In general, in the handling of almost any track material, the small monorail cars of the type generally known as "pony cars" are very useful. They will carry heavy loads, can be handled by one or two men, and may be quickly unloaded and lifted from the rail.

In handling bridge material, especially in maintenance work, the use of "pony cars" is advisable. This is especially true as regards timbers. Material is generally lifted or lowered into place by means of rope and tackle, and, provided these are of proper quality and the men using them are

sufficiently experienced, little or no improvement could be suggested. In placing bridge ties, however, the use of timber carriers of a two-man type is recommended as being safer and more expeditious than rope.

In loading heavy ties or timber of large dimension at storage yards, it is advisable to use flat cars or drop-end gondolas. This will avoid the lifting of the timber over the high sides of a car, if a crane or other device is not available. The storage yards themselves should be equipped with derricks or locomotive cranes. By concentrating storage at a few principal points, the use of such devices can generally be made an economic as well as a safe feature.

Handling Miscellaneous Materials

Heavy steel work and structural members are generally handled by cranes, derricks or travellers. On some smaller job, however, considerable manual handling is often done, but it is nearly always possible to obtain the use of a wrecking or other crane for such work. Plate girder or I-beam spans and slabs should be unloaded from cars in this manner and it is generally best to use a crane in placing them.

In erecting buildings, the foregoing remarks also apply to heavy timber and steel members. In handling brick, terra cotta, or similar material,

where the building is carried to a height of several stories, an elevator should be provided. This is better than having the material carried up ladders. On the ground, such material should be piled in a neat and stable manner, both as a measure of protection to the material itself and to prevent injuries to the workmen.

Of miscellaneous materials which require special caution, mention may be made of inflammable and explosive substances. Gasoline, oil, etc., should be kept for distribution at some central point in properly designed storehouses. Only comparatively small quantities should be kept at outlying points, and then only in an approved type of tank.

When the use of explosives is frequent enough to justify keeping a quantity on hand, a properly protected container should be provided at some isolated point. Under no circumstances should they be kept in section houses, freight houses, etc.

While the foregoing remarks are urged for the safe handling of track, bridge and building material, it is equally important to see that proper care is exercised in the handling of all material used in railroad operation. With that in view, all Safety rules outlining the manner in which the work should be performed must be enforced to protect employes against accidents.

Can an Auditing Department Clerk Boost Car Miles?

By G. Fred Miller

Secretary to Auditor Passenger Receipts

ALTHOUGH we folks of the Auditor Passenger Receipts office are not directly connected with the big movement of the railroad world today, *i. e.*, "Greater Car Miles

Per Day," nevertheless, being employes of the Baltimore and Ohio Railroad, we have a splendid opportunity to help this cause along in one or two ways:

First; in our railroad work we come in contact with persons from all branches of the service, including the departments primarily interested in the loading and unloading of freight cars, and it is quite an easy matter to endeavor to spread the feeling of good fellowship and loyalty among the other employes whom we meet. Being loyal necessarily means that the work will be the gainer through conscientious service on the part of the men; also in being loyal a man is usually happy, which naturally results in better work. Therefore, by talking loyalty among our fellow clerks we are in an indirect but resultful way helping to keep freight cars moving.

Second: it is our duty as part of the great Baltimore and Ohio family to boost the road in all respects and at all times. In traveling over the

THE MAN WITH THE MOST BRAINS DOES NOT ALWAYS GET THE MOST PAY
Student—Congratulations, Professor! I see you have at last bought a car.
Professor—Nonsense, my boy, I can't afford one; that car belongs to our new cook.

railroad this is made possible in our meeting with the traveling public.

Another splendid opportunity is afforded at our clubs and lodges. A word of praise is so much easier to give than the thrust in the back.

When we boost the Baltimore and Ohio we do so knowing we speak the truth, in regard to freight, passenger and dining car service. A salesman has no trouble in doing business on his second trip, if on his first trip he has sold articles which have proved to be just what he told the buyers. Therefore, we should feel very proud in boosting our road as second to none.

COURTESY also plays a great part in obtaining and holding railroad business. Men who make large shipments over railroads frequently are compelled to make personal trips in the interest of their business. These men pay special attention to the train service given them, the neatness of the cars and the train crews, the manner in which they are approached

by those in charge of the train, and the service they receive in the dining cars. There is no better way to win a man's heart and business, than by giving him a good meal—which gives a good opportunity to our dining car employees.

If a man is treated well on his first trip, he is bound to come back again, and there is no question but that he will ship his freight via the road he travels as a passenger. Furthermore, it is a surety that the passenger who receives good service will advertise the treatment he receives, in conversation with his friends.

Our office has always been among the leaders in contributions to the Red Cross, Salvation Army, Liberty Bonds, and other public spirited moves, and I am sure we are at all times doing what we can to instill the spirit of loyalty; to boost the Baltimore and Ohio whenever possible, and to be courteous and polite to the traveling public.

congestion of this division and it is probable that equal relief with continued steam engine operation could not be secured without the expenditure of a much larger sum for additional track facilities than would be needed to put electric locomotives upon the present tracks.—*Railway Age*.

From the Governor of West Virginia to the Baltimore and Ohio

IN THE August issue of the MAGAZINE, we published a letter from the Honorable William J. Sproul, Governor of the State of Pennsylvania, to our Passenger Department, commending the splendid service given him and his party on his trip to and from the National Republican Convention in Chicago in June. Now comes a gratifying communication from another governor, the Honorable John J. Cornwall, of West Virginia.

On August 12 Mr. Cornwall dined on a Baltimore and Ohio dining car, in charge of Steward Charles B. Kautz. After he had paid the check he wrote across the face of it:

"Good meal and service, fish excellent.

(Signed) JOHN J. CORNWALL,
Governor of West Virginia."

We thank the Governor for his courtesy and congratulate Steward Kautz on the compliment.

Economy of Electric Traction

A CAREFUL study of the seriously congested tracks of the Baltimore and Ohio, between Grafton and Cumberland, disclosed vitally interesting facts. Company coal movement in coal cars and engine tenders constituted over 11 per cent. of the total ton miles passing over the tracks. In other words, due to the very broken profile of this division, the equivalent of one train in every nine is required to haul the coal

burned on the engines. Taking advantage of this fact and the higher speed and hauling capacity of the electric locomotive and its freedom from delays due to taking on water and fuel, it is estimated that the three tracks now badly congested with present steam engine tonnage, could carry 80 per cent. more freight with electric locomotive operation. The coal output of the Fairmont district is largely restricted by the

The Baltimore and Ohio Line in Maryland and West Virginia

Assured that our readers will welcome advice and suggestions on the all-important problem of health preservation and life extension, based on the latest advances in medical science, it will be the purpose of this section of the MAGAZINE to present brief and instructive articles each month by members of the medical staff of the Relief Department. We know our efforts will appeal to our readers. If only a few profit by the advice offered, our contribution to the sum of human happiness will be considerable, and our service of value. The addition of one, five or fifteen years to a life is well worth the task.

Care of Our Eyes

By Dr. J. Gilbert Selby

Medical Examiner, Cumberland Md.

THE eye is a marvelous and delicate mechanism and is next in importance to the vital organs of the body. Many of us unwittingly abuse our eyes. The most common defects are known as near-sight, far-sight and astigmatism; these should receive prompt attention from an oculist.

Many defects may be cured by proper glasses, which train the eye back to normal. Cross-eyes may be benefited by a simple operation. Muscular defects often cause eye strain without our knowing what is wrong. Other eye troubles affect the lids, or first attack them and later impair vision. Proper and skillful professional treatment will usually cure these conditions, but cases complicated by infections may leave permanent scars.

There are so many kinds of eye troubles that all of them cannot be discussed here, nor can we treat ourselves. It is as unwise to have glasses fitted by an optician as it is to go to a druggist for treatment in sickness. For persistent pain or discomfort in the eyes, a reliable oculist should be consulted, and if glasses are required he will prescribe or order them for you.

An optician is one who, without preliminary medical instruction, has acquired some knowledge regarding the application of glasses to correct defective vision. An oculist, however, is a licensed physician, whose knowledge of the human body, and particularly the eye, enables him to determine whether the defective vision is due to eye disease or underlying physical ailments, or simply to improper formation of the eyeball.

The optician has no means of determining the presence of disease as an underlying cause, and while even in some of these cases vision may be slightly, but temporarily, improved by glasses fitted by an optician, the

disease itself is neglected and vision may eventually be entirely lost. The optician should simply furnish glasses prescribed by an oculist after a careful examination.

Although we cannot treat ourselves, we may easily avoid preventable eye trouble.

1. When using the eyes for close work, such as reading, writing and sewing, be sure to have a good clear light, preferably from above, behind and over the right shoulder.

2. Do not hold the book or work closer than 12 inches from the eyes.

3. Do not use the eyes continuously without an occasional rest, such as closing them, or by looking away from the book or work for a few moments. This should be done at least every hour while engaged upon delicate work or reading fine print.

4. Do not use your eyes constantly in an unsteady or flickering light.

5. Always wear goggles when compelled to work where flying particles may injure the eyes.

Relief Department—Advisory Committee

Conducting Transportation Department

L. W. GRAHAM	Operator	Kanawha Station, W. Va.
J. H. COULBOURN	Passenger Baggage man	Philadelphia, Pa.
GEORGE G. JAMES	Conductor	Baltimore, Md.
JOHN F. WUNNER	Clerk	New York, N. Y.

Motive Power Department

F. A. TAYLOR	Master Carpenter	Cumberland, Md.
HENRY F. EGGERT	Track Foreman	Pleasant Plain, Ohio

Statement of Pension Feature

Employees who have been honorably retired during the month of August, 1920, and to whom pensions have been granted:

Name	Last Occupation	Department	Division	Years of Service
Fitzgerald, Thomas	Laborer	Motive Power	Baltimore	40
Gather, Frank	Moulder	Motive Power	Mt. Clare	48
Jackson, Edward H.	Crossing Watchman	Maintenance of Way	Philadelphia	34
Lewis, Emma M.	Agent	Cond'g Transportat'n	Baltimore	22
Litchfield, Israel F.	Machine Operator	Motive Power	Baltimore	47
Lord, William H.	Conductor	Cond'g Transportat'n	Newark	43
McCahey, Patrick	Clerk	Traffic	Toledo	54
McCarthy, Dennis J.	Foreman	Maintenance of Way	B. & O. C. T.	45
Mullen, John	Engineer	Cond'g Transportat'n	Cumberland	41
Norris, James	Car Oiler	Motive Power	Newark	26
Shafer, Jacob	Trackman	Maintenance of Way	Newark	39

The payments to pensioned employees constitute a special roll contributed by the Company.

During the calendar year 1919, \$333,807.10 was paid out through the Pension Feature to those who have been honorably retired.

The total payments since the inauguration of the Pension Feature on October 1, 1884, to April 30, 1920, amount to \$4,032,546.35.

The following pensioned employees, after serving the Company faithfully for a number of years, have died:

Name	Last Occupation	Department	Division	Date of Death	Years of Service
Ferebee, Albert E.	Cr. Watchman	C. T.	Philadelphia	August 2, 1920	29
Johnston, John	Laborer	C. T.	Philadelphia	August 26, 1920	25
Longshore, Henry C.	Engineman	C. T.	Newark	August 19, 1920	44
Stine, William	Machinist	M. P.	Baltimore	August 7, 1920	44

6. Wear amber colored glasses or an eye shade whenever work is done under a very brilliant light.

7. Avoid the common towel, other people's handkerchiefs, or rubbing the eyes with dirty hands. Contagious eye disease is communicated in this way.

We speak of anything that enters the eye as a foreign body. Many of these are wiped away by winking and carried out by the profuse watering of the eye if they are not imbedded in the eyeball or under the lids. When these particles are not too firmly fixed in the eye, they may often be removed by a bit of absorbent cotton wound about a toothpick; this is dipped in cold water to make the cool, moist cotton less irritating as it is passed over the eyeball.

When particles cannot be easily removed in this manner an oculist must be consulted, as these injuries cause abrasions and ulcers, which may be followed by infection leading to partial or complete blindness.

The usual location of particles that are freely movable is just back of the inside margin of the lid; or, if fixed or imbedded, on the cornea or central part of the eye. When lodged beneath the lower lid they cause little discomfort; but those under the upper lid are extremely painful and the discomfort is increased by every movement of the eye.

Foreign bodies imbedded in the cornea often cause little discomfort at first, but after several hours the eye becomes very painful, and the pain is greatly increased by exposure

to strong light. There will be a red ring around the cornea, with increased watering of the eye. The sensation that a foreign body is still in the eye sometimes persists after its removal; this is due to the irritation it aroused, and it will eventually subside.

Under certain conditions, a particle may remain in the eye for a long time without giving trouble, but this is unusual.

The practice of placing flaxseed or similar particles in the eye, for the purpose of pushing out or removing a foreign body, is bad; it is not only ineffective, but frequently increases the irritation.

Overheard at the Medical Quiz

Prof. Sapio: Dr. Wright, is pain in the back usually an indication of kidney trouble?

Dr. Wright: No more so than a simple headache is indicative of brain trouble. As a matter of fact, pain in the back is seldom experienced even in serious kidney diseases.

Prof. S.: What, then, causes this symptom?

Dr. W.: It is usually due to an inflamed or rheumatic condition of the muscles, which is termed myalgia of the lumbar muscles, or lumbago.

Prof. S.: What are the best means to treat lumbago?

Dr. W.: Hot applications, massage and rest should relieve the trouble in a few days.

Prof. S.: Very good, but should the symptom persist, a physician should be consulted.

Twenty-ninth Meeting of the Baltimore and Ohio Association of Railway Surgeons—Baltimore, Md., September 7, 8 and 9

THE four elements of representative attendance, social intercourse, professional interest, and educational exchange of ideas were so well united at the Twenty-ninth Annual Meeting of the Baltimore and Ohio Association of Railway Surgeons, held at Baltimore on September 7, 8, and 9, that this convention must in all ways be classed as the most interesting, successful and helpful gathering ever held by the Association.

One hundred and eighty-five surgeons registered at the official headquarters at the Southern Hotel. Including the families of the members, the registration totaled 354 persons.

The opening session was on Tuesday, September 7, at 9.30 a. m., and embraced the following:

Address of Welcome on behalf of the City of Baltimore.

Hon. W. F. Broening, Mayor of the City of Baltimore.

Address of Welcome on behalf of the Medical Profession of the City of Baltimore.

Dr. Frank S. Lynn, Secretary of the Baltimore City Medical Society.

Address of Welcome on behalf of the Baltimore and Ohio Railroad Company. George M. Shriver, Senior Vice-President.

Response—

Dr. W. F. Morrison, Philadelphia, Pa., President of The Baltimore and Ohio Association of Railway Surgeons.

Introductory Remarks—

W. J. Dudley, Superintendent Relief Department.

Dr. E. V. Millholland, Medical and Surgical Director.

Dr. Page Edmunds, Consulting and General Surgeon.

The medical and surgical profession must keep pace with all discoveries in medical science and new methods in surgery. It cannot afford to stand still or to retrogress. The opportunity offered to present new ideas, and new methods which have proved their value, was not neglected by the members and a working program was quickly arranged.

The following papers were presented by specialists in their respective lines and these treatises were of unusual merit and of great educational benefit to all who heard them.

Minor Injuries: Their Care and Their Dangers.

Dr. Joseph A. Hall, Consulting Surgeon, Cincinnati, Ohio.

Focal Infection as a Factor Among the Injured.

Dr. N. R. Eastman, Mt. Vernon, Ohio.

The Medical Aspect of Industrial Surgery.

Dr. G. Carroll Lockhard, Medical Consultant, Baltimore, Md.

The Effects of Solutions on Wounds.

Dr. Walter R. Griess, Consulting Surgeon, Cincinnati, Ohio.

Report of Cases and Results.

Dr. Page Edmunds, Consulting and General Surgeon, Baltimore, Md.

Some Remarks on Industrial Eye Surgery.

Dr. E. A. Looper, Oculist, Baltimore, Md.

Congenital Hypertrophic Stenosis of the Pylorus.

Dr. A. C. Harrison, Consulting Surgeon, Baltimore, Md.

Diagnosis and Treatment of Bladder and Kidney Diseases in Elderly Men.

Dr. V. P. Lespinasse, Chicago, Ill.

The Pelvic Appendix.

Dr. Robert J. Reed, Wheeling, W. Va.

A Consideration of Some Real and Imaginary Traumas of the Back and Spine.

Dr. C. R. Ogden, Clarksburg, W. Va.

Newer Methods of Anæsthesia and Their Values.

Dr. L. D. Norris, Fairmont, W. Va.

Diagnosis, Treatment and Prognosis of Nerve Injuries to the Extremities.

Dr. C. R. G. Forrester, Consulting Surgeon, Chicago, Ill.

Injuries to the Peripheral Nerves and Their Treatment.

Dr. Irving J. Spear, Neurologist, Baltimore, Md.

Dislocation of the Semilunar Bone—Report of a Case in which Reduction was Successful.

Dr. W. W. Golden, Elkins, W. Va.

Fractures.

Dr. Oliver S. Steiner, Lima, Ohio.

It was regretted that we were prevented from hearing papers prepared by the following surgeons because of their unavoidable absence:

Uveitis, Depending upon Focal Infection in the Appendix (read before the American Ophthalmological Society).

Dr. H. H. McGuire, Oculist, Winchester, Va.

The members of the Baltimore and Ohio Association of Railway Surgeons and their families

(On account of the shape of the picture it had to be cut in four sections. The lowest section is indistinct because of blemish in the original photograph supplied. Read left to right, down the page)

Fractures.

Dr. H. H. Hatfield, Huntington, W. Va.
Acute Intestinal Obstruction.

Dr. Harvey S. McKay, St. Louis, Mo.

The following officers were elected on Thursday, September 9:

Dr. E. B. Fittro, Salem, W. Va., President.

Dr. J. G. Shirer, Newark, Ohio, First Vice-President.

Dr. V. D. Lespinasse, Chicago, Ill., Second Vice-President.

C. E. Johnson, Baltimore, Md., Secretary-Treasurer. Re-elected.

After the election the convention adjourned, to meet in Baltimore in 1921.

The members of the Association and their visiting ladies were entertained in various ways by the railway management. They viewed the city and its suburban environment through the medium of sight-seeing automobile tours. The ladies attended the movies during the two days' sessions when the surgeons were involved in the details of business. All gathered at the Southern Hotel for the Reception and Entertainment, on the trip up the Chesapeake Bay and along the Sassafras-River; and at Carlin's Park on the evening of September 9.

The details of the Vaudeville Entertainment at the Southern Hotel on the night of September 7 were arranged by Joseph W. Swikert, of the Relief Department, and the success of that portion of the pleasure-seeking side of the convention was largely due to his ability as an organizer and stage manager; lastly, but not least, to his own part in the entertainment.

The trip up the Chesapeake Bay on September 8 on the steamer *Annapolis*, was enjoyed by all of the visitors. The bay and river scenery was a revelation to some of our visitors from interior points. The buffet supper on the steamer was delicious. Foods to be served hot were piping hot and the ices were firm and of proper frigidity. Who was responsible? Why, John J. Bopp, of the Baltimore and Ohio Central Building Dining Room. Just another one of his successes, that's all.

Good-byes were said on Thursday evening when the visitors claimed their Pullman reservations, feeling and saying that Baltimore still held its laurels for hospitality.

Just a word, and we would like to make it a big one, for Miss Helen Bourne, the tactful and gracious social secretary at the Registration office. During the sessions and during the entertainments she tried to make everyone feel at home, and succeeded.

These were the committees which lasted to the finish and put the convention through:

COMMITTEE ON ARRANGEMENTS

Dr. E. H. Mathers,
Chairman.....Baltimore, Md.
Dr. Page Edmunds.....Baltimore, Md.
Dr. R. W. Locher.....Baltimore, Md.
Dr. J. A. Robb.....Baltimore, Md.
Dr. Frank S. Lynn.....Baltimore, Md.
Dr. R. D. Sykes.....Baltimore, Md.

EXECUTIVE COMMITTEE

Dr. H. S. Hedges, Chair-
man.....Brunswick, Md.
Dr. H. B. Anderson.....Newark, Ohio.
Dr. J. N. Sprowls.....Claysville, Pa.
Dr. J. W. McDonald.....Fairmont, W. Va.
Dr. E. S. Montgomery.....Pittsburgh, Pa.
Dr. J. S. Hull.....Hicksville, Ohio.

COMMITTEE ON RESOLUTIONS

Dr. C. W. Pence, Chair-
man.....Philadelphia, Pa.
Dr. W. M. Nihiser.....Hagerstown, Md.
Dr. L. M. Allen.....Philadelphia, Pa.

COMMITTEE ON TRANSPORTATION

C. E. Johnson, Chair-
man.....Baltimore, Md.
Dr. N. R. Eastman.....Mt. Vernon, Ohio.
Dr. D. J. Price.....Newark, Ohio.

COMMITTEE ON NECROLOGY

Dr. J. L. Cochran, Chair-
man.....Connellsville, Pa.
Dr. J. M. Spear.....Cumberland, Md.
Dr. M. F. Daubenheyer.....Butlerville, Ind.

Celebrating the 300th Anniversary of America's Origin

THE year 1920 is doubly significant, historically. It marks the 300th anniversary of two important events which led to the founding of the Republic of the United States of America. One is the signing of the *Mayflower Compact* and the landing of the *Pilgrims*; and the other is the meeting of the first *American Legislative Assembly*.

On November 11, 1620, in the cabin of the *Mayflower*, a tiny bark lying off the Massachusetts coast, a little band of liberty-loving men, from "Brittania," entered into what history has styled the *Mayflower Compact*. This agreement bound the 41 adult males in the ship's company into a civil body politic for the better ordering, preserving, and furthering of their mutual ends. And it provided for such just and equal laws and offices as should be necessary for the general good of the colony.

Ten days later, so records Dr. Charles W. Eliot's inscription on the Pilgrim Memorial Monument at Provincetown, Mass., "the *Mayflower*, carrying 102 passengers, men, women and children, cast anchor in this harbor 67 days from Plymouth, England.

"This body politic, established and maintained on this bleak and barren edge of a vast wilderness, a state without a king or a noble, a church without a bishop or a priest, a democratic commonwealth, the members of which were straitly tied to all care of each other's good, and of the whole by everyone.

"With long-suffering devotion and sober resolution they illustrated for the first time in history the principles of civil and religious liberty and the practice of a genuine democracy."

Meantime, uninformed of the Pilgrims, fellow-colonists of Captain John Smith had met at "James City" (Jamestown), Virginia, for the first

American Legislative Assembly. On July 30, 1619, they had thus broken ground for the foundation of the present democratic form of government in the United States.

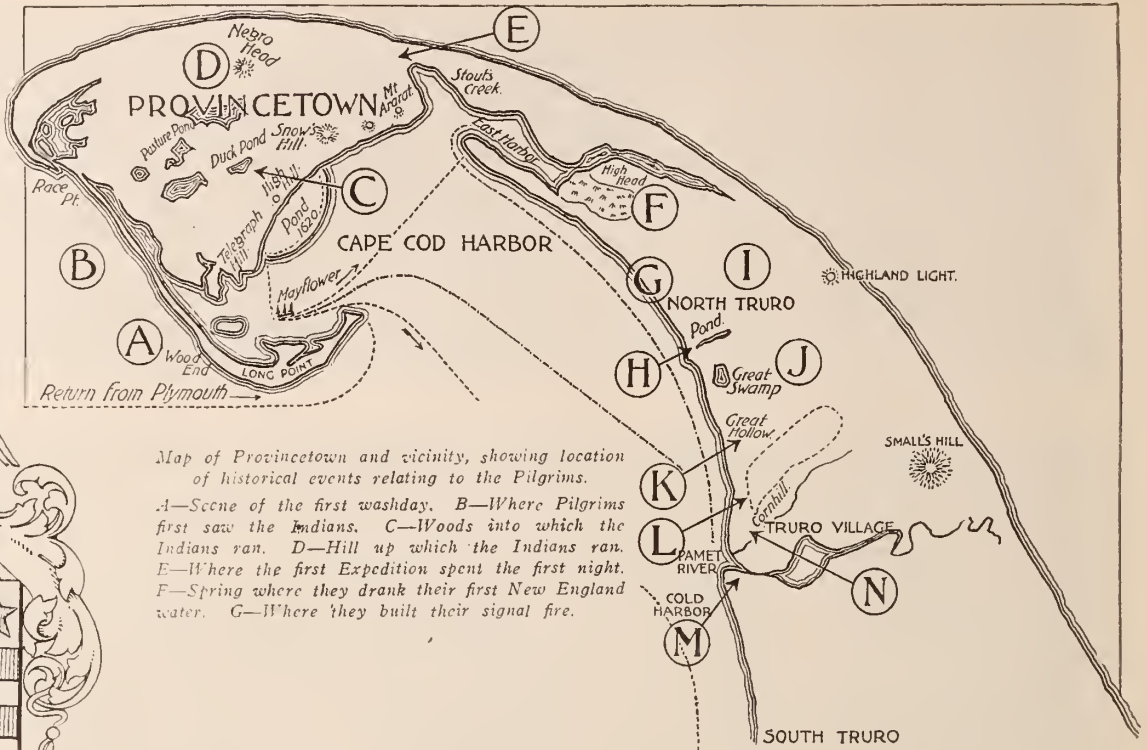

This year (in 1920) these events are being commemorated in the United States, in England and in Holland. In August, the origin of the Pilgrim movement was celebrated in England. And early in September, meetings were held in Holland in memory of the Pilgrims' sojourn in that country.

In September, a "*second Mayflower*" set sail from Southampton, England, to follow to the American shore the path taken by the original *Mayflower*. (But this second *Mayflower* is modern, and therefore much more seaworthy than her smaller predecessor.)

This boat, carrying many prominent people of England, Holland and the United States, will anchor in Provincetown Harbor. Its arrival will perhaps mark the crowning dramatic episode of the entire Tercentenary celebration.

These events are not being celebrated in the United States by the citizens of Massachusetts and Virginia alone. Nor solely by the New England and South Atlantic States. Communities throughout America are taking this opportunity to review the "foundation upon which the United States rests,"—and to reemphasize those principles which these ancestors established—and which their sons, their followers, and their followers' sons have handed down to us through our form of representative government.

The pictures on the two following pages will recall some of the more notable circumstances connected with these two historic events. The landing of the Pilgrims on the shores of America was epoch-making in the history of civilization.

Map of Provincetown and vicinity, showing location of historical events relating to the Pilgrims.

A—Scene of the first washday. B—Where Pilgrims first saw the Indians. C—Woods into which the Indians ran. D—Hill up which the Indians ran. E—Where the first Expedition spent the first night. F—Spring where they drank their first New England water. G—Where they built their signal fire.

The Washington Arms and Crest from Herald College, London,—reputed to be the original from which the American Flag was patterned.

Two views of the impressive bronze statue of Captain John Smith, which stands on the Jamestown Island shore, overlooking the broad expanse of the James River. The stories of the doughty Captain's adventures and his thrilling rescue from the Indians by the Princess Pocohantas have endeared him to all students of early American history.

H—Where the second night was spent. L—Deer trap in which Bradford was caught. J—Here they found "plaine ground fit for the plow." K—First mound opened, which proved to be a grave. L—Where they dug up corn and found a kettle. M—Where they saw two canoes and where the second Expedition landed. N—Where they found an old palisade.

The Pilgrim Memorial Monument in Provincetown, erected in honor of the little band of liberty-lovers, who, to quote from Dr. Charles W. Eliot's inscription on the monument, "with long-suffering devotion and sober resolution illustrated for the first time in history the principles of civil and religious liberty and the practice of a genuine democracy."

The picturesque ruins of the old Jamestown Church Tower before the restoration of the body of the church. In restoring the building, the Tower has been left undisturbed and appears just as in the picture.

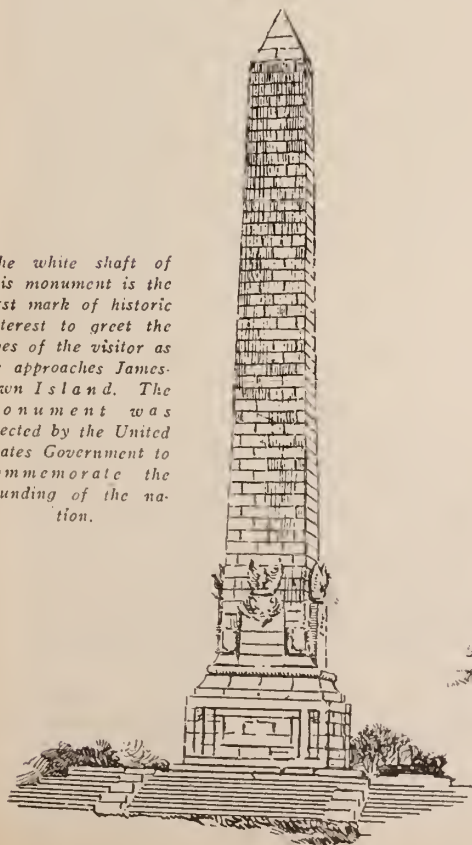

THE MAYFLOWER

In September a "second Mayflower" set sail from Southampton, Eng., to follow to the American shore the path taken by the original,—but this second Mayflower is more modern and much more seaworthy than her smaller predecessor.

The grave of Myles Standish in Duxbury, Mass.

The white shaft of this monument is the first mark of historic interest to greet the eyes of the visitor as he approaches Jamestown Island. The monument was erected by the United States Government to commemorate the founding of the nation.

One of the landmarks in Kingston, Mass., just out of Plymouth, is the Bradford House, built by the famous Bradford family in 1675.

Bring Your Lunch

Employees of the Railroad working in the general office building in Baltimore are fortunate in getting the quick, cheap, clean, good food and service given in the restaurant maintained by the Company. These employees are, however, but a fraction of the others in cities all over the System who have no such facilities, and have to bring or buy their lunches.

About two months ago the writer found that his lunches were costing him from 75 cents to \$1.00 a day—much more than he could afford. So he started to bring his lunch and is now a confirmed carrier of the little brown package from the home to the office each morning.

A quart of milk is left each day by a dairyman. A supply of a half dozen packages of graham or soda crackers is kept on hand, while an occasional glass of jelly, brought from home, provides the sweet required with the noon bite. These things, with a sandwich or two and an occasional bit of fruit, cost not more than 35 or 40 cents per day and are of much better quality than restaurant food at double the price.

The pennies saved each day are going into a Liberty Bond. You can figure what a nice little investment this will mean at the close of the year, not only as to finances, but also as to the condition of the inner man.

In the Women's department of this issue, a comprehensive article on this subject is written. It gives the food values of numerous articles and a sample menu for a period of six days. Read it and join the army of those who are beating the restaurant game and saving money and health.

Get-Together Clubs

A lot of fun is to be had out of get-together clubs, of one sort or another, all over the System. On the Railroad we cannot have a single club for athletic and social purposes, such as an organization whose plant and office are in one locality, can. There the personal contact, the closer supervision, the better opportunity for disseminating information, are possible. With us it is up to individual initiative in the various departments on the divisions all along the 5,100 odd miles of road.

Among the organizations which have meant a good deal of pleasure and profit to their members during the last five years on the Baltimore and Ohio, which the writer recalls, are the following: musical clubs—glee clubs for men's voices, opera and choral clubs for mixed voices, orchestras and bands; inter-departmental societies formed for social purposes only, such as dances, and entertainments largely given by the home talent; athletic associations, whose activities have run all the way from duckpins to football; traffic clubs organized

by live wires who felt the desirability of more scientific training in their line and got a number of employees in one department to form a class to take courses in traffic with correspondence schools; public speaking clubs designed to give men and women greater ability to express themselves.

During the existence of such organizations as the above on the System it has undoubtedly often occurred that a person who, in business hours, had gotten the reputation of being a perpetual grouch, has, through social contact, been found to be entirely likeable. Often first impressions are erroneous, and if, by virtue of a closer acquaintance through some social organization, we can straighten out a misinterpretation of the character of some fellow employe, our membership will have been worth while.

Ignorance, it is said, is the basis of misunderstanding, and, *per contra*, knowledge the foundation of progress and amity.

Let's get to know each other better through a larger social contact in such organizations as those we have mentioned. There is a lot of fun and profit in so doing.

Better Letters

From time to time brief articles have appeared in the MAGAZINE on the need of better letter writing on the Railroad. Our stilted phrases and awkward and wordy style are so much a matter of habit that we think they are all right when they are really far from the standard of good, forceful English.

On October 20, in Springfield, Mass., there will convene for a two days' session, the Better Letters Association. The name adequately describes the work of this group, who realize the deficiency of the general run of American business correspondence. Advertising writers, teachers in correspondence and business schools, college professors, publicists and statesmen, among others, will here get together and endeavor to improve our standard of business letters.

Because our letters pass muster with our correspondents, and our superiors apparently find them satisfactory, we proceed in the belief that they are good. Show some of your letters to a trained advertising man, however, or check them up against the model letters given in any of the considerable number of books written on "Better Letters," and you will find that what you thought were pretty good samples of business letters, do not by any means realize their greatest possibilities. It will pay most of us to get hold of a book on this subject and to make an intensive study of this important part of our work.

Everybody, by the way, is invited to this convention of the Better Letter Writers.

Car Mile Rhyme

Peter, Peter, pumpkin eater,
 Had a wife but couldn't keep her.
 She left and never said "good-bye;"
 But Pete was not a man to sigh,
 He drowned his troubles on the road,
 By giving each car a double load.
 In moving cars he won his fame,
 And straight back home his wifey came.

Faith

It is night. I am being whirled through space in a parlor car of the Pennsylvania Railroad at something like 50 miles an hour. The car is brilliantly lighted. Outside all is black. I do not know where we are, except

that this train—the Atlantic City Special, bound for the nation's capital—left Wilmington about 20 minutes ago and is somewhere between that place and Baltimore.

Across the aisle a boy of tender years is climbing up on his mother's lap, and the mother, with that light in her eyes which only mother-love can inspire, is patting his curly head. They do not think of danger. Neither do I. We have Faith. We have faith in the engineer. He is a competent man, or he wouldn't be in charge of this train with its several hundred human lives. He knows his engine, knows the roadway, knows all the possible things that could happen and is alert to avoid them. So we, knowing his hand is on the throttle, take it easy and think of things far removed from railway wrecks.

It seems to me that there is a lesson in this for you and for me, for every young man and every young woman in business—the lesson of Faith. It is not given to us to see very far into the future. For my part I do not want to know what is going to happen to me next week or next year. I am satisfied to keep plugging along—doing my little job from day to day as best I can—and trusting my fate to the Great Engineer, whose hand is on the throttle of your life and mine and the lives of countless other thousands.

The business man who has faith is not very likely to go wrong. He is going to conduct his business on a four-square basis; he is going to be upright in his dealings with his fellowmen; he is going to steer his ship of commerce through the troubled waters of misfortune, perhaps even adversity, with a serenity born of the consciousness that nothing can harm him permanently so long as he sees clearly and acts wisely. There will be many hands eager to retard his progress. Slander will raise its nasty head from many little by-ways along his path. Ill health may come; the loss of loved ones; the crippling of his finances; the striking down of his most cherished hopes; and yet—

And yet the man who has Faith—who believes that right is right and will triumph; who sticks to his principles and his ideals though the thunder of misunderstanding crash above him and the lightning of malice blind him now and then—that man will win all that is worth while in life. This I know. I have seen it work out in other lives. It is working out in mine. We who were on that train in the night had faith in the engineer, and we arrived at our destination safely. We who are all travelers on the greater and longer journey toward eternity, must have faith in the Great Engineer. We must know that, if we do our part, we shall arrive at the end of the road with shining eyes and happy hearts.—
JEROME P. FLEISHMAN in the *Baltimore Sun*.

When You Buy Your Winter Shoes, Remember This

When you buy your winter shoes, don't pay a fancy price in the belief that the recent increase in railroad rates has made it necessary. If your shoes happen to come from Boston to Baltimore the actual increased cost for the transportation is only a half a cent, with proportionate increases for greater distances. Most shippers were fair enough to support the railroads in their successful effort to have the rates raised and most of them will be fair enough to admit that the increased costs of transportation are so inconsiderable, certainly in so far as the ultimate costs to the consumer are concerned, as to make practically no difference in retail prices on almost all commodities. But this profiteering business seems to be a pretty elusive thing and little progress has been made in apprehending those who are responsible. As railroaders we do not want to have the buck passed to us, for we know that the transportation service that we are supplying is the most inconsiderable element in the ultimate cost of most things that the consumer buys.

How Many Can You Spell Correctly?

Way up in the Adirondack mountains there is a summer colony where, each year, college professors, authors, doctors and others of the genus "high-brow" get together for recreation, study, conference and writing. An officer of the Baltimore and Ohio visited the camp this year and one evening was invited to a gathering at the shack of the professor of history at one of the largest of the eastern universities.

Among the amusements was a spelling test. Each guest was given a sheet of paper and wrote his or her name at the top. The host then called out the words, slowly and distinctly, sufficient time being allowed after each for the contestants to write it out.

This is the best way to conduct the test, allowing about twenty seconds after each word. You can do it at lunch hour in the office, rest room, Y. M. C. A., or wherever you and a few others have a little leisure, or you can do it in your family circle. Or, should it be inconvenient to get a few people together, sit down yourself and write the words out as you think they should be spelled, and then find out from the dictionary how near you are right or how far wrong.

At the test above described no one got every word right. The railroad officer was high man with fourteen right, a professor of history was second with twelve right and the wife of the railroad man was third with ten right. The others got only from five to eight spelled right.

The MAGAZINE force got together on the test one day recently at noon with the following results: associate editor and secretary to the editor, each, eleven right; editor, ten right; chief multigraph operator, seven right; each of the other two multigraph operators, six right. Which proves that you don't have to be a good speller to be an editor.

The words are in more or less common usage, they are not trick words, but you will find mighty few people who can make one hundred per cent. on the test. In this list they have purposely been misspelled. Try your hand at it and then see Mr. Webster:

Car Mile Rhyme

Pussy cat, pussy cat, where have you been?
 "I've been down to Camden and guess what I've seen."
 Pussy cat, pussy cat, what saw you there?
 "A hundred fine freight cars, all loaded with care."

Baltimore Veterans Dedicate New Chapel for Their Meetings

ON MONDAY night, September 13, the Veterans of the Baltimore Division chapter dedicated their new home in Moose Hall, Baltimore City. This is located in a new building erected by the Loyal Order of Moose in Baltimore, and carries extensive privileges to the Veterans, notably that of using the magnificent assembly hall for their business meetings and also the large and attractive banquet hall upstairs for social gatherings and entertainments. The building is centrally located, the rooms are of large capacity and the Veterans should find this an ideal place for the further progress of their organization.

For the opening night and the dedication the company was unusually large, of course, and every available bit of space in the assembly room was occupied at 8.00 o'clock. From then until Vice-President Galloway arrived shortly afterward, the guests were entertained with selections by the Mount Clare Band.

The members of the Veterans decided to dispense with the regular business procedure and the President of the Chapter, George A. Bowers, opened the program by turning over the meeting to W. W. Wood, chief of welfare, as chairman.

After an appropriate story or two, Mr. Wood said that the whole history of mankind is one of slow and arduous progress. He recalled the great intellectual leaders of the past—Socrates, the greatest philosopher of the Greeks, who was forced by his persecutors to drink poison because of his advanced and at that time revolutionary ideas of man's relation to man; Jesus Christ, the incomparable philosopher, preacher and man, who brought the New Commandment "That Ye Love One Another" into the world and was sent to the cross because he preached it up and down the land. All other of the great intellectual and moral leaders in history, Mr. Wood related, have had to suffer the same discouragements and persecutions, and yet, despite this, progress continues and civilization marches on and upward.

Ignorance, he said, is at the bottom of

all the troubles of mankind, and if it were not for ignorance on the part of high and low, rich and poor, there would be a truer spirit of brotherhood and a finer standard of manhood.

He maintained that, after all, there was only one thing worth striving for in life and that the attainment of the finest manhood in every sense of the word. Then, turning to Mr. Galloway, as the speaker of the evening, he referred to the fact that so many of those present knew him intimately and for so long a time that he was sure they would agree with him when he introduced him by saying, "This is a man."

Mr. Galloway spoke in part as follows: "My friends, it gives me great pleasure to be here and welcome you to your new home. When the Veterans' committee requested the Railroad to arrange it so that they might use this as their meeting place for the coming year, it was a great satisfaction to me to approve the request, so that you might have this spacious, new and attractive meeting place, without cost to your organization, for at least the period of a year.

"The Baltimore and Ohio would like to provide a permanent home not only for this chapter, but also for other chapters on the Railroad. But you all know as well as I do that such an ambitious program is out of the question at this time because of the large expense involved. I want you to feel, however, that we are thinking of this and that it is not beyond the bounds of possibility for the future. It is eminently fitting that the Railroad should think of such a plan for men who have given so much in its service.

"There have been material changes in our status since I last talked to you. The wages of the transportation employees of the country have been increased by six hundred million dollars a year and the railroads have been granted a rate increase to help pay for their increased costs.

"Under the Transportation Act of 1920, which provides an effective and satisfactory way of adjusting the question of wages and

working conditions between the railroads and their employees, we should be able to maintain a thoroughly amicable understanding. There is more incentive to real cooperation than ever existed before. Not only cooperation by employees with the Railroad and *vice versa*, but also whole-hearted cooperation in giving the public good service. The public has to pay the railroad bill, and not only because we are employees of the Railroad, but also because we are part of the public, we should endeavor to render the most efficient service possible."

Mr. Galloway then spoke of the campaign for increasing car miles on the Railroad and showed what a large increase in capacity for transportation an average increase of one mile per car per day would provide.

"Is it unreasonable to ask all employees to join in a whole-hearted effort to get this and an even larger increase? I think you will agree with me that it is not, and that each of you will help bring this about by talking to other employees and urging them to help.

"You Veterans have an especially large opportunity along these lines. Your years of service, experience and judgment give weight to your words. All we are asking is a fair day's work for a fair day's pay and you yourselves can decide if we are getting this. Twenty years in one line of work shows that a man must have made good, must have liked his job. I wish that you could instill such ideas and principles as have made it possible for you to become veterans, among the balance of the rank and file, so that we can consolidate our Baltimore and Ohio family and make the Railroad a greater public service organization than it has ever been before.

"I understand that you are now planning the organization of junior chapters of men of five, ten and fifteen years' service. If you do this, it will bring into your membership almost 40 per cent. of all our employees, and I feel that this would be a fine stabilizing influence, making for a clearer and a more satisfactory understanding in our family. A railroad is only as good as the men who make it. But, if we can get all our men to stand back of the principles of fair dealing which you men stand for, we will have no cause for worry about our personnel.

"One other influence counts for much in our lives, that of the home, represented by the ladies here present and those of the other veterans' auxiliaries on the System. I am glad that the women folks are affiliated with you. The Railroad wishes to encourage their work as much as it possibly can.

"I am glad to be here, and to see you in your splendid new quarters. If it will give you as much pleasure to meet here as it did me to approve the plan for your securing this hall, you can look forward to a most enjoyable year."

Mr. Galloway then took his seat amid enthusiastic applause, but was again called on by President Bowers, who reminded him that he was to present the key to the hall to the Veterans' chapter.

Then, with a few additional appropriate remarks, Mr. Galloway presented the key, symbolic of the fraternity and sociability of the veterans' organizations and of the privilege to use their new quarters, to President Bowers. In accepting the key, Mr. Bowers said:

"Mr. Galloway: If you were tonight standing in a valley where the echo would come back to you, carrying with it the good things you have just said, I am sure you would be thrilled with the same inspiration we Veterans have tonight. No voice can do it justice, no pen can describe it, and I find it almost impossible to find words to tell you how happy you have made the Veterans and their wives tonight. Words such as you have spoken come only from the lips of such men as you, men of sterling character and sterling qualifications, and I am sure that tonight we have cemented the ties of friendship and loyalty between our organization and the officials of the Baltimore and Ohio Railroad as never before.

"We are very grateful for the kind consideration shown us and will be ever mindful of our future responsibilities. We want you to know and to understand that the army of well seasoned Veterans is with you, heart, soul and body, and that under the leadership of such men as we have today, we stand ready as we have always stood to give all that is in us, and will continue to obey the order to march forward for the welfare and progress of the good old Baltimore and Ohio.

"You have presented to me this beautiful key to our future home, which I gladly accept, and I believe if you should play a searchlight upon the hearts of these Veterans and their wives, you would see every heart beating with joy.

"I turn this key over to this organization. God forbid the time that it should ever be tainted with dishonor or covered with deceit. "Your home and my home, the home where we all can go, My home and your home, the gift of the good old B. & O."

Mr. Wood here read a letter from Senior Vice-President Shriver, expressing his regret at not being able to be present.

The addresses being over, the Veterans and their friends journeyed to the banquet hall on the second floor of the building to enjoy the entertainment and refreshments. The Baltimore and Ohio Band and the Baltimore City Quartet favored with selections; soprano solos by Mrs. W. L. Lynn were greatly enjoyed, as was the humorous recital by Mrs. G. A. Bowers, wife of the president of the chapter, entitled, "The Frenchman's Wild Ride on a Piano."

Ex-Senator D. E. Dick, fuel inspector on the Western District of the Railroad, also favored with recitations.

Jennie Smith Writes New Book

MISS JENNIE SMITH, the Railroad Evangelist, is well known to hundreds of Baltimore and Ohio men. She is still active in her evangelistic work and is having marked success not only among railroad employes but among others.

Her friends on the Railroad will remember that a number of years ago an effort was made through our MAGAZINE and through a number of other agencies to pay off the mortgage on her home. Unfortunately the attempt was not wholly successful and Miss Jennie is endeavoring to complete the mortgage payment by sale of her books, this being one of her few sources of

income, her religious work being done largely without remuneration.

The last book which she has written, "My Railroad Experience," is now ready for delivery and may be had by writing her at 319 E Street, N. E., Washington, D. C., and enclosing \$1.00. The book is well worth this small amount, especially to those who are familiar with the interesting and helpful work which Miss Jennie has done on the Railroad.

We are running this notice in the Veterans' Department in the belief that a good many Veterans will respond to this appeal, learn from the book of some of the recent work of Miss Jennie and, incidentally, help relieve the anxiety now attendant on her declining years.

"Uncle Dal" and "Uncle Joe"

D. CONNERS, pensioned trackman, age 70 years, often called "Uncle Dal," was one of the good and faithful trackmen of the old kind. He was always there with the goods. He has a good memory and it is interesting to hear him tell of the old times in and around Martinsburg Yard, about the track and the good old Irish that used to work with him in the days gone by. One of his buddies among those who collect at Joseph Pfarr's shoemaker shop is Joseph Pfarr, himself. "Uncle Joe" is a veteran car inspector, age 70 years. He never thinks of his age, but classes himself with the younger generation. He is now working at his trade, shoemaking, which he learned when a boy. It is in his shop on North Queen Street that you can find a bunch of old railroad veterans sitting around, swapping yarns, and at any time that anybody wishes to start an argument on railroading, just let him drop into Uncle "Joe's" shop and find this bunch.

Ninety-five Per Cent. of Ohio River Division Veterans Attend Their Annual Outing

AT SIX o'clock on the morning of September 12, the citizens of Parkersburg were aroused from their beds by the strains of music that floated upward from the street below. It was the Parkersburg Band on its way to the station to take the train to Huntington. Half an hour later found about 900 persons—veterans and their families—ready to take the same train.

"Here they come! Here they come!" shouted the little ones as two big engines, decorated to the queen's taste, and pulling a train of 15 coaches, came snorting along the platform of the station, then stood as patiently as a pair of old roans while everybody climbed aboard. Trainmen were all on the job, helping folks to get aboard, picking up the children, and arranging the lunch baskets, for this was a gala day—the day for the annual picnic of the Ohio River Division Veterans.

Through the mountainous country along the Ohio River, where they tell us the old story about the cows having short legs on one side in order to graze on the steep hill-sides, ran the Veterans' train. And everybody knew it was the Veterans' train, for wasn't there a big sign on the side of each coach that read, "BALTIMORE AND OHIO VETERANS"? On the right flowed

the muddy Ohio; muddy because of a heavy storm on the night before that had threatened to damage many of the beautiful fields of corn along its banks. Nowhere in the East does the corn attain as great a height nor tobacco grow more luxuriantly than in this valley. On the left rose the tall mountains, like giants in robes of green, with dark pockets in which to hide the naughty children.

Everywhere the train was hailed with cheers. Children and grown folks alike came out to see the gaily bedecked coaches and to hear the music with which the band saluted each village and almost every house. Children from cozy little cottages, children from mansions on the very tops of the hills, came out to wave their little hands; children, with ruddy cheeks and bare legs, from the cabins of their fathers, the typical mountaineers, stood at the doors and windows or along the roadsides to gaze at the spectacle in the silence characteristic of their kind.

On arriving at Camden Park, Huntington, the unloading began; in two minutes more, the coaches were as empty as last year's birds' nests. The photographer was ready and everybody smiled his or her prettiest smile and the big picture "was took." Then came the scrambling through the turnstile, where each one paid a penny admission. Then the lunch tables were arranged under the shady trees. No sooner were the boxes and baskets deposited upon them than the younger generations began to clamor for dinner. Who wouldn't, after having eaten breakfast at 5.00 a. m.? Of course, the older folks were not at all hungry, but they supposed that they would be able to *manage* to get away with a sandwich or two, since the *children* wanted to eat. (Ahem! We know all about it.) Everything eatable that you could imagine was spread out on those tables; there were so many good things that there was hardly room for the plates. And how they did eat! The real question was, who ate the most—the Veterans, their children, or their grandchildren.

There are 254 members of the Ohio River Veterans' Association, and 242 of these were present at the picnic. Had you seen them riding on the hula zula and chuting the chutes, you never would have guessed that any one of them had spent more than ten years in the service. "How do you Veterans keep so young?" we asked. "It's not work that kills a fellow," answered one, "it's either worry or sporting, and we don't have time to indulge in either." This seemed to be the prevailing spirit throughout the ranks of these men. Everybody seemed interested in his work. A group of men were standing around the drinking fountain, earnestly discussing some apparently vital topic—the presidential election,

I thought, or possibly suggestions for next year's picnic; but—and I crave their pardons for eaves-dropping as I put my drinking cup under the spout—what do you suppose it was? CAR MILES! Think of it! When men can talk about Car Miles at a picnic, you may be sure that they are interested in the standing of their division.

As soon as dinner was over, a selection by the band called the people to assemble before the large platform, where the speaking was to take place. Here J. W. Root, superintendent of the Ohio River Division, was chosen to be the master of ceremonies.

"Fellow employes, ladies, and children," said Mr. Root, "the duty has been delegated to me to read a letter to you." He then read a letter from our vice-president of Maintenance and Operation, Mr. Galloway, who expressed his sincere regrets at not being able to be present at the picnic.

"I want to congratulate the Ohio River Veterans," went on Mr. Root, "on the selection of a committee who were able to put over the excursion as they did. Knowing the conditions, I didn't think that they could get the train to handle the people at Parkersburg as they did—but they did it. They have handled the situation well.

"It is a great pleasure to me to join in this celebration, or picnic—" (here a long train of Chesapeake and Ohio cars went rumbling by).

"The C. & O. is trying to drown us out," shouted Mr. Root, "but they can't do it!" (Applause.) "However, the C. & O. must have heard our racket, for they have loaned us one of their men for the occasion. I take great pleasure in introducing Mr. J. L. Conner, of the Chesapeake and Ohio, and one of the political aspirants of this section. Mr. Conner."

Said Mr. Conner: "There ought to be, and there is, a good deal of friendship between the Baltimore and Ohio and the Chesapeake and Ohio; these roads are closely related. Had I known that the C. & O. would make such a racket, I would have had them stop it."

"There is nothing more important than associations to put over campaigns, and I am sure that the Veterans' Association is a big benefit to the Railroad. I am grateful for being asked to talk to honest and intelligent persons like you. It is my occupation to do nothing else but ride on a freight train, and occasionally on a pass, and I am glad to meet you." (Mr. Conner is a conductor of 16 years' service, and is Democratic candidate for Congress, Fourth West Virginia District.)

"We Huntington people hope that some day ours will be the greatest city in the greatest state, in the greatest country in the world. We have in Huntington a Chamber of Commerce, and everybody in Huntington is considered a booster. We hope to become better acquainted with the Baltimore and Ohio. Our two railroads need to work together. It takes railroad employes to make the right kind of a drive.

The Folks on the Opposite Page

1—A pair of Parkersburg peaches: Virginia, daughter of Engineer E. A. Augustine, and Evah, daughter of Arthur Sayre, bridge and building foreman. 2—A bouquet of Ohio River roses: Eleanor, Virginia and Catherine, daughters of Engineer O'Connor; Josephine and Eleanor, daughters of Engineer J. F. Taylor; Eleanor Roush, daughter of Car Repairer H. L. Roush. 3—Another posy from West Virginia: Ardiz, daughter of Engineer R. A. Wyatt, and Ruby Smith, his niece; Sarah Penn, daughter of Machinist W. C. Penn. 4—The biggest man at the picnic: John Landers, track supervisor. 5—A crew to be proud of: N. H. Bennett, conductor; G. B. Chambers, brakeman; H. H. Garrett, brakeman; J. F. Taylor, engineer; G. Free, fireman. 6—A young master mechanic, J. J. Hurlihy. 7—Two men who do their part in keeping the cars moving on the Ohio River Division: R. E. Barnhart, district freight agent, and Superintendent J. W. Root. 8—Some of those who furnished some of the good things to eat, left to right: (standing) Mrs. Arthur Sayre, wife of bridge and building foreman, and Mrs. J. F. Taylor, wife of engineer; (sitting) Mrs. E. A. Augustine, wife of passenger engineer; Mrs. H. L. Roush, wife of car repairer; Mrs. B. O'Connor, wife of engineer. 9—A railroad baby: Betty Anne Boyles, daughter of Engineer J. R. Boyles.

If you would succeed, get it into your head that some day you are going to be boss; tell your boss now that you are going to give him an honest day's work for an honest day's pay."

Mr. Conner concluded his address by reading the following:

The Man Who Wins

"The man who wins is the average man,
Not built on any particular plan;
Not blessed with any particular luck—
Just steady, and earnest, and full of pluck.

"When asked a question, he does not guess,
He knows the answer—no, or yes;
When set a task that the rest can't do,
He buckles down 'till he puts it through.

"So, he works and waits, 'till one fine day
There's a bigger job—with bigger pay,
While the men who shirked where'er they
could
Are bossed by the man whose work made
good.

"For the man who wins is the man who
works,
Who neither labor nor trouble shirks,
Who uses his hands, his head, his eyes—
The man who wins is the man who tries!"

Mr. Root then introduced G. W. Sturmer, grand president of the Veterans, who said, in part:

"To relieve man's mind he oftentimes seeks retirement in order to forget his trials. This is one of these days. We are here today as one family. We have come here to enjoy ourselves, to become better acquainted and to look into the future—and let me say that many of you *are* looking into the future—wondering how you are going to get benefits that will make your lives comfortable.

"Forty-three years ago I entered the Baltimore and Ohio, and I feel fully repaid because I have always been treated squarely. I look into your faces today, you Veterans, and I am proud of you, you who have made ours one of the greatest trunk lines, second to none in the United States.

"Most of you have heard of the first railroad in the United States—the horse car road from Baltimore to Ellicott City. When West Virginia celebrated its fiftieth anniversary we had the first horse car, the first engine and the latest type of Mallet. West Virginia is covered with iron and coal; West Virginia is producing more raw material than any other State in the Union. Who did it? You men, always ready to turn in and do your duty.

"What has the Baltimore and Ohio done to help its employes?

"First.—It has instituted a savings system whereby Baltimore and Ohio men can deposit their earnings and hold them for the future, or use them in building their own homes. We have over 70,000 employes, and many thousands of these own their own homes.

"Second.—The Baltimore and Ohio put the first Safety First movement into practical use.

"Third.—It has established the Welfare Department, which is going to look into the

educational facilities for your children. It is President Willard's desire that we look out for the aged. Our officers are all interested in this. The pension feature enables many to enjoy themselves now—and they have earned this enjoyment.

"Let us pull together and show results. When we clasp hands, let it be because we pull together, live together, and love together."

"Let's all stand while the band plays 'America,'" said Mr. Root, "after which we shall proceed to the baseball field."

The baseball game bade fair to be a thrilling victory for Parkersburg, for after five innings the score stood 8 for these boys and 2 for their opponents, the team from Apple Grove. However, it seemed as though the weather man must have been a rooter for Apple Grove, for at this juncture there

came a sweeping shower that sent everybody to seek shelter—the players included—and the game was over. Again the sun came out, but it was nearly time to go home. The crews donned their working clothes, the gaily decorated engines and train were brought up, and the Veterans and their families were on their way back to Parkersburg. But—strange to say—while we brought back those whom we took down, we left as many there at Huntington. You see, Huntington claims some of our Veterans, too!

NOTE—The accident which occurred as an unfortunate ending of such a happy day sent an undercurrent of sadness through the hearts of all who attended the picnic. The sympathy of all of the Veterans is extended to Brakeman L. N. Lang and his family.

Glancy's Smile Missed on the Toledo Division

By Charles Scott

Baggage-master, Toledo, Ohio

JOHN GLANCY was born in Licking County, near Newark, Ohio. At the age of eight he was left an orphan and came to live with a half brother at Columbus Grove, Ohio, in order that he might go to school. At this age, he was like all the rest of the young fellows—he loved to be around trains and cars. At every opportunity he would ride local freights, and it was not long before he was known by all of the train crews passing through Columbus Grove. They were glad to have him ride with them back and forth on the railroad, for they were using him to good advantage in handling freight and switching cars. He was too young to enter the train service at this time, but he was performing the same duties as the ordinary trainman.

One day while Glancy was riding on a local, a trainman named Hill was hurt at Ottawa, and the youngster was given an opportunity to fill the vacancy. He worked hard and his worth was recognized by conductor Marion on the opposite run, who promptly made an opening for him.

During those days of hand-brakes, pin and link couplers, frequent accidents opened up the way for quick advancement and thus afforded Glancy an opportunity to move along rapidly. Entering the service as brakeman for the C. H. & D. in 1869, he was soon a conductor, running the local between Lima and Toledo until he was promoted to passenger service February 12, 1877. Here he has been giving good service ever since, until now, when he has stepped aside from the busy whirl of the railroad game, and is located at Alhambra, Cal., where he has a cottage. The accompanying picture shows him at this home.

On May 17 last Mr. Glancy wrote the following letter to Trainmaster Havens:

ALHAMBRA, CAL.

C. W. HAVENS, Trainmaster,
Lima, Ohio.

Your letter of May 12 received today:

I was much pleased to hear from you. I am answering you right away so that you can go ahead and make your changes in men and set them all at rest as to what I am going to do. I am not coming back, for I have lost that confidence in myself to take the proper care of a train. Then, again, my health is poor and perhaps I would be off my train half the time, so what is the use?

But to step down and out just fills me up to overflowing; yet that time comes to all. I loved my work and from a little boy up to the time I got to be a brakeman it was my ambition to railroad. In my time on the old Dayton & Michigan Railroad I saw many changes in officials, but I got along nicely with all of them and have

Conductor John G. Glancy

always been treated nicely by them. I do not think I ever asked for anything but that I got it, for when a new official came, I always studied to please him and conform to his ideas, especially those with whom we came in contact every day, such as trainmasters and superintendents. The present official family is no exception, and right here, through you, I want to thank you and all others who have many times shown me courtesies. They will always make me feel that I am still one of you.

With best wishes for your success and happiness, I am

Yours truly,

(Signed) JOHN GLANCY,
Ex-Conductor.

Every employe who reads Mr. Glancy's letter will agree that it is a splendid proof of the ideal relation which can exist between

the Baltimore and Ohio and its employes. It is clear that it is with great difficulty and regret that he is forced to retire from railroad work.

Mr. Glancy has the highest regard of every man on the Toledo Division. He possesses one of the greatest gifts that a man could possess—that of being able to greet each man, woman and child with a pleasant smile at all times. At no time did any one notice Mr. Glancy out of humor while on or off duty, and every one of his fellow-workmen and officials extend to him, through our MAGAZINE, the hand of friendship, hoping that he will be permitted to live many, many more useful and happy years.

Are You a Member of the "Co-Op"?

C. O. Operation tells some of his personal experiences in reducing the cost of living by the methods he urges you to endorse by joining the Cooperative Store plan being organized by employes in Baltimore

WEBSTER says: "Cooperative means operating jointly to the same end."

This, in the case of the organization of our Cooperative Stores, means the reduction of H. C. L. You ask, "Can this be done?" I answer, "It can. I have proved it by personal experience."

Some years ago I lived in a section of Maryland where it was impossible to purchase a ton of coal; we lived far away from any city where a coal dealer was in existence. Some of us got busy to find a way to get it. In due time we secured subscribers for enough coal to fill a small sailing vessel, which would deliver the coal to the river wharf within hauling distance. We got our winter's supply of coal in this manner for each year thereafter, and when I last heard from that neighborhood, they were still getting it. Of course, at the time mentioned, the price of coal was reasonable, even for those days.

I kept a great deal of live stock on my place and I needed corn; I did not, however, care to pay the prices charged by the local dealers. Again the neighbors worked together until they effected a means to have the corn delivered by the carload at our station at a price which was 25 per cent. less than the local prices, and corn at least 25 per cent. better in quality.

When I heard about this Cooperative Stores idea, I was enthusiastically in favor of it. Though I am only a stockholder in it today, I am more enthusiastic about it than ever. If I can buy my household necessities at a fair price and of a known standard quality, I want to make use of this opportunity.

"It takes money to buy land," says the old proverb, and today it certainly takes money to buy groceries and dry goods for cash. There is no other way to obtain good goods at reasonable prices; therefore, before the store is opened, the cash must be on hand to stock its shelves.

How is the Cooperative Stores Association to get its capital? By our hearty cooperation; by each of us adding his little mite to the whole until we go over the top to the extent of \$15,000 or \$18,000, the amount required.

What are the inducements? These should be of interest to every employe, whether he wishes to buy from the Cooperative Stores or not.

1.—The Cooperative Stores Association guarantees interest of six per cent. annually on the amount invested, which must be between the minimum of \$30 and the maximum of \$500.

2.—The Cooperative Stores will offer only standard goods of known quality and no "bargains." The directors believe that cheapness in price and cheapness in quality go hand in hand; that the operating force will be so fully employed in handling good goods over the counters that they will have no time to bother with "come-backs" and exchanges. They want to perform their duties with the least expenditure of time and energy.

The location of the stores will be a matter of general agreement when the capital is at hand for stocking them. To those who, like myself, have paid in their contributions, I would earnestly ask for patience and boost for more members. Let us awake!

Go back a couple of years and think of the great Liberty Loan drives and the vast amounts subscribed for by the Baltimore and Ohio workers right here in Baltimore; then think about this little infant of \$15,000 or \$18,000, crying for more nourishment (cash) in order that it may get on its feet and walk.

We have not yet as many as 300 paid-up members, although, I am informed, there are over 600 workers who have pledged themselves to take stock in the Association. If we have 600 members at \$30 each, we should have the necessary funds to open the

stores. Six hundred, think of it! and we have, I suppose, within reach of Baltimore, more than 10,000 employes. With one member out of every six employes, we would have a thousand. Fellow workers, do not let this good work die, but come in and help the good cause along by soliciting members.

The Last One of John Brown's Prisoners

By Charles W. Hamilton

Wilmington MAGAZINE Correspondent

THOMAS ASTAULT, Hattown, W. Va., is the last surviving prisoner of John Brown's historical raid at Harper's Ferry. The writer had the pleasure of a visit from Mr. Astault recently, and was much interested in the stirring recital of the memorable incident told by this veteran of almost 80 years.

John Brown and his followers swooped down upon the home of Mr. Astault when he was a youth of seventeen. They had come from the hills in the direction of Charles-Town, halted in front of the home and demanded the instant surrender of the family, who had barricaded the door. Meeting with no response from within, John Brown and his men seized a number of logs which were lying nearby, smashed in the door, captured young Astault and his father, added them to a band of their neighbors already captured, and proceeded at a gallop over the road to Harper's Ferry, where the prisoners were confined in the historic old "Fire House."

Those who have seen the building recall that the doors through which the fire engine passes are built of heavy iron. John Brown's first attempt to batter down these doors was by means of sledges, which, however, failed to make any impression. A heavy ladder was found; the attacking forces lined themselves, one or two at each rung of the ladder, and, swaying back and forth with a mighty rhythm, forced open the iron doors.

Mr. Astault has seen his fellow prisoners of the raid pass to their final reward, taking with them the memory of the incident, but his mind is yet keenly alive to the national progress of the day as well as to the recollections of the past.

Twelve Things to Remember

By Marshall Field

The Value of Time.
The Success of Perseverance.
The Pleasure of Working.
The Dignity of Simplicity.
The Worth of Character.
The Power of Kindness.
The Influence of Example.
The Obligation of Duty.
The Wisdom of Economy.
The Virtue of Patience.

The Joy of Originating.

Women's Department

Edited by MARGARET TALBOTT STEVENS

October

*I have a little playmate, gay; her name you do not know,
She tells me tales of fairyland, where all the flowers grow.
She meets me in the Autumn-time and sings me songs of love,
And tells me how the brown nuts fall from branches high above.*

*She knows where all the chipmunks live and how the cattails grow,
Why the purple aster blooms and where the shadows go;
Where Jack Frost buys his magic paint and where the spider dwells,
How fairies play their woodland games and weave their mystic spells.*

*She calls the woodchuck and the hare, the dry leaves know her tread,
She laughs when e'er the raindrops warm come pattering on her head.
She flings her laughter in the air, the wood resounds in glee—
For 'tis my gay October who has come to play with me.*

A Chestnut Party for Hallowe'en

WHAT is Hallowe'en without a party? And here is a new one that you will enjoy. Perhaps you can get Grandpa to tell you how to play some of the old games that they used to play at the corn huskin' and the quilting parties. He will tell you, too, that the best place to hold a Hallowe'en party is in the kitchen.

The invitations and place cards are easily made. If you would like to copy those given on this page, get a sheet of thin, white cardboard, a sheet of carbon paper and a hard pencil. Trace these as you would an embroidery pattern. Remove the carbon and go over the designs in India ink or in water colors. If you haven't the time to copy them, you will find in the department stores assorted packages of little "stickers." Procure plain, white cards of the proper size, and with the stickers make your place cards. A row of tiny black cats across the top of the card, a moon on the left of another card, two witches glaring at each other, a girl and a candlestick, a jack-o'-lantern—any of these may be used to make attractive cards, and even decorations for the envelopes.

The invitation for the chestnut party requests that each person bring a card, which is enclosed with the invitation, on which must be written the oldest "chestnut" that you can remember. This is to be used as an admission ticket. At the door these are

collected by a witch, who tears each ticket in half, giving one half to each person, being careful to give halves of the same ticket to a girl and boy, respectively. This, of course, will require only half the number of tickets; the other half to be laid aside to be used later.

The decorations may be very simple; if the hostess lives in the country, so much the better. On the porch or at the entrance, a large corn-shock with several pumpkins lying around its base, with one large jack-o'-lantern fixed in its center. Strings of apples, real or paper, suspended from the chandelier and fastened with green or yellow crepe paper streamers at the corners of the room; several grinning jack-o'-lanterns peeping out from unexpected places—and you are ready. If you have a fire-place with a gas log, this adds to the effect.

Have the guests find their partners by matching the halves of the cards. Then, arrange the chairs in twos around the room. Provide each guest with ten chestnuts. Let each couple occupy a pair of chairs, then announce that they will play the game of "Old Gray Horse." This game must be nearly a thousand years old. It is played as follows:

One person of each couple puts his hands behind him, takes in his right hand a number of chestnuts, holds it out, fist closed, before his partner and says, "Old gray horse."

"I'll ride him," says his partner.

"How many miles?"

"Three" (or any number she may guess).

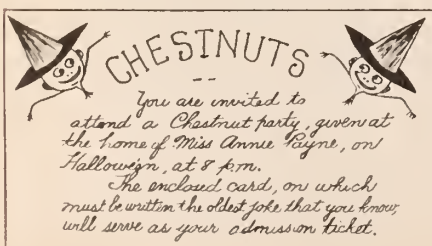

He opens his hand. If there are three, she gets them and it is her turn; if there are five, she must give him three, if there is only one, she must give him two to make three and he has another turn.

At the end of five minutes the boy, if the has any chestnuts left, proceeds to the next girl and the game is continued until the boy comes back to where he started. As soon as a person has lost his chestnuts, he must take his chair and move to the center of the room where he will soon be joined by others. This group in the center may "borrow" five or ten chestnuts from the hostess and continue the game among themselves. At the end of a time set by the hostess, a whistle is blown and the chestnuts are counted. The two persons having the largest number are presented with prizes, while the two of the group in the center of the room who have borrowed the heaviest and are the deepest in debt are given booby prizes. An appropriate booby prize is a baby doll, whose body is an ear of popcorn and whose head is a lemon; this is dressed in a gingham dress and bonnet.

The next on the program is to match up the rest of the "admission" cards. Any two alike must be cast aside. Judges are chosen from among those whose cards have been cast out to decide upon the best jokes that are left. The writers of these are also given prizes, while the writer of the stalest joke is given a booby prize.

By this time the guests will be ready for refreshments. The dining room may be decorated in keeping with the other rooms, but the greatest attraction will be the table. In the center is Cinderella, a doll about 12 or 14 inches high, dressed like a bride and sitting in her coach, which is made of a large pumpkin, hollowed out and shaped like an old English carriage. Before her sits a coachman, a small doll dressed in a black suit, who drives six mice. These mice are nothing more than thin sweet potatoes, about three or four inches long, with cloves for eyes, mounted on toothpick legs and harnessed to the coach with baby ribbons. The reins are also of ribbons. From the coach there is a ribbon that extends to the plate of each guest. At the end of each string within the coach is a doll, whose head is a chestnut and whose body is a small bag of chestnuts. These dolls are dressed in overalls and aprons of colored gingham.

Refreshments consist of pumpkin pie and cider, chestnut salad, roasted and boiled

chestnuts, sandwiches, fruit, nuts and ginger cookies. The ginger cookies are cut in the shape of a chestnut, the white part at the top of the chestnut being represented by a bit of white frosting.

The Business Girl's Lunch

HOW many of you girls have ever stopped to figure out the differences in the prices and quality of the lunches that you bring from home and of those that you buy at the nearest restaurant?

You have all heard the story about the human body being like a steam engine; coal provides the means of running a locomotive, and in the same manner, food provides the working material for the human organism. But, as all engines do not require the same amount of coal, but must be regulated according to their class and the work that they are supposed to do, so each individual requires a certain amount of a certain quality of food material according to his age and occupation.

For years, food experts have been measuring the amount of food necessary to an individual by a term known as "calories." All foods, if they are really *foods*, contain a certain number of calories, which show the amount of tissue-building material that they contain.

The clerk who sits at a desk all day requires a smaller number of food calories than does the farmer or the street laborer. Then, too, brain workers require different food from that of the muscle worker. Those who work in the open air require a little more food (measured in calories) than do those who are housed all day; those in the open air can digest the food more freely; the same amount would possibly cause the indoor worker to grow fat.

When we begin to discuss lunches, we must start with the breakfast. We have often seen the business girl rush into the office at the last minute and remark to her companion, "I haven't had a bite of breakfast yet; didn't have time to eat any!" If this girl would only realize the harm she is doing both to her body and brain by failing to eat breakfast, she would certainly make an effort to arise a little earlier in order to fit her stomach that it may act properly and thus keep the rest of her body in good condition.

Nine times out of ten, about the middle of the forenoon you will hear this same girl

say, "Oh, I have such a miserable headache. I get them so often and I really don't know why!" Then she doesn't know why she begins to make mistakes in her typewriting or in her figuring or in her copying.

Her chief knows, but he wisely shakes his head. "Can't do anything with them," he will tell you; "might as well leave them alone as try to argue with them."

The day of the pale, languid girl is past and gone. What we want now is the girl who can eat three good, square meals a day. I do not mean by this to say that she needs to eat a heavy breakfast; a heavy breakfast does not fit a girl, or anyone else, for work; yet she must eat enough to create an available amount of nervous energy. How much is that? Let us see.

Authorities have it that the clerk at the

Dear Women Readers:

Here beginneth the story of a pie.

One day in September as I was riding toward Cumberland on our train No. 15, I decided to try one of those special lunches that I have heard Mr. Haulenbeek and other folks rave about. And when I saw what was set before me, I knew why they raved; I've been raving ever since. It was certainly a fine lunch; when I had finished I had the feeling of satisfaction that a small boy has after a Sunday dinner. As I sat there I noticed several things, but the most important of all was the manner in which Steward Boylan treated his patrons. Nobody escaped his attention, and he saw to it that everybody was waited on as soon as possible.

"Did you enjoy your lunch?" he would say as each person left the table, and the smiles that were bestowed on him showed that the customer was satisfied. But, I started out to tell a pie story.

I had finished my lunch and was waiting for my bill, when the steward came forward.

"Wouldn't you enjoy a slice of peach pie?" he asked.

"I don't believe I have room for another mouthful," I answered, "but—oh, well, if it's peach pie—"

It was peach pie, and the finest peach pie that I ever tasted; and the crust—oh, my! And while I ate I wished that everybody could have a taste of it; I wished that I might manage in some way to sneak a whole pie out of the pantry and bring it home in my handbag; I wished, how I wished, and thought about every possible scheme—until, the thought suddenly came to me to ask for the recipe.

"Sure!" responded Mr. Boylan heartily. Just stop at the kitchen as you go by and ask the chef. He'll be glad to give it to you."

I stopped.

"I've certainly enjoyed your peach pie," I told the chef, "and I'd surely appreciate it if you'd let me have the recipe for the Woman's Department of our MAGAZINE."

"Why sure, lady," he said, as I got out my pencil, "but I can write it down better than I can tell it to you. Tell you what; you go ahead and I'll write it down and bring it in to you after awhile."

I thanked him and started out. At the kitchen door I met Joseph Reiser, inspector of dining cars. I told him my errand.

"Yes," he said, "everybody seems to like that pie. It all began this way. President Willard, Mr. Fries, and some others of our officers took a trip into the Potomac District and came across some fine peaches. They decided that these peaches would taste even better in pies, and, in order to give everybody a chance to try them, requested the Dining Car Department to purchase a big lot of them, make them into pies, and serve them on our dining cars. The result is, our chefs are now making a specialty of this peach pie."

He then showed me the instructions which ordered that "patrons receive generous slices."

Half an hour later, Steward Boylan came down the aisle and handed me the recipe for "Potomac Peach Pie." You will find this in the recipe column. Try it, and if you don't like it, you'll have to have an argument with me.

They told me that the next "very special" will be an apple pie, which they promise will run as a close second to, or even threaten to win out, over the peach pie. If this be true, then the very best wish that I have in my wishing box for you is that you're served with a generous helping of it.

Yours sincerely,

Margaret Talbot Stevens

Associate Editor.

desk requires between 2250 and 2800 calories per day. As an average, let us take about 2600. This will allow for 700 to 800 for breakfast, 800 to 900 for lunch, and 900 to 1100 for dinner, which is usually the heartiest meal of the business girl. Now for the lunch.

Can you forget that there is such a thing in the world as indigestion? If you can, you are a happy person. Can you during the lunch period forget the work and worries of the day? Then you need give little consideration to indigestion, for good humor is one of the greatest necessities to good digestion.

Let a number of healthy girls get together in a circle or around a table to eat lunch, and you may count on 99 per cent. to 100 per cent. good digestion, provided, of course, that they have only good, nourishing food. Highly seasoned foods and rich pastries should not be included in the lunch. Good home-made bread is far superior to baker's bread; moreover, by using home-made bread, enough money can be saved on the diet to pay for a sandwich filling; the amount of home-made bread will be less than the amount of the other for the reason that it contains the greater number of food calories per slice. A thermos bottle is a valuable addition to the lunch kit; you may have hot tea, hot soup, or cold milk. Salads can be carried very conveniently in the small jars in which salad dressings are sold, or in jelly glasses that have close-fitting tops.

Girls who live at home have a much better chance of getting nourishing food at reasonable cost than do those who board; then, too, many boarding houses do not furnish lunches. In this case, let the girls get together and decide on what each can bring. This will not only save the trouble of having to put up the lunch at home, but will insure a fresher lunch.

A loaf of bread, purchased at a nearby bakery in the morning and kept well wrapped, will make fresher and more palatable sandwiches at noon-time than if it had been cut in the morning, even though the sandwiches have been wrapped in waxed paper. Then, too, the filling will not have had the chance to soak into the bread; this is one of the objections to bringing sandwiches from home.

Let us take the menu as given below. Suppose there are five girls who wish to eat together. Let them decide on each day the menu for the next, or let each girl take her turn in working out a menu that will give the proper food values. Suppose two of the girls board and three of them live at home. Try this for lunch one day.

Let one girl who boards bring a loaf of bread, the other a head of lettuce. One of those who live at home can bring a small glass of jelly, another the dressing for the lettuce, and the third, 15 ginger cookies. Then they can "chip in" for the milk, which can be purchased, generally, direct from the milkman, who will bring it to the office.

Let us count up the cost of this menu for five persons. The prices given here were obtained from a Baltimore grocery store:

1 loaf bread (10 slices).....	\$0.10
1 head lettuce.....	.12
1 glass jelly.....	.20
Dressing for 1 head lettuce.....	.10
2½ pints milk.....	.25
Total cost.....	\$0.77

Dividing the total cost by five, we find that the cost to each girl would be a little less than 16 cents. If they wish to supplement this with fruit, the best plan is to buy the same kind of fruit for each person; this is not only practical, in that each may be satisfied that the cost to each is the same, but it is far less trouble to the purchaser to buy a large amount of one kind than to have to buy an apple for this one, a pear for that, etc. Moreover, the only economical way to purchase fruit for such use is by the half-dozen or dozen, by the pound or quarter-peck. The buyer should take care that the fruit is very fresh, in case it may be necessary to keep a part of it over for the next day. Adding 25 cents extra to the above menu for a pound of grapes, we have a total of \$1.02, or about 21 cents each. Where is the lunch room that will offer such an attractive proposition for 21 cents?

"Oh," you will say, "but the cost is greater to the girl who brought the jelly than to her who furnished the bread."

This is true, but tomorrow the girl who brought the bread may bring a quarter-pound of butter or a half-loaf of ginger bread.

Here are some menus for the other five days of the week. These are given as for one person; the number of calories reckoned accordingly.

TUESDAY

MENU FOR 1 PERSON—LUNCH	CALORIES	APPROXIMATE COST
2 slices home-made bread, spread with peanut butter	806	\$0.06
1 cup tea (with sugar and milk).....	70	.04
2 fruit crackers.....	62	.02
Totals.....	938	\$0.12
Extra fruit.....		.05
Total cost.....		\$0.17

WEDNESDAY

Lentil soup (1 cup).....	283	\$0.07
2 biscuits (buttered).....	213	.05
Junket.....	104	.05
Gingerbread (1 slice).....	281	.06
Totals.....	881	\$0.23

THURSDAY

2 baking powder biscuits, spread with date and prune jam.....	445	\$0.07
Rice pudding (1 cup).....	229	.08
1 glass milk.....	158	.05
Totals.....	832	\$0.20

FRIDAY

2 slices bread, spread with chopped egg.....	556	\$0.12
Lettuce salad (4 leaves and dressing).....	76	.05
Apple tapioca.....	235	.08
Totals.....	867	\$0.25

SATURDAY

Scotch barley soup (1 cup).....	134	\$0.07
2 slices bread and butter.....	460	.05
1 slice Dutch apple cake.....	296	.05
Totals.....	890	\$0.17

Compare any one of the above menus with that of the following restaurant lunch:

MENU	CALORIES	COST
1 chop.....	247.5	\$0.30
Totato salad.....	105	.20
Coffee (milk and sugar).....	70	.10
Totals.....	422.5	\$0.60

And this is a "very moderately-priced" lunch, with hardly half the food value as one of the above, and at nearly three times the cost of any one of them. Think it over.

Below are given the food value, in calories, of a few of the staple articles that may be used in preparing lunches. These are taken from Richards' "The Cost of Food—A Study in Diets," which may be obtained at the Pratt Library in Baltimore.

ARTICLE	CALORIES
1 slice home-made bread.....	202
2 meat balls.....	355
Peanut butter filling (for 2 slices bread).....	442
Milk, 1 glass.....	158
Prune jelly, 2 heaping tablespoons.....	442
Meat loaf, 1 slice.....	209
Junket, 1 cup.....	104
Cheese filling, for 2 slices of bread.....	504
Bread and butter, 1 slice.....	230
Sardine filling, for 2 slices bread.....	129
Egg filling, for 2 slices bread.....	152
2 frankfurters.....	361
6 ginger cookies.....	249
Milk and sugar, for cup of tea or coffee.....	70
Beef stew, 1 cup.....	691
Gingerbread, 1 slice.....	281
Lettuce and dressing, 4 leaves.....	76
Rice pudding, 2 heaping tablespoons.....	229
4 baking powder biscuits.....	313
Apple tapioca, 4 heaping tablespoons.....	235
10 small fruit cookies.....	309
Fudge, 2½ pieces.....	221
Plain cake, 1 slice.....	163
Cornstarch pudding, 2 heaping tablespoons.....	166
Rice, 1 cup, milk and sugar.....	250
Custard, 2 heaping tablespoons.....	181
Scalloped potatoes, 2 heaping tablespoons.....	242
Scotch barley soup, 1 cup.....	134
Lentil soup, 1 1/6 cup.....	283
Chocolate farina pudding.....	229
Sliced banana (½) with orange (1) and sugar (2 teaspoons).....	206
Cocoa, 1 cup.....	126
Dutch apple cake, 1 slice.....	296
Date and prune jam, 3 heaping tablespoons.....	288
Vegetable salad, 1 cup with boiled dressing.....	163

	CALORIES
1 slice bread, spread with prune jelly.....	422
1 slice bread, with lettuce and dressing.....	240
1 glass milk.....	158
3 ginger cookies.....	125
Total.....	945

Frocks That Should be Included in the Well-Dressed Wardrobe

By Maude Hall

THERE are a few models among the new season's fashions that no well-equipped wardrobe can afford to be without. Most of them are of the type that will do duty for many occasions, hence they are practical as well as stylish. New records for elegance and simplicity are established in the designs advocated by Paris, for in most instances the straight and slender silhouette is followed with unflinching fidelity. When the ruffled skirt is introduced, it is always in a way that is practical and generally becoming.

Since the chemise frock is one of the types that carry over from season to season, it is the one upon which the designers seem to ring in the greatest number of new ideas. The latest models feature solid front panels of black velvet or black satin, with the remainder of the dress fastening onto each side of the panel in visible or invisible effect. When such colors as the lavenders, browns and yellows which made summer so gay are employed, the black front gives just the sobering touch required and there is something about the aloofness of the arrangement that gives it distinction. Nowhere else will a touch of black be found, except in the girdle and then there must be a facing of silk or satin in the hue of the dress. Seldom do these dresses have any other trimming.

Panel effects are exceedingly popular, especially since there are so many new ways of adorning them. On every hand one sees the eyelet embroidery of which all the fashionable world is talking. Like the one-

piece frock this unusual form of decoration lends itself to such charming variety that the likelihood of its becoming monotonous and unpopular is exceedingly remote. One of milady's smartest Autumn frocks is fashioned of dark brown serge eyeletted in self-color silk. The embroidery appears at the lower edge of the gathered tunic and on the front of the waist and sleeves. At the waist the fulness is held in with a belt of brown satin lined with orange silk crepe de chine. Accompanying the dress is a small, close-fitting hat of brown velvet trimmed with orange and brown ribbon. The brim is faced with brown tulle, through which shirred orange tulle shows.

A frock with flounced skirt is developed in dark blue tricotine. The flounces are very scant to obviate fulness, the lower edges being trimmed with a border worked out in fine silk soutache braid. The top of the bibfront also features the braid trimming, while the collar is of filet lace mounted on satin.

Lovely in effect is a frock of black velvet and black and white check flannel. The lower part of the skirt is of the velveteen, the tunic and long waisted bodice being of the flannel. There is a string belt of black velvet ribbon with the reversed side in jade. In counting the season's most fashionable shades, jade must be given a conspicuous place. In the soft silks and satins it makes delightful dresses and blouses, while on thicker fabrics it appears in heavy silk embroidery.

Some of the great dressmakers do wonder-

ful things with the narrow loose panels which extend from hip to top of hem of skirt. They are outlined with narrow silk braid and sometimes are extended above the belt to form a bib-front on the waist. Seldom, however, is the bib applied in straight line. Either it is curved at the sides or divided at the front to form an inverted V or U. A little later in the season panels will be trimmed with narrow bands of fur. Although most of the shops are featuring fur sales, there is little in the announcements to give encouragement to the woman who has but a limited budget for dress. Her most practical resource is to furs of former seasons which have outgrown their usefulness and which can be cut into bits and applied here and there in original fashion. If a little embroidery is required to fill over a gaping void, do not hesitate to use it.

In the duvetyns and velours there are some exquisite shades of dark red which are made more beautiful by the addition of black embroidery. The handwork may be done in wool as well as in silk and hundreds of women have learned to make French knots since groups of these little points have proved so effective upon the front of a waist or about the lower edge of a skirt.

Potomac Peach Pie

Take seven large peaches sliced fine; mix with a little corn starch. Add half pound sugar, then mix all together.

Crust

2 cups flour.
 $\frac{1}{4}$ pound butter.
 $\frac{1}{4}$ pound lard.
 $\frac{1}{2}$ teaspoon baking powder.

Work well together, mix with a little ice water. Brush over top with a little egg and milk and bake in a moderate oven.

Another Woman on the Honor Roll

We call the attention of our readers to the name of Mrs. Clara Holt, the woman whose name is on the Honor Roll for this month. Mrs. H. It is an operator on the Indiana Division.

Home Dressmaker's Corner

Two-Piece Skirt with Plaited Sides Forming Slot-Seam Effect

THIS smart new skirt is designed to give width where width is most desired without changing the straight line effect so essential to modish appearance. It is suited to development in cotton gabardine, pique, taffeta, satin or, for use a little later, velvet. If 36-inch material is used, $2\frac{1}{2}$ yards will be required for medium size. There also will be required $\frac{3}{8}$ yard 2-inch belting for stay and $\frac{3}{8}$ yard 27-inch lining for the pockets.

In planning to cut the skirt, place the back and front gores of the skirt on the material so that the triple "TTT" perforations will rest along the lengthwise fold. The inserted side section and belt are laid along the selvage edge, with large "O" perforations on a lengthwise thread. Pin each section of the pattern to the material securely, then cut out, duplicating each notch in pattern and goods and indicating the different perforations.

Then take the gores and turn the side edges of front and back gores under on slot perforations. Lap on inserted side section to small "o" perforations with the notches and edges underneath even and stitch about $\frac{3}{8}$ inch from the folded edges, from the upper edge to the small "o" perforation in front gore. Leave the edges to the left of center-front free above the lower large "O" perforation in front gore and finish

for closing. Press plaits to position. Gather upper edge of back gore between "T" perforations. Adjust stay to position under-

neath skirt, closing at left side. Stitch upper edges of skirt and stay together.

Next, arrange one pocket section on front gore, matching small "o" perforations. Stitch straight across about $\frac{1}{8}$ inch each side of the line of small "o" perforations and then slash along the line of perforations. Draw the pocket through the slash to the inside of skirt and press. Stitch another pocket section to position underneath with edges even. Adjust belt to position with center-fronts and center-backs even and with upper edge of belt a little above the top of the skirt. If desired, the pockets may be piped with narrow silk braid.

Pictorial Review SKIRT No. 9020. Sizes, 24 to 34 inches waist. Price, 25 cents.

Pictorial Review Designs

GIRLS' GUIMPE DRESS No. 8745. Four sizes, 6 to 12 years. Size 8 requires 2 yards 36-inch material for dress, $1\frac{1}{8}$ yard 36-inch material for guimpe. Dress to be slipped on over the head. Price, 25 cents.

CHILD'S DRESS No. 8419. Four sizes, $\frac{1}{2}$ to 3 years. Size 2 requires $1\frac{1}{8}$ yard 36-inch material. Price, 20 cents.

GIRLS' GUIMPE DRESS No. 8861. Four sizes, 6 to 12 years. Size 8 requires $3\frac{1}{4}$ yards 36-inch material. Closed at back. Sleeveless waist with deep square neck in front. Two piece gathered skirt. Price, 25 cents.

DRESS No. 9079. Sizes 34 to 48 inches bust. Price 35 cents.

DRESS No. 9090. Sizes 34 to 48 inches bust. Price 35 cents.

COAT No. 9093. Sizes 34 to 44 inches bust. Price, 35 cents.

DRESS No. 9071. Sizes 34 to 44 inches bust. Price, 35 cents.

DRESS No. 9087. Sizes 34 to 50 inches bust. Price, 35 cents.

Safety Roll of Honor

Every man whose name is mentioned in this department for meritorious service has helped the Railroad increase car miles and decrease accidents. Every defect in equipment corrected, every accident prevented, every man-sized job here noted contributed directly and largely to the success of these big campaigns, to which we are all bending our energies

Staten Island Lines

On August 8 at 5.30 p. m., Maintainer Weber discovered loose wheel on coach 94 in Great Kills special. He notified trainmaster and car inspector and car was set out. Mr. Weber is commended.

Baltimore Division

On the night of July 30, Engineer W. H. Forebach, Cumberland Division, in going from the shop at Brunswick to the Y. M. C. A., discovered a piece of rail broken out at the cross-over switch on the Baltimore Division side between the shop and the central office. About the same time, Machinist Earl Cage, who had finished work at 11.00 p. m., also discovered this rail broken. Both of these men reported the matter to General Foreman Good. They have received commendatory notation on their records for observing and reporting this defective track condition.

On August 21 an extra freight train was pulling out of the Westbound Yard at Brunswick, en route to Cumberland Division. Machinist C. L. Russell and Helper L. W. Schnauffer, Roundhouse, noticed the brake beam dragging under Baltimore and Ohio car 137144. They had train stopped and car was set off. Both of these men have been commended for their close observation of passing equipment, which possibly averted a derailment.

Brakeman J. E. Canoles has received commendatory notation on his record for his observation of brake rigging down under wheels of car in train of engine 5058 on August 31. He flagged the train, which was backed in at Harvey, where the brake rigging was removed.

On August 7, Agent W. F. Matthews at Kensington observed broken brakehanger under Southern car 180335 in train of extra east, engine 4598. Train was stopped at Silver Spring and precautions taken to prevent hanger from dropping under car. Mr. Matthews has been commended.

Cumberland Division

While standing at Keyser station on August 14, as extra 4866, east, was leaving the yard, Telephone Maintainer Elliott observed tread of wheel broken under W.

M. car 53013, the sixth car from engine. He had train stopped and examination made, developing the necessity of setting out car for repairs. Mr. Elliott is commended.

The following defects and irregularities were noted by operators during the month of August and prompt action taken to correct:

NATURE OF OBSERVANCE	CASES
Wheels sliding.....	2
Brake rigging down.....	3
Broken rails.....	1
Broken wheels.....	1
Carrier plate down.....	1
Total.....	8

One car set out for repairs on above reports.

On August 14, while standing at Keyser Station as extra 4866, east, was leaving the yard, Telephone Maintainer Elliott observed tread of wheel broken under W. M. car 53013, the sixth car from engine. He had train stopped. Examination made developed the necessity of setting out car for repairs. Mr. Elliott is commended.

On the afternoon of June 20, C. E. Edwards, Paw Paw, W. Va., while walking along the track observed a large rock, which had rolled down the mountain side, lying on the high line track, about three-quarters of a mile above Paw Paw Station. He flagged train 34 and informed the conductor, who had Foreman Kaylor remove the obstruction. Inasmuch as Mr. Edwards is not an employe of the Company his interest in the matter was appreciated and he has been so informed by the superintendent.

Charleston Division

L. A. Rollyson, agent, Frametown, noticed brake rigging down on extra 2947, which was passing his station. He had train stopped, thereby averting a possible derailment. He has been commended for his interest.

Conductor B. R. Bragg found broken rail in Gassaway Yard, protected trains and had repairs made. He has been commended for his action.

The following employes have been commended for their good work during August:

Conductor D. Harmon—Clearing slide from main track, averting delay to trains. Conductor D. Harmon—Close observance. Reporting car improperly routed. Conductor P. J. Condry—Personally handling express, averting delay to trains. Fireman J. W. McTheny, Brakeman B. R. Matheny and Engineer D. Wilmoth—Assisting to clear slide from main track.

The following engineers' names appear on the fuel performance list for July as having made 100 per cent. or over. They are commended for their good work:

W. T. Spencer, F. Kerrigan, R. E. Smith, R. N. Jeffries, J. C. Jordan, A. Whitecotton, R. K. Ankrum, J. L. Davis, A. J. Lundsford, W. T. Powell, M. T. Hall, B. M. Shears, W. J. Johnson, P. W. Toms, G. E. Ramsburg, C. U. Skiles, J. H. Stalnaker, E. L. Jarrett, A. F. Vorholt, S. H. Haymond, C. A. Mullins, A. B. Nicholas.

Cincinnati Terminals

Safety Agent W. L. Allison on his return trip from Glendale was stopped at Woodlawn by Track Foreman John Reggello, who notified him that cut of cars on siding at Woodlawn had run down over derail at south end of siding, making close clearance on northbound main track at that point. The derailment was protected by flag until engine could be procured at Ivorydale and the cars pushed back into clear. Track Foreman Reggello has been commended for his action in reporting the derailment, so that the condition could be corrected in time to avert a possible accident.

New Castle Division

NEW CASTLE, PA., September 22, 1920.

Mr. C. A. DUVAL,
Chief of Employment Bureau.

Dear Sir—On September 17, about 5.45 p. m., while on a motor car trip on the west end of the New Castle Division, and while I was in "OD" Tower at Lodi, Extra Gang Foreman E. W. Foulk came into the tower and notified us that extra 4007, west, had in the train C. B. & Q. car 106661 with a hot box, flat spot on the wheel and a bent axle.

The train had passed "OD" and we were unable to stop them there, but a message was handed on to them at the next open telegraph office. The train was stopped and on investigation by the crew it was found that these facts were correct and the car was set off. I personally inspected the car the following morning and the car would not have run five miles further as the truck was about to collapse.

I desire in this way to commend Mr. Foulk for his action in this case, which undoubtedly avoided a serious accident.

Yours truly,

(Signed) D. F. STEVENS,
Superintendent.

On August 23, Conductor L. E. Hoffman, on extra 2731, en route to Cleveland, discovered a broken rail near the Erie overhead bridge at Kent, Ohio. Sectionmen were notified and repairs made promptly. This action is characteristic of Conductor Hoffman, who is unusually observant and displays keen interest in his work. A letter of commendation was issued by Superintendent Stevens and suitable entry made on Mr. Hoffman's record.

On August 28, S. A. Mitchell, of Hudson, Ohio, while crossing the tracks two miles east of Kent, Ohio, found crossing plank wedged across track where it had been forced by a passing train. Recognizing the danger involved in this situation, he ad-

justed the plank and notified the agent at Ravenna, so that permanent repairs could be made. Mr. Mitchell is not in the service of the Company, but his action in this connection is all the more commendable, indicating a keen appreciation of the importance of safe conditions along the railroad. An appropriate letter of thanks was forwarded to Mr. Mitchell by Superintendent Stevens.

Cleveland Division

CLEVELAND, OHIO, September 8, 1920.

MR. H. B. BIERIE,

Assistant Extra Gang Foreman,
Freeport, Ohio.

Dear Sir—It gives me great pleasure to commend you again on your watchfulness and prompt action in notifying conductor in charge of extra 4215, east, August 21, passing Freeport, after you noticed 36 inches of tread broken off rear wheel of head truck of G. T. 73359, containing iron ore. The conductor had car set off at east end of house track Freeport and thereby averted an accident. The interest that you are taking is appreciated and I hope that you will continue your good work.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

Chicago Division

On July 19, Section Foreman R. L. Curtis, from Section 28, discovered brake sticking and fire flying when No. 94 was passing his gang working on track. He immediately endeavored to flag train. The conductor on caboose seeing him, applied the air and stopped train. It was found on examination that the wheel was badly cracked and might have burst at any time. Mr. Curtis is commended for his watchfulness.

Fireman W. E. Getz, while on engine 4130, observed a brake beam down in his train at Postoria. It was removed by the crew, thus possibly averting a serious accident.

Ohio Division

On August 9, while working at Davis Switch, Lewis Meyers, trackman, discovered broken flange on Baltimore and Ohio 137311, loaded with coal. Operator at Oak Hill was notified and car was set off. Investigation developed that 12 inches of the flange was missing. Mr. Meyers is commended for his close observance and interest displayed.

Indiana Division

On September 1, when extra 2734, west, in charge of Conductor W. D. Cox, stopped at Watson to do work, Miss Clara Holt, operator, discovered brake beam down on D. T. & I. 7078. She immediately notified crew and brake beam was removed, thereby averting a derailment, as the wheel was backing up on the brake beam when the crew got to it. Miss Holt is commended for her close inspection.

On August 5, at Storrs, when extra 2685, west, was passing telegraph office at 8.23 p. m., D. T. Bellamy, operator, noticed brake beam and brake shoe dragging along rail under St. L. S. W. 40024, eighth car from caboose. He succeeded in communicating information to crew, train was stopped and defective parts removed.

The close attention of Operator Bellamy in inspecting train is commendable, and appropriate entry will be made on his service record.

Illinois Division

Fireman Phillippi a Life Saver

Fireman R. L. Phillippi, a fireman in every sense that the name implies, is to be highly commended from the fact that on two particular occasions within the last year he saved the life of one man and possibly more, together with averting damage to Company property.

Several months ago Phillippi was fireman on an official train eastbound, and while passing around a sharp left hand curve on a one per cent. grade the view was obstructed by bank. He noticed the heads of section men approaching on hand car, called to engineer, who immediately applied emergency brake, engine stopping with pilot about six feet beyond hand car where it had been taken off track. Had not Fireman Phillippi noticed hand car approaching car would have been demolished and possibly some of the men killed or injured.

A few days ago while train 68 was running 50 miles per hour between two cuts of cars, the engineer's attention was attracted to cross-over switches at extreme end of cars. Fireman Phillippi noticed a three-wheel car between cross-over switches and his engine,

called to engineer, who immediately applied the brakes and engine barely missed the three-wheel car, which was thrown off the track by the occupant. Had it not been for the watchfulness of Fireman Phillippi the car, in all probability, would have been demolished and the occupant possibly killed or injured.

Toledo Division

Commendatory entry has been placed on the record of Agent-Operator I. J. Fischer for his careful observance. On the morning of August 28, he discovered brake beam down, dragging on rail third car from engine on extra 4297, north. He gave the signal to the engineer, train was stopped and brake beam removed. He has been commended for possibly averting a serious accident.

H. C. South, section foreman, has been commended for his quick action and close observance. On August 11, at 7.10 a. m., extra 4557, north, had brake beam dragging on one end of car D. R. & U. 751, third from engine, when going through Cridersville. Mr. South detected this and notified the train crew; the train was stopped and the necessary repairs made.

Ohio River Division 3. Monongah Division 0

Legion Park, Grafton, August 25

On August 25, Grafton baseball fans witnessed the fastest and best played ball game of the season, between the Monongah and Ohio River Divisions. This was the last scheduled game for the Monongah Division to be played at Grafton. The Monongah Division won by a score of 3 to 0.

Shaffer, who started the game for the visiting team, was taken out of the pitcher's box in the first inning, after three runs had been scored on him. Mason, who succeeded him, held the Monongah Division to three hits during the remainder of the game. Burns pitched for the Monongah Division, allowing but four hits, not a man reaching

third after the first inning. His teammates played an air-tight game behind him.

Monongah Division—Huber, 3b; Van Horn, ss; Feeney, 1b; Ringler, lf; Hopke, rf; Fischer, 2b; Hankey, cf; Hoffman, c; Burns, p.

Parkersburg—Wayman, 3b; Fowler, rf; Hickman, 1b; Cook, c; Mason, cf, p; Cawell, lf; Hussion, ss; Hawkins, 2b; Winland, 2b; Shaffer, cf, p.

Score by Innings

	R	H	E
Parkersburg.....	0	0	0
Monongah Division....	3	0	0

Summary

Base on balls—off Mason, 1; off Burns, 1. Two-base hits—Fowler, Hickman. Three-base hits—Ringler, Hopke. Sacrifice hit—Feeney. Left on bases—Monongah Division, 4; Parkersburg, 6. Struck out—by Burns, 12; by Mason, 6. Umpire—Jones. Time of game—1.30.

"Giddap, Napoleon, it looks like rain!"

Among Ourselves

There is a larger representation of divisions and departments in this issue of the MAGAZINE than in any previous issue. This speaks well for our correspondents, who give of their time and interest freely to help make the MAGAZINE more interesting to its readers, and we thank them

Baltimore and Ohio Building

Office of Vice-President—Maintenance and Operation

Correspondent, H. H. HARTLOVE
Chief Graphic Clerk

Edward P. Wrightson of this office joins the throng of benedicts. Congratulations! Ah, the bachelor line is growing thinner!

A special article has come to the attention of your correspondent, and in view of the renewed activity in matters scientific, foreign travel, Darwinian theories and other allied subjects, we deem it best to allow our readers to profit tremendously by the experiences of our renowned—shall I say sophisticated—globe-trotter, J. W. Mackert, late of Cook's Illustrated Tours.

SPECIAL ARTICLE EXTRAORDINAIRE!

JOURNEYS OF PULLMANITE MACKERT.

Dear Folks—Ycs, I have seen the sights of a great city. Upon solicitation of my friends, I decided to travel in rare style (*rara avis* is the French expression) from Baltimore to New York. I took the Pullman (J. W. M. has a taking way about him) and anybody seeking information about Pullmans—ask me, I know! Follow these instructions carefully:

1—Carry with you all of your multitudinous identification cards—

Royal Order of the Hoos Hoos,
Independent Zoological Investigators Club.

Amalgamated Knights of Rubber Neck.

2—Don't forget your shower-bath tickets. By the loving humped up—would you believe it? I looked for two hours for the shower bath and ended my travels by stumbling into the smoker, and falling directly into the lap of a corpulent gentleman, who shouted, "For heaven's sake, go to bed!" I went. The porter forgot to put the light out over my berth, so I put my handkerchief over it, took the screens out, put the windows down, and lay down to sleep. I have heard weird tales of shoes getting badly mixed up over night, so I fooled 'em. I SLEPT WITH MINE ON!

Arriving in New York, I went directly to the Bronx zoo for the purpose of endeavoring to prove the Darwinian theory. I could not find any real resemblance between the inmates of the cages and myself—I didn't look very close—so I came away disgusted.

Nextly, I betook myself to the Rubber-neck Wagon, showed my card of admission and saw New York as only a Royal Knight of that order can do. Talk about ladies' wearing apparel!—but let us pass on. This is the true subject of my discourse: whenever you desire to travel in true artistic style, consult Pullmanite Mackert. No charge for elaborate and thorough information, as I am a champion of the people and I am not running for the presidency. I merely wish to be of service in helping the misguided public.

Yours travelistically,

PULLMANITE.

Here endeth the article, and you will agree that if there were more people like Pullmanite Mackert the world would be a better place to live in, to eat in and to sleep in. As I have been to Atlantic City on a vacation, you will please pardon the brevity of my correspondence. I'll see you at church. *Au revoir.*

Office of General Manager

Correspondent, G. F. ZIMMERMAN, Assistant Chief Clerk

We are glad that our assistant file clerk, Milton Crist, is again back at work. Recently while in bathing at Mountain Lake Park, Milton had the misfortune to break his arm. We all thought he knew how to dive better than that.

"Barney Oldfield" Andersen, of whom mention has been made in a recent issue of the MAGAZINE, has "added unto his list of speed machines" a pony. Why in the world a pony, "Ben?" If it had been a motorcycle we would not in the least have been surprised. For the benefit of our readers, however, let it be known that "Bennie" is the father of two youngsters (and mighty good ones too) who have been asking papa to buy them a pony for some time; so, with all the

back pay he was given, there wasn't anything left for him to do but satisfy their wishes.

Has anybody got a house to sell? See Mr. Kohlerman, he may be able to sell it for you.

Once upon a time the art of bowling was known to one of our stenographers, who never failed to tell us the morning after the night before what a wonderful score he made. Now we have a wizard in our midst, who wouldn't think of entering a game without making at least 150 pins a game. A mere trifle for him. Anyone desiring to know how he does it, might see Charles Cavey.

Law Department

Correspondent, GEORGE W. HAULENBEEK

I received a letter recently that did me a world of good. It came from our division attorney, Charles D. Clark, away off in Chicago. Judge Clark gave me warm commendation for my efforts in sending to the BALTIMORE AND OHIO MAGAZINE a monthly contribution. It made me feel particularly comfortable. If in the Law Department, where I have labored continuously for over 39 years, it should happen that no one uttered a single, solitary word, it would cause me to give thought to the couplet—"A prophet is not without honor, save in his own country"—and give it no further thought.

Women Readers of Newspapers

What part of a newspaper or magazine does a woman read? Someone has remarked, the advertisements, and that is why the majority of seekers after bargains at the bargain counters is composed of women. A young woman sitting in the seat with me in a 17 car the other evening read nothing in the *Star* but "Holding a Husband" and the "Marriage Mill" while grand good articles by Dorothy Dix, Dr. Crane and Frederick J. Haskin received no attention whatever.

Good-bye to No. 1 Train

I have finished my summer runs on No. 1 train to Deer Park. I saw many things on my weekly trips to commend. I met some grand good fellows in our service that I would not otherwise have had the pleasure of meeting. I rode in the smoking car on my Saturday afternoon trips and in the same way on No. 16 on my Sunday trips back to Baltimore. When the conductor politely requested men holding passes to go into the smoker I obeyed with alacrity.

From Cumberland on each Saturday a great number of our men return to their homes in Keyser, and from that point a number make the trip to Piedmont. I had the pleasure of conversing with brakemen and others in our service, and I enjoyed the trips. I found some good loyal men who, in flagging a train or in performing any other important duty, did it well. One man in particular told me that he was going to his home in Keyser in order to go out on a freight sometime during the night. I could see that man's little family, with the children in their beds. I could see the wife pack the dinner bucket well in advance of the call. We have some splendid characters among this class of men, and I doff my hat to them whenever I get a chance.

Back on the Reading

Now I have resumed my Saturday trips to Bethlehem, Pa., taking train No. 524 from Camden Station and changing at Wayne Junction to a Reading train. I have three minutes leeway for the change, but the Baltimore and Ohio and Reading trains are almost always on time and good service is rendered.

Robert Pressley Scott

During the summer we were distressed beyond expression by the sudden death of our counsel, Robert Pressley Scott, of Butler, Pa. Mr. Scott, who was 78 years of age, had served the Law Department faithfully for over 30 years. He was conscientious and painstaking and we will miss him.

Clyde Ludwig

Clyde Ludwig of Grafton, W. Va., 22 years of age, front freight brakeman, Monongah Division. On my last trip to Deer Park, this young gentleman entertained me. His narration of his vacation trip was full of interest. I favor sending employes away on vacation jaunts off our lines. It gives them an opportunity to observe how other roads do things, and sometimes how we can improve; moreover, they are apt to return brimming over with zeal and admiration for their own road. After all, there is no trunk line to day like the Baltimore and Ohio, and this was the purport of Mr. Ludwig's story.

Mrs. Edith Barnard Delano

"Blue Flowers from Red" in the *Ladies' Home Journal* for September, the work of Edith Barnard Delano, attracted much attention. Mrs. Delano is the daughter of the late Dr. William T. Barnard, the founder and originator of our Relief Department.

Dr. Barnard, while in the War Department at Washington, accepted a position in the President's office of the Baltimore and Ohio at Baltimore. This was away back in 1880. It was Mr. Robert Garrett's idea that a Relief Department, embracing its present features, should be organized, and placing Dr. Barnard in charge, the work was begun. The late Dr. S. R. Barr and the late John P. Hess were associated with Dr. Barnard in the work and lent valuable assistance.

I don't know what we would do without the Relief Department.

(We have received the following characteristic and amusing note from one of the proteges of Mr. Haulenbeek. It pays to have one of Mr. Haulenbeek's type for mentor and friend—not alone as an illustration of how a man can preserve his youth into the "threescore years and ten," but also to show how legal training improves one's vocabulary.—Ed.)

It is with interest that I write a diminutive article of the Honorable George W. Haulenbeek for the October issue. My principal statement is that Mr. Haulenbeek has a birthday in October, he being 77 years young on October 9, 1920 (1843-1920). His motto is "smile," but in many instances, especially when he is busily engaged, prudently speaking, I am of the opinion that he smiles in a sardonic attitude, but I am optimistic in order that I may follow the dynamic example which this propitious gentleman has effected. On behalf of the MAGAZINE, I must say that I enjoy his contributions and in our daily colloquy I learn much to my advantage. Let's hope that he will live to be an octogenarian and that, when he reaches this age, I will be a sibyl to name his next age.

(Signed) WILLIAM B. BERRY,
Junior Clerk.

Car Service Department

Correspondent, GRACE PLACED BERGHOFF

Here is a photograph of "Charlie Fischer, Esq.," the monarch of Sue's Creek and the "candy kid" of the Car Service office. This gentleman knows some little about

things piscatorial, but his long suit is amber fluid, which he admits he misses since the country has gone dry. Where's the bait, Charles!

Engineering Department

Correspondent, OSWALD EDEN

Friend Stork has been visiting the Engineering Department again. This time it stopped at the home of Engineer of Buildings L. P. Kimball, leaving behind an 8½ pound baby boy, born on August 27. Congratulations, Mr. and Mrs.!

"Velvet Joe" says: "Even the railroads have reformed—the Engineering Department think 2.75 is a grade too high for the best results and if the average grade was one-half of one per cent., the equipment would last longer."

"Herb" Dawkins, better known as "the guy with smoked glasses," has returned from a trip to Yellowstone Park, where he say many of the wonders that Nature has wrought. But for wonders "Herb" needn't have gone that far. He should have looked into a mirror.

Our poor "Willie" Pinschmidt seems to have trouble with eggs. Some sent by parcels post were badly broken. What does our "Willie" mean, badly broken? He claims others could only be partially used. He should prosper with this kind of economy.

J. W. Linnbaum has a beautiful coat of tan, obtained during a two week trip with his family to Atlantic City.

"Teddy" Ziegfeld has returned after a short sojourn to Atlanta, Georgia. We are glad he did not go on a hunger strike (many thanks, Warden).

Our chief, Mr. Lane, took a short vacation Down East—on his old home place at Foxboro, Mass.

M. T. Chambers, secretary to chief engineer, spent his vacation at his home in Philadelphia.

J. A. Layman, accountant, has been transferred from Pittsburgh to the office of cost engineer, Baltimore. L. E. Emmett, another accountant, was transferred from Cincinnati to the Baltimore office of the Cost Department.

L. E. Martin, engineer, has left the Cost Department to re-enter Purdue University, Lafayette, Indiana. H. A. Hook, chairman in the Surveys Department, has also left in order to resume studies at Cornell University.

J. Franklin Voll spent his vacation in Cambridge, Md. We understand a certain young lady was at home. Serious compli-

Fisherman Fischer

cations of the heart are looked for by his friends.

Politics are warming up at Halethorpe and candidate for Mayor, John F. Waters, is looking for a "still" to manufacture some "hooch" to aid his campaign.

J. R. Weer, Jr., has purchased an "auto," and makes daily trips from Sykesville to the office. He is now seriously considering the purchase of an aeroplane if permission can be secured to land on the Central Building roof.

"Colonel" Fry is still on the job and wears a collar in cool weather. Here's hoping, for his sake.

Wednesday, September 8, was a lucky day for D. W. Fry, assistant engineer in the Surveys Department. On that day Friend Stork visited his home and presented Mrs. Fry with a little baby girl. The department extends its congratulations.

Among the recent benedicts of the Cost Department was C. M. Whittaker, who took unto himself a bride, Miss Frances Barklage, on August 21, at Elkridge, Md. Hats off to C. M.

Kemp-McClanahan

Miss Helen E. McClanahan, daughter of Mr. and Mrs. S. McClanahan, and Joseph Milton Kemp, son of Mrs. and the late Charles E. Kemp, of Walbrook, were married on September 1. The Rev. J. M. Gillum, pastor of Walbrook Methodist Episcopal Church, performed the ceremony at the home of the bride, 3002 Garrison Avenue. Miss Lucille McClanahan attended the bride as flower girl. Mr. and Mrs. Kemp left immediately for New York. They will take a northern tour, stopping at the Thousand Islands, Montreal, Lake George and Lake Champlain.

The above tells the story. For weeks before "Joe" had been going around the drafting room as quiet as a mouse, until some one let the cat out of the bag. Passes began coming in for "J. M. Kemp and wife" and we began to wonder, until "Joe" let out that it was true. The young benedicts in his department were sorry (?) to hear of "Joe's" decision to take unto himself a wife, and so composed the following ode to him:

Ode to J. M. Kemp, on the Event of his Marriage

Why don't we listen to our friends?
Why don't we take advice?
Because we think we know it all,
And think they are not nice.

However much we think we know,
And try to carry out;
We find we didn't know it all,
And *that*, without a doubt.

The story goes we have been told,
That two live cheap as one.
But let us tell you, Milton Kemp,
We know it can't be done.

(Signed) MARRIED MEN, Drafting Room.

With the joy that came to us of a fellow worker taking unto himself a wife, comes the sad news of the loss of another fellow worker's loved one. I refer to the wife of Milton Fleagle, who succumbed after a long illness. Our deepest regret and sympathy are extended to you, Milton, in your bereavement.

Office of General Freight Claim Agent

Correspondent, Miss E. T. MURRAY

Smile!

Someone who has the gift of poetic expression has said:
"The man worth while is the man who can smile,
When everything goes dead wrong."

UNION MADE "Service" Suits

TRADE MARK REG. U.S. PAT. OFF.

For Your Protection
Every Button on a
"Service" Garment
Bears This Design.

"SERVICE" Suits and Overalls aren't just old-fashioned overalls made better. They are a brand new idea in the department of work clothes.

The single idea of original design and expert tailoring is enough to indicate the gap between ancient overalls and modern "Service" garments.

Selected fabrics and flawless workmanship add endurance to looks and comfort, and the cost is not greater.

Ask your dealer—he knows.

KOHN MANUFACTURING COMPANY

Makers

BRADFORD, PA.

Dorothy B. own
Three-year-old daughter of C. L. Brown,
Record Division

He must have had in mind those days that come to each one of us when we seem to be looking at things through blue glasses, when our best friends don't look good to us, when the milk of human kindness is soured, and when even work seems anything but a blessing. If we can keep the cheerful grin working overtime on these days, we may consider ourselves heroes, though perhaps not wearing the D. S. M.

The morning of September 2 was a sad awakening for Iona Newcomb of the Voucher Division. When she appeared in the office with tears of sorrow trickling down her scarlet cheeks someone asked why she was weeping so. Amid sobs and sighs the reply came, "My-my-little canary died last night a-and I didn't even know he, he was sick—poor 'Pete,' I'll miss him-m so much!"

The remains were laid away in a perfume box under the hydrangea bush at 2019 E. North Avenue. The bereaved one has our sympathy and we hope her next canary does not come to such an untimely end. Poor "Pete!"

Smile!

"Laugh and grow fat" is a saying which has been in use long enough to have become a classic. If the man who first used that sentence had said "Laugh and grow healthy" or "Smiles are a cure for the blues," he might have hit the nail on the head, even better.

H. C. Brownley of the file room has been granted an indefinite furlough because of illness in family.

We are sorry to report that M. Sidell of the O. S. & D. Division was seriously injured when an automobile struck him as he was alighting from a street car. The machine dragged him several feet, lacerating him about the head and breaking his collar bone. We hope that he will soon recover and be with us again.

Mrs. A. Gleim of the Typist Division has resigned her position as dictaphone operator to take up duties in a new field, namely "Housekeeping." Miss Ruth Banks, formerly a railroad employe, will fill her position.

We are pleased to report that W. C. Chance of L. & D. Division has practically

recovered from a slight accident he met with while taking a dip in the ocean blue. Mr. Chance was in the act of taking a dive when he misjudged the distance from a nearby boat and banged his knee. It put him out of commission for a while but we are glad he is back with us again, despite the fact he still walks with an accent.

So many of the employes have been on their vacations during the past month that it seems quite impossible to mention all of them. Nevertheless, we miss them, and wish them all kinds of good times, which we know they must be having while away from the grind of summer work.

Smile!

Solomon said, "a light heart maketh a cheerful countenance" and he might have gone further and said a cheerful countenance makes friends. It would be a grand thing for all of us to join the Smilers' Association. There is a time and a place where a smile may accomplish a great deal and that is when a new employe comes on the job to work with us, if we can greet him in a pleasant way, if we can show him something about the work, if we can simply give him a smile, we may help him to pass the first period when everything is strange around him, so our first and last word is "SMILE."

Relief Department

Correspondent, H. IRVING MARTIN

Professor William James, one of our greatest psychologists, said, "Education in the last analysis consists in the organizing of resources in the human being. An 'uneducated' person is one who is nonplussed by all but the most habitual situations. On the contrary, one who is educated is able practically to extricate himself from circumstances in which he never was placed before."

It is a pleasure to note that a large number of our clerical force will enroll in night schools this fall. The future will prove to them the truth of the saying—

"The heights by great men reached and kept
Were not attained by sudden flight,
But they, while their companions slept,
Were toiling upward in the night."

All of us enjoy vacations for ourselves, and we are glad to have others share our luck. We are willing to give our mite annually to the Fresh Air Fund that the kiddies may have an outing. Our donation for the fund this year amounted to \$25.00, and we hope that it helped to bring the great outdoors into the lives of some city youngsters; that the children were enabled to fill their lungs with good fresh air and their stomachs with wholesome food and country dainties, and that they returned to their homes so rosy and healthy that their mothers were possibly unable to recognize them.

Speaking of vacations, many of our force report good times spent this year.

Miss Brune spent one week in the Blue Ridge Mountains, and if there is a prettier spot than the background of the Monterey Country Club you will have to prove it to her by argument. Stop off at Blue Ridge Summit and see it for yourselves. She also spent a few days at Atlantic City, but the mountains get her the next time.

The Shakespeares took their respective wives to Boston and are now prepared to write a book with the title, "How to be Happy Though Seasick"—subtitle "Afterwards." We understand that for the first ten minutes after they were attacked they were afraid they would die, and after the next ten that they wouldn't. Miss Esther Harr, after visiting Buffalo and Niagara,

joined them in their delightful experience of "a life on the ocean wave." Of course, all of their time was not devoted to *mal de mer*. The days of pleasure spent in New York and Boston offset the later days "on the briny."

John Schuppner and Daniel J. Shivers also viewed the beauties of Niagara. "Reg" Forgan told the porter to "let him off at Buffalo."

Miss Waring says that she spent a large part of her time in the waters of the Rappahannock. Land values will go up next year in the Old Dominion as it is probable that many who have visited Atlantic City will turn their way hereafter to the bathing beaches of Old Virginia.

Miss Adams made some ethnological studies in Alabama—judging from the large number of souvenirs which were packed in her gripsack on her return. She says that she discovered that the word affinity means affection of the negro for the watermelon.

Mr. Brooks spent his rest days at New York and Atlantic City.

The last we heard from Mr. Thurston was that he was headed for Richmond on the banks of the James.

Miss Helfrich is our candidate for membership in the National Geographic Society, as her itinerary included Chicago, St. Paul, Duluth and some unknown place in North Dakota.

Reuben Gray says that "it" is a boy. He is wearing the smile that means that "Father" is just as proud as he can be.

Recent additions to our office force are Guy C. Riggs, Miss Mary Schwinger, Miss Katherine Myers and Charles R. Curtis. Mr. Curtis comes to us from the Consolidation Coal Company to handle the work of the tax desk in the Savings Feature. He is qualified for his service with us by many years spent in the handling of taxes, fire insurance and abstracts of title.

Telegraph Department

Correspondent, DELLA M. HAIN

Do you know what Form 2664 is? Do you utilize it when sending messages? Do you always follow your messages with proper symbol? Do you use the mailgram whenever possible? Can you answer "Yes" to each of these questions?

The correspondent recently spent a day in Philadelphia visiting the Zoological Gardens, and on the same day one of the storks in the bird house escaped to Maryland and left a sturdy little boy at the home of J. W. Bishop, plant clerk. Congratulations!

A recent caller at this office was Mrs. J. A. Lentz, formerly Miss Ethel Binau, manager private branch telephone exchange, Baltimore and Ohio Building.

The late Patrick Judge

Patrick Judge, aged 70 years, veteran railroad man and supervisor of transportation, was found dead near Glover's Gap, W. Va., on September 7, evidently from heart failure. Mr. Judge was visiting relatives in the country a short distance from Glover's Gap, and it is supposed that he was returning to the station to board a morning train.

Mr. Judge was born at Frankville, Md., on February 9, 1950. He entered the service of the Company at the age of 13 years as water boy on the track and continued in this service two years, when he took up telegraphy under Jesse Courtwright at Glover's Gap. He was made operator at Connellsville, Pa., and later at Littleton. In the spring of 1879 he took up dispatching under K. D. Walker at Fairmont. One year later, 1880, he was appointed dispatcher at Cameron, W. Va., under U. B. Williams, then chief dispatcher. A few years later Mr. Judge was appointed chief dispatcher, and held this position for 25 years. He also served as division operator and assistant trainmaster. In 1912 Mr. Judge was appointed supervisor of transportation by A. W. Thompson, which position he held under C. Selden, general inspector of transportation, until his death.

Patrick Judge was married on September 3, 1883, to Eliza Murphy, of Fairmont, W. Va. She and the following children survive: Mrs. N. I. Shai, of Charleston; Dr. Edna Morris, of Cincinnati; Misses Mary and Helen Judge, at home; Dr. Robert Judge of Cincinnati. Miss Helen Judge is a teacher in the schools at Morgantown. The surviving sisters are Mrs. Winnifred Murphy, Mrs. John Brant, of Fairmont, and Mrs. John Carlos, of Grafton.

Mr. Judge was of a genial disposition and numbered his friends by hundreds. In each capacity that he served he was eminently efficient and painstaking. In every sense he was a good citizen and a very lovable character. His untimely death brought sorrow to hundreds of his coworkers and his loss will continue to be deeply felt.

C. A. Plumly, superintendent telegraph; E. W. Day, assistant superintendent telegraph; E. T. Ambach, assistant superintendent telegraph, and B. F. Thompson, telephone engineer, recently attended the meeting of the Telegraph and Telephone Division of the American Railroad Association held at Winnipeg, Canada.

Several clerks in this office have returned from their vacations with sunburned faces, but the brownest countenance belonged to Mr. Krausz, and he didn't get it at the seashore, either. He got it from painting—not his face, but the roof of his house. Never you mind, Louis, it is mighty becoming.

Miss Catharine Owings now has the pleasant duty of making out Forms 621. Miss Mary Tansill, former executrix of the deed, is glad indeed that Catharine takes so well to this arduous work, which occurs semi-monthly. So say we all.

Here is a note we received from a friend of our correspondent. It fills us with curiosity. We are not strong on guessing names, but suggest "Willie."—Ed.

Miss Della Hain had a fine present from "Bill." A little dog. Ask her the name of it.

Valuation Department

Correspondent, G. B. SAUMENIG, *Accountant*

It is to be regretted that this issue only contains news from the Baltimore office. We hope next month to have each office represented.

The winner of the pot should at least "rattle" it.

It seemed strange to see Melvin going around on one crutch. No one can find out the reason.

The presidential situation is a popular subject at present. A recent straw vote showed Harding 38, Cox 23.

Mrs. Carter is after leadership in the political arena. You can never tell what the future may bring forth.

No mention has been made of a welfare organization in the Valuation Department. Now that the winter season is drawing near this should receive some consideration. Talk about it.

Several years ago the Valuation Department was a part of the Duck Pin League. There seems to be a great deal of interest in this sport and a number from other departments have advocated a reorganization. While it is rather late in the year to start, yet it could be done if quick action were taken. We are ready to enter.

An occasional 'Good Morning,' a smile or a 'Thank You' means more than silence, and the usual frown or grouchy look. Try it on the one next to you and see if it is not contagious.

Ask Janney about the sliding board at Carlins.

It is said that Callahan met with a disaster. Plans had been made to move, but during the night some unkind person changed the numbers on the houses. The next morning a moving man, having been given orders to move the furniture, made a horrible mistake and moved two loads of goods belonging to a neighbor. One would think that a man with such knowledge of "Buildings and Furniture" would be more careful. He got away with it, too.

Our gentlemen from "Indianer," better known as McGarry, is on the sick list. We are wishing for a speedy recovery.

This month's cartoon is quite realistic. No one can doubt the resemblance of the family. It was to be regretted that the trip was not made. Jupiter Plavus made his appearance and prevented the contemplated expedition. Next month's cartoon will be "Episode No. 12," entitled "Fishing from a Fliver." It will be good.

Transportation Department

Correspondent, J. B. EGERTON

Here we have our friend, T. A. McCann, who, since his transfer to the Embargo Bureau, is holding down a desk of his own. Moreover, he has a telephone at his disposal and a buzzer that calls when the boss wants him. Note the expression of pride

Every Baltimore and Ohio man in the Motive Power Department or in Engine Service should have this book

The Early Motive Power of the Baltimore and Ohio Railroad

By J. SNOWDEN BELL

Describes and illustrates the locomotives used on the Baltimore and Ohio Railroad prior to 1860. The history of locomotive development of the Baltimore and Ohio Railroad embraces nearly the entire history of motive power in America up to 1860

Fully illustrated and handsomely bound in cloth - Price \$2.00

Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Md.

"Mister" McCann

on his otherwise benign countenance. We'll say that "Tom" has imagination and that he has been known to build many castles in the air, but we never thought he'd reach this distinction. And the idea of his posing for a picture! Oh, well, when Miss Davis begins cartooning, anybody would be willing to pose for her.

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

On September 22, Miss Mary A. Auth, one of the original six young ladies employed in this office back in 1916, and, by the way, one of the most amicable young ladies of the entire office force, resigned her position, preparatory to her marriage to Mr. Henry Hamp ("Lunk" for short), on September 29.

Thus they leave us. One by one the old familiar faces disappear and new ones take their places. As sorry as we are to see Mary go, I am sure this young couple has the sincere and hearty good wishes of the entire department for a long and happy married life.

The latest acquisition in the way of personal adornment by little "Joe" Heine consists of one pair of patent leather shoes (the first since he was married some 15 years ago) and a pair of officers army shoes. It won't be long now before he starts carrying a cane down to the office. It's pretty hard to tell what his next move will be.

Our old friend, W. B. Stockett, is again compelled to take to the mountains for his health. We hope things come around all O. K., and that the cool, clear mountain air will do him lots of good.

The Children's Fresh Air Society, formed by the office, contributed the following amounts to that most worthy cause during the hot summer months:

June.....	\$ 27.25
July.....	28.60
August.....	27.60
September.....	25.45

Total..... \$108.90

This is a most creditable showing, which is, however, a characteristic trait of the employes of this office.

Auditor Disbursements

Correspondent, JOHN C. SVEC

One of our young ladies came to work one day wearing a strange stone in the shape of a ring. We have all been wondering since who the lucky fellow is. Come on Adazell, tell us when it's coming off.

One morning "Billy" Banes came to the office bright and early and said that he had chopped the head off one of his chickens. After chopping its head off the chicken ran away. Boys if you see a chicken without a head you will know who it belongs to. What did it, "Billy"? The country is DRY.

The young ladies seem to have had the time of their lives on their vacations. Buffalo, Cincinnati, Niagara Falls, Boston, Atlantic City and other places have seen faces that they never saw before.

The stork visited the home of our correspondent on August 23 and left a bouncing baby boy.

Auditor Merchandise Receipts

Correspondent, P. H. STARKLAUF

"We Move"

We have now moved and are comfortably located in the Annex Building. The building, an eight story structure, in the past has been successively known as the Lloyd L. Jackson, R. M. Sutton, and Government Store. The floors are large, well lighted, splendidly ventilated, and there is no reason why efficient service by the employes should not be rendered.

The places assigned for this office are as follows:

1st Floor: (part of) Claim Checkers' Bureau, Records and Bindery.

6th Floor: Auditor Merchandise Receipts, W. E. Rittenhouse; Assistant Auditor Merchandise Receipts, H. S. Maccubbin; Revision Bureau; Statistical and Comptometer Bureaus.

7th Floor: Assistant Auditor Merchandise Receipts, N. F. Davis; Local Settlement Bureau and Machine Room.

8th Floor: Interline Settlement Bureau.

Before moving, each desk, case, or cabinet had an identification mark and when taken from the moving van, shot up in the elevator to its respective floor, and was assigned

W. L. Straughn

its proper place. Forethought and well planned arrangements averted all confusion, and we picked up in our new quarters where we left off in the old. Hurrah for our movement, who endeavor to do all things well!

"We Celebrate"

On "September Morn," the first, to be exact, on entering the Statistical Bureau, a desk looked the part of a florist's shop, gaily bedecked with posies of all sorts. Yes, 'twas a birthday party—John E. Clarke, one time secretary to William T. Thelin, general auditor, celebrated the 50th anniversary of his entering the service. He wanted to pass the day quietly, but it "couldn't be did." Towards evening our silver-tongued orator, Assistant Auditor Harry Maccubbin, on behalf of the Statistical Bureau, gave Mr. Clarke a pair of gold cuff buttons with initials and date, and a silver pencil holder.

Our old friend, E. J. Napfel, received a severe jolt on Saturday afternoon when he was run into by a bicycle. He looked as if he had just returned from the west front. Look out for the kiddie-kars on Fair Avenue, "Ed."

We are also glad to see Miss Helen Walter resume her duties, after what might have been a serious automobile accident.

There are pleasant announcements coming. Some of our really nice girls are to be married. We expect to say something in the next letter about it. We had a big moonlight recently, and 'twas "some night" and "some fine time" for those present.

Here's old "Bill" Straughn, who is popular with everybody, even with our debonair young women, who always wants to hear the latest stories, which "Cap'n Billye" is just filled with. He's been in the Accounting Department so long that if some of his friends found out just how long, they wouldn't believe it. He can row a boat, paddle his own canoe (which he has been doing all his life), run a launch and drive a car, but his specialty is Interline Settlements. Summing it all up, "Bill's" some good sport.

Auditor Passenger Receipts

Correspondent, G. FRED MILLER

Secretary to Auditor

Please, Robert E. Machin, our friend of the titian hair, answer me one question. Why did you go to Canada after the strenuous fight you made for the success of the great cause "Prohibition?" What could have attracted you in such haste, just after "Prohibition" goes into effect? And you went to Montreal, one of the places not dry in Canada.

Miss Rosemary Sullivan, one of our beautiful girls, from the pretty little town of Ellicott City, has given up her position with the Baltimore and Ohio, to accept a partnership in the firm of "Malone and Sullivan." Miss Sullivan will marry Mr. Malone in the near future, and our good wishes for sufficient wealth, the best of health and untold happiness are extended to her and the other member of the firm.

Niagara Falls still seems to draw its quota of vacationists from our office, and recently three of our well known men made the trip, namely Messrs. Hoppman, Grund and Clark. We believe these boys are keeping something back from us. They started off to do the "Romeo and Juliet" stunt by serenading the folks with a ukulele. Mr. Hoppman is some "ukie" player, and you can imagine how the passengers on the train

felt when Hopp played and Grund and Clark got their delightful voices in working condition. On reaching Harrisburg they decided to stretch their limbs, and on returning they found the cars had been moved from the station; we understand the railroad company tried to lose them, but it couldn't be done. The question is, what caused them to remain such a long time from the station? Someone said a certain young lady could answer. 'Tis said, like sailors, they have a girl in every port now, but have finally decided the Baltimore beauties are the best after all. You might ask our friend Hoppman what it feels like to sit on the old front porch up in Canada. Talk about cold feet!

When Columbus started out to discover this old world of ours, he had nothing on four young men of this office, Grewe, Schuch McMahon and Norris, who, with a map of the world and four compasses, not forgetting the beans, eggs, etc., etc., and their canoes, decided to discover Tolchester, by way of Bay Shore and Sandy Beach. They started from Colgate Creek, and with their prearranged stops finally reached their ultimate destination. While at Sandy Beach two of our young friends took a stroll along the beach while the beautiful moon was casting its rays on the Chesapeake Bay, and accidentally(?) met two beautiful girls from Chicago; after a delightful evening it later developed that the girls from the Windy City were doing a windy act as headliners at the Palace Theatre in our City of Baltimore. Try again, boys. The four young men are awaiting Carnegie medals, as it was their good fortune to save a man from drowning who had fallen from a launch. You would be surprised what wonderful dishes can be made of beans and eggs. McMahon just loves sunburn.

We are beginning to feel at home in our new quarters at the Annex Building, as we now have with us our good friends of the Auditor Merchandise Receipts Department and are looking forward to the coming of the Freight Claim people.

New York Terminals

Correspondent, SARAH ROLMES

"Happiness in Every Box" is what a new candy corporation says of its wares. I would describe this baby as "Happiness in Every Look." Who is she? Helen Longfellow, one and one-half years old, daughter of M. R. Longfellow, yardmaster at West 26th Street Station, New York City.

Mrs. Frances Miller seems to be urging some of the boys here to buy property in

Helen Longfellow

Bayonne, N. J. As her home is located there, we wonder whether she is looking for an escort to and from business, or if she has an idea that she'll save car fare. Which is it, Frances?

We recall James Lynch as having said to Frank Santagata, "I'd like to be your boss for about half a day. What wouldn't I do to you!" and Frank's rejoinder, "If you were my boss, I'd quit." Now we find that Frank has been promoted to interchange settlement clerk, with "Jimmy" at the head of the department. Strange things do happen, don't they?

Please mention *BO* magazine when writing advertisers

"The proudest moment of our lives had come!"

"It was our own home! There were two glistening tears in Mary's eyes, yet a smile was on her lips. I knew what she was thinking.

"Five years before we had started bravely out together. The first month had taught us the old, old lesson that two cannot live as cheaply as one. I had left school in the grades to go to work and my all too thin pay envelope was a weekly reminder of my lack of training. In a year Betty came—three mouths to feed now. Meanwhile living costs were soaring. Only my salary and I were standing still.

"Then one night Mary came to me. 'Jim,' she said, 'Why don't you go to school again—right here at home? You can put in an hour or two after supper each night while I sew. Learn to do some one thing. You'll make good—I know you will.'

"Well, we talked it over and that very night I wrote to Scranton. A few days later I had taken up a course in the work I was in. It was surprising how rapidly the mysteries of our business became clear to me—took on a new fascination. In a little while an opening came. I was ready for it and was promoted—with an increase. Then I was advanced again. There was money enough to even lay a little aside. So it went.

"And now the fondest dream of all has come true. We have a real home of our own with the little comforts and luxuries Mary had always longed for, a little place, as she says, that 'Betty can be proud to grow up in.'

"I look back now in pity at those first blind stumbling years. Each evening after supper the doors of opportunity had swung wide and I had passed them by. How grateful I am that Mary helped me to see that night the golden hours that lay within."

In city, town and country all over America there are men with happy families and prosperous homes because they let the International Correspondence Schools come to them in the hours after supper and prepare them for bigger work at better pay. More than two million men and women in the last 29 years have advanced themselves through spare time study with the I. C. S. Over one hundred thousand right now are turning their evenings to profit. Hundreds are starting every day.

You, too, can have the position you want in the work you like best. You can have a salary that will give your family the kind of a home, the comforts, the little luxuries that you would like them to have. Yes, you can! No matter what your age, your occupation, or your means—you can do it!

All we ask is the chance to prove it. That's fair, isn't it? Then mark and mail this coupon. There's no obligation and not a penny of cost. But it may be the most important step you ever took in your life.

INTERNATIONAL CORRESPONDENCE SCHOOLS Box 8487-BSCRANTON, PA.

Explain, without obligating me, how I can qualify for the position, or in the subject, before which I mark X.

and No. _____

City _____ State _____

It looks as though we'll soon hear wedding bells ringing for another of our fair sex. Rumor has it that Winnie Locflier is to be engaged shortly, but we don't know just when.

A. L. Mickelsen, assistant terminal agent, St. George Lightcage, after spending two weeks among the hills of Vermont, says there's nothing like being a farmer. His ambition is to operate a 200 acre farm.

An August 21, M. R. Longfellow, yardmaster, 26th Street, was surprised by Dr. Stork with an addition of a baby boy to the family. Congratulations!

We take this means of extending our sympathy to Francis and William Duffy in the death of their uncle, John Duffy, on September 6. He was one of our veterans, having been in the service for almost 35 years. The greater part of this period he served as gateman and rendered faithful service during his employ.

F. W. Garlich, our able accountant, after 16 years of service, has resigned to go into business for himself. We all sincerely hope that he will have the best of luck and a huge measure of success. That "Fred" will be greatly missed from our organization, goes without saying.

Staten Island Lines

Correspondent, G. F. GOOLIC

"Alec" Conley, road foreman of engines, lost three days of his vacation procuring a driver for his new Essex. He can run anything that you don't have to steer, and he has proven it many times. He put steel wheels on the Essex and got classification signals.

Miss Dorothy Reynolds, stenographer and file clerk, Division Engineer's office, has returned from a pleasant vacation at Greenwood Lake, N. Y. "Dot" got a little red paint over her neck and back, and gained 10 pounds.

Pasquale Santoro, chairman, Engineering Department, spent his vacation at Fosterdale, N. Y. "Patsy" had to work hard in the open, and has changed his complexion.

Walter J. Vidler, chief clerk to Division Engineer, has enjoyed his well earned vacation at Walpole, Mass. This is the place for scenery, and a good place for young farmers.

Tompkinsville Force

The accompanying picture is of the force at Tompkinsville Freight House. They are, reading from left to right: John Sikorski, clerk; Harry Van Duzer, agent; Joseph Bloom, clerk; Miss C. Waltman, clerk; Rocco Fenola and William Sikorski, clerks.

Mrs. O. C. Nelson, stenographer to Division Engineer, is now back on the job, after going through a successful operation for appendicitis.

The Employees Mutual Benefit Association is going to hold its annual ball on Saturday evening, October 30, at the Stapleton club rooms. Music will be furnished by Professor N. P. Vice, an ex-trainman. Tickets for gentlemen, 75 cents; ladies, 25 cents. Come along and enjoy the dancing.

Miss Madeline Berry, ticket agent, South Beach, was running for queen of the carnival at that place. The employees took great interest in Miss Berry and were greatly disappointed when they heard she won only second place. But they did not lose any time. The boys secured a big silver loving cup and presented it to her on the day the other cup was given to the first prize winner.

We introduce Bernard Russell, office boy in Superintendent's office (left), Extra Ticket Agents Misses Frances O'Donnell and Helen Barrett. Bernard likes the ladies, as you see he takes care of two.

Harry Bertini and William Knowles

The accompanying picture is of Patrolmen Harry Bertini (left) and William Knowles (right). This picture was taken during a breathing spell after the crowd from one of the Saturday afternoon boats was cleaned up.

Baltimore Terminal Division

Correspondent, C. O. HEALY, *Secretary to Superintendent*

The accompanying photograph is of the yard force at Oak Street Yard. They are, left to right: C. L. Hopp, M. Jefferson, and J. Glaser (in charge). The office is run by these three men, who handle all of the work on the entire Belt Line, which covers the territory between Mt. Royal Station and Gay Street.

I. G. Smith, formerly of this office, has commandeered the Locust Point Coal Pier and is handling it in fine style.

We are pleased to note the return of C. E. Fowler, car distributor, after a long siege of sickness.

Effective September 1, C. H. Edwards of this office, assumed the duties of assistant agent at Mt. Clare. His many friends at Camden regretted his leaving, but we are glad to learn of his promotion and the splendid opportunity afforded him for future success. This gentleman has spent 44 years of his life with the Baltimore and Ohio, serving in various capacities, and we are glad to note that his ability is being recognized. We rather envy the Mt. Clare organization on annexing this congenial character to their force.

It may be that Mr. Edwards will think I have informed on him too strongly in

"Three" is no crowd here

divulging the fact that he has been working with the Railroad 44 years, in which event I might redeem him to a certain extent by saying that he is still young enough to buy the ladies sodas and candies, as personally observed, and we hope his new job will not interfere with his nocturnal visits to John Street.

"Ed" Myerly, who filled position as chief clerk to division engineer while Mr. Search was on his vacation, seemed to think it was necessary to have Miss Goodman on his side of the desk when he wished to dictate a letter. I don't think his voice is any weaker than that of Mr. Search.

J. H. Rockfort, stenographer of this office, surprised us by presenting the other day, for our perusal, a marriage license drawn up in his name. He left on September 4 for a honeymoon to New York. We all extend our hearty congratulations on his good fortune, and are in hopes his better half will cooperate with us in endeavoring to get him to settle down.

I thought, when it fell to my lot to send a few notes to the MAGAZINE for the Baltimore Terminal Division, that I would have a chance to seek revenge, but it is quite

Oak Street Yard Force

evident, in view of the fact that George Zimmerman is still permitted to use my name in his column, and the Editor accepts notes and cartoons sent from "Abe" Lincoln, that he is not cooperating with me.

Mt. Clare Shops

Correspondent, MISS MOLLIE ALBRECHT
Secretary to Superintendent
Superintendent of Shops Office

There is a diamond sparkling on the third finger of the left hand of a certain young lady in our office, and we all extend our hearty congratulations. This fair young lady is now very busy sewing, sewing—and we wouldn't be surprised if there is a vacant chair in our office shortly. We sincerely hope that announcement of the wedding will be given far enough in advance for us to start saving our pennies in time. In anticipating of this coming nuptial, someone was kind enough to notify the Ingersoll-Rand Company, who very courteously sent her a beautiful picture of their industrial buildings which she is requested to hang in her new home (?).

Miss Edna Schaefer, stenographer to the chief clerk, has returned to us after having been off for several days because of illness. Don't say we aren't glad. Just to see Edna merrily tapping away on her machine, makes things seem normal again.

Shop Order Bureau

"Buck" Bannan, our new chief clerk, recently took a trip to Pittsburgh and came back with the astounding news that he knew where to get the "real stuff!" Therefore, before going to Pittsburgh, we would advise anyone with the "unquenchable thirst" to see "Buck." However, whatever "real stuff" he was able to get, it didn't make his hair grow any longer.

Accounting Department

The Accounting Department has a new clerk, and he is no other than one of the crew of the S-5, the submarine that was submerged for such a length of time. This young man was granted an indefinite furlough and has become a railroader. We wish him good luck, and hope that our friendship will grow to the extent that we can perhaps get an interesting article from him for the MAGAZINE.

We announce the marriage of Miss Mildred L. Goetzinger and Warren L. Morgan, each of whom served as secretary to our superintendent. We extend our heartiest congratulations and best wishes. Their home is at present in Zelienople, Pa., where Warren is working with our late superintendent, L. Finegan.

Baltimore Division

Correspondent, W. H. TARR, *Superintendent's Office, Camden Station*

R. B. White, superintendent, spent his vacation in the West, visiting his parents. J. J. Swartzback, assistant superintendent, was in charge of the division during his absence.

The abnormal run of freight continues and new runs have been inaugurated between Wilmington and Brunswick and between Wilmers and Jersey City, via the Central Railroad of New Jersey and the Philadelphia and Reading.

Miss Emma Schleissinger and Miss May Schamel spent their vacation seeing the wonders of Niagara and visiting other points in New York State. Some good photographs of the Falls were taken, one of which is reproduced on the next page.

Robert Howard Peach, son of Edward J. Peach, Chemical Laboratory, and grandson of Edward Peach, No. 2 Machine Shop

Hamilton Watch

"The Watch of Railroad Accuracy"

Engineer F. J. Mink of the New York Central Lines is known as "The Chief" on the New York-Albany run, because he's handled a throttle for thirty-one years. For ten years he drove the Twentieth Century Limited on his division, with the Hamilton he carries, and established an enviable record for running on schedule.

Are you being handicapped with an inaccurate watch?

THERE'S probably no line of work where punctuality has more to do with a man's success than in railroading. If your particular job must be done to a time schedule then your efficiency record is at the mercy of the watch you carry.

There are two very real reasons why the Hamilton has become the most popular watch among America's railroad men:

Its day-in-and-day-out dependability—its ability to stand up under railroad work and give long years of unvarying satisfaction.

Have your jeweler show you Hamilton No. 940 (18 size, 21 jewels) and No. 992 (16 size, 21 jewels). These famous railroad models make time inspection a mere matter of routine.

Write today for "The Timekeeper"

An interesting booklet that pictures and describes all the Hamilton models. Prices are given and they range from \$22 (\$27.00 in Canada) for movements alone, up to \$200 for the Hamilton Masterpiece in extra-heavy 18k gold case.

HAMILTON WATCH COMPANY, Lancaster, Pennsylvania

John J. Publow, chief clerk, has resigned to accept a position in the Traffic Department of an industrial corporation. He was presented with a Masonic ring and chain by the employees of the office, as the expression of their esteem and appreciation of him as chief clerk. D. M. Shawen made the presentation speech. Mr. Publow leaves the service with the good wishes of those who worked with him.

Wilmington

Following the promotion of our freight agent, E. B. Rittenhouse to terminal agent at Philadelphia, the office force here assembled in the room of the chief clerk and

were presented to their new agent, A. D. White, formerly of the Baltimore offices. In the introduction of Mr. White to his new office forces, Mr. Rittenhouse made a very appropriate review of the qualities and work of the subordinates he was leaving, and gave his hearty assurance to Mr. White that the same loyalty and excellent work on their part would, without question, be his portion from them also. His remarks were well received and heartily applauded.

Mr. White followed him with a happy expression of his appreciation of the feeling manifested toward him, giving a manly, straightforward talk outlining the principles of his policy regarding future relations with

Please mention our magazine when writing advertisers

Sand-witches for two!

the office forces and the conduct of the heavy business handled by the Wilmington offices. His little speech was heartily applauded and was followed by remarks by Charles W. Hamilton, assistant cashier, on behalf of the employees here.

Mr. Hamilton gave expression to the deep regret of the entire force here at the necessity of parting with Mr. Rittenhouse, who had endeared himself to each one during the many months of close association and cooperation in exacting and trying periods of freight work. Their regrets were, however, tempered by the thought of the manifest approval of our Company in their selection of Mr. Rittenhouse for so important future work. To Mr. White the office forces heartily gave their loyal support and fidelity with the assurance that they were Baltimore and Ohio people in all the sterling qualities that this expression conveys.

A. D. White, the newly appointed agent, commenced railroading as an operator for the Pennsylvania Railroad in Delaware in the Spring of 1893. Leaving that company in May, 1902, he went to Wyoming with the Union Pacific. Here he worked as operator and manager of the Relay office of that road until 1905. From there he went with the Salt Lake Route in Utah as joint railroad and express agent in a copper mining camp, where his practical agency work began. Later he went with the Southern Pacific Lines in Louisiana as joint agent at Lake Charles from October, 1914, to April, 1918. During the consolidations of agencies brought about by the war, he was sent to a three-line agency in the lumber shipping belt of Louisiana; from there with the Santa Fe in Texas, coming East in 1919 with the Baltimore and Ohio as relief agent, assistant traveling auditor and car service

Lillian and Mary, daughters of machinist George M. Harrigan, Riverside Shops

agent on the recent drives for prompt loading and unloading of cars.

The selection of Mr. White for the important post of the Wilmington Freight Agency is a distinct accession to the city, because of the character of his services to its shippers, and a fitting compliment to him.

Pier 22, Philadelphia, Pa.

The accompanying photograph is of two bells of the Cashier Department, Pier 22. They are, left to right: Miss Edith Berkowitz and Miss Anna McKinley. The picture was taken while they were enjoying their vacation at Atlantic City.

Trainmaster's Office, Riverside

Correspondent, Miss MARTHA V. FOX

Ask Miss Poyner where the "Gretna Green" of Maryland is. Wonder how she knows about it?

Why is Miss Shipley so interested in the Baltimore Division baseball team? We don't know whether it is the games or the players. We think it is the second baseman.

Mr. Cannon, our road foreman of engines, has returned from his vacation, with a pair of sun-burned legs instead of a string of fish.

Miss Helen Feezer has asked for a leave of absence account of ill health. We hope she will recover and return to us soon.

"Daddy" Gaither is now spending his vacation at Betterton. We miss "Daddy's"

dition to welcome the coming of the inaugural ceremonies of President (?) next March. The improvement in appearance is a credit to the men who have done the work.

Freight Agent Fisher and Assistant Agent Hill have succumbed to the inevitable—each has purchased an automobile. If there is anybody in town who is getting more real enjoyment from his "buzz-wagon" than these two, we beg him to step forward with his photograph. Mr. Fisher's machine is a five-seater—which is perfectly correct, he is a large family man—but Mr. Hill's is a two-seater. Is there any significance in this? There may be not, but Mr. Hill is a good looking young bachelor (at present) and some of us are reminded of that old song, "A Bicycle Built for Two." Both Mr. Fisher and Mr. Hill experienced some excitement when they started in to reckon with the powers that be in Maryland in order to obtain a Maryland license; however, the little red and white tags are hanging on the backs of the machines and so far everything has gone along beautifully. Although the adventurers have taken many trips, no banks have been jumped nor trees uprooted.

The little god of love took it upon himself to fly right down into our delivery shed and strike the heart of Tallyman E. J. Quinn, who immediately became tired of single blessedness and persuaded Miss Katherine

Niagara Falls

cheery smiles and wonder whether the blue cap is attracting many fish.

Our circle is not complete without Mr. Hoddinott. We hope that the missing link will soon return.

Washington, D. C., Freight Station

Correspondent, W. L. WHITING, Chief Clerk

The person who travels toward Washington from the North, West, or East and fails to notice that he is approaching that city, is indeed afflicted with an unfortunate blindness. Our new sign, "THE BALTIMORE AND OHIO RAILROAD FREIGHT STATION," in large black letters on a white ground, the work of our artistic department, can be seen for many blocks. It welcomes the traveller to our beautiful city. But this is not all of the decoration that we have received recently from the hands of "Joe" Young and his corps of assistant artists. All of our buildings have received coats of paint on the outside, and the attractiveness of this decoration goes without saying. We are promised that the inside of our offices will also receive a new "coat of many colors." All spick and span in our new clothes, we shall be in fine con-

dition to take compassion on him and become Mrs. Quinn. The ceremony took place on August 24, and Mr. and Mrs. Quinn took an extensive honeymoon trip through the State of New York and on to Niagara Falls, following the shores of Lake Erie to Toledo and other points in Ohio. The best wishes of his co-workers are extended to Mr. Quinn and his bride.

Many of our forces have enjoyed vacations during the summer, and have returned with renewed vigor to prepare for the coming busy season. Indications already point to a resumption of old-time activities. Let them come! We are prepared to meet any emergency and to uphold the prestige of the good old Baltimore and Ohio.

E. C. DRAWBAUGH, Division Operator
R. G. ALLAMONG, Secretary, Y. M. C. A.
RUTH M. CHEUVRONT, Office, Mechanical Engineer

The back pay checks for June and July were distributed on September 1. All those who heeded the advice of our good friend, Mr. Haulenbeck, to salt it down for future use, raise your hands.

One of Cumberland Division's fine track crews

Mister D. S. Patcher, who's been a-writin' sech amusin' articleles an' letters fer the MAGAZINE an' simplifyin' his spellin' in sech a unique way, tells me that he's jes' got back from his vacashun in Texas. (Does he mean Texas, Md.? That's a pretty little spot fer a vacashun.) We've missed his letters considerable, an' now that he's back again, we be expectin' to hear a lot more from him.

Wilbur Hardy, section foreman on Section 27, has a large gang of Mexicans working for him. Now he can tell them what he pleases an' he won't understand them when they "sass" him back.

Timber Preserving Plant

Correspondent, E. E. ALEXANDER

We wish to introduce Miss Amy Jewel Alexander, daughter of Treating Engineer and Mrs. J. C. Alexander, born on August 12, at 8.30 a. m. (Note: We have it from J. C. A., a member of the Tigers, that Amy is a fan already. She bawls for some one to catch-er, always makes a hit at Home, puts up a holler if she is put out.) Anyway, Mrs. Alexander says Amy is a Jewel.

Treating Engineer E. S. Crawford, who was recently granted a leave of absence because of ill health, writes from his home in New York that his health is much improved and that he has been offered a lucrative position with the New York Central lines, near his home, which he has accepted. We regret that Mr. Crawford will be unable to return to the plant.

An excellent section crew, working in the

vicinity of Green Spring. Left to right: H. W. Davis, George Whitacre, Ray Twigg, S. L. Holland, Robert Nelson, George Smith, J. N. Wagoner (foreman), T. McAttee, W. Gross, C. Wilson, J. W. Chaney, A. B. Conner, H. C. Twigg, H. C. Pipcr; picture above.

There is another auto in the village. For further particulars see "Will" Grove.

A. E. Irving, formerly connected with the plant, has returned to the service. Mr. Irving has been filling Night Foreman Allen's position during the latter's illness.

Wilbur Mayhew, retortman, has requested a transfer to Cumberland Yard, where he has secured a better paying position. We regret that Wilbur found it necessary to make the change.

C. G. Worthington, a Cornell student, who has been at the plant during the summer, has returned to his studies.

"As fine a crew as ever hit the ties" is the title given to the accompanying photograph. They are, left to right:

Front row, sitting: C. L. Kittle, Seymour treating inspector, Roy Keiser, C. H. Haines, Howard Adams, A. G. Haines.

Second row, standing: E. A. Hott, H. E. Gulick, C. L. Landes, O. R. Landes, H. S. Roach, "Tom" Long, (Rev.) Z. J. Powers, E. A. Kline, Elwood Wagner.

Third row, sitting: Grant Kesner, J. I. Boone, J. W. Kenny, Tice Duckworth.

Back row: C. W. Parsons, R. G. Stewart, W. E. Landes, P. C. Kenney, W. T. Lichliter, W. J. Shanholtz, E. D. Robinson, A. H. Broome.

Camp Car Crew, Martinsburg

Left to right: J. W. Wellingham, leading laborer; Floyd Braithwaite, carpenter; W. Ginn, carpenter and Walter Brown

We have only three games to report for the Cross Tie-gers since last issue: August 14 at Romney, winning 9-6; August 18, Romney at Green Spring, losing to Romney 11-9; August 29, Green Spring at Cumberland. The Tie-gers played the poorest game of the season this time and allowed the crack Liberty Athletic Club to shut them out 6-0. This is the first time they have been shut out this season. This was due to a crippled team, some of the regulars being unable to appear in the lineup.

John Carter, father of J. S. V. B. Carter, died at his home in Springfield on August 7.

Martinsburg Shops

Correspondent, W. L. STEPHENS

Miss Ella Catherine Mosier, daughter of Engineer and Mrs. Alexander Mosier, and Arnold Aldridge Wedd, of Pittsburgh, were married at the home of the bride in this city. Mr. Wedd is rating clerk in the Baltimore and Ohio offices at Pittsburgh.

Charles Henry Davis, assistant to foreman of Frog Shop, and Mrs. Grace E. Bowie, were married on September 6 at the home of Mrs. Louis Zachow, a sister of the groom, at Baltimore, Md. "Charlie" is back on the job all smiling and happy and doesn't seem to mind the grinds of congratulation. Oh, well, the boys will have their fun.

Cumberland Young Men's Christian Association

One of the most beautiful floats that have ever been seen in the streets of Cumberland in parade was a gondola built by B. R. C. of A. in the new car shops at Cumberland, under the supervision of H. W. Gano. This float was one of the leading features in the Labor Day parade. The new car shop

opened here August 1, 1920. The accompanying pictures are of the first two cars that were rebuilt here: in one of the pictures you will see, left to right, H. W. Gano, superintendent of car shops; W. H. Maloney, painter foreman, and C. E. Howdshell, gang foreman.

Connellsville Division

EARL E. SHANK, *Office of Superintendent*, Connellsville, Pa.

W. S. Mason, painter foreman, visited Philadelphia, Riverside and Mt. Clare Shops and reports a pleasant as well as instructive trip.

J. W. McPartland, superintendent of motive power of the Moffet Lines, stopped at this point on his way to Cuba, where he has accepted a position as superintendent of motive power of the Cuban Railways. Mr. McPartland tells many interesting stories of the snow fighting on the Moffet

Scenes of interest from Cumberland's new car shop

Lines, which crosses the divide at Corona, two miles elevation or the highest point reached by a standard gauge railway in the United States.

A. R. King, general foreman, visited Mt. Clare and Riverside Shops, and the General Foremen's Convention held in Chicago. This is the first leave Mr. King has had in many years and the rest was very beneficial.

Charles Spence, roundhouse foreman, spent his leave of absence at various points in and about Pittsburgh, dividing his time between business and pleasure and visiting a number of shops and factories in the interest of his work. "Charlie" says it is harder to loaf than it is to work.

Lyle Cage, of Somerset, has been made general foreman at Smithfield. His friends wish him success in his new position.

H. W. Wageley, formerly general car foreman of Connellsville Terminal, has been appointed division car foreman of that division with headquarters at Connellsville.

H. Dinsmore, foreman of the Smith Shop, enjoyed a much needed as well as a much deserved vacation. Mr. Dinsmore has been in the employ of the Company for 41 years and this is his first vacation in that time.

At our regular Safety meeting held in the office of Master Mechanic J. F. Long, we enjoyed listening to highly interesting talks made by H. G. Scheck, Safety agent of the Pennsylvania Lines, E. M. Cooney, general mechanical inspector, Pennsylvania Lines, and J. C. Morgan, district Safety agent, Baltimore and Ohio Railroad.

Mary Penn has accepted a position as file clerk in this office.

H. Y. Snyder has been appointed assistant chief clerk to Master Mechanic Long, in place of W. E. Finn, assigned to other duties.

Pittsburgh Division

Correspondents

E. N. FAIRGREVE, *Car Distributor*, Office of General Superintendent

ELMER H. STOLTZ, *Pittsburgh Freight Station*

We were sorry to hear of the death of Operator H. N. Landmore, which occurred on Sunday, August 23. Mr. Landmore had been in the service since September 23, 1897, and had spent about ten years in "DS" office at Pittsburgh. We extend to his family our sincere sympathy.

L. E. O'Donnell, for many years operator at "DS" office, has been appointed manager of the Telegraph office in place of Mr. Fellows, recently deceased.

John Lloyd, formerly chief clerk to superintendent, Pittsburgh, has left the service of the Company to take the position of office manager with the Philadelphia Gas Company, under Mr. A. W. Thompson.

C. H. Durant, former assistant chief clerk in General Superintendent's office, has been appointed chief clerk to superintendent.

"Andy" Moore, formerly secretary to Mr. Keegan, has been appointed assistant chief clerk, vice Mr. Durant. We extend to all three our best wishes for success in their new fields.

Conductor J. W. Jones is wearing a pretty broad smile these days. It's a boy, and judging from the way he holds his fists already, he's going to be a prize fighter—at least, that's what we understand from "Jim, Senior."

"Jimmie" Gallagher, "Eddie" Lear and "Mike" Rafferty, all of Pittsburgh Yard, spent a few weeks in the West. We noticed quite a number of cards coming eastward. Although the boys had a splendid time, we missed them and are glad to see them home again.

"Bud" Ryan, office boy in the General Superintendent's office, came to work on September 8 wearing a very sorrowful expression. His grandmother was dead, we understood, and "Bud" had to have the afternoon off to go to the funeral, but—"Babe" Ruth was at Forbes Field and it was no funeral, either. How many other grandmothers were dead on that day?

Our old friend Cupid has again made his appearance in our midst, this time severely wounding our genial stationmaster, "Tom" Drake. A quiet wedding took place on August 31. We extend to Mr. and Mrs. Drake our heartiest congratulations.

"Bill" Leasure, of Mr. Didier's office, slipped one over on us and was quietly married on September 10 and "flew the

Margaret and Charles Wellingham, children of Carpenter J. W. Wellingham

Attractive drinking fountain at Glenwood

coop" before the news got out, but—just wait until he comes home with his bonnie bride!

We also understand that "Dan" has been pretty busy around Glenwood Yard, making some pretty good shots at one of our yardmasters, well known as "Bob." We won't mention the other victim, but will permit our readers to draw their own conclusions.

Miss Delahanty has been making a number of trips to Philadelphia recently. We wonder as to the attraction. Mary could, if she would, explain—but she won't.

Robert Presley Scott, Baltimore and Ohio Counsel at Butler, Pa., for 30 years, died at his home in that city on August 12, at the age of 78.

Mr. Scott was born in Fairview, Butler County. He served during the Civil War with Company H of the 78th Pennsylvania Volunteers. After the war he became deputy sheriff under his father at Butler. He studied law and was admitted to the bar in 1869. In 1903-1904 he served as commander of the Pennsylvania department of the G. A. R. He was president of the Butler County Bar Association, and was one of the oldest attorneys around that section.

One of the greatest surprises ever was given us the other day when W. J. Renziehausen, yard clerk, put one over on us by

sliding over to Cumberland in company with Anna May Stewart and getting a knot tied so tight that even now he has the audacity to claim he is a married man. More power to him and good luck to the couple in their future. "Renzie" is an old P. & W. head and was formerly in the employ of the general superintendent transportation. He is well known in this section. The newlyweds have taken up their abode just opposite the Braddock freight station and are as happy as two larks in the springtime.

Glenwood Shop Correspondent, FRANK RUSH

The picture of drinking fountain which has been installed at Allegheny shops is a design of Car Foreman Snider. Its workmanship and appearance shows how much interest Mr. Snider is taking in his work. We consider this about as nice as any fountain on the System.

On July 12, a farewell party was given in honor of Sister W. R. May. Sister May is a member of Brotherhood Locomotive Engineers, Chapter 59, and is one of the five remaining members of this old organization. A leather purse was presented to Mrs. May on this occasion by members of the Brotherhood Locomotive Engineers, Chapter 370.

Miss Olga Zukowski, has recently returned to work after being absent a number of weeks because of illness. We were all glad to see her smiling face back in the office.

Miss R. C. Winn has been transferred from the Stores Department to the position of private secretary in the Superintendent of Shops office.

Miss Elizabeth Passmore has been transferred from Superintendent of Shops office to Master Mechanic's office as stenographer. She is succeeded by Miss Olga Zukowski.

The accompanying photograph is of Frank Jarres, left, and David Maret, right, employes of Stores Department at Allegheny. Both are featherweight boxers.

Jarres and Maret—and they do these things, too

BERNARD-HEWITT & CO., 900 W. Van Buren St. CHICAGO

JUST PUBLISHED

THIRD REVISED EDITION

The WALSCHAERT and Other Modern Radial Valve Gears for Locomotives

By WM. W. WOOD, Air Brake Inspector

245 Pages (5 x 7 1/2)

Fully Illustrated

PRICE \$2.50

WITH the adoption of the Walschaert Valve Gear on nearly every modern locomotive in America, this book fills a place of real interest and usefulness. By a careful study of its pages, one can **THOROUGHLY** understand the Walschaert Valve Gear, as the author takes the plainest form of a steam engine—a stationary engine—in the rough, that will only turn its crank in one direction—and from it builds up—with the reader's help, a modern locomotive equipped with the Walschaert Valve Gear, complete.

THE CONTENTS OF THE BOOK ARE DIVIDED INTO FIVE PARTS

THE FIRST DIVISION contains an analysis of the Walschaert Valve Gear.
THE SECOND DIVISION treats on the Designing and Erecting of the Valve Gear.
THE THIRD DIVISION has to do with the actual work of the Walschaert Valve Gear on the road.
THE FOURTH DIVISION is composed entirely of questions and answers on the Walschaert Valve Gear.
THE FIFTH DIVISION deals with the Setting of Valves with the Walschaert Gear, the Hobart-Allfree Valve and Valve Gear, and the Baker-Pilliod Valve Gear in its original and improved form.

The book is fully illustrated, and a novel and interesting feature of the book is the folding diagrams with cardboard valve models, by means of which the actual operation of the valve under the influence of the Walschaert motion can be studied.

MARY C. LEEDS, *M. P. Clerk*, Grafton, W. Va.

The little beauty seated in the rustic chair in the accompanying photograph is Miss Mary Joan Limbers, the granddaughter of our faithful material man, W. E. Hodel. We think Miss Mary Joan should be elected an honorary member of the Baltimore and Ohio Veterans' Association, because she's a really and truly Baltimore and Ohio baby as shown by the following record:

Granddaughter of W. E. Hodel, Baltimore and Ohio employe for 36 years; granddaughter of Anthony Cannon, a Baltimore and Ohio engineer of long standing, now deceased; niece of two Baltimore and Ohio machinist helpers; last but not least, the great granddaughter of that well known deceased engineer, "Uncle Buck" Williams,

who served the Baltimore and Ohio from boyhood to old age.

The accompanying photograph is of Carl Nuzum, the official cartoonist of this division, who sent the cartoon of the Girls' Swimming Club which appeared in the September issue.

C. W. Van Horn, superintendent, has been promoted to superintendent at Cumberland, Md., vice J. W. Deneen. Mr. Van Horn came to the Monongah Division from New Castle, Pa., where he was superintendent, and has been acting in that capacity over the Monongah Division for two years. He was born and reared on the old Monongah Division, was trainmaster at Clarksburg and superintendent of various Baltimore and Ohio divisions from time to time. His transfer to Cumberland comes as a distinct promotion. It is with regret that the Monongah Division loses him and all wish for him abundant success in his new field of labor.

B. Z. Holverstott, assistant superintendent to Mr. Van Horn, succeeds him as superintendent on the Monongah Division, Mr. Holverstott has gained recognition as

The late J. M. Cassell

a capable directing head and leader of railroad men. He has risen from the ranks, having served as trainmaster on the Ohio River Division, was chief clerk to a former Monongah Division superintendent, and trainmaster at Cumberland.

James McClung, trainmaster at Clarksburg, succeeds Mr. Holverstott as assistant superintendent. Mr. McClung has served three years as trainmaster at Clarksburg and is well known, numbering his friends here as many as those in Grafton. The promotions of Messrs. Holverstott, Van Horn and McClung are received with great pleasure by their many friends.

Because of the efficient supervision of Division Engineer A. H. Freygang and his corps, it was possible to operate the large Mallet engines between Grafton and Fairmont on August 30.

Our chief clerk is wearing a smile that won't come off. The stork left another fine girl at his home on August 23.

Several of our boys have been granted furloughs to attend school. Among the number are: Machinist Helper Leo Hodel, who is commencing his third year at St. Charles College, Baltimore, Md.; J. J. Pendergast, Jr., electrician helper, a third year student at St. Bonaventure College, N. Y.; F. M. Hollis, Jr., electrician helper and E. M. Clark, who begin their collegiate

course at West Virginia Wesleyan, Buckhannon.

Painter Foreman S. S. Wolfe and his corps of workmen are decorating the interior of our roundhouse by whitewashing its side walls and ceiling. This is a decided improvement to our large, well-heated and lighted and finely equipped building, with its 22 stalls, of which we are justly proud.

J. P. Hussion, general foreman, returned from a pleasant trip to the seashore and eastern cities.

H. M. Casteel, machinist helper, reports a "glorious time" spent in Buffalo and Canada. Judging from the post cards sent to his friends, while in Pittsburgh, he found "cheap board and a good night's rest" in the massive building owned and managed by Pittsburgh and the city officials. Oh! "Happy," we didn't think this of you!

Erecting Shop Foreman J. E. Wren and Roundhouse Foreman G. A. Haislip are on the job with smiling faces and dreamy expressions in their eyes. They are anticipating a joyous vacation to be spent in "Little Old New York" and Atlantic City. (Boys, beware of the naughty girls.)

Congratulations to the following:

G. W. Moore, machinist, and Miss Elva McDaniel, stenographer, Freight office, whose marriage was announced early in August.

J. H. Shingleton, boilermaker, and Miss Alma Clare Ridenour, who surprised their friends by taking a flying trip to Oakland, Md., returning as bride and groom.

William Shanley and Miss Mary F. Coulehan, whose marriage took place August 11 at St. Augustine Catholic Church. Mrs. Shanley has been the efficient stenographer in the Storekeeper's office for more than one year, and by her amiability and obliging disposition she has endeared herself to not only her office associates but to all whom she meets.

Ohio River Division

Correspondent, MISS M. M. MOORE

The siding at Ann Street Station for parking Pullman sleepers has been completed. This is a great convenience for passengers, who can now board their cars for Clarksburg, Charleston and Pittsburgh.

A. B. Armstrong, former maintenance of way accountant, now with the "Rig and Reel," has been made assistant editor of the *Plant Paragraph*, their monthly magazine.

The drive is on for more car miles per day. We have been making a most favorable showing: in May our high figure for one day was 54 miles, June 43 miles, July 56 miles, August 45 miles, and we expect to average 45 miles per day in September. Everything is being done to keep cars moving.

The Wood County Fair, held at Parkersburg, September 6, 7 and 8, was a great success. The Baltimore and Ohio forces all had an opportunity to attend on Labor Day.

John Rood, Superintendent's office, is enjoying a much needed vacation in the West. It is rumored that he will leave us shortly to take up the study of music. Tra-la-la, tra-la-la!

H. E. Liggett, fuel performance clerk, has resigned to enter a Kentucky college.

"Silent" Frank Thomas, Auditor's office, stopped off between trains the other day. Mr. Thomas is the chief of the Bond Bureau.

General Foreman A. H. Tanner, Low Side Shops, has been promoted to the same posi

Mary Joan Limbers

tion at Fairmont. Mr. Tanner made many friends while on this division.

The new material bins have been completed at High and Low Side Car Shops. They are a great improvement. Material is now assorted and stored in the various bins and presents a neat appearance.

The vegetable train has had a very heavy run of business this year. This train consisted of about 30 refrigerators daily and was due to leave Parkersburg at 6.00 p. m. for the Pittsburgh markets.

Painter Foreman Wolfe and his force have just completed the job of painting the Ohio River Bridge. They have had excellent weather for their work and no one fell off the bridge this year.

The oil industry is rapidly growing all along the division; however, Chief Dispatcher Casper has had hard luck and his last three wells have been dusters. Relief Agent Wheeler hit oil near Linden. It promises great returns. Ticket Agent "Jim" Jones, Ann Street Station, has a big well in Texas and left the other day to inspect his holdings.

The new industrial track for the Rig and Reel Company has been completed. The track is 1531 feet long and connects with the new factory recently completed. The Rig and Ree Company has an electric crane over this track, which is of mutual benefit in the loading and unloading of cars.

The St. Marys Button Company, St. Marys, W. Va., which manufactures pearl buttons from clam shells, has enlarged its plant and increased its track facilities in order to handle their rapidly growing business.

Charleston Division

Correspondent, M. W. JONES, Secretary to Superintendent, Weston, W. Va.

\$4,500,000

Did you ever see so much money? Guess not. But that is what it costs the Baltimore and Ohio Railroad to pay for lost and damaged freight in a year and that is the reason why we have a Freight Claim Prevention Committee on each division, to see if we cannot reduce this amount to at least a reasonable figure. Naturally, as long as there are railroads there will be claims, but if we make up our minds to do our share, we can reduce the money loss very materially.

Our meeting of the Freight Claim Prevention Committee was well attended on August 27 at Weston. Many items of interest were brought up, and new ways and means for reducing claim payments thought out. Bad marking and packing is one of the worst sinners we have to contend with. Mr. Glessner says, "Start the freight right, and that is half the battle." Superintendent Trapnell made a vigorous speech at the meeting, and requested renewed activity all along the line of claim prevention. Handling of explosives came in for a good share of attention, as also did the handling of live stock, with special reference to overcrowding, dead animals loaded in cars, etc. It is very important that such facts be noted on the billing and the live stock contract. Care in doing this will avoid claims. Careful checking of weights will protect the Company's revenue. **DO YOUR PART AND SAVE CLAIMS.**

Be a Safe employe all the time, on duty or off duty, and by your example do what Fireman G. L. Nicholas tells us to do, in a very excellent paper presented at our last Safety meeting, "It is safer to be an employe or patron of the Baltimore and Ohio than of any other industry in the world."

We hear that one of the young ladies in the Superintendent's office (names no fair), is very anxious to take dancing lessons. Any young and eligible bachelors may apply, and receive consideration, provided excellent references are furnished. "No triflers need apply." Herc's your chance, boys, come early and avoid the rush.

Superintendent Trapnell and his wife have returned after their vacation. Both reported a most enjoyable trip in the district of the Great Lakes, Buffalo and Niagara Falls.

Miss Madge Hinzman, of the General Foreman's office, and an enthusiastic member of our Safety committee, says she spent her vacation on the front porch at home. Maybe so, but one day looking from our windows we spied her coming into the station by the back way, with a lunch basket, which certainly contained enough for two, heading in the general direction of Pickens. Why?

President Willard, accompanied by Vice-Presidents Galloway and Fries, General Manager Ennes and other officers recently made an inspection trip to Richwood and Elkins. Superintendent Trapnell, Division Engineer Brooke and Road Foreman Marsh acted as "guard of honor," while Engineer Pickens had the honor of pulling them over the Gauley line. It was regretted that the hour of their arrival did not give them an opportunity to see our division offices, but we hope they will come again and see them.

A meeting was held a short time ago by a number of employes from the division offices at Weston, with a view to forming the Baltimore and Ohio Charleston Division Social Club. Temporary officers elected were: M. A. Walus, chief clerk to the division accountant, as president, and Miss Viola B. Hickman, secretary. It is proposed to hold a general meeting shortly at which time definite plans will be made for the organization of the club, and its program for the winter outlined. Much good from a "get together" standpoint will be accomplished by this club.

D. D. Nicholas, water inspector for the Charleston Division, recently passed his 28th anniversary in the employ of the Company. We hope that he will be with us for many more years.

We note that some good work is being done on the south end in the interest of miles per car per day. Recently we noted a car placed at Sirk Mine, 19 miles south of Gassaway, in the morning, loaded with coal and brought back to Gassaway at 1.30 p. m. On August 25, a car of merchandise came out of Charleston to Frametown, distance 83 miles. It was unloaded same evening, loaded with staves, and moved on its way on the following morning. Still another case was on August 30, when a merchandise car moved from Charleston to Clay, 52 miles, unloaded, reloaded, and returned on the same engine early on the following morning, giving 52 miles each day. This shows that our boys on the division are after the CAR MILES, and that if each one does his part we can easily pull our miles up to the figure Mr. Willard is fighting for.

We have before us a note showing that Conductor Foy, on the south end, is displaying a very commendable interest in the car mile question, and that a large number of cars he brings out are released the same day and get a double movement on his return trip. We congratulate him on his good work, and we understand now why in the "Famous Sayings of Famous Men on the Charleston Division" Trainmaster Nicholas says with pride, "There are no cars delayed on my district."

SMITH TYPEWRITER SALES CO.
(Harry A. Smith) 620 No. Wells St., Chicago, Ill.

We are pleased to note Gassaway shop holds second place on the Safety Honor Roll for June, having worked 53,862 hours without an injury. Mr. Baldinger, our master mechanic, has reason to be proud of his record and we are too, because we have a number of his best men on our Division Safety Committee.

In looking over our notes, we see that we have omitted up to the present to make any mention of C. E. Rozzelle, assistant division engineer. Mr. Rozzelle is one of the most eligible and popular bachelors of Weston, and at the same time a real "matinee idol" with all the girls. In addition to this he is a staunch supporter of Governor Harding, and with all these qualifications, we must frankly admit we are at a loss to understand why he remains a bachelor.

G. F. Anderson, formerly discipline clerk, now of Baltimore, has entirely recovered from his illness, and paid us a visit a few days ago.

We are sorry to learn that the young son of Dispatcher C. H. Carpenter has scarlet fever; also that the wife of Machinist L. S. Sanders, of Gassaway, one of our foremost safety workers, is ill in Tennessee. The best wishes of all of us are extended to both young Dispatcher Carpenter and Mrs. Sanders for prompt recovery.

Among recent changes we note Mr. Stillings is now night operator at Gassaway, and H. L. Mullins at Weston. Agent Friend, formerly of Midvale, has Gassaway in good shape and is getting settled down in his new home.

The streets of Gassaway at present are being asphalted. While the process is a little uncomfortable while it lasts, the results are certainly well worth while. After the work is completed, Gassaway—a pretty little town, laid out in the valley and with mountains on all sides—will be an ideal spot.

The photo which accompanies these notes is that of Miss Sylvia Miller, stenographer to the Car Distributor, and one of our popular Weston girls. We don't know

Miss Sylvia Miller

whether Miss Miller is making more progress in learning how to distribute cars or check baggage, but we *do* know which she is most interested in.

Relief Dispatcher Mullbourne is at present in Weston, relieving Dispatcher Mason. After "Al" returns, he will go to Gassaway to relieve Dispatcher Carpenter. There will be many sad hearts in Weston, we know. "FX" is quite popular with the fair sex wherever he goes.

W. C. Boyer, for some time past claim agent at Weston, has been transferred to Chicago, for which city he left about a week ago with his wife. Mr. Boyer was one of our most popular men in Weston, and he will be missed. The best wishes of all of us for his continued success go with him. He is replaced here by John Workmeester, well and favorably known to us all.

D. S. Westfall, for some 30 years in the employ of the Company, as trackman and foreman, has been appointed Supervisor of the district vacated by Mr. Straw on the Elk Line. Congratulations!

We are pleased to report that Mrs. E. L. McCray, secretary to Assistant Superintendent Kinton, has entirely recovered from an operation for tonsillitis and is back at her desk.

Force at Coal Billing Office, Holloway

J. W. Green, formerly traveling auditor of the Western Maryland Railway, has been appointed joint agent at Elkins, vice C. H. Alderton, resigned.

Miss Floy Yokum, of Elkins, has accepted position of secretary to the division engineer, vice Miss Spradling, resigned.

In closing, don't forget the CAR MILES, boys. We are out for a record for the Charleston Division, and we need the whole-hearted support of every one of you. Do your bit, and the results will speak for themselves.

Wheeling Division

Correspondent, A. N. GANTZER

Benwood Shop

Correspondent, ANGELA APPLGATE

The accompanying picture is that of the force of the Coal Billing office at Holloway. From left to right: C. H. Harris, agent; J. S. Stamm, the boy with the divine smile; C. N. Marple, who some day hopes to be sales manager of the Camel Cigarette Co.; E. N. Skaggs, Miss Francis Perkins, H. W. Bendure, D. M. Hunter, Miss Henrietta Perkins and last, but not least, Miss Nellie Persons. This a jovial bunch and we know that when you visit Holloway you will receive a hearty welcome.

See also the picture of the Holloway wreck train. First, on the left, we have "Jim" Welsh, cook. When "Jim" mixes his good humor with his tasty dishes, the crew has a meal that is "fit to set before the king." Note also the flowers blooming in the cinder beds. These are planted and tended by "Jim"—and he keeps the inside

of the coaches in the same apple-pie order as he does the grounds. This is not an easy task, but "Jim" enjoys it.

On "Jim's" left we find Mr. Hickenbottom, trainmaster, Monongah Division, and "Bill" Mitchell, division Safety agent. These two generally happen to be around when we take pictures.

Next is Car Foreman M. Stevens, who would go a long distance in order to be snapped in a picture along with General Superintendent Scott, who stands beside him. And Mr. Scott is proud of this "firing line."

J. B. McCullough, steam crane engineer, would have felt more at home if the steam crane had been a little closer. Standing next to him, on the end, is Wreckmaster L. J. Frizzell, who knows how to get to the wreck train when he hears the whistle. He and "Jim" are great pals in keeping the train and its surroundings in good condition. They think it worth while.

Miss Rhea Horan has resigned her position as enginehouse clerk to take up her new duties of darning socks, mending silk shirts and other minor jobs which as industrious wife should perform. The wedding of Miss Horan and Mr. Edward Morningstar was a pretty event of September 15 at the St. James Catholic Church. Miss May O'Malley and John Heagar were the attendants. The bride and bridesmaid were attired in pretty suits of dark brown. The happy couple are at the present time residing with the bride's parents and will later make their future home in Wheeling. Mr. Morningstar is employed by the Nolte Bakery Company of Wheeling. We all joined in wishing them a happy future.

General Superintendent Scott and Holloway wreck train crew

The following Wheeling Division engineers have been commented for having 100 per cent. or over in their fuel performance for the month of August:

R. C. Bethel, Craig, I. H. Biel, E. Rude, T. W. Tomson, Robinson, Parmenter, I. A. Hall, G. E. Tribbett, J. C. Moore, Nease, McCoy, W. F. Hunt, D. O. Bethel, McCarty, G. Gorrell, J. M. Hall, C. P. Berry, W. S. Brookover, P. E. Chaddock.

We are going to see just how many names there will be in this column next month.

Bernard Helfer, cashier, Martins Ferry Freight Station, is all smiles. Bernard, Jr., arrived on August 19. B. L., Sr., is proud of the new addition to the family but his attention is called to the following:

"When you walk the floor with baby,

In a night crooning song,
Be thankful you're not in Greenland,
Where the nights are six months long."

C. M. Shriver, trainmaster on the C. L. & W. District, has been appointed assistant superintendent, Baltimore Terminal Division. We are sorry to lose Mr. Shriver but we are glad to hear of his promotion. His successor has not yet been named.

"Tommy" McMahon, our efficient messenger boy, had to resign to return to school. We hope to get him back some day.

L. H. Allen, roundhouse clerk, while on his vacation, met with a mishap when he got his ankle and arm broken in a street car accident at Fairmont. Here's wishing him a speedy recovery.

Walter Zipperich, local machinist helper, is all smiles. He says the youngster can say anything and is almost as big as himself. We agree with him he wouldn't have to grow much. Mrs. Zipperich will be remembered as Miss Hazel Ritter, of Benwood, W. Va.

Gregory Murphy and Miss Irene Kelly were married on August 17. Congratulations "Greg!"

Western Lines

General Offices, Cincinnati

Our sympathy is extended to Harry Duncan, chief clerk to superintendent motive power, on the death of his father.

H. K. Lett has resigned his position as traveling car agent on the Southwest District to accept a position as yardmaster on the Toledo Division at Dayton. Our best wishes accompany Mr. Lett for further promotions.

W. A. Radspinner, supervisor operating statistics, spent his vacation at home canning peaches.

Ralph Buzek has just been employed in the General Superintendent's office as assistant file clerk, vice J. F. Diver, resigned.

B. F. Timme, statistician, General Manager's office, has just purchased a new car. "Ben" says it is running a little stiff now but as soon as it loosens up he will take us all out for a ride.

Our sympathy is extended to Superintendent Motive Power Malthaner and family in the death of his father. Mr. Malthaner was 82 years old.

Have noticed that the general office mail man has established another new stop in the transportation department, mainly to collect mail, and he seems disappointed if he does not get at least two or three letters on each trip. We have come to the conclusion that the young lady, who is at the bottom of all this, is doing her part in the betterment of the U. S. by making some one or ones happy. How about it, Gladys?

Someone please advise why Miss Stutter is collecting "War Cry's."

We congratulate J. E. McKibben, chief clerk to district engineer, and wife, on the arrival of a baby boy at their home.

Our sympathy is extended to Stenographer F. A. Slatine in the loss of his mother.

R. T. Everett, building engineer, who broke his leg on March 24, is recuperating very rapidly. He is now able to go about with a cane.

Office Engineer E. J. Southerinton is now spending many sleepless nights. The stork recently visited his home and left a baby boy. Congratulations E. J.!

Recently coming home at a late hour from a party on Price Hill, Frederick Long, of the Engineering Department, fell asleep and rode around twice on the Price Hill car. When "Fred" goes out now he carries a sign on his hat "Let me off at Fifth and Walnut."

Our sympathy is extended to C. O. Mederett, statistician, Engineering Department, in the loss of his father.

Assistant Engineer James P. Ray has now taken up the study of Archaeology. After working hours Mr. Ray spends two or three hours looking up old relics. He is now digging up the banks of the Miami River at Bridge 19-95 looking for old Indian skulls.

C. E. Catt, chief clerk to division accountant, Seymour, has opened up a temporary office at Cincinnati, making a recast of the payrolls on the Southwest District. The following clerks have been assigned duties with Mr. Catt: Robert Jefferies, transportation timekeeper, Flora; Miss Bertha Feagans, transportation time clerk, Seymour; Frank O. Conn, transportation time clerk, Dayton; Charles A. Conner, transportation time clerk, Chillicothe, and Clerks Herbert Bell, Clifford Harker, Mrs. Alice Pettit and Mrs. Faythe Buck.

H. H. Bell, clerk in temporary office of division accounts, has resigned to enter Harvard Law School. Our best wishes accompany him. John Soudrette has been employed to fill the vacancy.

Cincinnati Terminals

Correspondent, JOSEPH BEEL, Chief Clerk to Superintendent of Terminals

We are glad to announce that "Red" Moeller, our first trick abstract clerk at Elmwood, is convalescing from an operation wherein he had a troublesome set of tonsils removed. We, however, are inclined to believe that in reality "Red" had his head operated on, as the following incident would either require a vast amount of nerve or a bad case of insomnia. One afternoon recently "Red," unheralded but perfectly decorated, with a young lady clinging to his arm holding a beautiful silk parasol over the crimson-headed boy, walked by the yard office at Elmwood. The crowd was breathless for a while but soon broke out, greeting our fellow countryman with "Hello Red, do you like to walk?" "Are you afraid of getting sunstroke?" and "Can you stand alone?" "Red" made every effort to quiet the outburst with a gesture from his unoccupied hand, but with no avail, and when last seen on this sunshiny day, he and his lady friend were standing on the bridge gazing into the silvery waters of beautiful Mill Creek.

The men on Toledo Division, particularly those at Elmwood, were very sorry when the "Red Front Restaurant" proprie-

\$3000 to \$5000 now being made by good men by wearing and taking orders for the famous Lincoln made-to-measure clothes. No experience needed, we teach you and furnish free equipment. Write today!

tor hung up a sign "Closed" for three days. The delicious meals furnished by our friend "Lake" are beyond description and we know one fellow that makes Elmwood regularly at noon so he can take advantage of "Lake's" cooking and service. If you don't think we are right, try it out yourself.

Frank Gochle has taken a position with Agent Hathorn at Hopple Street. Ross Kane will succeed Mr. Gochle as chief yard clerk at Brighton.

Roy Seyferrle, yard clerk at Oakley, surprised the employees of Cincinnati Terminals by announcing his wedding, which took place on September 15, after which Roy and "Mrs. Roy" made a two weeks trip to the northern part of Ohio.

"Gus" Holtzkemper, George Maloney and J. J. O'Donnell represented the Local office at Detroit, Mich., and Windsor, Canada, on Sunday and Labor Day. This trio spent a very enjoyable time, which was only marred by an accident that happened to Mr. O'Donnell. At one of the prominent corners he forgot that he was crossing the street and stood still. Of course this is not unusual, but it so happened that a street car wanted to occupy the same space as the same time, and the car being the stronger of the two, shoved "Joe" off the track. No harm was done except "Joe's" nervous system was affected and he lost his nose glasses. Now he looks like a country pedagogue, all dressed up in a pair of spectacles.

Old H. C. L. must have certainly straightened out on Detroit when three travelers from the Local office tried to satisfy their appetite on a bag of peanuts and a bunch of grapes.

"Dan" Hartigan, now acting in the capacity of assistant trainmaster, is a very busy man. If he only could remain on the job for one year, we believe that the American Walkers' Association would have a winner in the Olympic games. In two weeks "Dan" has worn out two sets of O'Sullivans.

New Castle Division

Correspondents

A. C. HARRIS, *Assistant Chief Clerk to Superintendent*, New Castle, Pa.
P. W. ADAMS, *Telegraph Operator*
O. C. BEDELL, *Telegraph Operator*

MILES — MILES — MILES
BOOST — CAR — MILES

Wear the wheels out
Watch the BOSS shout
SMILES — SMILES — SMILES

Some people are never satisfied. Both "Jack" McCarthy and Miss Mary Sullivan were single, presumably happy, and had good jobs in the Superintendent's office at New Castle, but they had to go and get married. We wonder what will happen next.

The New Castle Division baseball team, after battling valiantly throughout the season and arriving at the championship of the Northwest District, fell before the onslaughts of the clan from Chillicothe,

Clerical force, Local Freight Office, Warren, Ohio

losing the championship of the Western Lines in two consecutive defeats. It is hardly likely that the New Castle team was stage-struck or sun-struck, but they surely were Moon-struck, as Mr. Moon, the Chillicothe pitcher, certainly did shine, getting two shut-outs. Moon had something besides a glare—it might have been a shine ball—and so far as we noticed, there was no danger of an eclipse during his stay on the mound. We are sorry for Moon, because, if we could, we would say that he was a star. H. Fox also played a prominent part in defeating New Castle and swung a wicked club in both contests. Chillicothe had a well balanced team and deserved to win.

Two kinds of smiles on this page, six altogether, from the office and warehouse at Warren, Ohio. The girls of the clerical force are, left to right: Carrie Fauth, statement clerk; Gwendolyn Jacombe, claim clerk; Clara Wagner, billing clerk. The boys of the station warehouse force are, left to right: Ralph Barringer, trucker; Charles Haines, warehouse foreman; Donald Childs, trucker.

The meeting of the Freight Claim Prevention Committee at Youngstown on August 25 was well attended and there is every indication that the interest is being maintained at a high pitch. The work in general has received careful consideration and much study on the part of the employees on the division. The results are now becoming noticeable. Supervising Agent R. B. Viethdorfer is making satisfactory progress in interesting and instructing the station employees in conjunction with the work of S. H. Rhoads, chairman of the committee, who has spent much time in preparing data of interest for the younger employees on the division, for use during the committee discussions. The results have proven the wisdom of their course.

Agent H. H. Smith, Newton Falls, has returned to duty after a severe illness and is ready once again to furnish the service that means so much to the village.

We welcome to the ranks several new agents. W. C. Valentine, of Sterling, Ohio, and J. G. Slocumb, of Wooster, are new to Baltimore and Ohio service, although they are old heads at agency work. Both of these men come to us with exceptionally good reputations and with records of good work performed and we are sure that they will

soon become enthused with the spirit that is bound to make the Baltimore and Ohio service the best of all.

"Dave" Ekin, now ticket agent at New Castle, has been appointed agent at Warwick, Ohio. "Dave" is one of the younger agents on the division, with all the ambition and natural abilities that go with the make-up of the successful agent. Warwick has long been one of the quiet spots on the division, but we know this will change after "Dave" gets thoroughly on the job.

Car miles low,
Cars move slow,
Keep the cars a-rollin' by,
Watch the car miles going high.

John A. Jackson, secretary and treasurer of the baseball team, is busy trying to find out who has been appointed to succeed Signor Ponzi, the Boston speed merchant. The baseball team owes money that must be paid soon and John is anxious for a few moments interview with some Ponzi, with a money consideration as a prelude.

The spirit of economy abroad in the land is largely responsible for such price depreciations as have been noticed lately. With the increased earnings placed within reach of the railroad employees, and the immense sum distributed as back pay, there may be a tendency toward reckless spending. Under such conditions it may be difficult to preserve the proper perspective and appreciate the importance of saving and keeping purchases at a minimum. By joining the army of General Economy we will certainly not work any hardship upon ourselves and will have the satisfaction of knowing that in the end our efforts to help ourselves will result in benefit for others.

Division Engineer Correll and Master Carpenter A. T. Humbert are busy working up the estimates for the Bridge and Structure Program for 1921. In their visits to various points, it is suggested that they carry with them two books: one a small book in which can be shown the work actually required and that must be done; the other book to be a large ledger, the larger the better, in which can be entered all the improvements asked for by various parties they will meet in their travels.

Newark Division

W. E. LAIRD, *Chief Clerk*, Newark, Ohio
A. D. LIST, *Newark (Ohio) Shops*

Kenneth Boring has accepted position of tonnage clerk in the superintendent's office.

W. R. Totten, our popular ticket clerk at Zanesville Passenger Station, recently returned from what was supposed to be a vacation, spent in Baltimore and New York. However, on his return, he surprised all of his friends by introducing Mrs. Totten, who is a very estimable and well known young lady, formerly Miss Eleanor Knight of Quaker City, Ohio. We extend our congratulations and best wishes.

The joint agency at Monroeville, Ohio, Lake Erie Sub-division, has been dissolved and is now being operated as an exclusive Baltimore and Ohio station. J. R. Cartnal, former cashier at Bellaire, Ohio, has been placed in charge and is rapidly restoring things to "Baltimore and Ohio" standard.

R. F. McCann, for a number of years our efficient agent at Somerset, Ohio, has been promoted to the agency at Utica, Ohio.

S. M. ("Sam") Hiskey, well known passenger engineer, spent a long earned vacation in Montreal, Toronto, and other points in northern Canada. He was accompanied by Mrs. Hiskey.

Station Warehouse force, Warren, Ohio

Division Accountant's Office

James Johnston, division accountant spent his vacation in Churubusco and other points in Indiana.

Ray L. Redman is the proud father of a baby daughter, Catherine June, born August 29.

When Cupid starts to shoot his darts around he generally "Mrs." it. We understand that his darts have been flying around the desks of "Art" List and "Jim" Grady. Nuf ced.

Evan Lloyd has returned to the office after having been absent on account of illness.

Zanesville Freight Office

On August 16, Carlos Cockins of our office and Miss Rose Snyder were united in marriage at the Grace M. E. parsonage. The happy couple have the best wishes of us all.

John Robinson, rate clerk, who has been in the employ of this office for over three years, recently resigned to accept the position of agent at Fair Oaks, Ohio. John will be missed by all of us but we know that with his many excellent qualities he will make good. He is one of the kind of men who put everything they have into their work—and make good.

Our freight house foreman, Harley Dietrick, recently became the proud parent of a baby girl.

F. P. Foster has accepted the position of interchange clerk in the local office, the vacancy being caused by the resignation of John Robinson.

Everybody smiled on August 19. Do you know the reason? Back pay; oh boy!

Pumping Station at Godsend

DOVER, OHIO, August 21, 1920.
TO THE EMPLOYEES OF THE BALTIMORE AND OHIO RAILROAD:

We wish to take this opportunity to extend to you all our sincere appreciation and thanks for the kindness and helpful hand you gave during the illness and death of our beloved husband and father.

The spirit of brotherly love shown during our sorrowful hours by his fellow workmen tend greatly to aid us both in bearing our sorrow and will always be remembered.

(Signed) MRS. ROY O. VICKERS AND
DAUGHTER ADDA.

Miss Beatrice McNeal and Miss Ethel Donohoe, clerks in Local Freight office, are back again on the job after being off some time because of illness.

Brakeman Harold U. Brugh, has returned to duty after being on a leave of absence.

Night Yard Clerk E. A. Krier has been acting yardmaster in the absence of Mr. Brown, and seemed to get along fairly well in the daylight. Of course he forgot himself a few times and was caught carrying a lantern. Oh, you'll get used to working in the day time, "Ed." It only takes a little practice.

Trainmaster's Clerk W. E. Brugh, wife and son, took a short vacation trip to Piedmont, W. Va., and Westernport, Md. They make good moonshine down in those hills.

"Tom" Baker has taken position of yard clerk at Massillon.

J. O. Hart, extra conductor, has been filling the duties of night yard clerk at Massillon.

Oh yes, our chief clerk, "Jack" Hufton, has had his vacation too. He spent his time in Central City, Iowa, and reports are "favorable."

Our assistant agent called a meeting on Tuesday last and discussed with us, at length, the subject of "Greater Car Miles per Day." Though we have nothing special to report as yet, we are all working together toward this end, and we feel that SOUTH CHICAGO will have a good record in the final count. The "Boss" surely has the cooperation of all at this station and our slogan from now on will be "Greater Car Miles per Day."

The accompanying photograph is of Charles and Richard, the sons of P. Bartel, of Fostoria. These little fellows were two of the guests at the July meeting of the Freight Claim Prevention Committee at Lake View Hotel, Wawasee, Indiana. Many items of importance were discussed

Charles and Richard Bartel

at this meeting, and an interesting talk was given by Agent M. Altherr, of South Chicago.

Among the guests were Mrs. F. L. Charles, Mrs. W. C. France, Mrs. G. W. Trost, Mrs. C. F. Wagner, Mrs. C. E. Lightner.

Ohio Division

Correspondent, A. E. ERICH, Chillicothe, Ohio

The stork recently visited the home of Machinist George Krick and left a bouncing baby boy. We extend our congratulations to Mr. and Mrs. Krick.

Machinist George Sheldon and wife are also the proud parents of a daughter, their second child. Congratulations!

William Bateman, pipefitter and Thomas O'Donnell, machinist, spent a week fishing up about Hopetown recently and caught several fine fish, among them being a 40-pound shovelhead. Out of the joy of their hearts they invited the sheet metal workers to the feast. John Amann and four of the men accepted the invitation and ate all the fish, leaving none for Mr. Bateman. Next time, "Bill" states, he will help himself first.

Machinist Harry Hyson, also went on a fishing trip to Hoffman's camp near Chillicothe. After baiting and setting his lines, he became tired and went to his tent for a nap. When he awoke, he found that it had been raining, his lines were all gone and water was coming into the tent. He beat a hasty retreat back to Chillicothe, without any fish. Better luck next time, Harry.

On July 28 Fireman W. Oakes and Miss Mary Bethel of McArthur, Ohio, were quietly married. Congratulations and best wishes!

And here is another! On September 1, Fireman H. A. Killie, without any previous information to any one, and Miss Inez Grines of near Athens, Ohio, were married. Our best wishes go to them for a happy married life.

On August 28, William C. Adams, passenger engineer, passed away at his home at Newark, Ohio, death being due to an attack of acute indigestion. He had been ailing for two years with high blood pressure, but seemed in his usual health on the day previous to his death. He became very ill during the night and died at 1.00 o'clock. Mr. Adams entered the Baltimore and Ohio service as freight fireman on December 29, 1884; he was promoted to freight engineer on October 29, 1890, and to passenger engineer on December 9, 1909. He served in this capacity until his retirement, about two years ago. His last years of service were spent on the Newark-Cincinnati passenger run. He was a member of the Masonic Order, Odd Fellows and of the

Brotherhood of Locomotive Engineers. Our heartfelt sympathy is extended to his wife and two daughters in their hour of bereavement.

Effective August 16 the following changes were made in dispatcher's office, Chillicothe, Ohio, due to addition of third trick chief dispatcher: first trick chief dispatcher, C. D. Pairan; second trick chief, G. E. Davis; third trick chief, A. L. Johnson; swing chief and relief for three first trick dispatchers, R. R. Schwartzel. This change placed P. Matthews, second trick west; J. M. Iuler, second trick east; F. Donaldson, third trick west, and J. Gibson as regular relief dispatcher.

On August 26, V. V. Preston, third trick operator at Leesburg, Ohio, and Mrs. Frankie Lilly of that place were married. The happy pair are now enjoying their honeymoon in California. We are informed that Mr. Preston was considerably worried just previous to his marriage, for, because of the shortage of operators, it looked as though there would be no one to relieve him. However, after some little "juggling" around and keeping the "wire hot," it was arranged, and he went on his way rejoicing. Our best wishes for a happy married life.

Another young fireman was left at the home of Fireman and Mrs. William Ahrendt. The young gentleman has been given the name of Carl Frederick. Congratulations!

Machinist G. Sheldon recently had a narrow escape. While driving up shoes on the frame of engine 1475, a piece of cast iron flew off the shoe and would have destroyed the sight of his left eye, had he not been wearing a pair of goggles. The glass was badly shattered. Here is another case where the practice of Safety First paid.

When you see an employe make a careless move "call him down." Do not be afraid of hurting his feelings. It is far better to have his feelings hurt than his body injured. Practice Safety First.

Attention of all interested in freight claim prevention work is called to the date and place of these meetings—on the second Friday of each month at Chillicothe, Ohio. There is always an interesting subject up for discussion along the line of freight claim prevention at these meetings, and any new suggestion or item is welcome from any one.

We extend to George J. Miller, chief clerk to freight agent, Chillicothe, our sincerest sympathies in the loss of his mother, Mrs. Anna Miller, whose death occurred on August 18.

Fireman and Mrs. Joseph Baker were blessed when twin girls were left at their home on August 31. Congratulations!

Indiana Division

Correspondent, H. S. ADAMS, *Chief Clerk to Superintendent*

The following letter is self explanatory:
BRONSON, TEXAS, August 8, 1920.

BALTIMORE AND OHIO MAGAZINE,
Baltimore, Md.

Having once been employed on the Indiana Division of your great Railroad as foreman of construction, I decided to write and send you a picture of my Mexican construction outfit, now working on the great Santa Fe Railroad in Texas.

I was like the majority of my Eastern and Northern brothers when I came South. Possessed of a real hatred for a Mexican, I thought him no good whatever. But, since working Mexicans for the past eight months, I am convinced that they are good section and extra gang laborers. Had it not been for the Mexican labor throughout the Southwest during the past three years, our railroad here would have suffered badly.

When Mexicans finish dressing a piece of track it looks like it had a smoothing iron run over it. They use neither a measuring stick nor a straight edge, but with their eyes can start a great line and run it for miles as straight as the rail. They never become dissatisfied with their job, and never take a day off unless too sick to work.

I am putting up some real railroad here, but I oftentimes long to be back on the good old Baltimore and Ohio with this good Mexican gang.

With good wishes to the Baltimore and Ohio Railroad,

Yours truly,
(Signed) T. O. FERRELL.

Will you please send me one of your MAGAZINES?

Illinois Division

Correspondent, OMER T. GOFF, *Secretary to Superintendent*

Office of General Freight Agent,
St. Louis, Mo.

Correspondent, FRANCIS PIGLOSKY

It was with regret that we learned of the death of Miss Isabelle Kemp, sister of Victor Kemp, our bill of lading clerk. We extend our deepest sympathy.

T. O. Ferrell and his Mexican gang

Yard force at Rossford Hump Yard

Excerpts from a conversation regarding export bill of lading covering several hundred cotton sacks of grain.

Export Clerk—"Why don't you designate the kind of sacks?"

Stenographer—"What's the difference, sacks are sacks."

Export Clerk—"Yes, but they might be dressing sacques."

Wanted—Watchman, to watch Mr. Fry's new waste-basket.

Cases there and cases here,
Make a private office for Harry Cartier.

Question—What constitutes a private office?

Answer—Three walls adorned with pictures, a newly painted floor border and a green waste-basket.

Will some one ask Mr. Fry for the key to his office? No doubt, he'll give you the key to his cellar but not to his office, as in it there is something valuable.

Toledo Division

Correspondent, I. E. CLAYTON, *Division Operator*

The accompanying photograph was taken at Rossford Hump Yard. The men are, left to right, front row: C. Gars, engine-man; L. Thurston, switch tender; H. R. Steele, fireman; T. Moreland, C. A. Young, G. G. Avery, switchmen; E. L. Kelley, conductor; L. Bell, switchman; S. Pettigrew, switchman; B. W. Jeffords; T. King, yard clerk; W. G. Farling, general yardmaster; H. File, switchman. On foot-board: C. Sheer, switchman; E. Farley, baggagemaster; A. T. White, switchman; D. Bergman, switchman. Seated at top: Switchmen W. S. Gardner and E. L. Duddleston.

East Dayton

Correspondent, EDWARD MANNIX

The month of August has slipped by and still finds the shops and roundhouse with their whirl and hum, and not one accident to mar the ever careful attitude of its employees.

Our genial and hustling car foreman, Robert O'Neil, has just returned from his vacation, looking the picture of health. "Bob" spent some time around Baltimore and New York, and says a good word for the eastern cities.

On September 3 we had the pleasure of meeting J. M. Garvey, organizer of the Veteran Employees of the Baltimore and Ohio Railroad. The impression left by Mr. Garvey will be an inspiration to the younger employees and a strong incentive to the faithful Veterans who have rounded out years of usefulness and faithfulness to their employees. Come again, Mr. Garvey.

It is pleasing to know that one is not forgotten. Cards have been received from some of our employees from various parts of the country, with inquiries for the boys at the shops and good wishes for those they left behind. They still have a warm spot for Dayton.

J. J. Mahoney, one of our machinists, recently went on a short vacation of 10 days. When he returned the boys at the shops scarcely knew him. Inquiry? No, he did not fall out of a balloon, or anything like that, and was not on exhibition as a tattooed man. Ask John, he knows.

"Boob" McNutt has nothing on A. H. Windham, our boiler inspector, second shift. Recently "Al" got inside of a boiler to make an inspection. When Foreman F. G. Sehrt handed him a work report card, which read, "Engine burns too much coal," "Al" read the card and wrote on it, "Tell 'em not to put in so much."

"Andy" Dean, "Jack" Leahey and "Bill" Finley were deeply engaged in serious conversation the other day at noon meal. The writer happened to enter the office at the time, and the only part of the conversation overheard was, "Yes, those were good old days."

Now that the fall is fast approaching, the usual fall cleaning starts and ere the winter sets in upon us, East Dayton shops and roundhouse will be spick and span for the trials of cold weather.

Suggestions for Operators

THE following reprint of a portion of circular issued September 1, by M. E. Tuttle, division operator, Cleveland Division, contains some suggestions which will be of interest to other division operators and operators generally over the entire System:

CLEVELAND, OHIO, September 1, 1920.

All Concerned:

There is nothing in railroad work of more importance than the proper handling of TRAIN ORDERS. When you acknowl-

SMASHING SHOE PRICES

\$2.48

Work Shoes

Send No Money

And Dress Shoes at \$4.89

A Blow at Profiteering

\$2.48 for a pair of real honest built work shoes. Sounds impossible but it is true and the best part of it is that you do not have to send any money to prove it. Thousands have been satisfied.

The dress shoe we are offering at **\$4.89**, just think of it, **\$4.89** for a dress shoe. This in itself is the greatest bargain of the season, but in addition with every pair of dress shoes sold we will sell a pair of these work shoes for **\$2.48**. A price that sounds like the days before the war. Imagine for a total expenditure of **\$7.37** actually less than the value of the dress shoes you will have two pairs of shoes.

Send No Money, Just Send Your Order

and pay your postman \$7.37 and postage when the package arrives. You take no risk as the shoes will be sent to you under our iron clad guarantee of money back including postage if you are not fully satisfied.

We Positively Cannot Sell Either Pair of Shoes Separately

When ordering be sure to mention the size required on each pair of shoes.

WOLPER'S, CHICAGO

Dept. 151 1201-1209 West Van Buren St.

Let Us Send You A Suit

Made to your measure, payable after received, with the clear understanding that if the fit is not perfect or if you are not satisfied in every way, if you are not convinced you have received a fine, high grade, stylish, perfect-fitting tailored suit made to your measures and have saved \$15 to \$20, you are not under the slightest obligation to keep it.

Don't hesitate or feel timid, simply send the suit back, no cost to you. You are not out one penny. Any money you may have paid us is refunded at once.

SAMPLES FREE

Any man young or old interested in saving money, who wants to dress well and not feel extravagant is invited to write us for our free book of samples and fashions explaining everything. Please write letter or postal today, just say "Send me your samples" and get our whole proposition by return mail. Try it—costs you nothing—just a postal, get the free samples and prices anyway. You will learn something important about dressing well and saving money.

PARK TAILORING COMPANY

Dept. 426. Chicago, ILL.

edge receipt of a train order, you make yourself wholly responsible for its delivery and other work or conditions should not be allowed to take your attention from it until it has been delivered to the trains addressed. The lives of all persons on the trains concerned, whether employes or passengers, are in your care. Protect the trust placed in you.

In the year 1919 the Baltimore and Ohio System expended for tinware alone \$120,247.00. This included oil cans, funnels, measures, coal hods, signal lamps, lanterns, etc. It is felt that we have an over supply of some of the articles enumerated at different stations.

In addition to the necessary cans for oil, each telegraph office should have one coal hod, one lamp for train order signal, one

white and two red lanterns in condition for service. Check up and send all in excess of this number to Storekeeper, Lorain, showing on tag, where sent from and give me a list of all articles sent in.

SERVICE

Are you giving it?

Are you doing all you can?

Are you doing all you *should*?

Are you giving service commensurate with your wage?

Do you realize that RAILROAD jobs are bound to be the best jobs and the surest jobs in the future?

There is always something higher up in railroading, something worth trying for and, although it may come slowly, the surest way of reaching it is via the route known as SERVICE.

an increase in the number of shippers means more business; more business means more revenue; more revenue means better facilities, and so on around the cycle, and every irregular condition reported or corrected by an employe is a spoke in this mighty wheel.

Kentucky and Indiana Terminal Railroad Baseball Team

A GOOD many readers of the MAGAZINE do not know that in Louisville, Ky., the Kentucky and Indiana Terminal Railroad Company, which provides the facilities for the operation of the Baltimore and Ohio at Louisville, had one of the best amateur baseball teams in the country during the past season. They were the champions of the amateur industrial teams competing in Kentucky and lost by the close score of 2 to 1 in the National Amateur Baseball Federation's Championship in Indianapolis on September 11, to the Premier Club, amateur champions of that city.

The Kentucky and Indiana Terminal Railroad Company is owned jointly by the Baltimore and Ohio, Southern and Chicago, Indianapolis and Louisville Railroad Companies. George H. Campbell, assistant to president of the Baltimore and Ohio, is president of the K. & I.

The members of the team shown in the accompanying picture are, left to right:

Top row—D. Burke, yard clerk; W. Cummins, clerk; G. A. Harris, yard clerk; C. Humphries, machinist helper; William W. Thompson, clerk; B. Bossung, machinist helper; L. C. Higgins, yard clerk.

Bottom row—J. Schultz, interchange clerk; A. Bergeman, electrician helper; C. C. Hall, seal clerk; A. Thieman, route clerk; J. A. Howison, general freight agent (manager); E. C. O'Leary, crossing flagman; R. C. White, pipefitter helper; J. C. Burns, interchange clerk; L. Held, engine carpenter.

Safety Is First Aid to the Time-Table

By W. O. Johnson

Baggagemaster, Indiana Division

HAVE you ever thought of Safety as being a First Aid to the time-table?

Turn back to time-table No. 53, effective October 3, 1875. The schedule for our train No. 1 shows this train as leaving Cincinnati at 6.30 a. m. and arriving at St. Louis at 10.45 p. m., making the running time 16 hours, 15 minutes. Compare this with our present schedule of 9 hours, 25 minutes for No. 1. Considering this difference, the question naturally arises, "What has brought about this change?"

Fundamentally the growth of the Railroad has been due in part, at least, to Safety. If our Railroad had not been made a Safety Road, our trains would not be allowed to travel at the present high rate of speed. Safety has been a potent factor in bringing about the enviable reputation that places the Baltimore and Ohio in the top row of the world's transportation lines.

One of the many points in making the Railroad safe for speed is the care of its roadbeds. The use of rock ballast instead of cinders, and heavy rails instead of light ones, not only fits the road for fast travel but also increases train loads. A heavy train can play havoc with a light rail; in such a case, the rail tends to "spread" under the weight and, while the engine and the first two or three cars that follow it may be able to pass over a bad place, yet there is always the chance that the cars in the middle or on the end of the train will be derailed. The same thing is likely to happen when a washout occurs; cinders are more easily blown about by a hard wind or displaced by heavy rainfall. Because of this, the rock bed is the safer and not as susceptible to accidents of this nature.

When a fast road is a safe road, then it is the one that will be sought after by shippers;

The Star Kentucky and Indiana Terminal Railroad Baseball Team

Isn't it Worth the Effort?

In the little village of Green Spring, West Virginia, about twenty employes of the railroad have paid for their homes, or are buying them through the aid of the Relief Department.

We wish that we could show here a dozen little cottages or "homey" bungalows occupied by employes at this point. Such a picture would be an object lesson to many who at other points on the System are living in shacks, or over warehouses, or are begging for a chance to occupy any sort of rooms.

THE SECOND HOME GRANVILLE W. KAYLOR HAS BOUGHT THROUGH THE RELIEF DEPARTMENT. ISN'T IT A BEAUTY?

The picture on this page is a reproduction of the home of Granville W. Kaylor, manager operator at Green Spring. This is the second home which Mr. Kaylor has bought through the Relief Department.

It is a well-built, modern, eight-room house with reception hall, bath, acetylene lights, and is truly a home in which any man would take pride.

Mr. Kaylor set the ball rolling by writing to

DIVISION "S," RELIEF DEPARTMENT
BALTIMORE AND OHIO BUILDING
BALTIMORE, MARYLAND

Why not follow his example and see if you also cannot be the owner of a home?

Stifel's Indigo Cloth

Standard for over 75 years

STIFEL
REGISTERED

This is Mr. Charles Broll, one of the oldest engineers of the Baltimore and Ohio, who runs the famous "Royal Blue." Mr. Broll wears and swears by "true blue" Stifel's Indigo Cloth.

Since the time of the first railroads, strong, sturdy, fast-color, never-break-in-the-print Stifel's Indigo has been the popular garment cloth for railroad men. Before you buy

OVERALLS, COVERALLS, JUMPERS or UNIFORMS

look for this trade-mark on the back of the cloth inside the garment. It is the

guarantee of the genuine Stifel's Indigo Cloth, which never has been successfully imitated. Garments sold by dealers everywhere. We are makers of the cloth only.

Only
\$5.00
A Month

And all of this for \$5.00—only \$5.00 per month—a great reduction in watch prices—direct to you—positively the exact prices the wholesale dealer would have to pay.

Think of the high grade, guaranteed watch we offer here at such a remarkable price. And if you wish, you may pay this price at the rate of \$5.00 a month. Indeed, the days of exorbitant watch prices have passed. Write now.

See It First You don't pay a cent to anybody until you see the watch. You don't buy a

Burlington Watch without seeing it. Look at the splendid beauty of the watch itself. Thin model, handsomely shaped—aristocratic in every line. Then look at the works. There you will see the masterpiece of the watch makers' skill, a perfect timepiece adjusted to positions, temperature and isochronism.

Practically every vessel in the U. S. Navy has many Burlington watches aboard. Some have over 100 Burlingtons. The victory of the Burlington among the men in the U. S. Navy is testimony of Burlington superiority.

Send Your Name on This Free Coupon

Get the Burlington Watch Book by sending

this coupon now. You will know a lot more about watch buying when you read it. You will be able to "steer clear" of over-priced watches which are no better. Send the coupon today for the watch book and our offer

A Dreadful Offense

Titus Tiberius Smith was careful to give offense to no one, especially his wife. She was a masterful woman. Her home was her idol.

Titus Tiberius always opened the door with his handkerchief, lest his fingers would sully the brilliance of the brass knob.

"Titus," she said one evening, as he sank guiltily into a chair, "I can read you like a book. You've been doing something wrong! Did you scrape your boots before entering the hall?"

"Yes, my dear."

"Then what have you done?"

Titus blushed to the roots of his hair and clasped his shaking knees.

"Gladys," he stammered, "I hung my hat up carelessly and a raindrop fell from it on to the umbrella stand!"—*Exchange*.

STILL *the* GREATEST
MOTHER *in the* WORLD

How the Car Service Division of American Railway Association Handles Emergency Transportation Requirements

EARLY last summer the northwestern part of the country feared a shortage in coal during the coming winter. The newspapers featured prominently the subnormal coal movements to that point and the industries and the people of the Northwest importuned the Interstate Commerce Commission and the railroads to speed up the movement.

As is generally known, much of the coal for the Northwest is shipped from the States of Ohio, Kentucky, West Virginia and Pennsylvania to the great coal ports along Lake Erie, is thence trans-shipped by water to the docks on Lakes Erie and Michigan, and from there is forwarded by rail to the industries and other consumers further west. This coal must, of course, be moved during the season of lake navigation, ice usually beginning to form on the lakes about November 15.

Just how serious the condition was during the early summer may be seen from the following:

In normal years 30 per cent. of the so-called lake coal is shipped before July 1, and 90 per cent. of it before November 1. More specifically: On July 26, 1918, 11,300,000 tons had been sent to the lake ports; in 1919, 12,600,000 on the same date, but in 1920 on the same date only 6,300,000 tons had been shipped. This meant approximately only 50 per cent. of the normal movement, and quick and effective action was needed to prevent an actual coal famine.

The Car Service Division of the American Railway Association, of which W. L. Barnes is executive manager, is subordinate to the Advisory Committee of the Association of Railway Executives, of which President Willard is chairman. The Car Service Division works in close cooperation with the Interstate Commerce Commission, with commercial associations and the industries in general.

What was the result of its work in this particular case?

On October 1 of 1918, 25,000,000 tons of coal had been sent to the lake ports; in 1919, 20,000,000 tons; while in 1920 the movement had been so speeded up from July 26 on as to have placed at the lake ports for trans-shipment 18,000,000 tons.

In other words, in the short space of two months a subnormal supply of about 50 per cent. had been cut down to a subnormal supply of only about 10 per cent. And since October 1, coal has been kept moving to the lake ports in such large quantities as to obviate any further danger of a fuel famine in the Northwest, so far as the rail carriers are concerned.

How did the Car Service Division deal with this emergency?

On July 26, an order was issued by the Interstate Commerce Commission that 4,000 cars of coal should be shipped each day to Lake Erie ports until further notice. The Car Service Division, working in close cooperation with the Interstate Commerce Commission, then notified the railroads who handled this coal business, about twenty in number, as to the number of cars they should allocate for this particular movement, and the allocation and movement were so well carried out that on November 1 there was as much coal standing at and in transit to lake ports as would maintain the daily rate of dumping there for six to eight days *without further shipments*.

Another case will help illustrate the work of the Car Service Division.

In deference to urgent representations made before the Interstate Commerce Commission by the governors of the New England States, and the representatives of their industries and railroads, the Interstate Commerce Commission on August 2, last, issued a preferential order that 1,250,000 tons of coal per month should be sent to that section until further notice, and that whatever preferential movement and priority in car supply necessary to bring about this result should be effected.

The railroads which handled coal to New England were notified as to the number of cars they should supply for this movement and coal was soon moving to New England in large quantities. So effectively was this emergency handled that the preferential order was suspended from September 2 to September 6, and again on September 17 indefinitely.

Other similar emergency situations are being and will be handled in a like manner by the Car Service Division. The work of the Division is

particularly valuable in the movement of perishable foodstuffs—fruit, vegetables and the like, which have to be moved quickly and in large quantities in order to prevent spoilage. When a section of the country producing foodstuffs requires an abnormal supply of cars for its movement, the Car Service Division allocates extra cars to the railroads serving such sections, and sees that the commodities are adequately and promptly moved.

At this time large numbers of box cars are being sent from eastern roads to the West to take care of the grain which is waiting to be moved. And when the cotton growers want to move their crop or large beet sugar interests want to get their crop promptly to the refineries, the Car Service Division arranges for the car supply from the various interested railroads on an equitable basis.

Twice a month the Car Service Division gets a report from all railroads as to the number and kind of cars on their lines. This is an exact barometer of car supply in the various sections of the country and indicates how cars can be moved from one section to another to take care of emergencies and with the least possible interference with the normal movement of traffic.

The organization of the Car Service Division is as follows:

Executive Manager, W. L. Barnes; Managers, W. C. Kendall, L. M. Betts, A. G. Gutheim, W. J. McGarry, D. E. Spangler, M. B. Casey, C. F. Stewart; Assistant to Executive Manager, C. A. Buch.

Each one of these managers has a specific kind of work to look after. For instance, one has open top cars, another box cars, and each is a trained railroad man with special preparation in the particular line in his charge.

The Car Service Division also employs a number of inspectors whose duty it is to see that the orders of the Division as to pro rata movements, allocation of cars, etc., are followed.

As the work of the Division daily demonstrates its effectiveness in handling economically and promptly the transportation needs of the country, so the cooperation of the railroads increases. A transportation company might feel that an order for alloca-

Curtis Bay Piers Again Break All Records for Coal Loading

ABOUT two weeks before the record-breaking day of October 26 at the Curtis Bay Coal Piers, several officials of the Maryland District were investigating a jam on one of the McMyler dumpers. A car had jumped the track and the question was asked as to who was responsible.

"That was my fault."

The officials turned to see in the speaker a bright-looking young fellow who was acting as Barney operator. Further questioning disclosed that he had only been on the job a few days and that lack of experience had something at least to do with his bumping the car too hard and throwing it off the track. His frank willingness to shoulder the blame was a good sign in his favor.

This young chap was one of the prominent actors in the record-breaking dumping and loading on October 26.

Again, the same officials were at the pier and helping to make the record. Again they were standing at the aforementioned dumper and there they saw the same fellow hard at his job and handling it efficiently.

"How are we going along now?" he called to General Superintendent Scheer. "I dumped more cars in the last hour than ever have been dumped on this machine before, and together (the two dumpers) we dumped 52 cars in the hour."

He smiled through the black soot on his face as he said it and in his eyes glistened the enthusiasm and determination which makes possible the success of this and every other record-breaking feat man strives to accomplish.

But it wasn't the Barney operator alone. Way out in Brunswick officials had been planning, *and are still planning*, and employes had been working, *and are still working*, to shoot the long steel trains of coal into the Curtis Bay yard in such classification as to yard facilities, pools of coal and other factors entering into the situation as to bring about the highest efficiency.

All along the line from Brunswick to tidewater, thousands of factors operate to facilitate the movement of the trains. Men must not only handle their routine work well but be able to make the right decision and the right movement in an emergency. Adequate motive power has to be available—and this is no small job in these days of locomotive

shortage. The men in the Curtis Bay yard have to be on the job to get the best results out of the track facilities. The complicated and expensive machinery at the coal pier must be kept in prime condition to prevent any breaking down of the plant. Finally, supervision must see to it that there is a nice adjustment between the dumping of the coal and docking of the coal boats at the piers.

On September 16, 1919, the first big dumping record was hung up at the new and old piers at Curtis Bay, 424 cars in 24 hours.

On April 20 this record was eclipsed, when 655 cars were dumped and loaded.

On October 12, the 734 cars handled showed a further handsome increase in efficiency.

On October 19, 910 cars had been handled and every indication pointed to a record of 1,000 cars on that day when just one little thing went wrong. One man fell down on his job, a nut which he should have been watching backed off an eccentric strap bolt, and the resulting delay prevented the 1,000 car record being reached.

Generally speaking, it was what railroaders call "a refinement in operation" that made possible the record-breaking dumping of 1,082 cars, 52,790 tons, on October 26.

1. The coal dumping machinery was right.

2. The boats were docked at the pier with little delay.

3. Coal of the proper pools was available and was properly classified in the yard to enable its being sent up the hill tracks leading to the dumpers without delay.

4. Motive power was available in the yard to move the cars promptly from the empty tracks.

There was just one factor, the failure of one boat to dock at the time ordered (and this was in a large measure beyond the control of Baltimore and Ohio men), which prevented an even greater record. But we won't go into that failure now. Instead, we will look forward with General Superintendent Scheer and Superintendent Hoskins to the day which will see 1,200 cars dumped and which they confidently believe is not far distant.

It is hardly necessary to add that every man who had a part in the making of this splendid record has the sincere thanks of the Management for his interest and his work.

Car Mile Rhyme

There was a crooked man,
Who never wore a smile,
He watched the trains go creeping on
While he sat on a stile;
He got his neck all twisted
From gazing at the stars.
He could have made it straighter
If he'd helped to move the cars.

Weather Hot, Passenger Irritated—Good Meals and Good Service—Presto! Passenger Contented and Appreciative!

AMERICAN RED CROSS

NATIONAL HEADQUARTERS
WASHINGTON, D. C.

M. G. SCHEITLIN, DIRECTOR
C. S. CLARK, ASSOCIATE DIRECTOR

Editor, Baltimore and Ohio Magazine,
Mount Royal Station,
Baltimore, Md.

My dear Sir:

I had occasion to make the trip between Washington and Chicago recently on Baltimore and Ohio train No. 505, leaving at 1.35 in the afternoon.

It was warm and I was not in a very pleasant frame of mind, but the courtesy of the conductor and the members of the entire train crew made the trip so pleasant that I soon forgot the weather and irritation in the pleasure of the trip. The dining car service both for lunch and dinner was especially good and the food all that could be desired.

I am prompted to write this letter to show my appreciation of the courtesy and good service on the part of Baltimore and Ohio employes assigned to train No. 505.

Very truly yours,

(Signed) C. S. CLARK,
Associate Director, Fourth Roll Call.

October 28, 1920.

Top to bottom, left to right: Armored car, built by German war prisoners, and captured by Czechs from Bolsheviks; field piece mounted on flat car; this Red Cross hospital car did not get immunity; after the battle, the dead; armored engine used by Czechs; what the Czechs did to a Bolshevik engine; a part of the same wreck

Through Soviet Russia with the Czecho-Slovaks

(Continued from September issue)

By Colonel George H. Emerson

Chief of Motive Power

More information concerning the murder of the Russian royal family has recently come to light, confirming, in general, the story Colonel Emerson related as having been told him by the Czechs. Intensely interesting in this connection is the following editorial from the *New York Times*, under the caption, "A Visit to Yurovsky."

Elizabethan dramatists never imagined anything more horrible than the butchery of Czar Nicholas and his family in the cellar of the dreadful prison house at Ekaterinburg. The investigation made by Admiral Kolchak's direction brought out the truth, which seemed likely to be hidden forever in the mine shaft of the Kopchiki forest. All the guilty are known, and some of them apparently still live. The Bolsheviks themselves do not like to talk about the crime, and in the fullness of time it may prove a stronger influence in their undoing than the despotism and iniquities of their Government. In an article in *The Nineteenth Century* Captain Francis McCullagh, a British army officer and intrepid correspondent, reconstructs the story and adds details to a tragedy that will always hold the attention of mankind. He dared to live for several weeks under the Red Government at Ekaterinburg to seek and talk to witnesses, and he made a call upon the arch-murderer, Yurovsky, alone, because he could get no Bolshevik to keep him company. Most of McCullagh's material is, of course, gleaned from the official Kolchak records, but the narrative he presents is more nearly complete and dramatic than that of any of his predecessors. He talked with everybody who knew anything about the deed, he visited the forest where Yurovsky endeavored to destroy all the evidence of it, and he gives an unforgettable picture of the Ippatiev house where the imperial family dragged out a tortured existence until an end was put to it with revolver, bayonet and butt by Yurovsky, his Red companions and the Lettish soldiers.

The cellar where the murders were done is now used as a Bolshevik club. When McCullagh was in Ekaterinburg, Yurovsky, who shot the Czar himself, although as "commandant" of Ippatievsky House he might have ordered one of his villainous Letts to kill Nicholas, occupied a house within plain sight of the scene of the crime. Yurovsky could see the cellar from his drawing-room window. He might have hidden himself in Moscow or skulked in Petrograd, but he was drawn as by a magnet to the vicinage. Possibly he thought himself safer in the town where he still had some influence, malign as it was. McCullagh is of the opinion that the Czar had no foreboding of the fate of himself and his household when Yurovsky entered his bedroom on the night of July 16—without ceremony, as usual—and told him to get up, as the Czechs were near the town in their advance to make an end of the Red Government and seize its officials. "It would be better for you and your family," said the always unwelcome visitor, "to come down into the cellar, as there may be fighting in the streets and stray bullets may come through these windows." The Czechs were still far away; they did not reach the suburbs of the town for ten days. From Sverdlov, the "Red Czar," the order had come to destroy the imperial family, and Yurovsky had had it countersigned by the local soviet. Captain McCullagh says that "no record has been found to show that the Bolshevik Government ordered the murder, which was probably due to Yurovsky's fear that the Czar might be rescued by the Czecho-Slovaks." As it is doubtful whether the "commandant" would have taken his orders from the local Soviet alone, Captain McCullagh is probably wrong about this. Does not the Kolchak investigation show that he had instructions from some one "higher up," and that Yurovsky would not go ahead until the local Reds indorsed them?

A few minutes after the Czar, the Czarina, and her son and daughters, together with Dr. Botkin and three servants, descended into the cellar their bodies lay on the floor. Nicholas tried to make an appeal to the executioners to spare his wife and children, but his lips were still moving when he was shot through the head by Yurovsky. The carrying of the bodies to the forest, the disfigurement of the faces with sulphuric acid, and the burning of bodies and clothing to destroy the last vestige of evidence have been described in affidavits made in the Kolchak investigation. Yurovsky, who superintended the hideous business, failed in his purpose. It was possible to demonstrate the tragedy from bones and jewels found in the ashes.

McCullagh's visit to Yurovsky is new. Sergiev, the Bolshevik correspondent of the *Pravda*, had declined to face the man whose hands are stained with the blood of the Czar and who is detested even by his associates. The Englishman knocked at the door of the house, and, no one coming, he went around to a side door and walked in. A stout woman was cooking in the kitchen. He asked boldly for comrade Yurovsky, saying that he wanted to see him about an insurance report he had written. She shuffled off with distrust in her eyes, but after a while returned to say Yurovsky would see his visitor. The murderer, dressed in pajamas and a long shuba, his feet in cloth slippers, was seen to be a man of 40, prematurely old, thickset, sallow, neglectful of his person, and suspicious. He was not long for this world, thought his visitor, who scoffs at the report that Yurovsky has since been tried and executed. They talked about insurance, McCullagh not being able to find words to ask about the tragedy. It was plainly in the mind of Yurovsky, who was unnerved. But he did talk about the sixty White suspects he had put to death. "What are sixty men?" he asked contemptuously. He seemed such a devil incarnate that the Englishman was ill at ease and nervous as the murderer. The young son and daughter of Yurovsky came in. He seemed to read in McCullagh's mind the unasked question: "Did you kill the little lame boy also (the invalid heir to the Russian throne, Alexis)?" About all the visitor learned was that Yurovsky had been very fond of his mother, that mother who was proud that her son had immortalized himself by killing the Czar. At the end of the interview Yurovsky was in a state of collapse, although none of the dreadful questions had been asked.

It will be remembered that our first chapter told of the parley between the Bolsheviks and the Czechs, as arranged by Colonel Emerson, of the Czechs' decision to fight their way east to Vladivostok and of Colonel Emerson's decision to offer his services to them and share in their adventure. The second chapter, September issue, told of the events centering around the destruction of Tunnel No. 39 at Lake Baikal, including the destruction of the car ferry, Baikal, and General Guida's brilliant flank movement, which resulted in the capturing of nine Bolshevik supply trains.

ON AUGUST 2, while still supervising the clearing of Tunnel No. 39 at Lake Baikal, I received instructions from General Guida, commander-in-chief of the Czechs, to report to him at the front. He was located at Mourino, further east along the lake.

A locomotive and small Russian box car were placed at my disposal and, on arrival at the front, the train was stopped by the commander of the Czech rear guard. He advised that the nine trains captured by General Guida (as related in the account of his victorious flank movement in the September issue of the *MAGAZINE*) were at the next siding

east, and that there was considerable fighting still going on. Remnants of the Bolshevik forces had been dispersed into the woods and, from this vantage point, were giving the Czechs along the railroad a good deal of trouble with intermittent fire.

I finally received permission to proceed, and the commander of the rear guard asked me to deliver four captured war prisoners to General Ushakoff, the chief of staff with General Guida. I agreed and the four were placed in my car, three German war prisoners and one Red Russian. One of the Germans was badly wounded, his leg being broken in two places.

One of the Germans could talk English and I asked him why he had taken up arms with the Bolsheviks. At first he said that he had been forced to do so, but later confessed that it was part of the German plan in weakening the Allied defense in Russia and that he had joined the Reds, fully realizing that if captured, it meant instant death for him.

A few miles further east, where the captured equipment was located, we found two completely armored cars which had been built at Chita by German war prisoners aiding the Bolsheviks. They used American gondolas of fifty ton capacity, covering them with boiler plate extending

down below the journal boxes. The locomotives were also completely armored with the same material to protect boilers, running gear and fenders, as may be seen from the accompanying illustration. Each of the armored cars was equipped with two three-inch field guns, with five machine guns on each side.

Seven of the captured trains were made up entirely of box cars for the accommodation of soldiers. Two of the trains consisted of passenger equipment and one was of fifteen coaches, ten of which were fitted up as hospital cars and painted with Red Cross insignia. They were furnished with portable cots and had large side doors for the easy portage of the wounded in and out. Two of the cars were completely equipped as operating quarters.

A Barbarous Warfare

One of these operating cars was in charge of two Russian Red Cross women nurses. I found one of them badly wounded—shot through the body and both legs—in the first car I inspected. The seventeen patients in this car had been killed outright by hand grenades during the course of the battle. It was a cruel warfare with no quarter given and none received. The Reds were waging a war of extermination and the Czechs had to retaliate in kind.

The other girl nurse of the Red Cross had gotten out of the car in time to escape the hand grenades but had been shot as she was leaving the

platform. We did what we could for the girls, binding up their wounds and promising that we would have them moved promptly for medical attention.

The fierceness of this battle may be understood from the fact that when I arrived at the scene there were still fifteen hundred dead bodies lying in the immediate vicinity.

On August 2, at 5.00 p. m., I reported to General Guida at Mourino. He was greatly disturbed because he had discovered the large proportion of German, Austrian and Magyar war prisoners in the ranks opposing him, all of them armed with Japanese rifles and equipment.

Bolsheviki Using Japanese Rifles

Here was a pretty mess. For months we had not heard an authentic report from Washington, London or Paris. We did not know who was winning the war, nor what was the latest alignment of the nations, despite the fact that this was after Chateau-Thierry and Belleau Woods.

No wonder Guida was disturbed, for he knew that if the Japanese had, by any chance, joined the Central Powers, our chances of getting through Manchuria were practically nil.

I told him that in the early stages of the war the Japanese had sold the Russian Government a large number of standard rifles and other equipment. He then called attention to the fact that the captured rifles were the Japanese standard 25 caliber,

while he understood that the rifles sold the Russians in the early part of the war were of 30 caliber.

Here was where exact information which I had secured from the Bolsheviks in Vladivostok helped clarify the situation. There I had made an inspection of the arsenal during the previous spring and had been informed by the officer in charge that the thousands of cases in storage contained Japanese rifles of 25 caliber and that they had not been used on that account by the Russians during the early stages of the war. Russian ammunition would not fit them.

I further advised General Guida that I had a complete record of the rifles referred to, in my file, and that I felt sure that the Bolsheviks had issued these Japanese rifles from storage in Vladivostok to the war prisoners. Later on it developed that this was the case.

While General Guida was presiding at some courts-martial I hunted up the Red Cross officer of the Czechs and told him about the women Red Cross nurses of the Bolsheviks whom I had found in the shattered hospital car. I asked him if he would not give them immediate attention, but he refused to help them in any way. Another illustration of the kind of warfare they were then waging!

Later in the day a large number of Central Power war prisoners, proved to be such, were lined up in front of firing squads and potted. Among them were the four I had brought up to the front in my box car.

On this and opposite page are connecting sections of Russian map of Siberia. English names have been shown to help reader follow the march of the Czechs

Among the Bolshevik retainers also captured at this battle, were a number of boys and two Chinamen. They were about to be killed along with the rest of them when I found that one of the Chinamen spoke good English. He said that he and his companions had been forced to fight for the Bolsheviks on pain of death if they did not do so. I gave this information to the commander of the guard, who then decided that they should not be shot but whipped. After seeing this horrible exhibition of cruelty, I was almost sorry I had interposed to save them from shooting. They were stripped and tied face downward on heavy logs. A Cossack whip with 36-inch lash and a lead ball in the end, was given to a big and powerful man. Forty-five lashes were then delivered with all his strength on the bare skin of each of the poor devils. Every stroke brought blood and the victims were unconscious from the pain and the loss of blood after the whipping.

At 8.00 that night General Guida and I proceeded back to the tunnel, arriving next morning. On August 10, after blocking the main body of the Czechs for thirty days, it had been so far cleared as to permit the passage of eight *echelons* (trains). Then came intermittent slides of rocks and soil, one of which resulted in the derailment of a train. On August 13, twelve more trains moved through. Small slides still continued, however, until September 16, when we finally

completed the job, proceeding with our engineering train to the front. We were still ahead of the main body of the Czechs.

During the work on the tunnel we built a set of forty-foot leads at the shops at Sludianka, and fitted up an engine with a friction hoist, to operate a pile driver. The largest machine of that type on the Siberian Railroad had leads only fourteen feet long and the hammer weighed only 1,000 pounds. We anticipated heavy bridge reconstruction east of the tunnel and knew that this machine would save much time. At Sluzon, however, a short distance east of the tunnel, our trains ran into a section of the preceding train, demolishing several of our cars, and with it that one containing the new pile driver, which was completely demolished.

Russian Psychology

The crews in charge of the colliding trains were arrested and the line officer, a White Russian, in charge of our engineering train, decreed that they should be shot immediately, but I persuaded him to defer action until a full investigation had been made.

This developed that the engineer in charge of our train had lost control because of insufficient braking power and through no fault of his own. The crew of the train ahead saw our train approaching at high speed and, knowing that a collision was inevitable, and with fine presence

of mind, they pulled a coupling pin, cutting off their engine and started it back on the main track to meet the approaching engine of our train. This engine bore the brunt of the collision and saved the much worse collision which would have occurred had it not been cut off and run back. For it was connected to a train with cars filled with soldiers and it is quite certain that many of them would have been killed.

After the facts had thus been set before the commander of our train, he changed his decree about shooting the train crews, to one that they should be decorated for their presence of mind and quick action. So much for Russian psychology.

Railroad Warfare

At Tankhoi the vanguard of the Czechs again succeeded in getting into contact with the Bolsheviks, and captured another armored train. The battle occurred just east of the town. The Bolsheviks had placed a car of high explosives ahead of an engine and started this engine back, without crew, on the track on which we were proceeding toward it. It was the custom of the Czechs, however, to run their trains with a single flat car, loaded with emergency material such as rails, bolts, etc., ahead of the engine. When the officer in charge of our first train saw the oncoming engine and car dispatched by the Bolsheviks, he cut off this emergency car in front of our engine and suc-

Just above left corner of this section will be found Lake Baikal, around which many of the interesting incidents in this story took place

ceeded in backing his train a sufficient distance away from the point of the collision to avoid damaging it. The explosion which came with the collision was a terrific one, razing a number of buildings and obliterating all of the vegetation in the vicinity.

A little beyond this point, east, the Czechs found that the Bolsheviks were strongly entrenched behind barbed wire entanglements and, in accordance with their favorite method of warfare, they immediately started a flank movement, coming up in the rear of the Bolsheviks and routing them.

When our engineering train reached Tankhoi, where this fighting took place, we found the crew of the tug and raft which had sunk the steamer *Baikal*, as previously related. While interviewing the members of the crew concerning this exploit, a message was received saying that the *Angara*, the other car ferry, had surrendered to the Czechs, thus cleaning up all opposition on Lake *Baikal*.

At Myssovia, a short distance east, we found that the first car ferry sunk, the *Baikal*, was lying about half a mile off shore. We took a tug and went aboard her to see if we could find any equipment which would enable us to make a new pile driver. There was nothing of this kind on the boat, however, it having been pretty well gutted by fire, and was still burning.

The Czechs now had two complete armored trains, and two of the armored cars were used in the vanguard ahead of the fifteen trains of Czechs and Russians proceeding east, and which left Myssovia just before our arrival there. They were on the eastbound main track and we followed them on the westbound main track, supported by eight trains of soldiers that had been stationed at Myssovia.

Thirty-three versts east of Myssovia we found a train derailed and both main tracks blocked. The Bolsheviks had again been trapped, and had lost all their equipment and many men during the surprise and the ensuing panic.

This fight had been brought about by Colonel Ushakoff, General Guida's chief of staff, whom I had first met at Irkutsk. He was one of the most likeable and intrepid soldiers I have ever met, a White Russian, who had fought in the Russian Army during the whole war. He was placed with the Czechs when they first deserted Austria and offered their services to the Allies as a part of the Russian army. After the Bolshevik surrender to Berlin at Brest-Litovsk, he had continued with the Czechs, fighting his way east with them as

Guida's chief of staff in the hope of again being able to give his services to the Allies on the western front in France.

It was Ushakoff who engineered the brilliant sortie which resulted in the sinking of the car ferry *Baikal*. Later he had crossed Lake *Baikal*, going in at Posylskaya, informed the Bolshevik commissaire there that he himself was a commissaire and had eighty Bolsheviks with him. He told them that if explosives and supplies could be gotten to him promptly from Verkneudinsk, he would recross the lake and trap the Czechs by blowing up the railroad tunnels. He himself sent a wire to Verkneudinsk to this effect and was advised that action would be taken in accordance with his request. While he was talking with the Bolshevik commander, he learned that a number of Bolshevik trains would be dispatched east to set up a new line of defense. He then made a quick detour through the woods to a point about two miles east along the track. Securing tools from a handcar house, he loosened a

number of rails on both the east and westbound tracks, cut the telegraph wires and fastened them to the loosened rails. Then, when the trains, running at high speed, were almost upon the loosened rails, he and his men, hidden in the woods, pulled the rails out of the tracks, derailling the trains and causing much loss of life among the Bolsheviks.

He then made another detour west, finally striking in again toward the right-of-way. Seeing an armored car approaching from the west, he mistook it for the first armored car of the Czech forces and flagged it, informing the officer in charge of his latest *coup*. It turned out to be the rear guard of the Bolsheviks, who recognized Ushakoff and his men. The machine guns were turned on the little detachment and in the ensuing battle Ushakoff and all but eight of his eighty men were killed. Ushakoff himself was cruelly tortured and left to bleed to death. I have a picture of him with his ears cut off and other members of his body terribly mutilated.

F. X. Milholland Made Assistant to Senior Vice-President

ON October 9, Senior Vice-President George M. Shriver announced the promotion of Francis X. Milholland to the position of assistant to senior vice-president, effective September 1. This is a new position created by Mr. Shriver for Mr. Milholland, who has been his chief clerk for many years.

Mr. Milholland was born August 21, 1880, at Baltimore, and attended the public schools of that city for three years, prior to entering Loyola

College in September, 1892. Here he graduated with the degree of A. B. in 1899, immediately pursuing a post-graduate course and receiving the degree of A. M. in 1900.

In August of that year he entered the service of the Company as stenographer and clerk in the Transportation Department, remaining there until April, 1904, when he was transferred to the President's office under Mr. Shriver, who was then assistant to the president. On December 1 of the same year Mr. Milholland was appointed secretary to Mr. Shriver. He continued as such until Mr. Shriver was elected second vice-president in January, 1911, when he was appointed chief clerk of the department, which position he has held up to the present time.

In addition to his general collegiate education, Mr. Milholland pursued the study of law, receiving the degree of LL. B. from the Maryland University School of Law, in 1910, being admitted to the Maryland Bar in the summer of that year. Subsequently when Johns Hopkins University inaugurated its new course of night lectures during the winter of 1916-17 in Business Economics, Mr. Milholland was one of the charter students, completing the course in "Corporate Finance" and receiving the University certificate therefor in June, 1917.

Proper Salvaging of Wrecked Freight an Important Factor in Reducing Loss and Damage

By C. C. Glessner
General Freight Claim Agent

THE public, generally, is interested in derailments of passenger trains, especially to know if any of their relatives or friends have been injured. Business men, while equally interested in passenger derailments, are also interested in freight derailments, to know if any of their shipments have been damaged. Notwithstanding the fact that every precaution and Safety device is used to eliminate such disasters, it is un-

fortunate that they occur, regardless of the precautions taken to avoid them.

Freight derailments on our line for the year 1919 cost us, in settlement of loss and damage claims for the commodities concerned, \$275,326, and for the nine months ended September 30, 1920, \$204,199. These amounts do not include delay to trains caused by derailments, damage to track, equipment, etc. Certainly

the field is big enough to warrant a material reduction in this item.

Division Representatives of the Freight Claim Department are trained in the salvaging of merchandise and are instructed to attend all derailments of merchandise shipments, to assist the official in charge in salvaging such merchandise as conditions will permit, it being appreciated, at the same time, that the first consideration should be given to clearing the track to get trains moving promptly. But it is felt that more merchandise wrecked in these derailments can be saved in the future than has been saved in the past.

Wreck trains are, or should be, supplied with a number of tarpaulins of different sizes to protect shipments in case of bad weather; with burlap

(Continued on page 25)

The Beauty at Busted Gulch

By Frank Kavanaugh

BILL RIGGLE was just one jump from a big promotion when No. 32, the fast western limited of the Great Eastern, found the block against her and stopped right in front of the little station wherein Bill held forth. This circumstance would not have changed the course of the even tenor of Bill's ways had not Mickie Grogan, who was pulling the latch at the front end of the 32, swung his weight on the whistle rope four times, thereby notifying all within hearing that No. 32 wanted the block and should have it. But Grogan didn't get it. Extra west engine 1284 had piled several cars over the two tracks, thereby laying out the 32 for several hours. That layout sealed Bill Riggle's fate.

The passengers left the train to stretch their legs a little. Bill was idle, for the man at "CW" tower was handling the wreck, or at least that part of it necessitating the use of the wires, and Bill had nothing to do except watch the passengers stroll about while he checked up his "OH" book. Apparently he was busy at that task when a voice behind him ventured:

"That man at 'CW' breaks the dispatcher often, doesn't he? A ham, eh?"

Bill wheeled to meet the eyes of a vision in white. She looked so fresh and dainty that Bill mentally cursed himself for leaving the remains of his lunch on the ticket case.

"You're a telegrapher?" he asked.

"Yes," the vision smiled. "I work at Busted Gulch, Kansas, for the Winnipeg, Vinegar Valley and Mexican Railroad. I'm on my vacation now, and this layout's going to cause me trouble. If I don't get into Chicago in time to catch No. 2 on the Santa Fe tomorrow night my pass'll run out, and those Santa Fe men wouldn't carry their mother's pictures. I've been trying to find out by listening just how long we're in for here, but that ham at 'CW' doesn't seem to know."

"So you'll have to pay your fare from Chicago on, then?" Bill asked. "That's tough."

"That's the trouble," the vision said. "I wouldn't mind that, but if I allow myself a meal between here and Chicago, I'll have just five cents when I reach that city. And five cents won't buy anything now." As she finished her recital the brown eyes were growing suspiciously moist.

Bill thought of the four figures in his bank book, and said:

"If you will accept it I'll lend you the money. It'll just be lending a helping hand to one of the craft, anyhow. I've asked help lots of times and been asked lots of times. You can return it at your pleasure."

"If you—"

Bill waved his hand as if dismissing the subject, and drew a roll from his pocket.

"My name is Hazel Winner," the girl said, "and I'll return the money as soon as I reach Busted Gulch."

After a delay of four hours No. 32 proceeded on its way and Bill Riggle's heart went with it. Besides lunching with Bill, the vision had accompanied him over the little town, "sat in" on a car report and otherwise passed the hours pleasantly.

A week later Bill received a letter containing the money he had advanced the girl, accompanied by a few words of thanks. He replied and soon a correspondence grew until Bill's letters went West with the regularity of the Overland Express. Then came the day when he could stand it no longer. A letter to the proper official of the W. V. V. & M. R. R. brought the glad news that a man of Bill's attainments would be a welcome addition to the force of the line, and that night Bill's resignation went in by wire and a week later he was speeding toward Busted Gulch.

* * * * *

"It's this way," one of the W. V. V. & M. officials was saying to Bill a few days after his arrival in the West. "Busted Gulch is the center of a great wheat growing region and recently they've struck oil in that territory, but try as we can we do not get our share of the outbound stuff originating there. There's the Transcontinental and Southern Kansas to buck. Both have direct lines into Kansas City and so on East. Our eastern representatives get our share of inbound haul, but the elevator men and oil men seem to think the other roads give them the best service and they get the haul. Now you'll get the station and you'll get a reasonable time in which to make good, but if you fail to make good—well, it takes but 30 seconds to fire a man out here."

"How soon'll the auditor be out to check me in?" Bill asked by way of

reply. "If I fail to make good I'll beat you to the canning part—I'll resign so quick it'll make your head swim."

* * * * *

Hazel Winner was day operator at the station, so Bill did not look at the desolate little prairie town with critical eyes. When he learned that the girl had been born there, a product of the dugout and grasshopper period of the West, Bill saw several beauties of the place which were not apparent to the naked eye. But a week there showed him that all the outward haul went to the other roads, yet he hated to acknowledge defeat. It was embarrassing, to say the least.

One evening he stood on the station platform and watched No. 3 rush by. As the engineer called for the interlocking signal which would give him a clear track over the other two roads, an idea came to him. The next day he dropped his work at noon and, hiring a horse, rode out into the country. Five miles from town he stopped under the shade of a lone tree. A farmer, who had been cutting weeds in the fence corners, was sharpening his scythe.

"That's fine wheat you have," Bill remarked.

"It'll be the best crop in years," the farmer said, "if—". He hesitated. "But aw hell, what's the use?"

"What's wrong?" Bill asked, interested.

"See that wheat," and the farmer waved his hand over the expanse. "I've got 400 acres and my son has the same. When wheat starts ripening it ripens all at once and has to be harvested. There's probably one man here that wants work, where we'll need twenty. Half the wheat'll go to ruin. It's discouraging."

"No men, eh?"

"No men. We could get through, perhaps, if we had advance notice of the weather. Then we could cut all we could in the lowlands during the warm weather and then, if a rain happened to come, cut on the higher places just after. But we get government reports the day after the weather comes."

"How many farmers are there in your fix around here?"

"Probably a hundred."

"Organized?"

"We have a good live Grange."

"I've a proposition to put up to you," said Bill. "I'm the new station agent on the V. V. I want the wheat business out of here and the elevators won't give it to my road. You get your local Grange together and all of you who have 'phones shall have

weather reports every night at nine o'clock. I'll put it up to the passenger agents back East to ship all the college boys possible out here. I think I can get two hundred. Then the road has a surfacing gang working near Busted Gulch. They quit at five o'clock every afternoon. If you farmers will furnish motor cars I think I can get most of them to work, say, four hours every evening. All I ask in return is that you make those elevator men give me some of the outward business. You'll find railroad weather reports more accurate than those sent out by the weather bureau."

At about 9 o'clock that night Bill called one of the big oil well drilling plants, located about 8 miles from town. When the man at the other end of the line answered the call, Bill started the conversation:

"The Standard has posted a raise of 6 cents a barrel on crude in Wichita."

"That's fine," the oil man said. "Who's this talking?"

"The agent of the V. V. in Busted Gulch. I'm going to give out information to you oil men every evening at 9 o'clock. Know any news?"

"Two of my drillers are going to quit Saturday. Suppose you could pick up a couple in town?"

"I'll try."

"If you do I'll remember you. And say, my wife tells me she wants a paper of needles, those with big eyes, to be sent out tomorrow by parcel post. Guess you could go by the Boston Store tonight and tell 'em to send 'em out. I run an account there."

"They'll be out, all right."

"Good night."

"Good night."

Four days later the same driller called up the V. V. station:

"You the man that sent the needles out the other day?"

"Yes," Bill truthfully replied.

"Can you get the section men or someone to put that old loading wharf below town in condition? I've brought in a well here and will have another in a few days and have no tankage. There's no use trying to get tanks or tank builders, but if you'll fix up that wharf I'll give your road my oil if you can get tank cars."

"Hook up your pipes and we'll be ready for you," Bill assured him.

* * * * *

The yellowing grain was alive with harvesters, both mechanical and human, within a month. Bill had No. 3 stopped at Busted Gulch to take on and discharge passengers. Miss Winner's hours were arranged so that she was on hand to meet it and still not violate the Federal "hog law," which permits telegraphers to work but 8 hours a day. This gave Bill an excuse to stay at the station until after 9 o'clock and then accompany the girl home. Things were beginning to come his way. Fitch, manager of the largest elevator, called the V. V. station and ordered cars set at the loading chutes. The other elevator managers followed suit. So far Bill's weather prognostications hadn't erred and the men of the extra surfacing gang, with the lure of 70 cents per hour extra, went out and worked from four to five hours each evening. Colleges in the East whose students had a faint idea that Indians were the chief product of Kansas, found an opportunity for men who were working their way through school to make enough during a short summer to last them through the season. The leaven planted with the farmers and oil men was working. Station receipts rose and Bill's stock rose with them. What the two competitive roads were hauling was a minor quantity. A nice letter came, like a pat on the back, from the general freight offices. The V. V. was getting the outward business.

It was near the close of the wheat shipping season. Bill, up to his eyes in work, found time to accompany his pretty operator home from work one night. Although he was dead tired he was elated over the fact that he had billed out 50 cars of wheat that day and his outward oil shipments were limited only by the supply of tank cars. Every farmer and every oil man in the county was his friend.

Bill and the girl passed into a little park, and he led her to a seat. The moon was rising, a golden eagle in a

"Hazel," he began uncertainly, "I want to speak to you about something very—"

canopy of blue; somewhere uptown a barber shop quartette sang a doleful darkey melody; a dog howled at the moon, and from his seat Bill could hear the last sounds of No. 3's exhaust as she passed out of sight over the prairie. He recollected he had sold 12 tickets for that train, where not one was sold before he took the station. The whole world was at peace with the night.

"Hazel," he began, uncertainly, "I want to speak to you about something very—"

"If it's about that 31 order I balled up today, Mr. Riggle," she interrupted, "I couldn't help it. That hind brakeman of Scaly Miller's was leaning over my shoulder asking me which I preferred, caramels or chocolates."

"I'll boot him clear out of the right-of-way!" Bill exclaimed, hotly. "But that wasn't what I wanted to speak about. You must have realized before now what brought me to this country. You. Now that I have made good I want you. Will you marry me, sweetheart?"

Hazel hesitated.

"I am sorry, Mr. Riggle," she said. "I can't marry you. I was married a week ago to Mike Mulligan, the section boss. We are keeping our marriage secret until Mike gets a house built and I get a raise of wages. Do you know," she added, sweetly, "I could, I believe, run a station about as well as you could now, by following your plans. If they promote you, I would like to get this station."

In a daze Bill reached the station, after seeing Hazel, or, rather, Mrs. Mike Mulligan, home. Savagely he pounced upon the telegraph key:

"This is the thirtieth second. Accept resignation. Send man at once to check me out."

"RIGGLE."

A train pulled in and with the sharp whistle of brakes stopped before the station. The door opened and a man came in. Without hesitation he opened the door of the telegraph office and walked in.

"Is the fairy here?" he asked. "If that hoghead had the nerve of a sick sheep he'd have come in before No. 3, but he laid us out on a short time order. The fairy's gone, is she?"

"If you are speaking of Mrs. Mike Mulligan," Bill said, with emphasis on the "Mrs.," she left here some time ago."

"Mrs. Mike Mulligan!" the brakeman exclaimed. "You don't mean—"

"I do," Bill said, rising.

"You're a liar—you're sweet on her yourself!"

The brakeman heaved a heavy box

of soft candy at Bill's head. Bill dodged and the box expended itself on the ticket case. Then Bill charged.

Ten minutes later the crew of extra west engine 246 pried the two men loose. They looked at each other through four blackening eyes and shook hands.

"You remember the old saw about

there being good fish in the sea that ain't all caught yet?" the brakeman asked.

"Sure," Bill replied.

"We're going in the hole here for an extra east. Let's go up town and see an eye doctor and have a smoke together."

They did.

Railroad Made Splendid Showing in Handling of Specials of American Bankers' Association on October 23

PROUD as were our officials and employes over the smashing of all coal loading records at the Curtis Bay Coal Piers on October 26, some of them were heard to say that they thought the handling of special passenger trains over the Baltimore and Baltimore Terminal Divisions on October 23 was an even finer accomplishment.

This was the day set by the Fidelity Trust and Deposit Company of Baltimore for the excursion which they tendered to the American Bankers' Association, convening in Washington, to inspect the harbor of Baltimore and visit the interesting State Capitol and Naval Academy at Annapolis. The preparations made by this financial institution were comprehensive indeed, and their efforts to provide a comfortable, safe, and quick schedule for their guests, were ably seconded by the handling of the special trains by the Baltimore and Ohio.

The vicinity of Pier 6 at Locust Point had the appearance of a real passenger terminal when the bankers' specials began to arrive. Nine yard tracks were assigned for the incoming trains; new cinder platforms, were built between tracks and railings; gates and signs provided adequate

facilities for the quick and comfortable guidance of the excursionists from the trains to the boats docked at Pier 6.

