Edward Hitzeberger, stenographer, office of J. P. O'Malley, assistant comptroller in charge of Revenue Accounts

Mr. Egerton has returned, we might say, to his "first love," that of training the young, having accepted a professorship at Calvert Hall College, to teach mathematics and the sciences.

While his friends regret the loss, it is hoped our loss is his gain, and our best wishes follow him for all success and happiness in his chosen work.

Office of Assistant Comptroller Deverell

Correspondent, JOHN RUPP

Some years ago, shortly after the introduction of the Illinois Central Railroad through that portion of Illinois known as "Egypt," an honest countryman, who lived some forty years or thereabout in blissful ignorance of everything pertaining to the "kers," was appointed station agent at Carterville, one of those little out-of-the-way places, where, as Dickens says, "no one could by any possibility want to get off or on." On receiving his instructions he was told, among other things, that as Carterville was merely a "flag station," trains would stop only when some one wished to get off or on; and that if he wanted to stop any train, he must "flag" it.

Shortly after his appointment, accordingly, as the "mail train" came thundering on, he placed the magic red flag in position—the signal to stop.

As the car drew up to the station, the conductor jumped off on the platform, with his accustomed "All aboard," and at the same time he asked: "Are there any passengers to get on?"

"Wa'al, not as I know of," was the puzzled agent's reply.

"Then what did you stop the train for?" shouted the irate conductor.

"I didn't know but some 'un might want to get off!" shouted the obliging "agent" in a conscious tone of injured innocence—*Anecdotes and Table Wit.*

To the book-keepers—"May they faithfully keep their books posted-well, and may their books keep them well-posted."

Our Own Employes

"They are linked together by the strongest ties, and as they travel over life's track to the grand terminus, they occasionally form a junction on the road for the purpose of exchanging friendship and good-will."

Picked Up At Random

"The original noise is what counts—most people are merely echoes."

"The ideas that benefit a man are seldom welcomed by him on first presentation."

"An ounce of performance is worth more than a pound of preaching."

"An executive: A man who can make quick decisions and is sometimes right."

"Nothing will ever be accomplished if all possible objections must be first overcome."

Correspondent, HOWARD D. BAKER

EDNA HYNDMAN went to JACOBS CREEK to visit Miss LAYTON, but she had moved to INDIAN CREEK. While on her way she tripped over OHIO PYLE and fell in the SAND PATCH. Mr. WILLIAMS, a CASSELMAN, picked her up and took her to DAWSON, receiving an EMBLEM for his deed, accompanied with a letter from VERSAILLES for him to report at BERLIN in the morning. After arriving there he found he did not have a FAIRCHANCE with EIGHTY-FOUR men. For fear that he could not BOSWELL enough, he returned to PAINT CREEK and rowed to POINTS MILLS. On his way he

ran into LITTLE FALLS which was near COOLVILLE, having to camp there all night the FROST fell heavily over this RICHLAND. After digging awhile, he found some CLAY with which to make FIRE BRICK. Then he took a BLACK FORK from his knapsack and began digging the ROSEBUD to help it BLOOM, but the FLOWER was dead for lack of water from the WELLS.

Correspondent, JOHN LIMPET

The second season of the office Bowling League was gotten under way on Tuesday night, September 20, at the Baltimore Bowling Alleys (Yearley's), with a field of six entries. The Bowling League proved such a success last year that two additional teams were formed. If the present season comes up to the past one in attendance, interest and good contests, there will be left nothing to desire. This, however, is up to each individual, and we are hoping that we go it one better.

Auditor Disbursements

Correspondent, JOHN C. SVEC

We wish to announce the marriage of our correspondence file clerk, Miss Reba M. Powell, to Joseph Weilert, a former clerk of this department but now with the Engineering Department. The wedding took place on July 20, at 6.00 p. m., at St. Martin's Catholic Church. The bride was attired in white satin and lace, with veil, and carried a shower bouquet. She had as her matron of honor, her sister, Mrs. Hamilton Thompson. Her bride's maid was Miss Verna Newton. The little flower girls were nieces of the bride and groom. The ushers were Messrs. C. C. Hawkins, Harry Deford, Raymond Deford, uncles of the bride and Edwin Snyder, a cousin of the bride. The best man was Joseph Hoenig. After a wedding trip to New York and up the Hudson they will reside at 3311 Piedmont Avenue, Walbrook. We extend our best wishes.

Another marriage which we wish to announce is that of Miss Eda Hood, clerk in this office, to Mr. Z. Stultz Boone, on Thursday, September 1, at Hamilton Presbyterian Church. Congratulations!

Cupid still seems to be working hard, as another of our young ladies continually gazes at her left hand and then smiles—Oh! the daintiest of smiles. We have your number, Gladys.

One of the young men of the Traffic Department seems quite interested in a fair young damsel of the Payroll Bureau. We wish him the best of luck. May he progress rapidly.

Walter Wilmer, assistant chief clerk to assistant auditor disbursements, recently made a fishing trip to the Patuxent River, where he spent a week with the parents of Miss R. M. Coster. He was accompanied by Assistant Foreign Freight Agent M. W. Pryor, and Miss Coster. From the "fish" stories told around the office they must have had a very enjoyable time.

Since the last issue of our MAGAZINE, our baseball team has kept up its good work, winning 3 out of 5 games, bringing our total wins to 7 out of the last 10 games played; moving from last to sixth place. Our players are playing wonderful ball, one of them, John Scheureman, having been given a tryout on September 18 by Manager Hoblitzell of the Reading team of the International League, at Oriole Park.

Mrs. H. Corkran, wife of our traveling disbursement auditor, is ill at the Women's Hospital. We are indeed sorry to hear of her illness and wish her a speedy recovery.

We are all glad to have our auditor disbursements back with us after an absence of three weeks because of sickness.

The body of Corporal Charles N. Foster, 115th Infantry, 29th Division, formerly a clerk in this office, who was killed in France on October 23, 1918, was buried from the residence of his parents, Mr. and Mrs. C. M. Foster, 2313 Harford Avenue, on Friday, September 9. A representation of seven men from the office acted as honorary pallbearers, the active pallbearers being a squad of soldiers from his Company. The Baltimore and Ohio Post, No. 81, of the American Legion, sent to the late home its customary tribute of flowers and flag.

P. HENRY STARKLAUF

Wedding Bells

Miss Mary Elizabeth Doyle, Local Settlement Bureau, was married to Joseph Kerafa on July 15 at St. Cecilia's Church, Walbrook, by the Rev. Eugene Gwynn. They will reside at Lorain, Ohio.

Miss Dorothy Thompson, Local Settlement Bureau, to William E. Thompson on July 27, by the Rev. F. C. Reynolds of St. Paul's M. P. Church. They will reside at Elmhurst, L. I., N. Y.

Miss Mildred Underwood, Machine Room, to Elmer Soper, on August 10, at St. Luke's P. E. Church, by the Rev. Harrison and Rev. O'Connor.

Miss Elizabeth Haggerty and Frank O. Kemp, both of Interline Settlement Bureau, on August 17, by the Rev. J. J. Dunn, pastor St. Pius' Church.

Miss Cora Brooks, Machine Room, to Fred H. Einwaechter, August 25, by the Rev. A. G. Schultz, of St. Paul's Evangelical Lutheran Church.

Best Wishes!

Mrs. Laura Gardner, mother of M. M. Gardner, Interline Settlement, and wife of C. R. Gardner, Riverside, departed this life on July 10. Interment was in Woodlawn Cemetery, July 12. Services were conducted by the Rev. William A. Melvin, Lowe Memorial M. P. Church.

Joseph B. Kenney, Statistical Bureau, died on Tuesday, August 2. Interment in Loudon Park Cemetery on August 4; services conducted by Kedron Lodge and the Rev. Gillam. Prior to Mr. Kenney's coming to this office, he was for many years allied with the Company's interests at Locust Point. He was in his 60th year and a member of Kedron Lodge, the Baltimore and Ohio Veterans' Association, Jr. O. U. A. M. and the Royal Arcanum. He was a son of the late police captain of Baltimore.

Harry J. J. Stamm, Interline Settlement, died suddenly on Sunday, August 7; services were conducted at his home and at St. Elizabeth's Church on August 11, by the Pastor, Rev. John Murray. Interment was in Holy Redeemer Cemetery. The active pallbearers were boy friends in the neighborhood. Honorary pallbearers from the Interline Settlement Bureau were the Messrs. Lindner, Donoho, M. M. Gardner, Carrigan, Mullinix, McGuire and Stanley Wolf.

The families have our condolences.

Recent arrivals—Girls to F. E. Eidman, Ed. Napfel; Boy to "Tom" Hess. Congratulations!

One of our attractive young ladies went to the seashore for the vacation period, but the magnetic power of a certain young man brought her back to Baltimore, much in advance of her stated time. What were the wild waves saying, Mabel? (How Cunning?)

We have in our midst the cutest little boy (in years) six feet two inches in height, who comes to work the other morning with a bundle under his arm—a real trophy, a silver loving cup. "Bobbie" was a successful contestant in one of the Eastern States Regatta canoe races. "Atta Boy, Bobbie!" Quite evident you can "paddle your own canoe."

Auditor Passenger Receipts

Correspondent, G. FRED MILLER
Secretary to Auditor

Don't forget we are still out for business. Keep the stock on the upward trend. It's quite easy to remember a thing for a day or two, but we all have a tendency to forget as the days pass into weeks, and so on. This should not be a case of forgetfulness; it is a good example of "As we sow, so shall we reap." Work hard, get the business and then more business, and we will learn to appreciate our positions, and derive more interest from our various duties.

New York Terminals

Pier 22, North River, N. Y.

Correspondent, FRANK A. J. MANTHEY

The accompanying photographs are of employees at Pier 22, North River, N. Y. In the picture of the five girls, we have, left to right: Catherine Zoener; Anna Marshall; Mae Caffrey; Louise Bowne; Eleanor McDermott. In the other group are: Anna Marshall; Louise Bowne; Benjamin Jordan; Catherine Zoener; Eleanor McDermott; Margaret Cronin.

The Meaning of Normalcy

During a period of normalcy wages and living costs equal up against each other. When salaries are increased sharply, as they were in war days, it necessitates increases in the prices of commodities. Hence, during this time of business reconstruction and lower living costs, it is but fair to assume, in order that normal conditions may be restored, that salaries will have to be cut. Manufacturers are experiencing great difficulties in securing the necessary buyers to purchase their goods and are offering their products at greatly reduced prices in order to induce buying, and as more than half of the cost of production is labor it is necessary to reduce salaries to such an extent as to equalize the reduction in the sale price.

When readjustment and reconstruction bring about the hoped-for normal period, we all will enjoy better than pre-war conditions, and complete satisfaction and happiness, and not until then.

Employees at Pier 22, North River, N. Y.

Miss Eleanor McDermott has returned to the office after an extended vacation of several weeks, in order to recuperate. We hope she has recovered lost strength.

Staten Island Lines

Correspondent, G. J. GOOLIC

It is pleasing to note that the work which has been done on the Staten Island Rapid Transit during the present summer is being noticed by the general public, and that many favorable comments and compliments have been given.

During the war, because of the scarcity of men, the Company discontinued the practice of taking care of their parks at the station grounds. This practice was resumed during the present season, and under the efficient guidance of "Jim" Conway, the parks have already taken on their old time appearance; this particularly applies to the grounds at New Dorp, Clifton, Snug Harbor and Livingston.

On the Staten Island Rapid Transit there is approximately three and one half miles of elevated station platform. It can be readily appreciated that the upkeep of these structures is no small task, and one

Building Perth Amboy Ferry Bridge

that requires considerable attention. During the present working season, quite extensive renewals and repairs have been made to the platforms, now beginning to show the results of this work.

During the year 1920, our 328 daily passenger trains hauled approximately thirteen million passengers without train accident.

Among the principal improvements to be noted on the Staten Island Rapid Transit during the present year, are, extensive renewals to Pier 22, North River; Lighterage Pier 1, 3 and 4, St. George; rebuilding pontoon at 26th Street and pontoon at Transfer Bridge No. 1, St. George; also the laying of four and one-half miles of heavier rail. St. George and Arlington Yards are being thoroughly overhauled, and Cranford Junction Yard has been completely re-tied. On October 1, the contractor will start the filling of one and three-quarter million yards of material, which will eventually become a part of the completed yard and the new shop.

Enclosed is picture of Maintenance of Way carpenters completing building of Perth Amboy Ferry Bridge. This bridge was put in service September 26 at high tide. The work was started at 2.35 a. m. At 3.00 a. m. the old bridge was floated out of the slip. At 3.43 a. m. the new bridge was on its rockers. At 4.18 the weights had been adjusted and at 4.51 a. m. the first truck was allowed to pass over.

C. Donald Zephir, 19 months old

Car Accountant's Office, Force St. George

Descriptions of our office force I'll give as plainly as I can, Perhaps a few will be right cross, But—and I laugh—there is no ban On setting forth in pun and joke Some observations of my friends, Who as they toil in Labor's yoke Must laugh with me, e'er the work day ends.

Comes first of all, the captain bold, One William Ivers, of ancient fame, He keeps stern watch o'er all the fold— Now in good humor, now aflame. Across from him, his able aid, A man named Campbell, keen of brain, A roving eye, a voice low laid, Does not belie his Scottish strain.

Now comes O'Regan, tall and hard, With ready wit, like clowns you've seen, From office work he should be barred To take a job on stage or screen. Right near him sits a clever lad, With bristling hair, pugnacious face, Who, though he's never really bad, Looks like a chief of a savage race.

On t'other side, across the aisle, Miss Vetter and Miss O'Mara sit, They talk about the latest style, Of how to make a Broadway hit. Across from me, a likely chap, With first name's George; I truly think He draws his face up like a map Whene'er his right eye he would wink.

A happy soul is Miss Perrone, (We always like a jolly girl) Who as a typist holds her own, But stops to fix her one pet curl. Now I trust that you folks named above Have shared these verses all in fun, I herewith send you all my love, I mean no harm to anyone.

Canton has again been kept very busy by a number of oil steamers docked there.

Road Foreman of Engines "Uncle Joe" Cannon, went on a vacation to North Beach. Evidently the sun wasn't as hot this year as last.

Chief Clerk Frank Taylor and his family

"Chevroletting" seems to be a new sport of the stenographers. Miss Comra has just bought a brand new one, and has been practicing to see how close she can run on the edge of a bridge without going over. She missed one calculation, for it had a rail, and naturally she tore it away, stating it was of no use anyway. Outside of bent mud guards and jarred equilibrium, she proceeded on her way, nervous of course, but ready for another. She wants to borrow a suit of womanalls from the janitrix in case she might have to get out and get under.

Our worthy general foreman, Ralph Cline, forgets that he is not at home sometimes, and calls us girls "Honey." He is a newlywed.

Messenger Burns is coming right out into society now. He goes to Carlin's and they go "wild, simply wild over him." Ask

Frank and Robert Tunney

Horse racing is the sport of kings, they say, but "Bernie" will be a book maker some of these days. He has a nickel left after each pay day.

About a month or two ago one of our tender repairmen helpers was out riding in his two wheel automobile. All went along peacefully until he was struck by a Ford, and gossip around the shop reports that his legs were broken, his stomach was crushed in, and he was in a very critical condition. He is back to work now, and we expected to see his legs shorter, after having been broken, but when Harry came back, he wasn't shorter at all, for he had to go home and have a 12 inch piece sewed in the legs of his overalls, and then they were a little too short. His stomach being crushed in didn't affect Harry much, for he brings his lunch in two bundles now.

The stork paid a visit to Emory Skipper's house, and left a baby boy. Baby must have a very sunny disposition, for Daddy is never late for work, and he comes all the way from another city—Westport.

The accompanying picture is of our worthy Chief Clerk Frank Taylor, Stores Department, and his family. No wonder he is puffed up, he has a cause to be for there's

Locust Point Yard Employees in 1908

his young wife and baby girl, a dimpled darling. Get your hands out of your pockets, Frank, and stick your thumbs into your vest; you have a reason for doing it.

The accompanying picture was taken at Locust Point Yard in 1908: left to right, sitting—W. E. Snack, M. Sellman, A. H. Blackburn (now Trainmaster at Locust Point). Standing are J. J. Link, C. Anderson, A. Dowling, T. Burgee and C. Buckman.

Swimming days for yard clerks, Locust Point, in Devil's Buckets are now o'er, and we are wondering what they will resort to now, or whence cometh the next raft to replace the old bath tub.

The accompanying pictures are of Robert, age 3, and Frank, Jr., age 2, attractive children of Chief Clerk Tunney, Locust Point Car Foreman's Office.

F. H. Carter, assistant chief clerk in superintendent's office, has been endeavoring to buy a gun. Anyone having a "Busy Bertha" kindly notify "Nick."

Baltimore Division

Correspondent, W. H. TARR, Superintendent's Office, Camden Station

The regular divisional meeting of the Safety Committee was held at Riverside Y. M. C. A. on September 19. Superintendent E. G. Hoskins, chairman, presided. We also had with us J. T. Broderick, superintendent of Safety, William D. Lenderking and W. F. Braden, Safety agents.

We are glad to learn that Conductor George G. James is out of the hospital and has been getting along very well. Mr. James was injured in a derailment at Elk Mills on July 14.