A baggage room, telegraph and radio offices, uniformed patrolmen, fire fighters and equipment from the ranks of our employes, Relief Department doctors and hospital facilities, flood lights which made the vicinity of Pier 6 almost as bright as daylight for a section about a quarter of a mile square, are some of the details arranged by the Railroad. These were splendidly complemented by the beautifully decorated steamboats "Dreamland" and "Louise," provided by the Fidelity Trust and Deposit Company, and by the hydroplanes, destroyers and aeroplanes which accompanied these boats on their trip down the Bay and back.

The four trains, each consisting of 12 Pullmans, arrived from Washington at ten minute intervals beginning at 9.10 a. m. While the guests were on the boats, these trains were thoroughly cleaned for the return trip. The boats returned at 7.15 p. m. and loading began at 7.27, five trains being dispatched between that time and 8.04. Two of the trains went to Washington, two to Mount Royal

At Pier 6, Locust Point, on their way to the special steamboats

Station, Baltimore, and one, carrying a diner, to New York.

Besides the officers and members of the American Bankers' Association, the guests included members of the diplomatic corps in Washington, several Cabinet officers and a number of other government officials. The Baltimore and Ohio was decidedly "on inspection" and it passed the test without an unfavorable mark on the record. From superinten-

dent to switch tender, our men cooperated splendidly to make this movement a perfect one and they are all to be heartily congratulated.

It is interesting to know also that, including the special trains of the American Bankers' Association, there were, all told, 37 special trains handled on the Baltimore Division on that day, everyone of them on time, in addition to our regular freight and passenger business. Some record!

Work of Car Service Division

(Continued from page 5)

tion of certain of its cars to sections off its lines would work hardship on its current traffic requirements. But when this particular company needs for its own requirements, on its own lines, an abnormal supply of cars for a particular emergency, and the Car Service Division arranges to supply them by allocation from other railroads, the niceness of the arrangement and the effectiveness and fairness of the work of the Car Service Division are quickly appreciated.

If there were an ample car supply on all the railroads of the United States at all times, there would be no need for the Car Service Division.

Its real purpose, in cooperation with the Interstate Commerce Commission, is to carry out the true spirit of the Transportation Act of 1920, which provides that *in emergencies* the Interstate Commerce Commission is authorized to use all cars and engines on the railroads so as to best handle existing transportation requirements. The law further provides that the Interstate Commerce Commission shall exercise its authority through such agencies as it may determine, and the railroads have created the Car Service Division and placed it at the disposal of the Commission.

D. S. Patcher Recalls the "Good Old Days"

GARRETT, INDIANA,
September 1, 1920.

Dere Ed.:

I've been askin' myself why is it nobody don't like nobody else no more an' the whole world is upset an' everybody thinks that everybody else is crooked 'cept themselves—an' some of 'em ain't quite sure about hisself—always complainin' that the other fella is a-gittin' the best of it. Everybody is accusin' everybody else of profiteerin', an' etc., when they is all doin' it theirselves in one way or a nother. I've been tryin' to dope out a system what wood make 'em all luv one a nother once agin, jus' like they useter in the good old days of long ago, when nobody didn't have no job nor no money an' they all had to work together an' luv one a nother so's they cud get some liver an' onions. An' now they most all got incums an' they won't never eat nothin' 'cept hummin' birds an' quails. An' they don't want no jobs, an' them what says they do want a job all has a trade, something like shovelin' snow in summer or plantin' corn in winter, an' they won't never do nothin' else 'cuz the union won't

let 'em. An' they jus' hang around on the street corners 'cuz there ain't no other place to loaf no more cents the 18th commandment. An' they cuss an' discuss everbody an' tell big yarns about how it orter be done, an, jus' how they wood do it if they wuz Mister Woodrow. Truth is, they're jus' plain sore 'cuz their own home town baseball team ain't in the Leeg o' Nashuns, so's they cud win the pennant.

Most o' them aint got no inishitive, or watever you call it, theirselves, but they abuse the fella what's got nerve enuff to try to do somethin'. They jump on poor Mister Woodrow an' give him the dickens for everything them guys down at Washin'ton d c don't do, while he jus' sets quiet an' lets 'em call him names, 'cuz he nos abuse is like a rubber ball—it allers rebounds an' hits the guy what's slingin' it.

I'm a-thinkin' if it wood make 'em happy, a whole lot of them guys what longs for them good old days, orter be taken back there so's they cud work 12 to 18 ours a day an' woodn't never have no time to stir up no trouble no more.

Why is it, Ed., these guys is always a-tellin' the world their grievances an' keepin' their benifits, what is bigger, under their hat? These kind o' wops gets my goat. How do they git that-away? You tell 'em, Ed.; I no you can, cuz editors is smart 'n everything; if they wuzn't oful smart, they wood of exhausted their vocabylaries afore this time, an' be all tired out theirselves instead of makin' the publick tired, a-figgerin' quotas an' budgets, an' how many million soljers wood an' how-many woodn't be in Timbuctoo nex' tuesday 2 o'clock, if the U. S. remembered the Leeg 'o Nashuns.

Yours truly,

D. S. PATCHER.

Fifty New Mikados Ordered

The Baltimore and Ohio Railroad recently placed an order for 50 Mikado type heavy freight locomotives with the Baldwin Locomotive Works, the purchase of the equipment to be financed in part through the National Railway Service Corporation. The corporation, which was formed by S. Davies Warfield, head of the National Association of Owners of Railroad Securities, will take care of 60 per cent. of the equipment trust certificates which will be issued by the Baltimore and Ohio, the remainder being financed by the Government. The locomotives will be delivered about the middle of the Winter.

They Increased Car Miles

The proverb "A good mechanic can work with poor tools" puts the employes mentioned in the following note in the preferred class. Their spirit was unaffected by the breaking of the stoker. They surmounted the handicap and finished their job. They supported the Company splendidly in the present hard drive to increase car miles.

Engineer H. D. McGaughey and Fireman H. E. Pritchett, Pittsburgh Division, accepted engine 4529 at Wheeling Junction with stoker inoperative. Fireman Pritchett fired engine all the way to Connellsville by hand. Both the engineer and the fireman have been commended for their unusual effort and interest displayed.

They Increased Car Miles

Safety Section

Why Railroad Employees Should Take an Active Interest in Accident Prevention

By G. S. Crites

Division Engineer, Baltimore Division

A RAILROAD employe has all the reasons for being "safe" and being interested in "Accident Prevention" that any person has; which reasons are many. Added are reasons particularly applicable to railroading in general.

All persons are brought into this world equipped with the usual number of hands, arms, feet, legs, etc. It is the general plan of their Maker that they should be so prepared for work, and it would seem that had it not been intended that each and all should protect and use such equipment, it would never have been given them in the first place.

In other words, any person is morally lax who allows needless exposure of himself to dangers that may injure, cripple or kill him. He owes it as a duty to his Maker to not carelessly loose or injure any part of his body and he owes the same duty to not needlessly hazard his own death by accident.

From a purely selfish point of view any person should want to be as fully equipped physically as it is possible for him to be in order that he may not be handicapped in his pursuit of the good things of life. Almost daily we see living lessons of people struggling through life on an unequal footing with their fellows just because they were careless or were not "safe" at some critical moment. How much worse to our own mental well-being would it be if we had to see and think of some one going through this world permanently injured or crippled by a careless act of our own. We cannot imagine a much greater burden that could be carried.

Any person owes it to his family that he shall not become a burden upon them and also owes it to them that he shall fully assume his duties as a part of the family. This cannot be done if by carelessness or by unsafe practices he is injured, crippled or killed. Any person who needlessly exposes himself to danger cannot have the feeling of respect for his family that any decent person should have.

Any person has some obligations

as a citizen that should be fulfilled. Through health and modern medical resources he is assured a reasonably safe trip into the world. Laws prevent, or at least, come near preventing, his being taken out of the world

before his time through crime. Laws protect him on every side and assure him a reasonably unmolested pursuit of happiness and the comforts of life. The debt to society that has been and is constantly being incurred should be paid. A part of a man may not be able to meet this debt and may become totally insolvent and a burden upon society. During the early stages of man, society removed from their midst by death those who were apt to be a burden, and at present certain wild birds and wild beasts kill off their injured fellows. We have advanced beyond this beastly or primitive state and now aid and assist our less fortunate brother, but we all owe it to society to avoid accidents to our-

A Few Reasons Why There Are Many Accidents

A Safety Rule positively forbids a man to step upon the approaching locomotive at the front end, and common sense should prompt him to follow the injunction continually. Yet here's a typical case! A brakeman in the Parkersburg, W. Va., high yard threw a switch and as the locomotive reached him he tried to board the front step. One foot was resting on a pile of coal near the track. His foot slipped, he fell. His toes rested on the track and they were mashed when the wheels of the locomotive passed over them.

Five years ago a car repairman, lately working at Parkersburg, W. Va., lost three fingers in an accident. Naturally, one would suppose that he was going to play the game absolutely safely after that. A few weeks ago he has occasion to jack-up a car that was to be repaired at Parkersburg yard. He got a jack which he afterwards declared "was an old one and worn out." After jacking up the car he started to work. The jack slipped and the bolster fell on the springs, with the repairman's two remaining fingers between them. A part of one of them was pinched off. He now has one good finger on the hand.

The baggagemaster on a passenger train on the Baltimore Division discovered that a strip of wood 7 feet long and 2 inches wide was torn from the floor of the car. Instead of placing it in a corner until he reached the terminal, he glanced out the door while the train was making about 30 miles an hour, saw no one along the track, and hurled the piece of wood from the door. It struck the side of the car and bounded into the bushes along the track. There were four trackmen there, who had stepped into the bushes when the train approached. The stick of wood struck one of them on the head, knocked him down and severely injured him.

Walking through steam proved a dangerous and painful experience for a turntable operator at Garrett, Ind. He was going through the roundhouse and in passing an engine that was "blowing off" he dived through the steam cloud. A tender repairman on the opposite side of the steam cloud did likewise at the same moment. They met "head-on" in the middle of the cloud. The turntable operator was prostrated and his knee severely injured. The tender repairman nursed an injured nose for several days.

None of us should handle air equipment unless we are absolutely familiar with it and it is our duty to do so. A man in charge of a rail loader on the Baltimore Division lost his life in failing to follow this rule. The conductor of a work train had uncoupled cars and placed them as requested by the foreman. The man in charge of the rail loader wanted another move made. He failed to tell the train crew, but set out to make the move himself. He uncoupled the car ahead of the rail loader, gave the engineer a signal to pull ahead a few feet. He failed to turn the angle cock on the rear cut and walked directly behind the coupler on the forward cut. The rear cut drifted into the car behind which the man was walking and crushed him.

Loose boards had been noticed on the coal tippie at New Castle Junction, Pa., but no one repaired them. One day a laborer carrying water set his buckets down at the edge of the tippie while he wiped the perspiration from his head. An engine on the tippie jarred off a loose board, which fell, striking the laborer on the head. Immediately afterwards the loose boards were removed from the tippie. Too late!

selves and, in as far as it is in our power to prevent, keep others from meeting with accidents.

An unsafe person is a nasty fellow to have around. We feel uncomfortable when he comes about. We would not like to see him messed up nor do we want any of his careless acts to mess us up. We owe it to the people that come in contact with us or our acts that we be "safe" and

we also owe it to them that we will do what we can to keep the other fellow "safe."

These are a few of the many reasons why any person should be "safe," but we as railroad employes have further reasons for being "safe" and preventing accidents.

Railroading has always been hazardous. Big, heavy masses are moved at high rates of speed, and in conse-

quence there are dangers lurking in almost any corner of a railroad you care to be. There are dangers for the employes, for the users of the facilities furnished and for those who trespass upon the properties. Knowing the dangers, it is our duty to make a forceful drive to prevent accidents to ourselves or to others.

Today railroading is the greatest big game there is. Being big it is the target of the many who court favor by sharp practices, petty politics, minor favors, or by downright "Redism." Any accident that happens on or around a railroad is bait for these harpies to use in their attacks. For the good of the country as a whole, railroads must be successful and one way to make them successful is to make them as "safe" as practicable. Over 90 per cent. of all their accidents may be traced to frailties of human nature and these we can reduce largely if we will. Every accident prevented lessens the political harpies' bait.

Those who use our road furnish the money to pay our wages and give us the necessary equipment, tools and material to work with. These patrons should be assured that they will be safe while on the premises or property of the railroad and that they may make their schedules reasonably close. Accidents break schedules and may endanger the lives or limbs of patrons. Also, accidents may retard the movement of or mess up or destroy commodities handled. Such occurrences make dissatisfied patrons and dissatisfied patrons will not put up the money to pay our wages if they can help it. For our pocket book's sake, we should be interested in accident prevention.

There have been certain traditions built up around our railroad during the 90 years and more of its existence. These traditions have been cemented together by the thoughts, toil and very lives of those who have passed before us. And it is our duty to keep these traditions clear and clean. In the same manner that these records have been handed down to us, we in turn will pass them on to those who follow us. In passing there will be added the results of our thoughts, toil and maybe our life; so let us see that we pass on a record of Safety that will be a help and inspiration to those who take up our work where we leave it.

Each of us can recount many other reasons why railroad employes should take an active interest in accident prevention, so we will touch upon only one other. If an employee is not loyal, he is not anything. We must be loyal if we are to be worth

Total Injuries by Months:

January, 302; February, 239; March, 303; April, 282; May, 313; June, 307; July, 307; August, 300.

* The man hours worked at Ivorydale during July, as published in the October issue, should have been 181,420 instead of 81,420.

Closing Date on Essay Contest, "No-Accident Campaign," Extended to December 1

It was announced on page 4 of the October issue that the subject of the essay contest was "How We Can Help in the 'No-Accident Campaign.'" This was an error, the correct subject, as announced in the literature issued by the Safety Department, being, "*Why Railroad Employes Should Take an Active Interest in Safety.*" All essays submitted on EITHER subject, however, will receive the same consideration, but it is requested that all employes who are advised of the correct subject in time, submit their essays on "*Why Railroad Employes Should Take an Active Interest in Safety.*" Because of this error in the October issue the closing date on the essay contest will be extended to December 1. The "No-Accident Campaign" itself was concluded on the date originally set, November 16.

A recapitulation of the prizes to be awarded, follows:

FIRST

The pennant described on this page will be awarded to each winning division.

The pennants for the winning divisions in the "No-Accident Campaigns" are beautiful. They are sixteen feet long and eight wide, the body a deep royal blue in color, with a white border all around, and the letters in white. The SAFETY design is painted in gold, two shades of blue and white. The materials used are the best obtainable and the pennants will long be admired where flown by the winning divisions.

SECOND

Each winning division will be given a banquet and entertainment soon after the close of the campaign. One hundred employes on each winning division, representing all departments, will be chosen by lot to attend this celebration.

THIRD

Three prizes of \$25.00, \$15.00 and \$10.00 respectively, on both the Eastern and Western Lines (six prizes altogether), will be given for the best, second best and third best articles submitted to the Editor of the MAGAZINE on the subject "WHY RAILROAD EMPLOYES SHOULD TAKE AN ACTIVE INTEREST IN SAFETY."

This competition is open to all employes. The trackman or section foreman has as much chance of winning a prize as the division engineer; the freight handler, as the agent; the trainman, as the trainmaster; the machinist, as the master mechanic; the clerk as the superintendent. It is suggested that each employe who enters the competition treat the subject from the standpoint of his kind of work. This is not a condition of the contest, however.

Wherever possible, the articles submitted should be typewritten, but employes not having typewriter facilities can submit in long hand. Write on one side of the sheet only, allowing plenty of space between lines. Do not place any evidence of authorship of article either on envelope in which article is mailed or on article itself. But with article enclose a blank envelope with a slip inside giving name, position and address of writer. The authors of the articles will not be known, even to the judges, until the winning contributions have been decided upon.

The following officials have again kindly consented to act as judges in the competition:

EASTERN LINES

F. E. BLASER, assistant to vice-president.
J. T. CARROLL, general superintendent motive power.
H. B. VOORHEES, general manager, New York Terminal lines.
EARL STIMSON, chief engineer maintenance.
E. T. HORN, general supervisor terminals.

WESTERN LINES

J. B. CAROTHERS, assistant to general manager.
E. G. LANE, engineer maintenance of way.
G. D. BROOKE, superintendent of transportation.
W. M. MALTHANER, superintendent motive power, North-west District.

The winning articles will be published in the MAGAZINE and contributions must be mailed to the Editor, Mount Royal Station, Baltimore, Md., by December 1.

anything to the railroad. By being loyal we don't mean loyal in the way a louse is loyal to the unfortunate who is infested with it and its kindred. Such loyalty is displayed by an employee who says, "The Baltimore and Ohio is a great railroad and a fine one to work for," and then proceeds to give a poor or lax hour's

work for a good hour's pay, or by his carelessness and indifference causes damage to properties or injury to a fellow employe. If we are loyal we must take an interest in accident prevention. Loyal to ourselves, loyal to our fellows, loyal to our officers and certainly loyal to the Baltimore and Ohio.

Section Foreman Points Way to Safety by Example and Precept. He Keeps His Men and Himself Safe

ONE of the best illustrations of how to make our Railroad the *safest* Railroad is contained in the letter quoted below. If every section foreman would follow the example of Mr. French, deaths and injuries and money losses would be cut down to the minimum. It is not too late now for others to join him in his laudable work, to help make the

Safety work on the railroad the success it should be.

Here is the pointed story about Section Foreman French and his men:

BALTIMORE, Md., October 4, 1920.

R. B. WHITE, Superintendent,
Baltimore Division,
Baltimore, Md.

Dear Sir—Section foremen are having 15-minute weekly Safety dis-

cussions with their men at lunch hour. Section Foreman J. F. French, on Section 59 at Washington Junction, Md., under date of September 30, 1920, reports one of these meetings as follows:

"I have held Safety meeting of gang and read instructions to my men. I find it helps to do this, and I also speak to them on Safety every day.

"I have been working for the Company 20 years and never have got hurt myself. I have been foreman for 9 years and have never had one of my men hurt."

Section Foreman French keeps a very good and safe section, and it might be you would care to call the attention of Editor of the BALTIMORE AND OHIO MAGAZINE to his letter.

Yours truly,

G. S. CRITES.

Division Engineer.

"Safety First" Beatitudes

Blessed is the man who weareth his goggles, for he shall never be in darkness.

Blessed is the helper that keepeth the castings piled properly, for he shall never cause his brother to suffer a crushed foot.

Blessed is the sweeper that keepeth the aisles clean, for his path shall shine bright for his fellow men.

Blessed is the machinist that taketh extra care while at his machine, for his home will never be darkened by sorrow.

Blessed be the bench hand that keepeth his tools dressed, for burrs therefrom shall never lodge in his brother's eye.

Blessed is the truck driver that exerciseth care, for he shall never say to the coroner or to his victim's family that "he didn't mean to crush out the life of their loved one."

Blessed be the man that keepeth his body in good physical condition, for he shall sleep well and not be tormented by aches and pains.

Blessed be the man in the Receiving Department who turns down nails, for he shall never have the doctor poking iodine soaked gauze into nail wounds.

Blessed be those who practice Safety First, for they shall work in peace and shall dwell with the righteous forever.—*The Gospel fellow.*

"Produce! Produce! Were it but the most pitiful infinitesimal fraction of a product—produce it in God's name! 'Tis the utmost thou hast in thee. Out with it, then! Whatsoever thy hand findeth to do, do it with thy whole might. Work while it is called Today, for the Night cometh, wherein no man can work."—*Carlyle.*

Statistics show that the transportation needs of each person in the United States average 11 tons of freight moved 1 mile, daily.

If, through failure in transportation, less than the regular tonnage is moved, then some persons or some communities suffer.

The ton miles per car per day are dependent on:

(a) Tons loaded per car.

(b) Miles per car per day.

Think of these figures and do not overlook an opportunity to save a "car a day."

1—Sir Barton. 2—Trainer Bedwell. 3—Commander J. K. L. Ross, the owner of Sir Barton and other famous race horses. 4—Sir Barton leaving his "sleeping car." 5—Stalls used on American Railway Express cars for traveling thoroughbreds. 6—H. H. Taggart, division passenger agent

Sir Barton Talks for Publication

RACE horses are not generally supposed to talk for publication. Their principal business is to keep their owners' colors in front coming down the home stretch and, when they have proved their own racing mettle, to retire to those wonderful breeding farms and there to transmit their sturdy qualities to their sons and daughters.

But I am going to make an exception this time. First, because I do not know any other class of people who are more interested in me and other race horses than you railroad folk. Second, because railroad people always try to take good care of me when I am traveling about the country. The train crew always know I am aboard. In fact, they usually come down to try to take a peek at me. And then, I am sure, the engineer strives to handle his train a little more gently than he ordinarily would, so as to save me from bruises or the breaking of my legs.

Only this morning when I came in to the Laurel station, there were quite a number of railroad people there to see me. Mr. Taggart, Baltimore Division Passenger Agent, wanted to be sure that my car was handled properly; and then Mr. Luckey, the railroad photographer, got these pictures of me as I was going over to my owner's stable. Pretty good pictures, don't you think? And I am proud to have them on the same page with those of my trainer, Mr. Bedwell, who takes such good care of me, and of Mr. Ross, my owner, who, if I do say it myself, is very fond of me.

Then there were other Baltimore and Ohio men there, men in uniform who handle the race trains out to the track. They all remarked how well I looked and what a fine horse I was. Then they got busy with those little racing books and pencils, trying to pick the winners in the races to be run that afternoon. I could tell them how impossible it is for them to "beat the races," because of my great experience. But that is not my business.

I often hear people say, "Wonder how they make race horses?"

Well, there isn't any secret about it. Of course, I and all other good race horses come from extremely aristocratic families. My father was the well known Starshoot, and my mother the much admired Lady

Sterling. But my raising was much like that of any ordinary colt, except that I had the very greenest grass and the purest water, the sweetest carrots and the cleanest oats and hay. I was allowed to romp around the fields just like other colts, to get hearty and strong, before I started to match my strength with other young racing horses.

Now I am four years old, and what a world of experience I have had in that short time! Racing here and racing there under the orange and black of my owner, and (you will pardon my pride) almost always winning.

You know how wild the people in the grandstands go when the race is on. Well, I get even more excited. With the band playing and the people cheering, hats waving and other fine horses on your flanks, striving to beat you to the wire, it takes some nerve to keep your head, to respond instantly to the slightest wish or whisper of your jockey, to fight off the challengers and—to win! No wonder I sometimes tremble after a race. It isn't that I am all tuckered out nor that I am frightened. It is just the "let down" after the nervous strain. I feel just like I heard Mr. Bedwell, my trainer, express himself the other day—"just like a nervous lady."

Then comes the proud march past

the cheering people. Of course, I like that; to hear the shouts of my supporters and to see the loving glances of the pretty women who watch me as I go back to my quarters.

There I am petted and patted by all the grooms and stable boys. They do take such good care of me! Up at four o'clock in the morning to give me my breakfast and always on the job to see that I am comfortable and do not catch cold.

The stalls which you see in the train picture are not the kind I travel in. I have a big box stall, sometimes to myself and sometimes with a running mate for company's sake, with deep, thick straw under foot and my groom always there to take care of me.

What is that you say: "How does it feel to lose a race?"

Well, if you don't know, I hope you will never have to learn. It made me feel pretty badly last time it happened, because there were so many, many people who thought and hoped I was going to win. Yes, I was all choked up over that race, even though I knew I had done my very best—had given to my owner, trainer and well wishers all that was in me. But then my grief did not last long, after all. For right after the race, Mr. Ross, my owner, came over to my stall, put his arm around my neck and whispered in my ear: "Never mind, Sir Barton, you ran a good race. You did the best you could, old fellow, and I can't ask more. I am always going to take care of you like the grand, good and faithful horse you have been to me."

Baltimore Officers and Employees Subscribe Over \$11,000 to University Hospital Fund

THE Baltimore and Ohio made a splendid showing in the recent campaign of the University Hospital in Baltimore for funds. This hospital, it will be remembered, has a Baltimore and Ohio ward for the accommodation of sick and injured employees, which has recently been enlarged and refitted. The hospital is close to our properties in Baltimore and is largely used by our own people, and these facts made the appeal of more than ordinary interest to local employees.

The complete results are given in the following letter from Mr. Murray, who had charge of the subscriptions on the Baltimore and Ohio:

OCTOBER 29, 1920.

To Heads of Departments:

Referring to our appeal of October

4 in regard to the University Hospital Fund:

I am enclosing statement showing contributions made to this Fund by officers and employees of the various departments of the Baltimore and Ohio, as follows:

Cash	\$ 7,424.78
Pledges.....	3,602.00
Total	\$11,026.78

The Baltimore and Ohio officers and employees have always displayed a fine sympathy and lofty spirit in responding to every appeal that has been made during and since the War. There has been no undertaking, whether in helping the Government by lending their money for Liberty Bonds or for humanitarian purposes,

in which they have not been splendidly generous. In this particular instance, the gifts have far exceeded the largest amount contributed for any other similar purpose. Therefore, it is with renewed pleasure I am conveying the appreciation of the Hospital establishment, that of the General Committee, and to which I sincerely add my own, for the large

offering made and for the spirit in which it was done. And, will you not also kindly convey to the various committees helping to bring about this magnificent result, our grateful acknowledgment for their zealous assistance?

Very truly yours,

JAMES S. MURRAY,
Assistant to President.

Sounds Like Fiction

The following is from the Montreal, Can., *Gazette* of October 2, 1895:

NEW YORK—The Delaware and Lackawanna and Western has taken the initiative in advancing the price of anthracite coal at tidewater. The new schedule is \$3.75 a ton for stove and correspondingly for other grades.

Salvaging Wrecked Freight

(Continued from page 13)

bags, paper bags, twine, small quantity of lumber, shooks, nails, etc., to be used in salvaging the freight so far as it is possible to do so. In handling heavy articles with the crane, care should be used in placing the hooks or chain on the shipment, so as to eliminate as much damage as possible.

Here is a specific illustration:

Cars loaded with caustic soda in drums were derailed. In picking up

these drums it was done with a hook similar to ice tongs and the hooks penetrated the drums, permitting air to get to the soda, thereby causing the soda to lose its chemical value. We are now presented with a claim of \$1,300 to cover the value of this consignment.

This is but one of many similar instances. A little thought, a little careful judgment, and handling the derailed freight as if it were our own, will help us cut down our claims arising from derailments.

ranks are going to continue our drive for greater, and still greater, efficiency.

Other railroads have boasted of the loyalty of their employes, of the splendid *esprit de corps* that holds their men at their tasks in the face of any odds. This also is a characteristic of the Baltimore and Ohio employe, because of the common knowledge that our railroad is doing better work than ever.

A Nickel a Day

Note—The following is a copy of a letter sent by Master Carpenter R. C. Henderson to the employes of his department on the Toledo Division.

IN a magazine which I read a few days ago, the Editor had compiled figures on the railroad employes in this country. The following is what he found:

"A NICKEL A DAY"

"If each of the 2,000,000 employes in railway service, from the waterboy on the extra gang to the highest executive, saves five cents for his road each day, by greater and more intelligent effort; by greater care of plant, materials and fuel; by the elimination of waste; or by the adoption of improved methods, the total saving in a year of 300 working days will be \$30,000,000, or enough to buy 400 locomotives, 10,000 freight cars or 600,000 tons of rail. Or suppose that each of the 500,000 maintenance of way employes saves five cents a day in this way, this alone will aggregate \$7,500,000 in a year, or enough to buy over 5,000,000 ties."

On the Toledo Division there is an average of 800 employes in the Maintenance of Way Department. The five cents per day would amount to about \$1,000 per year. With about 100 employes in the B. and O. Department the amount would be about \$1,500. I am quite sure we can save as he states, or more, if we put our shoulders to the wheel and shove just a little harder. Let us try.

One of the things our superintendent has promised to do is to increase the car mileage on the Toledo Division. As we are in the business solely to give efficient transportation, let us do all we can to make his promise good. There are numerous ways we can help on this. Cars must be loaded and unloaded without delay; checking up Company material each day, regardless of to whom it is consigned, and doing everything we can to speed up car movements.

How the New Castle Division Has Increased its Net Train Load

By A. C. Harris

Assistant Chief Clerk

THE figures issued recently in the statement, "Net Train Load—January, 1916, to December, 1920," disclose some very interesting data and, so far as the New Castle Division is concerned, the results indicated are certainly gratifying.

In analyzing any set of figures showing an increase in train load there are several important factors that must be given serious consideration before arriving at any conclusion. Increased efficiency can only be granted as an actual fact where it is shown that the train loading has increased over previous periods under exactly the same operating conditions.

An increase in the train load is naturally to be expected where,—

- 1st—Heavier power is furnished.
- 2d—Curves and grades are eliminated or reduced.
- 3d—Radical changes in operating standards are made to permit handling heavier trains.

Business will, of course, fluctuate to a great extent, and the falling off of business in any one direction and the resultant necessity of moving power, either light or with reduced trains, seriously affects the average train load. But under ordinary circumstances this can be disregarded, for such conditions are not infrequently met with each year and the general average will show clearly the efficiency attained.

Beginning with the fiscal year of 1912, the average net train load on the New Castle Division for each year follows:

YEAR	FISCAL OR CALENDAR	NET TRAIN LOAD
1912	Fiscal	764
1913	Fiscal	825
1914	Fiscal	758
1915	Fiscal	908
1916	Fiscal	965
1916	Calendar	950
1917	Calendar	1027
1918	Calendar	1059
1919	Calendar	1132
1920	January to July, inclusive	1130

Approximately

While this statement shows a general encouraging progress in heavier train loading through all these years, the intensive campaign in this direction apparently did not begin to bear real fruit until 1917. During this year and the succeeding years the average has greatly improved. No material changes in the motive power or in the physical conditions of the division can explain the increase in train load since 1917, and it can only be attributed to wise leadership, careful planning and team work in increasing efficiency.

During 1917 and the early part of 1918 Superintendent Van Horn made great strides towards the standards set, and our present Superintendent Stevens has been able not only to keep up the pace but to surpass all previous records. This improvement has been made during a period of extraordinary demand for labor, at prices much beyond the reach of the railroads of the country, and the forced use of much inferior labor. In 1920 the climax was reached when experienced men deserted the railroad service in appalling numbers. The ranks were filled with any class of labor that could be secured, without regard to previous railroad experience, but in the face of these seemingly insurmountable difficulties, the net train load was maintained at a point equal to the 1919 high record and with a splendid chance of making a new high mark.

We are proud of our record on the New Castle Division, but not to the point where we have lost interest in the future in the contemplation of our past records. We know that Superintendent Stevens and our supervising organization are capable of the planning necessary to increasingly efficient service, and we further know that, once the plan is formulated and the details outlined, we men in the

Assured that our readers will welcome advice and suggestions on the all-important problem of health preservation and life extension, based on the latest advances in medical science, it will be the purpose of this section of the MAGAZINE to present brief and instructive articles each month by members of the medical staff of the Relief Department. We know our efforts will appeal to our readers. If only a few profit by the advice offered, our contribution to the sum of human happiness will be considerable and our service of value. The addition of one, five or fifteen years to a life is well worth the task.

Exercise

By Dr. J. P. Lawlor,

Medical Examiner, Parkersburg, W. Va.

OUR RAILROAD family is made up of an army of individuals, each of whom is moulded and patterned, in our shops of experience, to fit into his proper place, so that we may have a smoothly running machine.

Should any one of the individuals break down, from whatsoever cause, we would have a jar, at least, in the harmony of the whole. It is essential, therefore, that caution be taken and care used, to the end that each one of us shall be in the best possible condition; and one of the ways of attaining and maintaining the harmony necessary for our operation is *exercise*.

When we speak of *exercise* a number of things come into our minds. We have, for instance, certain movements of the muscles of the body, to develop special parts. That is seen in the case of the trained athlete. We have certain definite rules laid down for the training of the memory. The musician has impressed on him, from the time of his first lesson, the importance of constantly going over and over the notes of his music and the keys of his instrument.

It is not, however, with such an end in view that we speak of *exercise*, but rather as a means towards keeping ourselves in a healthy condition.

In order to have this great machine, of which we are a part, perform its proper function, it is necessary that each part engage in various kinds of work. We have, therefore, many employes in shops, on the tracks and trains, and in the offices.

How then are we to speak of

exercise to these, the very nature of whose work seems to be *exercise*?

I would not say to the man who has been working in the shop expending his physical force in muscular energy, to go into the gymnasium; nor would I say to the office man that he should continue the mental strain to which he has subjected himself during his hours on duty.

How are we, therefore, to *exercise*? The man who has been engaged in physical or manual labor, should rest his muscles and use his brain. He thereby draws to that part of his body the blood supply which has been otherwise employed. This can be done by helpful reading, attending proper shows and the like.

The man who has been using his brain, should go to the gymnasium,

and indulge in the various sports. He should play baseball, swim, and take long walks.

All *exercise* should be taken in the open, if possible, so that the poisons which have accumulated during the hours of work may be eliminated through the various channels of the body.

There are times during which we should refrain from *exercise*. It is a fallacy to suppose, as some do, that we should *exercise* to help digest a full meal. By doing so we draw from the stomach, the blood which is necessary for the proper work of that organ, and set up a train of ills which will take a long time to correct. We should give sufficient time for our food to leave the stomach before undertaking any kind of *exercise*.

It may be asked, finally, "How long should we *exercise*?" The answer is: Never to the point of exhaustion. We often hear people say, "I am tired." This is a "Stop" signal, beyond which we should never go. It is a warning which, if not heeded, will cause disaster.

If we wish to make and keep ourselves the proper piece of machinery in the proper place, we can do so by judicious *exercise*.

Each of us, in health—and we do not refer to the disabled among us, those who need the care of the skilled medical and surgical adviser—should be able to choose that form of *exercise* which best suits the individual condition.

We will find, if we give some little thought to the suggestions outlined, that we will maintain a "sound mind in a sound body."

Why Every Baltimore and Ohio Employee Should Be a Member of the Red Cross

AN OLD Roman writer and statesman once said: "Good Health and Good Sense are two of life's greatest blessings." That old Roman certainly knew what he was talking about. He knew in a hundred or so B. C. something which the American public in 1920 A. D. is just beginning to understand.

Good Health! The foundation upon which reposes the happiness of the people and the strength of the nation!

Most of you, probably, are married men with families and responsibilities. Or you will be some day! Oh, yes, Mr. Bachelor. But did you ever stop to think how the health of your neighbor, of your community, affected you and yours? Or how the

carelessness of your neighbor might bring tragedy to you?

During the year 1919, 1,250,000 persons in the United States died from sickness. And 750,000 of them died of *preventable* disease. While today there are fully 3,000,000 sick persons in this country.

During the nineteen months we were at war, 45,000 American boys died on foreign soil in action or from wounds. But, ten times that many, 450,000 American babies, under one year of age, died in this country during the same period.

Last year 100,000 persons in the United States died as a result of accident. Of these, 10,000 were killed in railroad accidents. In addition 200,000 were injured in railroad accidents.

A fact which amazed the nation at the time, but which now is widely known, is that during the selective army draft, 35 per cent. of our young men were rejected because of physical disability.

Do these figures interest you? Have they any connection with your health, or that of your wife, son or daughter?

Well, what are you going to do about it? Pay no attention to it? In one ear and out the other? Or are you going to do your part to make this world a healthier, better and safer place in which to live?

Does your wife or daughter know the simple duties in home care of the sick? Do they know what you should have to eat, in order that you may do your best work, or what the growing school-children should have in order that their mental development may not be retarded? Do you or your family know and follow preventive measures for sickness and disease? Do you know what to do in case of accident emergency or how to hold what remains of life until a doctor can be brought to the scene?

That you, with all America, may answer to that question "I do" is the peacetime aim of the American

Red Cross and for this reason it has adopted the spreading of public health for its peacetime program.

The Red Cross is cooperating with other health agencies, or when necessary, acting alone, in establishing Health Centers in American communities; in providing Public Health nurses for town, city and rural communities; in disseminating health knowledge and health information; in establishing Baby Clinics and Nutrition Centers for the coming generation; and classes in First Aid, Home Care of the Sick and Dietetics, for the benefit of the present one.

More than 200 Red Cross Health Centers have already been established while about 400 other Chapters have taken up other health activities. One thousand Red Cross nurses have entered the field of public health nursing, sixteen training centers are in operation and \$200,000 in scholarships have been provided for the training of additional public health nurses. 92,000 women and girls were graduated last year from 7,943 Red Cross classes in Home Care of the Sick and Dietetics; 6,967 persons completed the course in First Aid and 465 took advanced instruction.

There are, however, thousands of homes where the wife and mother knows nothing of the laws of hygiene or dietetics, thousands of men and women who know nothing of First Aid and Life Saving, thousands of babies dying of neglect and children suffering from malnutrition and correctable physical defects.

If the Red Cross continues its triumphant health campaign, eventually every community will give to its citizens a chance to be taught the laws of health. But without the support of the American people this health program cannot be carried out.

Every man, woman and child in the United States, employe and employer, professional man and laborer, writer, artist and trader should answer the Red Cross Roll Call November 11-25. It is *your* organization, carried on for you and yours as well as for your neighbor. Get together for the Red Cross.

Overheard at the Medical Quiz

Prof. Sapio.: Dr. Smith, what is lumbago?

Dr. S.: It is pain in the back.

Prof. Sapio: What is the cause of it?

Dr. S.: A rheumatic tendency aggravated by overexertion, or chilling of the body, and very commonly by a combination of both.

Prof. Sapio: How is this distinguished from a sprain of the back?

Dr. S.: A sprain disables at once, and is nearly always due to lifting a heavy weight in an unnatural position.

The onset of lumbago is usually slow, and the active symptoms may develop during even slight effort, and have no direct connection with it.

Prof. Sapio: Quite right. If the back is actually sprained, the patient is usually disabled for weeks and recovery is very slow, while lumbago may last only a short time and may disappear suddenly.

Let Every Employe Get a Home

SOMERSET, PA., October 4, 1920.
Superintendent Relief Department,
Dear Sir—Received the following papers regarding my home:

Policy of fire insurance; abstract of title; several tax receipts; mortgage.

I cannot speak too highly of the Relief Department for the way they treated me in securing our home, and I will say, "let every employe of the Baltimore and Ohio get a home through the Relief Department."

Yours truly,

(Signed) R. F. TAYLOR.

Real Cause for Thanksgiving

Thanksgiving of this year marks a great transition from Thanksgiving of last year in so far as the railroad situation is concerned. At that time our railroads were under Federal control, and an effort was being made in certain quarters, and by some persons in high places, to perpetuate that form of control, which had been instituted purely as a war emergency, and, if continued after that emergency, would have changed the fundamental policy of private ownership in this country. Fortunately, better counsel prevailed, and the best thought of the country combined to produce and enact the Transportation Act of 1920, under which the railroads are now functioning. This Act will undoubtedly be modified from time to time as circumstances demand. It does not satisfy all the vast and conflicting interests represented in the railroad problem, but it is generally felt that it is a marked step in advance in its solution.

It provides, among other things, a definite rule for rate making for its agent, the Interstate Commerce Commission, and it definitely states in the law that rates shall be so fixed as to yield an adequate return to the railroads. In a measure, therefore, the financial integrity of the railroad properties of the United States is assured, resulting not only in renewed confidence on the part of the millions of stockholders in railroad properties, but in the fact that the railroads will be able, in a degree at least, to maintain their track, secure adequate motive power facilities and make some of the many other necessary additions and improvements to their structures. This in turn promises an era of good service which, particularly after the inadequate facilities provided during Federal control, will be greatly appreciated by the public at large.

Perhaps no provision of this Transportation Act is more important, however, than that relative to the adjustment of wages and working conditions between the railroads and their employes. The Act insures to all railroad workers in the so-called subordinate classifications, the privilege of placing their claims in regard to wage adjustments and working conditions before a board of nine men, three of them chosen by the employes themselves, three by the railroad managements and three appointed by the President of the United States.

As has frequently been pointed out in these columns, this provision should effectually eliminate strikes and other manifestations of strife between employer and employe. One of the most hopeful signs in the industrial structure of the country is the fact that since the recent wage increase granted by the Labor Board, labor troubles on the railroads have become quite inconsiderable.

There is also every indication that the railroad business has reached a new standard of efficiency since the passing of this Act and the return of the roads to private control. Leadership on the railroads is proving itself capable, cooperative, and broad-visioned, and under the stimulus of this leadership the men in the rank and file seem to be responding with increasing interest in their work and a desire to give good service to the public. It is earnestly to be hoped that these good signs will continue and that as the months come and go there will be an even stronger development of the loyalty which, before the war, the railroads were given by a large majority of their employes; that the public service character of the railroad organization may become more clearly realized by the Management and men than ever before; that the prosperity and satisfaction which inevitably come to an organization which is producing in an efficient and useful manner the transportation commodity which the public needs, may be the reward of the railroads and their employes because of the splendid service they are giving to the public.

A Remedy for Decreasing Business

Reports of gross ton miles for September show a total somewhat less than for the record-breaking month of August. And it is fair to assume, on the basis of past performances and current business forecasts, that as we get along into the winter there will be further decreases from month to month.

This tendency brings up the question: "How can the individual employe help increase this normally declining business, maintain gross revenues at a high level and keep the working forces of the Railroad as near the peak as possible?" An important question, affecting every one of us, and which can be answered here only briefly.

It is impossible for any of us to increase the whole volume of business offered in the country, more particularly that part of the business offered in the territory covered by our lines. That situation is controlled almost altogether by economic factors beyond our reach. The question facing us is, therefore: "How can we get a bigger share of the business which is being offered to the carriers in our territory?"

Yesterday one of our civil engineers came into the office and said:

"I came over from Washington to Baltimore on No. 4 this morning and had breakfast in the diner, and you ought to have heard the conversation at the next table."

Questioned, he said that two business men spoke in high terms of the splendid breakfast they were enjoying, of the great courtesy shown to the travelers by our employes in general, and they agreed that thereafter, wherever possible, they would use the Baltimore and Ohio, which, before that experience, had not been in their favor.

Credit two new customers to the Dining Car Department and some other thoughtful and courteous employes. Too bad we don't know who they are!

Here is another illustration:

A real estate broker got on No. 1 at New York, bound for Middletown, Va., and, sitting in the smoker, he vouchsafed the information that he never would have ridden the Baltimore and Ohio had he been able to get to his destination by any other railroad.

That, however, was during the early part of the trip. His acquaintance, a Baltimore and Ohio employe, got busy. He mentioned the evenness of the roadbed and

the smoothness of the stops and starts made by the engincer, as noticeable as the usual thing on the Baltimore and Ohio as it is for being the unusual thing on certain other railroads. He pointed out the beauties of the Blue Ridge foot hills across the yellow harvest fields of central New Jersey. When they went into the dining car together for a "Dutch treat," the railroad man suggested one of the inexpensive, unusual and tasty special egg dishes, provided by our Dining Car Department, and a wedge of car-baked pie.

The lunch settled the question of the Baltimore and Ohio in the traveler's mind, and when the pair shook hands, good-bye, at Baltimore, the former knocker of our Railroad had very naturally become an ardent booster and well-wisher.

We mention the observations on passenger trains because they come to our notice. There are undoubtedly thousands of employes in our yards and on our freight trains who are taking unusual interest in their work and in the giving of good service in handling commodities, and are bringing business to the Railroad.

Wouldn't every employe of the Baltimore and Ohio like to see our present heavy business continue? Wouldn't every employe like to see the System payroll continue big, our shops singing with heavy repair work and the personnel kept at full strength? Wouldn't every employe like to see our passenger trains crowded and the increasingly good reputation of the Baltimore and Ohio finally become the standard by which all other railroads are judged?

It can be done, but only in one way; and that is if the Company has the interest, the real interest, of every employe in its progress and in its prosperity. The Management cannot do it alone. Leadership cannot do it alone. We have both these factors—capable, conscientious, square-dealing, progressive. And when we all realize the truth of the axiom that whatever benefits the Company benefits everybody connected with it, we will come to that stage of the game at which shippers will clamor for Baltimore and Ohio service, because it is the standard service, and at which passengers buying tickets at Consolidated ticket offices will say when asked on which road they wish their tickets: "The Baltimore and Ohio, OF COURSE."

College Football Season

The baseball scandal will have no effect in diminishing interest in the college football season; the effect, if any, will be the opposite. There is no question of the honesty and the earnestness with which college athletic contests are fought to an end. There is often reason for believing that athletic sports receive too much thought, and other things too little, in the college world. There is sometimes an exaggerated sentimentality in the expression of college loyalties. But there is never any question of the sincerity or the fine sportsmanship with which a student body cheers and supports to the last whistle, and after, a team that may be suffering overwhelming defeat.

Nor is there any question that the players, fired by the same spirit, give all that is in them and more. The watchfulness of the college coach is more needed to take exhausted or injured players out of a game, overruling their courageous protests, than it ever is to drive men doing less than their best. The contrast between the spirit of college sport and the throwing of the world baseball series of 1919, is complete. The sport-loving public will turn to college football with an interest born of the knowledge that it will be played through to the limit of strength and endurance.—*Springfield Republican*.

Ripples

Two employes, friends, were climbing the stairs from the lower to the upper level at Camden Station, Baltimore. One of them saw a passenger struggling with a heavy suit case and offered his help. It was accepted and, when the bag was safely deposited on the upper level, the gratitude of the passenger was ample reward for the trouble taken.

A few days ago the two employes again met after not having seen each other for about a year.

"Bill," said the one, "the lift you gave that passenger with the heavy bag about a year ago at Camden made a hit with me."

His companion had completely forgotten the incident. The speaker went on:

"When I got back home, I made up my mind that I would follow suit. The first chance came on one of those slippery days we had last winter. You know the principal hotel in our town is only a couple of blocks from the station. I was skidding by the hotel entrance one morning when an elderly gentleman, also skidding, came out with a heavy bag, and the little lift I gave him down to the station developed into a pleasant conversation and that into a nice acquaintance. Now I am playing this helping hand game whenever I get a chance."

The constant contact between railroad employes and railroad passengers in stations and on the trains provides innumerable opportunities for offering the helping hand.

The mother traveling alone with two or three children and encumbered with heavy bags—has your own wife or sister or mother ever had to do this? If so you know the anxiety it caused you when you said good-bye to them at the train. Keep your eye open for this opportunity.

Foreigners; so many of them are traveling westward on our lines now. Have you ever put yourself in their place—imagined you were in a foreign country whose language and customs you knew nothing about, in a strange place and among strangers you with your general intelligence and your experience in traveling? Lend a hand to the ignorant foreigner with his big family and his worldly possessions in unwieldy and flimsy trunks and bags and packages.

The Christmastide will soon be with us with its attendant train of heavy passenger travel, its bundles and boxes cluttering our trains, and, if we feel its most significant spirit—a mellowing of our sympathies.

Lending a helpful hand probably won't fatten your own pay envelope nor increase the Railroad's revenue, but for some person or persons you may turn a disappointment into a pleasant experience, may bring a smile where there might have been a tear. And there is a lot of satisfaction in that.

CAR MILES, CAR MILES, CAR MILES, CAR MILES,
CAR MILES, CAR MILES.

First Bid for Locomotives on The Baltimore and Ohio

Four Thousand Dollars Offered for Model to Haul Fifteen Tons
Fifteen Miles per Hour

ON JANUARY 4, 1831, the Baltimore and Ohio Railroad Company issued an advertisement to the inventive genius and mechanical skill of the country, offering most liberal inducements for the production of locomotive steam engines. It read as follows:

"OFFICE OF THE BALTIMORE AND OHIO
RAIL ROAD COMPANY.

BALTIMORE, 4th January, 1831.

"The Baltimore and Ohio Rail Road Company being desirous of obtaining a supply of Locomotive Engines of American manufacture, adapted to their road, the President and directors hereby give public notice, that they will pay the sum of Four Thousand Dollars for the most improved Engine which shall be delivered for trial upon the road on or before the 1st of June, 1831—and that they will also pay Three Thousand Five Hundred Dollars for the Engine which shall be adjudged the next best and be delivered as aforesaid, subject to the following conditions, to wit—

1st. The Engine must burn coke or coal, and must consume its own smoke.

2nd. The Engine, when in operation, must not exceed three and one-half tons weight, and must, on a level road, be capable of drawing day by day, fifteen tons, inclusive of the weight of the wagons, fifteen miles per hour. The Company to furnish wagons of Winans construction, the friction of which will not exceed five pounds to the ton.

3rd. In deciding on the relative advantages of the several Engines, the Company will take into consideration their respective weights, power and durability, and all other things being equal, will adjudge a preference to the Engine weighing the least.

4th. The flanges are to run on the inside of the rails. The form of the cone and flanges, and the tread of the wheels must be such as are now in use on the road. If the working parts are so connected as to work with the adhesion of all the four wheels, then all the wheels shall be of equal diameter not to exceed three feet, but if the connection be such as to work with the adhesion of two wheels only, then these two wheels may have a diameter not exceeding four feet, and the other two wheels shall be two and a half

feet in diameter, and shall work with Winans friction wheels, which last will be furnished upon application to the Company. The flanges to be four feet seven and a half inches apart from outside to outside. The wheels to be coupled four feet from the centre to centre in order to suit curves of short radius.

5th. The pressure of steam not to exceed one hundred pounds to the square inch, and as a less pressure will be preferred, the Company in deciding on the advantages of the several Engines will take into consideration their relative degrees of pressure. The Company will be at liberty to put Boiler, Tire Tube, Cylinder, &c., to the test of a pressure of Water not exceeding three times the pressure of the Steam intended to be worked, without being answerable for any damage the Machine may receive in consequence of such test.

6th. There must be two safety valves, one of which must be completely out of reach or control of the Engine man, and neither must be fastened down while the Engine is working.

7th. The Engine and Boiler must be supported on springs and rest on four wheels, and the height from the ground to the top of chimney must not exceed twelve feet.

8th. There must be a mercurial gauge affixed to the machine with an index rod, shewing the steam pressure about fifty pounds per square inch, and constructed to blow out at one hundred and twenty pounds.

9th. The Engines which appear to offer the greatest advantages will be subjected to the performance of thirty days regular work on the road: at the end of which time, if they have proved durable and continue to be capable of performing agreeably to their first exhibition, as aforesaid, they will be received and paid for as here stipulated.

P. E. THOMAS, President.

Development of the locomotive. Davis "York," Baltimore and Ohio Railroad, after remodeling by Ross Winans, 1831

N. B.—The Rail Road Company will provide and will furnish a tender and supply of water and fuel for trial. Persons desirous of examining the road or of obtaining more minute information, are invited to address themselves to the President of the Company. The least radius of curvature of the road is 400 feet. Competitors who arrive with their Engines before the first of June, will be allowed to make experiments on the road previous to that day.

The Editors of the *National Gazette*, Philadelphia *Commercial Advertiser*, New York, and Pittsburg *Statesman*, will copy the above once a week for four weeks and forward their bills to The Baltimore and Ohio Rail Road Company."

During the summer of 1831, in pursuance of this call upon American genius, made by the Directors, three locomotive steam engines were produced upon the Railroad, only one of which, however, was made to answer any good purpose. This engine, called "The York," was built at York, Pa., by Phineas Davis (or rather Davis and Gartner), and, after undergoing certain modifications, was found capable of conveying 15 tons at 15 miles per hour, on a level portion of the road. It was employed on that part of the road between Baltimore and Ellicott's Mills, and generally performed the trip to the Mills in one hour, with four cars, being a gross weight of about 14 tons. The engine was mounted on wheels like those of the common cars, of 30 inches diameter, and the velocity was obtained by means of gearing with a spur wheel and pinion on one of the axles of the road wheels. The curvatures were traveled with great facility by the engine, its greatest velocity

for a short time on a straight part of the road having been 30 miles per hour. It frequently attained a speed of 20 miles, and often traveled in curvatures of 400 feet radius, at the rate of 15 miles per hour. The fuel used in it was anthracite coal, which answered the purpose well, but the engine weighing but three and a half tons was found too light for advantageous use on ascending grades.

The performance of this engine fully confirmed the Board and its Engineer corps that locomotives might be used successfully on a railway having curves of 400 feet radius, and from that time forward, every encouragement was given by the Company to the inventive genius of the country to improve on the partially successful experimental engine that had been produced by Mr. Davis.

Various ingenious experiments were made during the year 1832 in the construction of locomotive engines, while the one built by Davis and Gartner, of York, Pa., continued in daily service, drawing trains on an average 80 miles per day. They had also put into service on the Road a second engine of greater weight and power called the "Atlantic," which proved equally successful. Peter Cooper, of New York, who had previously introduced an engine on the Road, continued his efforts to bring it to perfection. George W. Johnson and Minus Ward, of Baltimore, Md., T. Welsh, of Gettysburg, Pa., and Thomas James, of the city of New York, were also engaged in this then new and important branch of the mechanical arts.

Veteran Engineers, Do You Remember These Engines?

THE accompanying photograph is of pensioned Pipe Shop Foreman E. M. Barrett, well known to our Newark Division readers.

Mr. Barrett was born September 17, 1844, and first entered the service of the Baltimore and Ohio in 1859 in the Copper and Tin Shop at Zanesville. After service in the Civil War, he re-entered the service of the Railroad at Newark, where he was continuously employed until his retirement in 1910. He is the only surviving member of the shop supervisory force working at Newark, Ohio, when he was first appointed pipe shop foreman there in 1874.

We are indebted to Mr. Barrett for the following list of engines running into or through Newark in the early days of his Railroad service, when locomotives were designated by names instead of numbers:—

Antelope, Reindeer, Lion, Tiger, Leopard, Panther, Hero, Mastodon, Muskingum, Licking, Franklin, H. J. Jewett, George T. Clark, Whitmore, Belmont, Zanesville, Kenton, Firefly, Hiawatha, Pickwick, May Queen, Pataskala, Robert Garrett, Wash-

ington City, James Brady, New York, Baltimore, Philadelphia, St. Louis, Wheeling, Fassett, Elk, Black Hand, William Price, David Lee, William Wing, D. W. Caldwell, Flying Cloud, Director, E. M. Stanton, Chauncey Brooks, John W. Garrett, Guernsey.

The above were all wood burning engines, equipped with copper and brass flues, and copper flue sheets.

E. M. Barrett

The Engineer's Creed

By Engineer Joel F. Covell

I WAS employed by the Baltimore and Ohio Railroad in the month of October, 1878, and I must say have been treated nicely by everybody. I have been going in and out of the office for 42 years and have no regrets. I have always been treated as a gentleman by the officers and clerks.

It is often said that our homes are what we make them. If this be true, then let's make our Baltimore and Ohio Railroad home one of the best, by being pleasant to one another. Get this spirit. You will find that it pays better than strife and contention.

It has been said by one of our officers that as we grow older we see things with a broader view. That is true, for I can look back and note how I saw things at the age of 25, and how they appear to me now, at 64 years of age. Oh, what a difference!

The Good Book tells us that you must become as a little child, to enter the Kingdom of Heaven. These thoughts have been running in my mind for sometime; if we could only get this simple faith in God and man and not so much on denomination! I will now give you my thoughts on denomination, by taking an engine for illustration.

The Locomotive

The head-light represents the eye of God; the stack, the finger of God, pointing heavenward.

The engineer is the Master, the timetable in the rack is the Holy Word of God.

The tender is not loaded with coal, but is loaded with Faith and good deeds.

The tank is not filled with water, but instead it is filled with the Holy Spirit, the Great Three in One.

The roadbed is not the broad gauge, but the narrow gauge representing the straight and narrow path that never leads astray, but leads to Eternal Life.

The train reaches all around the world.

The coaches are filled with people and on the sides of them is written in blood red, representing the blood of the Blessed Christ—not Baptist, not Methodist, nor Lutheran, nor Catholic, or any other denomination or creed—but there is written very plainly, "The children of God returning home."

To remind you of some of God's words: "He that thinketh he hath no sin, deceives himself and the truth is not in him. None are perfect; no, not even one."

This is the Book of all Books. The one from which we get wisdom from on High.

Given Out

"Information given out here?" asked an excited traveler as he rushed up to the Bureau of Inquiries.

The tired attendant looked at the traveler and replied:

"It has."—*Ladies' Home Journal*.

Women's Department

Edited by MARGARET TALBOTT STEVENS

Thanksgiving Time

*There's an echo of gladness, an anthem of praise
That resounds through the woodland on November days.
O, 'tis heard on the hilltop, it floats on the breeze,
From the depths of the vale to the tall forest trees.*

*There's a song of rejoicing that fills earth and sky
As the footsteps of Autumn go hurrying by,
When the heralds of Winter their message proclaim,
And the hearthstone's dull embers now kindle aflame.*

*There's a rustle of laughter from turrets and eaves
Where jolly old North Wind flings heaps of dry leaves,
For Nature is singing her glad roundelays
And Woodlands re-echo her anthems of praise.*

A Woman Who Has Three Hobbies

MRS. F. W. FRITCHEY, wife of Master Mechanic Fritchey, Riverside, has three hobbies: her children, woman suffrage, and Safety.

Mrs. Fritchey, who came from Ohio to Baltimore two years ago, was the first woman in Baltimore to announce her intention of becoming a citizen of Maryland in order to qualify for voting. She is the granddaughter of Mrs. Evelyn Shurr, who campaigned with Susan B. Anthony for women's rights.

Contrary to the once popular belief that the woman's place is in the home and not at the polls, Mrs. Fritchey believes that a woman can attend to her household duties, to her children and to her social duties, and still have time to vote. Moreover, she can also find time to devote to Safety. "It is a little thing," says Mrs. Fritchey, "to call to your husband and children, as they are on their way to work or to school, to be careful in crossing the streets, but it is a thing that counts."

Mrs. Fritchey is determined never to grow old. She plays, talks, and dances with her four children. Nothing that they wish her to do is too great an undertaking for her; nothing could separate her from them; nothing that they do has too little interest for her. Eugene, her eldest son, is in the Navy. Last December he wrote her that he would be at home for New Year's Day. On New Year's Eve the family waited and waited, but Eugene did not appear. The others went to bed, but mother stayed up and waited. At 12 o'clock he came—she knew he would—and the two sat up, talking about the things that mothers and sons who are boon companions know how to talk about. And then, because

Eugene felt like dancing, mother was willing, and they had the jolliest kind of a time.

She is a typical "home woman," and yet, she finds time to look after the interests of other folks as well as her own. Many of our Railroad men, especially at Riverside, who have met with accidents that have sent them to the hospitals, have come to know the kindly face of this mother, who adopts them all and looks after them.

"Nobody could go into the hospitals," she says, "and look upon the suffering among the railroad men without wanting to do something for the Safety Campaign; nobody could see these things and not understand. But sometimes we have the terrible habit of forgetting, even after we realize the situation. We ought not to forget."

"Safety, like government, begins in the home. Our children are the future citizens of the world; the mother who is capable of raising them is capable of instilling into them the principles of Safety, and she is capable of voting."

"The first thing that inspired me to think seriously about the Safety campaigns was an article by Mr. Ennes, general manager, Eastern Lines, published in *The Sun*; then came another interesting article by Mr. Walker D. Hines, who endeavored to interest women in the work. It is the husbands of women, who make no effort to establish Safety campaigns in their own homes, who are the most careless men that we have on the Railroad. If these men and their wives would only realize that the officers of the Baltimore and Ohio have a personal interest in their welfare as well as the interest that they would naturally have in the loss of a good worker, what an improvement in the decrease of accidents

might be brought about. I am sorry that all of our Railroad men and women did not hear the splendid speech made by Vice-President Galloway at the September meeting of the Baltimore and Ohio Veterans.

"Women who would make good citizens must study these two things—Government and Safety; they will never be good citizens nor useful members of society unless they do. These two things lead to happiness and satisfaction in our work, and to the satisfied worker, work is a pleasure."

An Autumn Festival

SCHOOLS, churches and societies of all kinds are busy at this season of the year, preparing for Thanksgiving fetes, oyster suppers and bazaars. Suggestions for such entertainments are always welcomed from our readers. Meanwhile, here is a suggestion from a "school-marm," who held a very successful bazaar in her country schoolhouse, and who gives us some suggestions that may be helpful.

First of all, we prepared a program; not an extensive one, but one in which everybody could take part. It was not unlike the community "sing," with which we are all familiar, except that we added some stories. I found that we had some splendid story-tellers among the pupils of the upper grades, so we put it to a vote and decided on three who were to do the honors for the evening. Then we selected one good story for each to tell. Two stories were of the "ghost" variety, "The Golden Arm," and "The Legend of Sleepy Hollow," of which we never tire of hearing; the third, a real fairy story, which had been written by the children themselves. This done, we set about to see what we could do to make money, for we had decided that there was to be no charge for admission. It's always wisest to get your people in a good humor before you induce them to spend their money; this was the object of the program.

Grab bags and fish ponds were so old-fashioned, but we must have something to

Mrs. F. W. Fritchey

take the place of them. One of the children suggested Peter, Peter, Pumpkin Eater. But where could we get a pumpkin? Out in the woodshed there was a big, square box in which a stove had been packed. We took this and tacked strips of cheesecloth to the bottom, bringing these up over the sides and stuffing them with excelsior, straw, paper, hay, and most anything that we could fill it out with, giving it the shape of a "truly" pumpkin, leaving a small hole in one side and a good-sized one at the top. Then we covered it with orange crepe paper, which we sewed together where necessary, and supported it by means of green twine strings, arranged to represent the lines which mark the sections in a pumpkin. This was the home of Peter and his wife, who, dressed in old-fashioned costume, copied from the pictures in "Mother Goose," took turns in receiving a dime through the window and in passing out a wrapped package in return. The packages, the usual grab-bag varieties, were known as "pumpkin seeds." Occasionally Peter would come out of his house, which was placed on a platform in the center of the room, and exhort the people to buy their next year's pumpkin seeds. The only mistake we made in this was the fact that we did not have enough pumpkin seeds; Peter had sold out completely by nine o'clock.

The gypsy fortune-teller was the next one to be considered. We borrowed two corn shocks from a nearby farm, and from them built a gypsy tent, which was placed near the door. One of the dark-haired girls of the eighth grade made as pretty a little gypsy as one could wish for. With a red kerchief on her head, another over her shoulders, a gay apron, and her face powdered with browned flour, she looked like a real gypsy queen. A copper kettle swung over an imitation fire of logs placed over red and yellow papers, and real smoke came from a bit of Chinese incense, in a tin cup concealed between the logs. Our little girl did not know much about palmistry, but this was unnecessary. When a customer came in, his hand was first measured with a small ruler, and he paid a penny for every inch in the width of his hand. Then the gypsy queen had him cross her hand with silver, while she murmured an incantation over the pot, in which stood a lighted candle. Then she brought forth a black bag, in which, she told him, was the name of his future life-partner. He put in his hand and drew therefrom a slip of white paper, on which there was, apparently, nothing whatever. Murmuring another incantation, the gypsy took the slip of paper and drew it back and forth near to the flame of the candle. In a few seconds there appeared on the slip the name of some young girl in the neighborhood. (These slips of paper had been prepared by the pupils. On white slips were written the names of girls, and on blue slips the names of boys; this was all done in lemon juice,

with an ordinary pen. The heat from the candle flame brings out the letters.) The rest of the fortune-telling was done by means of the "Chi-chi" bamboo stick fortune teller, and a fortune-telling book, both of which had been purchased in a department store. This feature netted us about \$5, and a good bit of merriment.

Ice cream, cake, and candies were for sale at booths decorated to represent various mother-goose rhymes, the "store-keepers" being dressed to represent the

respective characters. Little Miss Muffet sat upon a high table and dispensed lemonade from a large punch bowl; the Queen of Hearts and Jack Horner presided at the cake table, and Old Mother Hubbard sold candy from her cupboard, an old book case with fancy scalloped paper on its shelves.

The cakes were donated, the candy made by the girls, and the ice cream was the only thing we had to buy, except two dozen rolls of crepe paper. Paper lanterns were borrowed for the occasion.

Where the Baltimore and Ohio Was a Godsend

By Mrs. L. W. Delmar

Wife of Carpenter Foreman, St. George Yard, Staten Island

"NO trolleys! What shall we do? And I must get to work by 8 o'clock in the morning, and in New York, too!"

"Oh, dear, I love the country and I don't want my folks to move back to the city. And moving is so expensive, too. They charged us \$50 to move us out, and now must we move back again? But what can we do?"

Remarks like this were heard everywhere when the news came to us that the trolleys would have to stop running because they could not afford to run for five cents, and authorities would not allow the companies to charge more.

"I am perfectly willing to pay more," said one. "My salary has been raised twice and I can afford that better than I can hire a taxi to St. George."

But all of this did not change the aspect. We had to go; how should we manage it?

A bus line was established, but it did not work. It did not pay to run them for a five cent fare; careful and responsible drivers, who appeared at first, began to give way to a class of men who were reckless and unsatisfactory in other ways. Finally these were done away with. But, we had one salvation—the dear and reliable old Baltimore and Ohio.

What a godsend it proved to be! True, some of us had to walk from Richmond—a bit of hardship in bad weather—but we could always reach our destination if we allowed ourselves a little more time. Moreover, our girls are prettier and rosier than ever. Can it be due to that little walk down to the Baltimore and Ohio Station in the early morning?

Blessings on the Baltimore and Ohio! Long may it wave—I mean run.

Dear Women Readers:

It is with a great deal of pride and a like measure of appreciation that I write you this letter. For several months I have appealed to you, through this monthly letter, to send us your contributions for our Women's Department. Although the response thus far has not been overwhelming, I am delighted to say that we have great hopes for the future.

Some of the girls have written to ask me just what kind of material we wanted; some have informed me that I may expect to hear from them very shortly, and several have already given us some good material. In this issue I call your particular attention to the story of the Graham children, of Kentucky; to the article by Mrs. Delmar, of St. George, to "The Vote," by "Ima Voter," and to the splendid recipes contributed by our librarian, Mrs. Irving. Read also about Mrs. Fritchey, whose picture appears in our department. Next month we hope to have—but wait and see!

Allow me to introduce you to the new Children's Page, which begins in this issue. Contributions to this page also will be appreciated. Each month there will be a bedtime story and as much other material as we can find space for. Stories, compositions, and poems, written by Baltimore and Ohio boys and girls, will be particularly appreciated, and I am going to depend upon you to encourage the youngsters to help make their page as you are going to help make ours.

With hearty appreciation and all good wishes for a happy Thanksgiving,
I am,

Yours sincerely,

Margaret Talbot Stevens

Associate Editor.

The Vote—"Now It Can Be Cast"

(With Apologies to Philip Gibbs)

By Ima Voter

DO YOU know that even now there are some folks who don't realize that women are people? Well, it is really true, and as an example of this the following conversation may be told. Yes, it's a Baltimore and Ohio story.

The other day a man spoke very pleasantly to two girls and after talking a while asked if they had registered.

"Yes indeed we have."

"Are you going to vote?"

"We certainly are."

"Well, well! To look at you I can't believe it."

Rather hard, isn't it? But the man

thought he was paying those girls a compliment.

Neither one of them happens to be either a Susan B. Anthony or a Carrie Chapman Catt, but both are thoroughly interested in reading and hearing all that they can about current topics and about folks that are really doing something worth while, and these girls voted intelligently, not merely to cast a ballot "because." And this should be so not only with women, but men. We should try to get all the facts, read both sides and then decide the way that seems best for ourselves. Of course, we won't all think alike. If we did, there might be—nothing in the world but men???

Have You Finished Making Your Christmas Presents?

A CHRISTMAS present that is made by hand, be it ever so small or inexpensive, is an expression of true thoughtfulness on the part of the giver. It is often appreciated more than the most expensive of gifts, picked up in the shop at the last minute. It represents the real Christmas spirit, for the gift that is given simply as a matter of duty is no gift at all.

A girl whom I know begins as soon as Christmas is over to make her presents for the next year. She makes a list of her friends and opposite each name she writes, after careful consideration, just what thing would be most suitable for each one. Then she sets to work, and on the long winter nights—which afford more time for such work than any other season of the year—she works stitch after stitch of love into each gift. She does not sew or embroider every night, either; only as she finds the time. It is surprising to know how much real work can be done in 15 minutes. Then when the "Christmas rush" is on and everybody else is running hither and thither and worrying themselves to death about what to give Mary, or Tom, or Edith, this wise little lady has all of her presents ready, and all she has to do is to arrange them in pretty boxes, with appropriate verses for each. This year, she tells me, she will use white paper, silver cord, and Christmas seals.

Have you ever looked in the windows down town and wished that you had time to make some of the gifts like those you see there? Here are some of the things which you find in the shops, marked at a ridiculously high price, and which, with a little ingenuity and spare time, you can make at a cost that will surprise you.

Among the illustrations you will find some simple conventional designs, which you may easily copy, even though you do not possess an "artistic temperament."

For 25 cents you may purchase at any department store, a good pair of plain, wooden shoe-trees. At the hardware store, get a very small can of good black enamel, one of yellow, and a third of green. Al-

though you will not use all of this on the shoe-trees, the purchase of it is not extravagant, for the paints will keep indefinitely, and they may be used also in making some of the other gifts described here. Stir your black enamel well, then with a small brush, give a coating to the wooden parts of the shoe-trees. Hang these to dry, by means of a string attached to the middle of each, or place them on some object so that the painted section is exposed to the air. It takes about two days for these to become thoroughly dry. Next, with a camel's hair

brush and the yellow paint, copy the flower designs on each end of the shoe-tree, as shown in the illustration, using very fine dashes of green to represent foliage. Give a coat of black enamel to the steel part of the trees and allow to dry. Tie together with a bow of yellow ribbon. These fit nicely into a glove box.

Take an ordinary flower pot and apply a simple stencil design in green, in a border effect, repeating the design on the other side of the pot.

In the same manner the other designs may be applied to book-ends, wooden candlesticks, shoe horns and sewing boxes, which have been first enameled in black. Large flower pots to be used as jardinières, may be enameled and treated with the designs, but flowers must not be planted in these, for the heavy coat of enamel prevents the circulation of air to the roots of the plants.

Try writing little rhymes like these on the cards which you enclose with some of your gifts.

For a Pair of Shoe-trees

There are Christmas trees and family trees, and trees of many hues,
But of all the trees the best are these—to hold your dainty shoes.

For a Handkerchief

Here's a little handkerchief to use throughout the year,
To carry lots of perfume sweet, but ne'er to dry a tear.

For a Work-bag

Here's a bag, quite large enough to hold whatever you're knitting,
A bit of silk embroidery, or anything that's fitting;
'Twill help you in your darning, for 'twill carry many a stocking,
And Pussy Cat can sleep therein—but wouldn't that be shocking!

For a Pair of Candlesticks

To light your home on Christmas Eve, these candlesticks I send you;
They bring to you my Christmas wish—that peace and joy attend you.

For a Pot of Flowers

May blossoms bring you wealth untold,
For a gladsome smile is a pot of gold.

For a Knitting Bag

You may use this little bag to keep your ball of thread
From twisting 'round and 'round your feet and winding 'round your head.

THE GRAHAM FAMILY—ALL EXCEPT DADDY

Upper picture, left to right: Herbert M. Graham, the record swimmer; Herbert's baby brother, George Carl; their mother, and their sister, Stella Lee
Pictures on left and right show Herbert in the act of making high dives. Lower picture shows Herbert and Stella Lee having a boxing match

Expert Swimmers—And Not Yet Six Years Old

LAST summer, when many of our folks were having their vacations, a little boy travelled with his daddy all the way from Jenkins, Kentucky, to Atlantic City. On their way home they stopped off at Baltimore, where Herbert was left alone in Mt. Royal Station while daddy attended to some business. Of course, Herbert got tired of waiting so long, and when daddy returned he found his little son in tears. Then they both came up to the MAGAZINE office.

Herbert M. Graham—for that's his full name—is the pride of his father, H. L. Graham, telephone maintainer, Jenkins, Kentucky. A pretty little light-haired boy, with big eyes, that were brimming over with tears when we first met him, Herbert would not give you the impression that he is the record swimmer of his age in the State of Kentucky. But that's just what he is, and at the age of five years and seven months. His little sister, Stella Lee, who is a year younger, follows him a close second. Both hold fine records for swimming and diving, and both are good boxers for their ages. Herbert is also learning to ride a bicycle.

Herbert is 44 inches tall and weighs 46 pounds. He dives and swims better than

many grown people who have had years of experience in the water. He seems to have no fear of the water. Last year, when Herbert was only four, he dived without hesitation off a ladder erected at a height of 30 feet. His record jump of 38 feet was made a little later in the year. He holds medals which he has won both at Cincinnati and at Louisville. In one diving contest, he won a gold medal for first place, in competition with a 15-year old boy. This time he made a backward dive of 18 feet. He swims with three different strokes; dives from a height of 20 feet; swims half a mile; jumps from a height of 30 feet; dives backward from 14 feet; turns air spring and hand spring from board 10 feet high.

Stella Lee swims nearly a quarter of a mile, jumps from a height of 20 feet; dives forward or backward from a height of 6 feet, and slides from a chute 30 feet long and 25 feet high.

Jenkins, Kentucky, is a little mining town in the eastern part of the State. There is a beautiful lake near the town, and it is here that the children have learned to swim. Their mother is quite a swimmer, too, and we expect, by next year, to hear of some

swimming records established by the baby, George Carl, who is now nine months old.

You can see pictures of all the family on this page, except Mr. Graham, who is the MAGAZINE correspondent for the Kentucky District.

Seasonable Recipes

By Mrs. E. P. Irving
Librarian

Note—The good old-fashioned housewife used to make her fruit cake, mince-meat and plum pudding far in advance of Christmas. Fruit cakes were baked one year for the next, and the housewife who had not made her mince-meat and plum pudding before Thanksgiving was considered rather shiftless. The following recipes have been used again and again. You all know the old adage, "The proof of the pudding—" Try this one.

Plum Pudding

2 pounds sieved flour; 2 tablespoons yeast powder; 1 nutmeg ground; 1 tablespoon of cinnamon; 1 tablespoon of ginger; 5 eggs; 1 pound sugar; 1/4-pound butter; 1 pound seed raisins; 1 pound currants; 1/4-pound citron.

Mix all dry ingredients except sugar into flour, beat egg, sugar and butter and then add flour with fruit and so on.

Copying Smart Creations a Fascinating Avocation for Home Dressmakers—One-Piece Frocks with Gay Borders

By Maude Hall

HOME dressmakers will find a fascinating and profitable avocation in the copying of smart new Autumn finery. Its great simplicity of line is one reason in support of this statement, the desire to possess pretty clothes upon a small income, being another. There is absolutely nothing forbidding about the latest modes. Even the garnitures, although sometimes elaborate in effect, are easy to reproduce because of the simple methods required for their development.

The great majority of women are remaining loyal to serge and tricotine, despite the appearance of lovely new materials, because there are no fabrics which wear better and present an ultra-chic appearance at the same time. One must admire the beautiful fabrics of fancifully descriptive names, built principally upon the duvetyne idea, but while they give delight to the senses of sight and touch, they are like poison gas to the limited budget for dress.

The long-waisted models for Autumn feature nothing more distinctive than a dress of dark blue serge trimmed deeply, as regards the tunic, with border embroidery. Self-color rope silk is used for the embroidery, though beads may be used instead—or a combination of both. The fronts of the sleeveless, slip-on waist are crossed in surplice style and rolled back with the straight collar. The remaining features of importance are: Long, close-fitting sleeves

sewed into a front-closing underbody, two-piece tunic and straight gathered underskirt. A wide choice is allowed in selecting the belt, but narrow ribbon yields prestige to none of the late contestants for popular favor.

For dress wear there are tricotines fancifully figured in self-color, to be employed in combination with other materials. Fascinating is a semi-dressy frock in dark brown tricotine and satin. The tunic blouse has an open front and short kimono sleeves finished with deep cuffs. It is of tricotine. The front of the blouse is gathered at the shoulders, the back being extended over the shoulders to form a yoke effect. The two-piece skirt of satin is laid in plaits at the top and closes at the left side. It is lengthened with a two-piece flounce laid in a plait at each side seam. The front flounce section has an extension at center-front, forming a panel. The upstanding collar turns gracefully back at each side, while the belt is of tricotine.

Serge trimmed with black silk braid is both dignified and serviceable. A very good-looking dress has a blouse that reaches to the hem of the skirt, according to the latest mode. About the lower edge of the blouse is indicated a checked border, the vertical rows of braid being turned under in points at the top. A belt of self-material holds in the fulness at the waist, while the collar is of white tub silk.

8625

COAT No. 9059. Sizes, 34 to 44 inches bust. Price, 35 cents.

LADIES' LONG-WAISTED DRESS No. 8625. Six sizes, 34 to 44 inches bust. Width at lower edge about 1 1/2 yards. Size 36 requires 4 yards 36-inch material, 7/8 yards 36-inch lining for underbody. Deep V-shaped neck finished with a removable vest. The one-piece sleeves are set in the armholes of front-closing underbody. Two-piece skirt slightly gathered at the top. Price, 25 cents.

LADIES' SLIP No. 8776. Sizes small, medium and large, corresponding with 36, 40 and 44 inch bust. Small size requires 2 3/4 yards 36-inch material, 3 5/8 yards banding. The front of slip is gathered, held in with a stay and finished with inset bands in panel effect. The back is laid in a box plait at center-back. The slip is perforated for shorter length. Price 20 cents.

DRESS No. 9146. Sizes 34 to 48 inches bust.

DRESS No. 9110. Sizes 34 to 46 inches bust.

DRESS No. 9120. Sizes 34 to 48 inches bust.

DRESS No. 9114. Sizes 34 to 44 inches bust.

DRESS No. 9139. Sizes 34 to 46 inches bust.

Hints on Flavoring

One teaspoonful vanilla added to each pint can of pears that are rather tasteless, greatly improves the flavor.

Canned peaches are improved by adding a few drops of almond extract.

A few drops of rose extract in apple jelly gives it a most refreshing flavor.

A few drops of vanilla in pitcher of cream to serve with breakfast foods, such as toasted corn flakes or rice, improves the flavor.

You Yourself Can Make this Smart Appearing Coat of Blue Velour with Cape in Two Sections and One-Piece Sleeves

CAPE-COATS will be fashionable during the coming season, and they will be developed in soft textures of dark color, brown, black and blue being most favored. Featured on the model pictured here is a cape in two sections. The sleeves are in one piece, however. The coat fastens in single-breasted effect and is trimmed with large patch pockets and buttons. Medium size requires 4½ yards 54-inch material.

The cape sections and the back of the coat are without seams, which means that these parts of the pattern are so laid on the material for cutting that the triple "TTT" perforations rest along the lengthwise fold. All of the remaining pieces have the large "O" perforations laid along a lengthwise thread.

Although captivating in its smart effect, the coat is not difficult to make. One must first take up a dart in front, bringing together and stitching along the corresponding lines of small "o" perforations, terminating

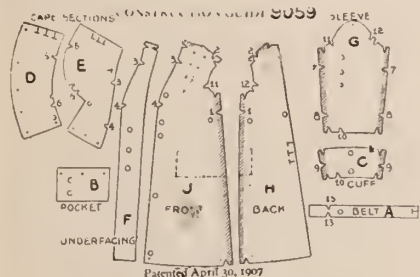

the stitching at the small "o" perforation. Next, close under-arm and shoulder seams as notched. Turn hem at lower edge on small "o" perforations. Adjust underfacing to position underneath the front of coat with notches and corresponding edges even.

Now, take the cape and turn hem at front edge of section D on small "o" perforations. Sew to section E with notches, centre-backs and large "O" perforations even. Turn hems at lower edges on small "o" perforations. Gather neck edge between "T" perforations. Sew to neck edge of coat as notched, with center-backs even.

Close seams of sleeve and cuff as notched. Sew cuff to sleeve as notched with seams even. Sew sleeve in armhole as notched with small "o" perforation at shoulder seam and bring seam of sleeve to under-arm seam, casing in any fullness between the notches. The fullness also may be shrunk out. Hem pocket and adjust to position, then add the belt, fastening in cross effect with large buttons.

8776

Seasonable Recipes

(Continued from page 35)

Dough should be stiff, as it must be steamed six hours in buttered mold or floured pudding bag. Many people are afraid to venture making plum pudding, when the secret of success is in having your water boiling hot and keeping it so, adding boiling water during the six hours while pudding is cooking.

Sauce for Pudd'ng

1 pint boiling water; 1 pint milk; sugar to sweeten, about ½ cup; 3 tablespoonsful corn starch, dissolved in little cold milk and added to boiling water and milk; any flavoring desired, but vanilla or liquor is best.

Fruit Cake

1 pound flour; 1 pound sugar; 1 pound butter; 3 tablespoons yeast powder; 2 pounds seedless raisins; 2 pounds currants; ½-pound citron; 1 tablespoon cinnamon; 1 teaspoon cloves; 2 nutmegs.

Sieve flour; grate nutmegs and put in flour yeast powder, spice and fruit; mix thoroughly while dry. Beat eggs; sugar and butter light, add 4 tablespoons of water and mix in flour and spice; bake in a moderate oven two hours.

Mince Meat

6 pounds clean beef; 1 pound suet; 3 pounds seedless raisins; 3 pounds currants; 1 pound

citron; 1 peck apples—tart; ½ dozen oranges; 4 pounds brown sugar; 1 gallon cider; 1 quart New England Rum (if you can get it); boil beef until tender. (A good noodle soup can be made from the water that the beef is boiled in.) Cool and chop fine; chop suet and skins of three oranges; peel and chop apples; pick over fruit and see that it is all clean and free from small stones, etc.; scald cider and cool; then mix thoroughly and pack in jars. This will keep all winter.

WOMEN READERS!

You can get any pattern here shown by filling out the following coupon, clipping and enclosing with price shown (stamps, check or money order) in envelope addressed "Baltimore and Ohio Magazine, Mount Royal Station."

Velour Coat with Cape

My Grandma's House

*My grandma lives in a tiny house,
Not made of brick or stone,
But just of wood an' shingles brown
An' a roof where moss has grown.*

*It's not a new-styled bungalow
Nor a castle on a hill,
But just a plain, old country house,
That stands near Grandpa's mill.*

*But when we go to visit there,
Or to spend Thanksgiving Day,
That little house just seems to grow
In a funny sort of way.*

*It stretches big enough to hold
My Mama, Dad, an' me,
An' Aunt Jeanette an' Uncle Jack,
An' cousins two or three.*

*It stretches big enough to hold
A dinner for a king,
A turkey, pudding, sauce and all,
An' nuts, an' everything.*

*For Grandma's house is like her heart—
There's always room for more,
An' folks all say they feel at home
When they come to Grandma's door.*

DEAR GIRLS AND BOYS:

Wouldn't it be funny if you woke up on some fine morning and found that you had just hundreds, even thousands, of cousins whom you never heard of before? And if I'd tell you that this is true, you'd hardly believe me, would you? And yet, it is just as true as true can be.

You see, I'm your Aunt Mary, and you are all my nieces and nephews; so that makes you all Baltimore and Ohio cousins, doesn't it? But I couldn't be your "truly" aunt, don't you see, unless we knew each other; and I couldn't possibly go all over the Railroad to see each one of you, could I? So, we're just going to make believe that we've known each other all our lives and we're going to write letters to each other. Each one of you will write to Aunt Mary, and she will write you a letter each month in the MAGAZINE. We have this page to write on, a whole page of our own, and you are going to help me make it into such a fine page that all of the grown-up people will wish that they were children again. But this is our page, and grown-ups are not allowed—only girls and boys under 12 years of age.

Each month there will be a little story; sometimes it will be written for the tiny tots and sometimes for the boys and girls who go to school. The November story is about Peter Pumpkin, who missed a good time because he ran away on the day before Thanksgiving. If you like this story let me know and I'll write you another about Peter some day. If you are not old enough to write a letter, ask big sister or brother who goes to school to write it for you. See if you can tell me a story, write a little verse, tell me how to make a little boat or a baby doll's dress, or send me a picture of your pets.

Perhaps you can draw pictures. No matter what you can do, write and tell me, so that I can tell some other little girl or boy who is waiting to hear how it is done. Some of the best letters will be printed on this page, just as you write them. Now, hurry up and let's see who will be the first. Address your letters to: "Aunt Mary," BALTIMORE AND OHIO MAGAZINE, Mt. Royal Station, Baltimore, Md.

Be sure to send with the letter the name of the folks in your family who work for the Baltimore and Ohio, because some of the grown-ups who read our page will want to know whose little boy or girl you are. And I'll promise to write a nice, long letter to the first little girl or boy who writes to me.

Aunt Mary

How Peter Pumpkin Ran Away

ONCE upon a time there lived in a large cornfield a little fellow named Peter Pumpkin. He had lived here ever since he could remember, ever since the time when he was small and green, and no larger than the little green plums that grow in Uncle Jim's orchard. This was when the stalks of corn were tiny and green, too, so tiny that when the black crows would fly down into the field and peck at the tiny yellow grains at their roots, some of the stalks would wither quite away.

But the farmer planted more corn in place of the stalks that had died, and soon there was a whole field of corn, beautiful and green and tall. And Peter Pumpkin and all of his brothers and sisters began to grow, too, and after a while there were big green pumpkins lying between the rows of corn.

By and by the corn began to turn yellow, and the pumpkins, too, grew to be as yellow as the autumn sunset; and everyone said that the field was beautiful.

One day, when the men came into the field to cut the corn, Peter heard them talking about pumpkin pies.

"What do they mean by pumpkin pies?" asked Peter.

Then his mother told him that on Thanksgiving the farmer and his wife would have a big dinner. They would invite all of their friends to come and help them eat. There would be turkey, and cranberry sauce, and potatoes, and cakes, and candies, and, best of all, the most delicious pies, made of the nicest pumpkins in the field.

"Dear me!" sighed Peter, "I know I'll be made into a pie, for I heard one of the men say that I was the biggest and handsomest pumpkin in the field."

"That is true," said his mother, who was very proud of him.

"But I want to live longer; I don't want to be made into a pie," sobbed Peter.

"You shouldn't say that," said his mother, "for it is a great honor to be made into a pie."

But Peter lay awake all night wondering how he might hide himself until after Thanksgiving.

On the next morning, bright and early, Peter was awake. Just as he looked over into the next row to see if his mother was still there, a tiny field mouse ran right past the corn stubble.

"Wait a minute," called Peter Pumpkin, "I want you to do something for me." The mouse came.

"Do you think you could gnaw my stem in two? Your teeth are strong and sharp, and I believe you could do it."

"I'll be glad to gnaw your stem," answered Gray Mousie, "that is, if you're sure you want it cut."

"Oh, if you only will," pleaded Peter Pumpkin.

So Gray Mousie went to work and gnawed and gnawed, until all at once the stem pulled right apart and Peter Pumpkin went rolling down the hill, so fast that it frightened poor little Gray Mousie out of his wits. Into a shock of yellow fodder rolled Peter, and he struck the shock so hard that he went right into the middle of it, where he was hidden so far away that nobody could see him. There he lay and listened.

"I wonder what became of that fine, big pumpkin," said one of the farmer's sons who had come into the field to cut the pumpkins for the Thanksgiving pies. "I am sure that I saw one that was much bigger than any that I see here. Somebody must have taken it away." But Peter didn't say a word; he just lay still. And then the farmer's boy gathered up the prettiest pumpkins that he could find and took them to the house. Peter's mother went, too, and many of his brothers and sisters.

One day the farmer's boy came back into the field with his brother to get a wagon load of fodder.

"Didn't we have lots of fun on Thanksgiving?" he asked.

"Indeed we did," answered his brother, "and so did everybody else. Why I never saw such beautiful pumpkin pies in all my life; and they were the best that I have ever eaten."

Oh, how Peter wished that he had been there!

"Look!" cried the other boy, "here is that fine pumpkin that I told you about. I wonder how on earth it got into this fodder shock. It must have rolled down the hill. See, it is of no more use; there is mould on one side of it. We must give it to the cows." And he picked up poor Peter Pumpkin and gave him a toss over into the pasture, where the cows were eating their dinner.

"Ah," thought Peter, "at least they will make me into a pie."

But as cows do not like pies, they ate poor, foolish Peter Pumpkin just as he was, and they did not leave even one little seed.

Ohio Division Employees Make Merry at Annual Picnic

By A. E. Erich
Secretary to Superintendent

"DID you have a good time?" "You bet we did." These were the remarks heard most frequently on Sunday evening, October 3, after the Ohio Division employees' picnic, which was held at Martinsville, Ohio, on that date.

At 8.57 a. m., over 500 employees and members of their families left Chillicothe, the train stopping at the different stations, picking up others until there were about 600 on arrival at the picnic grounds. A number of others made the trip in autos. There were games and contests of all kinds and for all ages, and some useful prizes were given to the winners. "Eats?" Oh! boy! EVERYTHING! All lunch baskets (160 in all) were checked in baggage car before leaving and they were all filled—but decidedly empty on return. Plenty of hot coffee, lemonade and ice cream was dispensed, free, at the refreshment stand. Even the weather man was in the spirit, as up until this date the weather was cloudy, cold and disagreeable, but on this morning "Old Sol" came out in full strength, warming up and making it an ideal picnic day. Another good feature, there were no injuries, not even a "bumped" head. The Odd Fellows band (which is composed of quite a number of Baltimore and Ohio employees) furnished the music during the day. The train consisted of ten cars, handled by engine 5092, in charge of Engineer H. D. Thacker, Fireman P. Q. Porter, Conductor N. Moore, Brakemen W. S. Lewis and L. B. Carroll, and flagman R. L. Wills. Quite a number of comments were made on the efficient manner in which this crew handled

the train. The winners of the various contests were as follows: Spelling bee, for boys and girls ten and twelve years of age (which was cleverly handled by Mrs. Henry Imhoff), Miss Josephine McCulgan and Master Edward Pross. Baseball throw, for ladies, Mrs. Denver Conner. Four-round boxing contest, draw between "Curly" Hosler and A. Donahue, both boilermaker helpers. Young girls' race, Miss Dorothy Allison. Boys' (over ten years) race, Master Lawrence McLaughlin. Married Ladies' race, Mrs. A. M. Davidson. Boys' (under ten years) race, Master Evan Harper. Tug of war between Officials and Shopmen, won by the Officials. Horseshoe throwing contest, shopmen L. Holton and M. Medert. Ball game between "Dirty Shirts" and "Rough Necks," won by the "Dirty Shirts," the score being 13 to 6, four innings. Umpires, George Harrison and John M. Mendell. Road Foreman "Bill" Graf made a two-base hit, but on arrival at second was running so fast that sand, emergency brakes, and reverse motion failed to stop him, with result that he ran by and before he could back was out. It is recommended by several of the engineers that "Bill" make a "test" of his brakes before leaving home in the future.

Committees in charge, as follows: R. W. Brown, superintendent, chairman; William Pross, machinist, entertainment; W. Shaffer, brakeman, transportation; J. Rutherford, tender repairman, numeration; G. Harrison, tender repairman, baseball. "Fred" Darling, chief clerk to general foreman, H. Imhoff and T. J. Clark, acted as judges; C.

Hildebrand, brakeman; J. McCulgan, engineer; A. E. McDonald, fireman; E. R. Maple, brakeman, and B. E. Knapp, brakeman, on general committee. All these men worked hard, and are to be commended on the efficient manner in which they handled affairs and kept things going at all times without a "hitch."

Mount Clare Welfare Athletic and Pleasure Association Minstrel Show, November 22

THE best show ever put on by the above association was the minstrel show given last year at Lehmann Hall. This year on the night of November 22, at the same place, the association promises an even better show.

Barry Fenton, of the Senior Vice-President's office, who handled the minstrel last year, will again be in general charge and will act as interlocutor. He will have an interesting array of talent, including Herma, the talented local dancer and impersonator, and the same star end men who helped make the show last year.

James Tatum, president of the association, and Joseph Scharnagle, chairman of the committee, are working hard to make this a record breaking night. Albert Koke's orchestra will furnish the music and admission will be by invitation of the association.

Pittsburgh Veterans— Please Note

On page 28 of the September issue an article was credited to C. A. Richardson, as president of your chapter. This was in error, the item having been sent to us by the Pittsburgh Division correspondent showing Mr. Richardson's proper official position in your organization as chairman of the Entertainment Committee, and the mistake in printing his title as president was solely my own. Due apology is therefore made to Mr. Richardson and to your association.—Ed.

A Live One

A number of students of McGill University, Montreal, on a bitter winter night, had rifled a grave in the cemetery near the college and put the corpse in their sleigh. The party drove to a hotel on St. James Street and, standing the corpse up against the bar, called for drinks. When these had been partaken of, the boys decamped without making payment and leaving the corpse in its original position.

The boys returned and found the corpse lying on the floor.

"Why, you have killed our friend," said the boys.

"Well," said the proprietor, "when I asked him for payment for the drinks he struck me and I struck him in self-defense."

Monument Erected at Fort Wayne, Indiana, to James T. Leary, Our Late Comptroller

By Louis M. Grice

Assistant Auditor Passenger Receipts

IMEDIATELY following the death of our former comptroller, James T. Leary, a movement was started by employees of the Accounting Department to raise a fund by subscription for the purpose of erecting a suitable memorial to this man who was so well beloved because of his many fine qualities of brain and of heart.

The subscriptions were confined to employees of the Accounting Department and according to arrangement of the General Committee, each contribution was mailed to the treasurer of the Memorial Fund, J. F. Schutte, without the names of the subscribers being given, so that there could be no question as to the voluntary character of the act of the contributor. In this way the sum of \$1,166 was raised and thereupon the general committee named a sub-committee to investigate and make a report as to the form the memorial should take.

As it had been decided to make the Catholic Cemetery at Fort Wayne, Ind., the final resting place of our honored chief, that city being the home town of Mrs. Leary, the sub-committee was honored by being asked to accompany the widow on this last sad mission of escorting the body from Baltimore to Fort Wayne, Ind., and they, with E. C. Hanson, formerly of Mr. Leary's personal staff, acted as pall-bearers at Fort Wayne on September 20 of last year.

Following the burial services the sub-committee obtained a bid from the Bates & Carr Monument Co. for the erection of a suitable monument at the grave. The cost was fixed at \$1,045 and it was found that this price compared favorably with prices obtained elsewhere. Consequently, upon returning to Baltimore, the specifications covering the work and the cost thereof, were laid before the general committee, and after due consideration the contract was awarded to the Bates & Carr Co.

The cement foundation for the monument was laid before the freezing weather set in, and the monument was erected in the latter part of March. The general committee then delegated the writer to journey to Fort Wayne to inspect the monument, and, if found to be in accordance with the contract, to make final settlement with the monument company.

A more dismal day could not have visited Indiana than that on which the writer alighted from the train at Fort Wayne (a city of about 75,000 inhabitants), for April 6 was beset with gloomy clouds from which fell snow and rain alternately, and a chilly wind seemed to reach one's very heart. The drive to the Catholic Cemetery, made in company with Mr. Bates, of the monu-

ment firm, was in an open automobile, the cemetery being several miles outside of Fort Wayne. Reaching the cemetery gate the way to the grave led through an avenue of ever verdant cedars, up a slight slope to a point about midway of the cemetery, and there, just beyond the crest of the slope, the grave with its gleaming monument met the eye.

Alighting from the car we walked around the path and stood facing the lot. What we beheld is pictured on this page—the simple beauty and symmetry of the memorial work made a striking appeal to the eye and to the spiritual vision.

The monument is of hammered Barre granite, light grey in hue, and is of modern design, with just enough ornamentation to relieve austerity without detracting from the dignity of the memorial work. The base is four feet five inches wide, with a depth of two feet four inches and a height of one foot four inches, while the shaft front is three feet six inches wide at bottom with a slight and graceful taper to the top; the depth of the shaft is one foot six inches and the height five feet one inch. Thus the height of the monument from base to top is six feet five inches.

The ornamentation on the upper face of the shaft is a Scottish thistle design, gracefully wrought, and midway of the shaft face the word "Leary" is carved in square five-inch letters, raised one-half inch from the surface. This carving is clear cut and is in entire harmony with the design as

a whole; thus a fitting tribute has been erected to the one who sleeps so peacefully there.

A marker of grey Barre granite gleams at the head of the grave. On this marker the name of James T. Leary is carved in square letters raised one-half inch, and the years of birth and death, 1858 and 1918, appear, separated by that emblem of Christianity, the cross (†).

Another marker of the same stone, but uncarved, is set in the lot next to the single grave there, the plain marker being placed in proper relative position to the monument, the principle of proportion being thus artistically carried out.

In spite of the dismal day the impressive beauty of this memorial created an effect in the mind and heart of the writer which will be lasting. That visit was more like a pilgrimage than an inspection trip, and any of Mr. Leary's friends who may be near Fort Wayne in the future would be repaid by visiting this spot.

Arrangements have been completed for perpetual care of the grave and the lot. This was accomplished by a payment of \$200, the interest on which will be used to defray the expenses of the upkeep of the lot. The difference between the amount originally contributed and the total cost of the monument, plus the cost of perpetual care, was defrayed by additional voluntary contributions.

The memory of James T. Leary will be kept ever green in the hearts and minds of many of our employees, as his lovable character and kindly disposition made its impress upon all with whom he came in contact. And the recollections of his many acts of kindness have become a treasured tradition which will act as a beacon light to guide us hopefully along the rough ways which we may encounter along life's course.

The Leary Monument

Safety Roll of Honor

Every man whose name is mentioned in this department for meritorious service has helped the Railroad increase car miles and decrease accidents. Every defect in equipment corrected, every accident prevented, every man-sized job here noted contributed directly and largely to the success of these big campaigns, to which we are all bending our energies

Baltimore Division

About 10.00 p. m., July 4, Engineer G. W. Abrams, with extra east, engine 4521, discovered a fire on the west end of Susquehanna River Bridge. He stopped the train and, with the assistance of Brakeman S. B. Davern, put out the fire. These men have been commended for their prompt action.

On September 22, Flagman J. C. Barrett with second 94, engine 4026, discovered a broken angle plate on the westbound track at the cross switches at Woodbine. Trackmen were notified and repairs made. Mr. Barrett has received a commendatory notation on his record.

On September 28, Flagman L. J. Belt with extra east, engine 4594, discovered a broken truck while passing Rossville. Brakeman R. B. Jakeman caught the first signal given to stop. This was good work on the part of these two men; it possibly averted a derailment. They have been commended for their alertness and the teamwork displayed.

Cumberland Division

The following defects have been noted by operators on the Cumberland Division and corrected:

NATURE OF OBSERVANCE	CASES
Brake rigging down.....	1
Broken wheels.....	1
Crozier plate down.....	1
Total.....	3

The broken wheel was noted by Operator J. D. Rockwell at Green Spring in train of extra 4872. He stopped train and Conductor Kane, on examination, found 18 inches of tread on wheel under Baltimore and Ohio 238820 broken out. Car was set off.

On the evening of September 27, Crossing Watchman W. H. Osborn, Newburg, W. Va., noticed that half of a wheel was missing on Baltimore and Ohio 94554, extra west 7120. Train was stopped and investigation developed that the remainder of the wheel was caught in brake rigging and was sliding. The wheel was clamped and car placed on side track without an accident. Mr. Osborn is commended for his good work.

On October 6, Lineman H. O. Collison, Martinsburg, returning from work on motor car, discovered a broken rail. He informed the operator at Martinsburg, who had No.

31 detoured and No. 1 notified to pass over rail carefully. The trackmen who made the repairs found the six-inch piece entirely gone from the rail. Because of Mr. Collison's quick action, there was only five minutes delay to the trains. He is commended.

Charleston Division

On September 5, extra west, engines 1238 and 1236, while descending Laurel Hill grade, was flagged by a 14-year old boy, Ernest Deel, and the crew notified of a broken rail ahead of them. His action undoubtedly saved a derailment, and the superintendent has written him a letter, thanking him for his efforts on behalf of the Company.

On September 27, we had a severe electrical and wind storm. Mr. L. E. Miller, of Selbyville, W. Va., flagged passenger train No. 54 near Chemical, W. Va., and informed them that a large tree had fallen across the track. This train was 25 minutes late, and Mr. Miller had waited this length of time to flag the train. He was appropriately thanked by the superintendent.

Conductor Malone has been appropriately commended for his good judgment in Buckhannon yard for averting a possible serious accident.

Agent L. A. Rollyson has been commended for the interest he is taking in prompt movement and release of cars at Frametown.

Fireman Fitzgerald cut his finger badly at Flatwoods on double header on September 30. Brakeman D. V. Stout volunteered to fire turn to Weston, thus averting serious delay. For this he has been commended by the superintendent.

Brakeman J. Alkire, on No. 181, on September 15, discovered brake hanger dragging on his train. He personally made repairs, which enabled car to be moved to terminal, instead of being set off and delayed. He has been commended.

Letters of appreciation have been sent to the following employees who handled as volunteer crews the Safety Picnic trains, enabling many employees and their families to enjoy a day's outing which would not otherwise have been possible:

Engineer L. R. Shome, Fireman John Gay, Conductor H. E. Bailes, Brakemen Wilson, Fox and Cay; Engineer T. J. Wil-

son, Conductor J. R. Cos, Fireman Malcomb, Brakemen T. J. Morrison, W. G. Cayton and Curtis; Engineer J. C. Jordan, Conductor Bishop, Fireman Keener and Brakeman Perkins.

Cincinnati Terminals

Conductor J. M. McKenna, noticed defective brake rigging on first 04 as it passed him at Bond Hill. He reported it and they were caught at East Norwood. Glad to add his name to the Honor Roll.

Newark Division

Operator R. W. Bennett, Junction City, Ohio, has been commended for his vigilance in observing brake beam down on tank of engine 1914, train No. 183, while passing his office at Junction City on September 21, and for his prompt action in having train stopped and trouble remedied.

New Castle Division

On September 28, Operator V. P. McLaughlin, Newton Falls, Ohio, noticed brake beam dragging in train of New York Central, engine 2602, operating over the joint track. Observation of this dangerous condition and the prompt report to the crew undoubtedly averted a serious accident. Superintendent Stevens has written Mr. McLaughlin, commending him for his action in this case, and suitable entry will be placed on his service record.

MR. M. MITCHELL,
Freight Brakeman,
Willard, Ohio.

Dear Sir—I am advised that on September 23, while you were braking head-end with Conductor Bass on No. 94, waiting for No. 8 to clear at Willard, you found a broken hanger on a car in your train. The train was backed into the yard and the car set off.

I desire to commend you for your close attention to duty; your watchfulness in this case undoubtedly saved us an accident. Thanking you again, I am,

Yours very truly,

(Signed) D. F. STEVENS,
Superintendent.

Cleveland Division

T. E. MCCLOSKEY,
Section Foreman,
Elyria, Ohio.

Dear Sir—My attention has been called to the fact that on September 20, at 7.00 a. m., you noticed truck broken down on C. & A. car 12569, in train of engine 4239 west, as train pulled by you at Grafton.

Your careful observation of passing trains has, without doubt, shown that your interest is right in our work. Your prompt action in notifying the conductor of this train in all probability averted an accident, and I feel that your action deserves commendation.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

Ohio Division

On September 4, while Track Foreman David Mercer was surfacing track and renewing ties on the Blackford Branch, he observed a brake beam dragging on one of the cars of extra west 2838, pulling by that point. He immediately made every possible effort to attract the attention of the train crew, but being unable to do so, notified agent, who got in touch with dispatcher and had train stopped at next station, where necessary repairs were made. This extra was running ahead of passenger train No.

53, and it is possible that through Mr. Mercer's watchfulness and interest a serious accident was averted. He is commended.

On September 7, when the brakeman of train No. 32 failed to report for duty at Columbus, and the general foreman at that point was trying to locate someone for the turn, Brakeman J. H. Frazier, who had arrived on No. 82 and had been relieved from duty, heard of the difficulty and volunteered his services. He did not have his overalls with him but fired engine in his good clothes to Midland City, where he obtained overalls. The action of Brakeman Frazier indicates clearly that he had the interest of the Company at heart and he has been commended.

On September 7, Engineer G. H. ("Dusty") Rhodes, in charge of extra 2921, while in siding at Zaleski to meet second No. 76, observed brake beam dragging under car on No. 76. He immediately made effort to notify train crew of this condition. Train was stopped, car taken out of train and repairs made. Engineer Rhodes has been commended.

On September 6, while Oscar Oney, trackman, was walking track on section No. 25 at West Junction, Ohio, he observed the track buckled east of West Junction. He immediately called to Trackman Roy Thacker, who was working nearby, and instructed him to report this fact to the operator at the tower while he, knowing No. 3 was due, kept going toward this train and succeeded in covering sufficient distance to flag and stop it before it reached this bad place in track. It was too late for the operator to stop this train, as it had passed the telegraph station, and, account of running late, was going at a good rate of speed when flagged by Mr. Oney. The prompt action on part of Mr. Oney probably saved injuries to passengers as well as disaster to the Company's property. Mr. Oney is a faithful employe and has heretofore discovered similar defects and reported them to the proper authority. He is commended.

Indiana Division

James Long, yard brakeman, North Vernon, discovered broken arch bar under Big Four 43526 at Whitcomb, en route to Louisville. Car was switched out and placed on repair track. The condition of the car was found to have been such that derailment would, no doubt, have resulted had not Mr. Long detected this condition. Appropriate entry will be made on his record.

Toledo Division

On August 10, E. F. Stenger, operator, Miamisburg, noticed car in extra 4266 north, which appeared to have bent axle. He had car examined at North Dayton. Car wheel was found to be $\frac{3}{4}$ -inch out of plumb. Mr. Stenger is commended for his careful observation.

On August 16, J. W. Shulte, operator-agent, Kirkwood, observed brake beam down on ear in middle of train of extra 4048-4246, coupled, south. He stopped train at south end with automatic signal and had brake beam removed. This averted a possible serious accident. Mr. Shulte is commended for his thoughtfulness and careful observation.

On the morning of August 23, Operator I. J. Fisher discovered brake beam down and dragging on rail, third car from engine in train of extra 4297 north. He gave engineer signal, train was stopped and brake beam removed, thus preventing probable accident. Mr. Fisher has been commended for this thoughtfulness and quick action in stopping the train.

How to be an Amateur Oculist

WE ALL appreciate the efforts of the amateur oculist. He is so earnest about it. But why let others get all the credit? Why not be one yourself? All you require is a few lessons by mail and a cast-iron nerve. Try everything once. Remember the victim suffers more than you do.

The first move is to roll back the upper eyelid by placing a medium-sized plank behind it. Then while the victim boxes the compass with his eye, you massage his eyeball with a match, a pair of tweezers, or the back of a knife, or any other appropriate instrument, first wiping the instrument carefully on a dirty apron or the sleeve of your

shirt and wrapping the end of it in a soiled handkerchief.

Always remember that the exercise the victim gets by moving his eye rapidly from north to south and east to west is in itself beneficial. In the first place it distracts his attention from your excruciating efforts and in the second place it loosens up the ligaments that restrict the movements of the eye. In fact, if the exercise is continued long enough he may be able to look in several directions at one time without apparent effort. Furthermore, it may work the dirt so far into the eye that it will be twice as difficult to remove it. This, of course, makes your task much more interesting.

After you have prodded the eyes of several victims you will be astonished to find that the human eye is not made of solid rubber or polished ivory as you imagined, but can be badly damaged with even a comparatively soft instrument like a match or a pair of tweezers.

Don't let this fact discourage you, however. Remember, if you want to be a member of the great army of heroic amateur oculists who are infecting and ruining the eyes of people all over the country you must persevere. There is no great gain without some small pain.

If you happen to lack nerve and this work seems too brutal for your sensitive nature, we would recommend that you refer sufferers to some competent first-aid worker or nurse. Naturally, though, we are disappointed in you and you are deprived forever of the pleasure that an amateur oculist gets out of life, even though in the end you will have more friends.—*Courtesy Liberty Mutual Insurance Co., Boston, Mass.*

The Bone Popper

A One Minute Essay

By T. H. M., Indiana Division

Did you ever go to one of those new-fangled doctors, one of those vertebra vampires? It's a romp from the time the festivities start to the checkered flag. I never knew I was deformed, but if I have as many lesions as that man found on me, I've got the cripples of Paris looking like the Cleveland Indians.

The way he could take a spine and crack its tail was a caution. Within five minutes from the time he put me on the rack he had my spine sounding like a barrage fire. He knew each vertebra by its pet name and by putting them *en rapport* with each other could cure anything from corns to Myelitis. He played the latest popular airs on my ribs, using them for a xylophone to the accompaniment of the spinal chord.

As soon as he invoiced my vertebra he told me he did not understand how I lived with a spine like a rail fence. He said there were so many lesions that my spinal cord must be fluted like the elbow in a stovepipe; he was so familiar with the human anatomy that by the simple twist he could extinguish one's lamp or extract the spinal cord and leave you wilted like a frostbitten caladium.

Wouldn't it be fine if Uncle Sam could mobilize an army of these bone poppers? What a sight it would be to see them go "over the top" to attack the enemy, and to come back with thirty thousand or more spinal cords glistening like eels in the sunlight, leaving the foe to crawl around in the trenches like slugs.

These fellows always carry a line of breeze with them to divert your attention while they slip up on you and dislocate your hip or some other portion of your anatomy. I distinctly remember his telling me, as he toyed with my floating ribs, making them vibrate like a springboard, of the tests he was put through at school before he received his diploma; how he had to perfect his touch; how they would put a slick dime under four thicknesses of carpet and, by feeling through this, tell the date on the dime. I told him when I paid him that his touch was perfect. I don't think there was much the matter with me when I went to him, but I am sure there was when I came home.

Among Ourselves

Baltimore and Ohio and Sutton Buildings

Law Department

Correspondent, GEORGE W. HAULENBECK
2000 Bars of Soap

Seven hundred and eighty children, Russian refugees, were brought to the United States in 1918 and turned over to the Red Cross for care. They were sent out of Petrograd, when that big city was sadly disrupted by the war, and they have been in this country since, absorbing a whole lot of real American ideas.

Having received proper treatment by the Red Cross, they were burnished up for a return trip to Russia, and their big ship was only recently pointed towards home. They no doubt created a great impression when they reached their destination. When these children came to this country in 1918, then were so dirty and disheveled, that to clay them up and make them at all presentable, 2000 bars of soap were used.

The foregoing paragraph cannot be regarded strictly as a Law Department item, but when everybody, or nearly everybody, gives me the injunction not to put them in the MAGAZINE, the poor correspondent is obliged to trot out something; I therefore ask, "What is a fellow to do under the circumstances?"

Information

Information of almost any character that cannot be readily obtained, is always on tap in the Information Bureau of the Baltimore Sun. I call upon that institution on the slightest provocation. I like to go there. I always get results. If the young lady in charge cannot get the information desired, it is unobtainable, but she never let's go. There are two kinds of information in everyday life. One is to be able to give it right off the bat, and the other is to know where to get it.

While waiting for the young lady to find what is wanted, I look over the titles of the books in the big book case; books upon every conceivable subject, all carefully arranged and indexed, and done by women, too.

We men have got to be on the alert and do our very best. A new condition is approaching—not only approaching, but it is here; women are factors in the business arena. I have already adopted the plan of doing a thing today, better than I did the same thing yesterday.

The four young ladies in the Law Department are very capable; their work cannot be done any better, and I warn young gentlemen in railroad service to do their work just as well, or better, if that is possible.

North Carolina Girls

Ever since I made the assertion in the MAGAZINE that John E. Clabaugh, of Frederick J. Griffith's Tax Office, preferred Baltimore girls to maidens from North Carolina, I have been in water of more than a tepid temperature.

The Bible says, "Even so the tongue is a little member, and boasteth great things. Behold, how great a matter a little fire kindleth."

I plead guilty to making the assertion, and in consequence I not only received a mild castigation from Mr. Clabaugh, for whom I have a very high regard, but also a rebuke from my young friend, Francis H. Urner, of this department. I verily believe that both of these young gentlemen have sweethearts in North Carolina, and that accounts for the milk in the coconut. Perhaps two important events will occur in the near future. Both of these gentlemen meet my approval in every way, and I want to do everything I can to aid them in their contemplated matrimonial intentions.

Mr. Urner comes to the defense of the North Carolina ladies very earnestly, remarking that the girls down there do not require calcimining, and the use of cosmetics to make themselves attractive to the male sex. They do not have to rely upon these things. The lip stick is something they know not of, and powdering the nose every few minutes is to them a distressing procedure.

In a recent issue of the MAGAZINE there appeared a picture of a baseball team at Jenkins, Ky., managed by District Superintendent H. R. Laughlin. "Hice" Laughlin is a Deer Park boy. He is very popular with his men down in Kentucky. They all call him by his given name, yet no one thinks of being familiar. When the outlaw strike was on, not so long ago, he acted as conductor on the up and down passenger train, and stood ready to act in any capacity that was required.

"Hice" Laughlin is not the only Deer Park lad who has risen in the railroad world; Mr. Otto Droege, general superintendent of the N. Y. N. H. & H. R. R. Co. at New Haven, Conn., is another.

I made a trip to New York early in October. I just had to see if Mr. Ziegfeld was giving a proper entertainment in his midnight frolics atop the New Amsterdam Theatre on 42d Street, and then I had to see the Hippodrome production to find out if it was correct and proper.

If some one else acted as the Law Department correspondent my trip would be reported about like this:

Our Mr. Haulenbeck, notwithstanding that he has passed the 77th milestone, has made another trip to New York. He runs on to New York quite often and insists on shopping at Macy's, though he earns his money in Baltimore. He just can't keep away from the Winter Garden and places of that sort. He says one day in New York at a time is quite enough for him and is always glad to get back to Baltimore.

Engineering Department

Correspondent, OSWALD EDEN

Sage sayings by sorrowing souls: "Some people come to work early and stay late so they can loaf longer."

Our "Joe" says: "A fellow's habits sure do change when he gets married." Pall Mall days are over, he never carries a match. He is afraid of circumstantial evidence. As for trips to places of interest, like Laurel, they are out of the question. "Joe" is so crazy about married life that he is the last one to leave the office every night.

The engineers are very much interested in the proposed clubhouse which the Baltimore Chapter has an option to buy. It is the former palatial home of Dr. J. Hall Pleasants, and is located at 16 West Chase Street. It is admirably planned for use as a club. Its outward appearance is that of a large clubhouse and its interior design gives the same suggestion, having a large and very beautiful open stairway leading from a handsomely decorated and paneled reception hall, together with several large meeting rooms on each floor, as well as various smaller rooms. It is felt that if the deal is consummated, Baltimore professional engineers will have a clubhouse ranking with the best now existing in the country.

Hip! hip! hurray! Once more and then some! "Pop" Hauser is at last safely (?) located in his "paradise." He has found a house with running water (which comes through a hole in the roof when it rains), a large chicken coop, lots of fruit trees, and a beautiful front lawn. The only disadvantages are that the house is equipped with electricity and located right on the road, only two minutes from the Western Maryland Railway. The thing that now makes us sorry is the fact that Harry Roebuck made a mysterious visit to the property on the night before moving day.

They say of a cat which goes after a mouse

The feline's a very good mouser;

But think of old "Gus" who went after a house,

He sure is a cracking good "Hauser."

"Velvet Joe" Kemp believes in nicknames. His'n is "Toodles," her'n is "Dew Drop." "Joe" says he's her'n and she's his'n.

Your correspondent takes pleasure in announcing the birth of a son to Mr. and Mrs. Wendell P. Ball, of the Cost Department.

"Alvie" Weston had a sham battle with an intruder in his home the other day. Someone placed a costumer, containing a hat placed on top of a coat, out in the hall—a position it never occupied before. "Kid" Weston gave one look and then grabbed at the intruder's throat. The hat fell off and as one can't choke a post of wood, our hero collapsed with chagrin.

While on his vacation Milton Chambers, secretary to chief engineer, had his tonsils taken out. He was in bed a week, but seems to be "all there" once more.

A great event is about to happen to one of the men in the Cost Department, including a trip 'n everything. But more about this later.

Office of General Freight Claim Agent Correspondent, Miss E. T. MURRAY

Well, here we are, all comfortably settled in our new office, fifth floor, Annex, with plenty of daylight as usual and everything that one could wish for in a modern office. By the way, we note from last month's MAGAZINE that the Auditor of Passenger Receipts folks were throwing bouquets at themselves for their record in moving from the Lexington Street Building to their new quarters in the Annex. We cannot see where they have anything on this department; one of our most important divisions, the Diversion and Reconsignment, was hard at work in the new quarters on the same day we moved in. For speed, believe me, they certainly showed "pep."

Already we have been honored with a visit from many friends, among them was James S. Murray, assistant to the president. Mr. Murray expressed his surprise at the fine large office we have. By the way, your correspondent had the pleasure of meeting Mr. Murray.

We introduce the following employees who have entered the service within the last month, so we will all feel that no strangers are among our "great big family." They are as follows: The Misses C. D. Runge, Ruth C. Banks, S. H. Barshop, J. T. Castello, May Jones, D. M. Hill; Robert W. Barry and R. H. Benfer.

F. N. Barr, file room, has been granted a two month's furlough on account of his health.

Why did Roberts go to Philadelphia?

Why did a certain young lady look for Roberts in Baltimore when he was in Philadelphia?

Why did Roberts come home on the Philadelphia boat all alone?

Why did the young lady come home from Boston by rail instead of by boat, as was planned?

Why was Roberts disappointed and the young lady angry?

Why were things all twisted up any way? Answer, "Seasick."

You see it was this way. She—

Oh! you had better ask him; he can tell you the whole thing.

Many, many months ago there began a romance in our machine room, the interested parties being Miss Edna Irene Blunt and William Siegmund. The happy ceremony was performed at Bethany Evangelical Church on September 25, at 8.00 p. m. Our congratulations and hearty wishes for a happy future are extended to them, along with the beautiful silverware.

Miss E. M. Jones, O. S. & D. Division, has resigned her position to prepare for a happy event which will take place on October 20. More in our next issue of the MAGAZINE.

Cupid seems to have stationed his batteries in our department. Now comes the report that besides the two "victims" above mentioned, at least a half dozen more of our fair maidens have felt the sting of the keen darts of mischievous "Dan" and have intimated that engagements other than those calling for dietation and typing are about to be consummated. Several girls have gone further than giving mere intimations to close friends—they are already wearing the "brilliant" on the proper finger. It looks as if Mr. Olson will have a deserted department in the near future. Nor has all this frivolous talk to do with the girls—certain of the boys are involved in Dame Rumor's meshes.

He and She

'Tis said "In the springtime our thoughts lightly turn to love." Can this be the reason

for the trip of J. R. M. and D. L. W. to Danville, Va., last month?

Maybe so, maybe so, because *he* said *he* was going to see *her* to the train and *she* was going away.

Well the baseball team happened to be on their way to Jessup on this train to engage in a battle royal at that metropolis and naturally there was quite a noise, but all of a sudden it stopped as the train started and in walked *he* and *she*, and *his* face fell, and *he* reddened the most beautiful shade of red.

Then somehow or other when congratulations started and good wishes were offered, *he* must have felt suddenly faint for *he* disappeared and when his loss was noticed by *she* it took quite a search before *he* was found crouched between the backs of two seats of the smoker and with stumps piled around him six inches deep.

We wonder why W. H. Bittner, head clerk, Reconsigning Division, appeared in the office one morning with gay cuffs about four inches in width on the bottom of his trousers. Good thing it was a holiday. For further information consult Charles Perry.

On September 18 the baseball team of the Freight Claim Department made a second attempt to defeat the team of the Jessup's Athletic Club on their grounds at Jessup, Md., and returned defeated, 11 to 8. The game belonged to the Claim men from the start and was lost by a change of pitchers in the fifth inning. The Jessup's Club found the change easy and binged out hits for six runs before they could be stopped. The score was as follows:

Score by Innings

Freight Claim.....	2	0	2	0	0	1	1	2	—	8
Jessup's	1	0	3	6	0	0	1	x	—	11

Summary

Home Run—Gover. Two-base hits—Robinson (2). Stolen bases—Fink, Helfrich (2), Vinci (2), F. Bond (2), McMahon (2), Tyston (2), M. Bond. Sacrifice hit—Barns. Left on bases—Freight Claim 9; Jessup's 4. Hit by pitcher—Brubaker, 1; Reimsnyder, 2. Struck Out—by Brubaker, 4; Reimsnyder, 3. Umpire—C. Keys. Time of game—1.45.

The boys had the regular large following of rooters and it was no fault of theirs that the team did not win.

The team should have won on the presence of "Daddy" Loane, who was very much on the job, entertaining the ladies and having his picture "took."

Just a word of advice to Miss Edna Foster. Be sure to have full explanations of a baseball game before witnessing another game; then there will be no reason for asking, "Why does a fellow want to bat the ball when there is a man on all three bases? He will have no place to go!", also, "Why knock the ball down in the field? Someone always catches it, and if you knock it in close someone gets it and throws you out at first; so what's the use in playing?"

Old High Cost of Living will surely receive an awful jolt if the rumor we hear about the bumper crops our amateur farmers are raising is true. Among the amateurs are the following: Messrs. Zenter, Taylor, Waters and Rogers.

"It's a girl and her name is Mary Elizabeth," was the first thing we heard from J. I. Waters, Claim Prevention Division, on September 20. "Mine is a girl also, and her name is Georgiana and she weighs 8½ pounds, was heard just a few days later, September 29, from J. L. Rogers, of General Division. Two more "farmerettes" in the near future—rather than additions to our Baltimore and Ohio family.

Did the office of Passenger Receipts think the Building was dynamited one day recently when "Bill" McCallum's chair suddenly slid and he fell to the floor with an awful crash?

Charity is a beautiful quality and it is with great pride that I express in behalf of Mr. Glessner, his sincere appreciation for the large donation contributed by the employees of our department toward the \$350,000 campaign conducted throughout the city for the benefit of improving and enlarging the University Hospital. As the Baltimore and Ohio Railroad Company has a private ward, consisting of about 30 beds, in this hospital, we especially appreciate the keen interest shown by each member of this office. Our contribution was approximately \$400.

Mail and Express Traffic Department

Correspondent, T. E. REESE, Chief Clerk

The accompanying photograph shows one of the ways in which the Mail and Express Traffic Department is progressing. This healthy looking group is the family of Clerk C. H. Birely. The picture was taken in the front yard of his home at Lansdowne, Md. Mr. Birely has recently been appointed assistant chief clerk.

Children of Charles H. Birely

Printing Department

Correspondent, M. J. CONROY, Proofreader

An old printer was telling a story the other day of an incident that happened in his career in the far west when he "toured" the country in a "private" box car with hay for a bed and without the formality of a pass or the payment of transportation. Traveling for a day and a night, after a hard battle with John Barleycorn, he came to an out of the way village with nothing but dreary desert waste and sand on all sides.

As he alighted from his "private" car and started toward an eating house he noticed quite a commotion about the place and a number of railroad men congregating. When he came up to where they were he found they had some fellow under arrest who had broken into a "hoghead's" shack and rigged himself out with new clothing from head to foot. He was captured while trying to make his getaway on a train. There was no justice of the peace or constable in the place and the railroad men held what they termed "kangaroo" court on the culprit. He was found guilty and sentenced to 20 lashes. A big, rawboned engineer, from whom the prisoner had stolen the clothing, was selected to administer the beating.

The prisoner was placed over a barrel and while one railroader held his arms and another his legs the engineer took a stout board about a foot wide with a handle for a good grip and commenced to "lay on." With every stroke of the board you could see the smoke and dust arise from the seat of the prisoner's pants. The loud yells he let out from the pain were frightful, and one could almost imagine he must have been heard in the next town, 50 miles away.

After the 20 lashes were duly administered he was turned loose and told to get the

"first train out," which advice he accepted with alacrity. Thus justice was speedily administered without cost to the county and everybody felt, no doubt, that a lasting impression had been made on the prisoner's thieving propensities and that for the next few weeks at least he would have to eat his meals off the mantel.

Several of our men have been paying visits to Judge Staylor's court in the past couple of months for speeding their little "Henry's." Emmet Collins has been there several times—in fact when the judge looked over his docket one morning recently and saw his name there again he at once ordered the bailiff to "bring out the regular customers first."

The sum of \$53 was contributed by employees of the Printing Department in October to the University of Maryland campaign fund. Pretty good little givers, we'll say.

Martin and Henry, our two candidates for future presidential honors, recently took a trip to Cumberland. They were told not to come back without seeing Narrows Park—one of the most wonderful and beautiful parks in all Maryland, they were told. When they returned they were asked if they visited the park. "Yes, we saw it. It's an 'll of a place to call a park. Why we saw the whole town in half an hour. We want something with a little more speed to it the next time we go visiting." Then "Bill" Rice chimed in, "If speed is all you want, why don't you go out to Laurel!"

You tell 'em type, you're all set up!

Relief Department

Correspondent, H. IRVING MARTIN

Every employe of the Relief Department was deeply grieved to hear of the death, on September 30, of Charles W. Ruddach, a retired employe of the department.

Mr. Ruddach became connected with the Relief Department in November, 1888, and served continuously until May, 1911, when he was placed on the retired list.

Through his kindly disposition he gained the regard of all with whom he came in contact. The title of "Pap," given him in the earlier years of his service, represented the personal hold which he had on the hearts of the boys. With "malice toward none, and with charity to all," he lived his life. He will be sincerely missed and mourned by all of his former associates.

Mr. Ruddach was buried at Loudon Park Cemetery, Baltimore, on the afternoon of October 2.

Telegraph Department

Correspondent, DELLA M. HAIN

Uncle "Al" and Uncle Frank

Went walking out one Sunday,

Said Uncle Frank to Uncle "Al,"

"Tomorrow will be Monday"—and they didn't get to Gettysburg, either.

You might as well tell us, Murphy; we'll find it out anyhow.

And just why Mr. Thompson would have to go to Canada to tread on a young lady's toes we should like to know. He could dance the same way here.

Inspector Allman has a second-hand hat store at home, at least we think he has. He gathered up all the old "straws" here and took them home in his suitcase. He takes milk bottles home, too. What are they for, Charles?

Sick News

J. C. Berrett had a boil, or rather a family of them, on his neck, but they are all gone now.

B. F. Thompson had something in his eye. It's out now, whatever it was—"something green," I think the nurse stated.

Division Operator Fuqua had his hands tied up—he must have been at mother's jam. The bandages are off now, we are glad to say.

Miss Mary Tansill spent a week at the Maryland General Hospital. She is out now, too. Another eye case, but our office nurse handles only cases for men.

Mr. Faringer got new glasses. He sees everything now—and hears it, too.

Mr. Miller had some nerve. It was in his tooth, but he doesn't have it any more. They all flop sooner or later.

Catherine: Wh-a-a-a-a-a-a-a-a-a-at?

Special to Editor—not via the correspondent:

First "Bill" gives Miss Della a dog; now he has made her a present of a duck. How about it, Della?

Valuation Department

Baltimore Office

Correspondent, G. B. SAUMENIG, Accountant

The Valuation Department is now permanently located on the eleventh floor of the Baltimore and Ohio Building and we are gradually getting the whole family under the same roof. It is a great relief to know that we now have a place where we can hang our hats. The trouble is, some hats do not stay where they are hung.

Back pay has at last become a reality and in view of the increases in salary recently granted there is a possibility of some of our Beau Brummels taking the step. It is rumored that some are considering the matter now.

Just a word about ventilation. There is absolutely no good reason why we should not have a well ventilated office, instead of being compelled to breathe impure and germ-laden atmosphere. It was the custom some time ago to have every window in the office opened at 10.30, 12.30 and 3.00 and kept open for several minutes. This custom should be revived and not only should this be done, but some definite and lasting arrangement made whereby the office is properly ventilated at all times and the temperature kept at about 68 degrees. *Fresh air is important.*

Because of the numerous changes that have lately been made it has become quite difficult to locate the different offices. Why not have a directory at the entrance on the first floor?

Donald Wilson is back in the army once more. He severed his connections with this Company October 1. We wish him all kinds of success.

Fishing seems to have been one of the chief sports during the past few months. Numerous parties were made up, but the strange part of it all, few were willing to talk about their success when they returned. We have in mind one exceptional case. He had no witnesses who could prove otherwise. It was wonderful to hear him tell about the trip. It was a fact, so he said, that the fish were so plentiful that they followed the boat all day and became so eager to get caught that they climbed in.

Our cartoonist has increased his appetite for soup. Now it is two plates; one for himself and one for his suit. Lucky for him that he has two suits!

Miss M. M. Sheehan, stenographer to cost engineer, spent her vacation at Niagara Falls and other well-known points.

Nothing has been heard regarding a welfare organization or something similar to bring about a closer feeling among members of our department. It is true that we hardly know each other.

In the recent drive for the University Hospital, the Baltimore office contributed \$231, of which amount \$145 was in cash.

Another new face in the office. This time the comptometer gets a "Miss" instead of a "Mrs." It is in the same family, so why shed tears?

Our file clerk is away out west, where he is enjoying an extended vacation. That boy certainly has the nerve and the wherewithal to take such a trip. As to postals, ask Mrs. Larmore about the one he sent her from Baltimore, when he was in Nebraska.

Allan Gibbons, mail clerk, has the "Murphyitis." Did you ever hear him talk? There may be something in the mail that causes our boys to become so speedy.

There is now a chance of some member of the department being put on the carpet.

Chicago Office

Correspondent, M. M. GREENBERG

The employees of the Chicago office were very sorry to learn of the death of their former co-worker, "Jack" Dinkel, who passed away on September 20 after a short illness. Mr. Dinkel held the position of assistant abstractor for about two and a half years. His many friends in the Grand Central Station showed their sympathy by sending a beautiful floral design.

The late Charles W. Ruddach

Cincinnati Office

On Saturday, September 11, the Baltimore and Ohio Railroad baseball team easily defeated a team from the E. A. Kinsey Manufacturing Co., of Cincinnati. The work of the men from the Valuation Department was stellar. With Meyer, the ex-University of Cincinnati star, in the box, runs for the Kinsey team were as scarce as the "free lunch" of olden days. We are developing a team which promises to be a strong contender for baseball honors here next season.

The lineup follows:

Patimore and Ohio—Schott, cf; Smythe, ss; Feist, 3b; Lind, 1b; Reising, 2b; Frey, rf; Harold Justice, lf; Howard Justice, c; Meyer, p.

E. A. Kinsey Manufacturing Co.—J. Beck, rf; C. Beck, lf; Goldberg, 2b; Nuremberg, p; Steidel, ss; C. Koopman, 1b; Cryon, 3b; Kirchner, cf; W. Koopman, c.

Score by Innings

	R	H	E
E. A. Kinsey Co.	0	0	0
Baltimore and Ohio	0	0	0

Summary

Sacrifice hits—Nuremberg, Steidel. Stolen base—Schott. Left on bases—Baltimore and Ohio, 3; E. A. Kinsey Co., 4. Struck out—by Meyer, 10; by Nuremberg, 10. Base on balls—off Meyer, 0; off Nuremberg, 3. Hit by pitcher—by Meyer, 1. Umpire—Troy. Scorer—Robinson. Time of game—1.50.

A game with the Kelly-Springfield Company, on September 4, resulted in another victory for our team, the score being 7 to 6.

W. E. Robinson, Valuation Department, is the proud father of a 7½ pound boy, born on Monday, September 6.

Now that the autumn meet held at Latonia is on, we are wondering if Martin and Peterman are playing their favorite horse "Green Blonde." "Pete" says, "She is a good mile and a halfer."

F. L. Templeton has left the Valuation Department to teach in Greensburg, Ind. We wish success to Mr. Templeton.

Roy C. McDiarmid, Valuation Department, left on September 14 to motor with a party of friends to Los Angeles for an indefinite stay.

"Miss Evans the Second"

Q. "Why is R. B. Stone so downhearted nowadays?"

A. "His wife is home."

Q. "Why is H. K. Justice eating his lunches at 'Spears' cafeteria these days?"

A. "Let Spears feather your nest."

The "switchmen" of the Valuation Department are all smiles. Why? Because their easy money checks for services rendered arrived.

We have been wondering why Miss Gladys McDiarmid has been working so industriously on pillow cases, etc. The mystery has been solved. She is wearing a blinder on her third finger. Congratulations! When is it coming off, Gladys?

Our eminent red-topped assistant abstractor, "Archie," just returned from a two weeks' trip through Illinois. We are sorry to say his "vacation" did not agree with him as he appeared quite feeble on returning to the office yesterday. Some have brought forth the theory that "Archie" has been pining his young heart away on account of absenting himself from Bellevue for two long weeks.

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

With the advent of cooler weather, we are looking forward to the resumption of the weekly talks conducted by the "Y."

If the speakers for the coming season are up to the standard of last year and the year before, we will have no cause for complaint.

A rumor persists that our Alice is wed. The still small voice insists that the event was pulled off in Pittsburgh during that September trip. We ain't got nothing to say, other than to express our joy if the rumor is a simon pure canard, and our deep sorrow if it is true.

Now that Frederick Road Park has closed for the season, there will be no excuse for "French" to stay up as late as nine o'clock every evening, but he will be in the house before the curfew rings. A regular twelve o'clock guy in a nine o'clock town!

On arriving at the office on Saturday morning, October 9, nearly everybody was very agreeably surprised to find a beautiful bunch of dahlias on his desk. (We understand the offices of chief traveling auditor and chief of tariff bureau were also remembered.) Inquiry developed that in line with the "Say it with Fowers" movement, C. C. Rettberg, assistant chief clerk and horticulturist of no mean ability, took it upon himself to beautify the office. The effect was certainly wonderful. A sort of "Vincent" affair on a small scale. Everybody was delighted, and much credit is due Mr. Rettberg for his kindness.

Office of Auditor Merchandise Receipts

Correspondent, P. HENRY STARKLAUF

Don't wait for the boss to crank you—be a self-starter—then measure your work with a speedometer, not with a clock. Never wait for a ship to come in, when you haven't sent one out.

Wonderful, indeed, to see how the newly enfranchised have responded to the call and to note particularly how the responses were made in the registration offices. The ladies seem to have it all over some of the men in many respects and it is to be hoped that the women will seek out and overcome the abuses of politics, such as has been done in some of the Middle West and far Western Centres. Well, ladies, it's now up to you. Go to it!

The Mt. Royals will hold their second Benefit Dance sometime in the early part of December at the Auto Club Hall. Doron and Gawthrop will make the necessary announcements later. The boys are asking your cooperation for the customary "Big Night."

And as for our attractive young women, they surely will not disappoint us, even though they do not offer a word of encouragement as to the Beauty Contest.

On going to the pictures or to church, on seeing an accomplished individual playing one of these big modern organs, working hand and foot, first a far-distant soft treble, and then moving towards a big massive heavy bass, one naturally is envious. We have two such here—"Buz" Seldner and "Fred" Norman. "Fred" quotes an authority regarding the Twenty-fourth Prelude of "Showbang," "As reminding him of the reverberations of gigantic waves on the remote shores of a distant world, etc., etc."

When someone is about to be married in our organization, they are accorded a send-off by decorating their desk in a style befitting. One of our young men was riced and confetti-ed recently, when someone turned an envelope full of this mixture down his back. He for sure did some tall "shimmying." Believe me—here 'tis—Miss Gretchen A. Gentsch to Charles F. Schwarz of the Interline Settlement Bureau, Saturday, October 2, at 4.30 p. m., by the Rev. Julius Hoffman of Zion Evangelical Lutheran Church.

Our sympathies go out to fellow-clerks J. W. Pickett and C. J. Kane on the deaths of their fathers; and to Miss Margaret Kerns on the death of her brother.

This office contributed \$663.25 towards the \$350,000 Drive for the University Hospital, for the construction of a Maternity Building and new Nurses' Quarters, and other improvements. This splendid showing is a credit to the committee, composed of the following young ladies: The Misses Worthington, Patschke, Spear, Spengler, Leech and Walters.

Auditor Miscellaneous Accounts

Correspondent, MARY E. PEARRELL

Frank A. Bond, Jr., one of our newcomers, has been promoted from check assorter to baggage desk. John P. Burke succeeds Mr. Bond.

John Tate and B. A. Lippert took a hurried trip to Atlantic City, leaving Baltimore at 7.15 a. m. on Saturday, October 2, and arriving in Baltimore, October 4, at 9.00 a. m. Neither of these two gentlemen

Robert Gallery

11-months-old son of Bernard F. Gallery, clerk, Assistant Comptroller's Office

looked very industrious when they arrive here at the office. Well, boys! did you meet John Barleycorn?

On Monday, September 19, this office moved from the eleventh floor to the ninth floor of the Central Building, taking for its new quarters the office previously occupied by Auditor of Disbursements. The entire office has been painted and rearranged and makes a very pleasant place to work in.

I am afraid that our chief clerk has missed his calling, as he surely is very poetic. I am sure his poems would create a great sensation, that is, if some of the well-known poets would just give him a slight chance. We wish him all the success possible and hope that he will contribute some of his best works to our MAGAZINE. ("Amen!" says the editor.)

W. R. McCreary, our assistant chief clerk, was seen at Atlantic City, sitting in a rolling chair with a lady. Mr. "Mac" tells everyone that it was his mother whom he took to Atlantic City with him. What seems to be the trouble, Mr. "Mac," have you run out of cousins?

Auditor Passenger Receipts

Secretary to Auditor

We feel extremely proud these beautiful autumn days for the reason that our good friend and ex-A. E. F. soldier, Roland Hasson, is now a daddy; we are doubly happy for the fact that friend wife was formerly Miss Nettie Krause, of this office. It's some boy, and we folks of the office feel like we'd like to be one great big godfather. With such handsome parents, the youngster bids fair to become a splendid representative of the State of Maryland. Good luck to our family! His name's Frederick, after me (?).

Yes, we had our little shore party on September 11, and while the clerks did not turn out as expected, the Old Body Guard was there with their friends and everyone had quite a pleasant time. The day was made to order and the location was ideal for just such a party. Those who were not present missed a good time.

"Tom" Cook's Rolls-Royce was a busy machine that day, and it's hard to tell how we could have managed without it. The boy, himself, is some drink dispenser, too; you should have glimpsed him shooting them across the mahogany. Give us two more, "Tommie," and take one yourself.

The Misses Hoy, Hoffman and Hamlin won their heats, and candy, in the ladies' races, and in the final heat Miss Hoye was the winner (more candy). Miss Hoye can step right out, but we "kinda suspicioned that" from seeing her snappy methods in doing things about the office.

Little Miss Dottie Wills (I'm trying to discover the Dot resemblance), won the mixed race for ladies and gentlemen.

In the watermelon contest the boys just mopped them up, and the way that Grund man can make watermelon disappear is a wonder. What became of the seeds, Carl? I know it wasn't a seedless melon; they don't make them that way.

There was good music, dancing, and there was an abundance of good food. Really there was too much food, but "Jim" and the major portion of his family were there, and "Jimmie" has a mean appetite. One little girlie of the office has such a taking way with small children; it looks like she's wasting her time in the office. Did you all see the leaping dominoes?

Richard R. Winslow has resigned his position with the Company to accept a commission as Second Lieutenant in the U. S.

Army, to be stationed at Camp Meade, Md. Here's our best wishes for rapid advancement.

"Hard cider up the Old Main Line way, boys!"

These are wonderful nights for strolling through the shady lanes of the surrounding country. Big moons, invigorating atmosphere, and the *only* one by your side. It's too cool for mosquitoes, so you can use your hands and arms for other things. What chance has a poor fellow with Dame Nature in all her regal glory working against him, and a girl by his side who has the benefit of the knowledge gained by mother Eve and all the other little vamps down through the pages of history?

Yea ho! "Snitz" is taking up dancing lessons. You can't keep a good man down. Who's the teacher? Save us a dance, "Snitz." Miss Dottie says she is just dying to shimmy with you.

"Pap" Rogers just finished building himself a million dollar bungalow away out on Charles Street Boulevard. Everything is finished, but they can't get the bath tub. Don't worry, "Pap," if you don't have a tub you won't catch cold this winter; they are only for summer use, anyway. "Pap's" corn was six feet tall this summer, and you should have seen the squashes. "You tell 'em lettuce, the corn is shocked!"

Mrs. Anna L. started to look for her winter outfit in the old cedar chest, and discovered something she didn't know she had. No, it wasn't a nice new blouse, but a nice little bottle. The doctor says, "take a teaspoonful three times a day in a little milk. I'm feeling bad all over, Mrs. Anna."

We are getting all tuned up for a banner fall and winter railroad season. We are working just like a big modern piece of machinery; almost perpetual motion. Therefore, with little extra effort we are making great strides. As said in a recent noonday talk, it is our duty to play the game fair, to be good sports and to give the railroad the best we can. There's hardly a person in the service, whose family in some direct or indirect manner has not been connected with the Baltimore and Ohio Railroad, and in some instances, practically whole families are employed by the Company. The Railroad has been extremely liberal, and we want to show our appreciation by giving A-1 service in return. So let's all pull together, keep up the good work of the office, and make a new record for ourselves.

New York Terminals

Correspondent, SARAH HOLMES

John Newman, our terminal timekeeper, was absent a week on a vacation. He relates that he spent the entire seven days cross-country riding through Long Island, hunting for a house, in the course of which business he visited 21 towns. "Did you find anything?" someone inquired. "Yes," answered J. N., "a headache and a dark brown taste, not induced by beverages, but by quotations." John also attended the Mineola County Fair, which was in full swing during his sojourn on Long Island. He found the exhibits unusually interesting and came away with praise and admiration for everything on Long Island except the food dispensers at the fair.

In connection with John Newman's efforts to obtain a home, we might mention the cases of M. M. and H. O. D. as illustrative examples of conditions prevailing in this city and suburbs. Of the former, we might say that "he sleeps at his desk." This, in the ordinary sense, would be taken as a figure of speech signifying lack of inter-

est. Not so in M. M.'s case. He sleeps at his desk literally, but not on his job. If it were not for the desk he would have no place whereon to rest his head. He has stored his goods, shipped his family west and now defies the devil and the landlord (synonyms) to do their worst. H. O. D. also anticipates becoming aagrant. He has had his month's notice to "get out" and Mrs. H. O. D. has been a month looking for some place fit for human habitation. Now the spectre of "dispossession" tares him in the face. The other day he saw an "ad" of a garage "to let." As the rental was just within his means, he made a rush for the place, but found that a better sprinter had beaten him to it. He speaks grimly of a letter he has just received from a friend down in Virginia, informing him that he had been transferred to New York, and requests Mr. D. "to pick out a nice floor or apartment for him at once and forward the address, as his household goods are already packed for shipment." The "Mayor's Committee" investigating the housing problem, finds that over one half million families in New York are "doubling" in single apartment. The Health Commissioner testifies he found one 16-flat tenement housing 35 full-sized families. Welcome to our City, Ye Country Cousins!

On September 12, "Ned" Fowler died of Bright's disease in the City Hospital, Jersey City. "Ned" was a member of the Veterans' Association, having entered the service September 4, 1896, a clerk at old Pier 27, East River. He served in various clerical capacities at Pier 21, East River, and Piers 7 and 22, North River. On December 19 of last year he was first taken sick, but returned to duty on March 1. He was again furloughed on account of illness on August 4, and this time did not return, but went to the Land of Eternal Rest. "Ned" was always cheerful, had a bright smile for everyone, and all in all was "a good old scout."

J. P. O'Reilly, Produce Exchange, is keeping bachelor quarters at Stewart Manor, L. I., while his wife is in Canada for one month.

Leslie Carpenter, our "genuwin" little blonde, goes by our desks like a young whirlwind and the minute we see him coming we have to look around for paper weights. He has "speed" written all over him.

W. B. Biggs, terminal agent, after spending one week each in Ocean City and Belmar, N. J., returned with photographs of the large fish he caught.

With the appearance of Miss "Tillie" Wilson in the Westbound Department, Hattie Mallick gladly relinquishes the title of "heavyweight champion," which she held on that side of the office.

Dame Gossip is connecting the names of two dark-haired clerks, A. M. and I. C. Wonder how far-fetched it is?

Frank Cappock furnished some excitement, and gave us a sudden scare one morning, when he stood on the radiator pipes trying to close the window. We don't know whether it was due to the additional weight gained on his vacation, or to the fixture that held the pipes in place, but no sooner had he put his foot on one of them, when there was a crushing noise that sounded almost like another "Wall Street Explosion," and the pipes in a big upright one as well as a few horizontal ones came down. Luckily Frank was not hurt.

Quite a few of our girls are crocheting ties just now. For their gentleman friends? Oh, no! From what they tell us the ties are for their cousins, uncles, fathers, etc. However, we have our suspicions as to the wearers.

Staten Island Lines

Correspondent G. F. GOOLIC

Now that Port Richmond Tower is completed, we have with us once more F. T. Metcalfe. He was away from the office for about six weeks, and we are glad to have him back with us again.

We all extend our congratulations to our friend "Dick Hart," who has just come back from "honeymooning it" at Atlantic City. The bride was Miss Lillian Hanlon, whose father is employed on this division as engineer.

W. L. Dryden, signal supervisor, and C. A. Salvesson, maintainer, spent their vacations traveling through the South in their new "Paige" car. They experienced no trouble during their two weeks' tour, which was a very unusual happening. Some people are lucky.

We have a new "fad" at Pier 6 now. All the girls are now wearing "RED" hats. Wonder whether its a club just organized, or what? Anyway, we will say they are becoming.

Thirty-six years ago a young fellow put on his Sunday-go-to-meeting clothes, eased his feet into a pair of store shoes, slicked down his hair, gave the family a strained good-bye, and shook the dust of Pocomoke, Md., from his feet. Today, he watches over the signals and interlockers of the S. I. R. T. Railway—signals that made 391,339 movements in the month of June, with a record of over 99.99 per cent. perfect. Do you know him? W. L. Dryden is the man. How does he do it?

H. J. Canlon, inspector, Maintenance of Way, spent his vacation at his little home at

Rosebank, S. I., with his two children, and is now back on the job.

John Brennan, scale inspector, went to Washington for two weeks. We are wondering what he went after. He's been smiling ever since he returned.

On September 30, H. W. Ordeman resigned his position as division engineer, and on Friday evening, October 1, a gathering of fellow-workers collected at the Staten Island Railroad Club Rooms, Livingston, S. I., and presented to him a token of remembrance and extended their good wishes for his future enterprise. Mr Ordeman came to Staten Island in 1912 when 24 years old. He was employed with the Staten Island Rapid Transit as transitman during that year. On June 1, 1916, he was appointed track supervisor and in January, 1917, was promoted to division engineer. Labor was very scarce and we experienced a very severe winter during the years 1917-18, yet when Mr. Ordeman was called upon to have snow and ice cleaned from the property, he was always ready to do it, coming out anytime of the night and gathering all men possible. While other railroads were tied up on account of snow and ice, Staten Island trains were running because of Mr. Ordeman's prompt action in getting men right on the job.

On January 1, 1919, he was appointed division engineer in charge of both maintenance and construction departments. This made the work pretty heavy for him, but it did not affect him, as he kept up the work just the same as when he was first appointed.

When his fellow-workers heard of his resignation being turned in, it was quite a shock to them, and they were very sorry to

lose him, as he was well liked by all men in his department, and in other departments as well.

J. L. Suesserott, assistant engineer, from Pittsburgh Division, has been appointed division engineer, vice Mr. Ordeman. We extend to Mr. Suesserott the same loyal support that we gave his predecessor.

Baltimore Terminal Division

Correspondent, MARTHA V. FOX, *Secretary to Superintendent*

We announce the appointment of C. E. Wood as general foreman, Grain Elevators, vice W. W. Carr, resigned.

Congratulations to I. G. Smith on his record dump of 75 cars at Baltimore Coal Pier! We wish him luck in breaking this.

G. P. Hoffman resigned as general car foreman to enter the automobile business in Colorado. E. F. Keene is acting general car foreman at present.

Locust Point Yard

After 15 years of courtship, J. E. Green, Locust Point Yard office, decided to take unto himself a wife (but he was very careful whose wife he took). We do not know whether there is any truth in the old adage about "leap year," but it certainly does look funny to us. "Greenie" never did have any nerve with the ladies.

"Sambo" Davis, brakeman, Locust Point Yard, is considered one of the speediest men in the Baltimore Terminals. At the tender age of 14 years his father gave him three snails to watch; hardly 15 minutes had passed before two of them had gotten away.

Track No. 8, St. George, on Pay Day

Who wants to "pat-a-cake" with little Edison Mitchell Hughes, Jr.

This information was furnished by Conductor E. C. Johnson.

J. J. Link, chief clerk, has taken an extended trip to Oregon, to bring his wife back home. Link must have gotten tired of cooking his own meals.

Agent's Office, Locust Point

Our beloved friend, J. T. Pringer, the South Baltimore Beau Brummel, certainly did look good at the wheel of his flivver on the Key Highway on September 26. All of his friends in the office are trying to find out who the fair one was alongside of him, all full of smiles.

I wonder how Messrs. Steen and Beeker spent the New Year Holidays?

There was a great collection the other day in the office; the purpose of it was to buy our farmer friend Dudley a new fall hat. The fellows in the office were tired of looking at his sunbonnet.

Our friend H. Nutter wants to know how long the job as assistant to the agent will last.

Mr. Jepper, who looks after the bananas at Locust Point, certainly did turn out with a new rig the other day. Wonder where the fire sale was?

"Joe" Galloway, the statement clerk of the office, has gotten rid of his 1905 Panama hat at last.

The men in the office are wondering why Mr. Clark bought two dozen pairs of socks when he got his back pay.

Our congratulations are extended to our old friend and fellow clerk, Mr. Degoe, on his 66th birthday. As he passes each succeeding milestone, he appears to grow younger and it is our sincere wish that there may be many more for him to pass.

The men in the office are wondering what all the attraction is where Mr. Rogers, assistant car record clerk, is seen every morning at 7.00 a. m. in front of the Riverside tower.

Bay View Yard

When calling Bay View on the 'phone nowadays, we miss the usual reply, "This is old man Heintz," which formerly came from the other end of the line. The "old man" is now working at night. We wonder if he spends his afternoons at the matinee, or minding "said daughter."

Trainmaster's Office, Riverside

The accompanying picture is of Edison Mitchell Hughes, Jr., attractive son of our

chief clerk, W. M. Hughes. He is quite a chubby youngster, and his father hopes that he will some day be one of the railroad family.

Miss Eva Bichman, our road foreman of engines' clerk, spent a week's vacation in New York City. Wonder if she was dazzled by the "Great White Way?"

Agent's Office, Camden Station

Correspondent, W. H. BULL

It is with deep regret that we record the death of R. W. Adams, our efficient time accountant, who passed to his eternal rest on

Sunday September 26, at his home, Cowenton, Md., after a long and lingering illness.

Mr. Adams entered the service on September 27, 1907, and lacked one day of a 13-year service. He endeared himself to all who knew him and his many friends will miss him.

He was buried in Woodlawn Cemetery, Baltimore County, on September 28. Charles H. Thompson, Vernon R. Mann, Frank Chambers, Robert Parks and R. W. Cattlett, represented the office at the funeral.

A handsome floral design was sent by our clerks.

*Why haven't
you clipped
this coupon?*

It takes but a moment—to mark the career of your choice, sign your name, clip out and mail.

Yet that simple act has started more than two million men and women toward success.

In city, town and country all over the world men are living contented lives in happy, prosperous homes—because they clipped this coupon.

In every line of business and industry, in shops, stores, offices, factories, in mines and on railroads, men are holding important positions and receiving splendid salaries—because they clipped this coupon.

Clerks have become sales, advertising and business managers, mechanics have become foremen, superintendents and engineers, carpenters have become architects and contractors, men and boys have risen from nothing at all to places of responsibility—because they clipped this coupon.

You have seen it in almost every magazine you have looked at for years. And while you have been passing it by more than ten thousand men and women each month have been making it the first stepping stone to real success in life.

Will you still turn away from opportunity? Can you still go on, putting in your days at the same grind, getting the same pay envelope with the same insufficient sum, trying to keep up the constant fight against a soaring cost of living, when such a little thing can be the means of changing your whole life?

You can have the position you want in the work you like best, a salary that will give you and your family the home, the comforts, the little luxuries you would like them to have. No matter what your age, your occupation, your education, or your means—you can do it!

All we ask is the chance to prove it. That's fair, isn't it? Then mark and mail this coupon. There's no obligation and not a penny of cost. It's a little thing that takes but a moment, but it's the most important thing you can do today.

Do it now!

Mt. Clare Yards

Correspondent, J. F. TEARNEY

Chief clerk to Superintendent Carter, and clerk to division engineer, in tacking up "No Accident Campaign" posters over the terminal, left several tack points upturned on the bench in B Yard office. Brakeman "Jim" Phillips, failing to see the point, was highly mortified at having his spirits so suddenly raised.

Yardmaster Hopkins has been knocking people's eyes out of late. Of course, we all know he'd hardly attempt such a thing by physical force—he's too good a fellow for that. The whole secret is a diamond cluster which he wears on his finger. He values it at three hundred, leaving the rest to our own conclusions.

G. H. Withrow, yard clerk, late of the Argonne, Montfaucon, etc., recently suffered a case of "trench feet," although he was seen to run at least three blocks in an effort to catch a street car. Upon his return after a period of convalescence, we heartily disagreed with Grayson as to his malady, but we were given no argument, as he seems to take a peculiar delight in playing these little school-boy pranks.

"Never saw so many beautiful dahlias in all my life, as I saw at the show at Cowenton yesterday," chirped little Miss E. J. Burke, secretary to Yardmaster Hopkins. We know that HE was along, although she would not say how "said party" enjoyed the show.

She said the wild confusion of beauty all around made her feel like a little child in arms again, although she would not say whether "said party" was identified with this or not.

We regret to record the death of Engineer J. H. Bush, and the injuries of Conductor J. W. Roney, Firemen W. E. Duvall and Brakeman J. F. Temple, on account of an accident on September 8, when oil burner of engine No. 98 was blown up. The many friends of the deceased engineer offer their heartfelt sympathies to his family; also to the injured men, who, we are glad to say, are on the road to recovery.

Mt. Clare Shops

Correspondent, MISS MOLLIE ALBRECHT
Secretary to Superintendent

Accounting Department

A. W. Shipley, our former head material clerk, has left us, and is now working in the office of the mechanical engineer at Mount Clare Shops. We wish Mr. Shipley success in his new position, and to state that we are glad he is still a Mount Clare-ite.

There have been so many changes made in the office of the accountant that nobody can keep track of them. One day you go in, and find the man you are looking for in one place, and the next day he is in another. We are all getting dizzy. And then there are so many new faces, that we all need a formal introduction. However, we wish to welcome the newcomers into our midst and hope they will learn to like Mount Clare as well as the "Old Gang" does.

Chemical Laboratory

I had occasion to go into the Chemical Laboratory several days ago, and found one young man in that place very much excited. I asked him what the trouble was, and he simply walked me over to where his coat was hanging, and asked me to have a smell. Immediately after sniffing, I closed my eyes, and imagined myself in a shoe-shining parlor. Of course, I sympathized with him (thinking he had probably spilled some

polish on his coat), but he explained that the "gang" had perfumed his coat before going to lunch, and everybody had sniffed and giggled at him until he was nearly frantic. One lady even offered to show him to a clothing shop, and introduce him to a salesman! This is just a warning: *Motto*: Watch out for the Chemical Laboratory gang!

Tool Equipment Office

R. T. E. Bowler, our supervisor of tool equipment, is forever smiling now. And his chest has developed at least three inches. Why? Can't you guess? Virginia Moreland has made her appearance into the Bowler household, and just a look at this little darling makes Daddy Bowler smile, smile, smile. Virginia has gained one and a half pounds in two weeks, and we all know it! When Virginia Moreland has her first tooth, R. T. E. won't be able to wear his hat! She's a pretty baby, though, and just as soon as we can get her picture, we'll let you all see it.

Stores Department

Cupid has gone and done it again! This time he made his appearance in the Stores Department, and smiled on Harry E. Litchfield and Lyda Oliver. (This is another Mount Clare romance; in other words, we are gradually marrying them all off.) We want to extend our congratulations to Miss Oliver and Mr. Litchfield, and to wish them every success in this undertaking! Here's hoping the little ship of Married Bliss never strikes any shoals! Mr. Litchfield is leaving us to work at Keyser, W. Va., but we believe his little fiancée will stay with us until January.

There is a certain young man in this department who seems to be very popular with the fair sex. Every night (if you chance to be around the vicinity of Baltimore Street) you can see this young Adonis walking serenely up the street with at least two sweet damsels. Gosh, boy! How do you do it? We know you have charming manners, but we don't see why all the girls fall for you. Can't you persuade them to try out a couple of the other boys? Eh, Stafford!

Superintendent of Shops

Often heard in this office:
"Miss Mollie, have those 60's been signed yet?"
"Say, how about those apprentice forms?"
"Miss Schaefer, take a letter—"
"Hydrostatic test 9-11-20, etc."
"What's your name? How do you spell it? Can you write? Well, for goodness sake, WRITE IT!"
"I've finished my luncheon set, and am going to start on—"
"Oh, darn that buzzer!"

Since the dainty sex have the vote, arguments are never lacking in this office. If you want to know what some of the "sturdy oaks" think of the "clinging vines" voting, just ask our employing officer at Mount Clare. Argument? You won't get away for a year! In behalf of the "clinging vines," I just want to say, Mr. Employing Officer, that in the future we are to be considered just as capable of handling the vote as you, and maybe more so! Now tell us what you think of us!

Since all the vacations are over and the fall has about arrived, and swimming, tennis and baseball are out of our heads, we are all ready for the winter of work ahead of us.

W. Weisman, brakeman at Mount Clare Yards, who has been in the University Hospital for several weeks, desires to take this opportunity to thank the Welfare Asso-

ciation at Mount Clare for the beautiful flowers sent him, and to tell all his fellow workers that he is getting along nicely, and hopes to be with them soon.

Baltimore Division

Correspondent, W. H. TARR, Superintendent's Office, Camden Station

George L. Cann, assistant file clerk, Superintendent's office, spent part of his vacation in October attending the Odd Fellows' Convention in Boston. Mr. Cann was somewhat taken with the latest styles the ladies are wearing; but your correspondent recalls that Mr. Cann rode in the parade during the convention held in Baltimore last year and made quite a showing. However, the ladies' socks and short skirts seem to have left an impression with Mr. Cann.

William M. Devlin, former secretary to the superintendent, has been promoted to chief clerk.

C. E. Owen, freight trainmaster, and E. A. Duffy, clerk to freight trainmaster, took their vacations during October.

Brunswick

Mr. Russell Reeds, freight inspector at the shed, has been transferred to Baltimore. We regret the loss of "Bobby," but all wish him luck.

Miss Christine Jones, mail clerk, has been given leave of absence to resume her studies at Hoods College, Frederick.

Miss Fisher, ice report clerk, spent her vacation in Norfolk, Va.

Roy Straitman spent a very pleasant week in Atlantic City, but after returning home was confined to his room because of sunburn poisoning.

Miss Cerelia Mills and party of friends spent two weeks at Niagara Falls, Canada and New York.

Miss Mabel Shaff spent her vacation in Atlantic City.

Washington, D. C., Freight Station

Correspondent, W. L. WHITING, Chief Clerk

"OVERTIME," without any extra pay, has been the order of the day lately in our Matrimonial Bureau. We never know when the fever is going to break loose. Our

assistant agent's stenographer was the first to succumb to the inevitable and quietly told us the other day that she had been married for about a week, and therefore begged leave to resign her position, incidentally leaving us for a time to do our own "stenoging."

On September 21, Miss Jane McDonnell, for that was her name until recently, went to Alexandria, Va. (of all the places in the world), in company with her "Joe," and returned from that gay and festive town as Mrs. Joseph C. Krieger. "Joe" was employed for some time in this office as demurrage clerk, and it was right here that the courtship began. If good wishes can bring them happiness, then "Joe" and Jane have a happy life ahead of them.

Some time ago, before it was decided that we could get along without a telephone exchange, there was a young lady telephone operator in this office whose name was Miss Emma Shafer, and who lived at Laurel, Md. (By the way, Laurel has brought a good many people to this station.) There is also a young man employed here as delivery clerk, named John B. Everson. At noontime, when most of our people were feeding the inner man, you could generally find "Johnny" and "Emmy" occupying the lowest step of the flight of stairs leading to our upstairs offices. This looked serious, but when Emma gave up her position, we all thought that it had only been a passing flirtation. Suddenly, however, "Johnny" began to get passes to Laurel, and finally made up his mind to go to that town to live. The result of all this was very natural, and on October 4 "Johnny" and Emma became "Mr. and Mrs." They are going on a short honeymoon, after which they will return to Washington, where the bridegroom will resume his matter-of-fact duties of delivering freight. "Johnny" is 22 years old and Emma is 18, so that there are many years before them, which we hope will be filled with happiness.

Cashier John H. Peak, recently spent a pleasant week in the vicinity of Cumberland, Md. He returned looking as brown and healthy as if he had been at the seashore the entire time. Good fresh mountain air and good country "eats" had a beneficial effect on John. While in Cumberland he paid a visit to Agent C. R. Grimm, who was formerly assistant agent at this station.

We regret to report that Miss Gladys Beall, one of our waybill clerks, has been ill of typhoid fever at her home in Laurel, Md. The last reports show that she is past the critical period and is on the way to recovery. We sincerely hope to welcome her back before long.

We had with us for a short time one of our old-time clerks, Julian C. White. He returned to his old desk as demurrage clerk, but left us for a better position with the Claim Department in Baltimore.

We welcome to the fold Milton McGovern, stenographer, whom we hope to have with us for many years.

The poem, "A Little More," published in the Veterans' Department of this issue, is from the pen of William Page, the aged grandfather of the acting lieutenant of the Baltimore and Ohio Police Department, E. E. Nicholson, in charge at this station.

Martinsburg Shops

Correspondent, W. L. STEPHENS

James Wilson Bayer, fireman, and Miss Gertie Virginia Hays, of Jones Springs, were married in Ridgeley, W. Va. Mr. and Mrs. Bayer will make their home in Martinsburg.

Peter J. Shriver, retired veteran engineer, died at his home, 545 North Queen Street, at the age of 73 years.

Mr. Shriver was a native of Morgan County. He came to this city as a young man, and on January 1, 1868, he entered the employ of the Baltimore and Ohio, in which service he served continuously until age compelled him to retire. In all of the history of the Company in this section there never lived or served a man who was better known than P. J. Shriver. "Uncle Pete," as he was affectionately called by old and young, could always gather an interesting crowd around him when he began to talk railroading.

At the organization of the local branch of Baltimore and Ohio veterans, Mr. Shriver was elected its first vice-president. After serving one year in that capacity, he was unanimously chosen "president emeritus" of the Association, and continued to hold this title until his death. The trainmen and many among the traveling public will miss his familiar figure, for he made frequent trips, hunting and fishing along the Cumberland Division.

The funeral services were held at the First United Brethren Church. A widow, three sons, and two daughters survive him.

The late P. J. Shriver

Timber Preserving Plant

Correspondent, E. E. ALEXANDER

Another record broken! All records for a single day's output were broken on August 28, when ten charges, 7,115 cross ties, were treated.

Mr. and Mrs. C. T. Thompson, Springfield, announce the birth of a son, James Martin Thompson, on September 19.

W. M. Mayhew, retortman, has been transferred to Car Department, Cumberland. Fireman C. C. Ricewick has occupied company house vacated by Mayhew. P. C. Kenney has been appointed retortman, succeeding Mr. Mayhew.

J. R. Leighty, blacksmith at the Plant since July, 1919, has resigned to accept a position with the Hice & Braler Mining Company at Mt. Savage, Md. W. F. Kifer was appointed blacksmith to succeed Mr. Leighty.

H. E. Smith has been appointed special apprentice at the Plant.

Mr. and Mrs. C. C. Ricewick were presented with a beautiful set of silverware by the Plant employees.

The Tic-gers continue to win, having taken four games out of five since our last issue. The games were as follows:

September 4, Cumberland, L. A. C., losing 9-5.

September 12, Great Cacapon at Green Spring, won 6-3.

September 19, Great Cacapon, won 3-2.

October 2, Paw Paw, won 7-2.

Try My Winter EGG MAKER For 30 Days

Send me no money. Just the coupon. My great Winter Egg Maker is called "Two-for-One." I want to send you some to try. Joe Brabee, Jr., of Mount Olive, Ill., gave his hens "Two-for-One" and got 336 eggs last November from 12 hens. Mrs. T. T. Simmons of Milltown, Ga., got 469 eggs from 13 hens in one month. Mrs. J. A. Doll of Corinth, Mass., in February got 709 eggs from 25 hens. Mrs. T. W. Wills of San Diego, Calif., writes that her 42 hens laid 1,260 eggs in one month. Mrs. R. Hegi of Buckeye, Ariz., got 93 eggs in a day from 100 hens in February. Your hens can do as well if you give them "Two-for-One."

I Guarantee It to Produce Winter Eggs for You at a Cost of 1c per Dozen or It Won't Cost You a Penny

If your hens are moulting they need help in getting over it quickly. If your hens are over the moult they need help because the process of moulting has weakened them. That is why they are droopy, lazy, listless.

My great Winter Egg Maker contains Iron Sulphate for the bone building and strengthening, Precipitated Calcium Phosphate for shell-forming material, Ginger for a general tonic, invigorator and to sharpen the appetite, and Aloes as a gentle yet effective laxative and intestinal antiseptic. These four ingredients are just what hens need now, just as weak soils need nitrogen or other ingredients.

Send No Money

I want to send you my great Winter Egg Maker, "Two-for-One," to try 30 days. Don't send any money now. Just send me the coupon. I will mail you "Two-for-One" prepaid. Try it 10 days, 20 days, or thirty days. Watch for results. If you are not completely satisfied, "Two-for-One" won't cost you a cent. The publisher of this paper guarantees that I will refund your money at once upon your mere request if you are not more than pleased. Send me the coupon now, without money, and begin getting big egg yields at once, as so many thousands of users are doing. Don't put this off—write me now before you forget.

H. E. GOODRICH, President

Kinsella Company, 243 Bonheur Bldg., Chicago, Ill.

H. E. GOODRICH, President
Kinsella Company, 243 Bonheur Bldg., Chicago, Ill.

Dear Mr. Goodrich: If my hens do not lay extra winter eggs at a cost of 1c per dozen as a result of "Two-for-One," you guarantee to refund my money on request. On this condition you may send me the following, as checked, on 30 days' trial:

- ☐ One package of "Two-for-One," for which I will pay the postman \$1.00 upon arrival.
☐ Three packages of "Two-for-One," for which I will pay the postman \$2.25 on arrival.
☐ Ten packages of "Two-for-One," for which I will pay the postman \$5.00 on arrival.

NOTE: The remedies below will help you make more money with your poultry. Order now. All sent on our money-back guarantee. Send no money now.

- ☐ 1 large size bottle of Kinsella Roup Cure, for which I will pay postman \$2.00 on arrival.
☐ 1 four-ounce can of Kinsella Lice Paste, for which I will pay postman \$1.35 on arrival.
☐ 1 four-ounce jar of Kinsella Scaly Leg Remedy, for which I will pay the postman \$1 on arrival.

Tie Plant Engine No. 1656 and crew

October 9, Paw Paw at Green Spring, won 3-0.

On Sunday evening, October 3, after an illness of many months, Mrs. I. N. Saville, wife of extra gang foreman at the Plant, passed to the Great Beyond. Martha Virginia Saville, daughter of the late John and Mary Miles, was born at Capon Bridge on January 19, 1866. She was united in marriage to I. N. Saville on August 28, 1884. Since that time she has been a resident of Hampshire County. She was a member of the M. E. Church South for over 40 years and was known through the community by her kindly ministering to the sick. Funeral services were conducted by her pastor, Rev. J. O. Thomas, and her remains laid to rest in the family lot at Forest Glen, on October 8.

Besides her husband, Mrs. Saville is survived by two sons and one daughter, I. C. Saville, at the Plant, E. B. Saville, car repairman, and Mrs. G. W. Smith, all residing at Green Spring. She was also a sister of Alexander Miles, well-known wreckmaster, Painesville, Ohio. The floral tributes were many and beautiful.

C. W. Lane, formerly supervisor at the Plant, accompanied by his wife, motored to Green Spring from their home in Boston and spent a few days with friends here.

The accompanying photograph is of Engine 1656 at the Tie Plant. The men are, left to right: W. F. Kesler, switchman; H. W. Gross, yard foreman; D. H. Talley, switchman; H. C. Seeders, fireman, and H. S. Long, engineer.

C. L. Kittle and wife entertained at their home, on September 3, in honor of Miss Bessie Thomas of Cherry Tree, Pa.

A pleasant evening was spent at cards, dancing and music, an old-fashioned square dance being the feature of the evening. At a late hour a delightful luncheon was served.

Among those present were: Mrs. Julia Montrose, Mr. and Mrs. C. L. Kittle, Mr. and Mrs. J. C. Alexander and daughter, Amy Jewel, Miss Bessie Thomas, Flora Morgan, Minnie Catlett, Elizabeth Sisler, Zelma Snyder, Akron, Ohio; Messrs. C. G. Worthington, Batavia, N. Y.; W. F. Kesler, J. H. Smith, W. N. Cline, F. A. Sebold.

This was Miss Amy Jewel Alexander's first social affair and her conduct was highly creditable. Her future standing among the "400" of this community is already assured.

Another big day's work in the interest of increased car miles was accomplished on October 11 when 38 cars of cross ties were released by 24 men. This is something we cannot do every day.

Pittsburgh Division

Correspondents

E. N. FAIRGRIEVE *Car Distributor*, Office of General Superintendent
ELMER H. STOLTZ, Pittsburgh Freight Station

The Freight Claim Department at Baltimore recently issued Bulletin No. 59, at the end of which there was an important question regarding the cooperation of the agents. The following is one of the splendid answers which was received in acknowledgment of the circular:

CHICORA, PA., September 30, 1920.

MR. C. C. GLESSNER,
General Freight Claim Agent,
Baltimore, Md.

Dear Sir—Your Bulletin No. 59, of September 15, received today. In response to query with which you end same, "May we count on you?" we answer—"You may."

Yours truly,
(Signed) C. H. SMITH,
Agent.

Pittsburgh Freight Station

W. F. Deneke, terminal agent, and wife, and R. H. Dierker, cashier, and wife, are motoring through the eastern part of Pennsylvania, Maryland and Virginia. M. A. Greenwood, chief clerk, spent his vacation with his family motoring through Wheeling, Columbus, Uniontown and Donora. Miss Emily Publow is back and looking fine after spending her vacation at Atlantic City. Miss Carol Lothrop, comptometer operator, spent Labor Day with her sweetheart and friends in Boston, Mass., and is back at Pittsburgh looking fine, still single. W. F. G. Rochfort, rate clerk, Auditor's Revision Bureau, is back from his vacation in the Isle of Pines and Cuba, very much benefited from his trip.

E. E. Greenwood has been assigned to the personal force of the terminal agent, as assistant cashier, succeeding A. E. Korb, who was promoted to the position of chief clerk to the division freight agent, W. E. Magill. Mr. Knorr has been assigned to chief collector and has charge of the collections at Pittsburgh Freight Station. C. M. Fisher, formerly rate clerk with the Pittsburgh & Lake Erie Railroad, is now rate clerk under the Auditor's Revision Bureau.

Very much pleased on the return of Miss Minnie Sasse, who has been ill for the past ten days with ptomaine poisoning. Charles Maloney, assistant foreman, off for a period of one month, has again returned to duty.

Considerable time was consumed when Miss "Peggy" Woods juggled sugar from the Pittsburgh Freight House to her home, and did not even squeeze it, as not a single grain was lost.

Miss "Ray" Cromer, stenographer of the Claim Agent at Pittsburgh Freight Station, is looking fine after her vacation at Ohio Pyle and also a week-end at New York.

Joseph Rausch, terminal timekeeper at Pittsburgh Freight House, is back after spending an enjoyable week in Canada.

Miss Anna Schiller, Accounting Department, retired from the service to be captured by "Dan" Cupid. The employees of the Pittsburgh Freight House will miss her sweet smiling face, and all join in wishing her great success and oceans of luck. Someone else, whom we did not know, liked her smile better, and captured her from our family.

Pittsburgh Freight Station boasts of 100 per cent. in the Baltimore and Ohio Relief Department, both office and platform employees.

George Hopper, chief clerk, and family, made an enjoyable trip to Tennessee.

One of our popular stenographers at Allegheny Freight Station, Miss Margaret M. Farber, better known as "Peggy," made a very pleasant trip to Lima, Ohio.

M. C. Preston recently came back from Washington, D. C., and Philadelphia, Pa. While visiting Washington, he looked over the Terminals.

John Reid, better known as "John, Dear," the popular O. S. & D. clerk at Allegheny, and Paul McGinn, are back after an enjoyable trip to New York.

Mr. Redman is back after a pleasant trip to Cleveland, Ohio, and Morgantown, W. Va.

Monongah Division

Correspondents

E. S. JENKINS, *Secretary to Division Engineer*, Grafton, W. Va.
MISS MARY C. LEEDS, *M. P. Clerk*, Grafton, W. Va.

Machinist helper B. D. Hall and Miss Beulah Shaffer, of Simpson, were married at the bride's home, in September. They are now at home to their many friends at 502 Gay Street, Grafton. Congratulations, "Bud"!

W. C. Grow has been appointed timekeeper in Storekeeper's office, succeeding R. C. Warden, who resigned to accept the position of bookkeeper with Heflin and Mayselles.

Our sympathy is extended to Carpenter Shop Foreman H. L. Miller and wife, whose daughter, Miss Zoe, is seriously ill in a Baltimore Hospital.

Miss Agnes McCabe, storekeeper's clerk, has returned from an enjoyable sight-seeing vacation in our eastern cities, including New York, Baltimore, Newport News, Boston, Albany and the famous Hudson River trip.

Crew of Crane No. 64 at Glenwood

Miss Mamie Eichelberger, the "laughing" girl of the Storekeeper's office, says that although she is a loyal American, yet she will be "Frank" about admiring the English nobility, especially an "Irl."

A. A. Powell has been appointed boiler form clerk, Master Mechanic's office. Glad to have you with us, "Arch."

Hark Ye to This Tale!

A strenuous day—writing service cards while timekeeper was on vacation, followed by a sleepless night with visions of the names on shop roll assuming all sorts of shapes, produced the following story in the mind of the L. P. I clerk (poor girl!).

On the Greene Moreland, overlooking the Loar Lake, where the Grey Waters Breaks all over the shore, and the Carroll of the birds can Bee Herd; where the Wolfe, Coon, Moose, Beavers, Campbells and Lyons Love to Hunt, where Millers, Wrens and Peacocks fly, where Meek Foxes Cut-right up the Holler as Fast as they are Abel, and where Blue Plums Grow and Wine is plentiful, stands the Cassell of the Prince with its Six Long Halls, where in days gone by Sweet Bealls and Noble Knights Held Weekly court and were served by Cook, Butcher and Baker.

Z. L. Dean has accepted the position of pipe shop foreman.

A young railroad clerk named Nuzum, Said, "Maybe a cartoon would amuse 'em," So this same little "Coxy," With pencil so foxy, Of the dear girls and "Life Guard" he drew some.

Ohio River Division

Correspondent, MAUDE M. MOORE

"Safety First"

"Safety First" has become the slogan of every railroad company and manufacturing plant in the country, and still, if we do not pause to think, we all become more or less careless. Often we could avert an accident if we would merely take the time.

Safety is not a question of time, but of saving a life, the most valuable thing in the world.

If we would all stop to think how the number of widows and orphans could be reduced if just one moment would be spent each day in practicing a little Safety, we would give this matter more of our time.

In our shops, for instance, many an accident could be averted if we would first find the danger points about our own jobs and then immediately report them to our foreman. The management does not desire that we take any chances where danger is involved. Remember that every time we avert an accident to ourselves or anyone else, we become somebody's benefactor.

Do not forget the blue flag when you go under that car or engine to make even minor repairs. It is furnished us to be used, and its use may result in the saving of your life as well as that of another.

No man ever lost his job for being careful, but many a man has lost out by carelessness.

Remember it only takes one accident to lose an eye, a limb or perhaps crush out a life. Let us strive to avert that accident.

"If a hand is worth a fortune
And an eye is worth a few,
Why take a chance of losing 'em
When you know just what to do.

A little care, a little thought
Preserves the lives of men;
So buck up, Pal, and take a think
Of Safety now and then."

We are glad to announce the appointment of M. H. Mohler as inspector of accounts on this division. Mr. Mohler has been transportation timekeeper for the past few years and is very deserving of the promotion.

G. B. Spencer, division accountant, has been transferred to Dayton, Ohio, to fill a similar position there. All regretted to see Mr. Spencer leaving and we know that he will miss the "Beautiful Ohio." All kinds of good luck, George.

Miss Ethel Owens has been transferred from stenographer to division engineer, to the Superintendent's office, taking "Musician" John Rood's position as general clerk. John has resigned, as he contended that he missed his calling as a railroad clerk and has taken up the study of music.

C. E. Catt, former chief clerk to the division accountant at Seymour, Ind., has arrived and is on the job as our new division accountant. We know that Mr. Catt will like his new surroundings and we all pledge our hearty support to him in his new position.

CAR MILES, MORE CAR MILES! is the slogan of the Ohio River Division.

S. W. Hill spent a few days in our city last week, visiting the Superintendent's and Division Accountant's offices. The clerks of the Division Accountant's office certainly enjoyed Mr. Hill's talk with them; they always enjoy his visits.

The new heating system is being installed at the Pullman track, Ann Street Station. The employees of that station are hoping that it will be completed before the snow man and winter winds arrive.

C. E. Adams, train dispatcher, motored to Morgantown during the latter part of August, and spent a week of real happiness with his little granddaughter, whom he claims to be the sweetest of all children.

Some time ago Benjamin Johnson was seeking a nice cool place to spend the hot summer nights in comfort. At last he rented a houseboat, and had been in camp about four nights, enjoying things fine—good eats, music, cold drinks (?) 'n everything. The

fifth night found "Benny" with a few friends in visiting. The evening was spent in conversation, dancing and various other ways. Finally the hour was mentioned and they were about to retire, when a little scream was heard at the end of the boat. All hands on deck rushed to the scene. Water was pouring in over the front of the boat like mad. The waters from Lock 18 had been let out and the water came in in a rush. It made it difficult for the pleasure seekers. They had to swim for their lives. Captain "Benny" spoke up and said, "Ha! just like we were in mid ocean, battling hard." Huh, "Benny?"

Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent*, Weston, W. Va.

Roundhouse Foreman "Add" Malone of Weston is looking for tank men. Does any one know where he can find about ten ready to work 24 hours a day? If so, speak quickly before it is too late.

Miss Borneman, shop clerk, on the day after pay day went to Clarksburg. Why? we know not, but we are watching with both eyes to see the new dress, latest fall style, which, doubtless, will soon appear.

JUST PUBLISHED

THIRD REVISED EDITION

The WALSCHAERT and Other Modern Radial Valve Gears for Locomotives

By WM. W. WOOD, Air Brake Inspector

245 Pages (5 x 7½)

Fully Illustrated

PRICE \$2.50

WITH the adoption of the Walschaert Valve Gear on nearly every modern locomotive in America, this book fills a place of real interest and usefulness. By a careful study of its pages, one can THOROUGHLY understand the Walschaert Valve Gear, as the author takes the plainest form of a steam engine—a stationary engine—in the rough, that will only turn its crank in one direction—and from it builds up—with the reader's help, a modern locomotive equipped with the Walschaert Valve Gear, complete.

THE CONTENTS OF THE BOOK ARE DIVIDED INTO FIVE PARTS

THE FIRST DIVISION contains an analysis of the Walschaert Valve Gear.
THE SECOND DIVISION treats on the Designing and Erecting of the Valve Gear.
THE THIRD DIVISION has to do with the actual work of the Walschaert Valve Gear on the road.
THE FOURTH DIVISION is composed entirely of questions and answers on the Walschaert Valve Gear.
THE FIFTH DIVISION deals with the Setting of Valves with the Walschaert Gear, the Hobart-Allfree Valve and Valve Gear, and the Baker-Pilliod Valve Gear in its original and improved form.

The book is fully illustrated, and a novel and interesting feature of the book is the folding diagrams with cardboard valve models, by means of which the actual operation of the valve under the influence of the Walschaert motion can be studied.

N. H. Davidson
Trainmaster and road foreman of engines,
Gassaway

Our photograph this month is of N. H. Davidson, trainmaster and road foreman of engines, Gassaway, covering the territory of the old Coal and Coke. Mr. Davidson was born in Gilmer County, West Virginia, and entered the employ of the Railroad as locomotive fireman on the Monongah Division in 1903. He was promoted to engineer in 1905, and on December 1, 1918, to his present position.

Mr. Davidson is an experienced engineer, well-known and well-liked by all of us.

"Mike" Murray, clerk to the captain of police, Weston, has resigned his position to accept place as yard clerk in Grafton. We are all exceedingly sorry to lose "Mike," but wish him all kinds of luck. There will be many a tear shed by the fair sex in Weston because of his departure.

Road Foremen Marsh and Davidson recently attended the road foremen's convention in Chicago. We are glad to report their safe return to the Charleston Division. Much anxiety was expressed over their probable safety in such a big city, without our guiding hand to sustain them.

Mrs. C. N. Criswell, having seen what we said about "Charlie" in the September MAGAZINE, decided to see for herself what he was doing when away from home, and recently spent a couple of days in Weston.

John H. Nodes, former secretary to the superintendent, who spent his vacation with us, has returned to school at Columbus, Ohio. Tie Inspector Kaufmann, who is often seen on the Charleston Division, is in Florida, maybe hunting "ties," maybe "alligators."

It is reported that E. M. Talbott, inspector of accounts, Baltimore, is visiting Gassaway, W. Va., quite frequently. Some attraction, of course, but we warn him he'd better stay home. You do not belong on the inside of the Charleston Division, E. M.

W. H. Schide, chief clerk, has returned to duty after spending a very "pleasant" vacation, undergoing an operation for tonsillitis, which relieved him also of quite a little surplus flesh, and left him somewhat peeved, but—

Nevertheless,
We must confess,
There's nothing wrong
With W. H. S.

Supervisor "Mike" Harrington, one of our old-timers, is spending his vacation at Mount Clemens, Mich. The climate of the Gauley Line has been hard on "Mike"

lately, and he is trying out the baths to see if they will help his rheumatism. We wish him every good luck.

C. W. Egan, general claim agent, Baltimore, was a recent visitor at Weston. While here, we had the pleasure of hearing him speak twice at the High School Auditorium. A number of Railroad men and their families were present at each lecture, and his kindness in giving us this pleasure is much appreciated.

Our sympathy is extended to Captain J. N. Godman in the death of his brother-in-law. Mrs. Godman and baby have just returned from a trip to Seattle.

R. A. Taylor has been appointed agent at Sutton, W. Va., vice Mrs. G. M. Leach, who is taking a leave of absence. Relief Agent Davis is enjoying life in the wilds of Curtin, while H. A. Robb, agent, is visiting relatives for a while. J. M. D. has his family in Gassaway, and says he would like at least to become acquainted with them again. As it takes about two days to go from Curtin to Gassaway, he does not get much opportunity.

Miss Nona Paisley, who has been in the Transportation Bureau of the Division Accountant's office for two years, has been transferred to Gassaway, where she takes the place of Miss Thompson, general clerk in the Master Mechanic's office. Miss Thompson was recently married to Operator Stillings of the Dispatcher's office. We extend our congratulations, but we regret exceedingly to lose Miss Paisley, who by her pleasant personality and unflinching good nature has endeared herself to all of us.

Miss Marguerita and Miss Kitty McCormick have recently returned from their vacation, which they spent in and near Buffalo. Marguerita tells us she visited Niagara Falls while she was gone, and that she never did see so much water in all her life. Kitty says it beats Ellamore all to pieces.

We are sorry to learn that Trainmaster J. D. Nicholas had to spend his entire vacation in Gassaway, on account of the illness of his baby, who, however, we are glad to note, is improving. We also learn with pleasure that Dispatcher "Charlie" Carpenter's boy is getting well over his attack of scarlet fever.

Miss Janet Longwell, who was recently married, has left the Division Accountant's office to take up other duties. Let us hope that her new "Boss" will not treat her any worse than the old one did.

Travelling Auditor M. J. Foos was a recent visitor at Weston. We are always glad to see him.

Weston Fair has come and gone. "Some time," the boys and girls surely did have. It lasted three days. Unfortunately the weather was unkind on the last day, and the fair had to be closed down. Miss Justice says she never did have such a time, riding on the ferris wheel, eating peanuts and drinking pink lemonade. That was one day she forgot that there ever was such a thing as a derailment, or a Railroad, and only remembered that "rural delivery routes" must be carried, fair or no fair. All the other girls had a glorious time, judging from their stories. Special shuttle service was run between the station and fair grounds, and a large number of people from all parts attended.

The September MAGAZINE has just arrived, and as usual is welcome. Of special interest is the letter from President Willard in reply to an allegation that railroads are profiteering in coal. As usual, President Willard hits straight from the shoulder, and

we are glad to see the editorial comment, "His word is always good." We can think of no finer compliment to be paid to any man. Of unusual interest, also, is the second of Colonel Emerson's articles on his adventures in Russia. They deserve careful reading by all of us.

We are just in receipt of advice that a "No Accident Campaign" will commence October 18, and continue until November 16. We take this opportunity to ask the loyal and well deserved support of all employees on the division.

When you pick up your daily papers, or when you look over the personal injury reports, how many times do you see the words "Struck by a train." Do you stop and think that the fellow who lost his life, or was permanently disabled, perhaps has a wife and children, and of the suffering which must result? Do you ever remember that it is just this sort of thing that the Safety Committees and the officers of the Baltimore and Ohio, and other railroads, are fighting against, day after day, and year after year? Or, when you see these words do you just pass them by without a thought? If you do, you are not doing your full duty to your employers and to your fellow men.

Do you work for Safety ALL the time, or only when you come to the committee meetings, or when it is momentarily brought to your attention? "Be a safety man or woman all the time," said our superintendent at the last meeting. Are you doing it? If not, start today. There is no time like the present. Show that we are all alive to the importance of the work, and let's do all we can to help it along. In the long run, we are just helping ourselves.

Let us go through the campaign without an injury or loss of life. If we all stick together and work to that end, we can do it. And let's win the pennant. It may seem a "tall order," but it can be done, and if you make up your minds to do it, it WILL be done. There is no one on this division, man

"This is my go-cart," says little Joseph E. Caperuse the 11-months-old son of E. M. Caperuse, agent, Midvale, W. Va.

Please mention our magazine when writing advertisers

C. F. Anderson, discipline clerk, Weston, has been transferred to Curtis Bay Coal Piers. We assume that a special mail sack will now be put on between Curtis Bay and Gassaway. It was reported that "Andy" would take up school teaching as a vocation, but evidently the prophets are wrong.

In the course of business it has often been necessary for us to talk to Chief Clerk Ford at Grafton, and we had wondered what he looked like. Our curiosity is appeased by the excellent photo which appears in the September MAGAZINE. We regret to note, however, that Mr. Ford appears to have somewhat of a selfish disposition. He is the only man in the picture, and is surrounded by a large number of the fair sex. We understand C. L. is married. Why not give the single boys a chance?

The "Jazz" tie has arrived in Weston at last. We note that Mr. Wetzel of the Maintenance of Way Department and Road Foreman Marsh are the victims. As, however, we have never noted them both wearing the "Jazz" on the same day, probably we are justified in our conclusion that but one of these ties has reached Weston.

Western Lines

General Offices, Cincinnati

Correspondent, E. W. SPILLE, *Pass Clerk*

A beautiful thought for today: "If you are happy any grouch knows you are foolish."

In the reorganization of the welding division on the Western Lines, J. T. Stroud, formerly district welding inspector, with offices in Cincinnati, has been appointed district welding inspector at Pittsburgh. J. B. Jenks, welder at Newark, has succeeded Mr. Stroud.

There seems to be quite a bit of rivalry in the General offices as to who had the best fishing during their vacation. William Moorehouse, assistant chief clerk, Superintendent Motive Power office, has told us some wonderful fish stories. O. C. Ross, telegrapher, "SG" office, returned from Charleston, Mo., and informs us that he caught the largest fish in the lake at that place. Mr. Ross says fishing was so good that he had to hide behind a tree to bait his hook to keep the fish from jumping out of the lake after the bait. Of course, we have no right to disbelieve these gentlemen but, would like to see some of the fish the next time.

George Bick has at last succeeded in growing hair on his head. We certainly hope that H. W. Shoup, who is now trying the same prescription, has as much success.

Charles Enneking, statistician, Cost Department, has joined the "Ancient Order of ROOPS."

Miss Jessie Pyne, stenographer, Transportation Department, has resigned to join the Order of Housewives. Our hearty congratulations accompany her.

Miss Hilda Klinkicht's beautiful collection of dresses always keeps us guessing which one she will wear the following day.

Miss Blanche Stephens, who has been in the West for the past three months for her health, has returned and is now employed in the Transportation Department. We are glad to have Miss Stephens back with us again.

Lester Carner, draftsman, Engineering Department, has informed us that he will not marry any girl unless she can cook. Take your time, girls, don't crowd.

Two good Stenographers:
Misses Amanda Geiser and Ruth Beitzer

George Kopp, Engineering Department, lost his moustache. Finder kindly return.

"Pat" English, assistant labor agent, spent his vacation at his home in Georgia.

The accompanying picture of the Misses Amanda Geiser and Ruth Beitzer, stenographers, Transportation office, was taken on one of their recent week-end trips to Mammoth Cave. These young ladies have, during their time with the railroad, acquired considerable knowledge through travel and can tell some interesting stories of incidents that have happened while on their trips. Besides being very diligent and conscientious workers they are two of the most popular girls in the General offices.

Cincinnati Terminals

Correspondent, JOSEPH BEEL, *Chief Clerk to Superintendent of Terminals*

A romance which had its inception in the Car Record office several years ago, culminated recently in the marriage of M. S. Mackenzie, head record clerk, and Miss Frieda Seurig, former employee of the Baltimore and Ohio. After the nuptial ceremonies, which took place on September 25, the happy couple enjoyed an extended visit to eastern cities. His co-workers join in extending to the lucky groom and his charming bride their best wishes for a long and prosperous married life.

"Joe" Beel, chief clerk to superintendent, and correspondent for the MAGAZINE, was absent from his desk for two weeks. He says he was taking a much needed rest and vacation. Unofficial information is to the effect that "Joe" was scouting around to get a suitable lightweight pug that he can train to succeed a recently dethroned champion of this city. "Joe" is quite a devotee of the fistic art, and if suggestions are in order, why not suggest "Eddie" Schmalz?

Miss Kathryn Weber, the genial secretary to superintendent, better known by the cognomen of "Jim," is flying her colors in the form of a beautiful green silk sweater. Our Norwood correspondents have given us some inside information that the Norwood Electric Company has made a complaint as to the extravagant use of the electric current. We deduct from this that there must be a regular caller at the "Weber" home on several evenings a week.

"Bob" Jennings, the live wire car distributor of the Superintendent's office, after reading the account in the September issue regarding the Baltimore and Ohio Baseball Cup Game, sat back and expressed what we

believe is the sentiment of each Cincinnati baseball boy—"I can't understand, with the amount of good ball players to draw from, why we cannot be competing for the championship." "Bob" was immediately appointed as a committee of one, to get a line on all the first class ball players in the terminal, so he can arrange next year (using his expression) "to have such a team that when they throw their gloves on the diamond, the other team is beaten." Let us all get together and start early. Let Mr. Jennings have your name, if you are a ball player; if you are not, let him have the names of some other employees that are good players but who are too modest to admit it. Mr. Jennings has a good plan in mind to accumulate finances necessary to start with, and with the combined effort of all, Cincinnati Terminals will bring home the bacon next year. Don't shove, keep pushing, and we will get there!"

We are glad to see our boss, Mr. Myers, back on the job after a short illness.

If you don't think Cincinnati Terminals will do its part in the CAR MILE DRIVE, just journey down to Wood Street some morning and watch "Bill" Fisher and his crew speed up.

"Eddie" Brown, erstwhile car buncher at Stock Yards, is now holding down the position of yardmaster at Brighton. If you don't think "Eddie" can produce, get your eye on Brighton 2651.

George Thornburg, conductor, has been acting in the capacity of yardmaster around the terminals, relieving regular yardmasters who were on their vacations. George is a good advocate of CAR MILES and is doing his share.

"Jack" Weber, yardmaster at Oakley, and family, are sojourning through the East, taking in the sights. Incidentally, "Red Jack" is gathering ideas about yard operation.

Frank Nock has come into the limelight recently. He succeeded to the chief clerkship in the Superintendent's office in the absence of Mr. Beel, who was on his vacation. Frank, known to his intimate friends as "Philander," dispalyed an unusual amount of diplomacy and executive ability handling the position. Frank's vocabulary has increased—he amazed the crowd recently by using the word "osseous." Strong men fainted, and ladies swooned.

Girls, girls and more girls! Watch Cincinnati Terminals' display of beauty in the coming Beauty Contest! Connoisseurs of beauty have picked out our sister city, Louisville, Ky., but we think we can show the Baltimore and Ohio family where most of the peaches grow.

It is rumored that Mr. Bybee, local car accountant, is contemplating a trip to Chicago to get some information regarding the system of keeping records. We just secured a suggestion from our Ludlow friend to be sure and place a big tag on "Bill" so that he won't get lost in the Windy City.

There are many ways to dispose of your back pay. Probably the manufacturer of "Tin Lizzies" took advantage of the situation, as we notice Yardmaster Alexander, Storr, making a record on the hills around Cincinnati in this popular conveyance.

It is rumored that Henry Nolte, yard brakeman, Winton Junction, has asked the state and county authorities to have the town of Lasche, Ohio, changed to "Nolte," and for the Norfolk and Western Railroad to substitute the name Norfolk-Nolte and Western; however, be it understood there is nothing authentic about it.

A certain person, working on Storrs repair track, went into a restaurant the other day for his dinner. On his table he discovered something different, with which he at once filled his plate. After tasting what he had supposed to be dressing, he discovered that he was eating bread pudding covered with catsup.

There is a rumor on the repair track regarding Frank Smith's being the proud father of twins. Good luck, old top! The office force thanks you for the cigars.

We also place O. H. Royse, car repairer, Storrs, Ohio, on the "papa" list, he being the proud father of a 10-pound baby boy. The only thing that will regret is the name given the child—"Clyde"—having named it for our M. C. B. bill clerk, Clyde D. Swepston. We hope that he will not follow in Clyde's footsteps.

Our deepest sympathy is extended to L. E. Birch, car repairer, and P. Birch, in the loss of their sister.

We would like to know what fair young damsel on Rosemont Avenue keeps our "Josie" out till four o'clock in the morning.

Girls, listen to this remedy for reducing, as prescribed by Mrs. E. R. Swepston. Are you all listening? Walk to work in the morning.

Assistant Trainmaster J. P. Fallon just returned from his vacation, which was supposed to have been spent in Chicago and nearby cities, but "Weber's," at Oakley, had information as to his whereabouts.

Trainmaster C. J. Cleary just returned from a very enjoyable vacation during the month of August, on which he had the pleasure of meeting some of his old-time friends and relatives in New York and Pennsylvania. Returning to Cincinnati, he visited St. Louis with his grandson, "Little Jake."

Road Foreman W. T. Darling has returned from his vacation, which was enjoyed by himself and family in their new "Oakland."

Yardmaster Alexander and family enjoyed a very successful "flivver" trip to Indianapolis and way points.

Trainmaster W. J. Robinson and family enjoyed a Chevrolet motor trip through the country.

A. S. Hilliard, night clerk, Stock Yards roundhouse, and Mrs. Hilliard enjoyed a trip to California.

New Castle Division

Correspondents

A. C. HARRIS, Assistant Chief Clerk to Superintendent, New Castle, Pa.

P. W. ADAMS, Telegraph Operator

MILES — MILES — MILES
BOOST — CAR — MILES

Wear the wheels out

Watch the BOSS shout

SMILES — SMILES — SMILES

We are low in spirits, and this is not intended as a warning to our thirsty friends. Our car miles for the month of September did not reach the figure we had promised, and while we feel somewhat disappointed, nevertheless we can see clearly the necessity for continued and greater efforts. Keep your eye on the October figures and judge for yourself if the New Castle Division ever fell down on any promise it made.

The Chicago White Sox debacle was truly terrible and the idea is prevalent, but "Steve" claims that "Sam" Johnson's white socks hide a greater scandal.

The "No Accident Campaign" should serve to restore our faith in human nature.

We all look askance at any scheme labeled "FREE," but in this case we are certain that every employee can secure something invaluable. What are you asked to do? To consider your welfare and the safety of others. What do you receive? Maybe an eye, a limb—perhaps life itself. Surely the reward is great.

Frank Stevenson is a remarkable lad, industrious, studious and everything. Even in his lighter moments his mind is wrapped up in railroad problems and he can be heard to murmur frequently, "You tell 'em, engine."

Lee Davids is aspiring to the mantle of the "Pied Piper." Through some clever work recently he disposed of three rats in one performance. It takes fast work, but Lee says the sure method is to sneak up quietly and with a quick twist tie a knot in the rodent's tail. Immediately the rat dashes for the hole but finds that he cannot drag the knot through. He pulls and pulls, stretching his skin so tight he cannot close his eyes and we all know what happens if we can't sleep. The scheme is patented. Don't try it without the permission of Lee.

Homer, Ohio, had an exceptionally strong baseball team; this is certain because the residents of the village would admit it. The New Castle Junction team made the trip to Homer, Ohio, recently and carried off everything except the ball park. Homer was helpless before the pitching offered them, while New Castle had little trouble in solving the delivery of the Homer artist. After the game a splendid dinner was served to the New Castle boys and it was then that "Nut" Schindler, New Castle third baseman, made the motion that the umpire cancel the game and declare the Homer boys winners on total points scored for the day. If those boys could only play ball like the ladies could cook and serve meals, the Cleveland Indians would never have had the chance to battle for the world's championship as the leading Ohio team.

On October 29 the annual big dance for the New Castle Junction employees will be held in Neshannock Hall. This is one of the yearly events that all look forward to, and

EIGHTH REVISED POCKET EDITION

Locomotive Breakdowns And Their Remedies

By GEO. L. FOWLER

Revised by WM. W. WOOD, Air Brake Instructor

292 Pages (4 x 6½)

Price \$1.50

Fully Illustrated

The new pocket edition of "Locomotive Breakdowns" has been revised by Wm. W. Wood, the well-known railroad expert, which is a sufficient guarantee that this work represents the best practice of the present day and is exhaustive in text and illustrations.

It is out of the question to try and tell you about every subject that is covered in this pocket edition of Locomotive Breakdowns. Just imagine all the common troubles that an engineer may expect to happen sometime, and then add all of the unexpected ones, troubles that could occur, but that you had never thought about, and you will find that they are all here, in this Up-to-Date Edition of "Breakdowns," with the very best methods of repair.

CONTENTS:

I—Defective Valves. II—Accidents to the Valve Motion. III—Accidents to Cylinders, Steam Chests, Cylinders, and Pistons. IV—Accidents to Guides, Crossheads and Rods. First Prize for the Brotherhood of Railway Carmen at Zanesville, and the men who made it

judging from the plans made, this year's dance is to be the best ever. John A. Jackson, with his efficient helpers, William Mulcahy, H. D. Horner, P. B. McDowell, and others, are up to their ears in work and are determined to beat all previous records.

Conductor J. I. McIntyre, New Castle Junction Yard, reports the arrival of a new daughter. He has been unable so far to learn whether or not the little lady has any interest in the coming election and cannot get her to tell him which candidate she favors. At any rate, "Jimmy" is sure of one vote in the "most popular man" contest.

The death of John Earle, patrolman on the New Castle Division, due to the accidental discharge of his gun, was a decided shock to the many employes who knew John and valued his friendship. A member of a splendid organization under Captain M. B. Earle, he stood out preeminently as a prince of good fellows, a keen, lovable sort of a chap and a willing worker, who received unsought that measure of assistance and cooperation from his fellow employes of all departments that could only come through recognition of his ability and genial disposition. The division force can ill afford to lose men of the type of John Earle. To his uncle, Captain M. B. Earle, with whom he lived and under whom he served, the sympathy of all employes is extended; we share with him the heavy burden of sorrow that such a loss entails.

The accompanying photograph is of "Nick" Radeff and his high-powered racing car. "Nick" is considered one of the finest employes in the New Castle Junction Shops, and we may be sure that he is proud of this splendid car, which has a speed close to 90

miles per hour. Noting the shape of the machine, we can see that it's a racer. It has been suggested by scientists that if our railroad cars could be built on such lines, the increase in speed over those now used would be surprising. Superintendent Stevens had occasion to make use of this car in an emergency; he thinks that it is a great machine.

Newark Division

W. E. LAIRD, *Chief Clerk*, Newark, Ohio
A. D. LIST, Newark (Ohio) Shops

On Labor Day, September 6, the largest demonstration the labor organizations ever held in the history of Zanesville was staged. The activities of the day opened at 10 a. m. with a large parade, in which over seven thousand men marched to the music of four bands. After the parade the members and their families proceeded to the Muskingum County fair grounds, where a basket lunch was enjoyed. In the afternoon horse racing, baseball and other games for the amusement of the crowds were held. The Baltimore and Ohio boys were well represented at this affair and we are proud to state that they were successful in winning the first and second prizes for having the best floats in the parade. The Brotherhood of Railway Carmen won the first prize, their float being a very fine reproduction of a box car which was placed on a wagon, as shown in accompanying picture.

The Brotherhood of Blacksmiths won the second prize, their float being a reproduction of the "Village Blacksmith," only with more modern equipment than that used in the days when Longfellow wrote the well-known poem.

Columbus Freight Office

Larry Miller and Ray Jones betook themselves to Yellowstone Park to see "America First." They say that goats and lambs were much in evidence.

"Dave" Reese and "Joe" Walsh spent their vacations at Los Angeles and San Diego, looking over this year's crop of beach chickens.

"Jack" Leitch enjoyed his vacation with the folks in Canada.

Maude Baker and Mary Wiley started to Bukeye Lake to spend a week, but someone

on the traction car lifted their treasury and cut the trip short.

"Dad" Maddox and his wife spent a couple of weeks over at "Bosting" renewing old acquaintances.

Marie Welsh spent a week at Chicago. The bathing was fine but she did not get her bathing suit wet.

"Tim" Payne also had his vacation spoiled by pickpockets. They got his roll at Washington Court House while he was holding a sack of eggs above his head to protect them from breaking.

Jessie Fralinger is convalescing after an operation at Mt. Carmel Hospital.

Ralph McDaniel, our night waybill clerk, was the successful applicant for admission to Annapolis Naval Academy. He is now Midshipman McDaniel. We wish him the best of success.

Cleveland Division

Correspondents

A. F. BECKER, *Secretary to Superintendent*, Cleveland, Ohio

AMY A. FORD, *Clerk to Pilot Engineer*, 621 Sloan Building, Cleveland, Ohio

We are all glad to see our L. P. clerk, Elmer Geise, back on the job again after a little bit of misfortune in being run down by an automobile.

Miss G. Metcalf, file clerk, Superintendent's office, just came back from a two weeks' vacation in the East. The only thing she brought back with her was a cold.

The unexpected was pulled off by G. W. Gordon, chief clerk to division engineer, when he quietly took a Saturday off and went to Buffalo. On the following Tuesday he was passing candy and cigars around to the clerks in the office celebrating Cupid's victory. He says that they all fall sooner or later.

E. M. Tuttle, trainmaster's clerk, spent his vacation with his friends at Ashtabula and Warren. He says it gives a fellow a lot of "pep" to be able to rest up for a couple of weeks.

Our telegraphers were very busy October 5, picking off the strikes and balls from the wires, also a few of the Indians' runs.

"Nick" Radeff's "Real Speeder." See Note

Massillon

On September 30, Brakeman W. H. Heyer was the next man who decided to take a life partner. We hope that he and his new "buddie" will have much success in the future.

William E. Kilbow, former operator, "CO" Tower, has hired out as a brakeman at Massillon. On September 4, he was transferred to Canton Yard, and is now promoted to conductor and is running a crew at Canton. Glad to see you progressing so rapidly, "Bill."

Conductor J. W. Seiber, who has been off sick with typhoid fever for several months, is up and around, but is still unable to resume duty. Glad you are better, "J. W." We hope to see you back on the job again soon.

Conductor C. E. George, Dover, Ohio, was blessed with a son last month. If he makes as good a conductor as his dad, we will be satisfied.

It is reported that Brakeman E. Fenstermaker expects to go in double harness pretty soon. I guess he doesn't like to go single. We wish you good luck, "Pete."

Conductor R. A. Watters has been requested to keep his dog away from the yard office, as Yardmaster A. H. Brown says he is a bad actor.

Brakeman C. C. Croy, who was injured on July 29 while on duty at Massillon, has taken the position of crossing watchman at Cherry Street, Massillon. Glad to see that he is still able to do something for the Railroad.

On September 7, Crossing Watchman John Defley, a well-known and good friend of everybody along this Railroad, passed away. We express our sincere sympathy. Mr. Defley had been an employee of the Baltimore and Ohio for a number of years and we shall miss him.

Arthur Stahl, who has been assisting Bridge Inspector Sidaway all summer, has left the service for awhile and is now attending college. He has entered the University of Michigan. We wish him success.

Chicago Division

Correspondents

F. N. SHULTZ, *Division Operator*, Garrett, Ind.
ESTHER J. SPREENBERG, *Clerk*, South Chicago
MARGARET GALLOWAY, *Assistant Shop Clerk*, Garrett, Ind.
R. R. JENKINS, *Secretary Y. M. C. A.*, Willard, Ohio
P. H. CARROLL, *Signal Supervisor*, Garrett, Ind.
W. C. ADDY, Willard, Ohio

South Chicago

We have a bit of news for our readers this time. On September 14, Miss LaVerne Peterson, our car record clerk, and Mr. Earl Thompson were married. We wish the "newlyweds" much happiness.

We are sorry to announce the death of Frank Kroll of the Mechanical Department. Mr. Kroll had been in the service for a good many years, though still a young man of 26 years. We are sincerely sorry to lose this friend, who died after a lingering illness. Our deepest sympathy is extended to his bereft relatives.

Willard

On the night of September 17, while doing duty in Willard Yard, John Bienkhorse,

switchman, fell from the top of a car and was instantly killed. His loss is felt among his fellow workmen.

Wade Winebremer, formerly machinist helper at Willard, and who mysteriously left town in 1918, has been heard from at last. A post card, received by a friend, tells us that he was recently stationed at Coblenz, Germany, with the A. E. F.

The annual examination of trainmen and engine crews on the Book of Rules was held at the Young Men's Christian Association during the month of September.

Great improvements are being made around the Willard Shops and Repair Tracks.

Ohio Division

Correspondent, A. E. ERICII, Chillicothe, Ohio.

On September 17, Harold Barnhart, clerk, Car Foreman's office, Chillicothe, joined the ranks of the benedicts. The bride, Miss Gertrude Treat, is the step-daughter of Brakeman E. R. Maple. We wish them a happy married life.

Simon Hinkle, car inspector, was married September 9. Congratulations and best wishes.

Another life contract was signed on September 18 by Electrician Pearl Miller. He and his bride are spending their honeymoon taking in the sights at Atlantic City and New York. Good luck!

R. Fink, machinist helper, is displaying a new smile over the arrival of twin boys. He reports them doing fine and figures himself twice as lucky as most men.

Charles Martin, machinist, is wearing a pleased smile over the second arrival, a baby girl.

Alva Rea, clerk, Division Accountant's office, is to be congratulated on the arrival of a daughter. "Alva" can get plenty of walking exercise now at night.

Lowell R. Hollingshead, clerk at Mt. Sterling, has just returned from an extensive western trip. By extensive we mean that the results of this trip may extend through his entire life. Of course, we do not care to have it repeated, but nevertheless, we wish to congratulate him on his success in locating a young lady humble enough to accept such a "one-way ticket." "Low" is an energetic worker and a loyal employee of the Ohio Division, where he had the name of

"We brought them through."—The Shriners' crew

being the swiftest platform man between Cincinnati and Columbus. "Keep the cars moving," is his motto.

Lost and Found column. *Found*—An event never known to have happened before. Charles King, first operator, Mt. Sterling, has just returned from a 15 day leave of absence. A liberal reward will be given to all parties who can recall a previous happening of this sort. Don't let it happen again, Charles.

If you wish to be instructed in regard to making your income tax report, consult Conductor "Tim" Shea.

"Ed" Henson, second trick operator, Mt. Sterling, is the proud father of a 9-pound son, born June 26. Both mother and baby are doing well, but we cannot say that for the father. We find him rather hard to get along with. The same might be said of "Granddad" Henson, second operator at "RK" Tower, and "Uncle Jes," a former Ohio Division operator, but now first trick operator, Toledo Division.

The accompanying photograph is of uniformed Knights Templars, who operated special train from Columbus to Cincinnati to the Knights Templars' Conclave, held at the latter point, beginning on September 15. They are, left to right: W. L. Schaffer, flagman; E. G. Brandenburg, fireman; J. F. McCulgan, engineer; A. L. Johnson, chief train dispatcher; P. E. Homans, conductor; F. S. Bradley, brakeman. A. L. Johnson, who acted in the capacity of operating official, made the entire crew all Knights Templars. The members of the crew were relieved on arrival at Cincinnati to participate in the proceedings of the Conclave, in which they spent an enjoyable two days. The train was handled with engine 5092, leaving Columbus at 1.00 p. m. on September 14, arriving at Cincinnati (a distance of 116 miles) at 3.35 p. m., making but one stop, which was for water at Midland City, Ohio. The run was indeed satisfactory to the Templars, who were of the Columbus and Zanesville Commandrys. They made a number of nice comments on the service rendered by our Company, and we feel that the Baltimore and Ohio has made many friends among those who were on the trip.

This photograph was taken by the Cincinnati Post, whose representatives at Cincinnati gave the following writeup in their paper regarding this trip:

RECORD IS SET. NEW TIME FOR TRIP FROM COLUMBUS TO CINCINNATI

"A feat performed by a delegation of Knights Templars was placed on records of

the Baltimore and Ohio Railroad, Wednesday, September 15.

"The delegation was composed of the train crew of a special train carrying Knights from Columbus to Cincinnati to attend the State Conclave. The crew cut 23 minutes off the running time between Columbus and Cincinnati, establishing a new record.

"Record formerly was three hours. The Knights' train arrived in Cincinnati at 3.35 p. m., railroad time, Tuesday."

"We were anxious to get to the conclave. We had a clear road so I let her out! That's all there was to it," J. F. McCulgan, engineer, said.

The train crew are members of Chillicothe Commandery No. 8, Knights Templar. They appeared for duty in full uniform, but put aside their uniforms while in the engine cab.

Indiana Division

Correspondent, H. S. ADAMS, *Chief Clerk to Superintendent*

Effective September 16, E. Massman, agent, Seymour, Ind., was appointed supervising agent, Indiana Division. Mr. Massman had previously served in the capacity of supervising agent for a period of six months. Being a very enthusiastic freight claim prevention man, he could not resist the temptation of returning again to claim work. Mr. Massman is a capable man, and he exerts himself to produce the best results in freight claim prevention work.

O. J. Holder, clerk, Division Accountant's office, has resigned to accept a position with Swift & Company at St. Louis. Best wishes for success!

L. F. Isenogle, clerk, Division Accountant's office, found it necessary to undergo a minor operation on his nose a few days ago. He is convalescing rapidly.

Dewey Neister, dispatcher, has been off duty for the past few days on account of trouble with his right eye. He is now under the care of one of Cincinnati's best specialists and it is hoped the desired results will be obtained soon.

E. B. Brown, tonnage clerk, has resigned to enter Columbia University. Riley Whitman, clerk, Division Accountant's office, has returned to Indiana University, Bloomington, Ind., to complete his course.

Prepare now to do your utmost to avoid accidents during the "No Accident Campaign," beginning 12.01 a. m. October 18,

and continuing until midnight, November 16. We want a clean sheet this time. Get every employe interested, and thus eliminate all accidents due to carelessness.

In line with the campaign being made throughout the country to increase car supply by procuring more car miles per day, we wish to announce that our division officers are following it up vigorously, and that the earnest and hearty cooperation of each and every employe is solicited in order to bring about the desired results. All employes on this division, from the superintendent to the station porter, are urged to keep cars moving. Have cars placed promptly for unloading, and follow to see that car is unloaded immediately; if it is not required for reloading, get it moved on the first available train to point where it can be used. If needed for reloading, do not permit delay in placing; when placed urge prompt loading and billing. Do not let it miss a train by delay in billing.

C. E. Catt, chief clerk to division accountant, who has been engaged in special work at Cincinnati for the past several months, has just been appointed division accountant, Ohio River Division, headquarters at Parkersburg.

"Cash" McOsker, transportation department timekeeper, has been promoted to chief clerk to division accountant, Charleston Division, headquarters at Weston. We are glad to note that the ability of these two men has been recognized. Of course, we regret that they are leaving us after years of association, but congratulations and best wishes are extended.

"Red" Stants, motive power timekeeper, has been promoted to a new position just created in Division Accountant's office, known as inspector of accounts. The promotions mentioned above will create many changes in division accountant's present organization.

Dewey Neister, extra dispatcher, who has been making very frequent trips to Shelbyville, Ind., for some time, made application for transportation a few days ago in favor of "Mrs." E. D. Neister. This, of course, exposed the well-kept secret, and the happy couple are now receiving congratulations from their many friends.

Mr. and Mrs. W. J. Ewing

Toledo Division

Correspondent, I. E. CLAYTON, *Division Operator*

The accompanying photograph is of Mr. and Mrs. W. J. Ewing, who were married on October 7 at Urbana, Ohio. Mr. Ewing, car inspector at Troy, is a son of J. M. Ewing also car inspector at Troy. Mrs. Ewing was formerly Miss Lulu Garver, of St. Paris, Ohio, whose charming personality has won her a very large circle of friends, who join in wishing the newlyweds a happy married life. "Slim," you show rare judgment and taste.

East Dayton

Correspondent, EDWARD MANNIX

November has arrived, garbed in its Fall attire, calling our attention to the approaching winter, which will soon be with us. As we look back upon the declining year, the vision of the past looms up before us, and with grateful hearts we are thankful to the Giver of all, for the many blessings bestowed upon us during the past year.

As a Thanksgiving proclamation, our master mechanic, Alfred E. McMillan, calls our attention to the loyalty of the employees under his jurisdiction and with thanks to all, wishes them the blessings of the season.

The "No Accident Campaign" has started again. While Dayton felt very proud of the honors bestowed upon her one year ago, it will again enter the campaign with the same energy and determination that is always characteristic of the Toledo Division, and we give to our superintendent, R. B. Mann, the assurance that every possible effort will be made to bring the banner again to Dayton.

On September 22, an unusual treat was given the employees of East Dayton, Ohio, under the auspices of the Welfare Department, when we were given an exhibition of moving pictures. The pleasure which it afforded was highly commented upon by our master mechanic, A. E. McMillan, our general foreman, W. A. Gilmore, and highly appreciated by all who attended.

Joseph Farley, Car Repair Department, has just led to the altar one of Dayton's most charming young ladies. We wish to "Joe" all the luck that he justly deserves and to his wife a life of happiness.

Miss Anna Jackson, Stores Department, has resumed her duties after a lingering illness. It is surely pleasing to see her back again at the old stand, for she is a real railroad girl.

Kentucky District

(S. V. & E. R. R.; L. F. R. R.; M. C. R. R.)

Correspondent, H. L. GRAHAM

Miss Stella Campbell of the Auditing Department of the Consolidation Coal Co., and Leslie Gatwood, chief clerk to division superintendent, were quietly married at the home of Mr. and Mrs. P. M. Conley, Lake Side. This pleasant event took place at noon on September 18, the knot being tied by the Rev. O. James. Immediately after the wedding the couple left McRoberts over the L. & N. R. R. for a two weeks' honeymoon through the southern states.

During several days of September we had with us W. L. Allison, Safety agent, Chillicothe, Ohio. Mr. Allison did some excellent work within our district by reorganizing "Safety First" committees. He was much pleased with the beauties of the mountain scenery, and took several pictures while

riding through the hills on a mountain burro. We have not yet been able to figure out why riding over the hills on a mule would cause him to stand while eating his meals.

On September 21, at Jenkins, Ky., September 22, at Van Lear, Ky., and September 23, at Weeksbury, Ky., very interesting "Safety First" meetings were held, all of which were presided over by chairman of District Safety Committee, H. R. Laughlin.

Agent John Hamlet (better known as "Shanghai"), Van Lear, Ky., declares that there are sure signs that old H. C. L. has been dealt a body blow—he has noticed several times recently that grease spots have appeared on the papers in which his lunches were wrapped.

District Superintendent H. R. Laughlin recently met with executive officers of the Chesapeake and Ohio Railroad, in their private car at Shelby, to discuss ways and means to relieve the congested traffic conditions in the Chesapeake and Ohio yards at that point.

Safe Car Windows

THROWING stones through the windows of passing trains is a favorite amusement of half-grown boys. Recently a stone was thrown through a window of a passenger train in the suburbs of Philadelphia. Broken glass was showered in the face of a lady passenger, cutting her in several places. Fortunately no glass struck her eyes. The stone itself missed her head by less than a foot.

It is no longer necessary to subject passengers to such dangers. As new passenger cars are built doubtless they will be glazed with the recently invented laminated, safety glass. This consists of two sheets of ordinary glass between which is interposed a thin sheet of pyroxylin plastic. Hydraulic pressure and the application of the proper degree of heat welds the glass and the pyroxylin together in a solid unit. The pyroxylin binder prevents any scattering of fragments in the event of violent breakage of the glass.

Recently, in a test, a nickel-jacketed revolver bullet, fired from a distance of seven feet, failed to penetrate a sheet of this laminated glass.

The transparency of the glass is not appreciably reduced by the insertion of the plastic sheet.

Passengers on both steam roads and trolley lines are subjected to great danger from broken glass, especially during strikes. The use of laminated glass windows would reduce these dangers to a minimum. Car builders are unquestionably going to receive many specifications in the near future calling for this equipment.

Card Ten Years in Mail

IT took a postal card ten years and nine months to make a Thanksgiving journey from New Haven to Staten Island. The card was mailed in Highwood, a New Haven branch office, on November 17, 1909, by B. B. Lynam to Daniel Horrigan, of the Baltimore and Ohio Railroad, who lives at No. 38 Montgomery Avenue, Tompkinsville, S. I.

Lynam and Horrigan are boyhood friends and have corresponded on all special occasions for 20 years, never missing a holiday except Thanksgiving, 1909.

The postal card, a reminder of the day when birds were cheaper than today, arrived last Monday afternoon. Horrigan is going to have it framed.—New York World.

New Volumes in Our Library

ONE night last winter I visited the home of one of the most progressive advertising agents in Baltimore, a young chap who is now handling the accounts of some of the leading advertisers in that city. He was especially proud of the little alcove off his living room, which he had fitted up as a combination den and library. Leaning down and pointing to one of the shelves, he said:

"There is a set of books that I will always treasure."

It was the Harvard Classics, that stoutly bound, attractive selection of 50 volumes that Dr. Charles Eliot, president-emeritus of Harvard University and one of the foremost educators of the world, chose as combining the best thought of all time for modern men and women who want to secure a liberal education through devoting just a few minutes each day to their reading.

"I have read something in each one of the books, and the longer I read them, the more interesting and valuable I find them," he continued.

"Do you find them helpful in your business?" I inquired.

"Yes, very much so. In my work I have to get the advertising message over to the reading public in the most forceful, cogent and attractive way, and the index which comes with the Harvard Classics, correlating the best thought of the greatest writers of all time, as they themselves have expressed it, often directs my own thought into the most suggestive and helpful channels.

"But it isn't in my business alone that I have found them of so much assistance. It is because of their general educational value that I prize them so highly. When you think of the best works on Science, History, Art, Biography, of the best Poetry and the greatest Fiction of all time being in these volumes, all arranged so that one can take a liberal education in any phase of any one of them, right in the comfort and quiet of his own easy chair in his own library—you can imagine how delightful and profitable they have been to me."

And he took the index volume from the shelf, pushed me into an easy chair and in about five minutes showed me how the classics provided these interesting and educational reading courses in so many, many subjects.

Readers of our MAGAZINE will be glad to know that the Harvard Classics are now in our Library at Mt. Royal Station, Baltimore, Md., and can be had on application in the regular way to Mrs. E. P. Irving, the librarian there. We venture the thought that any booklover who once begins to ex-

plore the treasures of the Classics by taking a book from the Library, will want to secure the entire set. On request, P. F. Collier and Son, the publishers, 413 West 13th Street, New York, N. Y., will be glad to send full information, without obligation to the inquirers.

The complete list of the titles in the Harvard Classics follows:

The Texts

VOLUME 1—*Benjamin Franklin, John Woolman, William Penn.* (3 books in 1.)

Franklin's plan of self-education, his rules for success, etc. Woolman's maxim of conduct, etc., etc. Penn's views on life, manners, business, politics, etc.

VOLUME 2—*Plato, Epictetus, Marcus Aurelius.* (7 complete books in 1.)

The Apology of Socrates, the Dialogue of Crito and Socrates, the 189 Golden Sayings of Epictetus, the Meditations of Marcus Aurelius, the Life of M. Aurelius Antoninus, the Philosophy of Antoninus. History, statesmanship, Roman customs, maxims of public life, etc., etc.

VOLUME 3—*Bacon, Milton's Prose, Thomas Browne.* (5 complete books in 1.)

Shrewd observations of how men get on; human nature, not as it ought to be, but as it is. In Sir Thomas Browne is revealed a personality of great charm and humor, and a mind surprisingly acute. Bacon's Essays or Counsels, Civil and Moral: Of Truth, of Revenge, of Ambition, and of fifty-six other topics; Milton on Freedom of the Press and on Education.

VOLUME 4—*Complete Poems in English, Milton.* (4 complete books in 1.)

Milton was the great poet of civil and religious liberty and of the English commonwealth. On Shakespeare, on Civil War, and 36 other subjects; also "Paradise Lost," "Paradise Regained," and "Samson Agonistes."

VOLUME 5—*Essays and English Traits, Emerson.* (37 complete essays in 1 book.)

Manners, Heroism, Politics, Beauty, Race, Aristocracy, etc., etc. These essays are singular in beauty and condensation of style.

VOLUME 6—*Poems and Songs, Burns.* (Over 400 complete poems in this book.)

Burns and Milton together cover the principles of free government, education, and democratic social structure. A volume endlessly entertaining; every shade of inspiration and emotion, from "Auld Lang Syne" to "Such a Parcel of Rogues in a Nation."

VOLUME 7—*Confessions of St. Augustine, Imitation of Christ.* (14 books in 1.)

Evils of Ill Society, Reflections on Grief, on real and unreal friendship, on love of fame, etc., etc. In the "Imitation," admonitions concerning the inner life, inward consolation, etc.

VOLUME 8—*Nine Greek Dramas.* (9 complete books in 1.)

Eight tragedies and a comedy; the archaic grandeur of Aeschylus is followed by the intensely human and vivid work of Euripides, presenting the higher moral and intellectual aspect of the golden age of Pericles. The comedy of Aristophanes is

a keen satire on the daily life of the Athenians.

VOLUME 9—*Letters and Treatises of Cicero and Pliny.* (4 complete books in 1.)

Intimate pictures of Roman society written by prominent statesmen and their friends. Especially interesting also are Cicero's treatises on "Friendship" and "Old Age."

VOLUME 10—*Wealth of Nations, Adam Smith.* (5 complete books in 1.)

The relations of Labor, Capital, Government, etc., etc.

VOLUME 11—*Origin of Species, Darwin.* (Complete in 15 chapters.)

Sets forth the theory of evolution—Laws of Variation, Natural Selection; or the Survival of the Fittest, etc., etc.

VOLUME 12—*Plutarch's Lives.* (9 biographies and 2 comparisons.)

Plutarch's Famous Men live and breathe again and we become personally acquainted with them, knowing their greatness and foibles alike.

VOLUME 13—*Aeneid, Virgil.* (The 12 books complete in this volume.)

For nearly 2,000 years Virgil has been one of the most powerful factors in European culture. The deathless epic narrative of the founding of Rome and the adventures of Aeneas.

VOLUME 14—*Don Quixote, Part 1, Cervantes.* (4 complete books in 1.)

Unsurpassed as a picture of Spanish life, as a masterpiece of droll humor, and as a gallery of immortal portraits.

VOLUME 15—*Pilgrim's Progress, Donne and Herbert, Walton.* (3 complete books in 1.)

"Pilgrim's Progress," a picture of universal human nature, one of the most popular and widely read books in any language. In his biographies of Doone and Herbert, Walton gives us harmonious and complete pictures of character.

VOLUME 16—*The Thousand and One Nights.* (41 complete stories.)

One of the great storybooks of the world, translated direct from the original Arabic, preserving its Oriental flavor. Arabian Nights Tales, "The King of the Black Isles," "The City of Brass," etc., etc.

VOLUME 17—*Folk-Lore and Fable, Aesop Grimm, Andersen.* (3 complete books, in 1.)

An important field of literature, revealing the teachings of universal experience. 82 Fables, 41 tales by Grimm, 20 tales by Andersen.

VOLUME 18—*Modern English Drama.* (6 plays in 1 book)

Dryden's "All for Love"; Sheridan's "School for Scandal"; Goldsmith's "She Stoops to Conquer," and three others.

VOLUME 19—*Faust, Egmont, etc., Goethe, Doctor Faustus, Marlowe.* (4 plays.)

Emerson called Faust "the most remarkable literary work of the age." "Egmont" is a picture of a historical situation of absorbing interest. "Dr. Faustus" sounds the depths of the human heart.

VOLUME 20—*The Divine Comedy, Dante.* (3 complete books in 1.)

Vivid poetic narrative of a journey down through Hell, up the mountain of Purgatory, and through the revolving Heavens into the presence of God.

VOLUME 21—*I Promessi Sposi, Manzoni.* (Complete in 38 chapters.)

A famous historical novel of Italy as it was in the seventeenth century; vivid and picturesque.

VOLUME 22—*The Odyssey, Homer.* (14 books in 1—complete.)

The golden age which gave to the world this chronicle of the wanderings of the cunning Ulysses was peopled with fancied monsters, magical and romantic, which are all mingled in the woof of the story.

- VOLUME 23—Two Years Before the Mast, Dana.** (Complete in 37 chapters.) Charles Dickens called this "the best sea book in the English tongue."
Old Sailing Ship Days, Around the Horn, California in '49, the Gold Rush, etc., etc.
- VOLUME 24—On the Sublime, French Revolution, etc., Burke.** (4 books in 1.) Taste, Novelty, Cause of Beauty, Effect of Words, Reflections on French Revolution, etc.
- VOLUME 25—J. S. Mill and Thomas Carlyle.** (5 complete books in 1.) Liberty of Thought and Discussion, Individuality, Life of Scott, etc., etc.
- VOLUME 26—Continental Drama.** (6 plays.) The six dramatists whose work fills this volume—Calderon, Corneille, Lessing, Moliere, Racine, Schiller—are the great masters of their craft.
"William Tell," "Life is a Dream," and four other plays.
- VOLUME 27—English Essays, Sidney to Macaulay.** (24 essays.) The essays cover a very wide range of subjects, religious, cultural, sentimental, literary, esthetic, and deal with a great variety of personalities and types of mind. Art, the Spectator Club, Education of Women, etc., etc., by Cowley, Addison, Shelley, and thirteen others.
- VOLUME 28—Essays, English and American.** (17 essays.) Seventeen more essayists. Taken together, they discuss the most significant questions in life. Newman, Huxley, Stevenson, Thackeray, and eight others, on Science and Culture, Race and Language, Democracy, etc., etc.
- VOLUME 29—Voyage of the Beagle, Darwin.** (Complete in 21 chapters.) The account of Darwin's five years' cruise—the countries visited, the various forms of life studied—human, animal, and plant.
- VOLUME 30—Faraday, Helmholtz, Kelvin, Newcomb, etc.** (8 scientific papers.) A careful study of scientific papers here collected will widen any reader's knowledge wonderfully in the fundamental points of which they treat.
Forces of Matter, Conservation of Force, Ice and Glaciers, the Tides, etc., etc.
- VOLUME 31—Autobiography, Cellini.** (2 complete books in 1.) He mirrors forth the fiery passions of his time with amazing candor. The period is the Renaissance, and he expresses himself strongly on the social and political movements which actuated the parties among which he associated.
- VOLUME 32—Montaigne, Sainte-Beuve, Renan, etc.** (13 essays.) Continental essayists—French, Italian, German. Among the subjects dealt with are friendship, education, happiness, philosophy.
- VOLUME 33—Voyages and Travels.** (7 complete narratives.) Every page is a record of the struggle of man, curious to pry into the secrets of the great unknown world; and their recitals inspire dormant imaginations with the fire of old adventure.
- VOLUME 34—Descartes, Voltaire, Rousseau, Hobbes.** (4 complete books in 1.) Carefully chosen examples of masterpieces in French philosophy, to which is added, by way of comparison, the work of a celebrated English thinker, comprise this thoughtful volume.
Method of Right Reasoning, Inequality among Mankind, etc., etc.
- VOLUME 35—Froissart, Malory, Holinshed.** (3 complete books in 1.) They are more than bare histories, they are the purest romances of medieval times. The Holy Grail, Wat Tyler's Rebellion, Punishment under Queen Elizabeth, etc.

- VOLUME 36—Machiavelli, More, Luther.** (3 complete books in 1.) The expression of the ideals of three great men who have bulked largely in the history of the world.
The Prince, Utopia, etc.
- VOLUME 37—Locke, Berkeley, Hume.** (3 complete books in 1.) Here we find these three great philosophers of Great Britain at their best.
Origin of Ideas, Reason of Animals, Liberty and Necessity, etc., etc.
- VOLUME 38—Harvey, Jenner, Lister, Pasteur.** (12 scientific papers.) Contributions of the world's greatest physiologists and surgeons to the literature of humanity.
Surgery, Germ Theory, Geology, etc., etc.
- VOLUME 39—Famous Prefaces.** (28 prefaces.) Probably the only work of its kind.
Heart-to-heart talks by the author to his reader.
Hugo on Cromwell, Whitman on his "Leaves of Grass," etc., etc.
- VOLUMES 40, 41, 42—English Poetry.** (200 authors.) 2,500 poems, ranging over the whole vast field of poetry in English. Three truly remarkable volumes that will give any appreciative reader a vivid conception of the permanent sentiments and passions of mankind.
- VOLUME 43—American Historical Documents.** (6 complete books in 1.) Mayflower Compact, Lee's Farewell, Lincoln's First Inaugural, etc., etc. These documents form a rich storehouse of material pertaining to American history.
- VOLUMES 44, 45—Sacred Writings.** (47 authentic texts.) Chinese, Hebrew, Christian, Buddhist, Hindu, Mohammedan. It is intensely interesting to compare the great religions of the world.
- VOLUMES 46, 47—Elizabethan Drama.** (10 complete plays.) Shakespeare, Marlowe, Johnson, etc. The boundless vitality of the age of Elizabeth in England can be apprehended from these dramas.
- VOLUME 48—Thoughts and Minor Works, Pascal.** (3 complete books in 1.) Mind and Style, Art of Persuasion, etc., etc. A discussion of the sufficiency of reason, the trustworthiness of experience, etc., etc.
- VOLUME 49—Epic and Saga.** (5 complete books in 1.) Beowulf, Song of Roland, the Nibelungs, etc., etc. England, France, the North Countries and Ireland have been drawn upon for this volume.
- VOLUME 50—Introduction, Reader's Guide, Indexes.**

Reading Courses and Lectures

All the books necessary for the reading courses are found in The Harvard Classics. Below is a partial summary of the reading course on History of Civilization. This course is by no means confined to works regarded by their authors as history, but includes letters, dramas, novels, and the like, which, by virtue of their character, period, or scene throw light upon social and intellectual conditions, enriching and making vivid the picture of human progress which is outlined in the more strictly historical narratives. This course includes 105 distinct readings. Space limitations forbid more than the vaguest suggestion as to the wide range of subjects covered.

Reading Course on History of Civilization

Race and Language—Deals in highly illuminating fashion with the much misunderstood term "Race." (1 reading.)

FREE Puncture Proof Tube 6,000 Miles Guaranteed

For a limited time only we are offering absolutely free a puncture proof tube guaranteed 6,000 miles, with every purchase of one of our famous Reliable Double Tread Tires which are guaranteed 5,000 miles and often give 8,000 to 10,000.

4 Reasons for Buying this Bargain Offer

- 1—6,000 miles without a puncture!
- 2—Save repair bills!
- 3—Save entire cost of tube!
- 4—Save money on tires!

Price Includes Tire and Tube

Size	Tires	Size	Tire
30 x 3...	\$7.25	34 x 4...	\$11.35
30 x 3 1/2...	\$8.35	35 x 4 1/2...	\$13.25
32 x 3 1/2...	\$8.95	36 x 4 1/2...	\$13.75
31 x 4...	\$10.20	35 x 5...	\$14.50

SMASHING SHOE PRICES

\$2.48

Work Shoes

Send No Money

And Dress Shoes at \$4.89

A Blow at Profiteering

\$2.48 for a pair of real honest built work shoes. Sounds impossible but it is true and the best part of it is that you do not have to send any money to prove it. Thousands have been satisfied.

The dress shoe we are offering at **\$4.89**, just think of it, **\$4.89** for a dress shoe. This in itself is the greatest bargain of the season, but in addition with every pair of dress shoes sold we will sell a pair of these work shoes for **\$2.48**. A price that sounds like the days before the war. Imagine for a total expenditure of **\$7.37** actually less than the value of the dress shoes you will have two pairs of shoes.

Send No Money, Just Send Your Order and pay your postman \$7.37 and postage when the package arrives. You take no risk as the shoes will be sent to you under our iron clad guarantee of money back including postage if you are not fully satisfied. **We Positively Cannot Sell Either Pair of Shoes Separately**

When ordering be sure to mention the size required on each pair of shoes.

Ancient Greece and Rome—The civilizations which, more than any others, have affected the culture of the modern world. (27 readings.)

The Renaissance—The great revival of interest in pagan antiquity, from which came the impulse to throw off the traditional bonds which had fettered the human spirit in the Middle Ages, and to seek a fuller scope for individual development. (36 readings.)

Modern Europe—Throughout all these later pieces there appear, more or less distinctly, evidences of the gradual spread over the world of the struggle for freedom and equality. (9 readings.)

To give the idea of the thoroughness with which the various Harvard University faculty members have arranged their lectures, and what they contain, a brief outline of one of the sixty lectures is given below. This is by Robert Matteson Johnson, M. A. (Cantab.), assistant professor of Modern History in Harvard University.

History

(Section-Headings)

The Leadership of Greece.
The Domination of Rome.
The Contribution of the Jews.
The Christianizing of Rome.
The Fall of Rome.
The Rise of Islam.
The Feudal System.
The Renaissance.
France and England.
Spain and the House of Hapsburg.
The Founding of the British Empire.
Modern Europe.

Picked Up Here and There

By "Ernie" Baugh

THIS IS A REAL ONE

Editor, Baltimore and Ohio Magazine:

Quite often I see "Pick Ups" by "Ernie" Baugh in our Magazine which are always complimentary.

Did "Ernie" ever "Pick Up" one of those darned pencils with which he expects

patrons to write out their orders on the dining car?

Better have him "Pick Up" an acquaintance with the Purchasing Department and arrange to get pencil sharpeners on the cars. It would be a cheap but wonderful improvement.

"Buddy."

We asked Mr. Baugh if we could use this in the Magazine and he said:

Baltimore, Md.

August 11, 1920. (1)

Dear Ed:

Returning you the attached; yes; if you will put it in under the head of "Picked Up Here and There," and put it in just exactly as he says it, then what you say to me, and my answer, which is:

No, "Buddy," I never did—I use an Eversharp—but if you will drop into my office some day I will show you Circular 71 to prove we appreciate and take action on just criticisms.

E. V. B.

Railroads Gain \$2,000,000,000 in Efficiency —Record Made Despite Loss of Equipment and Other Handicaps

Railroads of the United States are being operated at a degree of efficiency which is the equivalent of adding 500,000 freight cars, valued at \$2,000,000,000, to the nation's transportation system, as it existed on March 1 last, when Federal control came to an end.

At the end of Federal control the average number of miles per car per day was 22.3, and the average tonnage of each car was 28.3. On September 1 the average number of miles per car per day was 27.4 and the average tonnage of each car was 29.6. Translated by railroad experts into terms of efficiency, the gain in car movement alone was 22 $\frac{3}{4}$ per cent., and this was topped by a gain of more than 7 per cent. in capacity loading. As there are in use in the United States at present 2,350,000 freight cars, such a growth in efficiency has added as a minimum the equivalent of 500,000 cars to the service of the shippers of

the United States and the saving at \$4,000 a car in capital requirements, was no less than \$2,000,000,000.

During February last there were in use 2,490,000 freight cars and on September 1 last there were in service 2,350,000 cars, some 135,000 freight cars having been scrapped since March 1, although portions of such cars may be used for rebuilding purposes.

In other words, the railroads have been carrying since May 1 a tremendous amount of traffic with fewer cars than were available prior to the resumption of private operation. Furthermore, not until September 1 were the railroads able to break even on bad order cars, by the end of that month the reduction in the number of bad order cars having been reduced only a few tenths of one per cent.—*Extracts from N. Y. Herald.*

Will you help your railroad do its share in maintaining
and even bettering this splendid increase in efficiency?
Boost Car Miles and Car Loading

Just a Few Great Books Gave Him His Start

*Fifteen minutes a day, and the right books
—that's the secret of a liberal education*

HE talked like a man who had traveled. He knew History; and something of Science. He wrote in a style of wonderful beauty and simplicity—such a style as only comes to a man from reading the works of master writers.

Yet did you ever think of this?

You yourself, have probably read as many books as Lincoln read in the first thirty years of his life.

Why is it that you have gained only a smattering of knowledge from your books while he gained a liberal education from his?

The answer is that he knew what few books were really worth while: he made every moment count.

Why not decide right now—today—that you will stop wasting your reading? Why not say to yourself: "In my own small way I am going to do what Lincoln did. I will read in such a way that six months from now I will be a bigger, more effective, more interesting man or woman than I am today."

You can do it: two hundred thousand Americans have proved that you can do it, through

Dr. Eliot's Five Foot Shelf of Books

*The pleasantest, easiest way to learn
to think clearly and talk interestingly*

From all the millions of books on Travel, History, Science, Biography, Essays, Drama and Poetry, Dr. Charles W. Eliot, for forty years President of Harvard, has selected four hundred and eighteen and arranged them in fifty volumes.

These books, he says, if a man or woman will give them only fifteen minutes a day, will give him the essentials of a liberal education.

A liberal education—think of it. The power to think clearly and talk interestingly, to be a marked man or woman in any company. And all in exchange for a few minutes of pleasant reading each day.

Send for this **FREE** book

All your questions about the Five-Foot Shelf are answered in "Fifteen Minutes a Day." It's a great little book in itself. It contains:

Dr. Eliot's own story of the Five-Foot Shelf.

An outline of the reading courses in the Five-Foot Shelf, and many illustrations taken from the books themselves.

It tells what the books are that Dr. Eliot has selected, and describes the marvelous encyclopedic index. Send for this guidebook to good reading. Send for it now. Do as Lincoln did. Make your reading count.

Fine View

An American touring the Highlands of Scotland climbed a high mountain accompanied by a guide. The Scot kept bragging about the fine view.

"I suppose you can see America from here on a fine day," said the American with a little sarcasm.

"Ay, farther than that," answered the unabashed Scot.

"Ay, on a fine night ye can see the mune."

"Let me see," said the priest, filling out the birth certificate and trying to recall the date, "this is the thirtieth?"

"The thirtieth! Indade an' it's only the elivinth."

On Misdirected Wit

Sarcasm really never pays. We always like to see a sarcastic person get it in the neck.

Mrs. Clancy was a very sarcastic woman and it is probably due to this fact that she had a falling out with her friend, Mrs. Murphy, who lived in the apartment just under her.

One day while Mrs. Clancy was feeling particularly mean she looked down from the

WATSON E. COLEMAN
PATENT LAWYER

624 F Street, N. W.

Washington, D. C.

window and saw Mrs. Murphy also enjoying the scenery. She could not resist the temptation to take a shot at her:

"Oi say, Murphy," she called down in deep sarcasm, "why don't ye take your ugly ould mug out iv the windy and put your pet monkey in its place. That'd give the naybors a change they'd like."

Mrs. Murphy looked up.

"Well, now, Mrs. Clancy," she slowly said, "it was only this mornin' that I did that very thing an' the policeman came along and when he saw the monkey he bowed and said, 'Why Mrs. Clancy, whin did ye move down shtairs?'—*West Virginia Workman.*

Knew His Own Value

Bushby was sorely in need of an extra farm hand and advertised.

"What'll ye pay?" questioned an early applicant.

"I'll pay you what you are worth," promptly replied Bushby.

The applicant meditated for a minute, then, turning on his heel, decisively announced:

"I'll be durned if I'll work for that."—*The Aluminum Reflector.*

Boy—Say Mister, is the season open for crap shooting?
Constable—Wal, naow, I never heerd o' that kind o' bird!

Don't Send a Penny—Your Credit is Good

Ten Months to Pay the Royal Way. We want you to see and examine this famous watch before buying it. If you decide to keep it, pay \$10.90 and send us the balance in 10 monthly payments of \$4.36 each, averaging only 18¢ a day, which you never miss. Special low price \$54.50 on this offer only.

ROYAL DIAMOND & WATCH CO

ESTABLISHED 1895

35 Maiden Lane - New York

JUST PUBLISHED NEW POCKET EDITION WESTINGHOUSE E-T AIR BRAKE INSTRUCTION POCKET BOOK

By WM. M. WOOD, Air Brake Instructor

PRICE \$2.50

Contains examination questions and answers on the E-T equipment. Covering what the E-T Brake IS. How it should be OPERATED. What to do when DEFECTION.

Not a question can be asked of the ENGINEMAN UP FOR PROMOTION on either the No. 5 or the No. 6 E-T equipment that is not asked and ANSWERED in the book. If you want to thoroughly understand the E-T equipment get a copy of this book. It covers every detail. Makes Air Brake troubles and examinations easy.

AT THE DIVISION POINT

BY STRICKLAND GILLILAN

(Written at Parkersburg, W. Va.)

Poppin' and ready to ramble
The "hog" on the house-track stands.
The passengers restlessly amble
About with their grip-filled hands.

The "limited mail" is coming!
The station she shot through last
Has started the brasses thrumming
The symbols that spell out "Past."

(The drivers are oiled and ready.
The "smoky" has sprayed the coal
Till the fire's white and steady
As a furnace's glory-hole.)

Poppin' and ready to ramble
The "'gine" on the house-track waits,
R'arin' to romp and gambol
At the top of her fastest gaits.

Hark! down the line a whistle
Hoarsely crescendo comes!
(White as the down of a thistle
The plume from the pop-valve hums
As the "hog" on the house-track trembles
And strains at her leash to go.)
The throng at the steps assembles
As the mail comes down to slow.

Poppin' and ready to ramble
See the "hog" from the house-track glide—
Let her pal to the roundhouse amble
To be groomed for the next day's ride.

The Honorable John J. Cornwell, Governor of West Virginia, Elected a Director of the Baltimore and Ohio

His First Regular Job was that of Trackman on the Romney Branch of the Railroad

A LONG about the summer of 1880, employes of the Baltimore and Ohio, now Veterans, perhaps, might have seen this episode in the streets of their native Cumberland, Md.:

A sturdy lad of 13, clad in rough farm clothes, and carrying on his shoulder a basket of fine peaches. Had they followed him into the nearby store they would have seen him pocket a fancy price for his fruit, some of the first of the new commercial variety that had found its way from the improved orchards of Hampshire County, W. Va., into that section. Such extraordinary fruit, commanding so high a market, might have stimulated a natural curiosity to follow the boy still further—into a neighboring book shop, and there to see him emerge, his money exchanged for two books, Plutarch's Lives, and Creasy's Fifteen Decisive Battles of the World. And here, had our Baltimore and Ohio men been seers, they might (remembering Lincoln and his struggle to get books, or Garfield, perhaps, then a candidate for President of the United States, and the stories current of his absorbed reading while driving the horses along the canal tow path)—they might have projected their imaginations into the future and seen in the perfected fruit and the two book classics of youth, and again in the youth himself exchanging the food of the body for that of the mind and soul, indications of a career not always to be measured by the acreages of his paternal farm on Jersey Mountain in Hampshire County, W. Va.

But railroad men of that day were no more seers than they are today. And the lad of whom we write, books

under his arm, went back to the farm unnoticed of men, there to work out the problems and difficulties which finally prepared him for the responsibilities of the highest administrative office his native state could give him, and which made him worthy of the well-nigh universal esteem of his fellow citizens.

The Honorable John J. Cornwell, Governor of West Virginia and elected a Director of the Baltimore and Ohio on November 15, 1920, was born in Ritchie County, W. Va., on July 11, 1867. The home of his father, a Confederate soldier, lay in the disputed territory between the North and the South. His small properties had been badly dissipated by the fortunes of war, and he was at that time working the farm of his

wife's father. Three years after the birth of the boy John, one of three brothers, the family moved back to their native Hampshire County and again took possession of the little farm they owned on Jersey Mountain near Romney.

Between the short four months' winter sessions in the local country school, young Cornwell turned his attention to anything which would help the family fortunes. The introductory episode of the improved peaches which the lad peddled in Cumberland, has its place in these years of his life. For the Cornwell family, true to the fighting instinct illustrated by active participation of the father in the struggle between the North and the South, was here engaged in an effort in cooperation with the Rannells family, their neighbors, to improve the quality of the peaches grown on the local West Virginia hillsides. In this effort they were pioneers and it was young Cornwell's job to take this improved fruit into the local markets, particularly in Cumberland. When there was no work on his own farm, he hired out to neighboring farms or for any other job offering the best return. So, just after the completion of our Romney Branch to Romney in the spring of 1884, we find him in his first active connection with the Baltimore and Ohio, as a track hand at 90 cents a day, carrying his tin lunch bucket to and from work. His next regular job, paying \$1.00 a day, took him into the surrounding woods to peel bark for tanning purposes.

In the fall of 1884, when he was 17 years old, he began teaching in the county school in Hampshire County, supplementing the meagre stipend he re-

John J. Cornwell, Governor of West Virginia and a Director of the Baltimore and Ohio

ceived for this work by the hardest kind of toil during the long vacations, in local timber operations, at saw mills and, in fact, at any kind of restful activity.

In 1888 he took a ten weeks' course at Shepherd College, Shepherdstown, W. Va., this being the last schooling he had except for one ten-week term later in his life at the summer school of West Virginia University.

The same autumn he became principal of the public school at Romney, then employing only three teachers. It now has 20. In the fall of 1890 he and his brother, W. B. Cornwell, bought the *Hampshire Review*, a weekly newspaper, a publication which he managed and edited for varying periods during the succeeding years and which he still controls.

Soon after beginning this newspaper enterprise he entered the office of his brother, a graduate of the Academic and Law Schools of West Virginia University, to study law, and in 1894 was admitted to the State bar.

In 1909 he again directed his activities toward railroading. Grant and Hardy Counties, W. Va., had no facilities and the people of these two counties interested the two Cornwell brothers in the building of the road afterward known as the Hampshire Southern, now a part of the Baltimore and Ohio. Three of the districts in the counties voted \$30,000 in bonds each, the other funds being subscribed by outside capital in New York City and elsewhere.

W. Trapnell, then division engineer of our Baltimore Division and now superintendent of the Charleston Division, was secured to take charge of the construction and was made general manager of the Hampshire Southern on its completion.

In the meantime Governor Cornwell had been a member of the State Senate from 1896 to 1906. He was Democratic nominee for Governor of West Virginia in 1904, the year of the Roosevelt Republican sweep, and though not elected, ran ahead of the national Democratic ticket by 26,000 votes.

He was out of politics between the years 1906 and 1916, devoting his attention to the practice of law, to real estate, lumber and orchard developments, especially in the vicinity of the Hampshire Southern Railroad.

In 1916, upon a statewide demand from his party, he again consented to become a candidate for Governor of West Virginia on the Democratic ticket and in the ensuing election he was the only Democrat elected. His term of four years, which will be

concluded on March 4, next, has been notable for constructive legislation. The Governor is particularly proud of the budget amendment, passage of which he secured at a special session of the Legislature during the first year of his office in 1917, as also of the "Work or Fight" law, enacted by the West Virginia Legislature and signed by Governor Cornwell May 18, 1917, two months before any similar law had been passed as a wartime emergency act by any of our states.

A visit with Governor Cornwell, whether in his comfortable office in the beautiful old State House at Charleston, or in the cloudy atmosphere of a Pullman smoking compartment, discloses the engaging qualities of urbanity, modesty, culture and sincerity, which all who know him, whether of his political belief or not, recognize and admire. I saw him in both places on November 29. In the former he said in reply to my question:

"You ask me if, when a boy, I had a vision of my future. It was pretty difficult to see a vision of much worth while from that poor farm of ours on the slope of Jersey Mountain, during my early years. Yet, I suppose I must have had a vision, because I was always particularly interested in biography, in the life stories of men whom the world now acclaims as having done something worth while. And I believe it is true, that without a vision, without some sort of an ideal to look forward to and to work for, a man cannot rise very high in the esteem of his fellow men or be of much service to humanity.

"One of the things I prize most in life is the fact that I know well and am able to call by name so many men whom I have met in business, in politics and on the Railroad. I know hundreds of Baltimore and Ohio employes, met not alone in connection with my legal work for the Railroad, but also as neighbors along our Romney Branch, employes whom I have grown to admire for their unusual interest in and fidelity to the Baltimore and Ohio.

"My election as a director, therefore, comes more as a rededication to the interests of the Railroad in which I have always been interested, rather than as an assignment to a new kind of work.

"Although I have been interested in a number of small corporations, this is the first time I have become a director in so large an enterprise as the Baltimore and Ohio. And to me it means a great opportunity. In addition to my official connection with the Railroad when I qualify as

a director, and my work for it in the past, I have, in the words of the poet, 'lived by the side of the Road.' There, it has always been of the greatest interest and satisfaction to me to read the pronouncements of President Willard in regard to the Railroad's policy; of his wish that it be a good public servant, faithful in every obligation, square in every relationship, and, in brief, as he himself so aptly put it, a 'good neighbor' to all those who dwell along its lines."

As I was leaving Governor Cornwell's office he handed me a little cloth bound volume with his name imprinted on the cover as author, under the attractive title, "Knock About Notes."

On the first page following the title page, one reads the following:

DEDICATED

TO THE MEMORY OF AN ONLY SON

JOHN J. CORNWELL, JR.

WHO DIED FEBRUARY 10, 1914,

IN HIS 18TH YEAR

The table of contents contains such interesting and suggestive titles as these:

A Lady's Scrap Book.

Old Songs and New.

The Lost Doll.

The Railway Trainmen.

A Telegrapher's Troubles.

It is a delightful collection of the author's observations as he traveled to and fro, on trains, hunting and fishing trips, and on vacations,—all of them brief and originally published in his newspaper, the *Hampshire Review*.

Here perhaps we find the best portrayal of the man himself, a man among men, democratic, interested in the most trifling incident affecting his fellow men, philosophical, and with the genius of the born writer, able to see in mere commonplaces to most people an interesting story or observation.

We hope later on to get Governor Cornwell's permission to use some of these little monographs complete in the MAGAZINE, especially the several which deal with railroading and railroad men. Here we print in conclusion an interesting bit, extracted from one of the stories, printed some years ago, we presume, but of perennial interest to all who enjoy the study of life and humanity:

"The only contented or happy people in the world are those who are so busy that they don't have time to look for happiness; who have work to do, and who are content with their work. Not many miles away is a farmer, not a very extensive one, with rather poor land; he doesn't farm the greatest number of acres, but those he cultivates are put in perfect con-

dition and it is a very remarkable season that doesn't see him with a balance on the credit side of the account at the end of the year. He is a happy man, because he is a busy one and because he mixes brains with the soil. There are others just like him and whenever you find that kind of man you find one who eats and sleeps well. There is nothing better than having something to do, except doing it successfully. Great numbers of young people are idle because they can't get a job that is equal to their idea of their own dignity, who are unhappy and growing up into worthless men and useless women. The day has already dawned when the value of anyone depends upon his inclination to work and the fidelity and energy with which he does it. Young women understand it is no disgrace to work, and their matrimonial chances are not lessened thereby. The man worth having who is not already wifed, is attracted to the young woman who passes dry goods over a counter, plugs holes up in a switchboard, tickles the keys of a typewriter, or does any kind of useful work, at home or elsewhere, in preference to one who carols off the 'flower from mother's grave,' while the mother is doing the housework. The greatest aristocracy is the aristocracy of labor, any kind of work so it is well done. Those who are so unfortunate as to get rich enough to quit work and seek happiness are rainbow chasers and are to be pitied. Poor things."

"And A Little Child—"

By M. J. Comoy

Proofreader, Printing Department

I HAD the pleasure of a trip home to Cleveland this summer over the Best and Only and herewith acknowledge my sincere thanks. The trip was delightful, the scenery truly wonderful, and Steward Elkins took care of the inner man most satisfactorily.

When I boarded the car at Mt. Royal, opposite me sat a tired mother and her two little ones. The name of the oldest one I learned later was Doris. As the day wore on Doris began to make friends with the passengers, romping up and down the aisle and stopping wherever any one displayed a desire to take an interest in her doings, bringing a smile to those who were sad as well as to those who were glad. It was wonderful how those little feet maintained their equilibrium with the swaying of the on-rushing train. Yet never once did she fall.

Down the aisle came an elderly man on his way to get a drink of water and after he had quenched his thirst he started back with his paper cup in his hand. Doris was in the aisle and she stopped and looked up at him. He playfully held the cup over her little head and just then the car rounded a curve and the contents of the cup landed on Doris' head. Immediately she proclaimed to all the car that she wasn't partial to water. The old gentleman was evidently much alarmed and began at once to seek an alibi and said, excitedly, "Lady, lady, it wasn't me—blame it on the curve!" while all the passengers joined in the laughter that followed.

A few minutes later Doris was herself again and resumed her romps. She stopped at my chair and looked up at me and evidently figured out

that I was harmless—as well as lonesome—and extended her little hands to mine and smiled. As I held her in my arms and told her the story of Ali Baba and the Forty Thieves, her little eyes began to close and soon she was off in the Land of Nod. She must have slept for nearly an hour and I couldn't have guarded a million dollars more carefully than I did little Doris.

When they were leaving the train she put her arms around me and kissed me and when the train pulled out there she was, down on the platform, looking up at me and waving "Good-bye" with her little hands.

There was a tear in my eye and a smile in my heart and a prayer on my lips for little Doris as the train rolled on and I found myself journeying on again down the road to yesterday.

Western Railway Official Pays Remarkable Tribute to the Baltimore and Ohio

ST. LOUIS-SAN FRANCISCO RAILWAY COMPANY

OFFICE OF DIRECTOR PUBLIC RELATIONS
ST. LOUIS, Mo.

FLOYD L. BELL,
DIRECTOR

November 9, 1920.

Mr. Daniel Willard,
President, Baltimore and Ohio Railroad,
Baltimore, Md.

Dear Sir:

May I take this opportunity of expressing my delight at the splendid service accorded on the Baltimore and Ohio Railroad on the occasion of a trip from which I have just returned, to Washington, Philadelphia and New York.

The unfailing courtesy of the trainmen at every point was a source of perpetual delight and the dining car service was so excellent that perhaps that factor alone was sufficient to place me in such a mood as to thoroughly enjoy the entire trip.

I really do not remember having experienced a more pleasant journey. I was greatly impressed also with the extraordinary measures apparent at every turn for the comfort and safety of passengers.

Respectfully yours,

(Signed) FLOYD L. DELL.

Macdonald's Christmas Legacy

By Francis Lynde

THE hands of the clock were pointing to midnight, and Macdonald got up from his place at the train table and kicked the chair toward his "relief."