Your correspondent spent a week of his vacation during the latter part of September among the hills of West Virginia, and while there paid a visit to Superintendent C. B. Gorsuch, Wheeling, W. Va.; he also made the acquaintance of a number of his staff and personal office force. Mr. Gorsuch extended a cordial welcome and wished to be remembered to his former acquaintances on the Baltimore Division.

Effective 12.01 p. m., September 19, the Interlocking Block Office and Interlocking Plant at Reels Mills were discontinued and the block extended between Monrovia and Frederick Junction.

Your correspondent, in traveling over the Road, noted the excellence of the service and equipment as compared with that of a competitive line; and while traffic has not been what it was in former times, there seemed to be a steady movement from the Connellsville region.

"The 20th Century Limited"

There's a Hamilton Watch in the Locomotive

Thomas Loftus, the engineer of the 20th Century Limited, carries a Hamilton Watch. There's no need of telling you why he carries it. You can get the same kind of a Hamilton Watch at your jeweler's, and have just as accurate time as Loftus has, for all Hamiltons are alike as far as high standards of timekeeping are concerned.

The Hamilton is carried by more railroad men than any other watch, because railroad men know the Hamilton can be depended

on, under all possible conditions, to give them accurate time.

Your jeweler will be glad to show you Hamilton Watches. He has them at prices beginning at \$22 (\$25 in Canada) for a movement alone, and running up by easy stages to \$200 for the Hamilton Masterpiece in an extra heavy 18k gold case. Every watch is guaranteed to give satisfaction. For time inspection service, the most popular watch on American railroads is the Hamilton No. 992 (16 size—21 jewels).

Write today for the Hamilton Watch Book—"The Timekeeper." It pictures and describes the various Hamilton models, with their prices. Also other interesting watch information that makes it especially valuable to railroad men.

HAMILTON WATCH COMPANY, Lancaster, Pennsylvania

Hamilton Watch

"The Railroad Timekeeper of America"

Brakeman and Mrs. Stone, (centre) entertain Baltimore and Ohio folks at their dahlia gardens. Left to right: Engineer and Mrs. George W. Wendal, Washington Terminal, Miss E. Schleisner, Miss E. Timmerman and W. H. Tarr, superintendent's office, Baltimore, Dr. Hunter, Washington Terminal, and J. M. Strevig, Vice President's office. The children are Vera and Edward Wendal, Anna Hunter and Edward Phillips. In the picture on the left are: Mr. and Mrs. Stone, Mrs. J. D. Simmering, Hugh Phillips, Mrs. Phillips, Mrs. Strevig, Mrs. Tarr, Evelyn Wendal, Mrs. J. W. De Paschal, Cecelia Pierce

Engineer R. M. Bowman, West End, who served in the Canadian Army during the War, is in the receipt of the following for distinguished service:

"Canada"

DEPARTMENT OF MILITIA AND DEFENCE

OTTAWA, April 1, 1921.

From—

The Adjutant-General,
Canadian Militia.

To—

R. M. BOWMAN, Esq., M. M.,
1325 West Fayette Street,
Baltimore, Md., U. S. A.

Military Medal—

3032896—Pte. R. M. Bowman, M. M.

Sir—I have the honour by direction to enclose herewith Military Medal which His Majesty, The King, has been pleased to award you for bravery in the Field.

The Honourable, The Minister, desires me to extend his congratulations upon the honour thus conferred and the gallant action for which you were commended.

Please acknowledge receipt.

I have the honour to be,

Sir,

Your obedient servant,

(Signed) CLYDE S. SCOTT, Major.

For Lt.-Colonel,
Director of Records,
for Adjutant-General.

Mr. Bowman at the time of his enlistment was an assistant to the road foreman of engines on the West End. He first endeavored to enlist in the American Army, but was rejected. He was in the drives at Amiens, Arras and Cambay, where he distinguished himself and won the medal for bravery. In these drives, 90 per cent. of those engaged were killed and disabled but Mr. Bowman survived, receiving some shrapnel wounds. He was nine times in the first wave; it is remarkable that he came out with such few injuries. We would like very much to have reproduced the medal in these columns.

We regret to announce the death of Brakeman C. R. Schmidt on September 1. Mr. Schmidt has been in the service since July 14, 1909.

Miss Emma Schleisner and Miss May Schammel spent a week of their vacation in August on a trip up the St. Lawrence River. They took a number of photographs which we enjoyed seeing.

J. J. Swartzback, chief dispatcher, took in a trip to Montreal, Canada, during his vacation.

We are glad to have back with us File Clerk Harry Fox, who has been absent from his duties because of several month's sickness.

Business has picked up sufficiently on the East End to reestablish two freight crews; several of the furloughed brakemen also have been called back to duty.

Brakeman W. J. Krauch, East End, died on August 15 after several month's sickness.

The accompanying photograph is of the engineering force, Division Engineer's Office, West End, at Camden Station. They are T. H. Gorden, assistant engineer; Miss Esther E. Auld, clerk to assistant engineer; J. G. Collinson, transitman; W. A. Parker, rodman; and C. N. Byrn, chainman.

Brakeman and Mrs. W. H. Stone, whose home is in Gaithersburg, Md., have a dahlia farm that has attracted considerable attention. Each week end, while the dahlias were in bloom, found crowds of visitors from miles around. On Sunday, October 11, a party of Baltimore and Ohio folks spent the afternoon there, admiring the many handsome varieties of these flowers.

Mr. Stone makes quite a business of his dahlia raising, but he is glad to share his knowledge with his Baltimore and Ohio friends. As a proof of this, he has sent us a

Earl Jr., 10 months old son of assistant chief clerk E. L. Mallery

nice little article for the MAGAZINE which we expect to publish in an early spring issue. The accompanying pictures show Mr. and Mrs. Stone and a group of Baltimore and Ohio folks.

Brunswick

Correspondent R. L. MUCH, Conductor

Labor Day Celebration

The Labor Day celebration at Brunswick was a great success. After the parade, headed by Chief Marshall J. F. Kidwell, the Improved Order of Red Men, under the personal direction of "Big Chief" Amos Haller, the popular Baltimore and Ohio Engineer, and Chief Watts, gave the home folks a real Wild West Show.

A typical frontier scene was enacted. The main actors in this scene were Conductor R. L. Much, his wife, and Master Stanley Funk. After having their cabin destroyed they were taken before "Big Chief" Haller, by a roving band of "Red Skins." He ordered them tied to the stake. After the customary scalp dance, a battle royal ensued between the "Red Skins" and a rescuing band of "Cowboys" headed by Jim Eurey, in which the captives escaped.

Mr. Haller deserved great credit for the success of the show, which was witnessed by two thousand people.

A fine chicken supper was served in the evening by the ever willing ladies of Brunswick, who are anxious to secure for their town a fire truck, an appliance which they are so sorely in need of.

Brunswick is a growing town, built up by employes of the old "Billy O" and has one of the finest bands in the state under the leadership of Prof. Levi Lucas. A well organized company of "Rough Riders" is in progress under the direction of ex-service men and members of the Red Men, nearly all of whom are Baltimore and Ohio men.

Washington D. C. Freight Station

Correspondent, W. L. WHITING, Chief Clerk

We are once more approaching one of the busiest months in the year. Already the air is filled with the idea of big business, and our platforms are being well filled with both incoming and outgoing freight. The automobile platforms are also kept full of incoming "busses" of all sorts, shapes and sizes, from the high priced Locomobiles and Marmons to the latest product of the Ford factories. With Congress in full session again, and likely to stay here until the regular session opens in December, and the coming Limitation of Armament Convention, Washington, D. C. may well expect to be a busy city for some months to come. The railroads are doing their share of preparation for the influx of visitors. Coming, as they will, from all parts of the world, the good old Baltimore and Ohio will come in for its share of both passenger and freight traffic. It is up to us in the railroad service to be prepared for whatever may come our way. We have had our rest time; we must now think of our duty.

We recently received word by the "little bird" route, of the marriage of Frank M. Hanshumaker, one of J. K. Graham's boys.

"Owen" Moore never saw Mary Pickford but oh, how he likes the movies!

As we had Frank with us two or three years ago for so long a time, we feel that he is one of us. Our heartiest congratulations are extended to both himself and his bride, with our very best wishes for a long, happy life. Frank became a great favorite during the time he was here, and when he occasionally drops in to see us, he is always sure of a glad welcome.

About a year ago we reported the wedding of "Johnny" B. Everson, and Emma Shafer, both employes at this Station. Today it is a pleasure to add that the stork, in his wanderings over the city, dropped a great big bouncing boy down the chimney of their home. We congratulate them heartily, and wish them many "happy returns."

When we know of a good thing, especially in connection with the Baltimore and Ohio Railroad, it is our duty to push it along, no matter how many pushes it may have received before. The writer had occasion lately to go to New York City on Train No. 504, and while on the train took advantage of the Baltimore and Ohio Dining Car Service and enjoyed a "Special Baltimore and Ohio Lunch." Not only is the lunch sufficient to satisfy the hunger of the most starving "Wandering Willie" on the road; but the attention and service given to patrons by the steward and his corps of waiters is a most pleasing feature. Let me say that H. R. Mass, steward on the train, seems to make it his personal affair that everyone in the diner receives the most cordial attention; and well he succeeds in his task. It is a pleasure to meet such people, especially so when you know that they are your fellow employes, and are all working towards the good of the Baltimore and Ohio. Across the aisle from the writer there sat two gentlemen who were also loud in their praises of the service and everything in connection with it. They were not railroad men, either, but men who are in the habit of eating meals on railroad diners, and their comparisons of the various services they had encountered were very pleasing to a Baltimore and Ohio employee.

Your correspondent spent a couple of days in New England, visiting old friends in Bridgeport and West Haven, Conn.

Delivery clerk W. D. Kight is spending a few weeks on the Pacific Coast, and stopping over at various points of interest on the trip.

Miss Katherine Gerhardt spent a restful vacation around her home at Mt. Rainier, Md., and returned feeling better for her rest. Miss Gladys Beall enjoyed the mountain air and fine scenery at Pen-Mar; we who have visited that healthful spot know that she chose a delightful place.

Yard Delivery Clerk F. W. Harrison, took his family down the historic Potomac River to Norfolk, Newport News, Ocean View and other resorts overlooking the Atlantic Ocean.

Tallyman E. J. Quinn and his family spent a few days at the ever popular Niagara Falls. They returned with the usual inspiration.

C. Vernon Kilmer, of the clerical force at Cumbo, and Miss Anna M. Kline were married in Winchester, Va. The young newlyweds returned to Martinsburg immediately after the ceremony and were given a wedding supper at the home of the groom. They took a wedding trip to Newport News, Portsmouth and Richmond.

Roger W. Wall, a Veteran Baltimore and Ohio conductor, died very suddenly at his home, 220 East Burke Street, of acute indigestion. Conductor Wall, while only 54 years old, had served the Baltimore and Ohio for 36 years. He died in active service having just come from his run on the Cumberland-Martinsburg local freight a few hours before his death. Mr. Wall was born in Piedmont, W. Va., but came to Martinsburg when a young man and spent the remainder of his life here. He is survived by a widow and seven children. The funeral services were held at the late home and were attended by a large number of

DIAMONDS

For a Few Cents a Day

Send No Money
We will send you—upon your simple request—your choice of diamond bargains—the greatest in America! Do not send a penny in advance. When the ring comes, examine it. You are the judge. If it is not, without exception, the greatest value you have ever seen, send it back—at our expense! If you decide to keep it, it is yours—for a few cents a day. You may order direct from this advertisement if you wish. Don't send a cent. You do not risk a penny.

Charge-Account Plan
By our new charge-account plan, you may pay for your choice of hundreds of pieces of exquisite jewelry in sums so small that you would never think of saving them. You are also guaranteed 8 percent yearly dividend—and a 5 percent bonus may be earned.

Send for Bargain Book
Send your name and address today for our new 128 page book, showing hundreds of unmatched diamond bargains. Sent absolutely free. It explains the dividend offer and bonus plan. Write today to Dept. 8017

J. M. LYON & CO.

1 Maiden Lane, New York N.Y.

J. W. Imler recently left the service with the best wishes of his associates, and a beautiful watch, their gift

friends of the deceased. The pallbearers were fellow trainmen and division officials: Trainmaster E. C. Groves of Cumberland, Road Foreman of Engines C. H. Norris, B. Shipley, G. A. Martin, L. E. Whisner and W. Richard.

The session of the United Brethern Conference held recently at Dayton, Va., robbed the railroad men of this vicinity of a loyal and long time friend, by transferring Dr. W. F. Gruver from the First U. B. Church at Martinsburg to Harrisonburg, Va. During his 21 years pastorate at Martinsburg, Dr. Gruver won the respect and friendship of the Baltimore and Ohio men by his untiring efforts in their behalf and by being a "man among men." He always joined us in our festivities and was ever ready with sympathy, encouragement and service in the sadder moments of a railroad man's life. He has always been interested in our railroad and was ever ready to lend his influence and support in any movement put forward by the Baltimore and Ohio for the betterment of its men. Dr. Gruver was personally acquainted with all the Railroad men about Martinsburg, many of whom were his personal friends, and quite a number have been won to a Christian life by his prayers and teachings, some of these becoming prominent and influential members of his church. The transfer is decidedly unpopular with the Railroad boys, but they are big enough to acknowledge that "their loss is another's gain" and with the right hand of fellowship to bid the good Doctor, "God-speed," and wish him a long and successful career in his new field of endeavor.

Pittsburgh Division

Correspondents

ELMER H. STOLTZ, *Pittsburgh Freight Station*
Frank X. Jarvis

Frank X. Jarvis, an old and respected citizen of Kane, Pa., and for 25 years conductor on the Kane-Foxburg run, died at his home at 301 Haines Street, Kane. Mr. Jarvis had been ailing for several months, and in spite of the best medical attention, it had been impossible for him to fully regain his health.

Mr. Jarvis was born on April 21, 1867. During his railroad career he made many friends, who will be grieved to learn of his death, and the community of Kane will be lacking in one of its most worthy residents. Besides his wife and mother, the following children survive him: Mrs. O'Keen, Baldoa, Panama; Mary Jarvis, Pittsburgh; Aubrey, of Grafton, W. Va.; Harold, Lillian, Constance and Dolores, at home. There are also a number of sisters and brothers.

J. W. Imler, district baggage agent, Pittsburgh, recently resigned his position to accept service with the Milk Dealers'

Miss Theresa Gannon, stenographer to chief of Revision Bureau, Pittsburgh Freight Station

Association, Pittsburgh, in the capacity of General Manager. On April 15, the employees of the Station Master's Office and the Dining Car Department, to show the esteem in which they held Mr. Imler, presented him with a watch. The accompanying photograph shows Stationmaster Drake making the presentation speech, surrounded by an interesting group of listeners.

Allegheny

Saturday, July 30, closed the long and faithful career of John G. Voltz, 35 years in

the service. During that time he was off duty six days on an automobile trip to Washington, the only vacation he enjoyed during his long service. On this day the shopmen assembled in front of car men's building where a gold watch was presented Mr. Voltz, accompanied by a little talk by Car Foreman W. M. Snider. General Foreman H. J. Meinert then handed to Mr. Voltz a mailgram, expressing the good wishes and appreciation of the Company as follows:

"I wish to extend my hearty thanks to you for your hearty cooperation and 100 per cent. workmanship given to the Baltimore and Ohio Railroad during the past 35 years, three years of this time being under my general supervision; therefore I congratulate you, Mr. Voltz, on your faithful service record. We hope that the pension given you will be enjoyed by you for many days to come as it can be well said of you, 'Well done, thou good and faithful servant.'"

After all had been said and done, a Limousine was furnished Mr. Voltz and he was conveyed to his home.

Glenwood Shops

Correspondents

FRANK RUSH, *Shop clerk*

MARY A. BREEN, *stenographer to Master Mechanic*

J. J. Smith, formerly of Mt. Clare Shops, has been transferred to Glenwood as general foreman, vice J. L. Bowser, assigned to other duties. We wish both of them success in their new position.

Born to Work Checker and Mrs. J. P. Cassidy, a bouncing baby. We're waiting for smokes, "Joe."

Well, Gettle, how about the lumber business?

Miss Passmore has again returned to the office of Superintendent of Shops after taking position in Master Mechanic's Office some time ago.

P. W. Murphy has been in charge of the spring gang, Glenwood Back Shops. We wish him success in his new position.

Mr. McCabe, Notary Public, says that it is easier work being a notary than running a bolt machine. How about it, "Mac"?

Conrad Deabner entered our service at Glenwood as coppersmith, August 2, 1884. He was promoted to machinist on September 1, 1907, which position he held until several days ago when he was pensioned. While we miss his smiling face about the shops, we hope that he will enjoy himself during the rest of his life.

Superintendent Howe has just returned from his vacation and looks as though he enjoyed himself very much while away. We were all glad to see his smiling face back on the job again.

John G. Voltz (left center, front) also received a gold watch from his associates in Pittsburgh on the occasion of his recent retirement on pension

EFFICIENT STAFF OF STATIONMASTER W. A. MITCHELL, GRAFTON, W. VA.

Monongah Division

Correspondents

C. B. BAKER, Grafton W. Va.

VERNON A. LYON, Assistant Ticket Agent,
Clarksburg, W. Va.