"There you are, Pinckney," he said; "everything rolling and nobody hurt. See if you can do as well from now till morning. Reddick, you solemn-eyed owl, why don't you go home and go to bed?"

"Haven't any home," retorted the passenger man. "Besides, I have to stay here to keep you fellows from going to sleep on the job. If the trainmen on this jerkwater knew how many times I've saved their lives they'd chip in and buy me a house and lot."

Macdonald knocked the ashes out of his pipe and threw it at Reddick, after which he bent over the train sheet with Pinckney.

"Three and Four are both on time, and Four's engine is steaming well, for a wonder. Sixteen is an hour off, with about ten more loads than the mogul can handle; you won't hear anything more from her 'till she's doubled over the hill. Come on, Reddick; let's go home."

"Told you I didn't have any home," complained the passenger chief clerk, in tones that would have brought tears to the eyes of an oyster.

"So say we all of us—and more's the pity," Macdonald rejoined, wrestling into his heavy overcoat. "If I had money enough I'd see if I couldn't buy myself a little old-fashioned comfort along that line. Think what it would mean to have a real home to go to on a howling winter night like this."

"Money," said Reddick; "get somebody to die and leave you a good, fat legacy, Mac."

Pinckney looked up from the train sheet to say, "That's a good idea. Got any rich relatives?"

Macdonald laughed and said, "No," and then corrected himself. "Yes, I have, too; a grand-aunt's a relative, isn't she?"

"Don't know; I never had one," Reddick replied; but Pinckney thought there could be no doubt about it.

"All right; if you're sure of that, I have one rich relative," said Macdonald. "My grandfather's sister

lives in Whittlesey, Canada. She has all the money there ever was in the family; but that's all the good it will ever do me."

Pinckney looked up again. "Whittlesey, you say? What is the lady's name?"

"Elvira Spurlock, spinster—at least, that's what she used to be; perhaps she's married now—I haven't kept up with my mother's side of the family. You're not going up-town then, Reddick?"

"Not yet; no."

"Well, I am; good night."

After he was gone the midnight silence in the dispatcher's office was unmarred save by the clicking of the sounders, the howling of the December wind and the irregular crashing of the night switching engine coupling cars in the freight yard. Reddick smoked his pipe reflectively for a few minutes, and when Pinckney closed his key and leaned back in his chair, the chief clerk began to villify the absent Macdonald.

"What a hypocrite Mac is," he said sententiously. "Talking poverty all the time when he's got over a thousand dollars in the bank this minute! If he should ever happen to strike it rich I believe he'd be the worst miser on top of the earth."

Pinckney shook his head. "You're off wrong there," he argued. "You take a fellow that saves his money by littles, as Mac does, and he's all right while he's doing it that way; but you give him a pot of it in a lump and see how quick it'll turn his head. If Mac's aunt should happen to remember him in her will, you'll see a spoiled Scotchman trying to buy experience by the carload."

"All the same, I don't believe it," asserted Reddick.

Just then Pinckney had to answer the wire, and while he was doing it, Reddick reached for the "Official Guide." As the dispatcher closed his key the chief clerk said: "Whittlesey's on the Great Eastern, isn't it?"

"Yes; I know the place well."

"That so? I forgot you were a Canuck. Do you happen to have an operator's roster in your kit?"

Pinckney found the list in the table drawer and gave it to Reddick.

The chief clerk ran down the list of names. "Here we are," he said; "John Whitcomb, night operator,

Great Eastern, Whittlesey.' I wonder what sort of a chap he is?"

"Jack Whitcomb?—one of the best fellows in the world. I had the night trick with him once in the commercial office in London. I didn't know he was at Whittlesey."

"Seems to be," said Reddick, adding thoughtfully: "Say, Pinck, reckon he'd do you a small favor if you'd ask him?"

"Of course he would; why?"

"I have a scheme; I'll tell you about it when I come back."

The passenger office was just across the corridor in the railroad building, and a little later Pinckney heard, in a lull in the telegraphic clatter, the clicking of a typewriter. When Reddick returned he handed the dispatcher a freshly written letter.

"How would that do for an experiment to prove or disprove your theory about sudden riches?" he asked.

Pinckney's solemn face relaxed in a sardonic grin as he read. "Umph! you'll get yourself badly disliked some fine day. But this won't do, you know; these people wouldn't write on a blank sheet of paper—they'd have a letterhead."

"All right; they shall have a letterhead."

Reddick disappeared again and when he came back the next time the clock on the wall was measuring off the second of the small hours.

"Think that'll pass muster?" he asked, tossing the sheet of paper across to the dispatcher.

"That's better," said Pinckney. "How did you do it?"

"With a pen and some India ink. You didn't know I'd been sent up once for forgery, did you?"

"No, but I think it's quite likely. You'll get us both killed in this deal, though, if Mac ever finds out."

"Never mind about that," said Reddick, yawning cavernously; "you go ahead and do your part, and I'll go hunt me a little sleep. Good night."

Fergus Macdonald, of the Macdonalds of Clanranald, was indebted to his father's fore-elders for two things besides his Scottish name and lineage. One was the Macdonald physique, the figure of a young giant with a handsome face, curly brown hair and honest blue eyes. The other was something more than one young man's fair share of Scottish caution.

It was the latter trait which made him a laggard in love. To himself, Macdonald stated the case thus: Miss Elbert was the division superintendent's daughter; her father's salary stood sponsor for all of the comforts and not a few of the luxuries of

life; therefore he, Fergus Macdonald, must wait until his savings would make Mellicent's future somewhat nearer akin to her present.

They had been acquainted a year, but Macdonald's courtship, tempered by thrift and hampered by an occupation which kept him at his office from four in the afternoon to midnight, seven days in the week, had been rather more formal than a young woman of Mellicent's temperament could approve. Moreover, there was Mr. Hugh Mancraft, whose evenings were his own, who called four times to Macdonald's once, and whose suit was warmly seconded by Mellicent's father.

It was upon the night of Reddick's experiment in typewriting and pen engrossing that the Macdonald possibilities first took definite shape in the mind of the division superintendent. Mancraft had taken Mellicent to the theater, and had again urged his—thus far—unsuccessful suit. As he left the house he met the superinten-

dent coming home from his club; and ten minutes later Mellicent was listening to a statement of the case from the parental point of view.

"Now why can't you be reasonable about this thing, Mellie?"—the argument concluded—"Mancraft is a good fellow, in a good line of business, and he can give you any kind of a social position you want."

"I know, papa," said Mellicent, tying nervous little knots in the fringe of her opera wrap as she talked, "but you forget that I don't love him."

"Love—nonsense! You are living in the wrong century to fall back on sentiment! This is an age of common sense, and you know you can't urge a single reasonable objection to Mancraft."

"No—only that."

The division superintendent leaned forward in his chair. "You are keeping something back, Mellie," he said; "there's some other fellow in the background. Who is it?—not Macdonald, I hope."

"I—like—Mr. Macdonald."

"Oho! that's it, is it?" The father's look of displeasure deepened into the judicial frown which made him a terror to erring trainmen called into the private office for reprimand. "Well, let me tell you: Mac is nothing but an operator, and he'll never be anything else on this division. You promised your mother before she died that you wouldn't marry without my consent, and I'll never consent to let you throw yourself away on a poor devil of an office man"—here the official habit asserted itself irresistibly, and he concluded: "Just take ten days to think about that, will you?"

Mellicent wanted to cry, but the familiar sentence of suspension saved her, and she caught eagerly at the reprieve. "It shall be as you say, papa," she said submissively; "I'll give Mr. Mancraft his answer—in ten days."

"Humph!" said the superintendent, getting up to go upstairs; "that'll be Christmas. Well, I guess Mancraft won't object to that much of a wait for his Christmas gift."

If Macdonald had been omniscient, it is fair to presume that he would have thrown his frugal scruples to the dogs; but knowing nothing of the Mancraft threat, the parental point of view, or the reprieve, he suffered nine of these precious days to make yesterdays of themselves unmarked save by his usual Sunday afternoon call upon Mellicent. On that occasion she did what a modest young woman may do toward smoothing the difficulties from the path of a reticent lover, and more than once during this visit Macdonald had to emphasize the contrast between her home surroundings and the modest figure of his savings bank account, before he could persuade himself that the time was not yet ripe for him to put his fate to the test.

It was on the morning of the tenth day—Christmas Eve—that this laggard in love, coming down to his late breakfast in Mrs. Jordan's select boarding house for single young men, found a Canadian letter on his plate. Mrs. Jordan, herself, came in with his coffee while he was reading the address, and, like an honest woman, she made instant confession and apology.

"I'm ever so sorry, Mr. Macdonald—the postman brought that letter four or five days ago, and I put it up here on the mantel and clean forgot it. I do hope there's no harm done."

It is doubtful if Macdonald heard a single word of Mrs. Jordan's explanation. He had opened the letter,

Pinckney went from indignation to pathos. "I didn't think you'd go back on an old partner like that, Mac"

and the first typewritten line made him forget that Mrs. Jordan was observing him and that his coffee was getting cold.

"Dear Mr. Macdonald," it began; "As attorneys for Elvira Spurlock, lately deceased, it was our mournful privilege to draw up her last will and testament. Although the terms of the document have not yet been made public, we are in a position to know that you are the principal legatee, and as such we hasten to offer you our hearty congratulations upon your good fortune. Owing to the absence of one of the executors, the reading of the will will be postponed for a few days; but as your presence will be necessary, you may rely upon us to give you due notice.

"In the meantime, in evidence of our good will toward one whom we hope to retain as our client, we authorize you to draw upon us for any sum you may need for your present requirements up to \$1,000, the advance to be repaid when we shall have the pleasure of turning over the major portion of the Spurlock estate to its future owner. Until then, believe us, dear sir,

"Your most obedient servants,
"Grimshaw & Flynt."

Some tokens of Macdonald's mingled emotions must have found their way into his face, since Mrs. Jordan hastened to ask: "No bad news, is it, Mr. Macdonald?"

"Oh, no; it's rather the other way, I believe," replied Macdonald, putting the letter into his pocket and trying to bring himself down to the commonplace necessity of eating his breakfast.

Mrs. Jordan went to a window and looped back the curtains so that he might have more light. As she looked out, a young man was passing on his way down town, the snow crunching merrily under his quick stride.

"There goes Mr. Elbert's future son-in-law," she remarked, coming back to replenish Macdonald's coffee cup.

"What Mr. Elbert?" asked the breakfaster absently.

"Why, *our* Mr. Elbert—the division superintendent. Didn't you know that his daughter Mellie was going to be married to Mr. Mancraft, the mining engineer?"

Now there is a definite limit to the number and nature of the surprises that a man may endure with becoming indifference, and Mrs. Jordan's bit of gossip wrecked Macdonald's equanimity instantaneously and hopelessly.

"What's that you say?" he gasped, pushing his plate back and staring wildly at his landlady.

Mrs. Jordan repeated the scrap of gossip.

"But it can't be!" Macdonald insisted. "I—excuse me, Mrs. Jordan—I believe I don't want any more breakfast"—and the closing of the front door behind him punctuated his apology.

Once in the street, his determination was quickly taken, and within the quarter-hour he had presented himself to the division superintendent who, though it was Christmas Eve and the beginning of the holidays for other people, was on duty in his office as usual.

"Oh, it's you, is it, Mac," said the official as Macdonald let himself into the private office and closed the door behind him; "you'll have to talk quick this morning; I'm going out on No. 43 to meet the Reynolds and Whitman excursion."

Macdonald's tongue clave to the roof of his mouth, but he was not the young man to look back after he had put his hand to the plow.

"It's about—about your daughter, Mr. Elbert," he stammered; "I love her, and I want your permission to ask her to be my wife."

The superintendent glanced at his watch. "Am I to infer from this that you haven't already asked her?" he inquired coldly.

"Yes; I came to you first because—"

Mr. Elbert waved him off impatiently. "There is no need of making any more talk about it; the matter can be settled in just one word—no!"

Macdonald was already pretty badly overwrought, and the curt negative set the hot blood of his Celtic ancestry to dancing uncivilized measures in his brain. Putting his broad shoulders against the door, he burst out passionately: "You shall hear what I've got to say if you miss twenty trains! I want to marry your daughter; I can give her a good name; I've saved up money enough to give us at least a modest start; and if that isn't enough—" taking the attorneys' letter from his pocket—"I can give her more. Read that!"

The superintendent glanced at the letter, impatiently at first, and then with awakening interest.

"Open that door and tell Burwell to have 43 held until I come down," he ordered; and when Macdonald had obeyed—"You're a hot-headed young fool, like all the rest of them, but I like your spirit. Now tell me all about this letter."

"There isn't much to tell," said Macdonald, whose wrath vanished with the provocation. "My grandfather disinherited my mother for marrying a Scotch gardener and left his property to his sister. It seems

now that she has tried to repair the injustice done to my mother."

"How much of a fortune is it?"

"I don't know that. Grandfather left something over twenty thousand pounds sterling in English securities; and there was a good bit of land in Canada and some houses."

Mr. Elbert was a man of quick decision, as a railroad man should be. Twenty thousand pounds, English money, meant something like one hundred thousand dollars, roughly speaking. Handing the letter back, he said, "I'm not more mercenary than I have to be, Mac, but you see how it is, yourself; I wouldn't be much of a father if I didn't keep a level head where Mellie's interests are involved. After all, though, it rests with her; but if you can get her consent, why—I guess you won't have any trouble with me. Now I must go—before I get 43 laid out on her meeting point."

At the door he thought of something else, and paused with his hand on the knob. "By the way, Mac, perhaps it would be as well for you to change off with Pinckney or Magoffin so that you could run up to the house tonight—and I'd go pretty middling early, if I were you."

Macdonald needed no urging, but it took the better part of the forenoon to arrange the desired change in his working hours. This was accomplished finally by his agreeing to work during the afternoon for one of the day men, who was to relieve Macdonald at seven, and who, in turn, was to be relieved at nine by Pinckney.

It was unquestionably the longest afternoon in Macdonald's life, and when it came to an end at seven o'clock, he could only make a pretense of eating the supper which Mrs. Jordan had kept warm for him. Running up to his room to change from his working clothes he met the twins Delay and Haste on the threshold, and it was after eight o'clock when he rang the bell at the superintendent's house. While waiting for the door to open he had a chill of apprehension superinduced by the sight of the lighted windows of the living room, presaging another and an earlier visitor; and the presentiment had its fulfilment when the servant led him past the living room door and into the little den at the back that Mr. Elbert used as a house office.

It was five measureless minutes before Mellicent joined him, and he saw at once that she had only come to excuse herself. There was no time for the commonplaces, and still less for subtle and progressive upleadings to the object of his visit.

"Mellie," he began, taking both of

her hands in his, "give me just one minute. I don't need to tell you that I love you—that's been saying itself for more than a year—but I've been an over-cautious fool. I've been given to understand that I had a meeting point to make here to-night; tell me in just one word—am I too late?"

The whispered answer was frank and unhesitating: "No; wait." And before he could put his joy into words she was gone.

"Wait? well I should say I would?" burred Macdonald, tramping up and down in the exuberance of his happiness. "I hope the other fellow will take his medicine easier than I could have taken mine. Man! but I can almost find it in my heart to be sorry for the poor devil!"

Nevertheless, Macdonald's patience was tested severely before he was permitted to mend the broken thread of his wooing. Mancraft was only human; and inasmuch as Mellicent left him to his own devices for a good quarter of an hour while she went up to her room to have it out with her emotions, he retaliated by killing time mercilessly after she returned.

Putting this and that together, what with the mining engineer's obstinate refusal to take anything less than an argumentative series of negatives for his final answer, it was after nine o'clock when Mellicent rejoined Macdonald. A little later, after the arrears of repressed affection had been given a hearing and coherence once more became possible, Mellicent remembered her promise and thought of her father and his inhibition.

"Oh, Fergus!" she exclaimed, "we can't go on and be Christmas happy, after all! Papa will never, never give his consent."

"Sure he will," Macdonald asserted cheerfully; "he has given it already—I asked him this morning."

"And you made him say yes, after he had told me—" she stopped in mid flight and left the sentence unfinished. "Tell me what you said to him."

It was Macdonald's turn to hesitate, and he floundered helplessly among the introductory phrases. "I told him he'd have to—that is, I gave him to understand—or rather, I should say, he wasn't going to—"

Mellicent laughed and clapped her hands softly. "Go on, Fergus, dear; you're doing beautifully."

"Oh, pshaw! I suppose I may as well tell the truth and be done with it. He said no, at first, and wasn't going to listen to me—he was just going away, you know—and then I

he stopped in deference to the wide-eyed astonishment of his listener, and suddenly remembered that as yet Mellicent knew nothing at all about the miraculous legacy.

"Why, bless my idiotic soul!" he exclaimed, "I haven't told you yet! Another day like this one has been would curdle what little brain I have left—here, read this letter and I'll explain afterwards."

Mellicent read Messrs. Grimshaw & Flynt's letter with kindling enthusiasm. At its conclusion she said fervently, "Oh, I'm so glad! Now you won't have to work nights any more, will you, Fergus dear?"

Macdonald smiled lovingly at her unselfish first thought. "That wasn't what I was thinking of," he said. "I'm glad because it makes it possible for me to give you all the little comforts and luxuries you've been used to; that is what I was saving for, and it's why I waited so—"

The clang of the front door bell interrupted him, and a sleepy servant came in with a telegram addressed to Mellicent. Macdonald watched her face as she read, and so was not wholly unprepared for her little gasp of dismay.

"What is it, Mellie?" he asked excitedly.

For answer she gave him the message, and he read it with a curious inversion of the senses which seemed to set him upon a pinnacle remotely apart from the commonplace realities. It was from the division superintendent and was incisive and curtly definite.

"Tell Macdonald his trick is discovered and send him about his business. Miss Elvira Spurlock is not dead. She is a passenger on this train."

Macdonald grappled with his sanity, won the fall, and gritted out as near an approach to profanity as present company permitted.

"What in the world does it mean, Fergus?" asked Mellicent, shading her eyes from the drop-light with the opened Grimshaw & Flynt letter.

"Mean?—there's only one thing it can mean. This whole miserable legacy business is a hoax, and your father thinks I'm a party to it!"

"You mustn't mind—he's angry now," pleaded Mellicent. Then: "Who could be mean enough to do such a thing to you?"—she glanced

"All aboard!" And the ringing of the engine bell decided him

got angry and put my back against the door, and told him he'd have to listen. He was good about it afterward, though; and when I told him about my savings, and about the fortune Aunt Elvira had left me—"

up at the eye-shading letter and caught her breath—"Fergus, would anybody in Canada be likely to use C. & G. R. letter paper?"

"What's that?—what do you mean?"

She got up and held the letter between his eyes and the drop light. The watermark in the paper stood out accusingly: "Colorado & Grand River Railway." There and then Macdonald recalled the midnight talk with Pinckney and Reddick.

"That tells the story!" he burst out savagely; "I know who did it, and I'm going to make them both wish they'd never been born. Where's my hat?"

Mellicent saw battle, murder and sudden death in prospect for somebody, and a pair of restraining arms went quickly about the battler's neck.

"You mustn't, Fergus dear!" she entreated. "Whoever did it couldn't know what was going to happen; and, besides"—she hid her face in his coat lapel—"you know, you were waiting, and—if it hadn't been for the letter—"

The most courageous affection could go no farther, and Macdonald's wrath dropped a few degrees below the murder point when he supplied the missing half of the suggestion.

"You're right, Mellie," he acknowledged, disengaging himself gently from the clinging arms, "and I won't quite kill either of them. But in justice to your father, I must go. Good night, dear; try hard to think me out of this ghastly scrape"—and he was gone before she could promise.

Notwithstanding his relenting admission, Macdonald was determined to have it out with Pinckney and Reddick before he slept; and while he was on his way down town, breasting a Christmas storm which was threatening to grow into a Christmas blizzard, a dramatic little scene came upon the stage in the dispatcher's office. Pinckney had relieved the substituting day man, and had settled down to his night's work at the key, when Reddick rushed in with a Western Union telegram which he was waving like a flag of distress.

"Great murder, man! Read that, will you?" he exclaimed, dropping into a chair.

Pinckney read the message, which was dated from the incoming Reynolds and Whitman excursion train.

"Miss Elvira Spurlock, of my party on special wants Fergus Macdonald to meet her on arrival of excursion train in morning. Find and notify him quick."

"J. M. JOHNSON."

"Who is Johnson?" Pinckney asked.

"Passenger man from Boston in charge of the excursion. What on top of earth do you suppose brings that old woman out here right in the middle of things?"

Pinckney had the answer to that question in his pocket. In asking the Whittlesey operator to mail Messrs. Grimshaw & Flynt's letter to Macdonald, he could not refrain from telling the joke. Whitcomb had thoughtlessly repeated it, and he wrote in some contrition to say that he was afraid the story had got around to Miss Spurlock in some way; that she had been making inquiries and had taken a ticket for the Boston-California excursion. For prudential reasons, however, Pinckney ignored Reddick's query and asked:

"Do you suppose Mac's got his legacy letter yet?"

"Got it? I should say he had! I met Burwell a little while ago, and he says Mac had a row with Mr. Elbert this morning about Mellie—scored the 'Old Man' up one hill and down the other, and ended by shoving that fool letter under his nose!"

Pinckney came out of his indifference with a bound.

"That's pretty serious, Reddick. That's why Mac wanted to get off tonight. Did you know there was anything between him and Mellie Elbert?"

"Yes; but I didn't suppose he'd go and make a full-blown idiot of himself before he'd taken time to find out."

"You might have known he would, when there was a girl in the case. Oh, you're in for it good and plenty. The 'Old Man's' on the train, and he's probably talked with the passenger agent. That means a red-hot message to his daughter, or to Mac, or to both of them. Reddick, if I were you, I'd get out of town for a day or so; I sure would, if I had to walk."

"I? What's the matter with *you*? By gollies, you're as deep in the mud as I am in the mire!"

"Mac won't think so; and besides, one scapegoat's a-plenty—what was that?"

A door slammed at the foot of the stair and a quick step echoed in the corridor.

"Here he comes now," said the dispatcher coolly; "if you care to keep your skin whole you'd better get out of here."

The advice was good, but there was only one door to the room. Hence, Reddick did what was possible; diving into a cupboard under the copying press a scant half-second before Macdonald came in, stamping his feet and shaking the snow from his ulster. Pinckney looked up,

nodded, and took his cue from the out-thrust Scottish jaw and the flashing eyes.

"Where's Reddick?" Macdonald demanded.

"Don't know; he was in here a while ago, but he went out again"—the dispatcher on duty found it convenient to be very busy over the day man's transfer notes.

Macdonald tossed an open letter upon the train table.

"I want to know which one of you fellows wrote that!"

Pinckney read the letter with well-simulated interest.

"What makes you think either of us wrote it?" he asked mildly.

"I don't think—I know!" Macdonald held the sheet up to the electric light: "See that water mark? You do, don't you? Well, this letter has cost me my job and something more, and I'm going to punch somebody's head. Shall I begin on you?"

Pinckney had a just regard for the righteous anger of a normally good-tempered young giant, and he temporized.

"Don't be a fool, Mac," he said, with a fine assumption of virtuous indignation; "I'm no school boy. If that letter is a fake, you know well enough who wrote it."

"Reddick, you mean?"

"Naturally; he's the only man in the outfit with a pin-head brain. Besides, I remember his asking me something about Whittlesey that night after you told us about your aunt."

"He did, eh?" Macdonald spoke doubtfully; "I more than half believe you're trying to lie yourself out of a licking."

Pinckney went from indignation to pathos. "I didn't think you'd go back on an old partner like that, Mac; it's rough, especially when the thing is as plain as the nose on your face. Let me show you—here is a passenger department letter written by that chuckle-headed dwarf of a chief clerk today; just look at it and see if the typewriting isn't the same."

"You're right," Macdonald admitted, comparing the letters; "I take it all back, old man, but I've had grief enough today to rattle anybody, and all on account of that idiotic letter. Pinckney," he went on, his wrath rising again at the summing-up review of his misfortunes, "you tell Reddick to keep out of my way. If I get my hands on him before I've had time to cool off, there'll be a murder."

He let himself out through the gate in the counter railing, but Pinckney called him back to give him Passenger Agent Johnson's telegram. Macdonald read it with a snort of antago-

nism. "Meet her at the train?—I'll do nothing of the sort!" he grated, crumpling the square of yellow paper into a wad and flinging it into the waste basket on his way to the door.

When Macdonald was gone, the cupboard under the letter press yawned, and a dusty, cobwebbed harlequin bounded into the circle of light to dance around Pinckney's table, shaking its fists and rolling its eyes.

"Oh, you double-dyed hypocrite!—you smooth-faced, lantern-jawed foreigner! Chuckle-headed dwarf, am I?—with a pin-head brain? You just wait, will you? Maybe I won't make you wish you'd been born deaf, dumb and blind, before I get through with you!"

Reddick vanished, breathing out threatenings, and when the door closed behind him, an opportune call for a train order saved Pinckney from the collapse which might otherwise have followed his bad quarter of an hour.

When Macdonald awoke on the crisp Christmas morning, his angry determination to ignore his grand-aunt's request had lost some of its vehemence. He was obliged to confess that she was in no wise to blame for his misfortunes; and since kinship has its undeniable demands, he could scarcely do less than she had asked. Accordingly, he met the excursion special upon its arrival and sought out the passenger agent, Johnson, who was too busy at the moment to answer his question. When the time served, Miss Spurlock was not to be found; but a flagman enlightened the inquirers.

"The little old English woman, you mean? Yes, she was in this car; Mr. Elbert's been looking after her—reckon she must be one of the English stockholders in the road, isn't she?"

"Did they go away together?" asked Macdonald.

"That's what they did; made a bee line for the cab stand the minute the train pulled in."

It was the final drop of bitterness in Macdonald's brimming cup. His affair was the common ground upon which these two people, his grand-aunt and the division superintendent, had met; the assumption of his raciality was doubtless the theme upon which each had enlarged during their short acquaintance. And now they had gone to Mellicent!

When an optimistic young man of normally cheerful habit begins to give ground to an attack of the blue devils, his retreat is apt to become a rout. Looking back upon his performances of the exciting Christmas Eve, Macdonald accused himself wrathfully of

having given place to childish credulity and unreasoning impulse; and the affront to his self-respect was now simply insupportable. Clearly, there remained but one thing for him to do—to obliterate himself at once and unobtrusively. A westbound train, ready to depart, offered the means. He could telegraph his resignation from some way station, and could send for his belongings when he had settled upon his destination. The conductor's "All aboard!" and the ringing of the engine bell decided him; and he swung up to the step of the last car as No. 5 steamed out of the station.

An hour later, when Reddick went to the division superintendent's office to arrange for the future movements of the excursion train, Chief Clerk Burwell handed him a telegram. It was addressed to Mr. Elbert, and it was Macdonald's resignation. Reddick turned a bit pale, but he did not shirk his responsibility. Obtaining permission to deliver the message in person, he made a Christmas morning trip to the residence suburb on Wolcott Hill, and was closeted with the division superintendent for a rather humiliating quarter of an hour. When he left the house he was the bearer of a telegram which reached Macdonald at noon. The message read:

"TO FERGUS MACDONALD,

"Care Conductor Train 5.

"Don't make a fool of yourself.

Double back on Six and come to the house to eat Christmas dinner with us. Your aunt wants to see you.

"R. A. ELBERT."

Macdonald read it twice and then emphasized his decision by tearing it into bits. It was too late to return now, he told himself; and he determined to think no more of it, at least not until after the train had passed its meeting point with No. 6. That time was an hour away, however, and many resolutions may be made and broken in sixty minutes. Before the interval was half spent, Macdonald found himself fighting a losing battle with an irresistible desire to go back to Mellicent at whatever sacrifice of pride or self-esteem.

The crisis came when the operator at Jornado handed two telegrams to the runaway as the train pulled in beside No. 6. The first was a telegraphic return pass; the second was less formal:

"Come back and take it out on me. I have owned up and squared you with everybody.

"REDDICK."

No. 6 was a bit behind time that evening, and it was rather late for dinner when Macdonald rang the bell at the house on Wolcott Hill. It was Mellicent who opened the door, and she scolded him tearfully for running away.

"There wasn't anything else to do—this morning," he said humbly, "I was down and out." Then: "Mellie, dear, give me my cue quick, before we go in; what am I to say or do?"

"Anything you like; the murder's out—papa and your aunt have fixed it all up between them, somehow, and you're to have your Christmas legacy after all. The dear little old lady has been trying to find you for years, and it was that letter that finally gave her the clew; it seems that the joke was too good to keep, and Mr. Pinckney wrote the operator at Whittlesey all about it."

Macdonald grinned exultantly.

"Makes you think of that saying in the Bible, 'All things work together for good to them that love the Lord'. Or of that riddle of Old Man Samson's, 'Out of the eater came forth meat.' All right; let's brace up and go face the music. I don't care much what happens so long as we have each other."

They were married a few weeks later, and Reddick, who did many things well, was Macdonald's best man. Mac is now—or was at last accounts—chief dispatcher on the Grand River Extension. Having been his guest, I can testify to the coziness of his home in the wind-swept valley at Mountain Junction; and it was there—when I had risen to examine a typewritten letter framed and hanging over the fireplace—that he told me the story of his Christmas Legacy.

War-Time Rise in Passenger Fares

According to the most recent estimate of the Bureau of Railway Economics, the total advance in passenger fares on the railroads of the United States since the outbreak of the World War has been 47 per cent. The British Board of Trade is authority for the following estimates of the increases in nine foreign Countries:

Austria, 290 per cent.
Belgium, 100 per cent.
Canada, 60 per cent.
France, 70 to 80 per cent.
Norway, 60 to 180 per cent.
Russia, 1400 per cent.
Sweden, 100 to 200 per cent.
Switzerland, 100 per cent.
United Kingdom, 75 per cent.

J. T. BRODERICK, Superintendent

Charleston Division Wins Richly Deserved Victory in No-Accident Campaign

Ohio Division First on Western Lines Tie Treating Plant First, Police Department Second Among Departments

THE man who said that "Enthusiasm is the power that keeps the wheels of progress moving," must have learned his lesson on our Charleston Division. For if ever employes on the Railroad were keyed up to the limit of "pep,"

determination and drive, our friends in the West Virginia hills were during the 30-day No-Accident Campaign ending November 16. And they richly deserved to win the Pennant and Banquet on the Eastern Lines, and the honor of leading the

System. Their margin of victory was a big one, as the figures on the opposite page show, good proof that they left little undone that would bring them home in the lead.

Miss Margaret Talbott Stevens, associate editor of the MAGAZINE,

*Congratulatory Letter of Vice-President Galloway to Superintendent Trapnell of the Winning Charleston Division

December 6, 1920.

Dear Mr. Trapnell:

The No-Accident Campaign on the Baltimore and Ohio System, which began October 18th, and continued for 30 days, was concluded November 16th.

The Charleston Division, I find from reports submitted, has won the championship of the Eastern Lines, having made:

Increase in thousand gross ton miles per accident of 755%

Reduction in train accidents of 90%

and a

Reduction in casualties to employes of 75% compared with the record it made during the same period last year.

The results which you have accomplished on your division prove that we can reduce accidents when we enter into the work with a pronounced determination and earnest effort. The winning spirit with which you inspired your men could not fail of its purpose, and I am sure that you feel amply rewarded for the efforts put forth to insure this splendid victory.

The championship pennant for the Eastern Lines has been forwarded you today as a reward for the victory which your division has so well earned. It will serve, I hope, to encourage you, your officers and employes to accomplish even better results in the future.

The Tie Treating Plant at Green Spring has won the championship among the departments who competed on the basis of man hours worked, having made an increase of 230 per cent. in man hours worked per injury. They are therefore entitled to send 15 of their representatives to participate in the banquet to be given your division.

When you have the banquet, if my engagements will permit, I shall be glad to be with you.

The record which the Charleston Division has made is indeed most commendable, and one of which you and the entire personnel of the division may well be proud. I congratulate you heartily on the splendid showing you have made during the campaign.

Yours very truly,

Mr. W. Trapnell,
Superintendent,
Weston, W. Va.

C. H. Galloway

*NOTE—Similar letters were sent by Vice-President Galloway to Superintendent Brown of the Ohio Division, Pennant Winner of the Western Lines, and to Superintendent of Timber Preservation Angier, and General Superintendent of Police Denton, for the splendid records made by their departments as shown in the accompanying table.

has written one of her characteristic and interesting "Aunt Mary" stories on how they did it. It begins on page 41 of this issue and is a mighty good description of how team work can be inspired among a large body of men and beat all comers. Read it.

Among the other divisions, Ohio won second place on the System, and, in leading the divisions on the Western Lines, won the Pennant and Banquet for its territory. The Ohio Division boys showed during the baseball race that they had the stuff that winners are made of, and they now have two fine victories to their credit over their rivals in the West.

The Tie Treating Plant won first, and the Police Department second place among the Departments. All credit to them and to the other departments and divisions that made good showings.

There is little more to be said about the contest. The figures speak for themselves, and the congratulatory letters from Vice-President Galloway, copy of which appears on the preceding page, attest the sincere appreciation of the management.

We hope that another contest will be held next year. They are splen-

did tonics, fine incentives to enthusiasm and team work in every phase of railroad work. And each one that is held saves much suffering and sorrow, the elimination of which justi-

fies all the efforts put forward during the campaign.

We hope to publish the results of the Essay Contest, concluded December 1, in our January MAGAZINE.

Stop, Look and Listen When Going on Track— One in Every Three Killed is Struck by Moving Train

THE number of employes who were struck by moving trains and killed on the Baltimore and Ohio in the ten months of 1920 up to November 1 was 37.

That was 35 per cent. of the entire number who met death in that period.

Surely this should be a potent warning to our employes to watch out for their welfare when they have occasion to be on the tracks.

In these ten months there were 106 employes killed in all ways. This means that an average of more than ten met death each month. Nearly four of these ten met death by being struck by trains.

Here's food for thought. None of us is ignorant of the dangers that exist where trains are constantly

passing. Few of us are not acquainted with some one or more of the men who were swept from the world since this year began.

Their fate should drive home to us the necessity of stopping, looking and listening before we step upon the tracks.

It means only about three seconds of time to glance in both directions and to listen well and be assured that no trains are approaching before we step upon the rails.

Yet it may mean eternity in another world if we fail to observe the necessary precautions.

Duties assigned many of our men require that they be almost constantly passing over tracks, but there is no officer who would think of reprimanding an employe who used up a little time stopping, looking and listening before he puts his foot upon a track. There are others who only occasionally are required to cross over tracks. They likewise should use every precaution to assure themselves that it is safe.

But the odd thing about it is that the death rate from being struck by trains is higher among those constantly around the yards and terminals than among those who only infrequently cross the tracks.

Perhaps "familiarity breeds contempt."

Only recently one brakeman was killed and one severely injured when they sat upon the rail and chatted about their affairs. A passenger train came along and struck them.

We can with difficulty conceive why men should sit upon the rail when there are so many other places where they might rest in security. It surely was not comfort which caused them to choose the rail for a seat. It is difficult to imagine a more uncomfortable seat than a steel rail. Included in the 37 employes killed in the ten months of this year are a number who used the rails for a seat.

The second highest number of deaths came from employes falling under trains; that is, 17 of the 106 killed. That is just about 17 per cent.

In the next few months let us concentrate on the endeavor to stop

Summary and Explanation of Results of "No-Accident" Campaign, October 18 to November 16, 1920

BALTIMORE, MD., December 1, 1920.

MR. GALLOWAY:

The outstanding features of the attached statement, giving results of the No-Accident Campaign, are the following:

	PER CENT.
Increase in number of employes, System, 1920, compared with 1919 . .	20
Increase in casualties to employes—Eastern Lines	11
Decrease in casualties to employes—Western Lines	33
Decrease in casualties to employes—System	7
Increase in 1000 employes per casualty—Western Lines	81
Increase in 1000 employes per casualty—System	29
Increase in 1000 gross ton miles per accident—Eastern Lines	18
Increase in 1000 gross ton miles per accident—Western Lines	78
Increase in man hours worked per accident in special departments (not included in divisions)	21

We handled during the 30 days of the campaign this year, 3,598,882,000 gross ton miles, compared with 3,184,469,000 gross ton miles last year, an increase of 414,413,000 gross ton miles.

You will recall that from October 18 to 31, 1919, we were engaged in the National Railroad Accident Prevention Drive, during which time we reduced our accidents to a minimum never before attained. We continued the drive until December 31 and again made a good record. All our figures for the campaign of 1920 have the results of the National Drive as a basis of comparison. The latter was not a normal period, yet, with this handicap, our figures on the System this present year show that we made a—

	PER CENT.
Decrease in train accidents of	23
Decrease in casualties to employes of	7
Decrease in all accidents of	15

J. T. BRODERICK,
Superintendent, Safety Department.

Copies to Messrs. Ennes, Begien, Voorhees.

fatal accidents from these two sources and our death list will be cut to a low average. Look over the accompanying list of fatalities in the first ten months of this year and last and learn how our fellow employes met death:

	1920	1919
Burned.....	2	1
Boiler explosion.....	3	0
Caught in belt.....	1	0
Crushed between cars.....	8	4
Crushed by falling ice.....	1	0
Crushed by electric crane.....	1	0
Collision.....	3	3
Derailment—train.....	3	4
Derailment—motor car.....	1	2
Drowned in stream.....	3	2
Drowned in ashpit.....	0	3
Electrocuted.....	1	0
Fell from train.....	9	5
Fell under train.....	17	7
Fell from ladder.....	1	0

They Can't Forget Safety at Grafton Tank and Carpenter Shop

ONE of the real novelties of the No-Accident Campaign, which closed November 16 last, was a combination electric light flash and bell signal installed in the tank and carpenter shop at Grafton, W. Va. It is believed that this ever-present warning against unsafe practices did much to place the Monongah Division among the leaders.

With the approval and hearty cooperation of W. B. Porterfield, master mechanic, H. L. Miller, foreman of the tank shop, installed the device the opening days of the campaign and its utility has proved so great that it will probably be kept in place continuously. No man who entered or left the shop, and hundreds passed through the portals daily, could fail to note that something unusual was going on. Safety requires constant reminders and the device of Mr. Miller surely provided the reminders.

As one entered the shop he necessarily had to step upon a slightly raised platform. This caused a light to flash behind a glass transparency upon which was written the following:

No-Accident Campaign
October 18 to November 16
This Department Wants To Be 100%

Two large bells connected by electric wires with the sign immediately began to ring and anyone forgetting Safety for the nonce was involuntarily compelled to recall it. Passing under the sign, the pedestrian next was compelled to step upon a second platform. Again the light flashed on, again the bell rang out loudly and, glancing up at the reverse side of the sign, the passer-by read this slogan:

**We Can Be 100% If
We Practise
Safety Always**

And the recompense that came to Mr. Porterfield and Mr. Miller for

their ingenuity and efforts was a pretty clean record for the entire Grafton shops during the campaign. The big force of men there certainly did not do anything to prevent Superintendent Holverstott from getting a record comparable with the one made the previous year.

Copies of May and June Issues Wanted

The office of the Baltimore and Ohio Magazine, Mount Royal Station, Baltimore, needs copies of the May and June, 1920, issues. If any of these are available, please send promptly to the Magazine office.

Baltimore and Ohio Team Work Has Made a Big Dent in Loss and Damage This Year—Intensified Team Work Will Do Even Better for 1921

DURING the year 1919 the adjustment of Loss and Damage to freight cost Class 1 railroads \$106,800,000, an increase of nearly 100 per cent. as compared with the \$55,200,000 for 1918. This year we of the Baltimore and Ohio will show a marked reduction in claim payments as compared with 1919, because of our active Claim Prevention Campaign and the fine cooperation of our employees. For the nine months ended September 30, 1920, our Loss and Damage claim payments amounted to \$2,783,000, a reduction of \$546,539 as compared with the same period for 1919.

We hope for a reduction of 50 per cent. in our Loss and Damage claim payments for 1921 over 1920, and we are sure that this can be done with an intensifying of the cooperation which we have had from our employees during 1920. If we observe the rules, tariffs and classification requirements as issued—if we profit by past errors, which have been clearly pointed out as specific illustrations of what failing to follow the instructions is costing the Company—and if the attention and interest of agents, receiving clerks and others is directed to the following, there will be no question of our reaching the desired goal.

PLEASE SEE THAT—

Shipments tendered for transportation are securely crated and plainly marked in accordance with Consolidated Classification No. 1 and supplements thereto. Otherwise, they should not be accepted for transportation.

We receive all the items called for by the Bill of Lading or Shipping Order and the marks on the containers agree with those on the Bill of Lading before signing.

Cars in which high class merchandise is loaded are suitable for the commodity; that the freight is properly loaded, stowed and braced in car to reach destination in good order, and that cars are securely sealed before leaving stations.

Set-back cars are properly stowed to prevent damage by switching.

An accurate check is made at stations of all shipments unloaded; that consignees are promptly notified as to arrival of freight and prompt delivery effected. The liberal use of the telephone will aid in clearing out the freight for the handling of current business and preventing congestion.

You receive a receipt for all freight delivered; this includes C. L. as well as L. C. L. Also that these receipts are properly filed in your office for reference in case occasion requires same.

Freight arriving at your station without revenue billin and marked for some other point is promptly forwarded to that point on Astray Waybill and notation is made on the Astray Waybill, "Only deliver upon surrender of original bill of lading or other proof of ownership."

When freight arrives at station without revenue billing and is marked for same, marked consignee is notified that shipment is on hand and requested to surrender the original bill of lading or other proof of ownership, before delivery is effected; and when furnished that the necessary charges are collected to protect the Company's revenue; and that sufficient data is obtained to enable revenue billing to be located and connected with the Astray billing to complete record.

Many of our agents are cooperating in our Prevention Campaign by calling the attention of other agents to irregularities noticed in freight handling, such as improper containers, improper marks, improper stowing, etc. We should always courteously speak to the other fellow about his shortcomings so that he will eventually get in line and do his share in accomplishing the desired result.

A Freight Claim Prevention Congress was held by the Freight Claim Division of the American Railway Association at the Hotel La Salle, Chicago, Ill., November 15-16, 1920, under the auspices of the Cause and Prevention Committee; the objects of this congress were:

Promotion of Freight Claim Prevention Efforts on Inactive Lines.

Increase in Effectiveness of Freight Claim Prevention Efforts on Active Lines.

Coordination of Efforts of Individual Lines into a General Claim Prevention Movement.

The attendance at this congress consisted of 285 representatives of carriers in the United States, Canada and Mexico, members of the American Railway Association. The meeting was a success and all phases of prevention of Loss and Damage to Freight were discussed, and it was the opinion of those present that the congress had accomplished its aim by enlightening the inactive lines as to the necessity of claim prevention, and at the same time spurring on the lines who were active in Claim Prevention to greater efforts.

At this congress the following slogan was unanimously adopted:

"Cut Loss and Damage to Freight 50 per cent. in 1921. It Can be Done."

Are you with us in reducing our loss and damage claim payments 50 per cent. in the year 1921?

Yours for Cooperation in Prevention,

C. C. GLESSNER,

General Freight Claim Agent.

C. E. Catt,
Division accountant, Ohio River Division

Promotions

Lee Warren Fowler was recently promoted to accountant, headquarters at Mt. Clare Shops, Baltimore.

Mr. Fowler entered the Baltimore and Ohio service on July 7, 1903, at the age of 22, in the capacity of stenographer, and has been advanced successively to the positions of time-keeper, assistant shop clerk, shop clerk, chief clerk to district superintendent motive power, assistant chief clerk to the general superintendent motive power, inspector of accounts and accountant. During a part of the

G. B. Spencer,
Division accountant, Toledo Division

period of Federal control Mr. Fowler was engaged with the United States Railroad Administration at Washington in the capacity of chief clerk, car section.

Harry Thomas Beck was recently promoted to chief clerk to the assistant auditor disbursements.

Mr. Beck entered the Baltimore and Ohio service on April 27, 1908, at the age of 18, in the capacity of clerk, and has been advanced successively to the positions of assistant shop clerk, shop clerk, accountant and chief clerk to the assistant auditor disbursements.

George B. Spencer was recently promoted to division accountant, Toledo Division, headquarters Dayton, Ohio. Mr. Spencer entered Baltimore and Ohio service on November 1, 1894, at the age of 15, as office boy, and has been successively promoted to the positions of file clerk, time clerk, transportation time-keeper and division accountant.

Clyde E. Catt was recently promoted to division accountant, Ohio River Division, headquarters Parkersburg, W. Va. Mr. Catt entered Baltimore and Ohio service on July 13, 1905, at the age of 18, in the capacity of file clerk, and has been advanced successively to the positions of stenographer to trainmaster, clerk to chief train dispatcher, clerk to trainmaster, transportation time-keeper, chief clerk to division accountant, and division accountant.

Fine Uniform Material at Low Prices

THE Navy Department has on hand a limited quantity of very fine Navy dark blue cloth, Melton and Kersey finish, in 18 oz. and 30 oz. weights. The sale price per yard is \$6.00 for the 30 oz. cloth and \$5.25 for the 18 oz. cloth. In quantity purchases amounting to \$250 or more this price is reduced to \$3.80 per yard for the 30 oz. cloth and \$3.23 per yard for the 18 oz. cloth. The heavy cloth makes a wonderful overcoat and the lighter cloth an equally good uniform. This cloth is absolutely all wool and of fast dye, 54" wide, double width, 50 yards to the bolt. The prices are f. o. b. Great Lakes, Ill. Samples of this cloth may be obtained by writing to the Senior Member Board of Sale, Naval Training Station, Great Lakes, Illinois (Department R).

In addition to the cloth the Navy also has an excess stock of all wool

L. W. Fowler, accountant, Mt. Clare

dark grey blankets weighing $4\frac{1}{2}$ pounds each. They are 84" long by 67" wide and the price by the blanket is \$8.23 each. In quantity purchases of \$250 worth of blankets a special price of \$6.27 is secured.

It is suggested that men combine their orders to secure cloth or blankets at the most unusual prices quoted above. Any information desired may be obtained from Lieutenant Commander N. B. Farwell (SC), U. S. N., Senior Member Board of Survey, Appraisal and Sale (Department R), Naval Training Station, Great Lakes, Illinois.

H. T. Beck,
Chief clerk to assistant auditor disbursements

Assured that our readers will welcome advice and suggestions on the all-important problem of health preservation and life extension, based on the latest advances in medical science, it will be the purpose of this section of the MAGAZINE to present brief and instructive articles each month by members of the medical staff of the Relief Department. We know our efforts will appeal to our readers. If only a few profit by the advice offered, our contribution to the sum of human happiness will be considerable, and our service of value. The addition of one, five or fifteen years to a life is well worth the task.

Headaches

By Dr. C. W. Pence

Medical Examiner, Philadelphia, Pa.

HOW often, in greeting some friend or acquaintance and inquiring about his health, have you received the reply, "Feeling fair, thank you, excepting for a headache." Thus follows the practice of referring to the headache as a special disease.

A headache is a symptom and not a disease; it is Nature's warning of some disarrangement in the human machine.

Most headaches are of functional* or reflex origin—merely a temporary condition which is relieved when the cause is removed. Others, being more persistent in their association with the individual, are due to organic* disturbances of a prominent or obscure nature, and it is in such cases that the headache is as serviceable a danger signal to the physician in getting at the cause as the red target is to a locomotive engineer.

In the functional or reflex headache a common cause is overeating. By taking more food into the stomach than can be digested, fermentation occurs, and the detention of by-products in the stomach which would normally be thrown off through the skin, kidneys and bowels, causes a change in the quality of the blood, impairs the nourishment of the brain, and produces headache. Other causes are over-indulgence in tobacco, foreign bodies in the eyes, colds, nasal catarrh, bad teeth, neuralgia, excessive heat, and eye strain from improper focusing of the eyes, which may

be corrected by proper glasses. Constipation is the most frequent cause of headache, and a correction of irregular habits will afford permanent relief. Loss of sleep, nervous excitement such as fright and hysteria, are

contributing causes producing headache, which will be relieved upon removal of the cause. Among the functional and reflex headaches, there was one due to over-indulgence in alcoholic drink, which contributing cause has to a great degree been eliminated by Mr. Volstead and the Anti-Saloon League.

Among the organic causes of headache are those due to high blood pressure, hardening of the arteries, changes in the circulatory system and organic changes in the kidneys. As headache is often a diagnostic symptom in these instances, the individual should be properly looked after by his family physician.

Headache is also one of the prominent diagnostic symptoms in typhoid fever.

Nearly all headaches may be relieved by removing the cause and correcting irregular habits. Play "Safety First," and beware of the many so-called headache remedies widely advertised and sold, as their indiscriminate use frequently results fatally.

Smith, William T.....	Air Inspector.....	M. P.....	Philadelphia....	October 14, 1920	48

* Exact date of death not known.

*Organic disease—one in which an organ of the body is defective: functional disease—one in which the mechanism of the organ is perfect but its action is disturbed. Illustration—in organic heart disease the valves or heart walls are defective; in functional heart disease, the mechanism is perfect, but its action interfered with, this interference being caused possibly from indigestion, use of tobacco, &c.

Agents Please Note How Railroad is Cooperating With Farmers

THE County Farm Bureaus and Agricultural Agents in a number of regions through which the Baltimore and Ohio Railroad passes are engaged in an educational campaign to induce farmers to use lime and fertilizer more freely. The State of Pennsylvania in particular has issued a bulletin on the lime requirement of Pennsylvania soils, and this bulletin is to be used in connection with the campaign in that state.

Realizing the importance of this measure, the Commercial Development Department has made arrangements to lease to farmers for the storage of agricultural lime, small tracts of land adjacent to the Railroad's team tracks or other sidings at the various stations where ground is available. A lease of this kind will be made at a nominal rental, and will permit the farmer to obtain lime without paying demurrage charges resulting from his inability to haul

the lime immediately upon delivery. This has often been a serious obstacle in the past because the roads were frequently impassable at the time shipments reached their destinations.

Agents may assist in the work materially by circulating this information among the farmers and Farm Bureaus in their vicinities. Applications for leases of land for this purpose should be made to the Industrial Agent of the territory concerned, or directly to H. O. Hartzell, Manager Commercial Development, at Baltimore.

Overheard at the Medical Quiz

Prof. Sapio: Dr. Wilson, is consumption or pulmonary tuberculosis an incurable disease?

Dr. Wilson: No, sir! It is now known that practically all persons are attacked some time during life by the tubercular germ.

Prof. S.: Has a curative medicine ever been discovered?

Dr. W.: No, sir! A cure can only be effected through fresh air, proper food, rest and peace of mind.

Prof. S.: Can this treatment be practiced at home?

Dr. W.: Yes! If the individual does not reside in the thickly settled part of a large city; the treatment is commenced early; and he is under the constant care of a physician.

Prof. S.: Precisely, and for this reason a course in a sanitarium located in the mountainous region is much to be preferred.

Here is Real Loyalty

THE Pittsburgh Division Honor notes of this issue say:

"At 9.15 a. m., on June 20, extra east engines 1271 and 1253, in charge of Conductor G. G. Wise and Engineers C. C. Page and J. F. Carr, just west of west end of passing siding at Elk City, derailed four cars: a box car loaded with ties, a car of lath, and two other loads. Conductor Wise reported from Knox that they could pole the car of lath (the box car of ties had cleared itself) and derail the other loads in several hours without the necessity of running the tool train. These men had been called for 2.30 a. m. at Foxburg to make a Clanton Junction turn, therefore, they had only taken a small lunch, which they ate soon after making the start. They had had no breakfast when they began wrecking and they did not stop for dinner, but stuck to the job until the track was cleared for the train to move and they got into Foxburg at 6.10 p. m. in time for supper. Such loyalty and interest in behalf of the Company is highly appreciated. Conductor Wise and the rest of the crew, consisting of Brakemen J. F. McKathorn and G. B. Edinger, Engineer J. F. Carr, Fireman H. C. Dunkle and Engineer C. C. Page, are heartily commended."

This note has been picked from the many others appearing in this issue as best showing the finest kind of Baltimore and Ohio spirit and loyalty. The sacrifice made by these men meant a good deal to the Company. That it will always stand them in good stead is as true as is the character of loyalty itself.

—
Carol

By F. C. McCaghey

Carol along, beautiful song,
O Christmas, O Christmas!
Fill the great throng, spirit of song,
O Christmas, O Christmas!
Sing through the wold sweet stories
old—

His power extolled,
All sin controlled—
Garnish His fold, radiant with gold,
O Christmas, O Christmas!

Statement of Actual Average Miles Per Car Per Day (Including Bad Order Cars)

"The business of a railroad is to furnish Transportation, in brief, to move cars. In moving cars efficiently, ordinarily other operating problems will be solved at the same time. It is, therefore, natural to expect that local officials will concentrate their attention on the elimination of delays to cars and devote such time as may be necessary to this end.

Yards are designed for the express purpose of forwarding cars, and not for use as places to store them; cars are built for the purpose of moving freight, and should not be used as warehouses to store freight in. Let each and everyone of us keep this before us at all times in our endeavor to secure a maximum car mileage."

Christmas

Next to the story of Salvation unfolded by the life of the Babe of Bethlehem, the greatest significance of Christmas is in the opportunity it offers us to rededicate our lives to unselfish endeavor. This year in particular, it behooves us Americans, who have been singularly blessed among the other peoples of the earth, to consider our less fortunate brothers. To remember:

The millions of children in foreign countries who, without our succor, will starve this winter.

The typhus and other disease-ridden peoples who need American doctors, nurses, food and medical supplies.

The thousands of service and ex-service men among us who need our help and sympathy.

The manifold needs expressed in the work of the Red Cross and similar organizations, our local hospital campaigns and the other demands for help which crowd upon us.

Friends and fellow workers of the Railroad, may Christmas kindle in our hearts the spirit of helpfulness, the willingness to give. May we remember the sick, the crippled, the hungry—those unfortunates whom it was the special pleasure of the Master to serve. And when the many appeals for help come to us during the coming year, let us not turn deaf ears, nor measure our gifts by those of our neighbors, but let us give, give, give, until the suffering and sorrow caused by the World War shall have been permanently alleviated. It is only thus that we can put into our lives the best that Christmas offers.

I know a woman in the sunset years of life who could not realize two hundred dollars on all the possessions she has in the world. She has given everything—health, wealth and strength—to those she loves, and now lives in the modest home of a relative, helpful and comforting to those about her. She has never been appreciated at her full worth, yet not a suggestion of sourness has crept in. Each day sees her cheerful, uncomplaining, optimistic. The birthdays of her dear ones are always remembered. She is a model Santa Claus in buying early and with thoughtful devotion the little gifts which her small means permit. Christmas day will find her radiant with appreciation for the presents given her, and each day, as it comes and goes, will add but one more chapter to the epic of unselfishness that her life unfolds. Happier a thousand times is this woman than those who try to find the Christmas Spirit through riches, position and power. Happier a thousand times we, if we but approach this Holy Day emulating the spirit of unselfishness which, so naturally, so beautifully, is the secret of her joy.

As the Day approaches we will feel the same expectancy that we felt as children. We will sense the better impulses of our natures' urging, and making the world look brighter. The fellowship of the righteous will seem an eminently fitting thing to us on Christmas Sunday, and we won't be more surprised to see some of our business cronies at church than they will be to see us. The sweetness of the music will surprise us (those old, half-forgotten hymns of regal adoration) and we will catch ourselves putting on a whole lot of steam as we sing, and a funny feeling runs up and down our spines. Then the "Merry Christmas" after the service—"same old stuff," we think, until we catch the note of absolute sincerity. Then we are shaking hands with the rest, echoing the greeting and wishing we could think of a better reply than "same to you." And once again Sunday takes on a new meaning because Christmas is coming.

The feeling carries over to business, in the shop, in the office and on the street. Work? Well, yes—we have a' plenty to do—but our minds are awirl with the infectious spirit, and we plan dozens of things we want to do in preparation for our share in the Day. The hour is late, yet we manage to squeeze in a number of errands. Suspicious looking packages crowd our pockets and arms, and bits of holly (was it ever so pretty?) somehow have found their way to the lapels of our coats.

The home atmosphere changes. Confidences are slyly whispered. The tell-tale rustle of tinsel reaches us after the children have gone to their dreams of old Santa, and we catch faint odors of spruce or pine as we rummage the attic to find the stand that has supported so many beautiful trees. Other fragrances come from the kitchen—of puddings and fruit cakes and pies. And all the while we are moving in a kind of transport. We feel like pinching ourselves to see if it is true.

Then comes Christmas Eve with all its witchery and mystic charm. The stockings are hung and filled (we won't waste precious coal this year to make them seem substantial). The tree is trimmed with a hundred memories of bygone years and a few trifles we have picked up to add a bit of freshness. The candles are in place ready to be lit, the striped candy rings and canes encircle the branches, while underneath are piled high those mysterious packages put there by loving hands. And we take a final peek at the preparations, go to bed and wish that we could dream of Santa.

Then comes the Day. Of course, it belongs to the children—and so do we. The patter of feet and the "Merry Christmas" of those angel voices sound in the hall, and, though yearning for just another little nap, we open the door and in they troop with their stockings. Such treasures and trifles of tinsel and sweets! Such pretty little knick-knacks that a thoughtful mother has provided! We laugh at the cries of wonder and joy, steal a kiss from the dear mother as we find an especially thoughtful remembrance in our own bulging and misshapen socks, and get one in return for a surprise we have given her.

No one can do more than trifle with breakfast, for the big event of the day is still in anticipation, and all eyes are glued on the door behind which is the tree of trees.

"Please hurry up, daddy," assails us on all sides as we swallow our morning cups of coffee. Then we finally marshal our brood in order of ages before us (youngest first, oldest next, middle-aged last—this time), the door is opened with mock solemnity and loud hurrahs—and there stands the vision, prettier than ever!

Such cries and shouts as the presents are handed out with great flourishes and ceremony, all that anyone expected to get and then a heap more! Each wonderful package is opened separately and in turn, and each

causes new peals of laughter and more kisses from the recipient to the giver. It's only hard to tell who is the happier.

So Christmas will come, this year as it did last, and will for all the ages, ever fresh, ever new, ever happy, ever blessed.

The Solicitors' Slogan—"Buy and Ship Now"

The next few months will be a period of easy transportation. The normal seasonable decline in business will see less goods moving on the rails, less congested freight warehouses, terminals and sidings. Railroad facilities and personnel will be in shape to handle all shipping requirements more quickly, more safely, more satisfactorily, than during the recent months of abnormally large business. Here is the opportunity for the shipper and the railroad to get together to their mutual advantage.

Many buyers who need staple supplies for their businesses—the farmer, his fertilizers, machinery and seeds; the manufacturer, his raw materials; the big industrial plants, their surpluses of coal, coke, etc.—many of them are holding off because of the present unsatisfactory business conditions. Peak prices of six months back have fallen so hard as to do positive harm to our general prosperity. Retailers are taking big losses and hedging on placing the orders that keep manufacturing wheels turning. With the result that the wheels are not turning as we would like to see them.

But when the present low-priced stocks are gone we will be in danger of another demand that will exceed supply—and send prices skyhooting up again. Confidence must be restored in a measure now. Perhaps, a buying campaign should be inaugurated (luxuries omitted), to help the retailer, to help the wholesaler, to help the manufacturer, to keep his plant going and his employees at work.

On another page of this issue the Commercial Development Department tells agents and solicitors how, by placing our storage facilities at the disposal of shippers at very nominal rates, it is trying to help them avoid the congested transportation conditions which spring and the returning normal demand will probably bring—by purchasing, shipping and storing now. That is only one concession the railroad is willing to make. Agents, solicitors and other employees who study our customers' requirements can think of other practicable ways of proving that the Baltimore and Ohio is in the business of giving ultra-service.

Urge your customers to "buy and ship now"—to use railroad facilities when they are best able to handle goods quickly and safely.

The Impractical Man

There is a deal of nonsense uttered about the practical man. He is supposed to be of much more use to the world than the impractical man. They are always praising the man who does things or gets things done, and the words smack in our mouth as though, after all, he is the fully worthwhile man.

The truth of the matter is that your practical man is usually a second-rate man. To be practical implies that you can do things under existing conditions, taking things as they are. But very often the one thing needed

is to change these conditions. To be practical implies that one can do things that he has practiced. But in the crises of life, when we want a thing done that nobody has practiced, when we get to a real hard knot that has never been untied, your practical man is helpless. Then we discover that the genuinely great man is the dreamer, with his head full of theories.

The practical man can run a locomotive, but he never invented one. He can manage a telephone system, but he could not pick the telephone idea out of nothing and make it something.

The practical brother is a son of Martha, and gets the plums. The dreamer is a son of Mary, and usually gets the sack.

The founder of Christianity had nowhere to lay His head; the Bishop who manages successfully a huge Christian organization has a palace and a seat in the House of Lords.

The inventor of the sleeping car got swindled; the practical business man who runs the sleeping car company has a large, juicy income.

Your practical common sense physician can treat ordinary cases, but when the plague breaks out you send for your tousle-headed, absent-minded old professor, and the worse and the stranger the plague the more absent-minded and tousle-headed the professor.

The men who are pushing this world along are the theorists, the idealists, the dreamers in their laboratories watching test tubes, in their studies excogitating philosophies, or walking the pavement with their heads in the clouds, dreaming and singing of the Golden Year.

LABOR DOES NOT CREATE WEALTH. IDEAS CREATE WEALTH. THE MOST EFFICIENT MAN IN THE WORLD IS THE MAN WITH SOMETHING ON THE BRAIN. IT IS HE THAT MAKES IT POSSIBLE FOR US TO WORK.—*New York American.*

The Among Ourselves Department

Do you read the Among Ourselves department in the MAGAZINE? No? Chances are, then, that your department is not represented. If not, why not? The more the merrier.

And that reminds us—this issue of the MAGAZINE shows a larger representation of divisions and departments than any previous number, thanks to our splendid corps of correspondents. Incidentally the notes have reached a new high plane of interest and our MAGAZINE can surely boast of the best department of this kind among any of the railroad magazines. Baltimore and Ohio cooperative spirit, at its best!

Many a worth while bit can be found among these paragraphs, of humor, of constructive interest—a promotion, a transfer, a new baby or a new benedict.

Read the Among Ourselves items. Find out what other departments, friends and acquaintances at other places are doing. And if *your* department is not adequately represented, find out the reason.

Grand Lodge of Veterans Holds Annual Meeting in Baltimore, November 12-14

THIS year it was Baltimore's turn to act host to the delegates sent by the various lodges of the Baltimore and Ohio Veterans' Association to the annual meeting. It was eminently fitting that this, the largest meeting of its kind held, have its headquarters in Baltimore City, the headquarters of the Company and the nestor of all railroad cities and hence of all railroad veterans, because of its being the birthplace of the earliest railroad, the Baltimore and Ohio.

Baltimore and its Veterans did themselves proud, one of the most important as well as pleasurable features of the meeting being its delightful social aspect, enabling the delegates from all over the System to get together, to exchange opinions and to learn of the progress made by this Grand Association through its many lodges.

The first meeting was called to order on Friday, November 12, at the Hotel Joyce, Baltimore, by Grand President G. W. Sturmer; Grand Vice-President Garvey and Grand Secretary and Treasurer Wardley assisted him and the following delegates presented their credentials:

J. V. Lucas, Cumberland, Md.; F. A. Gump, Fairmont, W. Va.; H. D. Fletcher, Fairmont, W. Va.; John H. Doyle, Newark, Ohio; W. C. Garaghty, Cincinnati, Ohio; George W. Lischon, Cincinnati, Ohio; F. H. Brant, New York, N. Y.; William Cornell, New York, N. Y.; C. E. Lynch, Parkersburg, W. Va.; Daniel R. Sheets, Chillicothe, Ohio; John F. Fenton, Chillicothe, Ohio; John Hoddinott, Washington, Ind.; R. T. Ault, Brunswick, Md.; W. H. Shaw, Baltimore, Md.; J. B. Kennel, Grafton, W. Va.; F. M. Keane, Grafton, W. Va.; Thomas Brennan, Connellsville, Pa.; Martin Conner, McMechen, Pa.; George N. Orbin, Pittsburgh, Pa.; John McAbee, Pittsburgh, Pa.; A. L. Woodworth, Lima, Ohio; C. R. Emery, Seymour, Ind.; Patrick Sehan, Seymour, Ind.; George H. Glenn, Youngstown, Ohio; L. H. Eddy, Cleveland, Ohio; W. K. Gon-

nerman, Cleveland, Ohio; J. L. Oliver, Martinsburg, W. Va.; C. H. Pennel, Baltimore, Md.; W. T. Egan, Garrett, Ind.

Later during the meeting other delegates appeared and enjoyed their part in the festivities.

After the opening prayer by G. A. Bowers, president of the Baltimore chapter, Mr. Sturmer invited Mayor Broening, of Baltimore, to make the address of welcome. The presence of so many Baltimore and Ohio Veterans inspired the Mayor to his best efforts. He himself is a great believer in associations and he spoke of the great honor of belonging to an organization like the Veterans, where years of service and loyalty are qualifications for membership.

He also paid an impressive tribute to Grand President Sturmer, referring to a patriotic occasion at which both of them officiated in Baltimore a number of years ago. The celebration was that of a flag-raising and the Mayor said that the "American Flag" and "America First" had, since that time, always been associated in his mind with Mr. Sturmer because of the very impressive tribute paid by him to the flag on that day.

In concluding his address and welcoming the Veterans to Baltimore in the name of the city, the Mayor spoke of the very intimate relationship between the Railroad and the city, from the very inception of our Company up to the present time; of the big part the Baltimore and Ohio has always played in the progress and improvement of the city; and of the fact that it is one of the great industrial organizations, always called to mind when the City of Baltimore is mentioned.

The meeting then proceeded to its regular order of business, reports from the various committees being read and accepted.

Under the head of new business an interesting and extended discussion was held on the important question of pensions, which finally resolved itself into the appoint-

ing of the following committee, which was instructed to make its report later during the convention:

C. H. Pennell, Baltimore, chairman; T. A. Richardson, Fairmont; F. M. Keane, Grafton; John Hoddinott, Washington; G. N. Orbin, Pittsburgh; D. R. Sheets, Chillicothe; W. C. Garaghty, Cincinnati; F. H. Brant, New York; J. V. Lucas, Cumberland; J. H. Doyle, Newark.

A committee on constitution and by-laws was also appointed, with the charge to report at the next meeting. It consisted of the following members:

H. D. Fletcher, Fairmont, chairman; W. H. Shaw, Baltimore; William Cornell, New York; John McAbee, Pittsburgh; Thomas Brennan, Connellsville.

The meeting was then adjourned for lunch and the automobile sightseeing tour of Baltimore provided for the visiting Veterans during the afternoon.

The session from 5.00 to 7.00 p. m. of the same day was opened by Grand President Sturmer by the reading of a letter from President Willard expressing his pleasure in accepting the invitation to address the Veterans at their open meeting on the following night at Moose Hall.

The report of Grand Secretary-Treasurer Wardley, showing total receipts of \$1,399.25 and disbursements of \$85.42, leaving the handsome balance of \$1,313.83, was then read and approved.

Following the appointment of the following committee, G. A. Bowers, Baltimore, chairman; J. H. Doyle, Newark; W. S. Cox, Pittsburgh, on Ladies' Auxiliaries, Chairman Bowers spoke of the strong Ladies' Auxiliary on the Baltimore Division, consisting of 300 members and what a valuable cooperative body this had been to the Veterans' organization proper. He made a plea for the organization of similar auxiliaries so that the Veterans and their wives could look forward in the near future to the organization of a grand body of women veterans on the System. The meeting was then adjourned until 8.00 a. m. the following day, November 13.

As soon as this session was opened, Grand President Sturmer called for the report of the committee on constitution and by-laws. Chairman Fletcher requested that Mr. Shaw make the report, which was a lengthy one and entailed many important and helpful changes, which will be incorporated in the next printing of the constitution and by-laws of the grand body. It is of interest to note that the colors of the Association were voted to be yellow, red and green.

The afternoon session from 2.00 to 6.30 p. m. was opened by the moving by Mr. Bowers of a rising vote of thanks to the committee on constitution and by-laws, and its being carried. Grand President Sturmer then called for the report of the committee on pensions.

Mr. Pennel, chairman, announced that the secretary would read the recommendation framed by the committee. This was

done and most of the afternoon was devoted to the discussion of the various provisions made, with the result, however, that the recommendation for pension was approved in its entirety by the delegates.

Mr. Sturmer then read a letter from Vice-President Galloway expressing his regret at not being able to attend the open meeting scheduled for that night.

A motion by Mr. Richardson, of Fairmont, that the grand officers of the Association be constituted a committee to take up the pension recommendation with the Management, was carried.

Other business which received attention during the afternoon session was that of the organization of the Ladies' Auxiliary, on lines similar to that of the Grand Lodge, by Grand Vice-President Garvey, and also the question of passes.

The grand officers were empowered to call the next convention in Baltimore and the delegates expressed their appreciation of the courtesies extended them during the convention.

At the election of officers which followed, the following men were honored by the delegates: George W. Sturmer, re-elected Grand President and John M. Garvey re-elected Grand Vice-President by acclamation; James Wardley, Grand Recording Secretary; W. H. Shaw, Grand Financial Secretary; W. C. Garaghty, Grand Treasurer; J. H. Doyle, Grand Sergeant-at-Arms. G. A. Bowers, Baltimore; W. S. Cox, Pittsburgh; W. Fauver, Martinsburg; H. D. Fletcher, Fairmont; C. H. Pennel, Baltimore, were elected Directors on the Grand Board.

The convention then adjourned for the open session of the evening at Moose Hall.

Lack of space forbids an extended description of the entertainment provided and enjoyed by the visiting delegates.

The sightseeing trip on Friday afternoon gave the delegates not only a great deal of pleasure in seeing the new Baltimore, but also provided splendid instruction as to the large properties of the Baltimore and Ohio in the home city and the magnitude of its facilities and operations.

The excursion down the Bay on Sunday was the culminating feature of the entertainment program. Here, too, the delegates were given the opportunity to see the expansive properties of the Railroad, serving the many new industrial corporations which have built plants along the Bay during the last few years, as well as having pointed out to them the enormous possibilities of expansion and future development offered by Baltimore's splendid harbor. The weather during the convention was perfect and added to the enjoyment of the outdoor program.

For the open meeting on Saturday night, November 13, at Moose Hall, the convention's auditorium was packed with the mem-

bers of the Baltimore Lodge and the visiting delegates. President Willard was introduced by Grand President Sturmer and his address, extracts from which are printed on this page, was received with great enthusiasm. Following Mr. Willard's address, W. W. Wood, chief of the Welfare Department, also addressed the meeting.

This convention will go down as the most successful to date in the history of the Grand Lodge. Much of practical worth was accomplished, important recommendations made, and it was the consensus of opinion of all of the delegates that the Grand Lodge is on its way to a career of greater influence and usefulness.

General James A. Gary, Oldest Agent of the Baltimore and Ohio, Dies at the Age of 88

THE death of James A. Gary, the "Grand Old Man of Maryland," on October 31, marked the passing of the oldest agent, in years of service, on the Baltimore and Ohio, and probably the oldest man in this position in America.

General Gary held the position of agent at the little station of Alberton, Md., years ago known as Elysville, for 62 years. He was also manager of the Alberton Cotton Mills, owned considerable property in Howard and Baltimore Counties, and was a director and financially interested in many business corporations in and near Baltimore. Mr. Gary was Postmaster General in President McKinley's cabinet, but resigned at the outbreak of the war with Spain, in order that he might not be placed in an embarrassing position because of the quantities of cotton duck which his factory would be called upon to supply to the War and Navy departments.

Born in Uncasville, Vt., on October 22, 1833, he came with his father to Maryland in 1838 and attended the schools here. He was graduated from Rock Hill College, Ellicott City, and from Allegheny College, Meadville, Pa. He played an important part in political and commercial affairs.

He was possessed of an amiable disposition and was kind to his employes, one of whom was his assistant agent, our D. M. Shawen, now in the Superintendent's office at Camden Station. Mr. Shawen was active agent for Mr. Gary for 30 years. He speaks of the general as being a "fine gentleman."

The little town of Alberton, which has a population of a little less than a thousand, was practically built by General Gary. One of the first things that he did for the people there was to establish a public library. Then came several large stores, churches (both Catholic and Protestant), and a hall for entertainments. This hall, we are told, is a miniature Academy of Music, suitable in detail for amateur performances and has afforded much pleasure to the inhabitants of the town and employes of the cotton mills, as well as to employes of the Railroad.

The beautiful Gary home, Linden Avenue and Hoffman Street, Baltimore, was for years the scene of many interesting social events. There were seven daughters and one son born to Mr. and Mrs. Gary, and it was at the marriage of one of these daughters that President McKinley was the honored guest. The summer residence was at Catonsville.

Between sessions at the convention—the Veterans on the steps of Camden Station

The late General James A. Gary

How General Gary was respected by the officers of the Baltimore and Ohio is shown in a tribute paid to him by Vice-President George M. Shriver. Mr. Shriver recently said:

"I knew Mr. Gary for many years, ever since I was a youth, and for him I entertained the highest regard. He was the oldest employe of the Baltimore and Ohio, having served for over half a century as the agent of the Company at Alberton."

Another Martinsburg Notable

By C. Auld
Secretary of Chapter

HERE'S a word for another of the Veterans who frequent Joseph Pfarr's shoemaker shop on Queen Street, Martinsburg. This one is M. L. Sharon, age 65, pensioned engineer, better known as the "Morgan County Orator." "Uncle Mike" has just been retired from the Railroad service and he is the oldest young man of the group. He is always ready to tell you some yarn about a hunting or fishing trip, and, according to him—and we believe it—nobody has ever lived who caught more fish or captured bigger game than he has. When it comes to an argument, "Uncle Mike" has never found his equal. If we are to believe a story told by his close friend, Engineer Joseph Linthicum, "Uncle Mike" is as old as the hills. "Joe" says that once upon a time when "Mike" was counting up his years of service, the places where he has worked and the length of time he has spent at each place, that he (Linthicum) kept tally of the number of years and when "Mike" had finished talking he counted the marks and found that they totaled 150 years. In defense of this, "Uncle Mike" claims that "Joe" had forgotten how to count.

but it was well worth it, for Mrs. Downey is known as a fine hostess. At this meeting it was decided that the men would rent a hall and that the ladies would furnish the "eats" for each meeting. The result of this was that the Manley Hall was rented and we decided to celebrate right. Invitations were sent out to all members and to some outsiders, and we proceeded to make it a real "blow-out." It was a splendid success. This is what one of our local papers had to say about it:

"The Baltimore and Ohio Veterans' Association and the Ladies' Auxiliary of the same organization had a delightful gathering on Friday evening at their hall in the Manley Building and all made merry until a late hour. A program of music and other features occupied the early part of the evening. Vocal solos were rendered by C. H. Bloom and Frank Jordon with Mrs. Bloom and Miss Naomi Heffner as the piano accompanists. Violin solos were played by Frank Frey with Miss Byer as accompanist. An honor guest of the evening was Mrs. John Garvey, of Wheeling, wife of the grand vice-president of the Veterans' Association. She gave a very pleasing talk. Visitors were in attendance from Grafton, Clarksburg and Morgantown and with the local aggregation there was a large turnout. Mrs. F. M. Wiltman was at the head of the program committee and Mrs. Harry S. Fleming had charge of the refreshments. Delicious gingerbread, pumpkin pie and hot coffee were served. The festivities ended by the dancing of quadrilles by the veterans and their ladies."

Unload a car promptly—send it on its way,
Then we'll save a car every day.

Fairmont Veterans and Ladies' Auxiliary

By Mrs. F. M. Wiltman

THOSE who attended the Veterans' Picnic at Grafton last summer will remember our recruiting station and the fun we had getting in new members. Well, the first thing that we found out after the picnic was over was that our lodge room had been taken, so it was left for us to meet at the homes of such members as might care to have us.

Mrs. C. B. Cassidy said that she would try us first, so on our next meeting night we (16 of us) hiked over to her house. When we told of the lovely time we had, and of the delicious refreshments, those who had stayed at home were quite envious. When Mrs. Althea said that she would entertain us, many others of the members, both Veterans and their wives, came out. There were 46 in all. At this meeting we had a fine report from the ladies who had visited the chapter at Baltimore. But while they were telling about it, a screech owl flew into the room and caused considerable commotion until he was captured. Then we had just got settled down to business when a little mouse came and peeped

in to hear the proceedings. You can guess what happened. Our worthy president screamed and jumped for a chair, but fortunately for the ladies, the mouse was more frightened than any of us, and fled for his life.

Walter Wilson sang several solos, Miss Thelma Parker gave selections on the piano, and Mr. and Mrs. John Shafferman extended a general invitation to us to attend the wedding of their daughter Ruth. Mrs. Althea served refreshments and we all went away feeling that we would like to meet at the Althea home again.

The next to entertain us were Mr. and Mrs. George Swisher. At this meeting 65 were present. (See, we do better all the time.) Here we spent a most enjoyable evening. Frank Jordon and Douglass Fleming sang several selections, accompanied by Miss Naomi Heffner. Mr. and Mrs. Swisher proved delightful hosts.

Then we held another meeting at the home of Mrs. Henry Downey, who, by the way, lives on the very top of one of our mountains. It was certainly "some climb,"

Baltimore Veterans' Ladies' Auxiliary

THE regular monthly meeting of the Ladies' Auxiliary of the Baltimore Division Veterans' Association was held in Moose Hall on the night of November 1. There were present more than 200 members. Following is the evening's program:

Song: America.

Lord's Prayer, led by the chaplain, Mrs. Bowers.

Roll call of officers.

Reading of minutes of last meeting by recording secretary, Mrs. MacMillen.

Report of treasurer, Mrs. Holmes.

Reports of various committees, distribution of cards of membership and application cards.

Names of applicants for membership proposed and accepted.

Reading of various communications. Of special note in this connection was the reading of a letter addressed to Mrs. Daniel Willard, informing her that her name had been proposed and unanimously accepted for honorary membership, and the cordial reply to this letter.

During the time that the secretaries and treasurer were busy with the details of handling the membership cards, Mrs. Hanson told about the pleasant trip which a number of the members of the Auxiliary had taken to Gettysburg the previous week. Some of the ladies, she said, had risen at the

early hour of four o'clock in order to be dressed in time to catch the 7.06 train.

The Western Maryland kindly assigned to their use a special car. They took their own lunches along, and stopped during the tour of the battlefields to get coffee. They also had their "pictures took."

It was then decided that the next trip would be to Mount Vernon.

Mrs. Shipley, the president, then stated that the number for membership in the Auxiliary had been set at 500 for January 1. This seemed to be a rather high mark, but Mrs. Shipley is confident that if all of the members would work as Mrs. Galloway has in this direction, this would be a small standard. There were, at the time of this meeting, 230 members, and with 17 new names added to the list on this evening, the number was brought up to 247.

Mrs. Shipley next introduced "Aunt Mary," the newly elected honorary member, whom the president called the "baby Veteran"—then went so far as to ask the "baby" to stand alone and talk to all her proud mammas! Fortunately, the "baby," having just eaten a hearty meal and already seeing prospects of refreshments, did not cry, but proceeded to inform her mammas in her best language that she would do her best not to keep them awake at night, and that she would try to be as well-behaved as she knew how to be, and that one day she hoped to grow up to be an honest-to-goodness Veteran.

The motion was made that the election of officers take place on the first meeting night of December, instead of in January as heretofore. It was moved and seconded that during the latter part of November, the books be audited.

After the regular business session, a penny collection for flowers for the sick was taken up, then the tables were cleared and preparations made for the serving of refreshments. The Veterans came in and were served with ice cream, cake and cigars. After this, Mr. Sturmer, grand president, announced that there would be a session of the Grand Lodge on November 12, 13 and 14 in Baltimore.

Ladies' Auxiliary Entertains Martinsburg Veterans

ON OCTOBER 14, the Ladies' Auxiliary of the Baltimore and Ohio Veterans' Association of Martinsburg entertained the Veterans at a banquet held in their hall. All enjoyed the feast and spent a lively evening discussing Railroad problems.

The regular meeting of the Veterans was held in their hall on October 28 and was well attended. Many important matters came up for discussion. There is a growing interest in the Association and the Veterans are realizing the possibilities of a splendid organization. One of our members, Watch Inspector W. L. Jones, has just returned from a meeting of watch inspectors in Chicago. The delegates to the convention

consisted of watch inspectors from all of the railroads of the Middle West centering in Chicago. It is gratifying to note that this convention should invite a man from an eastern section of the Baltimore and Ohio to read a paper on watch inspection.

Poet Page—A Veteran

THE following poem was written by William Page, the grandfather of E. E. Nicholson, acting lieutenant of Baltimore and Ohio police and in charge of the freight station at Washington, D. C.

Mr. Page is 93 years old and the poem is, without a doubt, a true expression of his sentiment.

A Little More

A little more gray in the lessening hair,
Each day as the years go by;
A little more stooping in the joint,
A little more dim in the eye.

A little more faltering in the step
As we tread Life's pathway o'er,
And a little nearer every day
To the ones who have gone before!

A little more halting of the gait,
And a dullness of the ear;
A growing weariness of the frame
With each sweet passing year.
A fading of hopes and ambitions, too,
A faltering in Life's guess;
A little nearer every day
To a sweet and peaceful rest!

A little more loneliness in life,
As the dear ones pass away.
A bigger claim on the Heavenly Land
With every passing day.
A little farther from toil and care,
A little less way to roam;
A drawing near to a peaceful voyage,
And a happy "Welcome Home!"

To Members of The Veteran Employees' Association of The Baltimore and Ohio Railroad

Dear Sirs and Brothers:

Greetings!

As the Christmas holidays are approaching, I desire to bring the following thought to your attention for consideration:

Much was said at the convention respecting the financial situation of some of our old Veteran employes and of the efforts that we have made to help these brothers during the few years that remain to them. Therefore, I would appeal to you to do all in your power to help them enjoy the festivities of this Christmas Day.

We ourselves celebrate the day in feasting and merry-making, and shall we not endeavor to make happy those who are less fortunate than we and who are not financially able to help themselves?

I, therefore, suggest that each president

among the various Associations on our Railroad appoint a committee, which will arrange to provide baskets of groceries and other provisions for distribution to the worthy. Provision might also be made for the distribution of gifts to hospitals and to orphanages.

Brothers, we have enjoyed our convention and the fellowship of our Association, and I believe that we can and ought to remember our less fortunate ones at Christmas. Shall we do it?

Yours in sociability and friendliness,

Signed, W. H. SHAW,

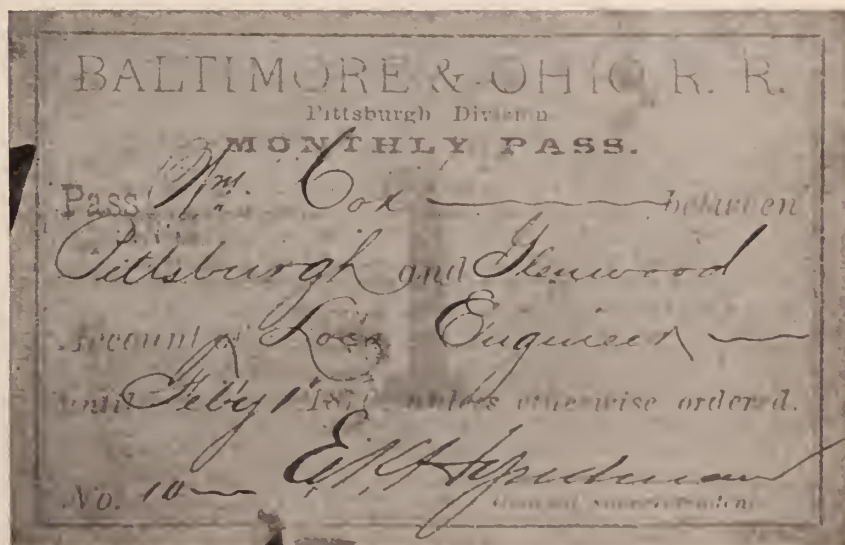

Grand Financial Secretary,

Room 1000, Baltimore and Ohio Building.

APPROVED:

(Signed) G. W. STURMER,

Grand President.

No Room At The Inn

No room at the inn!
No rich brodered hangings, no tapestries fine,
Nor great halls for feasting, no goblets of wine,
No wreaths of the fir tree His crib to entwine,
No room at the inn!

No room at the inn!
But tidings of angels proclaimed where He lay,
And shepherds rejoiced at the breaking of day,
And Bethlehem's Star shed its glorious ray.
No room at the inn!

No room at the inn!
Nor came one to earth more humble than He,
The Christ who all nations from sin would set free,
And He opens the portals of Heaven . . . Ah, see!
There is room at the Inn!

Mary Jane's Christmas Eve

By Another Miss Coplan

"WELL, Mary Jane Perkins," says I sarcastic to myself on Saturday night when I look in my pay envelope and finds a little, small, white slip in it (maybe you have got one of them slips in your lifetime, so you know what I mean), "you're out of a job. What are you goin' to do, my pussywillow? Live on yours and Vanderlift's income? An' Christmas only a week off!"

Just then I gets a bright idear, which, as my intimable friends, Carrie, May, Belle, Lizzie an' Mollie can tell you, is my favorite pie; if idears was dollars, I'd own the country. So, I thinks to myself—what's the use of followin' the down-trodden paths, as the poet says, an' goin' to a million different places lookin' for a job? Why can't I be aboriginal for once? I'm tired of manicurin' anyways; I'll just get the newspaper an' turn to the "Help Wanted" column, then, with my eyes shut so's I won't be able to see the dirty work, I'll jab a pencil into the page. After this dastardly crime, I'll proceed to get the job which my pencil has stabbed in the back. Do you get my drift? You do. Well, then, how does that strike you for an idcar? You tell 'em teeth, you got the chatter!

So, on Monday mornin' bright an' early, I gets the paper an' acts in the above-mentioned manner. It takes me about half an hour to get nerve enough to cast a glance at the ad what I had murdered. B'lieve me, I know now how the Heinies felt when they

saw the Yanks comin'! Finally an' at length I looks at the ad. What I reads nearly gives me the heart failure. This was it:

WANTED—An experienced assistant ticket agent. Must be pleasant and capable. Apply at X. & Y. R. R. Station and inquire for Mr. Hamilton, Roaring Creek.

Do you get the situation? Me, a city-bred manicurer, doomed to apply for a job as experienced ticket seller in a nereby hamlet. Experienced! Get that. The nearest experience I ever had in ticket selling was one time when I bought a theater ticket to see "Peggy" for two simoleons, an' then got such a rotten toothache that I had to sell it to Min O'Haley for six bits—the ticket, I mean, not the toothache.

I admit the idear ain't as good as some of the other children of my extensive brain, but say, I guess you know that sayin' about the exception provin' the rule. Well, I'm nothin' if not a sport, an' since I got myself into this tight place, I makes up my mind that I got to see the thing through, for I got to get something to do so's I can get Christmas presents for my friends Carrie, May, Belle, etc. So I dresses up fit to kill in my new fall suit, fetchin' hat, white gloves, patent leather pumps, etc., an' b'lieve me, when I peeks in at the buro mirror at myself, my lowly spirits sorter rise somewhat. Somebody once told me

that if good looks was ice, I'd be a glacier. I ain't a bit vain, understand, but herneit am I blind.

I pilots myself over to the X. & Y. station at Roaring Creek an' inquires for Mister Hamilton. There I am ushered into a office what looks like what Mister Ben Franklin's office must have looked like when he first started on the road to fame an' fortune. While I am settin' there, pensive like, waitin' for a old gentleman with white whiskers to walk in, I hears suddenly a wonderful voice sayin', "Good morning, I am Mr. Hamilton. Did you wish to see me?"

Well, I was so surprised I almost keeled over. Instead of bein' the white whiskered old man, this guy is a youth of about 28 or so. Talk about good lookin', ye gods an' little fishes! If swell looks was wood, he'd be a lumber yard.

After askin' questions, one bein' how much experience I've had, an' me sayin' five years, not mentionin' what kind of experience, this "Hammy" (as I calls him to myself) engages me at \$20 per.

The first few days I feels as much at home at the station as a mouse between a tom-cat's teeth, but it don't take me long to get the hang of things, an' in a couple of more days, me an' Hammy carries on the office pretty lively.

One evenin' I am informed real polite that I got to work overtime. Of course it's got to be on a night when I got a heavy date on hand to go to the weekly dance of the club with the best lookin' guy ('scusin' Hammy) in the joint; but, business comin' before pleasure, as my friend Bill Shakespeare says, I gets the heart-breakin' news to my gentleman friend. Hammy brings in some lunch, followin' which we goes to work with a vengeance, as some writers would say. Hammy is countin' out all the money what we have took in for tickets an' me watchin' him to check him up, when suddenly we hears a cold an' boomy voice yell, "Throw up your hands!"

Quick we turns around an' finds ourselves lookin' into the steely eye of a revolver held by the shorter one of two huskies what had just made their unwelcomely arrival. Am I scared! Sweet Patootie!!! My heart takes a sudden trip to Europe A. W. O. L. But my mind, brave night, refused to desert mam'selle in distress. All of a sudden I gets a idear—(another one). While I an' Hammy is tremendous busy holdin' up our hands, the tall one jumps on Hammy an' the two of 'em starts a fine rumpus. Meanwhile the short one, with a clammy gun in his grasp, comes over to the money table where I am. He looks me in the eye an' I flashes the brightest smile I knows how in his eye, makin' it look like a real smile what's all wool. Then I says to him, kinder low like, "Say, partner, tell your pal that while he's about it, he might as well finish up the job for my sake. As a swell boss the guy that's bein' murdered is about as mean a shark as ever lived in the ocean."

At this, the runt with the killin' instrument looks at me for a second, then says, "Say, Cutie, be you on the level?"

"You're a fine gent to insult a girl when she tries to be friendly," says I, real haughty like.

"All right, Honey," he says, grinnin', "take the gun an' guard that gink over there while my pal an' me gathers up this mazuma. We'll make it worth your while. Afterwards you can make a corpse of the boss if you want to; me an' my partner's only in the robbin' business."

"You're on, brother," says I, takin' the gun. All this time Hammy is fightin', an' I'll give it to him, he's some fighter. But when he hears me talkin' to Shorty an' sees me take the gun, he gives up in despair. You ought to seen his face. He looks like he can't believe his own eyes an' ears an' don't know whether it's him or me that's goin' daffy. Course, all this happens in less time than it takes me to tell it here, but I don't want to leave out none of the details. By this time, both guys is at the money table, shovin' the stuff into a bag. Here's my chance. Quick I walks over to Hammy an' with quietness an' dispatches, as some writers says, I turns the gun over to him, he takin' it quick an, pointin' it at the robbers, sayin', "Hold up your hands!"

I know them words sounded like music to his own ears. Did you ever take notice of how some words sounds when other folks says 'em an' when you says 'em? Well, then, you know the sensation. Up goes two pairs of hands, an' while Hammy is playin' nurse to them two, I am turnin' in the alarum. In no time a squad answers my S. O. S., which, as everybody knows, means "Save Our Station," an' away they goes with them two geezers. So that's the end of that.

But, this mornin', which happens to be both Christmas Eve an' pay day, I gets my pay envelope again. There was somethin' in it what would have made me faint if I'd been the faintin' kind—another white slip of paper. "Gosh!" says I, "here's where I gets the razz again!"

With great reluctance I pulls the slip out. This is what my starry eyes beholds:

MISS MARY JANE PERKINS,
Assistant Ticket Agent,
Roaring Creek Station.

Dear Miss Perkins:

It has been called to my attention that you were instrumental in bringing about the arrest and conviction of two burglars at your station on the night of December 10. I hereby take this opportunity to express my appreciation of your courageous action, and, at the same time, to notify you that, beginning with today, your salary will be increased to \$40 per week.

Yours very truly,

J. V. GRIGGEN,
President.

Merry Christmas? Oh say! If you feel like this in heaven, I want to die!

Christmas in France

As told in a letter from a little French girl to her friend in America.

LA ROCHELLE, FRANCE,

December 17, 1919.

My dear big American friend:

The anniversary of the birth of the Infant Jesus approaches and all of the people in all the world make ready for the coming of the Christmas season. You have asked me to tell you how we celebrate this holiday.

As in your country, our shops at this moment are in marvellous array; the little children are gazing with delight at the toys of all sorts which are displayed therein, and the playthings are arranged in such an artistic manner as to make the windows as attractive as possible. Tourists from all over the world seem to enjoy our displays.

At night, on the 24th of December, in all of the Catholic churches a mass is chanted, from 11 to 12 o'clock, and just at midnight the chimes ring out a wondrous pealing. From all of the little country hamlets nearby, there comes a long procession of somber silhouettes, figures of the country people carrying lanterns; the oldest grandmothers and grandfathers, who walk ordinarily with great difficulty, find again their strength of 40 years in order to walk to town and chant with the others of the birth of Christ.

One hears the joyous peal of the church bells and the mass is celebrated with great ceremony; the faithful ones are many, and

Dear Women Readers:

Among the Christmas cards which I received last year there was one bearing this inscription:

"May the Giver of gifts give unto you
All that which is good and that which is true,
The will to help and the courage to do;
A heart that can sing the whole day through,
Whether the skies be gray or blue.
May the Giver of gifts give these unto you."

If I should sit and think for a year, I am sure that I could not think of a happier thought or a more beautiful wish to send you at this glorious season of the year, and so, I am sending it to each of you with the hope that it may be a tiny drop in your cup of Christmas cheer.

As I told you in my November letter, I am overjoyed at the thought that we are beginning to get some splendid contributions from our Railroad women. Some of the contributors have asked that we do not publish their names along with their articles. We should much prefer to use their real names, but we are perfectly willing to let them use a *nom de plume* on condition that they send us their own names, simply as an evidence of good faith.

I know you will appreciate the expression when I tell you that among the girls in the offices I have one or two regular "standbys." There is nothing that I want done but that I always feel free to ask these girls to help me, and I am sure that those of you who know what it means to have a friend in need, can understand what a comfort it is to know that there is somebody who is ever ready to help. But, I cannot let a good joke go by, even if it is told at the expense of one of these good friends.

The other evening I attended an oyster supper, given by the church which one of my particular "standbys" attends. On my way out I happened to spy my friend and hailed her.

"I'm getting together the material for the Women's Department," I called to her. "Is there anything that you would like to add?"

"Oh, yes," she answered quickly, "I've a little poem, not original but quite to the point, which I believe would fit very nicely in some little corner of the Christmas number. I don't know what it's called, but the first line begins 'God give us men—'"

She got no further. A peal of hearty laughter burst from behind us and somebody murmured, "An old maid's prayer, eh?" Then we all laughed, for we realized how funny it must have sounded to one who had never read the beautiful little poem by J. G. Holland. But on the next morning I found it in my mail, and when I had read it I knew the depth of its meaning. Therefore, I am bringing it to you, in these columns, to add to your other beautiful Christmas thoughts.

With deep appreciation for your loyal support and with the assurance that these pages are ever ready to welcome contributions from our Baltimore and Ohio women, I am,

Yours sincerely,

Margaret Talbot Stevens

Associate Editor

they joyfully chant the canticles to celebrate this, the greatest festival of all the year. It is necessary to say that before going to church at midnight, certain persons assist in the preparation of a great banquet, which they are pleased to call the "reveillon," and on this occasion good cheer abounds.

The children go to bed at an early hour, for the good "Father Noel" (your "Santa Claus") will soon come down the chimney and fill their little shoes, for the little children of France place their shoes in the chimney place; then in their night gowns and bare feet they make their prayer before the altar and go to bed, curious for what the tomorrow may bring forth. A little boy, the brother of a friend of mine, has already written a letter to the good saint which is truly delightful. Think of it, a baby of six years, saying in a real grown-up manner, with a serious expression, that he has been a good boy, obedient to his mamma, and that he wishes to have "a railroad train that runs all by itself and which makes real smoke!"

In certain families there is a Christmas tree, on which are suspended many lights, and among these are hung the presents for the friends and toys for all of the children, bonbons and all kinds of goodies, for this is the happiest of all days. At the home of my friend Odette, there will be a Christmas tree, and we have already made many plans for the festival in connection with it. I know much of the details, but of these I will speak later, after Christmas shall have passed.

And now, dear friend, good night. Write me soon a long, long letter. The sea is very naughty tonight, the waves beat ragingly against the shore, but I hope that they will soon be calm in order that they may allow to glide in safety the great ship which will carry to you in America all of the affectionate thoughts of

Your little French friend,

MARCELLE.

"A Christmas Greeting for Those Who Dream"

By a Worker as well as a Dreamer

CHRISTMAS is the time when all of us want to do something for the "other fellow" almost more than at any other time, and so I am passing along something which is very, very good—not merely because it is so good, but because I believe it expresses very beautifully a dream that many of us have—and all the good things of life had their origin in someone's dream—"God give us men! The time demands Strong minds, great hearts, true faith, and willing hands.

Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor; men who will not lie;
Men who can stand before a demagogue
And damn his treacherous flatteries without winking;

Tall men, sun-crowned, who live above the fog
In public duty and in private thinking."

—J. G. Holland.

Little Thoughts

"So many gods, so many creeds,
So many ways that wind and wind,
While the only thing that really counts
Is a little kindness to mankind."

—Selected.

The street car was crowded. There were those who were on their way home from work, tired and hungry; there were merry school children returning from a joyous hike to the country; there were business men discussing their daily problems, and there were care-free maidens who were eager to get home so that they might get dressed for the evening's party. In every eye one could see the eagerness for a smoking hot supper.

In a seat near the back sat a little colored boy. He was next to the window and his hungry little black eyes glistened as the car stopped at the corner of Pennsylvania Avenue and Biddle Street, where Italian Joe and his wife kept a peanut stand. Into his pocket he dived and brought forth a nickel, raised the window and motioned for Mrs. Joe to bring him a bag of peanuts. Before she got to the edge of the pavement with the package, the trolley had started. She could have made her sale even then, had not a big touring car at that moment shot directly across her path. She looked at the chauffeur anxiously, appealing to him to wait but a second. He laughed at her and sped on. But the conductor and as many as 20 passengers on the car had witnessed the scene. Hurriedly pulling the signal to stop the car, he beckoned to the Italian woman to hurry up with the parcel. She ran, and in a second more the car was on its way, the Italian woman was happy, the little darky munched his peanuts delightfully, and everybody smiled.

"The first day that I came to work for the Baltimore and Ohio," said Mr. Cromwell, ticket agent at Mt. Royal, "was a beautiful day in June. I always look forward to that day every year with as much glad anticipation as I look forward to my birthday and my wedding anniversary, for it has always been to me a beautiful June day."

A man went into the shop of a silversmith, who was busy heating an alloy to be used in the mending of some broken article. The shopkeeper talked to the customer but kept his eye on the molten metal. Higher and higher leaped the flame, but he kept his eye on it.

"Why do you do that?" asked the customer.

"Because," answered the silversmith, "when the metal reaches a certain degree of heat I can see my face in it; then I know that it is ready for use."

Is your work a reflection of your face, your character? Can the "man higher up" glance at your work and say, "This is good work; it must be Mary's"?

Roast Turkey and Christmas Goodies

Roast Turkey

For a turkey weighing not more than 10 pounds, take 1 loaf of bread, break into bits and pour over it $\frac{1}{2}$ pint of boiling water. Cover tightly and allow to steam. While it is steaming, see that the turkey is thoroughly cleansed and wiped dry, both inside and out. Add to the steamed bread a large lump of butter, 1 teaspoonful salt, $\frac{1}{2}$ teaspoonful pepper, and sage to suit taste. Stuff the turkey and sew up to prevent bursting. (The threads are to be removed before the turkey is served.) Place in large pan and add 1 pint boiling water, flour and butter on outside of turkey, and roast for 3 hours, basting frequently. The oven should be moderately heated.

Chestnut Salad

Shell and blanch a pint of sound chestnuts, cook in boiling water until tender, and chop fine. Add 1 pint finely chopped celery and $\frac{1}{2}$ pint tart apples, chopped fine. Add mayonnaise dressing. Scoop out inside of apples to form cups and fill with salad. Serve on lettuce.

After Dinner Mints

Note: These candy recipes are contributed by the girls of the Multigraph Department, Mount Royal Station.

To 1 pound XXXX sugar add enough milk to form stiff paste. Add a lump of butter the size of a walnut, and 1 teaspoonful essence of peppermint. Roll into balls and flatten. These may be colored, if desired. For brown, add chocolate; for yellow, the yolk of an egg; for pink, raspberry. Other vegetable colorings may be purchased at the druggist's.

Peanut Brittle

Shell 1 quart fine large peanuts, separate into halves and spread evenly on the bottom of a large, well-greased pan. Place 1 pound white sugar into a saucepan and set over a hot fire, stirring rapidly until all of sugar has melted and is of a golden brown color. Pour over peanuts, spread evenly, and cut into squares immediately with a buttered knife.

Caramels

Grate $\frac{1}{4}$ pound chocolate. Add 2 cups sugar and $\frac{3}{4}$ cup of milk. Cook over slow fire for 20 minutes, or until it forms a soft ball in water. Remove from fire and add a lump of butter the size of a walnut. Beat well and add 1 tablespoonful vanilla. Pour on buttered tins and cut into squares while cooling.

Baked Apples

Select large, smooth, red apples. Scrub them with a brush, wipe dry, and remove the cores. Fill the cavity thus made with marshmallows, cut into small bits, and a teaspoon of sugar into each apple. Bake in a moderate oven. Serve with a sauce made of one cup water, half cup sugar, and two teaspoons vanilla, boiled together until sugar is dissolved.

Definitely Designed for Home Dressmakers are these Attractive Frocks

By Maude Hall

ALLURING indeed are the new frocks that come from the marts of fashion.

They are chiefly of one-piece design, supple and slender, and so simple in their plan and development that the home dress-maker contemplates them with pleasure.

Among the prettiest of the late models, for instance, is a dark blue velveteen. While black and brown are most seen in velvet dresses, there are many delightful models in blue, which is combined with gray and beige in clever and original ways. As it is one of the most dignified and becoming of materials, no woman objects to velvet as a leader among fabrics. Velveteen, cheaper

material to hold in the fulness at the waist. Finishing the neck is the fashionable high collar, a trimming distinctively becoming to certain feminine types. Embroidery may be added to the vest if desired, but the frock is quite effective without it.

A wide girdle placed below normal and a row of buttons on either side of an open front, give distinction to a tunic blouse of brown tricotine worn with a plain skirt. Although there is something Oriental in the suggestion of the low broad girdle, modern couturiers manage to manipulate it so cleverly that it is universally becoming. The fronts of the tunic fall in points over the

V to accommodate a vest of plain georgette. There is a high collar of gray satin attached to revers of the same material. It is predicted that gray is to be the predominant color of the coming season. Certainly it seems to gain in smart favor daily. While taupe is featured with great prominence, the light shades are being talked about more enthusiastically. The dark tones are for matrons; the light for youth. There seems to be no middle ground. One, of course, always has recourse to other colors—and the list is adequate for any demand. Not only is gray fashionable in fabrics, but in furs. Squirrel, krimmer and Australian opossum are the leaders.

The return of the high collar and open neck offers an opportunity for the wearing of many gay pendants and colorful necklaces. Not infrequently these foibles correspond with the color of the dress. Sometimes they are handmade—of beads or embroidered bands. Harmony from head to foot is the password of the well-dressed woman. She exercises the same particular care in the selection of her shoes and hosiery as in her hats and gloves. Nothing is overlooked—even the handkerchief and the bag in which it reposes correspond with her costume. All of these things may be vain and frivolous, says milady, but they are necessary to poise.

And without poise, all is vain!

Caramel Fudge Cake

Beat together 1 $\frac{1}{4}$ cups cold caramel syrup with $\frac{1}{2}$ cup butter. Add 2 well beaten eggs and 1 cup milk. Stir into this mixture 3 cups flour to which has been added 2 teaspoonsful baking powder and $\frac{1}{4}$ teaspoonful salt. Bake in moderate oven.

Date Pudding

Chop together 1 cup dates and 1 cup walnuts. Add 1 cup powdered sugar, 2 heaping tablespoonsful flour, 2 eggs well beaten, and 2 teaspoonsful baking powder. Butter baking pan and bake $\frac{1}{2}$ hour. When cold, break into small pieces and serve with whipped cream, or sauce made as follows: $\frac{1}{2}$ pint cream, 1 small cup powdered sugar, 2 teaspoonsful vanilla.

35 cents for each pattern

for the woman who has not a great deal of money to spend upon clothes, and remarkably wearable, enjoys as high favor as does velvet. The velveteen dress aforementioned is built upon straight lines. The waist has an open front finished with a long collar and inset vest. The vest extends below the belt of gray satin, which corresponds with the collar, and is embroidered in gray and dark blue silk. At the top it is cut in square effect. Long one-piece sleeves flare at the wrists.

Another dainty frock features a series of winding frills as a skirt trimming, without violating the dictum for straight and slender effect. It is fashioned of satin, the blouse being inset with a vest resembling a shirt bosom to offset the fussiness of the skirt. There is a narrow belt of self-

skirt, the sides and back being shorter. Collar and flare sleeves are of satin in the same tone as the tricotine, but there is a touch of gold in the buttons. As has been said before, brown is the most clannish of the season's smart colors and seldom requires the assistance of contrasting colors for the achievement of artistic decorative effect.

Sometimes the well-dressed woman asserts her independence of utterly straight lines and affects something slightly bouffant at the sides. And, in the language of the day, she "gets away with it beautifully" if she is slender. Just how successfully is illustrated in a frock of taupe French serge, with the skirt laid in plaits at the hips. The front is straight, as applies to both skirt and waist, though the latter is slashed in a deep

A Fetching Frock to be Developed Inexpensively in Dark Blue Serge or Tricotine

A FROCK need not be expensive to be fetching, as this model competently illustrates. Even though it is trimmed with a border of embroidery, the trimming is so simple in design that it may be

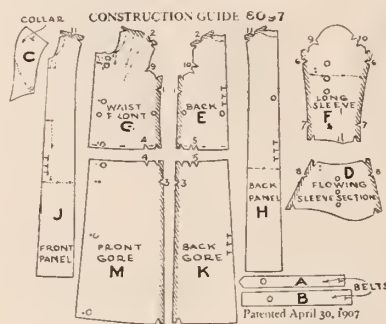

face collar and sew to neck edge with center-backs even.

Now, take the sleeve and close dart seam as notched, terminating seam at the small "o" perforation. Leave edges free below the large "O" perforation. Gather between "T" perforations. Close remaining seam as notched. Sew sleeve in armhole as notched with small "o" perforation at shoulder seam and bring seam of sleeve to under-arm seam, easing in any fullness between the notches. Hold the sleeve toward you when basting it in the armhole.

Arrange sash around the waist and tie loosely at the side or in front.

Pictorial Review DRESS No. 9087. Sizes 34 to 50 inches bust. Price 35 cents.

worked up quickly with darning or outline stitch, unless one wishes to substitute beads of braid. The lines are straight, the fullness being held at the waist with a narrow belt of self-material. The dress may be worn with a convertible collar and vestee, or with a square collar and shield. The long one-piece sleeves flare slightly at the wrists. Medium size requires $4\frac{3}{8}$ yards 36-inch or $3\frac{3}{4}$ yards 44-inch material.

The front and back of the dress being seamless, these sections of the pattern are arranged on the material so that the triple "TTT" perforations rest along the lengthwise fold. To the right of the back are the collar and shield, both resting along the lengthwise fold also. The sleeve and stay have the large "O" perforations resting on a lengthwise thread. Indicate each notch and perforation carefully, to avoid mistakes in making the design.

Then take the front section at under-arm seam, placing "T" on small "o" perforation above and tack. Close under-arm and right shoulder seams as notched. Leave left under-arm and shoulder edges as notched. Finish for closing. Hem shield and adjust to position underneath the front of the dress, matching large "O" perforations. Next,

Boys' SUIT (20 cents). Four sizes, 8 to 14 years. Size 8 requires 3 yards 36-inch material, $\frac{5}{8}$ yard 36-inch lining. Suit consists of a jacket and knickerbocker trousers, closing in front. Jacket has dart-fitted back, notched collar, pockets, and two-piece sleeves.

Old-Fashioned Marriage Proposal

By E. T. Murray

IT WAS rainy; it had been raining for three hours. Yet the young man remained loafing around the garden gate regardless of his dripping clothes. At last a middle-aged woman came to the door and indignantly demanded to know what he wanted.

"I've come a-courtin' your daughter," replied the young man sheepishly, hoping he would be asked inside.

"Courtin' Lizzie, eh?" said the woman with keen sarcasm. "Then you'd better run away and lose yourself! My Lizzie ain't goin' to marry anyone who ain't got the pluck to knock at the door and ask for her. Why, when her father came after me and found the door locked, he climbed the back wall, strangled the bull dog, and knocked the old man down. Then he grabbed hold of my hand and shoved on the ring and told me the banns were to be called the next Sunday. That's the sort of a husband I want for my girl—not a shivering idiot who ain't got enough sense to come in out of the rain!"

Boys' DOUBLE-BREASTED MACKINAW COAT (20 cents). Six sizes, 6 to 16 years. Size 12 requires 2 yards 54-inch material, $2\frac{5}{8}$ yards 36-inch lining. Coat has two-piece coat sleeves and three patch pockets. The collar may be closed high at the neck with a strap, or rolled with the fronts.

DRESS No. 9183. Sizes 34 to 46 inches bust. Price 35 cents.

DRESS No. 9196. Sizes 34 to 44 inches bust. Price 35 cents.

DRESS No. 9192. Sizes 34 to 44 inches bust. Price 35 cents.

DRESS No. 9160. Sizes 34 to 46 inches bust. Price 35 cents.

DRESS No. 9178. Sizes 34 to 46 inches bust. Price 35 cents.

The Baltimore and Ohio Railroad Company—Western Lines*

Locomotive Engine Crews:

Strive to "SAVE FUEL."

Avoid wasting steam at the pops. One minute unnecessary popping a day on every engine on the Baltimore and Ohio Western Lines, in one year, means a loss of \$10,000 in "FUEL."

Valves out, valves blowing, cylinder packing blowing, and various other leaks, tend to waste "FUEL," and all such conditions should be reported and corrected.

Endeavor to work engine at the shortest practicable cut-off at all times, so as to obtain full benefit of the expansive force of the steam.

Fuel is the greatest expense railroads have to bear, excepting wages. \$14,000,000 were spent for "FUEL" on the Baltimore and Ohio system in the year 1919.

Unless enginemen cooperate, we will be unable to "SAVE FUEL." Engineers and Firemen should work in harmony to obtain the best results.

Each engine crew should set an example in "SAVING FUEL."

Let each one become interested in "FUEL SAVING" and satisfactory results will follow.

*One of the bulletins now being issued by J. B. Carothers, Assistant to General Manager, Western Lines, in their fuel campaign.

New Opportunities for the Baltimore and Ohio in Philadelphia

By C. H. Pumphrey

District Freight Agent, Philadelphia, Pa.

PHILADELPHIA, where is supplied almost every requirement of the human race, is sometimes called the "World's Greatest Workshop." And this is entirely befitting its place in American history. When one recalls that here American freedom was conceived; here the Declaration of Independence and Constitution of the United States were written; here the first American flag was made and our first currency was minted, we realize that from the inception of the United States of America, Philadelphia has been preeminent in begetting the things vital to our political and commercial independence.

In population Philadelphia stands third among our cities, and official figures establish it as the second port in volume of tonnage in the United States, it being surpassed only by New York. Many advantages have given it this position of prominence, e. g., a thirty-foot channel from sea to port; modern, fireproof, double-decked piers of concrete construction and newest type mechanical handling equipment; good dry-

docking facilities; three great trunk lines for transporting goods from and to the seaboard, etc.

The Delaware River has been called the Clyde of America, because of the numerous shipyards for building and repairing, in operation along its banks. This is by no means an exaggerated comparison.

Philadelphia is preeminent not alone in shipbuilding, however, other important industries being: street car building, locomotive building, sugar refining, carpet weaving, confectionery, hats, woolens, textiles, electrical equipment and supplies, talking machines, motor trucks, chemicals, metals and machinery, leather and glazed kid, etc.

That these diverse industries have prospered is attested by the steady industrial growth of the city and the prosperity and contentment of the community. Philadelphia is noted as a city where a large proportion of the inhabitants reside in houses which they own, and as evidence of the thrift of its people, has outranked all our

Float Bridge, Pier 62

other cities in the relative importance of its savings institutions ever since the establishment of the savings bank in America, the first bank of this kind being opened in Philadelphia 104 years ago.

There has been no instrumentality of greater importance in the development of Philadelphia than the railroads serving it. Three trunk lines, the Baltimore and Ohio, Philadelphia and Reading, and Pennsylvania, afford its shippers and receivers a means of reaching the markets of the world, and the progress of the city commercially is a tribute to the efficiency with which they have functioned.

The Baltimore and Ohio was not the pioneer railroad reaching Philadelphia. When it obtained access to the city through extension of its Philadelphia branch and acquirement of the Schuylkill River East Side Railroad in 1886, it found the Pennsylv-

vania and Philadelphia and Reading Railroads already strongly fortified, and the struggle which has ensued has been one fraught with many difficulties. The Baltimore and Ohio, nevertheless, has steadily risen in the esteem of the shipping public of Philadelphia until today it has a host of staunch friends and patrons.

The most important thing done in recent years to enhance the prestige of our Company in Philadelphia was the establishment here of an Assistant General Freight Agency in December, 1916, and the transfer, the following April, of the offices of the Freight Traffic Department to quarters in the Widener Building, newly furnished throughout. These offices have since been referred to as the show quarters of the System outside of Baltimore.

Prior to this step the feeling existed that the Baltimore and Ohio cared little for

Philadelphia's trade and was satisfied to allow competing lines to haul the lion's share of the tonnage. This feeling is no longer manifest because of the fact that the new regime, by an energetic campaign and an ever-readiness to cater to the interests of the shipping public, is showing in no unmistakable manner that there is another "Richmond" in the field.

Along the Delaware River front, the Baltimore and Ohio maintains stations at Piers 11, 12 and 40 North and at Piers 22, 62 and 78 South, the four first named being served by float from Pier 62. Other sections of the city are served with stations at Twenty-fourth and Race Streets, Broad Street and Oregon Avenue and Fifty-eighth Street, these being reached by direct track connection, and our inland station at Lehigh Avenue and Howard Street.

We also have team track facilities of varying capacities at Pier 40 North, Pier 62 South, Broad Street and Oregon Avenue, Fifty-eighth Street, Twenty-fourth and Bainbridge Streets, Twenty-fifth and Callowhill Streets, Twenty-fourth and Race Streets and Locust Street, being equipped at the latter two points with platforms for the convenient loading and unloading of automobiles.

Pier 78 South is our foreign terminal. This facility was but recently acquired, our lease from the city of Philadelphia, covering the south side of the pier, having been consummated August 1, 1919. Municipal Pier 78 is one of a number constructed by the City of Philadelphia and is thoroughly up-to-date in every particular. It is a double-deck pier, 900 feet long and 250 feet wide,

Train Shed, 24th and Chestnut Streets, Philadelphia

Ash pit and coal chute, East Side Yard, Philadelphia

equipped with the latest devices for the rapid handling of freight, electric elevators, conveyors, chutes, etc. The Baltimore and Ohio had been without a foreign terminal since the destruction by fire of its old Pier 80 in 1912, and the acquisition of Pier 78 should enable our securing a much larger share of the foreign tonnage moving via the Port of Philadelphia. The MAGAZINE of November, 1919, contained an article with descriptive cuts covering Pier 78.

The Baltimore and Ohio is gradually reaching out and obtaining rights in other sections of the city. Through an agreement with the Philadelphia Belt Line and Philadelphia and Reading a few years ago, the Baltimore and Ohio acquired rights over the portion of the Belt Line south of Callowhill Street, which affords access to certain warehouses and piers along the Delaware Avenue waterfront.

A more recent agreement with the City of Philadelphia, providing for the abolition of railroad grade crossings in the section of the city lying south of Christian Street and between the Delaware and Schuylkill Rivers, commonly referred to as the "South Philadelphia Improvement Plan," will open up a large area for industrial development which will be served by the Baltimore and Ohio on an equal footing with competitors.

The following excerpt from a statement prepared by the Department of Public Works in the latter part of 1913 gives an idea of the scope of the development in contemplation by the Municipality in South Philadelphia:

"This site has been looked upon by the Department of Wharves for a long time as the logical location for the concentration of port improvements in this city for some years to come, and the consumma-

tion of the long-drawn-out negotiations with the railroads removes the principal obstacle in the way of what it is believed can and will be made into the finest, completest, and most noteworthy single terminal development on this side of the Atlantic.

"Bearing in mind the fact that the modern steamship terminal is not merely an aggregation of an indefinite number of piers, but must provide, in a logical scheme, for the effective coordination of the various units necessary to make it a complete working entity, the Dock Department has prepared preliminary plans for the construction of a dozen or more piers in this section, each 1,200 feet long by 300 feet wide, with docks between them of the same width as the piers, and with railroad yards located in the rear between the ends of the piers and Delaware Avenue. Storage warehouses for commodities of every kind received from the ships and held for local consumption or shipment into the interior, or *vice versa*, and a factory section somewhat along the lines of the great Bush Ter-

minal in Brooklyn, are planned to be located on the westerly side of Delaware Avenue. It is regarded as a practical certainty that the construction of these proposed piers would be followed by the location convenient to them of many manufacturing establishments which use large quantities of imported raw materials, and with them would come the concurrent residential upbuilding of the section in the rear of the factories.

"These preliminary plans contemplate piers and mechanical equipment of the most advanced type of construction, and the building of the first of them will mark a long step in advance of anything yet attempted in this line in Philadelphia or any other American port. It is recognized that this is not the work of a few months, or even two or three years, but the commencement of this great work is looked for in the near future and all necessary preparations are being made by the engineers of the Department with that end in view."

The improvement work was under way and progressing when, in a partially finished

Our Philadelphia landmark, the Baltimore and Ohio Passenger Station

condition, it was unavoidably suspended because of the War. It is expected that the work will be resumed soon.

The Baltimore and Ohio was growing steadily as a factor in the handling of freight business into and out of Philadelphia, when all competitive solicitation was discontinued coincident with the Government taking over the control of the railroads as a war measure.

Unifications under Federal control had the effect of discontinuing the use of some of our facilities, closing one station outright and limiting others to carload traffic, where formerly both carload and less carload business was handled in and outbound. The return of the roads to the Corporate owners again places us in full control of all facilities that can be mustered and thus prepares us to meet the friendly enemy on as near a parity as is possible.

Our traffic forces were also depleted, the solicitor seeking other scenes of activity in the country's service, the industrial field, etc., and these forces have been rebuilt with material of a calibre which is worthily upholding the prestige of our Company.

We look to the future with confidence that, through the earnest cooperation of all departments in Philadelphia, the business handled by the Baltimore and Ohio will exceed the greatest expectations.

Office force of the Assistant General Freight Agent, Widener Building, Philadelphia

Exactly, but you ask a person who has sat in a kitchen in England and he will tell you that the hob is a shelf on the side of the open fireplace on which articles to be kept warm are placed. Charles Dickens, in his inimitable description of home life, speaks of "the kettle singing on the hob."

Ask a wheelwright what a hob is and he will point to the center or nave of a wheel or hub, as it is more generally called.

You show an English mechanic a hob and he will say, "That's a master tap."

A manufacturer of gears will call a hob "a forming tool."

The last three observations can all be applied to a hob such as is used by tap and die manufacturers. This hob or master tap or forming tool *taps out* and *forms* the thread in the center of the die blank.

Then this thread in the finished die reproduces the original hob thread on screw

stock or whatever material is threaded so that just as the hob or hub or center of a wheel is practically the most essential part and from which radiate the spokes and rim, so the hob is the center from which the die and threaded piece are originated and the success of these depends fundamentally on the perfection of the threaded hob, or master tap or forming tool.

Personally I think the term "Master Tap" even more expressive, as the word "Master" gives an idea of the superiority required of this tool over regular taps in the tapping operation or hobbing as it is called, just as the terms Master Gage, Master Jig, are applied to their respective lines.

To sum up, "A hob is a specially designed tap for forming the thread on dies which are to be used later in forming screws or screw threads of the same size and pitch as those on the hob."

Screw-thread Etymology

Trailing a Word to its Lair
"What's a Hob and Why"

By George H. Bottom

OH YES! I can see you old-timers begin to grin and put on a superior look and think what a simple question that is and murmur, "Why a hob is a-a-er-er—why it's a hob, of course. I can't just explain it, but I know what it is."

Pneumatic chisel, metal fragments flying and goggles where they will do no good. Will he learn from some other fellow's bitter experience or must he pay the price of disobeying orders, too?

He Could be Trusted

A man got into a cab at the Richmond railway station and said:

"Drive me to a haberdasher's."

"Yaas, suh," said the driver, as he whipped up his horse and drove a block; then, leaning over to address his passenger, said:

"'Scuse me, boss, but whar d'yu say you want'er go?"

"To a haberdasher's."

"Yaas, suh; yaas, suh!"

After another block there was the same performance.

"'Scuse me, boss, but whar d'yu say you want'er go?"

"To a haberdasher's," was the somewhat impatient reply.

Then came the final appeal.

"Now, look a-here, boss, I be'n drivin' in dis town twenty years and I ain't never giv' nobody away yit. Now, you jus' tell dis nigger whar 'tis you want'er go."—Minnesota *Foolsap*.

When Kitty Cat Saw Santa Claus

KITTY CAT sat on the back doorstep washing her face and hands. "Hello there, Kitty," called Tommy Cat, who lived next door, as he sprang to the top of the wooden fence that separated the two houses, "What are you cleaning up for?"

"Oh, don't you know?" asked Kitty, "Why, tomorrow is Christmas."

"Well, what of it?" asked Tommy.

"Santa Claus comes tonight!" cried Kitty, as she stopped washing her paws long enough to chase her tail 'round and 'round in a circle about six times.

"But Santa Claus does not come to see cats," argued Tommy.

"No? Well, you'll see, Mr. Tommy, you'll see. I know just what I shall do. After the children have gone to sleep, I shall just wait up and see Santa Claus for myself; then I shall ask him for a gift. I know that he will give me one, for Doris says that he is the kindest person alive."

"Oh, maybe so, but I don't believe it," answered Tommy, "I'm going to hunt for a nice fat mouse. Want to go along?"

"No, thanks," answered Kitty, "I haven't finished my bath, and I must be nice and clean when Santa Claus comes."

Just then some tiny snow flakes began to fall.

"Mew, mew, mew," said Kitty to herself, "Isn't this just fine? Now Santa Claus can come in his sleigh." And she finished her bath and went into the house and sat on the rug before the kitchen fire. Soon Doris came in.

"Oh, Kitty Cat," she said as she stroked Kitty's fur and patted her on the head, "don't you wish that Santa Claus would come to see you?"

But Kitty Cat only answered "Pur-r-r-r!"

When Doris and her brother Teddy went to bed that night the snow was already two inches deep all over the ground, and it was still falling. The houses, the fences, and even the trees were all beautiful and white.

"I do hope that Santa Claus brings me a nice sled," whispered Teddy as they went up the steps. And Kitty Cat, who had followed them to the foot of the staircase, wished so too. Then she went back to the rug in the kitchen.

It must have been late in the night that Kitty Cat was awakened from her nap by the sound of sleigh bells. She jumped up with a start. Before she knew it,

Santa Claus was coming right down the chimney and into the room where Doris and Teddy had hung their stockings. Kitty Cat had just time enough to hide under the table. She watched Santa as he drew out of his pack just the prettiest little red sled that she had ever seen. He laid this

on the floor just under Teddy's stocking. Then came the most wonderful doll, with eyes that would open and shut and lovely curly hair. This was for Doris. Kitty Cat held her breath. Then Santa filled both stockings to the very tops and started to go when Kitty Cat came right out from under the table.

"If you please, Mr. Santa Claus," she began, "I wish you a Merry Christmas."

"Bless my soul, what's this?" asked Santa Claus, nearly startled out of his wits, "Why—why—it's really a pussy cat, isn't it? Why—why—bless my soul, who are you? What's your name?"

"I'm just Kitty Cat, sir," she answered, making her best bow, "and I was wondering if you might have just a wee, little present in your pack for me—that is, if you ever carry anything for cats," she added, respectfully.

(Continued on third page following)

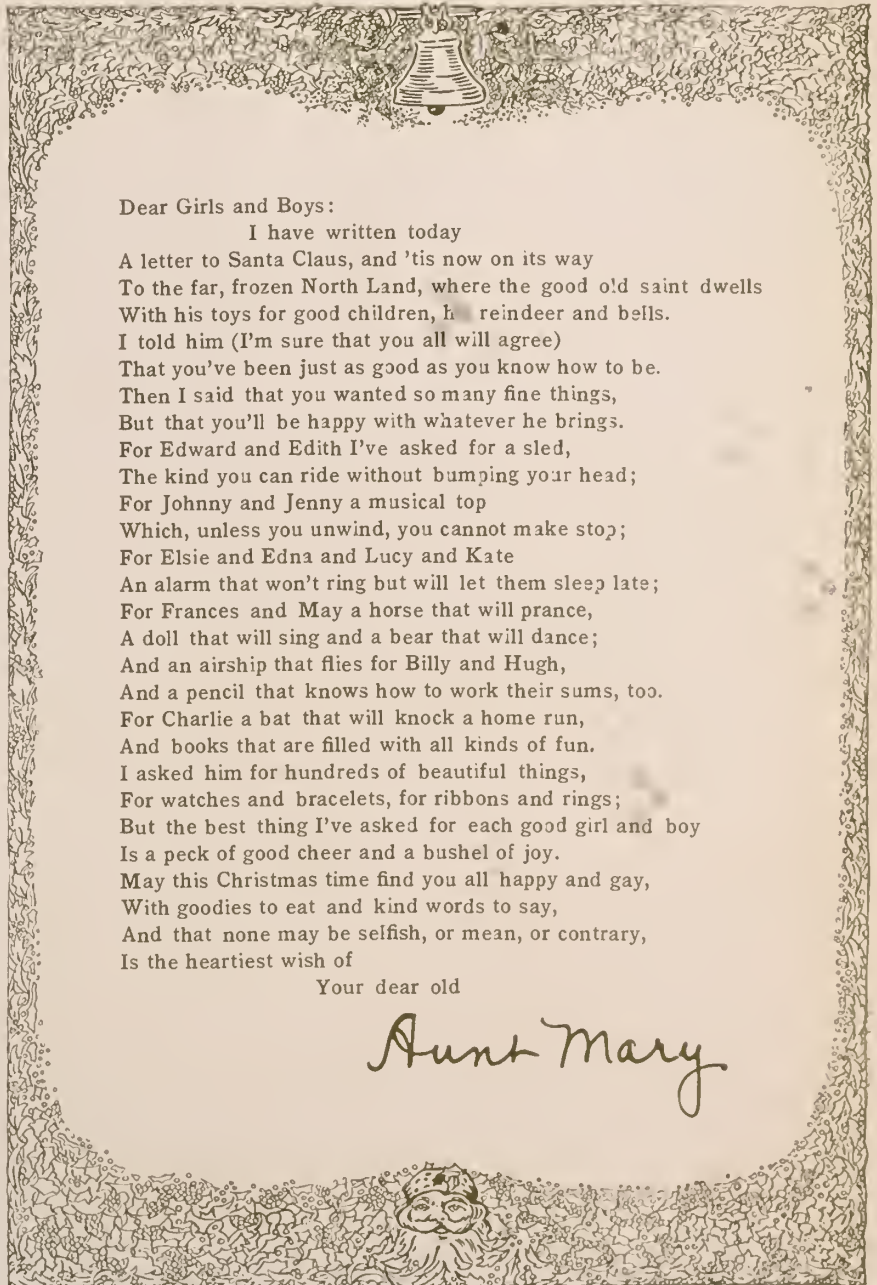

Dear Girls and Boys:

I have written today

A letter to Santa Claus, and 'tis now on its way
To the far, frozen North Land, where the good old saint dwells
With his toys for good children, his reindeer and bells.
I told him (I'm sure that you all will agree)
That you've been just as good as you know how to be.
Then I said that you wanted so many fine things,
But that you'll be happy with whatever he brings.
For Edward and Edith I've asked for a sled,
The kind you can ride without bumping your head;
For Johnny and Jenny a musical top
Which, unless you unwind, you cannot make stop;
For Elsie and Edna and Lucy and Kate
An alarm that won't ring but will let them sleep late;
For Frances and May a horse that will prance,
A doll that will sing and a bear that will dance;
And an airship that flies for Billy and Hugh,
And a pencil that knows how to work their sums, too.
For Charlie a bat that will knock a home run,
And books that are filled with all kinds of fun.
I asked him for hundreds of beautiful things,
For watches and bracelets, for ribbons and rings;
But the best thing I've asked for each good girl and boy
Is a peck of good cheer and a bushel of joy.
May this Christmas time find you all happy and gay,
With goodies to eat and kind words to say,
And that none may be selfish, or mean, or contrary,
Is the heartiest wish of

Your dear old

Aunt Mary

The Christmas Ship

Painted by R. M. Billmeyer

THE CHRISTMAS SHIP

BY LOUIS M. GRICE

ILLUSTRATED BY R. M. BILLMEYER

Ho! from the prow of the Christmas ship curls
Spray as she speeds along laden with toys—
Bearing such wonderful trinkets for girls—
Trumpets and jack-knives and jimcracks for boys!
Storms may assail her and breakers may crash;
Shoals may endanger by day and by night;
Yet will this magical dream-vessel dash
Into the harbor of Children's Delight.

Wonders from far-away countries she brings—
Strange little manikins made in Japan;
Games and queer puzzles and curious rings;
Tea-sets and many a beautiful fan;
Cute, dancing dolls from the toy marts of Spain;
And from old Nuremberg engines that go
Speeding in safety with tender and train,
Just like they do on the swift B. and O.

Then she is bringing such goodies to eat—
Walnuts, plum-puddings and candies galore!
My sakes alive! what a glorious treat
Every good, dutiful child has in store!
Soon will the tea-set be used the first time—
Mary will serve Tom and Bobby—her guests;
And the glad Christmas bells swinging, will chime
Joyfully over these little love-nests.

Sail along, Christmas ship! glide along fast
Over the sea of dreams hallowed by youth!
Come with your sails straining every tall mast—
Gladden child-eyes that reflect faith and truth:
Swing into port and your cargo unload;
Stevedores elfin will aid you, nor pause
Till every present is out on the road
Safe in the pack of the good Santa Claus!

R. M. BILLMEYER

The Christmas stocking that grew to be a pussy cat

When Kitty Cat Saw Santa Claus

(Continued from third page preceding)

"Ha! Ha! Ha!" laughed Santa Claus, as he stooped down and patted Kitty Cat on her soft little furry ears, "Anything for cats, eh? Well, I should say so. Now, just what would you like to have?"

"Oh, anything, sir, that you think a cat might like; you see, I want to share it with Tommy Cat, who lives next door."

"Oh, you do, eh? Well, let's see what I can find."

He opened his pack and took out a pretty little dish, which he placed on the floor. Then he took out a big bottle of sweet cream and filled the dish.

"How's that?" he asked.

"Just splendid," answered Kitty, walking 'round and 'round the dish, purring softly as she went.

Then Santa opened a big tin box and took out two nice sausages and laid them beside the dish of cream. Kitty Cat's eyes grew almost as big as the dish. But the best gift was yet to come—a lovely bunch of catnip, all tied up with a red ribbon on which hung a little bell. Then Santa tied up his pack, wished Kitty Cat a Merry Christmas, and was gone up the chimney again before Kitty Cat could say a single word, for she was so happy.

Next morning Kitty Cat was up on the back fence long before Tommy was even

out of bed. She called and called. At last he came, rubbing his sleepy eyes as he crept along.

"Where on earth did you get that pretty ribbon and bell?" he asked as soon as he spied them hanging about Kitty's neck.

"Come and see what else Santa brought me," said Kitty.

Tommy came over the fence with a bound. Soon they were on the back step and in the kitchen. Sure enough, right there under the table were the dish of cream and the two sausages.

"Well!" cried Tommy Cat, for he was too surprised to say anything else.

Then he stayed to breakfast, for Kitty invited him. And while they lapped the cream and ate the sausages, they saw Doris and Teddy go out with the doll and the sled. How happy everybody seemed to be! It was all because dear old Santa Claus had been so good and kind.

After breakfast, Kitty showed Tommy the catnip, and she even let him roll in it. Then she gave him a bit of it to take home. They both declared that this was the nicest Christmas that they had ever spent. Next Christmas, both Kitty and Tommy will hang up their stockings, for now they know that Santa Claus brings presents to good cats as well as to good little girls and boys.

Here's a Christmas Stocking that Grew to be a Pussy Cat

ONCE upon a time a little girl hung up her stocking beside the chimney place for Santa Claus to fill. Then she went to bed. By and by Santa Claus came down the chimney and went to fill the stocking. But what do you think he found? That the stocking had a big hole right in the end of the toe.

"What shall I do?" he said to himself. "Oh, I know, I'll give her another stocking and I'll take this one home to Mrs. Santa."

"Can you use this?" he asked Mrs. Santa when he got home the next day.

"Certainly, I can make a pussy cat of it," she answered, getting out her needles and thread. Then she made the nicest kind of a pussy cat for the little girl, and the next year Santa took it back with him and gave it to little Alice, for that was her name.

Now I am going to tell you how Mrs. Santa Claus made that cat so that you can make one for yourself. Look at the pictures on this page and you can almost tell without my showing you.

First of all she took the stocking, which was a long black one, and cut just the very tip end, just enough so that she could get her hand in. Then she took a needle and black thread and sewed the top of the stocking together as in figure 1. Then she made little ears by winding the thread around the corners as in figure 2. Next, she stuffed the stocking very tight with cotton wool until it was puffed way out as far as the middle of it, tying another piece of cotton tightly a few inches down to form the head, and another at the bottom of the stuffed part to form the body (figure 3),

and wrapping the cotton 'round and round and 'round on the part that is not stuffed so as to make the long tail, as you see in figure 4. Then she took two big white buttons and sewed them on for eyes, and with white cotton made a mouth, a nose, and a set of whiskers. Then she tied a pretty red ribbon around its neck—and there! Who would want a handsomer cat?

A Gift for the Whole Family—Safety

Children of the Railroad can help their mothers and daddies, their sisters and brothers, to no finer gift than that of health and strength, by saying to their loved ones as they go to work on track or in shop "be careful, always."

Do You Know this Little Girl?

SHE is Miss Mary Leona Loretta Allen, the 12-year-old daughter of Foreman and Mrs. Edward Allen, Timber Preserving Plant, Green Spring, W. Va. She is an accomplished little lady and her parents are very proud of her. Mary Leona Loretta can bake fine cakes, cook, keep house, and sew most anything for her little brothers; she is quite an elocutionist and a fairly good singer; she can play the organ and do stunts on her new violin.

She has always been attentive to her Sunday school and church and she wants to be a Christian worker when she grows up. There is no doubt but that she will accomplish her wish, for she seems to be successful in everything that she undertakes.

She is in the fifth grade at school. How many more of our little railroad girls can do as well as this one? If there are any, let Aunt Mary have your photographs along with the letters that you are going to write to her.

Wouldn't you like to hear Mary Leona Loretta Allen play the violin?

Blows— Cylinder, Valve, By-Pass

By *J. L. Shriver,*

Road Foreman of Engines, and

J. A. Tschuor,

Master Mechanic, New Castle, Pa.

BLOWS on a locomotive are most annoying, to say the least, and they are very expensive because of the serious waste of steam, which means a waste of fuel.

While limiting the supply of valve oil will eventually cause a blow, it is not, however, the only cause of the trouble. Valves that have not been properly fitted to their seats, badly fitted balance strips, a weak or broken spring under the balance strips, balance strips stuck down, a broken valve or a broken bridge—all these will cause a blow.

Blows due to valves not being properly fitted to their seats, a scored valve face or valve seat will have a continuous shrill, sharp sound. To locate—Place the engine on the quarter and the valve central on its seat, set brake, open the cylinder cocks, open throttle, and if the steam appears at the cylinder cocks, the trouble is on that side.

Balance strip blows due to the badly fitted balance strips, weak or broken springs under the balance strips, or the balance strips stuck down—the blow will be a continuous one, the sound being similar to that which is made by a blower when it is partly opened. To locate—Place the engine on the quarter on the right side, the valve central on its seat, set brake, open the throttle, and move the reverse lever from the forward to the back corner, then place the engine on the quarter on the left side. If the reverse lever moves considerably more easily in this position, the trouble is in the right valve, due to the right valve having the long travel while the right side is on the quarter, while the left valve has a short travel equivalent to twice the increased lead.

Another method of locating a balance strip blow is this: If engine has drain cocks in the exhaust port, open drain cocks, have someone give engine steam with the engine brake applied, and the side the steam appears at the drain cock will be the troublesome one.

Blows in the piston valve chamber are invariably caused by lack of lubrication, which is sometimes due to dirty lubricator, pockets in oil pipes, worn choke plugs, leaks in oil pipes, or improper oil pipe connections. Other causes for blows in the piston valve chambers are: poorly fitted or broken packing rings, a loose spool, badly worn or loose valve bushing, a valve steam guide

out of line, or drifting saturated or super-heater engine with a closed throttle.

Blows caused by badly worn or broken packing rings will be noticed as the crank pin is nearing the eighth. If the admission ring is blowing it will cause a very serious lameness.

For a standing test for a defective admission ring—Place engine on the quarter on the side to be tested, place the valve central on its seat, set brake and give engine steam, and if the steam appears at either cylinder cock, the trouble will be in the corresponding end of the valve.

An exhaust ring blow will cause engine to go lame, giving the engine three normal and one light dragging exhaust. By observing the crosshead and noting on which side of the engine the light exhaust takes place, the defective side may be detected.

Blows caused by drifting an engine with the closed throttle are due to little or no oil reaching the wall of the valve chamber, as the oil will settle in the pocket which is invariably found between the front and the back valve bushings. Air drawn to cylinders through the cylinder cocks is compressed in the cylinders, enters the valve chamber through by-pass valves, but does not have enough expansive force to disturb the oil that settles in the pocket of the valve chamber. And should the oil in the valve chamber pockets be disturbed by the compressed air from cylinders being forced into the valve chamber, it will not travel any further than the valve chamber walls, and if the engine is drifted any distance it will become very dry, causing increased friction both in the valve chamber and cylinder, resulting in the badly worn cylinder packing rings, and sometimes badly worn pistons on saturated engines, while on the super-heated engines the liabilities are greater, owing to the temperature of the cylinder being above the flashing point of the oil. When the throttle is closed the cold air is drawn to the cylinders through the cylinder cocks, which causes the lubricant clinging to the walls to be destroyed.

Cylinder blows may also be caused by vertical or lateral motion of the crosshead, giving the piston an uneven sweep through the cylinder, and as pistons are from five to six inches in thickness it will cause an uneven wear of both the packing ring and piston, which in time will result in a blow in the cylinder. The continual priming or foaming of water in the boiler will cause the

lubrication to be washed from the bearing surface, which will eventually promote friction to the extent that a blow will be the result in the valve or cylinders or both.

Blows in the cylinders may be located by watching the movement of the crosshead as it blows the hardest at the beginning of the stroke and decreases as the stroke is being completed. A blow of this kind produces a peculiar roaring sound.

To make a standing test for cylinder blows—Place the engine on the right top forward eighth, set the brake and open cylinder cocks, place the reverse lever in the full gear forward and give engine steam. If the steam appears at both cylinder cocks on either side, that will be the side on which you will find the trouble.

By-Pass Valve blows may be caused by a broken by-pass or a badly worn valve or valve seat. It is sometimes hard to distinguish by sound a by-pass valve blow from a valve blow. In testing for a by-pass blow, it is well to remember that the blow is prominent only when the exhaust is opened.

To locate a defective by-pass valve—Place engine on the quarter on the side it is to be tested, apply brakes, give engine steam and move the reverse lever to position which will close the front exhaust port. If blow ceases, the front by-pass should be reported defective. If the engine continues to blow, move the reverse lever to a position to close the back exhaust port, and if the blow ceases, the trouble will be found in the back by-pass valve.

The following are a few suggestions we wish to offer with a view to eliminate such irregularities mentioned above, which we feel are responsible at times for improper lubrication.

1. Dirty or Defective Lubricators

Would recommend that the lubricators be blown out and thoroughly tested before each trip. Care should be taken to see that all the steam and regulating valves are properly open and the feed nozzles are free from corrosion. Would further recommend that all pipes leading to or from the lubricator be thoroughly lagged. It will be found that by placing a small piece of soap in the lubricator occasionally it will assist greatly in keeping the walls, passages and the sight feed glasses clean, if, after oil is fed out, the soapy water is allowed to feed through the sight feed chambers.

2. Pockets in Oil Pipes

Pockets in oil pipes are generally due to the lubricator being improperly located, making it necessary to elevate the pipes at some point or points to avoid coming in contact with some part of the boiler or attachments. As most lubricators are located on the right side of cab, traps are usually found in the cab around the flexible caps or around air pump brackets in the pipe leading to the left cylinder, while traps are rarely found in the pipe leading to the

right cylinder except at the superheater damper bracket. Traps are sometimes found in the oil pipes when lubricators are properly located. This is due to the excessive length of piping used, making it necessary to bend the pipe to make the proper connections.

When oil pipes are suspected of containing traps under jacket, would recommend that the pipe be blown out thoroughly with steam, then disconnected at both the steam chests and the lubricator connections, and a certain amount of water poured into the pipe at the lubricator and drained into another vessel at the steam chest. If the amount received is not the same as the amount that was admitted, it will be apparent that the oil pipe contains traps or leaks. Would recommend that the lubricators be placed as high as consistent and centrally located lengthwise with the boiler.

3. Worn Choke Plugs

With them the lubricator generally feeds much faster when the throttle is closed than when the throttle is open. This is due to the unequal pressures.

To make a standing test for defective choke plugs—Place the reverse lever in the center, apply the brakes, open throttle and determine by a watch the rate of feed per minute. Then close the throttle and open the cylinder cocks and if the rate of feed increases, it can be safely charged to the worn choke plug opening, which should be turned. And if along the line of road choke plugs are found to be worn on both sides, would recommend that the enginemen use the displacement system, that is, by throttling the water valve on lubricator so just enough water is admitted to the reservoir to displace the oil that is needed to lubricate the engine.

4. Improper Oil Pipe Connections

They are often the cause of engines not lubricating properly. This is sometimes caused by the oil not mixing properly with the steam before portion of the oil is carried to the exhaust, due to blows in the valves. This is particularly true where oil is admitted to the steam chest direct.

To correct, would recommend that the oil delivery connections on the piston valve engine be made in the steam passage at least one (1) foot from the steam chest, and the extension used on the choke plug fitting so the oil will be carried to the center of the steam passage at an angle of at least 45 degrees in the direction of the flow of the steam to give ample time for the oil to mix thoroughly with the steam before coming into contact with the parts that are to be lubricated.

Although there may be many different kinds of blows and many causes for the same, many of the blows that have existed and caused decreased efficiency could have been prevented if the engine had been properly handled. Engineers should be instructed with a view of having them fully

realize the importance of proper lubrication so as to avoid friction to the bearing surfaces, which in turn will assist in eliminating blows.

To insure proper lubrication it is necessary for the engineer to see that the lubricator is properly operating, not only when leaving terminal but during the trip. Lubricators should be checked often to insure a uniformity of the feed, which is very essential to perfect lubrication. By checking the lubricator often any condition or irregularity which might occur to it could be noticed and corrections made before the valve or the cylinder suffers.

Many of the blows have been due to the fact that the engineer has waited for the jumping of the reverse lever or the groaning of the cylinder to notify him that trouble was existing before taking any action to prevent it, and when this is the case it is generally found that the damage has been done before the remedy was applied. However, if the engineer does check lubricator carefully to see that the proper amount of oil reaches the valve and cylinders, it will be of very little benefit if he is inclined to be careless in his method of operating the injectors and allows the boilers to fill to the priming point. For when water is permitted to enter the valve chambers or cylinders, it means that the lubrication is washed away and the bearing against bearing condition will exist until sufficient oil is again given and has adhered to the

bearing surfaces sufficiently to separate them.

With a view of having the proper amount of water maintained in the boiler, the engineer should personally operate the injector when possible and frequently check both the water glass and gauge cocks to know the correct level of the water at all times, which should never be more than a flutter of water at the top gauge cock.

The manipulation of the throttle and reverse levers are factors that should not and cannot be overlooked if the proper lubrication is expected. An engineer should have no set practice in handling the reverse lever or throttle. This is particularly true on pooled engines. The engineer should be in position to adopt such methods of handling the throttle and reverse lever to offset any peculiarities of the engine and not expect or wait for the engine to adapt itself to his mode of running.

The wide open throttle and short cut-off are feasible at times, but it should not be recommended for a standard practice. Better results can invariably be gained by the use of the partly open throttle and, if necessary, a little longer cut-off. This is especially true with the superheated engines.

In making stops it should be the practice of the engineer to drop his reverse lever about to half stroke, and steam should be kept in cylinders until engine has come to a stop.

The Advantages of Telephone Train Dispatching and Message Circuits

By B. F. Thompson

Telephone Engineer, Telegraph Department

BY THE use of telephone dispatching circuits a dispatcher can handle one-third longer section with greater ease than by Morse circuit; therefore, if the same section is equipped he is handling only a two-third load.

He is able to talk direct with engineer or conductor, while with the Morse he has to transmit to the operator, who telephones it to the end of siding, gets the conductor's or engineer's answer and retransmits it by Morse to the dispatcher.

With the telephone, the operator connects siding line direct on the dispatching circuit and the engineer or conductor talks from end of siding direct with the dispatcher.

Another advantage is that the dispatcher rings each office direct and gets an answer back showing that bell is ringing at way station; while with the Morse he has to call until the operator answers in Morse characters. With the telephone he is also able to talk with the first operator and at the same time ring the second operator in.

The telephone train dispatching circuit also saves overtime in the movement of trains, causing faster handling of traffic and

increase in tonnage moved within a certain period, thus increasing the average car mileage.

We can work an additional Morse circuit over the telephone train dispatching circuit without interfering with the dispatching circuit. This Morse simplex wire can be used as a part of a Morse through circuit; for example, we can use a single Morse wire Baltimore to Washington Junction, simplex over telephone circuit Washington Junction to Cumberland, and a single Morse wire from Cumberland to Pittsburgh, thus saving the building of an additional wire for Morse service between Washington Junction and Cumberland, 100 miles, at a cost of \$5,200.

The connection of a simplex circuit is simple. We use simplex coils at both terminals of the dispatching circuit, connecting resistances in series with both sides of the coil, the coil and resistances being in multiple with the line. The resistance inserted depends upon the amount of resistance of bridge at the point where coils are placed and the potential at that point. The amount of

The Railroad Power Plant

By W. J. Barnes

Engineer of Power Plants—Western Lines

THE power plant is generally one of the inconspicuous portions of a railroad terminal point, yet it is a vital factor in every activity of the terminal. It bears the same relation to the life of the terminal that the human heart does to the rest of the body. So long as the power plant functions properly there should be no serious interruption to terminal operation, but when any difficulty is experienced in the power plant the effects are felt in every department.

What Power Plant Does

The function of the power plant is to supply the necessary energy in the proper form for terminal operation. The output of the plant consists of steam, compressed air, electrical energy and hot and cold water. The steam is used for heating purposes, blowing locomotives and power generation. Compressed air is used for operation of portable air motors which are used for drilling, reaming, etc.; for air hammers used in boiler work; for operation of hoists and presses; for blowing coaches and for elevating sand. The hot and cold water is used principally for washing and filling locomotive boilers.

Its Equipment

The equipment of the average power plant on our Western Lines consists of two

to four boilers which are either hand or stoker fired, electrical generating units, steam driven air compressors and various pumps.

Coal the Largest Expense Item

During the year 1919 there was burned in the power plants on Western Lines about 135,000 tons of coal. This, if it could be hauled at one time, would make a train of 2,700 cars, the length of which would be nearly 18 miles. The cost of this coal represented about 60 per cent. of the total cost of operation of our 26 power plants. During this year the effects of the strenuous efforts made to conserve coal were evident and a resulting decrease amounting to about 12,000 tons was noted in the coal consumption as compared with that of the preceding year. This saving was due to the wholehearted cooperation of power plant men and every one who used any of the products of the plant.

Easily Prevented Waste

The peculiar and distressing feature about power waste is that it occurs in plain view of the person responsible, but because of the more or less abstract character of the losses, they frequently pass unnoticed.

An electric light which burns unnecessarily represents the waste of a fraction of a ton of coal.

The drip of a water valve on the wash and fill line in the roundhouse is a waste which may be measured in terms of the coal pile.

A leak in the ball joint in the connection from the steam blower line to the smoke box of a locomotive may waste more steam than is actually required to properly draft the engine.

The drain of a heating radiator is a common source of waste. It has been more or less usual practice in the past to run the drain from the radiator to the atmosphere controlling the discharge by a globe valve. These valves have a peculiar habit of apparently opening themselves and blowing live steam away. The average person thinks it necessary to have steam discharging from the drain in order that the radiators may be kept hot. As a matter of fact, it is only necessary to drain away the condensed steam in order to obtain the maximum heating effect. At the present time an effort is being made to attach small automatic traps to all radiator outlets in order that wilful waste may be prevented.

Uncovered steam lines waste coal at an astonishing rate. This waste is caused by loss of heat due to radiation, resulting in condensation of steam in the pipe. It has been determined by test that about nine feet of one inch steam line which has no insulating covering, will waste one ton of coal per year. Proper protective covering will reduce this loss to about one-tenth of

Common steam leaks which waste much coal

Uncovered steam lines waste coal

This steam should have been used in heating coaches instead of causing a violation of "Safety First"

Stacks should not smoke as this one did

Steam leak resulting from a bare steam line buried in the ground—a great coal waster

one ton in the same length of time. The amount of uncovered steam surface, which was to be found about railroad shops in the past, was so large as to be almost unbelievable. Rapid strides have been made in recent years to reduce to a minimum, waste from this source, and it is expected that wastes of this nature will be eliminated entirely in the near future.

High Coal Prices Demand Economy

In view of the present high price of coal and the difficulty which is experienced in obtaining a sufficient amount to meet existing requirements, every attention should be given to conservation of power plant output. Economies will be effected in the future, as in the past, only by the team work of everyone who has anything to do with the power plant.

Organization and Supervision

The Electrical Engineer has general supervision of Power Plant Standards of Operation and Maintenance, while the Division Master Mechanic or Superintendent of Shops is directly responsible for proper application of these standards.

The engineering force of the Electrical Engineer prepares all plans and specifications for new power plant construction, and oversees the actual construction work. Minor maintenance work and general supervision of operation are handled on each district by a Power Plant Supervisor, who checks up operating conditions in power plants and assists the Master Mechanic in maintaining the power plants in the best possible condition, as regards operation and maintenance. This organization proved quite effective last year.

As a result of greater attention given to power plant matters, a reduction of about \$47,000 was made in the total cost of operation and maintenance of power plants on Western Lines as compared with costs during the preceding year 1918.

The Advantages of Telephone Train Dispatching and Message Circuits

(Continued from page 38)

current flowing through coil is generally 44 milli-amperes at distant end and 36 milli-amperes at dispatcher's end. The telegraph wire is connected at neutral point of coil and the current is divided equally over both telephone wires to the distant end.

The dispatcher has an automatic key cabinet containing a key for each station on the line. This key cabinet controls a local relay which operates through a local battery, the main line points of which connect the main line battery through retardation coils which smooth out the kick of battery, thence to line. The code of impulses sent out by the automatic key passes through the coils of each selector, which are bridged across the line. The only one which closes its local contacts is the one of the same combination transmitted, each key being of a different combination.

All the relay points are bridged by condensers and resistances to prevent burning of the points. The telephones are in multiple with the line through condensers which do not permit the direct current of main battery to pass through telephone when a call is made. Each selector has inserted in series with it a resistance to permit ten milli-amperes of current to pass through selector coils. The time is not far off when we will be able to get an additional telephone circuit over the dispatching circuit which can be used as a trunk between two private branch exchanges, by the use of wired wireless telephones.

We have telephone train dispatching circuits extending between Washington Junction, Md., and St. Louis, Mo., a distance of 845 miles, with branches leading therefrom as follows:

Clarksburg to Hartzel and from Clarksburg to Fairmont, operated from Grafton,

65.8 miles; Hamden to Portsmouth, operated from Chillicothe, 85.6 miles; Midland City to Columbus, operated from Chillicothe, 124 miles; Cincinnati Terminal, Cincinnati to Toledo, 202.9 miles; North Vernon to Louisville, operated from Seymour, 72.7 miles; Flora to Beardstown and Flora to Shawneetown, 228.5 miles. In addition we have the same class of circuits: Tottenville to Clifton, 12.6 miles; South Beach to Cranford, 16.2 miles; Baltimore Terminal, 17.6 miles; Connellsville to Johnstown, 78.5 miles; Connellsville to Fairmont, 69 miles; Pittsburgh to Wheeling, 68 miles; Wheeling to Grafton, 99.8 miles; Wheeling to Holloway, 40 miles; Newark to Wheeling, 108 miles; Dayton to Wellston, 115.6 miles; Jenkins to Shelby, 31 miles; total, 2263.2 miles.

All of these telephone train dispatching circuits are paralleled with telephone message circuits which are used normally as side wires and to make the telephone train circuits good when they fail, with the following exceptions: West End Cumberland Division, Ohio Division, Toledo Division and Illinois Division. On these divisions when the telephone train circuit fails, we use Morse telegraph circuits in lieu thereof until telephone circuits are restored.

Cars**

Aunt Mary Finds Out Why Charleston Division Wins First Place in No-Accident Campaign

THERE has been campaigns for something or other ever since the War; there's been campaigns for hospitals, fer Scout Boys, fer Scout Girls, fer the Red Cross, fer women suffrage, an' fer orphans, an' playgrounds, an' fer almost everything that you can think of, but I reckon that there aint been a campaign what comes within 2000 miles of this here No-Accident Campaign what our Railroad has been puttin' over fer the last month or so.

Of course I knowed that everybody was willin' an' anxious to help reduce accidents everywhere, 'cause, 'tween you an' me, accidents aint healthy on railroads or nowhere else. An' so I reckined that we wuz all doin' our share in helpin' make the Railroad a safe place to travel on an' to work on, but as fer what folks really could do if they'd a mind to try, I never knowed until I went down on that Charleston Division an' seen what them folks down there was doin'. But, as Ezra sez, I'm always runnin' five miles ahead o' my story, so I'll come back an' begin at the beginnin'.

'Long about the first part of November, I got a letter from Mister Jones, that live-wire MAGAZINE correspondent down there at Weston, W. Va., what asked me if I didn't want to see what they wuz doin' down there on that Charleston Division in regard to the No-Accident Campaign. Along with it come a invitation to a No-Accident Rally what they was goin' to hold an' at which they said the Governor of West Virginia would be present.

Well, I thought as how I'd talk the matter over with Ezra. I waited 'till that evenin' when Ezra had finished supper. You know menfolks is allers in better humor after they've et. So I sez:

"Ezra, I got a invite to go down on the Charleston Division."

"Glad of it," sez he.

"Glad of it!" I ejaculates (that's the word, aint it?). "Is that the way you feel about it? Want to try yore hand at cookin' beans again, do you? Well, I'll give you a chance this time, fer I'm a-goin'."

"Go ahead," sez he, "if you reckon you kin do any good, 'though I can't see it. What you womenfolks wants to go trapesin' all over the country fer, is beyond me."

"Oh, well, that aint the only thing what's beyond you," sez I, "that No-Accident Campaign has done left you miles behind. Howsomever, if you reckon you kin look out fer yourself while I'm gone, I reckon I'll go."

"Looked out fer myself before I got you, didn't I?" sez he, "an' speakin' of accidents, you'd better be keeful on them cars."

"Hump!" sez I, "I reckon as how I knows all about them cars, aint I been all the way to Grafton once?"

"You have," sez he, "an' you remember when you fell outen that upper berth, too, don't you?"

"Oh, shet up!" I sez, "the Pullman conductor an' the porter was the only ones who knowed that, an' you don't have to go an' tell everybody about it. Howsomever, I'm goin' to have a lower this time, an' when I'm ridin' on the Baltimore and Ohio, I aint skeered o' nothin'."

So, sure enough, I got myself together an' left on Friday night fer Weston. There didn't nothin' happen on the way of partic'lar interest until the next mornin'. I waz settin' on the side of my berth busy tryin' to get my No. 9 foot into a No. 6 shoe, when somebody come a-runnin' by an' bumped me over in a heap. Before I could pick myself up they wuz gone, an' just as I was peepin' out from the curtains, I saw another lady what had been bumped over at the same time. Of course we got to talkin' an' she told me lots of interestin' things. She wuz from Arcadia, what she called the Land of Evangeline, an' it seems as if, due to some mistake on behalf of the ticket agent in Nova Scotia, her trunk had got lost. I told her I'd see if I couldn't help her to find it.

As soon as we got to Clarksburg we went to the ticket office an' met Mister Towles, the ticket agent there, an' explained all about the lost trunk. He promised to look it up right away fer her an' to telly-graph to Noo York an' get it. I knowed he'd do it, fer he is one of the finest men what I have ever met. His men told me that they think Mister Towles is the best ticket agent on the Baltimore and Ohio. I know that he's one of the kindest. He took me around an' interdooced me to the folks in the freight house an' I talked to the girls there an' got some pictures of 'em. When it wuz time fer the train to start to Weston, Mister Towles even went down to the train with me an' handed me a Baltimore paper to read on the way so's I wouldn't feel homesick. He wuz the busiest man what I seen around there, but they say that he's never too busy to do a good turn fer somebody, an' I know good an' well that that lady didn't have to wait long fer her trunk after he got to work on it.

On the train I talked to Conductor S. F. Caudy, Richwood Run, trains 64-65. He told me that Weston was plannin' a good time fer that night, an' made me all the more anxious to get there. Well, about half past one the train pulled up at Weston, an' the first thing I noticed when I got off was a big sign on the engine what sez "NO-ACCIDENT CAMPAIGN."

"Good night!" sez I "they even tell it to the engines."

With that, here come a lot of the folks from Weston, headed by Mister Jones, who interdooced me to 'em all. There wuz three girls among 'em, an' I found out afterwards that this jolly crowd made up the reception committee of the Divisional

Safety Committee. An' I wondered how many other divisional Safety committees had appointed young ladies on 'em; if they didn't they missed a whole lot, fer if there's a more enthusiastic bouquet of forget-me-nots on the Railroad than Madge Heinzman, "Peggy" McCormick, and Viola Hickman, I'd like to see 'em.

They took me by surprise so that I wouldn't a been more took off my feet if a brass band had met me. They took me up to the hotel, where we had the finest kind of a lunch along with the rest of the whole Committee, an' I'll tell you, we had a splendid time. Then we went to the office of Superintendent Trapnell for a meetin'. The Superintendent is a big, hearty, whole-souled man, who knows how to make a person feel right at home, and it is no wonder at all that his men consider him their big brother. He interdooced me to the Committee, an' about first thing he sez wuz:

"You know we're going to win first prize in the No-Accident Campaign, don't you?"

"I'm afraid so," sez I.

"Afraid so!" he thundered so that I shook in my shoes, "afraid so? You'd better not say that around here."

"I meant that I am afraid for the other divisions," I sez.

"Well, folks," he began, "as far as we can learn, the Charleston Division is still ahead." An' with that he called on first one an' then another to tell what each had done toward correctin' unsafe practices hat had been reported to him. AN' THERE WASN'T A ONE OF THEM WHAT HAD LOAFED ON THE JOB! Every man of 'em had something to say, an' one of 'em read a paper on why each employe should take an interest in the No-Accident Campaign. I aint tellin' his name, 'cause I made 'em promise to send it in fer the essay contest.

"How many of your men are you goin' to have at the rally tonight?" sez Mister Trapnell to one of the members.

"'Bout two-thirds of 'em," sez he.

"Make 'em come out 100 per cent.," thunders Mister Trapnell, "we're countin' on you. By the way, Marsh, how about that man what you thought sprained his ankle?"

"He's all right," says the road foreman.

"All right! Didn't he have to stay at home?"

"No sir, I told him I'd shoot him if he did."

An' that's the way they went on. Do you reckon why, with such enthusiasm in the Campaign like this, that they wouldn't deserve to get the prize? An' they believed sincerely that they could put it over if they tried hard enough.

"We're only anxious to get three prizes in that essay contest," Mister Pickens told me, "the first, the second, and the third."

"How on earth did you get up such a spirit among your people?" I asked Superintendent Trapnell.

"We've had the whole town busy in the game," he answered. "There are 13 churches in Weston. At the beginning of the Campaign we asked the ministers of these churches to help us. They each preached a sermon on Safety; the principal of the high school mentions it in the chapel exercises every morning; the Rotary Club interested itself in the campaign and has helped us; the moving picture parlors show a Safety picture, free of charge, along with the regular program; the staff officers have discussed it every day and each railroad man has been asked to talk about it to every man whom he meets."

That afternoon, Mr. Marsh took us all over the town to see the sights, the Masonic Temple, the high school, the 13 churches, Superintendent Trapnell's home, an' the Chicken House. Now everybody, includin' Ezra, will want to know about the Chicken House. It aint what *you* think; it's a hotel where they serve chicken once every day. Sometimes, so Mr. Marsh told me, it's mighty hard for the proprietor to get chickens for dinner, and one day they had to go without them. But it had so happened that a former owner of the house had left a provision in his will that a day must not pass without chicken for the guests, and so, on this fateful day, the old man's picture fell from the wall with such a crash that it frightened everybody there, an' since then, they aint *dared* to go a day without chicken.

At 8 o'clock the folks all come together in the auditorium of the high school to hear Governor Cornwell speak and to listen to the fine musical program that they had arranged for. One side of the hall was set aside fer Baltimore and Ohio folks an' the other side fer visitors. You'd be surprised it you knowed how many outsiders there wuz who wuz interested in Safety, but I reckon they couldn't help it, havin' had it preached to 'em an' taught to their children, an' havin' seen it at the movies fer a month. An' so, I wuz rather took back to see sech a crowd.

First of all, everybody stood up an' sung the Star-Spangled Banner, this bein' a very appropriate piece, fer I know that Mister F. S. Key, what wrote it, wished many a time that England had practised Safety First afore she started fightin' with us. After this, Miss Straw gave us a fine piano solo. My, but her fingers could fly over them keys. Then pretty little Miss Jeffries gave a vocal solo, at which everybody applauded, an' after this, Superintendent Trapnell interdooced the Governor of West Virginia, John J. Cornwell. (We knowed he wuz comin' fer shore, 'cause when we passed Mrs. Trapnell's house in the afternoon we'd saw she had all her pretty chiny-ware set out on the table.)

The Governor told us that he had once been a railroad man, trackman, who worked for the magnificent sum of 90 cents per day. He sez they call 'em by the fancy name of "sectionmen" now, but that when he

worked there he was called a track hand. He left the railroad to go an' work in the bark industry, where he got a whole dollar a day, an' where he earned enough money to buy his first suit of "store-bought" clothes. Before that time, his Ma had made 'em fer him. Then he went on to say as how he wasn't surprised to find that Mister Trapnell wuz practisin' Safety First, 'cause he allers did do it, citin' as a instance, one time when he an' Mister Trapnell wuz ridin' down the track on one o' them little hand cars, something happened an' all he knowed wuz that he didn't know nothin' 'till some time next day, while Mister Trapnell had practised Safety First by jumpin' over his head an' hadn't even got a scratch.

An' now, because Governor Cornwell could use so much more politener words an' say things a whole lot better, I'm goin' to tell you part of what he sez an' how he sez it. This is how it went:

"Mr. Trapnell has told you that I am interested in this campaign, and indeed I am interested not only in what railroad men are doing along this same line with the government, but also what all of the industries of the State of West Virginia are doing.

"The number of men killed and injured in this state is greater than anyone would think. I have tried to help the Legislature improve this condition. The mining departments are under my control, but our power to help reduce their accidents comes not from our political affiliations, but from our cooperative abilities and interest.

"There are 100,000 men and boys working in our mines today, and there has been an average of 47 fatalities per month; sometimes we have had as high as 350 per month. But we can get results—permanent results in the reduction of accidents—if we go after them in the right way. New coal mines and new wells are being opened up all the time and the larger mines and wells, which are properly equipped and properly run, have better working conditions and give us fewer accidents; the little fellows are what cause us the most trouble.

"In the past two years, however, we have succeeded in reducing the number of fatalities about 32½ per cent., or, we now have an average of 32 per month instead of 47. This has been accomplished through the appointment of efficient men as instructors in the mining business, men thoroughly capable of mine inspection. I believe that we now have one of the most efficient mining departments in this country. We have been trying to educate the men in Safety First and First Aid work. There are competitive teams and prizes are awarded the winners. Recently we sent our team to a national meet in the West, and our West Virginia teams there won first prize.

"In the near future we are going to put on a Safety campaign in the mining district, and we shall ask all other industries to go

into it with us. We hope to succeed with it as you men have done on the Charleston Division, and to concentrate our minds on it as you have done, for Safety means that we must take no step that will permit us to forget."

The Governor was just gettin' ready to say something else when something happened to the lighting plant up there in Fairmont an' every light in the place went out an' we wuz in total darkness, so to speak. After a while they managed to get a couple of gas lights lit, an' the Governor continued his speech, tellin' us all about a man who had gone to jail an' spent the better part of his life there, all because he hadn't been willin' to obey neither his paren's nor the law. We must be willin' to play the game fair an square, he sez, an' we must learn to accept suggestions from those who know; the good railroader obeys orders.

It wuz a fine speech, an' I heard one man say that he forgot all about the lights bein' out so long as the Governor wuz talkin'.

There wuz goin' to be a lot of good singin' an' playin' that evenin' but due to the lightin' an' heatin' conditions, Mister Trapnell wuz obliged to dismiss the folks fer the evenin'.

As fer me, my brain wuz so full of Safety that I knowed just how them Charleston Divisioners has been feelin' fer the last month or two. They told me 'twas as good as a big glass o' apple brandy, an' I reckon it wuz. An' I wuz so overjoyed with Weston an' the folks there that I spent all of the next day, bein' Sunday, with 'em. An' when I left there, one of the railroad men sez: "You aint goin' to forget us, be you?" An' I sez, "Never," an' I meant it.

The Two Enterprising Frogs

Just as a gamble, two frogs in search of richer feeding ground jumped into a bucket of cream they found standing in a brook.

"May as well give up," exclaimed one, after floundering about, vainly trying to get out. "We're goners!"

"Keep on paddling," answered the other, "and we'll get there!"

"No use," came from number one; "too thick to swim, too thin to jump, too slippery to crawl; bound to die anyway; may as well die tonight." And he sank to the bottom and kicked the bucket.

His companion doggedly kept on paddling, paddling, paddling. The next morning found him perched on a mass of butter, eagerly disposing of the flies that came swarming from all directions.

He got there!—*The Headlight.*

Safety Roll of Honor

Baltimore Terminal Division

The following letter from the superintendent, addressed to Signal Maintainer Smith, explains itself:

"It has been brought to my attention that on September 29, while train 97, engine 4158, was passing around the wye at Baileys, truck of one of the cars was derailed on heel of frog, and that you called Halthorpe Tower, had the train stopped, and car examined. Side bearing was found missing, resulting in car being set off, which probably averted a serious accident.

"I wish to express my appreciation and that of the management for your alertness and prompt action in this case."

Baltimore Division

On October 1, Flagman M. J. Bullington, with extra west, engine 4526, observed about six inches flange broken from wheel in rear truck of P. R. R. car 31011 in train of extra east, engine 4513, as train was pulling out at Gaither. Train was stopped and car set off. The attention to passing equipment by Flagman Bullington is commendable and a suitable notation has been placed on his record.

On October 3, Flagman Luther F. Murray, with train of extra east, engine 4524, discovered guard rail wedged in car and hanging over rail in front of wheel in train of extra east, engine 4598, just west of Frederick Junction. Engineer was promptly notified and train stopped. Trackmen were called and removed obstruction. Action of Flagman Murray is commendable and notation has been placed on his record.

On October 6, Agent M. J. Wann, Bradshaw, noticed and reported, through the operator at Poplar, that extra engine 4519, had broken axle bar. Extra was stopped and it was found a car had derailed but with no damage. Mr. Wann has been commended for his watchfulness and action in thus averting a derailment or accident.

On October 15, Section Foreman E. L. Fisher noticed brake rigging dragging on truck to tender of engine with No. 61 near "F" Tower, Washington, while train was passing. Mr. Fisher attracted attention of baggageman, who pulled the cord and train was stopped and rigging removed. His alertness averted a possible derailment and damage to the switches at New York Avenue bridge. He is commended.

On Saturday, October 16, Mrs. T. J. Doyle, wife of agent at Hanover, Md., discovered a gasoline tank which had rolled on the westbound track and removed it, thus averting a derailment. We wish to extend our appreciation of the efforts made by Mrs. Doyle in the prevention of accidents.

While extra east, engine 4072, was passing east end of the eastbound passing siding at Reels Mill on October 31, Brakeman P. J. A. Felthausen, with a train on siding,

noticed car loaded with cattle with door broken open and stock hanging out. He notified Conductor E. Schafer of the extra, who stopped the train and with the assistance of Brakeman Felthausen lifted the stock back in the car and secured door. Brakeman Felthausen has been commended.

Cumberland Division

On October 13, while going up the nine mile grade on a motor car, Lineman H. C. Collison found car door on No. 2 track and several boxes of handles on No. 2 and No. 4 tracks. With the assistance of track-walker and signalman he removed the obstructions and notified Track Foreman Thomas of Kearneysville to gather up the handles. The door and handles are supposed to have fallen from a passing train. Lineman Collison is commended.

The following item was sent to the Editor about a year ago and was omitted in error:

While Yard Brakeman E. H. Bitner was flagging at Luke Bridge in Piedmont yards on November 6, 1919, he observed a reinforcement rod out of bottom of concrete floor of bridge, hanging down, too close to clear a man on top of a car. He phoned to Piedmont tower operator, who reported it to the proper parties and repairs were made. No. 36, eastbound, which was using the westbound track that day, was flagged and held until repairs were made.

The accompanying picture is of Brakeman Bitner and his daughter, Pauline, who died on October 14, of last year.

Connellsville Division

Carpenter Foreman C. L. Inks, Connellsville, Pa., advises that while walking along our tracks, he discovered a broken rail just east of Oliver Station. Mr. Inks immediately took necessary action and protected this piece of track, thus averting a possible derailment. He is commended.

Pittsburgh Division

At 9.15 a. m., on June 20, extra east engines 1271 and 1253, in charge of Conductor G. G. Wise and Engineers C. C. Page and J. F. Carr, just west of west end of passing siding at Elk City, derailed four cars: a box car loaded with ties, a car of lath, and two other loads. Conductor Wise reported from Knox that they could pole the car of lath (the box car of ties had cleared itself) and rerail the other loads in several hours without the necessity of running the tool train. These men had been called for 2.30 a. m. at Foxburg to make a Clarion Junction turn; therefore, they had only taken a small lunch, which they ate soon after making the start. They had had no breakfast when they began wrecking and they did not stop for dinner, but stuck to the job until the track was cleared for the train to move and they got into Foxburg at 6.10 p. m. in time for supper. Such loyalty and interest in behalf of the Company is highly appreciated. Conduc-

tor Wise and rest of the crew, consisting of Brakemen J. F. McKathorn and G. B. Edinger, Engineer J. F. Carr, Fireman H. C. Dunkle and Engineer C. C. Page, are commended.

On October 2 some large rocks fell on the eastbound tracks in the vicinity of Undercliffe. A lad, P. V. Miller, age about 12, residing on a farm in the near vicinity, observing the rocks fall, ran across Pine Creek and flagged extra east 2613 by waving a red Tam o' Shanter hat which he wore. Master Miller was unsuccessful in getting the flagged train to an absolute stop, but the engineer slowed up in time to prevent a bad accident.

Mr. Keegan and Mr. Beltz were both very appreciative of his action, and both wrote him a very nice letter of commendation, and in addition thereto, he was provided with an entire outfit of clothing, shoes, etc., as a reward for his excellent service to the Company in time of danger.

Monongah Division

On October 23, extra 1890, west, light with caboose, Engineer J. G. Brown, Fireman Ekins, Conductor Hoge G. White, Flagman F. H. Maxwell and Brakeman Rex Davis found 18 inches broken out of rail about three poles west of Buckhannon river bridge, just west of Post Mills station. Following extra 2959 was flagged and Conductor White proceeded on to Buckhannon, called trackmen and had them started on repairing same before reporting to the dispatcher. Air was applied from conductor's emergency valve and train was stopped. The action of this crew prevented an accident.

On November 3, second 178, engine 2766, Conductor Hoge G. White and Flagman J. A. Wheeler, noticed rear car and caboose going over what seemed to be a broken rail. Air was applied from conductor's emergency valve and train brought to a stop when they found about three feet of a broken rail just three rail lengths west of west switch, Boat Run Coal Company's siding. Proper flag protection was given until Conductor White talked on phone to Operator Jenkins at Berryburg Junction and arranged for protection east, and also to get trackmen on the scene. Mr. White is commended for his close observance and interest displayed.

Charleston Division

DOING SOMETHING EVERY DAY
OF THEIR LIVES TO MAKE THE
BALTIMORE AND OHIO THE
SAFEST AND BEST RAILROAD

Yard Brakeman E. H. Bitner
(see Cumberland Notes)

Engineer B. H. Griffin—Close observance and prompt action in notifying dispatcher of package which had fallen from mail car. Commended.

Agent M. F. Hutson, Bower—Commended for close observance, reporting brake beam down on freight car passing his station, averting accident.

Brakeman John Bee—Commended for close observance, found broken wheel on freight car in his train.

Engincer T. J. Wilson, Brakeman D. R. Blake, Fireman L. H. FitzGerald—Commended for handling tonnage train through to Weston without delay when engineer of second engine was taken ill and unable to work.

Conductor F. S. Ballard—Commended for close observance. Found broken truck on car, setting it out and avoiding accident.

Following engineers were commended for a showing of more than 100 per cent. in fuel performance for the month of September: R. E. Smith, A. F. Vorholt, J. C. Jordan, H. W. Fury, A. C. Whitcotton, W. A. Stalnaker, W. T. Spencer, P. W. Toms, F. Thomas, J. H. Stalnaker, R. J. Vassar, A. W. Pickens, C. U. Skiles, W. J. Johnson, R. Malone, S. L. Rodebaugh.

And this explains why on the fuel performance statement for the month of September, the Charleston Division stands *first in freight and passenger service and sixth in yard service.*

New Castle Division

On October 10, extra east 4244, passing Greenwich telegraph office, had brake beam dragging. Operator H. C. Ashwell noticed the defect, stopped the train and notified the crew to correct this condition. Superintendent Stevens has written Mr. Ashwell a letter of commendation, expressing his appreciation of this act. Mr. Ashwell, by the way, is an employe of the Big Four and his action is all the more commendable.

On October 25, Agent H. D. Nowells, Cuyahoga Falls, Ohio, discovered a broken flange in train of extra east 4089. As a result the train was stopped and the car set off. Mr. Nowells has only recently entered our service but his actions in this case indicate that he is alive to the importance of reporting any unusual or dangerous conditions, and he certainly deserves the splendid letter of commendation sent him by Superintendent Stevens, in addition to the entry that will appear on his service record.

On October 29, Agent O. B. Shannon, Creston, Ohio, reported a dangerous condition existing in No. 1 main track; it was found that a rail had broken. Mr. Shannon lives near the track and was awakened at 3:45 a. m. by the noise caused by Cleveland 91 passing over this broken rail. This act of Mr. Shannon's indicates to what extent the Safety movement has interested the New Castle Division employes. A letter of commendation has been sent to Mr. Shannon and, in addition to this, an entry will be made on his service record.

Newark Division

On October 27, Operator R. W. Bennett, Junction City, Ohio, observed a brake beam down on car in train 183. He promptly flagged train and reported the condition to the train crew, who had the trouble corrected. This is the second instance in the past month in which Operator Bennett has performed meritorious service of this nature, and he has been commended for it.

Cleveland Division

CLEVELAND, OHIO, October 9, 1920.

MR. C. F. HUFFMAN, Operator,
Freesport, Ohio.

Dear Sir—It is very gratifying to receive reports as follows:

"As extra 4324 was passing my office on the morning of September 20, I noticed a very high blazing hot box on head end. I swung down on it promptly with my red lantern, getting it stopped and car set off. This possibly would have burned journal off in a short time."

Your careful observance and prompt action deserve commendation and I trust you will continue to render such services.

Yours very truly,

(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO, October 19, 1920.

MR. C. L. BAIR, Brakeman,
Akron, Ohio.

Dear Sir—My attention has been called to the fact that on October 13, you found broken arch bar on C. R. R. car 11902 in train of engine 2681, car containing heavy brick, and that arch bar, being in very bad shape, you no doubt averted an accident.

It is very gratifying to me to receive reports of this nature, and in my opinion you deserve commendation and I have arranged accordingly to have same noted on your record.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO, October 19, 1920.

MR. E. E. GRAY, Operator,
RD Tower.

Dear Sir—I have a report before me that on October 12, you discovered brake beam and rigging on track east of RD Tower, which you immediately removed. Had it not been for your prompt action in this matter, no doubt an accident would have occurred.

Reports of this nature from our fellow employes are very inspiring and lead one to believe that our employes are behind us in eliminating accidents.

Your actions deserve commendation and I have arranged to place proper entry on your record.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO, November 1, 1920.

MR. I. C. BOWMAN, Supervisor,
Massillon, Ohio.

Dear Sir—Understand that on October 13 while first 83, engine 4024, was pulling off double track at Dover, you noticed sharp flange on U. R. R. car 7088 and immediately notified conductor, who had car set off. It further developed that this car had a bad thin flange 13x16" thin. New wheels were applied to car at Dover. I commend you on your alertness and watchfulness in handling this case and hope that you will continue the good work.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO, November 1, 1920.

MR. GEORGE LEINMEISTER, Wreck Foreman,
Lorain, Ohio.

Dear Sir—My attention has been called to the fact that on October 27, at 4:30 p. m., you noticed brake beam down on eastbound

train, engine 4195, pulling through Grafton. The fulcrum bar broke off and jammed in frog of west wye and derailment very nearly occurred and you jumped on train and got signal to engineer who had train stopped and brake beam taken off. Your alertness and watchfulness deserve commendation and I want to assure you that same are appreciated by me.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO, November 1, 1920.

MR. G. C. LOVE, Conductor,
Lorain, Ohio.

Dear Sir—We have a report stating that you were conductor on extra west 4261, on October 17, and that at about 8:00 a. m., while in tower, Big Four, Grafton, you noticed westward home interlocking signal arm hanging down, made remark to the leverman about signal and was told by leverman to stop your train as derail was open and that an eastbound passenger train on Big Four was approaching; that your train had started east at Mill Crossing and that you ran down towards your train, although the weather was very foggy, and got it stopped before coming on to derail. Investigation showed that stud or bolt in interlocking arm had broken off, as it showed clear for crossing. I want to commend you on your alertness and watchfulness, which, in all probability, averted a bad accident or a personal injury, and have arranged to make proper entry on your record to cover.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

Ohio Division

On the night of September 26, while No. 98 was ascending Madeira Hill, Brakeman C. W. Shimel noticed packages along right of way. Train was stopped at Madeira, engine detached from train, and crew proceeded back to point where packages were observed. It was discovered that refrigerator car K. R. L. 604 had been broken into and robbed. It was also found that a truck in charge of three men was at this point, and that an attempt was being made to load the packages stolen from the car. On the approach of the crew, the men deserted the truck. Conductor E. R. Lee immediately notified the city police at Cincinnati, who took charge of the situation. Prompt action on the part of Conductor Lee and Brakeman Shimel averted serious loss of property, and the prompt information of the matter on their part to the Police Department will no doubt enable them to bring the guilty parties to justice. Both Conductor Lee and Brakeman Shimel have been commended.

On October 26, as extra west, Conductor Robinson, was passing extra gang between Dorsey and Twightwee, Foreman Eggert and Supervisor L. Pausch noticed brake beam dragging. Supervisor Pausch signaled to Conductor Robinson, who immediately stopped train and had this removed. Foreman Eggert and Supervisor Pausch are commended on interest displayed, which in all probability averted an accident.

Indiana Division

When extra east 2840 was passing Dillsboro station about 3:05 p. m. on November 7, Operator H. F. Cass, noticed brake beam dragging on N. Y. C. 50846. He immediately notified flagman as rear end of train passed office, train was stopped and de-

fective brake beam removed. The prompt action taken by Operator Cass probably averted an accident. Appropriate notation has been made on his service record.

On October 12, L. J. Swengel, third trick operator, Dillsboro, noticed two brake beams down in passing train, handled by engine 2772, Conductor Bulger. Mr. Swengel notified conductor, train was stopped and brake beam removed.

The close inspection of the train by Operator Swengel possibly averted a serious accident. Appropriate entry has been made on his service record.

On October 16, when extra 2913, east, was passing Loogootee, Engineer G. E. Russell, on work extra 1423, noticed wheel of C. E. R. X. 4334 not running true. He immediately communicated with crew on extra 2913, through the operator, and inspection was made of this car by crew. It was found that the car had a bent axle. The wheels were practically new and had a full flange. The car was sent on to Mitchell, where tie was set off for repairs. Mr. Russell is commended.

On October 13, when No. 69 made station stop at Butlerville, Train Baggage-master C. A. Davis notified Station Helper Herbert W. Shelton that he had noticed an unusual noise when car passed over road crossing just east of Butlerville. Immediately after working train, Station Helper Shelton returned to road crossing to determine what, if anything, was wrong. He found a piece of broken rail, immediately called sectionmen, and rail was changed. The close attention of Baggage-master Davis and the prompt handling of the matter by Mr. Shelton are commendable. Appropriate entry has been made on the service records of these two men.

On October 19, Operator J. B. Coyne, on his way to work, found broken rail on high side of main track just east of west switch, North Siding, Salem. He notified crew of No. 12 before arrival of that train, and called out sectionmen, who made repairs. Mr. Coyne's prompt action possibly averted a serious accident.

Illinois Division

On October 11, Fuel Station Laborer J. M. Martin, who meets passenger trains on first trick, noticed something dragging under engine tank of train 29, engine 1428, as it was pulling away from station at Flora. Mr. Martin had train stopped and found bottom rod of brake beam dragging. This might have resulted in a serious accident had it caught in the crossing. Mr. Martin is commended for his watchfulness.

Toledo Division

On October 15, while extra 4551, south, was passing Miamisburg, First Trick Operator E. F. Stenger noticed brake rigging dragging from a car 20 cars from the engine. Train was stopped at Carlisle and brake rigging removed.

Operator Stenger also noticed, on the same day, a car in extra 4182, south, not riding properly, and it appeared to him that the car was swaying considerably. He got in touch with Carlisle, the next office north, and had extra 4182 stopped. Examination of the train developed that loose wheel on A. T. S. F. 48290 was what Mr. Stenger had noticed. The car was set out and a serious accident possibly averted. Mr. Stenger is highly commended.

It is also gratifying to note that the operators at Miamisburg during the past three or four months have observed any number of defects in trains while passing their station, and in almost every case that has been reported and handled, accidents have been averted.

and . . . we wake up and find ourselves accident victims.

* This is where the story of the tooth brush starts. Did you ever happen to meet a better little attention-distractor than a healthy toothache? If you have, why you've been farther over in the book than we have. How an insignificant nerve in a tooth can grumble and growl and fuss and fume. It will keep you awake nights and make you miserable daytimes. And the first thing you know you've spoiled a lot of work or cut off the end of a perfectly good finger or stepped in front of an automobile. All because of a toothache. So why not avoid all this trouble? Keep the tooth brush busy. Wear out a lot of them. It's cheap accident insurance. And the next time you go to work with a toothache—why, don't go. Just go and have it fixed first, and avoid trouble.—*Courtesy Liberty Mutual Insurance Company, Boston, Mass.*

And Only Twenty Years Ago

(Brush and Pail)

Nobody swatted the fly.
Nobody had seen a wrist watch.
Nobody had appendicitis.
Nobody wore white shoes.
Nobody sprayed orchards.
Most any young man had "livery bills."
Farmers came to town for their mail.
The heavens were not full of manbirds.
Nor the seas alive with underwater boats.
The hired girl drew \$1.50 a week and was happy.

The butcher "threw in" a chunk of liver.
The merchant "threw in" a pair of suspenders with every suit.
Nobody "listened in" on the telephone.
Straw stocks were burned instead of baled.
Publishing a country newspaper was not a business—it was a duelling game.
There were no bolshevists or international anarchists.

The safety razor had not introduced the cleanshaven face.

Exchange Love's Limit

I'd swear for her
I'd tear for her.
I don't know what I'd do for her.
I'd lie for her.
I'd sigh for her.
I'd drink the Ohio dry for her.
I'd weep for her,
I'd leap for her,
I'd fight for her,
I'd bite for her,
Walk the streets all night for her.
I'd bleed for her,
I'd do without my feet for her.
I'd shoot for her,
I'd boot for her,
A love who came to suit for her.
I'd kneel for her,
I'd steal for her,
Such is the love I'd feel for her.
I'd try for her,
I'd cry for her,
But hang me! If I'd die for her
Or any other girl.—*The Record.*

The Tooth Brush and Accidents

"WHAT can a tooth brush possibly have to do with accidents?" you may ask. Here's the answer.

Safety experts tell us that 85 per cent. of all accidents are due to carelessness. Now carelessness is merely a form of inattention. Something distracts our attention and we forget momentarily the dangers of our work, or the dangers of the sidewalk or street,

How the fireman feels about it when the stoker won't work

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Offices of General Manager and Superintendent Motive Power

Correspondent, G. F. ZIMMERMAN

Merry Christmas!

It is assumed the majority of our readers by this time have been informed about the proposed Bowling League to be inaugurated by the superintendent of the Welfare Department, on the Baltimore and Ohio System. Let it be known by all that this office will be represented 100 per cent. strong. We have quite a bowling shark in our stenographic department; our file room will also be well represented. Several of our young men employees are awaiting the first call "to the front"—the correspondent included. A System Bowling League, in which all the departments in the General Office Building and those on the various divisions are represented, is something which we feel should have long ago been instituted—perhaps on the same basis as the baseball clubs during the past season. There will be plenty of enthusiasm among the different teams here and plenty of excitement for all. Here's to the success of the Bowling League.

We take great pleasure in stating that our secretary, Virginus F. Riley, has followed the great line of benedicts and has added unto himself a "better half." Mrs. Riley was formerly Miss Inez Seward. Virginus was very secretive as to just whether or not he intended to elope to Ellicott City, have a parsonage or church wedding, but on good authority I understand it was a quiet and, of course, lovely wedding. It "came off" on Wednesday, November 17—the time as yet unknown, as he is quite a distance from us just now. After spending a few days in Jacksonville, Mr. and Mrs. Riley visited Palm Beach. Congratulations, Mr. and Mrs. Riley, from the whole bloomin' office, and—may you never have to get married again!

You should see our "Cole 8" boy—some machine. Thomas J. O'Connell, secretary to the chief clerk, had stated so many times that he didn't know what to do with all that back pay he received and as he didn't need the salary he was drawing, he at last decided to purchase a machine. We haven't as yet been invited to take a ride with him and have been wondering what is wrong. How long did you say it ran, Thomas, after you got it? Only two days?

I noticed in the Baltimore Terminal Division notes in the last publication of this MAGAZINE that our esteemed correspondent, Charles O. Healy, thought that by changing his occupation from this office to that of the superintendent, Baltimore Terminal Division, he would escape notes about his cravats and that perhaps he could seek revenge. Since Mr. Healy's departure from this office, our secretary followed Charley's example for a while, but soon gave it up. Now, we have an office boy who, when he opens the door in the morning to report for work, commences to talk and fails to stop at all—without even moving his lips. We have been wondering for a long time just where and when he purchased those shirts he wears—they hold quite lengthy conversations with us.

As each minute changes the time, so does the fragrance of love seek to unite the few remaining bachelors of this office from the single ranks of freedom to the happiness of marriage.

The announcement of the engagement of our Secretary, V. F. Riley, to Miss Inez Seward, was gratifying, but a few days later when our assistant chief clerk bashfully, but courageously, narrated that he was to join the throne of benedicts, it exhilarated us beyond expression.

And our Correspondent, too!

On Thanksgiving Day, at the twilight hour of 5.00 p. m., the Rev. Dr. P. H. Miller, of Concordia Lutheran Church, solemnized the marriage of G. F. Zimmerman to Miss Mildred Briel. After the ceremony they made an extended tour of the North and West. It is the sincere wish of this office that felicitousness be the reward to both our congenial assistant chief clerk and his estimable wife and that their married life will be forever amicable and blessed. We simultaneously regret that our bachelors' force is vanishing.

Law Department

Correspondent, GEORGE W. HAULENBECK
Merry Christmas!

The Christmas Spirit

In many respects there is something wrong in the Christmas spirit that usually prevails on the recurrence of the greatest of all holidays. It is the feeling possessed by so many to bestow gifts only upon those who are likely to make similar return.

My idea is to bestow Christmas gifts upon children and those who are deserving, and not to make presents with a view to getting something in return. I think there is

too much of that. I may be old-fashioned, but this is my view. A doll or a sled or a kiddie car to a little child is the way I endeavor to practice it and I enjoy it immensely.

At the risk of being tiresome, I am still praising our No. 524 train, carrying me to my week-end destination, and I am filled with admiration for the Philadelphia and Reading train picking me up at Wayne Junction.

No. 524 train rolls into Philadelphia at 4.10. If my watch fails to agree with this, I immediately change it to 4.10, for the train is right and my watch is wrong. It takes no time at all to detach the big Baltimore and Ohio engine 5201 (usually) and attach the Reading engine. There is some one there who knows how to work expeditiously. The train starts off without any halting, and at Wayne Junction when three minutes have elapsed, the Reading train is there.

At 6.33, Bethlehem, a growing and thriving city, is reached. At Edgeboro, the Roland Park of Bethlehem, Susan and Charles Arthur Trageser are at the front window waiting for me and I instantly forget the journey's fatigue. The farmland on the Bethlehem Branch of the Philadelphia and Reading looks as though it was swept and garnished for Sunday inspection. I never could tell how the Pennsylvania farmer disposed of farm rubbish. He must place it on the other side of the barn, for it is not visible to the eye of the traveller. The Pennsylvania barns are covered with a generous supply of red paint, and they are a valuable asset.

In Garrett County, Maryland, the farmer generally prefers Jersey cattle. In Pennsylvania, the Holsteins abound.

On my return trip the Reading train, leaving Sunday afternoon, is very satisfactory and our own No. 527, running into Mt. Royal station at 9.10 on the minute, completes my week-end of rest and recreation.

The girls in Bethlehem, and indeed throughout Pennsylvania, are just too lovely—well, now, perhaps, I had better switch off on to another topic.

Law Department Changes

Our Francis H. Urner has decided to retire from the department in order to devote more time to the study of law. He came to us on the first of December of last year and we have enjoyed every minute he has been with us. He has been of assistance to the young lady in charge of our file room and we are sorry indeed to lose him. The Law Department file room, as it is now administered, is a place not only where files are kept, but a place where files can be produced in very short order.

Mr. Urner's successor, Franklin P. Dwyer, has been duly installed. He gave me just the kind of a handshake I enjoy, and I like him.

Prison Magazines

All state prisons may have monthly magazines for the interest and welfare of inmates, but I doubt if there are any publications better than the one published at the California State Prison at San Quentin.

Reading the excellent articles contributed to the July number by the inmates of the institution, gives one a peculiar feeling. That an inmate of a state prison undergoing a long term of confinement is able to write an article brimming over with sunshine and optimism, can scarcely be believed.

The articles are signed by the initials of the writer with his prison number and every thing printed breathes a beautiful spirit. Grouchy chaps whom we occasionally meet, not in prison either, might be benefited by a perusal of some of these contributions.

Mr. Fleishman on Faith

I hope everybody read Mr. Jerome P. Fleishman's article on Faith, printed in the October number of our MAGAZINE. It originally appeared in the Baltimore *Sun*, but I missed it then, and I am glad I had a chance to read it in the MAGAZINE.

When Mr. Fleishman was a lad at school he contributed every week to the page for boys and girls in the Sunday *American*, and I always made it a point to read what he had to say on that page, at any rate. I have followed him through his newspaper career, and I read everything he writes. But read what he has to say about the need of having faith.

Alonzo of Aragon

Alonzo of Aragon was wont to say in commendation of age, that "age appears to be best in four things—old wood best to burn, old wine to drink, old friends to trust, and old authors to read."

Superior Elevator Service

The Central Building elevators and the young gentlemen who manage and operate them, in my judgment, are fully up to the mark in this feature of big sky scrapers in Baltimore.

Messrs. John Huber and Joseph Marshall are in charge, and, rain or shine, they are always at their posts. Politeness prevails among the entire force, and satisfactory service is rendered. Where can you find anything better?

Miss Hilda Marshall

Miss Hilda Marshall, a sister of our Mr. Marshall, is in one of our departments. She displayed a fine record on her entrance into the service, making 100 per cent. in the examination. She was warmly congratulated at the time by the head of the department.

Engineering Department

Correspondent, OSWALD EDEN

Merry Christmas!

"Velvet Joe" says, "Did you ever see a cross-over in a good humor?"

Indoor sports in the drafting room these days are the offering of names to give to the new boy in "Bill" Pinschmidt's home. "Bill" had named him "Elizabeth," but found out that a masculine name would be more appropriate, so the game is on. Please send your suggestions to "Bill" in care of Mr. Milburn's office. Among names suggested so far are "Joe," Maximilian, "Gus," Richard, George, Harry, Oliver, Sylvester and "Duckie." Please do not duplicate.

"Alvie" Weston took a flying trip to New York for the first time in his life. He took a long boat ride on the ferries, a ride up and down the subway and over the Brooklyn Bridge. He saw it all in one day and one night, and hinted that he might go again.

"Willie" Adamson has a new addition in his home. SHE came in October. Besides a good wife, and a position, he now has two pairs—two boys and two girls.

Miss Fossett, one of the stenographers employed for the making up of A. F. E. forms, resigned the first of November to accept a position in the Valuation Department. "Tom" Ralston, formerly with District Engineer Mather, succeeds her.

Since "Jimmie" Sparks left the office of chief draftsman, there have been two aspirants to his place as the Beau Brummel of the Engineering Department. One is "Harry T.," who parts his hair in the middle and wears clothes that almost talk. The other is "Spike," who not only wears sporty clothes and parts (?) his hair in the middle, but has developed a fuzzy thing (one could

hardly call it a mustache) on the upper lip of his handsome countenance. Wild times occur when the two go to the same dance.

C. A. Pertsch, transitman, Surveys Department, left us on November 1. He has entered the manufacturing business for himself, specializing in the manufacture of gas gauges for automobiles. More power to you, Charles!

Paul Didier, principal assistant engineer, has just returned from a long visit to his home in France.

The professional engineers and other technical employees of the Baltimore and Ohio in and around Baltimore are greatly interested in the new development concerning the affiliation of the various engineering societies of the city for the purpose of obtaining adequate club house facilities for their members.

For a number of years there has been considerable talk of furnishing the engineers of Baltimore with facilities similar to those enjoyed by the profession in Boston, New York, Philadelphia, Harrisburg, Dayton and other cities. However, nothing definite was accomplished until the Baltimore Chapter of the American Association of Engineers, of which the Baltimore and Ohio Railroad section is a part, recently secured an option on a palatial residence in the vicinity of the Hotel Belvedere. Desiring to live up to the motto of the Association, "Advance—Cooperate," the chapter decided to share its good fortune with the other engineers of the city, the various societies were communicated with, and a general housing committee was formed. This committee, after diligent work, decided that the new building of the Merchants and Manufacturers' Association on Light Street could furnish quarters, the occupancy of which would be more feasible at this time.

An option was secured on club rooms in the latter building and the first option was surrendered. Plans were immediately formulated to coordinate the various units of the profession. This resulted in the complete reorganization of the present Engineers' Club of Baltimore to facilitate the formation of a new and larger organization, broader in scope and with which all of the various engineering bodies will coordinate closely. This coordination will mean much to the advancement of the profession and the improvement of conditions in general which are most vital to the engineers, contractors and the public.

The organizations which have decided to affiliate with the Club are the American Society of Civil Engineers, American Society of Mechanical Engineers, the present Engineers' Club, the American Institute of Chemical Engineers, American Chemical Society, American Institute of Architects, American Institute of Electrical Engineers and the American Association of Engineers.

Office of General Freight Claim Agent

Correspondent Miss E. T. MURRAY

Merry Christmas!

In this Christmas issue of the MAGAZINE, we, the employees of the General Freight Claim Agent's office, wish to extend to our General Freight Claim Agent, C. C. Glessner, and to his personal staff, a joyous Christmas and all happiness and prosperity for the coming year.

On October 20, at 5.00 p. m., the Immaculate Conception Catholic Church was the scene of a very beautiful wedding, the contracting parties being Miss Evelyn Jones, O. S. and D. Division, and Mr. Paul H. Carlotta, of Norfolk, Va. The bride was gowned in white satin trimmed in Irish lace and pearls, and wore a tulle veil, caught up with orange blossoms. She carried a shower bouquet of white roses.

A reception was held at the home of the bride, 1500 Linden Avenue, after which the couple left for Atlantic City and Niagara Falls. Upon their return they will make their home in Norfolk, where the groom is engaged in business. Our congratulations and best wishes go to this couple for a happy future. The office remembered them in their usual custom.

Miss Rose Lee Seim of O. S. and D. Division and Mr. A. E. Spilman, were quietly married on Wednesday, October 20. Congratulations!

My goodness! Mr. Olson, it looks as if you will be compelled to keep a reserve force, judging from the victims of Cupid's arrows recently. And still they fall, for next in line is Ida (judging from fancy work before office hours), then Helen (if rumors are true), and as for "Smitty," well, he is trying to keep everything quiet, but it can't be did, 'cause she works in Mr. Schutte's office.

We extend our sincere sympathy to Miss Pate, Record Division, in the sad loss of her sister on November 9.

Wonder why L. C. boosted "Big Bob" to "Joc," telling him how generous he was with us girls, buying us candies, etc. Well, "Bob" knows "Joe" pretty well, so maybe he will say a good word.

"Gee, the trip was great, and we had a wonderful time. Got a little seasick (as is evidenced in picture), but we didn't mind that. Met some lonely people on the boat (again evidenced) and do you know, we didn't ride in a street car the whole time we were away. Miami again for U. S. and Co. next vacation time."

Of course we won't go into detail about the trip as "Joe" may not like it and "Kramer" may become a little jealous if

Mal de mer

Miss Edna Foster and—

Miss Lorain Creamer and—

this gets out, but it's too good to pass up. And such is a little synopsis of L. and E.'s trip to the Sunny South amid the palms and ferns.

Things We Still Hear

Aero: "We are out of it."
(When a request is made for stationery.)
Townsend: "Can anybody get me a girl?"

Wheeler: "Why certainly, am glad to be of assistance to you."

Goldsmith: "Your pass hasn't come down yet."

Perry: "The boss is out to lunch—you'll have to call later."

Zenter: "Well, let's get to work."

Mrs. Warfield: "Yes—Um hum."

Waters: "This office has jurisdiction over loss and damage items only."

La Motte: "Everybody in this a. m.?"

Late comers: "How many minutes was I late?"

Printing Department

Correspondent, M. J. CONROY, Proofreader

May your Christmas Day be merry and happy and may it bring you blessings which shall brighten all the other days of the year!

Even though a man should answer the same question wrong twice in the same breath, and even should you hit him on the head wood alcohol would flow therefrom, he may be possessed of a sensitive nature. It is eminently more satisfactory and will perhaps accomplish just as much good if you would damn him inwardly and then go home and play horsey with your fair haired baby boy. It doesn't require much ability to find fault, but it does take a real man to commend.

Under the stimulus of encouragement and enthusiasm many a mediocre mechanic has become a competent workman. We are all constructed differently and what is as clear as day to some is correspondingly difficult of comprehension to others. Every one, we believe, tries to do his best in his own way. So in this glad season of peace and good will, let's all, big and little, resolve to be more magnanimous, sing and think more cheerily and lend a helping hand wherever and whenever we can, remembering, as the poet puts it,

Although we must answer to a name,
And live upon a certain street,
Do not take from us our dreams,
Or keep our lives from being sweet.

There was a thrilling account in the papers recently in which one of our men, William P. Kirkwood, a compositor, along with his brother, H. D. Kirkwood, and Walter Stevens, were the heroes. Hearing cries of "Help!" Mr. Kirkwood looked out the window of the apartment at 1027 W. Lanvale Street and saw William Moore, colored, swinging an ax. He could not see the woman, who was crouched below the fence, but heard her groan and beg for mercy, as Moore swung the axe. Mr. Kirkwood quickly got his revolver and with his brother and Mr. Stevens ran to the alley and ordered the negro to surrender. The back gate was locked, but Moore crawled through the fence, which was being repaired, and got into the next yard. By that time a crowd of negroes had gathered and were menacing the white men and their prisoner. and it was with difficulty that the white men kept them at bay. As it was, Mr. Kirkwood says, one of the colored women "crowned" Moore with an empty milk bottle. In the meantime Mrs. Kirkwood telephoned the police and when they arrived they took the negro to the station house. The negress, who was Moore's wife, was rushed to the hospital, but died within fifteen minutes,

without regaining consciousness. Mr. Kirkwood has been the recipient of many congratulations on his display of nerve and coolness under the trying circumstances, and unlike the colored woman who "crowned" Moore with a milk bottle, we'll crown him with the floral wreath of glory.

Four events of great interest to all here are about to be consummated. Daniel Lee Miller and Joseph Macko are to be married in January, while Henry A. Brill chose Armistice Day to sign the articles, and Miss Minnie E. Kress, of the bindery, picked out Thanksgiving Day for the happy event. It has been a long long time since "Dan" Cupid disturbed the serenity of these precincts, but four scalps at one shot speaks well for the accuracy of the little fellow with the bow and arrow. We haven't forgotten the last memorable event of this kind which took place about six years ago. One of our men at that time prided himself on his ability as an elocutionist and insisted on regaling the guests with "Spartacus to the Gladiators." But there will be none of that "rough stuff" this time. Instead, a bouquet of jingles will be presented to each of the four, highly illuminated and printed on the best paper obtainable, each jingle to be personally signed by its author. We are permitted to make four extracts therefrom in order to show that they are gems of the first water.

To Minnie

O Dear! O Dear! O Dear! O Dear!
How nervous I am getting as the day draws near.

To "Joe"

To me your love the whole world means,
I'll gladly hand you my 40 beans.

To "Dan"

Dearest, as o'er me love's gentle feeling steals,
I'll promise early to arise and get my own meals.

To "Hen"

My heart is yours, dearest, to take,
For two can live on what I make.

They are three splendid fellows and Minnie is a charming girl and the best wishes of all the boys and girls go with them for long and happy lives. The three young men evidently got together and figured it out that a man with a fork and without a knife is like a ship without a sail, and a man without a wife is like a shirt without a—front! We still have a couple of well-to-do widowers and a few hardened though eligible bachelors here yet and as a man is not a confirmed bachelor until he is dead, there is still hope.

N. B.—Still another! One of my trusty spies brings me the information that our efficient stenographer and office assistant, Miss Lena Rosenthal, has notified the department manager of her intention to leave the service to enter into a life contract in which she will assume the role of dictator, instead of being dictated to, as at present. The best wishes of all go with Miss Lena in her new undertaking. A cordial welcome is extended to Miss Ruth Jennings, her successor.

Miss Grace Fogle, daughter of C. F. Fogle, proofreader, gave a Hallowe'en party at her home, 1707 W. Lombard Street, to a gathering of 40 or more young people, after the manner outlined by our accomplished associate editor in the October MAGAZINE. It proved to be one of the most enjoyable affairs of its kind and will remain long in the memories of those who were fortunate enough to be present. So successful was it, that at the request of a number of those present it was repeated a few evenings later,

with the same results. "Daddy" says that making preparations for the party was some job, but the fun and the jolly good time made him feel that time had indeed turned back in her flight and he was a boy again and both he and Mrs. Fogle feel amply repaid, for a "good time was had by all."

Telegraph Department

Correspondent, DELLA M. HAIN

A Merry Christmas to all, and a Happy New Year!

And just imagine, after all these years "Uncle Billy" borrows a young lady's mirror to see—well, just what would he look at?

Here's a rich one. "Charlie" Tansill is taking dictation lessons from our telephone engineer. A-m-e-n!

E. L. Senseney, lineman, Harrisonburg, and his brand new bride, Mrs. E. L., spent their honeymoon at that place of places, Niagara Falls. Congratulations, E. L.!

Make a New Year's resolution—Consult code book Form 2664 when writing messages.

Like fish stories? Of course you do. Here's a story about a snake. Lineman W. C. Michael had two copperheads running after him. Michael won the race and the snakes were killed. One measured four feet in length and the other three feet.

Our supervisor of time service never gets romantic any more. How could he? All of his "Gettogether, gettogether" clocks he is replacing with the "T-a-k-e-y-o-u-r-t-i-m-e" variety. All right, "Bill," you don't keep tune with their tick anyhow.

Mary: "Have some 'chaîms,' Mr. Myerly?"

C. P. W. M.: "No, thank you, I have charm enough."

Transportation Department

Correspondent, J. B. EGERTON

Merry Christmas!

It may be of interest if not, indeed, an inspiration, to many readers of the BALTIMORE AND OHIO MAGAZINE to know that not a few members of the Transportation Department are taking advantage of the excellent educational courses offered in Baltimore to spend the long winter evenings in self-improvement.

Among those of this department taking advantage of the unexcelled facilities of the Johns Hopkins University for higher instruction in many subjects, your correspondent takes pleasure in singling out the names of Miss E. V. McClayton, who is pursuing the course given by Doctor Jacob H. Hollander in Current Economic Questions, and Herbert N. von Wachter, who, among others, is taking the course in Industrial Relations under Doctor Boris Emmet.

The spirit of Christmas economy has already reached the Transportation Department, as is evidenced in the following partly overheard conversation between "Gus" and George, of the File Desk.

"Gus"—Well we won't need to get a Christmas tree this year.

George—What do you mean; where are you going to hang your presents?

"Gus"—Why, on the Bush of course. You know we already have a Bush in the office that will do.

George—No go, "Gus," that would certainly be a-Miss; and Miss Bush is no Christmas tree.

Our heartfelt sympathy is extended to Miss Elsie Russell, chief file clerk, in the death of her father on November 16.

It is with regret that we chronicle the death of Hugh C. Pierce, travelling car agent, reporting to this office. Mr. Pierce was formerly a Blue Line conductor on the Philadelphia Division. After 20 years of Railroad service, he left us and went into business for himself, returning two years ago and reentering the service as traveling car agent. His death occurred on Thursday, November 16. Our sympathy is extended to his family.

A Tragedy Simplified

The early comers were horror stricken on entering the office the other morning, for right on their way to the lockers lay fragments of broken furniture, apparently hastily collected in a heap behind one of the massive pillars which support the upper floors. One brave and usually courageous young lady turned pale and faltered in her steps as she gazed on the heap of debris and shuddered at the thought which flashed through her overwrought mind of the awful tragedy that must have occurred but shortly before; for she felt that a few steps more would reveal the victim of some ghastly deed. Her muscles grew taut and her feet almost refused to act when she attempted to move on to remove her hat and wraps preparatory to starting on the tasks of the day. My heroine was fast losing control of herself and would have undoubtedly swooned had not the sight of two young men peacefully talking caused her to recollect and brace herself, for it would never have done to have given way to any such feminine weakness in their presence, when she heard one say: "Oh, it wasn't anything, only 'Fatty' Latchford ate an awfully big supper last night and when he came to work tried to squeeze into that little chair," and, pointing to the debris, "that's what happened."

Valuation Department

Baltimore Office

Correspondent, G. B. SAUMENIG, *Accountant*
Merry Christmas!

We cannot say for sure that the Valuation Department is permanently located on the eleventh floor. Every now and then there is a sudden quiet in the office. Nothing is said but it is soon evident that our army of engineers are in conference. There they are, bending over stacks of blue prints and charts. The reason is this, one row of tables is seventeen thirty-seconds of an inch out of alignment. All work is stopped and the guilty furniture moved. It is rumored that shortly we will have a mezzanine floor over our heads and desks on the window sills.

Another rule has been given the office and that is the one regarding the window shades being kept at uniform length. Not a word has been said about a common sense rule regarding ventilation. Is it selfishness or an utter lack of everyday knowledge of the rules of health that causes some of our force to absolutely refuse to have fresh air? This action causes the majority in the office to breathe not only impure air, but atmosphere laden with all kinds of disease germs. It would seem that a change of conditions is imperative, or else someone will be responsible for unnecessary sickness.

This will be the last issue of the MAGAZINE in which the correspondent will participate. On November 16 he assumed the secretaryship of the Maryland Society for the Prevention of Cruelty to Animals. His place as correspondent will be taken by our interesting and helpful cartoonist, E. B. Pierce, of the Equipment Branch.

The attention of our readers is called to our cartoon this month. We regard it as

Sloan's Goes Right To The Aching Spot

You can just tell by its healthy, stimulating odor, that it is going to do you good

THOUSANDS of men and women, when the least little rheumatic "crick" assails them, have Sloan's Liniment handy to knock it out. Popular over a third of a century ago—far more popular today.

That's because it is so wonderfully helpful in relieving external aches and pains—sciatica, lumbago, backache, neuralgia, over-strained muscles, stiff joints, weather exposure results. A little is all that is necessary, for it soon penetrates without rubbing, to the sore spot. No muss, no stained skin.

All druggists—35c, 70c, \$1.40.

Sloan's Liniment

Pain's enemy

our best yet and hope the entire family will like it.

Chief Draftsman William C. Coles has finally become a benedict. He and Miss Charlotte Bond, of Fallston, Md., were married on November 17, at the home of the bride. They will have returned from their honeymoon in time for Thanksgiving. They have our hearty congratulations.

SOME OF THE VALUATION DEPARTMENT VISITED MORGANTOWN
DECEMBER 1919

Please mention our magazine when writing advertisers

"There was the sound of a mumbling,
And the mumbling grew to a grumbling,
And the grumbling grew to a mighty
rumbling;"

—And then from the rafters there came a-tumbling—

the three members of the Valuation Party Number 3 whom you see in the accompanying photograph. They are, left to right: V. Weintraub, assistant engineer; H. T. Southerington, topographer; J. H. Gaule, chairman.

Yes, when they first came to Mt. Royal Station we did not know they had arrived. Therefore, you may be sure that when we heard unearthly noises that sounded like an army of rats tumbling about the walls, we began to ask if the station was known to be haunted. Not having time to make a thorough investigation, we passed a rather uncomfortable week before we discovered the cause of the peculiar noises. Finally, they came into the office of the MAGAZINE and took possession of it with their pencils, tapes, triangles, blue-prints, photographs and all kinds of valuation paraphernalia, and informed us that they were appraising the property.

During the past year this crew has visited nearly all of the large terminals of the Baltimore and Ohio, measuring, recording, and photographing railroad property.

"At the beginning of our expedition," said Mr. Southerington, "our president sent out a circular letter informing the employes at the various terminals of our object in visiting these places and asking their cooperation with us in order that results might be obtained quickly and thoroughly. We wish to state that every-

where we have been we have met with this fine spirit of cooperation, and we certainly appreciate it."

On the day that our friends had the photograph made, they paid us another visit, but they were so dressed up that we hardly recognized them. Of course it was Saturday, so that may account for it. Somebody has asked that we call our readers' attention to the fact that they make up a handsome trio, but this is quite unnecessary—just look them over.

This party, known as the Terminal Building Party No. 3, is under the immediate charge of D. G. Wilbur, building pilot engineer.

The following may not interest our readers, but it is true. Our friend Hartlove, of Vice-President Galloway's office, met with a serious accident some time ago. Now he carries a cane. It is especially noticeable that this cane receives but very little attention, except when there is a crowd. When he comes to a crowded street, he waits until some kindhearted person will see that he is taken across safely. Watch him and see if the above statement is not true.

It has been said that it is impossible to use 'phone 171 at noon. Lillie says it is necessary, but the others say it is not. In order to settle the argument, fix it up quick and there will be no necessity for 'phoning. You know what I mean.

The following may be too deep but it can be fathomed.

Inexpensive Amusements

Place: Drafting Room. Time: Any time.
Moving Pictures with Music.

Testing new face powder—all week.
Added attraction—The celebrated female whistler of the world. She will whistle any song, new or old.

No wonder Isaacs and Faber are happy. The former says they named the boy Walter Ulman and each morning he sends his best wishes to the office. No doubt, "Joe," but we cannot believe it. Faber claims his youngster, who has been named John Carl, "Jack" for short, has them all beat. If he grows in proportion to his father, he will be some boy.

Cincinnati Office

How Do These Strike You

You tell 'em I. C. C. tape, I've lost a foot.
You tell 'em Locke level, I can't see through it.

You tell 'em old profile, its too deep for me.
You tell 'em D. V. 135, I'm a liar.

You tell 'em alarm clock, J. R. is too early.

You tell 'em H. K., I want Justice.

You tell 'em Taylor, I want a suit.

You tell 'em Wye Level, he is only Dumphy.

You tell 'em slope board, I lost the inclination.

You tell 'em culvert, you've got an opening.
You tell 'em borrow, you've been around wastes.

Now—You tell 'em Bonney, for your a real sweet boy.

Why does Bonney howl for a typewriter, when he has an Oliver on the car?

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPFT

Christmas Greetings

To Employes in Office Auditor Coal and Coke Receipts:

Another year has passed and together we have come again to the Christmas season, giving me the opportunity to extend to each of you the compliments of the season and to wish you all, individually and collectively, a "Merry Christmas" and a "Happy New Year," and that you may have many of them with happiness and prosperity for yourselves and your families.

I desire also to express my appreciation of your hearty cooperation in accomplishing the work that has devolved upon us as co-workers during the year, bringing with it many new problems and perplexities, which, with your united support, we trust have been handled satisfactorily and to the best interests of the Company and of all others concerned.

For this cooperation and support I am sincerely grateful and hope for its continuance through the year that lies before us.

Sincerely yours,

L. A. LAMBERT,
Auditor Coal and Coke Receipts.

Once more the happiest season of all the year approaches and it is with all sincerity that we wish our fellow employes of the office, and on the entire System, a Merry Christmas and a Happy New Year. May we all be here this time next year enjoying the same good health and continued prosperity.

What promises to be the source of many an evening's pleasure during the coming winter, is a bowling league, composed of five-men teams picked from the office force. The weekly roll-off takes place on Wednesday night, on the "Y" alleys, and as there is plenty of room for spectators, anyone wishing to see some good pin spilling is invited to be present. We expect, after a few nights' practice, to be able to have a picked team, who will be ready to meet all comers.

Members of Valuation Party No. 3, left to right: V. Weintraub, H. T. Southerington, J. H. Gaule

Two is company, three is a crowd. We have several individuals in the office that are crowds all by themselves.

They all fall sooner or later. The latest fall was sustained by our old friend, Walter Lavan Price, secretary to the comptroller, who, on October 30, joined the noble band of married men. The happy, and one might add, lucky bride was the former Miss Florence M. Heiderich whose little sister, Elsie, works in this office.

The many friends of both bride and groom join in wishing them all kinds of happiness.

Under the heading of **STYLE**, quite a few of the ladies are wearing their shirt waists hanging loose and easy, right straight down, not hid away or tucked inside the skirt at the waist. Maybe it's all O. K., but suppose the men should take a fool notion to wear their shirts hanging out all around. Oh, boy! Some style!

It has been whispered to us that Howard August Ekas, he-vamp of the office, is taking up dancing. Don't know what kind, whether it be fancy, barefoot, toe, Isadore Duncan interpretative, Oriental, or just everyday jazz; neither do we know the cause of this sudden change, but it is also rumored that he is thinking of breaking into the "Follies." Last report has it that he shakes an irresistibly disastrous shimmy. Watch him, girls!

Among those more seriously ill during the past month was C. P. Spedden, who was compelled to take a rest, because of general run-down condition, and who recuperated at beautiful Braddock Heights.

Miss E. M. Ritter had a severe cold, which forced her to take several weeks' rest and W. H. Brauer was down with a bad case of grip.

We hope for the complete and speedy recovery of all.

Auditor Merchandise Receipts

Correspondent, P. HENRY STARKLAUF

Christmas being a state of mind rather than a date on the calendar, we herewith present a list of those who should be happy, at least in their own respective spheres:

Wedding Announcements

Miss Ruth Kenneally, Local Settlement Bureau, and Rev. William Milton Eareckson were married on November 24, at Cummins Memorial Church, Lafayette Square. Miss Kenneally is the daughter of one of our pioneer employees, William E. Kenneally, Wicomico Yard, who entered the service of the Railroad in 1904. The happy couple were the recipients of many useful presents, but none, perhaps, was more useful than that presented by the young lady's office friends, who placed a tissue paper cornucopia, filled with all manner of kitchen utensils, upon her desk. Our hearty congratulations are extended to this happy couple.

The other Autumn weddings are:

Miss Mary Gallagher, Local Settlement, and George Hickman, at the rectory of St. Jerome's Church, on November 17, by the Rev. Father Little.

Miss Joy Griffith, Local Settlement, and Mr. Joseph Morris at the bride's home in Govans, on November 10, by the Rev. Ennis. After an extended honeymoon through the South they will reside in Raleigh, N. C.

Miss Marie Kurtz and Mr. William H. F. Playhart, Jr., at the home of the bride, on November 24, by the Rev. G. C. Gabriel, of the Grace United Evangelical Church. An ocean voyage to various cities in the

far Southland—Jacksonville, St. Augustine, Miami—appears on their itinerary.

Miss Mary Evelyn Marren, Comptometer Bureau, and Raymond J. English, secretary to auditor overcharge claims, at noon on November 17, at St. Bernard's Church, by the Rev. J. T. Toolen.

Frank Rutter, assistant chief clerk, Local Settlement, to Miss Emma Virginia Bates, on November 17. They will make their home in North Forest Park.

Edgar Spilman, head clerk, Local Settlement, to Miss Rose Lee Tudebohl Seim, on October 20, at the rectory of All Saints' Chapel, Forest Park, by the pastor, Rev. Timothy B. Kenny.

Auditor Passenger Receipts

Correspondent, G. FRED MILLER
Secretary to Auditor

To everyone in the office I wish the happiest, brightest and merriest Christmas they have ever known, and the good wishes are doubled for the coming New Year.

As this issue will be forthcoming in December, the Christmas month, take a tip from me and do your shopping early. Remember the poor little girl in back of the counter, and don't forget to buy the biggest, largest, fattest stocking you can, for no matter how old we are, we know we have to hang up our stockings at Christmas. If you all follow my example you won't hang up a little sock. The nearer we come to Christmas the happier we feel, and we just can't get it out of our heads that we must do a little good and make others feel just as happy as we do. After doing a good turn, there's a certain feeling comes the next day which makes us feel big and fine and friends with the world.

Why go to the Rockies when we have our beautiful mountains and hills in this wonderful State of Maryland? The Welfare Association of this office being aware of the beauties of the Old Main Line, journeyed to Frederick and Braddock Heights on Sunday, October 24. J. M. Finn successfully guided the party.

Like all the Sundays of the October just passed, the day was perfect, and our old Railroad, which winds its way through the foothills towards Western Maryland, never looked prettier. While quite a few carried their lunches (such lunches as only Maryland ladies can pack), the remainder of the excursionists had their dinner at a hotel in Frederick, and from all accounts it was a splendid one.

"Hercules" Aler had three ladies in Frederick and gave the town folks a surprise. He was advertised as being the Prince of Wales. He's a jolly good fellow, don't you know! After reaching Frederick the battle cry was, "On to Braddock Heights!" General Finn soon had his army on its way and captured the place by storm. "Jim" Zim and J. Z., Jr., were the special guests of Mr. and Mrs. Jentner at their luncheon on the side of the mountain. "Jim" hasn't finished talking about that lunch yet, and he's trying to have Mr. Jentner adopt his son "Jim," Jr., who just loves fried chicken. Look out for a picture of "Jim," Jr., in the MAGAZINE one of these days.

Front row seats at the foot of the sliding board were in demand. As the sightseers reached this section of the park, they hesitated, gazed upon the sliding board and were lost. Talk about "Slide, Kelly, slide," that day it was, "Slide, Minnie, slide," and Minnie, Helen and Lillie did slide, too.

The day was ideal, the folks happy, and, due to the kindness of the Railroad officials, the outing was made possible; therefore, we take this opportunity to thank the Company

for its generosity, and Messrs. Finn and Billmeyer for their efforts in making the excursion a success.

Brother Hiltz was heard to murmur, "Boys, I haven't had a job as yet, but I have had several weddings." I haven't the heart to wish you good luck, friend.

It seems as if Cupid has decided to use this office as a special target for his deadly arrows. Miss Florence Heiderich and Walter L. Price were recently married, and are now on their honeymoon at the only place to spend a honeymoon, Florida. (I'm not speaking from experience.) This wedding was one of inter-department interest as Miss Heiderich and Mr. Price are well known throughout the Accounting offices, Mr. Price at the present time being secretary to our comptroller. Good luck and best wishes for many happy years to come.

Miss Florence should have everything her heart desires, she now has the Price, you see.

ORDER TODAY Just send us your name and address. No red tape. Just say, "Send me the Bunn Special." Do not enclose a penny. Don't delay. Write today.

Our 128-page catalog, No. 693 shows more than 2,000 attractive in diamonds, watches and jewelry. Write for it NOW.

J.M. LYON & Co. { Dept. 1 Maiden Lane }
{ 69J } New York City

You'd never believe it, but Miss Amy Norris really did hurry over to the Quaker City the other evening and got married. You have to keep your eyes on these quiet little girls. They're very deep and it takes a wise man to keep pace with the speed of the world these days. Heartiest congratulations to friend husband and the happy bride.

That surely was an exquisite silver service "Jimmie" Tracey and his wife received from the office, and those who selected it deserve much credit. We just love tea, "Jimmie."

Linger longer, splendid weather, and our coal in the cellar will last forever.

This being November, the month of Thanksgiving, let's all remember how good it is to be alive, to be healthy, strong and to have good friends, and a nice warm office to work in this coming winter. We have much to be thankful for, no serious "Flu" epidemic, good positions and nice salaries. Positions that belong to us as long as we do the right thing. Give as we would have given unto us.

We asked our fellow clerk in the last issue the reason for his journey to Canada, and now "Bobbie" is putting us on the right track, via poetry:

An Answer

Oh, please, G. Fred Miller,
Why make much sport of me,
For going up to Canada
About prohibition to see?

I was curious, I'll admit,
For of strange things I had heard,
"Our country was dry," they said,
"Go where they're free as a bird."

And so, away I went
To the near land of the spree,
But, dear Fred, 'tween them and U. S.
I'll take our land of the free.

—ROBERT E. MACHIN.

Sounds more like Robert Burns than Robert Machin. Wait until the Bentztown Bard reads this, "Bobbie!"

New York Terminals

Correspondent, SARAH ROLMES

Merry Christmas!

Dr. Stork visited the home of Francis J. O'Reilly and left a baby boy as a gift. Congratulations!

We are glad to welcome John Bradley in our midst once more, after his having been away from us for over four years.

That a smile can be used to good advantage is shown by Max Marder of the East-bound Department. When one of the girls

On the watch on Staten Island

remonstrates with him for making raids upon her desk, he just grins, shows his nice teeth, and then she can't help forgiving him.

We wish A. H. Bayer success in his new position of chief clerk, and have no doubt that he will be as good as his predecessor, H. O. Duffy.

"Bob" Riddell took a week-end trip to Niagara Falls with his mother, and was "all in" when he returned. We wonder if this feeling had anything to do with the "water" that is obtained on the Canadian side of the Falls.

Greetings exchanged between two of our fellow workers:

Miss T. W. to Mr. F. J. D.: "Good morning, Mr. Baltimore."

Mr. F. J. D., in response: "Good morning, Miss Ohio."

Staten Island Lines

Correspondent, G. F. GOOLIC

Merry Christmas!

J. B. Shay, coal shipping agent at the Arlington Coal Piers, sends us the accompanying picture of the McMyler Dumper at that point, with insert of Cornelius Sullivan. The little park which is seen is the special pride and care of Sullivan, who is ready to dispute anybody's right to spoil its appearance with paper scraps or any other kind of rubbish. A bit of green here and there about our working headquarters is a wonder-worker. Congratulations, Cornelius. Keep up the good work!

Join the Land-Navy Boys

There must be something extra good along the route of the ships passing New Dorp,

Grant City, and many other stations. Our recruits and firemen stand on the "look-out" for their friend to give them the ta-ta. How's business, "Finnally?"

Employees' Mutual Benefit Association Ball

The Stapleton Club Rooms, Stapleton, presented a picturesque setting on the recent Saturday evening of the annual ball of the Employees' Mutual Benefit Association of the Staten Island Rapid Transit Railroad. The hall was crowded to its utmost with the members and their friends. The hall was beautifully decorated. The stairs leading into the dance hall were draped in trimmings of white and gold, while the dance auditorium took the crowd by surprise when they entered. Every nook and corner was covered with white and gold decorations, and along the walls large clusters of colored lights illuminated the place. The large stage was arrayed with ferns and palms and behind these all the latest dance hits were rendered by Professor Vice's double orchestra.

Between the dances song hits were rendered by John B. Mahoney, Miss Frances Connine and Miss Anna Marshall, and the singers had to respond to many encores. The grand march was led by Mr. and Mrs. Slattery, followed by the members of the committee, attired in full dress. All the leading social and political clubs then followed, making it one of the most notable affairs held at the Club Rooms in a long time. Mrs. Slattery was presented a large bouquet of flowers.

The following were in charge: B. F. Kelly, president; E. E. McKinley, vice-president; J. B. Sharp, treasurer; G. J. Goolic, recording secretary; J. V. Costello, corresponding secretary. Executive Committee: J. F. McGowan, W. J. Reeves and W. Darnell. Floor Committee: H. H. Bardes, chairman; F. V. Martin, L. Rabino, J. McVeigh, E. J. Haslam, A. Moeller, F. Fetzner and J. F. Langford. Reception Committee: E. J. Hammer, chairman; W. J. Kenney, J. D. Gibb, A. Roring, D. Buckley, A. L. Mickelsen, F. T. Metcalfe, W. E. Connell, H. C. Barry, W. L. Dryden and L. R. Van Horn. Arrangement Committee: W. P. Slattery, chairman; R. Seigel, F. Rebhan, T. F. Watson, J. Naples, A. J. Conley, E. Wagner, J. Trainor, C. H. Bardes, B. Schweiger, E. Weissner, W. Hayes, W. Ellis and J. S. Volkert.

Is there anyone in the crowd who can explain why they've installed new springs in Smoking Car No. 64? Let's ask "Ed," maybe he knows.

Why does Williamson, Division Storekeeper's office, Clifton, N. Y., tie his umbrella to his vest when he goes out? We wonder if it is his short memory or, if he is in LOVE?

Cornelius Sullivan and his "bit o' green" at the McMyler Dumper, Arlington Coal Piers

Daily Occurrence

"Well! Why don't you stay by that gate over there, and see when the train backs in, 'stead o' scanning those Janes over on that bench morning till night?"

"Hey! fo' who you think you talkin' to? Me watcha my gate. I'm no needa you to tella me 'bout my business, dats all—huh!"

Ha! Ha! It's all right, Peck. Nogettamad.

Oh! Frenchy, who was it you were speaking to in "French" in the train sometime ago? Too bad Tompkinsville was so close to Stapleton.

"Joe" Bloom and "Bob" Wilson, will you kindly look after "Rocco" a bit more closely, please?

Harry Bombardi, we are all puzzled. Won't you kindly tell us where you get those *cigars* you smoke daily. Are they wished on you?

Frederick Shaboh, assistant chief night clerk, has a new Liberty Six. "Fred" has been very grouchy lately. I wonder why?

We are all glad to see "Bobby" Larkin, the snappy little car checker, back at his place in Arlington Yard.

How's the "Works," "Pete"?

Fifteen years ago Reinhard Groeling, Tompkinsville, was appointed secretary to the general traffic agent of the S. I. R. T. and Baltimore and New York Railroad.

We are pleased to announce the marriage of E. J. Haslam, signal helper, and Miss M. Murphy. The marriage took place at Tottenville, S. I. We all extend our congratulations and good wishes to both. They spent their "Honeymoon" visiting friends at Boston, Mass.

J. S. Volkert has been transferred to Lighterage Department; Joseph Lynch, day crew dispatcher, Stationmaster's office, has been promoted to day crew dispatcher at St. George Yard, vice J. S. Volkert. J. M. S. Lynch has been promoted to day crew dispatcher, vice Joseph Lynch, promoted.

John Westerman, maintenance of way carpenter, has been promoted to foreman pile driver, St. George, vice F. McCarthy, resigned.

The accompanying picture is of Conductor J. Holman, Trainman Christopher, Fireman Peggy, Trainman Davidson and Engineer Miller.

Here's a crew for you (see Notes)

Baltimore Terminal Division

Correspondent, MARTHA V. FOX, *Secretary to Superintendent*

Merry Christmas to all!

While in conversation with Agent C. H. Edwards, Mt. Clare, he advised us that in the October issue of the MAGAZINE, our correspondent showed him as having been in the service 44 years. Mr. Edwards states that while he has only been in the service 33 years, he hopes that some day he will be a veteran of 44 years.

E. M. Hughes, formerly *chief clerk* to trainmaster, Riverside, has recently been appointed secretary to the superintendent. Here's wishing Mr. Hughes every success in his new position.

The most completely lost of all days is the one in which we have not done our best to keep the wheels turning to help increase car mileage.

Cooperation is essential in all undertakings—so let us all cooperate in keeping the wheels moving to increase car miles on our division.

Locust Point

It is with deep regret that we record the death of our friend and fellow clerk, L. J. Henning, who passed to the Great Beyond on October 25.

He was a gentleman of fine sensibilities, a faithful employe, and a true friend, who by the strength of his character had endeared himself to everyone. Our heartfelt sympathy is extended to his bereaved family.

On the day of the Bankers' Outing, our Mr. Walstrum was appointed official flagman, and Mr. Willis was in charge of the entertainment committee.

Questions to be Answered

Who sent Mr. Melis the bouquet of flowers?

Who was the pretty girl whom we saw at the Garden Theater with Mr. Eisel the other day? She was a peach, but the boys are afraid that Mr. Eisel is taking 'em to raise.

Why were Messrs. Harshberger and Nowlin, our platform boys, waiting on the corner of Charles and Baltimore Streets on Saturday night? All dressed up with nose-gays adorning their buttonholes! Ah, we have our thoughts.

Silver tray and pitcher presented to W. T. Moore

The handsome silver tray and pitcher in the picture were presented by the clerks at our Locust Point Piers to their former agent, W. T. Moore, who has been appointed foreign freight agent. The presentation was made by J. J. Geigan, assistant agent at the Piers, and short addresses were made by C. M. Shriver, assistant superintendent, and Agent J. M. White.

Mt. Clare Shops

Correspondent, MISS MOLLIE ALBRECHT,
Secretary to Superintendent

Superintendent of Shops

Merry Christmas!

Everything is just about the same in this dear old office. Poole is still shouting "Hydrostatic test" over the phone; Miss Davis is still embroidering; Marion is still running errands for his favorites; "Jim" Tatum is still having lots of trouble; Mr. Carroll is busy with the Safety Campaign; Miss Schafer is still busily tapping the keys; "Joe" is still writing out numerous passes—in fact, sailing is pretty smooth these days. Of course, during the election period there were several heated arguments, during which the Misses Schafer and Albrecht were called upon to uphold the dignity of the office (by voting for Harding), when the balance voted for Cox. Most of our men were wearing buttons with roosters on them, which said, "We'll crow in November;" but somehow, none of these roosters have done very much crowing since November 3. Things have been *very quiet*. Miss Davis is going to leave us the end of November, and we are sorry indeed. We'll all miss Helen, with her cheery voice over the wires,

"Hey, there! I'm F. W. Vernon, Jr., and I'm going to be a railroader when I grow up!"

and we hope she won't neglect her Mt. Clare friends, even after she is married. Good luck, Helen!

Car Department

The accompanying picture is of F. W. Vernon, Jr., son of F. W. Vernon, and grandson of W. D. Roehner, foreman in the Car Department.

Stores Department

The accompanying picture shows the fairer portion of the office of the Storekeeper. They are: Mrs. German, the Misses Thelma Offutt, Edna Bussard, Lida Oliver, Minnie Claypoole, Edna Ruhlman, Mary Snyder, Bertha Harman, Ida Buchanan, Mary Duke, Katherine McCaffrey. The two gentlemen on the picture, who are holding these fair damsels on the roof of the storehouse, are John Kurtz and J. W. O'Neill. I guess there are quite a few who envy them their jobs.

Stewart A. Peters has been appointed chief clerk to the storekeeper at Mt. Clare, vice Harry E. Litchfield, transferred to Brunswick, as storekeeper. We welcome him into our fold, and hope that his stay with us will be a long one.

she has ever refused to do anything for them, and they will immediately tell you, "No!" Miss Julia is easy-going, and never allows herself to become ruffled. (And that's more than a lot of other Mt. Clare stenographers and secretaries can say!) This is just a little note to say that if she ever decides to undertake a *new position*, we wish her all kinds of luck!

Engineer of Tests

"Judge" Harry W. Harman gave the boys of the Test Bureau the slip, and got himself a little wife. When the "Judge" came back (after the ceremony), the boys asked him how he liked her; he said, "Oh, well!", but we are not sure if his answer was spelled with a W or H.

Harry G. Franck, better known as "Miss" Franck, the new arrival in the Chemical Laboratory, took a trip to Atlantic City, and while there met a young lady, Mabel, who hails from Lancaster, Pa. (Isn't it queer what attractions the little country clinging vines have for our city grown sturdy oaks!) Harry now carries a number of trip passes to this burg, and is always singing:

"If I can't have the girl I want,
I don't want no other."

Office force of Stores Department, Mt. Clare*

Tool Department

Lester L. Robinson, carried on our payroll as machinist in this department, has been transferred to Cumberland, where he has been appointed shop draftsman and apprentice instructor. Mr. Robinson left many friends at Mt. Clare, all of whom wish him the best of luck, and hope that he will have just as large a following of friends at Cumberland as he had at Mt. Clare.

As long as the MAGAZINE has been in existence, nothing has been said about "Miss Julia." We are now going to make up for lost time, and tell you a little something about her. Miss Julia has been stenographer in No. 3 Machine Shop office since her arrival at Mt. Clare, over three years ago, and you can ask any person in the Tool Room or No. 3 Machine Shop whether

Accounting Department

H. T. Beck, accountant, Mt. Clare, has been appointed chief clerk to the assistant auditor of disbursements. We wish him all kinds of luck in his new position, and we will miss him at Mt. Clare. Mr. Beck was always ready to give a helping hand to any needy person coming his way, and there have been lots of us who needed a help during his four-year stay at Mt. Clare. We are glad he isn't going any further away than the Central Building.

L. W. Fowler has been appointed accountant, vice Mr. Beck. Mr. Fowler is known to many of the Mt. Clareites, and we welcome him heartily into our midst, for he is a "jolly good fellow." Just as soon as the rest of Mt. Clare knows him, they will all shout for him.

Frederick Anacker and his grandchildren

The accompanying photograph is of Frederick Anacker, finishing shops, Mt. Clare, with his two grandchildren, James Frederick Lane and Margaret Blanche Lane. The picture was taken at Mr. Anacker's home at Morrell Park. James, the little fellow seated comfortably on grandpa's lap, is just 18 months old and weighs 35 pounds. Margaret Blanche is quite grown up, being four years old and quite capable of caring for her Teddy bear. Mr. Anacker is 54 years old, and has been in the service of the Company for 26 years. He is mighty fond of his grandchildren, as anybody else would be of youngsters like these. He has two others: Elizabeth, who is seven years old, and Adele Alma, who is six. Mr. Anacker is a Veteran and his wife is a member of the Ladies' Auxiliary.

Baltimore Division

Correspondent, W.H. TARR, *Superintendent's Office*, Camden Station

The regular monthly meeting of the Divisional Safety Committee was held on Wednesday, November 10, with Superintendent R. B. White in the chair. Matters pertaining to the safe operation of trains on the Road were discussed by Mr. White and points not heretofore discussed at our meetings were explained and were of interest to all those concerned in the safe operation of the Road.

The accompanying photograph is of little Miss Dorothy Elizabeth Ditzel, the attractive daughter of G. J. Ditzel, machinist, Riverside Shop.

Little Miss Dorothy Elizabeth Ditzel

No-Accident Acrostic

By G. W. Johansen

Operator, Holmes, Pa.

N ever cross the tracks before you stop,
look and listen.
O ur hearts are in the right place, show it.
A lways bear in mind
C arelessness
C auses
I njuries and
D eath, which
E nergetic employs
N ever fail
T o impress upon our minds.

C annot we all get together
A nd push our division ahead?
M ake every minute count for better.
P ull hard, boys, and push hard, too.
A ll working as we should together,
I nch by inch we will gather in.
G ood results that will never fail.
N ow is the time, boys, our division shall win!

During the month of October, the Baltimore Division handled the traffic to and from the Laurel Race Track. There were 152,000 passengers handled with no serious injury to anyone. The handling of this number of passengers without mishap is a source of gratification to the management.

Hamilton Watch

"The Railroad Timekeeper of America"

A Railroad Watch must be unfailing, like the air-brake

Safe railroad service depends on air-brakes, and on accurate watches. Like the air-brake, the railroad watch *must* be reliable. And the Hamilton is a timekeeper trusted by railroad men, with all their deep sense of responsibility for human life.

Truly dependable, every Hamilton is made right. With proper care it will stay right throughout a long lifetime of usefulness. The Hamilton is truly a fitting and appropriate gift for the young railroad man who is just breaking in, or for the veteran to whom associates would pay honor.

All the Hamiltons, from the bracelet models women wear to

Engineer Frank R. Lippincott pilots the "Twentieth Century Limited" out of Chicago on its first lap to New York. A real veteran is Engineer Lippincott—an engineer for forty years, and pilot of the "Century" since that famous train was first inaugurated. A quarter of a century as engineer on one of the world's fastest trains qualifies a man as a judge of watches. Engineer Lippincott carries a Hamilton—has, for the last ten years.

the timepieces which set the wheels of engines revolving, are reliable watches. Prices range from \$40 to \$200. Movements alone, \$22 (in Canada \$27) and up.

Send for "The Timekeeper"—our booklet which tells how a fine watch should be cared for. The different Hamiltons are illustrated and the prices given.

HAMILTON WATCH COMPANY, Lancaster, Penn.

Right: Passenger Brakeman Stone and wife

The accompanying photographs were taken on the flower farm of Passenger Brakeman W. H. Stone, Gaithersburg, Md. This year Mr. Stone's large and handsome collection of dahlias and Chinese asters attracted much attention, and the products of his garden found ready sale by the florist at Washington Terminal. Mr. Stone's home is one of the show places at Gaithersburg, a terminus for some of our local trains on the Metropolitan Branch. Mr. Stone himself has become quite a connoisseur in the art of growing flowers and takes great pride in his work. He has many friends among the children of the neighborhood; a group of these enjoying a pleasant visit to the flower gardens is shown in one of the photographs.

As the people of the United States have chosen their leader for the next four years, our division looks forward to the handling of an unprecedented crowd for the coming inauguration on March 4, 1921.

Here is a picture of our attractive station at Holmes, Pa., and our representatives at that point. The men, left to right, are: H. S. Hartman, agent-operator; P. J. Lynch, clerk; H. K. Hartman, division operator.

Washington, D. C., Freight Station

Correspondent, W. L. WHITING, *Chief Clerk*

A Merry Christmas and a Happy New Year to Everybody!

A happy group of little children in the beautiful gardens of Mr. and Mrs. Stone

And why should we not have a Merry Christmas and a Happy New Year? The election is over; the tremendous upheaval of the past few years has quieted down to a considerable extent, the entire world shows signs of returning to something like a normal condition, and the glad season is here when the blessed thought of GOOD WILL TOWARDS MEN will take the place of the fearful thought of War and Bloodshed; the season when PEACE ON EARTH seems to be almost an assured fact, and we are called upon to give GLORY TO GOD IN THE HIGHEST, who has brought us through our times of trouble.

Our thought is now of preparation for the great inaugural ceremonies of next March.

When things become topsy-turvy in the railroad yards and, instead of being a freight station, we are suddenly converted into one of the largest passenger stations in the country, it is an exciting time.

There have been the usual changes in our force lately. Miss Elizabeth Taylor, carbon clerk, and Milton McGovern, assistant agent's stenographer, have both left us to seek other "worlds to conquer." We wish them all success in their new

Holmes Station and the people who work there

ventures. Kenneth E. Ardinger comes to us as carbon clerk, and Henry E. Keane and W. E. Costello are busily engaged as freight bill clerks. We welcome all newcomers to the fold, and hope to see their faces with us for a long while.

Miss Gladys Beall, who was very ill for quite a long time, has returned to her desk fully recovered. Thomas E. Frye, chief delivery clerk, who was obliged to stay home on account of sickness, has returned to his duties. We all are glad to welcome back those who have been sick, and sincerely hope that it will be a long time before they are obliged to be absent for the same reason.

Cumberland Division

Timber Preserving Plant

Correspondent, E. E. ALEXANDER
Merry Christmas!

H. E. Gulick has been appointed watchman, succeeding E. M. Boyko, assigned other duties.

In the interest of increased car loading several of our foremen, particularly loading foreman G. C. Conley, deserve mention for their efforts to work out a tie loading device for loading freshly treated ties into closed cars. One of these devices, made for us in Martinsburg, while not developing the speed we desired, has proved fairly successful in increasing carload loading. Our plans are now being further perfected by our chief engineer, Maintenance of Way.

Purnell Jackson Brill

On the evening of November 6, as the dark hand of night was pushing the sun beyond the western hills, the spirit of one of our most dependable employees returned to its Maker, after an illness of eleven days.

Purnell Jackson Brill, son of Joseph and Annabelle Brill, was born at Doman, W. Va., December 28, 1881. He married Sara May Ruckman, daughter of Wright W. and Lucy C. Ruckmann at Cumberland, Md., on November 2, 1911, who, with three sons, Omar, age eight, Boyd, age four and Charles, age six months, survive him. He also leaves

two brothers, Simon S., of Doman, W. Va., and George B., of Cleveland, Ohio.

Mr. Brill was in the service of the Baltimore and Ohio some years ago but left it to take care of his parents at home. He last entered Company service on June 1, 1917, and on November 15, 1917, was appointed stationary fireman, which position he ably filled until his death.

M. Skelley, G. W. Robinson, G. N. Teeters, C. C. Ricewick, J. R. House and J. J. Foley, boiler room and plant employees, as pallbearers, sadly carried the remains from his home to the train and, as the Plant whistle was blowing, placed it

aboard the train to be carried to its last resting place, accompanied by beautiful floral tributes from the Plant, his organizations and friends.

G. H. Strople, supervisor, New Castle district, was an interested visitor at the Plant recently. He had been using treated ties and was anxious to see where they came from.

J. R. Myerly has been temporarily assigned to the duties of treating inspector with the American Creosoting Co., Marion, Ill. A. E. Irving, tie inspector, has been appointed treating engineer, vacancy of J. R. Myerly.

While we have received no official notice, we have been reliably informed that Ralph G. Smith, our estimable express agent, and Miss Ezzena May Montgomery, daughter of R. Montgomery, engineer, were quietly married in Cumberland on November 4, at the M. E. Parsonage, Rev. M. L. Schlinke officiating. They have our best wishes.

Audrey Geneva Nixon, daughter of Hostler and Mrs. R. D. Nixon, born October 31, died on November 4. The bereaved parents have the sympathy of the Plant employees, especially of those of us who are parents.

Brother C. H. Davis, Martinsburg Veteran, and his bride

C. W. Lane, formerly supervisor at the Plant, has sold his home on the Romney Road, which has been occupied by J. D. Rockwell, to C. G. Haines of Spring Gap. Mr. Rockwell has moved his family to Green Spring.

Mr. and Mrs. J. W. Twigg gave a delightful party on the evening of October 30 in honor of Miss Frances Lee Twigg's 21st birthday. Music, games and refreshments were enjoyed until a late hour. Some of those who were present are: Mr. and Mrs. C. L. Kittle and daughter Carolyn, Mr. and Mrs. G. C. Conley, Mr. and Mrs. E. E. Alexander, Mr. and Mrs. J. W. Twigg, Mrs. J. C. Alexander and daughter Amy, Mr. and Mrs. R. G. Smith, Messrs. H. M. Whitford, W. F. Kesler, W. H. Smith, Garland Myerly, Worthington Kline; Misses Geneva Kline, Elizabeth Sisler, Minnie Catlette, Georgie Gurtler, Lavine Nelson, Edna Foley, Evelyn Barrager, Daisy Smith, Mary Robinson, Frances Lee Twigg, Marie Twigg, and Master William Twigg. Miss Twigg received several useful and beautiful presents.

Martinsburg Shops

Correspondent, W. L. STEPHENS

Merry Christmas!

Robert G. Turner, drill pressman, died at his home, 116 North Center Street, on Saturday, November 6.

Mr. Turner was 38 years old. He entered the service of the Baltimore and Ohio as an

Robert G. Turner, drill pressman, Martinsburg Shops

employe of the frog shop, and by his efficiency and earnest efforts, earned a number of promotions. About two years ago he was taken ill and never recovered. He was an earnest Christian, a devoted member of the First United Brethren Church, and a member of Tuscarora Lodge No. 24, I. O. O. F. A widow and one son survive.

The accompanying photograph is of one of our veterans, Brother C. H. Davis, and his bride. Brother Davis is leading machinist in the Frog Shop at Martinsburg. He recently informed the boys around here that he was tired of leading a lonesome life. The result was that he proved his excellent judgment when he picked out such a handsome wife. He deserves credit, and the Martinsburg Veterans extend their hearty congratulations and best wishes to the happy couple.

Brakeman Charles Lee Duke and Miss Marjorie Smith were recently married. After a wedding trip to Chambersburg, Philadelphia, and New York, they will be at home, 323 Boyd Avenue.

The shop boys extend their deep sympathy to their fellow workman, William Brannon, in the loss of his two children, James C., age three years, and Loretta Virginia, age five years. The little ones were ill of diphtheria for only a few days. Their brother Calvin was also very ill, but we are grateful to say that he has recovered.

Mrs. Nettie Grimes, widow of Trackman Clarence Grimes, died at her home on North High Street, this city. Mrs. Grimes was an active member of the Ladies' Auxiliary of the Baltimore and Ohio Veterans' Association.

At the time of this writing, the No-Accident Campaign is in full swing, and perhaps by the time that this goes to press we shall know the names of the winners and of the winning division. Let us continue the spirit of the campaign indefinitely. Soon winter will be upon us with its snow and ice. Gather up all of the loose material, all boards with nails protruding, and anything over which the snow might make a trap or snare for some unsuspecting person. This is one way in which everybody may help.

Turn to the Veterans' Department of the MAGAZINE and read there of the doings of our Veterans and of the Ladies' Auxiliary.

EIGHTH REVISED POCKET EDITION

Locomotive Breakdowns

And Their Remedies

By GEO. L. FOWLER

Revised by WM. W. WOOD, Air Brake Instructor

292 Pages (4 x 6 1/2) Price \$1.50 Fully Illustrated

The new pocket edition of "Locomotive Breakdowns" has been revised by Wm. W. Wood, the well-known railroad expert, which is a sufficient guarantee that this work represents the best practice of the present day and is exhaustive in text and illustrations.

It is out of the question to try and tell you about every subject that is covered in this pocket edition of Locomotive Breakdowns. Just imagine all the common troubles that an engineer may expect to happen sometime, and then add all of the unexpected ones, troubles that could occur, but that you had never thought about, and you will find that they are all here, in this Up-to-Date Edition of "Breakdowns," with the very best methods of repair.

CONTENTS:

I—Defective Valves. II—Accidents to the Valve Motion. III—Accidents to Cylinders. Steam Chests, Cylinders, and Pistons. IV—Accidents to Guides, Crossheads and Rods. V—The Walschaert Valve Motion; Accidents that May Happen to the Gear. VI—Accidents to Running Gears. VII—Truck and Frame Accidents. VIII—Boiler Troubles. IX—Defective Throttle and Steam Connections. X—Defective Draft Appliances. XI—Pump and Injector Troubles. XII—Accidents to Cab Fixtures. XIII—Tender Accidents. XIV—Miscellaneous Accidents. XV—Compound Locomotive Accidents. XVI—Tools and Appliances for Making Engine Repairs. XVII—Air Brake Troubles. XVIII—The Pyle-National Electric Headlight. XIX—Rules, Tables and Other Information.

Henry Montgomery

Keyser

Correspondent, H. B. KIGHT

It is with regret that we report the death of our pensioned engineman, Henry Montgomery, who passed away at his home in Center Street on November 18, 1920.

Mr. Montgomery was born at Springfield, W. Va., on December 11, 1853. In 1870 he moved to Westernport and took up his duties as blacksmith with the Baltimore and Ohio at Piedmont. He was married in 1882.

At the time of his retirement, Mr. Montgomery received a letter from Superintendent Cahill, who thanked him for the interest he had taken in his work and wished him many more happy years. Mr. Cahill stated also that, during all of the years of Mr. Montgomery's service, there had not been a notation placed against his name. He had been an engineman for over 37 years. He was a member of the Brotherhood of Locomotive Engineers and of the Odd Fellows.

The funeral took place on Sunday, November 21, and was in charge of the Brotherhood of Locomotive Engineers. Interment was made in Queen's Cemetery.

"Meditation" as rendered by Miss Lena Vannort

He is survived by a widow, five children and four brothers. The children are: Erston, Clem and Bruce; Mrs. H. A. Edwards, of Keyser, and Mrs. John Spriggs, of Westernport.

We extend to Agent Charles Huth, of Piedmont, our deepest sympathy in the death of his father, Squire Charles Huth, Sr., which occurred at Piedmont on November 2.

K. H. Stover has been appointed agent at Keyser, vice G. W. Stell, who has been promoted to relief agent, with headquarters in Cumberland. Some of the employees do not know that we have a Free Circulating Library in Baltimore and that they can get any of the books from there free of charge. A list of the books is on file at the ticket office and anyone desiring to take advantage of our library, can look over this list, at anytime, and make their selections.

The former correspondent of the MAGAZINE at Keyser, Harry B. Kight, has returned to his old position as ticket clerk, after having been away for a while on a furlough. He has resumed his duties as

Miss Mary Goldstrom, pass clerk, Glenwood

correspondent again, and would appreciate having the fellows give him any news which would be of interest to the readers of the MAGAZINE.

Pittsburgh Division**Correspondents**

E. N. FAIRGRIEVE, *Car Distributor*, Office of General Superintendent
ELMER H. STOLTZ, *Pittsburgh Freight Station*

"Dan Cupid" has been lurking in these parts lately, and has bagged quite a lot of game. Two of his most recent victims are Frank McDonough, an employee of the Division Accountant's office, Pittsburgh, and Miss Pearl Dwyer, index clerk, Car Distributor's office at Pittsburgh. These two recently signed articles of agreement for the life "bout" and we extend to them our congratulations and best wishes.

In these days when the nation is "dry" and the spirit of the "bootlegger" is rampant, and we are thrilled with stories of exciting raids, and the destruction of moon-

Charles Francis, veteran clerk in Roundhouse

shine stills, and hairbreadth escapes, etc., the desire to "bowl" has been manifest to a large extent among the employees of the general and local offices, but fortunately, not in the spirit which the foregoing would imply.

In response to a request from the Welfare Department, several meetings were held recently which resulted in the formation of a Bowling League, consisting of eight teams, to be known as the Baltimore and Ohio City Office Bowling League. The following officers were chosen: President, Earl Tovey; secretary, C. J. Weaverling; treasurer, C. H. Durant, chief clerk to Superintendent Beltz.

Fortunately, we have been able to secure the new alleys at the Monongahela House. This organization is affiliated with the Baltimore and Ohio System League and the Pittsburgh Division team will participate in all scheduled contests as arranged for by that organization, and will enjoy all rights and privileges extended thereby. Much enthusiasm has been aroused, and it is felt the pin boys will be kept busy this winter setting 'em up in the alley.

It is expected and hoped that the contests staged by the different teams during the progress of the season will stimulate and create a keen rivalry and will provide an

Nice to have a good, strong shoulder to lean on, isn't it? Ask J. K. Murray who she is

enjoyable evening every now and then, not only for the players themselves, but for the spectators as well, so come over to the "Mon" House, as it is familiarly known, on any Tuesday evening, pick out your team, and root for dear life.

The formation of a Bowling League by the "boys" has created a desire upon the part of the ladies to indulge in the same sport, and they are holding meetings now with the avowed intention of going and doing likewise. At this writing plans are in the making, and we'll venture to say that before long our lady friends will be rolling them down the alley with as much vigor and enthusiasm as the "boys."

Here is the picture of one of the charming employes of the Division Accountant's office, taken this summer as she sojourned amid the Berkely Hills, her sobriquet, "Meditation." Her name? Oh, yes, we forgot. This is Miss Vannort. Girls, let us have your pictures, or let us get them as we got this one, and, honest to goodness, we'll do our best to say something nice about you.

In the formation of the Men's Bowling League, an idea was born which augurs well for the subject of Welfare insofar as the Pittsburgh Division is concerned. At this meeting it was conceived that the formation of a Welfare League here would be an excellent thing to promote good fellowship and better feeling among the numerous employes of the various departments, and so, with that end in view, a meeting was called for November 5 in the office of the Terminal Agent at Pittsburgh. This meeting was attended by some 60 or 70 employes, and resulted in the selection of temporary officers, and the appointment of committees looking forward to the formation of a permanent organization, of which more will be said in these columns.

Glenwood Shops
Correspondent, FRANK RUSH

Born to Material Supervisor and Mrs. B. H. Rush, a bouncing 10-pound baby girl, Dorothy May.

The accompanying photograph is of Miss Mary Goldstrom, pass clerk in Superintendent of Shops' office. Miss Goldstrom is planning to take a six months' vacation in the South for her health. We will miss her smiling face in the office and we hope that the vacation will restore her to good health.

W. H. Steppe, leading car inspector, Glenwood, has taken unto himself a wife. Congratulations! (Don't forget the smokes, Steppe.)

The accompanying photograph is of Charles Francis, veteran clerk in roundhouse, Glenwood, and his grandson.

Here is a picture of J. K. Murray, formerly receiving clerk in the Stores Department, Glenwood. We are unable to give the name of the young lady in this picture as she seemed to be very bashful at the time it was taken. Mr. Murray has since been transferred to Foxburg.

It was with regret that we learned of the death of Blacksmith N. M. Becker, Senior. Mr. Becker has been in our service for a number of years and was well known and liked by all employes here.

S. A. Bearl, upholsterer, Glenwood, has been on the sick list for some time. We hope that he will be well soon.

Joseph Hannonway has recently been advanced to the position of machinist at Glenwood Back Shops.

"\$100 a Week, Nell!"
Think What That Means To Us!"

"They've made me Superintendent—and doubled my salary! Now we can have the comforts and pleasures we've dreamed of—our own home, a maid for you, Nell, and no more worrying about the cost of living!

"The president called me in today and told me. He said he picked me for promotion three months ago when he learned I was studying at home with the International Correspondence Schools. Now my chance has come—and thanks to the I.C.S., I'm ready for it!"

Thousands of men now know the joy of happy, prosperous homes because they let the International Correspondence Schools prepare them in spare hours for bigger work and better pay.

Why don't *you* study some one thing and get ready for a real job, at a salary that will give *your* wife and children the things you would like them to have?

You can *do* it! Pick the position you want in the work you like best and the I.C.S. will prepare you for it right in your own home, in your spare time—you need not lose a day or a dollar from your present occupation.

Yes, you *can* do it! More than two million have done it in the last twenty-nine years. More than 130,000 are doing it right now. Without cost, without obligation, find out how you can join them. Mark and mail this coupon!

The Shop Boys' Christmas Wishes

By Mary C. Leeds

'Twas just before Christmas, and all through the shop,
The machinery was humming, like it never would stop.
The employes looked anxious, wond'ring could they expect
To receive before Christmas, another pay check.
Planning how they would spend it, how far it would go
Towards buying the presents, and candy—when lo!
Out in the big roundhouse there arose such a clatter
The men all came running to see what was the matter;
Machinists, pipe-fitters, e'en the master mechanic,
Fireknockers and laborers, 'twas almost a panic;
"Shot" Malone caused it all, with his head in a whirl,
He was crying for Santa to bring him a girl.
After promising Charley to do what they could
To get him a girl—and they thought Santa would—
Someone suggested: "Let's forget we are men,
Let the spirit of Christmas make us children again,
Let's be care-free and happy like innocent boys,
All watching for Santa with his sack full of toys.
In fancy, let's hang up our stockings and say
What would please us the most to receive Christmas Day."
The M. M. came first, genial W. B. P.
"What I want for Christmas? That's plain, can't you see?
"The engines all ready when called—no delay,
Not only on Christmas—all the time, every day."
What for you, Mr. Hollis (the M. M.'s chief clerk)?
"That's easy," said he, "a force that won't shirk,
With letters all answered, reports up to date,
My day would be happy, I'm here to relate."
General Foreman "Joe" Hussion said, "I'll tell you quick,
My wish is for fireknockers, the kind that will stick."
Said busy "Bill" Hodel, "I care not for wealth,
What I wish for the most is simply good health."
Shop draughtsman Wiles: "Good specs give to me,
Far-sighted ones, too, that will help me to see
That check for back pay that I've looked for in vain.
Something's needed at once to relieve my eye strain."
Roundhouse Foreman Haislip said, "I'll tell you *true*—
A lot of new engines and less work to do."
Clarence Dotson, Road Foreman, didn't need to think twice,
"To right engine failures, a patent device."
Said Bertha, the vamp, "I will be happy when
Old Santa rounds up some more good-looking men."

Said Mary, the file clerk, "What I really need
Is some good anti-fat, a brand guaranteed."
"My wish," said Hans Miller, "That won't take a minute,
A nice office I want, and my clerks to stay in it,
No neighborly visits, no talk of the dance,
I guess that's about all"—"Hans, come out of your trance!"
Said Ruby, the check girl, "It can't be denied
That I wish the brass checks would commit suicide
By hanging themselves, say twice every day,
Then that duty, unpleasant, would be out of the way."
"No presents for me," said McProudy, contrary,
"Just see, Mr. Santa, that my Christmas is *Mary*!"
"I wish," said Frank Keane, "there'd be no objection
From any official on my engine inspection."
Our wire man, Hall, said "Without any jolts,
The juice to run smoothly, about one hundred ten volts,
To one hundred fifteen, on chart of volt metre,
Then no complaints would I hear, and my life would be sweeter."
A. J. Meyers and "Bill" Parkhill: "We want greaseless grease,
Smokeless smoke, and white soot, then at home we'd have peace.
This request may sound strange but, here's what we mean—
We'd look, though soot covered, as though we were clean."
Said Williamson, helper, "How happy I'd be
If on my green sweater, another stripe I could see."
"Mr. Santa, remember" spoke up Tommie Madden,
"A pass for All Lines if my heart you would gladden."
Said little "Red" Francis, reaching out with both hands,
"I want oodles and oodles of nice rubber bands."
From way back in the crowd then Will Graham spoke,
"Just something to laugh at. I enjoy a good joke."
"Hug" Henry and Ringler: "We want sinew and muscle
That we victors might be in the next football tussle."
Clyde Barnes, of the Store Room, said "Please may I speak,
And ask Santa for shoes, the kind that won't squeak?"
Just then a queer noise, so peculiar, so rasping,
The men were all scared, for breath each was gasping,
'Twas Isaacs, the fireknocker, with laugh so sardonic,
Saying: "I wants for Christmas a barrel of hair tonic."
S. White, the six-footer: "Won't the time-keeper see
That I'll never be short, and full pay comes to me?"
Said "Happy" Casteel, "Christmas won't be complete
Without noodle soup and chicken pot-pie to eat."
Said Power Plant "Babe" Phillips: "My wishes are small,
All my men out each day, and a pencil, that's all."

"Polite" Billy Grow said, "I've lots of new wishes,
The first that my seals will have plenty of fishes."
While off in a corner stood more of the men,
All widowers and bachelors—Sam Wolfe, and Ed. Wren,
J. L. Grow and Wait Bartlett, Red Shingleton, Hussion,
All talking at once; 'twas an earnest discussion.
The others were curious to know what 'twas about,
Harold Hailip sneaked closer to try to find out.
Bartlett turned, when he saw him, and said, "Oh! the dickens!
Who wants turkey for Christmas? This bunch prefers *chickens*!"
Others were waiting, their wants to make known,
But they had to disperse, for the whistle had blown.
But into each heart the glad Christmas spirit
Had left "peace and good will." Everyone there could feel it.
Each said to the other as he went on his way,
"May you and all yours have a glad Christmas Day."

Grafton

Merry Christmas!

T. A. Deegan, platform foreman, freight station, Grafton, spent a few days visiting his brother at Lima, Ohio.

J. P. Jeffries, who has been ill with rheumatism for some time, has sufficiently recovered to return to his duties as tallyman.

Miss Elizabeth Shroyer has been appointed stenographer at local freight office, vice Miss Bernice Larue, resigned.

L. M. E. Parrish, waybill clerk, is filling the position as weighmaster.

A certain young lady would like to know just how Burrett keeps his hair combed so nicely all the time.

Fairmont

H. H. Tederick, supervisor of the Fairmont-Grafton Sub-Division and Paw Paw Branch, is with us again after a vacation.

W. T. Hopke, master carpenter, has resigned after 31 years of well rendered service. Mr. Hopke was well liked by all and is much missed. It is with regret that the Company loses such valuable men. His vacancy is filled by D. B. Taylor of the Chicago Division.

H. E. Whitmer left us for Parkersburg, A. H. Tanner, from the C. & O., filling his place. Mr. Tanner is genial and has made many friends. We are sure he will be a "hum-dinger" when it comes to getting the power out.

Miss Louise Kildare, stenographer to the general foreman, Fairmont, has resigned to accept a position with the Hon. U. A. Knapp. Miss Kildare's position is filled by Miss Valera Morgan of Elkins, W. Va.

Miss Grace Arnett, work report checker, and Carl Stutler, chief caller, second trick, both of Fairmont, were married on October 24 by the Rev. Bromfield.

Motive Power Department

Miss Leonore Baker has been appointed timekeeper, Master Mechanic's office, to fill the vacancy caused by the transfer of Miss Regina Coulehan to the office of Division Accountant.

"Among those present" in the list of successful candidates at the election were two of our men, L. E. Burdette and W. J. Mays, who were elected to fill the offices of clerk of the Circuit Court, and Sheriff of Taylor County, respectively. The large majority of votes that each received shows his popularity with not only his fellow men, but with the ladies as well. Congratulations, boys!

Read the accompanying "poem" to the tune of shivery music:

Little "Bob" Hefflin sat by the church,
Of his future wedding day he was planning,
A big sewer rat on his trouser's leg sat,
And tears from "Bob's" eyes came a-streaming.

Safety First

If in your clothes there comes a tear,
Safety first!
Of common pins beware, beware!
Safety first!
For if you trust to a common pin,
Your troubles then will just begin,
A bigger tear will come ag'in,
Safety first!

Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent*, Weston, W. Va.

"Peace on earth, good will towards men." Greetings from the "Mountain State." The good old Yuletide will be with us when this MAGAZINE reaches you, and this is a good opportunity to wish everybody on the Charleston Division a Merry Christmas. The Charleston Division boys and girls also extend their good wishes to every one on the Baltimore and Ohio—the BEST Railroad in the world—from top to bottom. For hundreds and hundreds of years the same old wish has been echoed down the ages, and yet today it is as new and as heartfelt as ever.

The New Year will be with us also before another MAGAZINE can reach you. The year which draws to a close will go down in history as full of many remarkable happenings, among the principal of which we find the return of the railroads to their owners, the drive for Car Miles, the drive for Heavier Loading of Cars, the No-Accident Campaign, and last, but not least, the Presidential election. May our efforts in the year 1921 continue with the same strength and enthusiasm, and may their results be even better than those we have shown for 1920. Let us all take to heart the old wish, "Peace on earth, good will towards men," and bring it into use in our daily lives, in our contact with our fellow employees, and in our contact with the public, and let our watchword at all times be, "Do unto others as ye would they should do unto you." The results will speak for themselves.

Accidents Are Due to Thoughtlessness—Tbink!

And now, by the way, looking around in our travels over the division, we see many wonderful things. If you were to have the dearest wish of your heart granted to you, HOW WOULD YOU LIKE TO SEE—

J. C. Kinton—WITHOUT A PASSENGER TRAIN LATE.

W. C. Deegan—WITHOUT A DERAILMENT REPORT.

S. W. Pickens—WITHOUT HIS STOGIE.

M. McCormick—WITHOUT HER SISTER'S HAT AND COAT

"Al" Mason—WITHOUT A GIRL.

J. P. Ryan—WITHOUT AN ALIBI.

Inez Young—WITHOUT ANY "R" STUFF.

John Staples—WITHOUT A CIGAR.

Sylvia Miller—WITHOUT ANY BAGGAGE CHECKING TO DO.

W. E. Severns—WITHOUT HUNGER.

W. H. Schide—WITHOUT A TROUBLE IN THE WORLD.

R. Brooke—WITHOUT A CAR OF SLAG ON HAND.

P. D. Marsh—WITHOUT AN ENGINE FAILURE TO TALK ABOUT.

D. Justice—WITHOUT A QUARANTINE.

B. F. Moore—WITHOUT A BAD ORDER ON HAND.

M. Hayden—WITHOUT A DIAMOND.

V. Hickman—WITHOUT (NAMES NOT FAIR).

B. Tierney—WITHOUT SOMEONE TO TAKE A RIDE IN HER AUTO.

Ethel Kellar—WITHOUT A BOX OF CANDY.

The Correspondent—WITHOUT NOTE BOOK AND PENCIL.

C. W. Dixon—WITHOUT A KICK FROM A MINE OPERATOR ON HIS DESK.

A. Teskey—WITHOUT AN EXCUSE THAT THE WIRES ARE DOWN.

C. M. Criswell—WITHOUT A CLAIM TO SETTLE.

And finally, HOW WOULD YOU LIKE TO SEE THE CHARLESTON DIVISION without an accident or personal injury during the No-Accident Campaign?

Stop, Look, Listen and Think. Avoid Accidents.

If You Get Hurt, See a Doctor, Quick

Our sincere sympathy is extended to Agent J. A. Bridge of Holly Junction, in the recent death of his brother.

We are pleased to record that Mrs. G. L. Nicholas, wife of a member of our Safety committee, is entirely recovered from a recent attack of typhoid fever. Harry, the six-year old son of Road Foreman Marsh, is also well on the way to recovery from the same disease.

While traveling recently on Train 57, the through Grafton to Charleston service, the writer had occasion to take a meal in car 1056. We hear many complimentary remarks made about the Baltimore and Ohio

Desk FS3612 BERNARD HEWITT & CO. 900 W. Van Buren St. CHICAGO

JUST PUBLISHED

THIRD REVISED EDITION

The WALSCHAERT and Other Modern Radial Valve Gears for Locomotives

By WM. W. WOOD, Air-Brake Inspector

245 Pages (5 x 7½)

Fully Illustrated

PRICE \$2.50

WITH the adoption of the Walschaert Valve Gear on nearly every modern locomotive in America, this book fills a place of real interest and usefulness. By a careful study of its pages, one can THOROUGHLY understand the Walschaert Valve Gear, as the author takes the plainest form of a steam engine—a stationary engine—in the rough, that will only turn its crank in one direction—and from it builds up—with the reader's help, a modern locomotive equipped with the Walschaert Valve Gear, complete.

THE CONTENTS OF THE BOOK ARE DIVIDED INTO FIVE PARTS

THE FIRST DIVISION contains an analysis of the Walschaert Valve Gear.

THE SECOND DIVISION treats on the Designing and Erecting of the Valve Gear.

THE THIRD DIVISION has to do with the actual work of the Walschaert Valve Gear on the road.

THE FOURTH DIVISION is composed entirely of questions and answers on the Walschaert Valve Gear.

THE FIFTH DIVISION deals with the Setting of Valves with the Walschaert Gear, the Hobart-Allfree Valve and Valve Gear, and the Baker-Pilliod Valve Gear in its original and improved form.

The book is fully illustrated, and a novel and interesting feature of the book is the folding diagrams with cardboard valve models, by means of which the actual operation of the valve under the influence of the Walschaert motion can be studied.

BALTIMORE AND OHIO MAGAZINE

Mt. Royal Station, Baltimore, Md.

Send Check or Money Order

A little Berry in a summer garden is Louise Mabel, Daughter of Conductor and Mrs. C. W. Berry, Gassaway, W. Va.

service, and they are certainly justified in every way. The steward in charge of this car is R. E. Whitcomb, and his popularity with the travelling public is deserved. Good food, good service, and courtesy are the watchwords of this car. In justice to Mr. Whitcomb it should be said that he had no idea who his patron was in this case, and the service was therefore the same as that given to passengers of any class. This shows just what he is doing to make the Baltimore and Ohio dining car service stand for all that is good. Mr. Baugh is to be congratulated on his representatives on this division.

Advice has just been received of the death of I. N. Kalbaugh, who for many years was located at Gassaway. His many friends extend their sympathy to his family, and the Safety Committee of the division, by resolution at their last meeting, instructed that a letter be written to Mrs. Kalbaugh expressing their sympathy. Mr. Kalbaugh was born in 1844, and first commenced work on the Baltimore and Ohio as a machinist apprentice at Piedmont in 1860; he was promoted to machinist and then in 1866 to general foreman at Parkersburg. After this his promotion was rapid, he being successively master mechanic at Cumberland, Piedmont, Mt. Clare and Pittsburgh. In

1896 he was appointed superintendent of motive power at Mt. Clare, and in 1899 to the same position at Newark. In 1907 Mr. Kalbaugh accepted the position of superintendent motive power of the old Coal and Coke at Gassaway, and when that company was taken over by the Baltimore and Ohio, he was retained as division master mechanic at the same place. At the time of his death, Mr. Kalbaugh had been in the service of the Baltimore and Ohio for about 60 years, and was holding the position of assistant superintendent maintenance of equipment, all divisions.

Miss Alice Rice of the Superintendent's office has been transferred to the office of Division Engineer Brooke, as private secretary to the division engineer, due to the resignation of Miss Yokum, who has returned to Elkins.

Roy L. Sargeant has been appointed inspector of accounts, Division Accountant's office, Weston. Congratulations!

We welcome to our city C. McOsker, who has recently arrived to take the place of "Mike" Walus, chief clerk to the division accountant. Mr. McOsker comes from Seymour, Ind., but says he thinks Weston is "some city" after that small village.

At our No-Accident Campaign rally in Weston, we were glad to note C. A. Plumly, superintendent telegraph, J. S. Calvert, superintendent of the Western Union Telegraph Company, Philadelphia, and Section Foreman Goodwin, of Elkins. They came from all parts to help us.

Our Photographs

Here we see C. E. Rozzelle, assistant division engineer, Weston, W. Va., who was recently transferred to Pittsburgh.

The little fellow seated by the garden gate is Forrest Lee, the son of Conductor and Mrs. William Young, of Gassaway. Forrest is just one year old.

This dainty little maiden is Louise Mabel, the little daughter of Conductor and Mrs. C. W. Berry. Mr. Berry is an old-timer and runs the Gassaway-Elkins local.

Miss Alice Rice, the recently appointed secretary to the division engineer at Weston, is shown in the accompanying picture with "Mike" Murray, formerly clerk to the captain of police at Weston, but recently transferred to Grafton as yard clerk. Does anyone wonder why he did not want to go?

The principal item of interest on this—as well as every other division on the System—during the month has been the No-Accident Campaign, our fight to make the Baltimore and Ohio the safest Railroad in the world. At the time of writing, the period set aside for the campaign is half gone. We stand third on the System, with one injury and one derailment charged against us. We are making a strong fight to avoid any more of them, and hope to win the pennant yet. The boys and girls on the division have made a good fight, and every one has done his share.

On October 21 we fired the first gun in the campaign by having a large open meeting for employees, their families and friends, in the High School Auditorium at Weston, at which meeting the principal speakers were Superintendent Trapnell, Dr. E. A. Fleetwood, our medical examiner, and Prof. F. R. Yoke, of the Weston School Board. The thanks of the Charleston Division are due the Professor and the School Board for the assistance they have rendered us, and also for the free use of the auditorium during the campaign. About 500 people were present, and an excellent musical program was rendered by our friends and employees.

C. E. Rozzelle

Arthur D. Gans, Safety picture exhibitor from Baltimore, brought along the new movie, "The Reason Why," which teaches some good lessons and was appreciated by all of us. Last but not least, our old friend "Billy" Mitchell gave us a few words of good advice.

Another open meeting was held in the Y. M. C. A. at Gassaway on October 26, at which there was a fine attendance, the only trouble being that the hall was not sufficiently large to accommodate all who came to help the good work along. The principal speakers were Superintendent Trapnell, Secretary Bowen, of the Y. M. C. A. and Mr. Fleisher, of Gassaway, while an excellent entertainment was furnished by our Gassaway employees and friends. Gassaway held another open meeting on November 9, at which there was an equally large attendance.

At Weston another open meeting was held on November 13, when the Governor of West Virginia, Hon. John J. Cornwell, and General Superintendent J. M. Scott were the principal speakers.

In passing, it should not be overlooked that the open meeting at Weston was also notable for its being the first appearance of the "Charleston Division Band," and the Gassaway meeting by the first appearance

Here they are—M. B. Murray, former clerk to captain of police, at Weston, and Miss Alice Rice, stenographer to division engineer

"Who wants to know? I am Forrest Lee Young and my daddy is Conductor W. M. Young"

of the "Gassaway Band," both organizations being composed principally of employees of the division. The Charleston Division is to be congratulated on having two such fine musical organizations to call on in case of need. All credit to the boys who are giving up their time in this way, for the entertainment of their fellows! Too much cannot be said in their favor.

The regular monthly Safety meeting was held at division headquarters in Weston on October 14, and it was a truly remarkable one. Thirty-five members and some 15 visitors crowded into the superintendent's office and made a showing long to be remembered. Every member of the committee was present, all full of enthusiasm and ready with suggestions for the No-Accident Campaign. The open meetings at Weston have been arranged by sub-committees of the Safety Committee, consisting of the Misses Viola Hickman, Madge Hinzman and Margaret McCormick, Messrs. J. P. Ryan, P. D. Marsh and J. P. Reed; those at Gassaway have been arranged by Mrs. E. L. McCray, Mrs. Moore and Miss Nona Paisley, Messrs. J. C. Kinton, P. D. Hickey and F. A. Baldinger. Our sincere thanks are due to each and every one of them.

The Freight Claim Prevention Committee met in Weston on the evening of the fourteenth, and was also the best attended meeting we have had in some time, about 30 being present. We were exceptionally fortunate in having with us on that evening, Conductors Barrett, Bailes and Nordeck, all local men, who gave us a number of good tips from their many experiences. We were also fortunate in having with us Mr. Kiveling, inspector of the Traffic Bureau, who gave us an interesting address. We have reason to feel much encouraged for the outlook of our Safety and claim prevention work from the intense interest which is being manifested all over the division by everyone.

Help to Make the Baltimore and Ohio the Safest Railroad

In connection with the claim prevention work, it is with sincere regret that we have to note that "the powers that be" have seen fit to remove from our midst "Charlie" Criswell, by transfer, to the Monongah Division. Their gain is our loss. "Charlie" has been with us for some time and leaves a host of friends on the division. He has been in the service of the Company for about 38 years, and by his looks we should say he is good for as many more. He has held all kinds of positions, for many years being chief clerk to Mr. Graham, and also in charge of the Wheeling station. "Charlie" was principally remarkable on the Charleston Division for his originating a new song entitled, "CARS ARE ONLY EARNING WHEN THE WHEELS ARE TURNING." The marble palace and the patients in the hospital will miss his melodious voice. The hearty good wishes of everyone go with you, Charles, and we wish you every success on your new job. Don't forget, however, that old loves are generally the best.

Conductor H. W. Bell, on the day district run at Buckhannon, died on October 27, after a long illness. He entered the service as brakeman in 1904. Our sympathy is extended to his family.

L. R. Porter, travelling auditor on the Elk Line, calls our attention to the following newspaper clipping, expressing the view, with which we agree, that it is well worth printing in the MAGAZINE, for the purpose of bringing it to the notice of all our people.

"It is estimated that if every man would turn out a third more work for two months he would increase his wages one-third.

This does not mean, of course, that he would receive one-third more money, but the price of what he must buy would be reduced so that the difference in the cost of living would be equivalent to an advance in wages."

Looks like good "dope" and worth trying.

The sympathy of every one at Division Headquarters is extended to Messrs. Schide, Pickens and Dixon on the death of their life's ambition, namely, the election of Governor Cox.

Mrs. W. C. Deegan, of Wheeling, was a recent visitor at Weston.

Reviewing events, it is remarkable how

when a good man is required, the Charleston Division is always looked to to furnish him. "Mike" Walus, for a long time chief clerk to the division accountant, is another who has left us. He has been transferred to the same position at Seymour, Ind. As a small mark of the esteem and affection in which he is held here, the boys and girls, on the eve of his departure, presented him with a handsome pair of cuff links and a gold ring. Our good wishes go with you, "Mike." May the baseball fans on your new division appreciate you a little more than they did here.

Then again, they stole Elmer Wetzel from us. He was chairman in the Division Engineer's office. Needing a good man at

Connellsville, Elmer got the call. Poor Weston! Many fair hearts are sad today, Elmer, but we assume you will soon forget them and find new interests in your new home. We told you about losing Rozzelle last month. This time we show you his picture. He seems to have forgotten us, as no one has heard a word since his departure for the "Smoky City."

Wheeling Division

Correspondent, A. N. GANTZER

The Safety First League

Allow us to present to our readers this month a man whose heart and soul are on Safety. Painter Foreman W. E. McCombs, whose photograph appears here, together with a Safety design which he designed and painted, has laid down two sets of laws in connection with our Safety Campaign. Mr. McCombs is, no doubt, a shining example to his fellow employees at Benwood. Following are his ideas about Safety:

To the Safety Voters of West Virginia District

I am presenting herewith what is known as the League of Safety First, for your approval. Study these 10 points as laid down by the "Safety crank" who works for the protection of his fellow employees; see if you don't wonder why we can't amend these rules and carry the League of Safety First "over the top" for the Baltimore and Ohio. Then turn to the 10 modified points, which are for the betterment of your family, your fellow employees, and which will make the Baltimore and Ohio a safe place to work; for the public a safe road to use, and will set for other railroads a standard that will cause them to come over and say, "Well done, Baltimore and Ohio, we accept your League of Safety First."

10 Ways to DOWN the League of Safety First

1. Don't practice Safety.
2. Whatever you do, do it in an unsafe way.

3. Never wear goggles, use blue flags, or any other device to protect yourself.

4. If the work doesn't suit you, do everything you can against Safety.

5. Never accept advice from anyone; simply criticize the Safety Movement.

6. Get sore whenever a person talks to you in regard to the way you ought to observe Safety.

7. If the master mechanic or foreman asks you to give your opinion on the Safety Movement, tell them it doesn't pay.

8. Take no part in protecting yourself or those around you.

9. Tell everybody that the manufacturing of cripples is a good business.

10. Don't bother about telling anybody about Safety; let the other fellow do it; tell them you haven't the time for such trifles.

10 Ways to UPHOLD the Safety First League

1. Collect your Safety dividends.
2. Who says Safety doesn't pay? Show him that it does.
3. Strive to protect yourself and your fellows at all times.
4. Defend the life, limbs and reputation of employees against unsafe practices.
5. Assist in turning the Safety work of the Railroad into profitable employment, and advance the interests of worthy employees by all honorable and reasonable means.
6. Encourage everybody to stand up for and practice Safety.
7. Settle all Safety questions with your master mechanic and general foreman, and the personal injuries will oftentimes look out for themselves.
8. Encourage your fellow workmen to give a better grade of work through carefulness and obedience to instructions.
9. Advocate and elevate the social amusements of employees in order to set a standard for future generations.
10. Promote these Safety elements: Patriotism, Respect of Railroad Laws, Honor to our Flag, Protection of the Lives and Interests of our Loved Ones.

Benwood Shop

Correspondent, ANGELA J. APPLGATE

Merry Christmas!

Mr. Garber has a fine bunch,
But they come to our office for lunch;
Of course, we will not mention a name,
But every one knows just the same.
Vic Haythorn, the principal clerk,
Is kept very busy at his work;
Bernadine Cooper has been sick,
And Pat G. declares her work is no trick.
There is Charles Youst, who plays the fiddle,
We know that he can play "Hi-dumm-diddle."

And now is the worst—about Elsie Manion,
She lost Tony Michels, her best companion.

There's Jerry, the artist of the shop,
And of his paintings we all think a lot.
Ofttimes they feel just a little forlorn,
But they are always cheered by Billy Haythorne.

William Welsh, former chief clerk to Storekeeper Kincaid, has been promoted to storekeeper at Holloway. J. Marchaine, of Baltimore, has succeeded Mr. Welsh.

Harry Keffer, clerk, Storekeeper's office, has resigned his position to take a course at one of the automobile schools at Detroit. Cupid has it circulated that Harry is soon to become a benedict.

Miss Frances Schuman has accepted a position in the Division Accountant's office, Wheeling. We all join in wishing Frances the best of luck in her new position.

We have again in our midst,
A name once cancelled from our list,
Harold Schafer, whom you all know,
Filled Tony's place when he had to go.
Tony is now L. P.-1 clerk,
And from his duties never will shirk;
But man-hour work will soon be done,
As Harold is considered A number one.
He is welcomed here with a cheery smile,
Yet we miss Tony all the while.

Mr. and Mrs. "Cat" Kettlewell are the proud parents of a son, born on September 15. The young man has been named James Wallace. Mrs. Kettlewell will be remembered as Miss Rosella Doyle, former file clerk in the Master Mechanic's office. If James is what "Dad" Kettlewell says he is, he will be running on the Republican ticket next election.

We sincerely regret to state that Francis Sigler, most popular young man at Benwood; has gone to Terra Alta for his health. We hope he will soon recover and be back with us, for his jovial disposition and that funny little way of his have won him many friends.

Catherine and Gillie, who work around here,
Keep the office full of laughter and cheer,
But Harold and Angela all the while,
Just take it all with their pleasant smile.
Gandy stays here part of the day,
And helps the arguments along the way.
But everyone agrees—and I'm sure that you will,
That Sarah and Della know how to keep still.

W. H. Neureither of Holloway,
Joined the Elks the other day,
And from the meeting he went home in a car,
And it was sad that he had to ride so far;
For all the rough places they surely did hit,
And he chose to stand instead of to sit.
We know why, but we cannot tell,
Yet all of the Elks know also quite well.
Now he laughs with a merry glee,
And says, "I belong to the B. P. O. E."

W. E. McCombs, painter foreman, and his Safety design

UNION MADE "Service" Suits

For Your Protection
Every Button on a
"Service" Garment
Bears This Design.

WHY FOR so many years overalls manufacturers were obsessed with the notion that fit didn't matter in work clothes—that we don't know.

That they were wrong we do know. We know it by the immediate response to our introduction of "Service" Suits and Overalls—the work clothes that are designed to conform to men's figures and tailored to fit.

The immense comfort of "Service" garments is matched by their extreme durability.

Ask your dealer—he knows.

Merry Christmas! Happy New Year!

J. C. Miller, our chief of Tariff Bureau, has started a school of tariff compilers and assistants in the office, which meets every Tuesday to discuss the rules of Tariff Circular 18-A. **WATCH OUR WORK.**

Miss Silberhorn, Traffic Department, smiled last week and everyone worked happily the rest of the day.

The boys in the Engineering Department have presented Dickman with a carton of cigarettes for Christmas. They hope not to be bothered with his daily rounds any longer.

Francis X. Brantigan has joined the ancient order of ROOPS.

Lester Kerner, Engineering Department, is having his voice cultivated, but will not tell how.

"Jimmie" Spires was caught thinking last week.

Raymond Ott, blueprinter, is in love again. Better luck this time, Ray.

"Billy" School, Traffic Department, claims to have spent a very profitable vacation catching black bass in Paint Creek.

Frank Sinnott, coming to work the other morning, wore his cap instead of his usual hat. The conductor coming to collect tickets, thinking Frank under 12 years of age, passed him up. Better wear the cap all the time, Frank.

Albert Studer, Traffic Department, spent his vacation in Cuba, and on his return passed around some clear Havana cigars. We all hope that "Al" decides to go to the same place next year.

Famous "Twos" in the General Offices:

Two Bits.
Two Pair.
Ruth and Amanda.
Reising and Daubenmerkle.
Bennie and Katie.
Lollie and Kinney.

J. E. McKibben is evidently carrying something in his pockets; he always has his hands in them.

James P. Ray is sticking close to Bridge 19-95. It is rumored that he is endeavoring to raise a French mustache and goatee. We hope he is successful, as we would like very much to see him thusly adorned.

"Jimmie" Spires is now growing hair on his head.

Clarence Hornback has been granted a 60-day leave of absence on account of ill health. We wish him a speedy return.

The Misses Jane Werthmiller and Louise Silberhorn spent their vacations in California, and we have heard nothing but California ever since.

C. T. Robinson, safety appliance inspector, located at Cincinnati, has been transferred to the Chicago Division as general car foreman, with headquarters at Garrett, Ind.

J. W. Curran, district master car builder, Southwest District, has been appointed safety appliance inspector, with headquarters at Cincinnati.

C. M. Hitch, district master car builder, Cleveland, Ohio, has been transferred to Cincinnati in the same capacity.

J. J. Kolker, Engineering Department, has presented George Reising of the same department with six victrola records for Christmas. Kolker says that he hopes Reising will return the ten records he borrowed from him two months ago.

E. C. Lane, engineer, Maintenance of Way, Cincinnati, has been transferred to Baltimore, Md., to act in the same capacity.

S. A. Jordan, formerly engineer, Maintenance of Way, Eastern Lines, has been sent to Cincinnati to take the place of Mr. Lane. We all regret to lose Mr. Lane, but our very best wishes accompany him to Baltimore. Mr. Jordan has been welcomed by all of us and he has our assurance that we will do all in our power to make it as pleasant for him as it has been on the Eastern Lines.

Upon the occasion of the transfer of Mr. Lane from Cincinnati to Baltimore, he was presented with a handsome standard railroad watch, suitably engraved, by the members of his former staff and several of his friends and admirers in other departments as a token of esteem and appreciation.

One of the boys in the Transportation Department has been slyly making trips to Delhi, a little town about 11 miles from Cincinnati. Since making these trips he seems to have a distant look in his eyes at all times and on several occasions he has been heard humming the tune, "Mary, you're the only girl for me." Of course we do not care to pry into his personal affairs, but we hope he will not forget us when the big date is fixed.

A. B. Hines, assistant engineer, Cincinnati, has been transferred to Baltimore to act in the same capacity on the Eastern Lines. Our best wishes follow Mr. Hines to his new field of endeavor.

Miss Stutter advises that her weekly contribution to "War Cry's" has diminished since the price was raised to ten cents.

If Leopold Von Toelke and "Handsome" Sheet Schott would refrain from smoking their pipes in the office, the clerks in the Traffic Department would not have to leave so often to get fresh air.

If "Bugs" Wayman would not play sick four days a week, "Niger" Jett, "Knock-Em-Cold" Wittman and "Monk" Edwards say that the Tariff Bureau Mailing Department would be the best on the Western Lines.

P. A. Callahan, assistant engineer, has moved his office from North Dayton to Cincinnati.

Editor's Note

Inspired by the photograph of the two young ladies in the November issue of the MAGAZINE, one of our readers has propounded a question for us to solve. It was too hard for us, so we pass it along:

There is a question I would ask,
And hope that you will answer—
"Would Miss Amanda Geiser smile
If pretty Miss Ruth Beitzer?"

Cincinnati Terminals

Correspondent, JOSEPH BEEL, *Chief Clerk to Superintendent of Terminals*

Merry Christmas!

Charles Graham, blacksmith, Ivorydale shop, who was never known to crack a smile, greeted his foreman, R. W. Miller, with a smile, the other day. That's nothing, "Charlie," the first time we met "Bob," we laughed out loud.

"Val" Knecht, our smiling apprentice boy, joined the ranks of benedicts early in life. "Val" is just married and everyone at Ivorydale wishes him a long and happy future.

Get in line, boys. William Weber, carpenter foreman, Ivorydale, is about ready to raffle off his automobile. It's beginning to fall apart.

We take great pleasure in introducing Charles Doll, machinist, Ivorydale, as one of the happiest fathers of the prettiest and healthiest twins. The twins won first prize at three consecutive contests this year.

T. Miller, Stores Department, was presented with a nine-pound baby girl. Congratulations!

"Bobbie" Gabriel, man-hour clerk, Ivorydale, is making his second attempt to raise a cootie garage. He had considerable luck with the first one in France. He hopes that Grace, at Storrs, will like it.

George Poppe missed his vocation in being a roundhouse foreman. He should have been a street car conductor as he has been practicing throwing the trolley on the Colerain Avenue car and has gained considerable headway.

Things We Would Like to See and Hear

H. Green coming to work on time.
Charles Arnold worrying.
"Norb" Green weighing 200 pounds.
George Donnelly doing the shimmy.
Miss Florence Bradford keeping still.
Charles Everly President of the United States.
T. H. Barker when he wasn't grumpy.
Some of Charles Kleinheinz's queens.
O. J. Heil minding his own business.
E. T. Haas whispering.
C. Listerman in a bathing suit.
C. Neihsel with nothing to do.
Paul Haaf buying cigarettes once in a while.
"Phil" Dixon without "Fred" Nolte.

F. Liebetrau, shop foreman, Ivorydale, finally has his auto parked in a garage. After being blown down by the wind several times, the garage has been completed. Never mind, poor "Freddy," Rome wasn't built in a day.

George Resch, assistant foreman, Ivorydale, has gone into business for himself. What kind of business did you say? Why, everybody's business.

"Cliff" Backer called on a young lady not so long ago and after the clock struck 11 the peevish father strode to the top of the stairs and called down:

"Mabel, doesn't that young man know how to say good night?"
"Does he?" echoed Mabel from the darkened hallway below, "well, I should say he does."

We have with us in the accompanying picture the Entertainment Committee of the Rekop Club, left to right: "Billy" Dean, "Johnny" Crowe, George A. Grogan, Ervin Kennedy.

Entertainment Committee, Rekop Club
Left to right: "Billy" Dean, "Johnny" Crowe,
George A. Grogan, Ervin Kennedy

BACHELOR BUTTONS

Clarence Keicher and a young lady (we'll call her Blanche) drifted into the Lyrie Theatre on a Thursday evening. The theatre lobby was very crowded. "I guess we can squeeze in here," said Clarence. "Oh no," replied Blanche, "wait until we get home."

Lena Goes Shopping

Lena Swallie went into a big store one day last week to buy some linoleum. A salesman dragged out roll after roll of the bulky stuff but it didn't quite suit. It was all the store had so he took her name and address and promised to have some samples sent from the factory. "By the way," asked the salesman, "how much did you want to buy?" "Oh, enough to cover the bottom of a bird cage," replied Lena.

"Say, Frank," said Roy Steinwert, "I passed your house at two o'clock the other morning and there were lights all over the place. Wasn't that a little strange?" "No, a little stranger," replied Frank.

We hope that William J. Maloney, chief yard clerk, has arrived in Cleveland safely. "Will" created some little excitement when he tried to secure sleeping accommodations at the Pullman window in the Union Depot. The clerk at the window asked "Will" whether he wanted upper or lower, which was rather confusing to "Will" and he in turn asked: "What's the difference?" "Fifty cents," was the reply. "If you want it lower you will have to pay higher." This enraged "Will" and he called "Joe" Beel on the phone, who in turn, sent Frank Nock and "Eddie" Schmalz over to explain the situation and straighten the matter out, which was done to the satisfaction of all concerned. We suggest that "Will" ride in the caboose on his next trip.

The Girls' Welfare Association at 5th and Baymiller Streets, recently gave a party for the members of the association, and a very enjoyable time was had by all who attended. Various games were played and a delightful supper was served by the committee in charge. The association desires to thank the committee, which consisted of: Miss Effie Haynes, Miss Bertha Goetz, Mrs. Mabel Schatz, Miss C. Winkel and Miss Alvina Thurman, for making this party a success.

Misses Leafy Wiltsee, Effie Haynes, Sue Elmore, Kathryn Weber and Clara Schulte

of the Superintendent's office, and Miss Helen Farmer of the Local Freight office, recently made a short visit to Cleveland, Ohio, and had a very enjoyable time.

As a rule very little is heard from our outside territory and of it very little is known, except from the direction of Cupid, who has been setting that section afire.

Our old friend, T. D. Mullee ("Red"), started the ball a-rolling when he got it into his head that it was just as cheap to support two.

The second one on the program was our esteemed rate clerk of the office of A. M. Cosby, A. S. Hilgemier, who upon his return from the army (Arizona), was wedded to Miss Dora Smith of Oakley, Ohio. "Al" still says the Honeymoon has not gone out of the window.

The next one to follow was Stewart Creager, the esteemed demurrage clerk of A. M. Cosby. Poor fellow! May he rest in peace.

Then came the popular chief clerk of A. M. Cosby, John ("Flicker") Hoctor, the Ex-Gob of the navy, who was wedded to Miss Ann Condon of Elmwood Place, Ohio, and he insists he never knew the cost of living was so high.

The last to be called to this state of life is our old friend, the jazz band Seyferle of Oakley, Ohio. Ask "Ginger" who put onions in the baby's milk to make it strong.

Now we have the real announcement of our efficient and most popular demurrage clerk of A. M. Cosby, Louis Smith, who is going to be presented as a Christmas present to Miss Hilda Holt of Cincinnati, Ohio. Go to it "Smitty," I'll bet on you.

Don't be discouraged girls, there is a lot of room out here yet.

What is that noise that we hear buzzing around the ticket office at Winton Place? Don't let them bluff you, "Hutch."

Do not overlook our efficient agent at St. Bernard, A. M. Cosby, the "Fertilizer Kid."

The Siameze twins at East Norwood, Mr. Kelly and Mr. Woodmansee, are hard to beat.

Our popular yardmaster, "Jack" Weber, and family have returned from the North and East where "Jack" claims that Canada is the only place these days, and of course he spent most of his time looking the situation over on the Canadian Railroad, such as the embargoes, etc. The busiest person, however, was the waiter, for "Jack" needs lots of service.

UR Tower, Sterling, Ohio, and C. E. Beichler, foreman of Station 32

"Sweet as a peach" is Maxine Jeannette Shaw

Newark Division

W. E. LAIRD, Chief Clerk, Newark, Ohio
A. D. LIST, Newark (Ohio) Shops

Division Offices

Merry Christmas!

The clerical department employees at Newark certainly had one put over on them when they recently received cards announcing the marriage of Miss Zanfrey Floyd, stenographer to trainmaster, and Oren J. Payne, report clerk, Superintendent's office. The announcement cards came from Covington, Ky. We confess we didn't know a thing about it and that we haven't as yet recovered from the shock. However, we extend our best wishes.

Harry L. Kent, chief clerk to division accountant, has been absent from the office for some time, by reason of infection from a small scratch on his hand, resulting in blood poisoning. Here's hoping for a speedy recovery.

The following vacations are reported:

Ira Richmer says he had a fine time down in the hills of "Old Kentucky."

"Tom" Brookes and Charles Raison say there is only one place for a real vacation, and that is in Northern Canada, where they had a very enjoyable two weeks.

"Tom" Snyder spent his two weeks in Davenport, Iowa.

Our old friend, Louis ("Doc") Savvy, is again back at his desk as assistant C. T. timckepper, after several months' absence spent in Wheeling on special statistical work.

Maxine Jeannette Shaw (note her picture) is the daughter of Ralph E. Shaw, secretary to division engineer, and also granddaughter of Engineer John E. Shaw, Newark, Ohio. She's at the top of the column.

Michael Scanlon

Michael Scanlon, Somerset, Ohio, was pensioned on October 1, after 50 years of continuous service with the Baltimore and Ohio Railroad.

To have served one Company a half century is certainly an honor, and one that comes to only a few of us. It not only speaks much for the employee attaining the distinction, but is a creditable endorsement of the Railroad on which such faithful service has been given.

The following lines have been contributed by one of Mr. Scanlon's friends, which will portray better than we can relate, the qualities that are back of such a record:

"You had luck to be born in that sacred green isle,
And its hearty good will is expressed in your smile;
In this fair land of freedom you grew to man's size,
Learned to love what is right, and the wrong to despise,
And deceit never lurked in the depths of your eyes,
Michael Scanlon.

Michael Scanlon

You are not deeply versed in the science of print,
But the book of "Hard Work" you've
absorbed without stint,
Though your hoarding be scant, it was
honestly earned,
For the goods of your neighbor your heart
never yearned,
And no vagrant unalmsed from your
doorstep you turned,
Michael Scanlon.

You'll never be old while you think you are
young,
May it be many years e're your requiem's
sung,
When your rich life is ended, your full
course is run,
And the goal of your striving is peacefully
won,
May you hear from His lips "Faithful
Servant, well done,"
Michael Scanlon.

W. S. Robinette

"Scotty," as he is familiarly known over the System, was born on February 21, 1849, is now 71 years of age, and never missed his turn as passenger engineer on what is known as the Shawnee "Dinkey," making the round trip between Newark and Shawnee daily.

W. S. Robinette

He first entered the service of the Baltimore and Ohio as a brakeman on what was then known as the "Sheep-Skin," now called the Fifth Division. He recalls that at that time they were hauling stone from the old stone quarry east of Grafton for construction of the Ohio River Bridge at Parkersburg; incidentally that they only handled about three to four stones on a flat car, and that many a time he jumped from one stone to another all night to keep from freezing. In May, 1870, he was transferred to the Fourth Division as fireman and was assigned to the Benwood accommodation, engine 89. He remembers this as one of the old inside connected engines called the "Dutch Wagon" class. In 1872 he was promoted to engineman, and the following year was transferred back to the "Sheep-Skin" and placed in charge of engine 109, a "camel-back." Later in 1873 he was transferred to the Central Ohio (now the C. O. Sub-division of the Newark Division). On his first trip over the Central Ohio he was piloted by his present baggagemaster, Joseph Workman, on the Shawnee "Dinkey," who is one of the older men in active service on the Newark Division. About one month later he was selected by David Lee, chief engineer of construction, to take charge of work train building the Chicago Division. In that service he was in charge of engine 517. He returned to Newark in December, 1874, was then employed with the L. & N. and Chesapeake and Ohio Railroads; returned to the Baltimore and Ohio in 1885, and has been running an engine ever since, with the exception of about seven years in which he served in the capacity of traveling engineer and assistant road foreman of engines.

To be running a passenger engine at the age of 71 years after 51 years of railroad service, most of which was spent on the Baltimore and Ohio and over various divisions of the System, is a record to be proud of, and we congratulate "Scotty" on his accomplishment.

Richard "Harding" Roll is the four-months old son of A. E. ("Tony") Roll, assistant chief clerk, Superintendent's office, Newark. We are told that the self-satisfied smile as shown in the picture has been pronouncedly permanent since election day, November 2.

The accompanying photograph is of Mr. and Mrs. Edward L. Weisgerber, married October 20, snapped in front of Grant's Tomb, New York City, while on their wedding trip. Mr. Weisgerber is a well known and popular machinist at Newark Shops, and Mrs. Weisgerber was formerly Miss May Winters, a young lady of the same city, and sister of Miss Eva G. Winters, secretary to superintendent.

Sloan Building, Cleveland, Ohio

Merry Christmas!

The Misses Mabel Gasser, Mary Beggs, Margaret Smith, and Messrs. Frank Hert and Robert Gymer of the Accounting Department, were entertained at a house party at the home of Miss Smith in Garrett, Ind., on October 23, by Miss Jane Milholland. They all had a wonderful time, especially Frank, who, it is said, left his heart there.

Mabel Gasser entertained with a wiener roast, mixed with a little cider, and followed

Mr. and Mrs. Edward L. Weisgerber

by a dance down on the farm in Brecksville, on November 6. Those present were Margaret Smith, Ethelyn Benedict, Mildred Roberts, Dorothea Van Gastle, "Teddy" Southern, Frank Hert, Dr. Keen, Frederick Scroggie, "Bill" Pitcher and several other friends. We understand that one of the fair sex lost her heel and it was up to "Teddy" Southern to carry her home.

J. R. Neiderheiser, secretary of the Veterans' Association and clerk, Agent's office, has been off on account of sickness. We hope to see you back on the job soon, J. R.

Arthur Marquardt, office boy, Superintendent's office, has been off because of the mumps. Well, we all have to have it once in a lifetime.

The Cleveland Division established a record in the month of October by moving 92,713 loads and empties. Guess that will hold them for a while!

F. J. Hess, train dispatcher, Akron, has been off for some time on account of undergoing an operation. We hope to see him back soon.

Massillon

Conductor J. W. Seiber, who was off duty for about two months because of typhoid fever, has resumed duty, taking a Willard and Holloway Run. Glad to see you back again, J. W.

The Harding Smile! and no wonder, for his name is Richard Harding Roll

Brakeman C. J. Miller, who was working at Massillon, was transferred to Canton Yard on September 18. We are sorry to see him leave, but hope that he will like his new location.

E. A. Krier who has been working as night yard clerk at the Yard office for so many years, has at last taken a day job. He had a little difficulty at first in finding the tracks in the day time, but he seems to be getting along well now.

John Sheffler, former conductor, Pennsylvania Railroad, has taken the position of night yard clerk at Massillon, vice "Red" Krier. With his past experience in railroad work he should make a good man for this position, and we wish him success.

Brakeman M. F. Grimm, who has been working in Canton, has returned to Massillon. They can't stay away from a good town. They all flop back sooner or later.

In connection with the No-Accident Campaign, a Safety meeting was held at the Dover Passenger Station on October 15. Twenty-five employees were present. Committees were appointed in the various departments. Safety and Sanitation rules and Safety First circulars were distributed. A Safety meeting was also held at the Massillon Passenger Station on October 14, in connection with the No-Accident Campaign. Employees from all departments were present. Committees were also appointed in the various departments and Safety First circulars and Safety and Sanitation books were distributed among employees. Trainmaster J. Fitzgerald presided at the meeting.

"Red" Everett, lineman, has been having considerable trouble with his motor car, about as much trouble as one has with a Ford. We hope he doesn't have too many parts left over when he puts it back together.

I. C. Bowman, supervisor, took his vacation between November 15 and 30, when he spent much of his time hunting rabbits. He says he made them all drop.

Austin Sanders, baggage agent, Massillon, had a sweet conversation with Miss Dorothy Gish, noted movie star, whose former home was Massillon and who was visiting relatives in this city. Said conversation took place over the telephone. I don't believe a burglar would have that much nerve, Austin. Austin told her he admired her plays very much. That is indeed a compliment.

Operator F. R. Landis, at CO Tower, was called to Fraeysburg, Ohio, on account of the death of his mother. We extend our sincere sympathy.

Dover

Conductor W. E. Hadden, who has been acting yardmaster at Dover, has gone back to running again, taking the Dover and Holloway local.

Conductor R. F. Halter, who has been working out of Willard, has returned to Dover.

"Tom" Adams, yard clerk, Dover, took a trip to Columbus on November 6, to see the Ohio State and Michigan football game.

M. Howell, night yard clerk, Dover, acted as night yardmaster in place of M. Reidy for a while and carried on his work very well. Conductors are not the only employees that can handle that job, are they Murrell?

"Mike" Reidy, night yardmaster, Dover, spent his vacation hunting and fishing in the Rocky Mountains around Dover.

Garrett, Ind.

A Merry Christmas to Everybody!

Engineer J. F. Mitchell is slowly recovering from an injury to his ankle, received some months ago. Mr. Mitchell is the oldest engineer in point of service on the Chicago Division.

Fireman Frederick Panning appears to be much interested in the diamond market. He has been making all kinds of inquiries among his friends as to the cost of these precious stones. It is our opinion that "Fred" is seriously considering a plunge. Who knows whether the young lady is a blonde or a brunette? What is her first name? Tell us, we'll guess the rest.

At this writing, our friend John Wright, former transfer clerk, is seriously ill at the home of his parents. We wish for his speedy recovery.

All of the employes at this point extend their sympathy to Mrs. Orville Feagler and sons in the loss of Mr. Feagler, gang foreman, Stores Department, who passed away at his home on November 1.

We extend our sympathy to Car Inspector W. H. Ray and his children, of Syracuse, in the loss of their little daughter and sister, who died in this city at the home of her grandparents, on October 31.

Much interest is being displayed in the No-Accident Campaign at this station, and it is the earnest desire of all that the same interest be maintained after the close of the campaign, as the results are gratifying.

Car Foreman D. L. Gibson is confined to his home on South Lees Street because of illness. We wish him a speedy recovery.

Effective November 1, C. T. Robinson, safety appliance inspector, Cincinnati, has been transferred to the Chicago Division as general car foreman, vice E. B. Miller, transferred to Eastern Lines as district master car builder, Pittsburgh. While we regret Mr. Miller's leaving us, we desire to congratulate him on his promotion and will welcome Mr. Robinson in his place, doing all in our power to make his sojourn here pleasant.

Miss Margaret A. Galloway, assistant shop clerk, has resumed her duties in the Master Mechanic's office, after five months' absence, during which she underwent an operation for appendicitis.

The wife and children of General Foreman H. Rees are expected to sail for home from Southampton on November 17, and arrive in New York on Thanksgiving Day. Mrs. Rees and the children left this country on July 28 for a visit with her parents.

Willard, Ohio

Merry Christmas!

A contract has been drawn up to put a roof over the Willard coal chute. Although the cost of this will be \$8,500, it will be of great value in keeping the snow and rain from the coal and sand.

Fireman C. E. Dame spent his vacation in Michigan during the early part of November. Hunting and fishing are his specialties.

Conductor Edward Heiser returned recently from a mysterious trip. He would not tell where it was, but some of us think we can hear the far-away sounds of wedding bells.

Tiffin, Ohio

The accompanying photograph is of the office force in the freight house at Tiffin, Ohio. We are anxious that the readers of the MAGAZINE should know that Tiffin is still on the map. The members of the force are as follows:

Left to right, front row: W. C. France, agent; I. W. McConnahay, chief clerk; Miss Myrtle C. France, stenographer; R. B. Thomas, O. S. and D. clerk. Back row: F. R. Saunders, bill clerk; H. P. Snyder, yard clerk; M. A. Schalk, cash clerk.

Office force at Tiffin, Ohio

Chicago Terminal

Correspondent, THOMAS H. WILLIAMS

Merry Christmas!

The Baltimore and Ohio Chicago Terminal has again organized a bowling league, consisting of eight teams, representing their respective departments. The league was organized several years ago, but during the war was postponed because a great number of the boys were bowling over the Germans instead of the other wooden pins. The most important object of the league is the promotion of good fellowship among the employes. The present standing of the teams for the first quarter, ending November 4, is as follows:

TEAM	WON	LOST	PER CENT.
Motive Power Supervisors	14	7	.666
Accounting.....	13	8	.619
Maintenance of Way....	13	8	.619
Car Accountants.....	13	8	.619
Engineers.....	11	10	.524
Transportation.....	8	13	.381
Motive Power Shops....	8	13	.381
Stores.....	4	17	.190

The Calumet Sag Channel crosses our tracks at Blue Island, Ill., where the Baltimore and Ohio Chicago Terminal McCook Branch has in the past crossed the Grand Trunk Railway tracks. The Sanitary District decided that it was more satisfactory to change the location of the Baltimore and Ohio Chicago Terminal-Grand Trunk crossing than to change the location of the canal, and so our tracks have been relocated. The work was begun in the Spring of 1917 and has been continued under difficulties until the new arrangement was placed in operation in November, 1919.

The photograph, looking north, shows the new tracks ballasted at Blue Island Junction. A new brick and concrete interlocking tower and the bridges over the canal can be identified at the top of the picture.

Miss Marie Goggin, Trainmaster's office, called on the employes at Barr Yard recently.

Charles Esping, master carpenter, and wife, spent their vacations visiting points of interest along the Atlantic Coast; F. W. McClement, superintendent of building, and wife, spent their vacations with relatives in Philadelphia; C. I. Bender, assistant supervisor, and Mrs. Bender, spent their vacations in Virginia.

We were all very glad to welcome back our superintendent, J. L. Nichols, after his long siege of illness. It seems like old times to have him around again.

H. E. Hansen, chief clerk to the superintendent, is back on the job again after several weeks of ill health. His fellow workers join in giving him a hearty welcome.

Miss Maragret Watts, stenographer, engineering department, has resigned and is leaving for an extended visit in the East.

The Sag Channel is an important addition to the drainage system of Chicago. It leads from the Little Calumet River at Blue Island to the Chicago Drainage Canal, north of Lemont, Ill. The only portion of the canal remaining to be finished is that just west of our tracks and the Sanitary District engineers expect to complete their work during 1921. When finished the canal will reverse the flow in the Calumet River so that pollution in Lake Michigan at South Chicago and vicinity will be carried directly to the drainage canal and disposed of. The canal is 60 feet wide and will carry about 20 feet of water.

Sing a song of six-pence,

The day starts with a bang.
September MAGAZINE came out,
And I was due to hang.

And, "Harry, you're a traitor,
I'm surely done with you,

You had my letter published
And my reputation slew."

Every place I travel now

I'm looked at with suspicion,

To half the places in the yard

I can't e'en get admission.

I walked into the office

Before I went to work,

I said, "Good morning, Mr. Neff,"

He said, "Get out, you Turk."

Miss Cordt gave me a haughty look

That froze me on the floor,

And Parberg said, "When going out,

Please don't slam the door."

I went over to the rip track,

To my eye there came a tear,

For Henry said, "Make business short

And beat it out of here."

But Miss Cordt has sold her fliffer,

And no other will she buy,

So if you'll keep it quiet,

I will tell the reason why.

While she was going to her work,

The fliffer balked one day,

She got in front to crank it up

And send it on its way.

New location of tracks ballasted at Blue Island Junction

She braced her both feet firmly,

The crank around did swing,

A sniff—a snort—a mighty kick—

Her arm goes in a sling.

'Twas but a few days after

She came in, wan and pale,

And told us all the story—

She had a car for sale.

General Freight Office, Chicago

Correspondent, FLORENCE E. SMITH

J. F. McWilliams—he's our boss,

S'awf'ly good and never cross.

His secretary's name is Jim,

'Tain't no use mentionin' him.

Now Francis is a tracing clerk,

He is some boy, but an orful flirt.

Ashton and Owen are tracers too,

They've gotta terrible lot to do.

"Reconsigning Tom's" our Vanity Fair,

Gay old bird who perfumes his hair.

Rose, a demure and shy little lady,

Stenos. for Tom, our "Pretty Baby."

Susie, the petite Rate and Claim stenog.,

Enjoys dictation from Bill—pedagogue.

Sphinx-like Kotz is our Mystery Man,

I don't "get" him—perhaps you can.

Never smilin' "Sponey," a meeting clerk he,

Always so solemn—what can the matter be?

"Whistling Sanders" is our happy Rate

Clerk,

Also Frank Hillinger, who just loves to work.

E. B. Tullis, our A. G. F. A.,

Is very dignified—I should so say.

His secretary, Kanis, is a rascally lad,

Always pulling jokes, but not really bad.

F. T. M. Constans, who is always so prim,

Adores golf—would ya b'lieve it of him?

A. R. Hermanson, our dear old Swede,

Doesn't like girls—"silly, indeed!"

Hon. Mr. Kridler is the G. F. A.,

Why are we quiet when you come our way?

Joe Hanley, Kridler's importance is he,

Seems awful crabbed but doesn't mean to be.

The great statistician is Herr Louie Battau,

Why he's so big-headed, I surely don't

know.

Very self-contained is our steno., Miss

Troller,

No matter what happens you don't hear

her holler.

Our Coal and Coke rep. is courtly G. V. K.,

Angry or cross words he never does say.

Dairy Agent Hook is a good old scout,

Butter, eggs and cheese is all he talks about.

Miss McAllen some day a great seeress

will be,

So cummalong kids, she'll tell your fortunes

free.

L. G. Reynolds is from way out West,

And says of all places he likes that the best.

Mrs. Blackwell a suffrage leader will be,

She sure is *some* talker—take it from me.

C. H. Harkins I don't know much about,

Why he's so busy I can't find out.

Billie, our little file boy, I'm told,

'Salways into mischief like a two year old.

Alabi Randall is the l'il offus boy,

An eternal ban on the boss man's joy.

Lee Emery, our jolly porter man,

Shines shoes better'n you or I can.

This punk writer, who can she be,

Well, up at the top her name you'll see.

Ohio Division

Correspondent, A. E. ERICH, *Secretary to Superintendent*

In this, the Christmas issue of the MAGAZINE, we wish to take the opportunity to extend to our readers, one and all, and especially those of the Ohio Division, a very Merry Christmas and a prosperous and happy New Year.

Effective November 1, E. J. McSweeney, former master mechanic, Chillicothe, was appointed master mechanic at Washington, Ind.

Edmund J. McSweeney

Mr. McSweeney entered the service of the Baltimore and Ohio as machinist helper at Garrett, in June, 1907; he was transferred to clerk in June, 1908; accepted position with Auburn Auto Company as draftsman in March, 1908, working with that firm until March, 1909, when he re-entered the service of the Baltimore and Ohio as special apprentice at Mt. Clare; he was promoted to machinist in April, 1911, at Chicago Junction; January, 1912, to assistant road foreman at Garrett; April, 1912, to foreman at Johnston; November 1, 1912, to roundhouse for man at Connells-ville, and served in that capacity until December, 1914, when he was appointed motive power inspector at Wheeling; June, 1916, to engine house foreman at Newark; February, 1917, to General Foreman at Garrett, coming to Chillicothe as master mechanic March 10, 1919. He was well liked by the employes on the Ohio Division and made many friends, who are sorry to lose him, but all were gratified at the well merited promotion.

A few days previous to his leaving Chillicothe a meeting was called by the supervising forces of the Motive Power and Car Departments, including the offices of storekeeper and division accountant. When all had assembled, Mr. McSweeney was called to account for the number of times he had been asked the time and because of having a defective watch had been unable to give correct information. When no reasonable excuse could be given, he was presented with a 21 jewel Howard watch, which was given him by the 27 present.

The day before he was to leave Chillicothe a treat was given him in the form of a "fake" arrest, staged by the officials at this point. Road Foreman "Bill" Graf, on leaving the office with Mr. McSweeney, offered to take him home in his auto, which invitation, of course, "Mac" immediately accepted. "Bill" at once started out to violate all traffic ordinances, and finally stopped his car in front of the city building, parked it in an improper manner and got out, telling "Mac" to wait a few minutes until he attended to some business in a nearby store. Immediately after "Bill" left the machine, Chief of Police Fox and a traffic officer (who had previously been "fixed") came to the car and after the traffic officer had identified it as the car that had

violated the different ordinances and asked "Mac" if it was his car, "Mac" stated it was not and he would not inform them to whom it did belong. The officer, however, stated that "Mac" was the party driving the car and he was placed under arrest. Bond was quickly arranged for (also previously "fixed") and he was told that in order to avoid any publicity his "trial" would be held the same evening privately, time being set at 5:55 p. m. Immediately after being released, "Mac" made all possible efforts to locate "Bill," but he had seemingly disappeared, as also had all the other officials whom he tried to get in touch with. At the appointed time, very much out of breath due from his hurry in trying to get some of his friends to be at the trial, "Mac" appeared and was escorted by the chief to a private office (?) for his trial. While on the way the chief made the remark that he believed that the car belonged to Mr. Graf, but "Mac" still refused to answer. On passing the Elks' club rooms Chief Fox stated it was possible that Mr. Graf was at that place and sent in to ascertain if correct. Word was sent out that he was there but that he had stated that if anyone wanted to see him they would have to come in. They immediately entered and it was then that "Mac" was "let in" on the joke, for seated at a table were all the members of the staff and several friends. A fine supper was served, after which, in a pleasing speech, Superintendent Brown presented Mr. McSweeney with a watch chain from those present, to go with the watch that had been given him by the other supervising forces. "Mac" has our best wishes for continued success in his new position.

F. R. Gilhousen, who has been general foreman at Chillicothe, succeeds Mr. McSweeney as master mechanic. Mr. Gilhousen served as machinist apprentice at Garrett from October, 1903, to October, 1907; machinist until March, 1908; entered service of the C. E. & I. R. R. at that time, returning to Garrett as machinist in September, 1908; promoted to engine house foreman September, 1913; general foreman at Newark in December, 1914, coming to Chillicothe on March 1, 1918, as general foreman. We congratulate him on his promotion and wish him the best of success.

C. I. Novinger, former roundhouse foreman, Chillicothe, was promoted to general foreman at Storrs, Ohio, on November 1. Employees of the roundhouse, in appreciation of his friendship, presented him with a fine Masonic ring and watch chain. "Novie" has made quite a number of friends at Chillicothe, all of whom join in best wishes for his future success in his new location.

Other changes, due to the above promotions, are as follows: J. J. Hurley, former general foreman, East St. Louis, appointed general foreman, Chillicothe, vice Mr. Gilhousen; R. Barrett, night general foreman; W. G. Noland, day roundhouse foreman; J. Howard, night roundhouse foreman; H. H. Haward, day assistant roundhouse foreman. We extend our best wishes for success of these men in their new positions.

Another proud car repairer! Phillip Diehl's home was blessed by a bouncing baby boy.

Sad, but true: Roy N. Francis, car apprentice, took his lady friend to the Ohio Division picnic, but alas! when he returned in the evening, he was very much alone. Some other fellow was escort to the fair lady. You have our sympathy, "Roy."

D. F. ("Dave") McQuade, well known Ohio Division Engineer, is off duty with a broken leg, the result of a smash-up between his motorcycle and a wagon. "Dave" was on his way home from a hunting trip when the accident occurred, which was after dark. He states he was blinded by the glare of the headlights of a car standing along side of road, went to one side to pass this car and in so doing crashed headlong into a farmer's wagon which was standing alongside, without lights. He was brought to the City Hospital at Chillicothe, where it was found that his left leg was broken near the ankle. We hope for his speedy recovery.

On Wednesday, October 20, Miss Eleanor Shearrow, clerk, Master Mechanic's office, became the bride of Mr. Herman Suman. The ceremony was impressively performed with the double ring ceremony. A dinner for the family and guests was served at noon at the bride's home, and in the afternoon the happy pair started on their journey, deluged with sincere wishes for health, wealth and prosperity expressed by their many friends. Miss Shearrow's many friends on this division join in the wishes of the others.

George ("Bud") Akennett, carpenter, who spent his vacation the latter part of September near Midland City, Ohio, made very good use of his time. In 14 days he obtained 32 squirrels and two fish, weighing 14 and 15 pounds respectively.

Boilermaker Helper Jasper Johnson has recently taken unto himself a wife, Miss Nellie Pugh. Congratulations!

Stationary Engineer Tracy is the proud father of a daughter, the second child left at his home.

We are glad to announce that Miss Ruth Bickel, of the Division Accountant's office, is back on the job after recovering from an automobile accident in which she was injured while returning from the Circleville pumpkin show.

Machinist J. L. Wagner has returned from British Guiana, where he has been employed for some time past. Glad to welcome him with us again.

Indiana Division

Correspondent, H. S. ADAMS, *Chief Clerk to Superintendent*

Melvin C. Whitcomb, one of the oldest conductors on our division, was claimed by death on October 8. Mr. Whitcomb had served the Company faithfully for almost 50 years and his death caused a great sorrow to all of the railroad men in this section. He resided for a number of years at Cincinnati, although his home was at Seymour. The burial took place at River-view Cemetery. The sympathy of our employees and of friends is extended to his widow, his sons and his daughter.

Our sympathy is also extended to Brake-man and Mrs. H. L. Butcher in the loss of their daughter, Baby Mildred.

Toledo Division

Correspondent, I. E. CLAYTON, *Division Operator*

Some time ago we published in the MAGAZINE a photograph of former Conductor John Glancy, but since that time he has acquired a mustache, a beard, and a grandchild, and we feel that he deserves to be noticed again. Therefore, we present a recent photograph of this gentlemen, who

is now retired from the service of the Baltimore and Ohio and is making his home in California.

East Dayton

Correspondent, EDWARD MANNIX

Soon the curtain will be drawn upon the year 1920, and ere it is, the gladdest season of the whole year, Christmas, will be with us. We hope that the past year has been one of gladness to our employees, and extend our best wishes for "A Merry Christmas and a Happy New Year."

A most beautiful testimonial to the employees of the Toledo Division of the Baltimore and Ohio Railroad is the Christmas proclamation of our master mechanic, Alfred E. McMillan:

To the Employees of the Toledo Division
GREETINGS

The year 1920 will soon be history, and, employees coming under my supervision, I desire to thank you for your faithfulness, diligence, and obedience; and as the glad season of Christmas is at hand, I trust that the blessings you have enjoyed during the past year will be doubled for the coming years. I wish you and yours "A Most Joyful Christmas and a Happy and Glad New Year."

The shop crafts have extended their best wishes to all superior officers and to each other, and the clerks join with them in wishing to everyone the compliments of this joyous Yuletide.

We cannot forget the girls in our Master Mechanic's office and the Stores Department, and wish them the best of the season.

A big boost should be given our car foreman, R. O'Neil, and assistant car foreman, W. R. Jackson. A look at the repair tracks shows it pays to have a system. Good work, "Bob" and Walter!

It is with regret that we learned of the death of Miss Anna Lyons, a sister of our fellow clerk, J. G. Lyons, and at one time an employe of the Railroad. Her death occurred during the past month and all who had the pleasure of knowing her will remember her sweet and loving disposition. She surely leaves the world better for her having been in it.

"Grandpa" John Glancy. You may laugh, boys, but time will tell

We naturally feel proud of our general foreman, W. A. Gilmore, who has the sobriquet of "Springy Bill." He can be found in all the yards and shops simultaneously. "Bill's" slogan is, "Be as big as the job," and he surely is.

At the present writing our shop bulletin of No-Accidents is 100 per cent. and East Dayton shops and roundhouse will be a criterion for the rest of the division as anticipation will be followed by appreciation at the end of the campaign.

Lima, Ohio

The accompanying photographs, taken at Lima Shops, show the fire brigade in action. Our boys are "right on the job" when it comes to scaling ladders and handling the big hose.

Fire Brigade, Lima, Ohio, in action

Adams, firemen; W. E. Salisbury, W. D. McCowan, and G. Tackitt, brakemen.

Leon Massey, Engineering Department, Baltimore, Md., was recently a visitor with us in connection with his work of determining property valuation. We noticed that Mr. Massey wore a class pin from some school and upon asking him from what school he was a graduate, we were surprised to learn that he is a graduate of the University of South Africa, Johannesburg, S. A. Mr. Massey is a very agreeable and enter-

taining person and we hope he can make it convenient to visit this territory quite often.

Trainmaster George Dixon has recently had a streak of bad luck. George, Jr., had to be taken to Johns Hopkins Hospital, Baltimore, Md., to have his tonsils removed, and to make bad matters worse the boy had to be returned to the hospital five days later to be treated for pneumonia. Junior has a good constitution and we are glad to say that he is now well on the road to recovery.

Kentucky District

(S. V. & E. R. R.; L. F. R. R.; M. C. R. R.)

Correspondent, H. L. GRAHAM

Merry Christmas!

Our vice-president recently made an inspection trip over the Kentucky District.

C. A. Plumly, superintendent of telegraph, C. E. Tansill, supervisor of telephones, and W. E. Donnelly, supervisor of time service, recently made an inspection trip over the entire Kentucky District and expressed satisfaction with conditions noted. Mr. Donnelly's interests here seemed to be about equally divided between time service and mistletoe. Judging from what he says, mistletoe must have some medicinal value; he says that by the proper use of mistletoe very pleasant and satisfactory results may be obtained. Many times during his stay he was noticed staring toward the peaks of the mountains and softly murmuring, "D. H.—D. H." On second thought we are not certain that it is his friends that are sick.

District Superintendent H. R. Laughlin now has a large, new motor car with a seating capacity of nine persons. It is equipped with a large headlight, standard markers, side curtains, and front windows; in fact, is very comfortable in every respect for winter service.

R. H. Russell, train dispatcher and champion endurance eater, who has been "batching" for the past few months, again has Mrs. Russell and the little Russells with him.

Roy Thrasher, who left the service about one year ago to accept a position with a rubber company in Akron, Ohio, has again taken up work with the Baltimore and Ohio as train dispatcher, Jenkins, Ky.

The accompanying photograph is of the double-header crew on the S. V. & E. R. R. at Jenkins, Ky. They are: C. E. Hartinger, conductor; C. E. Marshall and C. C. Candill, engineers; H. Anderson and J. N.

Double-header crew on S. V. & E.

Eulogy of Our Flag

From Proclamation by

Governor Coolidge of Massachusetts

WORKS which endure come from the seal of the people. The mighty in their pride walk alone to destruction. The humble walk hand in hand with Providence to immortality. Their works survive. When the people of the colonies were defending their liberties against the might of kings, they chose their banner from the design set in the firmament through all eternity.

The flags of the great empires of that day are gone, but the Stars and Stripes remain. It pictures the vision of people whose eyes were turned to the rising dawn. It represents the hope of a Father for his posterity. It was never flaunted for the glory of royalty, but to be born under it is to be a child of a King and to establish a home under it is to be the founder of a royal house. Alone of all flags it expresses the sovereignty of the people which endures when all else passes away. Speaking with their voice it has the sanctity of revelation. He who lives under it and is loyal to it is loyal to truth and justice everywhere. He who lives under it and is disloyal to it is a traitor to the human race everywhere. What could be saved if the flag of the American nation were to perish?

Just a Few Great Books Gave Him His Start

*Fifteen minutes a day, and the right books
—that's the secret of a liberal education*

HE talked like a man who had traveled. He knew History; and something of Science. He wrote in a style of wonderful beauty and simplicity—such a style as only comes to a man from reading the works of master writers.

Yet did you ever think of this?

You yourself, have probably read as many books as Lincoln read in the first thirty years of his life.

Why is it that you have gained only a smattering of knowledge from your books while he gained a liberal education from his?

The answer is that he knew what few books were really worth while: he made every moment count.

Why not decide right now—today—that you will stop wasting your reading? Why not say to yourself: "In my own small way I am going to do what Lincoln did. I will read in such a way that six months from now I will be a bigger, more effective, more interesting man or woman than I am today."

You can do it: two hundred thousand Americans have proved that you can do it, through

Dr. Eliot's Five Foot Shelf of Books

*The pleasantest, easiest way to learn
to think clearly and talk interestingly*

From all the millions of books on Travel, History, Science, Biography, Essays, Drama and Poetry, Dr. Charles W. Eliot, for forty years President of Harvard, has selected four hundred and eighteen and arranged them in fifty volumes.

These books, he says, if a man or woman will give them only fifteen minutes a day, will give him the essentials of a liberal education.

A liberal education—think of it. The power to think clearly and talk interestingly, to be a marked man or woman in any company. And all in exchange for a few minutes of pleasant reading each day.

Send for this **FREE** book

All your questions about the Five-Foot Shelf are answered in "Fifteen Minutes a Day." It's a great little book in itself. It contains:

Dr. Eliot's own story of the Five-Foot Shelf.

An outline of the reading courses in the Five-Foot Shelf, and many illustrations taken from the books themselves.

It tells what the books are that Dr. Eliot has selected, and describes the marvelous encyclopedic index. Send for this guidebook to good reading. Send for it now. Do as Lincoln did. Make your reading count.

Don't Send a Penny

These rubber boots and shoes offered here are such wonderful values that we gladly send them, **no money down**. You will find them so well made and such big money-saving bargains that you will surely keep them. So don't hesitate—just fill out and mail the coupon and we will send you a pair of your size. No need for you to pay higher prices when you can buy direct from us—and no need sending money in advance before receiving boots or shoes. Why pay out \$6, \$8 or \$10 for boots or shoes not nearly so good? Act now. Mail coupon today while special offer holds good. Pay on arrival.

Knee Boots

Biggest bargain in knee length rubber boots also. Made of same pure rubber and in the same way as the hip boots. The very same boot in fact, except that it is knee length and has no straps. Sizes, 6 to 12. No half sizes. Wide widths. No money to send now. Pay only **\$3.98** and postage on arrival. If not satisfied, return boots and we will refund your money. Order No. AX6001.

Put X in ☐ in coupon.
Order 1 size larger than shoe you wear.

Made of finest Gum Rubber. Heels will not come off.

half sizes. Wide widths. Send no money now. Pay only **\$4.69** and postage on arrival. If not equal to similar boots priced at \$8 to \$10 a pair elsewhere, send them back and we will refund your money. Order 1 size larger than shoe you wear. Order No. AX6000. Mark X in ☐ in coupon below.

Finest Pure Gum Rubber Imported Hip Boots at Half Price

These are **first quality**, pure gum. No better rubber ever put in boots. Absolute protection against dampness and water. No adulteration or "loading," just the best rubber, and lined with unbleached, strongest, closest woven toughest drill—the best wearing lining made. Every boot a brand new stock, strictly inspected and guaranteed perfect. Reinforced at knee by double thickness. Extra strong tapsole. Heels are moulded on and as an added precaution against coming off are substantially nailed—will not come off. Compare these soles and heels with the ordinary kind. Strap just below knee to hold leg firmly. Also extra and free the English sole leather straps to go around ankles. (These straps worth \$1 alone, but you get them free.) A boot that will outlast 2 pairs of the ordinary kind—not stiff and heavy, but tough, durable, soft and flexible. Sizes, 6 to 12. No

FREE Pair of English made sole leather straps to strap over instep and around ankle to hold boot on firmly when working in heavy clay or mud. Good for harness straps. Worth \$1, but **FREE** with boots.

Great Work Shoe Offer

This shoe is built for both outdoor city workers and for the modern farmer.

Built on stylish lace Blucher last. Special tanning process makes leather proof against the action of acids in milk, manure, soil, gasoline, etc.

Outwear three ordinary pairs of shoes. Double leather soles and heels. Dirt and waterproof tongue. Heavy chrome leather tops. Pay only **\$3.98** and postage on arrival. If not all you expect, send them back and we will immediately return your money.

Mark X in the ☐ by Number AX18068.

Send Coupon

Keep your money until the boots or shoes come. Then let them convince you of their great bargain value or return them and get your money back. This is the modern, sensible way to buy—the way thousands are buying their footwear today, direct from us—getting satisfaction—saving money. Fill out the coupon and send it now—today. Mark X in the ☐ to show which to send. Give your size. Order boots 1 size larger than shoe you wear.

Ladies' Hi-Cut Boots

Splendid shoes made of beautiful black glazed kid finish leather modeled on most fashionable last. Soles are medium weight and give splendid wear. Heels is the popular Cuban model. Sizes 2½ to 8. Compare with shoes at \$7.50 and \$8.00 and then you will realize what a bargain they are. Pay the special price, **\$3.98**, and postage on arrival. If not as elegant as you expect and what you want, return them and we will refund your money. Mark X in ☐ by No. AX999 in coupon.

Men's Stylish Dress Shoe

Made in classy lace Blucher style. Splendid quality Veal uppers. Splendid solid leather soles, strong heels. Comes in black only. You must see them to appreciate the fine quality of material, workmanship and astonishing bargain value. At our price these shoes challenge all competition. No money with order. Pay only **\$3.98** and postage on arrival. And that returned if you don't keep shoes.

Mark an X in ☐ by AX15106 in coupon.

BE A BUILDER!

THE GREAT PYRAMID OF CHEOPS

One hundred thousand men worked for thirty years to build the Great Pyramid of Cheops. Doubtless the biggest structure in the world, four hundred and eighty-one feet high and called one of the earth's seven wonders. But—it doesn't mean anything—

A huge pile of stone, whose erection cost the lives of hundreds of men and whose task through the ages has been merely to hold the mummies of a few Egyptian Pharaohs.

Match against it the building up of the Savings Feature of the Relief Department of The Baltimore and Ohio Railroad Company.

In twenty-six years the Savings Feature has helped twenty thousand employes secure homes. Not monstrous tombs for the dead, but cozy, comfortable, cheerful homes for the living, filled with the singing of loving mothers and the prattle of happy children—veritable dwelling places of contentment.

Twenty-four million dollars have been loaned to these employes that they might build or purchase homes.

Only fifty-four thousand dollars in the year 1883, but over two and one-half million dollars in the year 1920.

Every year a great new stone added to this Great Pyramid of Progress. Every year thousands of Baltimore and Ohio employes started as home owners.

Why not add your name in 1921?

You, too, can be a home builder.

A RELIEF DEPARTMENT HOME

This one owned by Engineer D. C. Hodges, Flora, Illinois, who has been in the service since 1905. On the porch in the picture are, from left to right: Norval Hodges, Engineer Hodges, Jack, Jr., Alyne, Mrs. Hodges and baby Saranel, and Nalon. Mr. Hodges writes us: "I have been a member of the Relief since it was adopted on this division. I find the Savings and Loan feature a great advantage, as without it I could not have owned my home, which the family is very proud of."

A Fellow Feeling

A humane society secured a downtown show window and filled it with attractive pictures of wild animals in their native haunts. A placard in the middle of the exhibit read: "We were skinned to provide women with fashionable furs."

A man paused before the window and his harassed expression for a moment gave place to one of sympathy. "I know just how you feel, old tops," he muttered. "So was I!"—*Ladies' Home Journal*.

Hopeful Sign

Husband: "You'll never get that new dog of yours to mind you."

Wife: "Oh, yes, I will. You were just as troublesome at first."—*London Opinion*.

Unequal Losses

Frederick was sitting on the curb, crying, when "Billy" came along and asked him what was the matter.

"Oh, I feel so bad 'cause Major's dead—my nice old collie!" sobbed Frederick.

"Shucks!" said "Billy." "My grandmother's been dead a week and you don't catch me crying."

Frederick gave his eyes and nose a wipe with his hand and, looking up at "Billy," sobbed despairingly:

"Yes, but you didn't raise your grandmother from a pup."—*Harper's Magazine*.

GOVERNMENT WOOL BLANKETS

PRICE
\$4.90

20,000 elegant wool army blankets purchased direct from U. S. surplus Division. Blankets that are real wool and will keep you warm for several years to come. The raw material alone is worth more than the price we ask.

Slightly used in local camps, but practically as good as new. Inspected, renovated, laundered and sterilized by Government authorities. Our price \$4.90.

Strictly new and just as received by the Government from the manufacturers. Our price \$5.90. Regular value would probably be \$16.00. Either of the above blankets are extra large size.

As a matter of good faith mail us a deposit of \$1.00 for each blanket order, balance on delivery. We will ship blankets by express unless otherwise instructed.

hotel for dinner. She turned up, looking smarter than ever, and after dinner they went to the theater.

A brother officer sat in a box, and the young airman waved to him, but got a rather quizzical response.

"What ails Topper?" he thought, and at the end of the act his question was answered: "Hello, there!" Topper said, coming up to him in the lobby. "I don't mind your taking out my wife's maid, old man, but I wish to goodness you'd ask her to wear her own frocks."—*Case Eagle*.

Real Chivalry

At a place "somewhere east of Suez" an intoxicated gentleman, after being ejected from a moving picture theater, was discovered seated on the doorstep of the back entrance, with a large bouquet in his arms. A policeman arrested him.

"Did he give any reason for his extraordinary behavior?" asked the magistrate.

"His speech was a bit indistinct, your honor," answered the policeman, "but from what I could gather he was waiting to see Mary Pickford home."—*Boston Transcript*.

Prize Winners in Essay Contest

Teamwork the Great Lesson of the Campaign—M. W. Jones First on Eastern Lines, W. W. Woodward, on Western Lines

THE results of the Essay Contest, No-Accident Campaign, October 18 to November 16, are given in the accompanying tabulations. In all 22 essays were submitted on the Eastern Lines and 20 on the Western Lines, a better showing than we had in the contest the previous year, but in the opinion of the writer not a number commensurate with the interest that such a contest should create among our thousands of employees. However, it will be seen from the letters of comment of the judges in the contest that the quality of the essays is higher than that evidenced in the essays submitted in the previous contest.

There are a number of significant features developed by this campaign and contest, especially in relation to the MAGAZINE. It seems more than a coincidence that the Charleston Division, winner of the System championship, should also have produced the first prize winner on the Eastern Lines and another employee

who tied for second prize on the Eastern Lines, in the persons of M. W. Jones and H. Enoch, respectively.

Charleston won because it developed the spirit of teamwork to a far greater extent than any other division. Not a single bet was overlooked, and in addition to the prize winners, Jones and Enoch, there were other Charleston Division employees, several of them prize winners in the previous contest, who also submitted essays. All of which shows that the men of this division were on their toes from start to finish of the campaign.

We think also that the unequalled representation which the Charleston Division has each month in the MAGAZINE through its able correspondent, Mr. Jones, is one explanation of their success. The employees of that division are kept in touch with all division activities through the MAGAZINE and cannot fail to be in sympathy with all movements calculated to better the general

working efficiency of the division. Back of this also is the fine leadership of Superintendent Trapnell.

It is significant also that the prize winning division on the Western Lines, the Ohio, has always been ably represented in the MAGAZINE. Employees cannot be expected to co-operate to their greatest ability unless they know what is going on, unless they are taken into the confidence of their officers. Interesting in this respect is the fact that four of the five prize winners on the Western Lines came from the State of Ohio; one of them from the Ohio Division, two from the Toledo Division and one from the Newark Division.

The first prize winner in the Essay Contest on the Western Lines, W. W. Woodward, must certainly be a Safety man of the first rank. For in order to make doubly sure that his efforts in the prize contest should be well considered, he submitted two essays, one of which won a prize and the other of which did not. It pays

Total Points.....	450	300	175	150	100

to play safe. It will be remembered that Mr. Woodward also won first prize for his essay in the 1919 contest on the Western Lines. There seemed to be less doubt about the merit of his essay than that of any other essay submitted, for he was chosen twice for first place and twice for second place, giving him the grand total of 450 points.

E. T. Horn, general supervisor of terminals, found at the last minute that he was unable to serve as a judge. Hence only four judges officiated on the Eastern Lines, as well as on the Western Lines. Also by virtue of the appointment of S. A. Jordan as engineer Maintenance of Way, Western Lines, Mr. Jordan took Mr. Lane's place among the Western Line judges.

The St. George Transfer Agency submitted an essay without the signature of any individual and we take it that the essay was written in collaboration by two or more of the employes there.

Miss Lillian Betony, daughter of section foreman at Kingwood, W. Va., was chosen by Mr. Stimson as having the third best essay on the Eastern Lines. We mention this in particular because Miss Lillian is only 13 years old and is in her third year in high school. We trust that she will have

better luck if she decides to enter the next contest.

Interesting comment by some of the judges follows:

Mr. Blaser said:

After reading each one of the 22 essays submitted in the No-Accident Campaign for the Eastern Lines very carefully, in fact many of them several times, I found it very difficult to confine my preference to five of the papers, as there are many more than five that I feel are worthy of being considered for prizes. But as there are only five prizes, the selection necessarily had to be confined to that number.

The arguments in the various papers that made the strongest appeal to my mind were those that related to:

- 1st. Careful observance of all rules.
- 2d. See that your fellow employe understands and complies with the rules.
- 3d. The far-reaching effect not only on the individual while in active service, but in his home life, and the example he sets not only for his children but for his neighbors and acquaintances everywhere.

It has always been my thought that while there are many accidents on railroads, brought about by thoughtless and careless acts of the employes, there is really greater precaution taken by railroad employes than there is on the part of the public generally; in other words, if the public were as careful comparatively as railroad employes, the number of accidents through-

out the country would be greatly reduced. Therefore, the widespread influence of precept and example set by railroad employes through the influence of Safety should have a very beneficial effect throughout the entire country.

Mr. Voorhees said:

In my opinion the essays as a whole show a much higher average standard than those submitted a year ago and I assure you that it was no easy task to make a selection.

Mr. Stimson commented on his choice of the best essays, per numbers given in accompanying table, as follows:

1st. The writer gives in a forceful, rugged style his method of helping in the No-Accident Campaign. He holds the attention of the reader to his subject and imparts to him some of his own enthusiasm. This effect would be much more marked on an audience to whom the paper is read. In this respect the essay excels all others and in my opinion entitles it to first prize.

2d. This is probably the best written of all the essays presented, but falls a little short in the presentation of the subject and in the strength of its appeal as compared with the first choice. It, therefore, is entitled to second place.

3d. This essay evidences the greatest amount of effort. It deals with the subject in more detail than any of the other essays.

What is said is very good and to the point. Many of the points will no doubt prove quite sharp to the reader with a guilty conscience. This essay will accomplish some good and is, therefore, given third place

4th. This writer tells in a very convincing way why employes should take an active interest in Accident Prevention.

5th. This essay presents in concise form an effective way of helping in the No-Accident Campaign. The thoughts are well expressed and although the essay is quite short it is deserving of mention and is chosen for fifth place.

On account of lack of space in this issue we will have to postpone publication of winning essays.

The Reconstruction of the Allegheny River Bridge at Pittsburgh

By Philip George Lang, Jr.

Assistant Engineer of Bridges

THE completion of the Baltimore and Ohio Railroad bridge crossing the Allegheny River, at Pittsburgh, Pa., marks the successful solution of a series of the most complex engineering and operating problems. The major operation in connection with this work, consisting of the movement into final position of a through truss span, 434 feet in length, and the jacking to a new grade line, 14 feet above the old grade, of a 261-foot truss span, which occurred on Monday, December 20, in the presence of a large assembly of engineers and other interested persons, indicates that all of the difficulties presented by this work have been successfully overcome, and that the Railroad has a modern structure for the movement of its traffic through this important and congested industrial region.

The original structure at this point, forming a portion of the Pittsburgh Junction Railroad, once an independent line, which constituted a link between the Eastern and Western Lines entering Pittsburgh, was built in 1884. Its principal portion, crossing the main channel of the river, between Herr's Island and the east bank, consisted of four double-track, through truss spans, the remainder being composed of steel or wooden trestle

and shorter spans of various types and lengths.

The Pittsburgh Junction Railroad, including this structure, subsequently became a part of the Baltimore and Ohio System, and for many years the bridge served its purpose as an important link in the route between New York and Chicago. Years of heavy service and the steadily increasing weight of motive power gradually produced in this structure a condition of obsolescence, and operation over it was subject to numerous restrictions.

The 33d Street Viaduct was reconstructed in 1916-1917. The reconstruction of the river spans had already been considered, and the United States Government demanded a minimum vertical clearance above the surface of the river of 50 feet. The reconstruction of the 33d Street Viaduct was arranged on this basis, and resulted in a 1.5 per cent. grade

on the structure connecting it with the river spans, which all eastbound traffic was compelled to face, and which proved an expensive operating element.

In the spring of 1919 the work was authorized at an estimated cost of about two and a quarter million dollars. The work contemplated the complete reconstruction of the masonry substructure. The new piers are placed at sites entirely distinct from those occupied by the old masonry, and the new superstructure is of a modern type, quite different from the old spans.

Work on the masonry was commenced in the late Summer of 1919, and was prosecuted without interruption throughout the winter. Several of the river piers were constructed by the caisson method, that is, by the use of a gigantic wooden box, very stoutly constructed. This box, or caisson, which is provided with a metallic "cutting edge," is sunk in an inverted position, the earth beneath it being excavated by means of air locks in the top. The caisson is sunk by this means to bed rock, and, when brought to the desired position is "sealed" (filled with concrete), and its upper surface used as a base upon which the masonry is founded.

In other instances the "open cofferdam" method was used; that is, interlocking sheet piling is placed and the water pumped from the enclosure, exposing the bottom of the stream. In some cases, concrete piling was used for the support of the piers.

Contract had, in the meantime, been placed for the fabrication and erection, complete, of the steel superstructure, and the shop work on this material was in progress at the Ambridge Plant of the American Bridge Company. Early in April of this

year, the American Bridge Company's erection forces arrived at the site. And the erection of this bridge, with but few hours' interference with regular train movement, at one of our densest traffic points, is an achievement worthy of more than passing note.

The erection was started simultaneously at both ends of the structure, and was prosecuted with

THE BALTIMORE AND OHIO RAILROAD COMPANY

TELEGRAM

BE BRIEF

PO J RO 216pm

New York Dec 21st 20

H A Lane

Your message advising allegheny river bridge ready for service 140 am Dec 21st and that No 7 was first train over it, is just received. Please accept my hearty congratulations because of the successful outcome of your plans and efforts in this connection.

D. Willard.

No. 1—Eastbound train crossing bridge at low level on westbound track

vigor. The west end of this bridge beyond the Back Channel, consists of a series of plate girder spans, resting upon concrete piers. This portion of the new line deviates from the old, and the absence of traffic at this point greatly facilitated the progress of the work.

At the east end of the new work the conditions were quite different and required much greater care in the

prosecution of the work. At this point the old and new lines are coincident, and the spans to be moved were of dimensions which, under any circumstances, would make their erection a matter of extreme difficulty.

In addition to these facts, it should be borne in mind that the improvement under discussion contemplated a 14-foot raise in the grade over this structure, which was introduced for

the purpose of complying with the Governmental requirements concerning overhead clearance.

The first span at the east end consists of 96-foot girders and, adjacent to this, a 261-foot through truss, the combined weight of these two spans being about 2,200,000 pounds. For the purpose of moving these spans to their place in the new structure, falsework extensions were made to

No. 2—In distance is new 261-foot truss span in place at low level. New 134-foot truss span in temporary position at high level. Traffic carried on two old truss spans in the foreground and the 261-foot span

No. 3—View looking east through old truss spans. Single track on line of westbound track at low level. New spans in temporary position down-stream at high level

the new piers on the down-stream side of the structure, and the spans, as their parts were received at the bridge site, were assembled and erected on these extensions. Similar extensions were also made to the old piers, on the upstream side of the structure, for the purpose of receiving

two of the old truss spans, whose withdrawal from the structure was incidental to the work contemplated in this operation.

The first of the so-called "rolling operations" in connection with this bridge, involving the movement to final line of the 261-foot through truss

span and the 96-foot girder span, and the withdrawal of two 206-foot truss spans, which formed a part of the old structure, occurred on Wednesday, September 1, 1920, and was completely successful in every respect.

The actual time required for the rolling of the spans was six minutes.

No. 4—New 434-foot truss span in final position, old truss spans rolled out and new 261-foot truss span being jacked. View taken when span was approximately five feet above low position

No. 5—In distance 434-foot span in final position—261-foot span being jacked approximately midway between high and low positions

It will be noted that the total distance occupied by the two spans removed, namely, 412 feet, is considerably in excess of that represented by the new spans moved into place. This gap was temporarily bridged by a 50-foot plate girder span, destined for permanent use in the 36th Street Yard Connection. This span was floated on barges to a position immediately below the opening which it was to cross; from this position it was raised by a derrick car through the opening, swung to line and bolted into its temporary position. The period of traffic severance on September 1 extended from 10.00 a. m. to 1.04 p. m., a total of three hours and four minutes.

An operation of greater magnitude was that performed on December 20, consisting of the rolling to final line and grade of the 434-foot through truss span, weighing about 5,000,000 pounds, and the jacking of the 261-foot span, weighing 2,000,000 pounds, 14 feet to the new grade.

In following the operations in connection with this reconstruction, it should be borne in mind that the main river structure was, until the last rolling operation, allowed to remain at the old or low grade. It was consequently impossible to complete the new piers, the height of which was limited by the presence of the old structure at the low level, and these were temporarily stopped at an elevation slightly above the lowest chord of the old structure.

The preliminary work in connection with the placing of the 434-foot span was, in many respects, identical with that followed in arranging a

similar operation for the spans involved in the movement of September 1, although in this case the work was of greater magnitude and the fact that the long span was drawn in at the final or high grade added a measure of complexity to the problem. This span, as its members were received at the site, was assembled on falsework, erected downstream from the existing structure.

Immediately following the movement of this span, it was arranged to jack the 261-foot span to final grade and, after careful review of the condition of the work, this operation was scheduled for December 20. The weather conditions on that day were ideal for the movement, which proceeded without interruption, and, commencing at 7.15 a. m., consumed a period of slightly more than an hour. In this movement 5,000,000

pounds of new steel were moved to position, and about 1,200,000 pounds withdrawn from the structure, making the total weight of metal involved in the operation about 6,200,000 pounds, which, with the addition of deck, rails and equipment, totals about 5,000 tons.

The jacking of the 261-foot span to final grade was next proceeded with, and this operation consumed a greater period than the rolling operation. In the meantime traffic was detoured over the Pittsburgh and Lake Erie Railroad. The jacking operation proceeded throughout the day of December 20, and was completed about midnight. The first train to cross the new structure made its passage about 2.00 a. m. on the 21st, making the duration of traffic severance 19 hours.

The completion of this structure

Important—Please Note!

The Company has generously responded to the increasing demand for copies of the MAGAZINE all over the System and our circulation is now several thousand more than it was a year ago. All officers and employes having anything to do with the distribution of the MAGAZINE will, therefore, please see that the magazines are distributed promptly and that any oversupply or delay in distribution at any point is immediately reported to the MAGAZINE Office, Mount Royal Station, Baltimore

Happy New Year!

By John Newman

Terminal Timekeeper, Pier 21, New York

December twenty-first there came a message full of cheer:
"The pay drafts will go forward," and the next day they were here!
Announcement of the tidings caused "the bunch" to buzz with glee,
"Ah! now the merry Christmas could be spent most merrilee!"

December twenty-seventh—and the selfsame merry bunch
Was counting cash to see how much they now could spend for lunch.
Through gloomy vistas far ahead next pay day they could see,
Till then the problem would remain, "to be or not to be."

But look beyond the imminent and banish gloomy fear
And "work and pray" that '21 will be a happy year.
Here's wishing to the B. & O., its captain and the crew,
That better than the going year will be the coming new.

So help to push the clouds away, the sun will shine again,
And, waiting, let us play the game like true and honest men;
Let's make the coming year the best the sun shone ever on,
And have a Happy New Year all through Nineteen-Twenty-one.

gives the Railroad many economic and operating advantages, and, in conjunction with the reconstruction of other bridges between Laughlin Junction and New Castle Junction, whose completion is anticipated dur-

ing 1921, will make possible the movement of any existing class of Mikado power from Philadelphia to Chicago via Cumberland, Connellsville, Laughlin Junction, Willow Grove, New Castle Junction and Willard.

New Mallets Make Possible Greater Average of Car Miles

OUR new type of Mallet Locomotive, No. 7307, shown in the accompanying photograph of engine 7304, class EE1, weighs 497,000 pounds in working order, and is somewhat heavier than the latest built locomotives in operation on the Baltimore and Ohio.

The wheel arrangement is different in that these locomotives will have trailing as well as leading trucks with a total locomotive wheel base of 59 feet 6 inches as against 50 feet 4 inches

for the older type engine. The tender wheel base included makes a total wheel base of 93 feet 11¼ inches against 87 feet 5¼ inches. There is also a much increased total heating surface, 5913 square feet as against 5484 square feet. Driving wheels are 63 inches in diameter as compared with the 56 inch and 58 inch wheels heretofore used.

This latter feature, namely the larger driving wheels, makes the new type capable of higher speeds, will

result in a considerable reduction of time in hauling the trains over the division, and will go a great way towards increasing freight movement and the average freight mileage per day. This capacity for quicker freight movement can be readily appreciated when it is realized that the diameter of wheels used on this new type is as large as was used years ago on locomotives in passenger service.

The leading dimensions of this locomotive are:

Cylinders, high pressure, 26½ inches in diameter by 32 inches stroke;

Cylinders, low pressure, 42 inches in diameter by 32 inches stroke;

Driving wheels, 63 inches in diameter;

Boiler, inside, 84½ inches;

Boiler pressure, 210 pounds;

Firebox, 96¼ inches wide, 132⅞ inches long;

Boiler tubes, 259 2½ inches in diameter, 25 feet long; 48 5½ inches in diameter, 25 feet long;

Total heating surface, 5913 square feet;

Grate area, 88.3 square feet.

Total weight, engine, 497,000 pounds; tender and engine, 691,000 pounds.

Receives the Usual Courtesies of the Relief Department

28 AUGUSTA AVENUE, IRVINGTON
December 6, 1920

MR. W. J. DUDLEY,
Relief Department,
Baltimore and Ohio Railroad Co.,
City.

Dear Sir—I acknowledge with thanks the receipt of release on mortgage issued by the Superior Court of Baltimore City, enclosed with your favor of the 3d, which I understand brings this transaction to a conclusion.

Please allow me to express my appreciation of the benefits afforded the writer by your Department and the courtesy extended during the period of the loan.

Yours truly,
W. J. MARTIN.

The first of the new Mallets, Type No. 7307, waiting at Mount Clare Shops for her road test

BALTIMORE, MD., December 31, 1920.

TO ALL MEMBERS OF THE BALTIMORE AND OHIO FAMILY:

Once again it is my pleasure to extend to my associates in the Baltimore and Ohio service, best wishes for the coming New Year. The last time it was my privilege to send New Year's greetings to my fellow officers and employes, our nation was in the midst of the Great War. Since then the war has been won, Federal control of the railroads, exercised as a war measure, has been terminated, and the disturbed and trying conditions brought about by the war are gradually becoming settled and more orderly.

While we have lived in the most interesting period in the world's history, we cannot forget that to many of us the war has brought sorrow and disappointment. However, the war is now happily ended, and while the cost is yet to be paid, there are many reasons why we should enter the New Year hopeful and with full confidence in the future. Our country has not been invaded by the enemy, we have not lost a million of our young men in battle as has been the case with some of the less fortunate nations of the world, we have not in this country suffered from drought, crop failure, or great disaster, and we have no cause to fear violent or untried economic or political changes. As a nation we have more than we need of almost everything necessary for life and comfort, and, best of all, we live in a country where all are equal before the law, and where the lowest not only may but constantly do rise to the highest station.

To me the future seems bright and full of promise, provided only we return to the habits of *thrift, economy and well-ordered industry*, which in the past have made us great as a nation, and happy as individuals.

Those of us who constitute the Baltimore and Ohio family cannot expect to realize the fullest measure of prosperity as individuals unless the Company we serve, and with which we are identified, is also prosperous. I most earnestly request, therefore, the helpful support and cooperation of all—officers and employes alike—in order that we may secure for the Baltimore and Ohio Company, as well as for ourselves, a fair share of the prosperity which I firmly believe the future holds for us all.

A handwritten signature in dark ink, reading "Samuel W. Brice". The signature is written in a cursive style with a large, prominent initial 'S'.

President, The Baltimore and Ohio Railroad Company.

Car Situation Materially Changed During the Last Two Months

Problem of Economical Handling as Pressing as Ever

ON DECEMBER 29, C. M. Erwin, agent, North Vernon, Ind., wrote the following letter to the superintendent of the Indiana Division:

For the first time as far back as records will show:

We had at freight house platform 13 Baltimore and Ohio box cars loaded with merchandise which was worked at platform December 28. Also had one car in same track west of platform known as "team track" which also was Baltimore and Ohio equipment, 100 per cent. System cars.

With this letter we quote another, a strong appeal sent by Agent Phinney of Grafton to one of his big shipper, as follows:

GRAFTON, W. VA., December 2, 1920.

Gentlemen—With the present abundant supply of box cars it is felt that there should be no failure on the part of any shipper to comply with our requests to load cars in the proper direction. For your ready reference I will repeat the simplest of the regulations governing the loading of cars.

System cars (Baltimore and Ohio Railroad) should be confined to loading to points on Baltimore and Ohio Railroad. Foreign cars should be loaded to destination on the railroad owning the car, to destination on the direct route to such owning railroad, or to destination which will allow the owning road to participate in the freight rate.

It is hoped that you will use every effort to keep cars moving in the proper direction. I give you below four instances in the past two days in which cars have been loaded improperly.

On November 30 you loaded C. N. J. 17550, with glass jars consigned to A. I. Root Co., Medina, Ohio. This is an eastern route car at home in New Jersey and eastern Pennsylvania.

On December 1 you loaded L. I. 3833, with paper consigned to Hinde and Dauch Paper Co., Sandusky, Ohio. This is an eastern route car at home on Long Island, N. Y.

Same date you loaded N. Y. C. 252804, with glass jars consigned to Horlicks Malted Milk Co., Racine, Wis. While we have connections with the N. Y. C. on our western lines, this car was loaded beyond the territory touched by New York Central Railroad and the routing specified did not allow that road to participate in the freight rate.

Same date you loaded C. G. R. 6221, with glass jars consigned to Arlington Chemical Co., Yonkers, N. Y. This car belongs to Canadian Government Railways and is at

home in Canada. Same should have been loaded to or towards Buffalo, N. Y., or Detroit, Mich.

If the L. I. car and the C. G. R. car had been reversed a much better showing would have been made.

These instances are brought to your attention for the purpose of securing your cooperation along the lines mentioned, which I am assuring our officials will be given by you.

Yours truly,

P. B. PHINNEY,
Agent.

On March 1, 1920, only 9 per cent. of the box cars on the System were Baltimore and Ohio cars. This was during a period of box car shortage. On November 1, this shortage ceased to exist and on December 1, 35 per cent. of the box cars on our lines were System cars. They were coming home rapidly and the surplus was increasing to such an extent that on

December 14 there were 35,000 surplus cars on our lines. One of the important phases of the problem now is, therefore, to get all surplus foreign cars off our lines and back to their owners, under the Car Service Rules.

During the middle of December the net per diem debit against the Baltimore and Ohio was 7,000 cars, a daily charge against our revenues of \$7,000, and this in the face of an actual surplus on our lines.

In addition to this charge, the cost of the non-revenue or empty mileage must be taken into consideration. With the surplus of cars on our lines, this amounts to a very considerable sum, as is illustrated by the following case:

At a certain large yard on the Baltimore and Ohio two cars were being loaded, one a Nickel Plate and the other a Long Island. The yardmaster spotted them at the proper platforms for loading in the direction of the home roads, the Nickel Plate car for Paris, Ind., and the Long Island car for New York City. In some way, however, the crew switching the cars did not follow the yardmaster's instructions, with the result that the

Nickel Plate car was loaded for New York and the Long Island car loaded for Paris.

The net cost of this to the Baltimore and Ohio can be figured out approximately in this way: Instead of these two cars being returned loaded to their home roads and thus gotten off our lines, both were sent in the wrong direction, with the result that on each there was a minimum per diem charge of \$10.00 for 10 days, the smallest length of time required to get them back empty to their home roads. And, as the shortest possible route for each of these cars back to its home road was about 600 miles, and the cost for hauling an empty is rated at five cents per mile, the additional cost to the Baltimore and Ohio was about

\$30.00 for each car. This makes a total cost of about \$100 for just these two cars, all of which could have been saved had the switch crew at the loading point followed out the instructions of the yardmaster.

With the large number of foreign line cars on our lines, it can be readily seen how much net and unnecessary debit many mistakes of this kind would amount to against our revenues.

While there is a surplus of cars on our lines it should be the effort of every employe engaged in the handling or directing of car movement to get cars off our lines in the direction of the owning roads. How this can be done in one way is splendidly illustrated in the fine letter of Agent Phinney, accompanying this article.

Brakeman's Sacrifice Rewarded With Gold Medal

Vice-President Galloway and Other Officers Address Meeting in Honor of Joseph Sweeney

THE committee room at the 24th and Chestnut Streets Station, Philadelphia, Pa., was the scene of a most interesting and instructive program on the afternoon of December 7, when Vice-President Galloway presented a gold medal to Brakeman Joseph Sweeney, who, on January 14, 1920, gave his blood in transfusion in an effort to save the life of a fellow employe, Thomas J. Thornton.

After the showing of the new picture, "Bulletin 70," now being exhibited at various points on the System, R. B. White, superintendent of the Baltimore Division, introduced Vice-President Galloway, who said:

"I did not come prepared to speak on Safety today, but I want to say to you that we have one of the most strenuous Safety men that I know. He pursues me day and night; he follows me all over the Road; he sent for this Safety picture to show me in connection with its proposed use on the Baltimore and Ohio, and then he has brought it along to show it here this afternoon. This picture, we understand, cost the New York Central Railroad between \$15,000 and \$20,000; from it we can visualize the meaning of accidents.

"Many times it is difficult for us to understand unsafe practices; we have to stretch our imaginations to get a conception of how some accidents occur.

"All accidents are, of course, reported on special forms. It is dis-

tressing to get reports of any kind of an accident, but it is particularly distressing to get the report of an accident to a man, and yet, we get them every day. We have made a very creditable showing in the recent No-Accident Campaign, but in spite of it, a number of accidents have occurred. This all came from the failure of railroaders to recognize the importance of Safety work. We should always keep it in mind. I never fail to call attention to it wherever I go. We are interested in it from a humane standpoint. As I have said, it is distressing to receive reports of personal injuries. We cannot do too much to correct this; we cannot say too much about it.

Joseph Sweeney

Each of us ought to appoint himself a committee of one to inform people about Safety.

"Strange to say, those who are the victims of many of our worst accidents are men who have been long in the service. This is the thing that the officers have much difficulty in understanding. How do these accidents occur? Why do they occur? It is impossible to understand this from a report.

"There are two examples that I wish to speak of. The first is of a brakeman who left his train and crossed three tracks in order to get a package of cigarettes. Then he stood on the track to light one of them. He was struck by a train. The other instance was the case of two men who sat on a rail in broad daylight. Sat on a rail, think of it! No. 29 came along and killed them both. We have tried to make men understand. How two intelligent men could sit down on a railroad track on as clear a day as this is hard to explain. Men still take the chance. These two men knew that they were on a track on which a train was due to arrive; the other lost his life for a cigarette.

"What more have we got to do? We have the most intelligent of Safety workers, but the fact remains that their work is not appreciated. However, we shall do everything that will impress the importance of this work upon the minds of our people. Let each one, therefore, appoint himself a committee of one to talk Safety to everyone.

"Is Mr. Sweeney here? Will he kindly step to the platform?

"Mr. Sweeney, I am told that on January 14 there was a very unfortunate accident at East Side Yards to a man named Thornton, who was found by his associates to be seriously injured. You recall this, do you? (Mr. Sweeney did.)

"You accompanied him to the hospital. In an effort to save the man's life, the physicians asked for volunteers for a blood transfusion. You offered and gave your blood to save this man, who, notwithstanding your noble sacrifice, passed away. If I talked for hours I could not say enough to show you our appreciation. An example of true manhood; that is what we think of you. Although it is a little late, I wish to say, on behalf of myself, of your associates, employes, and the Baltimore and Ohio Railroad Company, that we greatly appreciate your offering your blood to save the life of a fellow man. I want to present to you a gold medal, on one side of which is the guardian angel, hovering above

the prostrate form of an injured man, and on the reverse side your name and the inscription. I hope that you will accept this medal with the same feeling of joy and pride which we feel in giving it to you."

The medal is about the size of a half-dollar and is attached to a bar, which bears the name of Joseph Sweeney. On the medal itself is this inscription:

"Presented by The Baltimore and Ohio Railroad Company to Joseph Sweeney, who gave his blood in transfusion in an effort to save the life of Thomas J. Thornton, a fellow employe, who was found seriously injured in East Side Yard, Philadelphia, January 14, 1920."

After the presentation of the medal, Mr. White introduced General Manager Ennes, who said in part:

"I appreciate the honor of being here when Mr. Sweeney is presented with a medal. I also appreciate seeing the motion picture. There is little that I can say except to mention an accident which happened to an emigrant train, because of carelessness in handling the signal. One man was killed and 38 people injured—all because of lack of care. On our own Railroad, similar accidents have occurred, but fortunately nothing serious resulted. This will show how mean it is to run by a signal. Rules are all for a purpose. Back of these is the safeguarding of people and property. Within the past six weeks I saw a train standing on a track while a flagman sat upon the nearby rail with his shoe off, fixing his stocking. Now, this man was paid to attend to the train.

"I know how loath most of you are to take a man to task for not handling such matters properly, but it is necessary to keep a sharp lookout for violations of this kind. Just now we are facing a reduction in business. We have got to eliminate unnecessary accidents. I am sure that you are tired of hearing about the reduction of expenses, but this is a vital topic and one which must be discussed."

The closing talk was made by E. W. Scheer, general superintendent, Maryland District. Mr. Scheer said: "This is the first time that I have

BALTIMORE, December 31, 1920.

MEMBERS OF THE BALTIMORE AND OHIO FAMILY— OFFICERS AND EMPLOYEES:

It is again my pleasure to extend to you and yours my best wishes for the New Year.

Vice-President Operation and Maintenance.

ever came with the Baltimore and Ohio who was more whole-heartedly adopted by our own people. He established himself quickly and firmly in their regard and affection, and, as he was giving up his work with us, said that he had never been associated with railroad men who had shown him finer cooperation and whose friendship he cherished more highly.

had the pleasure of seeing a gold medal presented to an employe. I have oftentimes witnessed the presentation of oil cans, lanterns, etc., but never gold medals.

"By the remarks which have been made this afternoon, I am reminded of a case that has come under my observation. I was on my way from Cumbo to Brunswick. As the train came into Brunswick, a man who was standing on the track jumped just in time to save himself from a passing engine. I called to him. He answered, consigning me to other quarters of a higher temperature. Later I got hold of him; he was frightened and trembling from his narrow escape. I talked to him and to the other employes. Yes, they had read the Safety rules, yet, within a few weeks, three men among them had lost their lives.

"Do you wonder, then, that we are going to do all that we can to protect ourselves and to make the Railroad safe for employes and passengers?"

Mr. Ennes is now vice-president and general manager of the Wheeling and Lake Erie Railroad, with headquarters at Cleveland, Ohio. On December 31, he sent this greeting to the officers and employes of the Eastern Lines:

"Wish you and yours a prosperous and happy New Year."

And we know that we speak for the whole personnel of the Baltimore and Ohio when we wish him in return unqualified success in his new opportunity and work.

Vice-President Galloway has announced that until further notice the general superintendents on the Eastern Lines will report to him direct.

C. B. Gorsuch, Superintendent
at Wheeling

On January 1, 1921, C. B. Gorsuch was appointed superintendent, Wheeling Division, headquarters Wheeling, W. Va., vice E. V. Smith, deceased.

Resignation of General Manager Ennes

THE announcement of the resignation of S. Ennes, general manager, Eastern Lines, effective January 1, was received with sincere regret by all officers and employes of the Baltimore and Ohio who have had the pleasure of being associated with or knowing him.

Mr. Ennes's connection with our Road came as the result of the joint operation of the Baltimore and Ohio with the Western Maryland during Federal control. Previous to this he had been general manager of the Western Maryland, but no official

A New Year's Sermon

To be honest—to be kind—to earn a little and to spend a little less—to make upon the whole a family happier for his presence—to renounce when that shall be necessary and not to be embittered—to keep a few friends but those without capitulation—above all, on the same grim condition, to keep friends with himself—here is a task for all that a man has of fortitude and delicacy.

—R. L. Stevenson.

Cut Loss and Damage 50%
It Can Be Done

With the Help of the Olafson Kids

By Frank Kavanaugh

SHE was sweet sixteen or thereabouts when Fleming first saw her. He was engaged in the noble art of braking on Nos. 7 and 8 on the Elmore Branch at the time. The Elmore Branch, as you are aware, if you have ever read summer resort literature, leaves the main line and meanders up through the mountains to where Elmore Springs is located. Many visitors go there for the summers. The Girl was with a party of school girls and an elderly woman, evidently the chaperone of the party.

"Who's the girl seated next to the old lady?" Fleming asked Mike Reardon, the conductor, as that individual passed a "31" order over to the young brakeman to read.

"Don't know," the old man replied carelessly. "That whole outfit's traveling on a pass, though. I think the old lady's something or other to one of the big bugs of the road. Passes don't grow on bushes these days."

"The girl with the brown eyes—the one next to the old lady's all I wanted to know about," Fleming observed. Then he read the order aloud, as the rules require: "Extra Engine 1260 has right of track over No. 8, engine 661, Siding 22 to Meklen."

The next summer Fleming was a little older, and, when he saw The Girl, she, too, seemed to have aged a wee bit. This time Fleming followed the "old man" through the cars as he collected tickets. By that time passes had been forbidden by an ever-watching government and the girl presented the usual little piece of pasteboard which carried no marks of identification. Fleming looked over his conductor's shoulder as that individual punched the ticket, to make sure. This time the girl was accompanied by no one but the older woman.

By the following summer and the summer after that Fleming was on a freight run and he saw nothing of her. But sometimes, and at the oddest moments, he saw her face, coming to him, it seemed, out of nowhere. There was the time when, on his first trip over the road as freight conductor, he rode a car into a siding at a little hill station on the mountain division of the main line. He had tried the brake on the car

before his swing brakeman cut it off from the drag of cars and it held. But when he tried the thing as he was almost to the point where he had to "spot" the car, he gave the wheel the fraction of a turn too much and the brake-chain snapped. Before he had time to realize it the car was gathering momentum and heading for the lower end of the switch to the main line. It would be a two-mile ride, Fleming knew, if the car held the rails. If it didn't—well, he'd better get off. He pulled his watch from his pocket and noted the time. No. 1, the crack train of the road, was plugging along at forty miles an hour somewhere down in those hills, and she was about due. If the car held the rails—Fleming winced. No. 1 carried several hundred passengers, besides the crew of the two engines pulling the train. It would be cowardly to leave the car, yet he knew of no way to stop it. Just then the girl's face appeared, out of nowhere. "When all else fails, try the impossible."

The car was now on the main line, making nearly thirty miles an hour. Just ahead was a sharp curve. On one side stood a bluff; on the other a deep ravine. Fleming understood. With quick motions he drew off his coat, then his overalls, then his shoes. Wrapping his shoes in his overalls and the coat about all, he climbed down the step-ladder at the front end of the car. The clothing, with the shoes inside, made quite a bundle. Watching as the flanges of the outside wheels bit the rail, he dropped the bundle. The flange of the wheel, grinding the rail, struck the bundle. The wheel leaped the rail. When Fleming next regained his senses he was in the railroad hospital, mostly incased in a plaster cast.

The second time he saw the girl was the night he came down in response to the train caller's summons and found his name marked on the board as extra passenger conductor. She seemed to smile.

Mike Reardon, old-timer on the Elmore Branch, had gone to his reward. Fleming, who "knew the road," was put on the runs until someone having seniority would "bump" him. But the Elmore Branch was not much of a run, and no one seemed eager to do the bumping act. A month passed and Fleming asked about it.

"The run hasn't been bid in yet," he was told. "Since the Great Western's Branch was built into the Springs we're not doing much business on that branch anyway. They've got better track and better equipment. Keep the run for a while longer. It beats freight, and it's better than fighting the main line extra board."

"I thought if I was put on regularly I might try and beat the G. W. some. Billings, who's working opposite me—"

"Billings has been there since 1890 and knows all the population along the road. A conductor's got no chance to make people ride, anyhow. That's up to the G. P. A. and his men. You just stay on and then bid in a better run."

"I'll do it," Fleming said, "especially the first part of the request."

Fleming went back to his work. Perhaps the girl would spend the summer at the Springs that next season and perhaps he might—well, he closed his lips and stayed.

He had been there, running opposite Billings for eight or nine months, when one day a special twisted its way over the branch. Officials were inspecting their property and they stopped at every station and sometimes asked the station agents questions about crops, industries and other things the station men are supposed to be familiar with. They were talking to an agent at a small station when a wee girl entered. Shyly she approached the station agent:

"Mamma wants to know if Mister John's train is coming south today."

"He goes north today," the agent replied. "He will come south tomorrow."

"Then we'll go down to sister's tomorrow," the child remarked, as she left the building.

One of the officials was inquisitive.

"A relative of one of the trainmen?" he asked.

"No," replied the station agent. "She's just asking about John's train, John Fleming's a conductor on this branch. There isn't a kid or a mother on the line that doesn't swear by him. He's been known to stop his train near a farm house just because the milk in a baby's bottle became sour and the mother couldn't manage it—the child, I mean—because the milk made it sick."

"Bad precedent, bad precedent," snapped one of the officials, "stopping train except at scheduled points."

"But that mother happened to be the daughter of old Olaf Olafson, leader of a large Swedish colony

here," the station agent asserted. "Fleming didn't know it at the time, of course, and it wouldn't have made much difference with him anyhow. The baby was sick and that was all he thought of. There isn't one of that colony now that wouldn't go out of his way to haul freight to this branch, and they'll wait a day just to get to ride on Fleming's train. Besides Fleming saved your No. 1 on the main line one day by a little quick thinking," and the agent proceeded to tell of the runaway car incident.

"Make note," said the leader of the officials to his stenographer, "to get me statistics about the receipts of the Elmore Branch train; that is, each conductor's train receipts."

The stenographer jotted down a

few pothooks in his note book and the special resumed its trip.

"Just ride with John Fleming a trip and see how many children and mothers he carries," the agent said as a parting shot. "Country people who used to travel by wagon and horseback now ride his train, especially the little ones and the mothers. He watches out for 'em."

The officials, of course, had no time to try the experiment, but it seems others working for them did. At the end of his run one day, at the beginning of summer when he expected to see the girl once more, he was relieved. As the trainmaster handed him his passes he remarked:

"I have no idea what they want of you up there, Fleming. There's been some queer ducks up and down

the branch lately and if they've caught you wrong on the cash fares, why—"

"I'm not afraid of that, sir," Fleming replied. "I've been square. Anyhow, if it was that, you'd know, and fire me from here."

"It's the first time the officials have ever gone over my head," the trainmaster mused. "If I can do you any good, wire me; and if you lose out and need any assistance, why let me—"

"If I'm to go off the road, sir," Fleming interrupted "I'll try something else. I've saved. When I went overseas I planted everything I had and now I get a little interest that'll keep me awhile, at least."

Fleming nosed into the general offices and after a time was admitted to an office where a big man sat. The big man looked at the card and then consulted a penciled pad.

"Ah, Fleming, eh? Sit down, Mr. Fleming. You're our former conductor on the Elmore Branch, eh? You ran opposite Mr.—er—" The big man consulted the pad. "Mr. Billings?"

"Yes, sir," Fleming replied, noting the past tense reference to his late job.

"Mr. Billings appears to have obeyed some of the rules of our company more closely than you have, Mr. Fleming."

Fleming said nothing.

"On a date I have forgotten, it appears from our records that you caused your train to be stopped at a point unscheduled. You held it there a few minutes while you secured milk for a baby's—er—bottle."

"The day was hot, sir," Fleming countered, "and the baby would have been very sick for lack of sweet milk. The engineer made up the time lost."

"And on the eighth of February you caused your train to be held seven minutes while you and your porter carried an aged lady and gentleman from the landing at Woodside station to a wagon waiting for them about two hundred feet from the right-of-way."

"All the ground around with the exception of the landing was covered with ice," Fleming explained. "The boy in the wagon had a hard time holding the horses. That's a blind siding and no one else was there."

"I have here a list of more than fifty cases in which you have performed acts which no other conductor on the road ever was guilty of."

"I'm sorry, sir, but—"

The big man tore a sheet off the pad and consulted the one underneath.

Two hours later he found a seat by her side

"I also find," he said, "that receipts on your train amounted to 72 per cent. more than from the other train. In the last three months our men have reported that we have received a large portion of the freight business which went to the Great Western's branch into Elmore. I also find that mothers with children wait over a day sometimes to ride with you. We have an opening just now in the general passenger agent's office. I can get you in there if you wish, although I'm somewhat in favor of letting heads of departments hire their own men. But in this case it will be the same thing, as the G. P. A. has asked for you. What do you say?"

"I'd like to stay with the branch, if you please, at least until the summer season's over."

"Take a day or two to think it over. And, by the way, as you're a stranger here, come out to dinner with me this evening. It's quite a little railroad party and you'll make the acquaintance of some of the men from the G. P. A.'s office."

"I thank you, sir," Fleming said, and left the room.

Fleming felt out of place as he gave his card to a servant and was ushered into the drawing room. There was but one person present, because he was early. And it was The Girl!

"Uncle Bill will be down in a few minutes," she said simply. "You are Mr. Fleming, are you not?"

Fleming remembered afterward that he said something, but he did not know what.

Two hours later, he found a seat by her side in an alcove in the drawing room.

"Do you recollect the first time I saw you?" he asked.

"I do," she replied. "You were so tall and slim."

"And the second time?"

"You were trying to raise a mustache, but it was scarcely visible."

"I tried to wait for you this summer, but your uncle sent for me."

"I am going to stay here this summer; uncle is so busy he cannot leave and auntie is old."

* * * * *

Early next morning he was in the office of the big man. "I have changed my mind, sir," he said. "I'll take the place you offer, if it is still available."

"Blake," said the big man, turning to his clerk, "give Mr. Fleming the note to Mr. Oliver. Mr. Oliver has been looking for a man who loves little children," the big man continued. "We're running a daily excursion down to the coast this

summer, and he wants someone along to see that the kiddies learn to like the road. Just got word from our freight department that we beat the Great Western's freight receipts on the Elmore Branch for the period ending the first of the month. You

have a chance now to make friends with a great many future Olaf Olafson's. Good day!"

And Fleming walked down the hall toward the office of the G. P. A. The Girl's face danced before him, beckoning him to success.

Handle Shipments as if They Were Your Own

By C. C. Glessner

General Freight Claim Agent

FREIGHT Claim Prevention must be considered from two different standpoints, the public and carriers, both vitally interested in getting shipments to destination promptly and in as good order as when tendered for transportation.

And there is no reason why shipments should not reach destination and be promptly delivered if—and here is where the public comes in—if shipments are tendered in containers sufficiently strong to carry to destination, and each crate, package, bundle or loose piece of freight (L. C. L.) is plainly, legibly and durably marked by a brush, stencil, marking crayon (not chalk), rubber type, metal type, or other method which provides marks equally plain, legible and durable.

Marks must also show name of only one consignee and only one station, town or city and state to which destined. When consigned to a place of which there are two or more of the same name in the same state, the name of the county must also be shown. Shipments consigned "To Order" must be so marked with an identifying symbol or number, shown on shipping order and bill of lading. If this is also done with straight shipments the agent at initial point will carry the information to the revenue billing, which will assist the agent at destination in making correct delivery.

In his remarks before the recent Freight Claim Prevention Congress at Chicago, Mr. H. C. Barlow, traffic director of the Chicago Association of Commerce, said in part:

"When shippers fail to reasonably conform to regulations of this nature, it is the opinion of a large number of shippers that the carriers should refuse the goods rather than accept them and take the chance of damages which may follow."

So much for the shipper's part. Now for the carrier:

Because of the results accomplished already in our Loss and Dam-

age campaign we are of the opinion that claims can be cut in half; that "It Can Be Done." But it will require intensive efforts on the part of all departments and employees to watch the causes that have heretofore resulted in complaint and loss and damage claims, to take every precaution to eliminate such causes.

We are sure that all employees are with us to the end that the Baltimore and Ohio, serving eight of America's ten largest cities, New York, Chicago, Philadelphia, Detroit, Cleveland, St. Louis, Baltimore and Pittsburgh, should take its usual place at the head of the column when the final check is made in 1921 to determine which of the carriers have accomplished the end set by the slogan "Cut Loss and Damage in Half—It Can Be Done."

The embarrassing moment

When you meet the girl who married the man for whom you knit that sweater and socks while he was in the army

Employees May Have Deductions Made for Savings and Loans Either Monthly or Semi-Monthly

IN order to give every employee every convenience in his use of the Savings and Loan features of the Relief Department, a revision of the regulations governing deductions from payrolls has been made, as outlined in the following Accounting Department Circular No. N. S. 31, December 17, 1920, signed by Comptroller J. J. Ekin:

TO ALL CONCERNED:

To encourage thrift among our employees, through the agency of the Relief Department, the following rules, effective with January 1921 accounts, will govern in the preparation of payrolls.

1. Employees desiring deductions to be made from their pay for deposit in the Savings Feature must sign S. F. Form 7, authorizing the deduction of a stipulated amount monthly or semi-monthly. S. F. Form 7 must be signed in the space at the

left hand margin reading "Noted for Deduction on the Payroll," by proper official responsible for payroll, and forwarded to the Superintendent of the Relief Department. If a monthly deduction is desired, same shall be made on the payrolls covering either period of the month as selected by the depositor. Deductions for deposits, as authorized by employees, must be shown in the "Savings Feature" column on the payrolls, and after each amount so shown the word "Deposit" must be written.

2. Deductions for loans may be made monthly or semi-monthly and if monthly, the period selected by the employee shall govern; however, the stipulated deduction in connection with a loan must be made each month. Deductions for loans must be shown in the "Savings Feature" column on the payrolls and after each amount so shown the word "Loan" must be written.

3. In no case will a depositor or borrower be excused from deductions unless written

permission is received from the Superintendent of the Relief Department, and in the event that a borrower should not make sufficient time to pay his full dues for any month, then the difference must be made up in the following month.

4. The total of the "Savings Feature" column must be shown on Form 729, separated as between deposit deductions and loan deductions, in accordance with the notations on payrolls.

5. First carbon of all payrolls, for use of the Relief Department, should be sent to the Auditor of Disbursements in the container with the original of the payrolls.

These instructions supersede all previous instructions regarding this subject.

J. J. EKIN, *Comptroller*.

Cut Loss and Damage 50% It Can Be Done

Around the Town

By G. A. G.

I was standing
On the corner
Down on
Main Street,
When a
Swell machine
Pulls up
To the
Curb and
A nifty looking
Dame pokes
Her head out
And says,
"Where's the
Third Presbyterian
Church?" and
There was me,
Like a big boob,
I didn't even
Know where
The first one
Was.

To Allegheny River Bridge

Baltimore and Ohio Railroad Company—Opened for Traffic December 20, 1920

By O. S. Lewis

General Freight Agent, Pittsburgh, Pa.

Oh thou titanic, architectural span,
Born of the ingenuity of man,
May all who wrought and reared thy frame so well,
Make true and strong thy girders, struts and beams,
Thy joints, rivets, bearings, laps and seams,
And perfect thy dimensions to an ell.

For now we dedicate thee to the task
Of bearing heavy burdens, and we ask
That thou shall bear them safely, well content
At having been conceived and wisely made
To serve, a throbbing artery of trade,
To speed the traffic of a continent.

Each day in endless stream o'er thee shall pass
The peoples of the world, each tribe and class,
On missions of compassion, love or hate,
Or lured in hot pursuit of fabled wealth
Or yet in search of God's great blessing, health;
And all shall unto thee entrust their fate.

The fuel, cotton, raiment and the food;
Things fashioned well of metal and of wood;
Rich ores and precious bullion—wealth untold;
The countless missives, and the reams of news
Fraught with the whole world's messages and views
Will henceforth o'er thy shining rails be rolled.

Thus in the nation's progress lies thy part—
In mining, agriculture, science, art—
The task of serving well on thee is thrust;
And while the decades pass you still shall be
A link o'er waters flowing to the sea;
God keep you ever faithful to your trust.

Assured that our readers will welcome advice and suggestions on the all-important problem of health preservation and life extension, based on the latest advances in medical science, it will be the purpose of this section of the MAGAZINE to present brief and instructive articles each month by members of the medical staff of the Relief Department. We know our efforts will appeal to our readers. If only a few profit by the advice offered, our contribution to the sum of human happiness will be considerable, and our service of value. The addition of one, five or fifteen years to a life is well worth the task

Sore Throat

By Dr. U. W. Charlton

Medical Examiner, Wheeling, W. Va.

WHEN one suffers pain in the throat during the act of swallowing, the condition is popularly described as a "sore throat." This may be due to a multiplicity of conditions. It may result from a dryness of the throat, occasioned by excessive smoking; irritation by highly seasoned or spiced food; improper use of the voice; a so-called catarrhal pharyngitis, or general inflammation of the membrane or lining of the throat, usually resulting from mouth breathing associated with obstruction in the nose; and, some times, it may be but the local expression of an underlying constitutional disease, such as syphilis or tuberculosis. In the last instance, however, soreness of the throat is usually a symptom that develops after the disease has been recognized by more pronounced effects in other parts of the body.

The commonest types of sore throat, beginning as a rawness of the throat, and sometimes described as "a stick in the throat," quickly developing into a distinct pain on swallowing, are usually due to either tonsilitis or diphtheria. On account of the wide prevalence of these diseases, and the importance of their prompt and energetic care, we shall limit our consideration to them.

Tonsilitis is an inflammation of one or both tonsils, and in the simple form, where only the covering or mucous membrane of the tonsil is affected, it is known as "follicular tonsilitis." When the underlying structure or body of the tonsil is affected, and the inflammation involves the surrounding tissue, eventually resulting in abscess formation,

it is commonly called "quinsy." Either variety may be the result of exposure to cold and dampness, unhygienic surroundings, or carelessness about one's person or habits.

Send for a doctor!

When a sore throat starts suddenly and is accompanied by a chill or fever, difficult and painful swallowing, and a general feeling of fatigue, a physician should be summoned at once; the afflicted person should go to bed immediately in a properly ventilated room not occupied by anyone else, and be made as comfortable as possible until the arrival of the physician, who will render medical aid and give directions for the care of the patient.

The duration of tonsilitis is from two to ten days; it will be longer if complications arise, such as rheumatic symptoms of the muscles and joints, and occasionally symptoms of heart disease. Upon recovery, the tonsils should be examined and if found enlarged or diseased, as repeated attacks of tonsilitis invariably indicate, they should be removed.

The most severe and dangerous type of sore throat is "diphtheria." This is an inflammation of the throat which begins on one or both tonsils, and if not checked will spread to surrounding structures. The cause of diphtheria is a micro-organism known as the "Klebs-Loeffler bacillus," in all cases of sore throat where there is an exudate or film of grayish white substance on the surface of the tonsils and microscopical examination shows the presence of this germ, the case should be handled and treated as one of diphtheria.

Send for a doctor!

The gravity of this disease emphasizes the necessity for prompt recourse to a physician in all cases of sore throat; the death rate in diph-

theria is still rather high, but since the employment of anti-toxin, or serum treatment, there has been a gratifying and constant decrease. With a better understanding of its use, coupled with the effort made to diagnose the disease promptly, the death rate will decrease more rapidly.

Diphtheria may be communicated from one person to another, by convalescents, persons coming in actual contact with patients, and from books, toys or clothing upon which a patient has either sneezed, coughed or expectorated. Pets may carry the infection. These are all known as "diphtheria carriers."

There are many methods of ridding a carrier of diphtheria germs, namely: spraying the throat and nose with antiseptic solutions; sterilization by boiling of bed linen, clothes, dishes and tableware used by patients; and by burning or otherwise destroying toys, books, papers and such articles handled by them. The patient should remain isolated or kept from contact with other people until told otherwise by the attending physician, and it is well for all members of a household where there is a case of diphtheria to receive the immunizing or preventive dose of anti-toxin.

Symptoms of heart trouble and diphtheria-paralysis were frequently associated with diphtheria, but they have become very rare since the use of anti-toxin, and especially so when it is used in the beginning of the disease.

As diseased tonsils cause tonsilitis, they surely create a susceptibility to diphtheria; therefore, if upon the complete recovery of the patient, an examination shows a diseased condition, the tonsils should be removed.

Send for a doctor!

Appreciation of the possible seriousness of an attack of sore throat, especially if arising abruptly and accompanied by chill and fever, and the importance of prompt medical advice, are matters that should deeply concern us. Where so much can be accomplished by early recognition and prompt treatment as in tonsilitis and diphtheria, it behooves us to act intelligently. Diphtheria was formerly one of the most dreaded diseases. Today it is not so seriously regarded by the medical profession, for there is a sovereign remedy in diphtheria anti-toxin. Administered late in the disease it may be futile. While the treatment of tonsilitis is not so definite as that for diphtheria, the disease is frequently not so serious in itself, but early and vigorous treatment is just as necessary in order to prevent serious consequences, such as rheumatism, deafness and heart affections.

Overheard at the Medical Quiz

Prof. Sapio: Dr. Johnson, what causes typhoid fever?

Dr. Johnson: The entrance of typhoid germs into the system through drinking water, milk or food.

Prof. S.: Can contaminated water be recognized by appearance or taste?

Dr. J.: No, sir! Cloudy water with a bad taste may be harmless, while clear sparkling water may contain the typhoid germs.

Prof. S.: How then may we guard against the disease?

Dr. J.: By eating food that has been carefully selected, cleansed and prepared; and by drinking water of known purity or by boiling water of doubtful origin.

Prof. S.: Quite true! But an additional safeguard against the disease is obtained by inoculation with anti-typhoid serum.

"Am I My Brother's Keeper?" "We Are!" Respond the First Aid Men of the Baltimore and Ohio

By W. H. Ball

Assistant to the Superintendent, Relief Department

CAIN, with the cunning of the primitive man, asked this question to avert suspicion from himself as the murderer of his younger brother, Abel.

The answer, which has come down to us clearly and distinctly through the ages, affirmed an elementary duty imposed upon all mankind: we are the keeper and protector of our brother; we are responsible for the preservation and conservation of his life, health and happiness. This principle of mutual dependence and responsibility has served as a powerful agency in the evolution of the civilization and culture which we now enjoy. Without its beneficent influence, primitive man would have been vanquished by

the more powerful beasts, and the race would have become extinct.

As our civilization presses onward to its goal, we discover that we must be more and more watchful of the interests of each other, that true progress for individuals and nations springs from unremitting cooperation in the world's work.

With the growth of complex industrial organizations, in which the drone, the shirker, or the self-centered man has no legitimate place, machinery became necessary to produce and distribute the commodities required by the constantly increasing population; and with its advent, the risk of personal injury became more imminent. As the efficient operation of every industry requires dependable service by the individual workers, every effort is bent toward prevention of avoidable accidents, and measures are adopted for the immediate and skillful care of those injured in spite of the precautions for their safety. Behind every Safety Movement or First Aid Service there lies, however, the humane principle that we are, indeed, our brother's keeper.

The Relief Department of the Baltimore and Ohio Railroad has been a pioneer in the field of First Aid Instruction. It became obvious quite early that many minor injuries became grave surgical problems through misdirected efforts by willing, though unqualified, bystanders and fellow workmen. Sometimes lives were lost when they might have been saved had there been present some person who could have rendered intelligent First Aid until a surgeon was found. Upon recognition of these conditions, there immediately followed an organized and methodical plan of First Aid Instruction and Service. Equipment and material were placed at points convenient for emergency use, and employees everywhere have been organized into First Aid teams, the members of which are carefully instructed and regularly supervised by the medical corps of the Relief Department. Prompt and efficient aid is now possible, where previously there were excitement, unhygienic practices, and frequently fatal results due to ignorance of what should be done.

Medical and Surgical Director Dr. E. V. Milholland has just issued a condensed First Aid Manual, which contains brief but explicit instructions for the proper handling of

the various emergencies arising in the daily operations of a railroad or any other industry. Primarily designed to be placed in the Company's Emergency Cases without folding, it is likewise of such size and shape as to be folded and carried in the coat or vest pocket. An ample supply of the

Manual has been printed for free distribution, and it is planned to furnish a copy to every employe. Application for them should be made to any Medical Examiner, Division Superintendent, the Superintendent Relief Department, or to the Medical and Surgical Director at Baltimore, Md.

M. W. Jones Wins Another Prize

Charleston Division Magazine Correspondent Rewarded
for Fine Work During 1920

DURING the month of December, the editor of the MAGAZINE received the following tribute to M. W. Jones, the MAGAZINE correspondent for the Charleston Division, from the employes of that division.

Many employes have asked why the Charleston Division has been making such a fine showing in the MAGAZINE during the past few months. The answer is at the beginning of our divisional write up each month—M. W. Jones, our most affable correspondent.

You have read articles concerning almost everyone on the division from the superintendent down, but never a word about Jones himself. We cannot possibly allow him to hide his light under a bushel any longer, so here goes:

Mr. Jones came with us in November, 1919, and has made his presence felt in more than one way since. Of a likeable nature, he has made many friends and is still making them. His railroad experience is rather varied, covering over 10 years in different capacities such as: secretary to vice-president, secretary to president, chief train dispatcher, trainmaster, and others, too numerous to mention with the Quaque and Quito Railway in South America.

Mr. Jones was born in England, September 19, 1879, and has traveled extensively, having made four or five trips across the Atlantic visiting England, Scotland, France and a number of other European countries. He has also been over the larger part of Canada and the entire United States, and having been so long located in South America, has visited a number of countries in the northern part of that country. He speaks Spanish fluently.

Everything that interests his division and the Baltimore and Ohio interests him: Freight Claim Prevention; Safety; Fuel Performance, etc., are always on his mind. His enthusiasm is great and he has the faculty of passing it on to his associates.

Since the receipt of this tribute, a photograph of Mr. Jones has been received and now all our readers can see what the man who has been adjudged the best MAGAZINE correspondent for 1920, looks like. Mr. Jones' work on the MAGAZINE has

attracted attention all over the System, his monthly notes being as near 100 per cent. as they could be.

In addition to his regular work as correspondent, Mr. Jones has done work for the MAGAZINE which has not yet been seen. Several months ago, at the request of the editor, he

M. W. Jones

submitted a comprehensive and interesting article on Weston, the Charleston Division headquarters, with a number of photographs. This article has not yet been used solely because of lack of space.

He is, as will be generally known from this issue of the MAGAZINE, the prize winner in the No-Accident Campaign Essay Contest, Eastern Lines. Other of his good works appear in the MAGAZINE without credit from time to time and some of the best suggestions we have seen come from him.

What an influence for good on his division he is may be judged from the above letter of his fellow employes. Enough to say here that it is significant that the division with the best representation in the MAGAZINE is also the division which won the first place on the System in the No-Accident Campaign and stands high among the divisions in other respects.

Mr. Jones' work as correspondent

was brought to the attention of President Willard, who decided that a suitable reward be given him. A set of books was finally determined upon and Mr. Jones is now the possessor of a fine set of Harvard Classics, 50 volumes, which we are sure will always be a source of great pleasure and interest to him and his family. He wrote us about the prize viz.:

Your letter about the Harvard Classics was certainly a happy surprise. I had no idea of any such thing, and you may be sure I was not working with any view of a reward. I appreciate most highly the Company's kindness, and it will give me much pleasure to receive the books referred to. I have long wanted the Harvard Classics, but never felt I could quite afford them.

This reward is the first that has been given to any MAGAZINE correspondent since the MAGAZINE was established. Mr. Jones won it through his unusually high quality work and the editor can only say that he hopes that the precedent which Mr. Jones has established may be followed in future years.

Just one more thing. There are so many correspondents who have done such splendid work, many of them ever since the MAGAZINE was started, that we cannot conclude this article without paying a tribute to them. The competition is wide open for 1921, and, in fairness, we will have to make Mr. Jones ineligible for the prize this year. And we are confident that although he is barred from the competition, his work for the MAGAZINE will be better than ever.

Pension Meant Much to this Veteran Employe*

MR. W. J. DUDLEY,
Superintendent Relief Department,
The Baltimore and Ohio Railroad
Company, Baltimore, Md.

Dear Sir—I wish to thank The Baltimore and Ohio Railroad Company for their kind care of my father when he was no longer able to engage in active duty. He appreciated, and we all did, that he was provided for as long as he might live, after having spent most of his life in the Company's service. Again thanking you, I am,

Very truly yours,
MAUDE J. COX.

It Can Be Done**

Please Help Save

Though Written in Weston, this Bulletin Goes for the Whole System

BALTIMORE AND OHIO RAILROAD—CHARLESTON DIVISION

Bulletin No. 2, Weston, W. Va., January 1, 1921

REMEMBER THE CHARLESTON DIVISION SLOGAN— THINK

You are all aware of the present serious falling off in business, of that which occurred during the past month, and therefore of the consequent necessity for rigid economy in every direction. There are many ways in which money can be saved for the Company, without detriment to its interests, and I ask your special and *necessary* and whole-hearted support in securing the results desired. The success of the Baltimore and Ohio means the success of each one of us individually, and I feel that I can rely on every employe on the Charleston Division to do his full share.

Your attention is called to the following items, which should be given special attention.

SAVE ELECTRICITY AND GAS—Do not leave lights burning when they are not needed. Look about you and see how many cases like this you can save.

SAVE TELEPHONE BILLS—You have the telegraph and mail service. When the matter is not urgent, use them. The telephone bills on the Charleston Division amount to approximately \$300.00 per month. This can be cut in half without difficulty. When you are compelled to use the telephone, BE BRIEF. Each minute costs money. It has become a habit to use the telephone. THINK before you do so, whether you cannot just as well use the wire or the mail.

PREVENT CLAIMS—The amount of money which is spent each year in the payment of claims is appalling. During the first 11 months of 1920 the Baltimore and Ohio paid over three and one-half million dollars in settlement of claims, most of which was avoidable. THINK what good could have been done with this amount of money put into new equipment, or in maintenance. Let us make up our minds to cut the claims in half, at least, for 1921. WE CAN DO IT.

SAVE FUEL—There is no surer way to make money for our Company than by saving fuel. You all know what coal costs today. Every time the pop is open, it costs money. Every time you put the blower on, more money goes up in smoke. Defective locomotives burn more coal than good ones. Every one on the division can do his share to save money in coal. Avoid its misuse and waste.

DON'T WASTE STATIONERY—Paper is costly. If care is used, a large sum of money can be saved in our stationery bills every year. Avoid waste in postage stamps.

WATCH ALL SUPPLIES—Don't handle them carelessly; don't leave tools around where they can be stolen. Handle them as if they were your own.

In conclusion, then, if each one of us will do his full duty to the Company, watch its interests as if they were his own, as they really are, a good showing can be made for 1921. Let the Charleston Division be FIRST in this respect, as it has been in all others, and above all:

BE SAFE—Avoid accidents. Wrecks and personal injuries cost money, cause untold suffering, and CAN BE avoided.

BE COURTEOUS AND LOYAL—and the results will speak for themselves.

Finally, apply the slogan, at all times, to all subjects, "THINK ABOUT IT," be governed accordingly, then, with the rules and instructions for our guidance, we will make Charleston Division another name for EFFICIENCY.

W. TRAPNELL, *Superintendent.*

Archy Supplies a Reason

as i was
crawling through
a shoc store the
other day i
heard two pair of shoes
talking to each other
well says the
first pair
you needn't feel
so smart
you have been
marked down from
twenty dollars to sixteen
while i have been marked
down from twenty-one
dollars to
eighteen dollars
well said the
second pair i
make no claims to
superiority but
i will say i think
we are both doing
damned well for
five dollar shoes

Telling It Straight

Said Dan McGann to a foreign man who worked at the self-same bench:

"Let me tell you this," and for emphasis he flourished a Stilson wrench, "Don't talk to me of this bourgeoisie; don't open your mouth to speak

Of your Socialists or your Anarchists; don't mention the Bolsheveek, For I've had enough of this foreign stuff; I'm as sick as a man can be

Of the speech of hate, and I'm telling you straight that this is the land for me!

"If you want to brag, just take that flag, an' boast of its field of blue, An' praise the dead an' the blood they shed for the peace of the likes o' you.

I'll hear no more," and he waved once more his wrench in a forceful way,

"O' the cunning creed o' some Russian breed. I stand for the U. S. A.!

I'm done with your fads, and your wild-eyed lads; don't flourish your flag o' red

Where I can see, or at night there'll be tall candles around your bed.

"So tip your hat to a flag like that! Thank God for its stripes an' stars!

Thank God you're here, where the roads are clear, away from your kings and czars.

I can't just say what I feel today, for I'm not a talkin' man,

But first an' last I am standin' fast for all that's American.

So don't you speak of the Bolsheveek; it's sick of that stuff I am,

One God, one flag, is the creed I brag! I'm boostin' for Uncle Sam!"—*Exchange.*

Safety Section

Every Division Will See the New Safety Movie, "Bulletin 70," during January and February

AN ENTERTAINMENT and Safety Rally will be held at one or two places on each division during January and February and each and every employe, with his family and relatives, will want to attend.

The Safety Department of the Baltimore and Ohio has obtained a new motion picture, "Bulletin 70," and it is the most realistic and interesting picture yet obtained for the instruction and entertainment of our employes. To miss it would be to forego one of the really interesting events of the year.

The Safety Department wants you to attend. It wants your wife, your children, your mother, your father, your sweetheart to witness this film, which was made on a railroad for

railroad people and presents railroad daily life and hazards in a most realistic manner. There are three reels of vital, gripping, inspiring pictures and a pretty story runs through it that will make your heart throb.

Preceding the picture there will be given at each place the picture is shown a musical entertainment that likewise will be worth while. Plans have been made to have five or six numbers on the program. There will be vocal and instrumental solos by capable singers and players. There will be an act of magic and legerdemain that will surprise you and furnish plenty of amusement. In some instances there will be male quartets. Likewise some of the divisions are arranging boxing bouts of three rounds.

ray Studios

A happy home made miserable through the carelessness of a fellow worker—Bulletin 70

In each city or town where the entertainment will be given a large and commodious hall has been secured. You will be able to learn the location of these places from posters that will be distributed throughout your division.

J. T. Broderick, superintendent of the Safety Department, will make an address on Safety at each meeting. There will be singing by the audience of a few popular songs.

Following the musical program and the showing of the pictures, there will be a dance. A good orchestra has been engaged in each city and for two hours both young and old can "trip the light fantastic." There will be quadrilles as well as fox trots, one-steps, two-steps and waltzes.

It is expected that the evening will be one long remembered by those who attend. Admission is free to the entertainment, the showing of the picture and the dance.

"Precaution"

By W. A. Mitchell

Safety Agent, West Virginia District

WHENEVER we see a man with an arm off or with an eye missing, caused by his failure to follow the rules and instructions for the government of employes working in and around shops, terminals, etc., on the Railroad, we then realize how important it is that the Safety rules be lived up to. It signifies a waste of man power.

The Safety rules are reasonable and understandable. Sympathy for a

Bray Studios

The human chicken who won't get out of the way in time—Bulletin 70

victim of an accident does not avail much in aiding him to avoid dangerous practices. The victim himself goes through life, probably, a cripple, and he is a loss to himself, his family and the community.

Every employe should familiarize himself with the physical conditions in and around shops, yards, terminals, freight houses, etc. If he sees an unsafe appliance it is his duty towards himself, his fellow workmen and his employer to report the fact to the proper officials. He is not doing his full duty unless he takes this step. It is dangerous in the extreme for an employe to neglect this and later to "take chances." Sometimes we get by on a "chance," but more frequently we observe that he who "takes the chance" loses an arm, or a leg, or an eye, or is a cripple in other ways.

"Safety" should be the slogan of all Baltimore and Ohio employes not only at work, but also when they are at home. Begin at home to think Safety, talk Safety and act Safety; then we will accomplish our tasks on the Railroad with Safety and will practically eliminate injuries and fatalities.

Safety is the first step in the family welfare. It is our duty to preach it in our homes as well as in our shops. If we would think while at the work bench of the little tots who said, "Good-by, papa," when we left the fireside in the morning, and of the wife, who added, "Be careful and don't get hurt today," Safety would be kept fresh in our minds and would ever be a reminder that there are others depending on our careful progress. Above all, remember that it never has paid anyone to grow careless.

Employes should not fail to wear goggles when doing heavy chipping or cutting. And in performing this work they should adhere strictly to the Safety rules which the Company has issued for their benefit. They should know that all conditions about them are safe before undertaking their daily tasks. If they see any workmen indulging in unsafe practices they should call attention to the facts and warn the offender that he not only is endangering his own well-being, but also that of yourself and other men. This, in many cases, will prevent serious injury. Your life is worth what you make it; make it safe and you make it sure.

Picked Up Here and There

By "Ernie" Baugh
Of the Dining Car Department

Harry Smiley, our genial and popular Stationmaster at Chicago, was holding back some immigrants that were unloading from No. 15, letting the first class passengers out first, and was asked by a portly passenger "What's going on here?" He answered "I am holding back the League of Nations." As he looked up he discovered that he was talking to the Honorable William Howard Taft.

Seymour Will Continue Its Score Board—May it Keep the Record Clean!

By P. T. Horan
General Foreman

The accompanying photograph is of the score board that was kept of Seymour roundhouse and car repair track during the No-Accident Campaign, October 18 to November 16. Its appearance proves that the men took an active part in preventing accidents to themselves and their fellow workmen.

I feel proud of the splendid showing made in my department and am going to continue the score board. We are all very much interested in Safety, and I believe this will be an incentive to the men in keeping down accidents.

A One Hundred Per Cent. Brakeman

In the early days on the Lake Shore and Michigan Southern Railroad, now a part of the great New York Central System, one of the best operated railroads in the world, passenger trains stopped at Elkhart, Indiana, for meals. One of the railroad's brakemen on these trains got quite a local reputation for the way in which he called the station:

"Elkhart! Twenty minutes for hash."

Then he would get off the train and call up the platform to the engineer:

"Skin 'er back, Charlie, over the switch."

This story was vividly recalled to my mind the other day when I met a Baltimore and Ohio brakeman of the Twentieth Century type. It was going through the tunnel from Mount Royal Station to Camden Station in Baltimore that I first noticed him as he stood in the forward end of the coach and announced so clearly that the passengers could catch every word he said:

"The next station stop is Camden Station, the last stop in Baltimore; change for Annapolis, all points on Chesapeake Bay, etc., etc."

It was such a clean-cut performance that I became interested, made some inquiries about him and learned that he is rated 100 per cent. by his associates and superiors.

He is eternally on the job to make our passengers comfortable. If he finds a coach poorly ventilated, he opens ventilators in the front and rear on the side opposite that from which the wind is blowing. If he finds that the temperature has a tendency to go above 70 degrees, he reduces the steam, and if it goes down below 60, he increases it.

If seats are turned in the wrong direction after passengers have left the train, he turns them so that they face the engine. If there is litter of any description on the seats, he removes it, and frequently he goes through the coach and adjusts the curtains to the level of the upper sash of the windows, where this does not interfere with the individual preference of a passenger, for he knows that when the curtains are at a uniform height it gives the coach a trim and orderly appearance, inside and out.

Where windows are left open by passengers who have left the train, he closes them, lest resulting draft should cause discomfort to other passengers.

He has read the funny stories about the unintelligible way some trainmen announce stations; in fact, he knows them from experience. Often he has listened to the rapid-fire barrage of the typical lunch room girl in announcing the bill of fare. So he is particularly careful

when announcing stations to be sure that the passengers understand him. Instead of calling the station name first, which is the wrong way, because the passengers often miss the name when it is the first word of the announcement, he says: "The next station stop is Brunswick (or Baltimore or whatever it may be)," by his few preliminary words preparing his passengers for the station name.

When the train is in motion and the details of his job are properly attended to, he takes his seat in the end of the car nearest the emergency valve, so that in an emergency he can reach it quickly.

One other thing about this 100 per cent. brakeman. His work is a pleasure to him. From experience he knows that time passes most quickly when his mind is occupied, when he is busy looking after the comfort and convenience of passengers. Hence he gives passengers the impression that he is a pleasant and contented fellow and through that they get this same impression, an invaluable one, of the Railroad.

The future holds good things in store for this man.

Is This Asking Too Much?

Talking the other day to a fellow employe about the interest some men show in their work, reference was made to a certain engine crew. Their names were on the Roll of Honor recently for making some minor repairs to a locomotive which had broken down on line of road, and thus saving a bad delay to their train and consequent unnecessary expense.

"Examples of this kind were common during the war," remarked my companion. "Out on the mountain divisions during the heavy congestion of the extreme winter of 1917-18, we had a number of instances of engineers jumping in and filling the places of firemen, when necessity demanded, to get our trains over the road."

War times are over now, but we ought always to be engaged in a fight for greater efficiency, greater economy, even if in an emergency we have to jump in and give a lift on the other fellow's job.

The Magazine a Clearing House of Information

The MAGAZINE office gets many interesting inquiries from employes. For instance:

"What is the meaning of locomotive 'expression'?"

"Please send me information in regard to cranes."

"In 1914 there was an employe by the name of John Doe working at Cumberland. Can you tell me whether he is still an employe there?"

"When was the first train run over the Baltimore and Ohio Railroad?"

These and other similar questions reach us and we do our best to answer them; not often from our own fund of information, usually by inquiry of other departments.

If you want some information about the Railroad and do not know where to get it, send your request to the MAGAZINE. We will do our part to help you.

A Privilege to Belong to the Baltimore and Ohio Family

Recently the writer got a letter from the assistant cashier of one of our freight stations. It was concluded by the words, "We esteem it a great privilege to belong to the Baltimore and Ohio family."

He was speaking of his own family—his wife, two children and himself—one of the most interesting families, I suppose, on the Railroad.

They have a small farm not far from the freight station and, notwithstanding the fact that the two children are at school and that both the mother and father work for the Railroad, they find time to save money and get recreation in their garden and with their chickens.

They are the most thrifty people imaginable, not stingy, for they spend a good deal of time and not a little money on Sundays and holidays in visiting as a family, places of interest, historical and otherwise, near their home. New England, from the green hills of Vermont to the sandy shores of Nantucket, was covered last summer in their ten day holiday. Not an inexpensive vacation, even when the free transportation, for which they are grateful to the Company, is considered.

Intelligent, hard-working, liberal-minded, unselfish, loyal employes, these. They are not the only ones who could truly write, "We esteem it a great privilege to belong to the Baltimore and Ohio family."

Start A Checking Account

Dozens of employes are ordering through the MAGAZINE office the railroad books advertised in the MAGAZINE. For every check of an individual which we receive in payment for these books, there come three or four post office money orders.

It seems unfortunate that railroad employes, making larger wages than ever before, do not make more general use of banking facilities in the way of checking accounts. There are many reasons why they should:

To have a checking account in a bank gives a man a certain business standing otherwise unobtainable.

It is the safest way to handle money.

It is a great convenience and economy; a man who pays a premium for the use of post office money orders, if he sends many of them, will soon realize this.

Cancelled checks are legal receipts for bills paid, so much so in fact that many business houses do not even bother to send receipted bills when they have been paid by check.

One can keep a much more accurate and systematic record of his finances through a checking account than by carrying cash in his pocket and paying bills in that way or by money order.

Readers will find banks almost uniformly willing to open small checking accounts. There are undoubtedly many men among the railroad workers of America who, having but recently started small checking accounts, will eventually become important and valued depositors of banks because of their large balances.

Go to one of your local banks and talk the situation over with its officers. You will be courteously received, because bank officials, even more than other people, realize that the desire on the part of a man to start a checking account is indicative of his determination to adopt up-to-date business methods in handling his own finances and that he is therefore a thrifty and substantial member of the community.

The Penalty of Ignorance

Coming in on a local from Washington to Baltimore I was seated in the smoker. A man, who, from his general appearance, I judged was poor, got on the train at one of the small stations. With him was a rosy-cheeked boy, dressed in clothes that were the worse for wear and also for dirt. Yet he was an attractive little fellow but for one thing—big, blue eyes that should have been his most attractive feature were, instead, almost repellent—swollen, running, discolored, dirty, one of them with a drooping lid. The man showed a disposition to talk and in the course of conversation I remarked that the little fellow, who was restless and whining, had a bad cold in his eyes.

"O, that ain't a cold; he's been that way since he was born."

I asked why he did not take him to a hospital. A mute shake of the head was the only answer.

"What does the doctor say about him?"

Again the man shook his head.

I then asked him point blank if a doctor had examined the boy's eyes.

"Nope," was the laconic reply, "but the man in the drugstore says he can't do nothing for him."

Chances are that the attention of a competent oculist, or perhaps a few visits to the eye clinic at a hospital, would change the irritated and unsightly eyes of the little fellow into the beautiful clear blue orbs which his Maker intended he should have.

Such is the penalty of ignorance, even in this day, when free medical attention can be had, when needed, almost for the asking.

A Tell-Tale Bulletin Board

Sunday night in one of the largest and most important union stations in the country: In the concourse a three-panel blackboard showing incoming trains, Baltimore and Ohio trains on the left, those of one of its principal competitors in the centre, and those of other railroads on the right.

Two of the Baltimore and Ohio trains were from the West and two from the East, all through trains, and after the number of each were the initials "O. T.," so pleasing alike to railroad employes and railroad passengers.

In the next panel, that of our competitor, there was a different story: five through trains, but four of them late, from fifteen minutes to one hour and thirty-five minutes, the latest a crack train, one of the best-known in the whole country.

I would like to have gotten a picture of the blackboard. Lacking that I hope you can see it with the same pleasure I did. This is not an uncommon occurrence. Baltimore and Ohio passenger trains are making good "O. T." records. Let us remember that. Let us tell our friends about it and boost our passenger business.

Per Cent. It Can
Be Done**

¶ These men are making "Baltimore and Ohio" synonymous with railroad courtesy—Join their growing ranks!

"High Up on the Roll of Greatness," says Bishop Bell of Conductor Mullin

UNITED BRETHREN CHURCH
EASTERN AREA
BISHOP'S RESIDENCE, 1509 STATE STREET
HARRISBURG, PA.

November 12, 1920.

MR. J. F. KEEGAN, General Superintendent,
Pennsylvania District,
Baltimore and Ohio Railroad,
Pittsburgh, Pa.

My Dear Sir—The older I grow the fonder I grow of commending the good I discover in folks everywhere. Last Monday night I lectured in Connellsville, Pa., and entertained on your No. 10 there at 12.25 a. m. I could find no seat and so went to the rear of the last day coach and set my heavy case on end and made that my seat. When the conductor came to me he said, seeing my ticket was for Martinsburg, that my seat would prove wearisome and he would see if he could get me a seat as he looked over the car going back. Very soon he summoned me to the center of the car and asked me to be seated by another gentleman whom he had aroused to share with me. In the meantime he had passed me to the rear vestibule and grabbed my large grip and *himself* over my protest settled it in a reversed seat

space. This unusual kindness and service deeply moved me; but listen.

As we neared Cumberland this same conductor, ready for his leave taking, had discovered a little young mother with a tired babe wedged in with four people near the rear toilet, and here he came up the aisle helping the weary little mother until just opposite me he halted and said to two gentlemen who were going to get off at Cumberland, "Gentlemen, you are about to leave the car and I am sure will be pleased to give your seat now to this young mother with her small child." The two men arose, touched by his gallantry, and cheerfully made way while the worn mother and child sat down smiling and expressing thanks. Soon after we had left Cumberland the mother and babe had improvised a resting posture and they were happy all through the long night. I did little else myself than rejoice over the goodness and thoughtfulness of your great conductor. If he is greatest who serves most this man is high up on the roll of greatness.

Sincerely yours,
(Signed) WILLIAM M. BELL,
Bishop.

Dining Car Steward Schluderberg Does a Good Turn and Is Commended For It

SUPERINTENDENT BAUGH of the Dining Car Department tells us the interesting story of one of our dining car stewards who rendered a service to the son of the general superintendent of another railroad and who considered the act only as a part of the day's work. Mr. Baugh says:

"Henry Schluderberg, dining car steward, on No. 5, found a young boy whose mother had gotten off the train in Washington and for some reason or other had been left. He received a wire message to put the boy off at Martinsburg and to put him on No. 7; the boy had no money, so Mr. Schluderberg fed him and gave him a dollar for his supper while waiting for No. 7. Mr. Schluderberg casually mentioned this case, and when I wanted to congratulate him he seemed to think that there was nothing coming to him and that it was all in line with the Baltimore and Ohio policy."

When Mr. Baugh asked for a memorandum of the incident, Mr. Schluderberg sent him this:

October 30, 1920.
E. V. BAUGH,
Superintendent Dining Cars.

Dear Sir:

In reference to our conversation of October 25, as to the attached letter; I treated it in the manner that I did because I thought it my duty. I also pictured this in my mind: Suppose this had been one of my daughters

who had been left on a train alone without one cent in her pocket?

I always like to live up to the Golden Rule: "Do unto others as you would they should unto you."

Yours truly,
(Signed) H. SCHLUDERBERG.

The letter to which Steward Schluderberg refers was as follows:

THE CHICAGO & ALTON RAILROAD CO.
OPERATING DEPARTMENT

A. P. TITUS,
GENERAL MANAGER

TRANSPORTATION BUILDING
CHICAGO, ILL.

October 13, 1920.

Mr. H. SCHLUDERBERG,
Steward, Dining Car 1026, train No. 5,
Care E. V. Baugh, Superintendent Dining
Cars, Baltimore and Ohio Railroad, Baltimore, Md.

Dear Sir:

My son Jack has advised me of the very kind and courteous treatment you accorded him, as well as the financial assistance you rendered him on the 3d inst., when he was left alone on your train No. 5, account of his mother missing the train at Washington.

The amount of money you loaned Jack I gave to the Pullman conductor to return to you. I presume you have received it before this time.

I thank you very much indeed for your kindness, and trust that I may at some time in the future have an opportunity to reciprocate.

Yours truly,
(Signed) W. H. PENRITH,
General Superintendent.

Conductor Eckman's Example of Service

ON SEPTEMBER 23, Mrs. Dick, wife of Dr. J. McFadden Dick, Salisbury, Md., boarded No. 22 at Washington, D. C. She had had only 15 minutes in which to make the connection from the Southern Railroad, and in purchasing her ticket at Washington for Wilmington, was given a ticket for Winchester, Va. She did not notice the error until she was informed of it by Conductor H. Eckman, who told her that if she would let him have the ticket he would exchange it on his return trip to Washington, take out the fare, and return the balance in change to her. She agreed, and the money was forwarded to her later. In her letter Mrs. Dick thanked Conductor Eckman and stated that she was telling her friends of the fine courtesy she had received.

¶ I have never seen a man who could do real work except under the stimulus of encouragement and enthusiasm and the approval of the people for whom he is working

Charles M. Schwab

Edward V. Smith John Wiley Deneen

Edward V. Smith

SHORTLY after 3 o'clock on the afternoon of December 7, the telegraph and telephone lines carried to thousands of Baltimore and Ohio Railroad officers and employees, the sad news of the death of E. V. Smith, superintendent of the Wheeling Division. His death was caused by acute meningitis, with which he was afflicted less than two weeks before.

Edward V. Smith was born in Meadville, Pa., on March 29, 1873. After a high school education, he was graduated from Allegheny College. On leaving school, he entered the service of the Erie Railroad, in the Engineering Department. Four years later he came to the Baltimore and Ohio as supervisor. In 1916 he was transferred to the Transportation Department as assistant superintendent of the New Castle Division. In 1917, Mr. Smith went to the Wheeling Division as superintendent. He was well known and loved by his employees and fellow workers. Mr. Smith was married in 1892 to Miss Rena Stuckrad, of Kent, Ohio. Their only child, Martha Lee, was born in 1905.

The funeral services were held at his residence, 2227 Eoff Street, Wheeling. At 7 o'clock on Friday morning, the funeral party left Wheeling via the W. & L. E. for Kent, Ohio, where the interment took place. Among those who went from Wheeling were 75 Baltimore and Ohio employees; General Superintendent J. M. Scott and Acting Division Superintendent Creed Malone were in charge.

Superintendents from other divisions who attended the funeral services were: J. W. Root, Ohio River Division; W. Trapnell,

Charleston Division; H. B. Green, Cleveland Division; J. D. Beltz, Pittsburgh Division; H. K. Cruse, Newark Division; D. F. Stevens, New Castle Division. Other officers were: T. W. Martin, terminal supervisor, Pittsburgh; C. W. Gorsuch, supervisor of transportation, Pittsburgh; H. H. Harsh, division engineer, Pittsburgh.

The active pallbearers were: J. W. Bull, road foreman of engines; A. H. Warner, division engineer; F. R. Davis, trainmaster; J. E. Rickey, dispatcher; C. E. McGann, master mechanic; M. J. Walsh, road foreman of engines; G. Gatewood, road foreman of engines, and M. E. Cartwright.

The honorary pallbearers were J. W. Root, W. Trapnell, U. B. Williams, J. B. Bowden, district master mechanic; T. B. Burgess, fuel supervisor; G. P. Fitzgerald, chief clerk to superintendent; F. N. Fuqua, and W. J. Duffy.

John Wiley Deneen

JOHN WILEY DENEEN, former superintendent of the Monongah and Cumberland Divisions, died at the Deneen home, Cumberland, on Tuesday, December 14, from anaemia.

On December 8, Mr. Deneen was brought home from Denver, and on the following Friday, Dr. Stengel, an eminent blood specialist of Philadelphia, took him in charge, but held out no hope for his recovery.

John W. Deneen was one of Cumberland's most promising men. He was the son of Mr. and Mrs. John B. Deneen, born and reared in Cumberland and educated in the public schools of the city. He entered the service of the Baltimore and Ohio Railroad Telegraph Department when but 17 years old, and rapidly rose to the position of superintendent of the Cumberland Division, from which position he was transferred to the general staff, with headquarters in Baltimore, on September 1, 1920, to be given an official position with the Railroad upon his recovery. In the Telegraph Department he made progress rapidly, and in successive stages was promoted as follows: to train dispatcher, chief train dispatcher, trainmaster and assistant superintendent, in the latter two positions under former Division Superintendent M. H. Cahill. From the position of assistant superintendent he went to the Coal and Coke Railway, then a subsidiary of the Baltimore and Ohio, as superintendent, with headquarters at Gasaway. From that point he was promoted to the superintendency of the Monongah Division and stationed at Grafton, W. Va.,

John Wiley Deneen

coming to the Cumberland Division as superintendent on June 25, 1918, succeeding Superintendent G. D. Brooke.

The funeral services were held at his home at 3 p. m. on December 16; and his burial took place at Rose Hill Cemetery. The active pallbearers were: E. P. Welshonce and T. K. Faherty, assistant superintendents; E. C. Groves and M. A. Carney, trainmasters; P. Petri, division engineer; G. A. McGinn, chief clerk, and G. R. Bramble, relief agent.

The honorary pallbearers were: J. F. Keegan, general superintendent; T. J. Brady, J. D. Beltz, C. W. VanHorn, B. Z. Holverstott, W. Trapnell, J. W. Root, superintendents; C. A. Mewshaw, trainmaster, Baltimore; G. K. Galloway, general master mechanic; W. W. Calder, district master car builder and S. B. Wolfe.

A Good Salesman

DINING Car Steward W. H. Elkins, Car 1022, No. 10, "Florida Special," from Martinsburg on November 17 last, had as guests Mr. and Mrs. C. H. Horn of Akron, Ohio.

Mr. Horn had made it a habit for years to have no breakfast but a cup of coffee. On this occasion Mrs. Horn had ordered buckwheat cakes and country sausage and when they were served they looked so good to Mr. Horn that he was wavering on his resolution.

Here Steward Elkins displayed his diplomacy and salesmanship: "I'll fix you an order and if you don't eat it, I'll pay for it." The bargain was struck, and, to use Steward Elkins' words, Mr. Horn "cleaned up."

I am reporting this case because I have had the pleasure of eating Mr. Elkins' "Baltimore and Ohio Special" meals and I know how Mr. Horn enjoyed his breakfast.

I will venture to state that no railroad in the United States serves as good a meal for \$1.25 as does our own. **AN EMPLOYEE.**

Edward V. Smith

An Open Letter Sent to the Presidents of All Chapters of Baltimore and Ohio Veterans

BALTIMORE AND OHIO MAGAZINE
MOUNT ROYAL STATION
BALTIMORE, MD.

January 17, 1921.

Dear Mr. President:

If you yourself were not present at the reception tendered the delegates of the Grand Lodge by the Baltimore Chapter of Veterans on the night of December 13, you have read an account of the meeting in the December issue of the MAGAZINE and recall the fact that President Willard addressed the Veterans on that occasion.

A part of his address was devoted to a forecast of business conditions, and the general decline in the volume of business which he then predicted is now self-evident. The railroad cannot, of course, create business; *its* volume of traffic is only a very accurate thermometer of the volume of business being done. On the other hand, our employes can bring to our Railroad a larger share of the business available than we are now getting. Hence, in the hope of diminishing the adverse effect which the present decrease in business has had upon the prosperity of the Baltimore and Ohio and its employes (and it is unnecessary to add that the interests of the Company and its employes are mutual), President Willard made a strong plea to the Veterans that they use every effort to bring business to the Railroad, each one becoming an active solicitor, telling his friends about the facilities of the Baltimore and Ohio and the desire of its employes to give the best possible service.

In the motion which followed his address, he was thanked for his presence at the meeting and for his talk, and by acclamation given a unanimous vote of support by the representatives of all the lodges present, to the end that they would do their best to carry out his wishes in this respect.

It is at President Willard's suggestion, therefore, that I write to ask you if you will not read this letter at your next meeting, and see if some systematic movement cannot be made among your members to secure additional business for the Railroad.

By their long years of service and their high standing in their respective communities, the Veterans of the Baltimore and Ohio have an influence in their social and business circles which can be used properly and effectively to this end. Even a mere suggestion to a friend that he give our passenger service a trial not only makes an enthusiastic patron of our passenger service but often, directly or indirectly, influences freight traffic to our lines.

However, at this time something more than a mere suggestion is needed to bring about the desired result. As President Willard pointed out in his talk at the Baltimore meeting, much of the business which the Baltimore and Ohio had built up through long years of service, was diverted to our northern competitors during the period of the War in order that we might be able to handle a greater amount of materials needed by our armies; but now that the war materials have ceased to move, it is most important to all of us that we should get back to the Baltimore and Ohio rails business which formerly moved this way. To accomplish this in the shortest possible time will require the active cooperation of all who are interested in the matter, which means all Baltimore and Ohio employes, Veterans or otherwise.

As President Willard also pointed out in his Baltimore address, there are two ways by which the business of the Company may be increased, one by solicitation or by the getting of new business; the other way, which is quite as effective, is by giving good service at all times so that people who ship once or ride once over the Baltimore and Ohio, will not only want to ship or ride again, but will also advise their friends to do so.

We are most anxious that this letter be given the widest publicity possible among the members of your chapter and whatever you can do toward that end, either through personal contact or in open meeting, will be appreciated. We will also be glad to have you acknowledge this letter and keep us in touch with any developments which may come as a result thereof.

When any of your members have any suggestions to offer as to how new business can be secured, please have copies of them sent to me so that they can be examined for use in the MAGAZINE. And when any of your members get business for the Railroad, we shall also be glad to pass this word along in the MAGAZINE, telling how, when and where the business was secured, so that credit may be given where credit is due and other members of your strong organization inspired to similar activities.

Very sincerely,

(Signed) ROBERT M. VAN SANT,
Editor.

Veterans Enjoy Annual Banquet at Newark, Ohio

THE annual banquet of our Veterans' Association of the Newark Division, held in the dining room of the First Baptist Church, Newark, Ohio, on Thursday evening, December 16, was a grand success. Veterans, their wives and daughters and guests, to the number of 320, sat down to an excellent dinner served by the ladies of the First Baptist Church. The invocation was given by the Reverend Frazier of that church.

D. F. Moriarity, president of the Newark Chapter, acted as toastmaster and showed himself to be at home in that capacity. Out of town guests of the Association included the following: Grand President and Mrs. Sturmer; Grand Vice-President and Mrs. J. M. Garvey; President and Mrs. G. A. Bowers, of the Baltimore Chapter, and W. W. Wood, chief of the Welfare Department.

The dinner was thoroughly enjoyed by all, the cuisine being of a high order. The ladies received many compliments for the excellent manner in which it was served. After all had been served and the dessert finished, the president of the association, D. H. Moriarity, called the banqueters to order and in a brief statement outlined the policies of the association and then introduced W. W. Wood, chief of the Welfare Department, Baltimore, Md. Mr. Wood touched on a number of topics relating to railroad efficiency and paid the Veterans several splendid compliments for the services which they rendered the Railroad in the years gone by and which many of them are still giving.

Speeches were also made by the following: George W. Sturmer, grand president; G. A. Bowers, president of the Baltimore Chapter; J. M. Garvey, grand vice-president; H. G. Kruse, superintendent Newark Division; F. E. Cooper, master mechanic. The ladies also were represented. Mrs. G. A. Bowers, chaplain of the Baltimore Chapter, gave a pleasing recitation, followed by Mrs. F. M. Howard, president of the recently formed Newark Ladies' Auxiliary,

in an interesting talk on the work of the women in the Association.

Rev. Frazier was the last speaker called upon and spoke in his usual pleasant and entertaining manner.

This was the most successful affair the Newark Division Veterans have held and all seemed to enjoy themselves. Considerable credit is due Captain J. H. Doyle and his corps of able assistants for the success of the evening.

The Newark Division Association is in fine condition and growing rapidly. It now has about 375 members with nearly 75 new applications to be acted upon at the next meeting.

A Well Earned Vacation

THE accompanying photographs are of Conductor and Mrs. William Stanley, who are now on a visit to their old home in England. Mr. Stanley is a conductor in Camden Yard and a member of the Veterans' Association. Mrs. Stanley is a member of the Ladies' Auxiliary. It has been 38 years since they have visited their people in England and their friends wish them a pleasant time. They left via New York on the S. S. Aquitania on December 14. Before their departure their friends, among whom were many of Mr. Stanley's fellow employes, gathered at the Stanley home and tendered the couple a fine reception. They will remain in England until April.

Mr. and Mrs. William Stanley

Observance of Book of Rules Saves Disappointments

By C. F. Hopkins

THE Engineer's Creed" by Brother Covell in the November issue of the MAGAZINE reminds me of a little experience I had when I first entered railroad service nearly 30 years ago.

The trainmen were given a Book of Rules which served as a pass over the road.

I had a copy and was going from the roundhouse to the passenger station on an engine, a distance of two miles. In the way was a work train with two or three cars of gravel. We waited a minute or two, then I got impatient and, rather than wait for the unloading of the cars, got off and walked. I had gone but a few yards when the engine passed me and I had to walk the balance of the distance, just because I was not familiar with the Book of Rules, which said the engine I was on had the right of way, consequently the work train must get out of the way and let it pass.

As Brother Covell suggests, the Bible is a fine Book of Rules and if its contents are familiar to the owner it will carry him over many hard places and save some disappointments.

Be sure you know your Book of Rules.

Some Martinsburg Veterans

By C. E. Auld
Secretary

IF ANY railroader would like to hear about old times on the Baltimore and Ohio, all he has to do is to drop in Joseph Pfarr's shoemaker shop on North Queen Street. There he will find a number of veterans who are always ready with an old story or an argument. They form what is known as the "North End Ananias Club," which is composed of the following members: P. J. Shriver, M. L. Sharon, M. H. Harman, D. Connors, Joseph Pfarr, Thomas Sakeman, Lewis Dugan, William Airhart.

P. J. Shriver, pensioned engineer, age 73 years, is known by all railroad men as "Uncle Peter." It is interesting to hear him tell of his days when he was hunting and fishing in and around the Potomac River in Morgan County. As a young man he was one of the best hunters and fishermen to be found, and when it came to wild turkeys and deer, he was hard to beat. And even now, when the Spring opens, you will see "Uncle Peter" starting out with his fishing pole on his way to the Potomac River.

**Cut Loss and Damage 50 Per Cent.
It Can Be Done**

Cleveland Terminal Employees Form Welfare Association

AT A dinner of the Cleveland terminal employees held at the Masonic Club, Cleveland, on Wednesday evening, December 8, the formation of a welfare association of the employees was launched. F. W. Boyer secretary to terminal trainmaster, was elected chairman of the Organization Committee and C. H. Groninger, Traffic Department, was elected secretary of the Association.

The dinner was attended by approximately 50 employees, representing the transportation, traffic, station and yard forces. Considerable enthusiasm was displayed and plans were formulated for promoting social and athletic events throughout the winter months.

Assistant Superintendent Fahy acted as chairman and impressed those present with the importance of observing the rules on seal records and home route cars. These instructions he fully explained, giving several illustrations and instances of the results following the failure of employees to observe them. Mr. Fahy also urged the employees to solicit business for the Company and pointed out the necessity of giving courteous treatment to our patrons.

Assistant General Freight Agent J. C. Kimes explained the urgent necessity of securing more traffic for the Company, calling particular attention to the fact that in the last week of June, 51.9 per cent of the traffic originating on our line in the Cleveland Terminals was switched to connecting lines, while for the last week of November we were able to decrease the amount of switch traffic to 35.4 per cent. For the first week in December the per cent. went up to 39.5 however.

He also said that for the week ending November 27, the percentage of cars loaded on all Cleveland lines that were switched to connecting lines was 42.61, while the percentage of cars switched by the Baltimore and Ohio was less than the other Cleveland lines. Here he pointed out the opportunity for the considerable improvement which could be effected by giving every attention to road haul movements, billing and switching the cars promptly from the shippers' sidings, classifying and

forwarding on trains the same day the cars are loaded.

Attention was called to the fact that we have lost some revenue from our failure to weigh cars that were so carded. Illustration was given of shipments of sand that were billed at forty to fifty thousand pounds, instead of 10 per cent. above the marked capacity of the cars, and employees were urged to protect our earnings by displaying special interest in the billing of cars at the proper weights.

Mr. Kimes closed his remarks with a strong plea to each employee in the Cleveland District to exert every possible effort to secure more business for our Company and to hold to our rails the business which we now have. He stated that the keynote of his remarks and of this meeting, and the thought which he hoped all employees would carry back to their daily work was—"Business for the Company."

District Passenger Agent Strickenburg explained the duties of the Passenger Department and some of the difficulties encountered from time to time. He appropriately divided the passenger business into two sections:

1. The business that comes to a railroad through natural course of events.
2. Business that is created and secured through active solicitation.

"Uncle Ned" Tells About the Minstrel Show Given by the Mount Clare Welfare Athletic and Pleasure Association

YAAS, Suh, Mistah Tatum, when yo' boys gits it into dey hades to black dey faces, den we sho-nuff niggers is jes' natchully got to go way back an' set down. Now right away somebody goin' ax me how I know, bein's Ise black an' aint got no right to go whar white folks is. But on de night ob de twenty-second day ob November, white folks wuz black an' black folks wuz white, an' ef yo' doan b'lieve it, yo' go an ax Mistah Wood.

Mistah Wood, yo' know, is dat 'stinguish lookin' gempman, what eb'ry time he make

He impressed those present with the necessity of giving proper attention to both classes of business and cited several illustrations of passengers using our service between local points who were so well pleased with the courteous attitude of our trainmen and other employes that they became solicitors for our Company by recommending our service to their friends.

Mr. Strickenburg stated that each employe should be proud of his connection with this Company, which is the third largest revenue producing railroad of the United States, that each employe should see to it that he is known in his neighborhood as an official or an employee of the Baltimore and Ohio Railroad, that each employe should be provided with a schedule of our trains and should be in a position to answer any reasonable inquiry at any time and place.

Mr. Strickenburg closed his remarks by emphasizing the statements of previous speakers regarding courteous treatment of patrons and the necessity for securing more business.

Division Freight Agent Farmer called attention to the increase in the per diem rate and the fact that interchanging a car before 12 o'clock midnight would effect a saving of one day's per diem, or \$1.00. He also complimented the employes of the Operating Department on the splendid cooperation that the Traffic Department had been given at different times in the movement of cars and for the special attention given to shippers and receivers.

Trainmaster Batchelder, Terminal Trainmaster Gensley and Terminal Agent Bell described various interesting features which they hope and expect to accomplish in the near future in the way of further improvements in our service, that will, without doubt, strongly appeal to our patrons.

The meeting ended with a round-table discussion, in which all those present took an active part, each employe giving his views as to what action could be taken towards securing more business and improving our service. The suggestions given were all practicable and immediate action will be taken to put them into effect.

his bow before de public, yo' heah some nice young lady say, "Aint he got de pretties' hair!"

Well, right in front ob dis heah minstrel show, out walk Mistah Wood. He comence:

"Ladies an' gempmen, brudders an' sistahs." Yo' know he's bleeged to bring in dat *brudders an' sisters*; ef yo' wants to know why he say it, jes' ax him. Wid dat he up an tole 'em dat dey wuz once a man name Homer, what set de worl' on fiah wid his minstrelsy, an' dat eber sence dat day,

dey has been minstrels in de broad land. Some folks call 'em troubadours, an' dey used to go to de palaces of de barons an' baronesses an' sing an' play an' toot dey horns; but nowadays de baronesses an' barons an' sech animals comes to heah de minstrels. An' he say dat when dat Mistah Christophah Columbine diskivvered Afriky, dat he done find de true minstrels, who is minstrels widout knowin' it. An' white folks what can't be black by nachur, jes' blacks they own faces an' den acks nachural. But mos' conspicuous of all dat Bruddah Wood say in de course ob his remarks was de follerin': "Ef dey voices is brilliant as dey faces is black, den we'se gwine hab some music indeed. An' music beats in de heart ob him what hears it."

Ah, how Ah wish dat de great Mistah Caruso could a-heard dem voices! De way dat dey sung dat "Ole Black Joe" it jes' made mah toes trimble in mah shoes. Den de curtain went up. Dere set de beatenest bunch ob make-believe niggers what I eber sot mah eyes on. Most ob 'em wuz dressed up in black suits wid black an' yaller collars an' long-tail coats an' white gloves. But two or free wuz dressed differenter from de rest ob 'em, an' dem folks what aint seed Mistah Roper is done miss half dey lives. He wuz right on de end when de curtain went up, sportin' a most ridiculous pair ob white rim spectacles, a red cap—what he was allers puttin' on an' takin' off—a red tie, tremendous big trowsers, 3 or 4 diamond rings, a embroidered shirt, an' a most be-gorgeous yaller Christian anthem in his button hole. I kin tell you' dat he wuz got up most magnificent, an' Solomon in all his glory wuz not arrayed like one ob him. An' as fer rollin' de bones, Ah——! An' jazz! Oh——My!

But settin' right in de middle ob de blackes' ob dem black niggers wuz Mistah Barry Fenton. He wuz-er-er-a-er—wait, I got it writ down—heah 'tis—I-N-T-E-R-L-O-C-U-T-O-R! Dat's what he wuz, an' I tell yo', he did beat anything I eber seed. He kep' things goin' jes' as lively as if dey wuz a game ob African golf goin' on all de time. But dat aint all. When he foun' dat his two end men wuzn't dere, all he had ter do wuz wave his hand in de air an' invoke de sperrits, an' I'm blest if dem two men what he wuz lookin' fer didn't drap right

outen de heabens down on to dat stage. One he say he come from Cincinnati an' de othah from Noo York, an' it warnt more'n 10 minutes sence dey bofe left dey own respektive place. I doan know how dey done it, 'cause dey didn't explain, but I reckon dey must ob come by de Baltimore an' Ohio. Dey tell me dat Mistah Barry, as dey call Mistah Fenton, had done all de bossin' ob dat show, an' I got to say right heah dat he is some director.

Aftah de openin' chorus an some jokes, Mistah Lee come out an' sung all about how he once had a "Sweet Little Alice Blue Gown." I can't imagine how he musta looked in it, but he musta been a stunner, 'cause de folks kep' on clappin' dey hands an' made him come back an' tell it all obah agin.

Den, if yo' aint neber seed nobody shake a lively foot, yo' oughta seed Mistah Stern, what sung a little song called "Chili Bean."

Talk about dance! Dat niggah nigh tored hisse'f in two.

Right in de midst ob all dis motley crowd come a white lady. She wuz all dressed up in black, wid spangles, an' fringes, an' lace, an' a shawl. She danced a Spanish dance an' clicked little crickets in her hands at ebbery step. Den, she dance what dey call a Egyptian ballet. Lordy, but it done made de col' chills crep' up an' down dis niggah's spine! Jes' like a snake she look, wid her long hands creepin' back an' forwards lak some long, black snake crawlin' thoo de grass. Dat lady wuz a wondah, but I'll tell yo' moah 'bout her in a minute or two.

"Aftah You Git What Yo' Want, Yo' Don't Want It," sung Mistah Hittel, an' it sho' is de troof. I doan know what happened dat some young lady must a-throwed Mistah Moxley down, but he come out on de stage wid teahs streamin' outen

Baltimore and Ohio American Legion Post Organized

All Eligible Urged to Join or Transfer

THE Baltimore and Ohio now has a full-fledged American Legion post.

The organization meeting was held in the Assembly Room of the Baltimore and Ohio Building on the night of November 4, and we were fortunate in having the Department Commander, Charles F. Macklin, with us in a presiding capacity. After the fags had been passed around, those in attendance listened with a great deal of interest to the plans which the Department Commander has for Maryland's members of the Legion during the coming year. Principal among these is the securing of a larger membership and the definite arrangement for financing Legion Headquarters for the State.

Commander Macklin is an altogether likeable man, democratic, genial, enthusiastic, hard-working, and all those present caught his enthusiasm and promised to support him in his big job.

The following officers were elected:

Post Commander, W. W. Baldwin;

Vice Commander, John A. Kennedy;

Post Adjutant, Henry C. Weber;
Finance Officer, Walter W. Weller;
Historian, Robert M. Van Sant.

The election of a sergeant-at-arms and an executive committee was postponed by common consent. All present at the meeting promised to participate in the Armistice Day parade. As a result, the Baltimore and Ohio Post made a remarkable showing in the parade, not so much in so far as total numbers were concerned as in the proportion of members of the Post participating, and the good marching order of the post in the parade. Jenks B. Jenkins, valuation engineer for the Railroad and Lieutenant-Colonel of Engineers, U. S. R. C., was in command.

There is no reason why the Baltimore and Ohio Post should not rank with the best in Maryland. The Railroad had over 6,000 of its employees in the War, hundreds of them from Baltimore City and environs. The Post is fortunate in being permitted to use the Assembly Room in the Baltimore

Women's Department

Edited by MARGARET TALBOTT STEVENS

Fireside Tales

*O, let us draw near to the fireside tonight,
For the yellow moon's face is fast hid in the clouds,
Hark! how the winter winds howl with delight
And the deep veil of darkness the starlight enshrouds.*

*But the fireside is bright and the flames kindle high,
And the red goblins dance on the logs to and fro,
O, they bring back the jewels no money can buy—
The memories of tales that we heard long ago.*

*The tales that are told by mother to child,
When bedtime draws near and the firelight burns high,
When dark grows the night and the wind rages wild
And the sandman comes creeping across the dark sky.*

*Tales of fair princesses, knights brave and bold,
Of castles with towers and fortresses strong,
Of kings and their jesters, of misers and gold,
Of Cyclops, of Kriemhilde, of the sirens' gay song.*

*Now the firelight grows dim, the goblins are gone,
The stars shine again, the wind has gone down,
But the tales of the firelight have gone on and on
And we live in a castle in gay Sleepytown.*

What Goes to Make A Good Stenographer

By Edith Coplan

Stenographer, Transportation Department

Here is a splendid example of what girls in the offices can do to help build up the Women's Department. Miss Coplan has contributed to our pages before, but we believe that this is the best ever. In her letter which accompanied the following article, she said:
"My idea was to have something like a series of talks by the various women workers, having a representative of each kind of work give hints as to the best possible manner of doing her special work, giving hints as to efficiency, etc."

Who will be the next?—ASSOCIATE EDITOR.

BEING a good stenographer, I should say, is not always up to the stenographer alone. It is a sort of 50-50 proposition between stenographer and dictator, or even 60-40, but when it comes down to 70-30, the stenographer must be exceptionally good in order to be considered a "good stenographer."

Mere shorthand and typewriting do not make a stenographer, although there are many who have this mistaken idea. Being a good stenographer is a combination of being able to write and transcribe shorthand accurately with a fair degree of speed, and possessing plain common sense. These are the essentials of an efficient stenographer and all may be easily acquired by applying a little time and thought to that which is most lacking.

If you are not up to par in shorthand, brush up on words and word signs, and

learn to read your notes, but, as often happens when reading your notes, if there is something that doesn't sound just right, do not foolishly write what you think you heard but (if you do not wish or are unable to ask questions) write what you know will be correct, regardless of whether it was the exact phrase dictated or not. However, care should be taken that you know just what is correct before attempting to change anything. And that is what I mean by plain common sense.

Common sense is good judgment, together with a general knowledge of what goes to make conversation, including a thorough understanding of the English language. Of course, common sense literally cannot be learned, but it may be acquired. Books are our best teachers and reading the right kind of books goes far toward improving one's mind. The daily

newspapers and good magazines are also important factors in this connection for it is just as important to know what is going on in the world as it is to be able to discuss a good story. But most important of all is a fair knowledge of the English language, or in other words, grammar. Although it is not absolutely necessary to know every rule and every particle of speech, every stenographer should know at least the rules of punctuation, and should also know something about nouns, pronouns, adjectives, adverbs, subjects and predicates; a stenographer should also be able to spell properly. What with so many correspondence courses and our own excellent night schools, where one may attend either free of cost or at a slight expense, it really is not hard, if one has the will, to become a good stenographer.

Below I have tried to consolidate a few hints which I hope will prove as helpful to others as they have been to me:

Whenever possible, ask for files or reference notes from which a letter was dictated, so that you will be able to verify your own notes with them, especially proper names, numbers, etc.

Ask to have proper names spelled out during dictation, unless you are very familiar with them, for even such common names as Smith or Brown may be spelled in more ways than one. (As a hint to the dictator, I might add here that when dictating names, which most stenographers write out in longhand, it would be a much appreciated consideration on his part if he would go a little more slowly than when dictating other words.)

Do not be afraid to ask questions. It is much better to interrupt during dictation and make sure of a thing, than to have to write the letter over afterwards.

Quite often I have lengthy letters dictated to me which are alike with few exceptions, especially in the matter of tabulations, quoting of rules, etc. I have made a practice of keeping an extra carbon of such letters, binding them with heavy paper, and heading them "Form Letters." Since my employer has learned what I have done he no longer dictates such letters but gives me the necessary data and I can write the letters myself. In this way much time and energy is saved both for the dictator and the stenographer. My work also necessitates my sending out a good many circular letters. In a similar manner I have made up a book of circular letters and when it is necessary to refer to any one of them I have them right before me without going to the files.

Do not forget that a good stenographer is always neat in his work and his typewriting is well spaced. His carbon copies look just as well as the originals.

And, as a parting injunction, do not sulk or sneer when you have corrections to make, even though it be not your fault. Always do these things cheerfully and willingly. I would much rather correct what I have typewritten on the typewriter than have it all marked up and disfigured with a pen.

Miss Olive Dennis, civil engineer

Can A Woman Be A Civil Engineer?

Miss Dennis Says "Yes"—And Proves Her Answer By Being One

IN THE Bridge Engineering Department, on the 13th floor of the Baltimore and Ohio Building at Baltimore, is a young woman whose love for mathematics led her to choose the field of civil engineering as her life's work. She is Miss Olive W. Dennis, the daughter of Dr. Charles E. Dennis, of Baltimore; she is a competent worker who knows and likes her job.

Miss Dennis was born at Thurlow, Pa. As a child she was fond of mathematics. Her brother was a civil engineer and she became interested in his books; in this way she received her first impressions of engineering, and decided then and there that she wanted to learn how to build bridges. She was graduated from Goucher College, Baltimore, where she received her A. B. degree; at Columbia University she took her degree of M. A., and was graduated as a full fledged civil engineer at Cornell a year ago. She was the second woman to receive the degree of Civil Engineer at that university, and at the time she attended school there, there were only five girls who were taking that course.

While at school she had six weeks of experience in a regular surveying camp. When asked if she had had any experience in outdoor work during the cold weather, she laughed.

"I helped lay out the railroad line at Ithaca last December," she said, "and I am rather anxious to get out on the road again. There is no reason that a woman can't be an engineer simply because no other woman has ever been one; a woman can accomplish anything, if she tries hard enough."

Before coming to work for the Baltimore and Ohio, Miss Dennis taught mathematics in the Technical High School at Washington, D. C., but decided that if she would be an engineer, she must get down to real engineering work.

"I have always said that the Baltimore and Ohio is a fine railroad; my first experi-

ence with it was as a commuter, and that's the acid test of any railroad. I have always liked it, I like to work for it, and I think Baltimore and Ohio people are just splendid!"

Miss Dennis came to us only a few months ago. She is the only woman engaged in engineering work in the Bridge Building Department. She possesses a delightful personality and is an interesting conversationalist; to meet her is to like her. Besides her knowledge of bridge construction, she is a talented pianist and singer; she understands several languages and dearly loves to knit socks. (She didn't tell us all these things, but we happen to know one of her friends.) A gentleman who was standing nearby while we were talking to Miss Dennis, said:

"Ask her if she's afraid of mice." Miss Dennis laughed.

"No," she said, blushing like a little school girl, "I'm not afraid of mice nor of snakes—but I'm horribly afraid of bugs! Ugh!"

Recipes

Butter Scotch Pie

2 eggs, well beaten; 1 pint milk; 2 tablespoons corn starch, dissolved in milk; pinch of salt; 1 cup brown sugar.

Mix thoroughly the above ingredients, flavor with vanilla, and boil in double boiler until thick. While this is cooling, bake the crust. Put in filling and cover with meringue.

Meringue

4 heaping tablespoons XXXX sugar; $\frac{1}{4}$ teaspoon cream of tartar; $\frac{1}{4}$ teaspoon salt. Flavor with vanilla.

(Contributed by Mrs. Nelson Smith, Dorsey, Md.)

Devil's Food Cake

$\frac{3}{4}$ cup of shortening; 2 cups light brown sugar; 2 eggs, dropped in creamed margarine and sugar; $\frac{1}{2}$ cup of sour cream; 3 scant cups of flour; 1 teaspoon baking powder. To the above batter add $\frac{1}{4}$ cup grated bitter chocolate; 1 teaspoon soda; $\frac{1}{4}$ cup boiling water, stirring until soda is thoroughly dissolved.

Icing

1 cup light brown sugar; $\frac{1}{4}$ cup grated bitter chocolate; $\frac{1}{4}$ cup sweet milk; 1 teaspoon vanilla. Boil until chocolate forms a ball when dropped in cold water.

(Contributed by Mrs. F. W. Fritchey, Baltimore, Md.)

Valencia Rice

2 large onions, sliced and fried; 2 tablespoons melted butter; 1 can tomatoes; 1 cup raw rice; 1 pint water.

Put into double boiler and cook until it is of the consistency of porridge. Pepper and salt to taste. For a small family, use half the quantities of ingredients.

(Contributed by Mrs. Robert G. Peck, Washington, D. C.)

Dear Women Readers:

What wonderful possibilities these long winter evenings bring to us! Time to read, to study, and to do the little things for ourselves that we have long neglected; time to dream about the future; time to plan for next Spring's flower garden and for the rearrangement of the decorations of our rooms. Time is valuable, and the person who has plenty of it to spare is rich indeed.

Have you five, ten, fifteen or twenty minutes to spare this evening? Splendid! Mrs. Housewife, get your pen and ink and a sheet of paper; Miss Business Girl, put a sheet of paper into the typewriter. Now, we are ready to write—not our New Year's resolutions, but a letter to the other women who read our MAGAZINE.

There's a girl in Cincinnati who is anxious to know how the girls in Baltimore spend their Saturday half-holidays, and about the long hikes that many of the young folks here are wont to take; there's a housewife in Weston, W. Va., who would like to find out what the women of Dayton, Ohio, have to say about the new labor-saving devices which are being used in many of the western kitchens; there is a mother in Connellsville who would like to know what varieties of foods the mothers in Parkersburg put into their children's lunch boxes to make that cold midday meal particularly appetizing; there's a girl in the offices at Cumberland who wants to know what qualifications she will need besides a regular business course in order to become the "crackerjack" stenographer who is in demand throughout the business world today.

Now, I am going to ask the girls from Baltimore, the housewife from Dayton, and the mother from Parkersburg to answer these questions. Thank you. Just take a few minutes to tell us about it on your sheet of paper, and, in the meantime, if you happen to have any questions to ask, let us have these, too. There is surely to be somebody who is as willing and anxious to answer your questions as you are to ask them, and we shall be glad to publish both questions and answers in these columns.

Yours sincerely,

Margaret Talbot Stevens

Frocks of Unusual Style for Home Dressmakers to Reproduce

By Maude Hall

Dress 9146 35 cents

Dress 9134 35 cents

THE Paris innovations in dress, as shown in the newest importations, may easily be reproduced by home dressmakers. Some are extremely simple and some are not, but all ring true to the straight silhouette, which means that they do not offer any insurmountable difficulties.

Among a fresh series of creations one finds dresses fashioned in taffeta, satin, tricotine, serge, velvet and gabardine, though there are two or three different names for the gabardine effects. The silks are especially interesting because they are considered as

hints for springtime to be tried out at the Winter resorts. Two-tone effects and bright colors are featured. We are promised a brilliant collection of greens, reds, yellows, blues and purples. Rust, which will run toward the lighter shades known as nasturtium, will also be heard from rather impressively.

The latest silks are characterized by all the softness demanded by present modes. Among the foulards one finds fanciful designs in floral and futuristic patterns and foulard is used for some exceptionally clever separate blouses made in kimono style with the adjustment at the back. These blouses may be used separately or worn with skirts of satin, taffeta or velvet in costume effect. Soft taffetas in two-tone effects are frequently trimmed with bands of braid or embroidery featuring the tones of the silk. On one charming model consisting of a straight gathered skirt and long-waisted kimono blouse, the trimming bands, five in number, run round and round the skirt, being repeated on the waist in the same arrangement. Vertical bands of the decoration which outline the square neck, break the round outline, however, and give variety to the trimming. The lower edge of the blouse and the short sleeves are trimmed with deep flounces of accordion-plaited chiffon.

In every group of ultra-smart frocks one will find at least one velvet model. Particularly *chic* is a design with tunic blouse trimmed about the lower edge with a wide band of fur and several tiny tucks. The neck is U-shaped, although provision is

made for a slashed front and rolling convertible collar. The two-piece skirt is laid in the plaits at the top, closing at the left side. All of the dresses shown may have high collars, if preferred, for although they have not been generally accepted as yet, Paris is strongly emphasizing the high collar.

Silk crepe de Chine is ably aided and abetted by brown satin in an afternoon model with Moyen Age waist. The blouse is laid in plaits under the arm and closes on the left shoulder and under the left arm. A straight gathered flounce is sewn to the lower edge of the blouse, while a flounce of the same kind trims the skirt. The foundation dress, sleeves and vest of satin are in a deeper shade of brown than is the crepe de Chine used for the outer waist and flounces. Color is handled with charming results in all of the models for the coming season, and it is predicted that the Southern resorts will see a great deal of red and white in addition to black and white combinations.

Freight Rate Increases Here and Abroad

The Bureau of Railway Economics computes the total advance in freight rates in this country, from 1914 to 1920, at 80 per cent. As compared with this, the estimated increases in some foreign countries have been: Austria, 390 per cent.; France, 140 per cent.; Holland, 70 to 140 per cent.; Norway, 150 per cent.; Sweden, 200 per cent.; Switzerland, 180 per cent.; United Kingdom, 101 to 114½ per cent.

Dress 9163. 35 Cents

In many of the afternoon dresses neutral shades are selected and they make an effective background for the charming combinations of color in the embroideries and beadings so extensively employed in the decorations of modish costumes.

Although the addition to the length of the new skirts is slight, it is noticeable. The very short skirt has been rather overdone and the reaction against it will probably result in new designs of uniform length.

Employment Wanted!

The housewife has no occupation,
According to the census taker!
'Twould seem impossible to break her
Of making life one long vacation
Of sweeping, sewing, dusting, baking;
Of bed and bread and pudding making;
Of feeding men and kids and chickens,
And working all day like the dickens,
To rise next morn at four a. m.
And do the same thing o'er again.
It seems the duty of the nation
To give the housewife occupation.
—R. E. ALEXANDER in *Country Gentleman*.

Home Dressmaker's Corner

Smartness Deftly Adjusts Itself to Youthful Needs in This Simple Serge Frock

THE school girl comes in for her share of fashionable attention, now as never before. She considers the semi-tailored one-piece frock an indispensable part of her school wardrobe and is so insistent upon smart effects that her demands cannot be disregarded. This model is very good-looking and may be made by almost any girl with a fair knowledge of sewing. The waist and skirt are quite plain the decorative effect being achieved by the addition of an overblouse with U-shaped neck. The waist proper closes in front, while the applied blouse closes at the left shoulder. The skirt is laid in plaits, each side of the front and back, then gathered at the top. Medium size requires three yards 54-inch material.

To cut the dress, the material is not folded evenly in half as usual. Instead one edge is folded far enough over to accommodate the side gore of the skirt. When the remaining edge is folded over, it will be wide enough to cut the front gore, back gore and applied back and fronts without seams. All of the sections arranged on the wide turn of material have the large "O" perforations placed over a lengthwise thread.

The waist is quickly made by closing the shoulder and under-arm seams and hemming the front. Gather the lower edge next, then sew collar to neck edge. Close seams of sleeve and cuff as notched. Sew cuffs to sleeve, then sew sleeve in armhole, easing in any fullness between notches.

of waist and applied fronts and backs. Bring right front edge of stay to the left side edge of applied front.

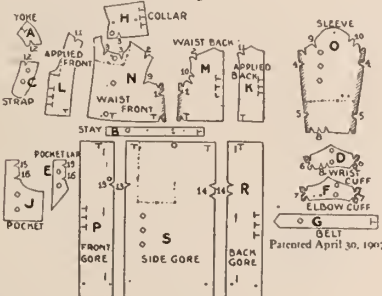

Next, take the skirt and turn edges of front and back gores under on slot perforations. Lap folded edges on side gore, press plaits to position and close seams underneath, leaving edges to the left of center-front free above large "O" perforation in front gore. Finish for closing. Hem lower edge, sew pocket lap to pocket and adjust to position. Gather upper edge of skirt and sew to lower edge of waist. Arrange belt around the waist and trim with buttons, braid or embroidery. The cuffs should be trimmed to correspond with the belt.

JUNIORS' DRESS No. 9107. Sizes, 13 to 17 years. Price 30 cents.

Clerks and Stenographers Are the Biggest Factors in Economical Use of Stationery

CONSTRUCTION GUIDE 9107

Take the applied front next and join right shoulder edges of front and back sections. Join yoke and strap as notched, then adjust to position. Gather lower edges and arrange on waist with center-front, center-backs and neck edges even. Sew stay to lower edges

When The Bogie Man Comes Over The Mountains

*On the darkest of midnights when the moon hides her eye,
When the bright, twinkling stars run away from the sky,
When the blustering old North Wind goes whistling by—
With a crash, and a bang, and a whoop, and a sigh,
The Bogie Man comes from the mountains.*

*Carrying a sackful of dreams on his back,
Wearing an ulster all faded and black,
And a big, woolly cap pulled down like a sack,
And with squeaking old shoes going "clickety-clack"
At each step that he takes o'er the mountains.*

*He looks for bad children and calls for them, too,
He peeps through the windows and hollers, "Woo, woo!"
"You were naughty today and I'm coming for you!"
Then he rattles the casement to frighten us, ugh!
This old Bogie Man from the mountains.*

*And once, so they tell us, he came into town
And though it was daylight, brought his dream bag of brown,
To threaten King Jack Frost and to seize on his crown;
But North Wind pounced on him, blew the Bogie Man down,
And puffed him straight home to the mountains.*

*And now, when he comes, 'tis in darkness, they say,
He's a bully by night, but a coward by day,
And when dawn comes peeping and the sky's growing gray,
With his pack on his back he goes snooping away,
Far off to his home in the mountains.*

Dear Girls and Boys:

You can't guess how happy you have made your old Aunt Mary by writing her those splendid letters. I am sorry we haven't the space to publish every word of each one, but I shall try to tell you in our letter column something that each one has said. The first letter that I received was from Myra Gill, and because it was the first I am going to let you read it all. I am sure that you will all agree with me that it is a fine letter.

Some of the little folks forgot to give me their addresses, and some forgot to give me the name of the persons in their families who work for the Baltimore and Ohio Railroad. Do not forget this next time, for it is very important.

We have some nice drawings on our page which were sent in by the little people. Can all of you draw as well as these? When you send in your drawings, just make them in lead pencil or in pen and ink, as this is the easiest way for us to use them in the MAGAZINE, since we can't put them in in colors.

Where is that little boy who is going to tell me about the bird box and how to make it for the little wrens next spring? And how about the little girl who is going to tell me how she takes care of baby brother or sister

while her mother is busy? I'm waiting to hear from both of you. Send your letters to "Aunt Mary," BALTIMORE AND OHIO MAGAZINE, Mt. Royal Station, Baltimore, Maryland.

Thanking each one of you who has written and all of you who are going to write, and wishing every little Baltimore and Ohio girl and boy a very Happy New Year, I am,

Your loving

Aunt Mary

Little Letters From Little Folks

BALTIMORE, MD., November 23, 1920.

Dear Aunt Mary:

Oh! how anxious I am to get acquainted with my new aunt and cousins. What fun it will be to hear from some of our cousins who live many miles from Baltimore. Please do write about Peter Pumpkin another time, I just loved the story.

I am 10 years old and in the fifth grade. I have a big white Maltese cat for a pet, he is very playful and has a white necktie. His name is Kitty.

My father has worked in the Freight Claim Department for 20 years.

Your loving niece,
3203 Baker Street. MYRA GILL.

Isn't that a nice letter? Myra is going to write us a story some day, all about Mr. Terrapin. Marie Clemmings is in the fifth grade, too. A part of her letter says:

"My father is a blacksmith in the Baltimore and Ohio shops. He brought the MAGAZINE home last night. I was 11 years old in August. I go to a country school at Vanatta. I am in the fifth grade and I like my teacher. I wish I could come and see you some time."

Mary Jones, Belleville, Pa., did not have much to say, but she drew the fine picture of the little Pilgrim, which you see on this page. Isn't it a dandy?

Bernice Conklin wrote a splendid letter, and I am sorry that I can't print it all, but I know you will laugh when you read how she makes doll dresses. Bernice lives near Moundsville, W. Va. She tells us:

"My papa works in the tool room of the Baltimore and Ohio. His name is Linue E. Conklin, and my mother's name is Mary. I go to school at Wood Hill and I am in the seventh grade. My teacher is Miss Violet Weekly. My papa was a boilermaker, but he got his eye put out. He has worked for the Baltimore and Ohio for 24 years and he thinks a lot of it. We live on a big farm, 7 miles from Moundsville and 5 miles from McMechen. My biggest brother is 15 years old. He hauled all of our coal, about 300 bushels or more. We have 6 cows, a lot of little pigs, chickens, ducks, and 3 horses.

"I will tell you how to make a doll's dress. First you take your scissors and cut it out. Then you sew it up and put the trimmings on." (Then, do you eat it, Bernice?)

Ida Smith, who lives at Dorsey, Md., is quite a poetess. She has written a very beautiful Thanksgiving poem and another for Christmas, but because they didn't reach me in time, I am going to save them for next Thanksgiving and Christmas. In the meantime, read her New Year poem.

Rosalie Swink, who lives at Connelville, Pa., wrote a nice little letter, but she did not give me her address and I couldn't write to her. She says:

"I go to Sunday School every Sunday, both morning and afternoon. I am eight years old and in the third grade. I love to go to church. I have not any pets, but I like to draw Pilgrims. My papa works for the
(Continued on page 40)

boro, W. Va.

The White Fairy

AWAY in the far North, there lives a beautiful, white fairy. Her face is white, her dress is white, and in her hand she carries the whitest box that you ever saw. This box is filled with white flowers. Nobody ever knew where these flowers grew, until the fairy told them.

Now, away in this far country there are ever and ever so many little children. They do not look just like you and me, for their skin is yellow and they have little, round, shining eyes. They are called Eskimos. They live in huts of skin in the summer, and in snow houses in the winter. Sometimes the sun does not shine warm enough all summer to melt their snow houses, and the little Eskimo children can go coasting all summer. Wouldn't you like that? But it is very, very cold there.

They do not have short nights and days there as we do, but they often have six whole months of darkness. But they could not think of sleeping all that time like the little bears, so they must be awake to play and to eat as we do. Up in their sky, all winter long, they can see the Aurora Borealis, who brings them the beautiful lights in every color of the rainbow. Often the children take long rides on the sleds with their fathers. These sleds are drawn by furry dogs, who are very strong and can travel many miles without getting tired.

Every year, at the end of the summer, when the air grows colder and the skies begin to grow gray and gray, the little Eskimo children begin to watch for the white fairy. Then, when they see her coming they run and tell their parents. "Oh, the white fairy Aureola is coming," they say, "see her lovely flowers!"

And sure enough, all over the country as far away as they can see, the white flowers are falling.

"Mother," said Kemloo, a little Eskimo boy one day, "where do you suppose the white fairy gets all her pretty flowers?"

"Yes, do tell us, mother," said his little sister Yalaco.

"I cannot tell you, for I do not know," their mother said, "but we can ask the fairy to tell us. Go out, Kemloo, and when you see Aureola passing by, ask her if she will come in and tell us."

So Kemloo put on his little sealskin coat and crawled out of the igloo—as they call their snow house—just in time to see the white fairy coming across the big glacier.

"Oh, beautiful Aureola," he called, "will you please come in and tell us where you get your flowers? Mother said I might ask you."

"Yes indeed," answered the fairy, "just wait until I close my box. I must leave it outside, or my flowers would fade away."

Then she got down on her knees, for everybody must crawl into an igloo, and was soon in the big room where mother was cooking a pot of stew over a bright fire, and where little Yalaco lay stretched out on a big furry skin, toasting her little toes before the heat.

The fairy sat down upon the rug beside Yalaco, and Kemloo curled up on the other side, while mother stirred the food in the pot with a big spoon, made of whalebone.

"Years ago," began the fairy, "there were no white flowers like those which I bring to your country every year. One day, while I was passing through a beautiful land where there are hundreds of green trees and where the sun shines warm all summer, and where the people live in houses made of wood and brick, I sat on the ground to rest. As I sat there thinking about you children, I heard a noise. Right there at my feet were two little blades of grass. What do you suppose they were talking about? They said that the cold, cold winter would soon be there, and that they were sure that they would freeze to death. They knew that they would have to lie out on the cold ground, with no cover on at all, until the whole winter was over.

"I felt so sorry for these little grasses, that I began to think of some way to make a nice, soft blanket for them. I went to my friend, North Wind, and asked him what to do.

"He gave me the big, white box that you see me carry. Then he went with me to see the big clouds. They gave me thousands and thousands of raindrops. North Wind took the raindrops into his big, cold hands and blew his breath upon them. In a few minutes they had changed into flowers, the prettiest that I had ever seen.

"Take these," he said to me, "and scatter them all over the earth. Don't go too near the sun, for they will surely fade. Take them even into the far North, for there are little boys and girls there who want the flowers to play with."

"So I took the flowers and scattered them over the earth. And now the little grasses

have a downy blanket to keep them warm in the winter, and two little Eskimo children take their sleds and slide upon the beds of these white flowers, while their father uses millions of them to build his igloo."

Then, before Kemloo and Yalaco could say a word, the fairy had gone. And Kemloo and Yalaco put on their coats and crawled out of the igloo as fast as they could. And sure enough, just as they got outside, they saw the fairy Aureola flying high in the air, scattering the white flowers.

Then the white fairy left the Eskimo country and came down into the very land where we live and scattered the pretty white flowers as she had done in the North Land. And each year the little boys and girls of our country get out their sleds and go coasting on the blanket of white flowers, under which the little grasses are sleeping soundly. Look at the snowflakes and see what pretty white flowers they are!

A Poem for the New Year

By Ida Smith

The New Year is here
With snow and ice,
With lots of cheer
And everything nice.

The New Year is here,
With skates and sled,
Little hearts happy,
Little noses red.

A Happy New Year
To you, everyone,
We'll celebrate it
With dancing and fun.

The Pilgrims

By James King, Jr.

About three hundred years ago,
Pilgrims were working in the snow.
They worked and toiled so very hard,
Yet, it seemed they never grew tired.

They worshipped God in their own way,
For they had come here to stay,
And the children played with Indian boys
And very soon learned all their joys.

Drawn by Mary Jones, Bellevue, Pa.

visor John Conley, Charleston
Division

Safety Roll of Honor

Baltimore Division

On October 8, as a freight train was passing Cowenton, Md., a broken arch bar was noticed by Crossing Watchman H. Baumgart. He notified Agent M. E. Corbin, Loreley, who stopped the train and notified the crew. Crossing Watchman Baumgart and agent, Mrs. Corbin, have quite a record for the observance and stopping of trains with cars that have defects. They have been commended.

On November 19, as extra east, engine 4565, was passing Woodbine, Md., Operator F. V. Grimes noticed a standard broken on car loaded with poles. Train was examined at Gaither and cars set out. Mr. Grimes has been commended.

While No. 94, engine 4329, was passing Cowenton on November 25, a broken spring hanger was discovered on a car by Agent W. F. Gatchell, who notified the operator at Poplar. Train was stopped at Loreley, where the car was set off. Mr. Gatchell has been commended for his close observance of passing equipment.

When extra west, engine 4507, was pulling in siding at Camp Meade Junction on December 2, Operator M. F. Quill notified the conductor that fire was flying from under a car. Examination of train developed a brake rigging was down under car D. & H. 333. Operator Quill has been commended.

Cumberland Division

The following irregularities were noted and corrected by observance of operators on the Cumberland Division in November:

Wheels sliding.....	2
Brake rigging down.....	3
Broken rails.....	1
Total.....	6

On December 7, as extra 7109, east, was taking siding at Thornton, Trackman H. Morgan noticed brake rigging down under G. S. & F. car 20091. He informed Conductor J. L. Little, who made necessary investigation, found and corrected the defect.

Our old friend, P. M. Pennington, who is still on the job at Polk Street Crossing, recently found a piece of broken flange and notified all concerned to be on the lookout for broken wheel. Mr. Pennington is congratulated on his watchfulness. He is ever on the alert.

On November 23, Warehouseman W. H. Hendricks discovered brake rigging dragging under car on train east, engine 4854. Train was stopped and trouble removed. Mr. Hendricks is commended.

Ohio River Division

L. J. Ferrell, operator clerk, Belpre, Ohio, has been commended for detecting brake beam down on passing train, which was stopped and rigging taken out.

Charleston Division

Conductor Asa Carr has been commended. He found side bearings gone from car B. & S. 11577; had car set off for repairs and thus averted a possible accident.

R. C. Miller, Sutton, W. Va., while walking along the track found a broken rail between mile posts 5 and 6, Sutton Branch. He at once reported same to agent at Sutton, who advised the division officers. He has been thanked by the superintendent for his interest.

Baggagemaster R. H. Hall has been commended for his interest in assisting to get passenger trains over the road without delay and particularly for the help he gave recently in taking coal at Bower when difficulty was experienced.

There are 25 reasons why the Charleston Division was able to make a good showing in connection with fuel performance in the month of October. These reasons are all engineers who made 100 per cent. and over, and their names are as follows: W. T. Spencer, W. T. Morgan, Gay, Groves, Shears, Phillips, Dougherty, Wilson, Vassar, Vorholt, Jordan, J. H. Stalnaker, Ankrum, Poling, H. W. Fury, G. E. Ramsburg, E. L. Jarrett, Marshall, Skiles, Homer Murphy, Burrows, Young, Paisley, A. N. Nicholas and Mullins.

The number of engineers making 100 per cent. is increasing, and we hope soon to add still more to the list of monthly commendations.

Conductor F. S. Ballard, Engineer W. D. Rohrbough, Engineer A. J. Lunsford, Fireman L. H. Fitzgerald, Fireman R. P. Morgan, Brakeman F. Simon and S. Queen, on arrival at Orlando Junction found water tank empty. Instead of setting off train, they fired up pump boiler and pumped sufficient water to allow them to move. Each of these men has been personally commended for his interest. They made CAR MILES.

Section Foreman O. P. McCord noted when a train was passing his tool house, side bearings falling from car. He immediately reported this to dispatcher by telephone. Train was stopped, car located and set out. Mr. McCord has been commended for his interest.

Engineer B. H. Griffin noted a package lying alongside track and notified dispatcher. It developed that same had fallen from mail car. He has been commended for his close observance.

New Castle Division

NEW CASTLE, PA., November 26, 1920.

Mr. J. L. BRUDER,
Signal Maintainer,
Nova, Ohio.

Dear Sir—I am advised that on November 23, while engaged in your work, you noticed a car on the westbound siding that had an electrical crane loaded on three cars. You found that the bolster on the east end

of the car was broken and that the crane shifted so that the probability was that at the first curve there would have been a derailment.

I appreciate very much the interest which you took in this, as we had this car switched out and repaired and placed in proper position before dispatchment.

Your interest in Safety is much appreciated.

Yours truly,

(Signed) D. F. STEVENS,
Superintendent.

Cleveland Division

Each of the employes whose names are listed below has received a letter from Superintendent Green commending him for his careful observance and prompt action in averting possible accidents on the Cleveland Division. "Just little things of this kind," says Mr. Green, "help bring down our accidents and also our expenses."

J. L. Shrimplin, operator, Seville, Ohio, noticed stake protruding from side of car, notified dispatcher at Sterling and had stake removed. Mr. Shrimplin had been in service only four days.

C. L. Blair, brakeman, Akron, Ohio, noticed brake beam dragging on head end of stock train, ran to telephone booth, notified operator at "XN" Tower, who had train stopped and repairs made.

J. I. Marlett, switch tender, M. & C. Junction, noticed spring hanger of Baltimore and Ohio car 23649 broken and riding on rail, notified conductor, who set car out without damage.

C. F. Hoffman, operator, Freeport, Ohio, observed blazing hot box on opposite side of train next to engine as he was handing orders to crew of third 81, had train stopped and hot box packed.

George Boric, section foreman, Willow, Ohio, noticed truck stalled on main track, notified dispatcher at Akron, and flagged No. 57.

Chicago Division

GARRETT, IND., December 15, 1920.

C. H. TEEGARDEN,
Brakeman,

Garrett, Ind.

Dear Sir—My attention has just been directed to commendable action on your part in observing and reporting broken rail in westbound main track at Sheridan Avenue, near Whiting Tower, on November 30.

Your alertness and interest displayed in this matter merit our commendation and appreciation.

Yours truly,

(Signed) S. U. HOOPER,
Superintendent.

GARRETT, IND., December 20, 1920.

F. M. THORNTON,
Operator, "HK" Tower,
St. Joe, Ind.

Dear Sir—Mr. Schultz has recently called my attention to commendable action on your part on December 15, in observing broken piece of rail in westbound crossing at "HK" Tower, and of the action which you took in protecting and remedying this condition.

Instances of this nature merit our sincere appreciation.

Yours truly,

(Signed) S. U. HOOPER,
Superintendent.

Ohio Division

On November 10, Trackman Oscar Oney while walking from West Junction to Vigo, observed broken rail. He immediately tele-

phoned operator at West Junction and all trains were notified of this condition. His watchfulness and prompt action are commended.

On the evening of September 29, while extra 2713, west, was passing "Q" Tower, Second Trick Operator O. E. Marsh, on duty, observed brake beam down under the train. He immediately notified operator at next station, who stopped train. Operator W. E. Littlejohn, after stopping train, notified dispatcher to stop No. 97, which was following, and have crew look out for brake beam, which was found on first bridge east of "DA" Tower. Operator W. E. Littlejohn also walked to the bridge and removed the brake beam. Both operators O. E. Marsh and W. E. Littlejohn have been commended for prompt action and cooperation in making conditions safe and thereby averting accident.

On November 13, while extra 2889, west, was passing Coolville Station, Operator T. E. Fitch noticed a steel brake beam down in middle of train. He flagged this train and succeeded in getting it stopped. Train crew removed brake beam. He is commended for his alertness and prompt action in averting possible accident.

On November 2, Engineer O. O. Welch, in charge of engine 2713, on train 76, discovered broken rail about two miles east of West Junction. He succeeded in getting his train stopped before any damage was done, and instructed Machinist Helper Hunsicker, who was deadheading on this train, to go to West Junction and notify operator and also to flag all trains he met en route. This was done, matter reported and section-men made repairs. This act on the part of Engineer Welch shows watchfulness. Commendation has been placed on his record.

Toledo Division

On November 16, while extra 4182, south, was passing Kirkwood, Third Trick Operator J. S. Hammond discovered wheels sliding on south end of car in about the middle of the train. Mr. Hammond immediately set the distant signal against them and stopped this train and notified the train crew to examine train. It was discovered that the wheels were sliding. For Mr. Hammond's close observance he is commended.

While extra 4551, south, was passing Miamisburg Station on October 15, First Trick Operator E. F. Stenger noticed brake shoe dragging on rail and dust coming from underneath the car, indicating brake rigging dragging. Operator Stenger tried to signal the train to stop but could not get signal to train crew. He then notified the dispatcher. Train was stopped at Carlisle and brake rigging removed, probably averting serious accident. He is commended.

On October 14, Operator E. J. Stenger, First Trick Operator, Miamisburg, noticed car in train not riding properly on extra 4182, south, in charge of Conductor Ridenour, while passing his station. He wired conductor at Carlisle that he had a car with a bent axle. Train was stopped and it was found A. T. & S. F. 48290, loaded with soda ash, had a loose wheel. Car was set off at Middletown. For his close observation of this train passing his station he is commended.

Departmental Efficiency Increased by Weekly Conferences of Division Chiefs

By E. T. Murray
Freight Claim Department

MOST of us take pride in our work but our efforts are often adversely affected because the other fellow isn't closely working with us. Here, however, we are well organized, especially since there has been weekly meetings of the heads and sub-heads of the different divisions of the department, with our assistant to the general freight claim agent, F. L. Schepler, as chairman of these meetings.

The aim and object of these meetings is to bring about a closer cooperation between the different divisions of the department in order that a steady improvement in the character of the work, as well as a greater output, will be shown.

A number of suggestions have been heard at these meetings which, if followed up, remove many little causes of friction which result in lost motion. If our clerks will heartily cooperate with their head clerks and their assistants, we can make this the smoothest running office on the System.

Each of us is but a cog in the wheels of

the machinery, and when we fail to function properly, we clog the whole works. One thing that it will always pay us to remember is this: when friction does develop, don't think it is the cog next to your cog that's rubbing you alone. Examine your own cog and see that it is properly lubricated with the oil of courtesy and consideration; maybe *you* have the rough, unyielding, destructive edge.

Recently a traffic manager of one of the largest industrial concerns in the country called to see our "Boss." Unfortunately he was not in town that day, so the gentleman consulted with our chief claim clerk, Mr. Heartt. During his walk across the room to Mr. Heartt's desk he had a good opportunity to survey the room, which he did, remarking "quite some claim department—a regular bee hive."

I have been thinking about this remark and believe if we all gave a good imitation of the "busy little bee" it certainly would help some.

Pennsylvania Railroad Bulletin on Passes is Timely and Reasonable

PENNSYLVANIA SYSTEM

For the Information of the Public:

December 30, 1920.

Employees of the Pennsylvania Railroad, to whom annual or other passes will be issued for the year 1921, are receiving from the President of the Company printed reminders of the fact that the privilege of free transportation carries with it a duty to surrender seats in crowded trains to pay passengers. The message from the Railroad's chief executive is embodied in a little leaflet entitled, "A Point in Courtesy," reading as follows:

"On some of our passenger trains it is not possible at all times to provide every passenger with a seat, nor will it be practicable to add materially to the passenger equipment in the very near future. Even with a slackening of traffic, which is already making itself evident, our passenger facilities will in all probability continue to be somewhat overtaxed for some time to come.

"It, therefore, seems appropriate to remind all of our employees, holding passes, of their duty to refrain from occupying seats in any train when pay passengers are standing.

"The obligation of an employee, in such a case, is plain and rests upon the principles of courtesy and right. It may be performed without embarrassment to any one, and without attracting needless attention, by simply arising and moving to another part of the car or train.

"Our patrons, on all occasions, should be treated as our guests, and whenever any question arises, we should sacrifice our own individual comfort for theirs.

"The railroads are judged in the public's mind as much by the conduct of their employees as by any other single factor. What the public thinks of the railroads, whether good or evil, will inevitably in its turn react upon the welfare of every one of us.

"It is, therefore, to our direct personal interest to give every passenger who rides upon our trains the best possible impression of the treatment received from every one connected with the Company with whom he comes in contact or whose behavior in public he observes."

Cut Loss and Damage 50%
It Can Be Done

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Office of Senior Vice-President

Correspondent, RAYMOND M. KURETH

The wedding of Miss Ernestine Keller Bender, niece of Mr. and Mrs. Charles S. Keller, 816 Green Street, to Raymond W. Auld, son of Mr. and Mrs. B. F. Auld, 19 Hilton Street, took place on Wednesday, December 1, at 4.00 p. m., at the First English Evangelical Lutheran Church, Fremont Avenue and Lanvale Street. The ceremony was performed by the pastor, Rev. Dr. Ezra K. Bell.

Miss Bender was also an employ of the Company, having been in the Purchasing Department.

Mr. Auld is employed in the office of the Senior Vice-President of the Railroad, having been connected with that department for nine years. At the outbreak of the war he enlisted in the old Fifth Regiment and was stationed for a time at Anniston, Ala., later becoming a member of the One Hundred and Fifteenth Regiment, with which he saw service overseas.

After a wedding dinner at the home of the bride, the couple left for New York, Niagara Falls and other northern points. Upon their return they took up their residence at 2623 Edmondson Avenue.

Office of Vice-President Operation and Maintenance

Correspondent, H. H. HARTLOVE

Wedding Bells

L. T. Feezer and Miss Helen M. Reiser were married in St. Mark's Lutheran Church on November 20. Immediately after the ceremony the couple departed for California and the West. Their itinerary included Chicago, Salt Lake City, San Francisco, Los Angeles, Alhambra, Grand Canyon, Kansas City, St. Louis, Cincinnati, then—

"Home again from a foreign shore;
And oh! it fills our hearts with joy
To see our "Doc" once more."

Miss Wagner, Pass Bureau, is wearing a four-carrot and two-turnip ring these days. Bah Jove, old Chippie! The little fellow with the bow and arrow shore am busy these days—*Rastus*.

SSH! ssh! Have you been visited by the three married burglars?

Cyrus Kearney, Frank Hermann and Harry Vick descended in a body upon an innocent, unguarded box of cigars which your correspondent, Harry Harman, left inadvertently and unadvisedly within that inner sector of that now-to-be-discovered insecure hiding place—the office desk. The victim was totally unaware of the foul designs of the married robber trio, for at the hour that the crime was committed, he was dining sumptuously at the Southern Hotel with Sir Isaac Newton, who had made his appearance by means of the Ouija Board. Had poor Harry known—ah, had he had the mere whimper, or whisper, of an idea what was to be whatteth, the cigars would have been filled gloriously, abundantly, and hot tomaleski with the copious monkey glands of red hot cayenne pepper, having the rare ability of a steaming hot firkin. But no! such was not to be. Thinking that they were in the Quartermaster's Department, the robber band returned the bands and stumps for revenue.

(To be continued in our next.)

Stork Activities

On November 30, the antediluvian bird hovered over the home of George Wilts and finally descended and left therein a baby girl. George signaled the bird some time ago and had him leave a baby boy in the vicinity of his domicile. Someone will have to walk the floor at night so—LET GEORGE DO IT.

Amateur Sports

L. B. Beck rolled three games of duckpins against our village champion, "Billy" Fowler, to decide the championship of Highlandtown. Results: Beck, average 67; Fowler, average 54. Champion Beck removed the medal from "Bill's" vest and now wears the sacred amulet. Let it be known, far and wide, that "Bill" Fowler, duckpinologist, bewails his lost charm and retires from the sporting arena—a sadder Budweiser boy. Pabst yes, Pabst no!

Hose for Sale

"Pulmanite" Mackert now assumes the role of stocking salesman. Having reaped a bountiful harvest of coin of the realm from gold-bricking his associates, "Billy" Mackert received the Beneficiary Degree in recognition of his ability to harvest huge benefits from the sale of UWEARUM hosiery. This promising hose salesman informs the public that his hose are guaranteed to wear once, after which they must be re-varnished in order to renew the line appearance.

Law Department

Correspondent, GEORGE W. HAULENBEEK

The Law Department finds itself obliged, at times, to do some unpleasant things. The law requires that a railroad company shall take all possible legal steps to collect sums of money due on account of demurrage and other like matters. Even though an agent of the company may give to a shipper a rate lower than the established tariff, the railroad is required to collect from the shipper or consignee, if necessary, the amount due.

In a recent case where a claim was presented, the head of a shipping firm returned the papers with check for the amount due, remarking that he regarded it as a hold up, and that he presumed the road needed the money, anyway. This remark was totally lacking in courtesy and politeness.

The great Napoleon declared on one occasion that the word "cannot" was not in his dictionary. After his death his dictionary was examined, and sure enough his statement was correct. The emperor had obliterated the word with red ink. "Cannot" was not in his dictionary. He was right.

"Only the wisest and stupidest of men never change." This is from the sayings of Confucius.

Our office young gentleman was ill recently, and we had to send for a lad to take his place for a little while. I liked the appearance of the young gentleman but did not have a chance to converse with him. If I had had that pleasure I feel confident that his grammatical utterances would not have given me a shock, and that he was incapable of saying, "Where is it at?"

Nearly All the Floors

In the November number of our MAGAZINE, I had a paragraph about the North Carolina girls and a reference to two young gentlemen. Do you know that one of the young gentlemen was not pleased at all with the paragraph, and I thought, "well, well, what a difficult task; what a tremendous job it is to even try to please everybody!"

I do not contemplate resigning my position as Law Department correspondent because of this. I rather like it. I particularly enjoy the comments, pro and con, of young gentlemen and a number of young ladies, bright girls, too, on the 2d, 4th, 5th, 6th, 7th, 8th, 9th, 10th, 11th and 12th floors. They appreciate the whimsies of a veteran, so why not keep at it and do the best possible?

The New Year

Here we are fully launched in the new year, 1921. I wonder if any of us have made a resolution (not to abstain from intoxicants or other forms or wickedness), but to do our best for the Company in the shop, on the train or in the office.

I have heard so much about men who declare they are going to do just as little as possible, and I have heard of office lads who decline to do this or that because they are not paid for such work. When we begin to act as though we were really a part of our great railroad organization and fully interested in it and its success, we are doing something of moment. Handling the office stationery, for instance, we should act as though we had helped to pay for it, and be just as careful as we would be if the articles really belonged to us.

I realize that this is sermonizing and the majority do not care to be lectured. The railroads have had a pretty rugged road to travel; we are not yet out of the woods, and we must make up our minds, if we are thoroughly loyal, to do everything possible to help.

Anonymous Communications

Someone sent me an anonymous communication just after the appearance of my letter in the *Baltimore Sun* wherein I advised railroad employees to save some of the good money paid to them, and thus be prepared for the inevitable rainy day.

It may be that the writer of the anonymous production has been laid off, and has now begun to realize that a balance in bank would come in very handy. Anonymous letters pay no interest, and every time I receive one makes me think of: "Every man throws a rock now and then that he would like to have back in his hand."

Our Tax Office

There are quite a number of young gentlemen employed in our tax office on the 11th floor. This is a part of the Law Department and we are very proud of it. It is a very busy place. Frederick J. Griffith, the tax agent, is an indefatigable worker. The same observation might be ascribed to his assistant, Hugh McNeil, Jr. I feel perfectly safe in giving them this designation, though they might object to so much publicity, for the *BALTIMORE AND OHIO MAGAZINE* has a big circulation, and not only goes to our men in the West but elsewhere. Mr. McNeil was one of my boys away back in the old Baltimore and Ohio Building and I could always bank on him. See where he is now!

Mr. Plummer

J. Robert Plummer, of Mr. Griffith's office, was on the sick list last fall and had to go away to recuperate. He is a competent aid to the tax office and his tabulated work is stately and correct; moreover, he is amiable and polite, and is not averse to publicity if the correspondent does not put it on too thick.

Office of General Claim Agent

I wish I had the time, I wish I had the space, to say something about C. W. Egan's office, now on the 6th floor. This office, too, is a part of the Law Department. Mr. Egan is the general claim agent. He never seems to take a vacation because he, as well as Mr. Peery and Mr. Stires, are always on hand and at work. But I shall take time some day to remark upon the value of the work this office performs. Now there!

Engineering Department

Correspondent, OSWALD EDEN

During the latter part of November and the first part of December there have been several changes in the locations of the various engineers:

L. P. Kimball, engineer of buildings, and force, is now located in Room 1303, southeast corner.

E. L. Gosnell, assistant to chief engineer, formerly located in Room 1308, now occupies Room 1306.

A. M. Kinsman, engineer of construction, who was formerly in Room 1310 with District Engineer Mather, now occupies Room 1308.

C. F. Bennett, cost engineer, and force, are now located in Room 1202.

B. S. Mace, superintendent insurance, formerly located in Room 1207, now occupies Room 1312.

District Engineer Mather's chief clerk and force, formerly located in Room 1316, are now in Room 1300.

The Baltimore Chapter of the American Association of Engineers held its annual dinner at the Hotel Emerson, on December 3, and a large number of professional engineers attended. The Baltimore and Ohio was well represented by the engineers in its various engineering departments. After the dinner nominations of officers for the coming year were made.

"Ted" Ziegfeld made a large number of Baltimoreans and Baltimore and Ohioans envious for a few days. He wore a large red nose. When asked where and how he obtained it, he would not admit anything other than that it was of the species called boil.

George P. Simpson, formerly of the Engineer of Buildings office, now holds the position made vacant by the resignation of Miss Josephine McCarthy, as secretary to J. H. Milburn, office engineer.

In passing, we might say that Miss "Joe"—as Miss McCarthy was called by her co-workers—left the service of the Road to be married. And a strange coincidence is that her sweetheart is also called "Joe."

"Gus" Hauser has designed side walls for all his beds so that he and his family cannot roll out. His home, you know, at Paradise, near Owings Mills, is in rolling country—and there are other reasons.

Someone in the drafting room made a great discovery sometime ago. He found that "Herbie" Dawkins, the man with the smoked glasses, had been working with the Baltimore and Ohio Railroad since he returned from the army. It may have been because "Herbie" is the "only" man in the drafting room who turns his back on the rest of the engineers, designers and draftsmen, said action putting him in a class all by himself. "Herbie" faces the west while all others are Sun worshippers.

The Bowling League

Sometime ago Mr. Wood, head of the Welfare Department, asked Mr. Sparks to start a bowling league in the Engineering Department. Prizes are to be awarded to the bowler having the highest average at the end of the season and also to the team. There were three teams made up, composed of men in the drafting room, Engineer of Buildings office, and cost engineer (who now comes under J. J. Ekin, general auditor). The players hold practice once a week, Saturday night, on the alleys at Carlins. Averages have been kept, but on account of the modesty on the part of some of the players they will not be published—yet. We hope though, to be able to publish them in a later issue.

Collision—Oliver

Miss Mildred Winn Oliver, daughter of Mrs. Emma D. Oliver, 1127 North Calvert Street, and Jennings Ford Collision, son of Mr. and Mrs. George F. Collision, 1837 West Lanvale Street, were married Wednesday, November 17, at Memorial Protestant Episcopal Church, by the Rev. W. M. Dame. The bride was given in marriage by her brother, Herbert Dean Oliver, of Atlanta, Ga. Mrs. Arch McLachlen, of Washington, was matron of honor and Herbert Jones was best man. The maid of honor was Miss Alice Stinson and the bridesmaids were Miss Dorothy Collision, sister of the bridegroom, and Miss Marie Miller, of Norfolk, Va. A reception at the home of the bride followed, after which Mr. and Mrs. Collision left on their honeymoon, stopping at New York, going from there by boat to New Orleans, and stopping at Atlanta, Ga., on their way home.

We didn't know why Ford seemed so much interested in weddings for a while. He watched the license reports in the daily papers, inquired of everyone if they knew of a wedding going on, we believe he called up the *News* once, and passing along the street, if he saw one, he would go in. In fact for a month or more we heard only of weddings, which he had attended. Now we know why there was so much interest shown on his part.

Cost Division

After this issue the Cost Department will probably have its notes either under a separate head or under the Accounting Department. When they moved from the 13th floor they also moved out of the jurisdiction of the chief engineer. It is only because they could not arrange with either party in time that their notes are being put in under the Engineering Department head.—Correspondent.

Our old friend Colonel "Windy" Frye honored Armistice Day by taking unto himself a bride, of the same general proportions as himself, only more so, by name Miss Mary M. Molesworth. They were "spliced" at the home of the bride's sister at Laurel, Md., by the Rev. William Harris of Washington. After the wedding breakfast, the happy couple left for an extensive trip through Canada, the Northwest and the Pacific Coast. We have received many memoirs of his trip in the shape of bottle labels from Canada, cigar bands (picked up in smoking cars) of good brands of smokes, etc. He also discovered a hotel in Seattle bearing the cognomen "Frye." Immediately upon the proprietor seeing the Colonel he decided to change the name so as not to be hit for reduced rates in the future. The department extends congratulations to the couple and wishes the Colonel the best in life and great prosperity.

Our bowling league team is traveling at a speed much below normal and holds a position in the league that is not envious. But look out for us hereafter, as our engine has been overhauled and the engineers are in good tune and full of pep.

"Jimmie" Conner is one of the luckiest men in our office. He received two tickets for the Army-Navy football game.

Our chief clerk, Guy W. Gaither, was operated on recently for Pilonidal sinus (this is not antediluvian, but actual) and we are glad to note his speedy recovery.

Office of General Freight Claim Agent

Correspondent, MISS E. T. MURRAY

A Happy New Year to everybody in the service, and may each have a full measure of the best things of life and most of all, good health.

"Cut Loss and Damage in Half. It Can be Done"

Messrs. Glessner and Schepler were in Chicago on November 15 and 16, attending the Freight Claim Prevention Congress, held by the American Railway Association, Freight Claim Division, under the auspices of the Cause and Prevention Committee, of which Mr. Glessner is a member.

In this claim prevention work it is gratifying to say that the Baltimore and Ohio Railroad was one of the first to realize the necessity of claim prevention, and in May, 1917, organized a Freight Claim Prevention Committee on each of our divisions, composed of representatives of the Transportation, Traffic, Freight Claim, Motive Power and Police Departments; also representatives from agencies, yard forces and General offices, Baltimore. Meetings have been held monthly to discuss prevention matters, which have shown results in eliminating causes resulting in loss and damage claim payments.

It will be the aim of the employees of this department to keep our coworkers on line fully advised of the various causes resulting in loss and damage claims, in order that they may follow up to eliminate or at least materially reduce them, with the view of cutting loss and damage payments in half in 1921, compared with 1920.

It has been suggested that the employees of the Freight Claim Department start a semi-monthly deduction from their salaries to be placed as a fund for buying wedding gifts. What do you think of the idea?

Does "Shad" Gainor know the difference between liquid soap and shampoo tonic, advertising matter and window display cards? If so, someone in Chicago explained it to him.

S'matter, Roberts? Why the "down in the dumps" look these days? It was only her cousin that accompanied her to see "Erminie."

Plans for the organization of the Baltimore and Ohio Railroad Duck Pin League were perfected at a meeting held on November 11 in the assembly room of the Central Building.

The office was represented by J. H. Riggan, who was chosen captain of the Freight Claim Department team. The captain gladly reports that out of nine games so far played, this office has won seven, being tied for first place, holds individual high score rolled by Mr. Ittner, on November 27, 140 pins, as well as high team score for one game and second high team average.

There are 18 teams in the League, 12 of which roll every Saturday at Carlin's at 8.30 p. m. and which are known as Division A. Division B uses alleys of the Aurora at Hamilton on Tuesday nights.

Members of the Freight Claim team are Messrs. Ellifritz, Correll, Roden, Hagerty, Miller, Ittner, Goeller, Goldsmith, McMaster and Riggan.

We hope that as much interest will be displayed by the members of the Freight Claim Department as is shown by our chief clerk, W. R. Heartt, who is always on the job at each game.

All the "sea dogs" have been giving "Skipper Charlie" Perry the cold shoulder for some little time, and at last the reason has been revealed. The skipper has gotten himself a "bus," a flivver, to be exact, and has forsaken the briny blue for the uncertainty of the "Lizzie." We all know the "skipper" is competent to navigate the waters of the Patapsco and its tributaries, and we can bear testimony to his efficiency in that respect, but he rambled in "unchartered waters" when he went out Harford Road, wandered from the "channel" and ran ashore. It is said that when he finally

Miss Grace Harris and a happy band of tourists in Colorado

"floated clear," he had used up a whole gallon of gasoline and a quart of cylinder oil while beating it back to the boat club as hard as he could go it.

We are sorry to report that J. A. Downey, Over, Short and Damage Division, has been confined to his home for the past few weeks with a nervous breakdown. The whole office joins in wishing him a quick recovery and that he will soon be among us again.

"Bob" Townsend made a flying trip to Pittsburgh recently, taking with him a supply of smelling salts and aromatic spirits of ammonia. It was later discovered that he believed in Safety First when going so far from base, and introduced by letter to one of the fair sex. Wonder which one he expected to faint, him or her?

Our congratulations to A. S. Parrish, Mailing Division, upon the arrival on December 6 of a 7½-pound baby boy. "He's already been offered a position as chief cook and bottle washer with an outside firm," says his dad. But we're retaining him for the Company.

It is not always easy to apologize; to take advice; to be unselfish; to face a sneer; to be charitable; to be considerate; to endure success; to forgive and forget; to subdue an unruly temper; to maintain a high standard;

to avoid mistakes; to admit an error; to shoulder deserved blame; to profit by mistakes; to see the silver lining. But it's always best!

The accompanying old picture will be of interest to all those remaining in the group, for two reasons: the one they can see themselves as others saw them in days gone by; the other because it was taken about 30 years ago on the roof of the original Baltimore and Ohio Building, which does not exist any more, and on the site of which the Emerson Hotel now stands.

Some of those in the picture are still in our department, namely: Taylor Myers, Edward J. Diggs, Summers Gainor, James Love and Joseph Wheeler. The others are: Frank B. Upshur, Marion B. Derr, L. B. Briers, Frank Alrich, William E. Ringgold, C. S. Knight, Edgar VanSant, William Hanson, George Chesley, James Pugh, Albert Burton, William Stisser, A. L. McDaniel, Frank Knight, H. P. Williams, Mark Pryor, E. D. Warfield, Vernon Keith, Sterling Frazer, H. W. Atkinson, F. R. Baugher, William Gross, Colin Grant, Thomas H. Stanford and Irvin King.

Epigrams of W. C. Bowhay

1. If your job were harder than the boss's, you would be drawing more money than he does.
2. Oh! how I long for the childhood days that mother made so happy with the things she purchased with the money father earned.
3. Nobody loves a fat man. That is why he is always good natured.
4. If there is no work in Heaven, someone will have to tell a plumber when he is dead. Otherwise he won't notice the change.
5. The old fashioned man who used to ask for work now has a son who goes forth to seek a position.
6. We celebrate Mother's Day once a year. But if father celebrates one night the whole family quits speaking to him.
7. The successful man uses new words when he tells his wife the same old lie.
8. Before the women voted they used to beat their husbands up every morning. Now they beat them up any old time of day or night.
9. Don't worry the boss and he won't bother you.
10. When you listen to a reformer talk you form the opinion that Hell is a local point on his line but that he has no interline billing or through rates to points in Heaven.

How many of these do you recognize?

"EVENTS"

"CARICATURES"

11. The best man in the bunch may have the worst reputation.

12. Some grandmothers can remember when the preacher used to select his text from the family bible.

In the accompanying picture is Miss Grace Norris, secretary to Assistant General Freight Claim Agent F. L. Schepler, second in line, and taken while on her recent trip to the Grand Canyon. Grace says: "The picture affords only a tiny bit of the splendor of the Canyon. One must see it to appreciate it." As is evidenced, sure-footed mules are the only conveyances by which the trip down the Canyon can be made. It takes about seven hours and covers approximately 14 miles.

Valuation Department Baltimore Office

Correspondent, E. B. PIERCE

The Valuation and Engineering Departments were given quite a surprise the early part of November when it became noised about that W. C. Coles, chief draftsman, Valuation Department, had confided to several friends his conclusion that, having come safely through the world war after eight months spent on the firing line, he could now face the hardships of married life and intended to set sail on the sea of matrimony.

Mr. Coles has been in the service of the Company 17 years, and those who worked with him had come to regard him as a confirmed bachelor; in fact, some of those in the official family when acquainted with the news exclaimed, "What, Coles? Impossible! It can't be true!" But it was both possible and true, even the date for the great event having been settled; and at high noon on the 17th of November he was joined in happy wedlock with Miss Char-

lotte Spence Bond, daughter of Mrs. Lenox Birkhead Bond of Fallston, Md.

The wedding took place in the Fallston Presbyterian Church. A delegation, consisting of Mrs. E. M. Barker, Miss L. R. Ritter, and Messrs. H. B. Dick, A. J. Janushek, W. H. Edwards and O. G. Wilbur, motored out to Fallston.

The church, which was very prettily decorated, was filled with the friends and the family of the bride, and after the wedding ceremony, when congratulations had been extended, the bride was presented with a good heavy rolling pin, bedecked with ribbon and inscribed with instructions for its proper use in subduing an unruly husband.

The new couple passed their honeymoon in New York, and upon their return re-

ceived a handsome chest of silver, the gift of our department. The presentation was both pleasing and unique. Mr. Coles, on his first day back at the office, was maliciously detained at lunch by conspirators, and when he finally reached the office found his desk decorated with silver, rice and Kewpie dolls that had been dressed a la bridal party. The only thing regretted by the whole department was the absence of Mrs. Coles.

To Mr. and Mrs. Coles we all extend heartiest congratulations, and our hope that their new life may be continuously filled with joy and happiness.

For some time the Building Branch has had a great deal of sympathy for their superior officer, Mr. Wilbur, because he is compelled to sit across from his assistant,

W. E. Coles and his wedding gift from his fellow workers

Mr. Slocumb, who has a very "ancient" pipe, which is prized very highly—by himself only. One can imagine the aroma when the "hod" is in action, and as a result the force is at a loss as to whether to buy Mr. Slocumb a new pipe or Mr. Wilbur an army type gas mask, which proved so effective against the gas attacks in the recent World War. Wanted: Ex-service man to stand by and give gas attack signal. Apply "Building Branch."

Miss Bryan, stenographer in our office, brings rosy apples to work with her. While eating one about the size of an Edam cheese, a bright youth exclaimed: When she consumes the apple it will be in cider. (Inside her.)

It is the intention of this department for the next several issues of the MAGAZINE (unless something more important presents itself, engineers being peculiar beings) to try to illustrate events that happen in and out of our department, also to make caricatures of the different members. They all all good fellows, I assure you, and mean well. We wouldn't for the world create the erroneous impression that we are casting reflections or slurs, so please remember when perusing our efforts to bear in mind the old saying "You cannot tell by the looks of a frog how far he will jump."

Printing Department

Correspondent, M. J. CONROY, Proofreader

Count 'em, boys: 1-9-2-1 = 13!

The sum of \$35.00 was contributed in December by the men of the composing room to the fund to purchase an X-ray machine for Captain John Logan's hospital on Lexington Street. This hospital is especially close to the hearts of the union printers of Baltimore, because everything there is as free as the air to the men and their families whenever medical attention is needed. It has been tried and found not wanting.

Santa Claus left a new baby girl at the home of Harry Harmeyer in December. This fine Christmas present so affected "pop" that he had to remain under the doctor's care for a few days. Cheer up, old top; wait until you hear those "famous words of famous babies"—"Da-da!"

For the last five years Harry Reay has never failed to show his appreciation at Christmas time by presenting me with a brand new, shiny, copper bust of Abraham Lincoln. It isn't an expensive gift, but the thought and spirit makes it valuable. I am saving them up, Harry, but as I can't buy anything with a nickel these days I'll have to wait two more years and then I'll be able to ride out to Druid Hill Park and gambol on the green and sharpen that new lead pencil you promised me with a blade of grass.

The annual custom of the Printing Department in contributing to the 12 Opportunities of the Baltimore News was again carried out this year. The sum of \$61.25 was realized. This shows a splendid spirit and made the holidays all the more enjoyable.

The girls in the bindery had their annual Christmas party as usual this year. Edward F. Leilich, foreman, and William E. Staines, assistant foreman, and the men of the press room were invited guests. A tree was procured and decorated and placed in a conspicuous place and gifts exchanged among the girls. Miss Lydia Brown, the forelady, was Mrs. Claus and expressed her appreciation of the splendid spirit of cooperation which exists among the girls. Miss Hattie

Carroll and Miss Cassie McAleer, two veterans in the service, also contributed to the gaiety of the occasion by reciting appropriate Christmas selections. Mr. Leilich expressed his appreciation of the splendid work of the bindery during the year and asked for a continuation of the same cooperation during the coming year. Miss Carolyn M. Brown, the "baby" of the bindery, brought the festivities to a close by reciting the following little verse, written by Miss Mabel Dressman:

This little green tree,
With its lights and its toys,
Brings back the dear days
To all girls and boys.

Though our lives may be filled
With more sorrows than joys,
We can all, in our hearts,
Be just girls and boys!

Only one accident was reported to mar our otherwise joyful holiday season. George ("Eddy") Foy was presented with a meerschau pipe several years ago as a wedding present and on each Christmas day he takes down this pipe to enjoy a quiet, peaceful smoke. But alas! Is it any wonder that a man acts mean and creates quite a scene when his wife will go and clean his pipe with gasoline!

May Good Luck and Happiness go hand in hand with you through the New Year, and Misfortune follow you—but never overtake you.

Relief Department

Correspondent, H. IRVING MARTIN

When the call comes to help the Red Cross or some equally deserving charity, the young ladies of the Relief Department always respond to the limit of their ability. We feel proud that among those who helped to raise the Baltimore and Ohio subscription of \$1,325—the largest single subscription, by the way—were three of the live wires of the Relief Department: the Misses Lillian C. Gerhold, Esther Harr and Carrie Mewshaw. There was a noticeable huskiness on the morning after, but what matters the temporary loss of the voice in such a cause?

Dr. Milholland, medical and surgical director, and his staff are now installed in the office fronting on Baltimore Street, which was recently vacated by the general claim agent.

The general bookkeeper and the Pension Division are also now located in this portion of the department. Fresh paint gives the whole place a bright appearance and all are "perked" up.

"Brer" Ball, assistant to superintendent, and chief clerk of Relief and Pension Features, with his force, takes the space vacated by the Medical Staff. This gives plenty of space and elbow room for the "Ball" bearings.

Frank Owens went to New York on November 27 to root for the Middies. That he rooted and prayed hard and well is evidenced by the score with which the Navy wiped up the Army. Evidently a victory for the "Wets" over the "Drys."

Speaking of "Drys," Dixon Thirston comes back after some days spent in New York. He was told there that the weather man is the only one who speaks of anything being "dry."

We welcome to our office flock:

Miss A. Paula Bernhardt, from Union Ship Building Company; Miss Agnes E. Jeffries, from Consolidated Gas Electric Light and Power Company; John S. Roulston, from the Crown Cork and Seal Company.

Charles Carroll Murphy
Five-year-old son of T. A. Murphy, car distributor, Transportation Department

We should have mentioned the return to our office of William Gable, who again took up shorthand work, this time as stenographer to the chief registrar. His specialty seems to be "to sit tight on the job" and "do the thing." Back again also comes "Bob" Graham who, as the "Cub" building inspector, is studying scenery on various divisions. We caught "Bob" first when he was a youngster, but when he left us in 1919 he was a well-equipped and efficient worker. He'll be just like "Dan" Shivers, leaking building lore at every pore.

Miss May Schwinger has been promoted to the position of stenographer to chief clerk, a post vacated by Roy Knauff, who takes charge of the newly created correspondence desk. To all we wish success and extend our best wishes that their relations with us be always pleasant and agreeable.

Our big husky, Baldwin, went off and took a chance with appendicitis. He has had a hard pull, but we hope soon to have him with us.

Frank Dorr, the little fellow whose mother "doesn't want him any longer," has taken Reuben Grey's desk.

It was with regret that we learned of the death of Samuel Householder's mother. Although we may not express our sympathy in adequate words, "Sam" knows that we think it.

The enfranchisement of woman has caused her to turn her thoughts to new fields of endeavor. Hist! we have with us a feminine Sherlock Holmes. She spends her evenings in the sleuthing of the carriage and delivery of mysterious packages—that is, those evenings not devoted to the study of palmistry. If she only puts into this work the "pep" that characterizes her movements, she will have many memorable acts of detection to record. Has she chosen a historian to record her deeds? S-s-h!

The pension clerk tells us of a recent visit from John Keyser, retired painter, of South Curley Street, Baltimore. He carries 78 years and carries them well. He came breezing in to get some information; he left full of the thought that the pensioner who visits us always gets the glad hand of welcome.

Our society reporter turns in this item: "I hope to tell yah:" those from the Relief Department who attended Carl Smith's subscription dance enjoyed themselves. It was some party. "You tell 'em!"—pretty girls galore, music divine, and good fellowship a-plenty.

Those vouching for the above are: the Misses Schwinger, Helfrich, Berrett, Harr and Brune; Mrs. Wiglesworth; Mr. and Mrs. Brooks; Mr. and Mrs. Bucheimer; Messrs. Greene, Swikert, Gable, Thirston, McCann, Stevens, Wilson, Lanahan, Desverreaux, and Carl Smith, himself.

Telegraph Department

Correspondent, DELLA M. HAIN

Many messages received in this office are not followed with the symbol, in accordance with instructions. STOP! LOOK! AND THEN LOOK AGAIN FOR THE SYMBOL!

And Bishop waking in his berth, return trip from Newark, Ohio, mumbles:

"Fe, fi, fo, fum—

"Wasn't he a joke, that Englishman?"

Stork news—During the past month three storks hovered over as many homes of employees of the Telegraph Department. Those who received congratulations are J. B. Hovermill, C. R. Yost and W. S. Stricker.

R. F. Miller, chief clerk, told us some interesting stories related to him by Engineer James Dennison, who is an authority on dates, facts and figures. Mr. Dennison can give a good history of the Newark Division.

Poor Millie! Just because she is SO afraid, a little mouse persists in living very near her rendezvous, the files. Whenever the tiny thing comes out for air the office is favored with some light opera by our Millie.

And now think, we must wait almost a whole year for good old Santa Claus again! But our next big holiday will be Easter, so here's wishes for an "eggy" one.

Blind people are sometimes fortunate. Imagine the touch system on the adding machine, and tell me—do you ever peep? Talking of accounting, of course.

Uncle Frank used to "kick" about the location of his desk, but for some time he has been "mum." We all know why.

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

With sincere regret we report the death, on December 5, of Mary C., daughter of James P. Landerkin, interline settlement clerk. The heartfelt sympathy of his fellow workers is extended Mr. Landerkin in his great loss.

Exceptionally good attendance records were established during the first part of December. On several days we had a perfect batting average, while on several others there was only one absentee. Let the good work keep up.

A special duck pin contest arranged between representative teams of office of Chief of Tariff Bureau and this office resulted in a decisive defeat for the Tariff boys by the following scores:

Coal and Coke. 451 474 469—Total 1394
Tariff. 407 434 396—Total 1237

Miss Florence Bennett's trip to Philadelphia is shrouded in deep mystery. From what we understand, much was done and seen in the City of Brotherly Love. Even the animals at the Zoo seemed to be affected with that brotherly love stuff, as one in particular took a great liking to Miss

Bennett and showed its affections by becoming quite sociable. Miss Bennett will not tell whether it had two or four legs, whether a centiped or quadruped. Whatever it was, the animal showed good judgment in picking out Miss Bennett, who has a broad and pleasing personality. (Wish we had a picture of that Zoo episode.)

At this writing (December 10), the fifth round of our office bowling league has been completed and shows the team standing as follows:

	WON	LOST	PER CENT.
Kilkenny Kats. . .	9	6	.600
Wild Cats.	8	7	.533
Sadas.	7	8	.467
Excelsiors.	6	9	.400

We have 54 members at the present time, 24 active and 30 passive. With the semi-monthly dues collected, we expect, at the end of the season—probably by the last of March or first of April—to have a big feast at one of the hotels.