Every effort is being made on the Monongah Division to prevent any material being scrapped or thrown away until it has become entirely unfit for further use. In line with this policy, on August 29 the division engineer held what was probably the most unique staff meeting in the history of the division. All supervisors were notified to report at Grafton at 7.00 a. m. in "fatigue clothes." They were then taken to the Maintenance of Way reclamation yard, and spent the day assorting angle bars, bolts, spikes and other maintenance of way material, which had been loaded on the monthly supply train as scrap. The meeting resulted

not only in several pairs of blistered hands and an equal number of sore backs, but in the reclamation of several hundred dollars of worth of usable material, and forcibly impressed upon the minds of the supervisors the importance of properly sorting material at the scrap bins before loading on the supply train.

The Monongah Division is justly proud of her record during the first seven months of 1921 in the matter of casualties to persons. She ranks second among the divisions of the System, having made a reduction of 36 per cent. as compared with the figures for the same period of 1920.

The accompanying pictures are of the efficient staff of Stationmaster W. A. Mitchell. They are: Miss Merle Costello, platform cleaner; Floyd Stokes, station porter; John Ellington (right) and Fred Bailey (left), baggagemaster and helper.

The little student of nature in the accompanying picture is Frederick, the two year old son of Machinist I. A. Peters and nephew of Storeroom Foreman C. W.

Robert Richards Jones

Barnes. Judging by Frederick's earnest expression we, no doubt, see before us a future Burbank. His protector and body guard is "Billy," a member of the family of C. W. Barnes.

Frederick Peters, 2 years old

What do you think of this good natured little bread winner? He surely is a winner and the bread is there too. He is Robert Richard, son of Carpenter and Mrs. J. R. Jones, and grandson of Uncle John Wittman.

David R. Barrett

CELEBRITIES OF THE CHARLESTON DIVISION

1. L. A. Tesky, the "Wirelessman" 2. Chief Clerk Houghton and Wreckmaster Shoemaker. 3. Conductor J. R. Cox. 4. Engineers S. L. Rodebaugh and P. W. Toms. 5. Chief Dispatcher Staples and Trick Dispatcher Baker

shop yard engineer. We can't say whether "Bob Dick" will become as famous a baseball catcher as his father, but we *know* that with those laughing eyes and that smile, he will be a *heart* catcher.

On the preceding page is a picture of David R. Barrett, a Veteran employe of Grafton. Mr. Barrett is considered an expert on the motive power of the Baltimore and Ohio.

Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent*, Weston, W. Va.

Dear Folks:

Some of you have been jumping on your correspondent pretty hard for the past couple of months because you have not seen your names in the MAGAZINE. It's not his fault. You all realize the conditions which have existed on account of trouble in the printing trade, and it is for this reason that our good friend the editor has been compelled to draw a big blue pencil through all the notes we have sent him from here.

Did you know we had a "No-Accident Campaign" on the System? The final figures are not out yet, but we hope that the Charleston Division has shown up in first place, as it has done in all other campaigns of a similar nature. Our total damages through accidents during the 30 day period amounted to slightly less than \$400.00, as compared with an average of some \$1,800.00 per month for the first six months of the year. While the actual campaign is over, the necessity for avoiding accidents is NOT, and we hope that every 30 days to come will continue to be a "No-Accident" Campaign" month, with the result that accidents will be unknown on this division. Every \$100 we save from this cause, as the general manager says, means \$100 in the treasury for some constructive work, or in other words means \$100 saved to pay in wages and give some fellow a job. THINK ABOUT IT, read the figures again and see what they really mean.

I hear that Trix McDermott had quite a nice vacation. She went to Philadelphia, and judging from appearances, we guess she

spent most of her time in Gimbel's and Wanamaker's. Viola Hickman spent her holiday in Atlantic City. Ask her to tell you how much a day it costs at the Traymore. We told you about Mrs. Schide having to go to the hospital at Clarksburg; well, we are glad she is able to be back home now, and is getting along very nicely.

Do you know that a foreign car costs our Company \$1.00 per day every day it's on our line? It does not take many days at this rate for half a dozen cars to pay a man's salary. Get after the foreign cars, and drive them off our line quick. It all helps to keep some one at work.

Our old friend "Bill" Severns and his wife left on a vacation trip the other day. First time "Bill" has had a vacation in history. We doubt if he will know how to behave himself, and expect he will spend all his salary in long distance telephoning to find out if the office is still standing in the same old place. We recommend to his wife that she take him beyond the reach of 'phones, telegraph wires, etc.

The FUEL bill on the Charleston Division alone last year amounted to \$450,870.00. Twelve cents out of every dollar the Company makes goes into fuel. If we can make this ten cents, it would be SOME saving. Will you do your share?

The advance August MAGAZINE just came in, and on the inside of the cover we note a little item submitted by Inspector Thompson of the Telegraph Department. This reminds us that a few days ago, we had the pleasure of a visit from Mr. Thompson and Mr. Allman. They brought along with them our old friend, W. C. Donnelly, who was carrying with him several clocks and watches. Their trip must have been an interesting one. Mr. Donnelly had three breakfasts, while friend Thompson spent a good portion of his time on the Charleston Division gettin a hair cut. Mr. Allman was apparently the caretaker of the party. After several warnings as to future conduct from us, he finally shepherded his bunch safely back to their own feeding ground.

The THINK AND ACT drive to prevent claims and reduce the waste from this

source is in full swing. We are getting results. Last year the payments from this source alone amounted to about \$4,000,000. SOME money! It didn't do any of us any good, and if we could save some of it, it would mean more money to pay wages and keep men at work. LET'S DO IT. WE CAN.

Dovie Justice has left us for a month. She said she was going to Baltimore and HALO for her vacation. No one has seen or heard of her since she left, but we hope for the best. The chief of police of Baltimore was notified by her friends to be on the lookout and see that she did not get into trouble. Having never seen a town much bigger than Burnsville, we are somewhat anxious.

"Superintendent's office, Schide speaking." Do you know of anything more important than courtesy? Ask W. H. S. He will give you a few lessons in how to do it RIGHT. "'Tis the voice with the smile that wins."

"Pick" and his family spent their vacation down on the farm on the Ohio River. "Pick" dug potatoes and stole apples. Ask him!

John Staples is going away pretty soon for his annual rest. We understand John has decided not to take in Canada this year, but will rusticate in Virginia, best state in the Union. By the way, Major Brooke just returned from a visit to his home in the same state.

What are you doing for Safety? Something every day, we hope. The Charleston Division committee is very much on the job. At the last meeting our friends Fleda Feagans and Bernice Borneman completed their terms, and were replaced by Margaret Patton and Madge Hinzman; that reminds us that Madge is on her vacation just now. We miss her smiling "voice" on the telephone, when we have to call up the shops, but we hope she won't get lost up the Pickens Branch as she did last year. In passing, we might add that the attraction between the Maintenance of Way and the shop is still as great as ever.

McOsker's feeling pretty good after a couple of weeks fishing on the banks of the Wabash, somewhere up near Seymour, Ind.

C. J. Fellows dropped in to see us yesterday. He is always a welcome visitor. When he left he took away several foreign box cars in his pocket and thereby saved the Charleston Division several dollars per diem charges. Come again, boss!

Now, my good friends, the editor has limited me to four pages and I am getting

Car Distributor C. W. Dixon, doing some heavy thinking for the good of the Charleston Division

down near the bottom of the fourth. I will write again shortly. Meantime, THINK ABOUT some of the little items mentioned in my letter, and see what you can do to help the cause along. Be courteous, be optimistic, and above all be SAFE.

Give my regards to all the folks, and let me hear from you often. News from various points on the division is always appreciated, but for one who sticks in Weston it is sometimes hard to get.

Yours sincerely,
The Correspondent.

In our "Art Gallery" this month, note our wireless man. L. A. Tesky, well known for his "Alibis that he has no wire to Gas-saway." Then Conductor J. R. Cox, "Fisherman Jimmie," who has been in the service many years, is well known to the travelling public and is a general favorite. Next the two heavyweights: Engineers S. L. Rodebaugh, and P. W. Toms, both of them old timers and real engineers, with excellent records for good service. Can you guess the combined weight? It is stated, although we do not of course vouch for the truth of the statement, that when they get pulling a double header the dispatcher has to figure on one car less on the train because of excess tonnage.

Chief Dispatcher John T. Staples and Trick Dispatcher C. M. Baker, who are shown strolling down a shady lane need no introduction, and anything good we can say about them would be superfluous.

Chief Clerk Houghton, Freight Office, Weston, and Wreckmaster R. D. Shoemaker are also well known figures in Weston everyday life. The worst we wish R. D. is that he may earn his salary without having to turn a wheel with his train.