Great interest has been exhibited so far. The boys are all keyed up and waiting for Wednesday night to roll around. With the teams pretty evenly matched, we will be much disappointed if this condition of friendly rivalry does not continue until the final bell rings.

We are sorry that conditions prevent our inviting the ladies to take part in this proposition. A man's game, it was deemed best to stick strictly to that idea and make it "stag" all the way through.

You men, who take an interest in the game but do not participate, are invited to be present any Wednesday night at the Y. M. C. A. alleys to root for your favorites.

Weekly Brown Derby Winners

November 10. Burns—One on a spare and one in the box.

November 17. Limpert—Four pins to tie the score and he gets two.

November 24. Moore—One on a strike; one on a spare and two on a spare. Grand total of four pins on three marks.

December 1. Moore and Hartwig share the honors for this week, each showing the high total of 59 pins for one game.

December 8. Just mention Madam Butterfly Cigars to Mr. Brauer.

Auditor Disbursements

Correspondent, JOHN C. SVEC

Ask Miss Edna Mitchell and Raymond Turner how they liked the Garden Theater on November 27.

The clerks of the office are wondering why two young ladies are frequently seen in New York. Come on, Marie and Reba, take us along with you on your next trip.

Who says "Jimmy" St. Leger rides the Charles Street busses now? "You're all wrong," "Jimmy" says, "I don't go out there any more."

Sunday, November 7, was quite an exciting day for one of our payroll girls. Then, too, she was absent on Monday, and on Tuesday morning she was exceedingly nervous, and peculiarly left handed. Oh! come on, Eda, tell us how you did it.

Another young lady succumbing to the malady is Miss Ida V. Susemihl. Say, Ida, it's a dream, 'fess up and let us all in on it.

One of the young ladies of the office recently made a flying trip to Chicago. Jean, tell us what's the attraction.

Speaking of country school teachers, ask John Barnes why he goes to Bethesda, Md.

All the ladies of the office, especially Francis, seem to take a delight in vamping the former movie actor, recently employed. Watch out, Harry!

We have received word from two of our former fellow clerks, Mrs. George Buckingham (nee Miss Carrie Schenkle) and Mrs. J. C. Fowler (nee Miss Anne Brennan) of a visit paid them by the stork.

We announce the marriage of Miss Leah V. Brown of this office to N. Clay Harrington, of the Comptroller's office, on Tuesday, November 16, at the home of the bride's parents, 225 N. Calhoun Street. The bride had as her bridesmaid Miss Hilda Delcher; the flower girl was a niece of the bride, Miss Louise Heath. Mr. Harrington had as his best man Mr. Walter Stump. A reception followed immediately, after which they left on the 4 o'clock steamer for Boston. They will be at home after December 1 at 3913 Norfolk Avenue. Congratulations!

Another wedding is that of Stanley G. Beeman to Miss Grace Smith, of Baltimore, on November 25, at Alexandria, Va. They have the best wishes of all his fellow clerks.

It is with the utmost regret that we announce the death of the sister of one of our fellow employees, Miss Helen McLaughlin, on November 21.

Office of Auditor Merchandise Receipts

P. H. STARKLAUF, Correspondent

The season of feasting and well wishing has again been with us and with the years should weld an inseparable bond in our official family, as it had a tendency with the ancients before the advent of the Nazarene. With the New Year comes the old ROLL CALLS. Of course, you have decided to line up with your "YOH!" (Military for "Here" or "Present.") So when the Red Cross girl comes around you won't be among the absentees and you will surely assist the needy ones. Unfortunate children, un-nurtured mothers, the aged and infirm are making the appeal to you.

To facilitate adjustment, a Correction Account Bureau has been inaugurated, with George F. Creswell as head clerk in charge.

The Bowling League has been started and is fairly well under way, this department furnishing three teams.

Much rejoicing in the Householder household—the stork pays his respects, and everybody is smiling. You said it the first time, yes, it's a boy. Congratulations, "Eddie"! Suppose you're going to teach him tricks on the cornet?

It has come to our notice that when some employees are finished looking over the

"Toby"

MAGAZINE, the copy finds its way to the floor, cupboard or waste basket. Why not get into the "Pass it on to a Friend Club." Few people, comparatively speaking, know of the existence of the MAGAZINE, and we can send it to a friend as a suggestion that we have a live Railroad. If you don't care to do that, why not return them in good condition to the Editor, for I'm sure he can always make good use of them. (You bet. —Ed.)

Miss Betty Ward has returned from an enviable trip to Pike's Peak, Denver, Colorado Springs, the Great Lakes, Boston, and Maine resorts.

The dance of the Mt. Royals came off per schedule on December 13 at Schanze's Hall. Notwithstanding the inclement weather a good representation of our office force was present. Messrs. Doron and Gawthrop of the Interline Settlement are to be congratulated on the excellent manner in which the affair was conducted. The younger element in the office, other than being pleasant to each other, have an excellent opportunity to be friendly and know and understand each other better at social affairs of this kind. I. M. Hudgins, Revision Department, furnished music.

Have you seen the latest in eyes? "Blushing Joe" of the Interline Settlement, when he approaches the comptometer crew. Don't you think so, Eleanor?

Cold weather is fast approaching, and with it "flivvers" and their kindred are put up for the winter. No more Annapolis Road nor Braddock Heights. Out to the movies we go. The little Hagerstown Two and its cute little engine are put away snugly in its moth ball bag. How about it, "Bekkie?"

There are chests and chests, but our noon-time sewing circle seems bent on hope chests. Now we see the Misses Dorothy Dryden, Ethel McConnell, Mary Hauk, Carolyne Miles, Hilda Silbereisen, Vertalee Nieman, and a host of others making particular use of every possible moment in betterment of needle craft.

Unsigned missives left in or on your correspondent's desk in his absence are passed up. Somehow some one BLANK wants to boost some one else, and while we are in a receptive mood, the subject deserves such consideration that one must lend a good word to "TOBY," who always has a real smile for me and mine. She is a girl who will prove as handy in the kitchen as she is in the parlor, and whose fingers are as nimble in running scales on the piano, whether classic or popular airs, as they are on the typewriter. This is just a passing remark on "TOBY," who is a credit to our organization. See the accompanying photograph.

T. S. Everitt and J. Harry Ries have returned from what should prove a successful business trip in the South.

Showers (other than Rain)

One of the pleasantest thoughts in after years is the thought of congenial surroundings and agreeable companionship in one's place of employment. Some of our young ladies, popular among their respective sets, were accorded different kinds of showers, linen, crockery, glassware, etc., at the home of friends as noted:

Miss Estelle Blades at the home of Miss Hilda Erck, North Broadway, November 29. Miss Mary Hauk at the home of Miss Caroline Miles, Park Heights Avenue, December 8. Miss Ethel Barling at the home of Miss Edna Koller, Harford Road, December 14. Gifts were done up in the

Irene and Vernon Leonard
in Tom Thumb wedding

style of Rocks in a path "Rocky Road to Matrimony." Games of various kinds were played: "Honeymoon," "How to Manage a Husband," etc. Not having attended any of these affairs, don't know exactly what happens, but we're stretching our imagination.

The game of hearts still goes on: Thomas I. Hess, Machine Room, to Miss Sadye A. Lyman, September 11, by the Rev. Hugh Monaghan, Sts. Philip and James Church. Dewey Zimmerman, Revision Department, to Miss Lanora L. Ogle, November 25, by the Rev. Isaacs of the M. E. Church. Miss Sarah Levy, Revision Department, to Harry L. Morgenstein, December 12, by the Rev. J. Greenbaum, at Fink's Hall. They will reside in St. Louis, Mo. Miss Mary Agnes Hauk, Interline Settlement Bureau, to Frank J. Kroeger, formerly of the Revision Department, December 15, by the Rev. Bernard J. McNamara, at 4.00 p. m. in St. Martin's Church. Miss Ethel Barling, Interline Settlement, to Ohle Herder, December 17, at the parsonage, Christ Church, by the pastor, Rev. L. M. Zimmerman. Miss Mildred Estelle Blades, Interline Settlement, to William F. Leaverton, December 18, at 5.00 p. m., at East Baltimore Baptist Church, Orleans and Luzerne Streets, by the Rev. Samuel Bowser. They will reside in Chestertown, Md.

Auditor Passenger Receipts

Correspondent, G. FRED MILLER
Secretary to Auditor

System

Nations are built upon System; organizations thrive upon it, and great business enterprises collapse and become bankrupt without it. The fall of Babylon was due chiefly to lack of System; armies and navies are lost when they fail to observe it, and no project, small or large, ever realizes its greatest possibilities without the use of System.

What a great opportunity railroads offer for the use of System! The railroad with the smallest number of accidents, highest efficiency in its train schedules, finest record in Loss and Damage (and our Road is one of them), must necessarily have an excellent working System.

No department or bureau of a railroad can function properly without System. And

every employe, realizing this, should be constantly on the watch for some new idea that will save time, unnecessary labor and expense, and make our Road a better and more efficient servant of the public.

Every supervising officer has an opportunity to improve the working conditions under his jurisdiction. The better the conditions, the more accurate the work produced. After making the first improvement, others follow more easily.

Having a close view of the working conditions, employes are often well qualified to see just what is needed. In cases of this kind it is their duty to bring the thing which can be righted to the attention of the man in charge, that proper investigation may be given, and the System which is needed put into effect.

System can be brought into use on each individual desk of a department, and the clerk who uses System in his daily work will surely go on to greater things.

System meets all emergencies.

S—System
Y—Yields
S—Success
T—Trust
E—Efficiency
M—Money

Our good friend and chief clerk, G. W. Jentner, and his genial wife went to Virginia for a short rest and vacation during December, after a strenuous summer of hard work. The Statistical Department will now endeavor to solve the problem, *i. e.*,

One filled coal bin, minus unheated house for two weeks, equals saving of how much in dollars and cents?

Moral: Visit your friends during the coal shortage.

The boys of the office are letting all their fine girl companions steal off and marry. Our little titian haired beauty, Miss Ethel Harris, has resigned her position to reign supreme over her own domain. She is to be married in the near future and our good wishes and congratulations are extended.

Recently a man stood on the top of the bottle of the Emerson Tower and endeavored to grasp an airship as it flew by. Ensign Hiltz, gazing thoughtfully at the man, was seen to silently clasp his hands and offer a prayer. I have never discovered whether the prayer was for the success of the man's venture or otherwise. "Limousines furnished for all occasions," is our friend Hiltz's battle cry.

Mrs. Roy Payne, formerly Miss Miriam Swartz of this office, is the mother of an eight pound girl. The fame of the Auditor Passenger Receipts office goes marching on. There's surely quite a difference between checking tickets and walking the floor during the wee hours with your onliest child on your arm, chanting the latest lullabies.

Miss Louise Le Compte has also decided to desert us and venture upon the matrimonial sea. This will be of interest to the office as Miss Le Compte will marry M. W. McBurney, who at one time was a member of this department. Mr. McBurney served as a lieutenant overseas during the late war. All good wishes are extended to our friends.

Our fellow clerk, Harry S. Phelps, has been reappointed Notary Public.

"Dick" knows every farmer up the Old Main Line and just how much cider remains on each farm, but he never invites a friend to make the trip with him.

It won't surprise us if little "Josie" Frisby decides to run off any day and take unto himself a wife. You can't fool us, "Joe." Get the license before they advance again.

walker" on account of "Joe, Jr." falling heir to a wisdom tooth. "Joe, Jr." is six months old.

A party was given on the evening of December 1 to announce the engagement of I. A. Houseman, trainmaster's clerk, and Miss A. Yenny, both of West Brighton. Congratulations, "Ike!"

Miss M. Petrone, stenographer, Pier 22, has been transferred to stenographer to Car Accountant W. J. Ivers, St. George, S. I.

Miss Elizabeth Adams has been employed in the Lighterage office, Pier 6.

Henry J. Shaeffer is studying to fit himself for the position of traffic manager. "Henny" has high ambitions.

Baltimore Terminal Division

Correspondent, MARTHA V. FOX
Car Record Clerk

Cupid has again been in our midst and this time it was Miss Lillian Mills, our telephone operator, who on Thanksgiving Day was married to Mr. Bertrona Blizzard. After the ceremony the couple left for Washington and points South. If good wishes can bring it, they have a happy life ahead of them.

M. P. Faherty, formerly of Mt. Clare, has accepted position as chief clerk in the Trainmaster's office, Riverside, vice E. M. Hughes, now secretary to the superintendent. We wish Mr. Faherty much success in his new undertaking.

F. H. Carter, assistant chief clerk, Superintendent's office, went hunting on Thanksgiving Day. From the size of the gun he took, it looked as though he had borrowed a machine gun from one of his army friends, but from the recent reports we find that he found his game in Lexington Market.

C. M. Shriver, assistant superintendent, has decided to make Riverside Tower his headquarters. We hope that he will like his new home as well as the old tenants there.

"Daddy" Gaither is back with us again, after spending a short vacation in Sharpsville, Pa. "Daddy" still wears his cheery smile and we all miss him when he is away.

Barrett Weis, stenographer, Mr. Hoskin's office, has accepted position as secretary to Superintendent White. We wish Mr. Weis much success in his new position.

Mr. Berghoff, Agent's office, has school every morning between the hours of 9 and 10 o'clock, writing on the large blackboard the list of all steamers at Locust Point. He is some teacher.

James Walker has been promoted lately, going around on the water front, taking list of what the steamers are performing. Keep up the good work, "Jimmie."

The oyster supper at the Baltimore and Ohio Y. M. C. A., which was attended by most of the men at the office, on Wednesday, November 4, did not agree very well with our Mr. Pringer, the Beau Brummel of the office. He was sick at home for several days after it. Must have been the good, rich food they served him.

The firemen at Locust Point will soon be in their new quarters on the second floor at Pier 5. We hope that they will like their new home. The clerks in the office are hoping that the Railroad officials will leave the Pullman car intact (the headquarters of the Fire Department at the present time), so that they will be able to take a smoke during their lunch hour this winter, and not have to stand on the corner outside of the gate.

The recent election was certainly a hard blow to Messrs. Monaghan and Dudley, of the Agent's office. Everyone is wondering what has become of their beautiful smiles, which they always wore but which they lost on the morning after election. They took the news very hard.

Locust Point

Mr. Forthman, of the Commonwealth Band of Sykesville, and Joseph Patrick ('nuf said) made heroes of themselves at Pier 5 on November 20 by extinguishing a fire started in office. They are both looking for Carnegie medals.

Our friend George Steen, of Furness Withy Co., has a new machine (auto). Some of the boys in Locust Point figure it is to be used as a free bus down town.

If this weather keeps up we will soon see Messrs. Krek and Lubinski walking from East Baltimore to work on the ice.

Mr. Gilbert, foreman, waterfront, is all swelled up over his new office. He will be looking for a stenographer next.

Mr. Garnett, foreman of cranes, has put in a rather lonesome time during the past month trying to follow the two cranes about; he doesn't hear them whistling any more. One good thing, he hasn't had to walk as fast as he used to since getting one of those coats they wear in Alaska.

Recollections: "The Old Bunk Car."

The accompanying photograph is of Joseph Parr, who has a record of 40 years' consecutive service in the employ of the Baltimore and Ohio at Locust Point. For 16 years he was in charge of the Locust Point

Joseph Parr

Coal Piers. Prior to this time there were 13 separate and distinct coal piers. Twelve of these have since been demolished to make room for other enterprises, the latest of which is the American Sugar Refinery. The only coal pier now in operation is the old Consolidation Coal Company's, which is used for local, bay and bunker business.

In the early stages of handling coal at Locust Point, cars containing 15 tons of coal were considered top notchers, and vessels carrying 600 tons of coal were placed in the same category.

The original 13 coal piers were owned and operated by various coal companies and representatives, most notable among whom were Charles F. Mayer, former president of the Baltimore and Ohio Railroad, who, after retiring from this position, became president of the Despard Coal Company; Charles K. Lord, former vice-president of the Baltimore and Ohio, who, after retiring from railroad work, became president of the Consolidation Coal Company; John K. Shaw, Enoch Pratt, James Boyce, S. S. Lee, Cyrus Hamilton, Frank Ehlen, Messrs. Black, Sheridan and Wilson, and Alexander were others. H. Crawford Black and Frank Ehlen are the only surviving operators and representatives at the present time.

At the time prior to the erection of the Curtis Bay Coal Piers all the coal for export, local and domestic use was handled at Locust Point, Mr. Parr supervising our interests in connection with the operation of these piers. Before entering the Coal Department Mr. Parr was employed in various departments in the offices at Locust Point under the direction of W. T. Moore.

In Memoriam

The uncertainty of life was never more vividly portrayed than in the sudden death of John C. Galloway whilst in the witness chair of the City Court on December 17, testifying in a habeas corpus case.

Apparently in perfect health, he left the office at Locust Point about 9.00 o'clock for the court and in less than two hours his spirit had flown.

It was our privilege to have been associated with Mr. Galloway for the past three or four years at Locust Point Station and to find him a perfect gentleman, one of nature's noblemen; ever ready to assist those in trouble, a faithful friend and a loyal and efficient employee.

Mr. Galloway was a member of the Brotherhood of Railway Clerks and his fellow employees beg to extend to his bereaved family their heartfelt sympathy in this, their hour of affliction, reminding them of the fact that whilst his death is a loss to his family as well as to his friends and fellow employees, it is his gain, and that:

When the shadows of eve are approaching,
And the merciless waves are in sight,
E'en on the sands of Life's Shore encroaching,
'Tis then He says—"Let there be light."
—J. R. G.

Agent's Office, Camden Station

Correspondent, W. H. BULL

Little "Dan" Cupid is among us again and his darts have made many hits. Those joining the married "folks" are: C. W. Stromberg, Accounting Department, and Miss Margaret A. Rourke, on November 4.

Miss Catherine Litchfield, Billing Department, and Mr. LeRoy Miller, on November 30.

A. L. Knorr and Miss Theresa M. McNeive on November 24. Mr. and Mrs. Knorr left immediately after the ceremony for a honeymoon trip to the West.

To all of these we extend our congratulations and best wishes.

The Co-operative Stores, Inc., owned and operated by Baltimore and Ohio Railroad employees have opened their first store at No. 300 East Fort Avenue, and it is hoped that all of those who own stock, those who purchase stock, and their friends, will take advantage of the opportunity and purchase their groceries from this store. Automobile delivery to all parts of the city. Phone South 248-W.

Stock may be purchased by paying an organization fee of \$1.50. \$5.00 per share is the cost of the stock, the minimum holding to be six shares, and it can be had of any of the officers. The store is proving very successful and it is hoped that many readers of this item will subscribe.

Mt. Clare Shops

Correspondent, Miss MOLLIE ALBRECHT
Secretary to Superintendent

Superintendent of Shops

By the time this MAGAZINE reaches you, our former record clerk, Miss Helen M. Davis, will have been married, and probably be living in a pot of honey. On Saturday, November 27, Helen left us, and on this same day, at 6.30 p. m., several of the girls at Mount Clare gave her a linen shower. The girls were: Miss Oliver and Miss Offutt of the Stores Department; Miss Hintenach of the Tool Department; Miss Oursler, secretary to the accountant; Miss Fisher, secretary to Mr. Bowler, and her sister; Miss Button, of the Mechanical Engineer's office; Miss Schafer and Miss Albrecht of the Superintendent's office. A buffet supper was served the girls by the bride-elect's

mother (and the girls enjoyed it so much that they haven't had to eat much since). Mrs. W. Lee Morgan (formerly Miss Mildred Goetzinger, secretary to the superintendent at Mount Clare) and her sister were also at this supper, and all of her Mount Clare friends were glad to see her again. Mrs. Morgan enjoyed the excitement very much, as she informed the party that all they had in Zelenople was scenery and fresh air. Although the weather was wet outside, it didn't dampen the girls' spirits at all, and everybody had a good time.

Famous Sayings of Famous Fellows at Mount Clare

T. R. S.: Tell Mr. Jinglebacher to come in here.

(The boss can't remember anybody's name.)

C. W. S.: That makes it bad.

T. J. C.: Good-night shirt.

Learn Piano!

Please mention our magazine when writing advertisers

Miss Mildred Hardy and Roy Hook, decided to settle all differences and get married. They were coupled on December 6, and everybody at Mount Clare wishes them all the happiness in the world.

Our messenger, Arthur, spent quite an interesting time in New York recently. Arthur simply took a train from Philadelphia, arrived in New York, spent about twenty minutes in the station, and started back on the next train to "Phily." Arthur, dear, will you please tell us, in an early issue, your wild experiences in New York, the dangers and pitfalls of a messenger, alone in a big city, etc., etc.

Stores Department

Cupid is still on a rampage at Mount Clare, especially in the Stores Department. There is a rumor that Miss Mary Duke expected a diamond for Christmas, and Miss Thelma Offutt is already sporting one. Miss Duke has not let us in on the date of the wedding as yet, but we expect to kiss Thelma good-bye "some time in June."

While we are talking of Cupid and his works, we might as well mention that Mrs. German (better known as "Jennie") is also wearing a diamond. We are told that the lucky guy is "Johnnie" Kurtz! Is that so, "Johnnie?" Speak up, honey, don't be bashful!

Well girls, you can rest assured that each of you will receive a good wedding present from "Willie" O'Neill. I am told that when you are married, he will open up his heart (and the stationery cupboard), and at least give you each a pencil.

We can't imagine what "Pete" is going to do when Thelma leaves our midst. Wonder whom "Pete" will argue with then? He is always nagging Thelma about the women trying to compete with the men, and failing, but at least Thelma is his match when it comes to arguments. Stick to it, "Thel," old girl. Soon you'll be married, and then you can show "Pete" who's going to be boss.

N. E. Alexander, one of our old employees, who recently retired from service at Mount Clare, underwent an operation at the University of Maryland. We are advised that he is doing nicely, and hope that he will soon be able to get around again, as we miss his coming in to see us frequently.

Please take my advice, and if you haven't any spare money, keep away from "Johnnie" Kurtz. John's pet hobby now is collecting money for orphans, and if he doesn't soon stop, we will have to start a fund for "badly bent" clerks and stenographers.

We wish to correct a statement which was made in a recent issue of the MAGAZINE. H. E. Litchfield, formerly chief clerk to the storekeeper at Mount Clare, has been transferred to Brunswick, Md., instead of Keyser, W. Va.

The accompanying photograph is of Catherine Gertrude Shoemaker, the nine-year-old daughter of H. Shoemaker, storekeeper, Mount Clare. We are of the opinion that if Catherine keeps up that cunning smile and the mischievous twinkle in her eye, she will be a real "vamp" in a few years.

Baltimore Division

Correspondent, W. H. TARR, *Superintendent's Office*, Camden Station

On December 4, the division handled the Marines from Quantico, Va., to Baltimore for the "Gob-Leatherneck" football contest on the grounds of Johns Hopkins University at Homewood.

Miss Margaret Hill has the best wishes and congratulations from her fellow clerks

in the Superintendent's office. She became Mrs. W. H. Foard on September 12. There are one or two other young ladies of our office force who contemplate matrimony, but we just do not know the dates.

All rotating members of the Divisional Safety Committee were retired with our December meeting. Safety Agent William D. Lenderking made an address, thanking the members for their work.

Wilmington

Correspondent, CHARLES W. HAMILTON

A. D. White, our genial freight agent, was remembered at the Christmas season by his appreciative office employees with a fine umbrella. Mr. White was equal to the occasion in the hearty and happy personal thanks which he accorded to each and all the donors. The true Christmas spirit rang out in all that was said and done, all leaving their work for the enjoyment of the holiday in the happiest frame of mind.

A notable evidence of the alertness and observation characteristic of President Willard came to the notice of the Wilmington office recently. Mr. Willard, in passing the sidings here, noticed an empty freight car. He immediately took the necessary steps to find out just how long this car had remained in that position since the unloading had been completed. His inquiries reached the Wilmington officials in record time. Prompt reports were at once required of the operating force, who in turn were happy to be able to say that the car had been in condition to move again for just 45 minutes previous to the time it was noticed by Mr. Willard. We trust that we may always be found equally ready with so favorable a report as to our operating efficiency, Mr. Willard. No matter how humble the capacity in which we serve our great Baltimore and Ohio Railroad, the Wilmington employees of the System take pride in the loyal efficiency and fidelity due our Company from them and heartily rendered.

Mr. Charles Palmer, Freight office, Wilmington, is the happy recipient of an "All Lines" pass, earned by his long and loyal service.

Martin Lawless, our Freight office demurrage and car service clerk, was delighted to receive an annual division pass as a token of the appreciation of the Company

Catherine Gertrude Shoemaker

Four girls and a boy from the offices at South Wharves, Philadelphia, Pa.

for his faithful and continuous attention to duties for the period of time necessary to secure such recognition.

George W. Bumpas, district freight agent, Wilmington, was recently married to Miss Mary McKee. After the return of the happy couple to Wilmington from Nashville, Tenn., a charming post-wedding reception was given by Mr. and Mrs. Bumpas at their home, 802 W. Ninth Street. Those present included nearly all of the employees of the freight office forces of both the Baltimore and Ohio and Philadelphia and Reading Railroads at Wilmington.

The entertainment consisted of music and dancing. Refreshments were served and the evening was made particularly pleasant by the witticisms for which Mr. Bumpas is famous. Mr. and Mrs. Bumpas told of the happy honeymoon. Mrs. S. E. Bumpas, mother of the groom, whose home is in Nashville, celebrated her 69th birthday on Thanksgiving Day. The event was made particularly pleasant for her by the homecoming of her two sons, George W. and James L., each of whom brought home a brand new daughter-in-law for mother to see. Mr. James Bumpas was recently married to Miss Winnie F. Davis, a descendant of "Jeff" Davis, of Civil War fame.

Mr. and Mrs. Bumpas were the recipients of many useful and beautiful gifts from their friends in Wilmington, for which they expressed their appreciation. We congratulate the happy couple and wish them all imaginable happiness.

Philadelphia

The accompanying photographs show a part of the force at Pier 22. The picture showing the four young ladies was taken on the Baltimore and Ohio tug, "Convoy," docked in the Delaware. The girls are, left to right: Miss Hatterer, Miss Brittingham, Miss Berkowitz and Miss McGinley; the gentleman in the picture is James Robinson. They are a part of our clerical force. In the other picture you may see our worthy watchman, A. Attridge, and O. L. Bossom, receiving clerk. This photograph was taken after an enjoyable day's outing in Washington.

Washington, D. C., Freight Station

Correspondent, W. L. WHITING, *Chief Clerk*

It is very pleasing to be able to appear in the first issue of the New Year with a clear record in at least one respect; that is, in connection with the recent No-Accident Campaign. We feel justly proud that we were privileged to report each day as follows: "No one to report." There can be no better report to make than that, and it shows that there was watchfulness displayed. We look forward to the same vigilance during the coming year, so that, should there be another campaign, we shall be fully prepared for it.

Commissary Barracks, Green Spring
Left, Hans Fostel, tieman; right, C. J. Carney, clerk, Commissary Department

increase production. Among those more prominently connected with the operation of the Plant at one time and now in other fields, some familiar to many of us, are recalled: P. C. Conley, Peters, Sparner, Giffhorn, Burns, Kellar, Shreve, Carrico, Frederick, Turner, Tebbby, Wedge, Fisher, McKibbin, Watkins and others; last, but not least, we pay tribute to C. W. Lane, supervisor in charge during construction and the first four years of operation.

The bright life of little Miss Lugine Crites, seven year old daughter of Tieman and Mrs. Allen Crites, came to an untimely end on Thursday morning, November 24, by the accidental discharge of a rifle.

Little Lugine was born at Romney, W. Va., on May 31, 1913. She leaves, besides her parents, three brothers and one sister.

Banked with flowers the little casket was tenderly borne to its last resting place by six little playmates: Masters William Kaylor, Lawrence Adams, Jesse Teeters, Estel Wagner, Edward Wagner and LeRoy Allen. Funeral services were conducted by Rev. J. O. Thomas. The little body was laid to rest in Springfield Cemetery to await the call of Him who said, "Suffer little children."

GREEN SPRING, W. VA., Nov. 30, 1920
To Our Friends:

On behalf of myself and little ones I desire to express our appreciation and heartfelt thanks, through the BALTIMORE AND OHIO MAGAZINE, to all those employees who were so kind to us during the illness and death of my husband, Purnell J. Brill.

(Signed) Mrs. P. J. BRILL.

Miss Jennie Smith

You knew Miss Jennie Smith.

A consecrated woman who stands near Heaven's gates.

Have you one of her last books?

Did you read the account of it in the Veterans' Department of the October MAGAZINE?

If not, read it and get one.

Fifty-two copies to date are now in the hands of employes or their friends at Green Spring. We feel we can recommend nothing better than you can do.

We could not help but notice the epidemic of marriages in "Among Ourselves" for November. At least 29 were officially reported and several others rumored. In order not to be entirely outdone we have two to report ourselves, one an *old country* romance:

Robert Glenn Brown, son of Mr. and

Mrs. T. J. ("Jeff") Brown, of Keyser, well known to Cumberland Division employes, and Miss Mary Ellen Robinson, youngest daughter of Fireman Helper and Mrs. G. W. Robinson, Green Spring, W. Va., were quietly married at the M. E. Parsonage, Glenn Street, Cumberland, on Thursday, November 18, by the Rev. Boyd Sweitzer. Immediately after the ceremony the young couple left for a brief honeymoon in eastern cities, and upon their return were given a reception, followed by a delightful wedding supper at the bride's home. The groom, formerly employed here, is at present employed by the Western Maryland Railway, at Ridgely, W. Va.

Joseph Loknar, one of our best tiemen, and Miss Fannie Jenkio of Krain, Czechoslovakia, were married by Deputy City Clerk M. J. Cruse of New York, in the courthouse, on November 20. The bride is the youngest daughter of a prominent farmer of Krain, adjoining "Joe's" old home, and the wedding a sequel of childhood romance. Miss Jenkio left her home on October 14, traveling over 4000 miles alone, arriving at New York on November 20, her wedding day. Mr. and Mrs. Loknar were presented with a beautiful set of silverware upon their arrival and have set up their own home in cottage No. 5.

Five hundred and eighty-three cars of cross-ties, in addition to several cars of other material, were received and released without delay during October, our largest month for 1920. A daily average of over 23 cars for 25 working days. November dropped only one car behind, with 582 cars of ties.

C. M. Gurtler has been appointed fireman, succeeding P. J. Brill, deceased. E. F. McBride has been appointed engine watchman, succeeding Mr. Gurtler.

E. D. Robinson was appointed retortman in place of P. C. Kenney, assigned to other duties.

The house occupied by Grant Kesner, tieman, at Springfield, was destroyed by fire on November 17. Mr. Kesner was fortunate enough to save his household goods with but slight loss.

C. L. Kittle, treating inspector, has been transferred to Central Creosoting Company's Plant at Finney, Ohio, in same capacity, succeeding C. E. Tebbby. Mr. Kittle has been connected with the Plant since July 30, 1917, and leaves a record worthy of special mention.

A. E. Irving has moved into the house formerly occupied by Mr. Kittle.

As we came to work this morning, November 9, we observed a fireman fill his tank without running water all over the tracks and onto the tie yard. It was so unusual that we immediately made an item of it. It CAN be done!

The accompanying photograph is of our commissary and barracks, showing well the care that is taken of our grounds. The commissary is divided as follows: Dining room, kitchen, commissary storeroom and sleeping quarters. The barracks have 10 private sleeping rooms, fitted with double bunks, and a large rest room.

C. J. Carney, standing at corner, is the Chicago commissary clerk in charge; Mrs. Carney is assistant. The man on the left is Hans Fostel, champion tie carrier at the Plant.

Heard Around the Tie Plant Daily

Good morning, both retorts running?
What time will they be off?
What's the delay?
Uh-ugh-ugh. (Clearing throat.) Why didn't you report to the office?
Well, let's get busy. We gotta do something.
How many did we get yesterday?
How many loaded and released today?
Which way can we load today?
What time didja get home last night?
You can't load six trams in a 34 foot car.
Who in h— got that pipe wrench?
Let's see the requisition book.
Better order some more pipe.
Who's got the gang pass?
How many men off the Branch today?
I'll have to change my D. G.
Betcha we handled more cars today than any other yard engine on the System.
Yessir, I betcha.
How's 31?
Good night!

Statistical

Investigation by the Forest Service of the United States Department of Agriculture shows that the use of wood preservative has increased to a large extent in the United States.

In 1919 there were 65,556,247 gallons of creosote, 2,412,592 gallons of paving oil, 102,011 gallons of miscellaneous preservatives used in the United States, in addition to 43,483,000 pounds of zinc chloride, the largest quantity of this preservative ever reported by the industry.

The material treated consisted of cross-ties, poles, wood blocks, cross arms, construction timbers, and miscellaneous material, largely for railroads, mines and telegraph and telephone companies. The total amount of wood subjected to preservative treatment by the 108 plants that were active during 1919 was 139,878,584 cubic feet, or 17,265,694 more than the previous year. About 80 per cent. of this wood consisted of railroad cross-ties.

Safety First

Through the No-Accident Campaign with "No Accidents" was a great reward for our effort. To win the pennant makes our reward greater. Realizing what one accident meant to us, our men were ever alert and now point with pride to the final report of the campaign.

Keyser

Correspondent, H. B. KIGHT

W. A. Bender, formerly general car foreman, Keyser, has been promoted to master car builder, with headquarters at Cleveland. L. O. Miller has been appointed general foreman, vice Mr. Bender.

E. W. Dawson, chief clerk to Master Mechanic Hodges, has been granted a fur-

lough. Mr. McGinnis is filling the job vacated by Mr. Dawson.

The west wing of the Rest House that was damaged by fire some time ago, has been remodeled and is ready for occupancy. C. H. Barnett, who has had 22 years' experience in the hotel and restaurant business, is now in charge of the Rest House, and has made a good showing in the short time that he has been here. He is careful to see that everything is kept clean and sanitary, and furnishes good wholesome food to the "boys." He has had a lounging room fixed up where the fellows can lounge around and read or write or discuss the topics of the day. Mr. Barnett deserves much credit for the way in which he is conducting Keyser's Rest House.

W. F. Braden was a pleasant visitor here a few days ago. Mr. Braden, while here, arranged for the showing of the latest Safety motion picture, entitled "Bulletin 70," and secured the use of the Knights of Pythias Armory for the night of February 19, in which this picture will be shown. The picture deals with "Safety First," and it is the desire of the Company that all employees see it. After the picture, an entertainment, under the direction of Mr. Atkins, chief clerk to the terminal trainmaster, will be given by local talent. The rest of the evening will be given to dancing, the music being furnished by an orchestra which is composed of Baltimore and Ohio employees, and led by Professor J. Harrison Isles, master mechanic's force. There will be no admission charged. Everything is free, so do not fail to attend.

On top of the car barn, Keyser, is an air whistle and a tin flag used for the purpose of notifying the First Aid crew, when someone is injured. In case of such an accident, someone runs to this place, and by means of the air whistle, informs the First Aiders. Having blown the whistle, the informer pulls a string attached to the tin flag and, by certain signals, informs the First Aid crew, who hurry direct to the spot where the injured person is, giving him first aid and making him as comfortable as possible until a doctor arrives or he is taken to the hospital. Many employees who preach Safety First fail to practice it, but should they take a walk up around the shops they would soon see that Safety First does pay. Look at that pair of smashed goggles hanging in the little office window up by the Triple room. A flying rivet head did that—broke it into many pieces—and the man who was wearing them was not injured. He wasn't long getting another pair on either, for he realizes that Safety First is "above everything else." And all around one can see signs asking you to do that which is safe for the welfare of yourself, your family and of your fellow man. Practice it, fellows, it pays.

Miss Marian Davis, secretary of the Keyser Chapter of the Red Cross, is asking for old clothes for the poor of the town. Miss Davis has visited many homes and knows their wants, and will appreciate any such donations. The Railroad boys never have turned down a worthy cause, and they will not do it in this case. Look around your homes, and if you find some clothing not in use or that you do not need, leave it at the Baggage Room for Miss Davis.

B. M. Carrico, chief train dispatcher, has been promoted to trainmaster, with headquarters at M. & K. Junction. Mr. Carrico is known as one of the Road's most efficient trainmen and his rise in the ranks on the local division has been steady.

Charles Carnell, brakeman, Third Division, and Miss Hattie Gerard were married

in Cumberland during the early part of November. They left for a two months' visit to New York and other eastern cities. They will reside in Keyser.

James Sample, brakeman, and Miss Effie Ravenscroft were married on November 17. The ceremony was performed by Rev. W. B. Wilt. "Jim" and "Mrs. Jim" kept the marriage a secret for a few days, but finally decided to make the formal announcement. Mr. and Mrs. Sample will reside in Keyser.

Connellsville Division

Shop, South Connellsville

Correspondent, WILLIAM R. HAMMER

A son was born to Mr. and Mrs. French Durst on December 11, James A. Durst. French has not decided whether to make an undertaker or a pipefitter out of him.

J. L. ("Ham") Quinn was disappointed in not getting to Mount Clare Shop to inspect Mallet engines. Well, "Ham," don't feel too badly about it for we will soon need another No. 9 and you can go and inspect it.

Frederick Zimmerman has been appointed foreman of roundhouse on the 11 to 7 trick. Mr. Zimmerman has been with the Company since 1911. He is a genial fellow and is well liked by the men. Here is wishing you the greatest success in your new job, "Fred."

The other night C. H. ("Buck") Smith tore through the shop as though he were going to a fire. After the excitement had subsided we found that the shop mascot (a little white dog) was up on the table eating "Buck's" lunch. You should be more generous, "Buck," and feed the mascot. Then he won't have to steal your lunch.

E. B. Small, genial machine shop foreman, 11 to 7 trick, has it on the Italians for eating spaghetti. He sure can hide the long, slippery sticks. Last month he gave a chicken and spaghetti dinner to the gang and you should have seen the feed disappear. "Eddie" is figuring on having another dinner soon, but if Owney King goes along again we won't get any of the chicken. He got it all the last time, at least all the bones were piled up at his plate.

W. J. Britt is enjoying bachelor life at present, for his family is sojourning in Florida for the winter.

Sloan's Goes Right To The Aching Spot

You can just tell by its healthy, stimulating odor, that it is going to do you good

THOUSANDS of men and women, when the least little rheumatic "crick" assails them, have Sloan's Liniment handy to knock it out. Popular over a third of a century ago—far more popular today.

That's because it is so wonderfully helpful in relieving external aches and pains—sciatica, lumbago, backache, neuralgia, over-strained muscles, stiff joints, weather exposure results. A little is all that is necessary, for it soon penetrates without rubbing, to the sore spot. No muss, no stained skin.

All druggists—35c, 70c, \$1.40.

Sloan's Liniment

Pain's enemy

Send No Money

Snap this bargain up right now before it is too late. Only limited quantity. Amazing underwear bargain. Greatest offer ever made. **Two Guaranteed \$4 Each, Wool Unionsuits \$5.75.**

Save big money on your underwear. Send postcard or letter today—this very minute, for these 2 beautiful perfect fitting heavy weight gray elastic rib unionsuits. Full cut. Seams reinforced and overcast. **Send No Money**—pay only \$5.75 on arrival, no more; we pay delivery charges.

We Guarantee to refund your money if you can match these 2 wonderful wool unionsuits for \$8.00. Order this amazing bargain this minute before it is too late. Just give name, address and breast measure.

Pittsburgh Division

Correspondents

E. N. FAIRGRIEVE, *Car Distributor*, Office of General Superintendent
ELMER H. STOLTZ, Pittsburgh Freight Station

In our notes in the last issue of the MAGAZINE, we promised to "expose" some of the inmates of the "Love Hospital," several of whom were severely wounded by "Old Dan Cupid" and some of whom succumbed to their wounds.

Philip Anthony McMahon, erstwhile secretary to the superintendent, Pittsburgh, and now a citizen of the neighboring village of Connellsville, and Miss Agnes Loretta Kenney, she of the winsome smile and sunny disposition, who used to dispense passes in the office of the superintendent at Pittsburgh, were united in the holy bonds of matrimony at Sheridan, Pa., the bride's home town, on November 18. The ceremony took place in the early hours of the morning, and a number of people in the general offices at Pittsburgh were invited to attend. One young lady in particular, Miss Lucey, decided to accept the invitation and to get a line on how weddings are performed. She arose long before daylight, and proceeded, in due time, to the scene of the ceremony.

After the "Tie-up" (that's a knotty one) "Phil" and Loretta (we can't get used to Mr. and Mrs. McMahon) proceeded to the bride's home, there to partake of the wedding breakfast, and Miss Lucey came to work. Say, when she hit the office, the radiance of her expression outshone the strongest radium ever invented, and her joy knew no bounds—and "that ain't all."

The happy couple, following the usual custom of newlyweds, came down to the station for No. 16. A number of girls had gathered to give the newlyweds the "once-over" and to wish them luck and a bon voyage. Following the usual custom, and according to all rite, rule and ceremony, the girls began to "smutz" the happy pair, but Miss Lucey, in her eagerness to plant a good smacker upon the groom's waiting lips, made a blind grab and kissed an innocent by-stander in the excitement.

Now when this first event above recorded was made a reality, there appeared as one of the contestants one Jere Lowney, who hails from the village of Connellsville, and who has been smitten, lo! these many years. Jere, acting in the capacity of best man, was rehearsing, as it were, for the great crowning event of his own life, which took place just one week later, out in little Old Hazelwood, where he also took unto himself a wife.

Miss Emma Ford, daughter of Conductor M. J. Ford, was the other half of this bar-

gain bill, and this happy couple departed for a month's sojourn to "bill and coo" in the sunny clime of Florida.

Beechview—just through the hole in the hill—sounds strangely familiar, that is, we all thought so on the morning of November 16. Several of our "Hello" girls and good-looking brakemen from Glenwood betook themselves to that charming suburb on the night of the 15th, and we understand they had a big time at the home of Fireman "Joe" Bell. Judging from the mirth that issues when one mentions Beechview to one of our Hazelwood exchange girls, it must have been "some" party. We surely are glad you enjoyed it, Teresa, and only regret that we couldn't find the place or we would have been there too.

The next night we removed our activities to a more remote section—Braddock. This time it was a barn dance, one of those regular old timers. This affair was held by the Carnation Club, of which our old friend John Haverty is president, having as his assistants several firemen and brakemen of Glenwood yard.

The night upon which this affair was held at Braddock was the meanest we have had so far this year, snow and slush ankle deep, and this served to keep a great many away. We understand there will be another one of these dances held soon, and those who were there only hope to have as good a time as they did in Braddock.

E. A. Keefe, employed for a number of years in the Local Freight office at Pittsburgh, has been appointed agent at Dawson, Pa., effective November 6.

Recently we saw quite a number of our telephone operators lugging huge bundles away from the Exchange and it was thought that the contents of these mysterious bundles might have been hats. Not so, gentle reader, the secret is out, they were hams and bacon. Why do the operators all

like ham and bacon? If you know, tell it to Day, tomorrow.

Why are all the girls getting their hair bobbed?

Because they have nothing left to take off. How about it, Miss Kenney?

There is a certain young lady employed in one of the offices of the building who has been melancholy of late, and, although her name is not Mary, we fear this condition is due to the loss of her little "Lamm" which used to cavort, until recently, in the District Master Mechanic's office in the capacity of assistant chief clerk. Mr. Lamm has been transferred to Cumberland as shop clerk. We're not going to tell who the young lady is, but just watch the expression on her face when she sees this.

The Baltimore and Ohio City Office Bowling League mentioned in our last issue got off to an auspicious start, and up to the present writing nine games have been played. Team "D" with eight wins and but one defeat is leading the league. All of the rest of the teams are keyed up to a high pitch and promise to make the league leaders hustle if they are to hold their position. Enthusiasm is keen and indications point to a successful season.

The ladies have since organized a league, and have rolled a set of three games up to the present time. The spirit of rivalry is intense here also, and they are going after the pins just like the fellows. Say, Brother, if you want an hour's good enjoyment, take a jaunt down to the Club alleys some Monday evening where these matches are pulled off, and we guarantee you will be well paid for your effort.

There has been a Welfare Club organized among the employes of the Pittsburgh Division, the object of which is to hold entertainments, etc., for the enjoyment of the members. Committees have been appointed to draft a constitution and by-laws, and the following have been elected to office: president, Miss Kate Beck, Terminal Agent's office; Miss Ward, of Mr. Clarke's office, vice-president; Miss Melvin, Division Accountant's office, secretary; Mr. Kerb, chief clerk to Mr. Magill, treasurer.

Here we have photographs of two of our headlight maintainers: C. R. Reese, Allegheny, Pa., and H. M. Hartman, 10th Street Terminal, Pittsburgh, Pa. Each is doing fine work at his terminal. Mr. Reese's foreman says that he doesn't know what it is to have a headlight failure; taking smiles into consideration, we don't believe that Mr. Reese has much trouble. Mr. Hartman is making a fine showing on the equipment at 10th Street, and now has everything shining there, where failures and delays are things of the past.

Yard Engine 1536, Ellwood City (see note)

Yard Engine 1514, Ellwood City (see note)

The accompanying photographs show engines 1514 and 1536 in yard service at Ellwood City. Crew on 1514, right to left: Dunbar, Mincier and Wallace, brakemen; McNeal, conductor; Isabella, hostler on tank, and Engineer McMullen in cab.

Engine 1536, from right to left: Stevenson, Hudspeth and Myers, brakemen; Sutton, conductor; Goodman, fireman, and Engineer Lefever in cab.

C. C. Glessner, general freight claim agent, recently received the following letter from Agent C. H. Smith of Chicora, and was so pleased with the unusual interest and evidence of the cooperative spirit displayed that he sent it to the MAGAZINE office with request that we print with the other notes from this division:

CHICORA, PA., December 18, 1920.
MR. C. C. GLESSNER,
General Freight Claim Agent,
Baltimore, Md.

Dear Sir—Your Bulletin No. 61 received and carefully noted. I am glad to be able to say that we are particular to watch all of the points that you bring out that are applicable to this station.

May I suggest a circular to agents calling attention to possible damage to freight if ears set off for partial unloading are not properly re-stowed before they are allowed to go forward?

Another practice that we follow here is the requiring of at least two marks on each package, even if we are compelled to place additional marks on each package ourselves. I find that we are seldom in receipt of advice of shortage on freight we have forwarded since we adopted this practice five years ago.

These suggestions and the above note are only to show you that your excellent Prevention Campaign bears fruit, and to advise you that we are cooperating with you as heartily as possible to bring down the claim burden. Your statistics of claims paid thus far in 1920 were startling to us. We will do our share to cut it in half—or more.

Yours respectfully,
(Signed) C. H. SMITH,
Agent.

EIGHTH REVISED POCKET EDITION

Locomotive Breakdowns And Their Remedies

By GEO. L. FOWLER

Revised by WM. W. WOOD, Air Brake Instructor

292 Pages (4 x 6 1/2)

Price \$1.50

Fully Illustrated

The new pocket edition of "Locomotive Breakdowns" has been revised by Wm. W. Wood, the well-known railroad expert, which is a sufficient guarantee that this work represents the best practice of the present day and is exhaustive in text and illustrations.

It is out of the question to try and tell you about every subject that is covered in this pocket edition of Locomotive Breakdowns. Just imagine all the common troubles that an engineer may expect to happen sometime, and then add all of the unexpected ones, troubles that could occur, but that you had never thought about, and you will find that they are all here, in this Up-to-Date Edition of "Breakdowns," with the very best methods of repair.

CONTENTS:

I—Defective Valves. II—Accidents to the Valve Motion. III—Accidents to Cylinders, Steam Chests, Cylinders, and Pistons. IV—Accidents to Guides, Crossheads and Rods. V—The Walschaert Valve Motion; Accidents that May Happen to the Gear. VI—Accidents to Running Gears. VII—Truck and Frame Accidents. VIII—Boiler Troubles. IX—Defective Throttle and Steam Connections. X—Defective Draft Appliances. XI—Pump and Injector Troubles. XII—Accidents to Cab Fixtures. XIII—Tender Accidents. XIV—Miscellaneous Accidents. XV—Compound Locomotive Accidents. XVI—Tools and Appliances for Making Engine Repairs. XVII—Air Brake Troubles. XVIII—The Pyle-National Electric Headlight. XIX—Rules, Tables and Other Information.

Baltimore, Md.

Well known at Grafton

PARKERSBURG, W.VA., November 20, 1920.

Dear Mr. Editor: I want to tell you (if you have any room on the pages of our good MAGAZINE for it) about the only time in my 18 years' service with our good old Baltimore and Ohio that I ever had the swell head to an extent where my hair actually stuck out like quills on a porcupine. Cause:—On the evening of the 17th, Caller "Jim" Burnes, at Grafton, handed me a message stating that I had an 8¾-pound baby girl down at the City Hospital in Parkersburg, where my wife had gone on some business or other. Now if a message like that wouldn't swell the bean of any "Hogger," especially when he is past 40 years old, and had about made up his mind that he would have to order from Sears-Roebuck, John Smith, Montgomery-Ward, or some other mail order house, then win out like I did, "Oh, Boy!" All I could do was make the old 2820 gobble up that 89 freight and do the shimmy-shake for home. Will send you a picture some time soon.

Yours truly,

H. J. MEEK,

Engineer, Monongah Division.

Some one must have told Engineer Meek about my experience. Though not 40 years old, I'm close enough to it to know just how he felt.—Ed.

Clarksburg, W. Va.

Correspondent, V. A. LYON, Assistant Ticket Agent

The *Sunday Telegram* of Clarksburg has the happy habit of booming business for our Railroad as well as for our town by means of inserting at the top of its title page little jottings such as this one, which appeared in the issue of October 31:

FREIGHT—Clarksburg is the largest freight receiving and distributing center on the Baltimore and Ohio Railroad between Camden Station, Baltimore, and Cincinnati.

In the accompanying photograph you will see some of the girls who help to make the folks happy at the Freight office. They are, left to right: Blanche Freeman, abstract clerk; Mary A. Grosscup, freight waybill clerk; Inez Cogan, bill clerk; Jennie Mowrey expense clerk; Mana Byrd, waybill clerk; Monnie Underwood, rate clerk.

Earl Van Horn, night yardmaster, has accepted a position in the same capacity at Fairmont, W. Va., H. R. Harper succeeding him here.

We are pleased to announce the marriage of our friends Oden Leatherman and Miss Kathleen Dove Koon. They were married at Buckhannon, W. Va., the home of the bride, and left Clarksburg on No. 67 that night for a honeymoon to Canada and Niagara Falls. Mr. Leatherman is an operator at

"MO" Tower and is quite popular among the Railroad employees. We extend to the couple our best wishes and hearty congratulations.

Born on November 12 to Assistant Ticket Agent and Mrs. Vernon Lyon, a little girl, Margaret Jane.

G. Fury, first trick operator, "MD" Tower, has left for his southern home in Indrio, Fla. C. E. Ogden succeeds him.

Sturgeon ("Bob") White went to Washington, Pa., to spend Thanksgiving and to witness a football game between West Virginia University and Washington and Jefferson. He came home with a heavy heart; West Virginia had lost out.

We are glad to welcome back into our circle Okey Marshall, yard conductor, who spent four months at Ranger, Texas, because of ill health. He is now back on the job and is looking fine.

Fairmont, W. Va.

Many of our readers will be delighted to hear of the wedding of Engineer Robert William Brennan, of Fairmont. On Wednesday, November 24, Mr. Brennan and Miss Bertha Angela Schuler, of Wheeling, were united in matrimony, the wedding taking place in St. Joseph's Cathedral, Wheeling. Miss Katherine Brennan, niece of the groom, was bridesmaid, and the groom was attended by Mr. Alphonse Leconte, of Fairmont. A niece of the bride sang an "Ave Maria."

The bride wore a traveling suit of blue velour with trimmings of beaver, and a blue hat to match, with a corsage bouquet of bride's roses and lilies of the valley. A wedding breakfast was served at the Windsor Hotel, and the happy couple left for Atlantic City and other points. After December 1 they will be at home at 707 Ogden Avenue, Fairmont.

The bride is the daughter of Mrs. Sara Schuler, Wheeling, W. Va., and the groom is a very popular Railroad man. Mr. Brennan, although quite a young man, is a member of the Baltimore and Ohio Veteran Employees' Association. Our hearty congratulations and good wishes are extended to the happy couple.

Ohio River Division

Correspondent, MAUDE M. MOORE

It was indeed a sad parting when, on November 15, R. E. Waid, motive power accountant, left the services of the Baltimore and Ohio. We extend to him our best wishes for a successful career in the insurance business.

We are glad to have Carroll O'Neal, leading transportation time clerk, back among us once more, after an illness of over eight months.

Ira B. Foster entered the service as a stenographer on November 12 and was married on November 20. Rather quick work, isn't it, Ira?

Ruby (speaking of a friend of hers):

You know him, don't you, Donald?

Donald: What was his name before he was married?

Mr. Catt has been ill of an attack of the flu. We are glad to report that he is with us again.

M. H. Mohler, inspector of accounts, is now on special duty in Baltimore. Seeing the country, eh, Myron?

E. L. Peters is the new motive power accountant in the Division Accountant's office, succeeding R. E. Waid.

Norman Harrison has finally located his stolen Ford, after offering a reward of \$50.00. He was able to bring it in in a hand bag, the remains consisting of four spark plugs and tire pump. Rather an expensive Ford.

The drive is still on for MORE CAR MILES. Watch us!

"Wren" Graham has made a wonderful discovery. After much thought and consideration we have decided to give you all the benefit of it. November, 1919, consisted of 31 days.

Charleston Division

Correspondent, M. W. JONES, Secretary to Superintendent, Weston, W. Va.

The No-Accident Campaign has come and gone. It was a foregone conclusion that the Charleston Division would be the winners, and we were. First on the System and first on the Eastern Lines. Some record! We are proud of the pennant, not so much for its beauty and the honor of having won it over all competitors, as what it stands for. It shows that every man and woman on the division had the interests of Safety at heart, and that they showed their interest in a practical way. If the campaign resulted in the saving of even one life, who will say it was not worth while? Let's now get down and have a No-Accident Campaign all our own, every day of the year. We have shown that we can do it.

A big meeting was held in Weston on November 13, at which some 600 employees, with their friends and families, were present. The principal speaker was Governor John

Gloom chasers at Clarksburg Freight Office

J. Cornwell, of the State of West Virginia. The Governor is an excellent speaker and gave us an interesting address, telling of his early start on the Railroad many years ago, and of what he has tried to do for Safety during his term of office. At the present time Governor Cornwell is conducting a No-Accident Campaign throughout the entire State, and in all industries. The hearty support of all Charleston Division employes was pledged to him. Superintendent W. Trapnell was chairman, and other numbers on the program were vocal and instrumental solos by our employes and friends.

We are all much interested and pleased to learn that Governor Cornwell has been elected a member of the Board of Directors of the Baltimore and Ohio Railroad. Our heartiest congratulations are extended to him.

Major Richard Brooke, division engineer, has returned from his vacation, spent in his old home in Virginia. What with the loss of bridge 40-C, and the defeat of Governor Cox, we feel sure he was fully entitled to the two weeks' rest he took.

Assistant Superintendent Kinton has also returned from his vacation, which he spent in parts unknown. We have not yet heard the result of this hunting trip, but assume we will hear some tall "bear" and other stories before long.

That Safety work on the Charleston Division is not confined to the grown-up people, is proved by the photos, one of which appears in the Children's Department, of Miss Gertrude Conley, daughter of our supervisor on the South End, and the other of Miss Geraldine Hostetler. On November 23, a large open meeting was held in the Y. M. C. A. at Gassaway, at which these two young ladies assisted. A large number was present, the assembly room of the Y. M. C. A. being far too small to accommodate the crowd. During the evening a telegram was received by Superintendent Trapnell, who acted as chairman, announcing that the Charleston Division had won the pennant. This news was greeted with enthusiastic cheers. All credit to our Gassaway people, who helped to a large extent in winning the banner. Others who assisted at the entertainment, and to whom our thanks are extended, were the Rev. Herold, the Rev. C. L. West, Mrs. Sanders, the Rosenberger-Keener-Wood-West quartet, and Mary Fink. During the evening the Gassaway Band rendered appropriate selections.

Miss Mary Collins, Weston, has been appointed clerk in the office of Superintendent Trapnell, vice Miss Rice, appointed secretary to division engineer.

Miss Bertha Van Dyke, Gassaway, has resigned. She has been replaced by Miss Floy Yokum, of Elkins.

R. A. Tull, general car foreman at Gassaway, has resigned. He has been in the service for many years, and our hearty good wishes go with him.

Miss Viola Hickman, Trainmaster's office, recently spent a day in Pittsburgh. On being interviewed by the reporter for the *MAGAZINE*, she declined to state for publication whether she was purchasing a trousseau or Christmas presents. We may, however, draw our own conclusions, especially as we observe she spends much of her free time at Grafton. "There's a reason."

Messrs. Baldinger, Davidson and Marsh attended a meeting of the West Virginia District mechanical officials at Grafton recently.

Congratulations are extended to a new telegrapher in our midst. A son recently

arrived at the home of A. Teskey, "The Gassaway Wireless" man at Weston.

Mrs. G. M. Leach has asserted her seniority as agent at Gassaway. F. E. Friend has bid in Gilmer.

F. M. Garber has been appointed general car foreman at Gassaway, vice R. A. Tull, resigned.

John K. Cogley has been appointed division freight claim representative at Weston, vice C. M. Criswell. We welcome the newcomers to our family.

Miss Irene McCormick and Miss Trix McDermott recently visited Charleston for the purpose—we are told—of doing their "winter shopping." How did they come to get on a C. & O. train with a Baltimore and Ohio pass? How was it they were the only ladies in —(?) Ah, that is another story. Then, to cap the climax, they came to Buckhannon on train 58, went to the New Valle Hotel to spend the night, and the hotel caught fire—some chapter of accidents, what? Much could be written of this trip, but as they are both good friends of ours we will let them down easy. Full details will undoubtedly be given by Trix, however, if a personal application is made to her. Those interested please apply *in person*. Letters ignored.

The correspondent has just returned from his vacation, during which he took a tour around the United States, for which reason any errors in this month's notes should be overlooked. While absent he visited Kane, Pa., where he left his wife and son, proceeding to New York, Buffalo and "through Canada" (without stopping) to Chicago and Cincinnati. He also had the pleasure of calling at the office of the *MAGAZINE* in Baltimore.

Relief Dispatcher D. F. Millbourne was absent for a couple of days around November 2. He says he went to vote at his old home. But we know very well he can't vote in Huntington. Therefore, this is just an excuse. We know where he went, but we don't know the reason, although we should be much pleased to meet her.

VOSE

The Piano Magnificent

Superb in construction, perfect in tone qualities, magnificent in its beauty, the Vose Grand Piano at its moderate price will appeal strongly to those who will investigate carefully before buying a piano.

Vose & Sons Piano Company

1020 Massachusetts Ave.,
Boston, Mass.

Division Accountant Severns will open his Accounting School again in a few days. A good attendance is hoped for. The good work Mr. Severns is doing along this line should be appreciated, and there is no surer way to show that it is than to fill his office every meeting night.

We have learned with sincere regret of the death of Superintendent E. V. Smith, of Wheeling. Our heartfelt sympathy is extended to his family. Superintendent Trapnell, with other Railroad officers, attended the funeral services at Kent, Ohio.

JUST PUBLISHED

THIRD REVISED EDITION

The WALSCHAERT and Other Modern Radial Valve Gears for Locomotives

By WM. W. WOOD, Air Brake Inspector

245 Pages (5 x 7½)

Fully Illustrated

PRICE \$2.50

WITH the adoption of the Walschaert Valve Gear on nearly every modern locomotive in America, this book fills a place of real interest and usefulness. By a careful study of its pages, one can THOROUGHLY understand the Walschaert Valve Gear, as the author takes the plainest form of a steam engine—a stationary engine—in the rough, that will only turn its crank in one direction—and from it builds up—with the reader's help, a modern locomotive equipped with the Walschaert Valve Gear, complete.

THE CONTENTS OF THE BOOK ARE DIVIDED INTO FIVE PARTS

THE FIRST DIVISION contains an analysis of the Walschaert Valve Gear.
THE SECOND DIVISION treats on the Designing and Erecting of the Valve Gear.
THE THIRD DIVISION has to do with the actual work of the Walschaert Valve Gear on the road.
THE FOURTH DIVISION is composed entirely of questions and answers on the Walschaert Valve Gear.
THE FIFTH DIVISION deals with the Setting of Valves with the Walschaert Gear, the Hobart-Allfree Valve and Valve Gear, and the Baker-Piloid Valve Gear in its original and improved form.

The book is fully illustrated, and a novel and interesting feature of the book is the folding diagrams with cardboard valve models, by means of which the actual operation of the valve under the influence of the Walschaert motion can be studied.

The rebuilding of Bridge 40-C, Gauley Line

On the morning of election day, November 2, at 1.45 a. m., word was received at Weston, that Bridge 40-C, near Arnold, on the Gauley Line, was burning. Engines with fire fighting apparatus and the division officers started out immediately, reaching the scene at 4.00 a. m. The fire was under control at 5.00 a. m., but the bridge was practically destroyed. Our photos show some of the work of reconstruction. During the work all trains were detoured over the Elk Line via Buckhannon, Hampton, Adrian and Orlando. The bridge was one of the highest on the division, being between 70 and 75 feet high, and about 200 feet of it was destroyed. The work was completed under the direction of Superintendent Trapnell, Division Engineer Brooke, Master Carpenter Walters and Trainmaster Deegan, in one week. The cause of the fire was not ascertained.

This neatly piled assortment of materials is an illustration of how Storekeeper P. H. Remalay keeps our storehouse at Gassaway.

The regular monthly meeting of our Division Safety Committee was held at Weston on November 13, all members and several visitors being present. We had the pleasure of having as our guest at this time, Miss Margaret Talbott Stevens, associate editor of the MAGAZINE, and Governor Cornwell, who dropped in and shook hands with all the members. A committee consisting of the Misses Viola Hickman, Margaret McCormick and Madge Hinzman was appointed to meet and take care of Miss Stevens, and we hope she had a good time. Anyway "Aunt Mary" was very welcome on the Charleston Division, and we all hope that she will come soon again. (Note—You bet I had a good time, an' some o' these days I'm a-comin' ag'in—Aunt Mary.)

Our Freight Claim Prevention meeting was held on November 20, and was unusually well attended, being the best meeting we have had for some time. Claim Prevention is a matter of great interest on this division, and all the boys are working hard together to help the good work along. E. J. Hoover, agent, Buckhannon, is the chairman; J. K. Cogley, division claim representative; Samuel Strachan, division freight agent; J. P. Ryan, agent, Weston; J. D. Kennedy, agent, Clendennin; F. E. Friend, agent, Gilmer, and many others were present. Any of these gentlemen will be glad to have advice and suggestions as to Claim Prevention at any time, as also will Superintendent Trapnell.

Roy Sergeant, inspector of accounts, finds it necessary to visit Gassaway occasionally. Perhaps you know the reason? We do.

1920 will have gone by the time this MAGAZINE reaches our readers and we take this opportunity to wish to everyone on the division a very Happy New Year, and every possible success for 1921. Don't forget the

ten commandments of the Charleston Division:

1. SAFETY ABOVE EVERYTHING.
2. Be loyal.
3. Prevent claims.
4. Save coal.
5. Don't waste anything.
6. Be efficient.
7. Give a good day's work for a good day's pay.
8. Be courteous.
9. It's the voice with the smile that wins.
10. Don't "Pass the Buck."

The Bowling League on the Charleston Division is hard at work, with the following officers:

P. D. Marsh, president; L. Berry, vice-president; J. P. Ryan, treasurer; W. C. Borneman, secretary.

On this division we have five teams, known as follows:

Freight House Team, No. 1; Superintendent's Office, No. 2; Division Accountant, No. 3-A; Division Accountant, No. 4-B; Dispatcher's, No. 5.

A percentage was kept of these teams and the 10 highest men selected to represent the division in the System League. The two teams are as follows:

(1) Carpenter, F. G. Cutright, Sergeant, Schide, Shoemaker; (2) Norman, Fisher, Summerfield, Nichols, D. T. Cutright. Substitutes: Downey, Seymour, McOsker, Borneman. Both teams are using the regular small wooden pins, with three balls,

and are governed by rules as set forth by the Welfare Department. Some very good scores have been made so far. The first team on Friday last averaged 106 pins to a man—Sergeant 109, Shoemaker 106, Schide 111, and Carpenter 101.

The question of the Community Welfare Club is being given attention, and Superintendent Trapnell has appointed the following committee to work with the Welfare Department in its formation: Chairman, C. W. Dixon; S. W. Pickens and M. W. Jones. We expect to be able to tell you all about it next month.

Wheeling Division

Benwood Shop

Correspondent, ANGELA J. APPLEGATE

Car miles, car miles,
We should smile,
We've had our cars moving,
For quite awhile.

F. M. Garber, the widely-known and well-liked car foreman, who has been at Benwood for a number of years, cast a gloom over the whole Benwood Terminal, especially the office and car yard, when he was promoted to Gassaway. Mr. Garber's kind deeds and pleasant smile won him the hearts of all the employes, who presented him with a chest of silver, wishing him good luck and God-speed in his new undertaking. H. D. Campbell has been appointed car foreman. We all join in wishing him success.

Our deepest sympathy is extended the family of Acting Yardmaster Daniel Nitengale, who was killed while performing his duties on the night of November 17 at Benwood Yards.

John Stamm, Coal Billing Agent's office, Holloway, has accepted a position in the Storekeeper's office, Benwood.

Chief Dispatcher and Mrs. W. L. Cockrell have gone to Cuba for an indefinite time.

Mr. and Mrs. "Doc" Brown have returned from Pana, Ill., Mr. Brown's home town, where they spent Thanksgiving. "Doc" is some sportsman and enjoyed quite a few hunting trips while away. Baltimore and Ohio car 43976 brought the results of his efforts back to Benwood, and his many friends benefited thereby.

Storeroom at Gassaway, W. Va., a credit to Storekeeper P. H. Remalay

The work of installing the lights at the Wheeling Coach Yards is under way and adds quite an improvement to the yards.

W. E. Mouse, boiler foreman, Benwood, received some very ugly burns about his face and head recently while lighting off engine 880. We are glad to report at this writing that he is getting along nicely and will soon be able to resume his duties.

J. Gatewood is on the sick list and George Stein has been filling his position.

Coley Ney, chief clerk to Mr. Bowden, and C. E. Shepard have returned from a trip to Canada, where they spent their vacations.

Of all the girls that ever did live,

Sarah Strong and Thelma Smith are the best,

And anyone else but these two girls,

Would seem to Harold and "Vic" a pest. Yet, what these girls say is the law of the land,

The boys know them well; and jump at each command.

J. L. Cusack has accepted a position as clerk to Road Foreman Walsh, vice J. A. Mitchell, promoted to the Division Accountant's office.

Ralph Gandy, our material man, Spends all the time on line that he can. Fairmont is where he longs to stay, There he can spend both night and day. And the only reason we can tell Is that he may be with his little Nell. When he is sad and things look blue, The only thing we can tell him to do, Is to board a train, bound for that town, So he can spend his hours loafing around.

Western Lines

General Offices, Cincinnati

Correspondent, W. H. SPILLE, *Pass Clerk*

District Master Car Builder C. M. Hitch and Supervisor of Safety Appliances J. W. Curran were tendered an agreeable surprise on December 10 at the Grand Hotel, Cincinnati. Mr. Hitch has recently been transferred from the Northwest to the Southwest District to succeed Mr. Curran, who was appointed supervisor of safety appliances on the Western Lines.

After a series of appropriate speeches, the Southwest District car forces presented Mr. Curran with a bag of gold coins, while the Northwest District car forces presented Mr. Hitch with a Ford sedan, together with a leather portfolio from the District Master Mechanic's office, Cleveland, and a Masonic watch fob from the Car Department employees at Painesville. The two latter departments had not been given the opportunity of participating in the presentation of the automobile, and wished to show their appreciation for Mr. Hitch's services on the Northwest District. The selection of the machine as a present to Mr. Hitch was the desire of the employees that Mr. Hitch and his family be able to view the picturesque scenery of the Blue Grass State.

Mr. Curran's gift came as a reward for his faithful services as master car builder. Mr. Moorehouse, in making the presentation speech, spoke of the splendid endurance of Mr. Curran and of the appreciation of the Baltimore and Ohio of Mr. Curran's faithfulness. Mr. Curran was always known to be first at the office in the morning and the last to leave at night. He is one of our popular officers on the Western Lines. In concluding his address, Mr. Moorehouse mentioned that one of Mr. Curran's friends suggested that he have the gold coins changed into pennies in order that he might spend his Sundays counting them instead of worrying over Railroad matters.

All of the employees and officers in the General offices extend their congratulations to these two men for their splendid services and wish them all success for the future.

The accompanying picture is of four accountants who have been working recently in the Cincinnati General offices on special work. They are R. Jefferies, Charles Connors, Frank Conn and C. E. Catt. Their work being completed in Cincinnati on January 1, they returned to their former positions on the division. Mr. Catt was promoted to division accountant on the Ohio River Division at Parkersburg. We regret to see these men leave Cincinnati as they have gained many friends among the employees of the General offices. Our best wishes accompany them to their former positions.

It is with much regret that we announce the death of W. F. Seely, draftsman, Superintendent of Motive Power's office, at his home in Cincinnati on November 29. Mr. Seely was an old employee of the Company, having been with the old C. H. & D. R'y and the Baltimore and Ohio for the past 20 years. Our heartfelt sympathy is extended to Mrs. Seely, his only survivor.

Miss Blanche Stevens, stenographer, Transportation Department, left on January 1 for Denver, Colo., for her health, having been furloughed for six months. We wish her a speedy return to health and her work.

"Kid" Callahan and Norsky Larsen are booked for a return engagement in February.

Miss Ethel Byus, assistant pass clerk, has promised us some poetry for the next issue of the MAGAZINE.

Larry Emmitt, accountant, Engineering Department, is wearing a pleasant smile over the arrival of a little Irish sufragee, called Patricia, at his home. We extend our congratulations and many thanks for the cigars.

"Tommie" Carter, messenger, Freight Traffic Department, has been transferred to the Tariff Bureau in the same capacity.

Our sympathy is extended to Miss Hilda Klinkicht in the death of her father.

The correspondent hopes that the members of the Passenger Department will not break their good resolution of the new year to furnish the MAGAZINE with some items of interest each month.

Chief Mail Clerk Whitcomb of the Tariff Bureau has resigned.

Things We Would Like to See

Larry Emmitt pushing a baby buggy.
P. A. Callahan with hair on his head.
Lester Kerner cooking cake.
Yocum finding a file.
George Kopp without his mustache.
F. C. Dickman buying cigarettes.
George Reising with his hair combed.
Ruth Murdock going seven days without talking to a man.
Mary Reuken quiet for five minutes.
"Jimmie" Flannigan in evening clothes.
John Sheeran without his pipe.
Clarence Hornbach in overalls.
Elizabeth Martin getting to work on time.
Charlotte Lauther and May Agen stop quarreling.

If Ruth Beitzer and Amanda Geisser want to get married it is all right with us, but we all hope that they will not worry us any more about it.

On the night of December 9 the stork visited the home of W. A. Radspinner, supervisor operating statistics, and left a baby girl. Congratulations, "Raddy"! Thanks for the smokes.

Back row: R. Jefferies, Frank Conn
Front row: Charles Connors, C. E. Catt

He held her in his arms and sighed,
"My mustache sure bewitches."
She kissed him once and then replied,
"But, Walker, how it itches."

Maybe Walker is paying an election bet, or maybe he wears it to keep girls away. If the latter is true, Secretary Todd ought to wear one too.

Edith Hormann has graduated into the stenographers' class and will cut stencils for the Tariff Bureau. Good luck to you, Edith.

As sure as the cat is a kitty
We're not always wise—'tis a pity,
But please tell me why,
Until he must die,
Our Harry will always be Witte?

If Chester's baby weighed ten pounds when it was born, would you say that it was Troy weight? Ooof! Ooof!

Coach Shofield took his football warriors to Newport to play a game. For a week thereafter he was not able to walk, which goes to show that they knock 'em off their feet in that town.

I am thankful for—
"The Crabbe Act"—Louise Silberhorn.
"No more embargoes"—Walter Sturm.
"Food"—Louise Menke.
"That Mueller is compiling the Tariff Index"—Miss Janie.
"Dances 'n everything"—Olive Tealen.
"Grape juice, women and song"—"Al" Todd.

"My looks"—Edward H. Henken.
"Rates"—F. M. Duncan.
"Five o'clock"—All stenographers.
"Our raises"—EVERYBODY

Sturm calling the Globe Soap Company:
"Hello, is Mr. Globe there?"

Cincinnati Terminals

Correspondent, JOSEPH BEEL, *Chief Clerk to Superintendent of Terminals*

The Story of Two New Hats, or "Funny Joe" and "Fuzzy Bill"

Joe Beel needed a hat.
Joe Beel looked for a hat.
Joe Beel bought a hat.
Joe Beel has a funny looking hat.
Joe Beel is wearing the funny looking hat.
Bill Maloney saw Joe Beel's funny looking hat.
Bill Maloney also needed a new hat.

Bill Maloney looked for a hat.
 Bill Maloney bought a hat.
 Bill Maloney has a fuzzy looking hat.
 Bill Maloney is wearing a fuzzy looking hat.

One of the amusing things that happen daily in the Superintendent's office is watching Miss Helene Herron scratch her head with a pencil. This is accounted for by the responsibility connected with the position which she holds and the many Mexican visitors who call on her daily.

Retires from Active Service

Jacob Sands, an employe of the 5th and Baymiller Station, was retired from active service on pension, Saturday noon, December 11.

"Jake" entered the service of the old C. H. & D. R. R., in 1884 as a laborer at the rate of \$1.15 per day. He was promoted January 18, 1887, to file clerk in the Freight office, occupying the position until March, 1890, when he was promoted to trace clerk, and serving in various capacities in the clerical forces of the C. H. & D. until December 24, 1909, when he was promoted to the Erie Railroad Department as trace clerk. He remained in this position until the date of his retirement, serving during this entire period faithfully and conscientiously.

The employes of the Freight office at the 5th and Baymiller Station presented to "Jake" a bouquet of flowers, as an expression of their good feelings and best wishes. C. E. Fish, terminal agent; L. A. Cordie, agent; G. R. Littell, assistant agent, and J. M. Hughes, president of the Veteran Employes' Association, Cincinnati Terminals, spoke of the loyalty and faithfulness of "Jake" during his active employment with the Company. "Jake" responded to the remarks feelingly and with much gratification.

Light refreshments were served by the girls of the Welfare Association.

The secret that we are going to expose we want confined only to the employes of the Cincinnati Terminals. The model exhibited in the window of a Vine Street gent's clothing store is not human, it is only a wax figure. The reason we know this is also a secret. While this figure was on exhibition, two young ladies from the Superintendent's office, the Misses Weber and Schulte, made daily visits to the establishment on Vine Street and feasted their eyes on the handsome man in the window. One evening they stood for 30 minutes. Then the curtain dropped and a sign explained that at the expiration of 30 minutes another exhibition would take place. Patiently for one half hour the young ladies waited before the window, only to find to their dismay that the man in the window was merely a wax figure without a heart.

Our painter, Charles Burke and Car Repairer Apprentice Charles Fisher are on the job again after spending a week on a hunting trip. The rabbits they shot were beautiful, BOTH OF THEM.

The item in last month's MAGAZINE reports Frank Smith as being the proud father of twins. This was a typographical error; the report should have stated that he is the proud father of an 8-pound daughter.

There is a rumor bothering our terminals that our car foreman, H. W. Myer, Stock Yards, is in love, and is about to join the ranks of benedicts. "Heinie," do you or do you not?

Our painter, M. V. Guard, is still looking for some sweet young miss to be his better half. Mill Street, take notice. Applicants must be good cooks and of Irish descent.

The late G. H. Pyne and Mrs. Pyne

"Tim" Mullee, rate clerk, Smith Street office, has been all smiles for the past few months—"a fine baby girl," Florence Loretta. Congratulations!

John Patterson, Smith Street office, surprised his many friends on November 1 by announcing the arrival of a fine bouncing boy. Congratulations, John!

The Veteran Employes' Association held its regular monthly meeting in the parlors of the Grand Hotel on Friday, November 5. J. M. Hughes, president, and all officers were present except G. R. Littell, who had been called away on urgent business. After the regular business had been transacted, a pleasing program was presented, which was greatly enjoyed. Miss Bessie Hall, a very prominent vocalist of Cincinnati, favored the audience with several fine selections; Miss Evelyn Ruggles, also a vocalist, rendered several solos that were greatly appreciated; Miss Marie McMorrow entertained with several readings that would have done justice to many a professional. After a cornet solo by B. S. Jelleff, the meeting adjourned. All who took part in the program are employed in the office of C. E. Fish, terminal agent. The meeting was a decided success.

George H. Pyne

On the evening of October 12, after the completion of his day's work, George H. Pyne, cashier, Local Freight office, Smith Street, was suddenly stricken with paralysis. After lingering for 24 hours in an unconscious condition, he passed away.

George H. Pyne was the son of Abram and Emma Pyne and was born November 5, 1868, in Cincinnati. His father was considered one of the most proficient rate men in the State of Ohio and held the position of chief rate clerk of the C. H. & D. for over 25 years. George followed in his footsteps, entering the C. H. & D. under his father in the capacity of bill clerk. After serving for several years he decided to try commercial work and accepted a position with the Procter & Gamble Company. In a short time he returned to his first choice, this time with the Ohio and Mississippi Railway. When the Baltimore and Ohio consolidated with the Ohio and Mississippi, he became an employe of our Road. He held the positions of abstract clerk, chief claim clerk, then chief clerk and finally that of cashier, all in a successful manner, was always to be found at his post, faithful in every respect and never known to shirk a duty.

The Company has lost one of its most efficient, upright and honest men, one whose place it will be difficult to fill.

After a brief service at his home in Madisonville, Ohio, Hoffner Lodge, F. A. M., of Northside, of which he had long been a member, conducted the Masonic service

at Spring Grove Chapel. Many railroad men were present. A wife and three daughters survive. The following fellow workers served as pallbearers: C. E. Fish, L. A. Cordie, F. H. Berry, W. J. Perin, John Kraft and B. S. Jelleff.

The many friends of Mr. Jennings, car distributor, Superintendent's office, wish to extend their heartfelt sympathy in the death of his mother, on December 2.

Newark Division

W. E. LAIRD, Chief Clerk, Newark, Ohio
 A. D. LIST, Newark (Ohio) Shops

Harry L. Kent, chief clerk to division accountant, and Ray Redman, time clerk, are again at their post of duty in the Accounting office, after an extended absence because of illness.

W. R. Totten, formerly clerk to coal billing agent, Newark, has accepted the position of distribution clerk in the Accounting office.

The entire accounting force have been transferred back to their old quarters in the Depot building, after a temporary occupancy of the old "Gym" building on First Street. They look and feel at home. This change has necessitated the moving of several of the other division offices, with the result that there is a new aspect to the general office layout. However, we feel that our "Spring" housecleaning has been disposed of several months in advance, and the new arrangement seems to provide a more convenient communication between the different departments.

Herbert ("Heavy") Rine, chief clerk to division engineer, is back on the job after several weeks' illness.

R. M. Beckett, Local Engineering Corps, has been appointed first assistant on the corps at Dayton, Ohio, Toledo Division. His many friends at Newark are congratulating him on his much merited promotion and wishing him the best of success in his new field of labor.

The Baltimore and Ohio Basketball team has, thus far, won two games and lost one to their old-time rivals, the Heisey Glass Co. team. Get your "fur up," boys, and take some of the ego out of this crowd on the next round. We're with you to the finish.

Zanesville Reclamation Plant

A surprise came to the employes at Zanesville during the week of November 16, when changes were made that included a promotion for J. L. McCann, superintendent of the Reclamation Plant. The Recla-

J. L. McCann

If "Eddie" Connors made the time he expected of No. 92 with orders to call up before heading in

mation and Car Departments were consolidated, with Mr. McCann as superintendent of shops. This promotion comes to Mr. McCann after more than 20 years of faithful service with the Company, during which time he has stepped from round to round of the official ladder. He commenced his career with the Baltimore and Ohio while a mere boy at the shops at Locust Point, Md., and has officiated in various positions since. About three years ago he was sent to Zanesville as superintendent of the Reclamation Plant. The new position is a reward for the efficient manner in which he has supervised the forces here.

Your correspondent understands that the change necessitates extensive repairs and also the addition of new machinery to the plant. Perhaps the long-hoped-for wishes of the employees and also the residents of this city have been granted, for the Baltimore and Ohio Shops make one of the leading industries of Zanesville and it will be more so now on account of this consolidation. I feel satisfied that if the men employed at these shops cooperate with their local supervising officials in every possible way and speed up and lessen the cost of production, the officers in charge will make the Zanesville Shops one of the largest shops for heavy repairs on the Baltimore and Ohio System.

A long and faithful service for the Baltimore and Ohio Railroad was ended on Sunday, November 21, when Frank Wesley Kinney, for 30 years assistant storekeeper at Zanesville, was called to meet his Maker. His death came after an illness of six months with a complication of diseases. He was buried on Tuesday, November 23, from St. Paul's Church. The funeral was under the auspices of Guiding Star Lodge, I. O. O. F. Mr. Kinney will be greatly missed by his Railroad friends, who join with me in extending our sincere sympathy to Mrs. Kinney.

Cleveland Division

Correspondents

- A. F. BECKER, *Secretary to Superintendent*,
Cleveland, Ohio
AMY A. FORD, *Clerk to Pilot Engineer*, 621
Sloan Building, Cleveland, Ohio
E. L. MILLER, *Chief Clerk to Division Freight
Agent*, Akron, Ohio.
H. B. SMITH, *Supervising Agent*, Cleveland,
Ohio.
W. E. BRUGH, *Clerk to Trainmaster*, Mas-
sillon, Ohio.

The Cleveland Division made a very creditable showing in the No-Accident

Campaign, and we desire to thank all employees for their cooperation. In looking over the final report, it will be noted that our standing was fourth for the Western Lines and fifth for the entire System. The per cent. increase for 1,000 gross ton miles per accident was 122. It is also interesting to note that the Cleveland Division made the best showing in the Northwest District. The volume of business handled in 1920 compared with 1919 was largely responsible for our good showing. There were only 11 reportable accidents in 1920, as compared with 15 during the same period in 1919. No employees were killed during the campaign. With two exceptions for the entire System, the Cleveland Division had the smallest number of accidents in 1920. The increase for 1,000 gross ton miles per accident on the Western Lines was 78 per cent., while on the Eastern Lines it was 18 per cent., the decrease in the number of accidents on the Western Lines being 108.

We regret to announce the death of Otto L. Miller, age 50, assistant foreman, Columbus Street Freight Station. Mr. Miller was in the service 34 years, the greater part of this time as assistant foreman. He was known as the best route clerk in the city; nearly every one of the railroads knew him as an expert on routing, and often he was called for to locate some inland town. Our sympathy is extended to his widow and daughter.

The agents who failed to attend the Cleveland Division Claim Prevention Committee Meeting at Cleveland on November 30 have much to regret. Many interesting and instructive talks were given by Superintendent Green, Assistant Superintendent Fahy and Assistant General Freight Agent Kimes. The meeting was presided over by Agent Bell as chairman, and Agent Crampton as secretary. An invitation to these meetings is hereby extended to Transportation, Operating and Mechanical Department employees who are interested in the handling of freight.

Report as issued by Assistant Freight Claim Agent Charles for the month of November shows that Cleveland Division stands first on the Western Lines with the fewest number of overs and shorts charges against operation of local freights. The interest being shown by local conductors in claim prevention is commendable and good results will continue just so long as the cooperation between agents and conductors continue.

Foreman O'Hara, of Columbus Street Freight Station, recently received a letter written in Italian, but because of the ink blots on the bottom resembling a skull and cross bones, he did not know whether he was being complimented or threatened. He took Patrolman Dowling into his confidence, both of whom referred the matter to Operator Warenfeltz, who proceeded to

J. I. Malone, supervisor, and A. R. Carner, division engineer

make finger print photographs and further investigation, and Lieutenant Barada insisted that no time should be lost and proceeded to apprehend the writer. Former Captain North was busily looking up the law on blackmailing and punishment that would likely result when Captain Rowe appeared upon the scene, called the janitor to translate the suspicious document and much to their surprise read the writer's appeal for employment as a trucker. (Not a moving picture.)

Traveling Car Agent J. L. Depser, Car Service Department, has been transferred to the Pittsburgh District. We wish him success and plenty of winter weather so that he will get the benefit of his new wardrobe purchased for the occasion.

Friends of Terminal Agent Pierce and Trainmaster Powers will excuse their failure to entertain or visit during the past lake season. Lorain did the biggest business of all lake ports, showing a gain of one-half million tons coal dumped over last year and unloaded four hundred thousand tons ore more than last year.

L. T. Kegler has been appointed agent at Elyria, vice C. E. Barry, who has taken a furlough. Relief Agent Elford has been appointed agent at Dover, his position being filled by former agent at East Akron, C. O. Hogue.

Division Accountant S. H. Jewett has organized a class for the purpose of studying the work of his department. It meets twice a month. Very good results have been obtained by those attending.

Supervising Agent H. B. Smith, who is noted for his constant and enthusiastic interest in the welfare and comfort of our patrons, had an opportunity last week to exercise his laudable ability in this regard. While awaiting his train in the station at Akron, a sweet-faced bustling old lady rushed up to him and requested him to care for the children of an unfortunate woman who had lost her tickets, and who had to appeal to a charitable institution for help. Five minutes later found "H. B." busy amusing three chocolate colored infants.

Akron Terminals

On November 5, the Akron Terminal Efficiency Committee held a banquet at Young's Hotel, near Akron. This committee was organized about four months ago and has held weekly meetings since that date to discuss the car situation in the local terminals and to work out arrangements that will result in greater efficiency in the Akron District in our being able to be of greater service to our patrons.

The members enjoyed a splendid fish and chicken dinner. Short speeches were then made, District Freight Agent Groninger acting as toastmaster. The committee had as its guests that evening, J. C. Kimes, assistant general freight agent; H. C. Batchelder, trainmaster, and C. F. Farmer, division freight agent, all of Cleveland.

The employees of the Akron Terminals extend their hearty congratulations to A. E. Thompson, chief rate clerk, South Akron, who was recently married to Miss G. E. Cross.

Speaking of marriages reminds us that Cupid has been very active in the Akron Junction Yard office, beginning with E. J. McCall, District Freight Agent's office, who was married some time ago to Miss Pearl Sours, secretary to Terminal Trainmaster Smith.

The engagement of J. G. K. Slocumb, crew dispatcher, Akron, and Miss Winifred May Trent, Toronto, Ontario, has just been announced.

Miss Ruth Myers, statement clerk, Akron Junction, has announced her engagement to Mr. O. C. Colby, representative of the LaSalle Extension University. The best wishes of the Akron Terminal employes go with these young people.

We are pleased to report that C. O. Hogue, assistant agent, East Akron, has been promoted to relief agent on the Cleveland Division. Mr. Hogue endeared himself to all employes of the local terminals during his tenure of office at East Akron and we part with him with a great deal of regret. Our loss, however, is somebody else's gain and we wish him Godspeed and success in his new work. We are glad to see our old friend and poet, J. B. Drake, promoted to the position made vacant by Mr. Hogue. We prophesy added activities for the young ladies of East Akron now that Mr. Drake is among them.

C. A. Stults, traveling freight claim adjuster, has been spending week-ends recently in the Blue Ridge Mountains of Virginia. Dame Rumor has it that Mr. Stults has met a young lady on the trail of the Lonesome Pine and that he is very anxious to make the trail less lonesome for her. Oh, June! June!

The employes of the Baltimore and Ohio at Akron have organized "The Baltimore and Ohio Welfare League of Akron."

The purpose of this association is to bring about more friendly relations between the employes at Akron and their families. The first party held by this association was at Marvin Parish House, Akron, Monday, December 13, at 7.30 p. m. An attractive program was arranged, followed by dancing. Practically every employe in the Akron Terminals has become a member of this association. Everybody connected with the Baltimore and Ohio in Akron is enthusiastic over the organization and all have put their shoulders to the wheel to make it a success.

A basketball team has been organized to be known as the Baltimore and Ohio Basketball Team of Akron, and has entered the City Industrial League. The manager of the team, R. W. Ballard, yardmaster, Akron Junction, would like to challenge any basketball team on the Baltimore and Ohio Railroad.

Massillon

W. L. ("King") Phillips, has re-entered the service, this time as a switch tender at

M. & C. Junction. This is a pretty good Railroad to work for, isn't it, "King"?

If all points on the Cleveland Division had done as well as the part between Massillon and Holloway in the No-Accident Campaign, the Cleveland Division would have been on top. There were no accidents whatever in this district.

Mrs. J. W. Griffin, wife of Conductor "Pop" Griffin, had an operation performed on her eyes some time ago to remove cataracts. We hope for her immediate recovery.

The air car visited Massillon last month. Some of our trainmen don't need to learn much about a certain temperature of air, but this car taught them a few things about another kind.

E. Richards, demurrage clerk, Massillon Freight House, received a sample of kidney pills from Sears, Roebuck & Co. Was the remedy a success, "Ed"?

Brakeman W. H. McInnes has been thinking seriously about taking on a partner. Better watch out, girls—he is a dangerous man.

Brakeman Dale H. Williams took a turn for better or for worse last month when he and Miss Alberta Keller, daughter of Car Inspector Price Keller, were married.

The Cleveland Division Safety Meeting was held at the City Hall Auditorium, Massillon, Ohio, on December 20. Members of the Safety Committee and many of the other employes were present. After the meeting, luncheon was served at the Conrad Hotel.

In the accompanying photograph we see L. W. ("Buck") Kinnear, passenger brakeman on Trains Nos. 58 and 59. He is very popular with the ladies, and has been faithful to the Company. All around, he is a very valuable man.

Looking for her daddy, the Magazine correspondent at Willard, Ohio

Garrett, Indiana

Miss Vera Coffing resumed her duties in Master Mechanic's office on December 6, after a ten days' vacation, spent with friends at Pittsburgh and Kane, Pa.

Mrs. H. Rees and sons, Harry, Jr. and Alvin, arrived in New York on Wednesday, November 24, after a five months' visit with relatives at Southampton. They also spent a few days with friends at New Castle Junction before coming to Garrett to make their future home.

We extend our sympathy to Engineer and Mrs. H. S. Wright, in the loss of their son, John, who passed away at his home in this city on November 8. He was a well known member of the younger set, having been a resident of this place practically all his life, and until very recently was employed in C. T. Department as clerk at Freight House.

A son was born to Machinist and Mrs. F. L. Deiderich, on November 24.

We are wondering if our genial little tool foreman, Louie Ziegenheim, is intending to store ice this Winter; we note that he already has the ice wagon.

Car Foreman Gibson has resumed his duties, after a three weeks' absence because of illness.

Chief Clerk J. J. Kennedy, Lincoln Street Terminal, is noticed on the streets of this place rather often. Who is she, "Joe"?

Miss Margaret Hammers, stenographer, Master Mechanic's office, has been transferred to the Accounting Department.

Miss Orpha Teders has accepted the position of temporary stenographer in Master Mechanic's office, vice Miss Hammers.

H. E. Wert accepted a position on the staff of Division Accountant Summers on November 15. Mr. Wert is well known to all at this point having been assistant cashier at Garrett State Bank for several years. We trust that Harry will enjoy railroad work and decide to remain one of the family.

We regret the transfer of District Master Car Builder Hitch from this territory; however, we welcome his successor, W. A. Bender, and extend our good wishes for their future success.

Road Foreman of Engines W. E. Frazier is driving a new Ford sedan. We understand that he intends to go into taxi service in the Spring.

WANTED: A blushing blonde, not over 23 years of age. Must be of a home loving disposition and a good cook. All interested or qualified apply to D. Damske, car clerk,

"Buck" Kinnear, brakeman

Garrett, Ind. Will furnish photo and references upon request.

Electrical Supervisor Robertson, Cleveland, spent several days of last week on the Chicago Division.

GARRETT, IND.

Dere Editor:

Wel yu know that D. S. Patcher guy, wel he aint got no mure knolege than I got, so i guss I cen rite yu a leter an tel yu al abut them shop foremen at Garrett an al they are wishin fur, fur the Neu year. "Harry" Rees "Genl. Foreman" hes wishin thet hes wife dunt gu back tu Scotland cuse he has tu cook hes own meels, an he is a roten cook. "Freddie" Moses hes wishin thet the cust of wigs wil cume down, cuse he wunts tu buy une. "Gee" but he needs it to. "Bob" O'Ferrall is wishin that so many wimmen wouldn't wate till evenin to go buy ther new hats, he says al the tyme that it takes tu wate on customers cuts his viset with Mary short. "John" Schunk is wishin that "Georgie Teal" wuld gu to the mivities mure often cuse hes wering off the plush of the parlor sute. "Dol" Galloway wishin thet thes shop guys wuld stay wey frum hes huse, cuse he has to pey the lictric bills. "Louie" Zeigenheim hes wishin thet the wether wuld stey gud cuse he wants tu run hes taxi buggy al winter. "Orin" Longbrake wishin thet wool wuld get plenty cuse hes su fat thet he cant get a sute of cluthes to fit him. "Ott" Rankin is always wishin thet sume une wuld giv hem a dog so he can gu huntun. Hes gut a gun now, su if yu knew sume une thet hes a pug dog ples heve them sen it to "Ottie." "Ollie" Grant is wishin thet nine guys whu cen play ball wuld cume to Garrett en get a jub in the shops. "Ollie" hed a tem thes year Thet wes born when "Garfield" wes present en I dunt knew when thet wes. "Daddy" Grooves went tu a fot bal game an wun two bits un it, so now hes wishin thet they culd play fut bal al year. "Jimmie" McSweeney es wishin that sume une wuld giv him a pair roler skats so he culd gu skating al nites. "Frank" Fouch es wishin thet sume day he culd wake up an find thet he hed turned out 15 engenes in une month. En thet "Lew" Eberle hes wishin al the time thet he hed a lot mure men su he culd turn out mure boilers. En thet "Joe" Gorden and "Herman" Vander-vosch sey thet they aint gut no time fur wishin cuse they is to busy, stil une dey I herd "Hermen" sey hed wish thet hes kid wuld sune walk cuse he was tered of pushin a baby buggy. "Jim" Lantz is wishin thet thes furmen guys wuld stop cumin in the ofice cuse they ere always askin fulish things, en taken up hes tim. "Jim" aint gut much tim cuse hes busy durin the day en gues to "Wawasec" lake at nite. "Hopeedo" Leisinger is wishin thet hes gurl wuld take hem back agin. She tied tinwear un hem en now they buth ar wishin fur a piece maker. "Orrie" Bennett es wishin thet the prise uf shues wuld cume

down cuse it takes too cows tu make hem a pare shues. "Del" Gibson is wishin thet sume une wuld buy him a sack of scrap tobuco each dey, cuse hes savin hes money tu buy a wig to. En them gurls in the ofice, they are always wishin fur luts uf thins thet they wil never get, stil i guss they lik tu wish. "Margaret" shes wishin thet she hed the old auto back agin. Nurdyca is wishin she hed a nice tal black hared man with baby blew eys, and "Theresa" wunts a beau fur "Saturday" nite cuse she hes a beau fur al the rest uf the nites. "Orphia" is wishin thet "Al" didnet heve to wurk the secund trick, and "Vera" is wishin thet her hupe chest bux wes filed. En Mr. Moran our "Master Mechanic" seys they al beter durn site stop wishin and get them 15 engenes out thet "Frank" Fouch is wishin fur. Now I am wishing thet all heve a Happy New Year.

Yours truly,

R. HOUSE.

Master Charles Baker, the genial day enginehouse clerk, spent the afternoon of December 9 in Fort Wayne, Ind. He made the trip alone and spent almost \$2.00. This was Charles' first trip away from home and he says that he enjoyed himself very much and never got the least bit homesick. He says that he went to two different shows and also the Palace OPERA HOUSE, where he heard the great PAVOLA dance and saw her sing.

Willard, Ohio

Chief Crew Dispatcher King has returned to his duties after being absent for a few months.

Engineers Grover, Enslly and Detrick returned from their deer hunt with plausible stories, of course. One apiece, they say.

For several years we have experienced considerable trouble in getting cars to run off the Westbound Hump. It has now been raised three and one-half feet, but without much advantage. The surveyors say, however, that they will make the cars run before they leave; and it looks as if their words are coming true.

The accompanying photograph is of Dorothy Arline Addy, daughter of W. C. Addy, MAGAZINE correspondent, Willard.

F. R. Rice, brakeman, New Castle Division, has brought his family from Baltimore to Akron, Ohio, where he has obtained rooms.

South Chicago

A Happy and Prosperous New Year to all.

We have had a little "tip" but "Cass" won't tell us much about it as yet. Possibly our next issue will contain some "startling" news. 'Fess up, "Cass."

We are sorry to announce that Miss Ethel Poole, our freight bill clerk, is still confined in the South Shore Hospital, having met with an accident some 10 weeks back. Ethel has our sincere sympathy and our best wishes for a speedy recovery.

The accompanying snap shot is that of Third Trick Westbound Clerk Frank Quinn, left, and Chief Yard Clerk Raymond O'Brien, right, "two of a kind." What's the matter with the smile, boys?

Chicago Terminal

Correspondent, THOMAS H. WILLIAMS

The accompanying picture of Ex-Yardmaster C. M. Bean, who is now a ranch owner at Fullerton, Cal., and has been since March, 1920, shows Mr. Bean holding some

"Take your choice"—Yardmaster C. M. Bean

of the fruits of his hard labor, and also indicates which one he prefers. Mr. Bean was in the service for 35 years. He was an industrious and conscientious worker and gave the best that was in him to the Company. Mr. Bean (better known as "Charlie") was held in high esteem among his fellow employees, who wish him all the success in the world in his new adventure.

Yardmaster F. B. Carr paid Mr. Bean a visit last summer and informs us that "Charlie" has a new car and can beat John Latshaw making time, but we think that "Charlie" will have to travel as he ever traveled before.

A proof of efficiency lies in the following story of the repairs made to engine 2447 at Lincoln Street Shops by our forces:

Engine 2447 is of Class K-17 type, is known as the pride of the terminal and will do anything except stall or talk back if properly treated. This engine handles passenger trains between the Coach Yard and Grand Central Station, switches all kinds of cars and sets cars at our Freight House, which is unusual for an engine of this type on the sharp curves.

A drive was made with our small force at Lincoln Street Shop and facilities, to get engine returned to service at the earliest date possible. Here was the work accomplished: tires were turned, new crown bearings applied and end play, general repairs to spring rigging and driver brake, part new shoes and wedges, guides planed, piston trued, new packing, lost motion, valve gears, new rod bushings and brasses, repairs to superheater units and necessary repairs to firebox and boiler. Work was started on Monday the 22nd at 8 a. m. We only have one shift of men on class repair work. The engine was fired the Thursday afternoon following, and was used on her regular run on Friday morning, November 26. Considering the amount of repairs made with the small force and the shop facilities at Lincoln Street, much credit is due to the men for the efficient manner in which this work was turned out.

A great many fine changes have been made since the appointment of General Superintendent Hoffman, one in particular which has been called to my attention is the comfortable quarters provided for the telephone operators for use during rest periods. These comforts are much appreciated, as the work of a telephone operator is one that very few of us could do and still smile. The four operators handle on an average of 3,500 calls per day of eight hours.

Frank Quinn and R. O'Brien

W. P. Finnegan has been transferred from the Local office to the Traffic Department.

The Coca Cola Company has purchased a parcel of property along the right of way of our Company, on which they contemplate building a four story concrete and steel manufacturing plant, which will cost approximately \$1,000,000. It will be the largest plant they operate and will be served by this Company.

Employees at Barr Yard

Let's start with Mr. Barlow,
He is always full of "pep,"
And the more he has to think about
The more he's bound to get.
No matter what your trouble is
Just get him on the line,
He'll help you out of any jam
And make you feel just fine.

Now, Mr. Neff has just come back
From his vacation trip.
To mention this, we must not lack,
But give you as a tip—
No matter what your age may be,
In order to look cute,
Just wear a cap quite carelessly
And smoke a cigarute.

We also have a Mr. Wann,
And a chief clerk named Labahn.
And have you met our Miss H. Rauch?
You should see her eyes roll about.
There's Mr. Ernst and Mr. Flassig,
Who make up their reports quite "classic."
And Mr. Esche, our handy man,
Who helps us out the best he can.

We must not miss Nick Pearlberg,
He's hustling you can see,
There are buttons on his trousers
Where matches used to be.
He says, "Now get together,
Let's do the best we can,
And keep your eye on Hoffman,
He's sure the 'boogie' man."

And last of all, but far from least
(E'en tho' he's always smeared with grease),
Is our little man who's so well known,
And goes by the name of Barney McGlone.
Without him Barr Yard could not run.
And as with work we must have fun,
So in closing, be impressed,
Barr Yard's employees are best.

Wednesday, November 24, was a lucky day for B. T. McGlone, machinist, Barr Yard. On that day friend Stork visited his home and presented him with a baby boy. The department extends congratulations.

The Accounting Department is now in a tie for first place in the Baltimore and Ohio Chicago Terminal Bowling League. We have a fine lot of bowlers and hope they will soon be able to secure a fast hold on first place.

Our Indoor Baseball League played its first game on Tuesday evening, November 30, and was defeated by a score of 7 to 1 by the Soo Line Team. Rumors persist in placing the loss of the game to one of the boys of this department, who suffered an aggravated attack of stage fright. The end of the season, however, will tell a different story.

D. J. McNeil is again on the job after an extended sick leave.

Herbert Rogers has returned to his desk after recovery from a severe attack of pneumonia.

Will some of our Baltimore girls kindly write an article on "How to Change Your

Name?" The young ladies of the Accounting Department and Car Accountant's office can't figure it out.

E. A. Mueller, H. Burg, T. H. Williams and M. D. Carothers enjoyed a week-end at Burg's cottage at Lake Catherine. Some one reported that Carothers took out a hunting license to clean the cistern. T. H. Williams used all high grade perfume on his vest. He came back aromatically noticeable.

H. H. Wilcy has vacated his summer home at the Sand Dunes for more comfortable quarters for the winter. He expects to return in the Spring to the birds and mermaids.

Darl Brennan has just returned from his vacation which he spent in Indiana with "her." We were disappointed at not receiving cigars. What's the trouble, Darl, does absence make the misses grow suspicious?

WANTED: A tailor who can do a neat job of repairing trousers. Apply to M. D. C., assistant engineer maintenance.

We regret to announce the death of Charles Larson, carpenter in the Freight Car Department. Mr. Larson has been in the employ of our Company for a number of years, during which time he made a host of friends who extend their deepest sympathy to the bereaved family.

Misses Bertie Stewart, Master Mechanic's office, East Chicago, and Nell Pope, distribution clerk, Lincoln Street, spent an enjoyable vacation on the Pacific Coast, visiting all points of interest.

We have been informed that the stork paid a visit recently to the home of J. P. Holdt, foreman of the Stores Department, presenting a fine baby girl.

Fellow readers, can you imagine an office so located that if you glance out of the windows on one side you have a view of a beautiful farming district with everything calm and serene, while looking out the windows on the opposite side, you have a view of the hustling and bustling life of the city with its busy railroad yards? Having imagined all this you now have an accurate picture of Forest Hill Station.

Our comptometer operator is "Long" on lunches. He now carries them in a wash boiler.

And girls, while this is not a matrimonial bureau, I can not help mentioning the fact that we have three very good looking bachelors. Who are they? Why surely, Teehan, Nagle and Sullivan.

The smile that won't come off is now resting on the face of our Hennessey. Yes, it's a boy. Congratulations!

General Freight Office—Chicago

The Power of Truth

I do not ask why clouds should cast
Their shadows o'er my way,
I only know that there is light,
Though faint may be its ray.

The scales of Justice wrestle
With the weights of careless dross,
But when I know that there is right
I can endure my cross.

For where a sunbeam lingers
A shadow always flies,
And Heaven doth re-echo back
When Truth for Mercy cries.

So though a smile may take its flight
Afrighted in the teardrop's way;
I'll not deny the power of Truth,
The Infinite's touch imparts the day.

—FLORENCE A. McALLEN.

I think this beautiful poem, "The Power of Truth," composed by one of the young ladies in this office, is the embodiment of a splendid truth, and it might be a good New Year's thought for us to remember. It is an incentive to make the best of whatever happens to be our lot—meeting our destiny as cheerfully as possible—and with a smile. Those who follow this creed will find greater happiness in life and much consolation in time of sorrow.

Santa Claus came around rather early this year. On November 14 he left a dear little daughter, Elvira, at the home of Mr. and Mrs. Henry Kanis. Henry is very proud and I'll say he is some "Daddy."

A rumor has been abroad that T. M. N., our "Pretty Baby," was married recently to a Milwaukee girl, but Beau Brummel won't admit it. However, he seems just as carefree as of old and as flirtatious as ever—so perhaps this is but a rumor.

Ohio Division

Correspondent, E. A. ERICH, *Secretary to Superintendent*

Through the never tiring efforts and hearty cooperation of every official and employe of our division, and especially the members of the Safety Committees, we won the Championship of the No-Accident Campaign for the Western Lines. The beautiful prize pennant is in two shades of blue and white. The SAFETY emblem of the Baltimore and Ohio Railroad is painted in gold, the body of the pennant a deep royal blue color, with a white border all around and the letters "No-Accident Campaign," "Champion: Western Lines," in white. It measures 8 x 16 feet. At this writing we are looking forward to the banquet.

O. Perry, steel car helper, is back on the job after being off duty for several weeks with a mashed finger.

Delbert McKinney, car builder, who has been with the Company several years, has resigned and moved to his new home in the country.

Two of the clerks in the Car Foreman's office went duck hunting. At least that is what they said they were going to hunt, but the only evidence they brought back was a duck feather, and that looked more like a "chicken" feather.

We are glad to announce that Engineer J. P. Britton and Conductor Thomas J. Hickey, who were both operated upon at the City Hospital for appendicitis, are improving rapidly.

Born to Assistant Boilermaker Foreman and Mrs. James Hull, a fine boy. Congratulations!

Boilermaker William Lyme is also the proud father of a baby girl. Congratulations!

On November 10, John E. Funkhouser died at his home after a short illness of pneumonia. Mr. Funkhouser has been with the Company for a number of years as fireman and engineer. He made many friends on this division, all of whom extend their heartfelt sympathy to his wife.

We also wish to express our sincere sympathy to Fireman Joseph Baker and family, in the loss of wife and mother, who passed away on November 15.

On Monday, November 15, Miss Grace Ellenberger and Frank C. Lechner were united in marriage. Miss Ellenberger has

been with the Company for some time as agent-operator at Vigo, Ohio, while Mr. Lechner is employed as operator at "DE" office, Chillicothe. We congratulate them and wish the happy pair good luck and happiness.

Miss Ida Mae Parker, clerk in freight office at Chillicothe, and John E. Cahill, brakeman on this division, joined in the great old game of matrimony. Both are well known and their host of friends join in wishing them much happiness and good luck in their new life. After the ceremony Mr. and Mrs. Cahill left for a honeymoon in the east. Just before leaving, Ida remembered her associates in the freight office by dividing her corsage bouquet among them.

Earl F. W. Kemmcrer, ticket agent, Chillicothe, came into the office seemingly unusually nervous and wearing a particularly happy smile. The cause was soon learned—a young ticket agent had been ushered in his home—Mr. Stork acting as chief usher. The young man has been given the name of Ralph Howard. Congratulations!

General Labor Foreman, Stores Department, Harold Brown, is also the proud father of a 9¼-pound boy. "Brownie" states that this young man is a "regular prize fighter."

W. R. Wellbrook, of the Division Freight Agent's office, is also the proud "papa" of a bright young man left at his home. "Bill" informs us that this gentleman is also a "prize fighter." With these two combatants we are expecting to be treated to a "real bout" in the near future.

Winter is here. Has everyone coal in his cellar? Speaking of coal; coal bill for the Ohio Division for the month of October 1920, locomotive use only, was \$105,043.80, exclusive of transportation. (Gee! that's a lot of money. Couldn't we have lots of fun if we only had it.) This is taking a "big bite" out of our revenue. It means that we must haul ONE THOUSAND THREE HUNDRED AND EIGHTY-TWO 50-ton freight cars loaded with revenue freight from Carbondale to Chillicothe (a distance of 66 miles) to pay for the coal used on our locomotives for that month. Every employee (it matters not where, how or what he does) can and should assist in SAVING COAL.

It was with regret that we heard of the death of former District Safety Agent Thomas Reagan, at Hamden, Ohio, on November 23. Some time ago Mr. Reagan was compelled to take a leave of absence and go west to try to regain his health; however, he was not benefited by his trip and returned to his home at Hamden, where he remained until his death. On his monthly visits to Chillicothe to attend Safety Meetings, he made quite a number of friends who extend their sympathy to his widow.

All employees extend their heartfelt sympathy to Machinist and Mrs. Charles Cook, in the loss of their son, Charles, Jr., who died November 23, after a short illness.

We extend our sympathy to Clark L. Reed, clerk, Freight office, in the death of his father, who was struck and almost instantly killed by an automobile while crossing the street to board a car on December 1.

Miss Dorothy Dunlap is the new stenographer in General Foreman's office, in place of Earl Schwitzer, who has been promoted to Division Accountant's office.

Mrs. Luella Wilcoxson, Louisville Freight Station, is again with us, having been sick for several weeks. Her place was held by Miss Jane Briggs in her absence. Very sorry to see you leave us, Jane, and we all hope your visit to Florida will be a pleasant one.

T. W. Jocelyn, formerly accountant in the Local Freight office, Louisville, has been promoted to cashier, effective November 11. We extend congratulations.

On December 8, T. O. Mattingly, formerly bill clerk at Parkersburg, joined the force at Louisville.

The Welfare League of the Kentucky and Indiana Terminal Railroad Company, on Tuesday, December 7, gave its annual banquet at the Seelbach Hotel. After the elaborate menu was served the entertainment included very interesting talks made by Rev. Dr. C. W. Welch, Rabbi Rauch and general manager and chief engineer, W. S. Campbell, while George E. Allen, secretary of the Louisville Convention and Publicity League, acted as master of ceremonies.

This Company has made extensive improvements in Louisville, enabling them to serve additional industries here. They also handle switching service for every line entering Louisville and their facilities are used as terminals by the Baltimore and Ohio, Monon, and Southern Railways.

A tobacco platform has recently been completed at Louisville. It is built of concrete and steel, fireproof, and greatly relieves the conditions there for the proper handling of this class of business. Twenty cars of tobacco can be loaded from the platform at one time. With this improvement we will be in a much better position to handle the expected increase in this freight.

On the evening of December 8, the Transportation Club of Louisville gave their annual dinner at the Pendennis Club. Those attending from the Baltimore and Ohio were: Messrs. H. R. Lewis, J. D. Marney, C. H. Gomm, G. W. Arnold, L. C. Smith, T. O. Pinaire, Edward Morgan, J. A. Wilconson, J. E. Sands, and J. H. Ziegler. A very attractive menu was served after which several excellent speeches were enjoyed.

We clerks in Superintendent's office envy our chief clerk, H. S. Adams, his trip to

St. Petersburg, Fla., during the Christmas holidays. We hope that he will have a very enjoyable time and forget all about railroading for about two weeks.

Necessary changes in division office building to provide room for the division freight agent and force have been completed and the division accountant moved to new location on third floor on November 26. The striking feature of this move was "A Get-Together Party," on November 22, for the office employees and their families, who responded to the following invitation:

"Won't you come with us a while
On Monday night, next week,
And spend a few delightful hours
On our new third floor, so sleek?
'Tis all fixed up for you and me—
Just waiting for some fun.
There'll be dancing, cards, 'n everything,
And cats, too, by the ton (?);
We'll meet at eight, and
Stay quite late.
So come and swell the crowd
And help us make this undertaking,
Ing, one to make us proud."

The evening was spent with short talks made by Division Freight Agent Galleher, Division Engineer Herth, Trainmaster Purkhiser, Road Foreman of Engines Rogers, Division Accountant Martin, General Foreman Horan and Cash McOsker, chief clerk to division accountant, Weston, W. Va. Some amused themselves at the card tables, others in dancing, and all participated in the delicious refreshments.

All present had a very enjoyable time; in fact this party created so much enthusiasm that the following invitation was issued by the Division Engineer's office for another party on December 1:

"Free Excursion for Baltimore and Ohio office Employees and Families."

In order to speed up the friendship TIE RENEWALS, you will please arrange to load your family on the Maintenance of Way Work Train for a trip to the Eagles' Club House, at 8.00 p. m., Wednesday, December 1.

With all the NUTS present, and plenty of free BALLAST, we will have all necessary MATERIAL for the TRACK of pleasure, except SPIKES, for which our requisition has not been filled. We do not want anybody to BOLT this meeting until the last ANGLE BAR has been applied."

This, too, was quite a success and all present were enthusiastic in their praise of the entertainment provided by the Maintenance of Way Department.

Cash McOsker, former chief transportation timekeeper, Division Accountant's office, Seymour, wh. was recently promoted to chief clerk to division accountant, Weston, W. Va., on November 25, returned to Seymour and claimed as his bride a charming young lady, Miss Madeline Reihl. Both parties are popular here and after receiving congratulations and best wishes from a number of their friends, they left on No. 2 for their future residence in Weston, W. Va.

Effective November 18, Roy Padgett has been appointed agent at Hayden, Ind., vice R. P. Stanton, transferred.

C. E. Morton, chief clerk to division engineer; L. F. Isenogle, motive power accountant, and G. T. Huffman, motive power timekeeper, have organized a Dancing Club composed principally of Baltimore and Ohio employees, and the first dance was given at the Eagles' Club House on December 10.

Rossford Docks, south side of coal machine

Illinois Division

General Freight Office, St. Louis

Correspondent, FRANCIS PIGLOSKY

Edward Hart, Jr., general freight agent, pays this tribute to the late Frank Whedon:

It was with deep regret that we recently received a telegram from San Francisco announcing the death in that city of Frank Whedon, former telegraph operator in the General offices of the Ohio and Mississippi Railroad (now part of the Baltimore and Ohio Railroad) and late employee of this office.

In his day, Mr. Whedon had the reputation of being one of the most expert operators in the United States and I have been told he was one of the few men that the Western Union Telegraph Company would often offer to employ from outside to transmit reports of conventions, etc., because his sending could be relied upon.

He was for many years telegraph operator in this office and in that capacity was efficient and trustworthy. I never found him to be away from his key during business hours.

He was universally liked by his fellow employees and endeavored to perform his duties long after he was incapacitated by illness.

He was in the service over 40 years and was retired in 1917.

Excerpt from letter of application:

"Am 21 years of age, married, and have had five years experience in that capacity."

R. J. R.: "Take this to the Merchants' Exchange."

R. D.: "What do you want exchanged?"

We recently enjoyed a visit from Edward Morgan, our old friend and former representative. We hope that he will favor us with many more visits.

The ladies of the office wish to extend their thanks for the many kind invitations which were extended them by our "Bowling Team" to witness their record-breaking scores. We (the girls) are from Missouri.

For the information of a gentleman in the office:

Busy Bee Candy Co., 417 N. 7th Street and 617 N. Broadway.

Herz-Oakes Candy Co., 512 Locust Street.

LaSalle Candy Shop, Inc., LaSalle Building.

Martha Washington Candy Co., 719 Olive Street.

Mother Goose (not yet opened), Central National Bank Building.

Oh "Daddy!" Yes, a girl. Congratulations, Harry.

We have succeeded in organizing a "90 horsepower" bowling team, which as yet has never been thrown into "reverse." Practice games developed that a ban must be placed on excessive talking as it unnerves some of our numerous "stars." There are those too who appear to be rather unfamiliar with the rules as others had to be continually calling fouls. All members of the team have been advised to secure "gym" shoes as it has been proved that these will add 30 or 40 pins per game to each member's score. Partial disrobing is permitted only when there are no ladies present, provided, of course, that the alley management has no objections. Those who have been unfortunate enough to fall into the

position of scorekeeper have been closely watched with some very surprising results. We have a hard schedule ahead of us, but no doubt would be able to arrange for games with any Baltimore and Ohio teams within accessible vicinity, particularly those at Flora, Ill., or Washington, Ind.

Toledo Division

Correspondent, I. E. CLAYTON, Division Operator

The accompanying photographs were taken north and south of the Rossford Docks, respectively. The north end picture shows the day gang, as follows:

Left to right, front row: Frank Stickley, dock foreman; Christopher Yoneff, empty car rider; Lester Nolton, oiler; a car inspector; "Dick" Inman, telescope operator; "Nick" Nicoloff, car rider; A. R. Zink, chief engineer. Second row: Charles Frobase, operator; Arthur Cravan; Jacob Stickley, coal passer; "Nick" Petcoff, car rider; Frank Huffman, operator; Tony Czjoroski, car blocker; Bert Barror, operator. Third row: Guttli Bauknecht, fireman; William Hoeft, car rider; Tony Karasinski, car blocker; Claude Pund, car checker; a car inspector; William McGuire, operator; Joseph Blasius, second engineer.

The south end picture shows the night gang as follows: Front row: Paul Wendland, fireman; a car repairer; Dennie Potter, car blocker; a car rider; Tony Wockoff, car blocker; Gale Shelt, car rider. Back row: Kosta Kapincheff, car rider; Peter Christoff, car rider; William Kiefer, car rider; Mike Laloff, car rider; William Hoeft, car rider; Henry Young, engineer; Bert Warrior, operator; Charles Nowak, car pincher; Clarence Waters, oiler; Walter Snyder, car checker; Charles Frobase, operator; Lester Nolton, operator.

Dayton

Miss Alma Olive has resigned her position as stenographer, Trainmaster's office, to take up Y. M. C. A. work, and the smiling countenance of Miss Ethel Denlinger is now seen in her stead.

James Kelly, popular clerk at the local office, Wellston, has taken unto himself a wife. Miss Ruhama Jenkins, of Jackson, Oh'o, is the lucky girl.

Rossford Docks, north of coal station

H. R. Rowe, roundhouse clerk, Wellston, has purchased a new flivver especially designed to run between Coalton and McArthur, where Mr. Rowe seems to find some attraction.

"Sol" Scott, car foreman, Wellston, has the sympathy of the employes in the death of his wife at her home on October 23.

East Dayton, Ohio

Correspondent, EDWARD MANNIX

The No-Accident Campaign, which closed in November, brings us to a realization of what can be accomplished where concerted action is given. While our division did not win the coveted honor, it made a strong bid for it and was a close second. Our shops and roundhouse passed through the campaign with 100 per cent. We congratulate the successful divisions.

"Jim" Rhodes, pipefitter, first shift, recently purchased a whole box of lady's silk hose, and said she had everything else but socks. There was included in this package a beautiful gold ring and all was sent to Covington, Ohio. We don't know the young lady's name, but what's the difference? "Jim" knows, and that's enough. Congratulations, old "rail."

Rumor has it that Russell Cable, fire chief, has a very strong attraction in the Storeroom office. Of course, we're not going to mention names, but Anna Jackson seems to answer the description of the particular lady to a "T." This is only hearsay, but it comes from excellent authority.

Come on, Conley, 'fess up; to whom did you give that engagement ring? Every time I ask Helen O'Neil about it she blushes, and won't tell me what she did with those three silk shirts.

Miss Clara Leingang, our stenographer, Master Mechanic's office, was seen looking at some furniture, carpets, bric-a-brac, etc., and there was somebody with her. It wasn't her mother or father either, but then you know a person can never tell. A cousin, perhaps.

From all indications the Christmas spirit took hold rather well. The married men are still wearing that holiday smile, and the single still commenting on each others' socks, suspenders, ties, etc. Ask Riley or Lowry, they know.

In a few well chosen remarks to the employes of the shops and roundhouse, our general foreman, W. A. Gilmore, conveyed his holiday wishes. This was reciprocated by the men, with thanks and assurances of the good will which they bear toward him.

Joseph A. Schiffgen is an addition to our foreman's department. "Joe" comes to us as one thoroughly experienced in railroading, having occupied positions of trust at Chicago, Ill., Cleveland, Ohio, and Storrs, Cincinnati, Ohio, and he immediately gains the respect and confidence of the men here.

Sleeping quarters of the Mount Clare Fire Brigade

Mount Clare Has an Up-to-Date Fire Brigade

IN one of the accompanying photographs are the members of the Mount Clare Fire Brigade; the other gives us a glimpse of their sleeping quarters.

The men are, left to right:

Front row—H. Robinson and J. Woolen, material men; E. Sudbrink, helper, Smith Shop; C. Kline, tender repairman; P. Rothstein, material man, Storehouse; H. Miller, helper, Iron Foundry; H. Platue, R. Russell, and H. Safran, helpers, Smith Shop.

Back row—J. C. Liefert, foreman, Electrical Department; H. Hommelbacker, blacksmith apprentice; F. Cook and A. Yokel, material men, Storehouse; William Stembler, janitor, office building; J. P. Reinhardt, fire marshal, Insurance Department; S. Balsmo, machinist, Axle Shop.

On Friday afternoon, October 22, W. R. Galloway, foreman in No. 3 Machine Shop,

happened to be in the Power Plant for some information, at which time there was an unexpected alarm sounded by our chief electrician, J. D. Winters, who was in company with Fire Marshal Reinhardt, about the Plant. The alarm was sounded at 4.07 p. m. In 30 seconds the whistle was giving the alarm, and in 50 seconds, a stream of water was playing on the imaginary fire, with 125 pounds water pressure from plug at Fire Hose Box No. 15.

Some firemen were in quarters, and others were working in the various shops where they are employed during the day, when the alarm was sounded, which goes to show that our fire fighters of the Mount Clare Brigade are alert and on their job at all times when needed, and ready to protect the Company's property. The efforts of the members of the Brigade are very much noticed, and appreciated.

American Steel and Wire Company Cooperates With Baltimore and Ohio For Safety

THE *Live Wire*, a magazine published by the American Steel and Wire Company, sounded forth the following warning to its employes at Rankin, Pa. We thank the editor, Mr. W. F. Greenawalt, for devoting the space in the *Live Wire* to this vital subject.

TRESPASS NOT!

"That some people do not believe in signs was amply demonstrated on the evening of October 6, 1920, when the Baltimore and Ohio Railroad detectives were

able to arrest about 25 trespassers. These were workmen who persisted in crossing the tracks in the face of the warning signs which had been posted in all Plants throughout the District.

"We trust the employes at Rankin are going to give this matter serious thought and consideration, and that they will resolve to use only the bridge over the tracks and the authorized guarded crossings when coming to and from the Plant.

"Watch your step! The Safety First Regulations of the Baltimore and Ohio must be observed, and the man who persists in ignoring them is bound to come in contact with the Law, or some dark foggy morning or evening the careless workman may forfeit his life for such foolhardiness. Watch your step!"

Will You Help?

There is only one way that we employes of the Baltimore and Ohio can assure ourselves and the Company a successful year, and that is, if each and everyone of us determines to practice the strictest economy in the use of the Company material we handle.

Mount Clare Fire Brigade

Baltimore and Ohio American Legion Post Organization

(Continued from page 33)

and Ohio Building for its meetings, thereby eliminating rental charges and also in the fact that its new members have the privilege of free transportation on the Baltimore and Ohio, a very great convenience when the Legion has outings or conventions in other cities than Baltimore.

There are also men on the Railroad who occupied positions of great responsibility during the War and who are also representative citizens in these times, and it is the hope and expectation of the Post that a series of interesting meetings will soon be arranged with these men, many of them members of our Post, as speakers:

The Post is also fortunate in having a live wire in the person of the Post Commander, W. W. Baldwin, office of Operating Vice-President, and former Captain G. M. C., U. S. A. He is a live wire, who has brought

in many members by personal solicitation. His work needs to be supplemented by that of all other post members, however, and it is hoped that all Baltimore and Ohio men eligible to the Legion and who are not members of other posts, or who would like to transfer from other posts to ours, will write or send immediately for an application card to the Adjutant, Henry C. Weber, office of BALTIMORE AND OHIO MAGAZINE, Mount Royal Station, Baltimore.

The Legion at large has a big duty to perform in these peace times. It must keep ever before the people the ideals of Americanism, for which many of its members fought overseas. It must help in the reconstruction of our own country, now in the throes of many diverse opinions and passions, and evolve from them a sane and constructive program which will mean security under the law, a clean, wholesome environment and the largest measure of individual freedom possible for everyone who owns allegiance to the United States.

"Uncle Ned" Tells About the Minstrel Show Given by the Mount Clare Welfare, Athletic and Pleasure Association

(Continued from page 33)

his eyes, singin' to de top ob his voice, "Who'll Take The Place Of Mary?" I couldn't answer, but I doan 'speck he'll have a whole lot ob trouble in findin' somebody. Den de folks all lissen while de Welfare Quartette render some solemcholy songs, one ob 'em tellin' about "A Vacant Chair In Home Sweet Home," anodder, "You're The Same Sweet Adeline," an' den, de real, *real* song ob songs, "Roll Dem Bones." Dere wasn't nobody in de whole congregashun but whose hands wuz itchin' to git a holt on dem two big dice what dey wuz shootin' 'cross dat stage.

"Sweet Mama! Sweet Mama!" hollered Mistah Miller in dat way down low, long-come-short voice o' his'n, an' wid dat de ban' struck up a jazz an' Mistah Miller brung down de house, a-twistin' hisself in a million bow knots. An' right on top o' dat come several selections by de one an' only "Beechnut Trio," then the follerin' songs: "Sometime," by Mistah O'Neill; "The Land Where Sweet Babies Grow," by Mistah Lewis, an' "Let The Rest Of The World Go By," by Mistah Weibkin. All three-ob dest gempmans wuz showered wid applauses from de people.

"How do you feel?" axed Mistah Barry.

"Jes' lak a piano, Boss," answered de blackes' man on de stage.

"How is that?"

"Upright an' Grand, Boss, Upright an' Grand."

Mistah Corcoran an Mistah Hagett gib one ob dem real interpretous dances. Fust, dey would dance each one by hisself, den dey cotch hold hands an' dance togedder; den dey'd back away an' mos' break de necks ob de folks what wuz watchin' 'em, den dey'd slide 'cross de flo' an' do a shimmy

or two. Ef I could do like what dey did, I'd go 'way from dis country an' git a job minstrellin' to some ob dem barons an' dukes what Mistah Wood told about. Follerin' dis, we had a song from Mistah Ruppert what he called "My Little Bimbo." My soul, but dat man musta loved dat gal! Almos' as much as Mistah Shaffer done loved his "Daddy," what he sung about an' had to sing all ovah ag'in. But de song what made ebery man in de congregashun jump clear out of his chair was in de little verses what Mistah Roper, de fat gempman wid de embroidered shirt bosom, sung about. Ef I wuz tellin' dis to ladies, I wouldn't hab de nerve to say de name ob it, but bein's its jes' 'tween you an' me, de subject ob his song wuz "Wild, Wild Wimmen!" Dat man sho' had a job on his hands, yaas, suh!

Now Ise gwine tell you 'bout de big s'prise. Dat lady what come in a little befo' an' done all dat great Spanish an' 'Gyptian ballet dancin', come in ag'in an' dance right from Paris. An' jes as she finish an' eberybody wuz a-clappin' dey hands an' applausin' an' all de men folks wuz 'bout to fall on dere knees befo' her an' swear day'd leave dere happy homes an' wives an' children fo' her, I'm blest ef she didn't take off her wig. An' SHE wuz a MAN! De Lawd knows what's comin' next, I don't.

Den come de gran' *finale* as de p'ogram call it. All de rattle-bones, Jews harps, kazoos, an' sich insterments, musical an' non-musical, as de preacher say, commence to play at once. An' ebery man what had a mouf opened it an' commence to sing. An' de curtain went up an' down an' went up ag'in an' come down ag'in. An' folks on de stage bowed an' folks in de congre-

gashun clapped dey hands, an' eberybody done had a mos' glorious time.

When 'twas all obah, dey wuz a scufflin' an' a shufflin', an' in no time de benches in de hall wuz slid down de cellah, an' old folks an' young folks wuz habin' a jubilee on de dancin' flo'.

When I lef' dere 'twuz gittin' close on to midnight, an' when I got home, Mandy wuz settin' up waitin' fo' me to tell her all 'bout it. An' when I had 'splained it all, Mandy say, say she, "Ned," she say, "de very nex' time yo' goes coon huntin', you'se got to bring home 3 coons; one ob dem is gwine be sent to Mistah President Harding, one to Mistah Tatum, who gib yo' de ticket to de show, an' de othah to Mistah Fenton, 'cause he done work so hard to make dat show a success."

Retirement of John Hair

ON DECEMBER 31, 1920, at his own request, John Hair, since February 1, 1877, an employe in the Motive Power Department of the Baltimore and Ohio, was retired on pension.

Mr. Hair started as machinist apprentice at Pana, Ill., and went up through the grades of machinist, machine shop foreman, assistant general foreman, master mechanic, to the position of superintendent of Motive Power in 1903. In 1912, he was made the representative of the Motive Power Department on the General Safety Committee and in 1918 resumed his work with the Motive Power Department as a special engineer.

On account of his early and active interest in Safety, Mr. Hair was recently asked if he thought that this movement had made substantial headway since it was started on the Baltimore and Ohio.

"Decided headway," he replied. "When we first started organizing our Safety committees, the men regarded the movement as being something which was started, not to benefit them but solely to benefit the Railroad. We had a hard time getting satisfactory committeemen and interesting the men in the work. Now there is a marked improvement, employes and officers alike appreciating the great importance of the Safety work, believing that it is a proposition which calls for the finest kind of teamwork and which benefits one and all alike. In my mind the increased interest taken in Safety and the marked results it has obtained during the last few years on the Railroad, are some of the greatest improvements and advances made in railroad operation."

Mr. Hair is well known up and down the line of road, and especially in the Motive Power Department. His splendid training and ability, dignified yet winning personality and many friendships among our employes, have made him welcome wherever he has gone. It is the wish of all who have had the pleasure of knowing him that the future years hold much of enjoyment and profit for him.

1 Brings HARTMAN'S Elegant 7-Piece Suite

Richly Upholstered Backs and Seats, Beautiful New Design

Here is Hartman's latest offering in Mission furniture. A new design in a 7-piece suite—elegant, massive, made on graceful tapered lines. Both chairs and rockers have upholstered seats and backs. Without doubt the greatest bargain in Mission furniture. Sent for only \$1 down and on 30 days' free trial. Then, if not satisfied, send it back and we will refund the \$1 and pay freight both ways. If you keep it, pay balance, only \$3 monthly—over a year to pay.

Take Over a Full Year to Pay

This splendid suite consists of large Arm Rocker, Arm Chair, Sewing Rocker, Side Chair, Library Table, Tabourette and Book Blocks—all beautifully finished, fumed in a rich shade of brown, neatly waxed.

Very massive and well braced—very durable. Upholstered Seats and Backs

Rocker and chair seats and backs are richly upholstered in imitation Spanish brown leather, well padded for comfort. Rears of backs are also upholstered with same material as front. Any way you look at them these chairs and rockers have a finished appearance. Chairs and table move easily because they are set on "domes of silence." Rocker and Arm Chair about 36 inches high and have seats 19x19 inches. Backs 22 inches from seat. Sewing Rocker and Side Chair about 34 inches high, seats 16x16 inches, back 21 inches from seat.

Extra Large Table Extra large 24x36 in. Library Table stands 30 inches high; legs 2 inches square. Paneled ends and roomy bookshelf. Tabourette top 10x10 inches. Height 16 inches. Book Blocks large and heavy. We can't say enough for this splendid set. Try it 30 days FREE. Shipped without delay (fully boxed, "knocked down" to save freight) from Chicago warehouse or factory in Indiana. Shipping weight about 180 lbs.

Order No. 110CMA15. Price \$39.95. Pay only \$1 down. Balance \$3.00 monthly.

FREE Bargain Catalog

The great free 432-page Catalog offers you choicest styles and amazing bargains in furniture, rugs, linoleum, stoves, watches, silverware, dishes, washing machines, sewing machines, aluminum ware, phonographs, gas engines and cream separators, etc.—all on our easy monthly payment terms. 30 days' FREE trial on everything. Post card or letter brings it by return mail.

Wide widths.

Order by No. AX1826. Pay **\$2.98** and postage on arrival. Money back if not satisfied.

You will say that we have surely dropped the bottom out of shoe prices when you see these bargains. Even before the war these would have been amazing cut-price offerings—and now they are a positive sensation. No need to look elsewhere. No money to send—only the coupon. If not satisfied after examination, return the shoes and you are not out a cent.

Prices Cut on Work Shoes

Extra Heavy Biggest work shoe bargain of the year. A manufacturer had these shoes made on a special export order. The order was cancelled.

A big manufacturer had to close out his stock of first grade Scout Style Work Shoes. By paying him the ready cash we got every pair at one of the biggest reductions ever made.

\$3⁵⁹
ON ARRIVAL

We have marked them accordingly. See if you can match this Scout Style Work Shoe at our price—and to give you the chance we send it on approval. Don't confuse this shoe with ordinary quality. This is first grade soft Chocolate Elk Scout Style sport or work shoe—guaranteed A1 quality. Made from selected leather. Tough, but easy on the feet. Strong leather soles. Low broad heels. Sizes 6 to 11. Wide widths.

Order by No. AX1807. Pay **\$3.59** and postage on arrival. Money back if not satisfied.

Prices Cut on Dress Shoes

\$3⁹⁸
ON ARRIVAL

Blucher Style You might pay twice our price for this shoe and not get one a bit better or finer looking. Made of fine black gun metal veal leather on stylish Blucher last. Soft, durable, long wearing and takes a wonderful polish. Low, broad heels. New style medium round Broadway toe. Sizes 6 to 12. Wide widths. One of the greatest shoes for all-round wear we have ever offered. It is one of the best looking dress shoes you will see anywhere and made for wear also—a shoe that will give best kind of service. Order by No. AX1510. Pay only **\$3.98** and postage on arrival. Money back if not satisfied.

Never before have we **Ladies' Hi-Cuts** been able to offer such a bargain as this in ladies' Hi-Cuts—a stunning soft black kid finished, stylish lace boot. Circular vamp and heel foxing. Imitation stitched tip and medallion. Strong leather soles. New 1½ inch walking heel. Very latest last. Sizes 2½ to 8. Wide widths. Order by No. AX999. A regular \$5 value, but you pay only **\$3.98** and postage on arrival. Money back if not satisfied.

NOTE—This bargain possible because a manufacturer had to unload a lot of fine leather at a loss to meet pressing obligations—notes coming due—that made the chance. The maker of these shoes got this fine leather at a wonderful bargain and sold us the shoes at a price which enables us to give you a splendid saving. Don't let the opportunity pass. Send coupon.

\$3⁹⁸
On Arrival

Send the Coupon

Send no money—only coupon. When shoes arrive pay only the low bargain price, \$2.98 or \$3.59 and postage for the Work Shoes, or \$3.98 and postage for the Dress Shoe or the Hi-Cuts. Compare with shoes that sell for twice our price elsewhere. If not satisfied, return shoes and we will refund your money. Supply is limited, so order quick.

Baltimore and Ohio Magazine

February

In 1753, with crude engineering instruments and facing the dangers of being attacked by Indians and wild animals, young George Washington and his crew blazed the trail between Cumberland and Wheeling for the Old National Pike, a great part of which the Baltimore and Ohio now follows

1921

There Are Reasons

If you should ask Engineman John L. Cogley, of Garrett, Indiana, for his reasons for making use of the Savings Feature of The Baltimore and Ohio Relief Department, he would say that there were many of them—a fine wife and some fine children among them—and every one of them a good reason for him to get a home.

THE SUBSTANTIAL AND ATTRACTIVE HOME AND FAMILY (INCLUDING SONS AND DAUGHTER-IN-LAW) OF
ENGINEMAN COGLEY, AT GARRETT, INDIANA

In the insert, left to right, top row, are: Miss Gertrude Cogley, Frank Cogley, Mrs. Frank Cogley, Maurice Crow, Esther Crow; second row, William Drayer, Mrs. Drayer, Margaretta Cogley; front row, J. G. Cogley, Beatrice Cogley, Catherine Cogley, Martin Cogley, Adelaide Cogley and Mrs. J. G. Cogley. Mr. Cogley is a passenger engineer on the Chicago Division and has been a member of the Relief Department since 1887. Only 51 years old and Mrs. Cogley only 48, with their splendid family and fine home, they have much to be proud of.

How many reasons have you for securing a home?

Why not clinch the reasons by action, write to the Savings Feature of the Relief Department and ascertain their terms for loaning money on a home?

Thousands of employes besides Mr. Cogley have acted and are now home owners.

How An Editor Got Rich

He started poor as a proverbial church mouse 20 years ago. He has now retired with a comfortable fortune of \$50,000.

This money was acquired through industry, economy, conscientious effort to give full value, indomitable perseverance, and the death of an uncle who left the editor \$49,999.50.—*Empeco News*.

Not That Kind

"I want a pair of shoes for this little girl," said the mother.

"Yes, ma'am," said the shoe clerk; "French kid?"

"Well, I guess not," was the irate answer. "She's my own child, born right here in Racine."—*Case Eagle*.

Honor in Politics

Ex-Representative Longworth, of Ohio, tells of a negro who brought his three sons to town on election day in a border town in Ohio.

"Hello, Rastus," said a man who knew the negro, "what are you doing here?"

"I's jist projeckin' 'roun' to see how's election."

In the afternoon the same man met Rastus again. "Have you voted, Rastus?" he asked.

"Yassir, I's voted, an' my boys, they's voted."

"How did you vote?"

"Well, boss, it was disyer way. I meets a Republican on th' street an' he gibbs me 'leven dollars to vote his ticket. An' I meets a Democrat, an' he gibbs me seven dollars to vote his ticket. So I voted for th' Democrat."

"But the Republican gave you the most money."

"Yassir, dat's jist th' pint. I voted for dem Democrats because they was least corrupt."—*Three Parties*.

What is Anatomy?

A little negro schoolgirl, down in Florida, in answer to this question, wrote the following:

Anatomy is the human body. It is divided into three parts, the haid, the cheist, and the stummick. The haid holdes the skull and the brains if they is any, the cheist holdes the liver and part of the lites, the stummick holds the entrails and the vowels which are a e i o and u and sometimes w and y.—*Case Eagle*.

Heard it Rattle

The witness for the defense was being cross-examined. In answer to a question put by counsel, instead of speaking, he nodded his head.

Whereupon the court stenographer, who was not looking at the witness, demanded: "Answer that question."

The witness replied: "I did answer it; I nodded my head."

"Yes," was the retort, "I heard it rattle, but could not tell whether it was up and down or from side to side."—*Exchange*.

YOU Can Get a Ford FREE

Without a Dollar of Cost

You don't have to pay for it—not even the freight. Not a dollar of your money is required. The man shown in the car answered our ad. Now he's riding in the car we gave him. You can get one too. Don't send a cent—just your name and address—that's all. Do it now. A post card will do. I want to send you a dandy auto also.

A Boston Conductor

"Fare!"
The passenger gave no heed.
"Fare, please!"
Still the passenger was oblivious.
"By the ejaculatory term 'Fare!'" said the conductor, "I imply no reference to the state of the weather, the complexion of the admirable blonde you observe in the contiguous seat, nor even to the quality of the service vouchsafed by this philanthropic corporation. I merely allude in a manner perhaps lacking in delicacy, but not in conciseness, to the monetary obligation set up by your presence in this car, and suggest that you liquidate."

At this point the passenger emerged from his trance.—Pittsburgh Chronicle Telegraph.

A Host in Himself

A gentleman found himself one day at a small station where he would have to wait several hours for the train. A New York paper tells the story:

"Sort of dull place," the conductor said to him, as he descended. "Still, you'll have company, the ticket agent, the operator, the flagman, the storekeeper, the postmaster, and the agent of the accident insurance company are all inside."

Mr. O'Neill entered the station and looked around. In the dim light he could distinguish only a red-haired man at a telegraph instrument.

"Where are the others?" the visitor asked.

"Others what?" said the man.

"Why, the ticket agent, the flagman, the postmaster and the rest." The man grinned. "Where are they?" Mr. O'Neill repeated.

The red-haired man grinned again.

"I'm um; come in and join us," he answered.—The Pilot.

Ruth

Ira Andrews, the newly elected city clerk of Terre Haute, is active in Sunday School work. Last Sunday he advised the children of his class that the morning study would be

about Ruth, referring, of course, to the gleaner.

"Now," said Andrews, after introducing the subject, "who can tell me anything about Ruth?"

Up went a little hand in the rear of the class. "Well, Willie," asked the teacher, "what do you know about Ruth?"

"He made 53 home runs last season," was the answer.—Indianapolis News.

You Need These Books

PRETTY soon you will be called up to take your examination and you will have to face a lot of hard questions. Better brush up a little. Our books contain every question with its answer you are likely to be asked by the examiner. They are the only complete railway books issued giving up-to-date, reliable information. Don't put off until examination day comes, but send for the following books at once:

Westinghouse E T Air Brake Instruction Pocket Book Catechism. By Wm. W. Wood, Air Brake Instructor.

A practical work containing examination questions and answers on the E T Equipment. Covering what the E T Brake is. How it should be operated. What to do when defective. Not a question can be asked of the engineman up for promotion on either the No. 5 or No. 6 E T Equipment that is not asked and answered in the book. If you want to thoroughly understand the E T equipment get a copy of this book. It covers every detail. Makes Air Brake troubles and examination easy. Fully illustrated with colored plates, showing various pressures. \$2.50

Locomotive Breakdowns and Their Remedies. By Geo. L. Fowler.

Revised by Wm. W. Wood, Air Brake Instructor. It is out of the question to try and tell you about every subject that is covered in this pocket edition of Locomotive Breakdowns. Just imagine all the common troubles that an engineer may expect to happen some time, and then add all of the unexpected ones, troubles that could occur, but that you had never thought about, and you will find that they are all treated with the very best methods of repair. Walschaert Locomotive Valve Gear Troubles. Electric Headlight Troubles, as well as Questions and Answers on the Air Brake, are all included. 294 pages. Fully illustrated. \$1.50

Train Rules and Train Despatching. By H. A. Dalby.

Contains the standard code for both single and double track and explains how trains are handled under all conditions. Gives all signals in colors, is illustrated wherever necessary, and the most complete book in print on this important subject. Bound in fine seal flexible leather, 221 pages. \$1.50

Walschaert Locomotive Valve Gear. By Wm. W. Wood.

If you would thoroughly understand the Walschaert Valve Gear, you should possess a copy of this book. The author divides the subject into four divisions, as follows: I—Analysis of the gear. II—Designing and erection of the gear. III—Advantages of the gear. IV—Questions and answers relating to the Walschaert Valve Gear. This book is specially valuable to those preparing for promotion. Third edition, revised and enlarged. 245 pages, fully illustrated. Cloth. \$2.50

Air Brake Catechism. By Robert H. Blackall.

This book is a standard text book. It is the only practical and complete work published. Treats on the equipment manufactured by the Westinghouse Air Brake Company, including the E T Locomotive Brake Equipment, the K (Quick Service) Triple Valve for freight service; the L High Speed Triple Valve; the P-C Passenger Brake Equipment, and the Cross Compound Pump. The operation of all parts of the apparatus is explained in detail and a practical way of locating their peculiarities and remedying their defects is given. Endorsed and used by air brake instructors and examiners on nearly every railroad in the United States. Twenty-seventh edition. 411 pages, fully illustrated with folding plates and diagrams. New edition. \$2.50

Practical Instructor and Reference Book for Locomotive Firemen and Engineers. By Chas. F. Lockhart.

An entirely new book on the locomotive. It appeals to every railroad man, as it tells him how things are done and the right way to do them. Written by a man who has had years of practical experience in locomotive shops and on the road firing and running. The information given in this book cannot be found in any other similar treatise. Eight hundred and fifty-one questions with their answers are included, which will prove specially helpful to those preparing for examination. 362 pages, 88 illustrations. Cloth. \$2.50

Link Motions, Valves and Valve Setting. By Fred H. Colvin, Associate Editor of American Machinist.

A handy book that clears up the mysteries of valve setting. Shows the different valve gears, in use, how they work, and why. Piston and slide valves of different types are illustrated and explained. A book that every railroad man in the motive power department ought to have. Fully illustrated. New revised edition recently published. 75 CENTS

Locomotive Boiler Construction. By Frank A. Kleinbans.

The only book showing how locomotive boilers are built in modern shops. Shows all types of boilers used; gives details of construction; practical facts, such as life of riveting punches and dies, work done per day, allowance for bending and flanging sheets and other data that means dollars to any railroad man. Second edition. 451 pages, 334 illustrations. Six folding plates. Cloth. \$3.50

The Baltimore and Ohio Magazine
Mount Royal Station
Baltimore, Maryland

The Cover Design—George Washington as a Surveyor

Painted by HERBERT DAVID STITT

THE traveler who delights in historical recollections and who would fill his soul with the spirit which held him spellbound when he first heard the tales of old Hendrik Hudson and his famous nine-pin crew, who,

“Up in the Catskills all night long,
Frolicked and revelled with wine and with song,”

will have his wishes fulfilled when a trip on the picturesque Baltimore and Ohio takes him along the trail of the Old National Road through the mountainous country surveyed by George Washington in 1753.

The Old National Road, sometimes called the Cumberland Pike, extending from Baltimore to St. Louis, and first among the several highways connecting the East with the unexplored West, had its origin as a national highway at Cumberland, Md., and extended to Wheeling, W. Va. (then Virginia).

For years this road was a vital factor in politics, industry and in the social life of the people. Think how advantageous it must have been to live near this great highway in the days antedating our numerous post offices and telephone lines; when landlords set their servants to watch for the passerby and to invite him to partake of the hospitality of the home in exchange for any bit of news he might bring.

Daring, too, were the pioneers who ventured forth and blazed the first trails. Over primitive paths, fording rivers, and exposing themselves and their families to the ravages of wild beasts and savage Indians, went the emigrants to their new homes in the valleys of the Ohio and the Mississippi. Soon the new government realized that if our country would grow, some protection must be given these travelers and to the mails and commerce at that time dependent upon open thoroughfares and navigable watercourses. The solution was the National Road.

Then it was that George Washington, surveyor of the lands of Lord Fairfax of Virginia, foresaw the possibilities of the great West by means of such a highway; then it was that he, accompanied by Gist, the veteran woodsman, traveled, studied, and surveyed that part of the National Road that lies between Cumberland and Wheeling; the section from Cumberland to Frostburg, through the famous Cumberland Narrows, over Wills Mountain and across Wills Creek; around and about the little town of Eckhart, where the traveler meets many a dust-covered figure wearing a little lamp on the front of his cap, and proclaiming his underground occupation; past the thousand foot rock at Lover's Leap, where legends tell us that an Indian committed suicide. These and other bits of exquisite scenery for which the National Road is famous lie alongside or near that stretch of the country through which run the rails of the Baltimore and Ohio.

Surveying in those days was not an easy task. The transit itself was simply a stake to which was attached the compass, having two small, upright pieces on its opposite sides, through which was stretched a fine thread or wire. Then, too, there were the necessary firearms, for in each party there must be several men to do scout duty.

To George Washington and his surveying party, including Gist, the woodsman, the Baltimore and Ohio owes a debt of gratitude; it was they who laid the foundation for the National Road, rich in natural beauty, and stretching through a land boundless in mineral resources, and of which our Railroad covers a goodly portion.

Like Washington, the pioneers who blazed the way for the laying of the Baltimore and Ohio Railroad also had great obstacles to overcome. For, besides clearing the way, they had to make the Line as level and straight as possible: a “prairie schooner” might make a very sharp turn without danger of upsetting or of running into another, but a railroad train must take a gentler curve; and the wheels of a stage coach might run over an occasional stump or into a mudhole without disaster, but the wheels of cars must run on level rails provided for them.

It is, therefore, an interesting tribute both to the Surveyor Washington and to the early trail blazers of our Railroad that nobody has ever found a better route from Baltimore to Wheeling than this first one mapped out by the young man who was destined to become the first President of the United States, and the one followed by the pioneer railroad, the Baltimore and Ohio.

Economies Being Effected Wherever Possible All Along the Line

Serious Falling Off in Business Shown by Sharp Decrease in Cars Loaded During January

To the employe who for any reason doubts the necessity for the most rigid economy during this period of decreasing business, the facts here presented will be convincing

THE superintendent of one of our largest divisions was recently discussing with an outsider the necessity for economy on the Railroad. He said:

"In spite of the evidence which is on every hand of the real plight of our Railroad in trying to reduce its expenses to some extent in the degree in which its revenues are falling off, I have a hard time persuading some of our men that such is the case. They attribute the economies which have been put into effect all around them to the most unreasonable causes. For instance:

"At a meeting held in my office several days ago I spoke strongly of the necessity of every employe helping in keeping down our expenses. Most of the men understood, for they had seen with their own eyes how our operations have been curtailed within the last six weeks. But one of them jumped up and said that he did not believe all this 'bunk' about the financial difficulties of the Railroad—that a good deal of the stuff in the newspapers was manufactured and that an investigation of the facts would prove that the railroads were trying to put something over on the public and their employes."

If such an employe as the one mentioned by the superintendent had taken the time to investigate he would not have laid himself open to having what he said so utterly confounded by the facts as they exist on his own Railroad.

The Facts

Just what are these facts and, in view of them, can any employe doubt the necessity for economy all along the line or be unwilling to lend his aid to that end?

The best quick measure we have of the amount of business moving on the Railroad (which represents the amount of money which the Company is taking in to pay its bills) is the record of cars loaded.

Here is this record for the last four months, including cars actually loaded on the Baltimore and Ohio and received from connections:

In October, 1920
302,538

the largest month in 1920 and one of the largest months in the history of the Railroad.

In November, 1920
267,301

In December, 1920
240,497

In January, 1921
194,651

This shows that during the comparatively short period of three months the number of cars loaded and received from connections per month on the Baltimore and Ohio decreased over one-third.

The record for January, 1920, was 259,632 cars, making the record for the January just passed a decrease of 25 per cent. as compared with the corresponding month of the previous year.

With such large decreases in the amount of business handled go a corresponding decrease in the amount of gross revenue received. In other words, when January, 1921, shows a decrease of a third in cars loaded and received from connections as compared with October, 1920, it means that the Railroad's gross revenue has also decreased approximately a third.

Difficulties of Curtailment on Railroads

As has often been pointed out, the Railroad cannot curtail its expenses in the same way that a large manufacturing plant can. In the first place the Railroad is in the business of performing a public service and cannot curtail its operations in the same degree as the business offered decreases, because it has to keep a certain number of trains running to handle both passenger and freight business in the public interest. Again, although some reductions can be made in its control of overhead ex-

penses, these also cannot be reduced in nearly the proportion of the decrease in its revenue. The same number of crossing watchmen have to be employed on a division to guard against crossing accidents when there are three trains per day as when there are thirty. Practically the same divisional, district and executive staffs have to be maintained, if only for the purpose of giving operations adequate supervision as to expenses, wherever they can be curtailed. The costs of money borrowed for capital investment still go on, no matter how many trains are cut off, and no matter what other curtailments of the service are made.

Sunday Closing on Slow Freight

As is generally known by employes all over the System, all divisions have been closing down during the last few weeks from midnight Saturday until midnight Sunday except for passenger, Q. D., stock and such few other trains which it has been necessary to run. Slow freight has practically not been moved at all during that 24 hour period.

This Done for First Time in Road's History

A good example of the economies effected by such an arrangement can be shown on the Baltimore Division. On Sunday, January 30, and on Sunday, February 6, all freight service on the Old Main Line between Halthorpe and Washington Junction was discontinued. Q. D. and stock trains were operated over the Metropolitan and Washington Branches. Passenger trains have run over the Old Main Line in accordance with regular schedule in order not to disrupt the public service. According to the best recollection of old timers on the Baltimore Division, this is the first time since the Old Main Line was built that no freight traffic has been operated over it during a 24 hour period. A single one of the economies effected by this may be shown from the fact that there was but one open telegraph office between Halthorpe and Washington Junction, namely that at Frederick Junction.

For quite a number of years it has been customary on the Baltimore and Ohio, when business has been at such low ebb as to warrant it, to curtail the movement of slow freight on Sundays. This procedure has been followed and is being followed because it does not interfere seriously with the service given our customers and, on the other hand, it does not work a serious hardship on our employes in the matter

of lay-offs. But it does effect considerable economies.

Knowing Facts, Loyal Employes Will Help

In mentioning these ways in which economies are being brought about with as little curtailments of our service to the public and with as little hardship to our employes as possible, we have not spoken of the many efforts also being made in other directions to

decrease our expenses during this period of business depression. But we believe we have covered the subject sufficiently clearly to show to any interested employe the real situation and, if he be the type who believes that it is a part of his job to make a special effort in reducing expenses when the Company needs this reduction as badly as it does now, to win his whole-hearted support toward that end.

Connellsville Veterans Show the Way in Securing New Business for Company. Judicious Combination of "Headwork" and "Footwork" Brings Remarkable Results

WHEN the late Dr. Osler said that a man passed his period of usefulness when he reached the age of 60, he reckoned without the Veterans of our Connellsville Division. For during the last month a number of these men of the Baltimore and Ohio, many of whom have put the age of three score well behind them, have been showing business getting ability enough to make our younger solicitors look to their laurels.

Appeal to Veterans

On January 17 the Editor of the MAGAZINE wrote a letter to the president of each Veterans' Chapter on the System. It summarized the appeal which President Willard made in his address to the delegates to the Grand Lodge Convention, and the members of the Baltimore Chapter on the night of December 13, briefly stating that during the period of Federal control our Railroad had lost a considerable share of the high class freight business which it had been handling up to that time and that the then comparatively small volume of traffic made it desirable that the Veterans, utilizing their large acquaintanceship and reputation among the business men and citizens generally in their respective communities, try through personal solicitation to bring back this business and secure new business for our lines. It also requested the presidents of the Veterans' Associations to read the letter to their respective memberships at the first opportunity and to proceed to some practicable working plan. Copy of this letter was also printed on page 30 of the January issue of the MAGAZINE.

They Get Busy

Since this letter was sent out, a number of encouraging replies have

been received, among them from President Shafferman, Grafton Chapter; President Trimble, Garrett Chapter; President Cox, Pittsburgh Chapter; President Moriarty, Newark Chapter.

Here's Where the Headwork—

At Connellsville, however, largely through the splendid initiative and hard work of P. J. Harrigan, president of the chapter there, and of James Wardley, grand secretary of the Veterans' Associations, work has been done and results obtained that are extremely gratifying.

These gentlemen adopted the wise plan of getting in touch with the division officials at Connellsville, and Superintendent T. J. Brady was an active participant in their plan and lent large assistance to it by virtue of his position with the Railroad and his standing as a business man in the community.

They also enlisted the enthusiastic support of the two newspapers at Connellsville, the *Daily Courier* and the *Daily News*, and succeeded in giving to their campaign such wide publicity as to make every newspaper reader in that section realize that Baltimore and Ohio men were up and doing.

The gist of their argument through the newspapers and through personal solicitation was this:

The Baltimore and Ohio Railroad is the largest employer of labor in Connellsville. As such it is the largest contributor to the welfare and prosperity of the community. It maintains division headquarters at Connellsville with shops employing hundreds of prosperous and desirable members of the community, and on the basis of the high class service

which it gives to shippers and travelers, it appeals for a large share of freight and passenger business in and out of the city.

Up to this time copies of the Connellsville papers published during the period of the campaign show dozens of first page articles and a number of strong editorials, all urging upon the business men of the community the desirability of giving their business to the Baltimore and Ohio. These articles also carried daily reports of the personal solicitations made by Mr. Harrigan and Mr. Wardley and developed the remarkable fact that between January 28 and 31 they called on 167 merchants and manufacturers, all of whom promised as much freight and passenger business to the Baltimore and Ohio as they could possibly give. Among those visited only three men were found who had complaints to make against our service and these were satisfactorily adjusted.

These articles also emphasized the advantages of shipping via the Baltimore and Ohio by stating that shipments made in Pittsburgh and Baltimore and Philadelphia on one day are received in Connellsville the following morning. Further than that, they mentioned to the shippers of Connellsville the fact that they could in a large measure control the routing of their incoming shipments by sending in with their orders for goods the request that they be forwarded via Baltimore and Ohio to Connellsville wherever possible.

And the Footwork Came In

That Mr. Harrigan and Mr. Wardley did not merely direct this far-reaching campaign is suggested by the statement above that they per-

sonally saw 167 merchants and manufacturers. This meant hard work, the wearing out of a lot of shoe leather. And almost any good solicitor will agree that it is not only thinking out your campaigns in the comfort of an office chair but also a good deal of "pounding of pavements" that gets business.

Mr. Harrigan also sent copies of the original letter sent to him, to all members of his executive committee, located at Confluence, Rockwood, Somerset, Hyndman, Smithfield, Meyersdale and Johnstown, with a supplementary letter from him, asking them

to pass the word on down to the membership in their respective communities and to get as many men actively soliciting business as possible.

An Enthusiastic Advertiser

One very interesting result of the campaign was disclosed in the advertisement of the City Meat Market of Connellsville in a recent issue of one of the local papers. This advertisement occupied about one-quarter of a page and the phrase, "Have your freight hauled over the Baltimore and Ohio—the Upkeep of Connellsville," appeared no less than nine times in

bold face type. Such results speak for themselves, but here are some others even more positive. Without using the names of the concerns in question we quote the following paragraphs from a letter from Mr. Harrigan dated February 8:

Tangible Results

"The Blank Company, who have a great demand for their products and whose factory is along the line of a competing railroad, promised to arrange to have practically all their transportation over Baltimore and Ohio lines. Their shipments are usually by carload lots and consist of at least four cars per week besides packages. They receive from Blank about the same number of incoming cars and it is their intention that these be handled over the Baltimore and Ohio at the closest junction our Road can be reached."

"Four of our largest manufacturers in blank supplies, three of them with factories located along a competing line, have also promised to ship all products from their plants by Baltimore and Ohio and will instruct that material shipped to them be routed over the Baltimore and Ohio."

Mr. Harrigan has also arranged for an open meeting of the Veterans' Association in the high school auditorium at Connellsville, to which the public will be invited, enjoy a social evening and hear our people tell of the activities and importance of the Baltimore and Ohio from an industrial and civic standpoint in Connellsville. At the urgent request of a number of prominent business and newspaper men of the city, this meeting has been postponed until Vice-President Gallo-way can arrange to be present and make an address.

Competition Steps In

The early bird may not have much competition for the first worm. After that, however, competition comes thick and fast. And so it has been at Connellsville. The representatives of other railroads, surprised by the success of our old stalwarts there in getting business for the Baltimore and Ohio, have put on increased pressure in their solicitation.

Service the Answer

From a Baltimore and Ohio standpoint there is just one answer to this problem and that is SERVICE. Our men there will get our share of the business, and if we handle freight and passengers as they should be handled and as we can handle them, we can hold this business. Rough handling of cars kills business. Here is a chance for our train crews to do their bit. Getting shipments in wrong cars causes interminable delays and claims

"Nowhere Have I Found Such Uniform Courtesy and Politeness"

H. S. ROBINSON CO.
43 CENTRAL SAVINGS BANK BUILDING
BALTIMORE, MD.

Baltimore, Md., January 12, 1921.

Mr. Daniel Willard, President,
Baltimore and Ohio Railroad Company,
Baltimore, Maryland.

My Dear Sir:

My business for the past year has brought me in contact with practically every large corporation, office building and employer of labor in the City of Baltimore. For some weeks past it has brought me in touch with nearly every department at the Baltimore and Ohio Railroad Building.

I wish to congratulate you upon your organization, for nowhere have I found such uniform courtesy and politeness. This includes the entire personnel of your Company, from the elevator starter on the first floor (to whom I have had to go a number of times for information) and the various messengers and clerks, up to the heads of departments and officers of the Company.

In not one instance have I ever had other than the greatest courtesy extended, no matter how busy the person might have been whom I approached.

It is so unusual and has made such a deep impression upon me that I feel that you should know how your policy is being carried out, for the policy of any organization is established by the head of it, and the element of courtesy tends to the highest efficiency, especially in great public organizations such as yours.

The public too often is apt to take these courtesies for granted without comment, but does not fail to write letters of complaint when anything occurs not entirely to their liking.

I wish it were possible to convey my appreciation to the various departments, but I am glad to take the opportunity to express it to them through you.

I trust it gives you as much pleasure to receive this letter as it gives me to send it.

Sincerely yours,
(Signed) F. H. GRIFFITH.

and also kills business. Here is an opportunity for the men at the freight station to do their bit. And so on

down the line, let every man realize the importance of handling his job as it should be handled, and the

transportation business of Connellsville will stay where it belongs, with the Baltimore and Ohio.

IN THE SHADOW OF THE NATION'S CAPITOL

One hundred and fifty Danes, Swedes and Norwegians—farmers from our great Northwest—on their way back to their native lands for a brief winter holiday

With Such Citizens as These America Defies Bolshevism

THE picture on the opposite page is a good tonic for our parlor and street corner Bolsheviks, and for those of us who often fear for the safety of democracy in our beloved country. It shows 150 sturdy citizens of the United States, some of the men and women who produce the famed harvests of wheat in our great grain growing areas of the Northwest. Going back to their native lands, Sweden, Norway and Denmark, the camera caught them in the shadow of our Nation's Capitol at Washington, where they had stopped off for a brief visit to this hallowed shrine on their way to New York for their trip overseas.

Substantial, prosperous, healthy tillers of the soil, these men and women, who but a few years ago came to this country as immigrants, have taken back to the folks they left in their homelands, the love for their adopted country which American ideals of justice and equal opportunity have implanted in them. The

coming of the warm spring days will see them again moving westward to America, ready and anxious to sow their great acreages of wheat and help feed the earth's millions.

Their trip from Minneapolis was started December 5, via the Chicago Great Western to Chicago, and thence via the Baltimore and Ohio to Washington and New York, and was made on schedule time. The movement was arranged by H. C. Strohm, Northwestern passenger agent, through the courtesy of Mr. Nils Nilson, Great Northwestern agent at Minneapolis, Minn., of the Swedish-American Steamship Line.

America needs and is proud of such citizenry—men and women who are willing to take advantage of the opportunities our land offers them and, in honest competition with their neighbors, to work out a happy and prosperous livelihood for themselves and their families and to contribute substantially to the support of our institutions and ideals.

Shaking Hands With Abraham Lincoln

By George W. Haulenbeck

Law Department

THE battle of Antietam, occurring in Maryland on September 17, 1862, was the only engagement in which I participated. It is today regarded as the bloodiest battle of the Civil War, Gettysburg being denominated as the greatest of all the engagements.

After the Antietam fight a Provost Marshal for duty in the town of Sharpsburg, Washington County, Md., was selected from my regiment, the 13th New Jersey Volunteers, and being on the detail for that service, I was selected to act as clerk to the Provost Marshal. That is the way my freedom from all the engagements that followed is accounted for. The work of the Provost Marshal in Sharpsburg lasted for several weeks, and when the Army of the Potomac moved into Virginia, entering the grand old State of Virginia by the Loudon Valley, another clerical detail was in store for me at the headquarters of the Brigade, where I remained until May, 1864.

The winter of 1863 was spent in Tennessee in guarding the Nashville and Chattanooga Railroad, over

which the army supplies were transported to Chattanooga. In the Spring of 1864 the Army of the Southwest moved, and just before General William Tecumseh Sherman abandoned Atlanta, his base of supplies, and began his march to the sea, I received an order from the Secretary of War to report for clerical duty in the War Department. This was in May, 1864, and upon reaching Washington after a journey of seven days, I was installed in my new position in the old War Department building.

At that time Washington City was a veritable military camp. The bulk of the audiences at the theatres was made up of soldiers on leave, those about to report, and so forth.

Mr. Lincoln's Reception

When I saw the announcement that President Lincoln would hold a public reception at the White House, I immediately made arrangements to be present. I was eager to see Mr. Lincoln and a public reception would give me an opportunity to shake him by the hand. The crowd in attendance was so great on that occasion

that no one gave a thought to the matter of checking hats and coats, shaking President Lincoln's hand being uppermost in the minds apparently of all.

I am proud to say that while I tarried in Mr. Lincoln's presence only long enough to enjoy and appreciate a handshake, it was to me a great event.

While in the War Department I often saw papers bearing Mr. Lincoln's endorsement, and this endorsement portrayed the man. Take the case of a soldier charged with sleeping on post. Mr. Lincoln could find extenuating circumstances in cases of this kind and the soldier was saved from death. One paper of this kind simply read:

"Pardoned,
A. LINCOLN."

I never saw a paper of this kind with the first name written out. It was always "A. Lincoln."

When General Early and his force of Confederates sought an entrance into the City of Washington, it was necessary for the military authorities to move quickly, and the clerks in the departments were organized into regiments. Nearly every clerk in the War Department had seen military service and the organization called the "War Department Rifles" was the result. When the Army of the Potomac began to arrive from the Peninsula near Richmond, there was no immediate need of these regiments except to guard public buildings, but our organization was continued and we had daily drills on the space between the White House and the old War Department building. On these occasions we often saw Mr. Lincoln at very close range as he walked over to the War Department to confer with Mr. Edwin M. Stanton, the War Secretary. This was almost a daily occurrence.

I was in the audience at Grover's Theatre on the night Mr. Lincoln was assassinated at Ford's, on 10th Street, near E. As soon as the news was received the audience at Grover's was dismissed. I walked up in the direction of Ford's, as I resided on E Street, near 10th. I tarried with the crowd that had assembled in front of the building. The back gate of my landlady's premises was located just where the horse of John Wilkes Booth was tied in waiting for his master's appearance after the deed was accomplished.

The immense throng in front of Ford's Theatre was soon dispersed by a company of cavalry, like detachments going in various directions to apprehend the assassin.

After the deadly work of the assassin, Mr. Lincoln was carried to a residence on 10th Street, immediately opposite the theatre, where he died the next morning, April 15, 1865. This house was purchased by the Government and today bears an in-

scription reciting briefly the death of Abraham Lincoln within its walls.

The theatre building was thereafter purchased by the Government for \$100,000 and was then used as a part of the Surgeon General's office of the U. S. Army.

solve that their men must follow the rules laid down for the handling of freight, many, many claims would be prevented.

The chart accompanying this article suggests other things besides the value of teamwork. It shows how big a cut was made in claim payments during 1920 as compared with 1921. It shows that "it can be done." The figures at the bottom of the chart also suggest what could be done with the \$600,000 saved. To the motive power man it means perhaps six great new locomotives, or a hundred fine steel hoppers of the largest capacity—enough new rolling stock to solve a big part of the operating problem on a whole district. To the maintenance man it conveys a picture of a long stretch of much needed new second or third track, the addition of which would in itself mean to the Railroad another large saving through efficiency. There isn't an executive officer on the Railroad who could not

Cut Loss and Damage 50 Per Cent.—It Can Be Done

Agents Backing Campaign to Reduce Claims for Current Year

MANY employes don't like to be quoted in our MAGAZINE, among them Agent F. G. Hadley, Mt. Vernon, Ohio. But so large a number of agents have written to Baltimore and advised that they are heart and soul in the campaign to "Cut Loss and Damage 50 Per Cent." this year, that despite Mr. Hadley's reluctance to have his letter printed here, we have asked him to let us use it as typical of the letters which have been received from other agents.

Mr. Hadley writes as follows:

MT. VERNON, OHIO, January 5, 1921.
THE EDITOR,
BALTIMORE AND OHIO MAGAZINE,
Baltimore, Md.

Dear Sir—In the December issue, our general freight claim agent asks if we are with him for a 50 per cent. reduction in claims in 1921.

I do not care to break into "print," but I do think that he is entitled to hearty cooperation from every employe, especially of the freight agents.

The agents at smaller stations should be urged to give their Local Freight Claim Prevention Committees reports which would help to prevent claims. These committees must continue to exert their best efforts along all lines, both of education and supervision.

IT CAN BE DONE!

That challenges our best efforts.

Claims must be reduced and
Agents giving careful supervision will
Never fail to obtain best results.

Baltimore and Ohio
Employes are loyal workers.

Down "Old Man Careless,"
Obey your L. C. L. rules.

Never overlook a chance to save a claim.
Enter into the game and keep your
divisional freight claim agent fully
advised.

Yours truly,

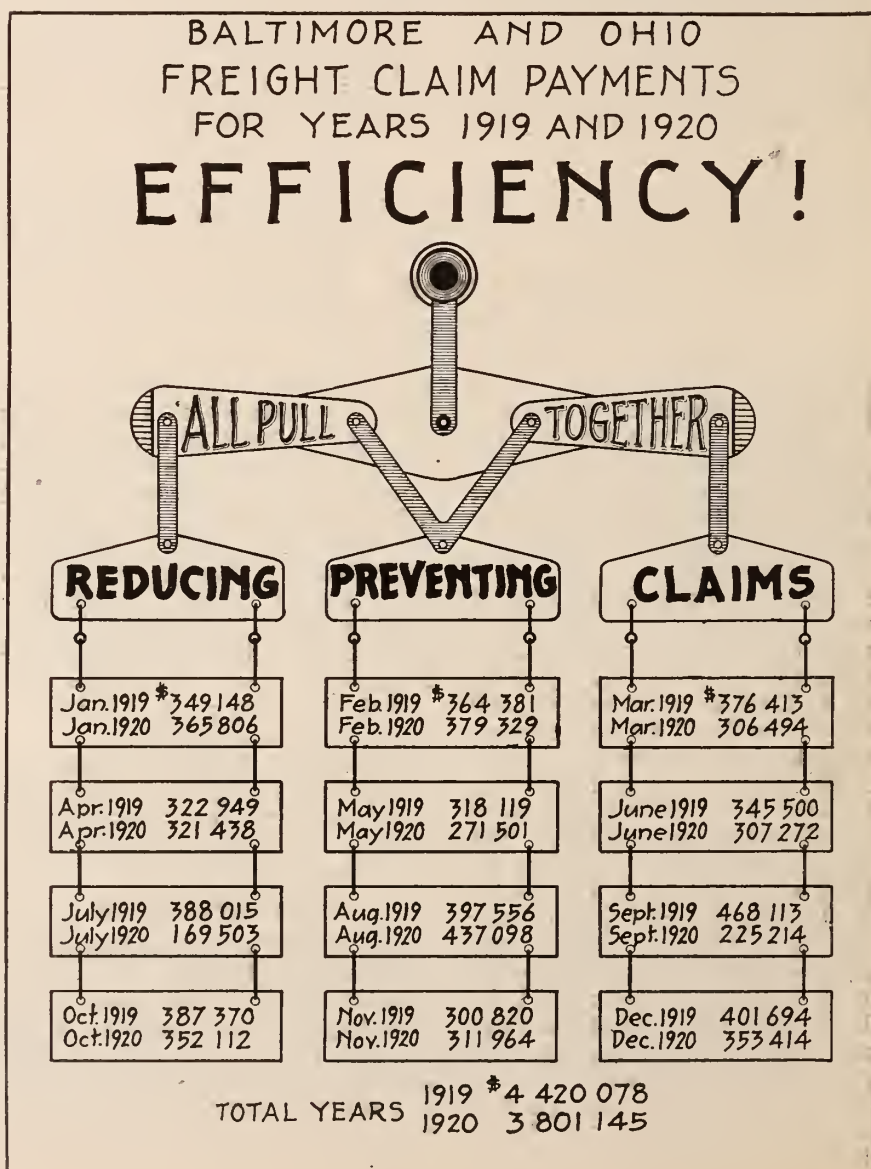

F. G. HADLEY,

Freight Agent and Member of

Freight Claim Prevention Committee.

Mr. Hadley hits the nail on the head when he emphasizes "education and supervision." Ignorance is the

cause of so much that goes wrong that a real effort to let every employe know the whys and the wherefores of freight claim prevention is bound to have results. If employes realized just how claims can be prevented, and how large a proportion of them are preventable, the sound good sense and practicability of this campaign would win their support. If employes in a supervising capacity would re-

tell us a dozen ways in which that six hundred thousand could be spent in improvements which would pay for themselves in a few years. And there are thousands of employes on the Railroad who know that several hundreds of employes could be kept busy at good wages for a whole year, at maintenance, repair, construction and other work, if this substantial saving could be multiplied enough

times in 1921 to cover the many things that it could be used for.

Yes, Mr. Hadley is right when he says "education." When we all realize that every penny saved the Railroad is a direct benefit to every employe, we will have the kind of teamwork that will be unbeatable in producing efficiency of the highest order and the resultant prosperity which will follow for all of us.

Increase in Idle Freight Cars on System Demands Greatest Efficiency In Handling

IF ONE were to describe briefly the surplus car situation on the Baltimore and Ohio now as compared with the situation at the first of the year he could truthfully say, "the same but worse." Specifically: On December 14 there were about 3,500 surplus cars on our lines. On February 11 we have 18,000. Every one of these means a considerable capital investment which, until business increases enough to put it back into service again in carrying freight, is a pretty expensive thing to own. This number of idle freight cars represents about one-

fifth of the total number of cars owned by the Baltimore and Ohio. The same general condition exists on the other railroads, it being estimated on February 11 that there were more than 300,000 idle freight cars in the country all told.

If the Baltimore and Ohio Railroad could put these 18,000 idle freight cars in storage and keep them there without movement, and use the rest of the cars owned by the Railroad just so nicely from an operating standpoint that all of them would be needed to handle the business offered,

without causing either a surplus or a shortage in cars, our officials would call such a performance pretty nearly 100 per cent. perfect.

But some of these 18,000 cars have the unfortunate habit of butting in, even when they are not needed, and calling for expensive train and engine crews, yard and terminal forces, and costly motive power, which, under the ideal conditions above mentioned, could be saved.

With reduced business and revenues it is more than ever important that the handling of equipment should be efficient, that cars be given a full load and that they be confined to loading in each case in the direction of the owner.

Every unnecessary car which is put into a train means higher and unnecessary expenses. It wears out the car. It costs more to haul it and, if the number of unnecessary cars be multiplied, it requires more trains and more facilities to take care of them.

Take for instance a concrete case, let us say, in the Cincinnati Terminals, of an amount of freight to be moved in a 24 hour period, which could be loaded in a minimum of 200 cars. Suppose that through poor loading 210 cars are used instead and here's what happens:

In the first place it requires the use and consequent wear and tear on 10 unnecessary cars. It means extra switching for these cars and the employment of an unnecessarily large number of men. It means additional motive power to handle them, perhaps additional crews and possibly an extra train.

Again, it naturally follows that in the system-wide distribution of equipment 10 empty cars have to be sent to Cincinnati to replace the 10 unnecessarily loaded. In fact the use of the 10 unnecessary cars brings in its wake a whole series of inefficient and expensive operations that proper loading in the first place could have prevented.

It is especially desirable now that cars be loaded in the direction of the owner. If an Eastern route car is loaded west and a Western route car loaded east, each of them after being released has to be moved in a cross empty movement to get it back home. This is one of the principal things being watched by our Transportation Department and the personal interest of all employes is urged to reduce it to the minimum.

A slender acquaintance with the world must convince every man that actions, not words, are the true criterion of the attachment of friends; and the most liberal professions of good-will are very far from being the surest marks of it.—George Washington.

The Man Who Got Katie

By Frank Kavanaugh

DESPITE the fact that Patsy was 18 years of age and possessed of as many lives as a cat, he felt hurt when he hit the cinders, propelled by the toe of Mike Brannigan's No. 10 shoe.

Patsy picked himself up and heard the last portion of what Mike addressed to him:

"—and if I ever catch a spalpeen like you comin' around to see my girl Katie again, it'll be bastin' ye wid a club I will. Now, begone, an' if I ever see yez on Section 44 again I'll throw yez off the right-of-way."

Disconsolately Patsy walked in the direction of the station. Although Billy, the station agent, telegrapher, baggagemaster and general factotum was an acknowledged rival for the hand of Katie Brannigan, Patsy knew he would secure more or less sympathy from him.

The station was darkened, all except a corner in the closed freight room. This corner was lighted by a lantern. There was a looking glass hanging in the corner. Billy, naked, was examining his body, and applying touches of arnica here and there.

"What's up?" Patsy asked, approaching the nude figure.

Billy peered into the gloom. "Oh, that's you," he said. "If you'll go down to the section house just now you'll have a good chance to win Katie. The old man just booted me out of the house. I was slow and his foot traveled too fast."

"Same here," Patsy replied. "Loan me a little of that arnica, will you?"

Without a word Billy passed over the bottle as Patsy stripped. For a time silence reigned.

"I'm going west," Patsy said, as he began to dress, "and when I've made something of myself I'm coming back and get Katie if I have to slug that old man."

"I think I'll go south," Billy said. "It looks better to me down there. The I. C.'s hiring operators now. I'm coming back for Katie, too."

"The one that get's back first gets her, eh?"

"With Katie's permission."

"Certainly."

* * * * *

Five days later Patsy walked into the office of a roadmaster in Fort Worth.

"Sendin' any men out now?" he asked.

"That man Fioreta at Bull Cow wants a couple of men," the road-

master said. "Ever do any section work?"

"Yes, sir."

"I'll give you a pass then."

That afternoon Patsy swung off the train at Bull Cow. Four houses composed the town. Half a mile down the track stood the red section house and he walked out there. The roadmaster had sent him, he told the Italian foreman, and as that individual knew very little of the American language and could speak less, he hired the boy without ceremony. The section foreman had been drilled in a hard school, and, although he might question the authority of the President of the United States or the Governor of the State, the roadmaster's word was law.

Society at the little town of Bull Cow consisted of the few cowmen who sometimes loafed in the saloon of the town, the station agent, four section men, who did not care to converse in English, and rattlesnakes. After work Patsy got into the habit of strolling down to where another railroad crossed the tracks of the one he worked for. It was the only time he had to ruminate on the whims of fathers with pretty daughters, and Mike Brannigan in particular.

Lots of cattle were shipped from Bull Cow. Each of the two roads maintained cattle pens there. One evening as Patsy strolled past he saw a drove escaping from the pens of the competing road. He, without thinking, went out and herded them into the pens of the road which employed him. Then he went to the little town to find, if he could, who owned the herd. Finally he located the man in the saloon.

He told what he had done and was invited to drink. He refused.

"Tell you what I'll do," the cattleman said. "I'll go right over to the Midland deepo and if that agent can furnish me cars tomorrow I'll ship that lot of cattle over your road. It's a d—d good road that hires men like you—you saved me several hundred dollars—would'a' had to round up the bunch tomorrow; and I sent all my men home—nearly 20 miles out there. If you people'll get me the cars I'll ship with you a lot. You got something under that red hair of yours."

So the Midland landed the haul and Patsy thought no more of it until a few days later, when the roadmaster dropped off the caboose of a train near where the gang was working. He singled Patsy out.

"What'n'll did you drive those cattle into our pens for?" he asked.

"There wasn't any water in the Western pens," Patsy replied. "With this hot weather it's a crime to pen cattle up without water. The Midland pens had plenty of water and I drove 'em in there."

"The Western people are raising particular hades about it," the roadmaster explained, "but our traffic department says you've won a good shipper for the road. Ever run a section?"

"No," Patsy said, "and I wouldn't run one out here. If I get one I want it to be near a big town."

"Want to see the bright lights, eh?"

"I want to be near a town where I can go to night school and where there's a public library," Patsy explained.

"Be down at the station when No. 7 goes through tonight. I'm coming back on it." So saying, the roadmaster walked away.

* * * * *

Billy went south and landed "somewhere on the I. C." There were several openings for good telegraphers and he was sent to the worst one—a junction where a short line went up the hills to a coal mine. The pay was small and the work was hard, especially at night. In the daytime there was so little to do that the station was closed altogether. But along about six o'clock a long train of empties came down the main line. The empties were pushed up the branch to the coal mine and the loads brought back—along about midnight. Then, car by car, the loads were pushed on a track scales, while Billy weighed them. Then, while the crew ate their lunch and smoked and drew pay, and cursed the luck that laid them out for two hours in the mosquito-infested place, the agent had to make out the waybills, sell tickets and OS out three passenger trains and finally send the coal out with running orders. It was a man's job—for a few hours, a three-man job.

One day Billy cut his sleep short and walked up to the mine. There he made the acquaintance of the checkweighman, the man employed by the union miners to weigh each car of coal as it comes from the pit. This man usually is a crippled miner and each worker contributes a small sum monthly to pay him. Billy found him an aged man, well read. They talked as the man ate his lunch.

"This place is all right," he told Billy, "but I can't get much reading matter up here. I take a daily paper, but the mail comes overland, and it's three days old when I get it. There's

no place here where I can get magazines, either, and I'm not able to afford to buy a lot."

"You're allowed to use that telephone down to my office, are you not?" Billy asked. "The one owned by the mining company?"

"Yes," the old check-weighman assured him. "Any of us miners can use it. That's what it's for."

"Well, I'll make a trade with you," Billy began. "You keep track of what car the coal's loaded on and the weights. I want that and want it at, say, six o'clock. If you'll give me the weights and car numbers over the telephone every evening, I'll send you up a lot of reading matter every night by the switch crew. They'll throw it off here at the pit house when they pull the loads out and the night top-man can give it to you in the morning. Why, the passengers throw off lots of magazines to me—they think I'm lonesome down there. What do you say?"

The check-weighman was overjoyed, and Billy went back to his post.

That evening he spent an hour at the telephone, taking weight and car numbers. He made up a big bundle of surplus reading matter and sent it up by the switch crew.

Before the crew came back with the loaded coal cars Billy had the waybills made out, put through the copying press and was ready. He weighed the cars as usual and found the weights of the check-weighman correct. As soon as the last car was weighed he folded the bills, handed them to the conductor and ten minutes after, with running orders, the crew departed up the main line. They were astonished, but not mosquito-bitten. As the passenger trains arrived and departed, Billy had no trouble attending to the business.

Any innovation made by a subordinate is bound to attract attention from superior railroad officials. Thus it was, that a few days after the first trainload of coal was sent from the junction several hours earlier than usual, the conductor of the crew received a letter from the trainmaster

asking an explanation of the matter. The conductor being a man of few words and few mosquito bites since Billy's innovation, penciled a notation on the letter and returned it:

"Present agent at Junction has head full of brains instead of ivory. Ask him."

The letter was then sent to Billy, accompanied by another, saying:

"Note what Conductor McCarty says in re early departure of coal extra from Junction. Please explain, returning all correspondence."

Billy made a clean breast of the matter. A month later he was relieved, a new man sent out, and the check-weighman put on the salary list of the railroad, just to use the telephone an hour or so each evening. Billy was "set up."

* * * * *

Five years had passed, during which Mike Brannigan had been successful in keeping suitors away from his daughter, Katie. In the meantime she had grown, and at times Mike speculated on whether it was not nearly time he let some suitor have her.

One day a telegram went from the west to the south. It read something like this:

"Am going back for a visit. In the interests of fair play I thought I'd warn you."

The telegram was signed "Patsy."

When Billy received it he laughed. "The old boy's heart must have changed some, or he never would have sent that. I wonder if I would like the girl if I saw her now? But she did like me and I'm sure she liked Patsy. So, as he says, 'in the interests of fair play' all around we'll go back together."

So he replied:

"Be in Kay See the third. Meet me there. We'll go together."

"BILLY."

Together they went down to the little station of their youth and landed there as dusk was coming over the land. The youthful station agent at the little place did not recognize them. Little was changed about the place. Billy introduced himself as a telegrapher and the agent let the two look into the station house and into the very corner of the freight house where they had applied arnica to their bruises after the encounter with Mike Brannigan's boot toe. Patsy asked about Mike.

"There's been queer doings down there for the last two or three days," the agent volunteered. "Mike passed by yesterday on the hand-car and both his eyes were blacked and one

"And wid that he's a fine upstandin' young man and some day he may be a siction boss!"

arm was in a sling. Mrs. Brannigan made a quick trip to Kay See the other day—the day after I saw Mike—and came home with a lot of things. Last night three of the section men pumped the hand-car past here as if they were going to a fire and they didn't come back till about midnight. Today no one but the track-walker left the house and that was a new one. Katie came by this morning and I spoke to her, but she wouldn't say a word. Tonight the whole section house's lighted up, but I don't know what it means. Usually Mike's so stingy he'll allow but one light in the house at night. I don't know what it means."

Patsy and Billy went down the track toward the section house. It was bulging with lights and a crowd stood outside the door. Some of the old fear of the big section boss came over the young men, but they went on. They came to the crowd at the door and looked in. Mike turned and saw them. With a cry he came toward them and pulled them into the room.

"'Tis Patsy and Billy!" he exclaimed, pushing them forward, "and wid good clothes on. 'Tis little I thought ye'd iver amount to much."

"I'm superintendent of bridges and building on a division of a road out west," Patsy said, with pardonable pride.

"And I'm chief dispatcher on the southern division of the I. C.," Billy asserted.

"Ye're all right, byes," the old man said, "but me daughter is to be married tonight to a man worth two of yez." The old man gulped with the memory, and went on: "He's the only man that I'd iver give me consent to marry Katie. He's the—"

"What position does he occupy?" Patsy asked, wondering if the husband of Katie was to be a millionaire or perhaps the general superintendent of the road.

"He's trackwalker on Siction 44, but he's the only man that iver came after Katie that could lick her dad. Why, he blacked both me eyes and nearly bruk me arm. And wid that he's a fine upstandin' young man and some day he may be a siction boss. It don't do to give a girl to ivery man that comes after her. It's better to wait till the right one comes along. See yez, the beau-utiful pair o' black eyes he gav' me!"

Erratum

In the January issue, on page 13, top line, column 3, it was stated that on December 14 there were 35,000 surplus cars on our lines. The correct figure was 3,500

Brakemen and Trackmen Should Better Guard Their Lives

A SURVEY of our fatalities during the year 1920 shows that heavy toll was taken among brakemen and trackmen. Employees in these two branches of the service suffered most from being struck by trains.

The best efforts those interested in Safety can expend during 1921, then, will be to help in keeping brakemen and trackmen from thoughtlessly stepping into danger.

Thirty-four per cent. of those killed last year were brakemen. Twenty per cent. were trackmen. The remaining percentage included 23 other kinds of employment.

Thirty-six per cent. of the fatalities was caused by employees being struck by trains. A similar large percentage was injured from the same cause.

Many of us have watched linemen upon poles stringing or repairing wires carrying high voltage current and

have marveled at the dexterity and the apparent fearlessness of these electricians. Unconsciously we have thanked our stars that we were not engaged in so seemingly dangerous a task as the man on the pole. Yet in 1920 there was only one electrician killed on our System.

O. C. Cromwell

Appointed Assistant to Chief of Motive Power

ON FEBRUARY 1, O. C. Cromwell was appointed assistant to the chief of motive power and equipment.

Mr. Cromwell entered the service of the Baltimore and Ohio as a machinist apprentice in 1878 and has come up to his present position through the successive stages of machinist, draftsman, locomotive boiler inspector and mechanical engineer.

During the year 1920 he was president of the Engineers' Club of Baltimore and his enthusiasm, judgment and tact have been largely responsible for the development of the new club, which now has in preparation permanent quarters in the Merchants and Manufacturers' Building at 24 Light Street. This new home contemplates an office for a secretary, reading, lounging and billiard rooms and a possibility in the future of a restaurant service for its members. It is felt that the central location of the new home will do much to increase the membership and interest in the club, so largely augmented during Mr. Cromwell's term as president.

Mr. Cromwell comes of a well-known Baltimore and Ohio family, his father, Andrew Jackson Cromwell, having been superintendent motive power, Eastern Lines, and all his brothers being in the service also: Andrew G. as ticket agent at Mt.

The linemen know the danger that lurks in a charged wire. They wear gloves, etc., to protect them and it is seldom that they discard them when they mount poles. There is just as much danger on a railroad track, yet the thoughtless and careless man discards care and pays the penalty.

Royal Station, Baltimore; George W. as patternmaker at Mt. Clare; and Jacob E. as apprentice instructor at Mt. Clare.

Mr. Cromwell wishes us to make as widely known as possible the fact that the Engineers' Club will welcome additions to its membership. The prospects for the formation of a body of engineers in Baltimore which will be a real power in the community and can be used by the City and State to great advantage as an advisory body in its engineering projects, are excellent. Baltimore and Ohio employees whose profession is that of engineer, or who are particularly interested in engineering science, are cordially in-

vited to join. Membership cards may be had from Mr. Cromwell, Room 705, Baltimore and Ohio Building.

Duty Called and Ramsey Answered

ON JANUARY 12, Charles Ramsey, crossing watchman, North Baltimore, Ohio, was notified—through a misunderstood order—that his time was to be cut from 12 to 8 hours a day. But when his eight hours time was up for that day, "Chip," as he is called, did not put on his hat and walk home; he stayed right on the job as usual until after No. 8 had passed.

And it was a mighty good thing that he stayed on, too, for No. 9 would probably have crashed into a team at Main Street crossing; the driver of the team was looking for "Chip" to warn him.

Later it was discovered that an order had been misunderstood, and Mr. Ramsey had been notified of the reduction of time in error. He is still waving pedestrians to stop when a train approaches, and working 12 hours a day as usual.

An Appreciation

Through Baltimore and Ohio Post No. 81, the American Legion, Department of Maryland, gratefully acknowledges the help given at its First Annual Carnival and Dance at the Fifth Regiment Armory on the night of February 8, by 50 young ladies employed by the Baltimore and Ohio.

At their own expense, they furnished the Italian costumes which they wore in the Venetian Tea Garden, and many of them worked steadily from the beginning to the end of the Carnival, performing the difficult task of serving the refreshments. Quite a number also sold tickets and thus contributed substantially to the financial success of the evening.

The names of these girls follow:

Prizes Awarded to Supervisors and Section Foremen

BALTIMORE, MD., January 27, 1921.

EDITOR, BALTIMORE AND OHIO MAGAZINE,
Mt. Royal Station, Baltimore, Md.

Dear Sir—In line with policy which has been followed in the past few years, it was announced last summer that prizes would be awarded to supervisors and section foremen for having the best district or section and for showing the greatest improvement in general work. It was decided to award prizes on each division as follows:

For best Supervisor's district.....	\$100.00
For best Main Line section.....	50.00
For greatest improvement, Main Line section.....	35.00
For best Branch Line section.....	35.00

After inspection had been made and careful consideration given to conditions which were found to exist, the prizes were awarded as follows:

EASTERN LINES

DIVISION	BEST SUPERVISOR'S DISTRICT—\$100.00	BEST MAIN LINE SECTION—\$50.00	MOST IMPROVED MAIN LINE SECTION—\$35.00	BEST BRANCH LINE SECTION—\$35.00
Philadelphia.....	No. 1—C. A. Waskey, Philadelphia, Pa.	M. Natale, Chester, Pa.	M. P. McNulty, Eddystone, Pa.	A. Ferruccio, Childs, Md.
Baltimore Terminal.	No. 2—W. F. Berrett, Baltimore, Md.	J. H. Chaney, Halethorpe, Md.	A. Staubitz, Baltimore, Md.	M. Michna, Baltimore, Md.

Charleston.....	No. 3—T. J. Conley, Buckhannon, W. Va.	B. King, Ivydale, W. Va.	J. E. Riffle, Walkersville, W. Va.	W. T. Smith, Alexander, W. Va.
Connellsville.....	No. 2—B. F. Hanna, Rockwood, Pa.	E. T. Emerick, Cooks Mills, Pa.	H. W. Hayman, Rockwood, Pa.	G. Gugina, Listie, Pa.
Pittsburgh.....	No. 3—C. E. Hanna, Millvale, Pa.	P. Perrone, Ellwood City, Pa.	J. Ercalina, West Newton, Pa.	R. E. Frazier, Marienville, Pa.

WESTERN LINES

Ohio.....	No. 1—L. A. Pausch.	J. E. Weaver, Greenfield, Ohio.	J. L. Kennedy, Martinsville, Ohio.	F. Weaver, Lynchburg, Ohio.
Indiana.....	No. 3—T. Rowland.	W. E. Cissell, Montgomery, Ind.	J. T. Gardner, Seymour, Ind.	
Illinois.....	No. 1—J. Quill.	G. Thomasson, Sandoval, Ill.	J. E. Clevy, Claremont, Ill.	H. E. Shipley, Lakewood, Ill.
Toledo.....	No. 4—W. O'Brien.	F. Dilsavor, Columbus Grove, Ohio.	H. A. Fogt, Anna, Ohio.	S. M. Allen, Milledgeville, Ohio.
Cincinnati Terminals	T. Mahoney.	J. Sullivan, Winton Place, Ohio.	O. Galvin, Stock Yards, Ohio.	
Chicago.....	No. 4—J. Clark.	Charles Core, Wellsboro, Ind.	John Dent, Attica, Ohio.	
New Castle.....	No. 4—C. A. Nunes.	J. H. Rock, Easton, Ohio.	S. Larantano, Kent, Ohio.	S. Glovosek, Painesville, Ohio.
Cleveland.....	No. 5—C. C. Bierie.	E. M. Morris, Tippecanoe, Ohio.	George Broie, Willow, Ohio.	M. Vargovic, Strongsville, Ohio.
Newark.....	No. 5—C. H. Royer.	J. Dement, Salesville, Ohio.	G. W. Forbes, Pleasant Valley, Ohio.	R. D. Cozzens, Lowell, Ohio.

It has been found that the practice of awarding these prizes has created a great deal of interest, and has developed keen rivalry. The awarding of the prizes takes place at the end of the year and vouchers are given the winners at the holiday season, an appropriate time to show appreciation for the good work performed by the supervisors and foremen. The prizes awarded this year were more attractive than those granted in previous years, and it is hoped that we will be able to continue the practice and thus maintain the interest of the supervisors and foremen, with the result that we may secure the best possible track conditions.

Yours truly,

(Signed) E. STIMSON,
Chief Engineer Maintenance

Statement of Pension Feature

Pensions have been granted to the following employees who were honorably retired during the month of December, 1920:

NAME	LAST OCCUPATION	DEPARTMENT	DIVISION	YEARS OF SERVICE
Armstrong, Edward.....	Conductor.....	Conducting Transportation...	Cumberland.....	40
Baltz, Ferdinand.....	Carpenter.....	Motive Power.....	Wheeling.....	39
Cummings, Florence.....	Telegraph Operator.....	Conducting Transportation...	Connellsville.....	40
Helmick, John L.....	Section Foreman.....	Maintenance of Way.....	Charleston.....	32
McBurney, Henry.....	Engineer.....	Conducting Transportation...	Pittsburgh.....	38
Sand, Jacob.....	Clerk.....	Conducting Transportation...	Toledo.....	36
Sullivan, John.....	Section Foreman.....	Maintenance of Way.....	Toledo.....	50
Swepton, Daniel.....	Cabinetmaker.....	Motive Power.....	Indiana.....	49

The payments to pensioned employees constitute a special roll contributed by the Company.

During the calendar year 1919, \$333,807.10 was paid out through the Pension Feature to those who have been honorably retired.

The total payments since the inauguration of the Pension Feature, October 1, 1884, to November 30, 1920, amount to \$4,232,740.60.

The following pensioned employees, after serving the Company faithfully for a number of years, have died:

Assured that our readers will welcome advice and suggestions on the all-important problem of health preservation and life extension, based on the latest advances in medical science, it will be the purpose of this section of the MAGAZINE to present brief and instructive articles each month by members of the medical staff of the Relief Department. We know our efforts will appeal to our readers. If only a few profit by the advice offered, our contribution to the sum of human happiness will be considerable, and our service of value. The addition of one, five or fifteen years to a life is well worth the task

The Tubercular Employee

Rigid Examination of All Applicants is Simple Justice
for Everybody

By Dr. Frank Dorsey

Medical Examiner, New Castle Junction

ONE of the greatest enemies of the human race is Tuberculosis. The pulmonary form is the most common; however, glands, bones and joints, as well as other organs of the body, are often involved.

Tuberculosis is common in industrial communities, or where large bodies of people congregate in shops and factories. In many instances the working people are more and more crowded together, the working places being extremely unhygienic, ill ventilated, unclean and insanitary. The highest mortality rate from tuberculosis being among the poorer working classes, they become the centers of infection and spread the disease to all other walks of life.

Autopsies have shown that from 70 to 85 per cent. of all people have at some time during their lives been infected with tuberculosis. The fact that more do not succumb to the disease is because our working and living conditions have been improved. The larger industries today have their employees examined by a medical staff and those suffering with the disease are rejected. Hence the great importance of medical examination in reducing the chance of contagion, by examination of all employees.

A concerted fight on the part of the nation against this disease would in time eradicate it completely and at the same time would solve most of the social evils coincident with it.

All persons suffering with tuberculosis and working in intimate con-

tact with fellow employees, throw off the germs by coughing and spitting. As the disease advances the more coughing and spitting is done. The worker often continues at his task as long as he is able, thereby greatly increasing the danger to his fellows, the masses he expectorates drying and being blown about or swept about with a broom.

Here are some of the reasons why tuberculosis sufferers delay in getting proper treatment:

No. 1 said there was no consumption in his family. Therefore, when he got a cough he felt certain it was a bronchial cough and that he would wear it out. By the time he got his mind made up that his cough was due to consumption and that he had better do something about it, his lungs were extensively involved.

No. 2 knew his trouble was just chills and fever—as for the cough, that usually went with malaria—he would take a few bottles of chill tonic and that would fix him.

No. 3 thought his trouble was just a mental error. The people whom he paid for service told him that cough and fever are simply mental errors—that there is no such thing as germs. During the several months when he was chasing the “mental error” tubercle bacilli got their revenge by eating holes in his lungs.

No. 4 consulted a very careless doctor who was just leaving his office for a game of golf. The doctor asked about the fever and the cough, presented a cough mixture and told the

man to take one bottle of it and then come back. The man took one bottle and, thinking the medicine was helping him, went to the drug store and had the prescription refilled. After he had had several refills, a careful examination was made, but in the meantime the disease had been making progress.

No. 5 went to see a very busy doctor who listened to the chest without removing the shirt. When the patient finally got an examination with the chest bared, it was found that the disease had made considerable progress.

No. 6 consulted a tender-hearted doctor who did not want to frighten him, so told him that he had bronchitis, to go to bed and eat eggs and drink milk. The patient considered this unnecessary, if he only had bronchitis, and did not carry out the directions.

No. 7 believed in taking lots of medicine. When he had a cough he bought three kinds of medicine and wasted valuable time trying them out.

No. 8 had recently been examined for life insurance and had passed. When he began to cough and the doctor suggested it might be consumption, he scorned the suggestion.

No. 9 had several members of his family die of consumption and he was afraid to be examined.

No. 10 was hard up financially and he tried to work an extra three or four months before going to the sanitarium.

The foregoing are cited to illustrate the absolute necessity of a thorough physical examination at the outset of the cough. As a safeguard to our employees, too much stress cannot be laid upon the necessity of having all new employees examined by the medical examiner before they are permitted to go to work. This is the only safe way of protecting healthy employees from being thrown in contact with a tubercular employee, who could transmit the disease to his fellow, and who, in turn, would give it to his family.

Not a great many years ago, when the physical examination of employees in industrial concerns was first advocated, it met with every form of objection. Today it is recognized as one of our greatest efficiency measures, as well as the most advanced public health movement which can be adopted. Every employer should see to the health supervision of his working force in order to discover and remove the tubercular employees.

In combating tuberculosis, the ventilation, including dust removal, temperature and humidity, and cleanli-

ness of the working places, are the three most important conditions for industry to consider.

Much more could be said relative to causes, treatment, etc., as it concerns us—the Railroad employees—but space will not permit. There are two rules which everybody should bear in mind, namely: Watch the cough and consult a doctor before it is too late. If in the shops, on the road, or wherever you may be, you are thrown in contact with an employe who, you suspect, has tubercular trouble, use your utmost endeavor to have him consult a physician before it is too late and before he infects you and other employes.

Tonsilitis

A One Minute Joke

(After it's Over)

By T. H. M.
Indiana Division

DID you ever have tonsilitis? It's a dude. The word is derived from the word "Tonsorial," meaning "barber-us," and with the suffix "it-is" we have the word "Tonsilitis," meaning "it is barberous."

It is a cross between Bubonic plague and an operation for gall stones. Highly magnified the germ resembles the starfish. Hence the safest results are obtained by viewing it through a telescope.

One afternoon during the melon-cauliflower days of January, I had a suspicious feeling among those subterranean fungi growing on the edge of my gullet, and my stomach felt as if I had swallowed a hot rivet. I went to the blankets while friend wife 'phoned for a pill shooter, and as my favorite was out of the running that day I drew a dark horse. He was an old rat and had a fern that looked like a snowball growing on his chin. He also carried as fine a case of sniffs as I ever heard. I'll bet that old squirrel could pick up a trail eight days old.

He asked me to put my tongue out in the perspective while he adjusted his peep sights. "Ah," said he at the first squint, "now put your tongue out a little further." I had it run out like an ant eater's then, so I said, "Doc, I'll have to unhook'er if I do." He said the seat of my trouble was the patches on my tonsils and I told him that most men's troubles now-a-days are patches on the seat. He either didn't hear me or it got through him, so I gave him credit for an error. He left some white tablets and told me to take one right away. I did and felt like a monument man swallowing one of those white slabs in a cemetery.

What a grand thing if nature had only fastened our tonsils on a rubber band so that we could pull them out when they get sore, hold them between our teeth, scrub them with a tooth brush and a little pumice stone, spray them with corrosive sublimate and let them snap back in place.

I asked that old toxin hunter if he wouldn't give me one of those triplacate tickets on the subway trunk line to the corner drug store. But he only smiled and said there was nothing moving on the J. B. line, so I lost my only chance to open the sea cocks on a demijohn of the forbidden flavor.

Every day that old boy would crawl into my pest ward, give my throat the once over and leave. He was raising the high cost of trying to live for me. I remember he bought a new touring car shortly after I was sick and I think I bought half the engine anyway.

After two weeks in the quilts I arrived at the rocking chair and broth stage and then one day that old calomel hound recommended a long cruise in the Caribbean Sea to recuperate. I told him I didn't Carriibbean away from home so long. He didn't even fumble that one so I put a 2 in the error column. He never took me out in that new car and I'm sore, even though I did recover.

Instead of Paying Rent He Bought a Home

406 GRAND AVENUE,
CUMBERLAND, MD.,

January 8, 1921

MR. W. J. DUDLEY, Superintendent,
Relief Department,
Baltimore, Md.

Dear Sir—On the 5th instant I disposed of property located at Shenandoah Junction, W. Va., that I had purchased through the Relief Department in 1917.

Am writing to thank you gentlemen for the care and financial help I have had through the department.

Prior to the time I was granted a loan of \$900 by the department, I was residing in Cumberland and paying \$25 rent per month; when I purchased said property I only had \$25 of my own money to invest.

I received \$2,000 for property, cash in hand, and had the use of the home for three years.

Again thanking you gentlemen for caring for me through sickness and financial troubles, and wishing you all the blessings of the New Year, I am, a booster of the department.

Very respectfully,

(Signed) CARL WHITE.

Helpful Publicity

Hundreds of millions are spent each year on advertising. Through a single issue of a single publication, the printed word now carries the message of the seller to a tenth of the people of the country. But back of this salesmanship through advertising still stand the personal selling organizations, the men who carry the sales message verbally from the seller to the buyer.

Often in these columns we have mentioned to our employes the possibilities of individual salesmanship of our Railroad service. "Ask your friends to try the Baltimore and Ohio" is the gist of this.

There is yet another avenue of salesmanship of Baltimore and Ohio service open to many employes. It is typified in a newspaper article on my desk, a two column account in the *Daily Democrat* of Doylestown, Pa., of January 20, giving a full and attractive account of our Safety rally of the preceding night in Philadelphia. T. L. DeLand, of our Police Department at that point, writes us that he was instrumental in having this article published.

Reading this article, a possible user of Baltimore and Ohio service would get this impression:

"The Baltimore and Ohio Railroad is progressive. It has proved the importance and value of its Safety work by the reduction in fatalities and injuries shown since this work was started. It must be a Safe Road. This presupposes the help of its employes, without whom these results could not have been accomplished. Further to interest all its employes in the importance of the Safety work, the Railroad is giving these rallies, full of instructive and entertaining features, and inviting all employes to attend as its guests. At Philadelphia, the demand for tickets was so great that a larger hall than the one originally engaged had to be secured to hold the over 1,500 railroad men and members of their families who attended. This is cooperation and enthusiasm. It is bringing the Railroad closer to its workers and *vice versa*. It is making their interests more nearly identical. It is helping smooth out any wrinkles which may exist in the big railroad machine. Everything of this sort creates better working conditions, greater harmony, smoother operation, better service."

And, almost inevitably, the conscious or subconscious conclusion of the reader is:

"I guess that is a pretty good Railroad for me to use."

Stationed in practically every city and town on the Baltimore and Ohio are men capable of preparing publicity favorable to the Railroad and its employes, publicity such as is illustrated in this article. Among these are the correspondents of the *MAGAZINE*.

The Railroad, both in its physical structure and its personnel, is so big, its operations are so manifold, the people and the things it touches in its everyday activities are so many and so interesting, that literally every day men with noses for news could find stories about it attractive enough to make newspaper editors want to use them.

It is the belief of many prominent men not connected with or interested in the Baltimore and Ohio that our Railroad is a leader among all railroads in its ideals of better service. Getting this truthful message home to the reading public in the form of newspaper articles calling attention to social meetings of employes, to courtesy acts on the part of employes, to special service facilities offered by the Railroad to shippers and passengers, and to other interesting items of this nature, is an important and practicable task. Work such as this cannot be organized at this time. It can, however, be carried on effectively if the correspondents of the *MAGAZINE* and other employes who appreciate the value of good publicity, as individuals, see to it that nothing creditable to our Railroad organization escapes the attention of the reading public in the newspapers.

If Every Engineer

Recently a chance acquaintance at lunch proved to be the son of a Baltimore and Ohio Railroad locomotive engineer. A salesman by trade, he does a great deal of traveling these days at his company's expense. Those former days when his father's affiliation with the Railroad made him, as a dependent member of the immediate family, eligible for the pass privilege, have not, however, been forgotten. Said the son:

"It used to be that when going out of Baltimore, east or westbound, I sometimes travelled on the trains of one of the Baltimore and Ohio's leading competitors. Dad checked up this part of my work, however, and kept after me so hard that now I hardly dare ride any other trains than those of the Baltimore and Ohio."

If every engineer, and other employes, with the natural loyalty which years of service with the Baltimore and Ohio develops, would take this kind of active interest in getting passenger business for our Railroad, orders for new passenger equipment would be more than ever necessary and there would be more work for engine crews.

George Washington

By Elbert Hubbard

Nobody knows just what a genius is or just what he may do next, he boils at an unknown temperature and often explodes at a touch. He is uncertain and therefore unsafe. His best results are conjured forth, but no man has yet conjured forth a Nation—it is all slow, patient, painstaking work along mathematical lines. Washington was a mathematician and therefore not a genius. We call him a great man, but his greatness was of a sort in which we can all share; his virtues were of a kind that, in degree, we, too, may possess. Any man who succeeds in a legitimate business works with the same tools Washington used. Washington was human. We know the man; we understand him; we comprehend how he succeeded, for with him there were no tricks, no legerdemain—no secrets. He is very near to us.

We know all of Washington we will ever know; there are no more documents to present, no partisan witnesses to examine, no prejudices to remove. His purity of purpose stands unimpeached; his steadfast earnestness and sterling honesty are our priceless examples.

We love the man. We call him Father.

Though Not One of Us He Is One with Us.

Several years ago a young employe of the Baltimore and Ohio received an attractive offer from a large industrial concern and accepted it. He asked that the MAGAZINE be sent to him and his request was complied with because we know that the deep interest he had always displayed as an employe of the Railroad would continue with him in the new position.

It was refreshing, therefore, to get from him a letter dated February 1, and reading in part as follows:

"My name is on your 'free' mailing list for the BALTIMORE AND OHIO MAGAZINE. With the conditions confronting railroads at this time I know every possible economy must be effected and undoubtedly you are being pressed to reduce to the lowest possible point. The result of striking my name from your mailing list is infinitesimal but it is the little drops of water that make the ocean, and if the Baltimore and Ohio were my own personal property I should want things even so small as saving one copy of the MAGAZINE given attention. Another employe of the Road has promised to send me his copy when he has finished with it. . . &c."

The letter tells its own story and makes us wonder how many of us earning our living on the Baltimore and Ohio can point to instances for which we have been responsible and which show the same degree of interest in our organization as is manifested by the thoughtfulness of this outsider.

The Pangs of Hunger

Writing in the *New York Tribune* of January 24, Victor M. Shapiro says Mr. Leopold Auer has made a statement that the greatest violinists of the world have been those who have suffered the pangs of hunger in their youth.

Although Mary Schaefer, the young girl who has gone on a hunger strike, eating the Hoover starvation ration, in order to be an example to the rest of us, has done this voluntarily, perhaps within the heart of these European countries may reside some future geniuses who will look to America always as their guiding star.

International courts, diplomats, may try to adjust world relations, but Hoover's method and Mary Schaefer's unselfishness are a bond of more lasting relationship.

Abraham Lincoln

By James Russell Lowell

Here was a type of the true elder race,
And one of Plutarch's men talked with us face to face.
I praise him not; it were too late;
And some innate weakness there must be
In him who condescends to victory
Such as the Present gives, and cannot wait,
Safe in himself as in a fate
So always firmly he:
He knew to bide his time,
And can his fame abide,
Still patient in his simple faith sublime,
Till the wise years decide.
Great captains with their guns and drums,
Disturb our judgment for the hour
But at last silence comes;
These are all gone, and, standing like a tower,
Our children shall behold his fame,
The kindly, earnest, brave, foreseeing man,
Sagacious, patient, dreading praise, not blame.
New birth of our new soil, the first American.

Adam Abel—Brakeman.

"Inasmuch as ye have done it unto one of the least of these—"

Boarding the train at a small station just outside of Baltimore one Sunday afternoon recently, I took a seat near the front of the day coach. Before we started moving two little colored children, the girl four and the boy six years, perhaps, ambled into the narrow vestibule and stood hesitating, where many of the people in the front of the car could see them. Then came the brakeman, lifted up the little girl by her arms and placed her gently on the long plush seat facing the rest of the car. The boy followed and climbed up alongside his sister. Lastly, there shuffled through the vestibule an old negro mammy, their grandmother, probably, who took her seat beside them.

She was very dark and, except for the sincerity and affection stamped on her features, and the cleanness of the cottons she wore, very homely. The children were pretty, very light, and with hair and features more like those of an Indian than of a negro. Later, I believe, I was the only one who saw the brakeman unobtrusively slip a copper or two into the hand of each child.

Interested in his attitude toward these passengers, I asked him if he knew them.

"No," he replied, "I never saw them before, but they wanted to get off at Mount Winans and as the train does not stop there, and we have to take them to Baltimore, I felt sorry for them."

This did not explain his unusual thoughtfulness in carrying the bewildered little girl to her seat, for at that time he did not know their destination.

Later I found out the brakeman's name, Adam Abel, and although I don't know a thing about his service record or about him except as I saw him on that occasion, I am willing to wager that he stands high on the records of the Railroad and in the esteem of his associates and officers, for he has a big heart and looks out for the comfort and safety of children and old folks, whatever their color.

Jim and Bill went up the hill,
Left Safety far behind 'em.
Jim came down with a broken crown
And Bill—they never did find 'im.

Looking to Future Equipment Needs

From statistics published in the annual review number of the *Railway Age*, it appears that the number of locomotives built for domestic service in 1920 was smaller than in 1919, but the number ordered was nine times larger. The number of freight cars built was not as large as in 1919, but the number ordered was three and one-half times larger. The number of passenger train cars built was almost twice as large as in 1919, and the number ordered four times as large.

Baltimore and Ohio Plays Big Part in Success of First Annual Carnival of American Legion in Baltimore

DESPITE the fact that the membership of the Baltimore and Ohio Post of the American Legion is still small, its members and other Baltimore and Ohio officers and employees who cooperated with them, played a big part in the success of the First Annual Carnival and Dance of the Associated Posts of Maryland on the night of February 8 at the Fifth Regiment Armory. Any Baltimore and Ohio employee present that evening must have felt decidedly at home for wherever one looked he was bound to see familiar faces.

President Daniel Willard and Chief of Motive Power George H. Emerson, who were both colonels during the war, served as vice-chairmen on the Honorary Committee of which Governor Ritchie was chairman. Neither could be at the carnival but each otherwise evidenced his interest in it and in the successful participation of our Post. Other of our officials contributed generously through the purchase of tickets and through effective cooperation in other ways.

One of the hits of the evening was the Venetian garden, which occupied the east end of the armory. The beautiful scenery which was used by the Maryland Institute for their Venetian Carnival of mid-January was kindly loaned for the occasion. It was

effectively lighted with subdued and multi-colored lights and the effect was beautifully enhanced by the placing of hundreds of stately palms at the entrances. These palms were loaned through the courtesy of the Baltimore City Park Board.

Fifty of our Baltimore and Ohio girls had charge of serving the refreshments in this attractive setting. They had been recruited by Miss Margaret Talbott Stevens, associate editor of the *BALTIMORE AND OHIO MAGAZINE*, and they gave unselfishly and willingly of their time, effort and money to play their part well. The pictures of a few of them are shown in the accompanying cuts and be it known that the girls purchased the material for and made the rich Italian costumes in which they appeared.

Many of them were also active in selling tickets and not a small part of the several hundred dollars which the Baltimore and Ohio Post No. 81 will probably realize as its share of the proceeds of the affair, will come as the result of the efforts of these girls.

Miss Ethel Buckless, of Vice-President Galloway's office, won special distinction by selling 300 packages of candy at 10 cents a package.

The purpose of the Carnival was to raise a sufficient amount of money to place the individual posts participating and State Headquarters in such financial condition as to enable them to do their duty by their disabled and sick comrades of the World War. A magnificent start has been made toward this end and the Dance Committee of the Legion in Baltimore extends its sincere thanks to the many individuals and departments of the Railroad which contributed so effectively.

Baltimore and Ohio Officers Visit Berkeley Springs

A HEARTY welcome was given to our Cumberland and Baltimore officers by the Board of Trade of Berkeley Springs on January 6. It was the occasion of a visit of mutual interest to the Railroad and to our shippers and patrons at that point. Those in the visiting party were: W. F. Richardson, general freight agent; M. J. Bishop, industrial agent, both of

Baltimore; C. W. Van Horn, superintendent; E. C. Grove, trainmaster; E. C. Drawbaugh, division operator; J. L. Hayes, division freight agent, and Traveling Freight Assistant Hice.

Mr. Richardson presided as chairman of the meeting, and explained the object of the visit: a closer acquaintance with shippers and patrons, the exchange of ideas on the

Some of the fifty Baltimore and Ohio girls who helped at the Legion Carnival

Dainty Italian maids are these three, who helped serve refreshments in the Venetian Garden at the American Legion carnival. They are, left to right: Adele Pettyjohn, Freight Claim Department; Lillian Foster, Transportation Department; Gladys Evans, Freight Claim Department

rendering of better service, freight handling, etc. Mr. Hayes and others endorsed the statements of the chairman. G. W. Biser, president of the Board of Trade, and others of his staff addressed the meeting and expressed their pleasure at meeting these men from the Baltimore and Ohio. Among other

commendations, the Board of Trade complimented our freight and ticket agent, W. T. Edmiston, for his faithfulness and good services during the many years at Berkeley Springs. The Board of Trade thanked the officers for their visit and extended to them the invitation to "call again."

imagine the very walls were vibrating as childish voices rang out above those of their elders with the words:

"I love thy rocks and rills,
Thy woods and temple'd hills,
My heart with rapture thrills
Like that above."

"Bulletin 70" Brings Three Thousand People to Cumberland Theatre*

"BULLETIN 70," the Safety moving picture which is being shown at various points on the System, was shown in Cumberland, Md., on the night of January 21. Nearly 2,400 Railroaders and their friends were fortunate enough to be allowed entrance to the Maryland Theatre to see the picture, while about 1,000 were turned away. The doors were closed before eight o'clock and no magic words could open the heart of the doorkeeper or the doors themselves.

In the boxes to the left sat the visiting officers, while showing our patrons to their seats were the ushers, our own attractive

*Stories on several of the other entertainments featuring "Bulletin 70" at various places on the System have been received, but lack of space prevents our giving them more than brief notice. We sincerely thank the writers for the trouble and interest manifested in sending the stories in.

Railroad girls from the Cumberland offices: Misses Mary L. Hollen, Genevieve I. Price, Ora A. Bauer, Gertrude Smith, Susan Ross-worm, Vada Drumm, Alicc Cronin, Shirley J. Roemiser, Georgia McCarty, Cleo Waffer, Winifred King, Regina Taylor and Margaret Burns.

But we had not long to wait. It must have been exactly on the stroke of eight that the magic curtain went up, displaying to all the world the Cumberland Shop Band in its uniformed magnificence. To those who were privileged to hear it, no world-famous music from the band of John Philip Sousa would have fallen upon their ears with sweeter notes—for this was our own. Then, to add a touch of patriotism to the spirit already prevalent, the audience arose and sang "My Country, 'Tis of Thee." One could almost

The mayor of Cumberland, Dr. Koon, then stood before the footlights and welcomed to town "Bulletin 70," together with its accompanying program, so splendidly wrought out by E. C. Drawbaugh, division operator, Cumberland, assisted by E. J. Soener, chief clerk to division accountant. Scarcely had the applause died away when it was doubly renewed at the appearance of Raymond C. Thuss, whose "Asleep in the Deep" was well rendered. "Be-ware! Be-c-e-ware!" echoed the voice of a youngster, puffing himself up like a balloon and growing purple in the face in an effort to imitate the soloist.

Arthur D. Gans, picture exhibitor and "Safety" magician, entertained old and young with his marvelous tricks. Colored handkerchiefs, flags, tubes and boxes played their parts.

"How does he do it?" frankly asked the children.

"Pretty clever," said the men. There was the wedding of Mr. Green and Miss

White, their love affair, their marriage, the trouble made for them by the mother-in-law; finally came the funeral of the mother-in-law, and Mr. and Mrs. Green lived happily thereafter with three little Greens. Then came the Safety First lunch kits, all in a row, and lastly the Baltimore and Ohio Safety emblem on a silk banner that sprung out from nowhere.

Following this exhibition, E. F. Warner gave a bass solo. From the depths his voice seemed to come, and his selection was greatly enjoyed.

"I laid my head on the railroad track

I thought of my gal and I pulled it back—
Swe-e-t Mamma!"

sang a quartet with such spirit that peal after peal of laughter resounded through the house. Another selection by the band brought forth much applause, as did the rendition of a number of pleasing numbers by The Cumberland Quartet; C. L. Colley, H. E. Childs, R. C. Thuss and John Gorman. Particularly enjoyable were "I Want To Go To Sleep And Wake Up In My Mammy's Arms," and the imitation of musical instruments, a feature that had been enjoyed by those who attended the Martinsburg Veterans' banquet on the night before.

Again there flashed upon the screen the words of a song, and in another moment the air was ringing with "There's A Long, Long Trail A-winding," led by W. F. Braden, Safety Department, and sung first by the galleries, then by the entire audience.

Master of ceremonies was Blacksmith Foreman J. V. Lucas, who, in introducing the next speaker, John T. Broderick, superintendent of Safety, presented him with a piece of music entitled "Safety First," composed by Signor Deluca, leader of the band. Mr. Broderick gracefully accepted the gift, then made his address on Safety, emphasizing the fact that the safety of employes depends in a great measure upon home influences.

"A sound body and good health," said Mr. Broderick, "are the greatest blessings in the world. It is unfortunate that so many people do not appreciate these blessings, and, therefore, do not possess them.

"The divisional Safety Committees are composed of approximately 1,500 men, through whom we are enabled to prevent many unsafe practices on the Railroad.

"During the World War we lost 48,000 lives in battle or as a result of wounds received therein. But 126,000 men, women and children were killed through accidents—220 lives for every 24 hours. When we think of this, it is high time to correct unsafe practices.

"The great value of human life was recently demonstrated in Philadelphia." (Mr. Broderick then related the facts of the case of Joseph Swecney, who gave his blood in transfusion in the effort to save a fellow workman. The story of this was told in the January issue of the MAGAZINE.)

"We have on the Railroad," continued Mr. Broderick, "three classes of men to

deal with. There is the man who is naturally safe and who helps to educate those less fortunate than himself; the man who is not naturally safe, but who through obedience to rules becomes a Safety man; the impossible man, who scorns and laughs at rules and orders. When these last named persons are persistent, they become a menace to themselves and to the Railroad.

"The thing we need most is constant enthusiasm. Let me urge upon you to take more interest in the work. Give it your thought and you will be rewarded. Let me urge officers to see that the men under their supervision are furnished with the Book of Rules. When in doubt, take the safe course."

Following the address of Mr. Broderick came the showing of the picture, "Bulletin 70," which has been described in a previous issue of the MAGAZINE. That the picture was a good one was evidenced by the sighs of satisfaction from the "regular movie fans"—the kind who sit behind you in the theater and read aloud the art titles into your unsympathetic ears. Ah, yes, they were there, but nobody minded, for they were "just our folks." The value of the picture cannot be measured in words of appreciation from those who witnessed it, but by the reduction in accidents during the weeks and months to come.

Busiest Season for Glee Club

BACK in the fall of 1913 three or four devotees of the lyric muse who worked in Camden Station were wont to gather of an afternoon and enjoy a few strains of close harmony before leaving their offices for the day. Probably no one of them thought that seven years later the Baltimore and Ohio Glee Club, organized through these informal matinees, would still be flourishing. Yet the Glee Club is now in the midst of its busiest season.

Since the annual concert on May 17, 1920, the following engagements have been filled:

June 16—The Episcopal Church at Harrisonville, Md.

July 28—Baltimore Press Club.

October 19—The Presbyterian Church at Roslyn, Md.

October 29—Monument Street M. E. Church, Baltimore, Md.

November 22—Belvedere Royal Arch Chapter, Masons, Baltimore, Md.

December 7—Fayette Street M. E. Church, Baltimore, Md.

December 9—Walbrook M. E. Church.

December 13—Soldiers' Hospital at Fort McHenry, Baltimore, Md.

In the lobby of the Fort Cumberland Hotel, a few moments after the entertainment had come to a close, one might have seen a steady stream of people passing up and down the staircase: those going up were on their way to the dance hall, those coming down were on their way home, for they had seen, to their disappointment, that the corridor upstairs was already filled with merry-makers and that there was not room for a larger crowd on the dancing floor. Standing in the center of the lobby with Mr. Broderick were Superintendents Scheer and Van Horn, and W. L. Robinson, superintendent of fuel and locomotive performance, watching the gay kaleidoscope of the stairways and giving hearty handshakes and merry smiles to those who pushed from the crowds to meet them.

Soon the strains of music from the floor above was answered by the patter and glide of footsteps, not only upon the waxed floors, but even from those who looked on, for when the Shop Band played, no foot could stand unmoved, and these kept time in glad anticipation. The grand march was led by Mr. Broderick and Miss Rossworm. Then came a one-step, a fox trot, waltz, fox trot, one-step, fox trot, waltz, then an old-time quadrille; our forefathers never stepped to more lively tunes, nor was the minuet of our grandmothers more enjoyable than this.

January was another big month in the history of the Club, concerts being given at the annual banquet of the 10, 15 and 20 year men, Consolidated Gas and Electric Company on January 15, 22 and 29.

Almost all of the concerts given during the current season have brought revenue into the Club's treasury, and the Club is now on a good financial basis.

Beside the fun of the singing and the social intercourse afforded by the entertainment features at the concerts, the members of the Club feel that in an altogether enjoyable way they are making a creditable reputation as Baltimore and Ohio men among Baltimoreans not connected with the Railroad, even though the Club does not, of course, officially represent in any sense the Baltimore and Ohio.

The Club has the best balance of voices in its history, but additions to its membership of men in service of the Railroad who like music and have reasonably good voices, are always welcome. Mr. Hobart Smock is still directing the singing and Mr. Alderson Mowbray, of the Peabody Institute, is the accompanist.

My Own

(Harold Vinol in Contemporary Verse)

Oh, I must answer to a name
And live upon a certain street,
And stairs within a dingy house
Must bear the burden of my feet.

Still, when the night is dim and sweet,
In dreams I roam the silent hills;
Where aisles of shadow, vague with light,
Are petaled soft with daffodils.

I foot it through the silver dark,
I shout aloud to field and tree;
And all this gypsy heart of me
Is longing, longing to be free.

Oh, I must answer to a name
And live upon a certain street;
But who shall take my dreams from me—
Or keep my life from being sweet!

Freight Traffic Officers Entertained by Newark Chamber of Commerce

THREE columns of the Newark, Ohio, *American Tribune* of January 7 were devoted to an account of a gathering of the business men of Newark and the officers of the Baltimore and Ohio on the preceding evening. We regret that lack of space prevents reprinting the whole account of the meeting. It is needless to say that affairs of this kind are mutually helpful to the Railroad and its patrons.

The dinner, given by the Newark Chamber of Commerce, was preceded by an automobile trip over the city and a visit to industrial plants and other points of interest.

The visiting guests included C. W. Galloway, vice-president and general manager; George H. Campbell, assistant to President Daniel Willard; H. R. Lewis, freight traffic manager; Harry O. Hartzell, manager Commercial Development; P. D. Freer, general freight agent; G. W. Arnold, industrial agent; E. A. Peck, general superintendent, Cleveland; J. C. Miller, freight tariff agent; H. G. Kruse, division superintendent; C. D.

Douglas, traveling freight agent; C. R. Potter, local agent; H. H. Wilson, chief clerk; E. N. Kendall, division freight agent; R. N. Begien, general manager, Western Lines; J. S. Carrothers, F. J. Kohle, B. R. White and C. C. Ritberg.

During the course of the dinner, an interesting program was rendered by leading musicians of the city. Following this were speeches by the following: W. W. Davis, president of the Chamber of Commerce; C. W. Galloway, vice-president, Maintenance and Operation, Baltimore and Ohio; George H. Campbell, representing President Willard; H. R. Lewis, freight traffic manager; H. O. Hartzell, manager Commercial Development; Frank L. Beggs, ex-president of the Chamber of Commerce.

Mr. Davis gave a hearty welcome to the Railroad men; Mr. Galloway gave some vital facts concerning the business outlook of today, urging cooperation and fair play; Mr. Campbell spoke of the relationship existing between the Railroad and its ship-

pers, and of the industrial activities of the city of Newark; Manager W. I. Irving, of the Chamber of Commerce, read a letter from President Willard, in which he expressed regret because of his inability to be present, and emphasized the desire of the Baltimore and Ohio to be a "good neighbor"; H. R. Lewis gave a talk on railroad problems and of the saving of thousands of dollars to the Company through the splendid cooperation of shippers; Mr. Hartzell touched particularly on the industrial, agricultural and geological features of the Baltimore and Ohio, its resources, and the industrial surveys which have been made; Mr. Beggs touched upon the duties of citizenship and said that each man has a share in the solving of domestic problems.

The meeting was closed by a vote of thanks given by the Chamber of Commerce to the officers of the Railroad for their visit.

C. E. McGann, Master Mechanic, Pittsburgh

Effective February 1, C. E. McGann was appointed Master Mechanic, Pittsburgh Division, headquarters Glenwood, Pa., Mr. W. C. Burel, resigned.

FOREIGN FREIGHT AGENTS, ON ROOF OF BALTIMORE AND OHIO BUILDING, BALTIMORE, DURING THEIR MEETING, OCTOBER 22 AND 23, 1920

The visiting railroad men were greatly impressed by the facilities of the harbor of Baltimore, our coal piers at Curtis Bay, general freight piers at Locust Point and the new grain elevator of the Pennsylvania Railroad at Canton, all of which were inspected.

In the picture, left to right are, upper row: H. G. E. Pansius, F. F. A., Delaware Lackawanna and Western, New York; A. F. Rosolon, E. & I. R., Baltimore and Ohio, New York; C. M. Colberg, T. F. A., New York, New Haven and Hartford, New York; J. W. White, F. F. A., Southern, New York; W. T. Moore, F. F. A., Baltimore and Ohio, Baltimore, Md.; T. Stackpole, D. F. A., Pennsylvania, Baltimore, Md.; C. E. Lodge, F. F. A., Erie, New York; E. J. Bauer, Superintendent Lighterage, Erie, New York; H. H. Scharf, Superintendent Elevators, Erie, Jersey City, N. J.; E. M. Snell, E. & I. A., Erie, New York.

Middle row: J. H. Carroll, A. G. F. A., Baltimore and Ohio, Philadelphia, Pa.; Harry Atkinson, F. F. A., Baltimore and Ohio, Philadelphia, Pa.; M. W. Pryor, A. F. F. A., Baltimore and Ohio, Baltimore, Md.; T. Y. Newman, F. F. A., New York Central and Hudson River, New York; E. L. Plummer, A. F. F. A., Pennsylvania, New York (now Chicago); G. N. Whelpley, F. F. A., Lehigh Valley, New York; A. J. Ball, F. F. A., Pennsylvania, Philadelphia, Pa.; T. C. O'Brien, Armour Grain Co., New York; R. F. Feist, District Representative, Pennsylvania, New York.

Front row: J. D. Berry, Jr., Lighterage Agent, Pennsylvania, New York; S. D. Riddle, C. F. A., Baltimore and Ohio, New York; F. F. Farrar, G. A., Boston and Maine, Boston, Mass.

Martinsburg Veterans Have a Jolly Good Time at their Annual Banquet

By Aunt Mary

"WOMEN folks," sez Ezra, puffin' at his pipe on the night when I told him I had my head plumb sot on goin' to that Veterans' banquet at Martinsburg, "women folks what goes trapesin' around to foreign cities in the dead o' winter when they ought to be a-settin' at their own firesides aint got the sence what the Good Lord give to a plain, ordinary tincan-eatin' billygoat!"

Now this was pretty harsh language for my Ezra, an' it's only when I say somethin' about goin' away that he gits het up enough to talk that way. I jus' takes it that men-folks is such helpless critters, that's why they hates to see their women folks leave home. So Ezra tried his beat-est to persuade me from goin'.

"Ezra," sez I, determin't like, "you needn't try to hide your own selfishness behind none o' that philisophisin' about billygoats; I know plumb well that it's only because you be too lazy to cook your own breakfast while I'm gone, now aint it?"

Ezra cleared his throat.

"Mary," sez he, sorter sheepish-like, "I'll admit that I'm about the worst hen-pecked man in Baltimore, an' I'm a big fool for lettin' you go, but when I know that you got your heart in the Veteran Association, ef I don't let you go, I'll have a dead woman on my hands, and, b'lieve me, funerals is too expensive nowadays."

"Right," sez I.

So next morning, which happened to be January 20, I packed my carpet bag, an' that afternoon I set out on Number One for Martinsburg.

I took a seat near the front. Pretty soon another lady got on an set 'longside of me. She just looked sorter like a Railroad woman, so, by an' by, I sez to her, "Be you a Railroad lady?"

"Yes, ma'am," sez she, "my man is a en-gi-neer, an' I'm goin' to Martinsburg"

"Me, too," sez I.

"Aint that grand?" sez she. "Have you got any children to home?"

"Glory be!" sez I, "No, ma'am, I aint, an' excusin' Ezra, I aint got no husband."

"Is tha-a-t so?" sez she, terrible put out at the idee, "Why I jus' imagined that you lived in the country an' raised turkeys for a livin'."

I dunno what else she mighta said if Mister Bowers hadn't come along jus' then.

"Hey, there, Aunt Mary," sez he, "where be you goin'?"

"Same place as you," sez I, fer as you know, Mister Bowers is president of the Baltimore Veterans.

"I'll be Jim-swiggled," sez he. "Well, I'll see you tonight." And he went on into the smoker to set with Mister Sturmer, the grand president, an' Brother Holmes, an' to smoke some cigars that some o' their Veteran friends wished on 'em. (I'll tell you I'm glad that smokin' cars wuz invented an' we womenfolks don't have to endure that terrible sensation of bein' in a rope fact'ry while men is smokin' gift cigars.)

A little way back there set Conductor an' Missus Culbertson an' their pretty little daughter, who wuz all goin' to the banquet too. In fact, if I aint been mistaken, I heard Mister Culbertson say that the whole family hadn't 'et nothin' since the day before, so's they could save their appetites fer the banquet.

When the train pulled in at Martinsburg, there wuz lots an' lots of Veterans a-waitin' to see who'd come down from Baltimore. Assistant Foreman Stephens wuz a-waitin' there to take me home to see his wife an' children, an' I kin tell you he's got a fine family. Matilda, his daughter, she goes to high school—I know it's high, 'cause I scen it, an' it looked awful high to me. William, the little feller, is as fat an' jolly as he kin be—why they say that he kin eat 14 boiled eggs in one day. They tell me, too, that William and his friends build all

kinds of houses in the back yard an' put in heatin' plants with old wash-boilers an' garden hose. The biggest boy, Harry, is away at Morgantown, goin' to the University an' gettin' a grand ejycation. Mrs. Stephens showed me all over Martinsburg. I seen the high school, the ward schools, the woolen and hosiery mills, an' a great number of imposin'-lookin' residences. They've got a nice little theater, too, an' dry-goods stores, an' everything just like 'tis at home in Baltimore.

The banquet wuz held in the Y. M. C. A. an' when we got there the folks had commenced to pour in from all sides. It 'peared like I hadn't ever seen so many folks all to once. An' everyone wuz howdyin' to everybody else, while the soun's of music issued forth from the pianny. When I looked over to see who it wuz that wuz playin', I couldn't see a-tall, for there wuz so many people standin' round the pianny. Sez I to myself, "Here's where I'll get a peep at the 'blonde belle,' or the 'village vamp,' ef I have to break my neck a-doin' it." But what do you reckon? I never wuz so mistook in all my life. When I finally made my way through the crowd, there set the blackest little pickaninny at that pianny, a-rollin' the whites of his eyes 'round to where the blacks oughter be, an' a grinnin' like a Cheshire cat, an' a-playin' that pianny to the tune of "Old Black Joe," "Suanee Ribber," "Old Kentucky Home," an' all them old-time pieces. It sure wuz fine, even ef he did play most of the bass on three or four keys. They told me that some of the folks around Martinsburg noticed his nachural ability in a musical direction an' now they're payin' to have him taught music, an' he's only been takin' lessons fer about 2 months. He didn't b'long to the 'Sociation of Veterans, but I'm a-tellin' you, he sure is musical.

"Say, Aunt Mary," sez Mister Stephens, "do you want to take a peek at the dinin' room tables afore they start eatin' offen 'em?"

"Yes, sir," sez I, turnin' my footsteps in that direction. There wuz the tables 'ranged all 'round the room an' down the center. There wuz flowers all set up in pretty vases, an' candles, all lit up; there wuz pickles, an' jelly, an' potato salad, an' slaw, an' ham, an' peas, an' creamed chicken, an' coffee, an' rolls, an' everything eatable.

"Line up fer the grand march," sez Missus W. A. Burkhart, president of the Ladies' Auxiliary. The lights was all put out except the candles, an' the line started. Everyone of 'em had that appetizin' look on their faces as they marched 'round to their places at the tables. The ladies of the Auxiliary had arranged everything, an' I'll tell you that they deserve lots of credit. Missus Burkhart, president; Mrs. Clara Taylor, vice-president, and Mrs. C. E. Auld are some of them. There wuz 400 plates laid an' all wuz used.

The way them Veterans et that banquet, you'd a-knowed that they enjoyed it. Everybody had a good time. Among the folks who set at the table where I set wuz Mister Sturmer, Mister an' Missus Bowers, Foreman an' Missus W. L. Stephens, Rev. F. R. Wagner, of the Lutheran Church; S. C. Tanner, superintendent of shops at Martinsburg; Mister Holmes, of the Baltimore Veterans; Mister an' Missus John Barker, Rev. McKeefrey of the Catholic Church at Martinsburg; President an' Mrs. Bowers, of the Baltimore Chapter of Veterans. Brother John Barker is 74 years old with a service record of 44 years. Over on the other side set Brother William Airhart; they call him the Veteran of the Veterans. He is 80 years old an' he has worked for the Railroad 49 years as a conductor on the East End of the Cumberland Division.

"Where is the ice cream?" sung out a youngster who wuz already so full of cats that he could hardly move.

"You don't reckon that you're goin' to get ice cream on top of all this, do you?" asked the Reverend Wagner.

"You bet!" sez the little feller, "I seen the freezers." An' sure enough, it wasn't long before the ice cream come around an' with the best cake—yum! yum! An' while we wuz enjoyin' it in come the Cumberland Quartet. 'Twuz the first time I ever seen a quartet with five men in it, but I reckon as how this one might be a double quartet, fer one of these men wuz doin' the work of four; an' when they made music like reg'lar musical insterments, this man played a imaginary trombone what resounded all through the hall. These men wuz as follers: C. L. Colley, J. T. Gorman, H. C. Childs, R. C. Thuss an' E. Dreming.

After the noise of the applaudin' had died away, Mister Fauver, the president of the Martinsburg Veterans, called the meetin'

to order. (There is a membership of 248 an' the chapter wuz organized 7 years ago.) The Veterans then stood with bowed heads in silent prayer in memory of 40 of their number who have passed away. Followin' this was some more selections by 'the Cumberland Quartet, then the report of the secretary, "Charlie" Auld, who is very popular among his brethren. Then come the election of officers, where Mister Sturmer took charge. The follerin' officers wuz elected, or rather, re-elected: Mr. Fauver, president; Mr. Burkhart, vice-president; C. E. Auld, secretary; Ray Russler, financial secretary; James Aldridge, treasurer.

Then a executive board of 22 members wuz elected, whose duty is to attend reg'larly an' to look after all needs. The men fer this job wuz: C. P. Martin, Robert S. Gregory, J. E. Oliver, J. W. Zepp, J. W. Kastle, H. Robinson, S. W. Thomas, Joseph Copenhaver, E. B. Robinson, Harry Oliver, G. T. Forman, M. L. Sharon, H. G. Wilger, H. W. Peer, A. J. Criswell, J. C. Davis, S. C. Tanner, Robert Clark, Robert Harris, L. M. Van Horn, John Householder an' Howard Keedy.

Next on the program wuz the readin' of a letter to the Veterans from Mister Van Sant, editor of the MAGAZINE, tellin' all about what Veterans can do fer the Railroad ef they've got a mind to. Mister Sturmer then commented on this letter, impressin' upon the Veterans just what things they could do to help. Then he read letters from many of the Railroad officers expressin' their regrets at not bein' able to attend the banquet, among which wuz a letter from Governor John Cornwell, thankin' the Veterans fer electin' him a member of the Association an' sendin' in the amount of his annual dues. Mister Sturmer then made a short address what wuz full of pep about the brotherhood of man, emphasizin' friendship, loyalty an' obedi-

ence; he also boosted the Railroad an' the home-buyin' idea of the Relief Department.

Miss Grace Fauver played the pianny, while Mister Lee Woolford an' Mister Edison Baker played the violins, all of which set the feet of the Veterans a-pattin' on the floor. Father McKeefrey made a pleasin' address, the principal theme of which wuz that pretty verse from the Bible what sez: "Behold how a sweet a thing it is fer brethren to draw together in unity." Miss Anna Kline then sung a pretty solo, an' Reverend Wagner, who was once a railroad man, spoke well of the Baltimore an' Ohio Railroad. Mister Wagner sez he lived alongside another railroad fer so long a time that he reckoned there wuz no other railroad in the world, but since secin' the Baltimore an' Ohio, he has come to believe that this Company takes better care of its employes than any other. He sez that he knows that the Railroad officers want the employes always to feel like sayin' "This is OUR RAILROAD."

Mister Bowers wuz scheduled to speak, but he declared that he had somehow got a frog in his throat an' that his wife would speak for him. I dunno what that man would do without the Missus. She got up there an' recited a pretty piece called "Little Tim," what everybody enjoyed. Then came a speech from the beloved president of the Martinsburg Veterans, Brother Fauver. He compared the life of a railroader with his work. He sez: "Have you your brakes fixed so that you can stop at any minute? If not, I beg of you to fix 'em." Then he went on to say that any railroad man must be a Christian if he would do his work successfully. I wuz talkin' to some of the folks afterwards, an' they told me that Brother Fauver not only talks but acts Christianity, an' that all of the men love an' respect him for the good life he leads.

Veterans who met at Garrett, Indiana, in January. In the front row are: W. W. Wood, chief of Welfare Department; Vice-President Charles W. Galloway; George W. Sturmer, grand president of Veterans, J. M. Garvey, grand vice-president of Veterans and James Wardley, grand secretary

Mister Holmes then made some humorous remarks about everything in general, puttin' everybody in a good humor an' ready to enjoy the recitation of Brother Allison, president of the Cumberland Chapter, who also made some interestin' remarks. He told how he had give his son orders to ride an' to ship via the Baltimore and Ohio. Then he called for volunteers to solicit business for the Company, an' I believe nearly every Veteran's hand wuz raised.

The meetin' wuz dismissed by Father McKeefrey.

"Well," sez I to the ladies, "I done hear talk many a time about the Martinsburg Veterans an' about the good banquets, but now I know it fer myself. They tell me it's so pretty up there when the apple trees is bloomin', but all I got to say is that if it's any prettier then than 'tis now, I'm afraid of I went up there then, I'd *never* come back home to Ezra."

Chicago Veterans Honored by Visit from Vice-President Galloway

A MEETING of the Chicago Division Veterans at Garrett, Ind., was held on January 21, in the assembly room of the City Hall. At 2.55 p. m. the meeting was called to order by the vice-president of the Association, C. H. Martin, who introduced the Rev. J. C. White, who delivered the invocation.

Grand President Sturmer then asked that all stand for one moment, bowing their heads in silent memorial to the deceased members of the Chapter. Reports from the secretary and the treasurer were heard, then the reading of a letter from the editor of the MAGAZINE to the Veterans, outlining the work that Veterans can do as a proof of their loyalty to the Railroad. A brief talk in support of this letter was given by C. H. Martin.

Following this, a gold button, signifying 50 years of active service, was presented to Engineer J. F. Mitchell. Others who are entitled to it are Alexander Cross and H. Frank Sembower.

After addresses by Mr. Sturmer, Grand Vice-President Garvey and Grand Secretary Wardly, the meeting was adjourned while the members went to the Reformed Presbyterian Church, where a flashlight picture was taken. This was followed by a sumptuous banquet, served by the ladies, in the basement of the church. The menu consisted of: Oyster cocktails, wafers, roast pork, mashed potatoes and gravy, corn, cold slaw, bread, butter, pickles, celery, coffee, Waldorf salad, and mince pie. Grace was said by Rev. F. M. Newlin, of this church. An orchestra furnished music, and the Veterans were delightfully entertained by Miss Bernice Long, of Willard, Ohio, Miss Vera Coffing, and Minor Miller.

After the banquet, the Veterans returned to the auditorium of the church, where they were addressed by Rev. J. C. White, W. W. Wood, chief of our Welfare Department, and by Vice-President C. W. Galloway. Mr. Galloway spoke of many of the railroad problems of today, touching upon the present business depression. He was optimistic as to the future, and spoke of recent railroad legislation as being the most constructive ever enacted for the transportation industry. Mr. Galloway paid a fine compliment to the passenger engineers of this division. Moreover, he said that he always felt home in a gathering of this kind, where he could talk to the men in their own language and enjoy the mutual benefit which comes from getting acquainted.

tuous banquet, served by the ladies, in the basement of the church. The menu consisted of: Oyster cocktails, wafers, roast pork, mashed potatoes and gravy, corn, cold slaw, bread, butter, pickles, celery, coffee, Waldorf salad, and mince pie. Grace was said by Rev. F. M. Newlin, of this church. An orchestra furnished music, and the Veterans were delightfully entertained by Miss Bernice Long, of Willard, Ohio, Miss Vera Coffing, and Minor Miller.

Connellsville Veterans Hold Memorial Service for Deceased Members

ONE of the features of the meeting of the Connellsville Veterans on January 12 was a memorial service in honor of deceased Veterans.

The memorial address was delivered by the Rev. B. W. Hutchinson, of the Methodist Episcopal Church, who paid a splendid tribute to the faithful Railroad employees who have died during the past year. These were: A. W. Bishop, T. E. Miller, C. W. Grimm, J. R. Kaufman, Thomas Welsh, W. M. McLaughlin, A. P. Hill, Foster Walters, G. W. Miller, Michael Shannon and W. H. Jamison.

Three officers of the Grand Lodge of the Association were present: President G. W. Sturmer, Baltimore; Vice-President J. M. McGarvey, Wheeling, and Secretary James Wardley, Connellsville. President Sturmer delivered one of his characteristic and energetic addresses, making an appeal for an

increase in the membership of the Association. He emphasized President Willard's recommendation that members of the Association practice thrift and give to their daily tasks the best that is in them. President Sturmer also directed attention to President Willard's request that every employee develop into a booster for the Company and exert his influence in an entirely proper manner to increasing traffic of all kinds.

Addresses were made by other members of the Association, including P. J. Harrigan, president of the Connellsville Association, who, with 46 years' service to his credit, rates as one of the oldest veterans.

Following the meeting, a pleasing entertainment was held. This included a piano solo by Miss Georgia L. Tipton, vocal solo by Miss Winnie Harrigan, and a series of moving pictures shown by W. H. Underwood, secretary of the Y. M. C. A. "Ma

Sweet" and her "seven daughters" formed a musical company which gave a splendid musical entertainment. These girls are: Misses Hilda Shuler, Amelia Shuler, Winifred Love, Annie Coin, Mary Margaret Krug, Loretta Lowney and Edna Wrote.

Cumberland Veterans Entertain

JANUARY 4 was a gala day with the Cumberland Veterans, who entertained the members of the Ladies' Auxiliary and their friends at the I. O. O. F. Hall. A fine musical program was arranged, together with recitations, speeches and refreshments.

The program follows:

Address—"Memories of the Past".....J. W. MILLER
Violin and Piano Duet.....MISS AND MASTER BRUBAKER
A Sketch in "Colored" Dialect.....MRS. A. MENAFEE
Song—"Afton Water".....J. W. MILLER
Address.....JAMES A. NEE
Piano Solo.....MISS EVELYN BLOSS
Recitation—"The Barber Shop".....CAPTAIN HARRY LITTLE

Piano and Whistling Duet
A LADY VETERAN AND R. H. HAMILTON

H. Allison, president, made the Democrats hold iron in their teeth while he recited "Made in the U. S. A."; Captain Lucas, whose popularity increases daily, delivered an enjoyable address; a delightful song was rendered by Miss F. Brubaker; J. W. Lucas won high honors with the "Man Behind the Anvil," and with a comic sketch, "The Man from College"; J. W. Miller followed and led the "bunch" through "The Rigs O' Barley"; Brother Allison then came on again with "The Lucky Woman," "The Graceful Woman," "The Tender Woman" and "The Slender Woman"; all arose and sang the "Star-Spangled Banner" as the closing number.

Miss Shirley J. Roemiser, who has the distinction of being the oldest girl, in point of service, in the clerical department, was one of our guests, together with a number of other young ladies whose names the writer does not know. We hope that they enjoyed their first visit to the Veterans' Association.

M. H. Cahill, general manager, Seaboard Air Line, and a member of our Association, wired his New Year's greetings, which were received with hearty applause.

The sandwich men of London have nothing on the bald-headed "waiter men" of the Cumberland Veterans, who performed their duties nobly and well.

The chairman of the entertainment committee extends his thanks to all for their presence and hearty cooperation in making this entertainment a success.

Death of S. B. Mason

We have just learned with regret of the recent death of S. B. Mason, at one time chief clerk to the general manager of the Baltimore and Ohio, and one of our "old timers."

Mr. Mason also served as chief clerk to the general superintendent of motive power. Later he became chief clerk to Vice-President and General Manager Underwood, with whom he went into the service of the Erie Railroad.

Death of Harry Lee Marshall, Superintendent of Shops at Martinsburg

By W. L. Stephens

Assistant Foreman, Martinsburg Shops

ON JANUARY 8, Harry Lee Marshall died at the University Hospital, Baltimore, Md. For the past 14 months he had been superintendent of the shops at Martinsburg, W. Va. His health had been failing for some time and for the three months preceding his death illness had almost incapacitated him from active duty, and he spent much time in Baltimore under treatment. His health seemed to improve, however, and while his fellow officials and friends realized the seriousness of his condition, all hoped for his recovery. His

A special train ran from Martinsburg with division officials and other employees.

The Baltimore and Ohio Veteran Employees' Association of Martinsburg was the only fraternal organization with which Mr. Marshall had identified himself and its members had charge of the services. Many of the veterans, with the entire shop force and several officers of the Company, formed a guard of honor from the home to beautiful Elnwood Cemetery in Shepherdstown, where his body was laid to rest beneath the sod of his home county.

The following officers were present at the funeral:

E. Stimson, chief engineer maintenance; G. W. Andrews, assistant to chief engineer maintenance; J. B. Myers, engineer roadway and track; M. M. Corrigan, inspector of tunnels; C. W. Van Horn, superintendent, Cumberland Division; T. Faherty, assistant superintendent, Cumberland Division; J. O. Potts, inspector of maintenance; F. A. Taylor, master carpenter; I. S. Sponseller, general supervisor; A. O. Tederick, supervisor; E. C. Groves, trainmaster; J. C. Tonry, assistant trainmaster; W. F. McBride, supervisor; P. Petri, division engineer.

The acting pallbearers were:

A. B. Irvin, chief clerk; J. H. Aldridge, foreman machine and bridge shop; J. E. Oliver, leading machinist; J. W. Kastle, blacksmith foreman; N. S. Edwards, leading earman; J. A. Holpp, frog shop foreman; Edward Rutledge, cashier, Citizens' National Bank, Martinsburg, W. Va.; J. S. Moler, Shepherdstown, W. Va.

Harry Lee Marshall

death, entirely unexpected, came as a shock to his fellow employees of the office and shop.

Mr. Marshall was born in Jefferson County, W. Va., 54 years ago. Here he spent his early life. He entered the employ of the Baltimore and Ohio on August 1, 1889, as agent at Engles, W. Va., at the age of 23 years.

Before coming to the local shops as superintendent, he was attached to the staff of Chief Engineer of Maintenance, Earl Stimson, as inspector of maintenance. In this capacity he traveled over the System. A good mixer and with a likeable disposition, "Harry" was known on every part of the Railroad. His service record of over 31 years shows constant promotions to positions of trust, until the once young agent at a small way station finished his Railroad career as superintendent of the shops at Martinsburg.

The funeral was conducted at Kearneysville, W. Va., at the home of his sister, Mrs. F. O. Trump, the shop employees attending.

William F. Dayton's An Extraordinary Railroad Record

By W. E. Laird

Chief Clerk to Superintendent, Newark, Ohio

WILLIAM F. DAYTON, one of the best known and popular passenger enginemen on the Newark Division, who at the close of the year 1920 completed 53 years of continuous engine service, and whose retirement commenced with the new year, has accomplished one of the most remarkable records that has come to our observation.

We say "remarkable" because at the time of his retirement, at the age of 74 years, he was successfully and efficiently operating regularly one of the larger passenger locomotives and hauling one of the most important through passenger trains running on the division.

It will be noted that he was actively serving the railroad nine years beyond the minimum age at which employees are usually retired and in a capacity requiring the maximum skill and effort demanded of an engineer.

The above facts do not alone portray the exceptional service given by him, for the reason that his service record, after his 53 years of continuous service, is entirely clear and no mark of discipline whatever appears thereon. On the other hand there are two meritorious notations at the bottom of the record sheet, which speak for themselves and which we quote herewith:

10-10-16.

Engineer in charge of engine handling President's Special; commended for the creditable manner in which train was handled.

8-5-17.

On this date a gold watch and chain was delivered to him with a personal letter from President Willard compli-

menting him on the completion of 50 years in engine service.

Since being presented with the gold watch and chain by President Willard on completion of his 50th year of service, he has added to his laurels by running a passenger locomotive for an added three years just to show that it could be done.

To Mr. Dayton and his extraordinary achievement, especial honor is due, and, through the columns of the MAGAZINE, most hearty congratulations are extended to him.

Baltimore Veterans Hear from Mr. Ennes

ON JANUARY 6, George A. Bowers, president of the Baltimore Chapter of Veterans, wrote Mr. S. Ennes, former general manager of our Eastern Lines and now vice-president of the Wheeling and Lake Erie Railroad, advising him of the resolution of regret at his resignation from the Baltimore and Ohio, which had been passed at the preceding meeting of the Veterans by the over 800 members present. The concluding paragraph of the resolution read: "As president of the Baltimore Division Veterans' Association, representing nearly 1,800 men and over 300 women, I express our deep regret at the leaving of a very near and dear friend, for whose peace, happiness and prosperity in his new field of endeavor we pray."

In his acknowledgment of this resolution in his letter of January 18, Mr. Ennes said in part:

(Continued on page 36)

Women's Department

Edited by MARGARET TALBOTT STEVENS

A House with a Gable Roof

*O, for a house with a gable roof, with eaves where swallows dwell,
Where noises of the city streets ne'er break the mystic spell,
Where—save for songs of stormy winds and calls from forest deep,
Or echoes from the hill and dale—the earth in peace doth sleep.*

*O, for a house with a gable roof, with a garret, broad and low,
Where children hie on rainy days and scamper to and fro,
And 'deck themselves in Grandma's gowns from the old, old haircloth chest,
Or in Grandpa's frock coat, ruffles, too, and fancy, silk-striped vest.*

*O, for a house with a gable roof, with a chimney, wide and tall,
Where urchins climb and skin their knees to find a "shinny" ball;
Where pigeons roost and sparrows chirp, and e'en the wildest crow
Will pause a moment in its flight to view the earth below.*

*O, for a house with a gable roof that points up toward the skies,
Whose sharp relief against the clouds the wintry gale defies.
Methinks 'tis independence there that holds the spires aloof,
And freedom reigns within the walls of a house with a gable roof.*

A Chat With Enid Paxton, An English Girl, Who Is Now One of Us

HOW would you like to go home from work on some cold evening this Winter and be told that you must not sleep in your nice, warm bed upstairs, but that you must take your blankets and hie yourself to the fields to spend the night? How would you, as a girl, like to work until midnight at your office, then walk home, a mile or two away, all alone and with not a single light to tell you which way to go?

If you would like to know how it feels to experience anything like this, ask Miss Enid Paxton, stenographer, Purchasing Department, Baltimore.

Miss Paxton is a little English girl, who came to America less than a year ago. During the World War, she lived in Yorkshire, England, and while not quite within the territory raided by the German Zeppelins, yet she lived near enough to hear them at night and to see something of their deadly effects upon the houses of some of her friends. She was a member of the Women's Royal Air Force, of the "Waacs" (Women's Army Auxiliary Corps). Miss Paxton was a stenographer in the service, but there were many other women in the W. R. A. F. who served as sailmakers, machine women, officers' cooks and in almost every imaginable position. They wore khaki uniforms with brass buttons. On the button was a bird, signifying the branch of service. Then there were high collars, rain coats—every-

thing military in the matter of clothing and drilling—for they were under strict military orders.

"Yes," said Miss Paxton with a smile, "we had to be real soldiers; we had perfectly awful food, too, but we lived through it. And oh, the drills! Every day! How I hated them! It was so cold getting up in the morning, too. Why, sometimes I'd get so cold in the night that I would get up and put on some of my clothes. A half hour later I'd get up again and put on more. By the time the time came to arise, I was often fully dressed; that was some consolation, of course.

"For a time we were billeted near my home. We girls all lived in a big house. Later I was transferred to quarters about two miles away. A part of my work was the booking of trains. We'd work oftentimes until midnight, with no lights except when the trains came in. While we were perhaps 20 or 30 miles away from the Zeppelin region, we could hear them and it was necessary that no lights whatever be seen from any house. Most of the people slept in the fields for it was dangerous to sleep in houses. The Zeppelins came only at night and you could never see them, only hear them. By the end of the war, our coasts were deserted, the people had all moved inland.

"You mustn't think that everything was

sadness and terror during the time of the Zeppelin raids. There were lots of funny things that happened. Why, a friend of mine was fast asleep in her cozy little bed one night when a "Zep" came along, dropped a bomb on the house, and—boom!!! Both she and her bed went through the floor and landed on the kitchen table without a scratch!"

"Girls"—A Schoolboy's Composition

GERLS are the foundations of wimmim. Every lady used to be a gerl once, and the older a lady is the longer ago it was, and evry gerl ipects to be a lady some time, and the younger the girl is the less she ipects it.

Most babies are called it instead of he or she, because most babies look like a it. Boys keep on looking like gerls til they get their hair cut, the one that gets theirs cut the first being the ones that start asking the youngest and get their mother tired of saying No the soonest.

When a boy gets mad he hits with his fists, being paneful as well as insulting, but when a gerl gets mad she sticks out her tung, being merely insulting.

Some gerls is prettier than others, but the others won't admit it. The prettier a gerl is, the more rites she thinks she has, generally thinking corekly.

When you are interdoosed to a gerl you are supposed to bow and say, "I am pleased to meet you," but what you generally do is jest stand there.

When sevral gerls get together they generally giggle. Gerls don't haff to have ennything to giggle at to giggle, so when they have suthing speshil to giggle at, it's farsee.

Gerls awffen grow up to be nerses, skool teechers, lady doctors and dressmakers, but hardly ever to be prize fighters, shoemakers, and firemen.

Menny gerls can't wink one eye at a time, being more of a curiosity than a disgrace.

—Case Eagle.

A "What Might Have Been"

By Ellen Virginia Sims
Car Service Department

Don't let them call you "What might have been,"

Or let the world laugh you to scorn;
Don't find your "fun" in the pathway of sin.

Then wish you had never been born.
Don't be a toy of pleasure and vice;
Don't play a useless role;
Don't lose your faith if you failed once or twice;

Buck up—try again for the goal.

Don't be a chap who can't hold up his head,
Afraid to meet men passing by;
Stand firm, falter not, nor let it be said
That you can't meet your foe eye to cye.
Keep love and faith a part of your mould,
They'll do much to help you to win;
Let go the dross and you'll be "all gold,"
Instead of a "What might have been."

Potato Recipes

Of all the vegetables commonly known throughout the greater part of the world, there is none so popular as the one known as the Irish potato, so called because of its being the principal food of Ireland. It is a vegetable adapted to a variety of climates and is full of food values, very palatable and a wholesome article of diet. With many people it takes the place of bread. It is about the least expensive of our common vegetables, and may be prepared in so many ways as to make it a welcome dish for any American meal.

Potatoes Au Gratin

Five cold boiled potatoes, $\frac{1}{2}$ pint cream, 2 tablespoons butter, 1 tablespoon flour, $3\frac{1}{2}$ heaping tablespoons of Parmesan cheese, yolks of four eggs, $\frac{1}{2}$ pint consommé, salt and cayenne pepper to taste. Put the butter in the frying pan and as it melts add the flour and let it blend, rubbing smooth without browning. Then add the consommé and cream and stir constantly until the mixture boils. Then take the saucepan from the fire and add the cheese, well grated, and the well-beaten yolks of the eggs, salt and pepper to taste. Beat all thoroughly until light. Mash the potatoes well and place first a layer of the sauce in the saucepan and then of the potatoes and so on until the sauce forms the top layer. Sprinkle this lightly with bread crumbs and set in the oven and bake ten minutes. When it browns, serve it in the dish in which it is baked.

Creamed Potatoes

Pare and cut the potatoes into small squares. Cook 20 minutes in boiling water and a little salt. Pour off the water and add a cup of milk and set on to boil again. When this bubbles up add a tablespoon of butter, with a teaspoon of flour, mixed with cold milk, and a little chopped parsley. Simmer for five minutes and pour out.

Stuffed Potatoes

Bake the potatoes and when done cut in halves and scoop the potatoes out; mash with butter, salt and pepper until very light, put back in jackets and return to oven to heat and brown.

Potato Pancakes

To 1 quart of raw potato, either grated or run through a food chopper, add 4 eggs singly, beating each one in thoroughly. Add salt and pepper and a little flour, only enough to bind the mixture; the amount will vary owing to the difference in potatoes. Fry by spoonful in drippings or lard and serve promptly. This makes the best dish yet for breakfast.

Potato Fried Cakes

To 1 cup of potatoes, mashed, while hot, add 1 tablespoon of butter, $1\frac{1}{2}$ cups of sugar, 1 cup of sweet milk, 2 eggs, nutmeg and salt to suit taste, 5 teaspoons of baking powder; add flour enough to make a soft dough. Fry in hot lard.

The Woman Who Missed Her Train

IT HAPPENED at Union Station, Washington. The train for Baltimore had just pulled out; it had left a woman behind. We knew it by the expression on that lady's face as she emerged from the waiting room and walked toward the gate-man, from whom she learned the bad news. She made a wry face and proceeded to lay the blame upon everybody from the station-master to the bootblack.

She was a thin, nervous little woman, apparently a widow of about 32 or thereabouts. As she walked rapidly to and fro, scrutinizing the face of every passerby, she stopped long enough every few moments to inquire of the porter whether he had checked her baggage properly. One would have thought that there was only one train in the world that could have carried her to her destination. She carried a small leather handbag, which she swung rhythmically at every step. Now she stopped to adjust her hat. A nosegay of violets which she wore at her belt became entangled in her handbag; with a jerk the flowers were flung to the

floor, and the lady moved her lips, although we could not hear what she had to say.

She inquired of several of the onlookers as to the time of the departure of the next train. On being told that she had about 20 minutes to wait, she immediately proceeded to consult a timetable, and finally chanced to look at the bulletin boards. She sat down for a few moments and tapped her foot impatiently upon the floor.

Finally, a young man who had informed her concerning the trains, approached her and volunteered his services and his company until train time. His offer was immediately accepted, and soon the two were installed in the end of one of the long benches, munching chocolates and "talking about the weather."

When the gate was opened for Baltimore passengers she stepped lightly aboard, and the last we saw of her was her smiling face at the window as she waved her hand to her companion of the afternoon, who gravely lifted his hat as the train pulled out of Union Station.

Dear Women Readers:

One bright morning, a few weeks ago, I awoke, rubbed my eyes, and suddenly realized that the day was a holiday and that I had made no plans as to how I would spend it. Of course, there are always buttons to sew on, and ribbons to run, and stockings to darn—but on this particular morning I yearned for adventure. What should it be?

The idea came to me at breakfast, just as I was in the middle of a buckwheat cake—I'd take the train to Washington and visit some of my relatives, whom I had not seen for more than 10 years. No, there had been no reason, save my own thoughtlessness, that I had not seen them; I had simply allowed them to drift out of my life. During that time, I myself had moved about town a bit, and they, too, had lost track of me. However, I determined to look them up and to see if they looked the same as they did 10 years ago, and to see if the war had had its effect upon them as upon everybody else, but particularly to apologize for my shortcomings and neglectfulness.

In less time than it takes to tell it I was on my way. On reaching Union Station, Washington, I got in touch with the family by telephone, and in a half hour I was at the house. There I re-discovered my relatives; there I met new cousins, by marriage, renewed my acquaintance with all of them, and had a simply glorious time. Then came the dinner that seemed just like home, and I could hardly realize that time had separated us at all.

As I rode home that evening on the train, I thought of the many people who come into our lives, who mean much to us, whom we think we will never, never forget—then, because of procrastination, such as the matter of writing an occasional letter, we let them slip right out of our lives. And then I thought about the many, many railroad women—whether they are Railroad employes or whether they are the relatives of Railroad employes—and of the relationship that ought to exist among us.

There is only one way to discover—or to re-discover—our relationship; this medium is the exchange of ideas. The progress of the world depends upon the exchange of ideas, and women as well as men can help push this old world along to the place where it belongs.

This MAGAZINE is purposed to this very end—to be of service to our employes and their families, through this exchange, as well as to further the progress of the Railroad itself. This department is for Railroad women. What about it, women? Shall we all help? Let's have your ideas.

Yours sincerely,

Margaret Talbot Stevens

Associate Editor

The One-Piece Dress in New Designs That Perpetuate Its Prestige and Popularity—All Coats High Collared But Not All Full Length

By Maude Hall

detail, the long tight sleeve is preferred above others and every great couturier uses it.

Upon such a foundation the clever woman can erect a superstructure of details that is limited only by the ingenuity of the builder. Draperies, embroideries, trimmings, etc., may be used with the greatest freedom or omitted without the sacrifice of smart effect.

One of the styles supreme for women who do their own dressmaking is a one-piece frock in dark blue serge trimmed with velvet striped satin. The front of the dress is cut out to form a panel effect. The straight sections set into the panels are of satin and this trimming is repeated in the vest, which is given an oval shape as a result of the way the front of the waist is cut out and held together at the neck. A narrow belt of self-material holds in the fulness at the waist. Buttons arranged in a row at the back of the long tight sleeves, add to their smart effect. This dress may be developed entirely in serge without the use of contrasting trimming.

Dark brown taffeta closely spotted with satin dots of self-color is employed to fashion a charming one-piece frock, for whose collar and vest bieve crepe georgette is selected. The side gore is attached to the front and back of the skirt below the waistline and underneath narrow plaits. This gives both

front and back a panel effect. The belt is of spotted taffeta. If desired in more decorative effect, the sides may be trimmed with bias bands of self-material or with ribbon.

Whenever panels are introduced, embroidery is found, especially since most of the panels on latest creations are of the straight gathered variety. There comes a fascinating frock in broadcloth in the new shade known as pine cone. It is a rich, dark green. About the lower edge of the skirt and on the flare sleeves is an embroidery trimming of exceedingly simple design worked in amber, brown and dark green wool. The panels, versatile adjuncts, may extend below the edge of the two-piece gathered skirt, stop even with its hem, or be omitted entirely. While all of the fashionable frocks are girdled in some way or other—always low—the girdles are not restrictive. While jackets sometimes are closely fitted above the hips to accentuate the flare below, there is no general attempt to tighten the blouse at the waistline.

There are numerous models in black velvet and frequently the skirt and waist are developed separately then joined under a girdle of the same material, resulting in a straight line effect. Either velvet or velveteen is so rich that no other material is required in its decoration. Cream colored lace gives a youthful and dainty touch, however, and one sees it employed quite often for vests and collars. Laces with the design outlined in colored silk threads are also extremely smart for the decoration of black velvets, to say nothing of the gold and silver garnitures. Silver seems more used for velvet than does gold, gold being reserved

THERE are no divergent views anent the fundamentals of fashion this season. All of the designers, whether European or American, emphasize the slender straight line. This silhouette they gloriously interpret in one-piece frocks fashioned of fabrics that are equally a delight to the eye, luxury to touch and triumph of artistic development.

All are agreed upon the correct treatment of the collar. It is high, whether it closes at the throat or falls apart to reveal a dainty vest.

About girdles there also is no controversy. It is sub-normal. As collars are raised, girdles are lowered.

Sleeves? Yes, here, too, is opinion unanimous. While there is infinite variety of

principally for black satin and the sheer fabrics. There is no reason, as generally explained, for this order of things. Some of the leading designers feature the velvet and silver combinations while others adhere to the satin and gold effects. The woman who is copying them exercises her own sweet will in the matter.

Black velvet, too, appears in the development of some smart coats. All of the new coats have high collars, but all of them are not long. A model that falls only to a little below the hips is fashioned of black velvet and provides for either a high choker or a cape collar. It is trimmed entirely with self-material, but the buttons are of handsome black silk braid. Very pretty silks—invariably figured—are used to line both long and short coats.

A blouse that is dressy and practical is pictured here and its good points are duplicated in the skirt of dark blue broadcloth with plaits at the sides. Striped silk is used for the blouse, which has a deep collar and turn-back cuffs finished with a narrow frill of self-material. Medium size requires $2\frac{1}{2}$ yards 36-inch striped silk and $2\frac{1}{4}$ yards 50-inch broadcloth.

CHILD'S DRESS No. 7812. Sizes 2, 4, and 6 years. Size 4 requires 2 yards 32-inch material and $1\frac{1}{2}$ yard ribbon. Dress is closed at center-back. Has round neck, simulated pockets, and a straight belt. Price 20 cents.

No. 12453. Blue or yellow transfer pattern. Sizes 2 to 6 years. Price 20 cents.

Becoming Frock of Wool Cashmere Designed to Meet Needs of Morning or Afternoon

THE fixed duty of this becoming frock of gray cashmere is service. With service, however, it combines style in its most pleasing form and is, therefore, appropriate for morning and afternoon wear. The design has a sleeveless underbody for a foundation. The overblouse is trimmed with a convertible collar and fastens in surplice effect. The skirt is cut away at the lower edge to simulate a tunic. Medium size requires $4\frac{1}{8}$ yards 44-inch material, with 1 yard 36-inch lining for underbody.

If the skirt is desired with the line simulating a drapery, be sure to turn the pattern back, or cut off along line, sew cuff to lower edge of sleeve as notched and tack back edges of cuff together, matching the small "o" perforations. Leave sleeve free beyond the cuff. Sew sleeve in armhole of outer waist and bring seam of sleeve of small "o" perforations before placing on the cashmere. The front gore is laid on the material so that the large "O" perforations rest along a lengthwise thread. The back gore, the collar and back of the waist are all placed along the lengthwise fold of material to avoid seams. The sleeves, outer front, belt and cuff are so arranged that the large "O" perforations rest along a lengthwise thread. In cutting the underbody, the front is placed with large "O" perforations along a lengthwise thread and the back with triple "TTT" perforations along the lengthwise fold.

Very little work is required to make the underbody, which serves as the foundation for a well-fitting waist. Close under-arm and shoulder seams, then plait lower edge as

Next, gather the sleeve between "T" perforations. Close seam as notched; to under-arm seam. Hold sleeve toward you when basting it in the armhole and ease in any fullness.

Arrange outer waist on underbody and stitch lower edges together. Leave outer front free forward of the large "O" perforations and adjust tape the length of stay A to position underneath the gathers.

Join gores of skirt, then turn hem a front. Lap right front gore on left and stitch one inch from the folded edge. Finish edges above the perforation for closing. Gather upper edge of skirt. Sew skirt to lower edge of waist, bringing side seam to under-arm seam and folded edge of hem in front gore to the front edge of waist. Finish with the belt, trimming belt with buttons.

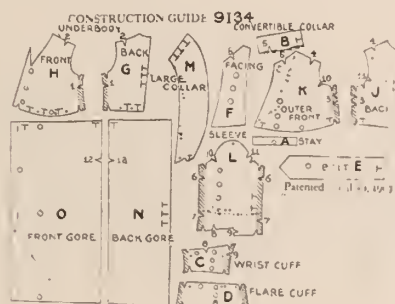

DRESS No. 9134. Sizes 34 to 46 inches bust. Price, 35 cents.

Visitor (at private hospital): "Can I see Lieutenant Barker, please?"

Matron: "We do not allow ordinary visiting. May I ask if you are a relative?"

Visitor (boldly): "Oh yes, I'm his sister."

Matron: "Well, well. I'm very glad to meet you. I'm his mother."—*The Nipco Bulletin*.

indicated. Before sewing shoulder seams of the outer waist, adjust facing to position underneath the front edge of outer front, with notches and corresponding edges even. Then, close under-arm and shoulder seams. Gather lower edge of waist between "T" perforations. Face and sew collar to neck edge of outer waist with centerbacks and front edges even.

The Land of Upside Down

*There's a queer old place near a queer old town
In a land where everything's upside down,
Where oblong stars show square moonlights
Through queer lamp-posts on long white nights.*

*There's a queer flat dog with a broadcloth tail,
A gingham steamboat with a calico sail,
A queer blue cat with a ginger ale nose
Who carries a treetop wherever she goes.*

*There's a lavender mouse with indigo eyes,
There are wild cherry cakes and hot pepper pies,
A queer red crow with teeth made of steel
That turn 'round and 'round like a blue orange peel.*

*But no one may visit this queer old town
Unless he knows how to walk upside down,
Then he may ride on a queer pink train
That is drawn by a short-legged, rubber-tired crane.*

Little Letters From Little People

THE pretty flower in the pot was drawn by Marie Clemmings, Newark, Ohio, whose letter was in the January MAGAZINE. Ethel Gardiner is the little Baltimore girl who drew the landscape with the big tree; her father is a Baltimore and Ohio electrician. Elizabeth Berry, Hamilton, Md., wrote me not one letter, but *two*, and they were both as nice as they could be. In one of them she told me all about her sister Marjorie's birthday, and of the nice present her mother gave her—a toy farm, with cows, a barn, trees and many fine things. Elizabeth sent me a drawing of a December landscape, with a man carrying a big Christmas tree on his back. Her letter came too late to use the drawing in the December issue, so we shall have to keep it until next Christmas.

Margaret Arbeit lives in Pittsburgh. She visited her Aunt in Cumberland, and wrote me a letter while there. Margaret is only seven years old, but she can read the Children's Page.

And now, I must tell you about two little sisters who live at Lesage, W. Va. Their names are Gracie Anna and Myrtle May Carter. They sent lots of nice pictures, which we shall try to find space for sometime soon. Their father is James William Carter, Section 34. They like the Children's Page. Gracie Anna is 7 years old and Myrtle May is 11. Myrtle May tells us how to

make a doll's dress. She says: "You cut out the dress to fit the doll, then you sew it up and hem it; then you work the buttonholes and sew on the buttons. (Sew them on tight.) Now the dress is ready for dollie to wear."

Dear Girls and Boys:

Isn't this just a splendid month, with so many nice things happening in it? Lincoln's Birthday, George Washington's Birthday, St. Valentine's Day, and even Groundhog Day—all coming together. And there are sure to be parties and coasting and skating—Goodness!

Drawn by Marie Clemmings, Newark, Ohio

Drawn by Ethel Gardiner, Baltimore, Md.

And next month we shall have the March winds and the Mad March Hares that Alice in Wonderland tells us about, and those of you who live in the country will find the pretty arbutus on the wooded hillsides, almost before the snow has disappeared.

Then comes pretty April, the time when the violets, anemones, hepaticas, blood-roots, Indian pipes, and all sorts of wild flowers begin to bloom, and the birdies will be coming back from the South, and singing their sweet songs in the apple trees. And now, I am going to tell you a secret.

Our whole Children's Page for April will be about birds. When you write your April letters, tell me about the birds that you know; how they build their nests, how boys and girls can help the birds in their nest making and in the care of their families; tell me stories about birds, their habits, of the best kinds of houses to make for them; of the good that birds are to the world, and anything at all that you know about them. If you have a real photograph of a real bird, or if you can write, all by yourself, a poem about birds, send that in with your letter.

You may begin sending in your April letters just as soon as you wish, but be sure to have them in by March 5. Now don't forget. Address:

Aunt Mary

BALTIMORE AND OHIO MAGAZINE,
Mt. Royal Station, Baltimore, Md.

February

By Ida Smith

Daughter of Nelson Smith, Freight Handler,
Camden Station

O, February,
You're contrary,
First you blow,
Then you snow,
But we like you well, you know.
And your ice
Is rather nice.
Coasting, too,
Is fun, that's true,
So here's my valentine to you.

Why Owls Can't See in the Daytime

*Over in the meadow, in the hollow tree,
Lived an old mother owl and her little owlets three,
"Wink," said the mother,
"We wink," said the three,
So they winked and they blinked in the old hollow tree.*

I KNOW that every boy and girl in the whole land knows that song, "Over In The Meadow," but I know just as well as I know that tomorrow is Saturday, that no little boy or girl has ever heard the names of those three owlets. Can you guess? Then I must tell you. They were Blinky, Winky and Booby.

For a long, long time these three little owlets lived with their mother in the old hollow tree. But owls, like people, must grow up. And so there came a day when the mother owl told Blinky, Winky and Booby that she must leave them.

"I have taught you how to catch mice, bugs and worms," she told them, "and now that you are full-grown owls, you are old enough to look out for yourselves. You may sleep in the old nest in the hollow tree as long as you wish, but you must be sure to be in bed by six o'clock."

"Yes, mother," said Blinky, Winky and Booby.

Mother said goodbye and flew away.

"What shall we do first?" asked Blinky.

"I shall go to sleep," answered Winky.

"When shall we get something to eat?" asked Booby.

"Oh, after a bit, there's plenty of time," said Winky, "I was out late last night and I intend to get to sleep now."

"And I, too," said Blinky.

"But I'd like to go and hunt for my supper now," complained Booby, "Mother said that six o'clock would be time to go to bed."

"Oh, come, don't be silly," said the other two, "we'll all wake up in time to get supper. Then we can sit up late."

So they all tucked their heads into the warm nest and went to sleep.

* * * * *

"Get up! Get up! The sun has gone almost over the hill. The mice will be in bed and we'll have no supper!" cried Booby, shaking the others.

"Oh, dear, Oh, dear!" said Blinky, rubbing his eyes.

And "Oh, dear! Oh, dear!" echoed Winky, shaking his wings, "What shall we do? What shall we do?"

"I know!" shouted Blinky, who was fully awake now. "I know! Let Booby and me go out and wake up the mice—I can squeak like a mouse—and you, Winky, go chase the sun and hold him up in the sky long enough for us to see how to catch the mice."

"But," said Winky, "the sun is ever and ever so big, and I am so small. Suppose both of you help me. We'll catch the sun, put a string around his neck, and tie him to the top of that tall church spire. Hurry, let's catch him!"

So they got a piece of string that Mother had used to tie the sticks together when she built the nest, and all three set out.

They flew, and flew and flew, on and on, towards the big, red sun. And closer and closer they came. But the nearer they came the hotter the air became, and the brighter the light grew, and the bigger the sun seemed.

"Let's go back," said Booby, "the sun is too big; we'll never catch him."

But Blinky would not listen.

"Come on," he said.

Just then the big sun turned to see why they were following him. "What are you up to?" he shouted, beaming hard upon them.

"Squeak! Squeak!" cried Blinky, falling to the ground. "Oh, my poor eyes!"

"Oh, I can't see at all!" cried Winky, as he flew to a tree in a wood nearby.

"Who—who! This is awful," screamed Booby as he turned quickly to fly, too. But he couldn't see where he was going, for the hot rays of the sun had scorched his very eyebrows and singed the lashes. He struck against something hard. It was the side of a barn. He crawled under the eaves to get out of the sunlight.

And the three poor owls could not see for

a whole day and night, and they had nothing to eat in all that time. On the second night, long after the sun had gone down, they came from their hiding places and met in the top of a tall tree.

"I'm so hungry," said Winky, winking his eyes.

"So am I," said Blinky, blinking his eyes.

"What shall we get to eat?" asked Booby, nodding his head.

"I don't know," said Winky, "but whatever we get, we must get it soon, for I can't see a wink while the sun is shining."

"Nor I," said Blinky.

"Nor I," said Booby.

And so they set out, weak and sore, to hunt for something to eat. But the only thing that they could find was a naughty chicken who had hidden in a tree outside of the hen roost instead of going to bed with his brothers and sisters.

"Shall we get him?" asked Winky.

"Yes," answered the others.

So they snatched the chicken from the roost and ate him for supper. And after they had finished their supper, Blinky flew to the top of his tall tree to spend the night, Booby hid under the eaves of the barn, and Winky went into the deep forest. And ever after that, Blinky was called a screech owl, because he always screeched in the middle of the night; Booby was called a barn owl, because he lived under the eaves of the barn, and Winky was known as a great horned owl, who lives in the deep forest. And neither one of the three could ever see again in the daytime.

Why Mr. Terrapin Carries His House on His Back

By Myra Gill

Daughter of J. F. Gill,
Freight Claim Department, Baltimore

MR. TERRAPIN is someone you have often seen, but I doubt whether you know where he came from. Well, I will tell you.

Mr. Terrapin came from Fairyland. There the fairies all loved him very much. He was forced to come to where human beings live to get things that the fairies needed.

One day, some girls saw him and ran away, screaming with fright, for you must know that Mr. Terrapin had no shell on his back. The boys threw sticks and stones at him. Then our old friend went to the fairies and asked for something to make him look better. The fairies soon granted him this wish by giving him a shell, which we call his house.

Mr. Terrapin went back to the land where human beings live and he liked it so well that he stayed.

Though this happened centuries ago, we still see this cunning old fellow and the house which the fairies gave him and which he carries on his back.

Myra Gill, who wrote the story of Mr. Terrapin

In the middle of the night, when all is silent, you can hear the screech owl trying to call the field mice from their beds; the barn owl goes about in the darkness to steal his food from the farmers, who are always trying to catch him; and the great horned owl comes to the edge of the wood and keeps the wood folk awake by calling:

"To-whit, to-whit, to-whoo-oo-oo!
My great ancient hall!
A king, a king I reign,
To-whoo-oo! To-whoo-oo-oo-o!"

But nobody believes that he is king of the forest or that he will ever be king, for he is too much of a coward in the daytime.

Baltimore Veterans Hear from Mr. Ennes

(Continued from page 29)

The League is entirely self-supporting and great interest is being shown in the games.

Section A, 12 teams, play at Carlin's on Saturday nights; Section B, 6 teams, at Aurora and Hamilton on Tuesday and Friday nights respectively.

Standing follows:

Section A

Week Ending February 5—Games Bowled at Carlin's

Safety Roll of Honor

Baltimore Division

On November 1, No. 511, engine 5205, lost time between Philadelphia and Newark, failing for steam. Fireman J. Jacobson, who was deadheading on this train to Baltimore, noticed same and when train stopped, went to the engine; upon finding what the trouble was, he fired the engine for the remainder of the trip from Newark to Washington and brought the train in on time. Mr. Jacobson's action in this case was highly gratifying and he has been commended.

On November 19, at 24th and Chestnut Streets, Philadelphia, while engine was placing some milk cars at the milk shed, Brakemen John Fox, who was riding cars, noticed a woman fall across the track within a few feet of them and jumped off and pulled her from danger. Brakeman Fox's quick action saved this woman's life as the wheel was within half a foot of her when she was pulled from her perilous position. The engineer could not have been singled in time to stop the cars. Brakeman Fox is commended for his timely rescue of this woman.

On December 8, when train No. 53 was pulling away from Twin Oaks, the engine crew noticed a bright headlight at the road crossing east of the station coming down the westbound track in face of the engine. Engineer W. G. Bryan immediately applied the air and stopped the train. Investigation by Engineer Bryan and Fireman W. Witteck developed an automobile had gotten on the track when driver lost control of the steering gear when it came against the rail. It was raining hard and the timely discovery by Engineer Bryan and Fireman Witteck probably saved the lives of the occupants of the automobile. Engineer Bryan and Fireman Witteck also helped these people out of their predicament by assisting in getting the automobile off the track. They have been commended.

Cumberland Division

Under date of December 31, Mr. A. Williamson, superintendent, Western Maryland Railway, Cumberland, Md., wrote our Superintendent Van Horn, advising that one of our conductors, while in the vicinity of Black Oak, Md., December 29, noticed the Western Maryland bridge on fire and immediately got in touch with their dispatcher by telephone so that arrangements could be made to protect traffic.

Superintendent Williamson requested the name of this man so that he could write him and express his thanks. Investigation developed that this was Conductor C. A. Sigafosse, in charge of extra east, engine 4839, who upon seeing the bridge on fire while passing that point on our tracks, immediately stopped his train and went to the Western Maryland telephone at the pull-out switch, notified the dispatcher and then took his brakeman, G. F. Donaldson, and extinguished the blaze by use of water from bucket in the caboose.

Upon being given this information, Superintendent Williamson wrote these gentlemen under date of January 18, extending his thanks in behalf of the Western Maryland management for their action in this case.

We are glad to mention this meritorious action in our MAGAZINE.

During 1920 the operators on the Cumberland Division contributed materially to safe operation by close observance and prompt action when noting defects and irregularities, as is shown by the following record:

NATURE OF OBSERVANCE	NUMBER OF CASES
Brake rigging down.....	28
Wheels sliding.....	12
Hopper bottoms down.....	10
Broken rails.....	8
Signals.....	5
Hot car boxes.....	4
Close clearances.....	4
Loose car doors and ladders.....	4
Obstruction removed.....	3
High and low couplers.....	3
Carrier plates and yoke bolts broken.....	3
Broken arch bars.....	2
Shifted loads.....	2
Broken wheels.....	2
Track conditions.....	1
Switch not properly closed.....	1
Broken spring hanger.....	1
Broken train line.....	1
Unsafe practice.....	1
Total.....	95

Among the above observations is included the following defects, investigation of which developed the necessity of setting off cars on line of road:

Broken arch bars.....	2 cars set off.
Hot car boxes.....	2 cars set off.
Broken wheels.....	2 cars set off.
Yoke bolts broken.....	1 car set off.
Broken train line.....	1 car set off.
Total.....	8 cars set off.

An estimate of the trouble likely to have occurred, had a number of these defects been unnoticed and no correction applied, is only a matter of speculation, but it is obvious that considerable damage and delay would have resulted.

On January 15, an extra west was in charge of Conductor C. E. Savage and Engineer W. J. Avers. While Conductor Savage was examining his train at M. & K. Junction, he found west wheel of west truck under Baltimore and Ohio 96432 with 24 inches crack and 2 inches of flange gone. He backed the car off at M. & K. Junction where repairs were made. This was an old crack and was not visible to inspection until after the wheel had become warm and the crack opened. Conductor C. E. Savage has been commended for his close observation on line of road.

Pittsburgh Division

The following employes of the Pittsburgh Division have been commended for their

splendid work, for their carefulness, and for being on the alert. We are proud of these men; they have the interest of the Company at heart:

W. R. Austin, engineer, and H. J. Meinhardt, roundhouse foreman, reporting engine leak and repairing same immediately; engine 1172 on November 4.

J. A. Welshonee, conductor, discovering and reporting broken rail on June 12.

J. F. Sweeney, operator, observing brake beam down on C. I. W. 17635, September 14.

L. L. Lovejoy, passenger brakeman, caught professional pickpocket and turned him over to police, July 2.

H. E. Abel, freight engineer, discovering large rock on track and handling situation well.

A. D. Weigel, operator, observing and notifying conductor that door of refrigerator car was open, September 14.

William Bick, operator, removing plank on road crossing loosened by brake rigging on engine, October 4.

Charleston Division

R. L. Hedrick, baggagemaster, No. 36, between Elkins and Gassaway, was noted assisting in handling express, which demonstrated that he was interested in getting train over the road. He is commended.

Asa Carr, conductor, while in charge of extra 2951, found switch at Adrian Junction with lug broken off, nothing holding switch points. Had repairs made, averting accident. He is commended.

Engineer A. W. Pickens and Fireman L. L. Gould, No. 52, discovered engine 1343 had side chest leaking. These men worked on engine at Pickens in order to get her in shape to handle train back to Weston, averting delay. They are commended.

Conductor H. L. Beamer and Engineer C. G. Waggoner have been commended by the superintendent for the efficient work rendered and interest taken in prompt completion of reconstruction of bridge 40-C at Arnold.

Conductor H. E. Bragg found hot box on car in his train at Frametown. Instead of setting off, he repacked box and handled car to terminal. He is commended.

A. F. Pennywell, agent, Falling Rock, has been commended for the interest he has shown in the work at his station, and for his action in averting claims.

Conductor G. H. Felix, Brakeman A. L. Boone and M. Childress and Engineer S. H. Haymond found slide on Sutton Branch. Instead of delaying traffic by waiting for sectionmen, they personally cleared the obstruction. They are commended.

On December 28, Brakeman H. E. Wilson, noted irregular track conditions at Orlando Junction and Pembroke, which if not promptly corrected, might have resulted in derailment. He reported these conditions and had them repaired. He is commended.

The following engineers have been commended for making a showing of over 100 per cent. in fuel performance for November:

W. T. Spencer, C. A. Mullins, J. A. Dougherty, S. L. Rodebaugh, B. J. Phillips, O. W. Gum, J. C. Jordan, A. F. Vorholt, O. E. Wright, W. B. Amos, C. U. Skiles, Albert Groves, C. G. Waggoner, A. B. Nicholas, L. B. Shomo, A. N. Burrows, Alva Kibbe, H. W. Fury, W. P. Duffield.

Newark Division

On January 8, "Jack" Tietter, Western Union Telegraph gang foreman, discovered a broken rail just west of Dillon. He promptly reported the matter to the train dispatcher, and ran his motor car after trackman to make repairs. He has been commended for his watchfulness and prompt action.

On December 15, Operator O. M. Varner, Bridgeville, Ohio, while returning from work, discovered broken rail one mile west of Bridgeville, flagged No. 89 and gave them message for section foreman at Sonora, Ohio, also notified dispatcher.

In addition to this, on morning of December 18, while going to work, he discovered another broken rail in main track just east of Bridgeville Tower, and notified sectionmen and dispatcher.

Mr. Varner is commended and suitable entry has been made on his service record.

New Castle Division

On December 17, No. 14, engine 5010, was stopped east of Kent, Ohio, by Express Messenger Martin, who had heard a noise under car while passing Kent. Inspection developed that bottom brake beam rod on Baltimore and Ohio car 1808 was down, and brake shoes dragging on the rail, creating unsafe condition. The prompt action of Mr. Martin eliminated the possibility of an accident. Superintendent Stevens has written a letter of commendation to Mr. Martin, also one to Mr. L. W. Prehm, Superintendent of the American Railway Express Co., in whose employ Mr. Martin is, thanking him for Mr. Martin's interest.

On Thursday, November 25, No. 7 was flagged at Hereford, Ohio, by A. R. Daniels, a resident of that village, who notified the conductor of a broken rail on the westbound main track. The prompt action of Mr. Daniels averted a possible accident. Superintendent Stevens has written him a letter of commendation, for his interest. Mr. Daniels is not an employee of the Company.

Cleveland Division

CLEVELAND OHIO, January 7, 1921.

MR. F. L. NICHOLSON,
Brakeman,
Cleveland, Ohio.

Dear Sir—We understand that on December 29, while No. 91 was passing "RD" Tower, on the Parma Run, you noticed broken flange on Baltimore and Ohio 150166 and twisted truck on Baltimore and Ohio 149737, and that you immediately notified the conductor in charge of No. 91, who had car set off. In all probability an accident was averted by your careful observance, and I want to commend you and assure you that your actions are very much appreciated.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

Chicago Division

J. R. Clements, operator, Alida, flagged two trains on the same day because of brakes sticking: Engines 4260 and 4301. Mr. Clements is commended.

On December 28, as extra 4323, east, was passing Kimmell, Ind., W. A. Reinhold, third trick operator, discovering hot box, which could not be detected by crew because of snow blowing, stopped train by advance signal. Mr. Reinhold says that he figured that a delay was far better than an accident. He was commended.

On December 24, as extra 4323, east, was passing Wellsboro, Ind., First Trick Operator A. G. Lemert noticed hot box. He notified crew, train was stopped and hot box examined. It was found that the journal had burned or broken off. Arrangements were made to have car set off. Mr. Lemert is commended.

Ohio Division

On December 9, when engine 5020, No. 12, became suddenly disabled, Engineer Cadden, with the assistance of Fireman C. E. Harper, took such action as to avert serious delay, for which action they have been commended.

On December 11, Engineer Waldo Laughlin discovered a broken rail on ash pit track at Athens. He immediately notified sectionmen and assisted them to repair the rail. Prompt action taken on the part of Engineer Laughlin possibly averted accident and delay. He is commended.

Trackman Earl Yates at Black Fork, Ohio, while temporarily in charge of section at that point, during the absence of foreman, who had been called away on other Company business, discovered a brake beam wedged in the track in such a manner as might have caused an accident. He immediately removed obstacle. Commendatory letter has been written him by Division Engineer Chamberlain.

On the morning of December 27, while extra 2711, west, was passing Grosvenor, Car Inspector W. D. Wildes observed column bolts broken and arch bar bent up against transom of the fifth car from engine. He immediately signaled to engine crew, train was stopped, and it was discovered that column bolts had been broken and some of them as well as the arch bar bent up against transom, the heads of column bolts being on each side of transom, which kept truck in a rigid position. Due to Mr. Wildes' watchfulness and prompt action taken, an accident was undoubtedly averted. He has been commended.

Indiana Division

On December 26, when extra 2920, east, was leaving North Vernon, John T. Booker, ash pit man, noticed brake beam down on PGX 971 when crossing Pennsylvania Crossing at North Vernon. Mr. Booker immediately notified Brakeman Spillman, who communicated this information to con-

ductor, train was stopped and condition corrected. Appropriate entry has been made on Mr. Booker's service record.

On December 26, when extra 2724, west, Conductor Elliott, was passing Marysville, Operator R. A. Trapp noticed something wrong with a car, but was unable to stop it at Marysville. However, he called agent at Otisco on city phone and succeeded in having train stopped at that point, where it was found that truss rod was dragging. The close observation of Operator Trapp is commendable and appropriate entry has been made on his service record.

Toledo Division

On December 21, Brakeman George Ballard, on looking over his train at Hamilton water plug, discovered car F. G. & E. 23858, loaded with potatoes, off center and trucks almost from under car. The car, in a dangerous condition, was set off at Hamilton. Possibly a severe accident would have resulted had it not been for close observance of brakeman Ballard.

Epigrams of W. C. Bowhay

Special Agent, Freight Claim Department

Some fellows are so busy watching the other fellow that they never have time to prepare themselves for promotion.

When a gink tells you how he is doing two men's work, just refer him to Deuteronomy, V-20.

If we had to BUY our office supplies from the stationery clerk, a baby's stocking would hold enough rubber bands, pens, pencils, pins and erasers to last a force of about 304 men 87½ working days.

If we were all forced to love our neighbors as ourselves the boss could have my job and I would go into the moving game.

In order to take a moving picture of some clerks the movie man would have to start his camera as the buzz announced quitting time.

He swore, the grouchy husband pup,
Because he had to hook her gown,
Then when he had her all dressed up,
She turned on him and dressed him down.

The Baltimore and Ohio will always give you a fair show, even with bum actors on its pay roll, but it's different with the Theatre Trust.

A poor man invented a patent face washer which was a failure. His wife advised him to market it as a drinking fountain. They now own their home and have plenty of money.

Father will use up all of mother's fruit jars for his home brew and then get mad as a hornet when mother buys a can of peaches.

Before you tell anyone the boss has it in for you, find out if he knows that you are on his pay roll.

When the old man gets sick and is so cross that the whole family gives him a wide berth except mother, he begins to realize that friend wife looks like she did when they were first married.

The country's dry and it's a fact,
That fishes now roost on a limb,
And when it rains the frogs will croak,
Because they never learned to swim.

Operator R. A. Trapp

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Engineering Department

Correspondent, OSWALD EDEN

"Velvet Joe" says: "If the women need any switches they should walk along the track until they find one."

The drafting room mournfully misses the demure Miss McCarthy, who has departed the dull, dreary office life to be wedded to her San Antonio Othello.

"Jits" Fleagle has been nicknamed "Cactus Charlie." He has supplied each one in the drafting room with a different species of cactus for window and table decorations. We wonder if this is a subtle attempt to get the office engineer's force to retain their fond memories of the former Miss McCarthy, who now resides in San Antonio, Texas, or if he is trying to show us how one can be dry and still thrive.

Railroad Notes

By intricate financing, "Ted" Ziegfeld has secured a lease on a narrow-gauge Lionel Railroad. His daughter is well pleased with this stroke of strategy. He also bought a herd of cattle at the ten cent store for the vast estate at the foot of the mountain.

"Ed" Pyles has acquired a wide gauge railroad and through equipment trust funds has just announced the purchase of additional rolling stock.

"Bill" Pinschmidt is having trouble on his private railroad. His switchmen have gone on a strike and he now throws the switch himself. He has consulted Mr. Herbert Dawkins, the electrical consulting engineer, about electric switches. Mr. Dawkins will make his report shortly. "Bill's" oldest boy—yes, he has two of them—has been promoted to tower operator.

J. W. Linnbaum and J. E. Schueler were also prominent railroad magnates during the Christmas season, devoting much spare time to line extensions and to raising the operating efficiency.

Since "Joe" Kemp has been married, his former habits have, of course, been changed very much, but he has not neglected his musical education. He attends the concerts at Stieff Hall frequently, where a good time is to be "had by all," and very reasonable.

G us Hauser worked hard as usual on December 31, when he started to clean up

H is library, files, and drafting table. A s it is his usual custom to start the New Year right, he always endeavors to rid the premises of all R ubbish.

C onsistent with past performances, L ots of junk was handled roughly; E ngineering books were hastily perused A nd several large blue prints, N ever before used, were relegated to the S crap heap.

U pon the table he placed a new white P aper cover, and on January 3, he was ready to accumulate another year's supply of rubbish.

Passing mention might be made of the fact that little "Willie" Joyce, our office boy, has passed the era of knee breeches, now hiding his shapely (?) calves from the eyes of the world by the wearing of long trousers. I wonder what his sweetheart—he told me he had one—thinks of her "young man" now? However, "Little Willie" is no more little—it is now "William."

Office of General Freight Claim Agent

Correspondent, Miss E. T. MURRAY

On December 29, friend Reuben, Record Division, was all smiles. "What's going on, Reuben?" he was asked. "Oh, boy! I am going to a big party tonight out at Marie's house in Hamilton. Yes, sir! They've got mistletoe 'n everything out there, and believe me, boys, I'm going to hold someone under it too." So between watching the clock and giving Marie the "cute" side smile, 5 o'clock arrived and Reuben hustled home. It is quite evident he had a glorious time as he wore the smile of content the next day, and is still talking about it.

When's your next date, Reuben?

A large office like ours is seldom without a sick list; those on our recent list are: Miss V. C. Brown, Miss A. Marshall, Miss M. H. Reider, Miss E. E. Norris and J. A. Downey.

"Gee, I hope they never get anything on me to put in the MAGAZINE," was heard from Mrs. Lozon of O. S. & D. Division one day recently as she was reading over the "Among Ourselves" Department.

Well, here goes. . . Ah! we'll just let Cupid tell it.

The members of our office wish to extend their heartfelt sympathy to John S. Smith, O. S. & D. Division, in the loss of his mother, on December 29.

Edward H. Scott, Accounting Division, has resigned his position to take up radio operating at United States Naval Training Station, Great Lakes, Ill. Good luck go with you "Scottie."

"Why is a pancake like the sun?"

"Dot's easy," answered the Swede. "It rises out of der yeast, and sets behindt der vest."

HE is head clerk in Accounting Division and SHE also works in that division. Each morning before 8.30 HE and SHE exchange smiles, and have a little chat, etc., and oh, how happy they are to begin work!

Miss Ida M. Brandt, O. S. & D. Division, resigned her position on January 16 to accept a position as housekeeper—just for two. More in our next issue.

By Gosh,
Helen, did you
see that?

Yes, Johnny,
what was it?

Yes
GLADYS

Isn't that
right, Petty?

Of course
it is, Jim

Bring me
a glass of
water, LAWRENCE

A Pipe Dream

By E. H. Brewer

I do not think that any of the girls would like to try this experiment for the "blues," but believe some of the boys in the office who are addicted to the habit of "Hitting the Pipe" might like it.

Did you ever feel so blue that your best friend did not look good to you, that your food did not taste right and your favorite smoke seemed rank, in fact, feel so out of tune with everything that you begin to wonder if you were not born under that sign of the zodiac which points to "GOAT." Well I have and here is my remedy.

For years I have kept a Missouri meerschau (corn cob) pipe on hand. It is an old battle-scarred warrior of many smoke battles, much blackened and a rather disputable-looking article, which the wife has three times endeavored to consign to the ash can. This old veteran, which I am ashamed to show to the public, I take from its secret hiding place, fill it up and go off by myself and have a quiet, sweet smoke. Then out of the fog of smoke the sun will suddenly shine and the world again smiles brightly for me.

My pipe is out—smoke up.

Printing Department

Correspondent, M. J. CONROY, Proofreader

Another "First" for Mr. Jones

While our friend Mr. Jones of the Charleston Division is being acclaimed for winning first prize in the Essay Contest, Eastern Lines, and justly so as the first correspondent of the MAGAZINE, we will have to hand him another "first," namely, for the neat manner in which he submits his "copy" for the MAGAZINE. What untold blessings are called down upon the head of the man—or woman—who prepares his copy in a careful and painstaking manner for the patient but long-suffering printer! We might mention also in this respect, *ex aequo*, the Honorable George W. Haulenbeck and our own beloved "Aunt Mary." We herewith, however, with all due solemnity award to Mr. Jones the Order of the Printer's Louse of the fourth degree with the blue ribbon and gold star. We desire particularly to emphasize the fourth degree, because there is a vast difference between the Order of the Printer's Louse of the first degree with the black ribbon, His Satanic Majesty rampant on a red hot plate, and the fourth degree with the blue ribbon and star. We award the first

degree daily—vocally, mentally and absent-mindedly. Even the editor of our MAGAZINE, though he be our friend and a gentleman withal, and also despite the fact that we both sing tenor in the Glee Club, has been decorated with the first degree time and again. In fact, there are two departments here in Baltimore with which we have large dealings, and which, were they to wear all the decorations of the first degree that have been conferred upon them, would look like the late Mark Hanna in his famous \$ suit in which the cartoonists took such great delight in clothing him.

We extend our congratulations to Mr. Jones and wish him first in everything good and honorable all through life.

Famous Men Born in February

St. Valentine, Abraham Lincoln, George Washington, "Charley" Lehmen.

Famous Spendthrifts

The Egyptians spent 30 years in building the great pyramid of Cheops; the Kaiser spent five years in trying to conquer the world; Harry Reay spent New Year's day in Hagerstown.

Henry and Martin Call on William Penn

Our two "devil boys," Henry Buettner and Martin Bafford, spent New Year's day in Philadelphia and witnessed the famous Mummerys' Parade, which they said was the greatest, grandest and most glorious spectacle ever conceived by the mind of man, and which contained more surprises than were ever gathered together in three rings under one circus tent. In order to make sure that they would not miss the train, neither of them retired the night before, but met at Camden Station at 3:30 in the morning and arrived in the City of Brotherly Love as the sun began to peep over the hills. Martin said he saw more people on the street there at six o'clock in the morning than he ever saw in Baltimore at noon. But Henry said he thought that half the crowd looked like they were from Baltimore, for they were looking up at the tall buildings and bumping into one another and trying to find some place in which to get an oyster stew.

The parade was wonderful, they said, but the "cops" were sure some rough "guys." They wouldn't let them move around at all—made them stand four hours in one spot! It was a great day though for the boys and will long be remembered, despite the fact that it took them several hours to get their bearings and find their way back to 24th and Chestnut Streets.

Purchasing Department

Correspondent, S. J. O'NEIL

Miss Marion Anderson, stenographer, was married to Mr. Edward Hale, at the residence of her mother, 1924 Penrose Avenue, on January 4. Mrs. Hale gave as her reason for leaving us, "I am going to help, mother at home." Mr. and Mrs. Hale have our best wishes for long life and continued happiness.

Cupid has paid us another visit. Harry Adams, a veteran in railroad service, was married to Miss Bessie Fisher on December 23. Here's luck, Harry, to you and yours. We hope that prosperity will shine upon you from every angle.

Earl Otto, clerk, Lumber Department, has been having quite a time lately about getting to the office on time. His excuse was, "a steam roller on the track." On January 11 he didn't show up at all, so we thought that he had been hit by the roller. No; he called up and said it was a girl. Congratulations, Earl!

Our readers will note that the Purchasing Department is not lacking when anything is doing in the Cupid line. Anyway, there shouldn't be an excuse for a single fellow to be lonely among such splendid opportunities as there are in our department.

John Hayes, timekeeper, is another one of the old standbys. All his friends have been under the impression that John was a quiet, unassuming fellow. We don't dispute that he is all those things, but at the same time there are some little rumors going about. Good work, John; come on in, the water's fine.

Relief Department

Correspondent, H. IRVING MARTIN

Our sick man, Robert H. Baldwin, has had a tough time of it. At this writing he is on the road to recovery and we all hope that the road will be a short one. It takes serious illness to bring out the depths of the real feeling for a fellow clerk. If all of the hopes, as expressed, come true, R. H. will be a well man and that right speedily.

Miss A. Paula Bernhardt wound up the old year by undergoing an operation for the removal of her tonsils. Truly not a pleasant holiday experience, but we are sure that the operation will be of lasting benefit. Your correspondent speaks from experience.

Among our visitors this month was John T. Mercer, formerly shop foreman at Mt. Clare. He dug into his memory and recalled S. B. Crawford, E. L. Weisgerber, E. T. White, "Tom" Turner, A. J. Cromwell, and many others dear to the hearts of the veterans.

Recent news items told of the discovery of a new sun, a star in the constellation, Orion. I'll wager it doesn't shine as bright for some hearts as does a new diamond ring that I heard about last week. Just a Christmas gift? "Mebbe" so, "mebbe" not.

Speaking of rings, what does one of our young chaps do but get himself a wedding ring and a wife. It happened on December 24 at the Parsonage of Broadway M. E. Church, when Rev. Daniel L. Ennis married Margaret May Hagner to John Norris Desverreaux of the Savings Feature. All the world loves a lover and a pair of lovers are sure of a double portion of affection and good wishes. The sailors on the sea of matrimony have anchored their bark at 1523 North Wolfe Street, Baltimore.

We regret to record the passing of the mothers of two of our veteran employees. They have "slippit awa" but are not forgotten.

Mrs. Louisa Bredehoeft, widow of Gustav Bredehoeft and mother of our "Uncle John," died on Saturday, January 1, at her home, 914 North Caroline Street, Baltimore. She is survived by two sons, Louis C. and John C. Bredehoeft, and by six grandchildren. She lived to complete 83 years with the full possession of her mental and physical faculties.

Mrs. Philena H. Griest died December 13, at the residence of her son, Samuel H. Griest, Rolling Road, Relay, Md.; on the threshold of her 90th year, from the infirmities of old age augmented by an attack of pleural pneumonia in May, 1920. Born January 27, 1831, near Penns Grove, Chester County, Pa., of Quaker parentage and early left an orphan, Mrs. Griest was reared by a minister of the "Society of Friends," Samuel Hadley and his wife Phoebe, until her marriage February 17, 1860, to William C. Griest of Flora Dale, Adams County, Pa.

At the expiration of her husband's term of enlistment in the Civil War in 1863, they moved to Havre-de-Grace, Md., where in 1869 they joined the Methodist Episcopal Church, of which they remained members until their respective deaths in 1904 and 1920. Of a distinctly optimistic temperament, Mrs. Griest was at all times able to perceive and live in the radiance of the silver lining of every cloud and through her cheerful disposition and keen sense of humor was a favorite with all who knew her, both old and young. During the recent great World War, she was an active member of the Relay branch of the Red Cross, attending every meeting; her skillful use of the old style steel knitting needles in knitting socks for the soldiers being a source of wonder to all who beheld her dexterity at her advanced age.

Mr. Griest is in charge of the Fire Insurance desk of the Savings Feature.

Miss Aileen Burns spent some days of a belated vacation in December renewing her acquaintance with her home town of Relay by the banks of the Patapsco. Her annual trip for sight-seeing purposes took her this year to Buffalo, but your chronicler at that time omitted to record her wanderings. She looks fit now to stand the strain of daily travel from Relay to Baltimore until the next rest period becomes due.

One of our social secretaries reports this "party in a parlor."

On the evening of December 27, a holiday party was held at the home of Miss Lillian C. Gerhold, Overlea. The rooms were tastefully decorated with green, red and silver drapery, holly and mistletoe. Games were played under the direction of the game mistress, Elizabeth Brune. Instrumental and vocal selections were rendered by Elizabeth Helfrich, Lillian C. Gerhold, Walter W. Lanahan, George H. Gerhold and Henry Wich. Much of the evening was given over to dancing, after which the guests were escorted into the dining room where refreshments were served. They all expressed themselves as having spent a very pleasant evening.

Among those present were: Mrs. George C. Kirchner, Messrs. and Mesdames John Gerhold, Sr., George H. Gerhold and J. Ernest Bucheimer; Misses Esther Harr, Evelyn Adams, Elizabeth Brune, Elizabeth Helfrich, Mary F. Wigglesworth, Lillian C. Gerhold and Virginia Jenkins; Messrs T. Parkin Scott, Sr.; Major Jenkins, D. R. Thirston, Walter W. Lanahan, Henry Wich, James Clancy, Charles Smith, G. Alston Stevens, Jr., D. Robert Repp, James E. McCann, William Gerhold, Marion A. Gerhold and John Gerhold, Jr.

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

It would have required quite a large sized pack to hold all the presents that were exchanged by the clerks of this office during the Christmas season. We doubt if a good big wagon would have accommodated all. Everybody seemed to have been affected with the same fever, for on Christmas Eve, every desk in the office showed anywhere from one fancy box up to a number reaching into the double figures. The list covered most everything that could be thought of, some useful, some ornamental, from toys to silverware.

Some worthy of mention were: Albert Lehman—one set of duck pins. This present apparently had a demoralizing effect because on the first night after receiving this gift, Albert's team dropped three straight. Miss Russell received a funny looking affair on a stick. Some say its excuse for existing is as a back scratcher; another ventured a guess that it was a powder puff; but it looked to us like an oversized tooth brush. Last but not least, our old friend "Joe" Heine of Ellicott City was presented with a Buster Brown collar and two bow ties, one pink and the other blue. "Joe" must look awful cute when all dressed up in his new collar. This bird also received a couple of wicked-looking cigars with red and yellow bands—red for danger and yellow for the fever of that name.

We might also mention the fact that the diamond crop was exceptionally large and profuse and many a hand and arm has been in a cramp ever since.

It was an ill wind that blew on "Charlie" Tucker January 12. During the process of moving records in the basement, "Charlie" put on a pair of old trousers, neatly wrapping his good ones in paper and placing them by the window. But—he forgot all about them until nearly quitting time. They say it's the unexpected that puts "pep" into life, and it was the unexpected that put "pep" into "Charlie" when he went to look for his bundle, because they were not there. According to eye witnesses, the entire southern end of the relief pair was missing and young Tucker has old man Winter to thank for saving him a very embarrassing trip on the street cars, because a long overcoat will hide a heap of sins. Just suppose it had been the good old summer time. Oh boy! Charles for the barrel stunt.

Under the heading of "Labor Saving Devices" we will place that new pinkish blue grayish brown suit of French T. Gartrell's. The reason for doing so is explained by "Joe" thusly: You can't see the gravy when he spills it down his vest, thereby it saves a lot of worry and the expense of having a suit cleaned every now and so.

It is also reported that French (not "Joe") now combs his hair with his hat on. Another labor saver. French comes back and says "Joe" never combs his hair either with his hat on or off. The secret is out!

Here is standing of teams in Office Bowl—League as of January 12:

	WON	LOST	PER CENT.
Kilkenny Kats.....	17	10	.630
Wild Cats.....	15	12	.556
Sad-as.....	14	13	.518
Excelsiors.....	8	19	.296

Records established thus far are: high individual, single game, Spurrier, 131; high individual, three games, Pritchard, 338; high

team, single game, Kilkenny Kats, 493; high team, three games, Kilkenny Kats, 1,401.

Keen interest is still maintained and we hope for its continuance.

While some records may be made on the alleys during the playing season, judging from the talk that is going the rounds, several new marks for endurance and capacity are liable to be established when the boys put on the feed bags on the night of the big party.

Brown Derby Winners for the Last Period

December 15—Each member of the Wild Cats team was presented with a brown derby for rolling the magnificent total of 26 pins in one complete frame.

December 22—Reichert. None on a spare and one in the box.

January 5—Mr. Schuster. All league records shattered—three balls down the gutter.

January 12—Mr. Milnor. Five pins in two boxes.

A little bird just whispered to us that W. B. Dudderar, assistant auditor, is now a GRANDPA, said important event occurring during the middle of January, when the family was increased by the advent of two grandsons. Congratulations, and our best wishes for the future health and happiness of the twins.

A Fish Story

By R. W. Stewart

J. E. McCann had a wonderful dog, That sat all day like a bump on a log, By a hole in the ice with a line on his tail, Whenever he barked Mac was sure of a whale.

A-running he'd come and pull it up quick, Take it up to the shack and fix it up slick, As a treat for a bunch of the boys from Mt. Clare,

That were sampling Mac's cooking that day on a dare.

They survived the ordeal—but the after effect

Caused each one to feel he was filled to the neck,

And vengeance they swore on the one that dared speak

Of that miserable spot called Seneca Creek.

They returned the next day all tumbled and torn,

Regretting the days on which they were born,

Then swore altogether that until Judgment Day,

Close to their own firesides they surely would stay.

When this department moved to its present location, the 11th floor of the Baltimore and Ohio Central Building, all concerned soon realized the improved working conditions as compared with our former quarters in the Riddlemoser Building. We have room to move around, necessary furniture—especially chairs—plenty of light and good ventilation. Orders are given to open all windows wide three times a day for periods of five minutes. We are setting the example for every other crowded office. It causes shivers and scatters papers at times, but we resume our work invigorated and refreshed.

Appreciation is shown in the determined effort everyone is making to master the detail necessary to complete the valuation of a railroad of such size and magnitude as the Baltimore and Ohio.

They say it pays to advertise: J. V. Smythe, of our Cincinnati office, announces the birth of a fine baby boy on November 11.

Walter Gemmill, representing the Baltimore office at Mt. Clare, has a 9-pound daughter, born December 27.

Edward Holmes, representing the Baltimore office at Mt. Clare, is the proud father of a bouncing boy, born on December 30, weight 10 pounds. "Very good, Eddie."

The accompanying pictures show: G. F. Hatch, chairman; R. B. Delaney, recorder; M. L. Swartz, topographer.

They comprise field party No. 5, working under the supervision of O. G. Wilbur, building pilot engineer.

The Mount Royal Tie-To Club

The afternoon of Christmas Eve was the occasion of a pleasant gathering in the office of the Superintendent of Timber Preservation, Mt. Royal Station.

At the suggestion of Miss Ruth Angier, daughter of F. J. Angier, superintendent of timber preservation, the young ladies entertained at a luncheon the entire membership of the department located at Mt. Royal.

After partaking of all the good things provided, speeches tending toward a better understanding of the work of the department and a mutual interest in each other's welfare, were made by Superintendent Angier and several others.

After due consideration of what might be accomplished by the uniting together into an organization, it was decided to form a club. Officers were elected as follows: F. J. Angier, superintendent, as president, and Miss Addie McCauley as secretary-treasurer. Committees were appointed to prepare by-laws and regulations. After a discussion concerning the name suitable to such an organization, it was decided to call it "The Mt. Royal Tie-To Club," thus briefly giving the location, the work of the department, and the hopes of cooperation.

The second meeting of the Tie-To Club was held on New Year's Eve, at which time all the members of the department gathered around the table spread with all sorts of good things provided for the occasion by the men of the department. Talks were given by the president and others regarding the aims and purposes of the Club. Harvey L. Meese, supervisor of tie distribution, was elected vice-president and Hartman Bright as publicity director. Decision was made that membership in the club be limited to the members of the Timber Preservation Department, located at Mt. Royal Station, and their immediate families. Meetings of the Club will be held hereafter at the call of the president.

We regret to have to announce the great loss suffered by our fellow-member and vice-president, Harvey L. Meese, in the loss by fire of his recently purchased home at Relay on January 4. The loss was complete, the family being unable to save anything.

Auditor Disbursements

Correspondent, JOHN C. SVEC

One of the young ladies of the Payroll Department has been seen wearing a very pretty ring, and on her left hand, too. It seems her fancy turns to the floor above, and they communicate their love notes by the Morse code, by hitting the pipes—an unusual accomplishment.

Some one said the Parkway movie is a fine place to tell secrets. Ask Miss Mary N. and Charles O.

Our little stenographer, Miss Anna, is seen quite frequently in the mail room. We often wonder if she uses so much stationery, or is it one of the mail clerks she is interested in?

Our friend David W. seems very partial to widows. We admire your taste, "Dave."

Auditor Merchandise Receipts

P. H. STARKLAUF, Correspondent

Sure, they all like a puff or two on the quiet, but why not think it over "safely" as to whether or not your surroundings are fireproof. If there is danger of a fire, don't imperil the lives of others for petty whims that could be stayed off for a while at least.

Bye Baby Bunting, Papa's gone a hunting, To get a rabbit skin to put his Lorienta in.

Yes, Lorienta is going bye-bye sometime in the future, as are Miss Strasburg of the Local Settlement and Miss Simmons of the Interline Settlement. This bye-bye outfit is not a single team affair, but pulls double.

A certain ambitious individual is seen paying strict attention morning and noontimes—from all appearances. "Ambition seems to be made of 'Sterner' stuff."

George Price, one of the Interline boys, sends greetings from the mountain tops of Sabillasville, where he is rustivating, and we hope the treatment there will benefit him.

"Hancock is the next stop!" and off gets Virginia, not to be met by her kinsfolk, but by Scott, two Alberts, Paul, etc., etc. (here my memory fails me, as I've mislaid the slip). Competition is keen even in a place like Hancock.

Now Virginia has some wonderful business associates:

Helen K. is a dance instructress and danced the old year out and the new year in until 6.30 a. m.—and mother wouldn't let her out the rest of the day.

Mary D. is another thrifty personage who runs a sewing machine as easily as she operates a typewriter, and from appearances she must be some little dressmaker. Good for her!

Helen S., a newcomer, quietly and smilingly busies herself with inbound tracers. She likes to dance as well as the other young ladies hereabouts, is an amateur actress and a member of a local troupe.

Bessy P., one of the belles of Belair Boulevard, is much annoyed at her troublesome beauty spot—it's a boil now.

Mabel C. quietly acknowledges high honors. We want to put our own little stars in a heaven of our own. So just twinkle, little Mabel Star, along with the big ones like Galli-Curci, Tetrassini, etc., etc. You are young yet, my little Miss, but with confidence and practice you'll get there.

Doris K. is the envy of the bright little corner where she shines in a way all her own. The indications are that she's going to shine in happier corners and be "A Wonderful Pal."

Let us forget, and we all ought to know it by now. To the movies with a five pound box of chocolates. Some party—maybe he's baritone, bass or just ordinary tenor. At any rate, he's a "Singer." Wouldst take a guess, Juanita B.?

Summing it up, one of our Stenographic Divisions seems singularly blessed with a variety of human nature and talent.

Local Settlement

Miss Eleanor P. Moulton and Mr. Paul J. Vincent were married at noon on December 28 by the Rev. Eugene S. Gwynn at St. Cecilia's Church, Walbrook.

Miss Georgia Baker, Statistical Bureau, and Elmer C. Nickles, Revision Division, were married in New York City on November 13.

Auditor Passenger Receipts

Correspondent, G. FRED MILLER

Secretary to Auditor

Just what might be expected when one of the modern inventions go wrong was experienced recently when a cable of the Telephone Company was put out of com-

mission, rendering telephones south of Baltimore Street out of service. Although a comparatively small defect in a great system, it caused inconvenience and loss of time, and in a manner we of the Annex Building were isolated; that day we had a little town all our own, getting in touch with the outside world at lunch time. There are cities with fewer inhabitants than there are employees in our Annex Building.

Accidents of this character have the same result: discomfort, delay in work and loss of time and efficiency, and these things bring about added expense.

This mishap makes one wonder what would be the result if the railroads did not run for one day only. It is hard to realize what would happen. It would mean the loss of thousands upon thousands of dollars, and cause untold hardships and suffering among the people in many ways. To avoid these occurrences we must always be on the alert to detect the slightest disarrangement in our system, as it is the small things which enlarge and cause the trouble. The smallest kind of a crevice in the wall of a dam usually results in a disaster if not detected in time. Our motto will be "Always on the Job," and in this manner we will be doing our bit towards keeping our railroad system intact.

I'll say we had a good time, you'll say we had a good time, and everybody at our last dance, given on December 10, at Walbrook Hall, will say we had a good time, and if I was a cussin' man I'd say we had a—well, you know what kind of a time.

Our assistant auditor and the chief clerk graced the dance with their presence, and from all appearances thoroughly enjoyed themselves. The floor was perfect for dancing with just the right number of persons dancing to make it enjoyable. Someone with better knowledge of the English language, and with adjectives in abundance, must describe the music. Oh, what music! the jazziest sort of jazz, and the dreamiest sort of waltzes; the musicians were extremely liberal in giving encore after encore. Did you see the little drummer boy? Talk about the "Spirit of Seventy-six!"

After the favors were distributed, and we placed our funny little hats on our heads, and tooted our little horns, you would have thought we had been granted another 20 per cent. increase.

Our fine friend Billmeyer, with his genial wife, could not be present. After convincing the judge on previous occasions that he would be unable to serve on a jury, the law succeeded in getting him just at the time of the month when we held the dance, and while we were dancing "Bill" and 11 others were locked in a nice little room trying to decide whether they should hang a man or present him with a Carnegie Medal. Better luck the next time, "Bill."

Did anyone notice what happened during the moonlight dances? I've heard several rumors, but I must have proof. Just as the music had ceased at the end of a perfect waltz, little Price Aler had succeeded in blowing his red balloon to its fullest capacity, and with a big broad grin upon his countenance held it forth for the inspection of his friends. In a moment the expression on his face had changed to one of astonishment, something had happened, his balloon was no more, it just "busted," and almost knocked him off his feet.

The young Chevalier from out of Washington, D. C., was again with us, and we almost feel as though we know him real well now; and a party wouldn't be a party without Mr. and Mrs. Evans. A new name has been discovered for the "Paul Jones" dance, namely, "Married Men's Delight."

Pen shots at basketball players at Pier 22, N. Y.

Carl and "Gus," the two Frenchmen, gave an exhibition of all the latest dances, and of which some will never be attempted by others, they require so much grace and daring.

To tell the story briefly, it was a pretty night, a jolly crowd, splendid music, and plenty of refreshments, and it is easy to see that chocolate cake rules a favorite with the ladies. Now for the next big time.

Recently someone in Baltimore endeavored to organize a Russian Society, probably to take the place of the old organization "Rushing the Can Society," which last summer was disorganized by General Volstead.

Word has been passed down the line to the effect that we should save our quarters; they say "Pat" of Reisterstown has invested in a handsome pearl necklace. What's that about "all flopping sooner or later?"

Miss Louise Le Compte stole a march on her friends of the office by slipping out to Chicago to be married, and then on to Milwaukee. Miss Louise married Mr. M. W. McBurney, who some years ago was a member of the A. P. R. force, and who served as a lieutenant in Uncle Sam's Army during the recent World War. Accept our good wishes for a happy future, Mr. and Mrs. McBurney.

An entirely voluntary offering by the clerks of this office netted \$73.20 for the 12 Opportunities listed in the Baltimore News. No appeal was made for the contribution, but it simply came as an act of generosity by the employees. Helping the 12 Opportunities is one of the pleasures we look forward to each Christmas.

In exchanging Christmas presents in the future I would recommend the "boomerang" gift, in other words, one that is sure to return. Good "Pap" Rogers was the possessor of a genuine French poodle (which looked more like a German noodle), about four feet long. This quaint animal he presented with Christmas greetings to someone we all know, collar, chain and good will. Our little friend graciously accepted the gift, and backing off the front porch called to the poodle to follow. He did, minus the collar and chain which remained in the hands of "Pap," who had been holding him; so you see he had part of the gift back at the very start. Our little friend reach home in safety, and after hanging up her little stocking for Santa Claus to fill, took her little pup to bed. In the morning the pup had disappeared, and after a thorough search had been made

"Pap" was called in conference. It developed the French poodle had turned into

J. P. Nevins, alias "Musty Supher," comedian of the westbound department, Pier 22

a bloodhound and found his way back to his former home. "Pap" said he was sure the dog would grieve himself to death if sent away again, therefore he had better keep him. Moral: "Give a Christmas gift that can walk back home."

The office folks were surprised to find a pretty little Christmas tree awaiting them as they entered on December 24. It is surprising how much good is the result of so little trouble. At 1 o'clock we had our little entertainment; first a beautiful Christmas carol, then talks by Mr. Poumairat, Mr. Grice, Mr. Jentner and Mr. Machin of the A. P. R. office committee, then another carol, and handshaking and good wishes were then in order. I hope our whole New Year will be as bright as the Christmas tree made us feel on December 24.

Pier 22, North River, N. Y.

Correspondent, FRANK A. J. MANTHEY

Can't we eliminate waste and inefficiency and give an equal exchange in effort and application for value received this year? By doing this we will be aiding ourselves as well as our employers, and thus make the readjustment period one of progress.

Anna Gneiting, Accounting Department, is sporting a solitaire.

Frank Cappoch, Mr. Olson's department, has returned after a successful operation. Here is to your health, Frank!

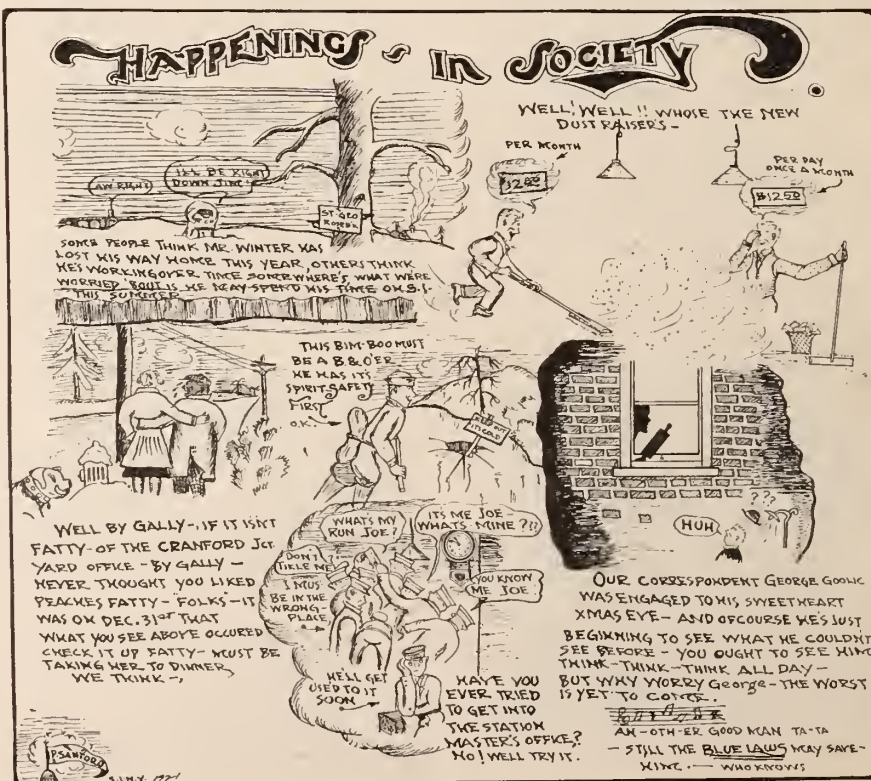

The following caption was received with a communication in the Claim Department from a claimant:

"The sweetest words of human speech Are not 'I love you,' as some men preach. There is another sweeter phrase, by heck, Which says to me 'Enclosed find Check.'"

It is the desire of the correspondent to secure from department heads such information as would be interesting in the MAGAZINE. Cooperation will be appreciated.

The following is from "Kop" at Pier 21, East River.

The basketball team of Pier 21, East

River, known as the PIER TWENTY-ONE PEERS, wish to challenge any team on the System. As yet they have been undefeated, numbering among their victims the Fulton Fish Five and the Tarrytown Trippers.

The line-up consists of "Joe" Cravin, who rarely misses a basket or a highball; "Bill" Moran, the "Babe" Ruth of basketball, who has always caged his fowls; "Mike" Maxwell, the undisputed heavyweight guard (they don't come big enough to dispute him); John Reilly, who knows more about a court than a judge does, and "Jimmy" Shaw, who has been known to hold his man down to only one basket without the use of a strangle-hold.

Address all communications to "Mike" Maxwell, manager of the Pier 21 Peers.

He: If a man having \$500 dies and leaves you \$200, how much would he have left?
She: \$300 of course.
He: Wrong. He would have left \$200.

Our basketball team would like to meet some "scrub" team that they can clean up.

Correspondent, G. F. GOOLIC

G. J. Goolic, assistant chief clerk to division engineer, announced his engagement to Miss Madelyn Cannon, of Fort Wadsworth, on Christmas Eve, thus surprising a great many of his friends, who thought he was a confirmed "batch." Congratulations, George!

It is rumored that George O'Regan, Car Accountant's office, Pier 6, occupied the front row in the "Palace," better known as the Bald-Headed Row, and while there attracted the eye of a beautiful actress. It looks as though it has developed into a serious proposition. Good luck, George!

Miss Lillian Breidenback, clerk, Car Accountant's office, has returned to duty after a serious illness. It's good to see you around the office again, Lillian.

We have the pleasure of announcing the engagement of Miss Edith O'Mara, clerk, Car Accountant's office.

Miss May McBreen, Division Accountant's office, flashed a diamond (on the left hand) before our eyes just a few days before Christmas. Who's the lucky man? Why, "Bill" Lynch! Best wishes, May!

H. P. Hahn, Cost Department, Baltimore, is now located in the Division Engineer's office temporarily, and appears satisfied with his new quarters.

St. George Yard Office

Assistant Yardmaster F. Holden has become very studious of late. Possibly he has been affected by the auto craze.

Our general westbound clerk, "Judge" Koenig, has been very much annoyed owing to the various titles bestowed upon him. He particularly objects to the title of "Barney Google," so please do not use this mode of address to the "Judge" in the future.

Heard in and about the Master Mechanic's office—"Pete, how about the 1240's?"

We extend our sympathy to Road Foreman McCaffrey in the death of his father-in-law, Edward Cockshute, engineer, engine No. 12.

E. W. Todd smokes the pipe of peace when he finds your tariffs are in perfect order

Left to right: Signal Repairman W. S. Coulbourne, Electrician J. Morris, Apprentice Helper E. J. Haslam

Eugene McCann, the "Beau Brummell" of the Master Mechanic's office, has made recent purchases of a new tie, shoes, etc. Some speed!

WANTED—One piece of soap; second-hand will be accepted. Deliver to D. A.'s office.

A young gentleman in the Engineering Department resolved not to swear in 1921, but someone happened to enter our lawyer's office one day and caught him swearing before a Notary Public.

We want to introduce our new stove cleaner, "Smitty," as they call him at Cranford Junction. On December 31, the stove in the Yard office at Cranford wouldn't draw well; it evidently had been choked up with soot. "Smitty" stepped to the front and removed the elbow from the stove pipe. That was enough!

After several attempts by a number of persons, the stove was finally fixed up by "Christmas," track foreman of Section No. 7.

New Year Resolutions

F. H. C.—To stop smoking cigarettes (other peoples').

G. W. C.—To work (occasionally).

J. H. R.—To keep supplied with matches and tobacco.

L. M. H.—To put my files where I can find them

E. E. M.—To have cigarettes on days other than pay day.

Miss K. T. Driscoll, Agent's office, Curtis Bay, has resigned. We are sorry to see Miss Driscoll leave, but wish her much success in her new undertaking.

With much regret we note the death of Engineer Wilton Simms, on December 30. He had been in the service for 34 years and was an engineer in the Hopper Yard, Locust Point. We extend our deepest sympathy to his family.

W. R. Gunning, timekeeper, Master Mechanic's office, reported for work the other day wearing glasses. Recently Gunning announced his determination of being married. I hope he did not injure his eyesight looking for a bride.

Miss Anna Stump, work checker, Master Mechanic's office, expects to change her name to Wroten on February 27. Best wishes, Anna!

Boiler Clerk Higdon recently had his heart smashed. He now has a ring that he doesn't know what to do with. Honestly, he will sell it cheap. No more Barclay Street for John.

Chief Clerk G. R. Merryman, who is planning a secret trip to South America in order to attend a public auction of a million dollars worth of liquor, has just received word that his partner, "Pat" Tunney, one of the leading auctioneers, has been captured by the dry law agents.

Reba Cohen, stenographer, Master Mechanic's office, believes in working late. Somebody saw her going home at 1.00 a.m.

Our well-known Assistant Chief Clerk Carter and Trainmaster Hoddinott were advised recently that they would have to appear in the Traffic Court. It must have been some joy ride.

As is generally known by the residents of Relay and that vicinity and by employees of the Timber Preservation Department, the home at Relay of H. L. Meese, supervisor of tie distribution, and almost its entire contents were destroyed by fire on Tuesday, January 4.

Mr. Meese has asked that acknowledgment be made in this place for the many expressions of sympathy he received from his railroad friends and acquaintances, also for the proffers of help to him and his family during the emergency.

He and his family are comfortably situated now in another home in Relay and he

expects to rebuild on the site of his old home at an early date.

There may be some of the employees of the Baltimore Terminal who do not know of the free concerts given each Sunday afternoon at the city's Recreation Pier at the foot of Broadway. These are well worth while attending, the character of the music being inspiring and uplifting as well as entertaining. The work is in charge of the Children's Playground Association of Baltimore and its efforts to provide helpful recreation on Sunday should not go unappreciated.

It is said that those who have heard these concerts have found them so thoroughly enjoyable that they have become regular attendants. In these days when the Blue Laws, Sabbath Observance, and other kindred subjects are being so widely discussed, it is interesting to find that the city has provided the way to an hour or two of recreation on Sunday which cannot offend the principles even of those who are in the forefront of the defenders of Sabbath observance.

The program for the Sunday afternoons of February follow:

February 13—Choir of St. Pius' Catholic Church, Miss Agnes Zimmisch, Director.

February 20—Euphonia Club (Brass Choir), Mr. Herbert E. Barnes, Director.

February 27—Choir of St. Michael and All Angels P. E. Church, Mr. G. Thompson Williams, Director.

Agent's Office, Camden Station

Correspondent, W. H. BULL

Charles Edward Thorney, city passenger agent, Washington, D. C., was the recipient of a fine shot gun, presented by his father-in-law, Charles H. Waltz, cashier, Camden. Mr. Thorney is an expert marksman, having qualified under Chief Gunner Haskell of the Coast Guard during the war.

Through the courtesy of Mr. Harrison, religious worker for the Y. M. C. A., "Shop Talks" have been held in the men's

Some of the Camden Station employees of 1883

"Sam" Warrenton doesn't hide his money in his wooden leg any more. We heard him tell the dispatcher in DO office that after a conference with his wife he made up his mind NOT TO

lunch room during the lunch hour by noted speakers of our city. Among other features is community singing by the men under the direction of Attorney Oregon Milton Dennis. Mrs. Earle Moberly is the organist.

Noon hour on December 22 was a decided musical event, when the following persons participated in the entertainment:

Mrs. John Bailey, soprano; Mrs. Earle Moberly, contralto; E. M. Thomas, tenor; Charles Pettis, piano accordion.

Mr. Pettis, who is a blind soldier from Evergreen, rendered many pleasing selections.

These meetings will be continued on Wednesday of each week during the lunch hour until further notice. John M. Green, assistant general foreman, is chairman of the meetings.

The accompanying photograph, showing some of our "oldtimers" in the Camden Outbound Billing Force, was taken at Camden Station in 1883. They are, left to right:

Top row—George Hoover, James Fletcher, John Medinger, John Nesbit, George McBee, Andrew J. Muncks, Boulden, Charles Peddicord.

Middle row—Wardin Markland, W. W. Ruth, Harry Wells, John Henshaw, "Jack" O'Donnell, W. O. Anderson, George Henkel, Thomas E. Bull, Frank Valiant.

Bottom row—George Chesley, John Gehart, cashier, A. J. Fairbanks, general agent, J. R. Fairbanks, Harry Spurrier and Bruce Southerland.

Mount Clare Shops

Correspondent, MISS MOLLIE ALBRECHT
Secretary to Superintendent

Superintendent of Shops

Mrs. G. Milton Keirn (formerly Miss Helen Davis, clerk, Mt. Clare), wishes me to express to all the locomotive foremen and to all of her friends at Mt. Clare, her appreciation for the lovely presents sent her. (Several of the young ladies at Mt. Clare visited Mrs. Keirn, and wish to state that she certainly is SOME COOK!)

Stores Department

This bit of poetry brings to mind the climax of the meeting of our former chief clerk, Harry E. Litchfield (now storekeeper

at Brunswick) and Miss Lida E. Oliver, Stores Department, Mt. Clare. This couple were united on Saturday, January 29. We extend our best wishes, and trust their future will be one of great happiness.

The Way They Met By Mrs. J. C. German

There was a wedding gay,
In April, and the day
Will always be so sweet
For two, who chanced to meet.

Love was in the air,
Romance everywhere,
Little did they know
Cupid held the bow.

Learn Piano!

This Interesting Free Book shows how you can become a skilled player of piano or organ in your own home, at one-quarter usual cost. Dr. Quinn's famous Written Method is endorsed by leading musicians and heads of State Conservatories. Successful 25 years, play chords at once and complete piece in every key with 4 lessons. Scientific yet easy to understand. Fully illustrated. For beginners or teachers, old or young. All music free. Diploma granted. Write today for 64-page free book, "How to Learn Piano or Organ." M. L. Quinn Conservatory, Studio D, Rt. 598 Columbia Rd., Boston, 25, Mass.

He aimed at both of them;
And shot an arrow, then,
Smiling, crept away.
Oh, wondrous wedding day!

Since that day, oh, my!
Each has wondered why

Hamilton Watch

"The Railroad Timekeeper of America"

What King Albert Learned from an American Engineer

King Albert of Belgium—he is in the cab window—rode on the Twentieth Century Limited engine between Toledo and Elkhart. He inspected the mechanism; he learned the method by which the engine while in motion scooped water; he sat in the engineer's seat and ran the engine.

As they approached Elkhart, Engineer J. A. Lux—he is in the gangway—pulled out his watch. His Majesty consulted his, and they compared time. After one look, "What watch do you carry?" asked King Albert. "A Hamilton," answered Lux. "Is it a good one?" inquired His Majesty. "Well, I've run trains by it for 25 years," said Engineer J. A. Lux.

King Albert put away his watch. Before leaving America, he bought a Hamilton.

It's their accuracy that makes Hamiltons the choice of a practical king and the favorite timepieces of American railroad men.

When you buy, ask for the Hamilton model most popular with railroad men, particularly No. 992 (16 size, 21 jewels). Hamilton Watches range in price from \$40 to \$200; movements alone, \$22 (in Canada, \$27) and up. Write us for "The Timekeeper," which shows how fine watches are made and tells how to take care of them. The different Hamiltons are described and prices given.

HAMILTON WATCH COMPANY

Lancaster, Pennsylvania

Love doth play a part
In man's and maiden's heart.

Just give them little time,
And then I know you'll find,
That Cupid in a lark
Made an everlasting mark.

When the bells ring clear,
To those who gather near,
Listen while they tell
"L. E. O." and "H. E. L."

Baltimore Division

Correspondent, W. H. TARR, *Superintendent's Office*, Camden Station

The Divisional Safety Committee convened on January 12 at the Y. M. C. A., Riverside, with the new members of the Rotating Committee for the first half of 1921 present. Following are the new members:

D. M. FISHER.....	Agent, Washington, D. C.
E. L. SHIPLEY.....	Operator, Watersville, Junction
G. A. NORRIS.....	Water Station Foreman, Baltimore
G. RICHARDS.....	Engineer, Riverside
W. C. DUVALL.....	Engineer, Riverside
C. W. GOSS.....	Fireman, Riverside
W. M. TIMMONS.....	Passenger Conductor, Camden
W. C. MITCHELL.....	Passenger Brakeman, Camden
W. H. TAYMAN.....	Brakeman, Riverside
E. D. SANDBORN.....	Operator, Newark
H. H. MITCHELL.....	Signal Maintainer, Wilmington
EDWARD MILLER.....	Carpenter, Wilmington
J. M. HANSON.....	Engineer, East Side
E. O. LARIMER.....	Engineer, Riverside
D. C. BLACKISTON.....	Fireman, Riverside
A. H. SHAWVER.....	Fireman, Riverside
S. L. MCCUSH.....	Passenger Conductor, Philadelphia
W. W. FRANCIS.....	Passenger Brakeman, Camden
F. C. MARTIN.....	Brakeman, East Side
C. F. GANNON.....	Conductor, Riverside
G. W. CHARSHREE.....	Conductor, Bay View

The handling of troop trains in connection with the establishment of an army corps at Camp Meade brings to the division something of its former war-time activities.

Our friend "Joe" Benick, Car Distributing Force, figured on blowing his horn during the coming inaugural procession, but from the recent reports it seems all bets are off.

The ladies of the Division Engineer's office inform your correspondent that Davis Aylesworth, file clerk, receives orders for candy but rarely delivers. We will leave it to the girls to tell us where the joke is.

W. M. Heinbaugh, clerk, Division Accountant's office, is now the proud possessor of an 8-pound girl.

Wilmington, Del.

Correspondent, CHARLES W. HAMILTON

A "get-together" social was given by the Baltimore and Ohio freight office force on the evening of December 30, at the freight office. Music, singing and dancing were participated in, and luncheon served.

The rooms were tastefully decorated for the occasion by the women. Thanks is extended to the Stieff Piano Company, the Fisher Undertaking Company and the J. S. Lowe Transfer Company for the use of a piano, chairs and the hauling of same. Music was furnished by local talent from the forces.

All present expressed themselves as having had an enjoyable evening, and it is hoped that the action taken by the merry-makers will be conducive of much good in furtherance of not only social, but business relations between the roads of Wilmington. It is anticipated by Freight Agent White that all forces in the city will at some future date be able to get together, in all lines of work, so that hearty cooperation may be expected, and this no doubt will result in a closer relationship by those handling the business end of the railroads.

Among those present were, from the Pennsylvania Railroad:

F. J. Vasey, freight agent, Wilmington;
J. E. Evans, freight agent, Montchanin;

Samuel Green, chief clerk; William Sawyer, clerk; Millard Pettitcord; Frederick Kendall, Richard Kendall, Mrs. Jennie Wright, Mrs. Margaret Frysinger, Miss Alice Monahan, Miss Katherine Collins, Miss Ruth Merrick, Miss Katherine August, Mrs. J. E. Evans, Mr. and Mrs. Harry Pierce, Mr. and Mrs. Robert Gray, Mrs. Samuel Green.

From the Baltimore and Ohio:

A. D. White, freight agent; J. O. Lambson, cashier; Charles W. Hamilton, assistant cashier; Martin J. Lawless, Lawrence Wel-din, Mrs. Genevieve Knoth, Miss Hannah Crumlish, Miss Catherine McNalley, Miss Ethel Fisher, Miss Martina Carroll, Mrs. C. W. Hamilton, Pier 22, Philadelphia; Ralph Densmore, yard office, Wilmers; George W. Bumpas, district freight agent; Miss Mary Freeburg, Mrs. George W. Bumpas, Miss Francis Tollins, Edward Knoth, Harry Grant, John Gallagher.

Washington, D. C., Freight Station

Correspondent, W. L. WHITING, *Chief Clerk*

"The best laid plans of mice and men gang aft aglee!"

The feverish, exciting, busy hum of expectation is all over. The plans for Courts of Honor, grand stands, profuse entertainment of out of town guests, and great doings and fun galore generally, are in a moment all knocked galley-wise.

President-elect Harding has issued a manifesto that this is not the time for a lavish expenditure of hard-earned money—there being so many places in which that money could be used to the benefit of suffering humanity—and has decided that he will be inducted into office in a truly old-style Jeffersonian simplicity.

There will be many who will be disappointed at the decision of Mr. Harding, but a little thought will show the wisdom of his action.

We shall certainly have a much more quiet, peaceful time at the New York and Florida Avenue Freight Station than has been customary at inauguration times. Our yards will not have the appearance of a military camping ground, and our offices will not impress visitors with the idea that they have by mistake walked into an arsenal, with stacks of rifles in all available corners.

Yet, Washington will still be the Mecca of thousands of tourists who will come to hear the "Inaugural" and to see the beauties of the Capital City. This all brings "Grist to the Mill" of the transportation companies, and the good old Baltimore and Ohio is getting, and will continue to get, its full share of the travel.

The writer has had occasion to talk with a number of Washingtonians who have been in the habit of using the trains of other companies when traveling to and from this city, and some of them have been persuaded to try the Baltimore and Ohio once. The result was that on their return they were full of praise for the accommodations that were provided them and decided that whenever possible it would be "Baltimore and Ohio" in the future.

We have had some sickness this winter, but it is a pleasure to report that at the present time none of our force is ill at home. Let us hope that this condition will last for a long time.

Cumberland Division

Correspondents

E. C. DRAWBAUGH, *Division Operator*
R. G. ALLAMONG, *Secretary, Y. M. C. A.*
RUTH M. CHEUVONT, *Office, Mechanical Engineer*
JOHN SELL, *L. P. Clerk, Superintendent's Office*

For several days during the first of the month a business inspection trip was conducted over the division, including all stations on the main line and branches. The party was composed of W. F. Richardson, general freight agent; W. I. Bishop, industrial agent; C. W. Van Horn, superintendent, and other division officials. Stops were made at all stations and in addition to the inspection, a large number of shippers were called on. The trip is expected to result in much benefit, not only to the Company, but to the shippers as well, as the various conferences resulted in a closer relationship between the Company and its patrons.

V. N. Carrico, formerly night chief train dispatcher, has been promoted to assistant trainmaster, west end Cumberland Division, with headquarters at Rowlesburg.

Recent inspection indicates that the campaign under the slogan "Cut Loss and Damage in Half," is resulting in much good. It is found that considerable improvement has resulted by a closer inspection on the part of agents to know that shipments are properly marked and crated before accepting and forwarding. Astray and damaged shipments are being reported promptly to C. C. Landis, Cumberland, which permits of astray articles being matched up and damaged freight handled more economically and promptly.

The death of our former superintendent, J. W. Deneen, has been fully reported in the MAGAZINE, yet we cannot fail to express here the sorrow of his many friends and fellow employees of our own division. While Mr. Deneen had been ill since early Spring, word had been received from time to time that his condition was improving and our fond hopes of soon seeing him back on the job were shattered with the sudden news. While volumes could be written on his life's work, his unswerving and absolute loyalty to the Baltimore and Ohio as well as true fidelity at all times manifested in his home, we pass this on as recorded in the Good Book and commend his soul to his Maker.

The accompanying picture is of one of our Cumberland Division veteran employees, William S. Wright. It was snapped with his grandson, Lee Fuller, age seven years, in the garden by his home, and shows Mr. Wright in every day life. Mr. Wright was born on June 13, 1850, and started work in the old Baltimore and Ohio Rolling

William S. Wright

Former employe of old Baltimore and Ohio Rolling Mill, and still in service. With him is his grandson, Lee Wright

Mr. Clark

Mill in May, 1871, being transferred to Maintenance of Way Department as carpenter upon close of mill. In 1900 he was transferred to the Signal Department, where he is still in active service. We hope to have Mr. Wright with us for many more years.

V. N. Carrico, night chief dispatcher, Cumberland, has been promoted to position of assistant trainmaster with headquarters at M. & K. Junction, W. Va. We are glad to see "Graney" going up the ladder, as well as our old friend, J. L. Mathews, trick dispatcher, who succeeds Mr. Carrico. H. E. Flook, who saw service in France as an aviator, has been made trick dispatcher. "Hairbreadth Harry," as we know him, won distinction on the battlefield and we know can acquit himself with credit wherever he goes. We wish him continued success.

Travelers passing through Cumberland have often commented on the cleanly appearance of the station and the Queen City pavement; this is brought about by the untiring efforts of Station Cleaner Price, who takes great pride in the station and its surroundings.

The sand shipments from Hancock during the month of December broke all records. The shipments of white sand from this district, which is used to manufacture high grade glass, are steadily increasing, and gives us a good westbound tonnage movement.

Weighmaster J. H. Fike, who was a star pitcher for the Cumberland Division baseball team, and who made quite a success with the Baltimore Orioles last season, has again signed up for 1921. Our own manager, McGinn, says he has no doubt that "Lefty" will continue to make good and we assure you he has the support of all the boys at home.

The coal business through Cumberland for some time past has been quite heavy, there being nearly 1,000 cars weighed on the Cumberland scales every day. Coal Billing Agent Beggs, who has charge of our scales, never becomes ruffled. He says "The more the merrier."

Shortly after the holidays, a carload of Florida oranges and grape fruit was put on sale on the team track at Cumberland at a reasonable price. Quite a few of our fellow employees suddenly acquired a great appetite for these delicacies.

Leap year is now over and we still have our famous yard clerk, Raymond H. Goss, better known as "Satch," whistling the

same old tune, somewhat out of date, entitled, "Gee, I wish I had my old girl back again." We feel sorry for him and wish him better luck next time.

Here is a good likeness of one of our best known veterans on the division, Robert C. Clark of Martinsburg. Mr. Clark entered the service at Sir Johns Run in 1876 and pumped water at that point for 35 consecutive years, then went to Magnolia in a like capacity to remain for six years. For the last three years he has been pumping at Martinsburg. In the service 44 years without a break, an absolutely clean record, and of a man it is a pleasure to meet at any time. This photograph was snapped by the writer near the pump house at Magnolia, and shows "Bob" in all his glory, working for the Baltimore and Ohio. Mr. Clark is seldom absent from his post. It is interesting to listen to the tales of railroading in times past as he tells them; officers as well as men from every department on the division always grasp the pleasure when the opportunity affords to spend some time with "Bob," who is well informed and can talk on any subject. We congratulate you, "Bob," both on your record and on the position you hold in all our hearts. May we have the pleasure of your company for many years to come.

"Uncle John" Deneen, first trick leverman, Viaduct Junction, is ill at his home. We wish him a speedy recovery.

Wilbur Hardy, foreman, Section 27, has moved his tool box to Frederick Street. This means business around there.

John Jones has been transferred from the carpenter squad to trackwalker in the yards.

Wilbur Hardy presented P. M. Pennington, crossing watchman, with a bunch of waste as a Christmas present. However, the gift was not made until January 7. Wilbur said, "Better late than never," but Charles Cotton was heard to remark, "Better never late."

T. E. Grindell, chief shop clerk, has been wearing a worried look lately but we know his troubles are all little ones, and when they are cutting teeth at night they are bound to keep him awake.

Miss Margaret Miller, office girl, Superintendent's office, was recently promoted to tonnage clerk.

Assistant Trainmaster C. M. Gearhart is wearing a smile now that won't come off, 'cause the fruit season is over and winter apples about moved. "Cad" had quite a job providing enough freezers and ice for the several hundred cars of peaches and apples shipped out of this belt during the past season.

R. W. Mellinger, general clerk, who handles personal injury reports and passes, states it affords him more pleasure to write passes than the injury reports. "Bob" is an advocate of Safety First, and practices what he preaches. A short while ago he prevented a near accident to a pedestrian near Baltimore Street Crossing. This is good work, "Bob," keep them off the track.

Our old friend, Burr Flagg, agent North Mountain, W. Va., is taking a month's vacation visiting relatives in California. Burr has been in the service for a long time and says this is the first real vacation he has ever tackled. He promises to send the boys some real California oranges. Hope he doesn't keep us waiting.

Colonel H. A. Allison, who has been chief interchange inspector at W. M. Connection

for a number of years, was recently promoted to chief joint inspector, Cumberland. Mr. Allison is well known among the boys all over the division as a poet. We have asked the Colonel to contribute some of his verse and the readers may look to a real treat in the near future.

Martinsburg Shops.

Correspondent, W. L. STEPHENS

Extended notice of the death of Mr. Marshall will be found elsewhere in this issue of the MAGAZINE.

The Shop Safety Committee for 1921 has been elected and organized with the following personnel: M. S. McDonald, car man; R. Russler, machinist; W. N. Keedy, machinist; W. C. Hill, blacksmith; G. S. Holliday, carpenter, and R. T. Banks, yard laborer. May the old adage "A new broom sweeps clean" hold good in this case of our committee. With the cooperation of all, may they reduce injuries and do away with carelessness.

David M. Kief, helper, bridge shop, and Miss Viola L. Snyder were married in this city on December 22 at the parsonage of Trinity M. E. Church, by Rev. J. R. Jacobs. "Dave" and his bride spent a pleasant honeymoon with Mrs. Kief's relatives at Middlefield, Ohio. The josh of the boys rolled from this smiling benedict like water off a duck's back. Mr. and Mrs. Kief are housekeeping in their new home on South Winchester Avenue.

Death has saddened the homes of several employees of the Cumberland Division:

Mr. and Mrs. Edward Butts, 510 West Race St., Martinsburg, suffered the loss of a two months old son.

James Raymond, seven months old son of Mr. and Mrs. R. A. Bowers, 136 East Liberty Street, died of pneumonia. The father is a machinist in the local shops. Our sympathy is extended to the stricken parents.

A good likeness, this, of the seven months old son of Brakeman George Penn. George is justly proud of the fine youngster. May he grow to be as fine a man as his dad.

George Theodore Penn
Seven months old, who's going to be a brakeman
like his daddy, George Penn, Sr.

N. S. Edwards, foreman, hand car shop,
[Martinsburg]

The accompanying cut is of Newton S. Edwards, the hustling foreman of the Hand Car Shop. "Newt" can boast of the distinction of having been on the job every day the Shops ran in 1920. This of itself is a good record and one that gets results. He has been in the service of the Company for over 20 years. For a time he was located in Keyser, W. Va., later coming to Martinsburg Shops. May he have many more years of usefulness on the Baltimore and Ohio.

John W. Light, age 62 years, a veteran employe, died at his home in Paw Paw, W. Va., after an illness of several weeks of pneumonia. Mr. Light had been in the employe of this Company for 39 years and had a splendid service record. He was a member of the Martinsburg Association of Baltimore and Ohio Veterans. A delegation of fellow Veterans attended the funeral.

Mrs. Edna Burke, age 24 years, wife of Robert Burke, motive power employe, died very suddenly of acute indigestion. The young matron was ill only a few minutes before death ensued. The husband and a small son survive.

Charles Henry Wilson, fireman, and Miss Susan Van Renseler Smith of Shenandoah Junction, were married at the bride's home on January 1. After a wedding supper the young couple boarded No. 16 for a trip to eastern cities.

Ernest C. Lock, a Baltimore and Ohio employe at Cumbo, and Miss Beatrice Rodgers were married in this city. The wedding was very quiet, only a few friends of the contracting parties being in attendance. The newlyweds left Martinsburg on No. 15 for a wedding trip to Pittsburgh and Cleveland.

Timber Preserving Plant

Correspondent, E. E. ALEXANDER

Have you started the New Year safe?

The Superintendent of Timber Preservation has set a high standard for the plant for 1921; much higher than previous years, and we intend to reach it.

Plant employes maintained their reputation, earned during the Liberty Bond drives, Red Cross and other campaigns, by making a Christmas gift of \$70.00 to the local church.

We are glad to learn of the election of our State Governor, Hon. John J. Cornwell, to the Board of Directors of the Baltimore and Ohio, and we are proud that we can say "We know him."

The keynote of the success of the Charleston Division in the recent No-Accident Campaign, from Aunt Mary's article in

December MAGAZINE (see page 42), was, to our minds, Education and Cooperation, carried on through the ministers, the High School, Rotary Club, moving picture theatres, staff officers, and each railroad man.

Harl Cosner, tieman, and Miss Pearl Susan Shanholtz, daughter of Mr. and Mrs. Britton Shanholtz, Donaldson, W. Va., were quietly married at the M. E. Parsonage, Cumberland, December 23, by Rev. H. L. Schlinke. They left that city on the same evening for Washington, D. C. Returning on Christmas day, a beautiful wedding dinner was served them at the home of the bride's parents. Among those present were Rev. and Mrs. Z. J. Powers and family, Mr. and Mrs. C. E. Shanholtz, Mrs. G. E. Cosner and daughters, Mr. and Mrs. Wilbur Shanholtz, and Mr. and Mrs. C. C. Cosner.

Mr. and Mrs. E. E. Alexander left on January 13 to attend the American Wood Preservers' and Tie Producers' Convention in San Francisco.

Janitor and Mrs. W. D. Foley announce the birth of a daughter, Miss Ruth Maxine, on January 7, and weighing 11 pounds. Some baby!

M. M. Rabourn, formerly superintendent T. J. Moss Tie Co., Mt. Vernon, Ill., has been appointed treating inspector at the plant.

Henry Leonard, a Cumberland yard brakeman living at Green Spring, lost an infant son on January 5. Death was due to pneumonia. The little one was laid to rest in one of the Cumberland cemeteries.

The death of little Mary Fishels, three year old daughter of Trackman and Mrs. Jacob Fishels, of pneumonia on January 8, is also reported. The funeral was held on January 10, at Levels, W. Va.

That death has been taking his toll among the old veterans in this vicinity has been shown in our items. Now another, the last of a once well-known crew here, has joined his comrades in the Great Beyond.

Samuel E. Smith, son of Jacob Smith, was born March 2, 1851, and entered service of the Baltimore and Ohio in 1879. He married Miss Cynthia E. Crabtree of Oldtown on November 2, 1885. After 36 years of service, he was retired in 1915. He died on January 6, of rheumatism. Funeral at Forest Glen in charge of his pastor, Rev. J. L. Thomas.

Mr. Smith united with the M. E. Church at Oldtown over 45 years ago, and though sorely afflicted since his retirement, was always cheerful and said he was ready whenever the Master called.

May we add a tribute to the memory of former Superintendent John Wiley Deneen. A man among men: we, too, knew and loved him, and were deeply grieved at his death.

To his loved ones, while extending our heartfelt sympathy, we can but say "mortal sympathy brings small comfort in the hour of such real sorrow. May God sustain them."

We also regret to learn of the death of Harry A. Marshall, superintendent of shops, Martinsburg, W. Va. We have known him through connection in railroad work. His loss will also be greatly felt.

"Army of the United States of America. To all who shall see these presents, Greeting. This is to certify that Authur C. Bean, Private Battery B, 313 F. A., died with Honor in the service of his country the 10th day of October, 1918.

"Given at Washington, D. C., office of the Adjutant General of the Army, this 24th day of January, 1919.

(Signed) A. W. ROBERTSON,
Adjutant General."

This tells the story of a former employe and is a cherished possession of Mr. and Mrs. Joseph M. Bean, parents of Arthur Clifton Bean, whose remains reached his home here January 11, this year, with its last interment in Indian Mound Cemetery, Romney, W. Va., January 12. The services were in charge of Rev. L. C. Bridges, Ridgely, W. Va., the American Legion Post of Romney attending. The pallbearers—all World War Veterans and employes of the plant—were: J. R. Myerly, J. C. Alexander, F. A. Sebold, C. C. Ricewick, Harl Cosner and B. F. Reed.

Arthur was born at Fabia P. O., Hardy County, W. Va., on November 10, 1889. He first entered the service of the Company on February 19, 1913. After leaving the service for a short time, he re-entered and remained until furloughed for military service, August 31, 1917.

"He heard humanity's clear call,
And knew the voice divine;
He gave his life, he gave his all,
In deadly battle line,
The silent stars in love look down
Where lies this loyal son;
In frost and dew they weave a crown
Of honor he has won.

Loading treated ties for shipment, Angier tie loader. Left to right: Foreman G. C. Conley, "Jerry" Setor, Andrew Creek, "Joe" Locknar, and Andro Plen, and "Old Faithful Kate," who keeps three such crews supplied without delay

Private Arthur C. Bean

Keyser

Correspondent, HARRY B. KIGHT

Assistant Superintendent and Mrs. Welshonce are the proud parents of a new son, born on January 3.

Early in 1917, shortly after America had declared war on Germany, Dewey Deputy answered his country's call. At the battle of Chateau Thierry, on July 18, 1918, he was gassed, but lived until December 27, 1920.

Mr. Deputy was with Company D, Twenty-third Infantry, Second Division. He won three citations for bravery from the French Government. He was returned to the States and was sent to several hospitals successively, in an effort to restore his health, but on Monday, December 27, he passed away at the United States Hospital at Staten Island. His body was shipped to Keyser and his funeral services held on the following Friday afternoon from his late home on First Street.

The funeral was in charge of Boyce-Houser Post 41, American Legion. The procession was led by McIlwees Band, followed by the local Legion Post in full uniform. Three volleys were fired across the grave, and a bugler sounded "Taps." Reverend A. N. Perryman, of Lynchburg, officiated.

Dewey was in the employ of the Baltimore and Ohio at the time of his enlistment. We extend to the bereaved family our sincere sympathy.

His many friends and acquaintances are grieved to learn of the recent death of Supervisor M. Scott Sisler, 38 years old, who passed away on Christmas morning at his home on Fairview Street, Piedmont, W. Va., following one month's illness from typhoid fever.

Mr. Sisler was born near Terra Alta, W. Va., February 25, 1882; he began work on the track at the age of 16 years and worked successfully as trackman and foreman until 1913, when he was promoted to assistant supervisor, Piedmont. Three years later he was made supervisor at the same place. His work on the 17-Mile Grade contributed materially to the success of the operation over that territory, which is one of the unusually difficult spots on the Railroad.

The deceased was a member of the United Brethren Church of Terra Alta; of the Knights of Pythias, and of the Loyal Order of Moose, Keyser.

The floral offerings were many and beautiful, including a blanket of flowers presented by his friends in the Maintenance of Way Department.

The body was taken to Terra Alta on Monday, December 20, and there laid to rest in the Methodist Cemetery.

Mr. Sisler is survived by a wife, who before her marriage was Miss Pearl Smith, of Morgantown, and six children, two of whom are now recovering from typhoid.

Connellsville Division

Correspondent, S. M. DeHUFF

The Christmas number of the MAGAZINE and not a line from this division! Just can't stand it, that's all.

Wonder how many good, bona fide, 1921 resolutions have proved "dusters" by this time?

Since anything has appeared in the MAGAZINE from our division, Earl E. Shank, assistant to the superintendent's chief clerk, has feathered a little nest of his own. Luck and "bestest" wishes, Earl.

Besides being the best ticket agent in Fayette County, R. E. Shaw, Connellsville, Pa., is gradually becoming recognized as the king of dance promoters. Some of those affairs of Ray's are distinctly elite.

"Who cares for an automobile?" quoth Brady Cole, car inspector, Connellsville, as he leaped from his own machine, watched

The late Dewey Deputy

it turn double somersaults down the mountain side near Confluence. Then he sauntered on up the road in quest of rabbits and squirrels.

Whilst engrossed in the subject of automotive locomotion, let us not overlook the spick and span roadster that languishes, during working hours of each day, just outside division headquarters, Connellsville. Between the hours of 8.00 a. m. and 5.00 p. m. he's merely a clerk in the Division Accountant's office; but after that period—ye gods! a veritable speed demon.

That was a nice traveling bag the Division Accountant office boys slipped H. L. Cordrey on Christmas.

It was rumored about that a beauty contest was contemplated by the MAGAZINE. Don't do it, Mr. Editor; don't, I beg of you, and only out of fairness to the other 17 divisions of the Baltimore and Ohio. They wouldn't have a possible chance. Right here in this village of coke dust, sitting daily side-by-side at a desk in the Superintendent's office, are two young ladies who are natural-born beauty contest winners. No, they are not on the order of the Barr

TUBE FREE

6,000 MILES GUARANTEED

Greatest tire offer ever made. For a short time we offer a practically puncture-proof standard made inner tube absolutely free with every order for one of our special reconstructed double tread standard tires. Guaranteed 6,000 miles. Users report 7,000 to 10,000 miles service. Unequalled in price, quality and workmanship. No repairs, no blow-outs.

or Fairbanks twins; in fact, they're not twins at all. They are just two demure little sisters who would render a contest such as is referred to, too one-sided to be of interest.

EDITOR'S NOTE: We are consumed with curiosity. Why not send in their pictures?

We are pleased to note the speedy recovery of W. H. Metzgar, Connellsville supervisor, who was seriously injured in a motor-car accident some two months ago.

J. M. Keane, general foreman, Hyndman, Pa., is fast establishing himself as a valuable asset to the Company by reason of his ability and his popularity with his subordinates.

Assistant Trainmaster J. L. Lowney has established a fireside of his own since our last write up.

"Cinderella on Broadway" proved an irresistible lure to many of the boys about division headquarters and their friends. And how lucky that the big Pittsburgh attraction happened on pay day!

Let's try to preserve intact the few New Year resolutions that have survived January.

It was with a feeling of regret that we learned of the resignation of Division Engineer A. P. Williams, which became effective January 1. It will indeed be difficult

Looking for an Aeroplane

Mary Catherine, granddaughter of Captain Burns, conductor between Cumberland and Pittsburgh

to replace Mr. Williams with another D. E. quite as popular as was the departing official. It is understood that a rest-seeking jaunt to Florida constitutes all of Mr. Williams' immediate plans.

One of the latest acquisitions to the list of passenger conductors is R. H. Miller, Connellsville. Something over six feet and proportioned for just such height, Hays well reminds us of the type we usually see in a big watch company's full page advertisement—standing beside a train and holding the chronometer that hasn't gained or lost a second in the last 30 years.

E. C. Loudon, conductor, depot shifter, Connellsville, is not only one of the most efficient employees of his class on the division, but he also possesses some ability as a stationmaster that is seldom found in that department. Many an aged person, as well as foreign-speaking folks, have made their connections at this busy terminal only through the timely assistance of Edward. He never appears too busy to offer a helping hand; and for that reason he enjoys great popularity with all classes.

"Joe" Peterman, our super-heater unit expert, was knocked back to the 11 to 7 trick. "Joe," who was in France, says that while there he had to do some big lathe work, and could not use their metric system and would guess at the dimensions. How would you make a shrink fit that way, "Joe"?

General Roundhouse Foreman Charles Spence, who has been off on account of illness, is somewhat improved, and expects to be back with the boys soon.

Since the Company has removed the surplus material and tools from the tool boxes of the men, "Jimmy" Quinn feels quite handicapped and lonesome; he has a nice large tool box on his hands with a big vacuum in it.

We have with us again our old friend J. D. ("Slim") Butler, who is acting in the capacity of assistant chief caller to W. H. Stange. "Slim" says it feels good to get back to activity in the old environment.

We have with us today—in our photo-graveure section—Master J. W. Love, son of "Doc" Love, genial and popular throttle-manipulator on the Connellsville Depot shifter. He's a wonderful kid, this Master J. W., but the writer cannot refrain from feeling that "Doc" had an ulterior motive in wanting the photo published. Old man Osler was all wrong, "Doc"; you're as good a man as Gunga Dhin ever was even if you are on the seamy side of 50.

Master J. W. Love

Brother E. B. Small, machine shop boss, says he is going to be a white collar boss for a couple of weeks, as he is going to lead the singing at a revival to be held at Elm Grove; he cannot get home in time to change his clothes. Wear your dirty ones, "Ed," people won't look at your clothes, they will be looking to see if you make faces when you sing.

It seems as though Santa Claus missed at least one house in our famous town. We were in hopes that he would bring our efficient hostler foreman, Harry Hostettler, a new pipe. We were sadly disappointed as Harry is still dragging on the same one as usual. We know that the pipe he now has is as old as Methuselah, and we are thinking seriously of taking up a collection and buying him a new corn cob.

Considerable comment has been heard since Frank Newton ("Tubby") Payne moved to Uniontown. He comes to work one day with a smile and the next day he will do nothing but sigh, and stare into space. "Tubby" has our sympathy, as we know just how he feels.

W. H. Stange has returned to work as chief caller on the 11 to 7 trick, with considerably less noise than he used before he left in September. Who remarked that "silence is golden"?

On January 1, 1921, H. R. Gibson was appointed division engineer, Connellsville Division, headquarters Connellsville, Pa., vice A. P. Williams, resigned.

Pittsburgh Division

Correspondents

E. N. FAIRGRIEVE, *Car Distributor*, Office of General Superintendent

ELMER H. STOLTZ, *Pittsburgh Freight Station*

The following have been rewarded by the Management in appreciation for the great interest taken in the discharge of their duties:

C. E. Hanna, Subdivision No. 3, received a prize of \$100 for the best subdivision during the year 1920; P. Perrone, Section No. 34, Ellwood City, received a prize of \$50 for the best main line section during 1920; J. Ercalina, West Newton, received a prize of \$35 for showing greatest improvement on main line section during the past year, and R. E. Frazier, Marienville, Pa., received a prize of \$35 for the best branch line section during 1920. We unite in extending our congratulations to these gentlemen for what they have accomplished.

Michael Hogan, one of our veteran employees, is at present in the Mercy Hospital at Pittsburgh convalescing after an illness incident to old age.

Here's one proposed by "Jimmy" Conlon, District Master Mechanic's office. "If the office force would go out on Thursday night and have a Gay time, would the boss get sore if they were to Miss Friday?"

There is a certain gentleman in the Engineering Department, Pittsburgh, who is, unconsciously, highly thought of by the ladies employed in the Transportation Department—two in particular, who rejoice every time he makes his appearance in a certain office. We're not mentioning any names, but we have a sneakin' idea this might be the starting of a romance. Here's good luck to you, girls.

H. M. Davenport has been promoted to the position of statement clerk in the office of District Master Mechanic, Pittsburgh. Harry was formerly employed in this office prior to his transfer to Glenwood, and says he is glad to be back again where he can ply his winning smile among the ladies.

Ruth and Hale Korb

The children in the picture are Master Hale and Miss Ruth Korb, children of A. E. Korb, chief clerk to division freight agent, a proud and happy father.

A certain young lady whom we know, labored unceasingly through the long and dreary winter months, up through the blossoming Spring, and, when the vacation season came, she hied herself away to the seashore to recuperate.

One day, as she strolled nonchalantly down the boardwalk in a village by the sea, she came face to face with a sign which bore the following inscription, "Twenty Dollars paid for 1920 Lincoln Pennies." Now this young lady had been educated from her youth in the interesting study of bargain hunting, and had become quite an adept at the game by reason of her visitations to V. & X. emporiums and department store basements. So when this alluring sign met her gaze, right away she was keen for the chance and entered ye little shoppe in a blythe and gay manner. The following dialogue took place:

Young Lady: I came in to see you about the sign in your window.

Proprietor: O yes, you mean the Lincoln penny sign?

Young Lady: Yes, that's the one. I have one of those pennies.

Proprietor: Is that so, well that's fine.

Young Lady: Can I get \$20 for it?

Proprietor: Yes, for it and 1919 more.

Young Lady: Ouch!

Hurried Exit—Curtain.

The lady and gentleman in the accompanying picture are Mr. and Mrs. Louis Soudes of Allison Park. Mr. Soudes is foreman of Section 24.

Lunch Hour Chatter

Miss Andrews: Harry, do you know that I am a blacksmith, and can prove that I am a mechanic of this craft?

Mr. Davenport: Why no, Ethel, I did not know that you were a blacksmith. How did you learn your trade?

Miss Andrews: Shooin' flies.

E. A. Abbott, formerly of the West Virginia District, has been employed as secretary to the district master mechanic at Pittsburgh. We welcome him to our ranks.

Glenwood Shop

Correspondent, FRANK RUSH

Considerable interest was displayed by the 700 employees at a meeting in the machine shop, Glenwood, on December 20, at noon hour. The meeting was held in connection with the idea of the proper handling of second class material and the saving of new material wherever possible.

Mr. Baker, secretary of Local Federation No. 10, spoke to the men in regard to saving material, and impressed upon them that money saved in material would, more than likely, be spent in labor. The enthusiastic applause which followed his remarks showed that much interest is being taken by our employees in this direction.

Shop Superintendent Howe explained to the employees how much he appreciated the savings that are being made from month to month, and expressed the hope that the final figures would convince everybody that the Glenwood men are interested in their work.

To stimulate this interest, placards of all sizes hang about the shops bearing such inscriptions as these:

"By saving material we can work our shops full force."

"A dollar saved in material means a dollar more to spend in labor. Ask your foreman to explain."

"Save material."

"Do not deal here. Prices are too high."

"Do not use this material. It costs too much money."

The two latter signs are placed at the various points where material is drawn from storekeeper.

With practically the same output of heavy repairs in December as in November, the Back Shop made a handsome reduction in material charges from storekeeper, and the final figures develop that a \$20,000 decrease had been accomplished.

Saving material seems to be the main topic at Glenwood, and with continued assistance and cooperation, there is no doubt but that we can accomplish a further reduction in material expenses, which will help work our shops to their fullest capacity.

Sectionman and Mrs. Louis Soudes
Pittsburgh Division

JUANITA LOCKHART, *Clerk to Trainmaster*, Fairmont, W. Va.

VERNON A. LYON, *Assistant Ticket Agent*, Clarksburg, W. Va.

Fairmont

Miss Roxie Lehew, stenographer to C. C. Hinkle, freight agent, Fairmont, was married to Mr. Nearle Moran, on December 18. Miss Lehew had many friends who dislike very much to think of her leaving, but then we know she has gone to a "Better Land," so we wish her much happiness.

Oh, gee! but Brakeman W. N. Elders was dancing jigs and such likes on December 22. He said he received his Christmas present rather early, but was mighty glad he did, for it was something he could keep. We do not know what they have named her, but Mr. Elders says she is the finest baby you ever laid eyes on.

At the meeting of the Ladies' Auxiliary of the Baltimore and Ohio Veterans' Association, held on December 11, it was voted to subscribe \$5.00 to the *Times*' Christmas Fund and the same amount to the Salvation Army. The Auxiliary is planning for a busy year, and with the following named new officers it will have some good working forces at the head: President, Mrs. Frederick Wittman; vice-president, Mrs. George Swisher; secretary, Mrs. Jessie Lee Nuzum; treasurer, Mrs. Harry S. Fleming.

A feature of the evening was an address by J. M. Garvey of Wheeling, vice-president of the Grand Lodge of Veterans. Frank Gump read the minutes of the Grand Lodge session held recently, and talks were also given by Harry Fletcher, T. A. Richardson and J. F. Shafferman.

T. W. Reynolds

After bravely battling against an incurable affliction for several years and submitting to the cross with a patience and humility not often experienced, Thomas W. Reynolds, trainmaster, passed away on December 11, at his home on Ogden Avenue. Six years ago Mr. Reynolds was stricken with paralysis and since that time had been an invalid.

Being so active during his business life the sickness which befell him was doubly hard to withstand, and Mr. Reynolds made a heroic fight to throw it off and to retain his post in the railroad service. After his condition became such that he was forced to retire from the trainmastership, he remained in the service for some time as a tonnage inspector, a lighter form of work. Eventually he was compelled to retire and for five years past he sat at his home overlooking the railroad yards, his interest never waning in the moving of the trains as they passed before him from day to day.

The deceased was a man of steadfast character and pleasing manner and he was a favorite with all his fellow workers and his friends were numerous. He began his railroad career as a telegraph operator. For upwards of 12 years Mr. Reynolds was trainmaster in the local yards.

He is survived by his wife, formerly Miss Katherine West, several children, several sisters and a brother.

Mr. Reynolds belonged to the Veterans' Association of this city.

The honorary pallbearers were: J. F. Shafferman, Bailey Nuzum, E. Bartlett, B. Z. Holverstott, A. R. Acard and Camden D. Summers. Active pallbearers were: F. H. Brummage, Guy Waltz, John Sweeney, John Hessian and Joseph Connors.

Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent*, Weston, W. Va.

Please mention our magazine when writing advertisers

The Charleston Division has adopted as its slogan for the year 1921,

"THINK ABOUT IT."

We know everyone will agree that the intensive application of this slogan will reduce claim payments, will reduce accidents, will completely avert personal injuries, save fuel, and in every other way tend to make Charleston Division simply another name for EFFICIENCY.

The hard times now with us are but temporary, and undoubtedly within a short time business will again become normal, we shall see as many trains as ever—perhaps more—running over our division, as many men employed in our shops, and, in fact, a normal condition completely restored. Meantime, let's all do our little bit, no matter how small, to help the good work along, and show that we are all loyal members of the small Charleston Division family of our Company.

One of the most interesting notices which has come to our attention of late is a circular issued by Mr. C. C. Glessner, which shows that during the year 1920, for the first 11 months, our company paid out in claims for loss and damage something like \$3,500,000. Do we realize just what an enormous sum of money this is, and what could be done with it in the way of new and improved equipment, or if it were placed at the disposal of our Company for maintenance? Do we realize just how many families that amount of money would keep for a year? We have all become so used to talking and thinking in millions since war days, that we mention a million as carelessly as we used to mention a dollar. If we bring this home to ourselves by thinking of what this would really do, how it could be profitably spent, instead of being wasted—which is really what happens when we have to pay freight claims—then we begin to realize how much it is. The General Freight Claim Agent asks in his circular that we adopt for our slogan in 1921:

CUT LOSS AND DAMAGE IN HALF—
IT CAN BE DONE.

Add to this the division slogan, and we know it can be done. The Charleston Division Freight Claim Prevention Committee has pledged itself to do its share to attain the end asked for.

On December 21 the Traffic Special made a trip over our division, covering the Pickens Branch and the Gauley Line to Richwood. Those on board were H. H. Marsh, general freight agent; W. I. Bishop, industrial agent of Baltimore, and Division Freight Agent Samuel Strachan of the Charleston Division. They were escorted by Superintendent W. Trapnell, Division Engineer R. Brooke and Trainmaster W. C. Deegan. On arrival at Buckhannon, the party was entertained by the Rotary Club at luncheon.

Mr. Marsh made an interesting address, explaining the objects of the trip, and was well received by all our patrons and ship-pers. Superintendent Trapnell also made a short address. Mr. Bishop explained the functions of the Industrial Department, and expressed his thanks for the entertainment the Rotary Club had provided. Next in order was a speech by our old friend Mr. Strachan. With his usual modesty (on account of his size he finds it rather hard to hide behind someone else) he declined. Superintendent Trapnell was heard to remark in an undertone which carried all over the room "Sam" is a man of deeds, not words."

It has been regularly moved and seconded that the Charleston Division Division Accountant's office be closed and a matrimonial bureau established in the same quarters. Our friend Severns has lost two young ladies recently. Chief Clerk McOsker went to Seymour, Ind., ostensibly to spend Thanksgiving with his folks. He came back with a bride. Chief Transportation Timekeeper Roy Sergeant said he was going to Gassaway for Christmas. Evidently it was in the air. He was married on Christmas Day to Miss Nona Paisley, who left Weston, where she held a position in the Division Accountant's office a short time ago, to accept a place in the Master Mechanic's office, Gassaway. We understand that Mr. and Mrs. Sergeant will shortly take up their housekeeping duties in Weston. The hearty congratulations of everyone are extended to both Mr. McOsker, who, while he has been with us a short time only, has captured the friendship and respect of everyone, and to Roy, whom we have known for a long time. We extend our heartfelt sympathy to both the brides.

We regret to record that Miss Inez Young, file clerk in the Superintendent's office, recently had to be taken to Charleston, where she underwent an operation for appendicitis. Latest reports indicate she is doing well, and we are glad of it.

Another matter of regret to us is the transfer of J. N. Godman, captain of police, from the Charleston to the Baltimore Division. Captain Godman has been with us nearly a year, and during that time, by his sterling worth and his absolute fairness, he has made for himself a very warm place in the affections of the Charleston Division family. A firm believer in the spirit of cooperation, he has done all he could to assist the division in carrying out this policy. He was a valued member and a regular attendant at our Safety and Claim Prevention Committee meetings.

We congratulate Captain Godman on his promotion. Mrs. Godman and the baby will join the captain as soon as he finds a house for them.

Our sympathy is extended to Dispatcher W. W. Young in the death of his brother.

"Ben" Young was employed by the K. & M. at Charleston as yard brakeman. He was injured by being caught between cars and rolled. He died shortly afterwards.

Congratulations are extended to Conductor Asa Carr and his wife. They are the proud parents of a 10-pound boy. We also congratulate O. H. Duncan, foreman in the wood working shop, Gassaway, on the birth of a daughter.

The Elk Line Club, composed of 40 members, has been organized by Baltimore and Ohio employees in Gassaway. They meet every Thursday at Moose Hall. A most enjoyable dance was held by the club on Christmas Eve.

We regret to learn that Mrs. J. D. Nicholas, wife of the trainmaster at Gassaway, was recently severely injured by a bad fall. H. H. Boggess, boilermaker, is confined to his bed with a severe attack of rheumatism. We extend best wishes to both for early recovery.

Brakemen A. J. Price and C. C. Cogar, of the Elk Line, were married during November. Our informant is unable to give us the names of the happy brides, but we extend congratulations just the same. Second Trick Operator M. A. Griffith of Orlando also became a benedict. Congratulations again!

Supervisors John and Joseph Conley were recently called to Elkins on account of the serious illness of their mother. We extend our sympathy.

The division accountant at Weston reopened his accounting school on December 14. Regular meeting nights are the 14th and 28th of each month at 7:30 p. m. All are cordially invited to attend. Come and learn how to be a Severns Junior.

Miss Ethel Keller, Car Distributor's office, has bid in the position of trainmaster's clerk at Gassaway, and has left us, much to our sorrow, but to her own great joy. Ethel is very fond of Gassaway. "There's a reason."

The Charleston Division noted with regret the death of both Superintendent Deneen and Superintendent Smith. At the last meeting of the Division Safety Committee, suitable resolutions were passed by a rising vote, and the Chairman requested to forward copies to the families, and to the division chairmen of the Safety committees at Cumberland and Wheeling. Superintendent Trapnell represented the Charleston Division at the funeral services in both cases.

The Charleston Division employees are perhaps not aware of the fact that the Baltimore and Ohio maintains a fine free circulating library for the use of its employees. The library is located at Mount Royal Station, Baltimore. During a recent trip there, your correspondent had the pleasure of meeting the librarian, and being shown over the library. Any one who desires to secure books can do so. Details will be furnished on application to the librarian, or to the correspondent of this division. For those who live at outlying points, the library would prove of great advantage.

A well attended meeting of the Charleston Division Freight Claim Committee was held at Weston on December 17. Among those present we noted Chairman E. J. Hoover, J. K. Cogley, and the various division officers. The guest of the evening was our old pal and side partner, "Charlie" Criswell. The discussion was lively and interesting throughout, and there is no doubt that if the enthusiasm continues, as it will, the Charleston Division will do

its share towards cutting off that 50 per cent. Mr. Glessner is asking for.

On the same date the Division Safety Committee held its regular monthly meeting, the business part being preceded by a lunch at which all members met at the Camden Hotel in Weston. The monthly lunch of the Safety Committee on this division has become an established practice, and much good has resulted, the members becoming better acquainted through these little get-together parties. At the business meeting, at which Superintendent Trapnell presided, rotating members were elected for the ensuing six months. The Superintendent thanked those retiring members for their unselfish work and the assistance they had given the cause of Safety, and expressed the hope that—though they were now leaving the Committee—they would consider themselves always honorary members, and would be welcomed heartily at all meetings.

The correspondent desires to extend his sincere thanks publicly to those who have so kindly helped his work along by giving him odd bits of information from time to time and to express the hope that they will continue to do so. Notes are always welcome. Your correspondent is located at Weston, and cannot know what is going on over the entire division unless you tell him, and he wants to try to make the Charleston Division Notes real "DIVISION" notes, and not from one place only. He has done his best to please you all, and hopes you are satisfied. Therefore, in the words of the famous man behind the counter "Thanking you for past favors and hoping for a continuance of the same."

Western Lines

General Offices, Cincinnati

Correspondent, W. H. SPILLE, *Pass Clerk*

Bert Miller
Our Art Gallery

Bert Miller, our young and esteemed assistant car distributor, started his career just six years ago as messenger in the Telegraph Department and has moved forward very rapidly ever since. Look at him now. Judging from his picture we are of the opinion that he missed his vocation. We believe that Bert should have gone in for politics and become one of our congressmen. But still we believe that some day we will see him riding in a private car of his own over the Baltimore and Ohio Railroad.

The endless argument between Miss Rullman and Henry Bauer about proper ventilation goes merrily on. Mr. Bauer insists on having the windows open and Miss Rullman insists on having them closed, while the rest of the office can only sit and suffer.

Our Own Luke McLuke
To Mister Blake
Please give full due,
He tried to make
A squeakless shoe.
And save some praise
For this dear lady
Who tried to raise
A cryless baby.

We wish to announce the arrival of a newcomer in the General Manager's office. Joseph Barron was recently employed as assistant statistician, vice G. E. Lund, resigned to accept position as draftsman, S. M. P. office.

It is the pleasant duty of the correspondent to bring before all the readers of our notes, pictures of our pretty stenographers, and it gives us much pleasure to present Miss Phyllis Meier (better known as Sadie or Lena), stenographer, Transportation office. Hard job to get it but—more will follow.

Miss Phyllis Meier

Herman Droppleman, our energetic neo-style operator, at a party recently met one fair little girl living somewhere near Lawrenceburg, Ind. We did not think so much of it at the time but it has now come to a point where Herman is taking a correspondence course in love making and dancing; the textbooks being "The Art of Wooing," and "How to Dance." Evidently Herman studies pretty hard during his lunch hours on these books and spends his evenings getting actual experience. Girls, beware!

Clarence Rackers resigned his position in the Transportation Department to accept a position with one of the large coal companies in Cincinnati. We regret to see Rex leave us, but our best wishes accompany him into his new field of endeavor.

How to Make 'Em Happy

Give Clarence a Rose.
Tell Elizabeth Martin how well she sings.
Give Herman Droppleman a girl.
Give Shoup a recipe to grow hair on his head.
Give Miss Stutter a War Cry.

Help Yocum find his files.
Give "Ben" Timme his GS-1 on time.
Give Mary Reuken something to talk about.
Give Ruth Murdock nothing to do.
Give the Correspondent some news.

February surely must be the month of great people. If you are skeptical and refuse to believe it, look over this list of famous men and women and the dates on which they were introduced to the world and its expenses during the shortest month:

"Al" Maier, 2; Charles Carey, 2; Olive Tealen, 4; F. G. Dickman, 4; F. X. Drain, 7; "Joe" Logan, 7; T. T. Doyle, 11; Abraham Lincoln, 12; St. Valentine, 14; Lucia Stock-

man, 22; George Pendery, 22; George Washington, 22; "Ed" Lind, 28; "Joe" Noewer, 28.

Several of the Traffic Department members have recently been discovered cavorting around the skating rink. Is it because they love to get a skate on occasionally, or are the girls up there so magnetic? Someone suggests that "Charlie" Lally use three skates, so that he won't stop so suddenly when he falls. And does he fall? Well, you tell them, dollar, you have cents. (Explanation of that last clever remark given upon application.) The only other casualties so far are Frank Duncan, "Ed" Gardner, "Tommie" Carter, "Al" Studer and Irene Tealen.

Mechanical Engineering

Learn at Home!

Employers everywhere are looking for men with mechanical ability. Splendid salaries and rapid advancement are offered those with special training.

There is an easy, delightful way in which you can learn right at home in spare time. For 29 years the International Correspondence Schools have been giving men and women just the training they need for success in mechanical engineering and more than 200 other subjects. Hundreds of thousands have stepped into good positions through I. C. S. help, but never were opportunities so great as now.

Let the I. C. S. help you. Choose the work you like best in the coupon, then mark and mail it today. This doesn't obligate you in the least and it will bring you information that will start you on a successful career. This is your chance. Don't let it slip by. The most important thing you have to do is to mark and mail this coupon *now*.

INTERNATIONAL CORRESPONDENCE SCHOOLS

Miss Linda Krombach, Cincinnati Terminals

"Go take a rest for seven days,
Get strong," said Doctor Peak.
"I can't do that," replied "Bill" Hays,
"For seven days will make one week."

Why We Often Wonder

How Radspinner did it.
Why "Ben" Timme never gets a hair cut.
Why May Agen spends so much time in
the Transportation office.
What made Shoup lose his hair.
Why Elizabeth Martin vamps all the new
clerks.
Why Dickman never buys cigarettes.

Every Saturday brings to our midst
Traveling Freight Agent Freese of Seymour,
Cincinnati and Walnut Hills, with an array
of brand new jokes and flashy clothes.
"Max" has always looked like a million
dollars until he takes off his hat and then—
shades of Hindenburg! We aren't proud,
but we do prefer our fashion of pompadour
to "Max's."

The Barber's Despair—Or the Bald Truth

(A hair-raising quartette)

Charles Hall,
"Charlie" Terhune,
George Barrick,
"Billy" Scholl.

J. McCabe and "Ben" Timme have been
admitted into the Ancient Order of Roopps.

To the first person who brings me a solu-
tion of the following alleged joke, which is
unusually clever (having thought of it my-
self), I will give one copy of Tariff Index
No. 12, Martin W. Mueller's latest work of
useless fiction, and a photograph of Ashur
Tullis at the age of four years. Here it is:

One night Walker Barrick took a lady
friend to the theatre, after which they had
refreshments which cost him 50 cents, all
the money he had. Quite naturally he did
not inform the lady of his dilemma, but was
nonplussed as to how to get her home with-
out money or car tickets. He thought so
hard over the matter that for the moment
he forgot to be his usual polite self and paid
no attention to the lady's conversation. She
noticed this and to bring him back to earth,
she pinched his arm and said indignantly,
"Why, Walker Barrick!"

"By George, I will," said Walker, and
even though she lived in Hyde Park, he did.

You tell 'em Clarence, Rose Stutters.

George Perry says that since he has been
married he has saved considerable money,
felt better than ever before and wouldn't be
single again for the world. But skipping
gaily along our bachelor way, we pause for
a moment to whisper in his ear, "Sour
grapes, George, sour grapes!"

Cincinnati Terminals

Correspondent, JOSEPH BEEL, *Chief Clerk to
Superintendent of Terminals*

The accompanying picture is of Miss
Linda Krombach, clerk, Terminal Agent's
office. The picture was taken at Keystone,
Iowa, and her home is in Cleves, Ohio. On
account of her pleasing disposition and her
excellent dancing, Miss Krombach has quite
a list of admirers. A popular young gentle-
man in the General Manager's office kindly
furnished the photograph. Watch your
step, Linda, or "Gander" might get jealous.

Our Boss

By the Cincinnati Terminal Employees

In our midst we have a man
Who makes us do the best we can.
He came from Loveland long ago,
You'd never say that he is slow.
John Meyers it is, jolly and stout,
A genial soul and a good old scout.
At times, his voice, like a lion's roar,
Assails us, that's when he is sore;
But always—in a friendly way—
And he lets each one say what he'll say.
When we have done the best we could
He tells us that our work is good.
It's only when all things go wrong,
We hear his voice come out so strong,
When engines meet their crews too late,
When records are not up to date;
When dirt and refuse lie around,
Or wasted drawbars strew the ground;
Or errant "hod" fireman begins to dream
And lets his engine fail for steam—
It's then we see his smoke turn blue,
Right then and there he's after you!
Full many a time we need a call
Which John can give to one and all.
But we just know 'twould be our loss
If Big John Myers were not our Boss.

The boys at Storrs are always ready for
the cigars that are usually forthcoming on
state occasions, such as weddings, etc.
This time it is the wedding of Earl Decker.
We extend our congratulations.

Katherine Jean
16 months old daughter of Assistant Car Dis-
tributor H. J. Fleming, Newark, Ohio

Miss Eva G. Winters
Secretary to the superintendent, Newark
Division

Virginia

Our poor friend "Pete" must walk the floor
From one a. m. until nearly four.
Virginia is the baby's name
And "Pete" loves her—we'd do the same.

Things We Would Like to See and Hear at Storrs

J. M. Shay without a cigar.
C. I. Novinger excited.
"Bill" Hartigan remaining quiet for ten
consecutive minutes.
"Andy" Haar addressed as "Mr. Haar."
"Hoppie" Russell with a clean face.
Russell Hicks at a loss for something to
argue about.
"Al" Eisman without a grin.
Ira Decker not attending a dance for one
night in the week.
"Fred" Schmidt taking a "Jazz Baby" to
one of his favorite shows.
"Ed" Massman without his "Tin Lizzie."
"Joe" Coones without his hair parted in
the middle.
"Bob" Melvin without a recipe for mak-
ing home brew.
"Jack" Niehaus minus a grievance.
Mrs. Pollack lacking something to do.
Harry Hocks with a wrinkle in his trousers.

J. L. Maher has been transferred from
Cincinnati to Chillicothe as division engi-
neer. He received quite a send off from the
Maintenance of Way employees on our divi-
sion, all of whom are mourning the loss of
friend "Jack." W. P. Abbott has been
transferred back from the Toledo Division
to our division in place of Mr. Maher.

Mrs. Lucille Fell, formerly Miss Lucille
Callahan, stenographer to division account-
ant, is again performing the duties of that
position temporarily, owing to illness of the
regular stenographer, Ray Shaw.

John Hiskey, who has been absent ac-
count sickness, is again back on the job.

Engineer W. F. Dayton and Conductor
W. T. Francis

The accompanying photograph shows William F. Dayton, right, comparing time with his conductor, W. T. Francis. Mr. Francis has an enviable railroad record, having been in the service approximately 48 years, and on his next birthday will be 71 years of age. An account of William Dayton's remarkable record as an engineer appears in this issue of the MAGAZINE, Veterans' Department.

Telegraph Department

We have advice to the effect that R. C. Moorehead, our Newark Division cartoonist, is devoting his extra time to good advantage, since "Whitie" was transferred to the Main Line. However, from "Whitie's" frequent trips back to his old stamping ground, he evidently is keeping posted on the "situation."

Zanesville

The accompanying picture is of L. A. Engle, foreman, Zanesville Shops, with his two grandsons, Thomas and Leo Mirgon. Mr. Engle is both daddy and granddaddy to these two boys, as their own father, a railroad telegraph operator, was a victim of influenza two years ago.

Mr. Engle has been with the Baltimore and Ohio for over 25 years.

Please mention our magazine when writing advertisers

Claire Kocher, a graduate of the New Castle High School, class of 1920, and now employed in the office of F. H. Knox, agent at New Castle, was elected captain of the Baltimore and Ohio Basketball Team, and is entered in the City League, playing games on the "Y" floor on Monday and Saturday of each week. His teammates are Glenn, Eilbeck, Peebles, Barrett, Kilbreath and Russell. Claire knows all the fine points of the game, and is well able to hold down a forward position on the team, and we're all pulling for him to land the cup for the Baltimore and Ohio.

The angel of death entered the home of Division Accountant and Mrs. P. H. Groscup and took their three weeks old baby, Phillip H., Jr., after a week's illness. The sympathy of the entire division is extended to Mr. and Mrs. Groscup in their great loss.

P. B. McDowell, C. T. timekeeper, Division Accountant's office, has been promoted to the position of inspector of accounts with headquarters at New Castle Junction. We all miss "Pete's" happy smile but wish him the best of success in his well deserved promotion.

A man who is clean inside and outside; who neither looks up to the rich nor down on the poor; who can lose without squealing, win without bragging, is considerate of women, children, and old people; who is too brave to lie, too generous to cheat, and too sensible to loaf; who takes his share of the world's goods and lets other people have theirs; who is true to his God, to his country, and to his employer—this is the ideal conception of a true gentleman.

H. F. Schwab, division storekeeper, New Castle Junction, slipped quietly away one beautiful day in November and never stopped until he reached Washington, Ind. Cupid's dart had done its work, and he found awaiting him Miss Letha Karr, to whom he was married on the evening of November 28. The happy couple arrived in New Castle on December 4 and are now at home to friends on the West Side. The best of good luck, happiness and prosperity is extended.

SAFETY FIRST

Today, Tomorrow and Every
Day of Your Life.

The employees of the New Castle Division regret the death of John C. Wilkin, former agent at Kent, Ohio. Mr. Wilkin was born in Delroy, Carroll County, Ohio, on April 14, 1862, and first came to Kent, Ohio, in 1888, as agent of the Cleveland, Canton & Southern Railroad (now the Wheeling & Lake Erie R. R.).

On June 14, 1900, he left the service of the C. C. & S. and accepted position of agent for the Baltimore and Ohio, holding this position until September 16, 1918, when he was given a furlough on account of ill health, and was later placed on the pension list. He suffered a paralytic stroke early in 1918 from which he never fully recovered. After being placed on the pension list, he removed to Clarendon, Va., to the home of his son, passing away at that point on December 24 as a result of another stroke of paralysis.

Mr. Wilkin made an enviable record as an agent at Kent, his services to the patrons of the railroads he served bringing the highest praise as a result of his painstaking service, reliability and trustworthiness. He was regarded as being one of the most conscientious agents on the division, and of the highest integrity.

A Methodist from his early youth, he gave devoted service to his church in all its activities. He was a member of Rock-ton Masonic Lodge.

The funeral services were held in the M. E. Church at Kent on Sunday, December 26, in charge of Rev. M. J. Slutz, assisted by Rev. E. R. Brown. Interment was made in Standing Rock Cemetery.

He is survived by his wife, daughter and two sons, to whom the sympathy of the employees of the New Castle Division is extended. In the passing of Mr. Wilkin, the New Castle Division suffers an acute loss.

Cleveland Division

Correspondents

 H. B. SMITH, *Supervising Agent*, Cleveland, Ohio
 W. E. BRUGH, *Clerk to Trainmaster*, Massillon, Ohio

Dover

G. J. Elford has been appointed agent at Dover, effective December 15. We all wish him good luck in his new position.

On December 23, little Donald Sexton, eight-year old son of former fireman and Mrs. Boice Sexton, was struck and killed by train near his home. The little boy was walking along the track happily playing a mouth organ, a premature Christmas gift, and did not hear the train approaching him on the eastbound tracks under a reverse movement. Railroad friends expressed their sympathy in a floral offering.

Car Foreman W. F. Krage has returned to his duties after a two weeks' vacation. Inspector Lawrence Wietz filled the vacancy during "Bill's" absence. Things look natural again around the repair shanty.

As a figure to show how much business is being handled through Dover Yard, the following will give a fair idea for the first 20 days in December: There were 6,499 cars handled through Dover Yard with a total of 333 trains, giving a daily average of cars per day 324.9, and an average of 16.6 trains per day. Car Miles—CAR MILES—CAR MILES.

Boiler Inspector Carl R. Kirkpatrick is the proud father of another young boiler inspector. Carl passed the cigars with a merry grin that told it was a boy.

Fireman W. H. Kalp is showing a great interest in his work as yard fireman at Dover. He seems to be following in his brother George's footsteps. "Bill" kept engine 2621 shined up. It was his misfortune to have this engine go to Holloway for a few days and we believe it missed a good shining every morning. This is certainly a fine spirit that "Brother" Kalp is showing.

Yardmaster B. F. Wilcoxon is working as acting trainmaster in the absence of Trainmaster J. Fitzgerald, who is on a well-earned vacation, visiting in the East and spending some time at his old home town, Silver Springs, N. Y.

Conductor W. E. Hadden is acting yardmaster at Dover, working in "Ben" Wilcoxon's place. "Ben" has pretty large feet, but W. E. Hadden can almost fill his shoes.

Night Yardmaster Michael Reidy has been off duty on account of sickness. During his absence his position was filled by Yard Clerks "Tom" Adams and M. Howell. Glad to hear that you are recovering nicely, "Mike."

Conductor E. J. McIntire has been granted a three months' leave of absence on account of ill health. We hope the rest will do him good.

C. L. Baker, ticket clerk, was highly commended by the Safety Committee for his work in that line during the past month. His first act was in putting out a fire which

Cleveland sleuths on the job

Mae Elinor and Marion Beatrice
Daughters of Trainmaster T. C. Smith

had a good start in a storage pile of creosoted ties, due to a lighted fusee having been thrown off of the track some time before Mr. Baker's arrival. He also warned The American Railway Express Company against using an unsafe truck for unloading express from baggage cars at this station.

On his 18th birthday, S. M. Mitchell, coal bill clerk, was presented with a pedigreed fox terrier from the Sterling Kennels by Conductor Peter C. Stevenson.

Clara Haug, rate clerk, when asked to submit an item for the MAGAZINE, replied, "Oh, nothing ever happens to me." Cheer up, Clara, he might learn to be a mind reader.

G. J. Elford, formerly relief agent on this division, is now agent at Dover, succeeding H. A. Fisher. We are working hard for 100 per cent. efficiency.

Akron

The Baltimore and Ohio Basketball Team made its debut in the City League on December 11. Unfortunately, they were beaten by Peck's Studios, score 37 to 19. Our opponents have played together for several years and were the champions of the city last year and we hardly expected to beat them in our first game. However, on December 18, our team played the powerful Imperial Electric Company's team and our victory was comparable to the Republican landslide. Score, 29 to 9. We are all boosting the team and feel sure that they will win the championship this year. R. W. Ballard is manager and D. C. Barnett is captain. The players are Messrs. Miller, Warner, Dugan, Ballard, Snyder, Doyle and Boyd.

On December 26, a beautiful wedding was solemnized at Charleston, W. Va., when Miss Ruth Myers, formerly in the Terminal Trainmaster's office, Akron Junction, became the bride of A. B. Colby of LaSalle Extension University. The Reverend Mr. Colby, father of the groom, officiated. After felicitations were extended the happy couple left for a honeymoon in sunny California. The best wishes of all of the employees in Akron go with Mr. and Mrs. Colby and we hope that their voyage on the matrimonial sea will be very pleasant.

On December 15, "Mike" Dugan, Akron Junction, was severely injured by a fall. Mr. Dugan is one of the most popular employees of the Akron Terminals and the heartfelt sympathy of all of us was extended to Mr. Dugan. A beautiful bouquet of flowers was sent to Mr. Dugan while he was in the hospital, by the Welfare League.

A meeting was called at Howard Street Station on December 24, all of the employees of the Freight Department being present. This meeting was called without the knowledge of Terminal Agent Troescher, and after everyone had assembled Mr. Troescher was presented with a beautiful ring. Appropriate speeches were made expressing to Mr. Troescher the appreciation of those who work under his direction for his guidance and kindness to them during the past year.

The Akron employees were delighted to welcome to our midst on December 28, the members of the Cleveland Division Freight Claim Prevention Committee. A meeting and luncheon were held at the Portage Hotel and all of those present found the meeting intensely interesting and very helpful. We hope that we will have the pleasure of having this committee with us again soon.

Massillon

C. M. Piper, engineer, has been off sick for a few weeks. It is hard to knock a good man out, isn't it, "Doc." Glad to see you are better.

C. T. Bannister, engineer, who was also ill for several weeks, has returned to duty. Glad to see you in health again, "Charlie."

E. Polen, roundhouse foreman, and "Mike" Lopus, car inspector, went out joy riding in Mr. Polen's Ford. Said Ford got a little wild and turned over, slightly injuring Mr. Polen and Mr. Lopus. It has been rumored that a broken wheel was the cause of the accident. No official report was made.

The passenger station at Massillon is being repainted on the inside. Say what you will—fine feathers do help make fine birds.

Miss Grace Wock, clerk, Massillon freight house, has been flashing a diamond ring lately. It looks suspicious.

If it is reported that Beatrice McNeal, O. S. & D. clerk, is to be married soon. We hope that she will like her new duties.

J. M. Addy, who has been working on the water gang for a good many years, has taken the position of crossing watchman, Cherry Street, Massillon, on account of ill health. We hope that his new job will agree with "Jim."

Conductor W. E. Kilbow, who formerly worked at Massillon, and who is now at Canton, Ohio, is the proud father of a bouncing baby boy. Try to make a good railroader out of him, daddy.

Conductor J. O. Hart has been ailing with lumbago for some time. It isn't very pleasant, "Joe"; we hope to see it leave you soon.

On Christmas Eve, the section gang's bunk house, Massillon, was destroyed by fire. Some of the men had to make a quick get-a-way, and nearly all of their clothing was destroyed. An over-heated stove was the cause of the fire.

Baggage Agent "Dad" Lynch has been off duty for several weeks. We hope to see him back on the job again very shortly.

Columbus Street Freight Station

RESOLVED—LOSS AND DAMAGE CLAIMS WILL BE CUT IN HALF IN 1921. IT CAN BE DONE—LET'S GO.

Agent Robinette, Uhrichsville, drifted from the straight and narrow path long enough at the recent Claim Prevention Meeting at Akron to puff at a paper wrapped cigar, his first pill. It is reported that the cigarette paper was brown and it resembled a little cigar. They all fall sooner or later.

"Say it with flowers" is the first sign Claim Adjuster Stultz sees when he arrives in any city. He can give you from memory the daily fluctuations of the flower market since his meeting with the wonderful girl from Virginia.

A barber in Dover had recently finished shaving Claim Agent Prem and was about to comb his hair. "Wet or dry?" asked the barber. "Oh, I'm the driest man on earth, voted for prohibition and have always believed in the enforcement of Rule G," responded Prem.

The monthly claim prevention meeting was held at the Portage Hotel, Akron, Ohio, December 28, and was well attended by representatives from the traffic, operating and mechanical departments. An enthusiastic effort will be made on the Cleveland

Every Baltimore and Ohio man in the Motive Power Department or in Engine Service should have this book

The Early Motive Power of the Baltimore and Ohio Railroad

By J. SNOWDEN BELL

Describes and illustrates the locomotives used on the Baltimore and Ohio Railroad prior to 1860. The history of locomotive development of the Baltimore and Ohio Railroad embraces nearly the entire history of motive power in America up to 1860

Fully illustrated and handsomely bound in cloth - Price \$2.00

Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Md.

Please mention our magazine when writing advertisers

Division to reduce loss and damage claims 50 per cent. in 1921.

Captain Rowe's impressive eloquence, so well known but rarely enjoyed of late, was heard at a police meeting recently held on this division, and as the purport of his message was complimentary in the extreme, his men enjoyed a double treat. The Captain expressed his admiration for the splendid work of the force during the season just closing. Several interesting and difficult cases have been disposed of by the various officers, resulting in convictions and profitable recoveries.

The wife and newly blossomed infant of Lieutenant "Sam" Barnette are sojourning in the wilds of Texas at the present writing, the State in which "Sam" was born. We regret, however, to say that cattle and shootin'-irons are far removed from culinary achievements. This accounts for "Sam" mistaking sawdust for flour while dishing himself up some flap-jacks under his own lonely and deserted roof. "Sam" is thinking seriously of throwing himself on the mercies of the Salvation Army.

Trainrider Harry Malone bears an enviable reputation as a slayer of the well-known "bunny" down in the jungles around Massillon. He had bad luck last season and stated as an excuse that his gun was not performing as well as usual. To back up this excuse he purchased a powerful looking weapon, ordinarily used by bear hunters in the Rockies, and went out determined to bring home the bacon. He did—he did! His gun was powerful all right; he shot at a nice fat "bunny" 50 feet away, missed him, and killed a promising young porker over in the next field. Harry paid \$25.00 for his bacon and gave his gun away. He now confines hunting activities to car thieves and other well-known crooks.

J. P. Warrenfeltz is a fingerprint expert but he had an awful time explaining to brown eyed "Buster," to whom he reports regularly, just whose fingerprints decorated his collar in delicate, pink, Christmas candy impressions.

Patrolman "Ed" Steinmetz had two fine geese for his New Year's dinner, but unfortunately some old lady who keeps a flock of such birds near the Railroad track missed several recently. She heard about "Ed's" feast and he had a mighty hard time satisfying her that he had purchased them at one of the leading markets in a perfectly legitimate manner. "Ed" surely thought his goose was cooked for a while.

A. L. Rankin, night clerk to dispatcher, Cleveland, desires to thank all employees for the kindness shown him during his recent sickness.

The best indications of our fast returning to pre-war existence were the jealous glances towards the Misses Myrtle Lowther, Geraldine Sammon, Elsie Lake, Edna Snyder and Elga Cartwright on the morning after Christmas; the sadness and gladness—all due to good intention rings being added to their left hands. Needless to say, when Santa arrived he did not find any empty stockings awaiting him from the five successful candidates.

We have with us again A. E. Medley, our former chief clerk, to whom we extend a welcome hand.

The surprise of the holiday season was the presentation of some gorgeous pishisha negligee "draped with crepe" to Louis F. Barada, lieutenant of police, and an imported hand-decorated gold pencil to Herman H. Reum, claim adjuster, by the Claim Department Maidens' Retreat. The

presentation address was made by Miss Irene Lake, the theme being "The city gentlemen of today."

When business interferes with pleasure—quit business. Miss Irene Lake announced her resignation to be effective January 1, and has since shown progress in her correspondence course in domestic science. We wish her success and happiness in her new field of endeavor at 927 East 130th Street.

When all was glad on New Year's day, George Trope, our popular paymaster, was sad. Cheer up, George, next Leap Year will be 1924.

Miss Catherine Spain has exhausted her knowledge of social letter writing and has taken to making carbon copies, since each of "them" demands a letter daily.

"Matt" Schummer is back again in the Claim Department and doing his usual line of good work. Father "Matt" says he has no time for the girls. (Hang up the crepe.)

Members of the Cashier's Office Lunch Club continue to hold their regular luncheons and have not grown tired of the popular Boston fruit. Mr. Murray has agreed to act as host, providing he is not required to wear his Tuxedo.

Chicago Terminal

Correspondent, THOMAS H. WILLIAMS

D. O'Leary, timekeeper, and his wife celebrated their 50th wedding anniversary on January 1. Mr. O'Leary started railroad work at the age of 18, as switchman, on Galena Division, C. & N. W. Railroad, Chicago. After two years he was made general yardmaster. After four years he went to Michigan Central Railroad as chief clerk to division superintendent. Eight years later he went to the C. St. P. M. & M. Railroad, now the Great Northern, as chief clerk to division superintendent for one year; as general yardmaster for one year, and as assistant trainmaster, Northern Division, for one year. Left there on account of climate being too severe for his children. Went to C. & T. T. Railroad at Chicago as general foreman, Freight Houses, and assistant local agent. After eight years he went to I. C. Railroad as assistant local agent, Chicago, in charge of Fordham Yard and outside territory. After seven years he came to C. T. T. Railroad, now Baltimore and Ohio Chicago Terminal Railroad, as chief yard clerk, Robey Street; then as chief clerk to trainmaster, chief clerk to superintendent; agent West Pullman Station, and finally as timekeeper, which position he holds at present. Nearly 21 years with the Baltimore and Ohio Chicago Terminal Railroad, and 51 years of railroad service. He has never lost any time on account of sickness or injuries.

The accompanying photograph shows that Mrs. O'Leary has taken good care of "Dave"; he looks as though he is good for

Mr. and Mrs. D. K. O'Leary

Miss Loretta Grogan

many years yet. A number of the old timers got together on the eve of their celebration and presented Mr. and Mrs. O'Leary with a purse of gold. Everybody joins in wishing them the best of luck and happiness in the rest of their journey through life.

Below is a letter from Mr. O'Leary to the editor of the MAGAZINE:

CHICAGO, ILL., January 7, 1921.

Dear Sir—January 1 being the 50th anniversary of my marriage, I was very much surprised to find out on the eve of that day that I had been accumulating one gold dollar for each year of that period, to get, all in a lump, as a token of good will, from fellow employes, who, through Superintendent Nichols and friends, called on me while at work.

My wife and I wish through the MAGAZINE to give our sincere thanks to all, and we hope that at some future day we can surprise some other employe on a similar occasion.

Yours truly,

(Signed) D. O'LEARY,

Timekeeper, Transportation Department.

R. A. Barlow, general yardmaster, has been appointed assistant trainmaster with headquarters at East Chicago. We hope that he will continue on his forward march! H. F. Anderson, our well-known yardmaster at East Chicago, has been appointed general yardmaster with headquarters at Blue Island. Mr. Anderson is a very ambitious young man who has worked his way up from a helper in yard service to his present position. Go to it!

C. Haugh, our former day yardmaster, Whiting, is sporting a big front as the proud papa of a 7-pound boy. Mr. Haugh was recently appointed day yardmaster at East Chicago.

Miss Loretta Grogan, Yard office, Robey Street, whose picture appears herewith, has no more use for Western Union clocks; she is now displaying a platinum wrist watch, one of her many Christmas gifts. Incidentally, she and F. McK. are rather "clubby."

W. G. Kennedy, accountant, Master Mechanic's office, has been promoted to assistant chief clerk, East Chicago, vice G. S. Smith, resigned.

F. J. Rosenberg, roundhouse foreman, who has been sick of pneumonia and pleurisy, has returned to duty, and is also back on the bowling team. If you don't believe us, ask the engineers.

The Bowling League is still in progress, with the Maintenance of Way team in the

lead and the Motive Power Supervisors following close at their heels. Go, Maintenance of Way, go! Here are the Car Record bowlers, reading from left to right: Peterson, Ruth, Wilmsen, Woods and Whitmer.

Charles Johnson, Car Accountant's office, may be short in stature (measuring about four feet ten inches), but he is a big man in the Car Accountant's office. Mr. Johnson has been employed by the Baltimore and Ohio Chicago Terminal for 31 years, having entered the service in 1889, serving with the Chicago and Northern Pacific and Chicago Terminal Transfer Railroad Company during their existence, and is still on the job every day bright and early with us. Wish you many more years, Mr. Johnson.

E. H. Taheny, Accounting Department, has not been himself for some time past. Explanation was given in his announcement December 16 of the arrival of a daughter. Mother and daughter?—Fine!

It is reported that our indoor baseball league is going to take up lotto to get in shape. They have been on the small end of the score for every game. However, they played the A. T. & S. F. team on December 15 for the benefit of the *Herald and Examiner* Christmas Fund. The victory was largely due to our business manager, Charles Stewart, who vamped all the opponents' female rooters, and after the game satisfied the girls by shaking a wicked shimmy. Charles! Shocking!

"Bill" Smithson, messenger, Superintendent's office, is training for the coming ice skating tournament. Go to it, "Bill," we're all with you.

"Bill" Hofford, junior accountant, Robey Street, recently became the daddy of a baby boy, weighing about nine pounds. "Bill" claims the youngster is destined to be heavyweight boxing champion, but for some reason or other wife dear disagrees and is of the opinion that he will be president; however, if he follows in the footsteps of his daddy his parent will be mighty proud of him, for "Bill" is a favorite among his associates.

Extra! Bad accident to A. Wilmsen, home route clerk. While on a southbound Rock Island train recently he accidentally ate his railroad ticket, for a cracker.

Bowlers, attention! Have you seen our standing in the League? Well, we have a nice handicap to look forward to. Watch us go; next round—the Stores Department.

Former Dispatcher C. F. Williams, second trick, Chicago Heights, was transferred to Harvey Junction, first trick, relieving Harvey Zimmer, who is on the sick list.

Carothers, Hogan and Bender, supply train, cleaned up every nook and corner of all buildings, everything having the appearance of scrap iron or non-usable material being loaded. They left us only the stove door and one pinch bar.

Claim Prevention is Agent E. J. Boyle's big hobby. "A little care may save the

Railroad hundreds of dollars. Please be careful," is his daily slogan.

Cyril Steffick, sealer at this station, is on the sick list. We hope he will soon be up and about.

Two middle-aged ladies, Irish by consent, were returning from a funeral in Buffalo recently. They chanced to cross Shelton Square at noon as the chimes of St. Paul's Church were sweetly ringing "Nearer My God to Thee."

Mrs. Duffy leaned over to Mrs. Casey, who is deaf, and said, "Don't the chimes sound beautiful?"

"What's that?" asked Mrs. Casey.

Mrs. Duffy repeated in a louder tone, "I say, don't the chimes sound beautiful?"

"What's that you say?" Raising her voice still higher, Mrs. Duffy reiterated: "Don't the chimes sound beautiful?"

This time Mrs. Casey leaned over and replied, "Them d—n bells are making so much noise I can't hear a word you say."

Some of our young ladies are taking swimming lessons and we hope to produce a second "Annette Kellerman" before long. I wouldn't mention any names, but for further information you might inquire of the blonde stenographer of the Maintenance of Way Department.

At the present writing, H. McDonald, track supervisor, is on the sick list. We surely miss "Mac" and hope he'll soon be back with us, as fat and "sassy" as ever.

P. H. CARROLL, *Signal Supervisor*, Garrett, Ind.
W. C. ADDY, *Willard, Ohio*
FLORENCE E. SMITH, *Freight Office, Chicago*

General Freight Office

In conformity with decision of the Interstate Commerce Commission in Ex Parte No. 74, freight rates throughout the United States were advanced, different percentages being applied in different territories and on through traffic also. Advances on intrastate traffic do not, in many instances, conform with those allowed by the Interstate Commerce Commission, and this results in disputes between carriers as to proper divisions to apply on traffic and is manifested at Chicago probably more than at any other point.

In order to keep the clerks (upon whom it devolves to execute the actual transactions) in contact with questions as they arise it was suggested that those interested in our local freight offices at Chicago meet at noon each Tuesday with clerks in the General Freight

office, where free interchange of views would be made.

The first meeting was held on Tuesday, January 4, from 12.00 to 1.00 p. m., during which time a light luncheon was served. There were about 20 present and the subjects discussed were as follows:

SUBJECT No. 1—Proportions east of Chicago on westbound trans-continental traffic originating in New England territory.

SUBJECT No. 2—Business to interior Iowa points on which the rates to east bank Mississippi River points are lower than to west bank Mississippi River points; through charge, however, being based on combination to and from the west bank points.

SUBJECT No. 3—Divisions of present joint through rates from Trunk Line territory to Minneapolis and St. Paul.

We do not expect to confine these weekly conferences to discussion of rates and divisions established incident to the decision of the Commission in Ex Parte No. 74. Other knotty questions will be discussed, the idea being that clerks in one department will get the viewpoints of clerks in other departments regarding rates, rules and practices.

I am sure these conferences will not only prove interesting and instructive to all who participate but will aid in gaining the closer cooperation and furthering the efficiency which are so essential to the success of the Baltimore and Ohio. If our Company is successful we must be, and we can be by applying ourselves to our jobs, being courteous and diligent and rendering the best that is in us to our work.

NOTE—Here's one on the correspondent, which was sent us by some of her friends. We hate to lose our correspondents, but—if congratulations are in order, we follow with ours. —Editor.

Congratulations

By M. L. Blackwell

There is a little Smith named Florence
Who's receiving good wishes in torrents,
'Tis a ring, as you see,
And no more Smith she'll be
When Frank, from Tomah, claims Florence.

Garrett

January 3 was a gala day for Division 153, Brotherhood of Locomotive Engineers, the occasion being the joint installation of officers and the celebration of the golden wedding anniversary of Mr. and Mrs. H. S. Wright. After the installation of officers, Sister J. L. Harrigar, presiding at the piano, played the Wedding March while Mr. and Mrs. Wright marched to the altar, where Brother O. O. Stoner, acting as minister, stood in waiting. There they renewed the marriage vows made so many years ago.

After the ceremony a bountiful dinner was served, Sister Wright first asking the blessing. The principal feature of the dinner was a huge wedding cake, which was cut by Sister Wright with the same ability which she displayed 50 years ago. The members of the division and auxiliary then presented the happy couple with \$20.00 in gold. Mr. and Mrs. Wright were married at Clyde, Ohio, in 1870, came to Garrett in 1875, where Mr. Wright has been employed by the Company ever since as fireman and engineer. He was running one of the fast passenger trains when pensioned. He has been a member of Division No. 153 for 48 years, having filled every office except that of chief, and is at present chaplain. Eight children have been born to them, four of whom are living.

South Chicago

Friends of Henry Caprez will be very sorry to learn of his death, which occurred on December 12, after an illness of consider-

Pick them out! Car Record Bowlers—Chicago Terminal

able duration. Mr. Caprez was a Veteran, having been in the service since the year of 1884, and pensioned for the past eight years. He leaves, to mourn his death, his dear wife and many, many freinds. Our sincere sympathy is extended to the bereaved ones.

We are sorry to lose F. A. Nagel, chief clerk to J. E. Quigley, general foreman at South Chicago. He has accepted a position at Pittsburgh, Pa., under the supervision of Division Accountant Tutwiler. We wish him much success in his new position.

At the same time we welcome J. M. Skilling, who has succeeded Mr. Nagel in the capacity of chief clerk to Mr. Quigley. Mr. Skilling was formerly motive power timekeeper at Garrett, Indiana.

There is a rumor that our confirmed "batch" is soon to become a benedict. Who? Why Louis Stack, of course. Perhaps our next issue will have more complete information. Are we all invited to the wedding, "Louie"?

Miss Catherine Donnelly, our coal clerk, is leaving on a furlough, and we understand she intends to make a slight change—in her name. To be continued—next issue. Tell us all about it, "Cass."

LaVerne Thompson is ill of a bad attack of influenza. We are sincerely sorry and all hope for her speedy and complete recovery.

Ohio Division

Correspondent, A. E. ERICH, *Secretary to Superintendent*

H. E. Coffey, former agent, Loveland, Ohio, has been appointed supervising agent, Illinois Division. Mr. Coffey is well known by the employees on this division, who wish him success in his new position.

It is with great regret and profound sympathy that we announce the death of one of our well known and popular employees, "Pat" Clark, supervisor. "Pat" had been ailing all summer with kidney trouble, which ended in chronic Bright's disease, which caused his death on Sunday, December 12. Mr. Clark was born in Mayo County, Ireland, on May 28, 1858. At the age of nine months his parents brought him to America and settled at North Vernon, Ind., where at the age of 15 in February, 1874, he entered the service of the Baltimore and Ohio as trackman. In July, 1906, he came to the Ohio Division as supervisor at Hamden; was transferred to Athens in the same capacity in April, 1915, and on September 1, 1917, was made supervisor of the Fourth sub-division with headquarters at Washington Court House, in which capacity he served up to his death, a service of almost 47 years. His wife preceded him to the grave one year and three months ago, after a lingering illness of two years. He is survived by two daughters, Margaret and Mary, and five sons, John, James, Dennis, Lewis and Thomas. The pall-bearers were: R. E. Chamberlain, division engineer, Ohio Division; H. R. Gibson, Toledo Division, engineer; L. A. Pausch, supervisor; E. Cole, supervisor; George Mitchell, supervisor; and G. F. Potter, ex-supervisor. "Pat" was extremely popular and widely known among the employees on this division, all of whom extend to the bereaved children their sympathy.

Stephen Flynn, crossing watchman at Loveland, passed away on December 13. Mr. Flynn has been in continuous active service of this Company over 52 years, entering as laborer on May 1, 1868. He was promoted to track foreman March 15, 1870, and to crossing watchman at Loveland,

February 1, 1892, in which position he served until his death. He was well known and well liked by all, who will miss his familiar figure at his crossing at Loveland.

Effective January 1, Division Engineer R. E. Chamberlain was promoted to division engineer, Toledo Division, headquarters Dayton, Ohio. It is with sincere regret that we lose Mr. Chamberlain. His pleasing personality won for him numerous friends on the Ohio Division, who wish him success in his new position. He is succeeded by J. H. Maher, former assistant division engineer, Cincinnati, whom we welcome on this territory.

The stork recently visited the home of George W. Myers and left an 11½ pound boy, who has been named George W., Jr. George, Sr., will now have his hands full instructing the young man so that he will be able to pass a first class examination for a good engineer, like his "dad."

We all extend our heartfelt sympathy to Claim Agent F. S. DeCamp in the death of his only daughter, at her home in Dayton, Ohio, on Christmas day.

Camp Sherman Yard Crew

It is with regret that we announce the death of Brakemen Joseph Zervis. On the morning of January 10, Mr. Zervis left Chillicothe on local No. 84, and while switching cars at Vigo, was killed. He had been employed as brakeman with the Company about six months and his tragic death bereaved his mother, five brothers and one sister, to whom our sympathies are extended.

A school for apprentices has been opened at Chillicothe Shop. It is well attended, all apprentices taking a lively interest and attending school two hours each day. Draughtsman H. O. Edmondson is the instructor, teaching mathematics and mechanical drawing.

Born to Mr. and Mrs. Harry McClain, a son. Mrs. McClain was formerly Miss Ethel Thomas, employed as clerk in the local Freight office, the employees of which wish to extend their congratulations.

Two Tiffany sparklers appeared on the proper fingers of two young ladies, respectively, when they reported for duty on the Monday after Christmas. One in the Storekeeper's office, Miss Grace Bennett, the other in the Freight office, Miss Wilda Graves. We are glad to see these cases, as they always foretell coming items for the MAGAZINE.

The accompanying photograph shows the Camp Sherman yard crew. They are, left to right: standing on bumper beam, J. Bennett, engineer; sitting on beam, "Mike" Shea, conductor; in the center of beam, F. Collins, brakeman; R. Ridley, fireman. Left to right: on step, J. R. Ford, yard clerk; on coupler, F. Offenbecher, brakeman; S. Metcalf, watchman.

This crew handles all supplies and troops within camp limits. All of the crew are ex-

railroad men. Engineer J. Bennett has recently been discharged from the Army and is back working on the Monongah Division.

Say didn't we come out on top on the Western Lines,

And second place for the System in the "No-Accident Campaign."

Very good boys.

Every one of us did his best.

For our next—Let's have a "Fuel Conservation Campaign," to show the other divisions we handle more gross tons (which means more car miles) with less coal than they can.

Useful suggestions to our fellow workers will help.

Engineers and firemen on our division all try to save coal, but don't forget that our trainmen, carmen, and station forces can all help, too.

Let's do it boys, what do you say?

Bernard Corrigan, car builder, who has been on the sick list for the past two months, is still in serious condition. We hope for his speedy recovery.

In the "No-Accident Campaign" on the Western Lines, the Ohio Division JUST HAD to come out on top. The cooperation of each and every one and the teamwork displayed during the entire campaign could result in no other end.

The victory was celebrated in a pleasing manner at a four-course dinner held at the Warner Hotel, Chillicothe, on the evening of December 16. Members of both division and shop Safety committees were present and a representative number of employees from each department.

On entering the lobby the guests were met by the committee in charge: T. E. Banks, trainmaster; R. E. Chamberlain, division engineer; C. E. Francis, division accountant, and William Allison, district safety agent, who presented each with a small white ribbon bearing the words "Guest, Ohio Division Safety Committee, December 16, 1920, No-Accident Campaign Dinner."

The decorative plan, while simple, was very effective. The big blue, white and gold pennant, which we received, was conspicuously displayed in the dining room, where it could be seen by all. It could not help but bring to mind that perhaps at least ONE life had been saved and considerable suffering to fellow employees averted, through the efforts displayed during the Campaign; also the thought that SAFETY should stand first in every employee's mind, not only during any particular campaign, but then, now and always.

The dinner was excellent. Red, pink and white carnations were given as favors. An orchestra played at intervals during the dinner until time for the speeches. The various speakers were at their best.

OUR superintendent, R. W. Brown, acting as toastmaster, after coffee and cigars had been passed, gave a few preliminary remarks on the "No-Accident Campaign" and benefits derived therefrom. He thanked all for the cooperation which made the winning possible. He read a telegram from Vice-President C. W. Galloway, expressing his regret at being unable to attend, and spoke of several others who had expressed their regret at their inability to attend.

The first speaker was Mayor Story, of Chillicothe, whose father was the first paymaster of the old M. & C. (Marietta and Cincinnati) Railroad. Mayor Story gave a pleasing talk on cooperation and teamwork.

Many favorable comments were made on the vocal solo, "Whispering," rendered by Miss Bertha Streitenberger, stenographer to chief clerk to superintendent, and also on the accompaniment, by Miss Edith Woodall, stenographer to division engineer.

Superintendent of Safety John T. Broderick was the next speaker. He began by calling for three standing cheers and a tiger for the Ohio Division, which was heartily given. He gave an interesting talk on the object of the "No-Accident Campaign."

H. H. Bennett, editor of one of the daily papers in Chillicothe, and who is an ex-railroad man, was the next on the list. He gave a talk on early railroad-ing and of the changed conditions, making the remark that the only Safety law (and this was unwritten) which they had during his railroad career was, "In case of an accident, if you have time, JUMP." He also spoke of the decided decrease in accidents now as compared with that time.

Colonel Richard Enderlin, president of the Carbondale Coal Company, the only medal of honor (presented by the Government) man in Ross County, next gave a very humorous talk on experiences with railroads, keeping all present in a continuous roar of laughter.

Superintendent R. B. Mann, Toledo Division (the winner of the pennant last year and our nearest competitor in this race on the Western Lines), in his talk brought congratulations on our success.

H. L. Denton, general superintendent Police Department, congratulated us on the winning of the pennant and remarked that the police should and would have been winner among the departments if it had not been for one of his men disobeying orders and coming out from under cover and getting himself shot, thereby putting his department second.

This ended the speaking program and the enjoyable evening closed with the singing of the "Star-Spangled Banner" by all present.

Joseph J. Hill

After having passed his 75th milestone, Joseph J. Hill, former engineer, ended his run at his final terminal in life when he fell into everlasting sleep on Sunday, December 26. Mr. Hill was one of the oldest engineers on the Ohio Division, having retired from service many years ago. He was born at Frankfort, Ohio, on August 10, 1845. In 1870 he married Miss Elizabeth Milligan, whose death occurred two years ago. On August 15, 1872, he entered the service of the Baltimore and Ohio as fireman. Shortly afterward he was promoted to engineer, in which capacity he served until June 25, 1911, when he was retired on pension. He was a member of the Brotherhood of Locomotive Engineers, a prominent Knight Templar, and a member of Trinity M. E. Church.

Signs of a full larder

Some Illinois Division employes (see note)

Indiana Division

Correspondent, H. S. ADAMS, Chief Clerk to Superintendent

The accompanying photograph is of Agent J. V. Huffington, Holton, Indiana, with his two hogs. These hogs weighed on an average of 403 pounds each, two days after this was taken. Mr. Huffington believes in having a well filled larder—and so do we who envy him. Sausage, ham, bacon, lard, pigs' feet! Yum! Yum! We're coming around some day this winter.

Illinois Division

Correspondent, OMER T. GOFF, Secretary to Superintendent

In the accompanying group of four pictures are: With yard engine No. 1559, Switchmen George Batchelor and W. E. Catt, Foreman P. E. Rice, and, at top, Fireman C. Traylor and Engineer "Mike" Toohey; with yard engine No. 2513, Engineer J. C. Reed, Switchmen G. A. Smith and F. C. Berry, Fireman J. E. Gilley, Patrolman Franklin; group of four, Engine Herder H. O. Pipher, Second Trick Operator M. F. Weshinsky, General Yardmaster R. C. Davis and Chief Yard Clerk G. I. Pride; group of three, Illinois Division Trainmaster K. S. Pritchett, Master Mechanic E. J. McSweeney and General Yardmaster R. C. Davis.

General Freight Office

Correspondent, FRANCIS PIGLOSKY

C. W. Browder, our star performer on the General Office Bowling Team, will be greatly missed, having been appointed division freight agent, Kansas City, Mo., effective January 1. Our cheer leader, F. G. Stebbins, formerly division freight agent at Kansas City, will likewise be sorely missed, having been moved to Dallas, Texas, where he will represent the Baltimore and Ohio as division freight agent.

Mr. Stebbins honored us with his presence for one day on his way from Kansas City to Dallas. We always enjoy his company and

while we had no "drapery" to show him on that occasion we hope to have something to please him on his next visit.

Our bowling engagements with East St. Louis have netted us a series of defeats; however, now that Mr. Haack has been relieved of his arduous duties, Mr. Bradley resuming his old stride, and an application of white-wash having been applied to Mr. Bollman's bowling shoes, highly favorable results are anticipated during future engagements, particularly in view of Mr. Cannon's disinclination to prolong arguments and the securing of much needed sleep that was lost during the various holiday festivities in which he participated.

Can Mr. Bollman explain the disappearance of the pretty calendar that once hung in his office, or is Mr. Fry more capable?

Miss Frances wants to know if C. W. Browder hasn't forgotten something. (Say it with —.)

SOLVED: How some of the young men in the office catch colds. Standing in [the] back yard too long with their girls. Is she still mad, "Bob"?

East Dayton, Ohio

Correspondent, EDWARD MANNIX

Soon Spring will be with us. Already our general foreman, W. A. Gilmore, is getting ready to brighten up the shops and roundhouse as is our usual custom.

The writer had the honor of being appointed on the general Safety Committee, and the first meeting that he attended left an impression upon him of the great and noble work being accomplished by the committee. It will be the aim of the committeemen not to stop their work until every man here becomes a "Knight of Safety First."

A great many of the boys at the shops had the opportunity of going home for the holidays. All have returned, after enjoying the season with their loved ones, finding everyone happy, and enjoying the blessings of good health.

It is with sorrow that we learned of the death of the mother of Horace Bethel, our air inspector, third shift. Her death occurred recently at Louisville, Ky., after 70 years of a good and useful life.

The accompanying photograph is of train and engine crew. Reading from left to right: Conductor McCarthy, Switchman Brown, Switchman Harr, Engineer S. J. Cook and Fireman Cress. Engineer Cook is the oldest engineer in service on the Toledo Division, having been with the Company for 56 years and still running an engine.

Oldest engineer on division, and his crew

Knew Where They Were

"I'll give you five dollars a day spot cash," said the farmer to the tramp who had stopped to beg a meal, "if you'll help me dig potatoes. We'll begin right now," he pointed at the big field, "because I'm afraid the frost will get them."

"No," yawned the tramp. "You'd better dig 'em. You planted 'em, and you know just where they are."—*Thermoid News.*

At a big railway station a four year old youngster wonderingly watched the man step out on the balcony and call the stations of the outgoing train through a megaphone. When the announcer finished and resumed his seat the youngster pulled at his mother's hand "Oh, mama," he said, "ask the man to sing another song!"

Safety First

Pat was employed by a subway company. As he was leaving the house his wife said: "Do moind yez don't git hurt, Pat, it's so dangerous working in that subway." "That's all right, Biddy," Pat replied. "I borrowed two dollars from the foreman and he won't let me do dangerous work any more."

One Advantage

"Why do you feed every tramp who comes along? They never do any work for you."

"No," said his wife, "but it is quite a satisfaction to see a man eat a meal without finding fault with the cooking."—*Philadelphia Watchman Examiner.*

Furnish Your Home for 20c a Day

Now you may furnish one room, or a whole home on the most convenient terms imaginable. Take 18 months to pay for Furnishings bought on this new Factory-to-Family Plan. Payments as low as 20c a day. **1000 Larkin Home Furnishings on Easy Monthly Payments**

Compare quality and price of Larkin Furnishings with those offered by others. Our quality is the highest. Our low Factory-to-Family prices will save you many dollars. Before buying your Furnishings this season learn about this offer.

Why Women Should Vote

He: "Of course women should vote. They deserve suffrage as much as men—more, because their minds are purer and cleaner."

She: "Of course their minds are cleaner, but how do you know that?"

He: "Because they change them so much oftener."—*London Opinion.*

On mules we find two legs behind

And two we find before;

We stand behind before we find

What the two behind be for!

—*Lafayette Lyre.*

Speaking of Speedy Nags

(From a Canadian Publication)

"Horses?" said the American. "Guess you can't tell me about horses. I had an old mare, Malzypop, who once licked our best express by a couple of miles on a 30 mile run."

"That's nothing," said the Canadian. "I was out on my farm one day, about 50 miles from the house, when a frightful storm came up. I turned the pony's head for home and do you know he raced the storm so close for the first ten miles that I didn't feel a drop, while my old dog, only ten yards behind, had to swim the whole distance."

Railroad Man's Knife \$1.00

Introduction Offer—Full sized sample of this knife with the emblem or design of the road of which you are a member placed under the handle will be mailed you for \$1.00 and this advertisement. For only 25 cents extra your name and address will be shown on knife. Size 3 1/4 inches long.

Easy Money \$75.00 to \$200.00

monthly. All or spare time. Railroad employees, your spare time can be turned into dollars with a little effort. **We Want a Sales Agent in Every Locality** to introduce transparent handle pocket knives and razors.

Under the handles can be placed the emblems of any Railroad or Labor Organization, Secret Society or Fraternal

Order. Also the member's full name and address on the other side. Blades, finest steel; handles, handsome as pearl, clear as glass and unbreakable. Every knife guaranteed to be perfect. Every railroad employee will want one as a mark of identification. We can also give permanent employment and exclusive control of territory to those who can give full time in taking orders from the general public. If you are earning less than \$1500.00 yearly, let us show you how to make more.

Nickel No Good

A little girl walked into a confectionery at Pendleton, placed a nickel on the counter and called for an ice cream cone.

"Ice cream cones are 7 cents, little girl," the fizz clerk announced.

"Well, then gimme a soda pop."

"Six cents."

"Got any root beer?"

"Yep, 6 cents, too."

The little girl sighed disappointedly and started out, leaving her nickel on the counter.

"Here, little girl, you're leaving your nickel," the clerk called to her.

"Oh, that's all right," the child shouted back. "It's no good to me—it won't buy anything!"—*Exchange*.

Rightly Named

Aunt Liza's former mistress was talking to her one morning, when suddenly she discovered a little pickaninny standing shyly behind his mother's skirts. "Is this your little boy, Aunt Liza?" she asked.

"Yes, miss, dat's Prescription."

"Goodness, what a funny name, auntie, for a child! How in the world did you happen to call him that?"

"Ah simply calls him dat becuz Ah has sech hahd wuk gettin' him filled."—*Success*.

Mr. Tarzan Jones was sitting down to breakfast one morning when he was astounded to see in the paper an announcement of his death.

He rang up friend Howard Smith at once. "Halloa, Smith!" he said, "Have you seen the announcement of my death in the paper?"

"Yes," replied Smith. "Where are you speaking from?"—*London Weekly Telegraph*.

"I say, Old Bean, was Klingie at the Club last night?"
"Yes."
"Was Schlick with him?"
"He was?"
"Awfully sorry to bother you, Old Top, but was I with them?"

That Dreadful Publicity

A certain young man entered a newspaper office recently. "I was intensely shocked," he said, "to read in your paper a notice of my engagement. I cannot tell you how shocked I was. I was positively chagrined. My fiancée was positively chagrined. We were all chagrined. How much for 50 copies of the paper?"—*Exchange*.

You Need These Books

PRETTY soon you will be called up to take your examination and you will have to face a lot of hard questions. Better brush up a little. Our books contain every question with its answer you are likely to be asked by the examiner. They are the only complete railway books issued giving up-to-date, reliable information. Don't put off until examination day comes, but send for the following books at once:

Westinghouse E T Air Brake Instruction Pocket Book Catechism. By Wm. W. Wood, Air Brake Instructor.

A practical work containing examination questions and answers on the E T Equipment. Covering what the E T Brake is. How it should be operated. What to do when defective. Not a question can be asked of the engineman up for promotion on either the No. 5 or No. 6 E T Equipment that is not asked and answered in the book. If you want to thoroughly understand the E T equipment get a copy of this book. It covers every detail. Makes Air Brake troubles and examination easy. Fully illustrated with colored plates, showing various pressures. **\$2.50**

Locomotive Breakdowns and Their Remedies. By Geo. L. Fowler.

Revised by Wm. W. Wood, Air Brake Instructor. It is out of the question to try and tell you about every subject that is covered in this pocket edition of Locomotive Breakdowns. Just imagine all the common troubles that an engineer may expect to happen some time, and then add all of the unexpected ones, troubles that could occur, but that you had never thought about, and you will find that they are all treated with the very best methods of repair. Walschaert Locomotive Valve Gear Troubles. Electric Headlight Troubles, as well as Questions and Answers on the Air Brake, are all included. 294 pages. Fully illustrated. **\$1.50**

Train Rules and Train Despatching. By H. A. Dalby.

Contains the standard code for both single and double track and explains how trains are handled under all conditions. Gives all signals in colors, is illustrated wherever necessary, and the most complete book in print on this important subject. Bound in fine seal flexible leather, 221 pages. **\$1.50**

Walschaert Locomotive Valve Gear. By Wm. W. Wood.

If you would thoroughly understand the Walschaert Valve Gear, you should possess a copy of this book. The author divides the subject into four divisions, as follows: I—Analysis of the gear. II—Designing and erection of the gear. III—Advantages of the gear. IV—Questions and answers relating to the Walschaert Valve Gear. This book is specially valuable to those preparing for promotion. Third edition, revised and enlarged. 245 pages, fully illustrated. Cloth. **\$2.50**

Air Brake Catechism. By Robert H. Blackall.

This book is a standard text book. It is the only practical and complete work published. Treats on the equipment manufactured by the Westinghouse Air Brake Company, including the E T Locomotive Brake Equipment, the K (Quick Service) Triple Valve for freight service; the L High Speed Triple Valve; the P-C Passenger Brake Equipment, and the Cross Compound Pump. The operation of all parts of the apparatus is explained in detail and a practical way of locating their peculiarities and remedying their defects is given. Endorsed and used by air brake instructors and examiners on nearly every railroad in the United States. Twenty-seventh edition. 411 pages, fully illustrated with folding plates and diagrams. New edition. **\$2.50**

Practical Instructor and Reference Book for Locomotive Firemen and Engineers. By Chas. F. Lockhart.

An entirely new book on the locomotive. It appeals to every railroad man, as it tells him how things are done and the right way to do them. Written by a man who has had years of practical experience in locomotive shops and on the road firing and running. The information given in this book cannot be found in any other similar treatise. Eight hundred and fifty-one questions with their answers are included, which will prove specially helpful to those preparing for examination. 362 pages, 88 illustrations. Cloth. **\$2.50**

Link Motions, Valves and Valve Setting. By Fred H. Colvin, Associate Editor of *American Machinist*.

A handy book that clears up the mysteries of valve setting. Shows the different valve gears in use, how they work, and why. Piston and slide valves of different types are illustrated and explained. A book that every railroad man in the motive power department ought to have. Fully illustrated. New revised edition recently published. **75 CENTS**

Locomotive Boiler Construction. By Frank A. Kleinhaus.

The only book showing how locomotive boilers are built in modern shops. Shows all types of boilers used; gives details of construction; practical facts, such as life of riveting punches and dies, work done per day, allowance for bending and flanging sheets and other data that means dollars to any railroad man. Second edition. 451 pages, 334 illustrations. Six folding plates. Cloth. **\$3.50**

EASTER LILIES

By Margaret Talbott Stevens

Associate Editor, Baltimore and Ohio Magazine

The swarthy vender of many a luscious sweet,
Trundling his push-cart down a narrow street,
Came calling out his wares one winter's day—
Not fruits or candies, wrapped in colors gay—
But packages, all brown and bursting out,
That in the push-cart bumped and rolled about,
And like the grab-bags which the children buy,
Each seemed to say, "Come guess now, what am I?"

A bright-eyed maiden, pausing by the way,
Asked of the swarthy man in kerchief gay:
"What have you in those packets, bulged and brown,
Some new-made candies that you bring to town?"
The push-cart man, with teeth all pearly white,
First bowing to the left and then to right,
Doffed his worn cap, and with a practised smile,
Posed there before his cart, Venetian style.

"Leetla brown bulb for lady, fresha, sweet,
To planta in da window, near da street,
Lika da earth now—brown an' lumpy, some—
But mak' da lily when da Springtime come."
'Twas then the little maid thought of a plan—
"Have you one for a penny, Push-cart Man?"
The deal was made; a little ball of brown
Was tucked into the pocket of her gown.

Time crept along and soon 'twas Easter Day,
And "Christ is Risen!" all earth seemed to say
As through a chapel window sunbeams bright
Shone on a little maiden, clothed in white.
All 'round about the altar Easter flowers,
With fragrance hung in festoons, wreaths and bowers;
And first among the garlands white and fair,
One lily's perfume filled the morning air.

And had there been no other bloom to grace
The beauty of the altar, in its place
This one pure blossom, without song or word,
Had told the story of the risen Lord.
And, save for one of all who worshiped there,
None dreamed that such a lily, wondrous fair,
Had sprung from bulb as brown and dark as night,
Sold by a push-cart man with kerchief bright.

For 'twas a little maid with golden hair
Who nursed the brown bulb with her loving care
Until the first white shoots came peeping through;
Then watered it and gave it sunlight, too,
Until at last there came a glorious day
When all the scales and brown scars fell away,
Revealing there a lily, fragrant, white,
An Easter offering, glorious in His sight!

And thus it seems, that underneath the brown
Of many a human crust of scowl and frown,
Like Easter bulb, built on the selfsame plan—
Belonging to a king or push-cart man—
A human heart stirs, throbs and smoulders there,
Awaiting just a bit of loving care
To make it blossom forth and some time bring
Itself to Christ—an Easter offering.

Getting Business for the Railroad

By Practical Example These Employes Are Helping Bring Prosperity Back to The Baltimore and Ohio

IT is safe to say that every officer and employe of the Baltimore and Ohio, from top to bottom, sincerely regrets the present reduction in forces. We are all workers in a common cause, and the adversity of one of us is felt by all. The necessity for the reduction of forces, however, is as generally admitted as is the regret that it has been made.

The record of cars loaded and received from connections for January of this year as compared with January of last year, shows a decrease of about 25 per cent. In February of this year as compared with February of last year, the decrease was even greater, almost 30 per cent., as may be seen from these figures:

February 1920	February 1921
240,747	168,781

In October, 1920, the record of cars loaded and received from connections was 302,538, which shows that in the short space of four months our business has dropped almost one-half.

The January financial statement for the Baltimore and Ohio showed that we failed to earn our fixed charges for the month by more than \$1,000,000. Most of our readers know what a serious situation that indicates.

The empty freight cars for the seven day period ending February 23, numbered 30,000 more than at the end of the preceding seven day period, for all the railroads in the United States.

The figures speak plainly and put the question up to every employe of the Baltimore and Ohio: "What are you going to do about it?"

A good many of our employes have put this question up to themselves seriously, thoughtfully, hopefully, and have answered it in no uncertain way. It is not pleasant to talk about how bad our business is. We would much prefer to think about the good times that are predicted and which we confidently believe are not far off. But that isn't answering the question which the present conditions put up to us. The Railroad needs a surplus of effort from every employe at this time, not only in his own job—in economy and efficiency—but in the outside soliciting which he can do to bring business to our lines.

The easiest way is to say "Let George do it." The other way is to read the cases cited on this and the next pages, of how employes outside our Traffic Department have brought business to the Railroad, and then to go and do likewise.

The Baltimore and Ohio revenue amounted to \$128,700. I have another card out and hope to report favorably on it soon."

And the report did come soon and was favorable, for on February 25, Agent Allman was able to write Mr. Sullivan direct and say:

"Herewith card covering Pennsylvania car 25572—hay, which went forward on train 82 today—to Cincinnati, Ohio, waybill L-24, February 25.

"Delivery on competing road was preferred on this car; car had been ordered on that line and would have been placed at noon today for loading. We had two cars of merchandise at freight house and by expenditure of considerable hard work and time, the clerk and I doubled up the cars, making one heavy merchandise car and securing the load of hay. This was very much appreciated by the shippers—J. M. Carmer Co., Fort Wayne, who agreed to give us some further shipments later."

This is one of the best letters we have yet seen in this System-wide soliciting campaign, for in it, Mr. Allman suggests all of the elements which tend to bring business to the Railroad and keep it there. First, his interest; second, his action in promptly soliciting the business; third, the service that he offered the shipper in order to get the business; fourth, the fact that the shipper was greatly pleased and has promised more business in the future.

If we could multiply the business which Mr. Allman, a single Veteran, has secured, by the many thousand Veterans who can solicit for the Railroad, what a splendid increase we would have. It would not be long before all our locomotives would be in use and the wheels humming merrily in all our shops.

Chicago Division Veterans Rounding Up New Business

J. M. TRIMBLE, president of the Chicago Division Veterans, has been one of the most active of the presidents of the Veterans' chapters in urging the members of his chapter to get business for the Railroad during this period of subnormal traffic.

Mr. Trimble has sent out the return postal cards furnished for the Veterans by our Traffic Department, on which they are expected to give advance information of any prospective business which can be properly solicited for the Baltimore and Ohio. The replies he has received have been encouraging, some of the Veterans sending in for additional postal cards.

D. D. Kaup, agent at Fostoria, Ohio, wrote Mr. Trimble on February 9 and said in part: "The post card scheme is the best plan to get business that has come along this

Road yet and you can rest assured that Fostoria will do its part."

W. P. Allman, agent at Avilla, Ind., wrote Mr. Trimble on February 17 as follows: "I forwarded Division Freight Agent D. E. Sullivan, of Chicago, part No. 2 of Veterans' card covering one car grain received from elevator located on G. R. & I.

Chance Started But Did Not Finish This Interesting Bit of Solicitation

CHANCE started but did not finish this interesting bit of solicitation which took place in one of the largest cities on our lines, within the last two months. It is related by an employe:

"While lunching with some friends recently, through one of them I met a man who was eating at a neighbor-

ing table. I was introduced as an employe of the Baltimore and Ohio and he was immediately interested. He said:

"My dad used to work for the Baltimore and Ohio; now he is retired. But I am still interested in the property, and maybe you can do something in this case. The Blank

Company (and he mentioned the name of one of the largest wholesale chemical houses in the city) is sore at the Baltimore and Ohio. They had an unfortunate misunderstanding about the way some of their business was handled and since then you haven't been able to get any of it. They ought to use your Road because their factory is right along your line. Instead they ship over another railroad at considerable inconvenience. Why don't you get after it?"

Be a Booster for the Baltimore and Ohio

W. P. Cahill

Transportation Representative, Western Lines

LOYALTY on the part of the employes of a corporation is that corporation's one big asset, the real power behind the machine that turns out the commodity, whatever it may be, that is to be sold.

A railroad corporation deals in service, one of the hardest commodities to sell. Is it not desirable then, that employes of a railroad be willing at all times to impress upon the ever critical public that their own particular railroad is the best, the most painstaking, the most regardful of the public's convenience?

The writer was recently traveling from St. Louis to Cincinnati on the Big Four, and during the trip talked with a man who seemed to be especially enthusiastic about "his" railroad, as he called it. Everything he said tended to impress upon the chance listener the fact that "his" railroad was the finest in the country, that he was pleased with his working conditions. He spoke highly of his superiors, and in all, he was an invaluable asset to his company as an advertising medium, this boilermaker of the Big Four, whose home is in Cincinnati.

Again the writer talked with a railroad employe. This time the scene was the Union Station at Toledo. An employe of the Baltimore and Ohio was waiting for his train when I approached him and asked how No. 55 was running; rather grumpily he said, "Forty minutes late." To the question, "Do you think she will make up time between Toledo and Cincinnati," his reply was, "Don't think so, the Baltimore and Ohio never makes up time."

Of course, he misinformed me, for our trains have an enviable reputation for being on time and I know that they often make up time. Of course, also, he was not a typical Baltimore and Ohio man, but an exception, and I hope that his grouch was only temporary. If not, he must

"I thanked my informant and as soon as I got back to my office, telephoned our division freight agent, and told him the story. Several days later I was gratified to learn from him that the matter had been satisfactorily adjusted between the shipper and the Railroad and that thenceforth we would get the business."

Note in conclusion that the business of this concern means additional revenue to the Baltimore and Ohio of many thousands a year.

be an awful gloom to work with. But he was a well-dressed, intelligent-appearing individual who, from ob-

servation, I would say, held a position of responsibility. And yet he was ready with his little hammer to give his Company a reputation for poor service and general disregard for public good, which is entirely false.

I do not attempt to point out a lesson or a moral in this little tale. I have been an employe for the Baltimore and Ohio for 30 years and in all my experience I have found that it measures up to the standard of any other great trunk line in the United States.

I also have learned that it is the spoken opinion of our own employes that largely sways public opinion and trade for or against us. Why not, then, all of us, everywhere, take a lesson from the boilermaker and boost the Baltimore and Ohio at all times!

A Bite from Big Fish

A COUPLE of weeks ago I went into a Baltimore restaurant for lunch and, the place being crowded, I was given a seat at a table

with two other men, strangers to me. I could not help hearing a part of their conversation and after learning that one of them was going to Chi-

Springfield Republican, Nationally Known New England Newspaper, Picks Out Baltimore and Ohio Dining Car Service for Favorable Comment

In an editorial, "Food Prices in Various Places," the Springfield (Massachusetts) *Republican*, one of the leading newspapers of the entire country, singles out Baltimore and Ohio Dining Car Service in these pleasing words:

"Among eastern roads the Baltimore and Ohio stands high in the estimation of discriminating travelers for the quality of food served in its dining cars and the kindly courtesy of the attendants. This road handles the heavier part of its passenger traffic west of Washington, but it nevertheless operates 14 trains a day into and out of New York, and 12 of these carry dining cars. It, therefore, comes up to the edge of New England, but not into New England.

"On this road at present a commercial travelers' club luncheon or dinner is served for 75 cents; a Baltimore and Ohio special luncheon or dinner for \$1.25. While one can pay \$1.35 for fried chicken a la Maryland, one can get plenty of dishes for 65 cents. Among the accessories, coffee costs 20 cents and Maryland corn muffins 10 cents. There is, in short, an ideal combination of a la carte and table d'hôte in the same car, and all purses are suited."

Though our Dining Car Department receives thousands of complimentary letters every year, this comment, part of an editorial in a leading newspaper published in territory foreign to our lines, is particularly gratifying.

We know that it will be an incentive to every man connected with this important part of our service to make 1921 excel all past years in the satisfaction it brings to the patrons of our dining cars.

eago that afternoon I waited for a lull in their conversation and said,

"Pardon me, but may I ask on what railroad you will make your trip to Chicago today? I am an employe of the Baltimore and Ohio and would like to have you try our Road."

We talked for the rest of the lunch hour, the men proving to be, one the vice-president, and the other sales manager of one of the largest wholesale drygoods houses in Baltimore. Unfortunately the V. P., who was going to Chicago, had had his reservation made by a traveling companion for that day over the line of our competitor, but he promised me that they would both come back on the Baltimore and Ohio. He also told me that he was going to buy a

large number of cattle in Chicago to stock his 2500 acre farm in Virginia, and I gave his name to one of our traffic men to see if we could not get a part or all of this haul.

I can't say that we got a penny of business because of my solicitation, but I feel confident that we got two first class fares from Chicago to Baltimore at least, and that having tried the Baltimore and Ohio, the two travelers will be predisposed to use it again because of the splendid service we are giving. Finally, I am sure that our impromptu conversation helped our Railroad because I unconsciously imparted my conviction to them that we have the service and that we want to prove it to an increasing number of people—*Employe.*

Honorable Mention for Employes White, Foxwell, Davis and Weldin

OUR Traffic Department is hard after our agents and their forces to get business, a good illustration of what is being done being submitted by W. F. Richardson, general freight agent, Baltimore.

Mr. Richardson and G. S. Harlan, division freight agent at Baltimore, had been studying the traffic situation

and had decided that one of the best ways to get more business was to appeal direct to the employes under the supervision of the various freight agents, those men who actually handle the shipments of our customers and are in close personal touch with them. Here Mr. Harlan found that he had live wire helpers in

Freight Agent White at Wilmington, Del., and some of his men. For the force there took hold in good shape, as will be seen from the following paragraphs of a letter from Mr. White to Mr. Harlan, dated January 31:

"Warehouse Foreman Foxwell secured a shipment Saturday last from the Blank Company, going to St. Louis, and weighing 3,500 pounds, by taking up with the shipping clerk and advising him that we would have a direct through car and give him quick service."

"O. S. & D. Clerk Davis, being closely connected with an employe who has to do with the routing of freight for the Blank Company (one of the largest shippers in Wilmington), has secured advance information on several occasions of shipments that are to be made by this firm so that proper solicitation can be made. This has resulted in our securing some business that we might not have secured."

"Rate Clerk Weldin secured a shipment of 20,000 pounds on Saturday last, that would have moved from Wilmington via another line, had this clerk not been on the alert and advised shippers, the Blank Company, that they could save by using our line. They had already forwarded one load of this freight to a competing railroad, but the balance went Baltimore and Ohio."

Mr. Receiving Clerk, Mr. Checker, Mr. Gang Foreman on the Platform—are you letting similar opportunities slip by? It isn't hard to get the business once you make the effort. And your friends and acquaintances will thank you for introducing them to the Baltimore and Ohio.

Poetry Helps Economy Drive at Connellsville

Master Mechanic Long, Connellsville Division, advised a committee of employes that they had exceeded the material allowance at Connellsville some \$9,000. One of the employes posted the following on the bulletin board:

"AN EXCESS OF NINE THOUSAND DOLLARS, LET US REDUCE IT TO NOTHING"

If you are in need of a nut or two
An engine to repair,
Please use reclaimed material
And treat the Company square.

When you jack up an engine
A spring hanger to replace,
Please try to use a reclaimed one;
Save the Railroad that much waste.

When taking out a cotter pin,
Don't throw it on the floor,
But use the old one over again,
Then you won't have to draw any more.

When you cut down an old front end,
Don't hide the main rod key,
'Twould mean the cost of a new one,
As you can plainly see.

When you have use for a hammer,
Don't use your monkey wrench instead;
These tools cost the Company money,
Costs drop when we use our heads.

Our watchword now is "SAVE"—
We will try to do our bit,
And reduce that nine thousand excess
So our shop will make a hit.

Got a Nice Home Through Relief Department

BRUNSWICK, MD., December 29, 1920
MR. W. J. DUDLEY,
Superintendent Relief Dep't,
Baltimore, Maryland.

Dear Sir—I acknowledge receipt of papers received from you December 16. I wish to extend my sincere thanks to the Relief Department for the many favors they showed in my transactions with them and must say that I don't know of any better way for a railroad man to acquire a home than through the Relief Department of The Baltimore and Ohio Railroad Company. I have a very nice home now and thank the Relief Department for it.

Wishing you all a very happy and prosperous New Year.

(Signed) WILLIAM H. BURKHOLDER,
Assistant Foreman.

The Man Who Waited

By Frank Kavanaugh

BILLY SIMMONS hit Merced, dirty, ragged and generally "out at the heels." But the Transcontinental was short of men then, and he was hired. With 20 stock trains being rushed East daily to accommodate the herds that were fleeing from the drouth, almost anyone who was experienced could get a place on the extra board.

Fennessey, the conductor who caught Simmons on that individual's first call, chased up to the yardmaster's office and cornered Lon McClendon, who had the handling of the extra men.

"What sort of a d—d freak have you got me for a brakeman?" the conductor demanded. "I've sailed with all sorts of boomers in my days here, but it's a cinch this bird beats all of them!"

"He'll do for a trip or two, Fennessey," McClendon said, quietly. "I've never heard of you kicking a man when he was down—give this kid a chance. If you think he's carrying disease in those ragged clothes of his, lend him a suit. Anyhow, you try him out."

Fennessey left the office grumbling, went to the telegraph office after orders and a few minutes later waved his engineer a "high-ball" as the caboose rattled over the last yard switch.

McClendon heard nothing from Fennessey or his ragged brakeman for a month. They were working, he knew, but the conductor had not mentioned any faults he had to find. It was not until the cattle rush had subsided and the extra board was being "cut" that Fennessey visited the yard office again.

"About Simmons, that extra brakeman," Fennessey began, but McClendon interrupted him.

"We'll cut the extra board Monday, and that'll probably let him out," McClendon said, "and you'll—"

"But, Mac," Fennessey said, "that's what I wanted to see you about. That kid's all to the good, and if he's cut off I'll feel like quitting myself."

"Made good, eh?"

"With a vengeance."

"We'll see what we can do, Fennessey," McClendon said. "Lots of these extra men will lope out as soon as the extra board's cut, and if Simmons will stay around it's ten chances to one that he'll stick."

Simmons, his appearance but slightly improved by a new suit of

clothes, "stuck." He fought the extra board for a year, got a regular run and eventually was given the privilege of fighting the conductor's extra board. He was averaging three trips a week when he met Miss Finley, the "old man's" chief clerk. Simmons had been called upon the carpet and had come into the office awkwardly, feeling very much out of place. Miss Finley greeted him with a smile and asked his business. He told her.

"That has been settled," she said. "It was about that delay to No. 7 the other night. Apparently you were at fault for not heading in the switch at Overbrook instead of pulling through and backing in up the hill. However, we've had a report from the section foreman saying he had spiked down the switch points because of a loose frog and that exonerates you. So after all you will not have to appear and explain."

"Thank you, ma'am," Simmons said. Miss Finley turned to her desk, but the conductor did not move. She worked a moment and then turned to him.

"Is there anything I can do for you, Mr. Simmons?" she asked.

Simmons, who, a month before had entered a box car alone and ejected therefrom a gang of tramps who were riding, felt he had not the courage to go through with it.

"I—I—I—" He blushed through a coat of sunburn. "If we could be introduced—socially, you understand—do you suppose you would let me call on you some evening?"

"Why Mr. Simmons!" Miss Finley was past the giggling age, but she smiled. "Do you really want to call on me? Why?" The last word was shot at him suddenly. Miss Finley had heard her superior shoot the same question at an erring employee.

"I'd like to call," he said simply. Miss Finley laughed.

"Well, Mr. Simmons, since we are fellow employes in a manner, you can call on me next Sunday afternoon, say five o'clock. I'll make you some doughnuts, and my mother will do the rest of the cooking. I'm not as conventional as I once was, or, rather, I'm not a slave to conventions, for I'm nearly 26 years of age and have supported my mother since I was 18. I like your frankness and mother and I will be glad to have you call—Sunday at five o'clock."

Saturday afternoon, as soon as he had turned in his waybills, Simmons

treked up town, visited the savings bank and afterward a clothing store. Sunday morning he wore a new suit of clothes.

Miss Finley's doughnuts may have been extra good and the rest of the cooking equal to them, for Simmons visited the little home once a week during that summer. If he wasn't busy during the daytime he visited the mother while Miss Finley worked and appeared to enjoy it just the same. Those who watched speculated on whether it was the girl or the mother Simmons was after. Then, all at once the conductor stopped his visits, neglected to put on his fine clothes, and the neighbors wondered.

"It is no use," Miss Finley had told him, one day as they sat on the porch of her home. "I've passed many chances to marry, sometimes because I did not care enough for the man; sometimes because he had faults I could not condone. I like you, but what would a marriage with you lead to? You are an extra freight conductor. While I work I will make as much as you do; so what is the use of changing?"

"I may be promoted."

"You may be. Why not wait?"

"I will wait. I waited 10 years once to get even with a man. I can wait 10 years for you."

The dull season hit the Transcontinental. One week Simmons caught one run; the week after his name stood at the top of the extra board and he got nothing. The week following he caught one trip and then fell to the bottom of the board. He left town on an extra and was gone three days, coming in just about the time he was due to be called. All summer he did the same thing. Some said he wired McClendon from points down the road asking how many times he was out, and came in when his turn was near. But whether this was true or not, the fact remained that he never stayed in town when there was no chance of his being called. One day upon his return from a trip he met Miss Finley as she was leaving the office at the close of the day.

"Where have you been?" she asked.

"Out chasing a thing called promotion," he replied.

She smiled and went on.

Autumn came and with it a slight increase in traffic. There weren't any promotions, however, but Simmons worked almost regularly, so regularly, in fact, that he had no time for the mysterious trips up and down the road.

One day a special was scheduled to come over on an inspection trip. As soon as he heard of it, Simmons called on McClendon.

"Mac," he said, "who catches the special out from here west?"

McClendon looked at the extra list and said, "She'll come in after 40. You'll catch the 40 out of here and Richardson's next. He'll catch the special. There isn't a passenger man here to get it."

"If it's all right with Richardson, can we trade?"

"Sure. But what's the big idea? I know Richardson would sooner ride a caboose than that special. There's a lot of big brass collars on it, and they'll rawhide the conscience off a man."

"I'll see Richardson," Simmons said, as he went out.

Richardson gladly traded. The through freight run was nothing compared with the special. A little bobble and all the big men of the road would see it. He pondered over

Simmons's sanity and took the 40 west.

Simmons arrived, clad in a natty uniform, clean shaven and erect. He waited with proper dignity until the leading man of the party expressed a desire to leave town. Then he swung onto the car ahead of the observation car and—carefully washed his hands!

Twenty minutes later the special "took the hole" at a blind siding for a regular passenger train. Simmons closed the switch behind his train and placed a step so that any member of the observation car might come down to stretch his legs. The leader of the party chose to do so. He stood near Simmons and looked across the prairie to where the smoke of a locomotive on another road appeared.

"That is the G. S. & I., is it not?" he asked Simmons.

"The Coalville Branch, sir," he

replied. "The branch taps the coal fields."

"They get all that haul, then?"

"Yes, sir. They have an agent at the crossing, about two miles from here, too, and they get a lot of the grain tonnage of this vicinity. Our nearest agent is at Walker, five miles distant. Last year they got more than 200 cars, while we got but 40."

"Hm-m!" The big man looked sidewise at Simmons.

"How far the other way is it to one of our 'live' stations?"

"Six miles. We get the long hauls from there, but the G. S. & I. has a station three miles from there across the prairie. Farmers during the threshing season have to go there for their coal and they haul a great deal of the grain there, too. They doubled our tonnage last season."

The appearance of the regular train stopped the conversation and the big man climbed aboard. It was four hours later before another chance came. They were inspecting the station property at a small city.

Simmons took time from the train to send a message to Miss Finley:

"Not certain whether I am two or four hours from the station called Promotion."

The big men walked over the yards and property of the company with the local officials. One of the party stopped a moment to watch a new factory in the course of erection.

"What's that?" he asked one of the local men.

"Cement factory."

"That'll mean quite a lot of freight. What percentage will the Transcontinental get?"

"I don't know, sir," the local man replied. "We've got most of their machinery haul. The Midland, however, is building a switch into the factory and they'll get a share of the cement haul, of course."

"How many cars a month will the output amount to?"

"I do not know, sir."

"Their initial output will be about 300 cars a month," Simmons volunteered. One of the big men spoke sharply:

"What do you know about their affairs?"

"Mr. Brumbach, the local manager, is an acquaintance of mine."

"He's here now?"

"Yes, sir; if you care to come over I will introduce you."

Simmons had the lead and saw to it that he led the big man into the office. He was mentally compiling another telegram to Miss Finley.

"Mister Brumbach, meet the general manager of the Transcontinental—"

The ragged brakeman was making good

Before the words were well out of his mouth his mind had framed the telegram. He fell back and let the conversation pass him. His thoughts were back in Merced.

"—this would have led to our having to place a track to the quarry to bring up the stone and then another track on which to load the cement, but Mr. Simmons came by one day and suggested the present arrangement. It saves a lot of labor and makes for efficiency, so of course we have a soft spot in our hearts for the Transcontinental—"

It was Brumbach, the cement factory manager, talking. Simmons, who had the telegram well condensed by this time, strolled out in the direction of the place his train was standing. It was not until the train was well on its way that the big man sent for him.

"How long have you worked for the Transcontinental?"

"Six years."

"Where were you before that?"

"For two years before that I served in the State Penitentiary of an eastern state."

The big man started. Simmons continued:

"I had waited for 10 years for revenge on one man. He was my stepfather. He mistreated my mother. The day I left college I caught him beating her. I knocked him down. His head hit on the edge of a door. A week later he died. I served my term."

"H'm. For what purpose did you make it a point to become acquainted with the affairs of the shippers of the Transcontinental?"

"I waited 10 years for revenge. I have been waiting for something else, and am taking the quickest way to it."

"What?"

"A woman."

"I see—and she does not want a man who is not successful?"

"Exactly. Her salary at present equals mine."

"You'll start in the traffic department at very little more."

"I know it. But I have reason to suspect that if several hundred of your best shippers prove to be friends of mine my salary will be increased."

"I think so. You'll hear from me soon."

"Thank you, sir."

At a little station a few miles down the road, while the big men were inspecting the road's property, Simmons went into the telegraph office. The young man at the telegraph key looked up inquiringly.

"How soon you fellows going to get out?" he asked. "Dispatcher says you can get through as second section

of No. 3 if you'll be here 20 minutes longer."

"I don't know when we'll get out," Simmons replied. "Say," he added, "can you send a period and a question mark by telegraph?"

"Certainly," the operator assured him.

Simmons wrote a few words on a sheet of paper and handed it over. "Send this then: 'Got it. Say when.'"

G. D. Brooke Wins First Prize in "Railway Age" Essay Contest—D. F. Stevens Gets Honorable Mention

UNDER the caption "How to Increase the Average Loading of Cars—Pertinent Suggestions from Railway Officers Who Have Given This Subject Close Study," the *Railway Age* of January 28 says, in part:

"Maximum car loading is a matter of dire necessity during periods of car shortage. It is also an essential to the economical conduct of transportation. Although the necessity for conserving cars has been temporarily decreased, the requirement of economy is now more imperative than at any time in the last 12 months. Therefore, the suggestions offered by railway officers and others who contributed articles in a contest on 'Means of Increasing the Average Loading of Cars' should be of distinct value to the railway managements in the herculean efforts which they are now making to conduct the operations of their properties with utmost economy.

The 25 papers received in this contest were referred to a committee of judges consisting of L. W. Baldwin, vice-president, Illinois Central, Chicago; F. T. Bentley, traffic manager, Illinois Steel Company, Chicago, and C. E. Spens, vice-president, Chicago, Burlington & Quincy, Chicago. These judges awarded the first prize to the paper submitted by G. D. Brooke, superintendent of transportation, Baltimore and Ohio, Cincinnati, Ohio, and the second prize to the paper prepared by O. C. Castle, superintendent of transportation, Southern Pacific Lines, Houston, Texas. Other papers received which merit special attention are those submitted by C. F. Balch, assistant general auditor, Chicago and North Western, Chicago; P. W. Coyle, traffic commissioner, St. Louis Chamber of Commerce, St. Louis, Mo.; E. H. Shaughnessy, American Petroleum Institute, New York; C. W. Hoisington, San Francisco, Cal.; J. L. Coss, train dis-

patcher, Chicago, Rock Island and Pacific, Haileyville, Okla., and D. F. Stevens, division superintendent, Baltimore and Ohio, New Castle, Pa.

The conductor watched the operator as he called the "old man's" office at Merced, and sent the message. Then the telegraph man closed his key and held it for several seconds. Back clicked a few dots and dashes. With a quick movement he closed the key, grasped a piece of paper and wrote the message which came in reply:

"When you get in."

We think it significant that the best of the 25 papers submitted in this contest should be the work of our superintendent of transportation, Western Lines, Mr. Brooke, and that the paper of Mr. Stevens, superintendent, New Castle Division, is among the other papers mentioned and printed because of special merit.

Such honors coming to Baltimore and Ohio officers make us all feel proud and more certain than ever of our capable and inspiring leadership. Intelligent and farsighted direction of railroad work is a great incentive to good performance on the part of the rank and file.

The papers of Mr. Brooke and Mr. Stevens follow:

First Prize—Use Large Capacity Cars in Heavy Loading Service

By G. D. Brooke

Superintendent of Transportation, Baltimore and Ohio, Cincinnati, Ohio

It is of prime importance that the marked capacity of each car be the highest consistent with the requirements of safe operation. General practice permits the loading of cars 10 per cent. in excess of the marked capacity. There are great possibilities in the utilization of this margin, for with many classes of loading advantage can be taken of it to gain one car in ten and to increase the average carload correspondingly.

With the cars properly rated the next step towards increasing the average loading is to distribute the equipment so that cars of high capacity will be used for long haul traffic and where practicable loaded in both directions. If we can add to these two conditions of service, that of

prompt loading and unloading, a maximum efficiency will be obtained. A familiar example of such utilization is the placing of high capacity coal cars in the lake coal and ore service. Light capacity coal cars should be used for moving coal from the mines to inland points close by the mining districts. High capacity box cars can be used to good advantage in the long haul movement of heavy commodities, such as grain and lumber, while the light capacity cars are assigned to the movement of light bulk freight, like straw, paper stock, etc., and to short haul business, trap-car loading, inter-terminal movements, package locals and similar service to which are attached inherent delays and slow movements.

Certain kinds of freight are peculiarly adapted to heavy loading both on account of the great weight per unit of volume and the large quantities offered for shipment. Ores, pig iron, mill products, stone, gravel and sand are good examples. With these and other similar freight the problem of maximum loading is simple. With bituminous coal skilful loading is required in order to take advantage to the fullest extent of the cubical capacity of the cars. Coke should be loaded to the full cubical capacity of the car and a generous crown added to compensate for the shaking down of the load when the car is set in motion.

The railroads load a large number of cars daily with their own forces. This loading can be divided broadly into two general classes—company material and commercial l. c. l. freight loaded at freight houses. The former consists both of c. l. and l. c. l. freight and the same general methods of loading are applicable as with commercial business. Commercial l. c. l. freight requires for its movement a very considerable percentage of the available box cars. Taken on the whole it is of light weight and the load of the aver-

age l. c. l. car is doubtless considerably under eight tons. This freight is for the most part loaded by the railroads themselves and the opportunities for increasing the car load are many. With proper care in stowing, the loading of merchandise cars to the full cubical capacity of the car should not increase the breakage and other damage and any delays to freight in holding it for full carloads are overcome by through movement when the car is started. When the tonnage for a single destination is not of sufficient volume for a daily car then resort can be had to such expedients as bi-weekly, tri-weekly and other periodic cars, loading cars to two or more destinations and loading on transfer stations. It is important to establish a minimum weight limit for carloads to apply unless the cubical capacity of the car determines the load.

The multiplicity of activities on a great railroad system is such that specialists are often required to direct the efforts of officers and employes in obtaining certain desired results. This applies to increasing the car load. For unless some individual or bureau is charged with the responsibility of keeping the question alive it will be lost sight of from time to time and much progress which has been made will be lost. A bureau consisting of a small office force and two or three traveling inspectors or instructors, in charge of an officer of suitable experience, can accomplish much in increasing the car load. The traveling instructors should visit large shippers and stations, instil and foster interest in heavy loading, assist in instructing employes and offer helpful suggestions regarding methods of loading. The office force should obtain such records as to enable it to compare the monthly performance of the various stations and of industries, including railroad storehouses and other plants where the loading is heavy.

Suitable statements embodying these comparisons when placed in the hands of the superintendent will show him what progress is being made at the stations and industries on his division and will enable him to take steps to correct backward tendencies and to offer encouragement where the showing is good.

The chief duties of the bureau are to maintain interest in the campaign for increased loading, to establish for the several divisions standards adapted to their loading conditions, and to see that the same general methods are used over the system. But the brunt of the campaign must of necessity be borne by the operating and traffic officers, the agents and other employes—the rank and file of the division organization. The superintendent who takes an active interest in the car load will infuse his entire organization with a like interest by discussions at staff meetings, by personal talks with officers and agents and by suitable written instructions. He should not fail to take advantage of the experience and ability of the personnel of the traffic department in dealing with the public, but should lean heavily on that arm of the service in placing the problem before the shippers. The agent has a most important part to play in applying the cars at his station where best adapted to the loading offered, in watching his l. c. l. loading, and in obtaining the cooperation and assistance of the shippers with whom he comes in daily contact. The assistant superintendent, the trainmaster, division engineer, master mechanic, yardmaster, all division officers, have their parts to play in direct supervision, in instruction of their employes and in their relations with the shipping public. Thus the concerted efforts of the officers, of a large number of employes and of many shippers are brought to bear on the problem, not to the exclusion of, but in conjunction with the other important phases of efficient transportation, and there can be no results other than the attainment of creditable car loads.

Take Photo Records of Light Loads

By D. F. Stevens

Division Superintendent, Baltimore and Ohio, New Castle, Pa.

The success which any railway division secures in increasing car loading, is largely controlled by the amount of effort that the division superintendent puts into the work, in planning a campaign for his staff, and outlining a policy which is workable and practicable. The methods employed vary

largely with the commodity to be loaded. For example, I have found in the coal fields that a camera is an extremely helpful instrument in increasing the tons per car. My method has been to have a man with a kodak go through the mine districts periodically to take pictures of any cars which do not show full loading. These pictures, with the name of the mine, date and car number written on the face, are shown the mine owner or operator personally or are sent him with a letter. His attention is directed to the empty space in the car, and to the fact that his light loading of the car is depriving him of the additional loading space.

Careful records maintained daily of our ore loading at the docks, making comparison with the loading for the previous month and same month previous year, and placing these figures in the hands of the superintendents of the docks, as well as their superior officers, has resulted in a net gain of approximately 20 per cent.

The two remaining items which I have dealt with have been that of persuading the big industry and the small individual car loader to increase his load per car. Frankly, I have found that the big industry is not only desirous of assisting, but has co-operated even more than I expected.

My staff officers and myself, in going over the division, stop and visit the officers of the industries having charge of this phase of the plant operation, discuss with them the car situation, call to their attention how many more cars are available for their loading by increasing their load per car, and we have asked them to have their salesmen cooperate to the extent of asking their consignees to buy in carload lots. The real hard job in the campaign has been with the men who load two or three cars a week. They have not grasped the idea as quickly as have the big shippers and we have not made the gain with them up to the present time that we have with the big shipper.

Railroads Are Impossibilities

ALEXANDER WELLS, an old citizen of Wellsville, Ohio, has a copy of an interesting and novel document issued by the school board of the town of Lancaster, Ohio, in 1818.

The question of steam railroads was then in its incipient stage, and a club of young men had been formed for the purpose of discussing their value and feasibility. They desired the use of the schoolhouse for purposes of debate. This was looked

upon by members of the school board as an innovation bordering upon sacrilege, as indicated by their reply to the request, which is the document in the possession of Mr. Wells. It reads as follows:

"You are welcome to the use of the schoolhouse to debate all proper questions in, but such things as railroads and telegraphs are impossi-

bilities and rank infidelity. There is no work of God about them. If God had designed that his intelligent creatures should travel at the frightful speed of fifteen miles an hour, by steam, he would clearly have foretold it through his holy prophets. It is a device of Satan to lead immortal souls down to hell."—*Wheeling Register*, March 22, 1918.

Reduced Fire Losses Means Reduced Operating Expenses

Prevent Fire Losses—Study the Causes

By B. S. Mace

Superintendent of Insurance

Despite the fact that there was no great single loss from fire on the Baltimore and Ohio in 1921, there was, nevertheless, damage from fire done to our properties that amounted to about \$140,000. Enough money to buy, approximately, 50 box cars, or two big Mikado locomotives, and have that much more new motive power available for revenue production; or to keep working at good wages for a whole month a thousand of those employes who have had to be furloughed on account of the subnormal condition of business.

For the records show that year in and year out 90 per cent. of these fire losses are preventable if proper study is made of the causes and proper care taken to eliminate them.

In January, 1921, there were 21 fires due to 12 different kinds of causes, and resulting in a loss of \$8,732.53. A few of the causes and the recommendations made for their prevention, follow:

ORIGIN

Employes thawing steam pipes on car with open torch or open fire.

Overheated stove, setting fire to roof of watch box, or carelessness of watchman.

Hot boxes and journals, or carelessness of train crews setting off cars on siding and not seeing that box was sufficiently cool so as not to cause a fire.

Smoking in Record Room.

FIRE PREVENTION RECOMMENDATIONS

Use only hot water or steam to thaw out pipe lines; never use open flames.

Proper clearance of woodwork from stovepipe where passing through roof, of $1\frac{1}{2}$ times diameter of pipe, metal ventilated thimble should be provided, and damper in pipe about two feet above stove.

Rigid inspection of journal and boxes at terminals to see that boxes are properly packed with dope, etc.; also special instructions to train crews in setting off cars with hot boxes, etc., not to leave car until box is thoroughly cooled, removing all dope and oil liable to ignite again.

Enforce "No Smoking" rule, keep all papers and records off floor and properly pile same on shelving, etc., provided for this purpose.

Proper interest in fire prevention will turn the money wasted in these fire losses into productive channels—into new equipment or track, and into greater expenditures for labor—with resulting greater prosperity among the rank and file of our employes.

Dip Your Pen in the Ink of Courtesy

By H. Irving Martin
Relief Department

SOLOMON, wearied with brain fag caused by over study, announced that "of making many books there is no end." Had he now the reading of the endless number of letters that flit to and fro over the Baltimore and Ohio System, he would throw up his hands and make application for retirement.

The vast quantity of railway service mail, passing under the supervision of J. C. McCahan, Jr., Manager of Mail Traffic, has never, as far as we can learn, been the subject of an analysis to determine its numerical total. We can arrive at an estimate of its bulk through a study of Mr. McCahan's report covering the total quantity handled in one day, or in one week, by the Central Mailing Bureau at the Baltimore and Ohio Building. These figures do not include the considerable amount of between-station mail which does not pass through the Baltimore office. Mr. McCahan tells us that a recent count of the pieces of mail handled showed the movement through the Central Mailing Bureau of 231,291 pieces in one week. Truly a stupendous total. Many of these packages contained more than one enclosure, as much of the mail is consolidated to save envelopes. It is safe to assume that every week 200,000 letters, each with an individual message, pass through the Central Mailing Bureau. Now what is that message?

One distinguished railway official of the old school achieved fame by coining the phrase, "the public be damned," and another man voiced the thought that "you can catch more flies with molasses than with vinegar."

Somewhere, between the extreme viewpoint of the railway magnate and that of the writer who uses honeyed phrases while engaged in cultivating a friendly attitude with human flies, there is a middle ground occupied by the efficient letter writer. He gets results through his courteous and considerate message. A letter usually reflects the mental attitude of the writer. If he lacks patience, feels sore, grouchy, or is peeved after a bad breakfast, he is apt to pour out his feelings in his letters, and in most instances the chap to whom he writes, replies (or wants to reply) in the same strain. If he rawhides some one without reason (note the *without*) he is going to get a tart reply or he

will leave a smart that will take a long time to heal.

There is need of courtesy in every piece of mail that passes over the System and certainly churlishness should be absent from every letter sent to a patron of the railroad. Surely, between ourselves, we will not be discourteous.

Don't call the gentleman a liar, or even a prevaricator. Intimate to him that he has made a misstatement, unintentionally perhaps. You could suggest to him that if he will eliminate the fables, you will face the possibility of his statement being correct. You know that in some states of the American Union it is unhealthy to call a man a liar. The wise man will "be governed accordingly." Adopt the Baltimore and Ohio spirit of "Safety First."

The writer recalls an admonition (it could not be called a rebuke) which he received, while serving as an office helper, from a superior official. The reproof was couched in such courteous language and the error so explained that the mistake was not repeated.

Isn't it possible to cultivate the attitude of courtesy toward the man who will receive your letter and who will *miss the smile* that often accompanies a word of disapproval?

A perfect letter! Who can write one? Yet it would represent the fullest realization of the needs of the writer, his knowledge of human nature and his ability to so express his questions or wishes as to produce the largest percentage of results. A letter should be simple. It should state what you want in few words, not sawed off, however, like a telegram, and convey the feeling that you are on perfectly good terms with the addressee.

If something is due you, go get it, but don't use the Marquis of Queensbury Rules.

While it is not necessary to write in primary school language, yet the fellow who gets your letter will appreciate it if you do not write so as to place him at an educational disadvantage.

Many letter writers resemble some railroads—they lack terminal facilities.

Don't use three sheets to convey your message if two will do, or two if you can say it on less. Better than all, learn to boil it down so as to put it all on one sheet. The other chap

will "get you" at a glance, and bless your memory forever.

Then, what's the reason why you do not cut out some of the letters about questions that could be settled with a word to the man you meet, or can see, daily? Without turning yourself into a messenger boy you can often get quick action by a personal interview, and push the thing through better than if you had a ream typed for you. It saves paper, envelopes, postage and lots else.

Lastly, your letter will reach the file clerk, to be tied up with previous correspondence. I can express the file worker's troubles by recalling the story of the boy who said that he could locate most letters by their dates, but that he had found out that there were thirteen months; the regular twelve and *Ultimo*, and he never could remember where *Ultimo* came in.

Picked Up Here and There

By Ernie Baugh
Dining Car Department

On a Laurel Race Train, returning: "How is things—every one I bet on was a hop-head, a cripple or a dink"—And he never went near the dining car.

From a big man in the Central Building: "Some people have notions and consider them ideas." Believe me, he was right.

Raymond Hitchcock, the actor, sang "Ain't it funny what a difference just a few hours make."

I will bet a dollar to a dime that the boy who wrote it got up early some morning and watched the Parade from the Berths to the Dressing Room.

"And Gosh, How They Dread It"

Handling of Exception Reports Shows Fine Teamwork in Reducing Loss and Damage

By C. C. Glessner

General Freight Claim Agent

CONCENTRATION of our efforts on the proper issuing of exception reports is receiving the whole-hearted support of all employees concerned. A comparison of

the station or crew with their various omissions. And in thus being able to place responsibility, matters can be readily handled for correction.

Cooperation of the employees during 1920 resulted in reducing our loss and damage claim payments approximately \$600,000, as compared with 1919, the largest saving being \$400,000 in claim payments on unlocated loss of entire or other than entire package. Let us continue our intensive campaign on this cause and at the same time make a special effort to reduce our claim pay-

tion reports, which will be handled to a conclusion.

As to defective equipment, attention is called to Code of L. C. L. Rules, recently issued by our general superintendent of transportation, which contains reference to Form 1126-Rev. on page 12, a facsimile of which is show here. This is self explanatory and should go a long way toward elimination of the use of cars which are not in satisfactory condition for the safe loading of damageable goods.

As a further illustration concerning claims resulting from the loading of high class merchandise in bad order box cars, attention is called to the accompanying photographs:

No. 1 shows the bad condition of roof of the car.

No. 2 shows defective side and end.

No. 3 shows contents, coffee, valued at \$9,900, damaged by water, showing stained bags, on account of rain coming through roof and end of car, for which carriers are called upon to pay \$3,773.

This brings us to the point: If you were the owner of \$10,000 worth of high class merchandise, would you stow it in a one-story storage warehouse, with defective roof and sides, subject to damage by the elements? Of course you wouldn't! Then why not look at the Company's interests from the same viewpoint and help

No. 1

of

ments on the following causes, which, during the year 1920, cost the Baltimore and Ohio as follows:

Defective Equipment, \$376,000.

Rough Handling of Freight, \$414,000.

Improper Stowing, Loading and Bracing, \$492,000.

The responsibility for rough handling of freight and improper stowing will be brought out almost daily through the proper issuing of excep-

tion reports, which will be handled to a conclusion.

Employees know that every claim hurts them as well as the Company.

Damaging Evidence

Long Life

*While Striving for Better Things, Enjoy the Present Lot,
However Humble*

By Dr. A. J. Bossyns

Medical Examiner, Baltimore, Md.

IT IS often said that "a man is as old as his arteries" and that "a woman is as old as she looks." To these should be added a truer saying, "*Man is as old as he wills,*" for it is a fact that to a great degree, longevity depends on the will of the individual. The fatalist who believes he will die "when his time comes," is just as mistaken as the fellow who persists in crime with a reliance on destiny to keep him out of jail. Life is not controlled by predestination, but is subject to the laws of nature, and its duration will depend on the care which is taken of the mind and body.

Personal Hygiene

In the past, this care was almost wholly left to the physician, who was looked upon as a kind of magician and was expected to cure all ills, however impossible. It is now known that he cannot restore damaged organs or renew a wasted life, but that he combats disease by assisting nature. Physicians have not performed miracles, but they have added many years to the average length of life through preventive medicine, modern surgery and sanitation. While doctors of public health are safeguarding the welfare of communities, it is essential for the individual who wishes long life, to pay strict attention to *personal hygiene*.

Take Care of the Body-Machine

The body is a mechanism, needing proper food, air, work and rest to keep it in good working order. Any abuse or undue wear causes permanent injury; for while repair is sometimes possible, the mark remains. As a furnace heats poorly when choked with ashes or excess fuel, so the body

works badly when overloaded with food.

Food—Exercise—Fresh Air—Cleanliness

Keeping the stomach full and burdening the intestines with waste matter inflicts a strain on the heart, damages the kidneys, hardens the arteries, and invites early death. To keep the human furnace and sewer in good order, it is necessary to eat simple foods slowly and in moderation, and in direct proportion to the amount of work done by the muscles. Meat should be eaten only once daily, even by those engaged in manual labor, and it is a good plan to leave the table with the feeling that one could have eaten more than he did. Exercise is needed for digestion, the building up of tissue and for storing up energy; while rest is required for the recuperation of the brain, the muscles and the organs of the body. Oxygen being fuel for the lungs, an abundance of fresh air must be supplied by proper ventilation. As cleanliness is necessary for the maintenance and proper operation of any machine, the abundant use of water internally and externally is indispensable to the health of the body.

The Clean Life Wins

It is clear that to keep in good health, it is essential to comply with natural laws. Choosing to do this is the privilege of all of us. "Man is as old as he wills," and as the will governs the body, it is the mind that must choose between darkness, filth, sin and early death on the one hand, and sunshine, cleanliness, virtue and long life on the other. Mind and body must both take one path or the other for better or worse, and the mind

must lead the way. Mind, like body, is influenced by good and bad, or what is the same, by health and disease. Mental affections are akin to the ills of the body.

The fierce struggle for wealth, the ambition to lord it over the masses, cruelty, dissipation, vanity, selfishness and conceit are symptoms of an unhealthy mind, and all damage the body and shorten life. The healthy mind is a righteous mind.

The creed for longevity may be expressed in very few words. Avoid excesses and practice moderation in all things. Keep the body scrupulously clean and insist on cleanliness in the home, the workshop, market and other places of public assembly. Select a vocation that is agreeable, and take pleasure in work. Spend at least eight hours in sleep, with the windows wide open, even in winter; or, better still, sleep in the open. Take long walks in the country, and enjoy the beauties of sky, field and stream. Shake off the shackles of fashion and live simply.

Keep the mind as clean as the body. Replace anger, hatred and conceit, with charity, mercy and humility. While striving for better things, enjoy the present lot, however humble. Take pleasure in all things day by day rather than sacrifice for the future, and be as cheerful as the sunshine. Above all, avoid undue emotion, worry and gloom, and cultivate will power, courage and enthusiasm. Observe these rules while young and throughout life, for the joys and pleasures of the present, as well as the benefit of future generations. Given a sound body, as a heritage, beginning early and following the simple rules of personal hygiene, there is every reason to expect, barring accidents, a full hundred years of peace and happiness.

Wishes Relief Department Many More Years of Usefulness

BALTIMORE, MD., January 1, 1921
MR. W. J. DUDLEY, Superintendent,
Relief Department,
Baltimore, Md.

Dear Sir—I cannot conclude our connection without expressing my heartfelt gratitude for the assistance rendered me by the Relief Department. In conclusion, Mrs. Bell joins me in hoping that the Relief Department will be permitted for many years to aid others as you have helped us.

Yours very respectfully,
(Signed) BENJAMIN E. BELL,
Brakeman

Safety Section

"Bulletin 70" Scores a Bull's Eye for Safety

Thirty Thousand See Picture at Employees' Divisional Rallies

By William F. Braden
Safety Department

ABOUT 30,000 employees of the Railroad, their families and relatives, had the lesson of Safety deeply impressed upon them through the recently completed series of rallies and entertainments held on the System.

Twenty-three separate meetings were held at which an entertainment was given, the latest Safety motion picture, "Bulletin 70," was shown, and an address made at each place by John T. Broderick, superintendent, Safety Department, under whose direction the tour was conducted.

Halls Couldn't Hold Crowds

Never before in the history of the Safety Department have such large audiences turned out to take part in Safety rallies. In all except two instances the halls or theatres engaged for the rallies were unable to contain all those who came and sought admission. In every city the largest hall or theatre available was rented for the evening and still these could not hold the great throngs.

After the first few rallies it was realized that there would be record-breaking crowds in every place and there was keen rivalry among the division officials to have the largest attendance. At Cumberland, about 2200 persons squeezed their way into the theatre. At Newark, Ohio, 2000 got inside the doors before the municipal officials advised that it would be unsafe to admit any more; there were about 1600 others who could not get in, but a second hall had been engaged for the dance and many from the overflow went there.

So great was the application for tickets for the rally at Philadelphia that it was realized a few days before the date set that the original hall engaged would not contain the crowd. An auditorium in North Philadelphia was then rented and 1500 persons came and were delighted with the motion picture and the other entertainment features.

Employees Show Fine Talent

It would be a deserved tribute to the employees on every division visited

if the names of those who took part in the entertainment features could be printed on a roll of honor for this issue of the MAGAZINE, but lack of space prohibits this. The latent talent that these Safety entertainments developed was a revelation to all our officers and employees. Talented singers, capable musicians, proficient comedians and comedienues, graceful and fascinating dancers took part. In several instances there were minstrel skits that would have done credit to professionals.

Girls and boys, the sons and daughters of our employees, likewise demonstrated their talents in vocal and instrumental musical numbers. All were of a high class order. In Chicago, for instance, daughters of two of our employees, girls 14 years of age, gave as graceful and pleasing an exhibition of toe dancing as one could witness anywhere. In Cincinnati there was a young woman, an employee, whose aesthetic dance was one of the most artistic bits of terpsichorean endeavor seen on any stage. The stage on which she performed was a temporary affair and none too secure, yet she and the others taking part did not let this interfere with their work. In three instances division bands, composed wholly of Baltimore and Ohio employees, played proficiently and won for themselves unstinted applause.

At Lima there was a minstrel troupe composed of 13 young men and 12 charming young women, all employees, who rendered a snappy, enjoyable program of songs and jokes. The young women wore "Aunt Jemima" costumes and had their faces blacked. For a half hour they held the audience spellbound. Another fine minstrel troupe appeared at Keyser, but the ladies there wore evening clothes and sat in a drawing room group to sing their songs and tell the jokes.

Of the several hundred persons taking part in these entertainments, there was one only who was not an employee or the immediate relative of an employee. This young man gave

his services freely and willingly to the Railroad, which, he said, has always been friendly towards him.

The same spirit of helpfulness and cooperation inspired the employees who took part in the entertainments. In December last, when the call went out on every division for volunteer talent, it was not a question of seeking for numbers to fill the bill, but rather to select a half dozen entertainers and disappoint the others, for in all cases the concert feature was not to last more than an hour. It was a great surprise to our officers and employees that there was so much talent among the forces in the offices, in the shops and along the road. In one case a track hand and his daughter gave a creditable instrumental number. Their efforts were vociferously applauded.

Picture Appealed to Young Men

It has always been a difficult problem to get the younger element among the railroad employees to attend Safety rallies. It has always been the desire of the management to present the Safety lessons to the young brakeman, the fireman, the switchman, the clerk and the freight house employe, but heretofore it has been difficult to gather them together. At the recent rallies they predominated in the audience. The veteran employe and his family were there as usual and absorbed the lesson.

Fine Divisional Team Work

The help given by the division officers in making arrangements for the rallies was spontaneous and generous. Every division superintendent has now seen "Bulletin 70" and few, if any, of the officers below this rank on the divisions failed to be present at the rallies. The committees especially appointed to complete the arrangements did their work in such a way that when the night for the rally arrived everything moved smoothly and well. Officers and employees were given the opportunity of getting together, and a new spirit of cooperation was kindled.

Praise was heard on every side regarding the merits of the moving picture and the lesson that it conveyed. After looking at it for a short time employees realized that the scenes portrayed were actual conditions on any large transportation system. They could picture themselves doing the unsafe and the safe things that they saw the actors perform. The touches of human interest in the film made an especial appeal to the wives and daughters of the employees and immediately enlisted them under the banner of Safety.

Practical Safety Talk Appreciated

The address of Mr. Broderick likewise was of absorbing interest. He talked directly to the men in a language they understood. His appeal to the wives, mothers, daughters and sweethearts of the male employes went directly home and already the effects are being manifested, for up until February 24, when this was written, there had not been an employe killed and the number injured on the System was below the usual monthly average.

The Appeal to School Children and Business Men

Close to 20,000 school children also heard a message of Safety when Mr. Broderick talked in schools along the System. School officials welcomed him and were highly pleased at the opportunity given the young folks to get a practical Safety talk that, no doubt, will save many a little life and limb. Mr. Broderick especially warned the youngsters of the dangers of walking upon and playing around railroad property and his appearance

usually was the occasion for noisy demonstrations on the part of the pupils, who lustily cheered their school, the Railroad and Safety.

Several Rotary Clubs also extended an invitation to the superintendent of the Safety Department to appear at their meetings and talk on Safety and he spoke to 1000 members of this organization of substantial business men, not only urging their observance of Safety, especially in the use of automobiles at grade crossings, but also cementing the bonds of friendship and cooperation between the Railroad and commercial enterprises.

Total Injuries by Months:

January, 1920, 302; January, 1921, 200.

The Saving of 138 Lives in Five Years Makes Safety Worth While

"SAFETY'S all right—but" and a conductor making the remark gave a wink of the eye to indicate that it was "all right" for some others, but that he personally did not feel the need of it.

Yet Safety, as promulgated through the Safety Department of the Baltimore and Ohio Railroad, probably has kept this same conductor in the possession of the health and happiness it was plainly evident he was enjoying. He forgot utterly to take into account the fact that what his fellow employes have done for Safety has redounded to his own benefit. He forgot that Safety is not inspired by selfish motives, but is a boon to humanity at large.

It can be definitely stated that at least 138 lives have been saved in the five years from January 1, 1916, to December 31, 1920. Perhaps the conductor mentioned above is one of these 138. Perhaps you are another of them.

The difference between the total employes killed on the Baltimore and Ohio in the five years between 1911 and 1915, and between the five-year period from 1916 to 1920, is 138. The difference in the number of employes injured in these same periods is 11,594. In the latter five-year period the number killed and injured was less than in the previous five-year period.

**In the long run it's Easy to
do things the Safe way;
but it's not always Safe
to do them the Easy way**

Captains as Privates

History has given us many examples of men and women in the ranks rising—some suddenly, some slowly—to positions of great and enduring leadership. Joseph, Moses, Coriolanus, Joan of Arc, Oliver Cromwell and Lincoln are some of these.

The World War was responsible for a phenomenon of the opposite kind, never before so apparent in history, where men who had made enduring names for themselves in some sphere of activity, forsook prestige and position and jumped into the ranks.

The best blood of England and France was sacrificed in Flanders and the Champagne, men of high birth, attainment and position facing the flood of flame, gas, and lead, shoulder to shoulder with comrades of far different heritage. Cases, even among our own countrymen, of brave souls who declined promotion and made the supreme sacrifice in the rank and file, are not rare. Congressman Augustus P. Gardner, who was one of the ablest champions of preparedness, died while learning to be a soldier at a training camp. John Purroy Mitchell, perhaps the best of the Mayors of New York City of our generation, lost his life while in training as an aviator.

Like instances could be multiplied and mentioned to prove the fact that one of the marks of a really big man is his willingness to tear off his shoulder bars when occasion demands and take his place in the ranks as a private.

Going from the sodden field of war to the attractive field of sport we recount another illustration:

Early last Fall the yachting world was enthused by a bit of news that was as fresh as the salt breezes of the Atlantic. A challenge had come from the sailing masters of Halifax, Nova Scotia, to their friendly rivals of American birth and training at Gloucester, Mass. The Canadian fishing schooner, *Delawana*, was pitted against the American smack *Esperanto*.

James B. Connolly, a famous writer of sailing stories, called the competition the "greatest international sailing race of our time," and his account of the race in the December 25 issue of *Collier's* bears him out.

Here is what Connolly says about the crew and here is the point of my story:

A great skipper and a great crew. There were half a dozen other Gloucester skippers in that *Esperanto* crew, and whoever knows Gloucester knows that a Gloucester skipper is a man of some note on his own account. But they all left their master mariner's certificates ashore, sunk their habit of command, and put out under Marty to prove that there were still able vessels and able seamen out of Gloucester.

And that crew served without pay. They gave up four weeks of their time—and all poor men these, to whom four weeks meant four weeks' loss of wages with no expectation of reward.

They sailed out to win a race, not to be rewarded. The big prize cup, that on its pedestal set high as a man almost, was on exhibition in Halifax, but only three or four of the crew ever went up to have a look at it. They gave Captain Welch a cup for himself and he was pleased, and carried it home in the cabin of the *Esperanto*, but on the trip home nobody ever even opened up the box it was in to see what it looked like. The cups were all right, and so was the money, but they weren't racing for cups or money.

There were other men in that crew who could have brought home the *Esperanto* a winner, too. But through hard experience in learning their vocation they understood the necessity of one man leadership and of the finest teamwork to bring victory.

Trouble is, in business life, there are too many of us who have not stood the gaff of accomplishment and yet who think we know the Captain's job better than he does. One of the identifying marks of most big men is to acknowledge able leadership, to jump in as one of the crew and strive for team work, to get down into the ranks and just plug along, when occasion demands.

One Man's Way

Early in the year 1900, two friends met in one of the chop houses of lower New York for a game of chess. They took their places silently, silently played their game, and silently departed. Another man sat beside them and silently looked on.

Every day for 20 years the friends had their game of chess. Every day for 20 years the other man looked on—until just the other day. One of the players didn't appear for the first time in 20 years. His partner waited a while and then asked the faithful watcher to play.

"I guess he isn't coming today. Would you like to play his men?"

"I'm sorry," was the faithful watcher's reply, "I don't know the game."

For 20 years he had followed every move—had watched the drama of king and pawn—without sensing the idea of it all—he didn't know the game.

Patiently he had looked at the game—not into it. His curiosity had remained dormant, his imagination unstirred by the struggle of forces and the subtle strategy of the battlefield.

He was one of those men who look without seeing, listen without hearing, do without understanding.

Placed anywhere, given anything to do, he would stay put—do his job—without knowing anything of his neighbor's job, the problems of the business, the significance of his own activities. Should opportunity pause at his threshold, he must answer, "Sorry, I don't know the game."—*The Barrett Trail*.

One on Roosevelt

Railroad men of the period will remember that during the early years of the presidency of Theodore Roosevelt, the railroads and the Government were "at sixes and sevens" on the subject of rebating. I believe the following story on Mr. Roosevelt in connection with his efforts to stop rebating has never been printed, although it was told me by an officer of the Government now occupying a high position in Washington in connection with railroad supervision.

There had been brought to Mr. Roosevelt's attention a number of specific cases of rebating on the part of certain agents of a great western railroad and he ordered the Attorney General to bring charges against them under the Anti-Rebating laws. Shortly afterward a vice-president of the railroad employing these men appeared at the White House for an interview with the president. His card was sent in to Mr. Roosevelt, who, despite the fact that the visitor did not have an appointment and probably surprised that he had attempted, under the circumstances, to "beard the lion in his den," nevertheless sent for him to come in.

"Well, Mr. ———," began the president, "if you have come to ask for leniency in the cases of your officials whom I have ordered prosecuted on account of an infringement of the Anti-Rebating laws, your effort is useless. Charges have been preferred against them and the cases will be pushed to the limit."

"But, Mr. Roosevelt," replied the railroad official, "the men you speak of are not guilty. I am the guilty person in the case since these men acted on my orders. Hence the charges should be directed against me and not them. Furthermore, they are men of only moderate means, with families dependent on them, and cannot afford to go to jail. I, on the other hand, am comparatively well-to-do, and if you are going to prosecute anybody you ought to prosecute me."

The frankness and sincerity of the statement momentarily disarmed Mr. Roosevelt and he said:

"It is diabolical that a great railroad system such as yours should, through one of its vice-presidents, confess to a wilful violation of this law. So far as I know, your road is the only one of which we have direct proof of a violation."

"That may be so," replied the vice-president, "but I would be willing to wager that there isn't another big railroad system in the United States which is not also guilty of having transgressed these new laws."

That was an eye-opener to Mr. Roosevelt and the result of the interview was that the vice-president was taken completely into his confidence, the cases against his agents discontinued, and that through his good offices it wasn't long before rebating had ceased on all the railroads.

Government Efficiency

(Special Dispatch to the *Baltimore American*)

WASHINGTON, January 28.—There are 3000 trucks, valued at \$14,000,000, at Camp Holabird not under cover, according to the testimony of Brigadier General Connor, submitted to the sub-committee of the House Appropriations Committee. This admission brought on a spirited colloquy between General Connor and Chairman Anthony, of the sub-committee.

"Is it not an awful waste to permit them to stand out in the open year after year?" inquired the chairman.

"We have been expecting to get them declared surplus and to get rid of them," replied the General.

"Why have they not been declared surplus?" inquired the chairman.

"Until the tables of organization were fixed the General Staff was not prepared to give us a policy," was the reply.

"Would it not have been good business," asked Mr. Anthony, "to have sold the surplus automobiles two years ago?"

"Yes," replied the General, "but government agencies move more slowly than business concerns."

General Connor added that it was estimated that it would have cost \$2,000,000 to provide a temporary shelter.

A Visit With Mr. Bryan

Whether or not our political beliefs are the same as those of William Jennings Bryan, all of us who have had the pleasure of hearing him make a public address will agree that he is an exceedingly interesting speaker and man. And some of our number are satisfied, after a recent experience of theirs, that he makes a most agreeable train companion.

It was on a trip which some of our well-known Veterans, including George W. Sturmer, grand president, and George A. Bowers, president of the Baltimore Chapter, were making to a Veterans' meeting in Newark, Ohio. Mr. Bryan had accommodations in the same sleeper and they vouch for the following:

First, in conversation, Mr. Bryan admitted this one on himself: At a banquet at which he was to be the principal speaker, the toastmaster introduced him by addressing him:

"Mr. Bryan, shall I call on you next, or shall I permit my guests to enjoy themselves a little longer?"

The Pullman conductor is authority for the statement that Mr. Bryan usually occupies an upper berth, whether on the principle "the higher the berth, the lower the cost" we do not know.

It is reported that on this trip Mr. Bryan was en route to Marion, Ohio, for an interview with President-elect Harding and, as the subject of living costs is near to his heart, our observers wondered if that was the reason for his rather unusual procedure in the dining car when he took a loaf of bread from a package which he brought in with him and cut off slice after slice as he ate.

Later, in conversation, Mr. Bryan remarked that pork at 12 cents a pound on the hoof in Nebraska, jumped to 65 cents for two small chops in the East, and that a merchandizing system countenancing such an increase was wrong. We shall certainly be glad to go with him on any plan which he can evolve which will cut the big difference between these prices for us Eastern consumers.

A Mother's Objection

No. 5 was leaving Camden Station and the day coach was unusually crowded. A few minutes out of the station saw several men and a woman standing, a particularly large woman.

Up jumped a man and offered his seat. The woman graciously suggested that she did not want to deprive him of it.

"But I work for the Baltimore and Ohio and it is up to me to give you my seat."

Then another woman spoke, one who was sitting with him on the window side of the seat:

"Well, I hope that is not the reason you are giving this lady your seat."

She was the man's mother and, oblivious of Baltimore and Ohio etiquette, her mind flashed back to his boyhood training, to the daily injunctions of those early years that he must be a gentleman, *always*.

John Edward Spurrier

AFTER an illness of about 10 days, John Edward Spurrier, one of the best known and best loved veterans of the Baltimore and Ohio, died in Baltimore on February 20. The funeral was held from his late residence, many of his railroad friends attending and, by their presence and their beautiful floral offerings, paying him their last tribute of respect and affection.

The honorary pallbearers were: George M. Shriver, senior vice-president; C. W. Galloway, vice-president Operation and Maintenance; J. S. Murray, assistant to president; O. H. Hobbs, supervisor of Refrigeration; E. W. Scheer, general superintendent Maryland District, and B. F. Baswell.

The active pallbearers were: E. W. Day, assistant superintendent Telegraph; A. E. Day, supervisor of Weighing; R. F. Miller, chief clerk, Telegraph Department; Bert Murnan, operator, Winchester, Va.; R. F. Mitchell and D. Hyde.

Mr. Spurrier is survived by Emma W., widow; Thomas E., claim agent, Tiffin, Ohio, and Albert F., train dispatcher, Baltimore Division, sons; Mrs. Ashby Sprint, Winchester, Va., daughter, and three grandchildren.

Mr. Spurrier's passing is lamented by hundreds of the friends whom he made during his career on the Railroad, which continued in an unbroken stretch from 1864 to 1921, a total of almost 57 years. The copious notes which the recent inactive years of his life gave him an opportunity to assemble, show that even before the outbreak of the Civil War in 1861 Mr. Spurrier had become a member of the Baltimore and Ohio family. In fact, he was born of a family which had been connected on both his mother's and father's sides with the Baltimore and Ohio from the very beginning of the Railroad, his relations including, in addition to the Spurriers on his paternal side, the Smiths and the Diffeys, names which were closely identified with the operating activities of the Railroad in the early days.

In 1864 Mr. Spurrier became an extra operator at Plane No. 4, on what we now call the "Old Main Line" in Maryland. The next year he was made a regular telegraph operator at that point, continuing as such until 1873 when he was made yard dispatcher. In 1874 he became train dispatcher at Baltimore and in 1883 yardmaster there. In 1886 he was transferred to Philadelphia in the same capacity and in 1894 made superintendent of the

Baltimore Division. In 1902 he was made superintendent of the Shenandoah Division, and in 1912 was relieved of his division assignment and reported direct to the general manager in a special capacity. In 1916 he became a special agent in the Office of the Operating Vice-President, and from 1917 until the time of his death was on the staff of the general superintendent of telegraph in various capacities, his last assignment being that of special agent and telegraph censor.

In a very particular sense Mr. Spurrier will always be remembered, especially by his business associates and friends, as a Baltimore and Ohio Railroad man. To a very unusual degree he was part and parcel of the Railroad and it of him. He never spoke of it in a frivolous way. To him it was a great institution, its past an illustrious one; its present full of potentialities for the good of the nation and the people it serves—and for those who serve it; its future one of tremendous possibilities for usefulness. One of his outstanding characteristics was faith—faith in the organization with which he was associated and particularly in its present day leadership. And as faith begets loyalty, so Mr. Spurrier in every phase of his association with the Baltimore and Ohio represented the finest type of the loyal employee.

He seldom spoke of "The Railroad," or of "The System," or of "The Company."

To him, these abbreviations were not adequate. It was always "The Baltimore and Ohio Railroad" or "The B. & O. Railroad," and it was a pleasure to note the pride in his voice as he used the name in conversation.

To attempt an estimate of his personal qualities, of his character, would be almost to enumerate the virtues. Kindliness, modesty and innate fineness of character are attributes with which he impressed everybody. His goings and comings were quiet and obtrusive. He never let his own interests in any particular subject run away with his sense of proportion, and as a result he was always welcome in every office which he visited. He had fine respect for authority; yet position, as such, meant nothing to him. It was the man who counted with Mr. Spurrier, whether he directed the activities of tens of thousands or worked in the most humble capacity.

A man who was almost entirely self-educated and self-made, a man who had made a success of his vocation and had earned the respect of his associates and of those under whose direction he worked, Mr. Spurrier always gave the impression of being a busy man and a happy man in whatever he was doing. Even in the last few years of his life, when the Railroad had placed him in a position which gave him the opportunity to come and go as he pleased, and when his duties had been made very light, he nevertheless took a tremendous amount of interest in his work and accomplished results which were extremely gratifying to the officers of the department to which he was attached. He believed unqualifiedly in work and continued to be

helpful in the tasks assigned to him up to the very day he was taken with his last illness.

In one respect Mr. Spurrier was unique, in so far as the writer knows, among all the Veterans of the Baltimore and Ohio, namely in the keen and systematic interest he took in perpetuating the history of the early days as he knew them. Much of the historical information which has appeared in the *MAGAZINE* without credit to him was, as a matter of fact, the result of his painstaking effort in the gathering of old records and in preparing them for publication. He had a remarkable memory and was constantly engaged in the collecting of old data and old photographs relative to the early history of the Baltimore and Ohio Railroad. There is a good deal of material now in the *MAGAZINE* files relative to this history, which Mr. Spurrier got together for publication and which has never been used because of the limited amount of space we are able to give to historical articles. We hope that all of this information will eventually appear in the *MAGAZINE*.

John Edward Spurrier

President Willard's Letter to Mrs Spurrier

At New York—February 23, 1921.

My Dear Mrs. Spurrier:

I have just learned this morning of the death of your husband and my very dear friend, and I want to assure you of my deepest sympathy because of your great affliction.

I became acquainted with Mr. Spurrier first in 1899, 22 years ago, and I have had for him the tenderest feelings of friendship during all the intervening period. He was always a gentle and kindly man, and I never heard him speak ill of anyone. He was always loyal to the Baltimore and Ohio Company, and was always anxious to do what he could to promote its interests. While his burdens in recent years had been lightened, I am sure his interest in the property which he served so long, remained just as keen as ever. He will be very greatly missed by his associates in the Baltimore and Ohio service, and by no one more than by myself.

Once more I wish to assure you of my very deep sympathy because of your great loss.

Sincerely yours,

(Signed) DANIEL WILLARD.

Mrs. John E. Spurrier,
Baltimore, Md.

and it will be a pleasure to give credit to Mr. Spurrier for it.

In a book in which he had done a good deal of writing during the years just previous to his death (and for a man of his education and experience, he was a facile writer), there are many interesting stories of the early history of our Road. Space prevents the publication of even a description of the contents of this volume but we quote herewith a single story pertaining principally to Mr. Spurrier's own early career, and given in his own words, in the belief that it will be especially interesting to his many old friends on the Railroad. He wrote:

Born at Plane No. 4, Frederick County, Maryland, October 11, 1849, the son of Thomas B. and Susanna Spurrier, I started to "Prospect School" about 1857. My Aunts always said that before I could read or write I could tell the numbers of every engine passing Plane No. 4, knew what engine was approaching from the sound of the whistle, and knew the names of the enginemmen, saluting them as they went by.