It is our desire to show you every month one of the division officers. This time without his knowledge we have secured Charles W. Dixon, car distributor. He is popular with all the operators on the Division, but perhaps not quite so popular when his car supply is down to 10 per cent. and he tries to figure by closing his eyes and making a blind stab, as to which of 8 or 10 mines he will give his only coaler to.

Mr. Dixon has seen long service with the Baltimore and Ohio. He declines to say when he was born or where, undoubtedly through a natural sense of modesty. He first entered the service as a messenger in Newark in 1902, serving as clerk, helper, yardmaster, assistant trainmaster, night yardmaster, and in 1916 was appointed general yardmaster at Holloway. In 1918 he left the service temporarily, returning to us as car distributor, Charleston Division, in 1919. This post he fills to the entire satisfaction of his superiors and the public. Of a naturally sunny disposition, diplomatic by nature, and with a kindly manner, with all a thoroughly loyal Railroad man, "Charlie" Dixon has many friends and is highly respected.

Wheeling Division

Benwood Shop

Correspondent, ANGELA JUNE APPLIGATE

John H. Zimmerman—Veteran Operator

John H. Zimmerman, veteran telegraph operator, Wheeling Division, was born July 22, 1855. He entered the service of the Baltimore and Ohio on May 8, 1871, when less than sixteen years old, as messenger in the Chief Dispatcher's office at Grafton, W. Va., at that time supervised by the late A. T. Cline. While discharging his duties as messenger he learned telegraphy and during the year 1872 was assigned to position of operator at Colfax, W. Va. He re-

mained at this station until the year 1880, when he was promoted to the telegraph office at Tunnelton, W. Va.; five years later he received another promotion, and was transferred to Cameron, W. Va., which position he still retains, with pleasure to himself and co-employees and satisfaction to the Company.

His one ambition in life was to complete fifty years in the service of the Railroad. During his fifty years, Mr. Zimmerman has never had a mark placed against his record, and at the youthful age of sixty-five, remains hale and hearty and anxious to continue in the harness; he has seen many changes take place. Many of the old timers

have passed away to the great beyond while others have left the service for parts unknown. But he has stood the storms of many winters and the sunshine of many summers.

Mr. Zimmerman has the best wishes of his officers and fellow-employees for continued good health, enabling enjoyment of pleasure for many years to come, not only for his own personal satisfaction but so that a record so clear and desirable may ever be before the rest of us as an indication that through the help of God, a man can do his duty, remain healthy, clean and well thought of by obedience to the rules and strict attention to business

From Nine Dollars a Week To Part Owner of a Business

The life-story of a man who wouldn't stay down. How Purwin got out of the rut and made good in a big way.

By Robert G. Hill

TO every young man who says that he "never had a chance" or that "Fate is against him," I want to relate the story of Klemens Purwin—"the man who wouldn't stay down."

Nine years ago his time card read K. Purwin—laborer—\$1.50 a day.

Today his business card reads—Klemens Purwin, Consulting Engineer, The Stoney Foundry Engineering and Equipment Co., East 66th and Hubbard Ave., Cleveland.

And he is part owner of this concern, as well!

MR. PURWIN's first job was as a laborer with the American Steel and Wire Company. His second was in a tinner's shop in Chicago. His third was as a pipe fitter with the Illinois Central Railroad. His fourth was with the Pennsylvania Railroad.

Mr. Purwin—or K. Purwin, as he was known in those days—was drifting. He was \$800 in debt when he got his next job—this time with the Erie Railroad.

He told me the other day that when he got his first pay envelope from this company he sat down in the corner of the shop and did a heap of thinking.

"Am I always going to work for such a small salary?" he asked himself. "Other men are getting ahead—why not I?"

The more he thought about it, the more he realized that the difference was simply this—they had trained themselves to do some one thing better than anyone else. And he—K. Purwin—was just one of hundreds of thousands of unskilled workers who are never sure of their jobs and who are always the first to go when business slacks up.

THAT night, K. Purwin made the decision that was to change his whole life. Reading through a magazine he came across an advertisement of the International Correspondence Schools at Scranton. It told how the Schools had helped thousands of men to increase their salary and to make themselves indispensable in business. How the Schools come to a man in his home, and how they train him in the spare time that is ordinarily wasted! How any man—no matter what his means or circumstances or education, can go forward through the help of I. C. S.

That night K. Purwin tore out that familiar coupon, marked it and sent it to Scranton.

Every lesson helped him with his work and in three months he secured a job as a machinist with the Ferro Machine and Foundry Company of Cleveland. After a few months he was made assistant foreman—then foreman. Then one day he said good-bye to his overalls and went into the drafting room.

Advancement followed advancement.

Please mention our magazine when writing advertisers

KLEMENS PURWIN

And today, as I have already said, K. Purwin, who was once a laborer at nine dollars a week, is not only Consulting Engineer for The Stoney Foundry Engineering and Equipment Company, but part owner as well!

IT is up to you, my friend, it is up to you. If you really want Success, you can have it. Not by simply wishing for it, but by studying in the spare time that now goes to waste.

No matter where you live, the I. C. S. will come to you. No matter what your handicaps or how small your means, we have a plan to meet your circumstances. No matter how limited your previous education, the simply-written, wonderfully-illustrated I. C. S. textbooks make it easy to learn. No matter what career you may choose, some one of the 300 I. C. S. Courses will surely suit your needs.

When everything has been made easy for you—when one hour a day spent with the I. C. S., in the quiet of your own home, will bring you a bigger income, more comforts, more pleasures, all that success means—can you afford to let another single priceless hour of spare time go to waste?

This is all we ask: Without cost, without obligating yourself in any way, put it up to us to prove how we can help you. Just mark and mail this coupon. Today is best.

Foreman Chaplin and his bridge gang

The accompanying picture is of bridge gang in charge of Foreman J. W. Chaplin renewing ties on the east end of Bridge 100, which crosses the Ohio River between Benwood and Bellaire. This is a single track structure, consisting of fifteen spans and is approximately three-quarters of a mile long.

Quite a record was established by Foreman Chaplin and his gang in the renewal of these ties. You will note from the picture that they are considerably larger than the ordinary bridge tie, measuring 8" x 14" x 15'. With the use of the hand derrick shown, it is possible for the gang, consisting of eleven men and the foreman, to renew the ties in half the time it would have taken without it. Being a single track bridge connecting up on both ends with double track, also makes traffic congested at this point, and it was with these difficulties confronting them that the record of fifty ties per day was established by this gang and without delaying a single train during the whole job.

The wedding of Rodman C. E. Kindelberger, Division Engineer's Corps, and Miss Catherine May, of Wheeling, took place last June. Congratulations, "Ed."

"Everything comes to those who wait." This saying again proved it's truth when our friend G. R. Fitzgerald, chief clerk to the superintendent, and better known as "Fitz," became the proud owner of a Hupmobile touring car. We are all waiting for him to fulfill his promise, which we hope will be before the tires go bad.

Machinist Helper Lawrence has taken unto himself a wife in the person of Miss Marie Frazier, of Shadyside, Ohio. We all join in extending them good wishes. It is also rumored that Victor Haythorn and Miss Sarah Strong are to be married October 15, but we shall tell you more about this later.

Who was it that took the watermelon for a ride on the speeder up and down No. 16 track at Holloway?

Miss Della Calvert, former file clerk, Master Mechanic's office, recently underwent a serious operation at the Renold's Memorial Hospital at Glendale. We are glad to report that she is much improved at this writing.

Edward Kuhn, formerly of the General Superintendent's office at Wheeling, has returned after being away since February. He has accepted a position in the Division Freight Agent's office at Wheeling. Glad to see you back again, Eddy!

F. C. Moran, formerly of Parkersburg, has "bumped" W. L. Cockrell, chief train dispatcher, Wheeling, since the consolidation of the Ohio River and Wheeling Divisions, at which time this position at Parkersburg was abolished. Mr. Cockrell is now working as second trick chief.

Outside of this one position, the old Wheeling Division staff has remained unchanged.

Western Lines

Cincinnati Terminals

Correspondent, JOSEPH BEEL, Chief Clerk to Superintendent of Terminals

Little mention has heretofore been made of our Stock Yards. In former years this terminal in Cincinnati has been looked upon as a mere junction point or turn around point for the Ohio Division, Newark Division, and Indiana Division freight power; however, since the place has been under the supervision of General Foreman Frank L. Hall, great progress has been made along the mechanical end of the work in putting and keeping the power turned in at that terminal in A-1 condition.

While Stock Yards is not equipped with all the machinery necessary for Classified

Repair work, they have turned out three or four engines already this year. We especially refer to engine 5017, a passenger engine, running between Washington and Cincinnati. This engine was turned over to Stock Yards for a general overhauling, and was turned out of this shop with a movement equal to that of the best standard railroad watch. The engine was given the "once over" by Boilermaker C. W. Yates, Machinist R. Swartz, and Mr. Hess, who made the trip from Cincinnati to Washington, Ind., a distance of 170 miles. It returned the following day with Engineer Black without being broken in prior to initial trip. Much credit must also be given to machinists C. O. Connors and W. Trefz, and machinist apprentice J. W. Schmidt.

While we have made mention of a few of our craftsmen at Stock Yards, we wish it understood that all had a hand in the work on this engine; however, the results obtained were particularly creditable to the supervision of General Foreman Hall and his assistant, F. W. Van Cleave.

The mechanical force at Stock Yards is EFFICIENT in all that the word implies and the motto at Stock Yards is "EFFICIENCY." If you want something done and are up against it, just turn it over to Stock Yards Shops; they will show you how things are made right. There is nothing too deep for them and they are glad to get hold of classified repair work, so you need not feel that you are imposing upon that station by "dumping" work on them.

The accompanying picture is the country home of Agent and Mrs. H. B. Kemper, at North College Hill, Ohio.

Our genial foreman, George Poppe, is the proud owner of a new Ford sedan. We would advise George to be a little careful about taking his whole family out at one time, as there is a limit to what weight a Ford can bear.

Round House Foreman Charles Arnold is a dead ringer for the Duke of Dazzle-berry as he rolls in each morning in his big bus; checkered cap, cigarette, 'n everything.

"Tom" Doty, "best man in the United States," according to his own opinion, is back after a brief attack of gout.

John Burns, "moon-light master mechanic," is deeply grieved over the poor showing of the Reds; 'tis said that he has not missed a game this year on the home grounds. "Enough to make a man bust out crying," says John.

Home of Jasper Sayre, baggage agent, Clarksburg, W. Va., purchased through the Relief Department

Switchman Fred Wolfe

The home of Stanley Phillips ("Red") was gladdened by a visit from the old stork this past month.

"Joe" Durkin claims to have an ancient razor, 150 years old or better, but where "Joe" stays when he is shaved is a mystery; his whiskers are always the same length.

No, Alfred Heath isn't growing. He is too old for that. Those short overalls belonged originally to his kid brother-in-law; all in the family, you know.

There is some suspicion that "Johnny" Zureick borrowed Charles Everly's clothes when he went on his vacation, but we hardly believe it—we think he rented them from Everly.

Hostler Charles Listerman ("Aunt Eppie") returned from a fishing trip with some queer smelling tales. But Fred Nolte rises to remark that "once a fisherman—always a liar" and Fred ought to know, he having been around the Big Miami camps quite a bit this summer.

One of our good-looking mechanics, Henry Frustorfer, has at last embarked upon the sea of matrimony. Cupid hasn't been doing much business at Ivorydale shops lately but maybe business is picking up. Good luck, Henry.

W. E. Moran, electrician foreman, Ivorydale, has moved his entire family to Cincinnati. Glad you are with us, William.

After several months illness we are glad to see our general foreman back on the job and looking so well.

Beware!!! Cupid has hurled another victim on the raft of matrimony. Good luck, Blanche. May the raft never sink!

The accompanying picture is that of Fred Wolf, the popular switchman at Storrs Battlefield.

Home of Mr. and Mrs. Howard Kemper, North College Hill, Cincinnati

More things we would like to see
 Sir Sidney J. Dresback without his umbrella.
 Billy Morin without his over-shoes.
 O'Brien getting next to himself.
 Maloney checking a correct rate.
 O'Donnell catching a rat.
 Daly in a good humor.
 "Billy" Moss doing some work.
 Mr. Hein, Jr.
 The Baltimore and Ohio operators.
 Grogan with a new line.
 Garner with a shave.
 Eddie McGinnes doing smokestack duty.
 "Jack," (ask R. A. G.).
 Richter buying the candy.
 And most of all, MORE BUSINESS!

New Castle Division

Correspondent, J. A. JACKSON

Carl Sewald, night boiler foreman, and Miss Hazel Conley, M. P. timekeeper, New Castle Junction, were married on Tuesday, August 16, in St. Mary's Church, the Rev. F. F. O'Shea officiating. A honeymoon trip on the great lakes will be followed by the happy couple taking up their residence in a newly furnished home on Fairmont Avenue. A host of friends are extending Mr. and Mrs. Sewald their best wishes for much happiness.

Conductor W. C. Shanafelt is wearing the big broad smile and passing around the El-Verso's. "Bill" says he is the happiest man in New Castle and his numerous friends are offering congratulations on a ten pound baby girl that arrived on September 11.

Brakemen and Mrs. Guynn were also paid a visit by the stork, during his stay in New Castle. The eight pound girl has been named Dorothy Corrine. Congratulations from his host of friends are being given in exchange for the "Best Smokes in Town" which L. C. manages to pass around between smiles.

chief clerk to the superintendent, in their latest model King Two.

Here also are J. C. Glenn and P. I. Eilbeck, two of the fastest basket ball players in Lawrence County, and who will be in the line-up of the Baltimore and Ohio team in the City League, which will open the season the latter part of December.

The accompanying picture of the New Castle Division Police Department, taken at the Youngstown, Ohio, Passenger Station, shows Captain T. L. Johnson and the members of his force. They are wearing their new uniforms, which were recently purchased—to be worn only on special occasions. Captain Johnson has been making an enviable record for his department. The members of his force are proving a terror to car robbers, with the result that thieving of freight cars has been reduced to a minimum.

When you hear of any of your friends going to use the Railroad, don't be afraid to ask them to use the best, the Baltimore and Ohio. You will have no apologies to offer, and they will thank you for the pleasant journey and courteous treatment made possible by your suggestion.

Our baby in the picture is little Miss Helen Marie Urmson, eight months old daughter of Pilot Engineer and Mrs. "Jack" Urmson, New Castle.

Division Office, Newark

"Pat" Hunt (more commonly known as "Spider") and our little C. T. timekeeper, Orie Reel, recently returned from a fishing trip to Owens Lake. According to their reports, there should still be some good fishing in this lake. At least, they didn't bring any back with them.

Stenographer Budd, Division Accountant's office, has been endeavoring to fit up a new home. (We hope to be in position to announce the name of the lucky young lady in a later issue.) His troubles seem to be starting early, as we hear that he recently made a trip to a city in the southern part of the state to buy some household furnishings from an uncle supposed to be in the furniture business, but found that he was operating an undertaking establishment instead. Budd is commencing to see a new meaning in the slogan "Trade at Home."

Car Distributor David Gettings, accompanied by Mrs. Gettings, reports an enjoyable vacation trip through the West. Denver, Colorado Springs, Pikes Peak, the Royal Gorge, etc.

New Castle Division Police Department. Fourteen to one, they're jolly good fellows. Left to right: Patrolmen S. C. Carnes, M. J. Teeter, E. L. Fox, C. F. Schock, H. C. Harper, R. O. Wright, S. R. Powell, L. U. Reed, O. P. Miller, L. Blakely, M. Kinnaman, W. E. Price, Lieut. K. F. Wright, Miss Irene Lettau, stenographer, Capt. T. L. Johnson

L. J. Savey, W. H. Dowden, O. C. Reel

Here are three hard-working and good-looking members of the C. T. timekeeping force, Division Accountants' Office, Newark. "Cap" O. C. Reel, C. T. timekeeper; "Doc" L. J. Savey, assistant timekeeper; "Bill" W. H. Dowden, time clerk.

Ralph Cook, formerly of the Stores Department, Newark, has accepted the position of fuel clerk, Division Accountant's office, vice M. F. Floyd, promoted to motive power timekeeper.

G. L. (Mac) McDonald had a rippin' good time on his vacation. He took in various county fairs, chicken shows, and finally wound up at the races at Covington, Ky.

Champion indoor fisherman Howard I. Holmes, after sojourning three weeks in the wild and wooly West, returned to our midst brown as a berry, and with the aid of photographs and affidavits, blue prints and other data, has indicated to us what might have been some wonderful experiences. After all, old Licking is good enough fishing for us, and we are wondering why Howard goes so far from home.

We confess that we are a little in the dark, but one of the dispatching force was heard to remark the other day that "Ananias must have been pretty proficient in his line in the early days; however it would be interesting to observe what expressions might cross his visage if this old fellow perchance might drop in the Dispatcher's office long enough to hear one or two of the tales now and then related about the hill climbing proclivities and speed violating qualities of some of those Detroit made automobiles.

It was rumored that some legal representation was in Zanesville recently planning to institute proceedings against one H. H. Supplee, for infringement on Douglass Fairbanks' stock in trade, in connection with the former's getaway from Dillon Tower a

short time ago. High diving and other reckless antics seem to be second nature for both of these gentlemen.

The accompanying picture is of Train Baggage Man Joseph M. Workman, and Passenger Conductor William Lamb. Both of these young men are camera-shy, and we consider ourselves fortunate in getting the picture.