Prospect School house was two and a half to three miles from Plane No. 4 Engine House, making a six mile walk per day, but I was getting along fine until the Civil War started. Then we had no school for long periods and would switch around from Prospect to Pine Grove, from Pine Grove to Kemptown, then back to Prospect, wherever there was a teacher. There was no school in summer because the children were needed on farms, and when I was old enough I was used to fire the helping engines in emergencies to get troop trains over the hills at Mount Airy. Therefore I have many times wondered how I managed to get any education at all.

When the operator at Plane No. 4 gave me the telegraph alphabet, I commenced on it right away and found myself improving

in reading, writing and spelling without going to school. Uncle Chris Smith saw me practicing, and told my people I should not learn to telegraph as it would not be worth a dollar a day after the war. Then I had to keep away from the office and hide the alphabet. I memorized the alphabet,

though having no telegraph key to practice on, but found that working a table knife between the fork prongs gave me the proper sound. When I went to the table to eat I would get into trouble practicing telegraphy with the knife and fork.

Alex. Diffey, my uncle by marriage, was general supervisor of trains and, taking a meal with us said, "what are you doing, John, telegraphing?" One of my aunts told me to leave the table, but uncle Diffey said, "let him alone, he is on the right track—we need operators, and when he learns I'll get him an office."

Later a lazy operator came to Plane No. 4. He wanted a boy to come around often to sweep out the dirt and clean the local battery and I promised to come often if he would not tell my aunts. I kept close to his calls and finally got hold of the telegraph key and made the alphabet plainly. He told me to write certain words, then said, "I believe you can send a message now, I will try you on a short circuit." I didn't know what he meant, but sent it, thinking I was sending it over the wire, but it was only through the short circuit through the instruments. Then he told me to send it again and run the paper through the Morse register and I could see the message and read it. I then got the idea of just what to do.

About 1864, Operator Dan Mason came
(Continued on page 22)

An Appreciation of John Edward Spurrier

By C. W. Galloway

Vice-President Operation and Maintenance

When I started working for the Baltimore and Ohio Railroad Company in 1883, as a messenger boy in the Telegraph Department, Mr. Spurrier was Train Master of the Baltimore Division and had his headquarters at Camden Station.

I remember him very distinctly in those days. He was a man we all admired, and especially interesting to us because his association with the Railroad dated back to the seething struggle between the North and the South over and around the lines of the Baltimore and Ohio, at which time (in the early part of 1864), he was a telegraph operator.

From the time I entered the service in 1883, we were both continuously in the Operating Department and saw much of each other; in fact, my first official position as trainmaster of the Baltimore Division in 1897, was under Mr. Spurrier, who was then superintendent.

He was a self-made man, skilled in his calling and the soul of honor in his dealings with his fellow-men; and much of my success was due to the patience he showed in drilling me into my new responsibilities.

He was a Nestor of railroad wisdom, ripe in experience, and with a fund of historical anecdotes. His remarkably retentive memory remained with him to the last.

He was modest and retiring in disposition, with a clear and sympathetic understanding of the viewpoint of the employee. He was always kind and considerate toward the men under him, always fair and impartial in discipline.

He was generous, genial and charitably inclined toward all, and an innate honesty marked his whole life and action. None knew Mr. Spurrier but felt drawn toward him in affectionate regard and respect, and hundreds of his friends, particularly in the railroad world, will regret his passing, yet cherish a memory of him singularly sweet and comforting, a rich heritage given to but few men to leave to their families and friends.

Organization of Ladies' Auxiliary at Lima, Ohio

ON FEBRUARY 17 there was a meeting of the Toledo Division chapter of Veterans at Memorial Hall, Lima, Ohio. The particular purpose of this meeting was to organize a Ladies' Auxiliary.

At 2.30 p. m. the meeting was called to order by Grand Vice-President J. M. Garvey. Fifty ladies were present. Following are the names of those who were elected officers:

President, Mrs. O. L. Wallbing; vice-president, Mrs. C. W. Day; recording secretary, Mrs. Emma Shank; treasurer, Mrs. John Sweeney; sergeant-at-arms, Mrs. M. Lane.

The ceremony of installing the officers was brought to an end at 5 o'clock in order that the ladies might prepare for the banquet, which began at 6 o'clock. The banquet hall was beautifully decorated, and about 200 veterans were delightfully entertained. The toastmaster, W. F. Van Horn, made a few preliminary remarks, then called on Reverend Smart to invoke the blessings of the Deity upon the assembly. Mayor Meredith was the first speaker; in an eloquent address he expressed his pleasure in being among the Veterans of the Baltimore and Ohio. Other speakers whose talks were greatly enjoyed were: George W. Sturmer, grand president of the Veterans; General Manager Begien; General Superintendent Mitchell; Superintendent Mann, Toledo Division; J. M. Garvey, grand vice-president of the Veterans. Mr. Garvey spoke of the purposes of the Association; called the attention of all to the post-cards that had been sent out by President Sturmer, and asked the cooperation of all the Veterans in securing business for the Railroad.

At 10 o'clock the curtain went up, revealing the black faces of 32 comedians, made up from among our young men and women employes at Lima. These entertained with singing and dancing and received hearty applause.

Following the minstrel show, the floor was cleared for dancing. The famous Lima Orchestra furnished the music, and the veterans and their sweethearts enjoyed tripping the light fantastic until the early hours of the morning. None enjoyed the

fun more than Captain J. H. Doyle, sergeant-at-arms, and Engineer William Glenn, Newark, Ohio, both of whom made themselves particularly entertaining among the ladies.

President Van Horn and Secretary Wallbing, together with their capable committees, deserve much credit for the success of the banquet.

Grand Vice-President Garvey is now arranging a membership drive, both for the Veterans' Association and for the Ladies' Auxiliary.

John Edward Spurrier

(Continued from page 21)

to Plane No. 4. Being a fine violonist, he wanted to attend many country dances; when he found I could send and receive messages he hurried me along and was continually after my people to allow me to remain with him at night. He would leave me in charge of the office and I would not see him for a week, as there were so many "corn huskings" and "apple butter boilings," and a dance at each, that it kept him busy sleeping during the day and playing the fiddle at night.

Dan left Plane No. 4 and J. C. Minnehan took charge and I felt my name was "Dennis," but he did not like the place nor the idea of sleeping in the office after working 12 to 14 hours, and said to me, "You can run this office for I am going to leave it in your charge." The next morning he left for Baltimore to see A. G. Davis, superintendent Telegraph, telling me if he did not come back to keep the office. He did not return and I never again heard of him. When pay day came I went to the car and inquired, "anything for J. E. Spurrier, operator, Plane No. 4." "Billy" Woodside said, "J. E. Spurrier, \$21 or \$22, that's better for a boy than firing an engine?" The office paid \$30 or \$35 per mo., but I did not make the full month of February."

Office of the Baltimore & Ohio
Rail Road Co 25 Oct 1836

Amos Kendall Esq
P. M. General
Sir

Your letter of the 20th inviting a deputation from this County to meet such representatives as may attend at Washington on the 27th to confer with the Department in relation to carrying the mail upon the Rail road, between the City of Baltimore & North Carolina has been received and I have the honour to inform you that Messrs Lucas, Stewart, Albert & Sprigg have been appointed by the Baltimore & Ohio Rail road company for the purpose of attending on its behalf at the proposed conference and will wait on you accordingly. I have the honour to be very respectfully, Yours, W. Patterson

"Battle" Harmon of Martinsburg

M. H. Harman, age 78, is one of the old-time yard conductors, better known by the name of "Battle." He was conductor in the Martinsburg Yard at the time the "Camel" engine was in use. He served in the Union Army during the Civil War, and they say that he made a good soldier—hence his nickname. "Battle" says that there was no one in his company who was better equipped for eating than he was, and that wherever the army camped, he always had the honor of looking after the hen roosts. The only mean thing that he admits having done while serving in the army was to steal a fiddle from a blind man. However, after he found out the man's affliction, he returned the fiddle at once and gave him a \$10 bill. (But he never said what kind of money it was.)

New Safety Platform Built from Scrap at Garrett

By G. M. Teal

Supervisor Shop Schedules

THE accompanying photograph is of a Safety Platform that has been put into use at the Garrett Shops. It will be of interest to other shops which do class and heavy running repairs.

The platform was designed by H. Rees, general foreman, and was built from old superheater units and scrap pipe and joints, acetylene welded.

It is used alongside of the engine when applying or removing air pumps, applying running board brackets, removing and applying stays, and for all fire box work. Across pit at back end it has a double purpose, that of making access easy to the cab and also as a Safety device, so that men cannot walk out of cab and fall into the pit. It has proved a great help at Garrett and the men are enthusiastic about it.

A smaller one is now being built for use with slide valve locomotives when applying steam chests and covers or facing off the valve seats.

Prints covering this platform can be obtained by writing Mr. Rees at Garrett.

Safety and Welfare Rally at Cleveland a Big Success

ON January 31, the Cleveland Division staged a joint Safety and Welfare Association Rally, which created a precedent in the history of Baltimore and Ohio social affairs in this district.

The Winston Hotel ball room was secured for the entertainment. There were about 1800 people crowded into the hall and balcony, with at least 200 people on the mezzanine floor who were unable to secure seats or standing room to view the entertainment. The employees of the C. T. & V. Division turned out en masse, a special train having been operated from Valley Junction and collecting employees at all C. T. & V. Division points. Our Welfare League of Akron had a good representation present, and their organization song, "Akron," composed and written by their amiable and successful poet, John B. Drake, was heard for the first time.

The program was opened with the song "America," sung by the entire audience. Dear to us all, it placed the audience in a receptive and appreciative mood for the numbers to come. C. C. King, brakeman, Cleveland Terminals, possessing a splendid baritone voice, sang "The Tumble Down

Shack in Athlone," and as an encore, "Drifting." Arthur D. Gans, the "Safety" magician, then entertained and amazed those present with some cleverly executed tricks. The duet, "Wishing Moon," rendered by Miss Stahlnecker, soprano, and Miss Cartwright, contralto, was highly appreciated. As an encore, they sang "Whispering Hope." Both of the girls possess strong and well cultivated voices. Miss Hilda Hinger gave a graceful interpretation of the ballet dance, with a "buck and wing" dance as an encore. L. N. Roller, freight representative, Assistant General Freight office, sang a tenor solo, "Tell Me Little Gipsy" and "Somewhere a Voice is Calling." In addition to possessing a fine tenor voice, Mr. Roller is an accomplished musician and played his own accompaniment for his last solo.

Following this, the words of "There's A Long, Long Trail" were flashed on the screen and all sang it with spirit. John T. Broderick, superintendent of Safety, gave an interesting and instructive address on Safety.

Dancing was then engaged in until a late hour, music being furnished by a splendid

orchestra under the management of J. E. Cavanaugh, one of our yard conductors.

The Safety motion picture, "Bulletin 70," proved to be interesting and educational, and the examples of unsafe practices indulged in by careless employees told a detailed story of just what the Safety Department has had to fight and its accomplishments in the way of accident prevention.

Much of the success of this entertainment can be attributed to the committee, composed of representatives of the Welfare Association, who worked diligently and unceasingly to that end. J. A. Schuerman, coal freight agent, acted as stage manager, and to his efforts can be attributed the business-like manner in which the performance was staged.

And At Lorain

The program was repeated at Lorain on the following night, and, in addition, the "Magnolia Quartet," composed of local Baltimore and Ohio employees in Lorain, entertained those present with several fine songs. The entertainment was held in the high school auditorium, which was packed to capacity. A special train was run from Dover to Lorain, picking up employees along the whole C. L. & W. Division. Immediately after the entertainment, a dance was held in the Chamber of Commerce Ball Room.

Too much praise and credit cannot be given to those employees who put forth their time and effort to make this rally a success. We believe that such a rally is without precedent in this district; it was a Baltimore and Ohio employees' affair from start to finish, and our employees acquitted themselves well.

We, the employees at Cleveland, are proud of the showing we made and intend to establish this successful rally as a standard for our future social affairs.

A good "flash" made at the Akron Welfare meeting

Three Cleveland girls who scored big hits as entertainers at the Safety Rally. Left to right: Miss Stahlnecker, clerk, Freight office, star soprano; Miss Eglic Cartwright, clerk, Freight office, and Miss H. la Hinger, toe dancer

There is one feature of the entertainment which we do not want to overlook—the splendid introductory address made by our esteemed superintendent, Mr. Green, when he introduced Mr. Broderick.

We might also state, and frankly, that no committee was ever given better support than that afforded this committee by Superintendent Green and Trainmaster Batchelder.

Wilmington's Valentine Party

By Charles W. Hamilton
Assistant to Cashier

ON the evening of February 8, nearly 100 railroaders met for the second of a series of "Get together" meetings now being held at Wilmington. The Philadelphia and Reading Depot building was the place, this time under the auspices of the employes of that railroad and in charge of Mr. F. J. Vasey, freight agent.

The waiting rooms at the station were tastefully decorated. A fine orchestra supplied music for the dancing, and many popular and patriotic songs were sung. Various contests were held and prizes awarded; speeches were made, and delicious refreshments were served. The giving of favors was also another feature which caused a good bit of merriment.

The Baltimore and Ohio Freight office employes came out in full force, under the leadership of Freight Agent and Mrs. A. D. White. There were also a few Pennsylvania employes present, and one guest from our offices at Pier 22, Philadelphia, Mrs. Alice Hamilton.

One of the splendid features of this meeting of railroad employes was an address,

made by one of the speakers, and relative to present railroad conditions. He said that he believed that those present favored the meeting of such issues as the labor question and operating conditions in a spirit of fairness and moderation, with a willingness to modify faults in the agreements now in effect, in the spirit of true American citizens. The address was indeed an inspiring one to all who heard it.

The photograph on page 49 was taken at the meeting. Those in the picture are: Left to right, front row: Samuel Green and F. J. Vasey, P. & R. employes; three members of the orchestra, and James Bradley.

Second row: Milton Ferguson, P. & R.; Mrs. F. J. Vasey, Mrs. Ermentrout, Mr. and Mrs. E. E. Townsend, Mrs. M. Alice Hamilton, Pier 22, Philadelphia; Charles W. Hamilton, Mrs. Samuel Green and son, Miss K. August, P. & R.; Mrs. Jennie Wright, P. & R.; Mr. and Mrs. A. D. White, Miss Ruth McCollum, P. & R.; Mr. and Mrs. J. H. Davis and daughter; H. B. McCollum, P. & R.

Third row: Miss E. Z. Pugh, D. H. Hendricks, Miss K. Collins, all of P. & R.; Lawrence Weldin, Charles O'Neill, Miss R. Ford, P. & R.; Miss M. Freeburg, S. Brooks, P. & R.; Miss C. McNally, H. Grant, Mrs. H. Pierce, Mrs. M. Freysinger, Miss M. Crumlish, Mrs. R. Gray, Charles Derrickson, Penna. R. R.; Mrs. Charles Derrickson, P. & R.; L. Polotsky, J. M. C. Milane, P. & R.; Mrs. G. E. Knoth, Edward Knoth, J. M. Wamples, J. O. Lambson, James Davis.

Back row: Miss A. Monahan, P. & R.; M. J. Lawless, Edward Darragh, Miss E. Pisher, W. T. Sawyer, P. & R.; Miss M. Carroll, P. Kendall, P. & R.; Miss Murphy, Miss E. Townsend, R. Kendall, P. & R.; Mrs. R. Hackett, R. Hackett, Miss R. Merrick, P. & R.; Miss M. McCoy, P. & R.; Miss A. Clements, J. A. Caban.

Akron's Second Party

ON January 28, the second party of the Baltimore and Ohio Welfare League of Akron was held in the ball room of the Elks' Club. A splendid musical program was given by Drake's Orchestra, I. M. Grice, N. B. Chalfant, and the Misses Kathleen and Marie Enrich. C. M. Groninger, district freight agent, presided at the meeting, and after a short talk introduced D. F. Stevens, superintendent at New Castle, who made a splendid address. All had a fine time, and every one in the employ of the Railroad at Akron is anxiously awaiting the next party which is to be held in the Akron Armory on February 25.

There's a Profit in Chickens for Those Who Like Them

By Charles E. Weakley, Jr.

Department of Agriculture of West Virginia

The belief that a hobby, other than the business hobby, makes life happier and more complete for most men, has often been expressed in these columns. It is as necessary for the success of the hobby that one be interested in it, however, as it is for the success of business that one be interested in it. Poultry husbandry has a great deal more to it than most people think and to one who likes it, it offers a delightful avocation. It is with the belief, therefore, that many of our railroad men can get a lot of fun and quite a little profit out of a backyard poultry plant, that the accompanying article is printed. It was written for the MAGAZINE through the courtesy of Mr. J. H. Stewart, Commissioner of Agriculture of West Virginia and formerly agricultural agent of the Baltimore and Ohio Railroad

A SMALL flock of chickens will do wonders in supplying the family with fresh eggs and meat at small cost, and their care will provide an enjoyable feature of the household routine. With good care a dozen pullets will produce sufficient eggs for the average family when fed the table scraps supplemented with a small amount of grain. To make poultry raising a success it is necessary to provide comfortable quarters, clean water and proper feeds. With these conditions fulfilled, almost any pullet will give a good account of herself, but, of course, the better the breeding the better the results.

The House

Comfortable quarters consist of a well ventilated, dry house, which is reasonably warm in winter and cool in summer. The shed-roof open front type is easily constructed and well adapted to the needs of the backyard poultryman. It should face south or southeast, care being taken that it is perfectly tight except in front, and draft-proof (see illustrations). The size of the house will depend entirely on the number of birds to be kept—four to six square feet of floor space should be allowed for each bird. The larger the flock the less floor space per bird will be required, as each fowl has the whole house in which to exercise. Also the large breeds will require more room than the small breeds, such as the Leghorns.

The interior equipment, consisting of perches, droppings-board, nests, hoppers

and water pan, should be elevated about two feet from the floor so the total floor space is available for the use of the fowls. The droppings-board with perches eight inches above is placed along the back of the house, allowing about eight inches of perch for each hen. The openings in the front should be covered with one inch mesh poultry wire to confine the fowls when the windows and curtain are open. The muslin curtain, which should be tacked to a frame hinged at the top to open inward, is put down only during very cold weather or during a storm which might beat in and wet the litter. The windows should open outward to increase the ventilation when necessary.

During the winter an outside run is unnecessary, but the fowls will do much better in the late spring and summer if they have access to a run, preferably provided with shade. If the house is of proper size for 10 layers, do not put in 15 and expect good results. Overcrowding is often responsible for a loss not only in egg production but also in fowls and must be guarded against by the beginner. The droppings-board should be cleaned every few days and sprayed occasionally with a solution of coal tar disinfectant to keep down the mites. When the litter gets cut up and contaminated with droppings, it should be removed and replaced, preferably with wheat straw. A good coat of whitewash once or twice a year helps wonderfully to keep down disease and brighten up the interior. One of the

best and cheapest disinfectants is sunshine and the house should be planned so as to admit the largest possible amount of sunlight. The run must be limed and spaded often, especially if small.

Water and Feed

Lack of water frequently cuts down egg production and while fowls may not suffer physically if they have access to water only a couple of hours each day, yet it is practically impossible for them to consume a very large quantity of grain without drinking freely, and heavy feed consumption goes hand in hand with heavy egg production. Even though another beverage—buttermilk or sourmilk—is before the fowls, fresh clean water also should be accessible constantly during the time they are off the roost.

Any feed which supplies the necessary ingredients for body requirements and egg making can be used. A good mash may be made from two parts corn meal, one part wheat bran, one part wheat middlings and one part meat scraps or in place of this mash, some of the better grades of poultry feeds may be used. The cost of these ready mixed feeds will be found to be about as low as the home mixed product and their purchase avoids the necessity of procuring a number of separate ingredients and mixing them.

Any worth while saving in the cost of feed should not be neglected, but one should make sure that the egg production is not decreased by the use of cheap feeds. For a small flock, the table scraps of the ordinary family will do a great deal towards cutting down the feed bill. The floor of the house must be covered with litter and the scratch grain fed in it to induce exercise—one fourth in the morning, one fourth at noon and the rest at night is a good method. The mash can be fed either wet or dry, the latter probably giving the most satisfactory results when placed in a hopper accessible to the birds at all times. Grit and oyster shell must be put in an open container. The table scraps may be fed in the middle of the afternoon or immediately after every meal. Musty or mouldy feed causes disorders in the digestive tract and must not be used.

Cross section, front to rear

Prize Winning Supervisor O'Brien and the men who helped him bring home the bacon

How to Start

The back yard flock can be started by buying pullets in the late summer or early fall, buying the eggs and hatching them under a hen or in an incubator, or buying day old chicks in the spring. In case the last method is decided on, it will be necessary to have some brooding device ready when the chickens arrive. Twenty-five or 30 can be taken care of with a home-made brooder if they are looked after carefully, but a larger number will require one of the numerous types of brooding devices. A good type of home-made brooder is a gallon jug filled with hot water placed in the middle of a box and covered with a cloth which sags down so as to touch the chicks backs. Cut a hole in one end of the box to allow the chicks to run in and out. The water in the jug must be kept warm.

The least expensive and frequently the best way is to purchase a couple of setting hens—the American breeds making the best mothers—and good hatching eggs of the breed desired. The hen serves the dual purpose of incubator and brooder and will give excellent results if looked after a little. The

mother hen must be dusted with a good lice powder before the eggs hatch and when the chicks are two or three days old their heads should be greased with a little lard to kill head lice, and a little of the grease rubbed under the wings of the mother hen. Lice quickly sap the vitality of little chicks and finally kill them. If the chicks become stunted in their early life the resulting pullets will not only mature slowly, but will not be very profitable as layers.

Poor incubation, improper brooding temperature, wrong feeds and feeding methods and insufficient exercise cause stunted chicks. Care must be taken not to keep too many fowls in too small quarters or on too limited an area. This cannot be emphasized too strongly as it will result in sure failure. There can be no hard and fast rule laid down as to the number of fowls that can be kept on a certain size yard, a great deal depending on the operator and equipment at his disposal.

Any one interested in back yard poultry keeping can secure free of charge some very interesting and instructive bulletins by simply writing the Department of Agriculture at Washington for them.

97 per cent. perfect track. They also took the prize of \$50 which was offered for the best section. The foreman for this section was Frank Dilsaviour, Columbus Grove.

The following towns were represented: H. E. King, Cairo; Joseph Wessel and John Wessel, Ottawa; A. Flickenstein, Leipsig; H. Blanckmeyer and George Meyers, Deshler; John Weaver, Custer; Richard Heminger, Weston; Carl Sheriff, Tontogany; William Van Scoter, Haskins; J. E. McCullough, Perrysburg; B. F. Beckman, Findlay; John Castner, McComb; J. S. Curry, North Baltimore; B. C. McCann, Bowling Green; Frank Dilsaviour, Columbus Grove; George King, John Poppoff, Edward Woodruff and Steven S. Tinio, Toledo.

R. E. Chamberlain, Dayton, division engineer; J. W. Kelly, assistant superintendent, Toledo; Dr. Hutcheson, Lima, division medical examiner; and M. L. Piper, executive secretary of the railroad "Y," were other guests at the banquet.

The dinner was furnished by the restaurant management and a committee of ladies served. The after-dinner program consisted of short talks by various guests of the occasion.

The accompanying photograph shows the men who attended the banquet.

Left to right, front row: Section Foremen Joseph Wessel, R. Hemminger, A. Flickenstein; Engineer R. E. Chamberlain, Supervisor W. O'Brien, Section Foremen George King and N. Stano. Second row: Section Foremen Carl Schreff, John Wessel, George Meyers, J. Weaver, B. C. McCann, J. S. Curry, J. Poppoff. Third row: Section Foremen H. E. King, John Castner, William VanScoder, E. Woodruff, B. F. Beckman, H. Blankemeyer, J. E. McCullough, F. Dilsaviour.

Road Supervisor O'Brien and His Men Celebrate Their Victory with a Banquet

ON January 12, at 6 p. m., at the Railroad Y. M. C. A., Toledo, Ohio, about 25 men, representing the various towns along the line of the Toledo Division, sat down to a sumptuous banquet given by William O'Brien, road supervisor, Toledo Division.

These men came to Toledo as the guests of Mr. O'Brien, who, for the fourth consecutive year, has been awarded the \$100 prize given to the road supervisor having the best

division. The territory between Toledo and Cincinnati is divided into five divisions. The award is decided by a machine which, when taken over the track in the officials' car, registers the defective pieces of track. The piece of track showing the least defects is the one that draws the annual prize. The fact that Mr. O'Brien and the men under him have captured this prize for the Toledo Division for four years speaks well for the work they have done. The division showed

The payments to pensioned employees constitute a special roll contributed by the Company.

During the calendar year 1920, \$342,993.35 was paid out through the Pension Feature to those who have been honorably retired.

The total payments since the inauguration of the Pension Feature, October 1, 1884, to December 31, 1920, amount to \$4,262,520.60.

The following pensioned employees, after serving the Company faithfully for a number of years, have died:

Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—
Retreat from care that ever must be thine;
How blest is he who crowns, in shades like these,
A youth of labor with an age of ease.*

GOLDSMITH—"The Deserted Village"

E. A. Durham

E. A. Durham, better known among railroaders as "Lon" Durham, was born at Wilmington, Dearborn County, Ind., on November 26, 1853. At the age of 18 he began his railroad career as a helper in the brass foundry of the Ohio and Mississippi Railway Company. Here he worked until the shops were moved to Seymour, Ind. At Seymour he worked as blacksmith helper, under Foreman Harry Jeffries, until November 11, 1874, when he was made fireman of a local freight engine between Seymour and Storrs. In this capacity he worked under his brother Theodore. On August 31, 1881, Division Master Mechanic Arthur Donaldson promoted him to freight engineer. (At that time there was no general master mechanic or road foreman of engines.) In 1893, Mr. Durham was promoted to passenger engineer and assigned to that section between Cincinnati and Louisville. This position he held until his retirement, at his own request, on November 20, last.

Thomas McDermott

Thomas McDermott, pensioned conductor and disciple of Safety, was known in his early days as "Tom," or "Tiger." His father, Thomas McDermott, Sr., was a Baltimore and Ohio pioneer who came fresh from the Emerald Isle, took service at Baltimore and drove by ox-team with a party of engineers to Grafton, W. Va. He, too, was retired on a pension after a half-century of service with the Railroad. His grandson, John M., son of the man of whom we are writing, is now industrial agent at Chicago; his brother, William, was telegrapher for a number of years. The combined years of service of the grandfather, son, and two grandsons are nearly a century and a quarter.

"Tom" McDermott carries many a reminder of old methods of coupling in the scars on his fingers and toes, and recalls many a narrow escape during his years of service. He began his railroad career 42 years ago, entering service at Grafton, W. Va., as engine wiper—that much begrimed and oft maligned urchin who formerly manicured the "iron hoss" and whose ilk is fast disappearing. Later he became helper in the brass foundry at Newark, Ohio, then fireman, brakeman, and conductor. The latter position he held until his retirement.

Thus passeth the old school who knew not overtime, air-hose, nor patent coupler, but who could race along the icy running boards and "wind 'em up" with a pick handle, or deftly "string 'em together" with link and pin, and who, while the old black coffee pot in the caboose held a savory cup, faced the elements cheerfully until a stop gave the opportunity to test the steaming strength of its contents.

Then came the way-bill, the hot-box, and the train order; now the book, the easy chair and the apple.

Eugene T. Gilmore

Eugene T. Gilmore, who holds a continuous service record of 41 years 4 months and several years additional, was born in Salmon Falls, New Hampshire, on September 14, 1846. At the age four he went with his parents to Ohio. At 17 he enlisted in the Union Army and at the end of the Civil War came to the Baltimore and Ohio as bridge carpenter. He helped to build the Painesville Branch between Painesville and Chariton. Two years later he left the Baltimore and Ohio to work for the Lake Shore, but after three and a half years he returned to his old job. In 1879 he was made foreman; in 1888, division foreman; in April, 1907, carpenter; in 1917, foreman. In this capacity he served until he was pensioned, January 4, this year. Mr. Gilmore says:

"I have been granted only one leave of absence during my period of service and that was for five days only. Never have I failed to complete satisfactorily any piece of work given me to do. Never have I failed to respond to an emergency call, day or night. Have more than made good every working day during my time of service by night and Sunday work."

All honor to Mr. Gilmore and our other loyal veterans of the rail.

B. L. Hardesty

B. L. Hardesty, conductor, Cumberland Division, who has just been pensioned, was born on January 24, 1856. He first entered the service of the Company as water boy, when Thomas Carr, camp foreman, and Engle Malone, supervisor, were handling the building of the double track at Snowy Creek Grade. He then worked with pick and shovel for a few years and started braking on October 9, 1878. He was promoted to conductor on

January 12, 1889, and on his second trip in this capacity lost the first joint of his index finger while making a coupling with the old link and pin. He continued as a conductor until he was pensioned.

Mr. Hardesty owns an attractive and comfortable home at Mountain Lake Park, Md., and is proud of the fact that he is the father of a family of Baltimore and Ohio employes. His first son, Thomas B., now deceased, was a fireman at 16 and an engineer before he was 21. William is a machinist at Cumberland and Charles is a yard brakemen at Keyser. His youngest son, now 7, wants to be a railroader too, and Mr. Hardesty hopes that he will be able to duplicate his daddy's record of 48 years' service.

Philip A. Drum

Philip A. Drum was retired on December 30, 1920, after having been in the service of the Baltimore and Ohio for 31 years.

Born on a farm on February 21, 1852, he began farm work at the age of 12 years. On October 14, 1890, he obtained employment with the Baltimore and Ohio as laborer in the saw mill at Newark, Ohio. After working in this capacity for four years he was promoted to mill machine hand.

In June, 1895, the saw mill was transferred to Zanesville. Mr. Drum was also transferred to that point and continued working as mill machine hand until the flood of March, 1913, when the shops were discontinued and Mr. Drum was again transferred to Newark, where he worked until he was retired.

Joseph F. Johnson

Joseph F. Johnson, pensioned yard engineer, was born in Morgan County, Ohio, on November 26, 1847. His early life was spent on a farm. He enlisted for service in the Civil War at the early age of 15, in the Fifth Independent Battalion, Ohio Volunteer Cavalry, and served until the end of the Civil War in the Twenty-second Corps, under General Sherman. Most of his time during the period of the war was spent in Kentucky.

He was mustered out in Cincinnati in 1865 and entered the service of the Cleveland and Pittsburgh Railway, now a part of the Pennsylvania System. Several years later he took service with the Panhandle Railroad as brakeman, leaving in 1870 to return to the Cleveland and Pittsburgh as fireman. Later he was promoted to fireman on that road. In 1877 he entered the service of the Allegheny Valley Railroad as engineer, leaving their service in 1884 to go with the Pittsburgh and Western Railroad (now a part of the Baltimore and Ohio) as yard engineer. He held this position until pensioned in January of this year. Mr. Johnson was commended at one time for action taken in averting the collision of two passenger trains.

RECENTLY PENSIONED EMPLOYEES

Left to right, top row: Joseph F. Johnson, Lou Durham, P. A. Drumm, Eugene T. Gilmore. Bottom row: James G. Whyte, Thomas McDermott, John M. Ellis, B. L. Hardesty

Daniel Swepton

The accompanying photograph shows Daniel Swepton, Illinois Division, who on December 20 was placed on the Pension Roll.

Mr. Swepton was cabinetmaker, Motive Power Department, Washington, Indiana. He entered the service of the Baltimore and Ohio at Zaleski, Ohio, on May 15, 1864, as car repairer. Later he held the positions of carpenter, patternmaker, car builder and cabinetmaker.

Daniel Swepton

John M. Ellis

John M. Ellis, pensioned baggageman, Willard, Ohio, was born on December 22, 1854. He entered the service of the Pittsburgh and Western Railroad at Allegheny, Pa., in 1881, as freight brakeman. At this time the track was of the narrow gauge type, being only about three feet wide. The trains were often known by the names of the conductors, such as "Bill Nichols' Train," the one train which hauled all freight cars at night, such as empty gondolas to the mines; another train, the day local, on which Mr. Ellis worked, was known as the "Market Express." Some of the duties of a brakeman in those days are explained by Mr. Ellis.

"Cars were coupled by link and pin; the trains controlled entirely by hand brakes. Not having sand on the locomotives, the brakeman was often required to place soft sandstone on the rails all the way up the main grade, so that the engine tender, backing up, would crush the stones, thus sanding the rails for the driver. There being no coal tipples, the brakeman was required to coal up the engine at the coal bins at the eastern end of the division with a supply sufficient to last the round trip."

On July 1, 1893, Mr. Ellis was promoted to freight conductor and remained in that capacity for over 15 years. He was then

promoted to passenger conductor and held that position until 1912, when he was disabled by an accident to this train. Two years later he was reinstated as baggagemaster and remained in that capacity until he was retired.

James G. Whyte

James G. Whyte, pensioned on January 13, this year, was born at Wheeling, W. Va., on November 19, 1855. He attended

Pleased with Passenger Service, He Directs Freight Over Baltimore and Ohio

ST. CLEMENT'S RECTORY
642 DEMING PLACE
CHICAGO, ILL.

December 27, 1920

MR. J. F. McWILLIAMS,
Chicago.

My Dear Friend:

On my recent trip to Baltimore, I went by way of the Baltimore and Ohio, at your suggestion. I know you are anxious to learn whether in view of my experience I share your enthusiasm for Baltimore and Ohio service. I think you will find the happiest answer in the fact that now about to sail for Europe, I am going to New York

over the Baltimore and Ohio. I find its service all that could be wished for.

With every good wish, I am,

Sincerely yours,

(Signed) F. C. REMPE.

As a result of his pleasant experience with our passenger service, Monsignor Rempe was instrumental in obtaining for the Baltimore and Ohio three of seven or eight cars of old clothing sent to Central Europe for relief work, as follows:

P. R. R. 42420—26,900 lbs.—\$418.13

B. & O. 190220—28,250 lbs.—\$545.25

B. & O. 172642—29,860 lbs.—\$461.30

Galli-Curci's Managers Write:

"Best Dining Car Service We Have Received This Season"

EVANS AND SALTER
Fifth Avenue at 44th Street
New York

Managers GALLI-CURCI.

January 29, 1921.

MR. E. V. BAUGH,
Superintendent Dining Cars,
Baltimore and Ohio Railroad,
Baltimore, Md.

Dear Sir—We desire to add a word of praise for the service which we received on

the dining car on train No. 12, Tuesday, the 25th, from Parkersburg, W. Va., to Cumberland, Md. Our entire party made this trip and we must say that the service was the best that we have received at any time during the entire season. We knew that you would be interested to learn of this marked efficiency. Mr. H. H. Fisher was in charge of the car.

Yours very truly,

(Signed) EVANS AND SALTER.

He Always Liked Our Freight Service—Now He Boosts Our Passenger Service as Well

THE CORNO MILLS COMPANY
NATIONAL OATS COMPANY
ST. LOUIS

November 19, 1920.

MR. W. F. BOLLMAN,
District Freight Agent,
Baltimore and Ohio Railroad,
Saint Louis, Missouri.

My Dear Bollman—While the Baltimore and Ohio has always been our preferred freight route to the East, and has handled thousands of carloads of our freight, I personally haven't ever regarded it as much of a passenger line, and have always very religiously passed it up when I had any traveling to do.

Accordingly, when in Washington some few days ago, I went to the ticket office

when ready to come home and, as usual, tried to get accommodations on another line. I found there were no lowers left, and was about to take an upper when I recalled that you had recently remarked that I was missing a treat in not trying your passenger service; so, finding that I could get a lower on the Baltimore and Ohio, I took it, and wish to acknowledge that it proved to be a mighty good investment, and that I have been "off on the wrong foot" in turning up my nose, so to speak, at your passenger service.

Have done considerable traveling through all sections of the country, but I have never had a pleasanter or more satisfactory trip than the one back from Washington on the Baltimore and Ohio. It was thoroughly

delightful. The scenery was beautiful, the roadbed good, the dining car service excellent, the train employes uniformly courteous and considerate, and—best of all—the train on time to the dot all along the way, which is better than your competitors have been able to do the last two or three times they carried me. I was much pleased with every phase of the journey, and shall hope to duplicate it next time I go East.

With kind regards, and best wishes, I remain,

Very truly yours,

(Signed) H. H. KENNEDY,

Secretary and Counsel.

Station Passenger Agent Newman Remembered the Golden Rule

LAST summer a Mr. and Mrs. Williams, elderly travelers from Minnesota, arrived at our station in Chicago and found that they had had their pockets picked of money, tickets and other valuables. Station Passenger Agent R. O. Newman heard of their plight, arranged for their accommodation at a hotel, wired to their folks in the West and explained their predicament, paying their expenses in the meantime out of his own pocket.

The result of his unusually thoughtful act is shown in the following letter:

THE PIONEER STORE CO.

BAUDETTE, MINN., September 1, 1920.

MR. R. O. NEWMAN,
Station Passenger Agent,
Grand Central Depot,
Chicago, Ill.

Dear Mr. Newman—The dear old couple whom you and others befriended arrived home safely this a. m. and I wish to join with them in extending our heartfelt thanks.

It was their good fortune to meet real men, whose generosity will never be forgotten. It seems that this is a pretty good world to live in after all. We enclose herewith the amount of money for which you are held responsible at the hotel.

Most sincerely yours,

THE WILLIAMS FAMILY,

By (Signed) J. L. WILLIAMS,

President.

If You Were Freight

By W. C. Bowhay

If you were freight,
And freight were you,
And you were changed about,
So freight packed you,
And marked you to ———,
But did not show the route,
The claims and files that it would make,
Would surely make me frown,
Because in getting you smashed up,
Our revenue would break down.

Women's Department

Edited by MARGARET TALBOTT STEVENS

My Treasure

*When first I beheld her in apron of blue,
A smile on her lips, pearly teeth shining through,
Came the thought—how to meet her, to call her my own,
For a neighbor now claimed her—and I lived alone.*

*The days slowly passed ere I saw her once more.
Ah, had I the courage to have spoken before!
For this dainty Lizette—I had found out her name—
Was truly a treasure, to lose her a shame.*

*One morning I muttered a brave "Howdy do?"
The rest—it was easy; my vision of blue
Now visits me daily—for Lizette, you see,
Is a little black maid, who scrubs steps for me.*

Stop, Look and Listen

A Safety Monologue on Matrimony

By Eulalie Cross Layer

(Given at the Safety Rally at Willard, Ohio, on February 2)

LET me introduce to you George Washington Ephraim Jones, colored porter at our local station, and more familiarly known to us as "Bones," who has been requested to tell us some incident pertaining to Safety First which has occurred at his place of duty:

Ladies and chilluns and what's commonly known as gentleman: When Massa Barniville comes into de depot and pat me on de back and says, "Bones, we all's givin' a Safety First meetin', and we wants our employes to come up to de Temple Theatre on de second day in February, and tell us some incident pertainin' to Safety First. You understand? Now you've seen 'nuff 'round here to fill a book and we wants you all to come up dar and tell us erbout it in youah own words."

(Who in de debbil's words Massa Barniville reckoned I'd be tellin' it in I ain't been able to figger out yet.)

"Sure nuff," Massa Barniville, says I, "ef you thinks I kin entertain them folks I'll be right thar."

"All right, Bones," says he, "we'll 'pend on you, only you be mighty careful and don't be tellin' any lies."

I didn't put up no argyment, but what on earth Massa Barniville meant by *me* tellin' lies, I don't grasp. Dere was one about a gold mine down in ole Kaintuck—but he says not to mention that up hyar, so I won't.

Now, folks, dere was one incident, happened right 'fo' my eyes which was 'bout as good as any Safety Fust sign 'I've seen stuck up on de platform or on de right-of-

way. You all rekollect dem young ladies what works up to de offices at de depot and at de shops? You all needn't blush, I won't be tellin' youah real names. Wall, der was one of dem young ladies, her name was—le's see, her name was—Mandy. That weren't it nohow, but we'll call her Mandy. Miss Mandy was 'bout the neates' pretties' girl in Willard, and she and Massa—Massa—Smith (that weren't it a tall, a tall) was very much in love. I saw it comin'. He were a employe too, but somehow he'd always manage to be down in de baggage room 'bout de time Miss Mandy come from her work and fust thing you knowed they'd be trottin' off down de platform together.

Things was goin' pretty smooth and all de rest of us employes was waitin' fer de weddin' bells, etc., when what'd Massa Heller do but hire a nice lookin' young feller to sell tickets in de depot. He was tall and black haired, but he didn't have a mite o' pep; stood 'round all de time he was off duty with one of dem dere coffin nails hangin' from his mouf. But 'fore you knowed it, him and Miss Mandy was takin' to each other jist like 'lasscs takes to griddle cakes and findin' 50 excuses ever day to see each other. Things was lookin' pretty black for Massa Smith, who stood around lookin' a thousand years old and mad 'nuff to refuse chicken fer a Sunday dinnah.

Atter awhile Miss Mandy couldn't see nobody but dis ticket office puson and neber even had a smile for Massa Smith. I tell you it got pretty pitiful.

I kep' thinkin' on it till 'peared to me

I'd have to stop one of them young fools and say, "Look'e hyar, hadn't you bettah 'Stop, Look and Listen'?" But I know dat Bones wouldn't dare cut on sich didos in Willard. I got to figgurin' how I could p'ison dis ticket office pusson, or shove 'im in front of numbah 7 some fine mornin'.

Seems to me love's lak a melody. Soon's a fellah gets sharp fer a gal or starts sendin' her a note, she knocks 'im flat by tellin' 'im not to be playin' 'round. Leastwise we all got to spectin' weddin' bells of a different chune.

One evening 'long 'bout five o'clock, jist when dis ticket office pusson was waitin' fer Miss Mandy to come from her work, hyar comes a stock train out on de New Castle Division, and on top ob one of de cars, most likely ketchin' a ride in from de hump, was Massa Smith. I'se hopin' he wouldn't look dat way and see Miss Mandy goin' home with dat good fer nothin', but sure as you live, right dat minute come Miss Mandy out ob de entrance with her arms full of mail.

Mah eyes was so full of her and Massa Smith dat I neber saw nothin' else 'till somebody hollered, "Look dar, dat lad 'll git killed!" I looked. Sure 'nuff, right down below de depot where de Lake Erie crosses de New Castle Division, dere was a little tike, not more'n eight or nine years old, what had caught hold ob de hand grip on one ob de cars.

I knowed he neber could hold on and I could jist see him cut into a thousand pieces. I guess we all did, but we jist stood thar paralyzed like ez though dere warn't nothin' we could do. By this time dere was seben or eight of us standin' in a row with our moufs open, and Miss Mandy were one ob dem.

All of a suddent I looks up. Dar were Massa Smith, he'd seen de kid too and was tryin' to crawl over de cars to git to him afore he was dragged under. I neber tuk my eyes off dat lad, an' I don't know how Massa Smith done it, but 'fore you knowed it he'd crawled ober the top of one car and half way down de side, lifted dat kid, fust by his arms den by his body, up to de top ob de car; and de last we saw ob dem de

Mrs. Eulalie Layer
Who gave a clever reading at the Safety Rally
at Willard

kid was wavin' to us from where he was sittin' 'side Massa Smith, who looked powerful white, but safe and sound jist de same.

Miss Mandy am de kind what would be turrible 'shamed to faint in front ob a crowd, and she didn't. But I sced she was mighty pale and I knowed I heard her sob when she told this ticket office pusson dat she'd rathah go home alone tonight!

Long 'bout four o'clock next day here comes Massa Smith saunterin' in. He walks up to me an says in his old time way, jist as if it hadn't been six or seven weeks since he'd been dar, "Hello Bones, how you comin'?" Weren't much, were it? But I knowed things was alright with him and Miss Mandy just as if he'd said so. And sure 'nuff they was. He waited. Long 'bout five o'clock we heard her comin' down de

stairs and it seemed to me her step was different—and I *knowed* her *voice* was—when she said, "I'se ready Walter, are youah comin'?"

I knowed dat kid didn't hab no right on de platform and I've chased him off a dozen times since, but I neber did have de courage to say nothin' 'bout him stealin' a ride on dat particular day. Secmed like it were Providence. You'd thought so too if you'd heard them weddin' bells and we didn't have to wait long neither.

Funny, ain't it, when a pusson "Stops, Looks and Listens," all his life 'bout matrimony he's so powerful anxious to see other folks get coupled up?

But you jist 'member this: his name weren't Massa Smith and her'n weren't Miss Mandy.

Cooperation

By Marie L. Blackwell

General Freight Office, Chicago

IT HAS long been a thought in my mind to analyze the business natures and characteristics of my fellow workers by associating them with duties.

A wonderful opportunity presented itself to me when I considered our employment with the Baltimore and Ohio Railroad. One of the first impressions was a statement made by a member of this organization: "A mistake committed once is excusable, for we all make mistakes, but a repetition is stupidity; this is inexcusable." Why not strive, therefore, to keep from making the first, so that the second will be impossible.

A passing conversation exchanged with another member, on the much talked of subject, "Cooperation," gave me food for further thought. When an employe is really desirous of getting ahead by climbing the ladder to success, he must first bear in mind the true principles of the concern with which he is employed, giving it the best there is in him; the good results then take care of themselves.

We, as employes, owe to our firm cooperation. This cannot be attained unless we, individually, reflect this characteristic, and we cannot reflect it unless we put into practice—even in the smallest portion of our allotted duties—this simple art.

The powerful and sleepless forces of good thought are continually placing their influences over our work; this is neither to our advantage or to our disadvantage, depending entirely upon the weight we throw in the right direction. You, and you alone, can be the means of reaching the pinnacle of success, envied by the crowds but attained by few. Don't be overpowered by the crowd. I recall a saying worthy of note, "One for good is a majority." Be the majority in quality, for it is this that really counts. If you fail to learn, grasp or advance by lack of cooperation, try by cooperation—then watch the results.

An important point to keep in mind is

that your superior in business is like a cloudless sky; if it were not for his clearer vision he would not be there. He has undoubtedly made the best of his knowledge and practice of cooperation. Just so long as you are contented not to cooperate freely with him, you can expect nothing better than failure as the ultimate result of your laxity.

Why are we desirous of success? We

should be because it gives us an inward gratitude that our position in business is beneficial to others. We must succeed because our firm is successful. Why is it successful? Here are a few of the reasons:

1. It is an organization based on principles.
2. It is governed by law.
3. It is regulated by system.
4. It is cooperating with its shippers and employes in every possible way to further efficiency in transportation. As a result it is serving eight of the ten largest cities in the United States; making for increasing usefulness, a greater earning capacity and the upholding of true Americanism.

Now, let us sum up the whole. If you work for a firm, *work!* Don't play. If you are able to work, stand by your employer; give him your undivided support. If your wages are supporting you and purchasing your daily needs, thank your employer, don't abuse him. Stand pat and *boost*. If you cannot boost, do not knock, for when you knock your firm, you knock yourself, for you are a part of it. Quit your position, then knock to your heart's content. Continue this until you have found your head, then make a real dent in it.

"Can't," "I won't," "I forgot" fail to apply in business. Remember that Cooperation spells success, advancement pleasure, comfort, and that this secret is fully realized by putting into practice the adage: "The measure ye mete shall be measured back to you."

Dear Women Readers:

"In the Spring," said a man the other day, "a woman's fancy lightly turns to thoughts of house cleaning."

He was right, practically, if not poetically, for, at the first whiff of balmy air, the stenographer seizes upon her cleaning cloth and benzine can and attacks her typewriter vigorously; the clerk begins to clean out her desk, and everybody in the office gets the fever, while the poor file clerk shakes her head and sighs over the winter's accumulation of files which have just been sent down to her and for which she has spent countless moments in fruitless searching.

And the housewife comes in for a large share. Her brooms and brushes and pails and dust cloths are handled so dextrously and with such emphasis that the whole house is in an uproar, while cartoonists in the daily paper busy themselves with making funny pictures of husbands leaving home. And yet, these very same cartoonists will find excuses to get home early in the afternoons to mow the lawn and dig around the rose bushes.

However, I want all of those girls—and no matter the age, we're always girls—who have helped build up the Women's Department, to pause a moment in their sweeping and dusting while I thank them for their cooperation. And, speaking of cooperation, read the article in this issue, written by Mrs. Blackwell, of Chicago.

Just as an example of what girls can do if they try, there were 50 of the Baltimore and Ohio girls, of Baltimore, who gave their time, furnished their own costumes, and helped serve refreshments at the American Legion dance on February 8. Their pictures appeared in our February issue. I want to thank each and every one of them. Some of these did not take a minute for their own pleasure, but "stuck by" until it was time for the "ice cream man" to go home. Thank you, one and all.

Yours sincerely,

Margaret Talbott Stevens

Frocks of Pronounced Smartness are Simple in Design

Dark Colors Emphasized in Impressive Models for General Wear—Crepe of Dull Finish and Brilliant Satin in Effective Combinations

By Maude Hall

AS FAR as clothes for general wear are concerned, women who appear the smartest this season are those whose frocks are designed upon the simplest models. In planning fashions for the new season, period modes have been quietly disregarded and the new offerings are the expression of good dressing reduced to such a fine art that chic effect, comfort and smartness are achieved without the aid of the styles of any other age than the present.

A cleverly simple frock of check serge is shirred at the waist, where the long kimono blouse and skirt are joined under a sash of black satin. The dress is made to slip on over the head and the front of the waist may be slashed at the center and rolled back to form a collar, or worn low with a convertible collar. The sleeves are three-quarter length and are opened at the back to disclose a facing to correspond with the sash and collar.

For daytime purposes also are the light weight duvetyns intended. The latest offerings are more durable than the original fabrics of that weave, and come in charming colors, brown, tan, dark green, Burgundy and henna being especially smart. Woolen homespuns and wool jerseys are also to be seen in a number of smart frocks. One youthful design in two-toned jersey closes on the left shoulder and under the left arm. At either shoulder in front are groups of small tucks, which run as far as the base of the square neckline, where they are released. Across the front of the dress, self-straps are stitched, secured at either end with small buttons. Large pockets, short sleeves and a sash girdle of jersey complete the little details that count so tremendously in the smart appearance of the design.

A dress of this type is ideal for development in the new cottons. Just now gingham is to the fore, as some of the greatest dressmaking establishments of New York and Paris are featuring them in models for tropical use. In all of these gingham, the variety in the shades of blue is interesting, color being one of the items of greatest interest. The blue featured includes the brilliant royal shade and the lighter tones of turquoise, corn-flower and sky blue. While there are many in solid color, there are also delightful striped and checked gingham. Decidedly novel is a new form of trimming for gingham and other checks

in tub fabrics. Little squares of duvetyn are cut out and pasted on the designs which fit into the crossbar of the fabric, giving an effect similar to a heavy cross-stitching. Of course, the new trimming has not the laundering qualities of cross-stitch embroidery, but it is to be the same old story of cleansing by scientific processes rather than by soap and water, for the fashionable "tub" materials.

The vogue for daytime costumes of silk will give added prominence to taffeta. Unusually pretty is a model in two-toned taffeta, blue and henna being combined in the color scheme. The tunic blouse is slashed at the center-front and rolled back with the collar, which is faced with white organdy. Outlining the fronts and sides of the blouse is a simple embroidery executed in henna rope silk. Two-tone ribbon is used for the girdle. The skirt is attached to a fitted underbody made of lining.

Suitable for either silk or organdy is a maize taffeta frock with short-sleeved overblouse and gathered skirt. The blouse is cut away from neck to hem, showing a vest of rust color silk and the pocket-trimmed front of the skirt. Maize taffeta forms the girdle, which is tied sash-fashion at the back, the ends being picoted. Rust silk is used to face the sides of the overblouse, though for warm weather, organdy promises to replace taffeta and crepe de Chine for facing panels, tunics, etc.

Dull crepe and brilliant satin are combined in the development of a number of pretty daytime frocks. The crepe is usually of the sports type and forms the skirt, the satin being used for a blouse.

CHILD'S COAT NO. 7673. Six sizes, 1 to 6 years. As illustrated, size 4 requires 1 7/8 yard 36-inch material with 7/8 yard 36-inch contrasting material for collar facing and cuffs; or, of one material, size 4 requires 2 3/8

Dark Brown Serge Dress in One-Piece Design with Embroidery About Neck and on Pockets

9330

yards 36 inches wide; 2 yards 36-inch lining, making seam at center-back of lining. Made with inserted side sections having shirred tucks and a heading at upper edge. Large collar and fronts may be rolled high or low. Price, 20 cents.

CHILD'S EMPIRE DRESS. No. 7785. Three sizes, 2 to 6 years. Size 4 requires $\frac{3}{8}$ yard 36-inch material for yoke and sleeves, $1\frac{3}{8}$ yard 36- or 40-inch material for waist and skirt. Dress has square yoke with high neck finished with a turn-down collar; perforated for square neck. The two piece gathered skirt is attached to pointed Empire waist; the waist is slashed in front and finished to simulate pockets. Long one-piece sleeves gathered to bands and finished with turn-back cuffs; perforated for shorter sleeves. Price, 20 cents.

LADIES' DRESS No. 9330. Nine sizes, 34 to 50 bust. Width at lower edge about $1\frac{1}{4}$ yard. Size 36 requires $5\frac{1}{2}$ yards 36-inch material, $1\frac{3}{8}$ yard 36-inch lining. Three-quarter length sleeves or long one-piece sleeves sewn in the armholes of outer waist. Three-piece gathered tunic. Price, 35 cents.

Easter Bunnies

Mix well together 2 cups sugar, 1 cup butter. Add $\frac{1}{4}$ cup flour and 4 well-beaten eggs. Add 1 tablespoon vanilla, then flour enough to roll to a stiff dough. Cut with a rabbit cake cutter, bake in quick oven, and ice with following:

One pound XXXX sugar, moistened with cream, lump of butter of the size of an egg, flavor with vanilla and beat until creamy, adding pink vegetable coloring, if desired.

A ONE-PIECE dress that answers all purposes of general wear may be effectively made after this model. It is trimmed with embroidery, placed about the neck and on the pockets, done in self-color silk. The sleeves are sewed into the arm-holes of a front-closing underbody, the dress closing at the left side. The two-piece gathered skirt is attached to the lower edge of the waist. Medium size requires $4\frac{3}{8}$ yards 36-inch material, with 1 yard lining for the underbody.

In cutting the dress, the front and back gores of the skirt should be laid along the lengthwise fold of material, also the outer front of the waist, collar and vestee. All the remaining pieces of the pattern have the large "O" perforations laid along a lengthwise thread.

The underbody is made first, and if this is well fitted, it will materially help the lines of the dress. Close the under-arm and shoulder seams as notched, hem the front, plait at lower edge and stitch.

Take the sleeve, next, and plait creasing on slot perforations. Stitch, leaving slashed

front, with center-fronts and lower edges and large "O" perforations at shoulder edges even. Finish left side of vestee for closing.

Close right under-arm and shoulder seams of outer waist and finish left for closing. Gather lower edge and adjust to position on underbody. Stitch lower edges together, leaving outer front free from center-front to left under-arm edge. Draw gathers to required size and finish for closing.

Next, join skirt gores and finish left side seam for closing. Gather upper edge of skirt and sew to lower edge of waist. Turn pockets, which should be embroidered first, and adjust to position.

The widest freedom is allowed in the arrangement of the belt.

Pictorial Review Dress No. 9120. Sizes, 34 to 48 inches bust. Price, 35 cents.

DRESS No. 9304. Sizes 34 to 46 inches bust.

DRESS No. 9146. Sizes 34 to 48 inches bust.

DRESS No. 9071. Sizes 34 to 44 inches bust.

DRESS No. 9137. Sizes 34 to 44 inches bust.

DRESS No. 9315. Sizes 34 to 50 inches bust.

DRESS No. 9329. Sizes 34 to 46 inches bust.

edges free and finish for closing. Gather between "T" perforations, close seam as notched and sew sleeve in armhole of underbody.

Plait lower edge of vestee, tack and adjust to position on right front of underbody

Little Letters from Little People

WE have always put the little ladies first, but this time we are going to turn things about and put first a letter from little James Sampsel, Washington, D. C., who is only five years old. Of course his mamma wrote the letter, but James told her what to write. This is a part of what he says:

"My daddy (grandfather) has been with the Baltimore and Ohio for thirty-five years. At present he is in the Traffic Department, Camden Station. I am only five years old, and I go to the Hubbard School. My pet is a big Belgian hare. His name is Bun, and he is very fond of mother's roses. I like to draw trains of cars, and I want to be an engineer when I'm a big man. Just now I am making a freight train of paper for my daddy, whose name is William F. Harrison."

From Fairmont, West Virginia, there comes a letter from a little girl named Violet Miller. She says:

"My father works for the Baltimore and Ohio. His name is Harry Miller. I want you to write some more about the White Fairy. I am 10 years old and am in the fourth grade."

And Rosalie Swink, Connellsville, Pa., wrote me another nice letter. Rosalie likes to go to Sunday School and to hear stories about Jesus. She has a sister 13 years old and they both like to go to school.

Dorothy Taxis, Baltimore, Maryland, has an uncle who runs an elevator in the big Central Building at Baltimore. She liked the letter written by Myra Gill, who goes to Dorothy's Sunday School. She liked the drawings on the January Children's Page.

Now comes another little poetess, Kathy Colling, who lives at Newark, Ohio. Her father is William Colling, a boilermaker. She is 10 years old and in the fifth grade. This is her poem. Can you guess the name of the flower?

There's a dainty little flower
Comes peeping through the bower
In the early Spring of the year.

And him we always cheer
When he comes to visit here,
In the early Spring of the year.

We're sorry when he's gone,
For he does not linger long,
In the early Spring of the year.

Three splendid letters have been sent by Harold Dunkerley. Harold knows James King, who wrote the poem about the Pilgrim, and Ida Smith, who has written several poems, for they all live at Dorsey, Maryland, and go to the same school. And what do you think of this! Harold Dunkerley wants to know when Aunt Mary is coming out to see him and to *spank* him. I'll be ready to go out very soon, and if any of you boys and girls want to come along to help me, just let me know.

Billy's Letter to the Easter Rabbit

"Dear Mr. Rabbit," wrote Billy McGee, "I've been just as good as a boy can be; I have wispered only six times today And broken only two windows at play. I stuck a pin in teacher's chair, And pulled the ribbon from sister's hair; I chased Mrs. Johnson's maltese cat, And put a hole in Granpa's hat. And then I told my Dad tonight He said what I'd done was far from right. But, Mr. Rabbit, I think you'll agree I've been as good as a boy could be, And I'm sure you'll see that Easter brings Me lots of eggs and choc'late things."

Drawn by Murtie May Carter, Lesage, W. Va.

Dear Girls and Boys:

Thank you for your nice letters. I have enjoyed reading every single one of them. Aren't we having a splendid time with our Page? And you are all helping me so nicely.

I told you about the April number and of the birds that we will talk about. Now I'll give you just three guesses to tell me what the May letters are to be all about.

There! I knew that you couldn't guess, so I am going to tell you.

Did you ever go to the circus or to the zoo? Then you can help me wonderfully. Our May Children's Page will be all about the circus—the tents, clowns, animals, balloon man and pink lemonade. Draw me some pictures of them, and I'll tell you a story about how my brothers and I played circus; then you can try it for yourselves. Now don't forget. All letters that you write from now until April 5 must tell something about the circus or the zoo, and we'll have a real circus page. Send your letters to "Aunt Mary," BALTIMORE AND OHIO MAGAZINE, Mt. Royal Station, Baltimore, Md.

With lots of love to all,

Aunt Mary

Read What This Boy Did

Even little boys and girls can help the Railroad to do away with accidents. If you will turn to the Honor Roll pages and look under the notes for the New Castle Division, you will find a letter, written by Superintendent Stevens to Charles Neil Starr, a 13 year old boy, and commending him for noticing a defective brake beam on Pennsylvania train No. 333. Perhaps if you will keep on the watch, you, too, may be able to do something like this.

My dolly

Drawn by Gracie Anna Carter, Lesage, W. Va.

The Mad March Hare

LONG years before anybody even thought of Cinderella or of Jack and the Beanstalk, there lived an old long-eared hare whose name was Jumpity-Jo.

Now Jumpity-Jo had a house, a long strip of ground, a wife and seven children, and a deep, deep well. He was a farmer and the only one in the whole neighborhood who raised goober-peas. (There! I almost forgot to tell you that goober-pea is the rabbit's own word for peanut.) And Jumpity-Jo had just bushels and bushels of goober-peas all stored away in his barn for the winter. Sometimes the other animals came to buy them; sometimes old Jumpity-Jo would sell them and sometimes he would not. He was a cranky old fellow and none of his neighbors liked him for he was so terribly selfish and greedy.

One day little Sammy O'Possum knocked on Jumpity-Jo's door and begged him for just a handful of goober-peas.

"Begone with you," thundered Jumpity-Jo, "I have only enough for myself."

"But my poor little insides are so empty, and the doctor says I must eat nothing else," mourned Sammy O'Possum. But old Jumpity-Jo only banged the door and went back to bed, for he was nearly always asleep. That's why he was so cranky.

So little Sammy went on, but nobody had any goober-peas to give him and he was very hungry.

That night all the other animals held a meeting in the Big Forest to see what could be done for Sammy.

"He's welcome to sleep by my fireside and eat at my table," said Grumpy Bear, "but I have no goobers to give him."

"I," said Wooly Wolf, "have only black-eyed peas, but I suggest we take up a collection for Sammy, so that he can buy goobers from old Jumpity-Jo." And he passed the hat around until it was nearly half-full of shining gold pieces, enough to buy a whole bushel of goober-peas.

Early next morning Sammy started out again to see Jumpity-Jo. Tap, tap, tap! he knocked on the door.

"Who's there?" roared Jumpity-Jo.

"It's that Sammy O'Possum," answered his wife.

"Yes," called Sammy, "I'm on a diet and can eat nothing but goobers. I have money to buy a bushel from you." But Jumpity-Jo was not to be persuaded.

"I'll give you just ten seconds to get away from my house!" he roared, "Go! One-two-three-four—", but Sammy had gone.

That night the animals held another meeting. This time it was Furry Fox who spoke.

"I have a plan," he said, "that I'd rather not tell you about just now. Tomorrow you will know it and laugh. But if you will let me have a bushel of black-eyed peas, I'll guarantee that Sammy O'Possum will have goobers for dinner tomorrow."

"Agreed," said the others.

Four of Aunt Mary's nieces: Irene, Alice, Ruth and Wanda, children of Engineer Shomo, Gassaway, W. Va.

So Furry went home and got a bag, then went to Wooly Wolf's house.

"Give me a bushel of black-eyed peas," he said. And together they filled the bag.

"What will you do with them?" asked Wooly, nearly overcome with curiosity.

"Never mind," said Furry Fox, "wait till tomorrow."

It was late that night when Furry Fox took the bag of black-eyed peas and went up the long hill to Jumpity-Jo's house.

Knock, knock, knock! he banged on the door.

"Who's there?" growled Jumpity-Jo.

"It's I, Furry Fox; I've come to trade you a bushel of black-eyed peas for a peck of goobers."

"Get away with your black-eyed peas, I don't want them!" screamed Jumpity-Jo. I'll not be bothered with another single one of you. Get away this minute. Sammy O'Possum may starve to death for all I care. I have enough goobers to eat and enough water to drink, and I do not wish to be bothered by shiftless neighbors. Leave me at once, I want to go to sleep!"

"Very well," said Furry Fox, putting his bag on his shoulder and leaving the house.

The next morning was the first day of March, the day when old Jumpity-Jo always started to plow his ground for the goober-patch. Furry Fox was up bright and early. He went to the doors of all his neighbors.

"If you hear anything about old Jumpity-Jo needing help, tell him to call on me." The animals said they would. Then they gathered together in the Big Forest to see what would happen. They had not long to wait.

"Ki-yi! Ki-yi! Yumpty-o! O, my! O, my! OH, MY!" yelled Jumpity-Jo from his house on the hill.

"What is the matter?" called his neighbors, climbing up the hill to see what was the matter.

"My well has gone dry and I can drink no other water! Ki-yi! O!"

"That's nothing to yell about," said Grumpy Bear, "Sammy O'Possum can eat nothing but goobers, and he has been hungry for three days."

"Oh, the nice sweet water of my well is all gone. What shall I do! What shall I do!"

"Brother Fox is a well-digger," said

Wooly Wolf, winking one eye, "perhaps he can help you."

"Send for him at once," commanded Jumpity-Jo.

But Furry Fox was already on his way to the spot with his well-buckets and a windlass.

"What will you give me if I clear your well so that the water runs sweet again?" he asked.

"What do you want?"

"A bushel of goobers, no more, no less."

"No, no! I cannot spare my goobers!"

"Then you'll go thirsty," and Furry Fox picked up his buckets and ropes and started away.

"Come back, come back!" yelled Jumpity-Jo. "I'll give you a peck."

"One bushel, no more, no less," said Furry Fox.

"Then take them!" shouted Jumpity-Jo, hurling a bushel bag filled with goober-peas at the fox's head. But Furry Fox dodged the blow and began to dig in the well, while Sammy O'Possum took the goobers and started home, for he was so hungry.

And all the time that Furry Fox worked, he chuckled. And nobody knew why, until they saw what came out of the well. For on the night before, Furry Fox had emptied the bag of black-eyed peas right down into Jumpity-Jo's well. And the peas had drunk all of the water that was in it and puffed themselves up higher and higher, until they nearly filled the well.

Oh, how old Jumpity-Jo did yell! How he did pull his hair and nearly tear himself in pieces! How he did rave and bite and scratch and kick until all of the other animals were afraid of him! And after all the peas were out of the well and the water flowed clear again, the neighbors took the swollen peas and cooked them over a bonfire in the Big Forest. Then they held a grand feast. And as they sat around the fire, they could hear old Jumpity-Jo still yelling to the top of his voice. Then they decided to give a nickname to the selfish old fellow, and because he was so terribly angry with everybody on this first day of March, they called him the Mad March Hare.

But Sammy O'Possum had all of the goobers he wanted for dinner that day and for many days thereafter.

A Page of Poetry

Two Minus Two Equals Four

(Affectionately dedicated to "H. G.," the Wizard of Motive Power Accountants)

By Arthur A. Boettger

The schoolmaster's voice sounded stern, as he gazed

At Harry alone in his seat,
"Stand up, sir, and tell me this answer"—quite dazed,

Harry, trembling, arose to his feet.
The chalk traced the figures of fate on the board,

That seemed like a problem too great,
For Harry was only eight years—pray the Lord—

That he would not make a mistake.
"Two minus two, equals what?" wrote the chalk,

Two eyes sought relief on the floor,
Then a far-away voice that did quiver and balk,
Said, "Two, minus two, equals four."

"Sit down, sir!" the schoolmaster snapped,
"Mary Jane!"

Harry's playmate jumped up from her seat,

"Why two minus two equals naught, that is plain,"

Mid laughter she made her retreat.
The school bell rang out its dismissal at noon,

Harry ran away injured and sore,
Right down by the brook, in his anger and gloom,

Where Mary and he played before.
A voice from the trees shouted, "Two minus two!"—

Would Mary now play any more?
The birds and the bees sang, "I'm sorry for you,
That two minus two equals four."

Ten years have rolled by, Harry now was a man

Who could love like a gallant of old,
And Mary had reached a sweet age, and began,

To think him both handsome and bold.
But he had two rivals for Mary's fair hand,
That would not be cast to one side,

Wherever he went they were both sure to land,

When Mary and he tried to hide.
Said Mary one day in a new-found retreat,
Where they both had been caught once more,

"I think it's a shame, Harry, won't you repeat,
Does two, minus two, equal four?"

Still years have rolled by, Harry now is past eight,

Though tender in years, ever shy,
And Mary, no doubt, ever loved to relate
Of memories dear, with a sigh.

But Harry sits quiet, with time cards in front,

A pencil in hand to record,
And thinks of the teacher, the school, with a grunt,

He'll make no mistakes, thank the Lord!
If you pass by a desk on a bright sunny day,
Where there's turmoil, and figures galore,
In reverence pause, as you hear a voice say,
"Two minus two equals four."

The Railroad Cop

By Lieutenant X. North

Cleveland Division

Say, who's that bird there in the yard
Giving those seals a pull;
The one with his face all sooty and hard?
Oh, him? He's a railroad "bull."

Guys like him give me a pain,
They're always hangin' 'round,
Askin' fer dope on a certain train,
Or where another is bound.

Always makin' us fix some door
Or have a switch light lit,
If they find a hole in a box car floor,
They throw a regular fit.

You'd think they owned the merchandise,
The rolling stock and track,
And that they pay an awful price
For every break and crack.

Why, just because Bill Jones'es son
Was playin' 'round the cars
They gave the kid an awful run,
And threatened prison bars.

An' they pinched poor old Jim Johnson
For takin' one jar of honey;
You'd think he'd stole the baggage room
Or a mail sack, full of money.

They're always testin' the fire alarm
Or wantin' to try the hose,
You'd think we're doin' the Road some harm
When the "bull" sticks in his nose.

When a "con" is makin' up his train,
They stop him about some car,
They've just got trouble on the brain,
What do they think we are?

What! Hill slugged at the lower switch?
They got his watch and coat?
This workin' in the dark at night
Sure does get my goat.

Come, let's chase 'em, every man!
We'll get those scoundrels quick—
Nothin' doin' on the suicide plan,
Send for a railroad "dick."

Hey, Bill, dya' hear about those yeggs,
That slapped Bill Hill on the head?
Well, the "dick" clean knocked them off
their pegs—
But they filled him full of lead.

Gosh! I hate to hear of him cashin' in,
We didn't pal so well,
But "dick" kind a' kept things balancin'
If he did raise a little hell.

Believe me, bo, those "bulls" are there,
And I don't mind comin' out,
I'd just as soon work anywhere
So long as a "bull's" about.

The Angler

By "Colonel" Fred Schley

Car Service Department

(With apologies to Mr. Kipling)

An angler there was and a fishing seen
(Even as you and I),
With a pipe in his mouth and a flask that gleamed
(We called him the man who always dreamed)
But the angler said it was only spleen.
(Even as you and I.)

Oh the money we spend and the time we lose,
And the scheming on sea and land,
Are of the world, with narrow views,
(All criticized from desk to pews)
And none can understand.

An angler there was and his way he went
(Even as you and I),
Engagements he had—he was back in rent,
(Of course it was not what the angler meant)
But an angler must follow his natural bent
(Even as you and I).

Oh, the lies he told, with a spirit bold,
And oh, the fine fish he missed!
And delusive dreams of days gone by,
(But ah, the poor angler never knew why)
And did not understand.

And the angler was stripped of his foolish pride
(Even as you and I),
Which the fishes knew when they moved
with the tide,
And they left his bait untouched, untried.
The angler is living, but some of him died
(Even as you and I).

And it isn't the game and it isn't the fame
That calls to the angler man,
It's the heart that pines for the lovely wild
(Forgetting all perfidy and its beguile),
They never can understand.

Safety Roll of Honor

Baltimore Division.

About 5.00 p. m., on December 25, Hostler William Murphy, Reels Mill, Md., discovered a broken rail west of Monrovia Station. Track foreman was notified and broken rail was replaced. Mr. Murphy has been commended.

On December 28, Section Foreman A. C. Hink, while working at Camp Meade Junction, heard an unusual noise coming from truck of postal car in train of No. 508 and immediately notified Train Dispatcher's office, Camden. Train was examined on arrival at Baltimore and it was discovered that 15 inches of the tread on wheel under postal car was broken off. Mr. Hink has been commended for his action.

While engine 5088 was handling No. 32 and passing "C" Tower, Washington Terminal, on January 4, the left rear parallel rod broke on the engine. Emergency whistle was sounded. Engineer G. N. Cage, in charge of engine, brought the train to a stop immediately and removed the parallel rods from both sides of engine with a delay of only ten minutes. Engineer Cage has been commended for his alertness and quick action.

Towerman J. C. Wolf, 58th Street, Philadelphia, Pa., discovered swinging door on car in No. 97, on January 5. A swinging door was also noticed by him on car in No. 94, on January 7. Mr. Wolf has been commended for his alertness.

On January 9, Conductor W. B. Connelly, in charge of extra east, engine 4598, discovered about 20 inches broken out of cap of rail on north side of No. 4 track on first curve east of Halethorpe. Flagman was left behind to protect movement and Chief Dispatcher's office notified in time to stop following trains. Conductor Connelly has been commended for his action.

Cumberland Division

Our operators commenced the New Year in the right way by tightening up on observance of passing trains and by being on the look out for unsafe conditions, as the following list for the past month shows:

NATURE OF OBSERVANCE	CASES
Brake rigging down.....	3
Unsafe conditions.....	3
Broken rails.....	2
Shifted loads.....	2
Unsafe practices.....	2
Wheels sliding.....	1
Bursting wheels.....	1
Close clearance.....	1
Car doors dangling.....	1

Total..... 16

Two cars were set off on line of road because of above reports.

Ohio River Division

On December 9, G. T. Brown, agent, Glenwood, W. Va., as No. 71 pulled into the station, noticed brake hanger on tank of engine 1412 broken and brake sliding on rail. Mr. Brown is commended.

Charleston Division

Conductor D. T. Foy, while clearing siding for No. 37 to pass, noted bent axle on front trucks of coach 2045. He reported this promptly and axle was changed, averting a possible accident. He has been especially commended for his watchfulness.

B. W. Ackles, Alton Lumber Company, Buckhannon, noted a broken rail in front of his plant. He called agent on telephone, then went out and flagged an extra train. The superintendent has written him appropriate thanks for his interest.

A. M. Carpenter, brakeman, on two occasions found defective switch at Orlando. He has been commended by the superintendent, and suitable entry placed on his record.

The following letter has been received from a patron of the Company:

"As one of your patrons, I wish to commend the courtesy and kindness of your brakeman, Mr. A. M. Carpenter, running on train 36. He is a stranger to me (I got his name from the conductor). He deserves well at the hands of your Company."

The following engineers have been commended for applying the division slogan, thereby making a showing of over 100 per cent. in fuel performance for December: W. T. Spencer, J. C. Jordan, H. W. Fury, W. J. White, A. F. Vorholt, L. R. Shomo, Alva Kibble, A. Mullins, A. J. Lunsford.

Newark Division

Extra 4216, east, Conductor Mulquin, set off C. W. V. S. 647 on account of defective draw bar. When leaving the station, Operator E. E. Withrow, in handing on orders, noticed that there was a broken arch bar on car K. & M. 9538. He gave this information to Conductor Mulquin, who applied the air, and stopped the train. As the train stopped, this car, K. & M. 9538, was derailed, to the extent of two wheels on the truck with the broken arch bar.

It is evident that this action on the part of Mr. Withrow was instrumental in averting a very serious wreck, and possibly loss of life. He is commended.

New Castle Division

Boy Prevents Accident

NEW CASTLE, PA., February 15, 1921.

MASTER CHARLES NEIL STARR,
Newton Falls, Ohio.

Dear Sir—I am advised that on February 11, you noticed defective brake beam on the second head car in Pennsylvania No. 333; that you went to the telegraph office at Newton Falls and reported it to the operator. We had the train stopped at "FS" Tower, where examination developed that it was in a dangerous condition, which we had corrected before proceeding.

Undoubtedly your close observance of the condition may have avoided serious trouble

and I desire to thank you for what you did.

I understand that your father is a Baltimore and Ohio employe, and, am sure that he will explain to you what it would have meant had this resulted in trouble.

With best personal wishes to yourself, I am,

Very truly yours,

(Signed) D. F. STEVENS,
Superintendent.

The foregoing letter tells a story of what children can do to help. Charles is but 13 years old.

On January 22, while extra west, engine 4012, was passing New Castle Passenger Station, Conductor R. C. Solomon, who was passing along Liberty Street, observed door swinging on C. M. & St. P. car 81462. He immediately telephoned Superintendent's office of this unsafe condition. Train was stopped and door adjusted to proper place. For his close observance and prompt action he has been written a letter of commendation by Superintendent Stevens, and a suitable entry will be placed on his service record.

On January 10, while Signal Repairman W. F. Brown was investigating track circuit failure, reported by Operator O. S. Clewell, discovered broken rail. He notified operator, who arranged for section men to make the necessary repairs. Superintendent Stevens has written these gentlemen letters of appreciation and a commendatory entry has been placed on their service records.

On January 24, while second 94, engine 4262, was passing Newton Falls, Flagman D. M. McMahon noticed fire flying from car in train, and he immediately notified conductor, who had train stopped by means of the air brake in caboose. Upon examination it was discovered that I. C. car 175971 had broken truck. Mr. McMahon's close observance in noticing this unusual condition, and his prompt action in having train stopped, undoubtedly prevented a serious accident, and he has been written a letter of appreciation by Superintendent Stevens. Commendatory entry will be placed on his service record.

Cleveland Division

CLEVELAND, OHIO, January 27, 1921.

MR. J. A. KIEFER, Operator,
"GI" Tower.

Dear Sir—I have before me report that on January 22, as 2-81 was passing "GI" Tower, you saw something dragging on train, but were unable to get down stairs in time to stop train. However, you notified dispatcher, who stopped train at New Philadelphia, where they found a brake beam down.

Reports of this nature are very gratifying. Had it not been for your careful observance, the above condition would possibly have caused an accident and I want to take this opportunity to commend you.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO, February 23, 1921.

MR. GEORGE EHRLMAN,
Car Repairman,
Elyria, Ohio.

Dear Sir—I am in receipt of information which states that on February 17, as extra 4277 was pulling through Elyria for Lorain, you noticed spring hanger on Baltimore and Ohio 224604, load of coal, broken and dragging on the rail with the wheels locked, which undoubtedly would have caused a derailment at the N. Y. C. crossing; that you immediately called this to the attention

of Car Inspector F. J. Staller, who notified conductor of this train and had car set off and repaired.

These are pleasing reports and I want to commend you for your careful observance and prompt actions. Commendatory entry will be placed on your record accordingly.

Yours very truly,

(Signed) H. B. GREEN,

Superintendent.

Indiana Division

While extra 2846-2916, west, was passing Fort Ritner, Ind., Operator J. G. Mather noticed a bad flat wheel on Baltimore and Ohio 15445, about third car from engine.

Operator Mather reported condition of car and extra was stopped at Riverdale and car examined. It was found necessary to set car out at Mitchell.

The prompt action of Operator Mather in reporting this condition, and the interest he displayed in train passing his station, is commendable. Appropriate entry has been made on his service record.

Toledo Division

On February 1, H. C. South, section foreman, Creidersville, noticed brake beam dragging on seventh car back of engine on extra 4173, north. He flagged train and had brake beam removed. Mr. South is commended.

Railroaders Welcome "Billy" Sunday at Fairmont

On February 13, "Billy" Sunday, the great evangelist, who came to Fairmont on January 5, concluded the most interesting evangelistic meetings ever held in our town.

Saturday night, February 5, was set apart as "Railroaders' Night," one of the most remarkable demonstrations ever held in the history of West Virginia, planned in an able manner by a willing and expert committee, heartily agreed upon by men and women connected with the Railroad, and forwarded in every possible manner by our officials. The committees were as follows:

Advertisement—H. F. Farlow, chairman; A. L. Hefner, G. S. Fletcher, and H. S. Downey.

Arrangements—A. L. Heffner, chairman; A. O. Bee.

Transportation—H. G. Fletcher, chairman; H. H. Tedrick, J. P. Roberts, J. Griffith, John Gantz, E. Bartlett, B. Nuzum, A. R. Acord and F. H. Brummage.

Reception—J. C. Staley, chairman; O. H. Hudgins, F. T. Willson, C. A. Stealey, G. W. Haller, Dale Miller, A. C. Auvin, R. G. Linn, E. C. Parks, C. C. Hinkle, C. Murphy, E. O. Garletts, Russell Soles, Charles Soles, Bailey Hupp, Harry Henry and C. McIntire.

Program—M. H. S. Kester.

Finance—E. Bartlett, chairman; J. Kearns, J. F. Shafferman, H. H. Tedrick, I. B. Davis, F. H. Brummage, H. F. Fletcher, A. L. Heffner, J. C. Staley, L. B. Atha, E. C. Parks, Bailey Nuzum and C. C. Hinkle.

"Billy" Sunday was formerly a railroad man and he knows railroad talk and used it freely. When our men entered the building they saw a huge semaphore, such as is

used on all local divisions, operating on the pulpit. At the proper times it displayed the white, green and red lights. It was one of the novelties of the evening, the work of Electrical Maintainer A. O. Bee.

When Homer Rodeheaver announced at 7.10 p. m. that the singing might as well proceed, there were rows of vacant seats, but at 7.20 p. m., F. H. Brummage, assistant marshal for the railroad men's delegation, marched into the tabernacle followed by the Greater Fairmont Band and by four men carrying a massive basket, filled with exquisite flowers, which was taken to the platform during the next 15 minutes. When all were in, he blew a whistle for them to be seated. The big feature of the evening, and one of the biggest in the campaign here, was the signing of "Onward Christian Soldiers" by the choir and entire congregation, with instrumental music by two bands and a piano. Two verses of the popular hymn were sung; following this the Rev. R. T. Brown, of the Methodist Episcopal Church, South, led in prayer.

Representing our delegation, J. M. Scott, general superintendent, then went to the platform, and, in a short speech, touched

upon the duties of railroad men, which he summed in two words—faith and work. "When we think of our work and the Almighty Himself, who gives us health and such men as Mr. Sunday to preach to us," said Mr. Scott, "we should not go away from here without being Christians."

He pleaded for the railroad men to stand 100 per cent. on the side of Christianity.

Responding, Mr. Sunday said that railroad men never do anything by halves, and he pointed to the large basket of flowers and the monster delegation as evidence of this. He told the delegation that the Lord is able to "back the whole bunch into the clear" and that if you'll trust in the Lord, he'll keep the sand dry. He said the flowers would wither, but that the memory of them would linger. Here Mr. Rodeheaver again assumed command, stating for Mr. Scott's benefit that he "never heard a more apt and practical presentation speech" and that he thought Mr. Scott would make a good preacher. When Mr. Rodeheaver asked how many railroad men in the delegation had been in the service for 20 years, about 120 arose; 18 said they had been in the service for 30 years; 4 for 40 years; 3 of them for 45 years, but when he got up to 50 years only one man arose. Following this the Baltimore and Ohio quartet sang "Onward and Upward," then Mr. Rodeheaver and Mrs. William Asher sang "The Old Rugged Cross."

James G. Whyte

(Continued from page 30)

the public schools of that city, and later the Shenandoah Valley Academy, Winchester, Va. In 1890 he was married to Miss Anna E. Owens, of Wheeling. He entered the service of the Baltimore and Ohio at the freight station at Wheeling as laborer in 1894. Since then he has served in the capacities of clerk, checker and receiving clerk, all at Wheeling. Mr. Whyte has two daughters and one son.

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department

Correspondent, GEORGE W. HAULENBEEK

Cupid, the god of love, the son of Venus, with his bow and arrow, or, as Shakespeare says:

"Pretty dimpled boys, like smiling cupids," has made a descent upon the Baltimore and Ohio Law Department.

I am a strong advocate of matrimony, and I greatly enjoyed hearing of the event. I pictured a wedding journey of the happy couple to Florida, and while I am not a mind reader, my guess was a pretty good one, for the destination proved to be Miami, Florida, thence in a private yacht to Bimini in the Bahama Islands, where the honeymoon was spent.

I am alluding to Miss Loretta Schott. She is a mighty fine girl, and I am sorry to know that the Law Department will lose a competent stenographer and a willing worker.

The marriage was solemnized at St. Bernard's Church, Gorsuch Avenue, Waverly, on Saturday morning, January 22. Mr. Joseph W. McGrain, the groom, was the fortunate young gentleman. I congratulate both bride and groom, and the Law Department joins me most heartily.

John Kissig Cowen

When I entered the department on the first of April, 1881, nearly 40 years ago, John Kissig Cowen, Carroll Sprigg and Benjamin Whiteley were the only ones in Baltimore City on the Law Department payroll.

The present head of the department, Hugh L. Bond, Jr., was dean of the Law Department students in the office. Whenever there was a game of baseball of any note, every last one of the students disappeared save Mr. Bond, who remained at his post, read law and thus advanced step by step. If I could only drill this into the minds of some of the young gentlemen in the building and elsewhere, and induce them to become somewhat studious instead of wasting their time, I would accomplish something. Night schools and study, instead of late hours and moving pictures!

Mr. Cowen, a wonderfully brilliant man and a lovable character; Mr. Whiteley and Mr. Sprigg, if I am not mistaken, have passed to the great beyond.

The Efficiency of Women

In the MAGAZINE correspondence, and in newspapers generally, I have frequently

narrated the growing efficiency of women and to this may be attributed the appearance at my desk of a young lady reporter on the staff of the *Evening Sun*, who stated that she came to interview me. She was very polite and considerate and I enjoyed it. I think she was a graduate of Goucher College. I had the satisfaction of giving her my views on various topics, and especially on the interesting feminine attire of the present day. When I suggested that a girl wearing cootie garages over her ears would not be able to hear a marriage proposal, she quickly resounded that their presence would not prevent her from hearing that.

No Egotism

While this paragraph does savor somewhat of egotism, there is no self-exaltation in it, for the reason that I am precluded from enumerating events and incidents connected with others in the department, because of the standing injunction not to "put me in the MAGAZINE."

When this injunction is removed, it will be an easy and agreeable task to extol the excellent work of A; allude to a perfect exemplification of the touch system on the Remington by B, and so on. These things can never be known, through the wide circulation of our MAGAZINE, as long as this handicap stands in the way.

I can hear some one say, "Why doesn't that MAGAZINE correspondent down in Baltimore go right ahead and write up those things he is eternally talking about; very likely what they really want is to be trotted out!"

"Life's a pudding, full of plums;

Care's a canker that benumbs,

Wherefore waste our elocution on impossible solution?

Life's a pleasant institution, let us take it as it comes."

Mr. Douglas A. McKay

Mr. Griffith's tax office, on the 11th floor, is a part of the Law Department, and is the proper thing for the Law Department correspondent to pay due heed to items of interest emanating from that office.

Our good friend Joseph R. Plummer, being absent because of illness, authority was given for the installation of a clerk to take his place. Douglas A. McKay was selected. Mr. Griffith and Mr. McNeil have a way of securing clerks who are fully acceptable and Mr. McKay reaches the usual requirements.

Holiday Season in the Law Department

There is a young gentleman in the Law Department who is the personification of unselfishness. Christmas comes and Christ-

mas goes, and he is ready with a present to every one. He never looks for anything in return, and I feel quite guilty in constantly accepting an annual gift, but then he knows that every one of us is full of gratitude. I am not going to put his name in cold type. He is beyond all question a grand good man, and valuable to the department.

Never Watch the Clock

When we were in the old Baltimore and Ohio Building, where the Emerson Hotel now stands, there was a department on the same floor with the Law Department. There was a young man in that department who never looked at the clock, and never calculated on how little he could do. When we in the Law Department filed out to the elevator at 5 p. m. or thereabouts, this young man was at work. He always found something to do; something to help the work along.

The great fire of 1904 put us out of business, as far as that corner was concerned, and we, after a time, came to our present location. The department I refer to is in the Central Building, and the young gentleman to whom I allude is now at the head of it. Suppose we read this paragraph over carefully and ponder a little. Now I feel better.

Notifying Company's Counsel

Where a suit is instituted against the Company, and summons is served upon the Company's agent, the first thing to do is to send the summons to the Company's counsel for proper action.

In a recent case the institution of a suit was discovered by counsel by accident, and just too late for the preparation and filing by counsel of the necessary pleas. All this could have been avoided by carrying out instructions to notify counsel upon service of summons.

President Willard's Greeting

At the beginning of the year, President Willard extended to all the members of the Baltimore and Ohio family a New Year's greeting. I enjoyed and appreciated every word of it. I have shown it to friends in Bethlehem, Pa., the mecca of my week-end trips.

I think it will do us good to read this greeting over now and then. I was particularly pleased with Mr. Willard's paragraph on thrift, economy and well ordered industry.

Mrs. Gertrude L. Kelly

The vacancy caused by the retirement of Miss Loretta Schott from the Law Department was promptly filled by the appointment of Mrs. Gertrude L. Kelly. Mrs. Kelly is an experienced stenographer, having served as secretary to C. H. Moran, real estate agent.

Car Service Department

Correspondents,

J. T. LEAN and H. V. OBERENDER

We are glad to hear of the speedy recovery of our good friend, "Jimmy" Austine, who was recently operated on for appendicitis.

"Robbie" called out attention to the fact that "Charles" sings "Feather Your Nest" when he goes to the bank on pay day. Where's "Vic"? Ask "Charlie," he knows.

Our Mr. Decker still lives in Hamilton. From recent reports we understand he has nominated himself "Mayor" of that village.

George McClellan, Demurrage Bureau, the dancing artist of this office, is still looking for pupils. There's your chance, Metz. Get to it.

O'B.'s suggestion to May: "Why don't you carry your lunch in a suitcase? It would be easier to handle."

"Uncle Billy" Woods still gets around; Hiram is still kicking, too.

If you want to hear some fish stories, ask Roy Brown and "Colonel" Schley.

Wonder where "Shorty" and his Drydock Baseball Team are this year? Ask "Charlie" Bayn.

By the way, the office has a few good bowlers. The boys are trying to arrange some match games with some good teams. All inquiries should be addressed to correspondents.

P.S.—Beware of the two new editors, "Jimmy" and "Mike"!

Our friend Hartman was recently seen looking at some furniture in one of the Howard Street stores.

Engineering Department

Correspondent, OSWALD EDEN

In order to keep the news from the various divisions that go to make up the Engineering Department together, a correspondent has been appointed from each district engineer's office whose duty it is to report whatever news items he has pertaining to his immediate location to the main office, instead of putting engineering news items in with the various departments. In this way we hope to keep the news pertaining to the life of the employees, their work, etc., in the Engineering Department together.

"Velvet Joe" says: If you want to see fish act crazy, watch them go "in seine." "Bill" Pinschmidt says this sounds "fishy."

From all indications, "Spike the Clipper," otherwise known as Romeo Schanze, has been very much smitten by Cupid. Any one who visits Ellicott City six times a week must be "smoted" badly.

We were very sorry to hear of the death of the mother of G. W. Motheral, transitman, during the first part of February. Our sympathies are extended to you, Mr. Motheral, in your bereavement.

"Gusle" Hauser recently acquired title to and exclusive publishing rights of a small booklet entitled "Recipes." The size of the volume is not so pretentious as that of some numbers of Everyman's Library, but judging by the manner in which it has been received by his many friends one can readily perceive that its contents have been studiously perused from cover to cover.

We have been trying to find out why "Gus" Schell waits for the same car every morning, and then gets peeved if he sees some one sitting beside a friend. "Gus" says he doesn't know her name, but he is willing to change it to —. Don't do it, "Gus"! It's awfully expensive!

A familiar call, "Oh Roger!" in this department, makes certain young men shudder. When asked why this made him shake so, he told me confidentially that it always reminded him of his wife. If you haven't the experience yet, ask Roger.

Mr. Baumann's (automobile commissioner of the Engineering Department?) automobile was seen parked on Linwood Avenue one night last month. It seems strangely coincident that one of our pretty stenographers lives on this avenue, but we would not accuse him of visiting her.

Another of our feminine stenographers has announced her intention of attending the next Naval Academy dance and also that her gentlemen friend will be togged out in one of those swallowtail coats and one of those see-more vests, and a white pleated shirt. We do hope that none of the rude men on the street will throw mud on this shirt. Wouldn't this be an awful predicament, Miss Fox?

If Jeremiah Martin Fitzgibbons has not told you the joke about Henry Clay, Sugar and Mary, get him to tell you, because it is full of pep, snappy, 'n everything. For assistance call Horace Seitz.

Our correspondent spends his lunch hour in the A. F. E. Department, but we do hope that nothing serious happens. Leap year has just passed.

"Alph" Herr, the exercise expert, says he will have the boys in good shape for the ball season this year.

Office of District Engineer, Baltimore, Md.

Correspondent, J. F. COLLISON

R. C. Howard, assistant engineer, Mt. Royal Station, is ill at his home. After having spent a week at Union Protestant Infirmary, he returned to duty; but was forced to give up, and is now in bed under observation of a trained nurse—as per doctor's instructions. We understand he is getting along very nicely, and hope that he will soon be on the job.

Our bookkeeper, C. L. Righter, didn't show his efficiency in bookkeeping when he recently purchased a \$10.00 rooster for his chicken farm. How does he do it?

MEMBERS OF THE EMPLOYMENT AND RECORD BUREAU AND THEIR CHRISTMAS TREE

They are, left to right, front row: A. S. Rice, Marie A. Ward, John R. Brooks. Second row: W. F. Beall, A. L. Applegate, J. M. Wilhelm, Elizabeth M. Rinker, M. Elaine Boyer, Charles A. Duvall, Elsie A. Jones, A. S. Boteler, Lee Hardesty. Third row, standing: Winifred Brenton, Ruth Wrightson, May Stuart, Agnes McWhirter, Myrtle Bockelman, Mildred Williar, J. W. Jones, Marian Davis, Loretta Hyman, Hazel Mewshaw, K. A. Boss, Mabel Barrett, Vernon Deane, Gertrude Sipe, John W. Geis

We understand that in May, Norfolk, Virginia, will awake to the merry peals of church bells, and will be decked with flowers to commemorate an event of almost national importance. Our dear friend W. W. Gwathmey, Jr., whom we all know and esteem, will be the central figure in this little celebration, for he will take unto himself a Southern bride.

Mr. Gwathmey has planned a great honeymoon as far south as the Bermuda Islands, thence to New York, thence back to his beloved Bridal Path at Philadelphia.

An Ode to W. W. G.

"Shall I take you to Bermuda, just to hear the sad sea waves?"

He shyly asked, while standing by her side. "Or shall we go to old Broadway, where nobody behaves?"

No matter where—I would be by your side."

She looked up at him shyly with—"Of course I love the sea

And would enjoy with you a salt sea bath. But if it's just the same to you, it will mean more to me,

If I could see our famous Bridal Path."

Correspondent, Miss M. M. WARD

The Engineering Department, Pittsburgh, is taking an active interest in the recently organized Welfare Club, the object of which is to promote sociability among the employes in the various offices of the Company in that city. Miss Ward, of Mr. Didier's Office, is vice-president of the organization.

It is with deep regret that we part with our charming and vivacious file clerk, Miss Blanca G. Devin, who is leaving the service indefinitely.

It is rumored that two of our most esteemed bachelors are contemplating a trip to the "Oasis." Why go to C-u-b-a, Brothers Wooley and Barrett, when Wind-sor is so near?

A very conspicuous solitaire has made its appearance in our midst. Allow us to congratulate you, Marcelle.

I. R. Mulvey, field force, has left for a short vacation to New Orleans and other southern points.

Office of District Engineer, Cincinnati, Ohio

Correspondent, G. F. DAUBENMERKL

Word has just been received from Assistant Engineer James P. Ray, Lawrenceburg, Ind., that there is a decided improvement in the condition of H. S. Davis, transitman, at Bridge 19-95, Indiana Division. Mr. Davis has been troubled more or less with heart failure for the past year, at one time being in pretty bad straits, but he now claims his heart is beating normally since his marriage to Miss Marguerite Burdsal, which happy event occurred at the Church of the Epiphany on Walnut Hills, on January 26. After the wedding bells ceased chiming the happy couple took a trip through Michigan and Canada. Congratulations, Harold! Thanks for the cigars.

People still ask J. W. Kathman, accountant, if he is in love. His long legs look as though they have been pulled quite often.

John Kolker, accountant, floated around and exploded another story about an American bald eagle's performance in the Philippines. The story was a PEACH. (A regular Kolker Special.)

The "Judge" is taking his bath this evening

R. E. Pflaum, stenographer, was sent to Bridge 19-95 to assist Assistant Engineer Ray. When he stepped into Mr. Ray's office, the latter began singing "Shine on Silvery Moon" and Pflaum immediately put on his hat.

R. T. Everett, building engineer, Western Lines, is now engaged in making a building record trip. He stopped at a small station on the Indiana Division one day and began inspecting the depot. The agent came out and watched him for a while. Mr. Everett finally turned to him and asked: "Where is the flue?" The agent smiled and said: "We have none since Prohibition."

S. A. Graham, transitman, says the only fault he finds with our beautiful city is that he cannot get a square meal for 15 cents. Judging from what we have seen of "Sam's" appetite, we don't blame the hash houses for soaking him.

Assistant Engineer Callahan spends quite a large amount of his time on Miami Conservancy bills. To look at the correspondence and other papers, one would think he was trying to settle all the bills for the World War.

G. L. Reising, file clerk, is gaining quite a reputation as a card and pool player. Even Southerington and Thompson seem to give him a wide berth of late. When asked why, they both replied in unison, "Experience is the best teacher."

H. L. Scribner, transitman, is the proud father of a wonderful baby boy. The boys at Bridge 19-95 say he is much more important than formerly. Who wouldn't be?

Office of General Freight Claim Agent

Correspondent, Miss E. T. MURRAY

C. C. Glessner, general freight claim agent, attended the joint meeting of the Cause and Prevention Committee, Freight Claim Division, American Railway Association, Southeastern and Southwestern Claim Conferences, held at New Orleans, La., on January 17, 18 and 19.

On Tuesday, February 2, Miss Ida M. Brandt, O. S. & D. Division, and Mr. Herbert Haebler were quietly married at the home of the bride, 1512 North Patterson Park

Avenue. After the ceremony the happy pair left for New York and Atlantic City, where their honeymoon was spent. Congratulations!

Do a LITTLE More!

You are all acquainted with the workman who is through when the clock strikes. He is much more common than the man who is willing to work 15 minutes overtime. The man who does only what he is expected to do is likely to find himself at the end of 20 years in the same position which he is now filling. The man who can think for himself, and who does what others do not do, is the man who makes his mark in this world.

Work while the world works with you,
Loaf and you loaf alone,
This strenuous world's a continuous whirl.
It offers no room for the drone!

Bowling continues popular. The Freight Claim Department team has taken the lead by a safe margin, and still gains ground. Congratulations are in order to those who have stuck faithfully to the job, especially H. F. Ittner, who leads all averages for the team and stands second in the league with a score of 101.24. E. E. Correll ranks third with a score of 100.02.

We now have another team, known as Team B, which has taken the place of Auditor Merchandise Receipts Team C. Members of the team are C. J. Smith, G. L. Seemer, L. Koenig, J. C. Roberts, H. Inglesman, E. Schleicher, with H. J. Frank as captain. Unfortunately they started in the league at next to last place, but we gladly report that after rolling two nights they have reached ninth place and stand a mighty good chance to "clean up things" by the close of the season.

Rooters are still most welcome at the games, and it is hoped that fellow clerks will show their appreciation by their presence once in a while.

The friends thou hast, and their adoption tried,
grapple them to thy soul with hooks of steel.

—Shakespeare.

Erma L. and Herbert C.
Children of Elmer Wright, clerk, Relief Department

Inquiring Correspondent

What would you do if someone came into the office and announced that you were heir to \$100,000?

Bradburn: I would shoot that person before he had the chance to shoot me.

Phillips: I'd go crazy.

Aro: I'd think it was a joke, but if it was true, I'd build a church.

Perry: I'd drop dead.

Miss H. Kraft: So would I.

Ramsey: I would find out first if it was bona fide; if it was, then I'd take a little vacation.

Bowhaw: I'd invite that person to take a trip in my diamond-studded aeroplane.

S. Gairnor: Ye! Gods! I'd take the first ship out for Honolulu!

Stagge: Why I would just go and tell Mr. Heardt he could have my job.

Flynn: The Freight Claim Department would be minus an investigator, without notice.

Miss Zepp: I wouldn't like to tell you what I'd do.

Taylor: You'd have to show me first.

Printing Department

Pick Ups

• It is great sport and a source of endless amusement to anyone who is inclined to observe the many oddities of expression and sentence structure to be found in books, newspapers and on signs. Some newspapers now devote a special column to these oddities and they furnish many a good laugh.

An English professor traveling through the Kentucky hills sought provisions at a mountain hut. "Madame," said the professor, "can we get cornbread here? We'd like to buy some of you." "Co'n bread?" she replied. "Why if co'n bread is all yo' want come right in; for that's just what I hain't got nuthin' on hand but."

At a summer resort the following sign greeted the visitor: "Inattention and incivility of attendants, if notified, the proprietor will be pleased."

Doctors, lawyers and electricians all have to pass an examination before they can practice their profession, but to be elected to the halls of legislation a man has only to secure the greatest number of votes, irrespective of his ability to make laws. Here is a sample of a statute that was introduced in one of our legislatures:

"When two trains, coming from different directions, approach any crossing in this State, both shall come to a full stop, and neither shall proceed until the other has passed."

Looks as though someone has telescoped this sentence and these two trains will remain forever stalled.

After sampling some of Minnie Clifford's fine home-made candies we have decided to form a company for their sale, and have already secured strong endorsements and three good customers in George Foy, Daniel Miller and Anthony Meisenhalter. As Minnie always has a jovial disposition and a pleasant smile for everyone, we have decided to name it the "Minnie Ha! Ha! Candy Company."

Miss Hattie Carroll, of the bindery, has undergone an operation for appendicitis and is seriously ill. We all hope that she will soon be on the road to recovery and bring her merry smile back with her as of yore.

Saw "Aunt Mary" coming up the steps the other day with several large packages under her arm. Spring poems! "All aboard. Next stop is Springtime."

Telegraph Department

Correspondent, DELLA M. HAIN

The stationer has a supply of Forms 2664, Transportation Department code book. If you have one use it; if you have not, order one on regular stationery requisition.

Even "Newt" Berrett's hens are getting efficient—they are dating their eggs.

Wonderful results have been accomplished through our endeavor to curtail the amount of business sent over the wires, both by the use of the mailgram and by writing letters where possible. Keep up the good work. Write a letter when you can; if a letter won't do, try the mailgram; if that won't do, send a message, but make it short and snappy. Use the code where you can and DON'T forget the symbol at the end.

Recent visitors from the office of M. B. Wyrick, division plant superintendent, Western Union Telegraph Company, Chicago, were Messrs. Ralph Taylor and A. L. Johnson. Come again.

Transportation Department

Correspondent, J. B. EGERTON

It is with sincere regret that we report the continued absence of Miss Ruby Durney on account of ill health. Here's hoping that she may soon be with us again, her same cheerful, sunshiny self.

Efforts are now being made in the Transportation Department to secure enough money with which to buy baseball accessories for the coming season. Raffle tickets are now in the making, so don't forget to save up your money and energy for the coming campaign. Workers from other departments are invited to help.

The girls of the Transportation Department who were among the Baltimore and

Ohio waitresses, headed by our own "Aunt Mary," and who helped to make the American Legion Dance of February a big success, are as follows:—Misses Rebecca Baker, Ruth Belt, Edith Coplan, Esther Daley, Lillian Foster and Elsie Russell.

The waitresses looked charming in Italian costume with an Italian setting loaned by the Maryland Institute as background. All the girls deserve much praise for their diligence and apt ability in the "waiter and towel" business. Ask them of the tips they received and then judge for yourselves—yes, even the one who asked her customers where to buy the refreshment checks and "Do they sell coffee here?" (P. S.—We are told with great solemnity that all tips went to the American Legion.)

One of our night fellows, "Sucky" Hatton, has been sick for about a week. "Sister" Siebert has been doing the honors while the "sucky" fellow has been off. Strange news comes to our ears from another source also; it is to the effect that there is a little "Sucky" in the Hatton home—arrived about a month ago. Now what d'ye think of that? Bet that fellow is as proud as a dog with two tails both tied up with red ribbon, but won't own up to it.

This old place has been turned around, remodeled, repainted, re-allocated, re-assigned, re-discussed and re-ge-twisted in the past few months, but when one comes in the door early in the morning, he is greeted by the same old faces of the people who work at night—except "Mister George," who has deserted us for the middle trick, having succeeded Major Oehrl as the official fighter of the telephone girls. (Now this is a secret. He's saving up his money to get married, or go to California, or something.)

You would be surprised to note the growing friendship between the ancient enemies, "Sucky" Jackson and "Sucky" McCann. They are actually civil to each other. Maybe that is because they are separated now by a hall, and that each, missing the other's serious face as he struggles with the intricate problems which he happens to dig out of the morning's mail, has more of a fellow feeling for the other.

Recently our chief clerk and assistant chief clerk asked the cooperation of all the members of the department in keeping our desks and floors in as cleanly a condition as possible. This everybody tried to do, but, as will sometimes happen, waste-baskets have a peculiar habit of moving to different positions during the course of the day; consequently when "Becky," Esther, "Lou," etc. (being girls and never having played on a regular "nine"), aimed their bits of waste paper at the baskets, they frequently failed to hit the target. As a result, some of these girls decided to do a bit of cleaning up on their own accord. It so happened that on one bright noon, "Aunt Mary" paid a visit to the office, just in time to see "Becky" with a broom and Esther with a dustpan, while

Paul and Catherine Hentschel
Nephew and niece of John Rupp, office of
Assistant Comptroller Deverell, at play

The equipment branch of the Valuation Department at Mt. Clare is represented by a squad of 8 men, who work in a small loft over the drafting room, and known as "The Birds' Roost"

standing nearby and blushing to the roots of his hair, stood our genial friend, J. A. Lateford.

"Say," called Mr. Wideman, "are you going to put that in the MAGAZINE?"

"What?" asked "Aunt Mary."

Nobody said a word. Finally "Uncle John" cleared his throat and left the room.

"He said," went on our informant, "he said, 'By golly! but he was glad you didn't see him on his knees, holding the dust-pan for Miss Blase!'"

is being made. The attendance record is satisfactory. Just here it might be fitting to remark, that the university spirit is a good thing to acquire, and apply such enthusiasm in our daily work at the office. The loyalty shown at some colleges, especially when "the team" looks beaten, is a fine thing to emulate.

When J. H. Goldsmith returns from his present long journey to Dallas, Texas, he will be able to give us some fine impressions of his trip.

That eminent citizen of Ellicott City, Joseph F. Heine, came within an ace of having a serious accident, recently. While attempting to fell a tree, "Joe" was indiscreet enough to get his foot in the way and the tree fell upon it, laying "Joe" up for about two weeks. Now if he had used a little forethought and let said tree fall on his head, everything would have been O. K., and no damage done, except possibly to the tree. Just another instance of the head not saving the foot.

Office of Assistant Comptroller Deverell

Correspondent, JOHN RUPP.

J. D. Dixon, our general bookkeeper, has been transferred to a similar position in the Comptroller's office. We all wish him well.

H. R. Clay, one of our genial stenographers, returned to work the first week in February after an extended trip through Kentucky on furlough.

E. F. Jendrek, head bookkeeper, Foreign Roads' Bureau, left on February 4 for a short business trip to Philadelphia.

M. A. Digges, of this office, is the secretary of the Baltimore and Ohio Cooperative Stores, Inc.

We would like to see current notes appearing in the MAGAZINE to represent the Comptroller's office. Surely, corresponding for the MAGAZINE is not such a hurculean job when once started.

A class in railway accounting is held every Monday evening at 8 p. m., at Johns Hopkins University, Homewood. A number of the employes of this office attend. The students are trying to increase their knowledge of railway accounts and good progress

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

Evidently prompted by a feeling of jealousy (because the men have a bowling league), a certain clique of young ladies of this office have formed a sewing circle. The order of the evening seems to be a little sewing, a little music, a little dancing and a lot of eats.

Being coerced by several of these young ladies to write a little something about their weekly affairs, we wish to state that if about 50 per cent. of the members would do a little exercise (broom and dust cloth or washboard and wringer) instead of trying to eat their heads off, maybe the fire alarm bell would not ring when they walk across the floor.

But never mind, girls, make a whole lot of nice pretty things for the hopeless chest. While there is life there is hope.

The sympathy of his fellow workers is extended D. M. Burdette, in the loss of his father.

"The sun shines on our house, but the moonshine's in our cellar"—the above recitation by "French." Many a true word spoken in jest.

Why make a whole lot of noise ringing the bell to announce fire drills? All that would be necessary to clear the building in record breaking time would be to have some one creep up behind the clock and make the hands register 5 p. m. The result would be the same, only instead of having some 15 or 20 floor chiefs, captains, etc., we would only need one clock pusher.

"A Reader" requests that we page Mrs. Clinton B. Crout. Will the young lady kindly arise?

Owing to the uncertainty of our Good Friday status, we cannot make any definite statement as to our heretofore annual ball game between the married and single men of the office, other than to state that if we are off, and the weather permits, the benedicts will go forth to regain the laurels lost year before last (no game last year). And if they play on the field nearly as well as they can make homers and doubles here in the office, it looks like sackcloth and ashes for Burns and his gang.

Keen interest is still manifested in the weekly bowling games and the attendance so far has been exceptionally good. The schedule runs to April 7 and any one of the teams can "cop" the flag. The standing, including games rolled February 9, is:

	WON	LOST	PER CENT.
Kilkenny Kats.....	25	14	641
Sad-as.....	20	19	513
Wild Cats.....	19	20	487
Excelsiors.....	14	25	359

January 19—EXTRA! Entire stock of brown derbies depleted. Such a large number of aspirants for honors this week that it would be almost impossible to pick out a single candidate, and limited space forbids any attempt to enumerate them.

January 26—Owing to the fact that the entire stock of brown derbies was depleted last week we will proceed to mention some of the weekly heroes. The first gent to get himself all messed up in this class is Mr. Atwell. With his team trailing in the last frame of the last box, this bird goes down the alley for a spare and strikes out, winning the game by a couple of pins. "Heavy" Burns and "Al" Lehman were also in the limelight with grand totals of 317 and 312, respectively.

February 2—Atwell again comes in for a big hand. A strike in the last box with nine on puts his team one pin in the lead. Ackler was high for the night with 307, followed by Poole with 300 even.

February 9—"Duke" Spurrier gets the rubber tooth pick this week. "Duke" scattered the sticks for a total of 142 in one and 331 for three. Reichert was next in line with a total of 299.

Auditor Freight Claims

Correspondent, **ETHEL VIRGINIA MILLER**

The Marada Club of the office of Auditor of Freight Claims announces a dance to be held at Tuttle's, April 12.

As this is the first "get together" of the club, every effort has been made to make the evening as interesting as possible.

Mr. Hook, as chairman, has secured the "Mobile Four" to cover the musical end, and we will trust his judgment in music to provide the necessary "pep." You are cordially invited.

The committee follows: Carroll W. Hook, H. Marie Berry, M. Lillian Dittmar,

William Kennedy, Third
Son of John Kennedy, Assistant Comptroller's office

Mildred H. Dopman, Frank, M. Ganzhorn, H. Earl Mullinix, J. Milton Perry and Elsie Wingate.

Auditor Disbursements

Correspondent, **JOHN C. SVEC**

A special bowling match was arranged between the Accounting Department and the Paymaster's teams, and on February 4 they journeyed out to Whiteford Hall. It was a hard fought contest, but an easy victory for the Accounting Department team under the leadership of H. T. Beck, who made the highest score of the evening.

The score was as follows:

ACCOUNTING DEPARTMENT					
NAME	1	2	3	TOTAL	AVERAGE
Beck, H. T.....	115	95	137	347	115½
Kuszmaul, J. G..	83	98	99	280	93½
McNamee, J.....	98	85	95	278	92½
Whelan, J.....	94	100	115	309	103
Baker, D. W.....	98	130	86	314	104½
TOTAL	488	508	532	1528	509½

PAYMASTERS					
NAME	1	2	3	TOTAL	AVERAGE
Williams, O.....	90	99	81	270	90
Mettle, G. W.....	93	110	95	298	99½
Boring, J. R.....	113	96	105	314	104½
Whelan, J.....	97	84	126	307	102½
Miller, G.....	93	97	107	297	99
TOTAL	486	486	514	1486	495½

Auditor Passenger Receipts

Correspondent, **G. FRED MILLER**
Secretary to Auditor

Several months ago, C. X. Hale, for many years connected with the Interline Division work of the Auditor Passenger Receipts office, was forced to give up his railroad work and make his home in Gilroy, Cal., where he engaged in the raising of prunes and apricots. He was doing nicely, and his many friends will regret to learn that he met with a serious accident recently, when a sled upon which he was bringing huge logs down the mountain side skidded and fell upon his leg, resulting in a compound fracture. No doubt a word of encouragement from those of his friends who care to write will be greatly appreciated. Our friend "X" has discovered that "No matter how young a prune is, it always has wrinkles." Good wishes for a speedy recovery. Mr. Hale is still acquainted with the doings of his Railroad friends by reading each issue of the MAGAZINE, which is forwarded to him.

A man would do well indeed to open a matrimonial bureau in the Baltimore and Ohio Buildings. Each week Cupid plays havoc with the Railroad forces. Once again this office feels the effect of the accurate aim of relentless Cupid.

Joseph Frisby pranced away and took unto himself a partner for life. He's a little man with a big idea, and he's wearing an everlasting smile. March on to glory, "Joe," and accept the congratulations of your A. P. R. friends.

Miss Nilson has finally been persuaded by our good friend from Washington that married life is the only thing. She has resigned her position and will be married in the near future. A new innovation, "a pre-nuptial luncheon," was undertaken by Miss Nilson and her friends during a lunch period, and from all accounts it proved a success. Desks were used as a table and the necessary utensils were brought from various homes. Two dolls, a bride and bridegroom occupied the center of the table. Miss Nilson will make her home in Washington, D. C., and we offer best wishes for a happy future and many long years of happiness.

Miss Lillian Mazer is the proud possessor of the "hope" diamond. I gazed upon it

just once, and am now wearing colored glasses. May the great day come soon, Lillian.

Mr. Jenkins is back at the office after an operation at the hospital.

We are also happy to have Miss Mitchell back at the office again with her smiling face and ever jolly disposition.

Mr. McGrain has just returned from a honeymoon to Florida. Mr. McGrain married Miss Schott, who was formerly a member of our force and who left to take up duties in the Central Building. Again we offer our best wishes and congratulations.

Each pay day the men of the office make the following report to their wives:

"Here's the dough, less 75 cents for marriages."

When the girls drop their offering, they murmur, "Another good movie show missed."

We'll get even with 'em some day!

Staten Island Lines

Correspondent, **G. F. GOOLIC**

The "Man from Egypt," alias V. Flannery. You can ask him more questions and get fewer answers than from the Sphinx. This bird can come to work in the morning clean shaven and quit at 5.00 p. m. with a full grown beard. His children think they have two fathers, the one they see in the morning and the other that they see at night. He is a good fellow though and has actually said "Yes" and "No" to me on several occasions.

Eastbound freight leaving Staten Island Junction for St. George

"Roach," "Sparks," alias R. J. Doty. This is the wireless bug. He recently was in direct wireless communication with Mars. Ma was looking for the Old Man; he hadn't returned from the club in three days. This bimbo thinks the air in Brooklyn does him good. He is over there enough—it ought to.

"Little Dick," "Red," alias W. Emde. He is a native of Stapleton and none the worse for his misfortune. He is a small, blond-headed, blue-eyed, befreckled little piece. A regular pocket edition, but I'll say he has a man's size pull with all the ladies. I can't say much about him, but where in thunder does he get his stories?

"The Fakir," "Pasquale," alias J. P. Stanziana. He is of the imported class, hailing from Sunny Italy. This fellow is the only one of his kind in captivity and we are the proud possessors of his services.

Laura Patricia and Bernard James, children of Trainmaster B. F. Kelly

He can kill nine hours out of an eight-hour day, and then have courage to put in a time-slip for two hours overtime. He actually does less work than I do.

"Speed," "Jersey Lightning," alias John MacDonough. This bloke is a disciple of Mercury. Don't you recall the Jersey lightning of Auld Lang Syne? That old 100 proof? Well, this fellow is 100 per cent. proof against all speed. He is the only professional somnambulist that I know. I feel sorry for him, however, for I hate to disturb anybody's pleasant dreams to make them go to the yard.

"Terry, the Irish Ambassador," alias T. Connolly, our J. P. Morgan. He is also the only Hebrew in our midst. "Terry" says we are going to get busy soon, for he can see the change in his work.

"Frenchy, the Count," alias F. W. Neidenfuhr. Another of the imported species, but not from Sunny Italy. His father, Count Meout, was very fond of children. He is a very prominent club man, being an active member of the "Eata Bitu Phi," which formerly met in the boiler room adjoining Dock 6, which meeting place was abandoned because of the very unhealthy climate.

"Andy," president of "Eata Bitu Phi," alias A. Woelfel. A native of Drunken Hills. "Andy" was brought up to greet the world with a smile, but since the 18th Amendment he has had to keep his smiles all to himself. He says that the "Eata Bitu Phi" meets in secret now. Between you and me and the gate post, "Andy" knows a fellow who has something in his cellar—it's water.

"Frank," alias F. Pfurr. He handles the keys for us. No, this isn't a jail, although people are easily misled, but he's our "steno." It is rumored in diplomatic circles that Frank is about to become a feather-bed soldier. I wish him luck, but when I hear that the "Count" is to be his first "Looie," that's different. Then you'll see the Pfurr fly.

"Jinnie Buns, the Woman Hater," alias J. M. Burns. "Jim" says he hates all the women. He means all those who wear mustaches and shave. "Jim" conducts a matrimonial bureau. He is general manager of the Eastbound Department. I wonder where he won the derby?

"Turkish Towel," alias H. Dowell. He comes from that large family of towels of

the kitchen, face and bath varieties. His family migrated to this country from Russia, having been deported because of their uselessness. Harold is an ardent worker in our Laundry Department, the O. S. & D.

"Buster," "Tango," alias B. Russell. He is about as fat as a match; if he had a thought it would show on him. Barnum was right when he said that there is one born every minute and this fellow is twins. The Lighterage hasn't many faults, but here is one of them.

"Friday, the Actor," alias G. F. Gippert. I should say "the late G. F. Gippert," for he is married. Yes, poor thing, he passed away about five months ago. Too bad! He is the only man in the office with any experience for he has been everything but dead. It must be so, for he says so. When he was superintendent, up at P. & G.—Say, boy, page Mr. Baltimore.

"Gallagher," alias J. Griffiths. He is the original Hon of the Hon and Dearie Duo. Now, between you and me (of course, you understand that this is strictly confidential and I don't want this to go any farther) could it be possible that this fellow is a spy? I know that he spends a lot of his time over by Belair Road. Sh-h-h-h-h-h! not another word.

"Miss Grapes," alias Miss M. Greabe. She sings soprano in that Hon and Dearie Duet. She is an inhabitant of Belair Road and only lately of Nanny Goat Hill. Rumor has it that this frail used to tour the hills in company of several herds of nanny goats. Some one told me that it was she who put the Belle in Belair Road. I wonder.

"Fay King," "Liss," alias Miss E. Adams, the Matinee Idol, or Why Boys Leave Home. She files all our letters away and a lot of them are never found again. Prosperity has a queer effect on some people. I've noticed (after my attention was called to it) that silk stockings have replaced the more democratic cotton ones. She says she should worry—she don't give Adam. That's her name.

AU REVOIR.

Walter E. Pettigrew has been employed as assistant division engineer, Staten Island Lines, in place of Charles Fernald, deceased.

We were all treated to a surprise by Miss Anna Levy, clerk, Division Accountant's office, who appeared one bright morning wearing a wedding ring. She is now Mrs. "Bob" Erwood. The girls gave her a kitchen shower and from all reports it would appear a pleasant time was had by all.

Maryland District

General Superintendent's Office

Correspondent, MISS M. ELIZABETH BELL

For a long time we have threatened to enter our office in the columns of the "Among Ourselves" Department, but, for some reason or other, we never did it. One of our friends promised to help us out, but failed us, thinking, perhaps, that there was no news to tell. There wasn't—until he invented some—and by the following note you may see that he has helped us, although unintentionally.

W. E. Gallagher, passenger clerk (and widower in good standing), was seen at the meeting of the Baltimore Chapter of Veterans in Moose Hall, on February 7, with a live chicken tucked cozily under his arm. Oh, yes, a pretty one, too, and he wasn't trying to sell her either. Moreover, jealousy ran riot among the "Vets." As "coming events cast their shadows before," our pocketbooks collapse with the thought.

FREE To Wear 10 Days Let us send you a wonderful

Sparkling Brillite Stone without one penny in advance. All the fire and brilliance of a perfect diamond. Beautiful hand made and engraved solid gold setting, plush case. Money back if you can tell a Brillite from a Genuine Diamond. Your choice of rings shown or scarf pin. (For ring size send strip of paper long enough to meet over second joint of ring finger.) Upon arrival deposit only \$1.75 with postman. We guarantee to refund your money in 10 days if you want it. Otherwise send only \$2.75 a month for 5 months. Send no money. Just write TODAY. For other styles send for catalogue.

Baltimore Terminal Division

Correspondent, MARTHA V. FOX, Car Record Clerk

Congratulations! J. B. Gaither, crew dispatcher, is now the father of a 11-pound baby boy, born on January 20.

Cupid has again claimed another victim, this time Mr. Moore, Curtis Bay Agent's office. The knot was tied on Wednesday at noon, January 19. The bride and groom left for an extended trip North. Congratulations, "Jimmie," and a happy trip.

With much regret we note the sudden death of George Pennel, caller, Riverside, who passed away February 6. Our sympathies are extended to his family in their hour of bereavement.

There's a guy works down at Lee Street, Adam is his name.

You've heard him toot his whistle when You passed there on a train.

He brought himself a brand new hat, A dicer so they say,

That made tir' folks all laugh so much He gave th' hat away.

—ROBERT L. HEISER.

Who says he's not a little Baltimore and Ohio man?
Emory E. Knode, Jr.
Son of assistant janitor, Camden Station

"Ed" Myerly is enjoying a vacation. While we will need him soon, he is thinking of taking charge of a large motor concern as manager. We know he will make good, but feel sure the old job still fascinates him.

T. B., Jr., seems to be head janitor at Mt. Royal. We wish him luck.

Cold weather hits our interlocking plants once in a while. The trouble is "Compensation." The signal supervisor says so.

Curtis Bay Coal Pier is enjoying easy hours, but seems to be doing well as far as cars dumped per hour go.

Baltimore Coal Pier is now under the expert guidance of Friend Padden. Speed up the dumping, Martin.

Uncle "Charlie" Edwards, assistant agent, in charge of Mt. Clare territory, started on his third matrimonial journey on February 5. Good luck is wished you, "Charlie," old boy.

C. F. Zimmerman, formerly assistant chief clerk to general manager, has been assigned to office of Superintendent.

Mount Clare Shops

Correspondent, Miss MOLLIE ALBRECHT
Secretary to Superintendent

The accompanying picture is of Charles Robert Poulton, son of H. L. Poulton, blacksmith helper, Smith Shop, and grandson of R. L. Poulton, clerk in our office. Charles is quite a little darling now, and he has only to copy after his granddaddy if he wants to make lots and lots of friends when he grows older. The only thing missing on this picture is the smile, which is seldom missing from Charles' face.

Mechanical Engineer's Office

For quite a long time this office has not been heard from. In fact, nobody who reads the MAGAZINE would know that we are at Mt. Clare.

This office is composed mostly of men, but there are some fine girls here. Ask any of the men and they will tell you so. However, we are afraid for at least two members of the fair sex. Miss Webb received a beautiful diamond ring for Christmas, which she claims wouldn't fit her right hand, third finger, so she is compelled to wear it on her left hand. (Miss Webb, that sounds better on the water!) Then there's Miss Button. Her hope chest must be nearly full to overflowing, for all she does now, is sew, sew, sew!

Mr. Cole had the most beautiful white beard before Christmas. But alas! somebody gave him a new razor, and as he had to try it out on something worth while, he cut off his beard.

We musn't forget Stenographer Felte. This young man, with his witty expressions, is sunshine on a gloomy day. So whenever we're blue we just have to go visit the drawing room—and we come back with a smile.

We trust the Mechanical Engineer's office will appreciate our putting them in the foreground this month. We shall endeavor to keep them there, if possible.

Baltimore Division

Philadelphia, Pa.

Correspondent, J. A. MCDEVITT, Chief
Rate Clerk

The accompanying cartoon is of a city passenger agent, who claims that he never does anything wrong. Here is the evidence that his theory is a bit defective.

Philadelphia Passenger Station

Upper picture on facing page shows the fire department at our station, made up of the station cleaners and organized by Janitor Charles T. Allen (shown at extreme right). The equipment consists of one 200-foot hose cart, one 400-foot hose cart, equipped with standard 2½-inch hose, and a 40-gallon chemical engine. The men have been trained for fire-fighting. Each new man is given a chance to discharge the fire-extinguisher and to get practical experience. As

Master Charles Robert Poulton

yet there is no regular fire alarm, but the men can be assembled in from two to three minutes. They can lay 250 feet of hose and have water on fire in two and one-half minutes. Two of the men, Wesley Ford and William Butler, can uncouple from hose cart and attach nozzle in fifteen seconds. The longest time yet taken to run from the hose station to the city fire plug and have water turned on is two minutes, five seconds. Mr. Allen has worked hard to make his an efficient fire brigade and his is congratulated on the results of his efforts.

The men are, left to right: John Begley, hoseman; Stephen Wilkins, pipeman; Charles Kennard, engineer; Michael Lambert, hoseman; John Bachman, night captain; Wesley Ford, pipeman; William Butler, pipeman; Walter McKennie, hoseman; James Lynch, lieutenant; James McCarron, pipeman; Giovanni Paradiso, hoseman; Charles J. Donahue, hoseman; Jacob Greenberg, engineer; William Dougherty, lieutenant; Charles T. Allen, fire marshal.

Wilmington, Del.

Correspondent, CHARLES W. HAMILTON

Officials of the Baltimore and Ohio made a two-day survey of local industrial plants in an effort to better, by a broader understanding, the conditions existing between the railroad and its patrons. The inspection party comprised W. F. Richardson, general freight agent; A. D. White, freight agent; C. E. Owen, assistant superintendent; W. I. Bishop, industrial agent, Baltimore; N. C. Clark, general yardmaster; G. W. Bumpas, district freight agent, and G. S. Harlan, division freight agent, Baltimore.

One of the important objects of this inspection was to cover transportation cases and questions met with on the trip, giving immediate consideration and decisions to shippers. Several cases were thus very satisfactorily disposed of without delay or formality, particularly those bearing upon car service situations.

In reviewing the local conditions and attitude of our employes toward the shipping public, it is worthy of mention that those located at the important business center of Wilmington, Del., are imbued with a most praiseworthy spirit. It was stated to your correspondent by A. D. White, freight agent, that the Wilmington employes are notably alert and prompt in their solicitation of business for our lines. They do not allow any opportunity to slip by to the "other fellow," representing rival carriers.

Their aim seems to be wholeheartedly "on the job," with courteous recommendations of Baltimore and Ohio facilities and service.

A large and enthusiastic company of Baltimore and Ohio and Reading Railroad employes and their families filled two coaches, especially provided, to attend the Safety First Rally at Turngemeinde Hall, Broad and Columbia Avenue, Philadelphia, on January 8. That so many presented themselves for attendance, even when their

Fire Brigade, Philadelphia Passenger Station

return home meant the "small hours" of the morning, manifested the live interest shown in the important and far-reaching Safety campaigns promoted by the railroads, notably by the Baltimore and Ohio. There has been spared no effort or reasonable outlay in promotion of "Safety" education. In this particular event special coaches were provided and one of the fast trains swung into service for the Wilmington crowd. The crowning event of the pleasant and profitable evening was the fine motion picture story of "Safety First" in many of its varied phases, which of itself involved a heavy initial cost to produce. The promoters of this successful entertainment deserve great praise and many thanks from those whose privilege it was to attend.

Correspondent, W. L. WHITING, Chief Clerk

Sad news reached this station on the morning of January 29 with the report that Medical Examiner J. A. Robb had passed to the Higher Life on January 22.

Dr. Robb had been with us as examiner at this station for so many years that we looked upon him as one of our own circle, and we were so accustomed to see his portly form and smiling face appear about 9.30 every Tuesday and Friday mornings, that if we did not see him the question was always raised, "What has become of the Doctor?" The report of his passing away spread a feeling of gloom over all his friends here, and they were many. His kindly manner and genial bearing endeared him to all who came in contact with him. He

never passed the desk of your correspondent without some friendly greeting and a little pleasant conversation, usually drifting into a little talk about a Mutual Friend, named Charles Dickens. Dr. Robb was a great admirer of the great English author, as is also your correspondent, and many a laugh we have had together over some of the inimitable characters created by the author of the Pickwick Papers.

We shall all miss him greatly at Washington, and our deep sympathy is extended to the members of his family in their hour of bereavement. *Requiescat in pace!*

Many changes have taken place at this station lately. We miss some faces that have been with us for some time, owing principally to the necessary reduction in working force that has struck us as well as all other industries all over the country. But in spite of an enforced temporary idleness, there is an optimistic spirit in the air that is displayed by those who are affected by the "lay-off" that is very pleasing to notice. The general opinion is, "Well, it will not be for long; business will soon pick up again, and we shall be back on the old stamping ground before we know it."

G. R. Bandy, extension clerk, was recently transferred to Cumberland, Md., where he will be with his old Washington friends, Agent C. R. Grimm and Chief Clerk R. W. Price. We wish him all success in his new position.

Our sick list has been remarkably small this winter, there being at the present time only one of our office force to report. Miss Mary McDonnell, cashier's stenographer, has been confined to her home for several

days with a severe cold and tonsillitis. We hope to see her smiling face among us shortly, fully recovered.

Coal Clerk E. C. Scaggs had a bad attack of acute indigestion lately, which kept him home for a day. But, as you could not keep "Gene" away from the coal dumps unless he was the principal party to a funeral, he was right on the job the next day and was wondering what had happened to him. He laughed at the idea of his being sick and said it was a bad stomach ache. So it was, but a mighty bad one at that, and "Gene" must take care of himself a little more than he has been in the habit of doing.

Cumberland Division

E. C. DRAWBAUGH, Division Operator

RUTH M. CHEUVRONT, Office of Mechanical Engineer

JOHL SELL, L. P. Clerk, Superintendent's Office

William C. Fisher

William C. Fisher, telegraph operator, Sir Johns Run, died of paralysis on January 11, at the age of 57.

"Bill," as we all knew him, began working for the Baltimore and Ohio as trackman in 1881. On September 18, 1882, he was made baggagemaster. In 1886 he entered the telegraph service, where he remained until his death. He was stricken with paralysis while on duty, as he was attempting to display a proceed signal to a train.

"Bill" was one of the most efficient, capable and faithful employees in the service. Although he has gone to his last resting place, yet will his memory live in the hearts of his friends.

Those present at the Wilmington Valentine Social

The late William C. Fisher and grandson

February 9, C. T. Hemphill and C. W. Short, delivery clerks, Cumberland Freight House, delivered a total of 230 shipments, a splendid day's work.

T. K. Faherty, assistant superintendent, East End, Cumberland Division, has recently been made assistant superintendent of the entire division. Mr. Faherty is well known to all the "boys" as a Safety man, and we know he is equal to any occasion. Go on up the ladder, Mr. Faherty; we are with you to a man.

Hats off to the man who started our night school—F. L. Sheakley, division accountant! We have class every Wednesday night and study such subjects as department charges, why they are so charged; various reports and why they are necessary; the importance of having reports go in on time and what is done with them. In fact, every phase of railroad accounting is gone into with the natural result of better knowledge of our work. The class is not limited to the Division Accountant's office; clerks from almost every office in the city, from the shops to the Superintendent's office, take part.

Any question is open for debate, and while Mr. Sheakley and his able chief clerk, E. J. Soehner, preside, the clerks handle the debates, the presiding officers acting as judges.

The school is a great success and "F. L." is to be congratulated for killing two birds with one stone: educating his own clerks to do better work and at the same time providing an opportunity for others to become equipped to handle the first opening. The writer admits the many advantages the school affords him, and particularly enjoys the opportunity afforded for the clerks to become better acquainted. The class has selected an entertainment committee, which takes charge on one evening each month and provides various means of amusement. Lady members of the committee serve refreshments in their own delightful way.

Mr. Sheakley, there is no question of the educational value of your undertaking—for which, by the way, there is absolutely no charge. May success crown your every venture.

Our able messenger boy, "WC" office, J. C. Rodenhauser, recently graduated to long pants and the change is wonderful. It's an easy bet that "Charley" has a girl now.

Cupid is busy around Cumberland. We know several of our clerks who are slipping. Lookout, "Vince," the storeroom isn't able

to spare you and honeymoons take time. However, a honeymoon comes only once in a lifetime.

Warren P. Frye, genial night yardmaster, Westbound Yard, Keyser, has been promoted to day yardmaster. Mr. Frye numbers his friends in both Cumberland and Keyser by almost all the names that the payroll shows.

G. Frank Messman, report clerk, Superintendent's office, recently earned the title of "Grandma." Frank went to a card party recently and finding that he was the only one of the "odd" sex, drew the job of minding the younger "set." Frank, you having a standing invitation to our functions in the future, but bring your apron along.

Our well known checker champion, R. L. Ketzner, has a standing challenge to the world. Come on, boys, he is taking all comers.

Two of our Index "fair ones" are glad that leap year is over. Shirley Jane and Genevieve are now busy lining up prospects and we look for the glad bells before long. Mollie says, "count me out," but you can never tell.

Stock shipments over the division have been heavy for sometime past. In checking the record for the month of January it develops that 3407 loads of stock moved in 114 trains from Cumberland to Weverton, a distance of 100 miles. The maximum time allowed for trains handling stock between these points is five hours. An interesting feature in connection with the movement, from an operating point of view, is the fact that the average running time of the 114 trains was three hours and fifty-three minutes. This record is something for stock shippers to remember when freight of this character is to be moved and good time is desired.

Martinsburg Shops

Correspondent, W. L. STEPHENS

Brother E. T. Fortney, retired veteran engineer, received a pleasant surprise on his birthday, January 29. His good wife and children had arranged a surprise party in his honor. A splendid dinner was served and the veteran and his guests enjoyed an evening of good fellowship. We hope that Brother Fortney may live to celebrate many more such anniversaries.

Keyser

Correspondent, HARRY B. NIGHT

Track Foreman J. S. Rhodes, Section 39, Cumberland Division, was in charge of the prize section for the best maintained foreman's territory on the west end of the Cumberland Division. Foreman Rhodes has four miles of track on the Seventeen Mile Grade, just east of the summit, and is located at Swanton, Md. This is a particularly hard track to maintain, owing to the conditions made by the heavy grade and curvature over this territory. Mr. Rhodes has gone through the past season without having a single derailment, which is indeed a marked achievement. He has been in the service of the Railroad Company for the

past 40 years and is still a young man. He is now working for next year's prize.

Not long ago, a woman, who shipped some household goods to Baltimore, requested "Cob" Parsons, rate clerk at the freight house, to allow her to have her furniture roped in the car. "Cob" informed her that it would be all right to tie her furniture securely, in the proper manner of packing for safety in transportation, but the lady informed him that she wished to have it tied in the car. When asked why, she told him that she did not want it shifted from one end of the car to the other as the train went up and down the hills. Some hills!!

Yard Brakeman John Siever had a Christmas tree scene in the parlor of his home that attracted much attention. He spent much time in arranging and building a country place. The little pump in the foreground of the barnyard, the only part of the big scene space permits us to show, though small, was real, and brought water from a mineral well. Hundreds of people visited Mr. Siever's home to see his clever handiwork.

The talent of our local employes was proved again on Saturday night, February 19, when they took part in the entertainment at the Safety Rally held here. J. T. Broderick, superintendent Safety Department, and W. F. Braden arrived early Saturday morning with the motion picture, "Bulletin 70."

Upon their arrival they found that the Armory which had been secured would not be large enough, so they rented Music Hall, Keyser's theater beautiful, and it was filled to overflowing. After the show a dance was held in the Armory, where a large crowd tripped the light fantastic until the wee small hours. Much credit is due those who took part in this, the biggest rally of its kind that has ever taken place here, and the local employes were highly pleased with its success and feel that those in charge felt repaid for their visit here. We are hoping that it will not be long until we shall have them with us again, and will guarantee them that we will be on the job.

Special credit is due H. R. Atkins, chief clerk to Terminal trainmaster, who prepared the entertainment given by our local talent.

Five months old son of C. E. Barkley, Division
Accountant's office

Christmas garden of Brakeman Siener

Why?

A sufferer who lives close to a railroad yard in the suburbs wrote the following to the railroad company complaining about the racket made by a switch engine:

"Gentlemen: Why is it that your switch engine has to ding and dong and puff and spit and clang and bang and buzz and hiss and bell and wail and pant and rent and howl and yowl and grate and grind and puff and bump and click and clank and chug and moan and hoot and toot and crash and grunt and gasp and groan and whistle and wheeze and squawk and blow and jar and jerk and rasp and jingle and twang and clack and rumble and jangle and ring and clatter and yelp and howl and hum and snarl and puff and growl and thump and boom and clash and jolt and jostle and shake and screech and snort and snarl and slam and throb and erink and quiver and rumble and roar and rattle and yell and smoke and smell and shriek like hell all night long?"—*Boston Daily Globe*.

Timber Preserving Plant

Correspondent, E. E. ALEXANDER

These men work in crews consisting of one engineer and two retortmen each. Their duties are to bring trains of loaded trams from the yard to cylinder, switch them out properly for treatment according to class and grade, and to recharge cylinders when a charge is off. As every minute counts with a treating cylinder they are allowed 20 minutes without delay in which to make a change. Over that time a delay is charged and must be accounted for. However, this time is

"Resolved that a copy of this testimonial be sent to the editor of the BALTIMORE AND OHIO MAGAZINE for publication, that other employes may know in what high esteem our departed friend and associate was held by his friends and co-workers.

Who says we didn't go into the February issue "in high"? Thanks, "Ed."

Taking a chance bears no relationship to Safety First. President Willard does not approve of trusting to luck in railroading; why should we?

He's on the job every minute. Not only doing his own work but assisting others with theirs; and always with a view to Safety. That's the unanimous opinion of all

And now a line or so on the Safety First rally held in Connellsville, Monday evening, January 24. So many, many good things were served to the crowd which taxed the capacity of the normal theatre-sized high school auditorium that it will be impossible to dwell at length on any one of them. First of all, the film, known as "Bulletin 70," was pronounced, by even the most critical movie fans, a real treat when considered merely as a moving picture. The realism used in driving home to all the benefits of Safety First observance held the great audience spellbound at times and its influence for the promotion of the great movement should be limitless. Came, then, a wonderfully enlightening talk by J. T. Broderick. Superintendent T. J. Brady preceded Mr. Broderick, but, as he stated, his purpose was chiefly to introduce the principal speaker of the evening. However, the generous applause which greeted the appearance of the superintendent clearly demonstrated his popularity with the audience. And then the vaudeville

J. P. Dempsey (Jack, Jr.), in charge of the reclamation platform, Glenwood car yard, has recently taken unto himself a wife. Best wishes to both.

Rumor in the store room at Glenwood is that General Foreman Frank Adams will soon take unto himself a wife.

F. J. McDonald is back in our midst again at Laughlin Junction as leading signal maintainer and we are glad to see him.

H. T. Forse, assistant signal maintainer, has left Laughlin Junction to take a similar position at Callery. He is sadly missed and all wish him success.

The accompanying picture is of some of our men working on the heavy wood end at Glenwood, under Foreman O. F. Stoneburner.

It was with regret that we learned of the death of the father of Mr. Stroud, welder supervisor.

C. P. Kalbaugh, shop clerk, Glenwood, recently met with a serious accident by

Foreman Stoneburner and his force

who work with Engineman "Billy" Turner on Trains 61 and 62.

Engineman M. H. Patterson and family are wintering in Florida. Used to be nobody but "J. D.'s" and "J. P.'s" could so indulge themselves. Nowadays—but "Abe" Martin has explained changed conditions better than the writer could.

The many friends of W. C. Michael are relieved to learn that that efficient station lineman has been furnished a "Safety First" speeder. The machine formerly used by William derailed itself so often, and on such slight provocation, that he had decided to equip it with pneumatic tires and use it on public highways exclusively.

It's far more glorious to explain how an accident was averted than to wonder whose blunder caused one.

F. W. Steganius, car inspector, Connellsville, recently sustained a badly mashed finger in closing a passenger coach trap door. Next to the injured digit, the thing that peeves "Freddie" most is for any person to even intimate that the mishap was due to even observance of Safety First rules.

It's easy to do things the safe way; but it's not always safe to do them the easy way.

stunts. Miss Nora Grace, of the Division Accountant's office, tickled the risibilities of all with a blackface eccentric dance stunt, following which A. D. Gans amused and mystified with sleight-of-hand. A dance at the State Armory followed the auditorium show and added the finishing touch to a grand and glorious evening.

Glenwood Shop

Correspondent, FRANK RUSH

It was with regret that we learned of the death of S. A. Bearl, upholsterer. Mr. Bearl had worked for the Company for 25 or 30 years and was well known, not only at Glenwood, but at other points on the System.

N. Becker, Jr., blacksmith, Glenwood Shop, died recently. Mr. Becker had been in our service for a number of years and was well known and liked by all. His family has our sympathy.

Third trick Operator E. B. Curtis at "MJ" Tower is back again. "Tubby" says he spent most of his time in Wheeling and Evans City. Rumors are that the wedding bells will ring in the near future.

being struck by an automobile truck. Cecil is again back at work and we are all glad to see him in the office.

Miss Jane Passmore, clerk, Master Mechanic's office, has been off for some time because of illness. She has our best wishes for a speedy recovery.

Get busy, you shop men at Glenwood, as well as the office crowd, and give the correspondent some items for the MAGAZINE. Let's get Glenwood Shops on the map.

Born to Mr. and Mrs. L. D. Hickey, a bouncing baby. Mr. Hickey is welder in our shops at Glenwood. Lawrence did not forget the smokes. Best wishes to Mrs. Hickey and the youngster.

Ohio River Division

Correspondent, MAUDE M. MOORE

The accompanying snapshot is of Mrs. A. E. Graf, the most popular store helper at Parkersburg. Her genial smile and unfailing good humor, together with a superabundance of energy to render courteous and efficient service, are valuable assets to the Company. If anything further is to be said of "Ma" Graf, it must be a word to

"Ma" Graf, store helper

inform the world that she has a shock of the brightest auburn hair on the System.

"Trixie" Dye, Car Foreman's office, was threatened with pneumonia, but we are very glad to say that now she is much improved and entirely out of danger.

J. P. Hoban has recently been promoted to general foreman, Low Yard Shops, Parkersburg. Mr. Hoban has the good wishes of the shop men and we all hope that he will make a very efficient foreman. He was formerly a machinist.

Engineer Taylor: Duffy, there is something wrong with that 1405.

Duffy: What seems to be the matter with her, John?

Taylor: Well, I'm not certain, but I think some of those umbrella menders that you call machinists left some of the jewels out of her.

John Hoban: Brigham, I can't make out the writing of this engineer's report of yours.

Brigham Icenhour: Hoban, I am not responsible for your lack of education.

"Jack" Dougherty engineer on the day passenger pool, West End, has been seriously ill for the past month. We sincerely hope that he will be back on the job before long. In his absence, "Felodious Bill" McNerney is holding the turn. He is dolling up the 1413 with some of the brass ornaments off the "Anna Louise" (1363). When the job is completed she will be the pride of the valley.

The accompanying snapshot shows engineer Henry Bartells and Fireman Richard Evans with their favorite engine.

Engineer Henry Bartells and Fireman Richard Evans

Dr. J. P. Lawlor, Medical Examiner, has returned from Baltimore, where he was critically ill. We are glad to know that Dr. Lawlor is able to be back with us again.

Donald P. Kennedy, caller, Low Yard, is proud to announce the birth of Mary Frances. Heartiest congratulations!

Things we'd like to see and hear by employees of the Division Accountant's office: Norman Harrison—Tripping the light fantastic.

Carroll O'Neal—Buying a box of matches. Edgar Fortner—Eating his lunch.

Roy Arnold—Drive his Studebaker to the office once in a while.

Maude Moore—Drinking grape juice.

"Bud" Wiggins—Catch the 5.00 p. m. car.

Nell Peppers—When she wasn't going to a dinner party.

"Ed" Rupp—When he didn't have the office force in his "Jewish Packard."

Myron Mohler—Swimming the Ohio.

R. C. Gruver—Rolling more than 58 pins in ducks.

Ira Foster—When he had less than 37 pages of notes to transcribe.

Mr. Catt—Watching the boats on the river.

Charles Matheney—Before he lost his hair.

Ruby Busch—Not crocheting or tatting during lunch hour.

Katherine Fittro—In a bad humor.

George Sayre—Without his arms full of mail.

E. L. Peters—Laugh.

The two bowling league teams organized at Parkersburg are composed of the following:

Team A—S. C. Woods, captain; N. K. Harrison, treasurer; R. C. Gruver, C. Farrell, F. Bailey.

Team B—L. A. Allen, captain; R. F. Arnold, treasurer; H. C. Bodie, R. A. Augustine, E. L. Barnum.

Clarksburg

We are pleased to announce the wedding of Miss Blanche Freeman, revision clerk, Clarksburg Freight office, and Waldo Waugh. Mrs. Waugh is a popular young lady and her host of friends wish her happiness. The newlyweds will make their home at Fitzgerald, Georgia.

Our sympathy is extended to Mrs. Lillian Farnsworth, whose father-in-law, H. H. Farnsworth, died recently in the local hospital. Mrs. Farnsworth is abstract clerk at the Freight office.

We are glad to welcome E. L. Shurtleff back on the job again. He has been ill for some time, but is now much improved. (Whatever happens to the laundry, we always have a good Shurtleff.)

Another spirit has left the wires. Miss Ada Irene Spurr, one of our telephone operators, Freight office, and Oswald B. Fletcher, of this city, were recently married. The wedding took place at Cumberland,

Md. The bride is the daughter of Mr. and Mrs. R. R. Spurr, West Union, W. Va. Mr. Fletcher is the head of the Fletcher Motor Car Company, Clarksburg. The happy couple will live at 172 W. Main Street, this city. We extend our hearty congratulations.

Chief Clerk and Mrs. C. McOsker, Division Accountant's office, Charleston Division

continue in every direction. There never was a better time to show what sort of stuff we are made of. There is not one of us on the division who cannot help or hinder the campaign for economy, and we feel equally sure that there is not one of us on the Charleston Division who will not be **HELPING** in his or her own quiet way. There is no better start to be made than to show what we can do with our freight claim prevention work. We hold our meetings, and we call attention to all the bad practices, and to all the places where—**if** care is used—claims can be averted.

Let's practice prevention every day, and not only prevent claims, but also prevent waste of every kind, whether it be human waste, brought about by personal injuries, or material waste, brought about by fuel waste, waste of supplies, etc. The Charleston Division slogan is so well known that it seems almost unnecessary to call attention to it again, and yet it is one which will bear repetition at all times. If we will use the thinking apparatus we have been given for that purpose, the results *must* be reduction in claims, fuel bills, supplies, etc., and in fact reduction of waste of all kinds.

This is not alone for the benefit of our Railroad Company, but it is must naturally redound to the lasting benefit of each member of the Best Division of the Best Railroad. It follows then that the more we save in useless expenditures, the more we will have for essential work and maintenance.

Mrs. Vassar, formerly Mrs. Inez Young, File Clerk, Superintendent's office

There is no one who cannot help our Company by making friends for it. We should talk Baltimore and Ohio to every one we meet, whether he is a large shipper or a small one, or merely a prospective shipper.

If you go into a store to buy a pound of sugar, and the man behind the counter greets you with a smile, and tells you to come again, and you give him your custom. If he is a grouch, then you go elsewhere. Sure enough "'Tis the voice with the smile that wins," and a friend gained is much better than an enemy, because while an enemy may seem a small and unimportant one, who knows what influence he wields in his community? We are the "men behind the counter" on the Railroad, and we can make our Company a success or otherwise.

Remember also "Every little bit added to what you've got, makes just a little bit more." If we go about it in the right spirit, there's not one of us on the division—or on the System for that matter—who can't do his share, and help us to hold what we've got and get more. And we must realize that in the end it comes back to us. Let us, then, see that shipments intrusted to our care are promptly and properly handled, that passengers get such courteous treatment that they will want to use our trains *all* the time, and, as our superintendent has said, make Charleston Division simply another name for **EFFICIENCY**.

Another of his remarks is very appropriate at this time, "Apply our slogan to all things. Cultivate a spirit of enthusiasm in our work and optimism for the future, and we will not be disappointed."

The Community Club of the Charleston Division has now become an accomplished fact. At a recent meeting (during the absence of the writer on line) a number of employes, representing all departments, met in the Weston passenger station. The following officers were unanimously elected: President, M. W. Jones; vice-president, L. G. Berry; secretary, W. C. Borneman; treasurer, J. P. Ryan. Various committees will be appointed and we hope to get things going with a hum. The objects of the club are not alone educational, but we hope to "Get together" and accomplish much good for the division and for ourselves. The superintendent is an enthusiastic backer of the movement; he has promised to become a member and assist us in every way possible.

It is with deepest regret that we must chronicle a sad accident which occurred on our division recently. While running the second engine in a double header, Engineer B. J. Phillips was killed. His train struck a rock fall in Frenchton Cut, he being dragged from the cab and crushed to death. "Jack" Phillips was an upright and loyal employe, every inch a man, and had been in the service about 14 years. He was a 100 per cent. engineer, and had been commended for various meritorious acts three times during his period of service. He was well liked by every one and had earned the esteem and affection of his supervising officers as well as his fellow employes. He was 34 years old, and leaves a widow and three small children. Funeral services were held at Abbott, W. Va., and attended by Superintendent W. Trapnell and other division officers, as well as a large number of friends and relatives. We desire to express our sincere sympathy to Mrs. Phillips and her family in their sad bereavement.

The jurisdiction of Road Foreman of Engines P. D. Marsh has been extended to cover the entire division. The position of

John T. Staples, chief dispatcher

road foreman at Gassaway having been abolished, N. H. Davidson will assert his seniority on the Road, after spending a short vacation with his family in Parkersburg, W. Va.

General Superintendent Scott recently made a trip of inspection over the Charleston Division. He was accompanied by Superintendent Trapnell and other staff officers.

L. W. Peters, for three years agent at Richwood, has resigned to enter other business. Our good wishes go with him. He is being replaced temporarily by J. M. Davis, relief agent.

We present in the place of honor this month a photograph of the best division accountant on the System, known far and near for his unfailing good humor, his desire to help the other fellow out, and his never-failing appetite. Walter E. Severns was first employed by this Company in 1901, as a messenger at Riverside Shops. Going successively through the positions of clerk, stenographer, caller, timekeeper, shop clerk and chief clerk, he was appointed division accountant of the newly formed Charleston Division in 1919, replacing W. C. Barnes, transferred to Grafton.

There hangs a tale by this photograph which is too good to keep. One fine day "Friend Wife," came across with the order that "Bill" must get a photograph, and a good one at that. Like the obedient "hubby" that he is, away he went. He had two plates taken. Upon receipt of the proofs, he did not think they were good

W. E. Severns, division accountant

enough; in other words they were not as handsome as the original. "Handsome is as handsome does, Everett." He showed them to a friend who had dropped in to while away the hours in friendly argument, and asked for criticisms and comments, which—needless to say—were given with a will. Passing by the house later, say about 10 p. m., this friend dropped in again, and found the victim of "Friend Wife's" whim, and the photographer's art, with a proof in each hand and a looking-glass propped up under the electric light, looking first to the right, then to the left, and then into the glass, in an endeavor to decide which of the three was "Bill." We understand confidentially that he had occupied this position for some three hours. Judge for yourselves whether the photograph does him justice or not.

Why does Roy Sergeant wear the smile that won't come off? Wifey has "arrove," bag and baggage. Roy and the good lady have secured a house and have now set up housekeeping, for better or worse.

Mrs. J. N. Godman and her baby have left Weston for Philadelphia to join the captain. We were all sorry to see them go. Weston had a warm place in its heart for "Cap" and his family.

Chief Clerk McOsker, Division Accountant's office, has also secured a house, and is now settled down, just as if he never knew what it was to be single. A photograph of his wife and himself are presented herewith for your inspection.

Miss Inez Young, former file clerk, Superintendent's office, recently underwent an operation for appendicitis. We are glad she is out again and well on the road to recovery. We regret to learn, however, that Miss Young will not return to us, as since going away she stole a march on us and became Mrs. Vassar. Our hearty congratulations go to the happy pair. Maybe Inez got tired having "Pick" dictate to her, and thought she would try her hand at "dictating." Her photograph is shown here.

The regular monthly meeting of the Division Safety Committee was held in Weston on January 31, Superintendent Trapnell in the chair. This meeting was of special interest on account of our new rotating members for 1921 being present, and the superintendent took the opportunity of explaining Safety work very fully. Among the new members we find Engineer R. Malone, Conductor Roush, Miss B. Borneman, Miss F. Feagans, Fireman Harris, Craneman Jordan, Car Distributor Dixon, Division Accountant Severns, Conductor O. J. Heater, Supervisor Harrington, Machinist J. A. Malone, Dispatcher John Carpenter and Agent E. J. Hoover. Any of these members, or any of the permanent members, will be glad to have information regarding Safety matters at all times.

Master Mechanic Baldinger of Gassaway has been promoted to Benwood. He has been with us less than a year, but during that time he has gained the respect and friendship of every man on the Charleston Division. It is with feelings of regret that we see him go, but we congratulate him on his promotion, and wish him every possible success in his new work. That he will make good goes without saying, because "Efficiency" is his middle name.

On the Children's Page you will find a picture of an interesting little family. They are the four daughters of Engineer L. R. Shomo, one of our old-timers, who runs out of Gassaway.

Of special interest to the ladies is our next exhibit. Ever since we took over the job of corresponding for the MAGAZINE, we have been trying to secure a photograph, by fair means or foul, of our popular ladies' man, Chief Dispatcher John T. Staples. We must admit this one did not come to us from him, and through some accident he heard we had it. Numerous threats have been made as to what would happen to the correspondent if it appears in the MAGAZINE, but we will take a chance. Mr. Staples has a record of 21 years' service. That it is a good one goes without saying; all who know him agree that he is one of the best ever. He first took employment with the Company as operator at Clarksburg in 1900, being promoted to dispatcher in 1901. His reward for hard work and good service came in January, 1920, when he was appointed chief dispatcher of the Charleston Division. It is with regret that we record that John is still a bachelor. However, while there's life there's hope, and noting carefully the good example set him by all of us around here, he may gather up courage to take the plunge one of these days. John is a product of old Virginia, "the finest State in the Union," he says. It sure is one of them anyway. We won't be as cruel as our friends were with the correspondent—we will not tell the year in which he was born.

Engineer J. C. Jordan, Sutton-Flatwoods mixed run, has recently returned from a trip to Key West. Asked what he thought of his trip over the Keys of the Flagler System, he remarked that it was very fine, but he felt more at home on his old 1205 on the Sutton Branch.

Captain of Police at Large, I. C. Kuhn, is at present in charge of the office at Weston, pending the arrival of our new captain, Mr. Earle.

In concluding our notes this month, we would like to call attention to a little clipping which has just come to our notice. Apply the suggestions set forth, in connection with our own division slogan, and the results will surely come. Unfortunately we cannot give credit where it is due, as we do not know the writer of the following lines:

"The successful man is the man who accomplishes the object for which he sets out. The secret of success in life is not a secret. Nor is it something hard to secure.

"To become successful, become more efficient. Do what you can do, and what you should do, and do it in the right and proper way. Let your aim ever be to better the work you are assigned to do, remembering above all things that you cannot better the work you are doing until you better yourself.

"You can make success sure by work, sacrifice, enthusiasm, unselfishness, self control and common sense."

COURTESY IS THE FOUNDATION OF EFFICIENCY.

recognizing the Irish republic and quite a bit of dissension. It has been suggested that the matter be left to the Transportation Department for decision by such men as Flanagan, O'Hornbach, MacWilhelm, Murphy, Burns, O'Movies, McVonBlon, MacMiller, O'Calvin and MacMorrison.

Some people are always starting things in this world. They have Fords, and—but what we started to say is, what happens to all arrangements made in the Transportation Department for hikes, bowling parties, dances, etc.? Is it because the single ones can't find time, or is it because the married ones can't get away?

Famous pairs in the Transportation Department:

Shoes, gloves, scissors, Clarence and Rose, "Jimmie" and Alice, Howard and Russell, "Ferdie" and "Drop," Calvin and Andrews.

Contributed by one of our messengers, "Whitie."

"Spille is a curly head,
He lives in Saylor Park,
He likes to stay out late and take
The girls home in the dark."

Into our Hall of Fame has stepped another champion. Peter Duffey claims to be the champion checker player on the Western Lines, having recently gained the title by defeating the world known checker players, "Pat" English and George Davis, both from Macon, Georgia.

Horace Ralph Bunton, age 19 months

Slim's Philosophy

Smile, darn it, it ain't goin to cost you nothin'.

Be a gentleman always, not only when somebody is lookin.

Be considerate; don't do others before they do you, but do to others as you would like them to return the compliment.

Always be on time; the early bird catches the worm.

If you have something to do, stick to it until it is finished.

Don't swear, it doesn't do any good anyway, and besides it sound like —

Don't be a grouch; "smile and the world smiles with you."

Don't brag about your ancestors; Adam is the only man who never had any.

If you are not afraid to work, nobody is going to be afraid to allow you to work.

Just because things don't go right is no reason why you should make everybody feel the same way about it.

Traffic Department

The accompanying picture is of Miss Gertrude Wehage, stenographer, General Superintendent's office. This picture was taken while she was leaving her limousine on the way to work in the morning. We must admit it is pretty soft for some people to be able to ride in machines of this sort

Miss Gertrude Wehage

when the majority of us are strap-hangers on the street cars.

The baby in the picture is Horace Ralph Bunton, 19-month-old son of Mr. and Mrs. F. O. Bunton. Mr. Bunton is assistant chief clerk, General Superintendent's office.

Freight Representative Terhune spent several days in St. Louis during January attending the twenty-ninth meeting of the National League of Commission Merchants, which was held in that city, and returned full of appreciation for the way he was treated by the traffic representatives at that point. He met quite a number of the important commission merchants from all parts of the country. This association will doubtless react to the benefit of the Baltimore and Ohio for "Terry's" congenial personality is a hard one to resist.

And then it happened:

"I wonder," began "Tom" Baker—

"You wonder what?" asked "Art" Aaman as he reached for a sponge cup.

"I was wondering how a *single* girl could ever lead a *double* life," replies "Tom" and headed for the door.

Blanche and Mary Evelyn Jennings

"I know he's no porcupine," says Clarence Tabeing, "but I've often seen Walter Bruestle."

We have been told that Miss Estelle Downing of the Industrial Agent's office is wearing a diamond engagement ring. The Freight Traffic Department extends its congratulations and best wishes.

"I don't believe in burglary,"

Said honest Mr. Long,

"But really I can see no harm

In breaking into song."

Everytime the moon changes the Traffic Department adopts a new fad. First it's baseball, then roller skating, and now it's bowling with every noon finding about 10 of the boys knockin' 'em dead on the Hotel Honing alleys. Several good bowlers have been uncovered and also several of the other variety.

The baseball season is almost here and within a very few weeks the boys of the Carew building will start practicing in an endeavor to duplicate their success of last season. Although getting away to a late start last year they were able to play six games and win them all, being compelled to close the season on account of an injury to Howard Justice of the Valuation Depart-

ment. Justice catches a game of ball the like of which is seldom seen in amateur or semi-pro games, and if he is not able to play this year his absence will be sorely felt.

Olive Tealen is happy. She says she has at last found a restaurant where she can dip her toast in her coffee.

Cincinnati Terminals

Correspondent, JOSEPH BEEL, *Chief Clerk to Superintendent of Terminals*

C. J. Schaefer, agent, Lockland, Ohio, and Miss Marguerite Detzel, clerk in his office, were married on February 3. After the ceremony Mr. and Mrs. Schaefer left for an extensive honeymoon through the south. Congratulations!

The accompanying photographs show two young beauties, the daughters of Robert J. Jennings, car distributor in the Superintendent's office. They are—Blanche, age five years, and Mary Evelyn, age three years. The twinkle in Mary Evelyn's eye leads us to believe that she will take after her daddy, while Blanche is a perfect beauty.

There is a rumor out that M. V. Guard, painter, Storrs, has received word from such a large number of applicants to be his better-half that it was necessary for him to put on an extra force to handle the correspondence. Have not heard of any final selection being made to date.

The exhibition of the motion picture entitled "Bulletin 70" was held at the Chamber of Commerce, Cincinnati, on February 9. A large attendance from Cincinnati spent an enjoyable evening. In addition to the picture, entertaining features were as follows:

Cornet Solo.....B. S. Jelleff
The "Safety" Magician...Arthur D. Gans
Reading.....Miss Marie McMorrow
Vocal Solo.....Miss Besse Hall
Fancy Dancing.....Miss Norma Holcraft
Duet (Trombone and Cornet)

J. Eken and B. S. Jelleff
Vocal Solo.....Miss Evelyn Ruggles

Contributing to the success of the evening was the fact that J. T. Broderick, superintendent, Safety Department, was among those present, giving an interesting talk on Safety, and J. B. Caruthers, representing Mr. Begien, who also made a short address. Many thanks are extended to C. E. Fish, chairman of the rally.

Makers of Bennett Homes

3060 Main Street

No. Tonawanda, N. Y.

Like other localities we have experienced a slowing up in business. However, we have a number of industries which are doing well, considering the general depression over the entire country. I call particular attention to one of our best and most loyal customers, the B. Manischewitz Company, the largest matzos bakers in the world. Fortunately their busy season comes at a time when there is a lull in other business. They expect this year to be the most successful in their history, due to the export business, which could not be handled during the war period to any great extent.

Their product is shipped to many foreign countries and is used during the Passover season. With the emigration to Palestine of many Jews from Europe, a steady demand for matzos will be felt and regular shipments are to be made hereafter. Just recently we had a carload to Jerusalem, Palestine, and a few days later the genial Mr. Blumenthal, of the Manischewitz Company, stepped in with one of their Philadelphia customers and left an order for 40 cars for immediate shipment. Matzos being a food stuff for religious purposes during the Passover season, it requires prompt and careful handling. The Philadelphia shipments are going forward and from reports received, are making good time. Seventy-five per cent. of their business is shipped in three months, February, March and April.

Through the hearty cooperation of every department of the Baltimore and Ohio Railroad in serving this industry, we have been able to give them first class service and have received in return a road haul on every car to date.

(Continued on page 58)

Though Physically Handicapped, Fireman Stultz Builds His Own Home

THE accomplishment of C. J. Stultz, fireman, Baltimore Division, during the last few months, is a notable one. For, despite the fact that he lost a foot while kicking a coupler about 14 years ago, and is thus physically handicapped, he has about completed an attractive little home at Landsdowne, Md., which he and his wife erected with practically no outside help.

Fireman Stultz, however, chose the easiest way. Instead of going to the expense of having plans drawn for his home, he bought his home, the many various parts already cut and already to be put into place, from one of the manufacturers of "ready-made" houses. In doing this, Mr. Stultz had these advantages over the man who has his house built on the contract system from his own plans.

In the first place, expecting to erect the house by his own labor, he knew almost to a penny just how much it was going to cost him before he started. Second, he knew that the material which he was getting was "A-1" in quality, because the manufacturers of these houses guarantee that the material supplied is the best obtainable. Third, he was able to save the cost of labor, when labor was high, because the hard part of the building of the house had been done for him and he had no heavy cutting and difficult fitting to do.

It seems almost unbelievable that a man with only one foot could do practically all the work necessary for the erection of even a "ready-made" house, yet Fireman Stultz

and his wife have done this even to the placing of the shingles on the peak roof, a ticklish job for even a trained workman. Fireman Stultz is not the only employee of the Baltimore and Ohio who has taken advantage of the "ready-made" house plan.

The manufacturers of these houses employ the best architects procurable and an examination of their catalogues show that the houses which they can supply and which range in price from a small to large costs, are the last word in perfection of detail, economy of space and beauty of finish and appearance.

We congratulate Fireman Stultz on his interesting achievement and hope that other employees may be helped to the ownership of homes through his sensible plan.

GEOGRAPHICALLY SPEAKING

Please mention our magazine when writing advertisers

They have shipped over 100 cars and we expect to get over 200 more. So let us continue to cooperate with each other for the best interests of our patrons, of the Baltimore and Ohio and ourselves. Let our slogan always be—Courtesy, Service, Cooperation, a combination that always wins for all; nothing else could be a bigger factor in restoring our business to the normal.

(Signed) W. C. O.

We now find out why our car writer, William Green, was absent from the repair track two days—it was on account of his daughter being initiated into the bonds of matrimony.

We wish to thank "Shorty" (William) Bingham and Oliver Johnson for the cigars which were received by the office force to celebrate the arrival of the stork at their homes. Be on the lookout, girls, when they grow up, providing they resemble their fathers.

The Storrs Repair Track can claim 100 per cent. in the way of injuries, as they haven't received any reports or had any injuries occurring in their territory this year. This, however, is a record for over two months, considering the territory, which is covered by our general car foreman, J. M. Burke.

Newark Division

Correspondents

W. E. LAIRD, *Chief Clerk*, Newark, Ohio
A. D. LIST, *Newark (Ohio) Shops*

Report Clerk—O. J. Payne has been absent from duty for some time and is obliged to get around on crutches, because of an aggravated injury to his knee.

C. A. Budd, recently employed in the general offices at Cincinnati, has accepted a position in the local Accounting Department.

We make bold to say that the Safety rally and entertainment held at Newark on January 28, in point of interest and attendance, was the most successful Safety event that has yet been featured here. The Auditorium theatre was filled to capacity early in the evening, and by the time the curtain was raised, many hundreds of people had been unable to gain admission. However, the overflow was directed to Knights of Pythias dance hall and enjoyably entertained by a boxing match, good music and dancing, with the latter pastime extended into the early morning hours. The entire program, rendered by Superintendent of Safety J. T. Broderick and his assistants, Messrs. Gans and Braden, as well as the

several numbers featured by local Baltimore and Ohio talent, was thoroughly enjoyed by everybody.

Columbus, Ohio, Terminal

On Saturday night, January 22, the employees here gave a farewell party for Mr. and Mrs. R. S. ("Colonel Highpockets") Dodds, Columbus Freight office. The guests numbered more than 100 and were confined to those employees with whom Mr. and Mrs. Dodds were in daily contact during their service with the Baltimore and Ohio at the local freight office. Mrs. Dodds, formerly Miss Maud Baker, and Mr. Dodds are leaving for Washington, D. C., where Mr. Dodds takes up his duties with Senator Willis.

A dinner dance was the feature of the evening, followed by toasts, presided over by our old friend, "Doc" Watson, of the Hocking Valley. Music was furnished by the famous symphony jazz artists of the Hocking Valley. Toasts were responded to by E. A. Furgeson, commercial freight agent; J. A. Johns, Division Accountant's office, Newark; E. D. Baldwin, local freight agent, and L. E. Miller, cashier, local office. A fountain pen was presented to Mr. Dodds, a symbol of the craft with which he has been affiliated, by J. T. Payne, who very touchingly conveyed the sentiments of all of Mr. Dodds' fellow employees. Mr. and Mrs. Dodds responded graciously to the toasts. The employees of the Company are highly elated that they have had the opportunity of expressing their appreciation of Mr. Willis' choice in selecting Mr. Dodds for his direct and personal service.

To Cashier L. E. Miller we extend sincere sympathy because of the recent death of his father.

Misses Hazel Cashner, Edith Roach, Kate Funke and Marie Brink, all employed in the local freight office, have, according to recent advice, taken up "domestic science." This has a serious angle to it, and we very naturally offer the warning: "Watch out, boys!"

"Grammer" Burgett, claim clerk, says his farm at Grove City will be a "chicken and berry" farm this summer. He is taking some chances in making this kind of an announcement.

New Castle Division

Correspondent, J. A. JACKSON

Neshannock Hall was packed to overflowing on January 26, on the occasion of the Safety Rally and entertainment, held under the direction of J. T. Broderick, superintendent of Safety. An excellent musical and vocal program was rendered by various employees at New Castle Junction, and each number met with rounds of applause.

Superintendent D. F. Stevens introduced Mr. Broderick, who gave an interesting talk on the vital importance of the practice of Safety as pertaining to the happiness and welfare of the employees and their families. After this "Bulletin 70," the greatest motion picture on Safety ever made, was shown on the screen. Dancing was the concluding feature of the evening's program, and the Hammond-Fishburn Orchestra rendered a special program of the latest dance hits. It was the greatest gathering of Baltimore and Ohio employees and their families ever held on the New Castle Division.

J. A. Phelps, chief dispatcher, New Castle Junction, is back on the job again, having recovered from a month's serious illness. "Jay" is one of those fellows whose friendship is an asset to those who know him, and

Assistant Boiler Foreman D. E. Sturdevant and Boiler Foreman G. T. Jones

a host of friends will be glad to know that he is enjoying good health again.

The accompanying photograph shows D. E. Sturdevant, assistant boiler foreman, left, and G. J. Jones, boiler foreman, right, New Castle Junction Shops. "Denny" is numbered among the expert duckpin bowlers in New Castle, while G. J. is an avowed chicken fancier (not the kind you mean). We're anxiously awaiting an invitation to one of those famous Jones' chicken dinners. It's up to you, George.

Our basketball team is numbered among the leading teams in the City League, and while no predictions are being made as to winning the pennant, our team can be expected to finish well up in the standing when the race closes on March 28.

"Walt" McGonigle, genial messenger, Master Mechanic's office, is back on the job again after an illness of a week. Nicholson said he drank too much red lemonade at the Safety Rally.

Miss Ethel Thomas, fuel clerk, Superintendent's office, New Castle Junction, has been transferred to car record clerk, Terminal Trainmaster's office. She took her cute little smile with her and we miss them both.

In one of the most interesting basketball games ever witnessed on the "Y" floor in New Castle, our team defeated the fast Keystone Five by the close score of 20 to 19. An extra period of play was necessary to decide the winner, as both teams were tied at the end of the last half. It looked as though there would be no scoring in the extra period either, but Captain Claire Kocher put the enemy to rout when he caged a field goal just as the whistle blew, and another victory was tucked away for the railroaders.

Cleveland Division

Correspondents

A. F. BECKER, *Secretary to Superintendent*, Cleveland, Ohio
AMY A. FORD, *Clerk to Pilot Engineer*, 621 Sloan Building, Cleveland, Ohio
E. L. MILLER, *Chief Clerk to Division Freight Agent*, Akron, Ohio.
H. B. SMITH, *Supervising Agent*, Cleveland, Ohio
W. E. BRUGH, *Clerk to Trainmaster*, Massillon, Ohio

Sleepless nights and busy days do not change the smiling countenance of Captain T. L. Rowe since the arrival of a 10-pound girl on February 6. Congratulations!

Claim Adjuster Stultz continues to follow from town to town the famous photo-play, "TO PLEASE ONE WOMAN." Suggestions are cheerfully received as unproductive leap years continue to pass.

On December 23, Miss Mabel Whitsman of Aultman, Ohio, became the happy bride of Cashier C. L. Williams at Uhrichsville. Needless to say, all future arrangements will be handled by Mrs. Williams.

Advice has just been received from Chicago that H. Hercules Reum was elaborately dined by old friends on the evening

Miss Mary Ganey
Clerk, Division Accountant's office, captured by some of the male contingent of that office and held in front of the "camera man"

before his departure. The cigars served were a rare Havana brand, carefully wrapped; however, he remarked that the smoke of the paper spoiled the flavor. "Not enough Turkish."

Shortage of gas in Lakewood and the improvised heating system adopted by Clain Agent Maisch for the cold winter nights has resulted in many restless nights. Taking to bed a large jug of hot water is a blow at the high cost of fuel, but, George, why worry all night about the cork coming out?

Supervising Agent Smith reports the earnest cooperation of all local crews and station forces in the endeavor to cut loss and damage in half—in 1921.

Unknown talent has been discovered for future Welfare entertainments. A special ear was provided for employees from Cleveland attending the recent Safety Rally at Lorain. A. F. Becker, secretary to superintendent, gave some very pleasing solo selections on the return trip, while Chief Clerk Fluek did some artistic dancing, including the "Shimmy." The date of the next performance will be announced later.

Akron

The accompanying photograph was resur-rected, no one knows how or where. Nevertheless Miss Catherine O'Toole, post-ing elerk, has a wonderful disposition, ex-cept when someone forgets and calls her "Katty." This photograph was taken when Miss O'Toole was enjoying the sunshine on her vacation.

On February 8, in the home of Yard-master O. P. Eichelberger, the marriage of Miss Gertrude Botler and Luther W. Bechtol, chief clerk to the terminal trainmaster, was solemnized. After a honeymoon in the East, Mr. and Mrs. Bechtol will be at home to their friends at 146 Grand Avenue, Akron. Mr. Bechtol is one of our most popular employees and we all join in wishing them happiness.

We are glad to welcome to our midst W. H. Winkler, as agent at our South Akron Station. Mr. Winkler comes from Sandy-ville. He is a live wire, is making a big hit in South Akron and we are delighted to have him with us.

About 300 of the Akron employees en-joyed very much the hospitality of the Cleveland Welfare League at the Division Safety Rally held in the Winton Hotel, Cleveland. The Company very kindly pro-vided a special train and we had a real jazz orechestra with us on the trip. We all had a wonderful time and hope that we will be able to reciprocate with our Cleveland friends by having them as our guests soon.

Miss Katherine O'Toole, posting clerk

The basketball team journeyed to Wil-lard, accompanied by a special car of loyal Akron rooters, to play the strong Baltimore and Ohio team of that city. Because of an accident to "Pinky" Boyd, in which his arm was dislocated, the team was seriously crippled and met defeat. However, Man-ager Ballard assures us that we will re-deem our good name at New Castle soon. The usual special car of rooters from Akron will accompany the ball team to New Castle.

Dover

Conductor W. F. Stapleton has returned to work after spending several weeks in Canada.

Night Yardmaster M. Reidy is back at work again. He was laid up with an attack of stomach trouble.

Yard Clerk "Tom" Adams was a little humiliated the other night. He took a girl friend to "Bringing up Father" at the Seashore and had a box seat. During the show one of the chorus girls took a liking to him for a few minutes, and made things a little uncertain for his best friend.

Friends and employees around Dover express their sympathy to Yard Conductor L. C. Kail, whose father passed away on January 25. A floral remembrance was sent to the bereaved family.

"The proudest moment of our lives had come!"

"It was our own home! There were two glistening tears in Mary's eyes, yet a smile was on her lips. I knew what she was thinking.

"Five years before we had started bravely out together. The first month had taught us the old, old lesson that two cannot live as cheaply as one. I had left school in the grades to go to work and my all too thin pay envelope was a weekly reminder of my lack of training. In a year Betty came—three mouths to feed now. Meanwhile living costs were soaring. Only my salary and I were standing still.

"Then one night Mary came to me. 'Jim,' she said, 'Why don't you go to school again—right here at home? You can put in an hour or two after supper each night while I sew. Learn to do some one thing. You'll make good—I know you will.'

"Well, we talked it over and that very night I wrote to Scranton. A few days later I had taken up a course in the work I was in. It was surprising how rapidly the mysteries of our business became clear to me—took on a new fascination. In a little while an opening came. I was ready for it and was promoted—with an increase. Then I was advanced again. There was money enough to even lay a little aside. So it went.

"And now the fondest dream of all has come true. We have a real home of our own with the little comforts and luxuries Mary had always longed for, a little place, as she says, that 'Betty can be proud to grow up in.'

"I look back now in pity at those first blind stumbling years. Each evening after supper the doors of opportunity had swung wide and I had passed them by. How grateful I am that Mary helped me to see that night the golden hours that lay within."

In city, town and country all over America there are men with happy families and prosperous homes because they let the International Correspondence Schools come to them in the hours after supper and prepare them for bigger work at better pay. More than two million men and women in the last 25 years have advanced themselves through spare time study with the I. C. S. Over one hundred thousand right now are turning their evenings to profit. Hundreds are starting every day.

You, too, can have the position you want in the work you like best. You can have a salary that will give your family the kind of a home, the comforts, the little luxuries that you would like them to have. Yes, you can! No matter what your age, your occupation, or your means—you can do it!

All we ask is the chance to prove it. That's fair, isn't it? Then mark and mail this coupon. There's no obligation and not a penny of cost. But it may be the most important step you ever took in your life.

Canadians may send this coupon to International Correspondence Schools Canadian, Ltd., Montreal, Canada

Conductor F. J. Rericha, who formerly worked out of Dover, paid us a visit last Sunday. Frank is now on 88 and 89 out of Cleveland to Valley Junction.

Yard Clerk "Tom" Adams is taking a trip to Salinas, Cal. "Tom" has relatives out there, and possibly will try to tie up with one of those movie stars. Can you beat it?

Trainmaster J. Fitzgerald undertook the task of making some conductors of our brakemen. He succeeded fairly well. Brakemen Sherman Naylor, John Stevenson, Charles Powell and A. A. Newland from Dover, and Brakemen G. H. Brugh, W. H. Heyer, G. R. Murray and F. C. Cline were promoted to conductors on January 30. We wish them success in their new duties.

Miss Mabel M. Intermill, cash clerk, Dover Freight House, contemplates a trip to Pittsburgh. She says it is for shopping only. However, on seeing her solitaire, we believe otherwise.

H. P. Lohrman, warehouseman, Dover Freight House, resigned on February 8 to enter Ohio State University. We did not like to lose Mr. Lohrman, and trust that after he has completed his studies he will return to the Baltimore and Ohio.

Massillon

E. Polen, roundhouse foreman, has returned to duty again. Mr. Polen was off for several weeks because of an attack of smallpox. Glad you are fully recovered, Mr. Polen.

J. T. Sidaway, bridge inspector, has taken a trip to Florida. We would all like to go along with you "Tom."

N. B. Zisimos, section foreman, Massillon, has returned to his "old country."

Many of the Baltimore and Ohio employees and their families of Massillon and Dover went to Lorain on February 1 on the special train to see the rally and entertainment. All had a good time and plenty of fun.

P. M. Carpenter and F. C. Bumgarner have been assigned to extra passenger work out of Cleveland as brakeman and baggage-man.

Chicago Terminal

Correspondent, THOMAS H. WILLIAMS

An interesting evening was enjoyed by all who attended our Safety Rally, held in the White City Casino on February 4. The attendance exceeded one thousand people, all our employees and their families. The entertainment, furnished by home talent, proved as enjoyable as that rendered by professionals. Those of our family who took part were: A. D. Gans, safety magician; Miss Virginia Ratcliff, daughter of Mrs. B. Ratcliff, stenographer, General Superintendent's office; Clarence Seifert and sister, son and daughter of Signal Supervisor C. O. Seifert; Locomotive Engineer and Mrs. E. B. Oliver, and Miss Yvonne DeVeney, daughter of Trainmaster F. S. DeVeney.

The entertainment was followed by a Safety talk by D. M. Julian, car foreman, and an interesting address by J. T. Broderick, superintendent of Safety. After the motion picture, "Bulletin 70," was displayed, the chairs were moved to one side and a large number of those present enjoyed the dancing.

The rally was full of goodfellowship from the first click of the castanets to the final chorus. Great credit is due Superin-

Girls from Stores Department and Master Mechanic's office, Chicago Terminal

tendent J. L. Nichols for the efficient way in which he conducted the rally, and we know that everyone left with a clearer understanding of just what "Safety First" means.

Locomotive Engineer John Latchaw was seriously injured over a year ago to such an extent that it was thought he would lose his foot, but he positively objected to the amputation and gamely fought the battle that finally put him in condition to return to work with his foot almost as good as ever. We are all glad to see him back in the harness.

We regret losing our accountant, A. J. Ireland. "Al" goes to the Police Department in the Bureau of Records. Good luck!

Yes! The Stores' Bowling Team is *still* in the cellar—not a bad location either, eh?

Frank Ruth, of the Car Accountant's bowling team, recently came within a few pins of equalling high average. Keep it up, Frank, better luck next time.

Our heartfelt sympathy is extended to Henry Burg of the disbursement division of the Accounting Department in the loss of his mother.

Those infernal thought waves of procrastination are mental "bugs" that have a brilliant headlight in front and long sharp "stinger" behind. With a little encouragement they breed by the millions and inject their poison into the mind of man only to hinder his happiness and success. Earnest work is the only antidote that will exterminate these pests. One good lick of work is worth 10,000 wishes in striving for success. The whole world respects a good worker. Work is the great conqueror—our one best friend and the foundation stone of all successes. There never was a time when concentrated efforts and diligence were not rewarded by a just measure of attainment—and there never will be.

The Accounting Department Team is now tied for first place in the Bowling League. Watch them get a strangle hold on first place.

The C. B. & Q. employees are having a Claim Prevention Campaign, the slogan being "Prevent a claim a day." There is not a department in the organization of the Railroad that cannot be of assistance in prevention of claims. Let's go the "Q" one better and make it two a day for a starter and see how easy it really is.

Nature plays no favorites in apportioning her daytime. The sun rises at the appointed hour for all alike and thus gives every man an equal start with his fellow workers. There may be some who appear to reach their heights without taking advantage of that equal start, but they are the exceptions to the rule and make poor examples by which to gauge our efforts. Time is divided into past, present and future—with the future steadily shifting over to the past like the hands of a clock, and when it passes the ever present is the time to think, act and work—making every minute of the present count to insure the pleasant vision of a successful past.

H. J. Weber, demurrage adjuster, Accounting Department, while in a restaurant the other day, casually looked to the floor and was greeted with the sight of a paper resembling a gum wrapper. Not wishing to attract undue attention he accidentally dropped his "bill folder" near the object of his gaze and in picking up the folder also picked up the "wrapper," which he found to be a \$5.00 bill. Just like Weber, he immediately handed it over to the "Far East Campaign."

Elmer Kremsky is back on the job after having been confined at home by illness.

Miss Rose Glover reports the death of one of her baby nieces. The other one is well and we hope that she may in a measure appease the grief of the bereaved ones.

Charles Johnson, chief clerk, Freight Claims and Receipts, has had a disfigured face from the effects of an abscessed tooth. He says it's funny to everyone but himself.

Engineer Wordelman, who was injured on January 21 by falling off running board of an engine, is in St. Francis Hospital. The last report received was that he is getting along nicely. We wish him a speedy recovery.

N. T. Paarlberg, agent, Barr Yard, has just returned from a week's trip to Denver. General Yardmaster Anderson has issued instructions that his trip is not to be discussed during working hours. "Nuff sed."

Frank Flassig, car repairer, has sent his wife to the country. We wonder why.

We know a certain young lady who will positively not have anything to do with a young man who drives a Ford. Reasons: While "Andy" Gump, with the best of intentions, was trying to show her an enjoyable evening, he drove her out 12 miles in the country. Suddenly "Henry" balked and it took "Andy" one hour and forty-five minutes to persuade him to go. The last "Andy" saw of the young lady she was walking back to the city with her head high.

The figures given below reveal in a startling way the amount which accidents cost our Terminal Railroad for two months last year:

	SEPTEMBER	DECEMBER
Track.....	\$3831.52	\$1812.24
Equipment.....	4551.69	3655.22
Contents.....	631.35	502.00
Wrecking.....	139.00
Total.....	\$9014.56	\$6108.46

The causes are classified and show decreases, but it is estimated that with a little more care and efficiency this should be cut at least 75 per cent. more. A study of these figures indicates that we are still in need of more education in regard to preventing accidents. It must be realized that damage occurring through accidents, represents a total loss. Are you doing your part to reduce accidents?

Who said the Irish were superstitious? The Safety Rally was held on *Friday* and "Ed" Ryan, one of the distinguished ushers, just couldn't keep away from Post 13. Who was she, "Ed"?

The accompanying picture shows why the offices of the Stores Department and Master Mechanic at East Chicago are always radiant with sunshine, no matter how gloomy the day. The girls are: Margaret English, Bartie Stewart, Marguerite Craick, Cora Scholl, Frances Wahl and Hattie Arnold.

Chicago Division

Correspondents

F. N. SCHULTZ, *Division Operator*, Garrett, Ind.

ESTHER J. SPREENBERG, *Clerk*, South Chicago
MARGARET GALLOWAY, *Assistant Shop Clerk*, Garrett, Ind.

R. R. JENKINS, *Secretary*, Y. M. C. A., Willard, Ohio

P. H. CARROLL, *Signal Supervisor*, Garrett, Ind.

W. C. ADDY, Willard, Ohio

FLORENCE E. SMITH, *Freight Office*, Chicago

The accompanying photograph is of a part of the force in the Superintendent's office at Garrett.

They are, left to right: Back row—Misses Gertrude Crow, Frances Stack, Marguerite Roan, Mary Madden, Margaret Hammers, Nordica McCullough. Second row—Helen Loomis, Jeune Milholland, Vesta Marvin, Dorothy Brinkman. Third row—Georgia Imler, Clarice Horn, Leoria Trimble, Cleatus McKinley, Vera Coffing, Selma Grischke, Elsie Rang, Madolin Scisinger.

Garrett

Supervisor Clark, who received the prize for the best sub-division on the Chicago Division, gave his firemen a turkey dinner, and after dinner took them to the picture show and had three special reels run off for them.

Willard

B. L. Prince, Willard Police Department, was transferred to Cincinnati on February 5. He has purchased a home in East Norwood, Ohio, so that he will be close to his work.

Harry Guydenberger, former night roundhouse foreman, has been transferred to Washington, Indiana, to take charge of the machine shop there.

Mr. Hirsch, Garrett, Indiana, has been transferred to Willard, vice Mr. Rumbaugh, who takes Mr. Heinlein's place. Mr. Heinlein is now chief rider on eastbound hump.

"Johnny" Karr has decided to take up preaching for the benefit of unsatisfactory brakemen.

Engineer John Shearer has been off duty since the first of November because of illness. We wish him a speedy recovery.

A new turntable will be installed at the roundhouse soon after the first of April. The new one will be much larger than the old. Two new water tanks have also been installed at the foot of the coal chute. This will be a great advantage in watering engines before going on the cinder pit.

"The Air Car," a lecture, held in Willard from February 6 to 26, inclusive, was attended by many firemen, engineers and trainmen.

Fireman Viers has returned to his duties in Fostoria after having been absent for two months.

South Chicago

On January 22, the Veteran Employees' Association held its meeting and banquet at Garrett, Ind. Six of South Chicago's "Old Reliables" attended. They are: "Bill" Oburn, Charles Maley, Hugh Lee, Karey Pence, "Bill" Frame and Frank Johnson. They had a very enjoyable time.

Congratulations, "Cass"! So that's the news! (Note: Catherine Donnelly and Thomas McArdle were married on Thursday, January 20, at St. Bride's Church.) We wish you both much happiness.

Someone at South Chicago tells me that they encountered George Maypole at dinner at the Terrace Gardens and wish to know if "Somebody's Uncle" left a "small fortune." Who was the "gentleman" with you?

Our bill clerk, Miss Ethel Poole, is still off duty because of her injury. She is able to be about on crutches, but it will probably be some time before she is with us again. We are all with you, "Poolie."

Ohio Division

Correspondent, A. E. ERICH, *Secretary to Superintendent*

Can any one beat this? Harold Barnhart, clerk, in General Car Foreman's office, states he visited his uncle on Christmas Day and partook of a delicious dinner; he weighed himself before eating and found his correct weight to be 169 pounds, but after eating and getting on the same scales they tipped 174 pounds. Still he said he was not VERY hungry when he started to eat.

We are advised that the stork visited the home of Time Clerk Clarence Steel on

Brakeman F. R. Rice

January 9 and left there a baby girl. "Red" had the usual happy smile. Congratulations!

E. H. Fisher has been appointed general yardmaster, Chillicothe, in place of O. E. West, promoted to general yardmaster, East St. Louis. We wish both of these men continued success in their new positions.

It is with regret that we report that Thomas F. McGrath, brakeman, had his right foot mashed at Greenfield while switching train 86 on January 18. After pulling car off coach track he started to climb between cars, his foot slipped and he went between draw head and dead wood. His foot was crushed so that it became necessary to amputate a part of it. We are glad to announce, however, that he is getting along nicely.

Engineer C. L. Schwarzler recently surprised himself and his friends by becoming a benedict. He was "treated" a few days later to a mighty fine "calf wagon" ride about the principal streets of Chillicothe by his friends. We all congratulate you, "Charlie," and wish you much happiness.

We extend to Dispatcher W. W. Woodward our sincerest sympathies in the loss of his wife, who died January 23.

Fireman W. R. Dean, who recently underwent an operation for appendicitis, has recovered and is back on the job.

It is with regret that we announce the death of the wife of Brakeman P. R. Cotner on January 23. Our sincere sympathy is extended.

One of the time clerks, Division Accountant's office, has been noticed making all speed possible toward the freight house office, lurking nearby at about 5.05 p. m. Together with this and the tell-tale solitaire on a certain young lady's finger (which was mentioned previously) the forthcoming item for the MAGAZINE (also mentioned) will be delayed but a short time.

The following item appeared in the Columbus *Dispatch*, under date of January 16. "The engagement of Miss Mildred Woods, 266 South Ogden Avenue, to Mr. E. Zenner Taylor, 360 Marshall Avenue, is announced today." This article was accompanied by a picture of the bride and groom to be. Mr. Taylor is a brakeman on the "Midland Local" on the Ohio Division, and we congratulate him.

The following unusual letter was received by Joint Ticket Agent E. F. W. Kemmerer, at Chillicothe. "Enclose find 25 cents due you on half fare ticket or instead of half fare." (Signed)—From a "Conscience." Letter was post-marked Piketon, Ohio, and evidently was from someone who had only paid half-fare for a child who should have paid full fare.

Some of the girls in the Superintendent's office at Garrett

Helena Marie, daughter of LeRoy A. France, clerk, Superintendent's office

We extend to Division Operator G. W. Plumley our sincere sympathy in the loss of his daughter, who died in Albuquerque, N. M., on January 29.

We are sorry to report that Engineer J. Sulzer was seriously injured on January 21 while oiling front engine trucks, just previous to starting on his run. Sheet iron cover fell, striking him on back of head. We hope for his speedy recovery.

Freight Claim Prevention meetings, held on the second Friday of each month, are being well attended, and we feel that this committee is doing much to avoid freight claims. Any employee interested is always welcome at these meetings. Help cut loss and damage, thereby cutting freight claims

Good Railroading means More Car Miles. More Car Miles mean less pounds of coal per gross ton mile. Practice Good Railroading.

Indiana Division

Correspondent, H. S. ADAMS, *Chief Clerk to Superintendent*

An illustrated lecture on the safe transportation of explosives and other dangerous articles was given in the Scottish Rite Cathedral, Louisville, Ky., on December 16, by a representative of the Bureau of Explosives, and was largely attended by employees.

The Freight Claim Prevention Committee held a meeting in the assembly room at Seymour on January 18. The manual of procedure for freight claim prevention meetings is just being distributed, which we hope

The late Patrick Clark, Ohio Division, whose obituary appeared in the February issue of the Magazine

will add to the enthusiasm that has already been manifested in these meetings.

On January 19, at St. Patrick's Church of Louisville, Ky., the wedding of Miss Rosella Keenan, daughter of Mr. and Mrs. Thomas J. Keenan, to Charles J. Seibel, Accounting Department, Louisville Local Freight office, took place, after which an elaborate wedding breakfast was served at the Louisville Hotel for near relatives and friends. They visited Cincinnati and Cleveland on their honeymoon. All extend best wishes.

On January 30, at the Methodist parsonage, Miss Pearl Krewell and L. F. Ackerman, of our Dispatcher's office, were united in marriage. Mr. and Mrs. Ackerman left immediately after the ceremony for Louisville and other points of interest. Congratulations and best wishes.

Deepest sympathy is extended to Brake-man and Mrs. Clyde Raeburn in the loss of their infant son, who recently died of diphtheria.

The accompanying photograph is of the rear of engine 197 and crew, Bedford Branch. The men, left to right, are as follows: "Tom" Murray, brakeman; Windom Goss, fireman; C. H. Frey, engineer; F. S. Gilbert, conductor; J. C. Purkhiser, brakeman.

Illinois Division

Correspondent, OMER T. GOFF, *Secretary to Superintendent*

Patrick Shannon, veteran employee, was born in County Roscommon, Ireland, March 17, 1852, and passed away at his home in this city on December 15, 1920, at the age of 69 years.

The deceased came to this country with his mother at the age of eight years, when his parents located in Lebanon, his father having arrived here several months prior to their coming. When a young man he secured employment with the Ohio and Mississippi Railroad, now the Baltimore and Ohio, and served for more than 40 years at this work until the company saw fit to place him upon the retired list with a pension in 1917.

He was married in Lebanon on July 3, 1872, to Miss Catherine Fannon.

Mr. Shannon had been in excellent health until a few weeks before his death, which was a complete shock to his many friends. Although he never took part in city affairs he was known to most everyone as a highly respected citizen.

He is survived by four children, namely, Police Commissioner John Shannon; Mrs. J. J. Whalen of East St. Louis; James and Elizabeth of this city; three grandchildren and one brother, Peter Shannon of Chariton, Iowa.

Funeral services were held on December 17, from St. Joseph's Church, of which he was a faithful member.

Office of General Freight Agent, St. Louis, Mo.

Correspondent, FRANCIS PIGLOSKY

Extensive investigation to ascertain the cause of recent misfortunes of our bowling team has developed that a certain member of the team appears to be very prosperous. However, this matter has been corrected. Complaint also has been made that a pendulum motion of "Tenacious Tony" and "Angel" Haack has somewhat unnerved the members of our team to such an extent that they had to be reminded in order that the balance could do themselves justice.

Arrangements have been made with the management of the alleys to leave at least four alleys between lady bowlers and our

Bedford crew

team. This matter has been taken at the request of "Terrific Turgeon."

Miss Frances wants to know if there are any candy shops in Kansas City.

W. F. B.: Do you know Miss Fox?
"Al": I know Fox, the tailor.

East Dayton, Ohio

Correspondent, EDWARD MANNIX

The spirit of economy which has ever been prevalent in our shops and roundhouse is strongly asserting itself at the present time and it is pleasing to note that Master Mechanic A. E. McMillan and General Foreman W. A. Gilmore have made good records in this respect.

Miss Anna Jackson, general record clerk, Store Room Department, has been confined to her home for the past few weeks because of illness. Last reports show that she is convalescing nicely and will soon be able to be back at the old stand. Our best wishes are that this prophecy will come true.

On February 10, "Bulletin 70," the Safety motion picture, was shown in our city at the Y. M. C. A. Despite the inclement weather of rain, hail, sleet and snow, the hall was packed to its capacity. The picture in itself was the most educational of its kind ever shown in our city, and those who were fortunate enough to secure admittance will never forget it.

The late Patrick Shannon

city, we
Safety taught us what to be remembered.

The accompanying picture of the Stores Department Lumber Yard Crew at East Dayton shows William Cunningham, fore-

Lumber Yard gang

man; George Marron, James Anderson, Harry Appenzeller and William Martin.

The accompanying photograph is of Johnson's Station. The building here was torn down when the fill was put in for the cut-off, which was built when the Miami Conservancy started erection of the dam at Taylorsville.

The accompanying photograph is of our 100 per cent. Safety crew. During the recent No-Accident Campaign, these boys had not a single accident to report. They are, left to right: Charles Posell, seal clerk; Walter Reed, fireman; "Jack" Stevens, engineer; Alonzo Stephenson, conductor; Charles Lease, brakeman; James Putman, brakeman.

In Defense of Kentucky Boys

In a note about "Hice" Laughlin, superintendent of Kentucky District, that recently appeared in the MAGAZINE, it was stated:

"When the outlaw strike was on, not so long ago, he acted as conductor on the up and down passenger train, and stood ready to act in any capacity that was required."

Fearing a misinterpretation of the note an employe sends us the following:

PITTSBURGH, PA., January 7, 1921
EDITOR, BALTIMORE AND OHIO MAGAZINE,
Baltimore, Md.

Sir—Please allow me to register a kick in regard to the attached clipping from

Mr. Laughlin as conductor. Well, here is the reason: The passenger

Left to right: Miss M. Baude, ore clerk; A. Zink, chief engineer, coal machine; Miss M. Keurth, stenographer

conductor, J. M. Moore, and Engineer Burpo, together with 12 brakemen, volun-

A Doctor Who Takes His Own Medicine

Dr. Frank Dorsey, medical examiner of the Relief Department at New Castle, Pa., entered the service on July 30, 1906. He has always taken an unusual personal interest in the well-being of our employes, and is a favorite among our people on the New Castle Division.

Soon after coming into the service, Dr. Dorsey recognized the great value of the Savings Feature of the Relief Department, particularly the opportunity it offers employes to secure their own homes in an economical and convenient way. Hence, during his entire career with the Railroad, he has urged those

HOME OF DR. FRANK DORSEY, MEDICAL EXAMINER, NEW CASTLE, PA.

employes with whom he has been associated, to secure homes for themselves through the Relief Department. And when the opportunity offered, he seized it, and, practicing what he preached, started to become a home owner through this easy plan. Now, both he and his family are proud of the attractive home pictured on this page, where they live in comfort and contentment.

They, like thousands of other Baltimore and Ohio employes, do not have to worry about the monthly visit of the rent collector, because they made the wise decision to let the Relief Department help them secure their homes.

Do you know what an easy and economical plan the Relief Department has to offer you? If not, don't delay but write now for full particulars to

OLD KENTUCKY HOMESPUN TOBACCO

Cream of the Finest Crops Direct to You

RIPE, RICH, OLD-FASHION LEAF

FAMOUS OLD KENTUCKY HOMESPUN is no more like the manufactured tobacco than day is like night—free from chemicals and all other adulterations that undermine the health, that conceal imperfections and delude the sense of taste. Grown and nurtured in Kentucky's finest soil, cut at the proper time, carefully selected, aged and mellowed for chewing and smoking. Like old wine in the cellar, its rich, rare fragrance permeates the air. Cured and "sweated" by the same method as employed in the early days, the method our grandfathers used in preparing tobacco for their own use—every trace of harshness leaves it—nothing to "bite" your tongue or parch your mouth; nothing to tire your taste. No fancy packages, no decorations—just QUALITY and lots of it. Throughout the country—North, East, South and West, men have tested this fine old tobacco and spread the news of its inimitable quality.

Grown right here in the greatest tobacco producing district in the world. We bank on it you have never tasted a finer flavored, more satisfying tobacco in all your life. Give the old "cob" a treat—"load 'er" up to the brim. Cut off a "hunk" as big as your fist and slip it between your teeth. Smoke or chew it will give you the keenest joy since the days of Old Bourbon.

"I have used the best tobacco they have in Canada, England and Ireland, but have never tasted any as good as your Old Kentucky Homespun."—J. P. O'Connor, Gold Beach, Oregon.

"I am a retired physician, 82 years old. Have used tobacco ever since I can remember. I chew but do not smoke. None gives me such satisfaction as Old Kentucky Homespun Leaf Tobacco. It is not only the most pleasant and agreeable but goes farther than any other kind and produces no ill effects."—S. S. Sutton, Kirby, Ark.

"Your tobacco is everything a person can desire. Even my wife enjoys its pleasant aroma in the house."—A. C. Evering, Grand Center, Ia.

"The tobacco came in good shape and I like it fine. Have been imposed upon long enough by the makers of high priced, doped up trash called tobacco."—C. L. Gates, Morrisville, Vt.

Send No Money

We Pay All Charges!

Old Kentucky Homespun in the Natural Leaf as We Ship It.

Mellow as Moonlight—Fragrant as the Rose.

REDUCE YOUR TOBACCO BILL 75%

We are growers of tobacco and sell none but our own crops, therefore exempt from all revenue tax. We pool our crops, placing them in our warehouses and share equally all the expenses of conducting our business, thus our expenses are reduced to a minimum. This co-operative marketing plan eliminates all middlemen; you deal directly with the growers, thereby effecting a saving to you of 75 per cent or more.

Read These Money Saving Prices. We Pay Postage
5 Pounds, \$2.98 10 Pounds, \$5.85 20 Pounds, \$11.40

5 pounds of our tobacco will make 55 sacks of smoking, or 65 chewing or smoking twists.

With each order we include complete instructions (profusely illustrated) showing how we Kentuckians make the old-fashion chewing and smoking twist, granulated, smoking etc.

Which do you prefer? The high-priced manufactured tobacco that has been adulterated, sweetened, chemically treated, or otherwise "doped" in order to minimize the amount of real tobacco used, or do you want the Old-Fashion Kentucky Homespun that brings to you the cream of Kentucky's famous harvest in all its goodness.

SEND NO MONEY

Pay only the price above when tobacco arrives. **TRY THE TOBACCO 10 DAYS** and if it doesn't please you—if it doesn't suit your taste—if it doesn't save you money—back it comes and every cent of your money will be returned without quibble or question. **You Risk Nothing.** Sign and mail the coupon today and enjoy the tobacco treat of your life.

Another Dry Vote

"A burnt child dreads the fire," announced the teacher during the lesson in proverbs. "Now, give me a sentence different in wording but meaning the same thing."

A grimy hand shot up from the back of the class.

"Please, teacher," came a small voice. "A washed child dreads the water."—*Blighty* (London).

Misunderstood

He—Margaret, there has been something trembling on my lips for months and months.

She—Yes, so I see. Why don't you shave it off?—*Exchange*.

A red-headed Irish soldier thrust his head out of a passenger coach and excitedly cried, "A woman has fainted here! Has anyone a drink of whiskey?"

A man in the crowd handed up a pocket flask, and the soldier took a long swig.

"Thanks," he said, smacking his lips. "It always did make me nervous to see a woman faint."—*American Legion*.

Misunderstood

Proprietor—Do you drink?

Applicant for Job—Thank you, sir. I'll have a small one.—*Judge*.

On a Returnable Basis

Mr. Sophie—"Well, Willie, your sister has given herself to me for a Christmas present. What do you think of that?"

Willie—"That's what she did for Mr. Bunker last year, and he had her back before Easter. I expect you'll do the same."—*London Tit-Bits*.

An officer on board a warship was drilling his men. "I want every man to lie on his back, put his legs in the air, and move them as if he were riding a bicycle," he explained. "Now begin."

After a short effort one of the men stopped.

"Why have you stopped, Murphy?" asked the officer.

"If ye plaze, sir," was the answer, "O'im coasting."—*Case Eagle*.

Clever Sandy

The "kirk" was in urgent need of repair, and Sandy McNab, a very popular member, had been invited to collect subscriptions for the purpose.

One day the minister met Sandy walking irresolutely along the road. The good man at once guessed the cause.

"Sandy," he said, "I'm sorry to see ye in this state."

"Ah, weel, it's for the good o' the cause," replied the delinquent, happily. "Ye see, meenister, it's a' through these subscriptions. I've been down the glen collectin' fun's an' at every house they made me take a wee drappie."

"Every house! But—But, surely Sandy there are some of the kirk members who are teetotalers?"

"Aye, there are; but I wrote tae those!"—*Pittsburgh Sun*.

You Need These Books

PRETTY soon you will be called up to take your examination and you will have to face a lot of hard questions. Better brush up a little. Our books contain every question with its answer you are likely to be asked by the examiner. They are the only complete railway books issued giving up-to-date, reliable information. Don't put off until examination day comes, but send for the following books at once:

Westinghouse E T Air Brake Instruction Pocket Book Catechism. By Wm. W. Wood, Air Brake Instructor.

A practical work containing examination questions and answers on the E T Equipment. Covering what the E T Brake is. How it should be operated. What to do when defective. Not a question can be asked of the engineman up for promotion on either the No. 5 or No. 6 E T Equipment that is not asked and answered in the book. If you want to thoroughly understand the E T equipment get a copy of this book. It covers every detail. Makes Air Brake troubles and examination easy. Fully illustrated with colored plates, showing various pressures. **\$2.50**

Locomotive Breakdowns and Their Remedies. By Geo. L. Fowler.

Revised by Wm. W. Wood, Air Brake Instructor. It is out of the question to try and tell you about every subject that is covered in this

pocket edition of Locomotive Breakdowns. Just imagine all the common troubles that an engineer may expect to happen some time, and then add all of the unexpected ones, troubles that could occur, but that you had never thought about, and you will find that they are all treated with the very best methods of repair. Walschaert Locomotive Valve Gear Troubles. Electric Headlight Troubles, as well as Questions and Answers on the Air Brake, are all included. 294 pages. Fully illustrated. **\$1.50**

Train Rule Examinations Made Easy. By G. E. Collingwood.

This is a book which every railroad man, no matter what department he is in, should have, as it is written by a man who understands the subject thoroughly. Mr. G. E. Collingwood, the author, is a recognized authority on train rules and train orders. For years he has edited the train rule department in four of the foremost railroad magazines in the United States. 256 pages. Fully illustrated with train signals in colors. **\$1.50**

Nearly 500 Questions with their Answers are Included.

Walschaert Locomotive Valve Gear. By Wm. W. Wood.

If you would thoroughly understand the Walschaert Valve Gear, you should possess a copy of this book. The author divides the subject into four divisions, as follows: I—Analysis of the gear. II—Designing and erection of the gear. III—Advantages of the gear. IV—Questions and answers relating to the Walschaert Valve Gear. This book is specially valuable to those preparing for promotion. Third edition, revised and enlarged. 245 pages, fully illustrated. Cloth. **\$2.50**

Air Brake Catechism. By Robert H. Blackall.

This book is a standard text book. It is the only practical and complete work published. Treats on the equipment manufactured by the Westinghouse Air Brake Company, including the E T Locomotive Brake Equipment, the K (Quick Service) Triple Valve for freight service; the L High Speed Triple Valve; the P-C Passenger Brake Equipment, and the Cross Compound Pump. The operation of all parts of the apparatus is explained in detail and a practical way of locating their peculiarities and remedying their defects is given. Endorsed and used by air brake instructors and examiners on nearly every railroad in the United States. Twenty-seventh edition. 411 pages, fully illustrated with folding plates and diagrams. New edition. **\$2.50**

Practical Instructor and Reference Book for Locomotive Firemen and Engineers. By Chas. F. Lockhart.

An entirely new book on the locomotive. It appeals to every railroad man, as it tells him how things are done and the right way to do them. Written by a man who has had years of practical experience in locomotive shops and on the road firing and running. The information given in this book cannot be found in any other similar treatise. Eight hundred and fifty-one questions with their answers are included, which will prove specially helpful to those preparing for examination. 362 pages, 88 illustrations. Cloth. **\$2.50**

Link Motions, Valves and Valve Setting. By Fred H. Colvin, Associate Editor of *American Machinist*

A handy book that clears up the mysteries of valve setting. Shows the different valve gears in use, how they work, and why. Piston and slide valves of different types are illustrated and explained. A book that every railroad man in the motive power department ought to have. Fully illustrated. New revised edition recently published. **75 CENTS**

Locomotive Boiler Construction. By Frank A. Kleinbans.

The only book showing how locomotive boilers are built in modern shops. Shows all types of boilers used; gives details of construction; practical facts, such as life of riveting punches and dies, work done per day, allowance for bending and flanging sheets and other data that means dollars to any railroad man. Second edition. 451 pages, 334 illustrations. Six folding plates. Cloth. **\$3.50**

His Epitaph

In Zanesville, Ohio, they tell of a young widow who, in consulting a tombstone-maker with reference to a monument for the deceased, ended the discussion with:

"Now, Mr. Jones, all I want to say is, 'To My Husband' in an appropriate place."

"Very well, ma'am," said the stone-cutter.

When the tombstone was put up, the widow discovered, to her amazement, that upon it were inscribed these words:

TO MY HUSBAND IN
AN APPROPRIATE PLACE

—Case Eagle.

Saw the following sign in a tailor shop window on Baltimore Street: "Girls Wanted to Sew Buttons on the Fourth Floor."

And on Fayette Street: "We Shine Shoes Inside."

Startling Announcement

At a fancy dress ball the mistress of the house stationed a servant at the door to announce the guests by their costumes. Among those who arrived a little late were two ladies in plain walking garb, to glance at the gay and dazzling scene.

"What costume shall I announce, ladies?" asked the servant courteously.

"Oh, none—we haven't anything on at all," responded one of the ladies.

"Two ladies without anything on at all," bellowed the faithful domestic.—Boston Transcript.

He Got the Job

After a ruthless process of rejection there were five applicants for the post of errand boy left for the head of the firm himself to interview.

It was one of his flippant mornings, and he sought to amuse himself by asking the eager boys puzzling and quite irrelevant questions to test their general knowledge.

"How far away from the earth is the North Star?" was the question he fired at the first shiny-faced youngster.

"I'm sorry I can not give you the exact figure offhand, sir," was the reply, "but on

You Can't Beat the Irish

An Irishman came into the office of the president of the Illinois Central Railroad and said:

"Me name's Casey. Oi worruk out in the yar-rds. Oi'd loik a pass to St. Louis."

"That is no way to ask for a pass," said the president.

"You should introduce yourself politely. Come back in an hour and try it again."

At the end of the day back came the Irishman. Doffing his hat, he inquired, "Are yez the man I saw before?"

"I am."

"Me name is Patrick Casey. Oi've been workin' out in the yar-rds."

"Glad to know you Mr. Casey. What can I do for you?"

"Oi've got a job an' a pass to St. Louis on th' Wabash. Yez can go to hell."

—Case Eagle.

Literal

"What is it," asked the teacher, "that binds us together and makes us better than we are by nature?"

"Corsets sir," piped a wise little girl of eight.—Case Eagle.

Miss Rose asked her eighth grade: "What are the sister states?"

Mabel answered: "I am not sure, but I should think they were Miss Ouri, Ida Ho, Mary Land, Callie Fornia, Louisa Anna, Della Ware, Minnie Sota and Mrs. Sippi."—The St. Cloud High School Mascot.

Sad Sad Sad

The saddest words from kith or kin

Come from friend wife,

"WHERE HAVE YOU BEEN?"

—The Goodfellow.

"Buck": Was that a short skirt?
"Vet": Naw! Long legs!

Cause of Tommy's Query

"Are caterpillars good to eat?" asked Tommy at the dinner table.

"No," said his father. "What makes you ask a question like that while we are eating?"

"You had one on your lettuce, but it's gone now," replied Tommy.—London Tit-Bits.

Can't be Done These Days

"Will you give a poor man a dime to get something to eat?"

"A dime! Now I know you're lying!"—Judge.

First Constable: "Did yer git that feller's number?"

Second Constable: "No, he was too gol-derned fast fer me. That was a perty pert lookin' gal in the back seat, wasn't it?"

First Constable: "She shure was!"

—Hum Bug.

Send No Money
Thirty Days Trial

Don't Pay a Cent in Advance

Just mail the coupon below and we will ship you this Model R Silvertone and the records you want with it. Play the outfit as much as you please.

If, at the end of thirty days' trial, you are not fully satisfied that it is in every way the equal of any phonograph on the market selling at prices from \$50 to 100 per cent higher than the Model R, simply notify us and we will take away the phonograph at our own expense and return any money you have paid. The test will not have cost you one cent nor placed you under any obligation.

ONLY \$10.00 a month

If, after thirty days' trial, you are fully satisfied with this Silvertone and desire to keep it, send us only \$10.00 a month until the total of \$158.00 is paid, plus the price of any records ordered.

Price Reduced \$42.00 The Model R sold last year for \$200.00. Even at that price it represented a big saving over other phonographs of the same size, quality and beauty of design. But at our special sale price of \$158.00 it is the biggest phonograph bargain we have ever offered.

Wonderfully Sweet and Mellow Tone

The perfected Silvertone reproducer, in combination with the non-vibrating tone arm and scientifically and acoustically correct amplifying chamber, creates an exceptionally clear tone. The volume of sound from loud to soft is regulated by a tone modulator.

Beautiful Adam Period Cabinet

Only the finest materials are used in making the Model R. It is furnished in three woods, each carefully selected for the beauty of the grain.

Absolute Satisfaction Guaranteed or Your Money Back

You are perfectly safe in buying a Silvertone—the phonograph with a lifelong guarantee. We guarantee the Model R to be the equal of any other phonograph in every respect and we will make good this guarantee by returning your money at any time if for any reason you are dissatisfied with your purchase.

The Booster

TO THE EDITOR,
BALTIMORE AND OHIO MAGAZINE.

WASHINGTON, D. C., March 14, 1921.

Dear Sir:

I arrived here last night after dining on J. M. Templeman's car. Waiter No. 3 served me.*

"Waiter," said I, "what is that chicken pie made of? Real chicken? Can you recommend it?"

"Yes, sir! You'll find it all right, sir. White meat mostly, with a little dark, and the bones all taken out. You'll never find anything on the Baltimore and Ohio but what's all right, sir, you can bet on that!"

In due course the waiter returned with the pie. It had struck me as somewhat unusual for him to praise the food in just the way he did and I recalled once before hearing another Baltimore and Ohio waiter use much the same expression. I wondered if the Traffic Department had been giving the dining car personnel lessons in the psychology of advertising. Naturally, I was interested—for sooner or later most of the important shippers patronize the dining cars of the roads that carry their freight—so I determined to find out.

"It is refreshing to hear you praise your own road as you did a few moments ago," I said to him. "You will never lose by doing a thing like that."

"Well, sir, I guess it don't make no difference either way. I don't get nothing for it, and I guess the Company don't know there's such a man as me working for 'em, anyhow."

"Hold on—you're wrong about that," I replied. "You may be sure they know all about you. Neither you nor any other man on the road is lost sight of for a second. What you do and say counts every time. Don't you forget that."

"Oh! I suppose they do see my name on the payroll once in a while, but that's about all." Abruptly he added: "That chicken pie's fine, just like I told you, ain't it, sir?"

I doubt if the suggestion of Baltimore and Ohio perfection as conveyed by that final sentence could have been improved. It was not the praise of the pie, it was the "Just like I told you"—*right on the Baltimore and Ohio*—that he put across.

That kind of talk gets business and keeps it. Such a spontaneous expression of loyalty by an employe will make friends for a road every time. Never have both friends and freight been more sorely needed than right now and my little experience has once more impressed me with the unlimited opportunities to boost that come continually to every man in the railway service. With traffic where it is we are all painfully near a case of "boost" or "bust," but if your road and mine can count among our assets such "boost" spirit as I met with yesterday, we need never fear the latter.

Sincerely,

THE PRESIDENT OF ANOTHER ROAD.

*Waiter No. 3 was H. A. St. Luce—ED.

Veterans' Success in Solicitation Points the Way to More Systematic and Intensive Campaign

Flying Squadron from Baltimore Will Address Every Lodge During April—All Employees Urged to Attend Meetings

*"There is a tide in the affairs of men,
Which, taken at the flood, leads on to fortune."*

THE officers of the Baltimore and Ohio believe that the turn in the tide of business depression is about here. For weeks our car loading has been going back, our gross and net revenues falling. But if business reports are to be believed, the month of February was a much larger "order taking" month than January; and March, than February. Order taking does not mean an immediate increase in traffic, but it does mean that the wheels of business are gradually being set in motion, and that portends an early demand for more cars.

Industries Resuming Work

Reports from the industries along the Baltimore and Ohio have been pointing to the month of April for resumption of work in a number of plants, and as soon as they get going their activities will become contagious, and it is confidently hoped that this will mean a gradual return to general business normalcy.

Veterans' Work Encouraging

The best proof of what we can do at this time is what has already been done through the solicitation of our Veterans since President Willard urged them at the meeting of the Baltimore Veterans on December 13 to get all the traffic they could for the Railroad. Reports already in hand, some of which have appeared in the February and March issues of the MAGAZINE, show that many carloads of freight have been directly secured through the Veterans' solicitation.

Return Postcards

Soon after this address of President Willard, Vice-President Fries, in charge of Traffic and Commercial Development, had thousands of return postcards printed. On one-half of the cards on one side was a space left for the name and address of a shipper. On the other side, signed by the employee making the solicitation, was a brief request that the

shipper favor the Baltimore and Ohio in placing his shipments. On the other half of the cards was printed, on one side, lines for the name and address of the Veteran and on the other side a brief statement to be filled in by the shipper indicating whether or not he had complied with the request. Some of these postcards were sent by mail by Veterans to their business friends and acquaintances. Others were handed to them and a personal solicitation made, and this method, of course, has brought the best results and is recommended wherever it can be followed.

Ten thousand of these cards have been distributed by George W. Sturmer, grand president of the Veterans, to the presidents of the local chapters, and given by them, in turn, to their fellow members. Hundreds of these cards have been received by Veterans, indicating substantial increases in our business through this solicitation. It is believed, however, that many cards promising business and received by the Veterans have not yet been turned in by them. Hereafter, therefore, in order that an accurate record can be kept of the results of this campaign, it is requested that all

these cards be sent by train mail or United States mail to

H. O. HARTZELL,
Manager Commercial Development,
The Baltimore and Ohio Railroad Company,
Baltimore and Ohio Building,
Baltimore, Md.

Bringing the Story to Every Employee

So encouraged have President Willard and Vice-President Fries been with the results already shown by the campaign, that, during the first week in April, it was determined that the campaign be extended and intensified through the Veterans' Associations to all of the employees on the Railroad who can be reached through a series of meetings. Mr. Hartzell is in direct charge of this campaign, and, with W. W. Wood, chief of Welfare Bureau, and Mr. Sturmer, will complete the following schedule during the last three weeks in April:

Pittsburgh.....	April 11
Youngstown.....	April 13
Lorain (noon).....	April 13
Cleveland (night).....	April 13
Connellsville.....	April 14
Cincinnati.....	April 15
Lima.....	April 16
Washington, Ind.....	April 18
Chillicothe.....	April 19
Philadelphia.....	April 20
Martinsburg.....	April 21
Cumberland.....	April 22
Parkersburg.....	April 23
Wheeling.....	April 25
Newark, Ohio.....	April 26
Willard.....	April 27
Garrett.....	April 28
Grafton (noon).....	April 29
Fairmont (night).....	April 29

Veterans to Hold Open Meetings

Because of the quickness with which this speaking tour had to be organized it is possible that some of these engagements will have to be modified. But J. M. Garvey, grand vice-president of the Veterans and W. F. Braden, Safety representative, are at this writing acting as advance agents, hiring suitable halls in which

The Cover Design

Charming little "Betty" Myers held up No. 146 for a few minutes at Relay, Md., one morning recently, while she presented a glorious bunch of Forsythia to Engineer "Tom" Collins. Meantime George B. Luckey, chief photographer of the Baltimore and Ohio, who conceived the setting, got the pretty picture on the cover.

"Betty" is the daughter of J. B. Myers, Engineer Roadway and Track, and Mrs. Myers, who live at Relay. Engineer T. F. Collins came with the Company in 1896 as a freight fireman. Since 1903 he has been engineer in freight and passenger service.

to hold the meetings, procuring local talent wherever possible for entertainment features, and planning adequate publicity so that all Baltimore and Ohio employes and their families may know in good time of what is being done. The meetings are to be held under the auspices of the various chapters of the Veterans, but through their cooperation all employes and the members of their families are cordially invited to attend.

Operating and Traffic Officers at Meetings

Vice-President Galloway, in charge of Operation and Maintenance, is requesting the officers of his department to attend these meetings and to further their success in every way possible. The same thing is being done by Vice-President Fries in his department. Through the cooperation of J. T. Broderick, superintendent of Safety, all Safety supervisors and committeemen will form a special auxiliary corps to help bring home the importance of this campaign to every employe. During the meetings incident to the special 60-day intensive campaign on Safety now being carried on, the return postcards will be widely distributed.

Over Sixty Per Cent. of Revenue Goes to Payroll

This is a straight business campaign, a frank plea to all our employes to help the Company through this period of subnormal traffic. With the success which has already attended the efforts of the Veterans at several points, notably at Connellsville and Garrett, and with all present indications pointing to the resumption of manufacturing, and the general forward movement of business all along the line, it is confidently believed that by intensifying this business-getting campaign among all the thousands of employes of the Railroad and the members of their families, an immediate and notable increase in our traffic will be shown. And if this result is attained, it will be quickly demonstrated, to the satisfaction of every Baltimore and Ohio man, that the prosperity of the Railroad means the prosperity of its employes. **It should be remembered here that about 60 per cent. of the gross revenue received for every carload of freight is distributed to the employes through our payrolls.**

Helped by the Flood Tide

The rise of the tide of business must not catch us asleep. We must be prepared to ride in on the flood tide to business prosperity. New and profitable traffic affiliations can be

made with every industry resuming business, at competitive points particularly, if we will but make them. With the kind of service which the Baltimore and Ohio is giving today, new shippers giving our service a trial will become regular and enthusiastic patrons of our Railroad, with a resulting permanent increase in the number of our business friends and in our prosperity.

These Have Done It—So Can We

Read the following brief articles and see how many of our employes outside the Traffic Department are trying to get and hold business for the Company. Then turn to the Among Ourselves Department in this issue and read in the notes represent-

Newark Division Says Transportation Efficiency is Best Traffic Getter

You need not be an expert traffic man to get business for the Baltimore and Ohio. Follow this cue, and let the Transportation Department do the rest

By W. E. Laird

Chief Clerk to Superintendent, Newark, Ohio

ON February 28, Yardmaster C. B. Powers, at Zanesville, Ohio, and Agent E. C. Doudna at that point, obtained information that G. N. 121268, stoneware from the American Clay Products Company, had been offered for movement via Baltimore and Ohio, Zanesville to Philadelphia, Pa., and that at the same time there had been another car loaded by the same firm for the same destination and offered to one of our competitive lines. These two cars were trial shipments, the delivery of which would decide via what line the balance of a shipment of about 50 carloads of this business would move.

It took Mr. Powers a short time to have this car set first out for No. 92, wire the Superintendent's office, who in turn wired connecting division and General Superintendent Transportation Curren. On March 2, we received advice from Mr. Curren that G. N. car 121268 had arrived at Philadelphia on train 94, at 9.22 p. m. that date, and when notifying the shippers to that effect, they very promptly gave assurance that the 50 carloads yet to move from their plant would go Baltimore and Ohio. Inquiry on March 5, three days after delivery of G. N. 121268 at Philadelphia, indicated that the car forwarded via our competitors' road had not yet reached destination.

This case points out in a very convincing way, that "Service" will get business and retain it when other methods fail, and that the Baltimore and Ohio Railroad has a special brand

ing our employes at Cincinnati Terminals and Akron, of the efforts of our friends there to secure traffic among their friends and acquaintances for the Baltimore and Ohio.

There are very few employes of the Railroad who are so situated that an effort on their part to get friends to use the Railroad for travel or freight would be fruitless. Church, lodge, society, neighborhood, school—all these associations and others offer the opportunity to bring business to the Baltimore and Ohio. If every employe would look at the problem as have the stalwarts mentioned in the following articles, it would not be long before prosperity was an established fact all along the line of the Railroad.

of that article for sale. Help the Traffic Department get the business by advertising this among your friends in the shipping business, and if you cannot assume the role of a solicitor, help improve the "Service."

And Here is More Super-Service From Newark

C. C. GRIMM, day yardmaster at Newark, Ohio, reports the following, indicating fine cooperation between our employes to the end that no business shall be lost to the Railroad where good service is able to hold it. Mr. Grimm writes:

Recently Conductor John Robinson, arriving at Newark on extra from Cincinnati, was met by yard clerk to take his bills and mark train.

He had picked up Baltimore and Ohio 196387 at Washington Court House, billed Pittsburgh, the car having a note pinned on it reading, "Yardmasters, this is a rush load, trial shipment, please rush, signed, Agent."

Conductor Robinson would not give bills to clerk until he had shown them to the yardmaster, and as a result, the car arrived on extra east at 4.20 p. m., and was switched out and forwarded on train 92, at 5.30 p. m.

We are glad indeed to publish this note in the MAGAZINE giving credit to Agent Kibler, Conductor Robinson, and the yardmaster for their fine teamwork.

Chicago Veterans Again to the Fore in Getting Business

ON March 24, J. M. Trimble, president of the Chicago Veterans' Chapter, sent in a splendid report of the activities of his veteran associates in getting business. This is real stuff and should inspire their fellow Veterans all over the System to similar activities. Mr. Trimble's report follows:

On March 13, J. F. Walsh secured one carload of lumber from the Hartman Lumber Company, Chicago, destined Pocono Lake, Pa., routed via Baltimore and Ohio to Youngstown, Ohio. This was originally a competitive shipment.

On March 12, W. C. France, Tiffin, Ohio, secured one carload of wash-boards, Tiffin to Detroit, Mich., a trial shipment. This business heretofore moving via competing road. Consignor, Monarch Manufacturing Company, revenue on this shipment \$92.00.

On March 17, H. J. Ringle, Bremen, Ind., advised that all shippers at his station had been solicited, as well as nearby towns located on competing lines and that he has secured some new business, of which he will write me fully later.

On March 1, D. D. Kaup, Fostoria, Ohio, secured one car household goods for Waterloo, Ia. On March 10, another car of household goods for La Salle, Ill., and on March 11, one car of hay for Grafton, W. Va., all new business secured from competitive lines.

On March 13, H. S. Lee, South Chicago, advised that the American Asphalt Paving Company promised him, commencing first of April, 6 or 8 carloads of freight each week, Philadelphia to Chicago. He is also after

another company, which he expects to land in a few days and will advise me later.

On March 14, T. J. Rogers, Garrett, advised that he had solicited business from party in LaPorte, Ind., located on another line and promised from one to two carloads of freight each week to be routed Baltimore and Ohio.

On March 12, W. P. Altman, Avilla, Ind., advised he had solicited freight from McMillan and Company, Fort Wayne, Ind., Carner and Company, Fort Wayne and Stiefel & Levy, Avilla, and has received one car from each of the two latter firms and expects to secure additional shipments later.

J. W. Fox, Hamler, Ohio, advised he has solicited freight from Hamler Cooperative Grain Company; also C. J. Rayle, shipper of hay and straw, with good results.

In addition to the above I have communications from practically every station located on the Chicago Division, stating

Veteran Freight Foreman J. T. Mathews, Washington, D. C., Making Business Friends for the Railroad

THE truth of the old saying, "if you want to get something done, ask a busy man to do it," is well exemplified in J. T. Mathews, veteran general foreman of the Baltimore and Ohio at the freight house in Washington, D. C.

In another section of the MAGAZINE, in the story of the meeting of the Baltimore Veterans on the night of April 4, is told how Mr. Mathews, by securing 95 new members for the Association was awarded, as a prize,

that shippers have all been interviewed, and in addition that soliciting cards have been mailed to parties who are now using other lines.

The Connellsville and Chicago Veterans' Associations have shown the way in this campaign, and like all other successful efforts, theirs have demonstrated the great importance of enthusiastic, hard-working, well-directed and systematic leadership. Messrs. Harrigan and Wardley at Connellsville, and Mr. Trimble at Garrett have shown loyalty, interest and ability of a high order.

We hope to have favorable reports from other of the Veterans' Associations so that we can give the individual members due credit for the work they have done and are doing. This campaign will continue for some time to come and the results will appear in the next several issues of the MAGAZINE. What other of the Veterans' Associations are going to place their names on this HONOR ROLL?

a beautiful gold ring showing the Veterans' insignia.

Turning to new fields to conquer, this veteran employe bids fair to stand high up on the Roll of Honor for those who are trying to bring much needed business to the Company. Listen to these three letters that Mr. Mathews has received recently from prominent shippers whose business he has solicited for the Railroad:

"Have heretofore traveled via a competing line but from now on will travel and order all goods shipped via Baltimore and Ohio.

(Signed) SAMUEL H. BLUMENTHAL,
Merchant, Washington, D. C."

"As per your recent request, we will be very glad to have our next shipment of automobiles from The Winton Company come by Baltimore and Ohio freight. Wishing you continued success, we are

(Signed) T. LAMAR JACKSON."

"Am shipping regularly via Baltimore and Ohio from Brooklyn, N. Y. Better time on shipments will be appreciated.

(Signed) R. S. BOWIE,
Washington Representative,
AUSTIN NICHOLLS & Co."

We believe that we can assure Mr. Bowie that if better time can be made between Brooklyn and Washington in the class of service that he uses, the Baltimore and Ohio stands ready to give it to him.

And still another letter, to the traffic manager, we presume, of the automobile company mentioned, with copy to Mr. Mathews:

April 1, 1921.

"REO MOTOR CAR Co.,
Lansing, Mich.

Gentlemen—We beg to advise that the two carloads of Reos shipped us on March 25 via

Here's a gloom chaser from the Gloom Chaser

Baltimore and Ohio freight, reached this city yesterday and will be unloaded by us this morning.

"We are calling this to your attention to show the quick arrival of carload shipments made by the Baltimore and Ohio to this city. You will probably recall that prior to the war practically all Reos were shipped us via Baltimore and Ohio, as we always had such good service on such shipments, and we wish to request that whenever practicable to do so, future shipments are made to us over this Road.

Yours very truly,

THE TREW MOTOR CO."

Went After His Honor, The Mayor

THE many friends of H. W. Biser in Cumberland, where he formerly was stationmaster, and in Philadelphia, where he now holds down the same position at 24th and Chestnut Streets, would never call him a politician. Nor is he willing to admit the charge. Yet, be it known that Mr. Biser has recently gone "into politics"—plunged in, we might say.

Not so long ago he attracted the attention of one of our passengers by doing him a little courtesy in the station in Philadelphia. The man, a politician, whose name would be known to many of our Philadelphia employees if we should mention it, asked Mr. Biser to come and see him at the City Hall. The invitation was accepted and a few days later Mr. Biser was cordially received by his new-made friend. He was presented to a Pennsylvania State Senator, a number of city councilmen, and finally to his Honor, Mayor Moore of Philadelphia, formerly Congressman from Pennsylvania.

Mr. Mathews is in an unusually favorable position to help the Railroad get business, both because he is in close touch with shippers and because his work enables him to be of a good deal of service to them. It will be noted, also, that he is making the best of his opportunities.

How about our freight foremen at other places? Isn't there something in the way that Mr. Mathews is handling his job to persuade them to go and do likewise?

The executive of a big city is a pretty busy man, but he didn't get away from Mr. Biser before he had heard a little solicitation for the Baltimore and Ohio.

"Come down and see me at 24th and Chestnut Streets some day, your Honor. Try our line to Washington and see how much you will like it."

And the Mayor promised!

In recalling the event later, Mr. Biser said:

"Why shouldn't I ask them to use our Railroad. That is my business just as it is theirs to get my support and vote on the municipal policies they want to put into effect. I believe in the Baltimore and Ohio Railroad and its service. I only wish that outside of the routine opportunities which we men in the Operating Department have to make the service so good that people will want to use the Road over and over again, we had a chance to go out and tell other people how much they are missing by not giving it a trial."

Employee's Courtesy Brings Honeymoon to Baltimore and Ohio

By M. J. Conroy

Proofreader, Printing Department

RECALLING an incident that happened not so long ago, illustrating how courtesy on the part of our employees can redound with profit to our Railroad:

I was a passenger on No. 9 from Pittsburgh to Akron, in a day coach, when a young lady came up the aisle and inquired if the seat was occupied by any one else than myself. As I was alone I told her that she was welcome and I assisted her with her bag and helped make her comfortable. In the course of our conversation I found that she was a school teacher from a little town in Pennsylvania and was on her way to Willard.

There had been a street car strike in Pittsburgh at the time and she had

been unable to get any breakfast between the time she arrived and the departure of the train. About that time Mr. Baugh inaugurated the serving of hot coffee and sandwiches through the coaches and I insisted that she let me help her to some.

As we were nearing Akron she told me that she had never been to Willard before but that she had friends there and expected them to meet her at the station. I told her at what time she would arrive and that I would ask the conductor to keep an eye on her and see that she reached her destination safely. A short time afterwards I received a letter thanking me for my kindness and assuring me that her trip was a most enjoyable one.

At Christmastime I received another letter, post marked Cleveland, and found that it was from my little companion of a year or so before. In it she told me that she had not forgotten her kind friend nor her pleasant trip on the Baltimore and Ohio. She had since married a Cleveland man and her object in writing me was to tell me that she had insisted that her honeymoon to Atlantic City and New York and back to Cleveland be by the Baltimore and Ohio, because of the kindness and courtesy shown her by our employees.

Thus the Company derived some little revenue and we now have an enthusiastic booster for our Road at all times. As for me—I have two valued friends and a standing invitation to enjoy their hospitality any time I am in Cleveland.

This is the kind of personal salesmanship that we all can do and should do in behalf of our Road, in making its splendid service better known to the traveling public.

Engineer Enjoys Cosy Home

CONNELLSVILLE, PA.,
December 20, 1920.

MR. W. J. DUDLEY,
Superintendent Relief Department,
Baltimore, Md.

Dear Sir—I received the papers in my loan O. K. Am very thankful to the Relief Department for enabling me to build a very comfortable home. Am enclosing picture of same and think any employee of the Baltimore and Ohio is very foolish not to take advantage of the opportunity of living in his own home instead of paying rent.

Yours very respectfully,

(Signed) ROBERT T. CART,
Engineer.

Gila Monsters and Deserted Babies

These are but Two of the Hundreds of Different Things that Annually Come to Our Lost Article Bureau

By H. L. Norris

General Baggage and Milk Department

WHAT would you do if you suddenly had to take care of a Gila Monster reptile, a scaly, mottled and cantankerous-looking individual who has the added distinction of being one of two species of the poisonous lizard? If we had known all about this fellow's notorious reputation when we got Superintendent Trapnell's S. O. S. to take him off his hands, we perhaps would not have been so quick in complying. A passenger had left the "pet" on a Charleston Division train and the superintendent's plea "for goodness sake tell me what to do with it" showed that even superintendents have problems once in a while that they don't know how to handle.

Nor did we feel very confident as the caretakers of this unusual visitor when he finally arrived at Camden Station. There wasn't a mark on his box to indicate ownership, and the young ladies in the office, who usually show a proper amount of sympathy in similar cases, refused to have anything to do with his lordship. At length someone suggested the Zoo at Druid Hill Park. So we carefully observed the instructions of the caretaker there concerning the proper kind of nourishment to set before our strange guest and sent him over, lunch and all, to his new home. Later Superintendent Trapnell wired us that the owner had been found and wanted his pet back again. This meant another study as to his safe boxing and shipment, but we were finally gratified to learn that the lost was again safely in the possession of its boss.

This is but one instance, an unusual one to be sure, of the cases that our department is called upon to handle in receiving, caring for and returning the thousands of lost articles left annually by passengers on the property of the Railroad. And it is a splendid illustration of "service" as it is practiced by the carriers, even when it is entirely unremunerative. Though small in comparison with the other activities of the Railroad, the lost article proposition bulks big in the results it can accomplish.

For instance, recall if you can the time you lost a cuff link or similar personal article. Do you remember the inconvenience that it caused you?

It may not have had a large intrinsic value, but all our personal belongings (and most lost articles are personal belongings) have a sentimental value that cannot be expressed in dollars and cents. And if you were fortunate enough to get back your lost link, or whatever it may have been, you remember your feeling of gratitude to those who were instrumental in its return.

Only the employees who are intimately concerned with the handling of lost articles appreciate how big a part this plays in the satisfaction of the passenger. The carriers are not responsible for lost articles, to be sure, and their loss is almost always the fault of the patron. Yet if they are not recovered, the railroad comes in for blame, and if they are recovered, those to whom they are returned can usually be counted firm friends of the Company. So we feel the responsibility of this part of our work very keenly and no pains are spared to the end that the lost be found and returned to the owner. Frequently the appreciation of passengers is a great reward in itself. Other times—but why dwell on a well-known frailty of human nature?

The handling of lost articles that are received by our department is not difficult. When an article is turned in, a tag consisting of three stubs is issued and description of the article inserted thereon, with name of finder, where found, etc. One portion of the tag is given to the finder as a receipt, one sent to our office, and the remaining stub left attached to the article subject to call of owner, and upon it his receipt is taken, if

article is later claimed and properly identified. If it is not called for within 30 days, it is then forwarded to the Unclaimed Room in Baltimore, where it is held for safe keeping and where inquiry is instituted to locate the owner if the article shows any marks upon which such an inquiry can be made.

It is the lost article that *never reaches our department* that causes the greatest amount of trouble. The passenger is very human and if he or she discovers at the end of a trip that something is lost, we can usually count on being assured that it was lost on the train. Then the excitement starts, and if we haven't the good fortune to discover the missing article, we have—to put it mildly—a peck of trouble. And it is for that reason in part that we ask for the help of all the employees on the Railroad, especially those engaged in train and station service.

There are two things in particular on which we need this help. The first is the following implicitly of the Lost Article Instructions, copies of which may be had from this office. These request that lost articles that are found be turned in to the agent or baggage agent at the end of the run. And it is in getting this rule carried out that we have, perhaps, our greatest trouble. Trainmen and other employees often think that they will be able better than we to find the owner. Such, however, is not the case. Our timetables tell passengers how they may seek their lost articles, and their inquiries are directed to this department. Hence, the work is systematized, all inquiries and articles eventually coming to this one centrally located bureau, where comparisons of inquiries and recoveries can be made, and a systematic effort instituted by trained employees to connect up the missing article and the owner. Employees who hold missing articles with the idea that they can best find the

Gila monster, *Heloderma suspectum*

owners, complicate our task considerably and ultimately cause dissatisfaction among our passengers. Sometimes, also, their motives in holding such articles are very naturally misinterpreted. So we urge that the rules in this respect be followed invariably.

The second thing that we would like to emphasize is the way that we can keep our passengers from losing their possessions. Our employes, and particularly station and train crews, whose duties bring them in direct contact with passengers, can greatly aid us in not only increasing the percentage of articles returned to owners, but also diminishing the number of them lost. Ushers and gatemen can often prevent careless passengers from leaving their hand baggage and belongings standing unprotected in stations. It is surprising how many people walk off and leave these things without any guardianship whatever, instead of placing them in our parcel room at a nominal charge of only 10 cents. When announcing station stops, train crews and porters can also remind passengers not to forget the articles belonging to them. Some of our men thoughtfully do this. Former Train Porter Chase, who, on account of his long and faithful service, has been transferred to Red Cap Porter duty at Camden Station, was particularly thoughtful in this respect, and was known all over the lines on which he ran, because, before trains came to a stop, he always said: "Don't forget your parcels and umbrellas." His little reminder undoubtedly saved passengers many thousands of dollars in losses by preventing their thoughtlessness, besides the great amount of worry which always comes when we lose anything.

One of our principal troubles, of course, comes from the fact that there are many things lost on our property that never come into the hands of our own employes. Other passengers pick them up, and in some cases, we and the owners never see them again, although there are many instances of passengers finding articles and being as solicitous as are we and many of our employes in seeing that they get back to their owners. Such a case is not illustrated, however, by the following, which is mentioned to suggest further the complicated problems that we are called on to handle.

At 9 o'clock one night, one of our "Red Caps" at Camden Station, a man who is always very prompt in turning in lost articles that he finds, saw a black valise, unaccompanied by the owner, in the waiting room.

"The Loyalty of Your Employes is One of Your Greatest Assets"

P. FLANIGAN & SONS

General Contractors

HARFORD AVENUE AND 25TH STREET
BALTIMORE, MD.

December 29, 1920.

Mr. Daniel Willard, President,
Baltimore and Ohio Railroad,
City.

Dear Sir:

Having recently completed a contract embracing the paving of a number of streets in Martinsburg, W. Va., we desire to extend to you and through you, to each individual employe of your Company, who assisted in any way the prompt movement of the several hundred cars of material which were required for this work, our sincere thanks and appreciation.

This help was given not only in the Baltimore terminals, where most of the cars originated, and in the Brunswick Yards where the movement of our cars was expedited, but also at point of destination, Martinsburg, where the cars were placed promptly upon arrival.

Occasionally an extra shift was required during the day in order to remove empty cars from siding at plant in Martinsburg, and when this was asked, your employes always acted promptly and our requests were always complied with within a reasonable time.

As for "service" we want you to know that our experience in the past three months has been that the movement of cars between Baltimore and Martinsburg is as prompt and satisfactory as could be expected by anyone. This, together with the uniform courtesy of your subordinates at all times, and their desire to aid us in every way possible, consistent with their duties, in order to hurry our work to completion, has also been the source of general satisfaction.

The loyalty of your employes is one of your Company's greatest assets, and the cooperation, courtesy, and assistance which we have received at all times has been of such a nature as to make you feel justly proud as being the Commander-in-Chief of such an efficient organization. We have found that your men always try to make friends for your Company, and we are sure that this will mean increased business for you next year.

With very best wishes for the future prosperity of your Company, we are,

Very truly yours,

(Signed) P. FLANIGAN & SONS.

The Burning Bridge of Fiction and Fact

Stories of heroic engineers catapulting their speeding engines across burning railroad bridges, and by sheer nerve and good fortune saving their trains and the lives of their passengers, were favorite ones in old-time railroad fiction. Many a theme of this kind stirred the hearts and imaginations of our forebears in crossing shanty, caboose and tool house.

If miracles these were, they are now a thing of the past. Railroading is an infinitely more exact and painstaking science, and the safety of our trains and passengers doesn't depend so much on the quick wit and nerve of the individual as it does on the thoughtfulness of many.

The burning bridge is still a menace—and will be as long as wooden bridges last—but its elimination as a hazard hangs not on the bravery of the engineer, to whom, suddenly faced by its menace, it means almost sure death, but on a whole chain of vital factors.

The mechanic who does an indifferent job on repairing an ash pan, or the inspector who carelessly passes his poor work, these and other links in the chain are often responsible for extremely dangerous conditions which they may never even hear of. Investigation does not always locate the responsibility, but the responsibility remains notwithstanding. And carelessness must be answered for some day.

Fire is one of our greatest railroad hazards. During February it cost the Railroad \$2574.50, a snug sum which, had it been saved, could have been used for productive purposes. Some of the typical cases follow:

ORIGIN

Hot coals from locomotives setting fire to bridge.

Smoking in lumber dry kiln.

Sparks from locomotives, setting fire to roof of tower.

Overheated stove setting fire to ceiling of caller's office.

FIRE PREVENTION RECOMMENDATIONS

Rigid and proper inspection and maintenance of ash pan on engine and proper fire protection, such as water barrels and pails on bridges.

Enforce "No Smoking" rule. Conspicuous "No Smoking" signs should be posted and the rule rigidly enforced.

Proper inspection of spark arrester appliances in front ends of locomotives at least weekly. Nettings and spark arresters must be in perfectly tight and serviceable condition at all times.

Proper clearance of woodwork behind and around stoves, wood protected with asbestos and metal, with an air space between metal and asbestos of not less than one foot. Provide standard metal mats under all stoves.

Note that one item was a burning bridge—there were two such during February.

Railroad men need not be reminded of the potential hazard to life and property that a burning bridge means. Baltimore and Ohio men need not be urged to prevent such hazards—they will do so once the facts are before them.

It is the purpose of this series of reminders to put these facts before them so that, knowing the menace of fire, they can cooperate in its proper control.

He turned it into the Lost Article Bureau, where it was properly checked and entered and then set up on the rack to await the call of the owner. The next morning a peculiar noise was heard at intervals by the baggage agent, half wail, half cry, and a search to locate it brought him to the black bag, and in it a blanketed baby boy about a week old. Twisting and squirming and crying, the dear little fellow was trying to find the absent mother, who, unfortunate woman, had taken this unusual and, to us, perplexing way of getting rid of him.

Feeling quite helpless ourselves in this emergency, and touched with the plight of the dear little baby, we turned to our friend J. J. McCarron, captain of police of the Baltimore Division. Though a bachelor, we knew that he had a great love for children, and how well our faith in him was justified may be seen from the following memorandum that he sent us concerning the fate of the unfortunate waif:

Name of child, Douglas Camden; sex, male; sent from Camden Station to Western Police Station, Baltimore; thence to Child's Nursery Hospital; thence to Juvenile Court where committed to Florence Crittenden Home Nursing House. Is still there.

De Maupassant or O. Henry could have taken this incident and woven a poignant story about it. We are well pleased, however, that the baby is in good hands, is getting along well, and, despite the incident of his birth, has the opportunity of growing up to be a healthy, normal boy and, in this land of opportunity, a useful and prosperous man.

That thin circle of gold that you may pick up from the floor of a Baltimore and Ohio coach will not be worth the price of a theatre ticket to you. Yet it may be the only remembrance that the owner has of a departed wife or mother, and cherished beyond belief. That little trinket that you may discover in the corner of the waiting room is but a cheap, tawdry bauble as you see it. Yet its graceful silver form may have been caressed every day for years by the devoted hands of one who loved beyond expression the original wearer, and who now lives in memory only.

Sentiment, to be sure! Yet one of the best parts of life is sentiment, and it is for this reason, in addition to the intrinsic service that it gives our passengers, that we are counting on the help of our fellow employes in handling in the prescribed way the articles which they find on the property of the Baltimore and Ohio.

The Lane-Galloway Mechanical Trimmers Installed on the Baltimore and Ohio Railroad Company's Export Conveyor-Belt Coal Pier, at Curtis Bay, Md.*

By Philip George Lang, Jr.

Assistant Engineer of Bridges

THE export coal facilities of the Baltimore and Ohio Railroad Company, at Curtis Bay, Md., vitally concern all whose interest is identified with water-borne commerce. The development of this great terminal marks a distinct chapter in the age-old history of inter-continental trade, and, during the recent past, the steady replacement of hand labor by mechanical equipment has exerted a mighty influence upon industrial organization and economic policy.

In the production of those articles which minister to the need, comfort or luxury of mankind, perhaps the greatest single factor is an uninterrupted coal supply. Through a period of more than 70 years, the coal traffic of the Baltimore and Ohio Railroad has continued to flow from the bituminous fields to Baltimore, gradually increasing in volume to the mighty torrent which now pours into the local yards, and which reached its maximum last autumn.

The operations at Curtis Bay mark the consummation of a distinct phase in the distribution of this important commodity. By the beginning of 1915 it had become apparent to all observers that the volume of coal traffic at Curtis Bay had reached such proportions that new means for transferring the coal from cars to vessels must be developed. Investigation of this problem resulted in the construction of the immense concrete and steel conveyor-belt coal pier, whose four moving towers attract the attention of all who visit that point.

* See illustrations on pages 36 and 37.

With the completion of this pier, and its initiation into service, another difficulty soon became apparent. Although a perfect machine had been created for the mechanical performance of every operation incident to the delivery of coal to vessels, its distribution by hand within the cargo space could not be effected with a degree of rapidity sufficient to keep pace with the delivery by the mechanical means which had been provided.

The export facilities at Curtis Bay represent an investment of approximately \$3,000,000. Trimming coal cargoes by hand meant that a large portion of the potential working time of this pier was absorbed in periods of enforced idleness, because it was impossible for hand trimming, no matter how many laborers were employed, to keep pace with mechanical delivery. And this condition created a major source of economic loss.

During 1918 these conditions were the subject of anxious consideration on the part of the Baltimore and Ohio Railroad, and the necessity of some device capable of at least supplementing, if not entirely replacing, hand trimming, was clearly recognized. H. A. Lane, chief engineer, was instructed to inaugurate studies, with a view to evolving some practical mechanical device; this work was assigned to the office of the Engineer of Bridges, and the direct supervision of the development, construction and installation of the Lane-Galloway Trimmer devolved upon the writer.

The task in question involved close and systematic observation of the con-

ditions at this terminal, the tonnage and character of material handled, and the physical characteristics of the various vessels to be loaded. These and other elements involved in the Curtis Bay situation were carefully studied in their entirety, and weighed in their relation to each other, the final result being the installation of four Lane-Galloway Trimmers.

The success of these machines, in practically eliminating hand trimming, has exceeded the most sanguine expectations. The record for the new conveyor-belt coal pier, before the installation of the Lane-Galloway Mechanical Trimmers, was made during the month of October, 1919, and these figures, shown in comparison with those for October, 1920, one year later, at which time four (4) Lane-Galloway Mechanical Trimmers were working, are tabulated on this page.

It is apparent from the following table that the Lane-Galloway Trimmers have had the effect of tripling the capacity of this pier. This is all the more remarkable when it is considered that capital investment involved in the installation of the trimmers is very small.

The record for October, 1920, when an average of 1342 tons per working hour was placed in vessels, is believed to be the world's maximum. It must further be borne in mind that this tonnage was placed in all classes of ocean-going ships.

The only objection so far raised against the mechanical trimmers proceeds from the crews of vessels in which they work, and is founded upon a senti-

Comparative Record, Curtis Bay Conveyor-Belt Coal Piers, Before and After the Installation of Lane-Galloway Mechanical Trimmers

	Without Mechanical Trimmers October, 1919	Four Trimmers Working October, 1920	PERCENTAGE INCREASE
Total tonnage of coal handled during month.....	266,533	622,097	133%
Total number of cars unloaded.....	6,003	13,504	125%
Average number of cars handled per working day.....	207	500	†
Average number of tons placed in vessels per working hour....	460	1,342	192%†

NOTE—† Average working day in 1919, 20 hours. Average working day in 1920, 17 hours.

ment which recently found expression in the following words, uttered by a member of a ship's crew:

"The trimmers are no good, because they load the boats so fast that we don't get shore leave."

To the Shipper, Household Goods Are "Household Gods"

Their Sentimental Value Makes Extreme Care in Packing and Carriage Desirable

By E. H. Brewer

Secretary to General Freight Claim Agent

CLAIMS on shipments of household goods are of a more intimate and personal nature than any other claims for loss or damage handled by the Freight Claim Department. Household goods become "household gods" to the woman who is shipping them, and who often attaches to them a sentimental value (in dollars) far beyond their actual worth. Naturally, when lost or damaged, the satisfactory settlement of claims is usually difficult because of this factor.

It has been our practice to dispose of these claims, when it is definitely decided the Company is at fault, on the basis of the bill of lading contract. But the peculiar value attached to household goods by shippers has made it especially desirable that such shipments be afforded an unusual measure of protection.

Hence we have given the subject considerable thought, and in our Freight Claim Prevention work we have been able to gather considerable data of interest to shippers and forwarders of this class of freight. This was compiled and published in a booklet called,

"REQUIREMENTS FOR THE PROPER PREPARATION OF HOUSEHOLD GOODS FOR SHIPMENT."

This booklet covers essential data for the proper preparation of household goods for shipment, with illustrations of shipments properly packed and not properly packed.

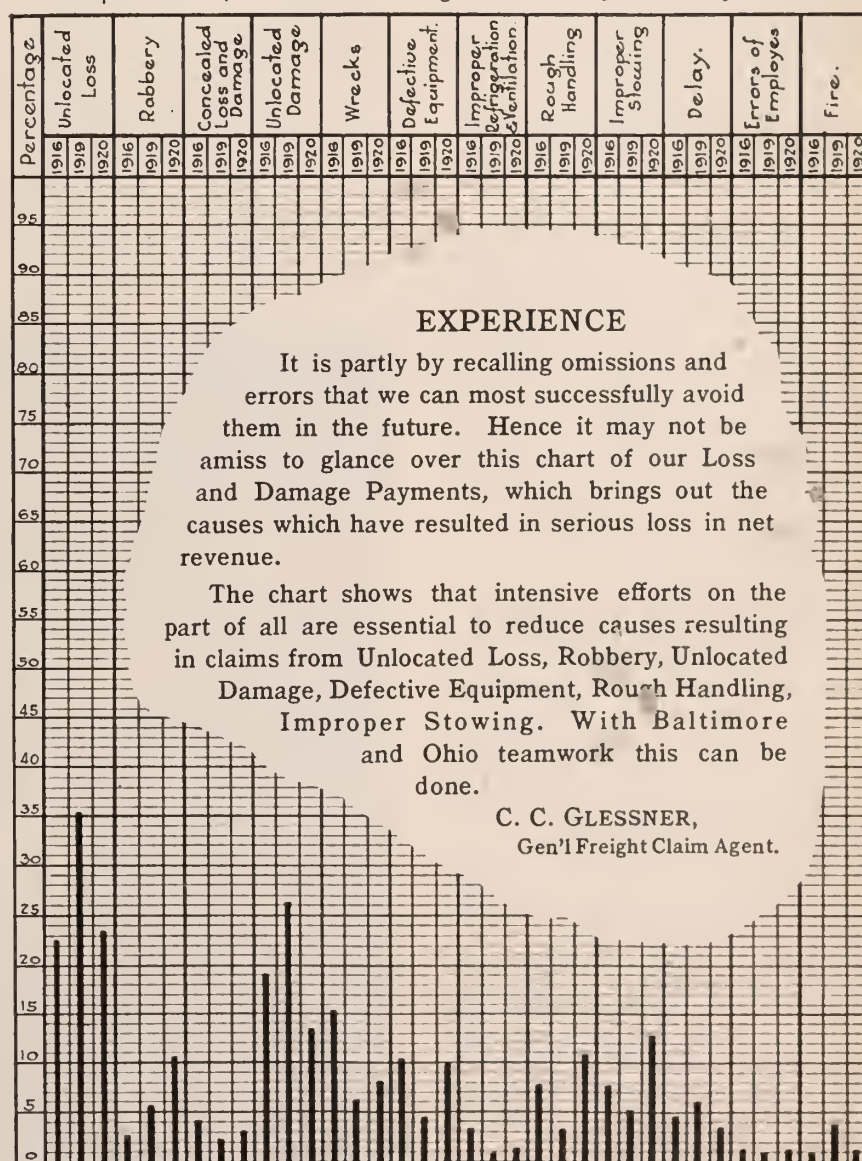

We are very gratified to note the interest which has been displayed in this pamphlet by forwarders and shippers of household goods. Among the many letters we have received asking for additional copies was one from the New York agent of one of the largest forwarding and shipping companies of this country. He also asked if this pamphlet was copyrighted and if they would be permitted to have it reprinted for the use of their patrons. We also had printed 5000 of these pamphlets, but this

supply was soon exhausted and we have since received requests from various forwarders and shippers for 2500 copies additional, with every mail still bringing in more requests.

From the number of requests received for this booklet we feel that we have planted the seeds of CLAIM PREVENTION on shipments of household goods and trust that they will soon bear fruit in the shape of a reduction in the number of claims filed on these shipments.

It is a fact that freight rates in relation to present prices of nearly all commodities are lower than they were in 1914.

Comparison of Loss and Damage Claim Payments by causes.

EXPERIENCE

It is partly by recalling omissions and errors that we can most successfully avoid them in the future. Hence it may not be amiss to glance over this chart of our Loss and Damage Payments, which brings out the causes which have resulted in serious loss in net revenue.

The chart shows that intensive efforts on the part of all are essential to reduce causes resulting in claims from Unlocated Loss, Robbery, Unlocated Damage, Defective Equipment, Rough Handling, Improper Stowing. With Baltimore and Ohio teamwork this can be done.

C. C. GLESSNER,
Gen'l Freight Claim Agent.

Total Claim Payments, 1916 \$1,154,390
Total Claim Payments, 1919 4,420,086
Total Claim Payments, 1920 3,801,139

The Tale of the Semaphore

By John W. Wolfe

THIS is the story of a thing that happened at an altitude of ten thousand feet; but it had its beginning a mile nearer sea level.

It was summer, after the completion of the big tunnel on the Invincible Line, when I was holding down the night trick in the train dispatcher's office in Glenburn. On the night in which this story begins I had just relieved Brooks and was comfortably seated with a pipe, fresh-filled and lighted, and the train sheet before me, when the chief came in.

"You needn't mind about checking over," he said, briefly. "You're elected."

"Am I?" I said with a good deal less interest manifested than felt. Barring sarcasm, election meant promotion, and promotion to a young chap is like a full cup to the wine-bibber.

"You are that; you are to tackle the 'mystery' up at the tunnel block. You can go out on No. 10; that will give you 35 minutes to pack your grip."

My jaw dropped and the full cup spilled itself through a hole in the bottom. "The devil you say! What has the old man got against me?"

Brooks just stood there and grinned. "Perhaps you had better go and ask him," he suggested, this time with the sarcasm spelled out in full.

I thought about it for a moment. When a man begins to take backward steps in the railroad business, it is time to quit.

"I'll be hanged if I don't," said I, and I went forthwith.

Superintendent Clarke's office was at the end of the long corridor, and I was lucky enough to find him at his desk. Now with this particular "old man," brevity was ever the soul of wit. So I let him have it straight.

"Brooks say's I'm to go to the tunnel block on No. 10 tonight. What have I done to kill myself, Mr. Clarke?"

The old man's heartiest laugh was never more than a pale ghost of a grim smile, and he gave it to me.

"I like your nerve," he said. "It's nothing you've done; it's something we want you to do. There have been five men on that block in as many months and every one of them has fallen down. I want you to go up there and find out just what the trouble is."

Of course, that settled it. I legged it for a car to go and tell Anne, and to get what could be crammed into a grip at such short notice. I was keen enough to go now, you bet.

Being a railroad man's sister, Anne limited her protest to a dismayed, "Oh, dear! Just when we were so nicely settled." But she went to packing the grip, asking a half-hundred questions about the tunnel block station and its mystery as a running accompaniment.

"I can't tell you a thing more than the dear old man told me," said I. "Each time there has been a scare, nobody hurt, and a fired operator who evidently wouldn't tell all he knew. That's all there is to it."

"Do be careful, Jack," she begged, when she let me out at the door. "And you know your weakness; if there are any pretty girls around—"

I laughed. "It's a block signal station on top of the highest mountain on the line, Anne, dear—not a female seminary town. I shan't see a skirt till I get back to Glenburn—much less have a chance to propose to its wearer." And with that I kissed her and ran for the downtown car. Do you know I think a mighty lot of Anne. She is no end sensible.

It lacked less than an hour of noon the following day when the big engine, with Al Smith at the throttle, whisked No. 10 out of the curbing snow-shed and came to a stand with brake shoes squealing at the little block station on the sky side of the embankment on the shed of the tunnel.

I dropped off and found Jones, the retiring operator, all ready to say "Hail" and "Farewell" in one and the same breath.

"Oh, it's you, is it, White? I did not know whom the old man would send. Good luck to you. The air's too thin up here for me and I'm off."

"Going West?" I inquired; "not going in to fight it out?"

"Nary; they try to make me talk, and that I won't do. You won't, either, when your turn comes."

"But, say, you might give me a hint of what he's to expect," I protested.

"I'll tell you what fired me, if that will do you any good. I set the signals for No. 4 last night, and set them right; I'd swear to it on a stack of Bibles a mile high. Joe Brown was running, and when he trailed out of the tunnel and saw the wig-wag wrong, he had a blue spasm trying to make the 249 rear up and stop in her own length. Of course, he made me report it, and equally, of course, I got the 'g. b.'"

"But hold on; tell me—" I got no further in the cross-examination. Smith and the conductor had signed

their orders, and the air was hissing in the brakes. "So long," said Jones, making a run for it; and a minute later the black tunnel mouth had swallowed No. 10, and I was alone in my kingdom.

If you cared anything for scenery it wasn't such a bad kingdom to look at. Out of the window on the sky side there was a view that carried you with your heart in your throat clear and away across a valley a thousand feet deep to the piled up masses of the Range beyond.

But on the terrestrial side the kingdom was narrower. Two double lines of glistening rails in front, merging into one 300 yards to the west at the tunnel portal, and again into one 300 yards east where the mile long snow-shed began; these on a 30-foot embankment cut like a notch around the steep shoulder of old Invincible.

This was the view from the bay window of the block office. It stopped short at the tunnel on the right and at the snow-shed on the left, and for a background the fir-clad mountain side rose sheer from the passing track ditch from end to end of so much of the right of way as lay open to the light of day.

It was the devil's own place for a wreck, and I did not wonder that Joe Brown had a "blue spasm" at the sight of a wrong signal. A train rarely leaves the iron on the inside of a curve, and for its outer boundary this curve had a cliff wall and a drop of 500 feet in the clear.

As a matter of course, the first thing I did was to overhaul the signals. There were two of them, one at either end of the passing track; a mast semaphore with a weighted, hinged arm at the top to be raised at the horizontal "block" by means of a wire pull running through a box at the track side to the operator's table in the station. Opposite the arm at the top of the mast was a signal lamp with a "white" light looking each way. The heel of the arm carried red glass disks to make a danger signal of the light when the semaphore was set at "block."

Being on an open line (main) and intended only to protect a siding in the extra hazardous bit of track between the tunnel and the shed, the working of these safeguards was the reverse of the usual. In busy yards the semaphores stand automatically at "block" until the signalman changes them. Mine hung at "clear" until the rings in which the office end of the wire pulls terminated were hauled up and hooked, each over its respective peg in the bay window frame. By this means the "block" was raised by the act of the operator

and the signal could return to "clear" only when the wire pulls were released in the office.

The story hangs upon the mechanical detail here given, so I trust I have made it plain.

Now to get back to that first forenoon. I looked to every detail of the semaphores, filled the lamps, oiled the bearings, and worked at the signals with the office pulls until I was positive that everything was in perfect order.

By that time it was past noon, and it struck me all of a sudden that I had neglected to ask Jones how the operator at the block was supposed to get his meals.

There was a telegraph station at the west end of the tunnel, and I called up the man at the key.

"Say, how does a fellow eat over here?"

The reply came as prompt as a parrot's. "With his fingers, if he isn't fortunate enough to have a knife and fork."

I gave the smart Aleck as much of a Scotch blessing as the rules would stand, and now he recognized my "handwriting."

"One on me, White, my boy," he clicked back. "Thought you were some kid the old man had sent up.

Tell 'GS' (the train dispatcher's office) you are going to eat. Then go up the mountain in front of you till you come to a gulch, go down the gulch 'till you come to a cabin, and there you are."

I did it all in proper sequence and found the cabin as set forth in the weird itinerary. It was a substantial log affair and looked as if it might have been built to live in the year around.

The door stood open, and when I came near enough to darken it I saw within and forgot to knock. In the middle of the room was a dining table, set and waiting; in the chimney corner sat an old man, white-haired and fiery-eyed, looking as if he might be no other than the selfsame old gent with whom Sinbad the sailor had so much trouble, and, tripping back and forth between the fire and the table, her curls flying and her cheeks flushed—but it's no use; I can't describe her to you. Anne knew what she was talking about when she slipped me that word about pretty girls.

There was no need of my introducing myself. Instead, she came to welcome me sweetly as if she had been the Sleeping Princess and I the long-expected Prince Charming.

"You are awfully late," she said.

"Mr. Jones always came exactly at 12." And when I stumbled in: "Father, this is Mr. —" "White," I stammered, and she went on without a break—"Mr. White, another of our friends."

The old man gave me a look which might have meant anything from "good morning" to "go to the devil," and said not a word. But he dragged his stool to the table, and we three sat down.

That was the beginning of it, but it wasn't the end. An end implies something completed, and when I tore myself away from the table at the very last moment of an ecstatic half hour, there was nothing completed, save the shackles wherewith I was bound to this sweet wild flower of the mountains.

I can't remember of what we talked. I know I almost made a fool of myself. Also that the old man had been to appearances deaf and dumb, favoring me now and then with a stare, which was mighty curious.

If it were curiosity, I could own my share of that, too. Who were these two, and what were they doing in this lonely gulch? In a wire lull I asked a guarded question of the west end man, who told me all he knew in three lines: "The old Philistine is a crazy prospector, nobody knows where from, been there since the year one, daughter boards you to keep the pot boiling."

But old Reilly, the trackwalker making his afternoon round of the tunnel and the snow-shed, gave me better information—or at least more.

"Crazy, is it? Devil a wan bit, Misther White. 'Twas himself as had a pr-spect hole right where the track do be now, just betune this and the tunnel. That was before the gr-raders came. They blasted out the cut and he lost his lead, an' sure, he has been lukkin' for it be day an' be night since."

Here was food for reflection. Was the old man at feud with the railroad for losing his prospective mine, and was he vindictive enough to square the account by tampering with the signals?

I would not believe it of the father of such a girl as Alice Deane. Besides there was a simpler solution of the mystery. The operators of the block had been falling in love with Miss Deane, one after another. From loving in vain to losing your grip is but the shortest of steps.

It was working around toward evening before I began to wonder how I was going to get my supper. As the time card stood, four trains were due between six o'clock and eight and I dared not leave the key.

This was the beginning of it, but it wasn't the end

But, lo and behold! at 6.30 to the minute came Miss Deane bearing gifts, a basket, napkin-covered. With a merry laugh at my start of surprise she set out a little table at my elbow and poured the coffee for me.

"Say, little woman, this won't do," I began. But she grounded the protest wire in a word.

"It's a part of the bargain, although you did not make it so," she said. "I know all about the time-tables and you can't get away till after eight. That is too late for supper."

Of course, I let her have her own way, but I made her sit down and have a cup of coffee with me and then I turned my back on the workaday world and saw nothing but the heavenly blue of her eyes, and heard nothing but her artless prattle until it was forcibly driven in upon me that Disbrow was calling "TB," "TB," "TB," on the wire with a snap of ill temper in his fingers.

I tore myself away and took Disbrow's wiggling like an angel. It was a preliminary to the preliminaries for a train order. No. 3, freight, due at the block at 7.10, was late. Hence it must be held at my passing track for No. 7, the eastbound night passenger.

I set the semaphores to "block" (I remember I had to reach over her shoulder to hook up the wire that set the snow-shed signal), "O. K.'d" the instructions and went on with my supper and the bliss path in the depths of the blue eyes. Ten minutes later the roar of the fast freight came thundering through the snow-shed and from sheer force of habit I glanced at the semaphore. It was just dusk and I could see both the signal arm and the "lamp." Though I had but now set it at "block," the semaphore stood at "clear," giving the freight the right to pass without stopping.

In the turning of a leaf I had a terrifying picture of all the murderous detail of a collision in mid-tunnel, and with a yell of horror I was up and out and racing down toward the snow-shed, making frantic stop signals with my lantern as I ran.

Then came the other half of the mystery. Before I had sprinted halfway to the signal post, the arm went up with a click and the lamp flashed from the white "clear" to the red "block."

I stopped short and rubbed my eyes. If they had deceived me before telling the truth now, for at that moment the headlight of No. 3 glowed in the shed portal, and the hoarse bellow of the whistle answered the "block" signal.

The freight was pulling in on the passing track when I went back to

the office. The girl had gone and with her all traces of the unfinished supper. I set it down to a very proper disinclination on her part to have the crews of the passing trains find her there talking with me; but afterward . . .

Happily, I can speak of the "afterward" calmly now, but for a month I lived the life of the condemned in torment. When the busy evening time came, I could never be sure of those cursed signals or of the evidence of my own senses. Time and again I had to snatch up the office lantern and race out with my heart in my mouth, and as often the tricky signal would flip back to "block" before I could reach it.

And, mixing up with the torturing horror of it was a keener pang. I knew I was falling in love with the daughter of the mountain, and I knew the girl with innocent blue eyes was playing the part of Delilah at the bidding of her murderous old Philistine of a father.

You may be sure I fought this conclusion to the last ditch. But it would not be denied. The nerve-racking thing never happened save when she was with me and though I am sure now she did not release the signal wire in the office, I could no longer doubt that she was there to hold me in play while her father did his devilry outside.

What that devilry could be was a Chinese puzzle, but I solved it at last.

Of course, I knew my duty was a full month old. I should have reported the suspicious circumstances to Mr. Clarke at once, letting the axe fall where it might. But love is mighty and for Alice's sake I put it off day by day, searching meanwhile, like a sleuth-hound, for the means by which signals were changed.

The revelation came one day when I found the marks of the nippers on the signal wire at the foot of one of the semaphore masts. Borrowing a hatchet from a passing section gang, I opened the track-side box through which the signal wire ran on pulleys to the office. At the removal of the third plank I found the leak. The wire had been cut and a stout coil spring, such as is used for straining barbed-wire fences, was toggled in the break. The spring was stiff enough to lift the semaphore arm when the wire was pulled at the office end, but a strong man taking hold of the wire with a pair of nippers beyond the toggle, could stretch the spring and get it slack enough to drop the signal to "clear."

Once again the reporting duty was plain, but I shall always be thankful

to my finger tips that I took the matter into my own hands.

Cutting out the coil springs, I spliced the breaks securely, and that evening when Alice came with my supper I was easy on the score of disaster, however sorely the heart-wound rankled.

That night the tunnel siding was again the meeting point for Nos. 3 and 7. But this time both trains were late and the freight pulling in on the passing track when the west end operator clicked me word that the passenger had entered the tunnel.

I snapped the key and excused myself hastily. The girl rose at once and began to gather up the supper things.

"You need not hurry," said I. "The freight is in the way and you can't cross to the path."

Nevertheless she took up her basket and followed me out, meaning, as I supposed, to go around the rear end of the freight. But when I had crept up stealthily to a point whence I could dimly make out the figure of a man crouching in the shadow of the tunnel signal mast, she was right behind me.

"Go back," I commanded; "this is the last hand in the game, but you need not stay to see it played out."

I heard her catch her breath as with a sob. "I—I don't understand," she faltered.

"Don't you? I would to God you didn't. Answer me this: where is your father?"

"Can't you see him? He is over there by the semaphore, waiting for me. He always comes when I bring your supper."

I set my teeth upon an oath. The low rumble of the passenger train gurgled in the black throat of the tunnel and the figure at the mast foot, straightened itself and began to tug at the wire.

What followed came in the twinkling of an eye. No. 7's headlight was an electric and when its great beams lit up the curve I saw the old man dash down the nippers and fling himself with a wild cry of rage fair in the path of the on-rushing train. The next instant he was hurled back to us a poor, crushed body, and the girl was alone in the world.

We buried him the second day after, the sectionmen and I, high on the slope of the Invincible Line. I wired for Anne. She came on the first train, and, much to my disgust, positively refused to take Miss Deane home with her.

"No, we have arranged all that," she said, airily. "It's my vacation, and I need a month in the mountains. We

shall live at the cabin and keep house for you and I'll bring your suppers."

It was on one of the supper-bringing excursions a month later that my sister took me to task.

"Do you know, Jack, that you are just breaking Alice's heart?" This without preface and after four trains had passed and I had filled my pipe.

"The deuce I am!" said I. "She played me for a fool and it was God's mercy that—"

"Be still and listen to me!" said my mentor. "Her father was a monomaniac on the subject of the lost mine—a harmless one, as she fully believed. He had a dream once that a train would run off the track and unearth the lost gold. She knew nothing of the attempts to make the

dream come true, and well—well, you are just breaking her heart."

"By believing that she made love to me at her father's bidding?"

"She did not and he did not. You stone-hearted thing! Can't you see an inch before your nose?"

"What should I see more than I do?"

"That she loves you for your own sake, you dear, old stupid!"

The windows were open and I flung my pipe into the abysmal immensities. Then I whirled quickly, snapped the key and called up Disbrow.

"Any more business?"

"No; go to bed."

"Thanks. I'm going to walk across the mountain with my sister. Good night."

always have, and just as sure as Tuesday follows Monday, always will. Living conditions change during such times of stress and anxiety; epidemics, such as the "Flu," gain great headway and cause much sorrow before some successful form of combating them is discovered. Working conditions change entirely. Some must be soldiers or sailors, while others remain at home to make proper clothing, prepare nutritious foods, and keep great transportation systems running smoothly.

Readjustment is necessary; we cannot get away from it. In the past few years farmers have been paid prices far in excess of the pre-war value of their crops. Those farmers who have saved and exercised thrift are the gainers. Labor and fertilizer will become cheaper, and although the prices paid for soil products will be smaller, the value of the dollar will be greater. Likewise, the millions of workers of the cities, especially those who made princely salaries, must endeavor to adjust themselves to a mode of living to meet the present conditions.

Railroad stockholders have invested their money and are entitled to just compensation. If these men had no faith in our honest endeavor to give efficient service that their money may prove a good investment, where would the railroads be, and where our positions? Citizens with money tied up in railroad stocks have received but little income from them in the past few years, and I am certain that it is our wish to see all concerned in the success of our great railroad systems justly treated.

Business prospects have already brightened considerably; textile industries, steel and various other mills have again started work. Several large enterprises in the vicinity of Baltimore will commence operations within a short time, and all indications point to a period of renewed prosperity. The buying value of the dollar is on the increase, and adjustments must be made to meet the reductions in the cost of food and clothing.

Get in the game of "chasing the joy-killer." There's a delightful musical comedy, with a pretty little song, "Look for the Silver Lining." Let's do it.

Look for the Silver Lining

By G. Fred Miller

Secretary, Auditor Passenger Receipts

WHEN pessimists are shouting in our ears "Look out for the cut in wages," "Look out for furloughs," and so forth, and depressing rumors come to us from all

directions, it's the time to buck up and be 100 per cent. Americans—100 per cent. loyal.

Such periods of depression follow in the wake of all great wars; they

Members of Crafts Now Present at Superintendents' Staff Meetings

New Castle Division Plan Put into Effect on Whole System

SUPERINTENDENT D. F. STEVENS wrote the Editor of the *MAGAZINE* on February 23 as follows:

"In order that supervising officers of the division may have the benefit of the direct suggestions for improvement and betterment of service, and in order that the men may become more closely aligned with the local division officers and better become familiarized with the problems which confront them, a plan has been devised on the New Castle Division of inviting members of the different crafts to attend the Monday morning staff meetings. It is felt that in this way these men, who are actually doing the work on the Railroad, will be able more promptly to bring to the attention of the officers the things that are in need of correction and which have escaped them; will give the officers the benefit of the judgment of the men; and will clearly indicate to the men that the officers have many trying problems, which they, with their intimate connection with the daily operation, may be of assistance in correcting.

"Such men as are available are invited to the Superintendent's office to these meetings and it is felt by both the men from the train and engine service represented as well as the officers, that the scheme has proved of mutual benefit to both. It will be interesting to watch the progress of this departure in modern railroading."

At the meeting held at New Castle on February 21, the following were present in addition to the division officers: Conductor J. E. Conley, Engineers E. F. Toepfer, C. F. Shriver and W. H. Maureman.

The following topics were discussed:

- Purpose of the Meeting;
- Handling Committee Matters;
- Use of Telegraph Wires;
- Percentage of Left Over Loads;
- Train Movement;
- Night Inspection by Officers;
- Fuel Performance;
- Overtime at Stations—Working of Clerical Forces;
- Revenue;
- Stoker Failures;
- Tonnage Reports;
- Locomotive Performance;
- Hot Boxes on Cars;
- Fuel at Warwick;
- Track Conditions.

As President Willard pointed out in one of his recent addresses in New York City, the greatest problem facing the railroads in the United States today is the problem of being understood. It is but natural that some employes on whom the curtailment of service and reduction in forces have worked hardship, should feel aggrieved. Yet the facts of the case are so clear that no reasonable man, once understanding them, can have any animus against the Railroad Company on this account. In addition, therefore, to the better mutual

understanding of technical operating problems which face the officers and employes of a division, it seems fair to assume that through the method adopted by Superintendent Stevens on the New Castle Division, and now extended over the whole System, there should come about a clearer conception of the general economic and social problem on the Railroad.

We commend this plan very heartily as being a step in the right direction and hope that it will be given a thorough trial. It will be appreciated if our superintendents will keep the *MAGAZINE* office in touch with the way it is working out, so that further report may be made in these pages, for the information of our entire personnel, of any modifications, additions or suggestions making for the success of the plan.

Quick Replacement of Bridge 31B at College, Maryland

By P. G. Lang, Jr.

Assistant Engineer of Bridges

AN INTERESTING bridge replacement job was completed on the Washington Branch on January 8. Three spans of double track structure were taken out and three spans of double track structure put into place. The total weight rolled was about 700,000 pounds.

No. 78, at 10.43 in the morning, was the last train over the old structure. The track was cut, the new structure moved into place, and the track made ready for traffic in 45 minutes. The actual time of rolling was three minutes and thirty seconds, with no delay to trains. No. 149, at 11.43 a. m., was the first train over the new structure.

Note the two accompanying photographs, one showing the old structure in place, with girders projecting above the tracks. The other view shows

No. 149 crossing the new structure, in this case, with no projection above the base of the rail.

No. 149, first train over new bridge

Just before the new bridge was moved into place

Conductors and Ticket Takers, Please Note

Until Collected, a Ticket is a Charge Against the Railroad

A PASSENGER recently boarded train No. 3 at Philadelphia, leaving at 8.30 p. m., occupied a sleeping car and rode through to Marietta, Ohio. He was handled by a Pullman conductor and three passenger conductors and no one asked him for his transportation on the entire trip. On reaching his destination he forwarded his transportation to the Passenger Department in Baltimore for cancellation.

It is reassuring to come in contact with a passenger as honest as the one mentioned. Unfortunately, however, we cannot count on having all our passengers whose tickets are uncollected do the same square thing. Most of the tickets which are returned to the Passenger Department in Baltimore are sent not for cancellation, but for a refund of the money which was originally paid for them. And investigation has developed that in many cases such tickets have been used by passengers for transportation but through some oversight on the part of conductors or ticket takers have not been properly collected and cancelled.

It cannot be definitely stated how much money the Company loses each year because of the sharp practices on the part of passengers who seek to avoid the surrender of their tickets, and through oversight on the part of our ticket takers. But the number of tickets sent in for refund makes it appear that this is a considerable sum, the loss of every penny of which counts just as much against the interest of the employees of the Railroad as it does against the Company itself.

Here is a leak in our revenues which is called to the attention of our conductors and ticket takers in the belief that this little reminder will increase the care and watchfulness which they give to this important item. Please be sure to get the passengers' tickets. Please remember that within its time limit the ticket is a potential charge against the Company's revenues unless taken up and cancelled, and that money taken in at the ticket window means nothing whatever on the credit side of our business sheet, when the same money has to be refunded to the passenger who "gets by" without surrendering his ticket.

steadily during his almost 40 years of continuous service with the Company. One of the oldest traffic men of the Railroad, a friend who knew Mr. Constans intimately, paid this tribute to him soon after his death:

"Mr. Constans won his way step by step up the ladder in the Freight Traffic Department. By hard and careful work and by analyzing problems most thoroughly before making any decisions or attending meetings to discuss them, and by his thorough knowledge thus acquired he generally succeeded in reaching fair conclusions, which naturally redounded to the best interests of the Company. He was considered a leader and authority on Freight Traffic questions, and his judgment was held invaluable.

"His genial disposition and willingness to help others, gained and held for him many friends, both on the Railroad and among shippers. He was straightforward and honest in all his dealings and made the interests of the Baltimore and Ohio of paramount importance in his daily work."

In his telegram of sympathy, the traffic manager of one of the largest shippers in the United States said:

"We learn with great regret of the death of Mr. Constans. We feel that your Railroad has lost a very valuable man and the shippers a good friend."

Oscar A. Constans, Late Freight Traffic Manager, Northwest District

THE sudden death on March 8 of Oscar A. Constans, freight traffic manager at Chicago for the Northwest District, came as a great shock to his many friends on the Baltimore and Ohio. He was stricken on the morning of March 3, in the General Offices in Grand Central Station, with what appeared to be acute indigestion. He was taken to his home in the afternoon, when his illness was diagnosed as uraemic poisoning, and he lingered, part of the time conscious, part unconscious, until his death.

The short funeral services in Chicago on March 9 were attended by many of his fellow officers and employees. The remains were then taken to Columbus, and after a further service at the home of his sister-in-law there, interment was made in Green Lawn Cemetery of that city. The pallbearers were George M. Kridler, general freight agent, Chicago; R. L. Galleher, division freight

agent, Seymour; J. W. Melone, district freight agent, Chicago; D. E. Sullivan, division freight agent, Garrett; E. N. Kendall, division freight agent, Newark, Ohio, and E. L. McWilliams, chief clerk to Mr. Constans. Among the large number of officers who attended the service at Columbus were R. N. Begien, general manager, Western Lines; F. B. Mitchell, general superintendent, Southwest District; O. S. Lewis, general freight agent, Pittsburgh, and R. A. Ebe, general live stock agent, Baltimore. Floral tributes came from officers and employees at many places on the Railroad, notable offerings being those from the officers of the Freight Traffic Department and from former Vice-President A. W. Thompson.

Mr. Constans was born in 1862 and entered the service of the Company on May 1, 1882, as secretary to the general freight agent at Columbus. His promotions were gradual and

The man who is worthy of being a leader of men will never complain of the stupidity of his helpers, of the ingratitude of mankind, nor of the inappreciation of the public. These things are all a part of the great game of life, and to meet them and not go down before them in discouragement and defeat is the final proof of power.—*Fra Elbertus.*

The late Oscar A. Constans

Safety Section

Special Sixty Day Drive on Accidents, April 1 to May 31

By W. F. Braden
Safety Agent

ANOTHER important Safety activity is now under way on the Baltimore and Ohio Railroad and it promises to be a strong instrument for the further reduction of the number of injuries to employes.

The recent exhibition of the remarkable motion picture, "Bulletin 70," helped materially in the reduction of the number of accidents of all kinds. There was only one fatality on the System the entire month of February, and also an appreciable reduction in the number of personal injuries.

This exhibition, which attracted so many thousands of the employes and their families, followed on the heels of a "No-Accident Campaign" that embraced the whole System and during which an enviable record was made in the reduction of train accidents and injuries to employes.

Now comes a special accident prevention drive which should arouse the sympathetic support of those who are actually employed in the zones of operation affected and also of the other employes.

It started April 1, and is to be continued for 60 days from that date. The campaign already gives indications of arousing unbounded interest. The several thousand of employes in the places selected for this special test seem to be headed towards an unusual record. The places where the special test is being tried out are as follows:

Eastern Lines

East Side (Philadelphia), Pa.
Brunswick, Md.
Cumberland, Md.
Glenwood, Pa.
Riverside (Baltimore), Md.
Mt. Clare (Baltimore), Md.
Keyser, W. Va.
Grafton, W. Va.

Western Lines

Washington, Ind.
Ivorydale, Ohio.
Toledo, Ohio.
Garrett, Ind.
Lorain, Ohio.
Newark, Ohio.
Chillicothe, Ohio.

Other System Points

New York Terminal Lines.
Baltimore and Ohio Chicago Terminal.

In preparation for the special Safety test, officers and employes were organized along the lines of group units, which was so effective in

the Liberty Loan campaigns. It is expected that in this manner each employe will be reached intimately.

Master mechanics, yardmasters, supervisors, foremen and others having jurisdiction over groups of men have been impressed with the fact that they will be held responsible for the carrying out of every Safety Rule and reducing accidents to a minimum.

It is planned to make those in a supervising capacity realize that insistence upon the observance of the Safety Rules and the consequent reduction in the number of accidents is one of their principal functions, and not an incidental one.

At the points chosen for the test not only will the shops be affected, but the yards and the immediate vicinity. Motive power and maintenance of way employes are also included.

Forget Safety and Here's What Happens

A machinist working at a lathe in Washington (Ind.) shops, was turning brass and had his goggles adjusted to protect his eyes. Finding it necessary to get some tools, the machinist pushed the goggles up over the peak of his cap. Upon returning to the machine he raised his hand to readjust his goggles and at the same time looked closely at the brass he was turning. A small piece of brass penetrated his eye. The doctors say he will probably lose the eye.

Noticing that an air hose was burst on a train that was being made up in Benwood, W. Va., yard, a car inspector attempted to make repairs. He did not think it necessary to put up a blue flag or to tell the train crew that he was going to work between the cars already on the track. Cars were shoved on to the track from the East and the inspector was caught between two of them and his hips crushed. He spent 19 days trying to regain the use of his limbs.

A brakeman on the Chicago Division was assisting in setting off a car that bulged and that might cause trouble if it was carried along the road. It was necessary for the car to be shoved past a viaduct. The brakeman knew the clearance was close at the viaduct, yet he stood on the stirrup and held on to the grab irons. Just before attempting to alight dust blew off the cars into his eyes and he forgot to alight, with the result that his body was struck against two steel posts supporting the viaduct. The second blow threw him from the car. He spent many days recovering.

Engaged in holding one end of an eccentric crank arm that was being removed from an axle in the shops at Connellsville, Pa., a machinist helper was injured when the heavy arm fell on his foot. The machinist was prying off the crank arm with a bar and had told the helper to get a firm grip on it. The weight was too great for the helper when the crank arm came loose from the axle and he had to let it fall. His instep and toe were crushed and he was off duty for a long time.

"I was in a hurry and did not examine nipple as carefully as I might have had I not been in a hurry." This was the explanation given by a boilermaker at the roundhouse at Storrs, Ohio, after he had been injured. He was attempting to connect the hose to an air hammer and had partly screwed the nipple on to the hammer when it fell upon his foot. The threads in the nipple had worn off. His toe was mashed and he spent five days at home nursing a painful wound.

Mounting a platform a machinist and his helper at the shops at Ivorydale, Ohio, were tightening a cover dome on the steam chest of a locomotive. A bar was placed in the socket of the wrench to give it greater leverage. The machinist held the wrench on the nuts and the helper tugged at the bar. The wrench slipped from the nut and the helper pitched from the platform. His arm was broken in two places. It was stated that the machinist should have used a "thinner" wrench that would have passed between the ribs on the cover.

To stimulate interest, the component units at each of the test places will be designated by numbers and the performance of each unit will be announced daily and the result posted in conspicuous places. These reports also will go to the superintendents, general superintendents, superintendent of the Safety Department, general manager (on the Western Lines) and to the vice-president in charge of Maintenance and Operation (on the Eastern Lines).

One of the special features of the test will be the rigid investigation of

each accident involving personal injury in the places designated. If it is shown that any foreman or other supervising officer is to blame because an accident happened where it could have been avoided had the Safety Rules been enforced, there will be an entry placed against his record to that effect.

Every two weeks during the campaign, general superintendents will arrange for meetings at the test points, when the record already made will be gone over and arrangements made to carry on the work more vig-

orously. At these meetings the general chairman, in charge of the group captains, will report conditions and suggestions for continued success.

During the closing days of March, the general superintendents, in conformity with instructions issued for the conduct of the special test, assembled their officers at the places on their territory selected for the campaign and planned their organizations to reach every branch of the service there. Unusual enthusiasm was manifested everywhere. All realized the benefits that would accrue from such a campaign and officers imbued the employees with their enthusiastic feeling.

The employees caught the spirit of the campaign from the very start and on April 1, it was evident that the personnel at every test point was ready to exert every effort for making an unusual record in reducing accidents to employees. On every hand could be heard the conviction expressed in no unmistakable terms, that the end of unsafe practices in railroad operation on the Baltimore and Ohio had come. All determined to strive for the goal of "No-Accidents" and to rest not a moment until it was won.

"Willing Worker" Sometimes a Menace

THE "willing worker" is not always a safe man around a railroad, although he is always popular. A request for service usually brings a ready response. Sometimes, even, he anticipates a request and gets to work.

One of these "willing workers," a brakeman, was riding on an engine between Lima and Dayton. Without warning to the engineer or fireman he took down the squirt hose and began wetting down the deck of the locomotive. He was using scalding water. Unwittingly, he directed the stream of water into the shoe of the engineer. Before the latter could remove his shoe, his foot was scalded and he was off duty 20 days.

The brakeman was "mighty sorry," but his carelessness meant the loss of the service of a good engineer at a time when enginemen were in great demand.

Are We Alive?

The best answer to this question now is—"Yes, if we can get business."

What shall it profit us to operate 100% efficiently if we can't get enough traffic to operate on!

A Business Getter.

Drinking Water

By Dr. Roy C. Potter

Medical Examiner, Chillicothe, Ohio

ALTHOUGH the principal purpose of this article is to emphasize the importance of the chemical purity of the water we drink, it is instructive to consider the use of water in general.

The maintenance of life depends to an almost incalculable extent upon the accessibility of an unfailing supply of water. Without it the earth would be an arid desert, devoid of the vegetation and plants which provide sustenance for all the creatures that inhabit it.

Water in History

The requirements of the early tribesmen were adequately met by springs, pools and shallow wells; and readers of scriptural records must recall the importance attached to these sources of supply. Villages and towns came into existence because of the purity and constancy of the water supply, and these communities grew into large groups, and eventually nations. Even in this day nations at war use every effort to protect their water sources and reservoirs, for it would mean early annihilation and defeat if the enemy could pollute or cut off this indispensable element.

As civilization has advanced, with a constantly increasing tendency toward the coming together of groups of people to form towns and cities where industrial enterprises have grown to hitherto inconceivable proportions, provisions for an adequate water supply for every human need are imperative. For this reason, mainly, it has become the duty of the public authorities, or the local government, to control the water supply; this sometimes takes the form of municipal ownership and operation, but frequently involves no more than a close supervision of private enterprises engaged in water distribution for profits.

Health Departments Keep Water Safe

The maintenance of the public health would be no more than a farce if State Health Departments did not have unlimited power to pass upon the purity of water from every source and to prohibit the use of such water as was proved, after analysis, to be impure through contamination or pollution. This jurisdiction covers wells, springs, pools, or other sources of supply upon the property of the isolated farmer, as well as the water-sheds and storage reservoirs of great cities. It is an illustration of the principle that the healthfulness of a community or nation depends entirely upon the conservation of the health of every individual comprising the group. As one sick man may be the source of infection of thousands of his fellow-citizens, it is the right and duty of the health authorities to intervene and take measures that will restore the sick man to health, or make it difficult for the infection to be transmitted to other members of the community. The same principle operates in the public control of the water supply, as one contaminated well or spring on the isolated farm of a dairyman has been known, many times, to have been the source of a widespread epidemic of typhoid fever which took a heavy toll of human life.

Watch Your Drinking Water

It is our personal and individual duty to assure ourselves of the purity of the water we drink or use for cooking purposes. Purity or fitness for human consumption is not established because the water looks good and clear, or tastes right. This is especially applicable to the water obtained from springs, shallow wells or small streams: all of these sources may be polluted by filth-laden surface water or drainage from cess-pools, barnyards and stables, and the impurities cannot be detected by its appearance, taste or odor.

As water supplied to dwellers in large cities is under constant inspec-

tion and analysis by competent chemists, we may ordinarily use it without risk, unless warned by the authorities that it should be boiled as an additional precaution. It is principally the rural sources that should be viewed with suspicion and avoided unless one is certain of their purity.

Don't Drink Water from Engine Tanks

Among railroad trainmen, particularly those in engine service, it is a common practice to drink water stored in the tank. This is intended solely for use in the boiler and contains many impurities which render it unfit for taking into the stomach. Hence, for all practical purposes, it is just about as safe to drink a cupful of such water as it would be to swallow the same quantity of fluid filled with all sorts of wriggling and squirming germs. We must have water, and when we are so situated that our needs can only be met by resort to a supply which is under suspicion, or the history of which is not ascertainable, it should be sterilized by thorough boiling.

Every householder should learn, as soon as possible, the quality of the water used constantly for drinking and cooking, and may do so by forwarding a sample taken from the source of supply to the State Board of Health, by which it will be analyzed. The purchaser of a property upon which water is obtainable from shallow wells or springs should satisfy himself that they are so located as to make it unlikely that surface drainage or filth from cess-pools flows by gravity or seeps into them.

Drink Good Water Copiously

Very few people drink enough water, and not many know how to drink so as to get the most benefit from it. Immunity from infection by contaminated water does not lie in total abstinence, but rather in a careful choice of pure water; and when this has been found, enough should be taken daily to meet the needs of the body.

A glass of water upon awaking each morning, either cold or hot, is a sovereign remedy for constipation when taken with regularity. Drink copiously during the day, between meals, to replenish the fluids appropriated by the body in its systematic repair and the elimination of waste material; this is particularly necessary during the heated term, when profuse perspiration draws heavily upon the fluid contents of the human body.

Avoid excessive use of water with meals, so as to prevent undue dilution of the gastric juices necessary

for the proper digestion of food. Americans are said to be the only people who manifest a fondness for iced drinks, and it has been alleged that this explains why we suffer from impaired digestion so universally that we are known as a nation of dyspeptics. Iced water or other beverages should be taken sparingly, swallowed slowly, and never used when the body is overheated, for very severe illness may ensue through the sudden reduction of the body temperature.

Avoid the Common Drinking Cup

No discussion of drinking water is complete if it does not urge the vital importance of the use of an individual drinking cup. The most loathsome and repulsive diseases that afflict humanity have been communicated widely and disastrously through the use of the common drinking cup, and if one has not provided the individual

cups that may be conveniently and constantly carried in the pocket, it will be much safer to suffer the pangs of a burning thirst for a short period than to run the risk of acquiring a disease which taxes the skill of professional men to cure or arrest after the infection has been discovered.

The Baltimore and Ohio Railroad has, through its medical staff of the Relief Department, a well-organized system for the periodical examination of the sources of water used for every purpose, and at every point on its lines; so that its employees everywhere, and the patrons of its passenger service, may be assured of the purity and safety of the water supplied for their use. Moreover, an intensive campaign has been undertaken against the common drinking cup, and sanitary fountains have been installed at every point where conditions justify and permit them.

coming into the yard. Gee, don't they look nice? They never shine me up like that, and I bring in a lot more revenue than they do, too. But then the working man is never appreciated.

I just got in yesterday with a load of Fords from Detroit. They had me loaded down something fierce. I guess it's my duty to carry as much as possible, but it's sure hard on the underframes. It took me three weeks to make the run from Detroit. I got held up in Toledo in bad order. I really had a bad case of hot box and rusty axles. Staying in Toledo over two weeks isn't any fun either. No wonder Dempsey knocked Willard out so soon! Guess he was mad because he had to go there. Anyway, Toledo is no place for an Irishman.

Whew! I'm dirty. They might brush off my floor once in a while even if they don't ever paint me. But what do some of these birds care! You can hardly read my number anymore. Oh, prunes! here comes that darned switch engine—look out—Boy! He almost knocked my end door out. Guess they are going to weight me again. Tomorrow I'll have to be loaded. Well, I hope they don't put any junk into me. It rattles too much. Well, here we go and my left hind wheel is so sore I can hardly roll. Oh, mama, but I do need some rest.

What a Box Car Thinks About

By E. W. Spille

Correspondent, Cincinnati General Office

GR EAT essence of shoe leather, but it's cold here. Wish I was an F. E. Car and got down to Palm Beach once in a while. As it is, the only place I ever reach is Cincinnati,

Toledo or some such town. There's nothing aristocratic about these places.

And speaking of aristocrats, look at the string of new passenger coaches

Mrs. Leary Thanks the Accounting Department Employees for Memorial to Her Late Husband

MRS. JAMES T. LEARY
704 WASHINGTON, EAST
FORT WAYNE, IND.

The Officers and Employees of
The Accounting Department of
The Baltimore and Ohio Railroad:

I desire to express to you my sincere appreciation for your kindness and sympathy and your regard for my husband, which is so evident in the splendid memorial you have erected in his honor. Realizing as I do, that such honor has seldom, if ever, been accorded to one in his position, it is with a sense of deepest gratitude that I write this.

To know that his memory is to be perpetuated and that he will continue to live in the minds and in the hearts of all those who in life were such good friends, is a comforting thought, and I know that it would be his wish, as it is my own, to thank you each individually for this great tribute.

Very sincerely yours,

(Signed) ALICE LEARY.

An Easy Way to Get a Home

WHEELING, W. VA., January 3, 1921

MR. W. J. DUDLEY, Superintendent,
Relief Department,
Baltimore, Md.

Dear Sir—Just a line to let you know I received all of the papers that you held, under which I obtained a loan, and I am surely pleased that I have my home paid for and am glad that we have such a nice way to obtain a home.

In regard to making deductions at present, we want to have the houses painted and wired for electric lights this Spring, and it will take about all I can save for a while, but would like to start in the Savings Feature soon after and will write to you for a book.

With my kindest regards and best wishes for a prosperous New Year, I am,

Very respectfully,

(Signed) LEE R. MCFANN,
Engineer.

The Passenger or the Pass

The action of a number of railroads in reminding their employes that in crowded coaches pass holders are expected to surrender their seats, when necessary, to passengers, has received a good deal of favorable newspaper comment.

It will perhaps be recalled that on this page in the September, 1920, issue, the leading editorial was devoted to this subject. Since that time the Management has been very much gratified in having called to its attention many cases in which our employes, in following the practice of the Baltimore and Ohio in this respect, have lived up to the best interpretation of our slogan, "Our Passengers Are Our Guests."

The shortage of passenger equipment last autumn, and the abnormal passenger business then being handled, made a hearty compliance with this practice especially desirable. Passenger business has now dropped off considerably and our coaches are not nearly as well filled as they were at that time, but the principle of politeness and consideration in this matter will always remain unalterable. The complete comfort of our passengers is as essential to our ideals of public service now as it was then.

We are not indulging in any fantasies when we say that the Baltimore and Ohio is especially well known as the Road of Courtesy. Hundreds of letters from our patrons, enthusiastically endorsing this belief, are received each month by the Management, and many employes who have been the inspiration for these letters have shared in the gratification of the Management in knowing that our passengers appreciate their courtesies.

Politeness and courtesy are their own reward, and we know of no better business-getters on the Railroad. Hearty congratulations to all those employes who are making the rule of courtesy the rule of their work on the Railroad each day! May their numbers increase and their good works multiply!

Lest We Forget

It is but natural that America, with her comparatively brief participation in the World War and with her tremendous recuperative powers, should, after the shock of the struggle, have readjusted her national life to the normal more quickly than the other warring countries. To the person with a seeing eye and quick sympathy for those who still suffer, however, there is no lack of reminders even in our own fair land of the horrors of the conflict.

Within the last three months two obituaries have appeared in these columns about members of our own Railroad family; the one about a Green Spring boy whose body, brought back from France, was interred

with impressive ceremony in his home town; the other of a Keyser lad who finally succumbed at that place in December from the effects of gas poisoning.

At supper in a Baltimore restaurant within the last week there was placed on the table beside me an envelope and on it written:

"Gassed during the war—I can't talk. Please help by buying the contents of envelope for 10 cents."

The seller was in the uniform of a doughboy. He could scarcely whisper, yet I managed to learn that he had been severely gassed, and had been discharged from the service since 1919. He said that he was not getting enough money from the Government to support him. As I was remonstrating with him for wearing his uniform illegally after his discharge, and trying to direct him to proper Government authorities for help, the waitress stepped between us and, with a show of impatience, thrust a quarter into his hand. I dug down for my two-bits and he took it and was gone before I could talk longer with him. I started to explain to the waitress why I had remonstrated with him, but she cut me short with:

"They aren't taking decent care of the boys and it's a shame."

When I heard her own history, I understood her quick sympathy.

Her only three brothers volunteered in the 29th Division at the outbreak of the war. One died from sickness on the transport going over and the other two were killed in action. Her only sister was a victim of the war plague, influenza, in the winter of 1918. Her mother and father both dead—she is alone in the world but for a six-year old boy whom she is supporting in a boarding house in Baltimore. She said nothing of her husband.

Hearing of a case like this makes one feel almighty thankful for his own blessings.

Passing a busy street corner I stopped to hear the music of an always interesting Salvation Army band—just in time, too, to meet the tambourine collection plate coming my way. In front of me was a magnificent specimen of manhood and I saw him flip a half dollar in with the pennies and nickles. Then he left abruptly while I lingered. In a few moments he was back again. Wondering at his unusual interest, I ventured to ask him why.

"Well, I saw a lot of service overseas and, believe me, the Salvation Army people were just as far front as they would let them go. I will never forget the food and hot coffee they passed out to us when we were under fire and almost famished and I am here to take my hat off to them any time and in any place."

The Salvation Army has a big asset in this strapping six-footer and his generous gratitude.

It may not be amiss here to say that the American Legion has been the chief organization to keep the public advised of the needs of the flotsam and jetsam of the war. As a national organization, through the State departments, and as individuals, the American Legion has not only campaigned for many needed reforms at Washington, but has taken a quick and unselfish interest in the welfare of sick and wounded comrades.

In the Department of Maryland a certain number of days each month are given each post as its detail for looking after the welfare of the sick and wounded soldiers in the hospitals. April 16 to 22 falls to the lot of the Baltimore and Ohio Post No. 81 for this "tour of duty" and one of the things which is planned is a concert on April 18 by the Baltimore and Ohio Glee Club for the 700 hospital-ridden ex-service men at Fort McHenry, Baltimore. The Post is paying for the cost of this and for the entertainment of ex-service men in other hospitals in Baltimore.

The Way It Works Out

Looking over into another field of business often gives us a new and refreshing viewpoint. It puts our own proposition in a better perspective. It makes us see the things of our own concern in a clearer light.

Before me is the business statement for 1920 of the Metropolitan Life Insurance Company. Some of the stupendous figures are:

Assets.....	\$980,913,087.17
Total insurance placed and paid for in 1920.....	\$1,651,950,151.00
Total amount of outstanding insurance.....	6,380,012,514.00
Number of policies in force December 31, 1920...	23,899,997.00
Amount paid to policy-holders in 1920.....	\$1,257,393.70
Reduction in general mortality at ages 1 to 74 in 9 years.....	22.7%
Death rate for 1920 on the industrial business lowest in history of Company.	
Dividends declared payable in 1920, nearly.....	11,000,000.00
Our nurses made 1,625,271 visits in 1920, free of charge to sick industrial policy-holders, including 14,667 visits to persons insured under group policies.	
Our employes distributed over eighteen millions of pieces of literature on health.	

Even to railroad men, accustomed to the huge figures which represent the property values and operations of the American Railway System, these insurance figures will be startling.

Particular attention is called to the last five items in this statistical table, for in them is great food for thought.

The Metropolitan Life Insurance Company was one of the pioneers among the great life insurance companies, in instituting a health department, the purpose of which was to investigate living conditions of the company's policy-holders, and in every legitimate way to lengthen their lives and thus decrease the mortality percentage from year to year. How extensive this medical supervision has become is indicated in the last two items in the table, and the splendid results of this medical supervision may be seen in the three preceding items, showing the large reductions in deaths from preventable diseases, the reduction in the death rate of the company's policy-holders and the dividends of \$11,000,000 paid back to policy-holders during 1920.

The history of this phase of the insurance company's activities is a most interesting one but we cannot go into it further here except to point out this fact:

In instituting this medical supervision over policy-holders, this company not only did them a great service in decreasing the number of days they lost through illness and actually cutting down their general mortality, but it was also able through the savings made by the decreased mortality to reduce the financial drain on its resources. And this reduction is in turn undoubtedly reflected in part in the \$11,000,000 in dividends returned during 1920 to the policy-holders. This is convincing proof that what benefited the company also directly benefited all those connected with it and vice versa.

On the Railroad we sometimes hear of employes who are disinclined to submit to physical examination, of employes who make light of the work of our first aid teams, of employes who ridicule the systematic and effective efforts being made to make their working conditions safer. Some of them explain their lack of interest in these activities by saying that the Company is interested in them from purely selfish motives. Yet Safety and adequate medical supervision on the Railroad mean just as much to the welfare of the individual employe as they do in making more efficient the conduct of the Company's business. The two ends attained are inseparable and, generally speaking, it is becoming more and more generally admitted by both management and labor that what redounds to the prosperity of the railroads redounds in equal degree to the welfare of its employes.

The Messenger Boy and the President

The messenger boy hustled through the doorway into the outside office, walked up to the nearest stenographer and said:

"Have you got that job ready for our department?"

With a quick movement the young lady addressed reached up, took the cap off the boy's head and, placing it in his hand, said:

"Gentlemen coming into this office and addressing ladies always take their hats off, first."

"Do they?" responded the boy. "We don't in our office."

"Well," said the young lady, "when President Willard comes into this office he takes his hat off and I think if he does you should, too."

"Gee," replied the lad, as he shuffled off toward the door. "I didn't know he ever came in here."

An hour afterward when the same messenger returned to the same office, he had his hat in hand before he opened the office door.

President Smith of the New York Central and the Negro Who Always Prayed

A blizzard was raging the day President A. H. Smith of the New York Central Lines was saddled by Director-General McAdoo with the responsibility of directing the operation of all the railroads east of Chicago, by far the greatest mileage ever put under one man. Congestion had become terrific. "Priority" orders had been issued by every official and every lieutenant in the government service, with the consequence that traffic had been thrown into hopeless chaos. As Mr. Smith sat in his car on his way back from Washington, the snowstorm howled and pelted against the windows and was rapidly threatening to block the tracks. An overpowering sense of the magnitude of the problems confronting him weighed down the new Regional Director.

"Happy Henry," the colored car attendant, breezed in, humming a cheerful tune. Smith looked up. Henry was smiling.

"Say, Henry, why is it that you are always able to be happy no matter what happens?" asked Smith.

"Because, sah, I always takes everything to the Lawd in prayer."

"Do you always get an answer?" asked Smith.

"Yes, sah, I always gets an answer."

"Always?" interrogated Smith.

"Yes, sah, always."

"Fine! Now, Henry, you know what I am up against, and I want you to get busy and offer up the best prayer you ever offered up in your life that I'll be able to do this job."

Henry promised.

"You have taken a great load off my mind, Henry, for you assure me that you always get an answer, don't you?"

As Henry walked off, he replied, "Yes, sah, I always gets an answer—mostly in de negative."—*Forbes Magazine* (N. Y.).

Archibald Fries, Vice-President Traffic and Commercial Development, Addresses Baltimore Veterans

AT a meeting of the Baltimore Chapter of Veterans, on April 4, Archibald Fries, vice-president of Traffic and Commercial Development, gave an interesting and instructive talk to the members and their wives concerning the opportunities open to railroad men to show the kind of material they are made of in helping the Company get business.

Introducing Mr. Fries, G. A. Bowers, president of the Baltimore Veterans, said:

"There are two conditions in the life of man, happiness and sorrow. Tonight I am happy. There are two kinds of men, artificial and real; the real men are built on the old pattern and taught by the old masters. Tonight we have with us a real man, and I take great pleasure in introducing him to you, Mr. Archibald Fries; vice-president of Traffic and Commercial Development."

Mr. Fries said:

"*Ladies and Gentlemen, Veterans of the Baltimore and Ohio Railroad*—This is the first opportunity that I have had to address a gathering of this kind. I was present with Mr. Willard when he addressed the Veterans last summer at Somerset, and I was very much struck by the interest of the people, and particularly that of the women. Women always make things go, whether it be in church, school, or secret society, and I congratulate the Veterans on having them as allies.

"I must apologize for being a veteran; I have only been in the service for 38 years, having started working in the Freight Department of the Baltimore and Ohio at the age of 17. Then I went to work in the Cincinnati freight office, and from there I came to Baltimore. I take pride in the fact that there is no position in my department that I have not filled at some time or other. I think that we, as Baltimore and Ohio employes, should appreciate that our president and three vice-presidents of the Com-

pany, besides nearly all of the general officers, have worked their way from the bottom to the top. The man who has filled every position knows the work and the trials of "the boys"; he is better able to sympathize with them, and is better able to value their work. I know of no other railroad whose four executive officers have started in at the bottom of the ladder and worked to the top.

"It is expected of me to get sufficient freight and passenger traffic to pay our salaries, our maintenance and expenses and taxes, besides the fixed charges on bonds, notes, etc. In February, out of \$14,200,000 gross revenue, we had only \$60,000 left after paying the first four of these items, and as our fixed charges on bonds, etc., for a month average about \$2,000,000, you can see that the Company went into the hole for February almost to that extent. We trust that March has made a better showing and that April will be still better.

"I do not want anyone to feel that the Traffic Department is trying to do his work for him. The Traffic Department is trying to get sufficient traffic to keep the Baltimore and Ohio prosperous, but our president believes that this is the time when every employe is interested in getting every ton of freight and every passenger possible through his influence at any and all times. It is the time when we cannot afford to rest upon the success or failure of the Traffic Department. **Every one of us should consider it a sacred obligation to his fellow employes and to the Company to use every bit of his influence to get goods to move and passengers to travel via the Baltimore and Ohio.**

"Have you ever thought of the impetus that could be given to any movement by an army of 10,000 men with their wives and children back of it? This is what the Railroad has back of it. And if we, as railroad officers, feel that there is any one set of

people on whom we can rely, it is the Veterans. It is at this time that we come to you to ask that you give us, freely, willingly and sympathetically, your assistance.

"When you ladies go to the department stores to buy, or to your grocerman, or to your tailor, won't you go to the manager and say this: 'I patronize your store; do you give the Baltimore and Ohio Railroad your traffic?' This applies also to you men. Now is the time to show your loyalty, your friendship, and your standing on the Baltimore and Ohio.

"We have no wish to criticize our competitors, but we believe that we have a solicitation power in our Veterans that no other railroad possesses, and as a representative of the president, I ask you to use your every effort to the end that we may secure as much traffic as possible through your influence. Every passenger traveling from Chicago to Baltimore means \$32; every carload of freight means about \$70. Post cards have been distributed among you for use in getting freight and similar cards have been prepared for passenger traffic."

W. L. Robinson Discusses Railroad Coal Consumption

Following Mr. Fries' address was a talk given by W. L. Robinson, supervisor of fuel and locomotive operation, who gave some interesting points on the enormous cost of fuel and its importance. Some of the "pointed paragraphs" given by Mr. Robinson were as follows:

"The railroads consume about one-third of the coal that is mined. The Baltimore and Ohio is the third largest coal consumer. The Pennsylvania and the New York Central only exceed us in the amount of coal consumed by locomotives. The only industrial company exceeding us in this is the United States Steel Company."

"In 1916, it cost us \$5.70 out of every \$100 to pay for coal consumed; in 1920, \$11.80, this difference being brought about by the increased cost of fuel. The average cost of fuel in 1916 was \$1.09 per ton; in 1920, \$3.38 per ton. The total cost in round figures for coal in 1916 was \$6,750,000; in 1920 it was \$27,000,000."

"Sometimes we overlook the fact that we don't charge ourselves with any rate of haulage for the 6,000,000 tons of coal annually consumed on the System. We get coal from practically every district on the Railroad. Many roads have no mines from which to draw, consequently, they charge themselves with freight rates, and their cost is not the same as ours."

"Fuel conservation means good railroading."

"We are now experiencing the largest coal car surplus in our history . . . It may even be a wise thing now to buy your next winter's supply of coal."

The next speaker was Senator Dick, who spoke eloquently of appreciation and loyalty to the Railroad, concluding his remarks by reading a poem by Edgar A. Guest. Mr.

Dick then presented to John T. Mathews a ring, bearing the Veterans' emblem, as a reward for securing 95 new members of the Veterans' Association. Mr. Mathews said:

"It was a pleasure for me to get members for the Baltimore and Ohio Veterans' Association; now, it is giving me pleasure to solicit traffic for the Baltimore and Ohio." Mr. Mathews is general foreman of the freight house at Washington.

Judge Thomas Bond, who served the Baltimore and Ohio 70 years ago as a civil engineer, then told some interesting tales of the early days of the Railroad. His work lay between Kingwood Tunnel, then the largest tunnel in the world, and Cheat River. He remembered when Parkersburg

and Grafton were only sections of wilderness, and how, when the first "iron horse" came through, the people flocked from the country for 50 miles around to see it. This was in 1852. Said Mr. Bond: "When the men, women, children and other things came out to see the iron horse, the whistle blew a loud blast. The people scattered in every direction, while the dogs ran barking after the engine."

After the addresses were over, the Veterans, their wives and friends enjoyed a musical and literary program while they partook of the delicious ice cream which always accompanies a Veterans' meeting. A number of children took part in the program, and Miss Helen Doyle favored us with her famous violin selections.

Helen Doyle, daughter of Martin Doyle, chief clerk, office of General Superintendent. Miss Doyle was accompanied by Miss Van Hollen, formerly an employe of the Car Service Department.

Brother Pennell was presented with a framed photograph of the Veterans and their friends taken at the picnic last summer at Brandywine Springs.

The floor was then cleared for a dance. Brothers Bowers, Sturmer and Covell took turns in calling out the numbers for a square dance, while Brother Holmes and several of his friends gave an old-fashioned cake walk, much to the delight of all, and which concluded an evening of merriment.

George W. Lishawa a Stalwart Veteran

GEORGE W. LISHAWA was born in New York City on September 21, 1848. He has been in the railroad service since 1860, having started at the age of 12 years as switch tender for the Cincinnati Street Railroad, working from 6 o'clock at night until midnight, and going to school during the day. He followed this until 1865 when he went to work for the Ohio and Mississippi Railroad (now the Baltimore and Ohio) in train service between Cincinnati and St. Louis.

In 1870 Mr. Lishawa resigned this position and went over to the C. H. & D. R'y (now our Toledo Division) as depot baggage-master, which position he held for two years. He joined the auditing force of the C. H. & D. R'y, working up from a clerk to auditor, which position he held for 18 years. From 1905 to 1908, during the merger of the C. H. & D. and P. M. R. R., he served as assistant comptroller and auditor of passenger receipts.

From 1908 to 1918 he served as paymaster, during which time this road was taken over by the Baltimore and Ohio and the Paymaster's office moved to Baltimore.

Helen Doyle, violinist

Veterans to Celebrate Anniversary of Opening of Brunswick Yard—Bands, Speaking and Entertainment Galore Promised for this Big Holiday on May 10

TUESDAY, May 10, will be a gala day for the Veterans at Brunswick, for then will be celebrated the 30th anniversary of the opening of the Brunswick Yard.

President W. R. Smith, with his able committee, is making extensive plans for entertaining all officers and employees, as well as the members of the Veterans' Association, who find it possible to attend.

There will be a basket picnic, but dinners will also be served on the grounds. A photographer will be on the job, ready to snap the interesting scenes, and those who do not

wish to get into a picture had better have in mind a good hiding place before coming to the picnic. There will be music a-plenty for those who like to "shake a foot" with the Veterans, and games will be provided for old and young.

President Willard and Vice-Presidents Shriver, Galloway and Fries, besides many other officers, have been waited on by a committee of the Veterans and have promised to be present if their engagements permit.

The invitation is particularly extended to the Veterans of all the other divisions. Come and have a good time.

Baltimore Chapter Has Interesting Monthly Meeting

AT a meeting of the Baltimore Chapter of Veterans and of the Ladies' Auxiliary on March 7, a musical program was rendered which added to the usual merriment prevalent at such gatherings.

The meeting of the Ladies' Auxiliary took place on the second floor of Moose Hall at the same time that the Veterans held their meeting on the main floor. Mrs. Shipley, president, was absent because of illness, and Mrs. Hanson, vice-president, took charge. The meeting was opened with the singing of one stanza of "America," followed by the Lord's Prayer. Then came the roll call of officers, sale of buttons, collection and reading of application cards, and acceptance of names for membership. About 120 ladies were present. At the close of the business meeting, Brother Holmes gave the ladies a heart-to-heart talk concerning the sale of tickets for the entertainment and dance on March 31.

At 9 o'clock the doors were opened and the Veteran brothers came up to share with the Auxiliary sisters the feast of ice cream and to enjoy the entertainment.

Brother Holmes introduced to the audience a quartet of little girls, who gave a splendid exhibition of songs and dancing. They were Mildred Provance, great-granddaughter of Ephraim Provance, the engineer who saved Annapolis; Sylvia Stricker, Lillian Elliot and May Snyder. Particularly attractive were the solo dances rendered by each of these girls. Miss Provance sang "Take Me Back to the Garden of Roses," and gave a clever exhibition of toe dancing. Miss Lillian Elliott gave a bit of interpretative dancing, accompanied by Mr. Earl Watts, pianist. A clog dance by Miss Stricker was heartily applauded by the Veterans, as was an Oriental dance by Miss Snyder. Following this was a solo by Master Herman Lang, and a violin solo by Master Irving Stricker, accompanied by his sister, Sylvia.

Of much interest to the Veterans was the entertainment given by Miss Thelma Culbertson, who made her first appearance on the "stage," and played her part very creditably in song and dance. A piano duet was rendered by Mrs. Quinlan and Mrs. Mantz, followed by a violin solo by Miss

George W. Lishawa

He has since been employed as general clerk in the office of Assistant to General Manager, Cincinnati. Mr. Lishawa is a member of the Veteran Employees' Association.

Besides being a valuable man to his Company, he has also been a valuable man in Hartwell community, where he resides, having served as a member of the Board of Education for two terms, councilman for two terms, and finally as treasurer of the village and school board.

Mr. Lishawa is still full of life and ambition and is one of the best rooters for baseball on the System. Regardless of what's going on, Mr. Lishawa is always on the job, rooting for the Baltimore and Ohio.

An Appreciation of the Late Dr. John A. Robb

By William H. Ball

Assistant to Superintendent and Chief Clerk, Relief Department

OVER 40 years ago our Company inaugurated a plan for financial aid to disabled employes and the dependents of those who died in its service. This was pioneer welfare work, but its intelligent, tactful and sympathetic administration by able executives and skilled professional men has evolved our present Relief Department, through which \$28,000,000 has been paid for disability insurance and death benefits.

It is no inconsiderable honor to have been actively associated with an enterprise of this magnitude from its inception, and to have participated in its service to many thousands of railway employes. This was a distinction enjoyed by the late Dr. John A. Robb, who died at Baltimore, Md., on January 30, 1921, at the age of 62 years, after 39 years of service as a medical examiner in the Relief Department.

In the imagination of the average person, railroad operation, like sea-faring, is highly romantic and spectacular; and to justify this view, one hears and reads almost exclusively of the masterful men who merit praise and deserve emulation for their able management of the traffic flowing through the great arteries of commerce. It does not in any measure diminish our appreciation or admiration of their achievements to emphasize their dependence upon the loyalty, intelligence and skill of the multitudinous subordinates whose constant and efficient service is rendered without expectation of fame; the reward to such men lies in the knowledge that they have contributed to the success of which their chief executives are the better known exponents.

Dr. Robb exemplified these characteristics in every act of his extended railroad career. Loyalty was ever his guiding principle, involving unwavering and implicit adherence to the policies of every department of the Company. As a physician, combining high professional attainments with an unusual capacity for business administration, he rendered invaluable service

in his intimate daily contact with the Company's employes, and was exceptionally qualified to minister to those temporarily or permanently withdrawn from active duty by disability or disease. Few men have been accorded so great a measure of respect and confidence by the rank and file.

Dr. Robb was born at Baltimore, Md., on April 1, 1859, his father, John A. Robb, Sr., having been for many years the financial officer, or City Registrar, of Baltimore, Md., associated with the late Ferdinand C. LaTrobe, seven times elected Mayor of the Monumental City. After graduation from the public schools, he studied pharmacy, and subsequently entered the Medical School of the University of Maryland, from which he graduated in 1880. This was followed by post graduate work in the Johns Hopkins University at Baltimore. On May 1, 1882, he entered railroad service as a medical examiner in the Relief Association, his initial assignment being in the office of the Superintendent at headquarters. This afforded him opportunities for the acquisition of practical experience in the business administration of the department, which was ever thereafter a valuable asset in the exercise of his duties as a field representative.

Upon the creation of the Philadelphia Division, Dr. Robb was, on May 1, 1888, assigned thereto as the Divisional Medical Examiner, with headquarters at Wilmington, Del. His painstaking administration, affability and close intimacy with the pioneer Baltimore and Ohio men in what was new and undeveloped territory brought to him an esteem and regard which are still manifested by the old guard on that division.

A reorganization of the medical forces of the department resulted in Dr. Robb's transfer to Baltimore in 1902, when he was detailed to make all of the physical examinations of employes in that district. As a specialist in examinations for sight, hear-

ing, and color perception, with particular reference to employes engaged in train operation, he was frequently given special assignments requiring protracted tours of the entire system. In January, 1913, he was transferred to the district embracing the Washington Branch, old Main Line and the Metropolitan and Frederick Branches, with headquarters at Washington, D. C., and was still actively at work on that assignment up to a week preceding his death.

Dr. Robb leaves surviving his widow, Mrs. Jennie A. Robb, a daughter, Mrs. Gertrude R. Cross, and a son, Captain Henry Robb, all of Baltimore, Md.

The writer, who made his entry into railroad life in 1902, as a clerk in the office with Dr. Robb at Baltimore, will ever cherish his memory as an honorable gentleman of the old school, of unimpeachable integrity and an unfailing courtesy and modesty; a man with high aspirations, who lost no opportunity to pass on to the novice such experience as had proven of value; whose capacity for making friends was enviable, and whose death removes from our sphere of activity one of whom it may with truth be said—

"To live in the hearts we leave behind us is not to die."

The Death of "Lou" Smith

THOUSANDS of employes and passengers of the Baltimore and Ohio whose way has taken them past St. Denis, Md., have been attracted by a property lying just alongside and to the west of the track. Here lived for years the subject of this obituary—an ardent horticulturalist, devoted husband and father, loyal employe of the Baltimore and Ohio.

It is almost 7 years ago that the writer first visited Mr. Smith at his home, that home that was such a reflection of the man himself. Cosily tucked under the very shadow of the Railroad in whose service he gave practically all the working years of his

The late Dr. John A. Robb

The late "Lou" Smith

life, the house and the grounds were eloquent evidences of his frugality, his painstaking care, his neighborhood pride, his productivity, his love of the beautiful and particularly of his choice flowers.

For years "Lou" Smith's garden was a show place in the neighborhood, and here he could be found in good weather busy with spade and fork, working, working—unceasingly it seemed, yet always happily—to increase the glory of his roses, peonies and dahlias. Several days before his death, realizing the toll that the months of dieting

and medicine for high blood pressure had taken from his constitution, he said to his friend, Stationmaster Adams at Mt. Royal, that he wanted to die in harness. And his wish was granted, for it was in his beloved garden, forking up the ground for Spring planting, that he was stricken with paralysis, March 9. He died the following morning, leaving his widow, two daughters, a son, and a large number of neighbors and friends to mourn him.

The funeral was held from his late residence on March 12. The Rev. William A. Carroll, pastor of the Relay M. E. Church, paid a beautiful tribute to Mr. Smith, and the Veterans' Association of Baltimore sent a delegation, the members of which acted as pallbearers. The tributes of flowers seemed especially profuse, and recalled the many beautiful bouquets which during his lifetime it was Mr. Smith's delight to give to his friends.

Louis Smith was born on Independence Day of 1862 and entered the service of the Company on April 1, 1880, as janitor at Camden Station. From then on for almost 41 years he uninterruptedly was in the service, either at Camden or Mt. Royal Station, his last position being that of night stationmaster at Mt. Royal. He was an intelligent, hard-working employe, who always had the interests of the Company at heart, and his long service record bears only the mark of commendation for courtesies shown to the patrons of the Company whom he served in line of duty.

The Death of George Frederick Oehrl

By John B. Egerton

Transportation Department

THE news of the death of George Frederick Oehrl, formerly an employe of the Transportation Department, Baltimore, filled the hearts of those who were his fellow workers with a great sorrow—the hearts that once overflowed with the joy of his friendship. And the little review of his life, written for the Pensioners' Department of the MAGAZINE, for the purpose of expressing to him and to his family our good wishes for many days of happiness in his home in the sunny lands of Florida, now becomes his obituary.

Born on April 4, 1851, George Frederick Oehrl entered the service of the Company in June, 1871, as messenger, Agent's office, Winchester, Va. I imagine he was then a big, husky, country boy of 20 years, a fourth of whose life had been spent among the scenes of the Civil War in the historic Shenandoah Valley.

Next year we find him an operator at Confluence, Pa. Another year, and he became operator and agent at Casselman, where he remained for 5 years, and then went to Pinkerton for 3 years more. Leaving the service for 9 years, he returned again in May, 1900, as clerk in the office

of General Superintendent of Transportation, Baltimore. Here he remained until November 15, 1920, when the Railroad, in recognition of his long and faithful services, placed him among its pensioners. Then Mr. and Mrs. Oehrl went to live in Eustis, Florida, where they had spent many a happy vacation and had long planned for the time when this was to be their home.

As characteristic of the man, your correspondent takes leave to quote from his last letter, addressed (to use his own words) to "My Dear Friends and Fellow Workers of the Transportation Department:

"In leaving after over 20 years of continued service in the Transportation Department, I do so with deep regrets. They would be deep, indeed, if I did not feel that the friendships which I have made in the Baltimore and Ohio, and particularly in the Transportation Department, were not to be continued beyond my years of active service.

"I wish I could express verbally to each one of you just how much I appreciate the testimonials of your friendship which you have given Mrs. Oehrl and myself in leaving.

We shall always cherish them as evidence of our continued friendship."

On Friday, March 18, Mr. Oehrl was stricken with paralysis. His death occurred before midnight of the same day. His funeral took place at Eustis, Florida, on the following Sunday. The deep sympathy of all of us, who knew, respected and loved him, is extended to his family.

For ourselves, who are still in harness, the departure of such a fellow worker leaves a void which it will be hard to fill.

You're Gone, But Not Forgotten

By Paul L. Ackler

Clerk, Transportation Department

You're gone, but not forgotten,
You're in our memories still;
We see you now as you used to be,
Tho' grief our hearts doth fill.

You're gone, Old Pal, you're gone,
You've crossed that boundary line,
Leaving us here to mourn you,
And to follow you each in his time.

You've entered the vale of shadows,
Yet to you, it can mean no fear;
Leaving behind you blessed memories
Which each of us holds dear.

Well do we all remember,
When you were with us still;
How much your friendship meant to us,
As we traveled up Life's hill.

You're gone, but not forgotten,
As "Pop" we remember you,
And as a friend of friends to us,
A comrade good and true.

The Late John Abel Hunter

By C. H. Moran

Real Estate Agent

AFTER a long illness, John Abel Hunter, for many years in the service of the Baltimore and Ohio Railroad, died at his home in Bel Air, Md., on February 12.

The late George Frederick Oehrl

Clevelanders Entertained by Welfare League of Akron

By H. B. Smith

MAGAZINE Correspondent

THE open-house policy of the Baltimore and Ohio Welfare League of Akron was taken advantage of by a large party of Clevelanders, representing the traffic, operating, transportation, claim and mechanical departments, by a surprise visit to their entertainment and dance on February 29.

We want to say that "OUR BIG FAMILY" was the predominating spirit, and the attendance indicated that operations at Akron Terminal had been suspended so

that all could attend. The local performers gave a good account of their talent and their entertainment was greatly enjoyed. The decorations were beautiful, and the Armory was a very appropriate place for the occasion. We wish to compliment the committee for their superb arrangements.

The Welfare Association of Cleveland extends to all employees and their families a welcome invitation to attend their monthly entertainments and promises to give them a good time.

Baltimore and Ohio General Office Duckpin League

THE season 1920-1921, now drawing to a close, has been highly successful even under the many handicaps with which the League has had to contend, and those who gave their untiring efforts to make it so are to be commended.

The final contests between the leaders of the two sections to determine the championship, will be bowled on the evenings of May 10 and 13, on the Regent alleys, the honor going to the team winning four out of seven games.

Organization for 1921-1922 is well advanced. The League will consist of 20 teams, divided in sections of 10 each. The schedule will begin early in September and run for approximately 30 weeks. Arrangements have been completed for the use of five double alleys at both the Regent and Victoria, and the bowling will alternate, a section using the Regent alleys one week and the Victoria alleys the next.

Careful consideration will be given to the formation of the two sections with a view to apportioning the teams according to ability, so that both will weigh up in proper proportion.

The entire success of the past season is indicative of a most satisfactory future for the League, and everyone connected with it is enthusiastic in the belief that the coming season will surpass any we have had thus far.

All general offices desiring to participate should so indicate by writing C. E. Bortner,

secretary, care of superintendent Car Service, Room 1000 General Office Building, for application blanks. These application

blanks should be secured, filled in and returned to the secretary promptly, as all organization matters will be completed sometime prior to commencement of the season.

Miss Virginia Ratcliff

MISS VIRGINIA RATCLIFF, pictured on the next page, made her debut as an entertainer in public at the Safety Rally held at the White City Casino, Chicago, on February 4. Although only 14 years old, Miss Ratcliff danced with the precision of one much more mature in years. Her assurance and captivating smile made her dance offering one of the best things on the program at Chicago. Petite and coquettish, she immediately won her way into the hearts of the great throng of spectators and she was recalled several times to repeat her terpsichorean offering. Mrs. B. Ratcliff, stenographer in the office of the General Superintendent of the Baltimore and Ohio Chicago Terminal Railroad, and mother of the dainty Virginia, was as interested in the success of the child as if she herself had been out before the footlights. If Virginia continues to improve at the rate she has been going during the short time she has been taking lessons in dancing, she will soon be giving the redoubtable Fokina, even the incomparable Pavlowa, strong competition for popular favor. The willingness with which Virginia gave her services for the enjoyment of Baltimore and Ohio Chicago Terminal employees and their families, won her many warm friends, who will watch her career with much sympathy and good wishes.

Have You Heard the "Baltimore and Ohio Grand March"?

THE "Baltimore and Ohio Grand March" is a song that has been written by John Lawrence Walpole, a Mt. Clare shopman.

Mr. Walpole worked for a number of years as crane rigger at Number One Machine Shop, Mt. Clare. Last year he was injured and was sent to the hospital for five weeks. On his return to the shop, he was put on lighter work.

One day one of the Mt. Clare "boys," who knew of Mr. Walpole's fondness for things musical, said to him:

"Look here, Jack, do you know what would make a corking good advertisement for our Railroad?"

"What?" asked our friend "Doc," as he is often called.

"Why, you get your head to work and write up a nice little song about the Railroad. Have it set to music, not only for the piano, but for all musical instruments; then the Mt. Clare Band will have some music to call its own, and you'll be doing a good work for the Railroad as well as for yourself."

So "Doc" put on his thinking cap. He had done such work before, and composing was not new to him. Two other songs which he has written are familiar to a number of our people—"Hark to the Voices of Springtime," which was also filmed for the screen, and "The Lark." In less time than it takes to tell it, "Doc" Walpole had his words and melody written, all ready for Walter A. Shawker to put on the finishing touches.

The music is light and airy, and the words are catchy. Listen to the chorus:

Three cheers for the Royal Dandy,

Hoo-ray for the Royal Blue,

I took my girl last Sunday

And on the train we flew.

So, now, my boys, you take a trip,

No matter where you go,

Just take a trip, a dandy trip,

Down on the B. and O.

The cost of the song, words and music (piano), is 30 cents. Those desiring copies can get them from Mr. Walpole, 1646 Holbrook Street, Baltimore, Md., or from the BALTIMORE AND OHIO MAGAZINE, Mt. Royal Station, Baltimore, Md.

Then followed "Bulletin 70," the Safety moving picture, and the best of its kind we have ever seen.

O. L. Wallburg, chief clerk to freight agent and chairman of the entertainment committee, is still receiving congratulations on the success of the entertainment; he, however, places the credit to the individual members of the chorus and to all who took part in the program; their cooperation and support were so cheerfully given that the success of the evening could not but be assured.

Keep the Rails Bright

By Margaret Talbott Stevens

Would you hear the whistles blow?
Would you see the headlights glow?
Would you watch our business grow?
Then keep the rails a-shining.

Move the cars with all your might,
Keep them busy day and night,
From set of sun till morning light,
And keep the rails a-shining.

Every town will trade invite,
On our trains—a pretty sight—
Sing their power and praise their might,
And keep the rails a-shining.

Ah, what a thrill of pride we feel,
On long lines of glistening steel
Burnished bright by racing wheel—
The rails so bright and shining!

Round valleys deep and over hills,
Up the grades and o'er the fills,
Across the bridges, to the mills,
We'll keep the rails a-shining.

For business moves on brightest rails,
In bags and bundles, boxes, bales
And leaves behind its golden trails,
When tracks are bright and shining.

Wealth of Railroad Talent Shown at Lima Safety Rally

By O. L. Wallburg

Chief Clerk to Freight Agent

THE results of the Safety rally at Lima, Ohio, on February 11 are being felt in every office, section, and terminal about town—not only among Railroad employees, but among the citizens of Lima, whose attention was called to the fact that the Baltimore and Ohio is an up-to-date Railroad, which stands ready to handle their business efficiently.

The meeting was held in the Elks' Hall, with an estimated attendance of 1500.

The program opened with a minstrel performance, some of the principals being as follows: Otto and Oscar Koch, end men; Albert W. Morton, waybill clerk, interlocutor; Frank Guinan, engineer, baritone; John Cusack, yard clerk, bass soloist; Marion Wallburg, car record clerk, and Alfred Malloy, shopmen, soloists; Beatrice Blank, stenographer, Freight office, soloist; "Dan" Campbell, Storekeeper's office, and John Cusick, soloists; "Ray" Snyder, solo dancer. Dorothy, the 6-year-old daughter of Conductor "Happy" Day, gave a recitation, "A Little Nigger Baby," and also an exhibition of interpretive dancing.

Other members of the troupe who deserve special credit are: Robert Brown, messenger; D. S. Crayton, truckman; Yard Fireman Williams, Yard Engineer C. H. Towe, Ruth McIlvain, assistant cashier; Nellie Malley, abstract clerk; Edna Black, correction clerk; Menilla Britt, Isabella Gobel, and Paul Bierlein, all of Storekeeper's

office; Wilfred Helms, truckman; Mrs. Kluetter, Bernice Wallburg, and Mrs. A. W. Morton. Mrs. A. L. Dempster, wife of Switchman Dempster, assisted in directing the rehearsals and the performance; much credit is due her for her helpful suggestions.

The 25 members of the minstrel troupe were black-faced; the men wore white coats and dark trousers, the women bungalow aprons and bandanna handkerchiefs.

The rest of the program consisted of the following: Piano solo, Esther Roberts, clerk to trainmaster; piano and violin solos, Alice and Ruth, daughters of Assistant Blacksmith Foreman Pratt; exhibition by A. D. Gans, Safety magician; sketch entitled "The Highland Fling," by about 25 children of Baltimore and Ohio employees, in charge of Mrs. Van Cleve.

Superintendent Mann gave a pleasing address and introduced Superintendent of Safety Broderick, who gave an interesting talk about the work of his department.

Miss Virginia Ratcliff, daughter of Mrs. B. Ratcliff, stenographer, General Superintendent's office, Baltimore and Ohio C. T., Chicago

Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—
Retreat from care that ever must be thine;
How blest is he who crowns, in shades like these,
A youth of labor with an age of ease.*

GOLDSMITH—"The Deserted Village"

James A. Hilton

Never Late for Work During 43 Years' Service

James A. Hilton, Baltimore, Md., entered the service of the Railroad on April 1, 1873, at the age of 20 years. He was first employed as carpenter, during the construction of Elevator B, Locust Point; after the completion of the elevator he worked as machinist.

In 1883 he was transferred to Elevator E, Camden Station, holding the same position until that elevator was destroyed by fire in 1907, when he went to work at Elevators B and C, Locust Point. Later he was transferred to Elevator D, as machinist.

On January 1, 1920, his health failed and he was placed on relief until March 1, 1921, when he was granted a pension.

During his 43 years and 11 months of service, Mr. Hilton was never late on a single morning. This is a record to be proud of.

Mr. Hilton says:

"While employed by the Company, I raised three sons and one daughter: George F., civil engineer and draftsman; J. Carroll, commander, U. S. Navy; Alpheus T., civil engineer; Ethel F., who served during the war as yeomanette, first class, U. S. Navy.

"I take this opportunity to thank the Baltimore and Ohio Railroad Company for its kindness to me during my years of service, and for the provisions which have been made for me during these years when I am unable to perform service for them."

Frank C. Caddy

Frank C. Caddy, pensioned agent-operator, was born in Waltham, Mass., on October 9, 1853. In 1859, his parents moved to Xenia, Ohio, where he attended public school until the age of 12, when he left to become a newsboy on the Little Miami Railroad, running between Columbus and Cincinnati and Xenia and Richmond.

Not being quite satisfied with his occupation, Frank gave it up to learn the printing business in the office of the Xenia Gazette. After serving his apprenticeship here, he went to Wapella, Ill., learned telegraphy, and served as a "register operator." At that time it was only the older and more experienced operators who could receive messages by sound, and nearly every telegraph office was equipped with registers for the use of the less experienced. Mr. Caddy used a register for about two years, then went to work for the Illinois Central, the Illinois Midland, the Ohio, Mississippi

& New Orleans, and the Texas and Pacific Railroads.

While at Monroe, La., he contracted "swamp fever" and was compelled to return north. He went back to Xenia, Ohio, where he married Miss Rosalie Dinsmore, and secured employment with the Pennsylvania Railroad, with which company he worked until 1893, when he came to the C. H. & D. as agent-operator, Wyoming, Ohio. Here he remained until November of last year, when he was granted sick leave.

P. J. Healy

The records of the Engineering Department show that P. J. Healy was born in Ireland in 1854; that he entered the service of the Baltimore and Ohio in 1871 as drill runner. Later he was made foreman at Junction Tunnel, Pittsburgh. When the Baltimore Belt Line was completed Mr. Healy was sent to Bakerstown Tunnel, and later to Harpers Ferry. From then to the time he was pensioned, February 6 this year, he has worked on the Main Line Tunnels.

Thomas P. Douglass

Thomas P. Douglass was born in Rapahannock County, Va., on January 27, 1856. Five years later his father, Parker Douglass, moved to Pittsburgh and engaged in the hotel business. Here the son attended school until January, 1872, when he went to Piedmont and entered the service of the Baltimore and Ohio as machinist apprentice, under A. J. Cromwell, who was then master mechanic.

He continued working for the Baltimore and Ohio for 12 years, then went into the newspaper business with his brother at Keyser, W. Va., editing and publishing the Keyser Tribune.

Method for Squaring Walschaert Valve Gear

By W. J. Dixon

Assistant Master Mechanic, Holloway, Ohio

BEFORE attempting to set the valves on a locomotive equipped with the Walschaert gear, check should be made to determine if such parts as reach rod, tumbling shaft arms, radius rod hangers, union links, etc., are of correct dimensions. After the above mentioned parts have been proven and the port openings have been correctly scribed on the valve stem, run engine over catching centers in the usual way.

To determine the changes to make in the gear as based on the tram marks on the valve stem, proceed according to the following method, as illustrated in figure 1:

Assume that lines MN and XY represent the two port marks on the valve stem, and

A, B, C, D are the tram measurements from the port marks:

RULE I:

$(A+C)-(B+D)$ divided by 4 = valve rod change.

RULE II:

$(A+D)-(B+C)$ divided by 4 = eccentric rod change at valve stem.

RULE III:

$(A+B)-(C+D)$ divided by 4 = crank arm change at valve stem.

In making the above computations it is understood that the lesser is subtracted from the greater, which might reverse the above combination. For example, to compute the valve rod change we might have $(B+D)-(A+C)$, etc.

Fig. 1

Fig. 6

Fig. 2

Fig. 7

Fig. 3

Fig. 8

Fig. 4

Fig. 9

Fig. 5

EXAMPLE I:

Taking a practical example, assume that figure 2 represents the valve stem reading. The numbers indicate the measurements from port marks in thirty-seconds of an inch. The forward motion is shown below the center line, while the back motion appears above.

To obtain valve rod changes:

RULE I:

$$(4+24)-(8+12)=8.$$

$$8 \div 4 = 2.$$

Therefore, valve rod should be shortened $\frac{2}{32}$ " or $\frac{1}{16}$ " inch, as there is a direct motion on this part. Making this change gives valve stem reading as shown in figure 3.

Proving the above operations gives the following results:

$$(10+14)-(2+22)=0 \text{ or no change.}$$

Next, to determine the change in the eccentric rod, take conditions after valve rod alterations have been made, as indicated in figure 3.

RULE II:

$$(10+22)-(2+14)=16.$$

$$16 \div 4 = 4 \text{ or } \frac{1}{8}''.$$

From figure 3 it can be seen that valve should move back $\frac{4}{32}$ ". Referring to figure 1, this change would take 4 from A and D and at the same time add 4 each to C and B. This would produce reading on valve stem as shown in figure 4.

$$\text{Proving gives } (6+18)-(6+18)=0.$$

This shows that no further change is necessary for a balance of figures either for valve rod or eccentric rod. However, the change shown above is result obtained at valve stem. To bring about the change it is necessary to make a greater alteration in the eccentric rod. This is determined by multiplying the valve stem change by a factor determined by dividing the travel of the valve in full gear into the throw of the eccentric arm. For example, travel of valve is 6 inches and throw of eccentric arm is 18 inches, then $18 \div 6 = 3$. Then referring to the $\frac{4}{32}$ " used in figure 4, $4 \times 3 = \frac{12}{32}$ " or $\frac{3}{8}$ " that the eccentric rod should be shortened to obtain results shown in figure 4. In determining whether to lengthen or shorten the eccentric rod to obtain desired results, it should be borne in mind, that when the link block locates at the bottom of the link, a direct motion exists from eccentric crank arm pin to the valve itself. Therefore, lengthening the eccentric rod adds to D and A, figure 1, while B and C is diminished an equal amount. Shortening the rod has an opposite effect throughout.

Referring to figure 4, it will be noted that having made alterations to valve rod and eccentric rod the valve is square in both forward and back motions, but has more lead in forward motion. To correct this proceed as follows:

RULE III:

$$(18+18)-(6+6)=24.$$

$24 \div 4 = 6$ or $\frac{3}{16}$ " change in lead at valve stem. This would require crank arm changed on main pin sufficient to give $\frac{3}{16}$ " more lead in back motion. In doing this $\frac{3}{16}$ " lead would automatically be taken from forward motion, producing results shown in figure 5.

EXAMPLE II.

Should the tram marks on valve stem measure up as shown in figure 6, proceed as follows:

Valve rod change:

$$(8+16)-(24-4) = (8+16+4)-24 = 4.$$

$$4 \div 4 = 1 \frac{1}{2}'' \text{ valve rod should be lengthened.}$$

This alteration gives the situation shown in figure 7.

It should be borne in mind that when a tram mark on valve stem shows blind, the measurement is negative and should be so considered when computing change.

Eccentric rod change, figure 7:

$$(7+25)-(15-3) = (7+25+3)-15 = 20.$$

$$20 \div 4 = 5 = 5 \frac{1}{2}''.$$

Eccentric rod should be shortened to produce $5 \frac{1}{2}''$ change on valve stem. Applying this change produces results as shown in figure 8.

Change in lead, figure 8.

$$(20+20)-(2+2) = 36.$$

$$36 \div 4 = 9 = 9 \frac{1}{2}''.$$

Crank arm should be moved back on main pin to produce above change on valve stem. Applying this change produces results as shown in figure 9.

* Referring to figures 5 and 9 it is seen that the valve has been squared with equal distributions in forward and back motions. By the above outlined method it is possible to prove each operation so that the mechanic may always be sure that he is making correct changes. The three changes may be made in any order; for instance, the eccentric or crank arm alterations may be given consideration first if desired.

Attention is again brought to the first paragraph of this article. In order to obtain satisfactory results the parts mentioned must be perfect. Otherwise it might be possible to obtain correct readings on each valve stem separately and yet not have square valves on the locomotive.

The method explained above is applicable to the Baker Valve Gear; however, it should be borne in mind that the factor used to determine the eccentric rod change always is a constant of 4 regardless of valve travel and throw of eccentric arm.

all the people of Nimes will regret their departure.

"The detachment of 35th Engineers has acted particularly well at Nimes. It has never deserved anything but praise for its fine appearance, its excellent spirit, and sentiments of perfect comradeship and keen interest and steadiness in its work.

"The American soldiers have shown how to make themselves beloved by everyone, and when they leave will leave only friends behind them.

"The General feels sure that he is a representative of all soldiers and civilians of Nimes in addressing them warm congratulations for their mode of life during their altogether short visit among them, begging them to accept all their thanks for the services rendered and their best wishes for the future and the expression of their feelings of affectionate friendship.

(Signed) FRONTIER,

Alais, January 16, 1919."

(Gard.)

After the close of the war, Mr. Long spent eight months in Government service at Washington; after the termination of Federal control, he entered the service of the Baltimore and Ohio as maintenance of equipment inspector, Pennsylvania District. He is now master mechanic, Connellsville Division.

Captain John C. Long, Master Mechanic, Connellsville Division

MASTER Mechanic John F. Long, captain, United States Engineers during the late war, began railroading at an early age. After serving a regular apprenticeship he accepted a position with the Frisco Railroad as machinist and served this company in the various capacities of assistant foreman, instructor on special appliances, division foreman, general foreman, master mechanic and shop superintendent.

Mr. Long has had many interesting experiences in train operation and maintenance, in handling locomotives in muddy water, alkali water and foamy water districts, and enjoyed the operation of oil burning locomotives. After three years in this capacity he accepted a position as mechanical investigator for a number of supply concerns with headquarters at Chicago, his work carrying him into the principal shops of the United States.

Soon after the opening of the war, Mr. Long entered the United States Engineers as captain. After a short period of training, or rather, as Mr. Long puts it, "brightening up on his former training in the Spanish-American War," he organized Company 365, Casuals, at Camp Merritt, N. J., and proceeded to Le Mans, France. From Havre to Tours and from there to the headquarters of the 35th Engineers at La Rochelle, he was attached to Headquarters Company and assigned to special duty; he remained there only until he was assigned to duty as inspector of equipment built for the United States Government by a private concern at Santes, France; later he was placed in charge of the railroad shop at Nimes, Garde, France, on the Paris, Lyons and Mediterranean Railroad; then he was

given charge of the American shop at St. Sulpice, Izon, France.

Mr. Long says he has handled the French, Belgian, German, and has observed the English, Russian and Italian locomotives, but that he is glad to have the all-American locomotive—even the "Mallet."

Captain Long received many interesting letters from French military authorities as well as from members of social organizations in that country, complimenting him on the splendid appearance and behavior of his men, and thanking him for his services. Following is a translation of one of these:

"The General Commanding Arms learns of the early departure of the American Detachment of Nimes. He wishes to express to Captain Long, his officers and non-commissioned officers and soldiers how much their comrades of the French Army and

Wishin'

*O, it's on the road to Springtime where the winds of April blow,
An' Nature's secrets tellin', all the grasses whisper low,
An' the Pipes o' Pan are soundin' out an' beckonin' to me
To cross the field o' Springtime where there's gladness, full an' free.*

*An' it's down the road to Springtime, where the ferns in glad array
Like soldiers tall an' stately spread their swords across the way,
Where pussytoes, all soft an' gray, creep 'round beneath the trees,
An' I'm wishin' I might live with them an' dance there in the breeze.*

*An' it's down the road to Springtime where I hear the robin sing,
A-sittin' on the Wishin' Gate an' tellin' folks of Spring,
An' his song is full o' joy an' love with ne'er a dream o' care,
An' I'm wishin' I'm a robin when I see him sittin' there.*

What Goes Into Your Husband's Dinner Pail?

Fifteen, Ten and Five Dollar Prizes for Housekeepers

HERE is a chance for our women to show us what good housewives they are. If you will tell us what kind of lunches you prepare for your husband, your brother, your father, or your son to take with him to work, you have a chance of winning one of three prizes of \$15, \$10, and \$5, respectively, for the best series of lunch menus to cover the period of six working days.

Inspiration or Indigestion?

Do you ever think what it means to a working man to be well fed? One of our executive officers who used to carry his lunches tells us why he enjoyed them. They were wholesome, attractive, fresh, and well-cooked; moreover, he did not have to depend upon the quality nor the prices of restaurant foods. He knew that his good wife had prepared for him such a lunch as would give a man strength for doing his work and no indigestion; he knew that there would be enough food to satisfy his hunger and that it had been economically prepared. He says there was never any waste in his home. This is indeed a compliment to his wife, and the husband, I am sure, could not help feeling a touch of pride as he opened his dinner pail. Perhaps, as he took a bite of a delicious sandwich or sampled a slice of homemade apple pie, he glanced at his companions—if there were any, or gazed across the green fields and smiled to himself—and said, "My wife is some cook!"

What kinds of foods do men like to eat? What kinds of foods ought a healthy man have for his midday meal? Which are the most palatable and digestible articles of food that should go into the dinner pail of the manual laborer or of the brain worker? How do you cook and put up the lunches for your men? What is the average cost of these lunches per day?

These questions, together with any other suggestions which you may have concerning the lunch problem, may be discussed in your paper. It is not necessary to write an extensive theme; just tell us in the way that you would tell your next door neighbor if she were young and inexperienced.

Rules of the Contest

1. Write out a series of menus, one for each working day, or six in all. Add to this any suggestions of your own as to the preparation of lunches.
2. Specify the season of the year for which your menus are suggested, Spring, Summer, Autumn or Winter; also name the occupation of the man for whom these lunches are intended.
3. Three prizes of \$15, \$10, and \$5 will be given for the best, second best, and third best articles submitted.
4. This contest is open to all Railroad women, including the wives, daughters, sisters and mothers of our employees.
5. Write on one side of the sheet only, allowing plenty of space between lines. Do not place any evidence of authorship of the

article either on the envelope in which the article is mailed or in the article itself. But with the article enclose a blank envelope containing a slip of paper showing name and address of the writer. The authors of the articles will not be known, even to the judges, until the winning contributions have been decided upon.

6. Spelling, penmanship and punctuation will not be considered by the judges in their decisions.

7. Send your contributions to: Associate Editor, BALTIMORE AND OHIO MAGAZINE, Mt. Royal Station, Baltimore, Md.

8. All competing articles must be mailed to the BALTIMORE AND OHIO MAGAZINE, Mt. Royal Station, Baltimore, Md., not later than May 31.

The following points will be considered by the judges:

Wholesomeness of the Foods

Foods must be such as give strength to the body without overfeeding it. If an office worker has eaten a hearty breakfast he does not require a heavy lunch; this would tend to make his brain sluggish, but a man who works hard in the open air can eat and digest much more. Foods must be well-cooked in order to be wholesome. Lunches should be well balanced. An illustration of the values of some of the staple articles of diet is given in an article on the business girl's lunch, in the Women's Department of the October (1920) MAGAZINE. Those who have not copies may obtain them by writing the MAGAZINE Office.

Selection and Arrangement of Foods

In midsummer there are many foods which spoil easily, and which, therefore, it

Mrs. William S. Colvin
Wife of operator, Camp Meade Junction, Md.

would not be advisable to use unless it is possible to keep the lunch in a cool place until noontime. The arrangement of certain foods in a lunch box or pail is important. Lunches must certainly be appetizing in appearance. If blackberry pie runs over the ham sandwiches, the meal will be anything but appetizing.

Economy

There is no economy in purchasing cheap grades of food nor in giving short rations; economy lies in close buying in order to eliminate waste, and careful cooking to see that nothing is burned or not sufficiently cooked. The cost of restaurant service is interesting when comparing the prices paid for a lunch put up at home with that bought at a lunch room.

Helpful Ideas

Perhaps you have some ideas of your own about utilizing "left-overs"; about preparing extra portions of meat, such as liver, sweet-breads, heart, tongue, etc.; about how a lunch should be arranged, the best kind of a container, etc. If you have, then you can be helpful to some of our beginners or, perhaps, awaken the interest of some other person who does not realize how necessary a good lunch is to a working man: this is the big aim of the contest.

Judges of Contest

The judges for the contest will be the wives of some of our own Railroad men. They will be women who are practical housekeepers and who have the reputation of being good lunch providers for their husbands. Their names will be given in the next issue of the MAGAZINE. The winning articles will be published in the MAGAZINE. Success to the woman whose family knows not indigestion!

"I Haven't Any Word-Sign for Dar-r-r-ling"

DOROTHY and Lillian were on their way to New York to attend a dance.

Dorothy was a little butterfly, who imagined herself very deeply in love. Lillian was a sensible little stenographer-to-be.

"Oh," yawned Lillian, "I must get busy. I promised Dad that I'd practice my shorthand all the way to New York if he would let me take this trip. Come, dictate something to me."

"I promised Dick that I'd wire him the minute I get in New York, just to let him know that I arrived," said Dorothy.

"Just as if the train had a notion to change its destination," commented Lillian.

"Oh, but you don't understand; you've never been in love."

"No, and just at present I prefer shorthand. By the way, did you study the Pitman system? Did you have a 'shun hook' or a loop?"

"O, I've forgotten. I do hope Dick will be in his office when the telegram arrives, for he'll be so-o-o worried until he hears from me."

"Say, Dot, forget Dick for a minute, will you? Please dictate something to me. Here, I've just started reading this story. Read it to me and see how fast I can take it."

"I don't feel like reading, I only want to think. How about my dictating a letter?"

"Good! Let's begin," said Lillian, taking a silver pencil from a chain around her neck.

"Why," began Dorothy, "you may say 'Dear loving and devoted—'"

Bang! went the notebook on the floor and Lillian's foot hit Dorothy's chair. "There!" exclaimed the stenographer-to-be, "I haven't any word-sign in my vocabulary for *dar-r-r-ling* and *devo-o-o-ated*. Dream on, love-sick soul, I'll see you when we get to New York. Meanwhile, I'll finish my story."

And she turned her chair around, picked up the magazine, and began to read. But Dorothy didn't mind. She simply gazed out of the window at the beautiful sky and the lovely trees and the "green grass that grew all around."

Dear Women Readers:

"I like to read the Women's Department," said a girl to me, "and I wish I knew how to write something for its pages, but O, I'll never be able to do it. You know, I'm not one bit enthusiastic about my work, and I couldn't say enough about it to fill two good lines. It's terrible to feel that way about your work, isn't it?"

It is. I agreed with her; it's a terrible way to feel about your work, but is it really necessary? If we are not interested in what we are doing, and if we can't cultivate an enthusiasm, we'd better drop it and take up something that we are interested in. If our work is not interesting to us, it can never be worth while; if we don't like it, we're not going to put our hearts into it; if we can't put our hearts into it, we are doing ourselves as well as our employers an injury; we're losing good, precious time.

I'd rather be a good washerwoman, who has a line full of the whitest clothes in the block, than to be a disinterested, discontented clerk.

As a washerwoman, I *would* have something to be proud of in spite of the humble job, but as a poor clerk I'd have to be ashamed of my work. Pride engenders self-respect, and self-respect is the backbone of right living.

Some people can cultivate an enthusiasm for anything. A girl whom I always admired for her happy disposition was married several years ago. Yesterday she called me on the telephone.

"John has gone into business for himself," she told me joyfully, "and he's just as busy as he can be!" she added.

"Splendid! I'm glad to hear it," I told her, "what kind of work is it?"

"He's head of a ladies' hairdressing parlor," she said, "and it's awfully profitable. Can't you come out to dinner tonight? One of the manicurists is coming around to sing for us, and I'm sure that you'll enjoy it!"

Not a business that I would be wild about. Yet honorable enough and solely a matter of taste. The point is that this girl knows how to *stimulate* enthusiasm in her proposition.

Yours sincerely,

Margaret Talbot Stevens

Associate Editor.

Well-Groomed Women Will Need These Frocks in Their Wardrobes

Plain and Novelty Cottons in Smart Demand—Sombre Tones Enlivened with Bright Trimmings—Drawn Work and Hemstitching Appropriate for Simple Models

By Maude Hall

A NEW and interesting display of cotton frocks designed far in advance of the time of wearing, not only shows the well-groomed woman what she will need for the coming season's wardrobe, but gives her time to reproduce the original models.

Many novelties are featured in cotton materials. Those in plain colors are characterized by exquisite shadings, while those with figures introduce the most unexpected shapes and designs. Among the latest voiles richly toned printed motifs are represented; these are used for hats as well as costumes, so that a striking ensemble may be achieved by having hat and frock of the same material.

Sprawling patterns combining polka dots and irregular lines are also effective in voiles. One of the advance models fashioned in this fabric is in straight line effect, closing on the left shoulder and under the left arm. There are tucks on the shoulders which are released at the bust-line to supply a fulness which is caught in again at the waist with a girdle of self-material. The neck may be finished with drawnwork or hemstitching, with this form of decoration repeated on the sleeve. There is no more appropriate trimming for soft cotton fabrics than hemstitching or drawnwork, for it is

possible to emphasize the effectiveness of either by the use of threads that contrast in color with the tones of the dress.

Dress 9359
35c.

As popular as the voiles are organdies, which, in dark tones, look exceedingly smart enlivened with touches of gay color. Black organdy is used to fashion another pretty frock, which has a white collar and vest. Sheer linen is used for these accessories and it is lined with tangerine organdy. The dress slips on over the head, but has a front-closing underbody as a foundation for the waist. For Summer, or, in fact, for any season, it is well to make the underbody of coarse net. It is strong, wears well, and never causes discomfort. Besides, being light, it adds nothing to the bulk of a dress.

In a group of very choice models one finds a white organdy frock in one-piece effect, with a black taffeta belt and bias folds of the silk on the collar and cuffs and along the edges of the tunic. The tunic, by the way, is dropped to the hip-line and falls a few inches below the skirt of the dress. The waist has an open front to disclose a vest of self-material. The upper edge of the vest may be hemstitched with black thread, if desired.

A pretty dress made up of white swiss with polka dots in turquoise blue has the skirt trimmed with three deep flounces. The blouse has a V-shaped neck which is finished with a long collar of soft white batiste. The girdle corresponds with the collar.

Alluring in Satin

THIS model makes up gracefully and alluringly in satin. There is a new dark green called Derry that is generally becoming. The two-piece gathered skirt is attached to the long-waisted blouse under a belt of green and black satin brocade. Deep flare cuffs attached to the kimono sleeves make the dress adaptable to general wear, developed in serge or trico-

tine. Medium size requires 3 yards 48-inch material, or 3½ yards 40-inch satin.

Pictorial Review DRESS No. 9268. Sizes 34 to 42 inches bust. Price, 35 cents.

Of August Simplicity

DARK blue crepe meteor emphasizes the simplicity of this straight line frock. The gathered skirt is attached to a long-waisted blouse with square-neck and short sleeves. The important decorative detail is a soft sash of blue satin lined with tangerine crepe. There is a kimono underblouse which may be worn independent of the plastron front. Medium size requires 4 yards 36-inch material, with 2½ yards ribbon.

Pictorial Review DRESS No. 9000. Sizes 34 to 46 inches bust. Price, 35 cents.

Child's Play Dress in Kimono Style with Side-Closing Rompers for the Home Dressmaker

A PRACTICAL little play dress for kiddies between the ages of one and four years forms the subject of today's dressmaking lesson. It is in slip-on kimono style and closes at the back. A circular band of self-material trims the round neck. With the dress come bloomers which close at the sides, each side being gathered to a straight band. Medium size requires 2½ yards 36-inch material.

Because of the width of the bloomer section of the pattern, it will be necessary to place the material in open width on the sewing table for cutting. There should be a double-ply of material, right sides facing. After provision has been made for the bloomers, there will be material left for the laps, bands and pockets.

To make the dress, slash through the fold at center-back, from upper edge to the large "O" perforation. Adjust neck-band to position with center-fronts, back edges and notches even. Sew lap C to slashed edge at back of dress and to neck band as notched. Take up a ⅜-inch seam at upper edges of slash and graduate into nothing at lower edge. Take up a ⅜-inch seam in lap. Fold lap through the center and fell the remaining edge over the seam. Close under-arm and sleeve seam as notched. Close side seam of trimming bands G and H as notched and sew to lower edge of dress, with center-fronts, center-backs, seams and lower edges even. Lap right back edge of dress on left width of the lap and finish for closing. Trim lower edge of sleeve with a straight band of material 1¼-inch wide when finished.

DRESS No. 9354. Sizes 34 to 46 inches bust. Price, 35 cents.

BLOUSE No. 9345. Sizes 34 to 48 inches bust. Price, 35 cents.

SKIRT No. 8295. Sizes 24 to 36 inches waist. Price, 20 cents.

BLOUSE No. 9366. Sizes 34 to 46 inches bust. Price, 35 cents.

SKIRT No. 9360. Sizes 24 to 34 inches waist. Price, 35 cents.

BLOUSE No. 9361. Sizes 34 to 46 inches bust. Price, 35 cents.

SKIRT No. 8295. Sizes 24 to 36 inches waist. Price, 20 cents.

JACKET No. 9375. Sizes 34 to 46 inches bust. Price, 35 cents.

SKIRT No. 8880. Sizes 24 to 38 inches waist. Price, 25 cents.

DRESS No. 9359. Sizes 34 to 50 inches bust. Price, 35 cents.

Turn pocket at upper edge and adjust to position.

The front of the bloomers is indicated by large "O" perforation. Sew lap E to slashed edges, matching single and double notches. Take up ⅜-inch seams at upper edges of slash and graduate into nothing at lower edge. Take up ⅜-inch seam in lap. Fold lap through the center and fell the remaining edge over the seam. Turn lap underneath front of bloomers and tack upper edge to position, permitting the back lap to extend. Close leg seam as notched. Close center seam of bloomers between "T" perforations. Sew waist bands to upper edges of bloomers, as notched. Fold waistbands through the centers and fell the remaining edges over the seams. Work a button hole near end of front waistband and sew a button on back waistband to correspond, for closing. Close seam of legband as notched. Sew legband to lower edge of bloomers as notched, with seams even. Fold band through the center and fell the remaining edge over the seam.

CHILD'S PLAY DRESS No. 9305. Sizes 1 to 4 years. Price, 30 cents.

Song Of The Robin

How happy, how happy, how happy am I,
Our little birdies will soon learn to fly.
Some day to Southland we'll fly far away,
And 'tis there we'll be happy for many a day.

How happy, how happy, how happy am I,
Swinging and singing in branches so high,
Close by my side sits my dame on her nest,
O, the children all love us and none will molest.

The Farmers and the Birds

By Catherine Kelley

Roland Park, Baltimore, Md.

IT WAS Springtime. The birds were singing merrily as they built their nests.

But the farmers were angry. They did not want the birds to eat the corn in the fields and the cherries on the trees. They said that all of the birds must be killed.

But the birds had one friend. This friend stood up before the farmers and said: "Think of your woods and fields without birds! Who will drive the worms from your fields and gardens? The birds pay you well for the grain and the cherries that they eat. What will you do without their sweet music?"

The farmers only laughed and would not listen to the friend. They sent men and boys into the fields and woods to kill the birds. The little ones were left to die in their nests.

When Summer came there was not a bird to be seen. Hundreds of worms ate everything that grew in the gardens and fields.

When Autumn came there were no red and yellow leaves on the trees. The branches were dry and brown.

Then the farmers were sorry. The next

Spring they sent a man away to bring the birds from all of the country around.

One day the man drove a wagon, covered with green branches, into the village. Cages filled with singing birds hung upon these branches.

The farmers opened the doors of the cages and the birds flew out.

Once more the woods and fields were filled with sweet music.

Little Birdie

By Dorothea Taxis
Baltimore, Md.

Little birdie, will you look
At the pretty running brook,
And the lovely flowers
Of the pleasant summer hours?

Little birdie, will you sing
Of the Spring,
And of the nest
Where you rest?

Little birdie, will you love
Like a dove
The pleasant summer hours?

The Birdie

By Esther V. Righter
Roslyn, Md.

A little bird sat upon a tree one day.
While he sat there a strange thing happened.

He was singing with all his might when a boy came along.

"Why do you sit so still, little bird?" he asked.

The bird never answered him, but went on singing his little song. The boy went away.

By and by, the birdie finished his song and flew away. No sooner had he gone than the boy came back, and what do you suppose he had with him? A bow and arrow. He looked for the birdie but the birdie was nowhere to be seen, for he had flown away to his nest. The boy found him and was just going to shoot, but the bird flew away.

How to Build a Bird House

By Harold Dunkerly
Dorsey, Md.

Get some thin boards. Cut two sides of the roof, each 1 foot long and 1 foot wide. Make the sides 1 foot long and 10 inches high. Then cut out the bottom, 1 foot 4 inches long and of the same width. The edge of this will extend beyond the sides, front and back of the house to form a porch for the birds to walk about on, and it will catch any of the young birds if they should happen to roll out of bed. You can run a little railing around it,

Drawn by Melvin Dunkerley, Dorsey, Md.

if you wish, but do not fix it on so that it will catch water. It is best to start building the sides first. Nail on or dove-tail the front and back, which are each 10 inches high, to the edge of the roof and 6 inches more that go up into a peak under the roof—1 foot 4 inches altogether. Add the roof, whose edges will overlap the sides and form caves. Be sure that everything is good and tight, for we don't want the birds to get wet. If the house is for wrens, make the doorway very small so that the larger birds cannot get in and chase the wrens out. Finish off the house with a little swing.

A little porch roof may be built over the doorway, if you wish it to look like a real house. This will also protect the doorway from heavy rains.

Dear Girls and Boys:

Aren't you glad that it's Springtime?

One day in March as I was going home from the office, a little girl, no larger than Catherine Kelley's little sister, ran up the street to meet me.

"I know something! I know something! It's a secret!" she shouted happily as she seized my hand. "Let me tell you in your ear."

I bent low to hear it.

"The bluebirds are here," she whispered, "I saw one in the country today."

And then both of us were so happy that we had to go home and tell everybody about it.

How do you like our Bird Page? Why, there were so many nice things to put on it that there wasn't room for a long story. But I am sure that you will enjoy reading the stories from our own little girls and boys. They are just splendid.

Now for the June Page! What shall it be? Guess—one-two-three—Why, flowers, of course! Isn't June the month when the roses, the daisies, the honeysuckle, and all the sweetest flowers bloom? So, remember, when you write your letters for June, tell me all of the things that you know about flowers. If you have a picture of yourself taken among the flowers, let me have that, too. Send your letters before May 5, and I know that we'll have a beautiful page.

With love,

Aunt Mary

P. S.—Send your letters to Aunt Mary, BALTIMORE AND OHIO MAGAZINE, Mt. Royal Station, Baltimore, Md.

The One He Loved Best

An Atlanta husband, having offended, came home the evening of the quarrel with a parcel under his arm.

"Darling," he said to his wife, "look here. I've got something here for the person I love best in all the world."

She came forward with a shrug.

"Humph! What is it?" she asked. "A box of cigars?"—*Thermoid News*.

Little Letters From Little People

FIRST on out list for this month comes Catherine Kelley, who has written us such a delightful story about the farmers and the birds, and right along with the story is a picture of Catherine herself. Catherine is 12 years old and her sister Margaret is 8. They live at Roland Park. Wouldn't you like to know them? They have a brother who works for the Railroad.

Next comes Marguerite McDonald, whose father is a signal maintainer at Richmond, Staten Island. She drew a pretty picture of a little Dutch boy and girl with a goose and some boats.

Gale Schachte lives at Mt. Pleasant, Pa. She says: "I am 9 years old and in the fourth grade. I have two pets. I bet you can't guess what they are. They are two banty chickens. I call them "Dick" and "Biddy." They eat from my hands. I think very much of them. My daddy has worked for the Baltimore and Ohio for about 25 years. He is a brakeman and a member of the Safety Committee. His name is Anthony Schachte."

Would you like to read a pretty little story? Then read Esther Righter's story about the birdie. Esther lives at Roslyn, Md. She knows the robin, the cardinal, and the bluebird, the woodpecker and the sparrow. She says: "Boys and girls can help birds by throwing threads and pieces of wool on the ground to help them make their nests."

James Sampsel, Washington, D. C., wrote another nice letter. He is only 5 years old, but he knows how to use the typewriter. Isn't that splendid? He drew a picture of a village with a train pulling in,

a threshing machine, fields, a barn, and almost everything that you can find on a farm.

Effa Beckman, 326 Patapsco Avenue, Baltimore, has drawn a picture of a Mack Sennett beauty, which we are going to show you on our Vacation Page in the Summer. She is going to draw us something for the Circus Page, too.

Ruby Smith lives at Gaithersburg, Md. Her father has worked for the Company for 19 years. She has a little sister named Frances, and they both like to read the Children's Page. She is in the fourth grade. Her teacher is Miss Mitchell, who reads pretty stories to the pupils.

Ruth Kencally, Baltimore, loves flowers. Some Saturday afternoon she is going out with Aunt Mary to look for wild flowers. She is 10 years old and her grandfather is foreman of the Wicomico Lumber Yard in Baltimore, and a veteran in the service of the Company.

Fannie Keith lives in Baltimore, too. She sent a doll, all drawn and cut out. Fannie is 9 years old. Her grandpa was a Baltimore and Ohio conductor for 42 years. She likes to read the Children's Page.

Dorothea Taxis wrote again and said how much she liked Myra Gill's story of the terrapin. Myra will certainly have to write is another story. Don't forget to read Dorothea's poem.

Kathryn Hadden was the first little girl to write to me from the Cleveland Division. She is 9 years old and lives at Dover, Ohio. Her daddy works for the Baltimore and Ohio. She likes the stories on the Children's Page.

SOME OF OUR LITTLE PEOPLE

Top: Ida Smith's little sister Selina. Left: Catherine Kelley, who wrote "The Farmers and the Birds," and her little sister Margaret. Right: Louise Fankhanel, granddaughter of Mrs. Sagle, matron, Camden Station. Lower picture: Edward James, Jr., son of E. J. Sullivan, conductor, Shenandoah Division

Here you see a picture of Louise Fankhanel. She is the granddaughter of Mrs. Louise Sagle, matron, Camden Station. She is 8 years old. Her great grand-father was "Uncle Joe" Sagle, an engineer of 50 years' service on the Baltimore and Ohio. Louise lives at Ridgefield, N. J.

Now, last but not least, come our little friends from Dorsey, Md. You have already met Ida Smith, but here is Ida Smith's little sister, Selina. Selina and her mother and daddy and all the family went to the Veterans' picnic at Brandywine last summer, and she just had the time of her life. Louise Perry is another little Dorsey girl who has written us a poem about the games the children play at school, and another about her teacher. You will read these in the September number of the MAGAZINE. We're going to have a School Page then. I am sure that Louise could tell us a lot about flowers for our June number, for her daddy is a florist and has just lots and lots of beautiful flowers that grow in glass houses. Harold Dunkerley is the boy who tells us how to build a bird house. Thank you, Harold. His brother drew the picture that goes with the story. Isn't that a funny little bird in the swing.

Thomas P. Douglass

(Continued from page 33)

In June, 1900, he returned to the service of the Baltimore and Ohio as machinist at Cumberland.

Mr. Douglass married Miss Mary Long of Virginia. They have three sons: Parker, a salesman for Eckert and Meyers, tobacco wholesalers; Paul, who is connected with the American Express Company; Russell, Baltimore and Ohio machinist.

Mr. and Mrs. Douglass are now living on Virginia Avenue, Cumberland, Md.

Effective March 1, this year, Mr. Douglass was transferred to the Pension Roll.

J. H. Carnes

J. H. Carnes, pensioned engineer, was retired on August 25, 1920, his 65th birthday.

Mr. Carnes was born in Loudon County, Va. In December, 1865, his mother moved to Newburg, W. Va., and in March, four years later, Mr. Carnes went to work for the Company as grease wiper. Two years later he was promoted to machinist helper. This position he held until September, 1879. He secured a position as fireman later in the same year, following his work to Rowlesburg, where he now resides.

On October 6, 1882, he was promoted to engineer. He has been in continuous service of the Company for 51 years, and has tried at all times to give the best possible service to the Railroad.

Mr. Carnes is a member of the B. of L. E., Chapter No. 437, Cumberland, Md. Those who see him on the street would

not think of him as being retired because of his age; he is lively and happy, and his robust appearance and good health are in keeping with his' sunshiny disposition and good fellowship.

Joseph N. Gore

Joseph N. Gore was born on November 3, 1852, at Winchester, Va. About 1862 he moved to Harpers Ferry, then to Charles-Town, where he worked for a sash factory. He came to Baltimore in 1878 and began work as elevator carpenter for the Baltimore and Ohio, continuing in this work until pensioned.

John T. Marshall

Born in Baltimore, Md., on March 13, 1855, John T. Marshall began work with the Baltimore and Ohio in the lumber yard office at Mt. Clare in September, 1870. In June, 1872, he was sent to the foundry to learn his trade as iron moulder. Here he served until four years later, when he went to work in the foundry at Mt. Clare. When furloughed there in 1877, he went to Locust Point, where he worked as blacksmith until later in the year, when he was transferred back to Mt. Clare. Later he returned to Locust Point and worked until 1913, when he became crossing watchman on the Washington Road. From here he was transferred to the Storekeeper's Department, Locust Point, where he remained until November 5, 1919, when he was pensioned because of eye trouble.

H. M. Creak

H. M. Creak, pensioned engineer, Cumberland Division, was born in Preston County, W. Va., on January 2, 1855. He attended school near Terra Alta. He tells us that he first entered the service of the Baltimore and Ohio at Newburg on September 2, 1871, as grease wiper; that he resigned in 1879, and re-entered the service in 1881 as fireman, running between Keyser and Grafton.

He was promoted to engineer at Martinsburg in 1888. In July of the same year he resigned and went to the Pacific Coast, returning to Martinsburg a month later. Here he was re-employed and remained in service until his retirement on March 15, this year.

Joseph M. Knopp

The photograph on page 33 is of Joseph M. Knopp, one of our pensioners who has been spending a few months in Jacksonville, Fla. He and his two friends are displaying one of their famous "catches." The picture was taken on a boat returning from the Gulf. Mr. Knopp is standing at the right.

Joseph Knopp was born on November 17, 1847, and began his career with the Company in 1871 as fireman, Cincinnati, Ohio.

In 1875 he was made engineer, in 1891 passenger engineer. During the next year he lost several months because of illness, but returned in June to his old job, which he held until he was pensioned, November 14, 1914.

Navy Football Men Like Our "Training Table"

ROOM 2302, NAVAL ACADEMY, ANNAPOLIS, MD., November 30, 1920.

MR. E. V. BAUGH,
Superintendent Dining Cars,
Baltimore, Md.

Dear Sir—The Manager of the Navy football team on behalf of the Navy football squad wishes to express his appreciation for the wonderful service rendered on special trains which carried the Navy football team from Baltimore to New York and return.

This service was made possible thru the efforts of Inspector Joseph J. Reiser, Dining Car Stewards "Dan" Marks, Car 1025, and J. F. Halshouser, Car 1030, and in fact the entire force connected with us.

I am assured that the future trips of the Navy football squad will be on the Baltimore and Ohio Railroad.

Sincerely yours,

(Signed) SIDNEY WRIGHT HARVEY,
Manager football, Navy.

Train Baggage W. H. May Commended

WE ARE glad to quote extract from letter of Mr. R. I. Pile, proprietor of the I. X. L. Creamery, Friedens, Pa., commending Train Baggage W. H. May on train 51, between Rockwood and Johnstown, on which the milk shipments for that branch are handled, viz.:

"I wish to call attention to the efficient manner in which your local baggageman, Mr. May, handles milk and cream shipments. Attention is called by him to any errors in shipments and billing, immediately when such occur, instead of allowing customers receiving such shipments to direct attention to same at end of month, when it is difficult to check up an error. Shipments in his care always receive the best of attention."

General Baggage and Milk Agent Dugan appreciates the interest of such employes, who are most important factors in holding and increasing our share of the milk carrying business.

You can't run a railroad without traffic any more than you can fire a boiler without fuel

Safety Roll of Honor

Baltimore Division

How truly "Bread cast upon the waters will return after many days," is illustrated in the following token of appreciation for something that happened about two years ago:

March 1, 1921.

Division—Baltimore,
Entry Number 2119-B,
J. T. MATHEWS, foreman, Washington,
D. C.

Dear Sir—The following entry has been made on your service record:

"1-21-19--Washington--Sometime around the first of January he assisted Company's patron in shipping an automobile and some household furniture from Washington to Cincinnati. Handled matter with such courtesy that Company patron states 'what might have been an unpleasant task on my part proved a pleasure.'"

Mr. Mathews for his action in this respect is commended. File 2576.

(Signed) R. B. WHITE,
Superintendent.

On February 11, while Agent C. E. Whipp Lime Kiln, Md., was on his way home from work, he found a broken rail on westbound track at target pole, Adamstown Junction, Section 58. Rail was reported to the section foreman through the operator and repairs were made to the track.

On February 12, Operator J. F. Elste Poplar, Md., observed broken arch bar on Baltimore and Ohio 223206 in train of extra east engine 4521. Train was flagged and stopped just east of tower the in time to avert accident as it was necessary to call rigging outfit to get car clear of main track. Operator Elste has been commended for his quick action.

Cumberland Division

On February 26, C. M. Clark, car inspector, found broken rail on the eastbound track, east of "Z" Tower. He reported this at once, knowing the possibility of a train being due at any moment. Mr. Clark is commended.

During the past month the following irregularities were noted by operators and prompt action taken for correction:

Brake rigging down.....	1
Wheels sliding.....	1
Broken spring hanger, car set off....	1
Flat wheel, car set off.....	1
Unsafe condition.....	1
Extinguishing fire.....	1

Total..... 6

On February 26, Trackwalker Frank Seeders, Section 24-A, who lives about one-quarter mile from the railroad at Dans Run, W. Va., heard a train going west making an unusual noise. As all men were off on that day, he went to investigate. He found a broken rail, went out to flag and protect track, and notified Foreman J. F. Kellar, who had repairs made.

Connellsville Division

On the afternoon of February 14, Bridge Inspector Walter H. Cotton, while on his way from Morgantown to Uffington, discovered a broken rail on outside of curve, 200 feet west of lock No. 11. He immediately notified the proper authorities to have repairs promptly made. Mr. Cotton has been commended for his prompt action.

On March 17, when Operator D. E. Hartzell, of Wilson Creek, went to handle his switches at that point, he found a flange; having been over the ground prior to this time he knew the flange was lost from extra east engine 7145, which had just passed his station. He immediately got in touch with Operator P. E. Hauger at Rockwood. Operator Hauger immediately left his office, went up over a hill and across the branch wye and running track, delivered instructions to the conductor and had the train stopped and the car with the broken flange set off. The alertness and prompt action of both Operators Hauger and Hartzell probably averted an accident, and they have both been commended for the interest they displayed in the Company's welfare on date in question.

Ohio River Division

On February 15, while extra 1353, east, was passing Glenwood, W. Va., Agent-Operator G. T. Brown noticed brake rigging dragging under eighth car from caboose. He notified conductor and train dispatcher. Train was stopped and brake rigging taken down.

This observance on the part of Agent Brown is commendable. Suitable notation will be made on his service record.

Charleston Division

Mr. Clayton Vance, who lives near Charleston, W. Va., was recently walking along the railroad track at Mile Post 1, when he found some large rocks on the track. Knowing that passenger train No. 37 was about due, he turned and walked back, flagged the train and advised the crew of the obstruction. The superintendent has written a personal letter to Mr. Vance expressing his appreciation of his action.

On March 2, Mr. Lee Skinner, Orlando, found a piece of broken wheel about eight inches long just north of Orlando Depot. He took it to the station and turned it over to Operator Griffin. A check was made and it was found that last train passing there was extra 2885, north. Conductor Robinson, in charge, was caught by wire, stopped his train and on examination found that a piece of tread of wheel on a load of coal had broken out. Car was set out for repairs. The superintendent has written Mr. Skinner a letter of appreciation. His action probably saved a derailment.

While extra 1228-1232 was passing Erbacon, Agent T. J. Thomas noticed a car with brake rigging down. He ran after train, stopped it, and had repairs made. He has been commended.

Conductor Leinaster, while passing Chappelle noted that switch lock was unlocked and lying on head block. He stopped train and made repairs, locking the switch. For this action he has been commended.

Conductor D. T. Foy, while in a siding with his train, noted bent axle on coach 2045, passing on passenger train. He reported it at once by wire. Examination showed his report to be correct. He has been commended for his watchfulness.

Conductor R. R. Mills has been commended for his interest in avoiding freight claims in the handling of local trains.

The following engineers have been commended for making a fuel performance of over 100 per cent. in January:

W. T. Spencer, who heads the list twice in succession; W. A. Stalnaker, S. H. Haymond, B. H. Griffin, L. R. Shomo, A. F. Vorholt, J. A. Dougherty, A. B. Nicholas, C. W. Gum, J. Ankrum, J. H. Stalnaker, W. T. Morgan, W. J. Johnson.

Newark Division

On February 27, Brakeman F. L. Durkin, train third 95, discovered broken arch bar under car in train at Shelby Junction. He took prompt action to have train stopped and car set out before any damage was done. He has been commended for his watchfulness and prompt action.

On February 24, Operator O. W. Varner, Bridgeville, Ohio, discovered a broken rail while on his way to work. He took prompt action to notify the dispatcher and to have the location protected until repairs were made. This is the fifth instance in which Mr. Varner has discovered and reported broken rails, and he has been especially commended for this vigilance. Notation has been placed on his record.

On February 12, Joint Operator E. E. Withrow, Shelby Junction, Ohio, while delivering orders to train 98 at that point, observed something dragging under train, called to conductor, and by the time the train had stopped the car had derailed, but before any particular damage occurred. Mr. Withrow has been commended for his alertness and prompt action.

New Castle Division

On February 23, as extra west 4030-4131 was passing Hereford, Ohio, Track Foreman J. L. Fordney noticed a wheel broken in car P. M. 32809, and immediately notified the crew, who stopped the train by applying the air from the rear.

The close observance and prompt action of Mr. Fordney in preventing a serious accident has caused a commendatory entry being placed on his record, and Superintendent Stevens has written him a letter of appreciation for his interest in the safe operation of trains.

NEW CASTLE, PA., March 11, 1921.
MR. WILLIAM MORT,
Yardmaster,
New Castle Junction, Pa.

Dear Sir—On the morning of March 10, while train 67 was taking water at the penstock at New Castle Junction, Yardmaster Mort, in passing train, discovered brake beam down and damaged on Baltimore and Ohio baggage car 517. Investigation developed that some obstruction had been struck on the Pittsburgh Division, just east of New Castle Junction.

We desire in this way to commend Mr. Mort for his watchfulness in this instance.

Yours truly,
(Signed) D. F. STEVENS,
Superintendent.

NEW CASTLE, PA., March 15, 1921.
MR. F. H. ELSON,
Operator,
Ravenna, Ohio.

Dear Sir—On March 11, N.Y.C. extra 3967, coming on our tracks at Ravenna, Ohio, had a brake beam down and three or four cars ran over it. Operator Elson threw the advance signal and got the train stopped, at which time the brake beam was removed. It was found that a guard rail was driven forward 18 inches. Operator Elson had the crossover spiked down, maintainers called and conditions corrected.

I desire to commend him in this way for his close observance and prompt action, which, undoubtedly, saved an accident.

Yours truly,
(Signed) D. F. STEVENS,
Superintendent.

Cleveland Division

CLEVELAND, OHIO, March 1, 1921

MR. J. A. KIEFER,
Operator,
"GI" Tower.

Dear Sir—I have before me a report showing that when extra 4034, east, was passing "GI" Tower, February 27, you noticed brake beam down on one side and dragging on rail, and that you stopped train and had same removed.

Your careful observance and prompt actions probably averted an accident and I want to commend you. I have arranged to place proper notation on your record.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

Ohio Division

On February 17, Samuel Jones and Henry Scaggs, both employes of the Portsmouth Street Railway and Light Company, while on their way home from their duties at that place, discovered a broken rail west of Sciotoville Junction on the Baltimore and Ohio tracks. Mr. Scaggs remained at the rail to flag any approaching train and Mr. Jones notified our track foreman of the condition. When this matter was brought to division engineer's attention, he sent each of these gentlemen a letter of appreciation for the action taken and interest displayed on their part, which undoubtedly averted a serious accident.

A letter of appreciation has also been written by Division Engineer Maher to Edward Marsh, a resident of Gepharts, Ohio, who, while on his way from work on the evening of February 24, discovered a broken rail on main track, one-half mile west of Scioto Furnace, and immediately reported this condition to operator at that point.

On February 1, after setting cars in yard, Switchman A. Calver, riding foot board of tank, yard engine 2892, switching over Main Street crossing, Chillicothe, light, observed an old man going across the tracks with his back to engine, entirely unaware of any danger. Mr. Calver gave engineer stop signal and ran ahead of engine and pushed this man off track. Engineer observed the stop signal, but would have been unable to stop engine in time to avert an accident had it not been for the prompt action on the part of Mr. Calver. He has been commended.

CHILLICOTHE, OHIO, March 1, 1921.
MR. W. S. SMITH,
Fire Brick, Ohio.

Dear Sir—I desire to express my appreciation for the interest taken by you when you discovered broken rail in track just east of New Globe, and which you reported to our agent at South Webster, who, in

turn, was able to notify our track foreman to make repairs before a derailment occurred.

Again thanking you for your interest, I am,
Yours very truly,
(Signed) J. L. MAHER,
Division Engineer.

Indiana Division

On February 20, at 4.20 p.m., Big Four extra 6711, east, pulling over Walnut Street crossing, North Vernon, Ind., had arch bar broken on NSCX 929 and dragging in the dirt.

Crossing Watchman W. J. Henry saw this condition and stopped the train just before it got to the point where it would have torn out the crossing, possibly derailing four or five cars and doing considerable damage.

Investigation developed that the arch bar showed an old break. It took about one hour to get the car in the rip track.

Crossing Watchman Henry is commended. Appropriate entry has been made on his service record.

On February 10, while freight train No. 90 was passing North Vernon, Fireman Frederick Aufderhide, who was standing on platform, noticed something dragging on an oil car three or four car lengths from caboose. He called the attention of the conductor to the unsafe condition, train was stopped and it was found that part of the brake rigging had been broken off.

The close attention of Fireman Aufderhide in observing train on which he was not employed is commendable. Appropriate entry has been made on his service record.

On March 1, while train No. 90 was passing Dearborn, Operator T. R. Scoopmire noticed brake beam down on car of oil and notified conductor. Train was stopped and necessary repairs were made.

Had this condition not been discovered it would have caused damage to interlocking plant at Lawrenceburg Junction and possibly derailed car.

The close attention and inspection of train by Operator Scoopmire is commendable and appropriate entry has been made on his service record.

The Late John Abel Hunter

(Continued from page 29)

Mr. Hunter was born September 20, 1845, at Martinsburg, W. Va., and although but a youth at the outbreak of the Civil War, entered the Confederate Army, and served with honor during the later period of the struggle.

For almost a half century Mr. Hunter faithfully served the Baltimore and Ohio Railroad. He first entered the service in July, 1865, as a rodman in the Engineering Department, and filled successively the positions of resident engineer in construction of Ohio River Bridge; resident engineer of survey, Chicago Division; resident engineer in construction of Somerset and Cambria Branch; master of road, Grafton to Ohio River, and division engineer Maintenance of Way, Keyser to Ohio River.

In June, 1890, Mr. Hunter was severely injured in a wreck of a Baltimore and Ohio inspection train, passing over the Ohio River Railroad. Upon recovery from his injuries, he was assigned to the Real Estate Department as engineer, and in 1901 was

made Right of Way agent, which position he held at the time of his retirement in February, 1915.

Mr. Hunter was a lovable Christian gentleman, and found the greatest pleasure in assisting and aiding the younger men with whom he came in contact. He had a wide acquaintance and great popularity among all classes, particularly in his native State, where he counted the most prominent people among his friends, and his death has caused great sorrow among them and among his old comrades on the Railroad.

Death of Philip T. Spence

PHILIP TAYLOR SPENCE, pensioned conductor and resident of Redlands, California, for the past 12 years, passed away on February 21 at his home there. He is survived by his wife and daughter, and a sister, Mrs. John Murnan, of Winchester, Va. Interment took place at Winchester, Va.

For 44 years Mr. Spence engaged in railroad work in the east, occupying responsible positions with the Baltimore and Ohio, his father being a railroad builder, especially in the construction of the Shenandoah Valley Branch of the Baltimore and Ohio after the war.

Mr. Spence in his youth naturally gravitated toward the railroad, entering the service of the Baltimore and Ohio on February 1, 1866, as timekeeper at Winchester. He left in May, 1870, but returned the next year as brakeman, Newark Division. In 1872 he was made baggageman, and in 1879, conductor. When the Company inaugurated its service of limited trains between Chicago and Wheeling, W. Va., Mr. Spence was called upon to take charge of these important and fast trains, a service which he rendered so faithfully that when advancing years necessitated retirement he was pensioned in January, 1910, in recognition of his long years of activity and allegiance to duty. His duties gave him a wide circle of acquaintances, who will grieve at his passing and sympathize with the family in the great loss sustained. Mr. Spence was 73 years old.

"Cannot Recommend Savings Feature Too Highly"

March 10, 1921.

MR. W. J. DUDLEY, Superintendent,
Relief Department,
Baltimore, Md.

Dear Sir—Policy of fire insurance, abstract of title and judgment bond received O. K. I take pleasure in thanking you and your department for the promptness and fair dealing of the Savings Feature. I cannot recommend the Savings Feature too highly to any employes seeking a home. It is the surest and cheapest way with least trouble to the buyer.

Very respectfully,
(Signed) W. E. DITTMAN,
Engineer, New Castle, Pa.

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department

Correspondent, GEORGE W. HAULENBEEK

Birthdays were teeming in February. We had three on the 20th; quite a rarity. It happened on Sunday and that explains why we had no celebration, as would have been the case had any of the young ladies been participants. In the latter case, American Beauty roses would have been in order.

If you ask me about the birthdays of young ladies, how and when they are celebrated and when they occur, I respond that though I make every effort to be exact in recording incidents and occurrences, I am powerless to give any worthwhile information on this point.

I firmly believe and feel that I could carry a message to Garcia in much better shape than I could supply a readable paragraph on this subject. I curb my natural curiosity in this regard and advocate this treatment generally.

Here are the names of the gentlemen who celebrated in a quiet manner at their respective residences on the date in question: William Irvine Cross, Edgar W. Young and John William Rich.

Copying Long Letters

I notice that our young ladies are frequently called upon to make copies of long letters to be used in connection with a case, and this, I think, could be obviated if stenographers in transcribing letters of unusual length would make an extra copy for the file. This could easily be done, and in case it should be necessary to use a copy, the file would disclose and furnish it, and labor could be saved.

"To save time is to lengthen life."

Mr. Marshall's Children

"The January MAGAZINE, on page 40, displayed the pictures of a number of children, and that was the page that held me enthralled. At the bottom of the page there appeared the picture of three fine-looking children and I congratulated the father, Joseph Marshall, of our elevator service. Please turn to page 40 and note this picture again.

Real Economy

J. W. Root, superintendent, Ohio River Division, has the proper view concerning real economy. He sent out a circular in February requesting the total number of

new time-tables required for distribution, stating that the information was to be used in a revision of mailing list which he was endeavoring to cut down to a minimum.

Heretofore the Law Department has been deluged with time-tables which it did not require, and this movement of Mr. Root is in the line of strict economy.

We are getting there.

Bath Tubs and Progress

In an article on Bath Tubs and Progress in a legal publication called *Case and Comment*, which comes regularly to the Law Department, I find that the first bath tub in the United States was built in Cincinnati and installed in a home there in 1842. It was denounced in the Cincinnati newspapers as a luxurious, undemocratic vanity. And medical men declared it to be a menace to health!

In 1843 (my year) Philadelphia tried to prohibit bathing between November and March by ordinance.

In 1845 Boston made bathing unlawful except when prescribed by a physician, and the grand old State of Virginia taxed bath tubs \$30 a year.

Clever Husbands

"Tell me, do clever men make good husbands?"

"My dear, clever men do not become husbands."

Our Passenger Department

The Passenger Department is constantly doing things to help matters along, and I would like to see something from that busy department in the MAGAZINE now and then, but better still, regularly.

In going to New York the other night to see "Lightnin'" and the "Gold Diggers," I walked over to Mount Royal Station, and at 10 o'clock, when the New York sleeper was open and ready for visitors, claimed ownership to upper four. I slumbered peacefully to New York because a young gentleman from the Passenger Department had placed in a conspicuous place in the car a card on which was printed in clear bold type:

"Please assist in preserving silence for the benefit of those who desire to sleep."

This was a new experience, for heretofore I have been much disturbed by conversations in neighboring berths when everybody ought to be asleep. Hats off to the Passenger Department!

The Deer Park Boys

In a recent number of the MAGAZINE I referred to Deer Park boys who had climbed

the ladder in the railroad world and made a good reputation. I made one or two mistakes and am indebted to Mr. John A. Droege, who reads the MAGAZINE every month, for calling my attention to the errors. I omitted to mention "Eddie" Griffin. He had risen from the position of telegraph messenger boy to finally becoming an operating official at Grafton, where he died some two or three years ago. "Hice" Laughlin also started as a messenger boy.

John A. Droege

In designating the Deer Park lad who had attained the position of general superintendent of the New York, New Haven and Hartford Railroad Company, I should have been more careful and written it John A. Droege instead of Otto, his brother. Mr. John A. Droege has offices in the Grand Central Terminal, New York, and is a very popular official. He has written books on railroad subjects which are standard publications.

Car Service Department

Correspondents,

J. T. LEAN and H. V. OBERENDER

With sincere regret we report the death of Miss Carrie Clark, one of our foreign record clerks, on February 23. We all extend our deepest sympathy to the bereaved family.

Wilson Auld has been elected manager of the baseball team of this office, and desires to arrange games with other railroad uniform teams. Players are as follows: Catchers, Peters, Bayn; pitchers, Bryan, Robinson, Boteler, Rieder; infielders, Warner, Grafton, Strauss, Donald, Smith, Bredehoeft, Calhoun, Lean, Peddicord; outfielders, Oberender, Crosswell, Buettner, Magruder, Dick, Brown, Kerby.

Note our Harry Bredehoeft is "Feathering his Nest" as he expects to join the benedicts soon. Best wishes, Harry!

"Colonel" Schley is again getting his fishing tackle ready. Look out for the sharks, "Colonel."

Our friends "Robby," Wette and Deeker are scouting all over town for some good hair tonic.

According to the "sparklers" being worn by our girls lately, seems as if there will be quite a few June brides.

Dorothy E. Stewart
Daughter of J. C. Stewart, schedule clerk,
Advertising Department

There's a doubt about "Robby's" full name—some say it's Olwine Augustus Robinson and some say it's Augustus Olwine Robinson. It certainly seems to be worrying some of the girls.

Elmer Warner, one of our little bowlers, has bought a little bowling alley to practice on. Look out for Elmer; he's a wonder on ideas.

"Mike" Oberender, our "Beau Brummell," is simply crazy about one of our telephone girls. Suggestions that may help the cause along will be greatly appreciated by "the Gang."

We wonder if "Jimmie" Lean, the "he-vamp" of the trace desk, makes a practice of taking girls home for supper.

Coal Traffic Department

Correspondent, GEORGE C. BAUER

On Saturday, March 5, our bowling team gave an artistic trimming to the five representing the office of the Auditor of Coal and Coke Receipts and thereby got sweet revenge for the 4-0 defeat handed us in baseball last summer. We added insult to injury by bearding the lions in their own den, the match taking place at the Y. M. C. A. After losing the first game by a single pin, we came back strong and made a strike and three spares in succession early in the second game. The box score below will tell the story better than words.

Although our victims felt the sting of defeat keenly, they exhibited the same sportsmanship in defeat as in victory. They acknowledged that the better team had won, and thanked us for the bowling lesson we gave them.

Our chief clerk, C. W. Shinnamon, who is also captain of our team and chief yell-leader when not rolling, displayed his versatility by being high man of the game.

Following is a little ditty entitled "The Lost Spare" or "How Guy Won the Beautiful Tallow Frying Pan" (with apologies to J. J. et al.):

Somebody said that it couldn't be made,
But he with a chuckle replied:
That maybe it couldn't but why be afraid
Of something he not yet had tried.
So with calmness and care he aimed for the pair

And everyone thought that he'd do it,
But he heard something tear when he rolled
for that spare

That couldn't be made—AND HE BLEW IT.
Seriously speaking, Guy did roll a nice game—the third one.

Arthur B. Rock, secretary to T. J. Walters, general coal freight agent, is at St. Joseph's Hospital, having recently undergone a serious operation.

The boys in this department, as well as his many other friends, sincerely hope for a speedy recovery, and that he will be back at his desk within a short time.

Signs of Spring

"Herbie" riding his motorcycle.
"Gus" dreaming about Crawford Avenue.
"Pinnie" trimming his grapevine.
"Ted" planting tomato seeds in a tin can.
"Alvie" cleaning the chicken yard.
"Harry" parting his hair in the middle.
"Joe" consulting programs of County Fairs.
"Spike" looking in jewelers' windows.
"Jits" inspecting his Magothy River farm.
"Witty" practising detection in the parks.
"Mac" walking to work.

"Herman" opening the window.

"Leonora" thinking of Roland Park and Atlantic City.

"George" shopping for Miss Simpson.

"Velvet Joe" says: "Gosh blame it! Every time I goes to git a hair cut them blamed barbers makes me wait. You jest watch, tho', and see if I don't git even with 'em. I'll cut it myself, by heck!"

"Witty" Warren, the village wit, is now aspiring for the role of amateur detective. His latest case, "The mystery of the missing mate," required some real footwork, as well as headwork. He was especially good on the footwork. His charges are nominal. Try him and see!

"Connie" Schanze, better known as "Spike the Clipper," is getting close to port in the "courtship race," and we look for the announcement of his "finish" very soon.

'Twas midnight in Paradise. The town clock in the distant village chimed the hour. In the library of one of the leading citizens of the county was seen the form of a man bending over a table in the center of the room. About him were numerous sketches, drawings, plans, what-nots. Occasionally the otherwise quiet form moved, the fingers running through the few remaining strands of what was once a wonderful suit of hair. Suddenly the form arose, walked over to the window, looked out into the inky blackness of the night, turned suddenly with a quick jerk of the head, jammed his hands deep down into his jeans, withdrew them quickly, gazed at the palms and said: "My fortune is made; tomorrow I shall see my patent attorney and clinch this thing!"

Thereupon our hero (for such he is) stepped briskly over to the table, gathered up the various papers, prepared them neatly for transportation to the big city on the morrow, and decided to call it a night. Fifteen minutes later he was in the arms of Morpheus, snatching a few hours' well-earned rest before the alarm rang at 5 a.m. to call him forth to conquer new fields. (To be continued.)

"Joe" Kemp recently announced that he now knew who was "boss" in his home. It

TREASURY DEPARTMENT, BALTIMORE, PHOTOGRAPH TAKEN JUNE 23, 1894

Treasury Department, Baltimore, as it looked in 1894. In the foreground are: Charles W. Rhodes (left), deceased; N. S. Pendleton, retired, former paymaster. The others are, left to right: William G. Pearson, deceased; J. A. ("Jack") Read, Jr., Paymaster's office; T. P. S. ("Pete") Brown, receiving teller, Treasury Department; "Ben" Lewis, porter, deceased; Milton B. Smith, Paymaster's office; J. Q. McComas, assistant treasurer; N. M. Huppman, Paymaster's office; Edwin W. Robinson, deceased; William Yardley

J. C. Korte, alias "Cootie"

seems as if it took him quite a while to find out. We knew the moment we heard he was married.

"Bill" Pinschmidt's idea of a perfect holiday is to make snowballs (when there is enough for that purpose) around the back yard, until they get large enough to form the head and torso for a snow man. He claims he did it for his boy's sake. However, we think he did it either to reduce or to prevent his wife drafting him for kitchen duty.

While exercising the other day, a terrible accident happened to our most honorable Jeremiah Martin Fitzgibbons. We thought at first that probably someone had been tearing rags, but when Jerry appeared in his overcoat for the rest of the afternoon and a new suit the next day, we knew that some portions of his pantaloons had had an argument and had parted. We'll say he ripped them. Never mind, "Jerry," lucky for you that it didn't happen when you were with her.

The baseball club of the Engineering Department is now preparing for the coming season as a member of the General Office Baseball League. From a list of 20 candidates we hope to be able to have a formidable aggregation on the diamond representing this department. T. L. Ralston was elected manager. A captain will be elected later.

Office of District Engineer, Baltimore, Md.

Correspondent, J. F. COLLISON

C. L. Righter, our bookkeeper, showed us again that he is wealthy by taking unto himself a "Tin Lizzie" in February. We are all expecting picnics in the summer, by way of Mr. Righter's transportation.

This is the way you have to look to be an expert on "Flying Cootie."—A snap of J. C. Korte (pronounced "Kootie," if you please) himself.

Office of District Engineer, Pittsburgh, Pa.

Correspondent, Miss M. M. WARD

It is with deep regret that we report the death of Lewis Taylor Walraven, on February 24, after having been ill but a few days of pneumonia. For the past several years Mr. Walraven had been assistant chief clerk in the office of the district engineer, Pittsburgh, and for many years previous had served as chief clerk to Paul Didier, principal assistant engineer. His death

came as a shock to his fellow employees, by whom he was held in high esteem. Mr. Walraven was born in Philadelphia, Pa., on May 29, 1859. He entered the service of the Baltimore and Ohio Railroad July 1, 1904.

The funeral was conducted at Meadville, Pa., February 28, this office being represented by J. H. Mulvey, assistant engineer. Mr. Walraven is survived by one son, R. F. Walraven of Denver, Col., to whom we extend our heartfelt sympathy.

This office mournfully misses our charming Miss Devin, who is now affiliated with the Mellon National Bank. Her present whereabouts may be of interest to a nice young man in Baltimore.

Paul Didier, Sr., who has been abroad for the past several years, has returned to this city, arriving in New York recently aboard the Cunard liner "Carmania."

Our popular and obliging messenger recently met with a serious loss, some one (whom he doesn't remember) relieving him of his pocketbook and valuables. "Jim" positively refuses to talk on the subject, and we are left to draw our own conclusions.

One of our most popular field engineers seems very partial to widows. We admire your taste, Walter, but must confess that we are a trifle jealous.

Office of District Engineer Cincinnati, Ohio

Correspondent, G. F. DAUBENMERKL

On February 12, Fukujiro Hirayama, construction engineer, Japanese Government Railways, Tokyo, Japan, who is touring the United States and studying construction methods of American Railways with particular reference to pneumatic caisson work, was a guest of The Vang Construction Company and District Engineer Griffith. He was taken over the work and shown the methods used in the foundations at Big Miami River Bridge No. 19-95, Indiana Division, east of Lawrenceburg, Ind. Mr. Hirayama expects to spend several months in America, going from here to Europe and returning to his native land in October, 1922. He was much interested in the work at Big Miami River.

J. E. McKibben, our genial chief clerk, has joined the Tax Payers' Association, having purchased a six-room bungalow of brick construction in Clifton, one of Cincinnati's beautiful suburbs. Go to it, John! We're with you.

G. L. Reising, file clerk, is having a little difficulty in disposing of his house in Norwood. What's the matter, George? Must be a "nigger in the woodpile" somewhere.

James P. Ray, assistant engineer, Lawrenceburg, Ind., came into the office the other day with a new joke which he had heard at Lawrenceburg. He started to spill it but was interrupted by everyone in the office, all wanting to finish it. He went back to Lawrenceburg in great disgust. Must be some burg, "Jim!" Bring in a good one next time.

'Tis said that H. A. Davis, transitman, wields a wicked broom in his new home. We are wondering who is the guiding power behind this domestic activity.

Why is "Joe" Kathman like the hand of a clock at 6.00 p.m.? Because he is straight up and down.

Earl Stout, transitman, has a worried look these days. He claims that although Leap Year is past, the girls still continue

The late Lewis Taylor Walraven

to pester him. That's it, Earl, boost yourself if nobody else will.

"Sam" Graham, transitman, was looking for a house. Some fresh fellow told him he had one for sale. "Sam" went to look at it and found that it was a dog house.

John Kolker, accountant, has been asked to join a church choir. After hearing him sing they will, no doubt, put him to pumping air into the organ.

All the boys have been asking P. A. Callahan what happened to Norsky Larsen some days ago. There was a slight discoloration under Mr. Larsen's left optic. They must have had the return engagement referred to some time ago. A little information on this, "Pete," please.

Stanley Thompson, draftsman, has purchased a new pair of trousers to match a coat and vest. "Yea, yea, the road to matrimony is a long, hard road, causing compulsory economy."

George Washington Motheral, transitman, reported for duty on February 22. Some coincidence, eh! But instead of a hatchet, he was given a hammer to test rivets at Bridge No. 104-18.

Lest we forget, Mr. Ray and Mr. Hirayama had a quiet little conversation at the bridge site (Bridge 19-95) in the latter's native tongue.

Office of General Freight Claim Agent

Correspondent, Miss E. T. MURRAY

The death of J. A. Downey, on Wednesday, March 2, is a loss which is keenly felt by all who were privileged to know him. In a larger sense, his passing is a loss to the particular department of the Baltimore and Ohio with which he was affiliated, the O. S. & D. Division.

Mr. Downey had been in ill health for several months and confined to his home since last November. He is survived by his wife, Mrs. Mary Crane Downey, and a daughter, Miss Helen Downey.

The funeral was held on Saturday, March 5, from his late residence, 2422 Lauretta Avenue. The pallbearers were composed of the following fellow workers: O. H. Olson, F. A. McShane, C. F. Biemiller, E. K. Williamson, A. M. Krager and J. S. Smith. Mr. Glessner and Mr. Bradburn also attended the services. A floral tribute was sent by the office. Our sympathy is extended to his family in their bereavement.

The Passing Show as Pierce sees it in the Valuation Department

We are glad to hear of the improvement in health of Miss V. C. Brown, Suspense Division, and also of Milton Hamburger, Accounting Division, who have been away from the office for the past two months. We sincerely hope to be able to welcome them back before long.

We have no weddings to announce in this month's issue. Unusual, isn't it? Many prospects are reported for the near future.

Welcome and greetings to T. E. Conlon, supervisor of freight suits; C. E. Yarnall, assistant supervisor of freight suits, and Miss M. E. Rawlings, stenographer, who were transferred to this office February 15 from the office of C. W. Egan, general claim agent. We trust that they will soon feel at home and become one of the family.

The Wrong Label

"Here, my man, is a sixpence," said the benevolent old gent, handing the man marked "Blind," a little piece of silver.

But the sixpence fell out of the man's hand and rolled into the roadway, whereupon the "blind" man walked after it, picked it up, and coolly put it in his pocket. "What," gasped the gent, "I thought you were blind."

"Blind," cried the poor man in amazement. "Sure, they must have put the wrong ticket on me. Its deaf and dumb I am."

And the old gent walked away quite satisfied.

Anything you want to know about the Annex office building, ask Ethel Eisberg—she knows. She stayed late on one Saturday afternoon specially for that purpose. After everything had gotten quiet she started her travels and wandered over the entire building, looking in all the rooms and corners and sizing up the whole situation until she now

knows more about the layout than the contractor.

Our Own School

Recently we mentioned in the MAGAZINE the monthly conferences held in our office by the division chiefs, at which time various suggestions along the lines of investigation, etc., were made. One important suggestion was to have weekly meetings for the entire office force, or in other words to organize a school. With the approval of all, preparations were immediately begun to solicit the individual cooperation of the clerks. Active interest was signified by a large percentage of the force and the first session of the school was called to order on Monday, February 28, at 5.10 p.m., by F. L. Schepler, assistant to general freight claim agent.

Mr. Schepler explained in full the purpose of the school and the importance of each investigator fully understanding all necessary requirements in the payments of loss and damage claims. Our chief clerk, Mr. Heartt, also discussed the various phases of Straight and Order, Notify bill of lading, and various conditions as set forth therein. It is the intention to have some of our freight and traffic officials deliver lectures on Monday evenings on subjects pertinent to freight claims.

Under the new plan of organization, Mr. Schepler appoints committees of three at each meeting to make a special study of some particular feature of claim investigating, with a view to developing the most efficient methods.

We hope that the benefits derived from these lectures will soon place the office of the General Freight Claim Agent of the Baltimore and Ohio Railroad on a plane by itself, to be recognized as a standard by which other roads will be guided.

You Can Never Tell

At the lunch room where my friend John Hilleary and I dine we make character studies of the different faces we see there while waiting for our hash. Our deductions and conclusions are often given a rude shock.

The other day there happened to be a new waitress on duty, and as soon as John's eye landed on her he immediately waxed enthusiastic over her splendid face and stately bearing.

"I'll bet there is an interesting story hidden there—a profligate husband or perhaps a widow with several children and forced thus to work in order to keep the wolf from the door. Ah! see, she is approaching."

John could hardly restrain himself as she stalked majestically towards our table. He would have ordered everything on the card, hadn't I nudged him and reminded him that our time was limited. She bent her head low to catch our order, but not once did she utter a word—just mentally absorbed our request and was off.

John's eye followed her every movement. She certainly gave every evidence of refinement, her big blue eyes showing a trace of sadness. There was not a semblance of a smile on her countenance.

"Maybe she is a student working her way through college! I'm going to ask the manager about her," said John.

Soon she returned and deftly placed the food before us. After we had disposed of it, I said to John, "I think I'll order bananas and sauce, and maybe our queen will deign to let us hear her melodious voice."

I caught her eye and as I proceeded to give my order one of the United Railway's flat-wheeled cars hobbled by and my voice was lost in the noise. As she inclined her

head towards me my heart went pit-a-pat. Would she speak!

I looked up into her lovely blue eyes and was about to repeat my order, when she said, in a voice which Mr. Jiggs would have readily recognized:

"Whatja say, bananners an' souse!"

What Would You Have Done?

The other evening as the boss was about to start for home in his fine Hudson car, one of our colored porters came out of the door with a small earload of wood on his shoulder.

"Mister Leilich, is you goin' my way?"

"I don't know. Why?"

"I jes' thought mebbe if you wuz you wouldn't mind givin' me a lift!"

"Peck" Has the Floor

"Peck" Wright of the pressroom intimates that the story about the three gentlemen mentioned in this column last month as being deeply interested in the Minnie Ha! Ha! Candy Company is all wrong. He says they are only interested to the extent of all the free samples they can get; but when it comes down to paying real cash for the goods, "Peck" says they are "cheap skates." He is the only original, bona fide, strictly cash customer—and he can prove it. This is getting serious, boys. I'll agree to be arbitrator for a one-pound box.

Hope You Land this Five-Pounder, Hattie

Our Miss Hattie Carroll, of the bindery, is progressing nicely after her serious illness and has been removed from the hospital to her home. We would suggest to "Peck" and his friends that it would be a chivalrous act if they would send Miss Hattie a five-pound box of Minnie's celebrated candies. It might hasten her recovery and help bring back the old-time cheery smile as "through the sick room windows the golden sunbeams creep."

One Happy Day in March

George Foy has fallen heir to a million dollars in the person of a brand new baby boy, who arrived on March 21, via the Springtime Special. It is his first born and in honor of the glad event daddy came down all decked out in his Sunday clothes and with a smile that lit up his jolly countenance like the midday sun. "Dan" Miller, who recently became a benedict, was intently observing how a proud father conducts himself under such happy circumstances. Congratulations!

Telegraph Department

Correspondent, DELLA M. HAIN

The accompanying photograph is of John Edward, 5-year-old son of J. L. Krantz, plant clerk.

Give us a ride, John Edward

Recent visitors, and attractive ones too, were A. S. Rosenberg and T. E. Colwell, from the office of District Plant Superintendent W. W. Olheiser, Western Union Telegraph Company, Pittsburgh.

And Mr. Miller wants to know if "Miss Norteup" is going up to the "Women's Y. M. C. A."

Why they should call Uncle Frank "Jiggs" at home we don't understand. Is there a "Maggie"?

Every city call made on a Baltimore and Ohio telephone costs from three cents up. Restrict such calls all you can, as the

monthly expense for this service alone aggregates over \$1,400.

If I start writing "sick news" I will be compelled to mention almost everybody—but here's hoping there will be less illness next month.

Messrs. Adams and Thompson sit side by side, but their backs usually face. Can any kind soul tell why?

Somebody find out how Bishop runs his flivver. Takes an awful lot of gas.

Here's a good one on Mr. Ward. He has a special "Brill" car to take him to and from the telegraph office in the Baltimore

Hamilton Watch

"The Railroad Timekeeper of America"

What Do We Owe to Accurate Timing?

WE owe our Limiteds that flash from city to city, our fast-sparking automobiles that shorten formerly long drives, and those machine-guns so marvelously timed that they shoot between the swiftly-revolving blades of aeroplane propellers.

Back of each is an accurately-timed schedule.

Back of our railroad schedules is the Hamilton—a watch so accurate that it is the most popular timekeeper in use today among railroad men.

Charles Hamilton, the efficient engineer shown here, runs the Bangor Flyer—one of the longest hauls on the B & M. He has been with the Boston & Maine 48 years. He runs the Bangor Flyer by a Hamilton Watch.

When you buy, inspect the Hamilton models that railroad men favor, particularly No. 992 (16 size, 21 jewels). Hamilton Watches range in price from \$10 to \$200; movements alone, \$22 (in Canada \$25) and up. Send for "The Timekeeper," an interesting booklet about the manufacture and care of fine watches. The different Hamiltons are illustrated and prices given.

HAMILTON WATCH CO., Lancaster, Pa.

and Ohio building. This car holds two—or rather the other passengers are oblivious to G. D. W.; he sees only “her.”

All of us, and especially “Uncle Billy,” are glad to see old friends. “Uncle Billy” jumped up with a smile on his face and there he stood a’ talkin’. Say, don’t forget her other admirers, Mr. Brown. You should give a widower a chance.

A whole cup full of ice cream and pineapple and cherries is what our Millie gets for a sundae. The rest of us get half as much. Explain, Mildred, please do.

And Mr. Miller glanced around the office to see who was making all the noise and Mr. Davis wasn’t talking; so take another guess.

Mr. Donnelly is going to have his picture in next month, so you will have something to look forward to.

Transportation Department

Correspondent, J. B. EGERTON

Inquisitive Tattler

This month the question asked by the Inquisitive Tattler was “Why do so many men chew tobacco?” Some of the replies we have received are as follows:

C. F. S.: Because it cleans the teeth and keeps them in good condition, thus saving one the expense of tooth brush, tooth paste and dentist bills.

P. S. W.: Because it is a general comforter; it keeps one from getting hungry before lunch, is a dessert after lunch, acts as brain food when handling difficult problems, and cleans the teeth.

J. C. S.: Well, women chew the rag and so men, to get even, chew tobacco.

R. E. R.: Ask “Johnny” Joynes, he knows. He eats it.

A. S. H.: Because it acts as a germ killer.

T. A. M.: Because they are persistent brutes. Because women oppose it. I tried it once and never came back.

A certain girl in this department wears a certain kind of a ring on certain finger of a certain hand. Don’t keep us in suspense, Hilda; be a good scout and let us know when it is coming off.

Last month we told about our wonderful baseball team (that is to be), dwelling at length upon raffle tickets, etc., but it so happened that by the time the article appeared, the tickets were printed, distributed, sold and the prize about to be drawn. This was due to the fact that all such information must be sent in by the 5th of the month preceding the one in which it will appear, and we sent it in too late. So at this writing (March 4), although the last of the tickets have not as yet been sold, we think it a safe prophecy to say that our raffle has been a great success. We also prophesy with confidence some great games.

Our department is commended for the cooperative spirit and whole-hearted interest with which it met the campaign. Under the able management of Roy Mansfield and Carl Scharnagle, and “first aid” by Luke Burns, the tickets were disposed of long before the allotted time.

The eligibles for the team are: Richard LeRoy Mansfield, manager; Carl Scharnagle, captain; L. K. Burns, H. Evans, J. C. Smallwood, W. Seibert, P. Ackler, C. F. Roycroft, W. J. Marley, W. S. Guerke, V. Belt, W. T. Laslo, L. Phillips, L. Rosenthal, W. J. Walsh, R. Poole, R. C. Brooks, P. S. Wood, G. Loeblein, R. Laudon, G. J. Roth.

We also take this opportunity to thank each and everyone who helped to make our raffle a success.

Office of Assistant Comptroller Deverell

Correspondent, JOHN RUPP

A. C. Meade, accounts receivable ledger bookkeeper, tendered his resignation on February 15. Mr. Meade, who served his country in France with the A. E. F., was granted his Vocational Training claim by the Government. J. P. McNulty has been promoted to Mr. Meade’s position. We congratulate “Mac,” and wish him success.

S. B. Muller, bookkeeper, miscellaneous ledger accounts, returned on February 3 after a short business trip to Pittsburgh, Pa. E. T. Johnson, general bookkeeper, has been back on the job for some time. This news will be very welcome to his many friends who were aware of his long illness last year.

Clock Watchers

There is no doubt that many hours are wasted by those who observe the clock more than their work. Continual clock watchers are found not only among commercial and industrial organizations, but lately they were discovered in the clerical personnel at Camp Holabird, Md. The *Baltimore Evening Sun* lately reprinted an order in this connection, by the Lieutenant-Colonel in charge of the Camp. The Official Order reads:

“Clerks will discontinue at once the practice of leaving their desks to sign out and secure their hats and wraps before 4 o’clock. Attention is invited to Bulletin 4, January 6, 1921, which indicates that work must not cease prior to 4 o’clock and the sounding of the gong.”

Steady and persistent work is requisite to success in life, and clock watchers make no progress and are not welcome anywhere. While certain small privileges are appreciated by all employees, they can only make themselves worthy of these considerations by arriving at work on time and giving strict and honest attention to daily duty.

Instead of watching the clock, our spare seconds should be applied in planning how we can improve our service to the Company, and thus success will crown our endeavors.

BY A SUBORDINATE.

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

“It would be — if it missed the hole,” observed the Irishman as we watched the train plunge into the tunnel.

With a mouth comparing with that of the Belt Line, how that prominent citizen of Ellicott City ever missed the shot, no one seems to be able to tell. But miss it he did, and the net result was cream puff all over his face, down his collar, onto his tie, across his vest, on his trousers, covering his shoes, finally landing on the floor, where it spread itself out most artistically. Again we say, “how in the — did he miss it?”

A cheering report has been received from our old friend, W. B. Stockett. Walter writes that he has regained several pounds recently, and that he feels considerably stronger. We hope that his health will continue to improve and that the nice clear Spring weather will do lots to help his condition.

Another candidate for “Good Husbands’ Row.” A. T. W. Moore has finally decided to be in debt for the rest of his natural life. Albert plans to share his misery with a Miss Edna Thomas, starting sometime in the month of April of this year.

The honeymoon trip includes visits to New York, Albany, Buffalo, Toronto, Atlantic City, etc.

Blessings on you, my children, and may bad luck follow you all your life, *but never overtake you!*

Bowling News

With only 12 more games on the schedule of our bowling season, the Kilkenny Kats appear to be sure winners, and the interest shifts to the battle for second place, which at this date, March 9, is in a deadlock. The standing of the teams to date is as follows:

	WON	LOST	PER CENT.
Kilkenny Kats.....	34	17	.667
Sad-as.....	26	25	.510
Wild Cats.....	26	25	.510
Excelsiors.....	16	35	.313

February 16—Nothing very good, neither was there anything very bad. Pritchard was high with 301, with Limpert second on a 295 count.

February 23—Everybody seemed to have an off night as will be seen from the high score for the night of 294 by Pritchard. The surprise of the night was furnished by W. J. Hartwig, who rolled the high total of 291. No doubt “Willie” was as much surprised as anybody else.

March 2—Pritchard was the whole works again this week, with 123 in one game and 325 for the three.

March 9—Atwell mowed ‘em down for a 304 count, which was equalled by Guy. The chief clerk got back in stride with a 68 and a 69 game. Sad-as took two out of three from the leaders.

Auditor Disbursements

Correspondent, JOHN C. SVEC

Mrs. J. C. Fowler and Carville, Jr.

We have often wondered why our file clerk looked so happy, and then one morning we looked on her left hand—there’s a reason. Congratulations!

Did you ever watch a certain young lady in the Journal Entry Bureau, especially around 4.45? We often wonder if she has a home, or perhaps she likes her work (?) better.

One of our traveling car repair accountants sent us a letter some time ago requesting passes for the future “Mrs.” We all wish him the best of luck. California is a dandy place to spend a honeymoon.

The accompanying picture is of Master J. Carville Fowler, Jr., age three months, son of Dr. and Mrs. J. C. Fowler, and his mother. Mrs. Fowler was formerly Miss Anna Brennan and an employe of this department. They are now residing at Ancon, Canal Zone, and they seem to be enjoying the climate very much.

A visitor to the South was our chief clerk, J. F. Donovan. Owing to Mrs. Donovan’s health, they, with a couple of friends, spent some time in the winter vacation land. We all missed Mr. Donovan and we are glad to have him back again.

Three young ladies of the office also visited the South. They are Misses Porter, Spear and Holtz, and they stopped at all points of interest along the way, including St. Augustine, Savannah, Miami, Jacksonville and Palm Beach. From all reports they must have had a lovely time, even if they did miss half of their meals. Ask the fish.

Correspondent, P. HENRY STARKLAUF

We hear a great deal about more miles make more smiles, etc. An excerpt from the I. C. C., quoting an authority, states: "A freight car was moving in trains on a certain road only three and one-half days out of 30. Taking the average of all roads in Official Classification Territory for the whole year, the time a car is moving in trains probably does not exceed three days out of 30 and the car is under load only two days out of three. Furthermore, the cars under load are loaded on an average to only about 58 per cent. of their capacity. The percentage of empty movement and of waste capacity in loaded cars have both grown." From the foregoing we all can see that a marked improvement should be made.

The Misses Biggs and Jolliffe held their little dance at St. James' Hall, Irvington, recently, and it was an attractive affair. Comptometer Bureau employees and their friends were present to make merry.

"Shad" broke another record, not the efficiency or speed kind this time; 'twas just one of those kind you put on a talking machine.

Bent on "Vamping" some midshipmen at the Washington Birthday Afternoon Hop given by the second year class at the Naval Academy, and on hypnotizing students of the Marine Corps Officers' School, the Misses Weller, Lushane, Bruner, Lillian, etc., chaperoned by Mrs. Hile, surely must have been doing an awful lot of advertising for the Baltimore and Ohio, as nearly everybody made reference to them as the "pretty railroad girls."

Whisperings from the Hope Chest: It looks like I'm after the Misses Shoemaker, Sylvia and Neilson; they're working and talking crochet work and household cares.

Our sympathies go out to our brother employee, W. T. McGrohan, on the death of his infant son, a recent arrival; also to the family of Clarence Wescott, a veteran transportation man, one time telegrapher at Cumberland, Grafton, Baltimore and Parkersburg. The elder Wescott, father of the above gentleman, was one of the first engineers running between Cumberland and Parkersburg. Funeral services were conducted from his late residence on Franklin Street by the Rev. E. L. Leech of the Franklin Street U. B. Memorial Church on February 8. Interment was in Loudon Park Cemetery.

Mrs. Medora Kuehne Kaltenbach, a former clerk in this office, presented her husband with a son recently, as did the wife of George Koerner.

Miss Helen Marie Nugent, Machine Room, was married to Charles S. Barrett at St. Joseph's Passionist Monastery Church, Frederick Road, on January 27, by the Rev. Maurice Sullivan, C. S. B. They will reside in Norfolk, Va.

Two little girls, aged 10 and 11 years, boarded No. 7 at Philadelphia the other Saturday afternoon. On tendering their transportation, the conductor was solicitous of their welfare as to whether or not they were accompanied by an older person,

showing that our "passengers are our guests." "Courtesy" is a big and growing asset on the Baltimore and Ohio.

Auditor Passenger Receipts

Correspondent, G. FRED MILLER
Secretary to Auditor

Something like the income tax is always taking the joy out of life. It's more like "Outgoing Jack" to me.

Who's gonna be the first one to get "Spring fever"? Don't let anyone tell you it's Spring fever. Did you ever notice the wild doves in the springtime, cooing and going off in pairs, and even the little street sparrows fighting to see who is strongest and will win the fair lady? Well, that's what "Spring fever" is.

I'll take another slice of that homemade rhubarb pie now.

You "On-line-of-Road" folks, get the seeds down early and win the prize for the first ear of "country gentleman."

Here's our chum Robert E. Machin, little bow tie, golden hair, et al. Who's going to be the lucky girl?

Some kind friend forwarded this remarkable likeness on St. Valentine's Day. Further information as to age, financial status, etc., and so forth can be secured by communicating with this office. The same dog-gone picture was sent to "Charlie" Grund, too. They ain't a bit like twins though. Carl says both pictures belong to him, 'cause he knows the girls like him, but we all believe Robert is hiding something from us.

All that can be said of our last dance on February 18 is that it was just a repetition of the delightful time we had at the dance earlier in the season. There were, however,

more people present, which made for more enjoyment. Everybody seemed determined to have a good time and did. Naughty boys stuck knives and pins through their partners' balloons, and the blowers and crickets made some racket. An abundance of ice cream and cake, with splendid music, made the evening pass quickly, to our sorrow. We should have had a grand promenade, for you must know Jackson Jones and his partner would have led it. There's another good time coming shortly.

The hard part about office dances is that it's often difficult to secure a sufficient number of chairs to permit the ladies and their escorts to secure a little rest between dances; however, this is easily overcome by sharing your sweetie's chair. This manner of taking care of all present was suggested by having glanced about the ball room at the last "hoe down." As far as could be seen it worked wonderfully well, and should be all the rage at the next dance. Ain't them moonlight dances terrible? It's a tiny new moon and clouded at that. Takes a man with a strong will to pull through one of those dances without getting nervous.

Miss Mildred Eberhart and Mrs. John Kavanaugh have returned to the office after successful operations at local hospitals. We hope they will enjoy better health than ever before.

The bashful boy—angel face

Set in Solid Gold

Set in Solid Gold

Send Your Name and We'll Send You a Lachnite

DON'T send a penny. Just send your name and say: "Send me a Lachnite mounted in a solid gold ring on 10 days' free trial." We will send it prepaid right to your home. When it comes merely deposit \$4.75 with the postman and then wear the ring for 10 full days. If you, or any of your friends can tell it from a diamond, send it back and we will return your deposit. But, if you decide to buy it—send us \$2.60 a month until \$10.75 has been paid.

Write Today Send your name now. Tell us which of the solid gold rings illustrated above you wish (ladies' or men's). Be sure to send finger size.

Harold Lachman Co., 204 S. Peoria St., Dept. 4011 Chicago

Railroad people have unique "two in one" positions. We may be officials, foremen, chief clerks, shopmen, clerks or stenographers, but at the same time we are salesmen.

The Railroad employees who travel over the road are the traveling salesmen, while those permanently located in the cities may be called the local salesmen, or the home office force.

We sell our wares in much the same manner other businesses sell their goods. We give evidence of quality, service, comfort and efficiency, backed by courtesy. Describe the scenic beauties of our Road, tell of quick service between all the principal cities, and direct connections to all points in this country, Canada and Mexico. We also have our fast freight service, which enables the producer to make speedy deliveries in clean, sanitary and well iced cars. Early vegetables, fruits and perishable goods from the far South, and poultry and farm products from the farms are quickly brought to the large markets.

We are advertising our Railroad when we least expect it. Just in everyday conversation with our friends and neighbors we have much opportunity to help the cause. Is it not well to assist in the successful operation of an enterprise which provides for us?

Staten Island Lines

Correspondent, G. F. GOOLIC

John J. Killeen, towerman, "B" Tower, St. George, has returned to duty after a period of illness caused by pneumonia. We are all glad to see "Jack" back on the job again.

John Klein has been appointed night crew dispatcher, Stationmaster's office, St. George, vice J. M. S. Lynch, resigned.

Did you ever see a red-headed fire inspector? If you have not, take a trip to the Division Engineer's office and take a look at the (bright) head of Daniel G. Reynolds. "Dan" is always on the go. Judging by his looks you'd think he was going to a fire. Some boy!

Irving Owens, endman, A. K. Bridge, is now studying accounting. Guess the bridge is not fast enough for him, so he has decided to start something else. Keep the good work up.

"Fritzie" Peccoraro, our new ticket chopper, East Shore, has bought two new dogs, for use in hunting next season. He had a good one but he was shot by mistake. Someone thought the dog was a rabbit.

Pier 22, North River, N. Y.

Correspondent, FRANK A. J. MANTHEY

BOOST—BOOST—and keep on boosting the good service rendered by the BALTIMORE AND OHIO RAILROAD.

It is absolutely necessary for the employees of this road to use this method of ad-

vertising the service which we have to sell. We are all a part of the great machine, and any loss in business affects us. I had an opportunity some time ago to speak with the traffic manager of one of the largest fruit and produce concerns in our city. In the course of conversation, I asked him what he thought of the service of this road in general, and he replied that if all the roads were as good as the Baltimore and Ohio, his job would be an easy one. A similar reply was received from an old traveling salesman who had traveled for a local leather house for years. When the question was put before him, he replied that the passenger service of this road was second to none, and he further stated that the old maxim: "Time and flow wait not for the slow, therefore take the B. & O.," was the truest piece of advertising he had ever read.

The accompanying picture is of one of the popular girls in the Claim Department, Miss Eleanor McDermott, otherwise known as the "Belle of Staten Island."

Lost

Elks' Watch Fob Charm, initials B. P. O. E. and W. J. D., in blue enamel. Evidently lost while inspecting freight in westbound cars, moving from Pier 22, March 16.

Valuable to owner as keepsake; will gladly reward for its return.

Pier 22, North River,
New York City, N. Y.

Baltimore Terminal Division

Correspondent, MARTHA V. FOX, Car
Record Clerk

With much regret we note the death of Brakeman J. J. McHale, Locust Point Yard. Mr. McHale served in the army overseas, and while there contracted influenza. Although he never fully recovered, he returned to Locust Point, where he resumed and held his position as brakeman up until the time of his death from pneumonia.

Assistant Trainmaster F. W. Stringer has again taken up his headquarters at Camden. The folks at Riverside miss his cheery "Good morning," and hope he will be with them soon again.

The Safety Committee held its regular monthly meeting at the Riverside Y. M. C. A. Several interesting talks were given by Trainmaster "Zach" Biddison and Division Engineer Bloecher.

Chief Clerk Williams, Crew Dispatcher's office, Riverside, has been seen carrying his lunch. This seems to be a mystery still unsolved.

Prohibition Nursery Rhymes

By S. L. Hoskinson

Secretary to District Master Mechanic

Old Mother Hubbard went to the cupboard
To quench her terrible thirst,
But to her surprise, what a sight got her
eyes,
Another had gotten there first.

There was an old woman who lived in a shoe,
She had so many children she didn't know
what to do,
But rather than starve or become an old
beggar,
She bought a boot and became a bootlegger.

Hickory, dickory, dock,
To the drug store people all flock,
With coughs and bad colds and prescriptions
old
They say, "liquor me, liquor me, Doc."

Jack and Jill went up the hill,
But no more down the hill will they fall,
The tombstone reads, "here lies Jack and
Jill,
They both drank wood alcohol."

It is learned that "Battling" Hughes and "Kid" Carter have arranged for a bout at the Fifth Regiment Armory in the near future. It is well that the 'phones are stationary and paper weights are scarce, as they have been practising daily.

As Usual

Mr. Carter: "George, stop whistling while you are working."

George: "I ain't working, Mr. C., I'm just whistling."

A ray of Spring sunshine
Miss Eleanor McDermott

Would you believe it? He is now Assistant Trainmaster A. H. Blackburn, Locust Point

The accompanying picture is of A. H. Blackburn, of Locust Point, at the tender age of 18 months.

The Tactician

The Vicar (meeting inebriated parishioner): "Oh, Pat, and I thought you were a teetotaler!"

The Parishioner: "Shure, an' that I am—hic—yer Riverence, but norragigoted one."—*The Tatler*.

Heard in the "Division Accountant's office:

Gus—Why did they call the soldiers doughboys?

Grapejuice—Because the Secretary of War was a Baker.

Francis DeVoughes, Halethorpe, and Loeschel, Riverside, use I to be fast friends. But someone has thrown a monkey wrench into the machinery. Far be it from us to throw sand in anybody's ice cream, but this is what we hear Francis remarked to Loeschel on the Belt Line telephone:

"Aw g'wan, I know who did it. It was that fellow 'Shorty' Wolfe, at Baileys, and if it wasn't him it must have been Loeschel sent th' cat. He's ornery enough to do anything. In fact he's so ornery he sets on th' bed post at night and whistles his prayers. Someone goes to work and sends me a package containing a cat, and after I go to work and reach deep for express charges, th' cat's dead ! ! ! ! !"

If John Quinn, dispatcher in "DO," doesn't name at least one of them after me—well, we think he ought to. John came to work the other day all wreathed in smiles and good humor; he had two of th' greatest kids in th' world at home and everything; went home in th' evening just as bright and fresh as a new dollar, then BING! A message comes that John is sick and won't be out to work. No wonder—he found his nice little family had grown by two.

Hear about it? Oh boy! They say "Dan" Davis, motor conductor, sat on th' oil stove in "CA" office and fell asleep, and some darned "phool" went to work and lit th' stove.

Locust Point

Correspondent, JOHN E. GREEN

Since J. P. Dudley, Agent's force, captured two prizes at the poultry show, he has been bragging about his two cockerels.

A. Johnson, Agent's force, who lives out on Harford Road, says he is going to show Mr. Dudley how to raise chickens.

The Smile of Miles

Have you ever heard of Andy Miles? I know you have of "*Miles of Smiles*." But have you seen the *Smile of Miles*? When he some pretty girl beguiles? 'Tis then you'll see her *Smile at Miles*. Well, Andy, here, is quite a fixture. I'm sorry we can't send his picture As fourteen cameras he has broken, Without a word e'er being spoken. We are lost without our Andy, A good, old scout—both fine and dandy; He whose rating's good, whose class fine He handles freight on any line. Yet, greets us all with cheery smiles, So that we're forced to *Smile at Miles*.

—J. R. G.

Picture to follow when a camera can be built.

The accompanying picture is not a likeness of B. F. Morse, but a faithful reproduction of our old friend and fellow clerk, A. B. Casey, who has cast aside the constant worry of railroad business at Locust Point and is wooing the finny tribe, like a true disciple of Sir Isaac Walton. You will note by observing the picture closely, and by the serious look on his face, that he has something on his line, and no doubt after watching his float for an hour or two, he will manage to capture one poor, lone gudgeon. But one thing we will grant Mr. Casey—notwithstanding the Volstead Act, which has played havoc with his bait—he never comes home empty-handed, there being several markets intervening between the fishing-grounds and his home.

If you only knew friend Casey,
You'd know something rare and racy,
And a fisherman of note;
Who, on Summer evenings fine,
With Casey at the line,
He'd bring more fish home than one
could fairly "tote."

But this is a picture of Mr. Casey relaxing. Not a thought of coastwise business now enters his mind.

Mr. Casey is one of the Old Guard at Locust Point. He entered service at that station 18 years ago, and has been working there as a competent and conscientious employe ever since. He is affable (especially to the ladies), courteous, always approachable, and ever watchful of the Company's interests.

It is the sincere wish of his fellow clerks that they may be permitted to enjoy his association for many years longer.

"He was a fine old Irish gentleman, one of the olden times." This fittingly describes our old friend and fellow clerk, J. S. Monaghan, whose ready smile and

A. B. Casey "a-fishin'" went

equally ready wit are well known at Locust Point. He prides himself greatly on his ancestry and claims that neither Miles or Casey are in the same class with him. But hist! speak it softly—for the very walls have ears—there is a deep secret between him and Miles that as yet we have been unable to fathom. But we are on his tracks and justice will be done, though Casey falls—for know ye not that Bielaski "Joe" Lubinski is on his trail. Eventually the fatal secret will be discovered.

The Agent's force extends a hearty greeting to C. B. Forgan, our new tonnage clerk. We wish him every success.

Who is the party that calls up C. F. Ecker each morning? It must be a very pleasant person if we are to judge by the expression on his face. Look out "Charlie," she will get you if you don't watch out!

M. M. Higgs, delivery clerk, Camden Station, 50 years of service, and little grandson

Mount Clare Shops

Correspondent, MISS MOLLIE ALBRECHT
Secretary to Superintendent

We considered ourselves lucky in having such darling babies to show on our baby page as appeared in the MAGAZINE about a year ago. How Glen ever stayed off we never will know. However, we are glad to introduce to you Miss Glen M. Miller, age 3 years, daughter of Blacksmith W. H. Miller, Mt. Clare Shops. We would be very glad to have Glen pay us a visit at Mt. Clare, as we would like that cheery smile to be just for us.

We are all hoping that the Welfare Association will arrange for another May ball this year. Last year's May ball was a success, and we want another. This is just a gentle hint, Mr. President.

There is a little messenger named "Bobby" who comes to Mt. Clare daily. We hope he will come for quite a while longer, for "Bobby" sure is a good cure for Old Man Grouch. His cheery smile is a "gloom chaser," and we all have to smile whether we want to or not when "Bobby" saunters in with his telegrams and his much-tilted hat.

Glen M. Miller and her happy smile

Below is copy of an article found in the *Ellwood Evening Ledger* of February 2, which will be of interest to Mr. Finegan's friends:

Mr. G. H. Emerson, chief of motive power and equipment; Mr. J. T. Carroll, general superintendent of motive power, and Mr. J. F. Peach, supervisor of maintenance of equipment statistics and expenses, of the Baltimore and Ohio Railroad Company, with general offices at Baltimore, Maryland, arrived in Zelenople yesterday morning on a special train of the Baltimore and Ohio Railroad, and were guests, during the day, of General Manager L. Finegan, of the American Flexible Bolt Company. They arrived on train No. 9, and spent the greater part of the day inspecting the plant, and products made there. At noon, the party were the guests of Mr. Finegan at the Welcome Inn. Mr. Finegan was formerly associated with the Baltimore and Ohio Railroad Company, being superintendent of shops, at Mt. Clare Shops, Baltimore, Maryland.

Nothing has been said of "Miss Bailey." Everybody at Mt. Clare knows and likes her, and although she hasn't been with us for such a long time, she is quite a favorite. Miss Bailey never gets peeved or excited, always takes things good-naturedly, and no matter how gloomy things are, she can always scrape up a smile. Here's hoping you like us and will stay, Miss Bailey.

Drawing-room

We are going to write a book entitled the "Trials and Tribulations of Elsie." We are sure its going to be interesting, for Elsie is going to furnish all details, and she can tell some thrilling ones! Maybe we'll make it a serial, you know—one of those "continued in the next" things that just get interesting and then stop for a week. How about it, Elsie?

Stores Department

There was a young lady named Thal,
Who was a real nice little pal;

Till Lawton passed by,
And winked his left eye,
And that was the end of the gal.

The above is the only way we can tell of the courtship, and engagement of T. V. O., of the Storekeeper's office. She is dead to everybody's charms and graces except Lawton's. She sings his praises from morning till night. We don't blame her one bit.

A part of the office force at Pier 22

We handled 135 cars of cord wood and cork waste at Pier 78, Philadelphia, during the month of August, 1920.

Destination Sweden, for export: 46 carloads agricultural implements (one train); 4 carloads tractors from Milwaukee, Wis.; 10 cars. Total 60 cars loaded on S. S. Braeholm loading at Pier 78. Made remarkable time, left Chicago, Ill., on Sunday, January 16, 1.37 a. m., arrived East Side, Philadelphia, on Tuesday, January 19, 1 a. m.

October, 1920, to December we handled 200 cars tobacco for export at our Piers 78 and Belt Line Pier 40, south. We have a similar movement to be handled for March and April.

We regret to announce the death, on February 25, of Louis S. Rogers, son of L. A. Rogers, agent, 24th and Race Streets. The young man had suffered for a long time with spinal trouble, which finally resulted in his death. He bore his suffering with great fortitude and cheerfulness. He was a general favorite with the hospital people while there. Mr. Rogers has the sincere sympathy of all who have been associated with him.

Race Street

Agent Rogers at Race Street is in receipt of a nice letter of thanks and appreciation of Baltimore and Ohio methods in general and Mr. Rogers' alertness in particular in the matter of a stolen automobile, which was recovered and turned back to the Auto Company in Ohio. Mr. Rogers observed an Ohio licence tag on the car and started an investigation.

Pier 22

We present to our readers several photographs of some of the members of our office force. In the picture of the girls we find the following, left to right: Standing—Mrs. H. Warrington, Mrs. Wederman, Miss M. Mooney, Miss M. Blackburn, Mrs. Hatterer, Misses N. Carter, A. Murtha, M. Maguire, B. Berkovitz, J. Brittingham, M. Mooney. Kneeling—Misses H. Dean, Townsend, Helen McDevitt, A. Schnupp.

The boys are: Standing—David Alten, W. Eppeheimer, George Gallagher, John McKenna, E. Connelly, John Maher, William Lafferty, R. Carson, W. J. Hallahan. Kneeling—William Morrison, E. F. Wells, J. A. McDevitt, C. Auld, F. Shepherd, E. T. Carrigan. Foreground—D. Grad.

In the other large group we see: left to right, standing—Mrs. H. Warrington, Miss Helen McDevitt, R. Carson, J. Robinson, Miss Mooney. Kneeling—J. A. McDevitt, Miss Helen Dean, Miss A. Murtha, Charles Auld, John Maher.

Small insert—Michael Torpy, clerk, and J. Robinson, patrolman.

"Sam" Hutman, manifest clerk, is now taking a physical course at "Jack" O'Brien's studio, and in a short time will be ready to take on all comers in boxing at 160 pounds.

Cumberland Division

Correspondents

E. C. DRAWBAUGH, *Division Operator*
RUTH M. CHEUVRONT, *Office of Mechanical Engineer*
JOHN SELL, *L.P. Clerk, Superintendent's Office*

Here is a good likeness of Coal Billing Agent W. Stoner Beggs and son, of Cumberland Scales. When the "Black Diamonds" are not passing over the scales too rapidly, Mr. Beggs sometimes motors out for a little recreation. This picture was snapped on such an occasion.

The beautiful springlike weather we have been having has caused the baseball fever to rise early this year. While definite arrangements have not been made for a system championship series, at the same time our local boys are looking forward to putting a strong team in the field. "Hotty" Spearman, file clerk, Superintendent's office, is right on the job when it comes to playing ball, and keeps Manager McGinn posted on the prospects. While the loss of our star twirler, "Lefty" Fike, who goes with the Baltimore Orioles, will be felt, we still have the balance of the team who were successful as

pennant winners in the past, and with the new recruits developed last season, will be able to put a good combination in the field.

Night Chief Dispatcher J. A. Miller, better known as "Jake," states that he finds more pleasure in motoring to his old home town, "Sandy Hook," since the state roads have been macadamized through that busy little metropolis, although he has some trouble dodging the goats across from Harpers Ferry.

Water Station Foreman C. A. Wigal recently assisted the Police Department in making an important arrest by use of his Speeder. "Charlie" is being congratulated by his fellow employees for his bravery.

Agent J. T. Goldsborough, Romney, has been on the sick list for several weeks, and his many friends and fellow employees are glad to hear that he is rapidly improving, and expects to be back on the job shortly.

The artificial silk plant of the American Cellulose and Chemical Company, just west of Cumberland, is rapidly nearing completion, and will be in operation shortly.

W. S. Beggs and little son

C. W. Jackson and "Pop" Bratt

The accompanying photograph will introduce C. W. Jackson, boilmaker foreman, Cumberland roundhouse (clad in overalls), and our general foreman, A. W. Bratt, known to all as "Pop."

The big Kelly-Springfield Tire Plant at Cumberland, recently completed, expects to start operation in the near future. This will be quite an important industry for Cumberland, as well as contributing a good freight and express business over our line.

While the inauguration movement was not as heavy this year as in the past, at the same time, it was handled in a very creditable manner, all through and special trains being moved on time over the division.

NOTICE.—Employees in train and engine service may obtain copies of the BALTIMORE AND OHIO MAGAZINE at the check room of the Y. M. C. A., South Cumberland.

Assistant Trainmaster C. M. Gearhart has been transferred to the west end of the Cumberland Division, with headquarters at Newburg, W. Va.

Robert C. Childers, who has held the position of division claim agent with headquarters at Cumberland for the past four years, has been transferred to the New Castle Division, in the same capacity, with headquarters at Youngstown.

The many friends he left on the Cumberland Division wish him the same success in his new territory that he had here.

He is succeeded at Cumberland by Paul C. Garrott, who, during the war, was located at Hagerstown, Md., and later at Rockwood as division claim agent. He is assisted at Cumberland by K. P. Cline, who was transferred with him from Rockwood.

J. C. Peddicord, who assisted Mr. Childers at Cumberland, has been transferred to Rockwood.

The Baltimore and Ohio Shop Band gave a musical entertainment in the Strand Theatre at Cumberland on Easter Sunday at 8.30 p. m. The entertainment was much enjoyed by a large audience.

Recently there has been more or less vocal effort from some individuals around the terminal, proclaiming their ability as duck pin artists. This idea prevailed until the superintendent, together with several others, took the so-called artists to the Savoy Alleys for a demonstration. Since that time the stillness has been oppressive.

Keyser

Correspondent, HARRY B. NIGHT

It is with deep regret that we report the death of one of our Cumberland Division engineers, Patrick M. Casey.

Mr. Casey was stricken with pneumonia a short time ago, and on February 23 succumbed to the attack. His body was taken to Oakland, and the funeral took place from the Catholic Church in that city, interment being in the Catholic cemetery.

The Brotherhood of Locomotive Engineers and Firemen attended the funeral in a body.

Let's Go! Why can't we? Who started this depression? Let's Go! With might and main, with all the wheels of industry turning, with trains loaded to capacity running continuously, with shops operating day and night, and with work for all, everybody busy, everybody happy and business good.

Ties! Ties!! Ties!!!—1,000,000 Ties.

We have in our yard now 1,000,000 ties, 200,000 more than ever before at any one time. We have ties piled on every

available space and wondering where we will pile them next. Any wonder we dream of ties, occasionally?

One million ties, entrusted to our keeping! What capital they represent—what responsibility!

While we did not quite succeed in breaking the previous January high record for ties treated, February's record of 82,879 ties made in 1916 and which has stood for five years, was shattered by almost 10,000 when we treated 92,282 ties during February, 1921. Let's Go!

Our heartiest congratulations go with these notes to our Charleston Division

This Man Wouldn't Stay Down

He was putting in long hours at monotonous unskilled work. His small pay scarcely lasted from one week to the next. Pleasures were few and far between and he couldn't save a cent.

He was down—but he *wouldn't stay down!* He saw other men promoted, and he made up his mind that what they could do *he* could do. Then he found the *reason* they were promoted was because they had special training—an expert knowledge of some one line. So he made up his mind that *he* would get that kind of training.

He marked and mailed to Scranton a coupon like the one below. That was his first step upward. It brought him just the information he was looking for. He found he could get the training he needed right at home in the hours after supper. From that time on he spent part of his spare time studying.

The first reward was not long in coming—an increase in salary. Then came another. Then he was made Assistant Manager. Now he is Manager with an income that means independence and all the comforts and pleasures that make life worth living.

It just shows what a man with ambition can do. And this man is only one out of hundreds of thousands who have climbed the same steps to success with the help of the International Correspondence Schools.

What about you? Are you satisfied merely to hang on where you are or would you, too, like to have a real job and real money? It's entirely up to you. You don't *have* to stay down. You *can* climb to the position you want in the work you like best. Yes, you can! The I. C. S. is ready and anxious to come to you, wherever you are, with the very help you need.

Surely when you have an opportunity that means so much, you can't afford to let another priceless hour pass without at least finding out about it. And the way to do that is easy—without cost, without obligating yourself in any way, mark and mail this coupon.

Former Agent F. Keller, Express Agent "Bill" Holiday, Helper "Bill" Wynkoop and "Dal" Foley

correspondent, M. W. Jones, on his extreme good fortune, the reward of honest effort. To be presented with a set of Harvard Classics would make any man's heart swell with pride. What grander gift to the book lover and knowledge seeker?

When we read of Mr. Jones' good fortune in our January MAGAZINE we got out the little circulars we have been cherishing for many a day of these famous volumes in the hope that sometime we too might boast similar proud possession of them and carefully looked them over again and wished our real congratulations to Mr. Jones.

When our supply of the MAGAZINE is received, the copies are brought to the office and marked with employees' names before distributed, checked off on employees' list, oldest and most interested employees served first, one oftentimes for several employees who live under one roof. Visitors never find a discarded MAGAZINE lying around the Plant. Inquiry shows several who have saved every copy received; others send them to friends after reading.

In our quest for items of interest we have invited cooperation of our operators and station force, local section foremen and others to contribute. There are not many of us all told here and the help of all is needed.

We regret that our accidents have increased this year, although the majority have been more or less of a minor nature, resulting in but little inconvenience to employees, a few have been serious.

Tieman W. E. Landes was first this year, with a badly mashed finger. Others who are off duty account injury include Tieman Hans Fostel, lacerated hand; "Joe" Joseph bruised hand; "Joe" Loknar, finger severed, and Yard Foreman H. W. Gross, who fractured an ankle bone jumping into depressed loading pit.

Switchman D. H. Talley resumed his duties on March 7 after a layoff with a badly lacerated hand in making couplings on December 21.

W. W. Wood, chief of the Welfare Department, was among our February visitors. We only wish we had the facilities for organizing a Community Welfare Club and envy those communities who do.

We deem the good work of Mrs. E. Allen, wife of our night foreman, among the children, worthy of mention and regret that she was unable to continue. Mrs. Allen organized a "Quiet Hour" for the children. This was held in her home every Sunday afternoon and it was a pleasure to observe the interest and to see the little ones coming from Mrs. Allen's talking of "Quiet Hour"

work. We hope that Mrs. Allen will find time to devote to this again.

Treating Inspector M. M. Rabourn was called to Terre Haute in February to relieve Inspector Von Leer, who was called home because of the death of an uncle.

The Finney (Ohio) Plant of the Central Creosoting Company, with Treating In-

J. H. Robinson, laborer, and Gang Foreman "Ike" N. Saville

spector C. L. Kittle in charge of Baltimore and Ohio interests, has been breaking all previous output records by wide margins. Best wishes, Carl, we knew you could do it.

J. H. Waterman, superintendent timber preservation, C. B. & Q. Railroad; A. R.

Joyce, vice-president, and Mr. Watkins, Jr., of the Joyce Watkins Tie Company, accompanied by E. Stimson, chief engineer maintenance, and F. J. Angier, superintendent timber preservation, made an inspection of the Plant on February 24. The gentlemen from the other companies were well pleased, placing our Plant high on the list. That's where we want to stay.

During the time of the big snow, a number of delightful sledding parties were enjoyed in this community through the courtesy of A. W. Kline. Space forbids listing them, but don't stop reporting such items on this account; hand them in.

Birthday Party

Mr. and Mrs. G. W. Robinson entertained a number of young folks at a birthday party in honor of their daughter, Mrs. J. C. Alexander, on the evening of February 12. Various games, cards, music and a delicious luncheon were provided.

Mrs. Alexander got many useful and beautiful presents. Among those enjoying the evening were: Misses Geneva Kline, Elizabeth Sisler, Frances Twigg, May Teeters; Messrs. H. M. Whitford, Henry Smith, Harvey Smith, Burton Short, Millard Kline, Earl Robinson, Jesse Robinson; Mr. and Mrs. R. G. Brown, Mr. and Mrs. J. C. Alexander, Mr. and Mrs. E. E. Alexander, Mr. and Mrs. G. W. Robinson. Among those sending remembrances but unable to be present were Mr. and Mrs. A. E. Irving, Misses Hazel Crabtree, Minnie Catlette, and W. P. Kesler. We join her friends in wishing Mrs. Alexander many happy birthdays.

We note that Supervisor J. Clay won the prize for the best Supervisor's District on the Cumberland Division, East End. We knew he had something up his sleeve. Congratulations "Jim"! May you win again.

The accompanying photograph, taken before the war, has been handed in under "When Business Was Good at Green Spring." The men are: former agent, Frank Keller; former express agent, "Bill" Holliday; and former helpers, "Bill" Wynkoop and "Dal" Foley, in other positions now.

GREEN SPRING, W. VA., February 14, 1921.
To My Friends:

I do wish to express my deep appreciation and thanks to all those who so kindly contributed to the fund presented me yesterday. It was a big help in an hour of sickness and need.

W. D. FOLEY.

Reunion of Davis family

"Safety First"

If a chicken smiles at you,
Safety First;
Please be careful what you do,
Safety First.
You may not mean any wrong,
She's but one girl in a throng,
But your wife may come along,
Safety First.

This is my advice to you:
Safety First;
Always to your wife be true,
Safety First.
Chickens have been known to flop,
And if wifey gets the "drop"
Beat it to the woods, old top,
Safety First!

From "Him" book of Fairmont, W. Va.,
Rotarians.

Ohio River Division

Correspondent, MAUDE M. MOORE

Parkersburg, W. Va.

The local Baltimore and Ohio bowling team left on March 19 to enter the A. B. C. Tournament, which was held at Buffalo, N. Y. The team is composed of C. Cooper, C. Farrell, R. Augustine, T. Barnum and F. B. Bailey. They are all employees of the Baltimore and Ohio, and each one averages between 175 and 200. Bailey, who is leader of the team, has broken several records in the city; his average is above 200. They will try hard to win some of the honors, but if they fail to do this, they will make some of the professionals wake up and fight hard. Every member of the Baltimore and Ohio is enthusiastic about this tournament, as well as many outsiders who know of the ability of the team. We will let you know in next month's column of their success.

J. A. Shiffgen from Dayton, Ohio, a well-known Baltimore and Ohio man, will be the new general foreman at the Ohio River Shops, vice J. R. Hoban.

If you wish to know how quickly Lieutenant Boice can say \$5.00 and costs for running a Ford, ask Norman Harrison.

It will be remembered that in last month's column we gave you the line-up as well as the scores of the two teams organized at Parkersburg in connection with the "System Bowling League." These two teams bowled regularly each week, but we are sorry to say that the League as a whole was a complete failure. Parkersburg was one of only two points on the entire System to actually start bowling, with the exception of Baltimore, where they had an Independent League.

The Safety Rally, which was held at Parkersburg on February 15, was a complete success from the minute the entertainment began at the Y. M. C. A. until the last chords of "Home Sweet Home" were played for the dance at the Elks' Club. We enjoyed having General Superintendent J. M. Scott with us. His address, as well as the address of Mr. Broderick, as very helpful and instructive.

Of course we know that the Girls' Basketball tournament was held at Spencer on the 11th and 12th, but we do not think that was the attraction for Roy Arnold, motive power timekeeper. We all know that the tournament is held only once a year, and that will certainly not account for the monthly trips.

Mr. Catt, division accountant: "What is this item in your expense account, Mohler, 'Incidentals, \$10.00'?"

Mr. Mohler, inspector of accounts: "Oh—ah—er—that's inside-dentals; I had some jaw teeth filled."

Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent*, Weston, W. Va.

In our notes last month, mention was made of the sad accident resulting in the death of Engineer "Jack" Phillips. Here we show his picture, taken with his wife and child.

A recent visitor at Weston was H. H. Marsh, general freight agent, Wheeling. Mr. Marsh spent a few hours here in company with Superintendent Trapnell and Division Freight Agent Strachan in connection with traffic matters.

We are glad to note that Dispatcher C. H. Carpenter, L. Plum and C. L. West are again holding down their jobs after short absences due to illness.

The "No-Accident Campaign" pennant, won by the Charleston Division, is now flying at Division Headquarters. A photograph of the "Pride of the Charleston Division" on its flag pole is shown in our column of honor this month.

Here are a few questions we would like to have our friends on the Charleston Division answer. They cover a wide field and a variety of subjects, and the answers give a clue to important events in our territory during the past month.

Why did the superintendent and the division engineer quit smoking?

Why is the chief train dispatcher so familiar with Second Street, Weston?

Why does W. H. Longwell always fall for a "king"?

Why do the Gauley Line firemen like the Weston-Grafton local better than other trains?

Why does Madge always have a date on Wednesday night?

Why does Fireman D. E. Rohrbough make so many trips to the postoffice?

Why did Madeline quit smiling for a week?

Why did "Peggy" quit chewing gum?

What does the division accountant like to do better than anything else?

Why does the assistant division engineer find so much business in the Weston shop office?

Why does the assistant chief clerk always chew stogies; are they better than chewing the "rag"?

Why is Ethel so fond of Gassaway?

Why has Viola lost interest in Grafton?

Why are Cora and Alice so much interested in engine 2010?

Why doesn't Miss Justice learn to dance; is it because her advertisement in the MAGAZINE a short time ago failed to get results?

Why does not Bernadine bring her auto to the station any more; has she decided to walk during Lent?

Why did the chief clerk go to Church one Sunday during the past month?

Why does McOsker like Seymour, Ind., better than Weston, W. Va.?

Will "Roy" explain his opinion of the difference between Gassaway and Weston? (This to be done on a Sunday when he is at home here alone and wifey is visiting her folks.)

J. A. Fisher, for some years cashier of the Weston Freight office, has been appointed agent and general yardmaster at Weston vice J. P. Ryan, resigned. Congratulations are extended to Mr. Fisher on his promotion.

The Charleston Division Safety Rally and entertainment at the High School Auditorium, Weston, on February 17, was a

A spot on the Monongah Division at the termination of the Wheeling and Connellsville Divisions

We also take this occasion to welcome our new master mechanic, C. E. McGann, formerly of Benwood. With the new position, we understand he has recently become a benedict. We extend our earnest congratulations, and wish him success in his new position.

Monongah Division**Correspondents**

E. S. JENKINS, *Secretary to Division Engineer*, Grafton, W. Va.

VERNON A. LYON, *Assistant Ticket Agent*, Clarksburg, W. Va.

Fairmont, W. Va.

The accompanying photograph shows part of track and yard layout, with a few of the interlocking switches and signals at "WE" Tower, Fairmont, W. Va., west end Fairmont yard. The Monongah, Wheeling and Connellsville Divisions terminate at this point.

The Operators at "WE" Tower are H. F. Farlow, J. M. Stiles and L. B. Ferrell. Signal Maintainer is A. O. Bee, who was the photographer.

Here is "Fred" Brummage, one of our conductors, who played a fine part in the "Sunday" campaign at Fairmont on Railroaders' night. "Fred" says he has better clothes (we do not know); but never mind the clothes, just admire his one-sided smile and live up to his motto, "Keep Smiling."

"Fred" Brummage

great success in every way. The auditorium was packed, some 1200 Railroad men and their families and friends being present. At the appointed hour the Charleston Division band opened the proceedings with a pleasing overture; and, with Mrs. M. W. Jones at the piano, this was directly followed by the singing of our own beautiful "America" by the audience.

Superintendent W. Trapnell explained the object of the meeting in his characteristic cordial manner, and welcomed every one in the audience. E. V. Shorr sang a solo, with Miss Borneman as his accompanist. Walter Edwards sang a solo, and Bernard Armstrong played the violin. A quartette composed of Misses Hilda Jeffries and Emma Vassar, Mr. W. L. Sheets and Dr. Beldow, sang a pleasing selection, which called forth an encore. The old-time war song, "There's a Long, Long Trail," with words on the screen, sung by the audience, concluded the musical part of the program. A. G. Gans, the Safety Magician, gave the children a delightful quarter of an hour by his clever tricks, after which Superintendent J. T. Broderick, who had come from Baltimore to be present with us, gave an interesting talk on Safety work. This was followed by the new motion picture, "Bulletin 70," which shows the results of carelessness, and made a deep impression on the audience. The band, which was a delightful feature of the entertainment, closed the evening with another selection. The scene then changes to the Masonic Temple, where about 500 people, to the music of Borneman's orchestra, spent a very enjoyable three hours dancing. Among those prominent on the floor were Superintendents Broderick and Trapnell, and they certainly seemed to enjoy the dance.

The committee in charge of the arrangements wants to thank all those who so kindly helped to make the evening a success. As some one in the audience remarked, "Mr. Trapnell draws a bigger crowd than anyone else except 'Billy' Sunday."

Richwood, W. Va.

After long and hard work, the correspondent has finally managed to draw some news out of the town of Richwood, which is about the heaviest shipping point on the division, and should therefore be heard from. When the Richwood paper mill's passenger train gets down in front of the Baltimore and Ohio station, with Saxman's engine standing back of it, and the Cherry River Boom and Lumber Company's 18 with a string of logging cars, while our own local is weighing a train of lumber, and the Lumber Company's engine No. 9 is shouting for empties, then Richwood looks like a real town, bearing a slight resemblance (if you have a good imagination) to Baltimore or Pittsburgh. They call them "Hemlock savages" because they are up in the wilds, but even at that they feel they are the sole excuse for the existence of the Richwood Branch. Some modesty, what?

There is a fine little Charleston Division family up there in the woods, from Agent J. M. Davis down. Conductor Caines, of the local, for instance, sometimes known as "Dar-Daniel" for reasons known up there, is one of them. "Bob" Williams brakes for him, and life is never dull when this picturesque couple is on the job.

Miss Lucille Grey Pierson is another of the family. She refuses to answer her first name, but will come running at the call of "Grey" or "Jiggs." She is the yardmaster, weighmaster, bill clerk and all-around good fellow. Her confidential friend and working companion is "Shorty," otherwise Miss Hazel Sowards, who makes out freight bills and such things.

"Pop" must not be forgotten. His real name is "Tom" Meadows. He handles the money, and sits in his cage back of a fence. He also sells you a ticket to Cranberry, St. Louis, Chicago or any old place you want to go.

We have a sort of a step family at Richwood. They are the crews of the Cherry River Boom and Lumber Company's engines 18, 15 and 13. They run on our road between Richwood and Camden-on-Gauley, with their long trains, and are a part of the Charleston Division while on our rails. Speaking generally, the Cherry River Boom and Lumber Company's boys are about as fine a set of people as you will find anywhere on the System, from top to bottom. They are always ready to give us a hand when we need it, and we try to do the same for them.

Many years ago, we wont say how many, in the town of Ritchie, W. Va., there was born a little boy named "Mike" Harrington. Along in February, 1880, this little boy had grown up to such an extent that he was able to go to work, and he did, for the Baltimore and Ohio as a trackman. Along in 1890 he was made a track foreman, and on October 1, 1905, a supervisor, which position—after 41 years of honorable service—he holds today as efficiently as ever, and to the entire satisfaction of his superior officers. On his record there is but one mark. It is this. In 1919, "Mike" was riding on train 65, when the fireman was taken sick. "Mike" immediately volunteered and fired the engine, bringing train 65 successfully into Weston, averting a long and annoying delay to the passengers. He was commended by his superiors for his good work and this proof of his interest in the Company's business. We take pleasure in showing with our notes this month a photo of Supervisor M. J. Harrington, a real old-timer, a real member of the loyal Charleston Division Baltimore and Ohio family, an honest, hard-worker, beloved alike by his superiors and his subordinates, and every inch of his over six feet a "Real Man."

The chief train dispatcher has requested us to advertise in the MAGAZINE for a package containing "30 bolts" which escaped from the telegraph wires some where between Gassaway and Charleston. Full particulars may be obtained by inquiring from a certain young lady in the Superintendent's office. The loss is a serious one, and proper reward will be given to the finder, or to the one giving information which will lead to the capture of the bolts, to the young lady above mentioned. Her name is not mentioned, but will be given in strict confidence to the person claiming reward.

Every one on the Charleston Division works. See our picture showing the superintendent helping to handle mail at Orlando station.

In conclusion, let's get all the business we can, and let's avoid all the WASTE we can, and above all
BOOST THE BALTIMORE AND OHIO AT EVERY OPPORTUNITY.

In the line with our campaign to move cars promptly, Baltimore and Ohio 94450, loaded with hay, arrived at Gilmer at 5.00 p. m. on February 10, was unloaded at 8.00 p. m. and left again the following morning at 9.00 a. m. with a load of merchandise. Agent Friend is congratulated on his interest in keeping cars moving.

Weston, W. Va.

In connection with the Charleston Division slogan for 1921, the following item in a recent paper came to the writer's attention. It fits so well that it is worth repeating:

"The Joyce" Very Latest Style POPLIN DRESS

\$4.95 For This Sale

Look the world over and you won't find a more striking bargain! Just to introduce the David Strong Company to thousands of new customers, we offer this beautiful, lustrous Silk Poplin Dress for the unheard of price of \$4.95! The Joyce is an exact copy of a very expensive model. It has all the grace and charm of a real fashion creation. A favorite style with women of all ages. We know that once you see it you will say it is easily worth double this special advertising price. But don't take our word for it. We gladly send you one without any penny in advance. Just send coupon or letter and the dress will be sent to you at once. Don't delay—this is a special advertising offer and may be withdrawn.

Beautiful Lustrous Silk Poplin

\$9 VALUE

Send No Money

The season's most charming style—The Joyce—is made of a choice fine quality lustrous silk poplin in two favorite colors. Richly embroidered with beautiful gold thread embroidery. Stunning triangle of French Knots in contrasting color on waist. Cut full in one-piece effect—all the rage. Charming sash of self material. Poplin, three-quarter length sleeves with double cuffs. The matching beauty, the tailored smartness and the choice materials of this beautiful frock cannot be appreciated until you have it on. It is not to be confused with ordinary poplin dresses generally offered at much higher prices.

Send Now! Just mail coupon or write letter quick, before this sale closes. Send no money. Deposit \$4.95 and postage with postman on arrival. Try on and examine. If not convinced it is greatest Silk Poplin Dress bargain you ever saw, send it back and we will refund your money. Colors: Navy Blue and Black. Sizes: 32 to 44 bust measure, regular lengths. Misses' sizes: 14 to 18 years. State color and size.

Richly Embroidered
David Strong's Famous Guarantee Protects You

"Consequences are pitiless—and in the life of every man and every woman 'Unthoughtfulness' (in other words, failure to 'Think About It') covers a bottomless pit of useless regrets and unavailing remorse." "People succeed and are happy in proportion as they look to the future and work for the future."

Good advice; let's all try to follow it.

Business conditions in some directions seem to be improving slightly, while in others they remain the same, but the general result is well set forth in an article appearing on page 5 of our February MAGAZINE. If you have not read this article it is recommended to your careful study. It contains food for serious thought. It shows that our business since October has fallen off some 30 per cent. If some of us have felt that the economies being effected are drastic, or harsh, a careful study of the article in question gives us the reason. Economy does not always lie in cutting off men; it can be effected in other ways, and we are the ones who can do it. The higher officials of our Railroad are all "human"

men, and no duty is harder for them than that of reducing forces.

If every bit of saving that can be made, were made, it is probable that we could conserve our resources enough this way to obviate large reductions in forces. Every employe can help to save, and avoid waste, and by performing his duties in a thoroughly efficient manner avoid the necessity of making further cuts.

There are no surer ways to save money than by avoiding claim payments, waste of fuel, waste of stationery and supplies of any kind, and the hundred and one things that go to make bad operation. The shutting down of a big shop for a few days will save, perhaps, several thousand dollars, but of what use is that economy if the next day, through the failure of someone to THINK about his work, there is a derailment which costs three or four times the amount saved, and is nothing more or less than absolutely avoidable waste.

SAFETY is another item that counts above all things in our scheme of operations. If a passenger is injured through lack of care on the part of some employe, and a claim of large proportions results, then what has it profited that a similar amount was saved by some operating economies? Better far that we all make up our minds to give a 100 per cent. performance, so that the wasteful payments, which do no one any good, may be avoided, and money which would otherwise be so thrown away, made available to pay the salaries of all our employes.

The Charleston Division has made up its mind that it is going to be efficient, from top to bottom. It has made up its mind that it is going to be SAFE, that it is going to AVOID CLAIMS, that every one of us is going to do our share to make friends for

Daddy's an engineer and so is little Harry, son of Ross Burford, Wheeling Division

the Company, and by so doing insure the freight and passenger business coming our way. Finally, that it is going to AVOID WASTE of all kinds, both human and material.

A recent visitor at Weston Division Headquarters was S. W. Hill, assistant auditor of disbursements. Mr. Hill was a very welcome surprise, it being the first time he has come to see us in Weston. During the afternoon he addressed the employes of the Division Accountant's office, others from adjoining offices being present, including Superintendent Trapnell. Mr. Hill discussed the work

of the Accounting Department and impressed his force with the necessity of team work, and also emphasized the importance of correct accounting. We hope he will come soon again.

H. J. Burkley, recently appointed master mechanic at Gassaway, has returned to duty after two weeks absence with an attack of influenza. Master Mechanic Baldinger has moved his family from Gassaway to Benwood, and General Car Foreman Garber has brought his family from Benwood to Gassaway. We speed the parting guests and welcome the newcomers.

Wheeling Division

The accompanying photograph is of Harry Burford, Jr., son of C. R. Burford, engineer, Wheeling Division.

Western Lines

General Offices, Cincinnati

Correspondents

E. W. SPILLE, *Pass Clerk*, General Manager's Office

E. H. HENKEN, *Assistant Chief Clerk*, Division Freight Office

We have in the Superintendent Motive Power office a young man who is the champion of champions. Roger Meagher claims the distinction of being the best pallbearer in the city of Cincinnati. He sets aside one day each week to act in this capacity; had he more time, "Rog" says that he could perform this work of charity at least two or three times a week. If anyone in the General offices is contemplating "ending it

SNAPSHOTS FROM THE CHARLESTON DIVISION

Left to right, upper row: Engineer "Jack" Phillips and his family; engine 2070 as she looked when Foreman O. J. Kelly's men turned her out of Weston. Middle row: The Superintendent on the job; Supervisor M. J. Harrington, W. Va. and P. territory; the "Pride of the Charleston Division" floats on high. Bottom row: Gassaway Station; Orlando Station at a busy moment

L. S. Cunningham

all," get in touch with Roger at least three weeks in advance, so that he can arrange his work accordingly.

Clarence Hornbach, the energetic evangelist, will give a lecture next Tuesday night at Workman's Hall on "The Evils of Tobacco."

Millionaire Miller has just recovered from a serious operation. Credit his devoted nurse, Gladys Pierret.

John Sheeran and George Kopp have opened up a first class barber shop. Mustaches a specialty.

"Joe" Noewer and W. A. Radspinner have opened their new hotel for colored people at Third and Central Avenues.

F. O. Bamforth, formerly assistant chief clerk to general manager, has resigned to accept the position of chief clerk to superintendent, Garrett, Indiana. Mr. Bamforth has been in the General Manager's office for the past 9 years, working up from the position of stenographer. We all regret to have "Freddie" leave us, but our very best wishes accompany him to his new duties. We hope that he will not forget us and will drop in on us occasionally. Walter K. Noe, former secretary to the general manager, has been promoted to the position of assistant chief clerk.

The accompanying picture is that of two comptometer operators in the office of assistant to general manager. They are, Miss Charlotte Lauther on the left and Miss Mae Agen on the right. It is needless to mention the fact that they are two of the most pleasant girls in the General offices. See that smile on their face! Well, it's there all the time. Will try to have more smiling countenances next month.

We extend our congratulations to R. K. Sheets, telegrapher, "SG" office, on the arrival of an 8-pound baby girl at his home on February 20. This is the sixth in his family. Thanks for the cigarettes.

Slippery Slim's Philosophy

If you do not want to work, do not get in the way of others that do.

Don't ridicule the aged, remember you'll be old some day yourself.

If you don't like the way the office is run don't tell us about it; tell the "boss."

Give the Company full eight hours' work; remember you are asking for eight hours' pay and this is no charitable institution.

Don't think the "boss" has it in for you just because you cannot have what you want.

If you had a fight with your wife before coming to work, don't come to the office and take it out on the clerks.

When out among strangers, always have a good word for the Baltimore and Ohio Railroad.

Be a booster, don't be always knocking.

A lion's roar induces respect, but remember, Calvin, you're no lion.

"Bobbie" Burns will meet all comers to defend the 300 ball pool championship of Ohio.

E. C. Yocum from XAT Ranch, Cheyenne, Wyo., is in town conferring with "Bill" Andrews, the big beef packer, about the price of canned "BULL" for next season.

Traffic Department

The accompanying picture is that of L. S. Cunningham, draftsman in the office of superintendent of motive power. Mr. Cunningham is known quite well over the Baltimore and Ohio for his skill as a draftsman. He has contributed a number of the covers for our MAGAZINE.

Arthur Perry, John Smith, Rawn Kinney, "Tom" Baker, Arthur Flach and "Ed" Gardner journeyed to St. Louis on February 26 to engage in a bowling contest with a team from the Traffic Department of that city. Sad to relate they lost by some 200 points, but the sting of their defeat was lost in the splendid treatment they received at the hands of the St. Louis players. They extend their sincere thanks to Messrs. Bollman, Bradley, Turgcon, Minear and Coppedge of the St. Louis team for their hospitality, and assure them that any time they visit this man's town they are certain of a warm welcome.

F. Earl Smith, Tariff Bureau, takes the hand embroidered freight car when it comes to presumption. Can you imagine a person having a birthday and then demanding that the office force give a party in his honor? Well, that's what F. Earl did—and even insisted that Louise Silberhorn buy him a bunch of lollypops as a birthday gift. But we hand it to you at that, "Smittie"; anybody that can get Louise to spend a nickle certainly deserves credit.

Olive Tealen once had a bad cough,
So she went to a doctor named Hough,
And he said, as he laughed,
"You've been caught in a draught,
For the hair from your ears is all off."

"I wonder," began "Tom" Baker.
"You wonder what," asked "Art" Flach,
reaching for a paper weight.
"I wonder if you could call a man a
cannibal if he's living off his friends," replied
"Tom." And then it happened.

After seeing the notice in the February
MAGAZINE, advertising the Traffic Department
Hair Raising Quartet, "Charlie" Hall
was bumped by a poetic muse, which he
says is responsible for the following:

That note may be funny, I'll have to admit.
But to one of the victims seems very poor wit.

Why is work interesting at General Offices,
Cincinnati? Two good reasons:
Misses Charlotte Lawther and May Agen

As Shakespere Sees Them

"It will discourse most eloquent music."—Charles Lally.

"Very like a whale."—Edward Henken.

"Assume a virtue if you have it not."—Lucia Stockman.

"Let me not burst in ignorance."—Arthur Perry.

"The lady doth protest too much, me thinks."—Louise Silberhorn.

"The observed of all observers."—Olive Tealen.

"I am the very pink of courtesy."—Edward Gardner.

"I bear a charmed life."—Albert Todd.

"Give me the ocular proof."—Rawn Kinney.

G. Jeffries: "Charlie," on what does a ship weigh anchor?

C. Boyd: Why, they catch a fish and weigh it on its scales.

We are advised that when "Tom" Baker went to St. Louis with the bowling team, it was the first time he had ever slept in a Pullman, and great was the occasion. That is, it was great for everybody except Rawn Kinney. Kinney slept right across the aisle from "Tom" and every time the train would stop at a station, "Tom" would reach over and jab poor Rawn in the ribs and ask him what station it was. By the time the train got to Vincennes, Kinney thought that possibly "Tom" had gotten over the sensation of lying in a berth and watching the stations pass by, but no, innocent Thomas wasn't satisfied until he counted every station up to East St. Louis

—and then wanted to sleep! Betcha that even now "Toni" doesn't know on which side of Cincinnati North Vernon is located.

W. R. Kinney left Cincinnati on Sunday, March 13, for Dallas, Texas, to become traveling freight agent for the Baltimore and Ohio, with headquarters in that city. Before he left, the General Freight office employees presented him with a handsome traveling bag in which he will be able to carry his other shirt and another pair of socks if he has them. "Kinney-Bill" takes with him the very best wishes of the entire Traffic Department, accompanied with the hope that he won't get shot up by any of the bucking buckaroos of Topsy Texas and that he will find at least enough Irishmen down there to make things interesting. So long, Rawn; remember that there's where "Max" Freese got his start.

Cincinnati Terminals

Correspondent, JOSEPH BEEL, *Chief Clerk to Superintendent of Terminals*

James H. Finley, for many years an employe of the Baltimore and Ohio Railroad Company, passed away at the Presbyterian Home for the Aged, Pittsburgh, on February 22. He was buried on the Wilsee Chapel, Cincinnati, on February 25.

The services were conducted by the Rev. David McKinney of the Reformed Presbyterian Church, of which Mr. Finley had been a life-long member and was attended by a large number of old friends.

Mr. Finley was 82 years old at the time of his death. He entered the service of the Ohio and Mississippi Railway as depot master at Storrs in 1882. He held this position until 1900, when he took charge of the perishable yard at Plum Street. In 1915 he was retired and placed on our list of Veterans.

Mr. Finley was fair in all his dealings, upright and honest, and could always be trusted with any duty.

The Company lost a faithful servant and it can well be said of him: "Well done, good and faithful servant, enter thou into the joys of thy Lord."

We have all read recently of the instructions issued by health officials: "Get plenty of sleep." It is quite obvious that a certain young lady in the Master Mechanic's office at Storrs does not agree with this theory. They also say she is some "Tangoist"!

The Stores Department, Storrs, has a romantic employe in the personage of Bertram Golden. He has punched cattle in Arizona, mined copper in Utah, fought Mexicans in Mexico, and can tell interesting tales of the old days of the West. This handsome young "Soldier of Fortune" has also toured Europe quite extensively, especially the place of his birth—Ireland. I'll have to disappoint the girls, though; he's married—just recently, too.

An Open Challenge to All Motorists

C. J. Bredestegge, of the Stores Department, claims he can beat any one—or rather any other machine—down Glenway Avenue in his Maxwell. He won't race up hill, though. They say that his car has five wheels—perhaps that's the reason!

Let the other fellows spread the gloom and paint the future blue—when they lie down it makes more room for men with sand like you.

Each time they tell their sorrow,
They could turn it into a smile;
To load their freight via B. & O.
They'd find it worth their while.

Reducing Expenses

We are going back to getting on the job, watching costs, retaining the business we now have and hustling for new. Service and cooperation on the part of every department and employe of the Baltimore and Ohio family to our customers will be a wonderful factor in increasing our revenue.

Do you know that the loss of revenue on one car of fourth class freight from Cincinnati to New York would pay the expenses of a good sized office force for a week? Don't let any business get away from us on account of service, and above all, when located on our own tracks.

On the Job

Not going to get on, but "ON."

Hugh King, our hustling tallyman, Gest Street, is wearing a broad smile lately, knowing that he made an average of 21,653 pounds merchandise per car for November, ranking eleventh among stations on Western Lines. He came right back again in December for an average of 21,175 pounds per car, ranking seventh.

Hugh just won't let them go light when he has the business. Keep it up, Hugh; load them solid. You no doubt have in mind that 50 per cent. reduction in damage claims for 1921. Hugh not only loads cars heavy, which is a big saving in many ways, but he has a little way of his own in keeping the cost down, which shows he is working on 1921 standards.

George Rethman, our accommodating assistant cashier at Gest Street, has been working hard on collections. It is needless to say that George succeeds in his task, as he accomplishes about everything he goes after, even if it is an old demurrage bill which has been disputed. George made the encouraging report that collections for month of January, 1921, exceeded the same period in 1920 by 34 per cent. Pretty good for dull times. Now is the time when increased collections count.

Meet Mr. Spaulding

G. B. Spaulding, car inspector, Gest Street, the box car poet, better known as "Bad Order Spauldie." George's excellent cooperation with all departments to furnish suitable equipment for the many industries in the west end manufacturing district is a wonderful help in getting and retaining business for our own rails. From the way George is ordering supplies of Form 1126 "Commodity Card" it is evident that he is picking out cars that will transport freight to destination without damage. He also has in mind the drive for 50 per cent. reduction in damage claims for 1921. George is a great advocate of Safety First, and only those that are good will go.

Harry J. Hocks boasted recently of having lunched for three days in succession at the Gibson Hotel. Upon investigating it was found he had taken up the church collection on the previous Sunday.

Things We Would Like to See

J. P. Fallon figuring his income tax.
P. C. Stanhope attending banquet at Manhattan Rest.

H. F. Howard riding in his Jewish Showcase (Ford Limousine.).

A. E. Busard's farm at Silverton, Ohio.

Operator Kelly, "GK" Tower, contracted with a farmer about two years ago to take eggs weekly, at a set price. Since the fall in the price of hen fruit, he does not want to carry out the contract.

Elmer Pabst, known as the "fashion plate from Stock Yards," has been working the temporary vacancy as crew dispatcher, Eighth Street.

A. E. Busard has been assigned to the first trick crew dispatcher vacancy, Eighth Street, vice J. L. Keefe, who died on December 8.

R. K. Bottorff, former operator, Indiana Division, has been assigned to third trick crew dispatcher, Eighth Street.

Wesley Hoopengartner, former operator, Indiana Division, has been assigned second trick crew dispatcher, Eighth Street.

The pet cat from Trainmaster's office, belonging to W. J. Robinson, has disappeared. Finder please return to night trainmaster.

No doubt you have heard of our bachelor friend, W. C. Owens, assistant freight agent, Gest Street Station. If you have not, you have missed a good treat. Agent Owens is a fine fellow, all the girls around the factory district at Gest Street say so, and if the girls say he is, it must be right. As to Baltimore and Ohio business, Owens has them all beat. He will let nobody ship at Gest Street without giving us as long a haul as they can. The Railroad practices "Safety First" and Owens is sure playing the game. The fine work he is doing at Gest Street shows that he is on the alert and keeping times good at his station. I am showing below a little story about "Owens and the Box Car" which will explain the trying position he is in at times.

The Plight of a Box Car

I built a box car
While Agent Owens slept,
And out of the car
I silently crept.

Out of the car
Into the yard
While Agent Owens
Was off his guard.

The little box car suddenly awoke,
Gave to himself a punch and poke,
Rubbied his eyes and looked around—
But Agent Owens could not be found.

Out of the way he ran so hard,
Out of the way and railroad yard,
Never an Owens was there in sight
The box car had got in a dreadful plight.

Up the track he ran to look,
Down the track to another nook,
Up the hill came—whom do you guess?
Agent Owens in his night dress!

It rained and the car was wet as sop,
And Agent Owens kicked to make him stop.
Gripping his dress in his teeth so strong
He gently carried Agent Owens along.

It was the only car in the Railroad yard,
And Agent Owens was trying hard
To stop the car for a Gest Street load,
And bill it out on the B. & O. Road.

Of course that filled Owens full of smiles,
A haul on our Road of 200 miles,
And Agent Owens didn't get the worst,
For he was playing "Safety First."

Increased Business

The outlook for increased business at Gest Street is bright. With the short month of February of 23 days, the inbound carload revenue haul tonnage increased 20 per cent. over January this year. The fact that industries in this territory are getting in more material is a good indication of increased output in the near future.

Our big Matzos baker, The B. Manischewitz Company, is running at top-notch capacity. Our big furnace company, The Monitor Stove Company is fast getting into their usual stride; F. H. Lawson Company, manufacturers of tinware, etc., report increased business. The Brown Carriage Company has had a nice business for the past two

Phyllis and Elaine Dickerson

John Hiskey, local accounting office, has been compelled to take a leave of absence because of ill health.

The accompanying photographs show Phyllis, age three, and Elaine, age six, two bright-eyed daughters of J. B. Dickerson, Division Accountant's office, Newark, Ohio.

Information reaches us that "Turkey," a well known telephone maintainer, was

the Mardi Gras at New Orleans as well as a number of other cities in the Southland.

Business conditions are reported improving. A number of industries have opened up, and the indications are that within the next month most of them will be back on nearly normal basis.

The ice crop in Sandusky bay this year has been a complete failure. Ordinarily

months, having had a large export order. With other industries gradually falling into line, it won't be long until business will be about normal in this territory.

Be an Optimist

An optimist is one who knows that the bitter is mixed with the sweet, but who has sense enough not to grind his teeth upon a bitter pill.

Conditions may not be as favorable as we would like, but we know they are not half as bad as compared with conditions in other countries.

Optimism sends new life force through the system. "Laugh and the world laughs with you—smile and the banker will trust you."

Look cheerfully into the future. The tide turns quickly. Cheer up, it isn't half bad.

W. E. LAIRD, Chief Clerk, Newark, Ohio
A. D. LIST, Newark (Ohio) Shops

The accompanying is a good likeness of William A. Ford and grandson, "Billy" Hall. Mr. Ford entered the service of the Company in August, 1884, and at the present time is a member of the Police Department, acting in the capacity as night watchman, Newark Shops, making the rounds and ringing in at a dozen or more fire boxes each hour every night. Besides his grandson, Mr. Ford's hobby is rabbit hunting, and we'll say that the number of miles covered by him each night in the performance of his duties has in no way interfered with his climbing up and down hills all day in pursuit of the cottontail.

After their recent "hit" in presentation of "Fads and Fancies," the "Apple Pie Revue," we fear the call of the stage may cause us to lose the services of two efficient clerks in the Accounting Department—Ira Andrew Rickmer and Otto Von Reichert.

Granddaddy W. A. Ford and little "Billy" Hall

not yet learned the name of the lucky gentleman, but are extending best wishes for her future prosperity and happiness.

Van Sant, the "Office Grouch" was recently heard singing "In the Good Old Summer Time," and now we are willing to bet that Winter is over.

New Castle Division

Correspondent, J. A. JACKSON

Friends of Mr. John F. Stevens, father of our superintendent, will learn with interest of the honors recently bestowed upon him by the French Government, when he was decorated with the cross of the Legion of Honor, with the rank of officer. This is the highest honor conferred by the French Government, and this distinction comes as the result of Mr. Stevens' exceptional record in Russia and China on the Inter-Allied Technical Board in charge of Railroads in Russia, and also that of the East Chinese Railroad.

Mr. Stevens assumed his duties in the Far East about four years ago, and since that time he has been successful in placing the roads on an efficient working basis.

On a recent visit to this country on an important mission for the Government, Mr. Stevens stopped here and spent several days at the home of his son, D. F. Stevens, on Carlisle Street.

Our basketball team closed its schedule in the City League and finished in third place, which is a creditable showing, considering that the league was composed of some of the best players in the State. Much of the success of the team is due to the efficient handling of the players, under the direction of Captain Claire Kocher.

George Broadbeck, electric welder, New Castle Junction Shops, and Miss Daisy Pringle, of this city, were recently married in Cumberland, Md. They are now at home to their friends on Adams Street. George is one of the popular boys in the shops, and a host of friends are extending the happy couple their best wishes for an abundance of good luck, prosperity and happiness.

Miss Agnes Barnes, stenographer to terminal trainmaster, New Castle Junction, resigned her position on March 20 and left for Gary, Ind., where she will make her future home. Her father recently accepted a position with the United States Steel Company at that place. Our best wishes accompany Miss Barnes.

The accompanying photograph is of the sectionmen of Section 58, and a part of the

station force at Wooster, Ohio. The names of those in the picture are, left to right, first row: H. Keightley, M. Miller, S. J. Arnold, R. S. Miller, section foreman, and J. H. Hudnut. Second row: L. O. Marble, clerk; J. G. Slocum, station agent; E. C. Low, and B. F. Low.

Cleveland Division

Correspondents

A. F. BECKER, *Secretary to Superintendent*, Cleveland, Ohio
E. L. MILLER, *Chief Clerk to Division Freight Agent*, Akron, Ohio
H. B. SMITH, *Supervising Agent*, Cleveland, Ohio
W. E. BRUGH, *Clerk to Trainmaster*, Massillon, Ohio

The Cleveland Welfare Club gave its first ball on February 21 at Moose Hall. Approximately 250 to 300 members and their families attended. By special request, Misses Stahlnecker and Cartwright were asked to repeat the part they took in the recent Safety Rally, of two duets, which were beautifully rendered and appreciated by all. This is only the first of a series of dances and entertainments to be given by the Welfare Club, and judging from the attendance and comments on the dance, we feel that it was a success.

Someone has said that the local laundries are losing money because G. H. Kaiser, road foreman of engines, wears a rubber collar. We understand he has discarded it and is now wearing linen collars. George says he can still beat the laundries by turning his collar inside out, thus wearing it on both sides.

Do You Know the Reason

Why H. B. Smith receives the women's fashion sheet?

Why George Maisch wears his coat out in the sleeves?

Why George Gordon wears soft collars now?

Why John Fluck breaks his chair?

Why Carl Groninger is popular at the Welfare dances?

Why "Jack" Scheuerman makes a good stage manager?

Why everybody looks for George Trope on the 13th and 16th of the month?

Why Margrette Smith cannot ride for half fare and H. H. Reun can?

Boost

Boost your city, boost your friend,
Boost the church that you attend;
Boost the street on which you're dwelling,
Boost the goods that you are selling.

J. A. Weaver and C. R. Summers

They can get along without you—
But success will quicker find them
If they know that you're behind them.
Boost for every forward movement;
Boost for every new improvement;
Boost the Company for which you labor;
Boost the stranger and the neighbor.
Cease to be a chronic knocker,
If you'd make your city better;
Cease to be a progress blocker,
Boost it to the final letter,
Join the Welfare, you'll be better.—J. P. W.

Effective March 15, Train Rider Warrenfeltz was promoted to position of lieutenant on staff of Captain T. L. Rowe. Keep up the good work, "Jack," we wish you continued success.

"Uncle Tom" Dowling continues to act as secretary of the Mothers' Benevolent Association and H. ("Hercules") Reum as the president. Membership is now open to all departments.

All agents and local freight conductors continue their campaign to reduce claim payments 50 per cent. for this year and results are showing up well. The postponing of monthly claim prevention meetings will not interfere with the intensive campaign in the interest of freight claim prevention.

Friends of Officer "Jack" Foley will now find him at Ninth and Superior any day after office hours. Looks as if competition was too keen at Ninth and Euclid.

W. G. Dee, foreman, Lake Warehouse, submits the following:
The little things are the things worth while,
The word of praise, the pleasant smile,
The helpful thought, the handclasp true,
The kindly deeds you always do.
Just the little things that help along
And fill one's life with joy and song.

Massillon

"Nick" Gullef, car inspector, announces the arrival of a 10½-pound daughter on March 8. Congratulations!

F. C. Bowman, is now section foreman, Massillon Yard. The track is beginning to show much improvement, "Ike."

E. Landis, former supervisor, New Castle Division, is now supervisor between Warwick and Dover, vice I. C. Bowman, assigned to other duties.

J. C. Hahn is the regular passenger conductor on trains 58 and 59 running between Cleveland and Bridgeport, vice W. J. Bair. Mr. Bair now has the St. Clairsville "Flyer," vice "Tom" Bowen.

Sectionmen of Section 58 and part of station force, Wooster, Ohio

J. T. Sidaway has returned from a short trip to Florida, but we didn't see him bring any oranges or grape-fruit.

Thomas B. Adams, yard clerk, Dover, has returned from a western trip, extending to various points in California. "Tom" had a fine time, and rode on some good railroads like our own. After all, there is no place like home.

We wish to express our sympathy to Conductor W. E. Hadden, who lost his father in February.

Police Department

Correspondent, LIEUTENANT L. F. BARADA

There being a certain young lady known at times as "Bobbie," "Golden Locks," etc., who is the "Queen of the 'Hunt and Punch' system on the L. C. Smith," and who daily receives reports from the officers who do their patrol duty, she is especially interested in the making of fancy borders on towels, napkins, scarfs, etc. I wonder why the big idea of the "hope chest materials"? Anyway, we trust that she will be a good sleuth around the house and locate all dusty corners.

It is strange when a certain supervising agent, who is granted the honor of popularity winner for good looks, dancing and entertaining, should attend the Welfare meetings alone. It is hardly fair to monopolize our fair guests for dancing and moonlight waltzes when not accompanied by someone to trade. Get busy "Handsome" and show us that you are not going to be classed as an habitual bachelor tutor.

Our agent, Massillon, purchased a ticket for the Cleveland Welfare Dance held at the Moose Club Hall recently and then did not appear. Could it be that he is following in the footsteps of our supervising agent and has taken up the crape of bachelorhood?

Akron

Elmo J. McCall, the amiable clerk, District Freight Office, is the happiest man in all Akron because of the arrival at his home of a wonderful baby girl. Mrs. McCall was formerly Miss Pearl Sauers, secretary to Terminal Trainmaster Smith.

D. C. Barrett, secretary to district freight agent, resigned, effective February 29. We are glad to welcome as his successor Miss Ruth L. Gordon.

Miss Pauline Rush, the most popular girl in the Akron Terminal, has been transferred from the Car Foreman's office to the office of the Terminal Trainmaster.

J. B. Drake, assistant agent, East Akron, recently received the following letter from a Barberton lady:

"About 10 years ago I used the Baltimore and Ohio passenger service every day. One day the agent gave me \$1.00 too much change and I kept it. I have gotten religion and want to make everything right with Jesus, so I am enclosing \$1.00 with 31 cents interest."

The accompanying picture is of our beauties, J. A. Weaver, demurrage clerk, and C. R. Summers, chief rate clerk, Howard Street.

A clever poem, written by Mr. Weaver to Miss Crowthers of Howard Street, who has been ill for the last two months, contained the names and occupations of all those who participated in the securing of a token for Miss Crowthers. We have sent it to the MAGAZINE in the hope that it can be used.

Sorry, though good, it is quite long, and pressure for space prevents.—Editor.

Realizing our need for additional freight and passenger revenue, the Welfare League of Akron has launched a two weeks' solicitation drive in cooperation with the Traffic

Department. An effort is being made by the members of the League to induce the merchants, with whom they trade, to route their traffic via our line and we are all endeavoring to interest our friends in using our passenger service.

During the period of depression we have enjoyed splendid cooperation and practically every employe of the Akron Terminal has been a freight solicitor. Terminal Agent Troesch and Terminal Trainmaster Smith have closely cooperated with District Freight Agent Groninger in an active solicitation of freight traffic and splendid results have been obtained.

One of the most active freight solicitors in the Akron Terminal is J. E. Frisky, night yardmaster, East Akron. Mr. Frisky feels it a personal loss whenever any of the industries in his territory give the Baltimore and Ohio a car to be switched to connecting lines at Akron for road haul movement. By giving the concerns in his territory exactly the kind of switching service they want he has made many friends for the Railroad.

R. M. Claggett, demurrage clerk, East Akron, this week secured a carload of household goods for Philadelphia despite the fact that a competing railroad was actively soliciting this business.

Willard

It is hard to keep "Charlie" Dame at home nowadays. He spent the months of December and January in Postoria and became acquainted with so many other "dames" that he is getting positively unmanageable.

Fireman Ernest Ransom, Postoria, is the proud daddy of a baby girl. Congratulations, Ernest!

H. E. Heller, our honorable freight agent, has paid his last dime for a shine. The Company has built a cement sidewalk into the freight office for his special benefit (?).

"Scottie," operator at "J" Tower, tells us an amusing story of an old-time "section boss," who had two sons. The elder son had followed his daddy's occupation, but the younger had not yet chosen his career. The old man came to talk to a passenger engineer about the matter.

"Do you reckon you can get my boy on the road as a fireman?" asked he.

"I'm willing to speak to the road foreman about him," said the engineer, "but why not make a section boss of him as you did with the other boy?"

"Well, sir," said the old fellow, "I reckon I might as well tell you, the boy ain't exactly right."

Mrs. A. H. Young, wife of Fireman Young, underwent a serious operation for appendicitis during the early part of February. We are glad to know that she is rapidly improving.

Wait one minute, Hartzeler! We'd like an introduction to her.

Sarah: Why do you think that women talk longer in summer than in winter?

Barney: Because the days are longer.

Firemen "Jess" Durban and Clyde Shaffer passed their examinations on air O. K. Some engineers they will make, eh, boys?

"Joe" Maroney is back on the job, calling again. The same old "Joe," hunting those darn firemen and engineers, although he says the switchmen are the hardest to find.

Fireman Smith had the mumps for a whole week in February. We all thought his cheeks were fat and rosy from being well fed, until he told us. We're glad he's well again.

South Chicago

During these times "Get the Business" must be the watchword of all loyal employees. One way to secure new business and to keep the business we now enjoy is to be courteous to our patrons, both in telephone and personal conversations.

Surely Cupid is working overtime at South Chicago. Since September we have lost three of our girls, the last one being Millie MacFarlane, who, on March 8, became the bride of Robert Kendall, formerly employed by the Company here.

Mr. and Mrs. Kendall left on March 9 for Palmer, Saskatchewan, Canada, where they will make their home. Our sincere congratulations and best wishes.

Chicago Terminal

Correspondent, THOMAS H. WILLIAMS

Echoes from the Record Office

By A. Dum Bell

On desk number one there's a sweet little maid,
 Hattie's her name, and her smile doesn't fade,
 And then at desk two, just opposite, sits Harry,
 with record book held in his mitts.
 Desk three is Winnie Winkle, she of Tribune fame,

We're glad now to boast of this fine little dame.

Miss Connor (Irene) presides at desk four,
 She's sure right home on any dance floor.

Next comes the young lady on Car Record phone,

Just take it from me, that girl isn't a drone!
 And don't forget Lucy, our Junction Card Queen,

Most any night at Merry Gardens she's seen.
 While Bertie and Romey are the reclaim twins,

Special reclaimers are their favorite whims.

And Newlywed Wood is next in the line,

He says married life's an experience fine.

"Gus" is the fellow who answers "99,"

Chewing of horseshoes is his pet pastime.

"Charlie" and "Ed" are the two wheelage boys

Who scatter the wheels without any great noise.

Then comes our stenographer, our "fair Marie,"

She is the just pride of room three-forty.

Miss Ruth and Peterson end up our line,

We call them our "Bowling Twins" almost divine.

And now that we've written the "Car Record Review,"

We'll rack up our pens and bid you adieu.

Effective February 16, our genial friend, J. F. Walsh, was promoted from the position of general yardmaster, Chicago District, to that of assistant trainmaster. Mr. Walsh entered the service of the Company on July 4, 1891, and has worked his way up through the ranks, serving as switchman, conductor, yardmaster, and general yardmaster. He has our best wishes.

Why's?

Why do they open the windows on cold days and keep them closed on warm days?

Why do we pay income tax?

Why do they keep the window shades down when the sun isn't shining?

Why don't they announce the date prohibition is to go into effect?

Why is "Gus" a home route clerk when he should be a heart-breaker in the movies?

Part of a letter to the Correspondent:

I greatly enjoy our MAGAZINE. Its fine lessons have inspired me with a desire to contribute something which directly concerns the many trackmen in our family.

In days gone by I have often made efforts, which came from an inward inclination, to write my thoughts in rhyme, but I never was sufficiently satisfied with them to show them to anyone. At this time I feel that the object in view is more important than classic, and I am willing to humbly expose my composing efforts to your criticism. If you think it is worth printing, let it ride in one of the issues of the MAGAZINE. If not, throw it into the waste basket. My object is only to drive deeper the lessons which have already been taught the trackmen.

Foundation of Safety

By Frank Sindelar

Extra Gang Foreman, B. & O. C. T.

All objects must have a foundation, that's true,

No matter how small or how large they may be,

But pray let me speak of the one above all
 That's known around here by the name
 of SAFETY.

First comes the track on which the trains ride—

The trackmen all look upon it with great pride,

For 'tis by their toil that the train speeds along

And all is made safe for people to ride.

To make a track safe is a lesson itself,

And must its actual meaning construe.

We, ourselves, must be safe to make other things so—

Practice "Safety," whatever we do.

Trackmen, a chisel must never be used,
 On the ball of a rail that is hardened with age.

The danger is great from splinters that fly,
 And your name may be placed on the accident page.

When with a chisel you must cut a rail,
 And slightly you've severed a bit from the line,

Do not attempt to make it straight then,
 For surely a splinter will get you some time.

Make sure that your chisels are all good and sound,

The heads of them as also the cutting edge.

Forget not the handles that you must tight hold,

Forget not the hammer, forget not the sledge.

A clawbar is also a dangerous tool,
 When held in the hands of a careless trackman.

Especially when pulling spikes in a turn-out,
 Your fingers 'twixt the bar and the rail you might slam.

God has given us reason, sight and hearing,
 And a love of life for our protection,

Make ample use of these great gifts,
 And you'll have no need of sad reflection.

Our Industrial agent, J. M. McDermott, is a live wire. He announces the following new industries located on our line to be served by us: The LaSalle Woodworking & Lumber Company, manufacturers of all kinds of fancy woodwork; Wolf, Sayer & Heller Company, manufacturers of all kinds of butcher supplies, and importers and exporters. Good luck, "Mac," go get some more!

D. J. Sloan, yardmaster, Lincoln Street Joint Zone, has been confined to his home for the past two months because of illness. We are glad to learn that his condition is improving and hope that he will soon be back on the job.

H. O. Wertenberg, president of the Gasoline Alley Club, whose members gather in the Maintenance of Way Department every noon to discuss their troubles, advises he has just completed a course in automobile repairing and now considers himself a first-class mechanic. Howard says he is going to write a book, the title of which will be "Drain Your Radiator to Avoid Trouble." Come on you fans, and "Dan" McNeil! Place your order for a copy today.

A stalwart Swede stepped into a corner drug store. "I bane sick," said he to the clerk. "And I want some viskey."

"Nothing doing," answered the clerk. "Don't you know the country's dry? But," he added, "you might be able to get some squirrel whiskey over there at that saloon."

Across the street the big Swede made known his wants.

"Squirrel whiskey!" yelled the astonished proprietor. "We don't have such a thing, but," in a whisper, "I can fix you up with a little 'Old Crow.'" The Swede shook his head, "I no want to fly," he answered, "I yoost want to yump around a while."

Mrs. Bartie Stewart, M. C. B. clerk, East Chicago, has recently undergone an operation at the Mayo Brothers Hospital, Rochester. We all wish her a speedy recovery.

"Fred" Rosenberg, enginehouse foreman, Lincoln Street, has been appointed assistant general foreman, East Chicago, vice G. H. Rosenberg who has been appointed general foreman, Lincoln Street.

Every busy man should have a wife so he won't have to waste his time trying to make up his mind about anything.

He worked by day,
And toiled by night,
He gave up play
And all delight.
Dry books he read,
New things to learn,
And forged ahead,
Success to earn.
He plodded on
With faith and pluck,
And when he won,
Men called it luck.

Obituary

Our sincere sympathy is extended to the families of those in our ranks who have recently died.

P. Parisi, laborer, Lincoln Street Terminal, sustained injuries on February 16 from which he died on March 5.

John Mical, grease cup filler, Lincoln Street Terminal, came to work on February 24, performed his work as usual, became ill and died that night.

Mrs. Jane Pinkerton, secretary to the General Superintendent, buried her father on February 28, after a month's illness. Her friends and co-workers extend their sincere sympathy.

We regret to announce the death of the daughter of Power Plant Engineer G. Danks and to extend our deepest sympathy to the bereaved family.

The Yard at East Dayton, Ohio

J. M. Quigley, boilermaker, Lincoln Street Terminal, fell from locomotive cab window to cement floor in the roundhouse on February 27, sustaining serious injuries about the head, from which he died on March 3.

Ohio Division

Correspondent, A. E. ERICH, Secretary to Superintendent

An editorial in one of the local papers gave quite a pleasing comment on the Safety rally we held in Chillicothe on February 14 and ended with the following remarks: "More gatherings of this kind would be productive of untold good to all concerned and the community at large. Whatever the cost, it is money well spent."

The local committee in charge, William Rardin, chairman; Misses Bertha Streitenberger and Eva Eberle, are commended on the efficient manner in which they made all necessary arrangements for this entertainment. We also wish to thank our own interesting entertainers, Miss Bertha Streitenberger, Miss Edith Woodall, Edwin Rutherford and Miss Mildred Curtis.

Roy N. Francis, car apprentice, states he will not have to request trip passes to Wellston, Ohio, in the future, as he is now the owner of a Ford, in which he expects to make the journey to see HER. It may be possible that it will be entirely unnecessary to make the trip to Wellston at all—at least not alone.

Twelve "SAFETY" sentences using names taken at random from the Ohio Division pay rolls:

Read each "PAGE" of the Safety book of rules.

Safety First should "BEE" "AMANN'S" "CURRENT" thought.

When you see a nail pointing upward in "DEBORD," bend it down.

Total number of employees "KILLE"(d) during 1920 was 123. Practice SAFETY and see the "QUICK" reduction in this number.

The "POWERS" of Safety are unlimited.

The employe who "MASTERS" the desire to indulge in unsafe practices is the one that "COUNTS."

Remember "STEEL" and other metal "CUTRIGHT" into the eye. "WARE" goggles when doing dangerous work requiring their use.

"WARREN" the "NEWMAN" in regard to unsafe practices.

A "LADY" can also assist in Safety work, if she will "WARNER" husband, brother or father to avoid unsafe practices.

Do not look "OVERSTREET" at the "BUNCH" when "CROSSEN" tracks; think Safety.

Every one knows it is "HARD" to live in "BLACK"(ness). Therefore, why pay the "PRICE" of losing the eyes when the use of goggles will prevent this?

"AID" the Safety Work.

In the last issue of the MAGAZINE, announcement was made of the promotion of O. E. West to the position of general yardmaster, East St. Louis. We again have the pleasure of announcing his further promotion to the position of supervisor of terminals on the Southwest District, with headquarters at Cincinnati. Mr. West entered the service as brakeman on the Ohio Division on May 2, 1903; he was promoted to conductor on February 19, 1917, to night yardmaster on March 3, 1918, and to general yardmaster, Chillicothe, on September 1, 1918. He has our best wishes for success in his new position.

A surprise came to us all recently when the news leaked out that Miss Nell Scharenberg, comptometer operator, Division Accountant's office, had changed her name over a month previous (January 8), having quietly slipped to Windsor, Ontario, where she was married to Lawrence W. Miller, an employe of the Mead Pulp & Paper Company. Accept our good wishes for a happy married life, Mr. and Mrs. Miller.

We have just received notice that the monthly Freight Claim Committee meetings will be discontinued. While this action is necessary at this time for the reduction of expenses in every way possible, it does not mean that what has heretofore been achieved by the holding of such meetings will be lost; on the contrary, individual efforts on the part of all should be put forth to carry on this good work. As much and

Hillsboro Passenger Station

more can and will be accomplished by personal efforts on behalf of every agent and others. **PREVENT FREIGHT CLAIMS. IT CAN BE DONE.**

J. S. Randall, second assistant engineer, Maintenance of Way, reports the arrival of James, Jr., weight 9 pounds. Congratulations!

F. Segale, agent, at Cozaddale, is the proud pa-pa of a bouncing baby girl. Best wishes, Frank.

The stork also left another girl at Cozaddale. Section Foreman James Long wears the smile that won't come off in this case. Congratulations to the new mamma and papa!

J. W. Purdy, assistant division engineer, on the eve of being transferred to Zanesville, Ohio, February 11, decided it would be entirely too lonesome to live at that place all alone and took unto himself a wife, Miss Cora Gabriel of Cincinnati. The honeymoon was spent in Miami, Florida, from which place "Jim" was thoughtful enough to remember the "Bunch" with a case of oranges. We congratulate you, "Jim," and extend our sympathy to the bride, but wish you both a long and happy married life.

The accompanying picture is of our station at Hillsboro. In the insert are Conductor "Pat" Murphy, the "egg king," and Train Baggage-master West, both of the Hillsboro accommodation; Station Baggage-master Doggett.

Indiana Division

Correspondent, H. S. ADAMS, Chief Clerk to Superintendent

Seymour, Ind.

At our Safety Rally on February 8 a very interesting program was rendered at the Majestic Theatre, the following employees participating:

Misses Erma and Elma Stark, Mrs. R. L. Galleher, Miss Luella Brand, Miss Lillian Osterman, R. L. Galleher, N. R. Martin and Travis Spear.

After "Bulletin 70" had been shown at the Majestic, employees and their families enjoyed a dance in the Knights of Pythias Hall. About 1200 employees, their families and friends, attended the Rally.

C. E. Catt, formerly chief clerk to division accountant, and now located at Parkersburg in that position, was a visitor in the division office building recently renewing old acquaintances. Mr. Catt and his family had been called home on account of the death of his father-in-law. Our deepest sympathy is extended.

Cash McOsker, formerly chief transportation timekeeper, and now chief clerk to division accountant, Weston, W. Va., recently returned to Seymour, accompanied by his wife, to spend a holiday with his family and friends. We are glad he found time to drop in and shake hands with his old friends in the division office building.

Office of General Freight Agent, St. Louis, Mo.

Correspondent, FRANCIS PIGLOSKY

We have among us a fortune teller. Clairvoyant Farrar specializes on relating the "past," as he deems it unwise to mention the future, claiming it too black. He prefers telling fortunes of those living in the country and requests patrons not to watch his movements too closely as under his foot he keeps a card, upon which is written all the information.

Mr. Farrar: Haack, are you going to wear out your overcoat today?

Mr. Haack: No, I intend to wear it all winter.

We enjoyed the visit of the bowling team from the Freight Traffic Manager's Office, Cincinnati. After being met at the station Sunday morning, we advanced cautiously up the street in search of Mr. Turgeon and Mr. Bradley, who were part of the Reception Committee. Mr. Turgeon was easily located, and having in mind that Mr. Bradley's wife was out of town, it was unanimously decided to wait no longer. After breakfast a few moments were spent in getting better "acquainted," and at 10:30 the Match Game was played. We won.

Charles B. skinned Skinner for two. What can you do, "Tony"?

A. H. F. appreciates the assistance given by Miss Fox in securing the valuable business of one of the large firms in his territory.

Division Freight Representative C. W. Browder of Kansas City and District Freight Agent F. R. Stebbins of Dallas attended the Missouri Poultry and Egg Convention held here Monday and Tuesday of this week.

A blue velvet dress and a beautiful diamond ring made their appearance at this office within the last week. What's the answer?

East Dayton, Ohio

Correspondent, EDWARD MANNIX

With business affairs rapidly adjusting themselves, we can look forward to better times. Let's all work together, and our country will soon return to its normal condition.

It is inspiring to note how easy it is to secure business when we go after it in the right way. The right way is talk Baltimore and Ohio Railroad for traveling and shipment; and the argument is all on your side.

In an address before the Traffic Managers' Association of our city, Superintendent R. B. Mann presented the claim of our Railroad for traffic, and pointed out Dayton as a shipping point to all parts of the world. The interest manifested in his address will be a business getter—he left no point untouched.

Joseph A. Schiffgen, acting night roundhouse foreman, East Dayton, Ohio, has

been called to a higher station in railroad life, namely that of general foreman, Parkersburg, W. Va. This is another case where efficiency has been recognized. We regret to see "Joe" leave us, but, in an unselfish spirit, we congratulate Parkersburg on its selection. Our best wishes follow him.

About one of the most inspiring. Safety meetings ever held at Dayton was called to order by Superintendent R. B. Mann on March 8. The interest displayed by the members was surely inspiring.

Again, we must say that a look through our shops and roundhouse, our repair tracks and maintenance of way tracks, reflects great credit on our master mechanic, A. E. McMillan; our general foreman, W. A. Gilmore; our car foreman, Robert O'Neil, and section foreman, A. E. Cooper. Teamwork effects wonders.

Our Welfare Association will soon be formed. Soon we shall enjoy an old-fashioned dance, an up-to-date minstrel show, a basket picnic, a theatre party, and an old-fashioned banquet. Some doings ahead for our bunch. And then—that baseball team again.

The absence of scrap iron, couplers, and various other kinds of material from around East Dayton yards is due to the efforts of our genial section foreman, Allen Cooper.

The splendid appearance of the coal dock at East Dayton is accounted for by the daily inspection trip of General Foreman Gilmore, who also sees to it that the roundhouse tracks are kept in equally as good a condition.

General Yardmaster H. J. Voris has purchased a new pair of glasses. Boys, keep moving.

Our correspondent, Edward Mannix, makes a daily trip to East Dayton yard office to learn if the boys there have any unsafe condition to report.

Brakeman J. C. Smith, generally known as "Hoke," turned up a little later than usual one morning not long ago. Oh, no, he was not late for work; he usually reports three-quarters of an hour ahead of his crew, but on this particular morning he was just on time. Explain yourself, "Hoke."

Can You Beat This for a Home— A Home in the Springtime!

Perhaps you have always felt that you could not afford to buy a home. So also did A. W. Creeger, track foreman at Tiffin, Ohio, until 1907. Then he decided that he *must* have a home for his large and growing family, and the picture on this page shows the result of his wise decision.

Read Mr. Creeger's interesting story just as he sent it to us:

I entered the service of the Company in October, 1898, as a trackman. In June, 1901, I was promoted to track foreman and worked as such up to May, 1920, when, for a time, I was acting supervisor. I was married in 1899 and raised a family of 9 children, all living. I made application to the Relief Department for a loan and it was granted in October, 1907, to purchase my home. I paid out on this loan in 1915 and asked for another loan, which was granted; this to improve the house. You can see that I have had dealings with the Relief Department for a long time and I must say that the employees of the Baltimore and Ohio surely can feel grateful for the advantages the department offers to help a man acquire a homestead.

The names of the members of my family as shown in the picture are, reading from left to right, standing: Delphin A., Karl M., Thelma M., LaDora A.; seated, Hilda V., Loren M., Mrs. Alice V., myself and the youngest son, Allen W., on my lap; Gilbert H., Mary E.

THE ATTRACTIVE HOME AND FAMILY OF A. W. CREEGER, TRACK FOREMAN AT TIFFIN, OHIO

Can you imagine the charm and satisfaction which Mr. Creeger and his family find in their beautiful home, especially at this time of the year? Spacious grounds, beautiful flowers and trees, the delight of the home garden, and with fragrant fruit blossoms promising a bountiful harvest.

A prospect that any man might envy and a promise that you may some day turn into fulfillment.

We will tell you how if you will write today to