The accompanying photograph shows Yard Clerk "Clay" Horn, and his new motorcycle. Clay says this machine has made several records for speed (which unfortunately were not officially recorded).

Zanesville Freight Station

Cash Clerk E. A. Van Sant has recently become the owner of a new shot gun, and, take notice from us squirrels are going to be scarce in this vicinity henceforth.

Freight Agent E. C. Doudna spent his vacation on the Great Lakes, enjoying part of the time on his fruit farm.

Our congenial yardmaster, C. B. Powers, better known as "Handsome Charlie," has given up the movie business. Our informant tells us he may be seen on the real stage in the near future in a leading role in "Fads and Fancies."

Columbus Freight Station

It has been the custom for the past ten years for the employees of the local freight office to have an annual picnic. On a recent evening they all assembled at the Union Station and a coach load of them were transported to Grove City, where they were delightfully entertained at the beautiful home of Mr. Burgette, in charge of the Columbus Freight Station Claim Department. The picnic this year served a two-fold purpose, in that it furnished the annual outing of the Columbus force, and also celebrated the birthday of the hostess, Mrs. Burgette.

Everyone who attended will vouch for having had a splendid time. The "cats" started with wienerwersts and finally wound up with ice cream. A plentiful supply of everything was available to satisfy the most appalling appetites. The crowd then enjoyed some vocal recreation, singing all the songs they knew, and some they didn't know.

The return trip was made by autos, and enroute back to old Columbus town, they serenaded the country folk.

It was a very successful and enjoyable occasion all around, and the committee in charge are to be congratulated.

Never fear! their wives are along, and you can't believe in signs

There have been a lot of short walks these days since the sign "Smoking Strictly Prohibited" has been placed throughout the Passenger Depot at Cleveland.

Not mentioning any names, but, some people love to dance and others dance to love.

At a recent staff meeting, held at the Winton Hotel in Cleveland, Agent A. Robinette of New Philadelphia, had some difficulty in getting his peas eaten. The peas were served in small paper cups, and they looked so natural that Mr. Robinette ate the peas, paper and all. We hope you will not embarrass us again like that, "Bige."

Second Trick Operator C. E. Wood, Beach City, while up after the mail at that point, met a man who had been on a visit at Beach City and was on his way to a certain depot to get a train to Cleveland, thence to Ashtabula. Mr. Wood explained to this man that by going via the Baltimore and Ohio he would get to Cleveland about 45 minutes earlier and the fare would be about 20 cents less. Mr. Wood "got him." Keep up the good work, Mr. Wood! We need the business.

Dover

In the accompanying picture we find, left to right: Conductor E. C. Pratt, Engineer "Shotgun" E. J. Baker, Pennsylvania Engineer, "Pop" Stottlemeyer, and Engineer J. J. Crouch. They were all out at Hot Springs, Ark., for their health.

Conductor A. Richardson and Brakeman J. W. Nash

If there are any employees on our division between Massillon and Holloway who are unable to get copies of the MAGAZINE, they should report this to the Trainmaster's Office at Massillon. The MAGAZINES that are distributed between Massillon and Holloway are all sent to Trainmaster's Office, Massillon, and then are sent out to all departments between Massillon and Holloway. They are sent to the official at the head of each department respectively. As the MAGAZINES are distributed, the employee signs his name on receipt of the MAGAZINE. In doing this, it is known just who is getting the MAGAZINES, and none is left lying around. The receipts are then returned to the correspondent at Massillon for his file.

Conductor W. F. Stapleton spent his vacation in Canada. Canada and Cuba seem to be the principal points of interest in this country around vacation time. Don't bring any home with you, boys.

Yardmaster M. Reidy has been off duty for some time, due to sickness. M. Howell has been acting yardmaster during his absence.

Brakeman "Scotty" Ross got in the way of a box car door when it fell from the car, and consequently "Scotty" took the count. "Jack" Dempsey can hit harder than that, "Scotty."

Brakeman R. J. Everett recently escaped serious injury when he got caught between two cars, one having a draw bar out. Experience is the greatest teacher, Everett, but try to be more careful the next time.

Massillon

Passenger Conductor C. B. Campbell, trains 47 and 48, running between Cleveland and Massillon, on August 19 gave the Company some very good free advertising by his kindness and accommodation. A party of five school teachers were on their way to Chippewa Lake. Three of them were delayed in getting to the station to get train No. 47. The other two explained the situation to Conductor Campbell, who held his train four minutes for the other three. Some time later, one of our employees overheard a conversation between some of these school teachers and another party of friends, and they could not say enough for the GOOD SERVICE they received on our line. The ladies certainly can do the free advertising!

Arthur Stahl, clerk to the supervisor, has returned to the University of Michigan, to continue in his college work. We wish you much success, Arthur!

Here we have a picture of F. C. Baumgartner, extra conductor, and extra yardmaster, Massillon, and his seven months-old granddaughter, Elaine Louise. A good looking grandfather and a fine looking granddaughter, Frank.

Behold J. T. Sidaway, bridge inspector, on his speeder. You will appreciate this picture more when you are advised that this picture is several years old. This was taken when Mr. Sidaway was down on the Wheeling Division, and somewhat younger. You cannot deny the picture, "Tom."

Can You Imagine?

"Stonewall" Jackson Johnson on a motorcycle?

J. Fitzgerald, trainmaster, with a pipe in his mouth?

G. H. McCoy, operator and ticket clerk, with his cap off?

J. T. Sidaway and his speeder

W. E. Brugh, clerk to trainmaster, getting to work on time?

A. Saunders and C. Foss, baggage clerks, without having "girl" on their minds?

E. J. Crampton, agent, staying away from Tiffin, Ohio?

J. T. Sidaway, bridge inspector, working hard?

Archie Seifert, rate clerk, with a girl?

E. Polem, roundhouse foreman, with a shave?

I. C. Bowman, section foreman, not chiding Sidaway?

R. A. Watters, conductor, without his dogs?

A. R. Carver, division engineer, eating a "Frog?"

J. T. Sidaway, eating a pound of eight penny nails?

E. A. Krier, yard clerk, in a hurry?

Harry Malone, patrolman, killing a snake?

Jennie Eckroad, clerk, freight house, with a young man?

A. H. Brown, yardmaster, taking his time?

Chicago Terminal

THOMAS H. WILLIAMS, F. S. DE VENY

That courteous service is always appreciated is shown in the following extract from a letter to our general passenger agent

F. C. Baumgartner and granddaughter Elaine Louise, 7 months old

Miss Mattie Morgan, clerk, Chicago Terminal

in Chicago, from A. M. Arnold, assistant auditor, United Cigar Stores.

"As you know, Mrs. Arnold was in an extremely nervous and weakened condition and when she left Chicago, after having been in the hospital for several weeks. She says that she cannot adequately express her appreciation of the attention and service given her on train No. 6, which left here at 5.40 p. m. on March 26.

"Please accept my sincere thanks for your unusually kind assistance and permit me to say that I feel personally indebted to the Baltimore and Ohio Railroad for its splendid spirit of service. Mrs. Arnold's safe arrival in Washington, although she was a sick patient, was made possible only through this service.

"I have already taken advantage of several opportunities of telling our New York officials of this splendid service, and they have been greatly impressed.

"Please be assured of my hearty co-operation, and permit me to repeat my sincere thanks."

modestly says "It is only my duty;" nevertheless, we shall give him this honorable mention.

Garrett, Indiana

Drs. J. W. Thomson and W. A. Funk attended the Baltimore and Ohio Surgeon's Convention at Baltimore. Dr. Thomson read a paper on "Sudden Post-operative Death" before the Convention at the Saturday session. He visited friends in Washington, enroute home.

Right—Engineer "Bill Oborn", 44 years service, and Edward Oborn, Jr., 10 years service

Shop Clerk J. H. Lantz has resumed his duties in the Master Mechanic's office after a six weeks' leave, which he spent at his cottage at Lake Wawasee, Indiana.

Boilermaker and Mrs. John Miller, are the proud parents of twin sons, who arrived to take up their abode with them on September 14.

Car Foreman and Mrs. D. L. Gibson are spending some time at their cottage, at Kale Island, Lake Wawasee, where Mr. Gibson is recuperating from an illness of several months' duration.

We wish to extend our sympathy to J. J. Kennedy, his brothers and sisters in the loss of their mother.

The marriage of George Carroll, son of Chief Dispatcher and Mrs. H. H. Carroll, and Miss Margaret Mountz, daughter of Attorney and Mrs. H. W. Mountz, occurred at the home of the bride on East Houston Street on September 22. Mr. Carroll is superintendent of the Garrett Schools. Congratulations!

Coppersmith and Mrs. H. H. Roan announce the approaching marriage of their daughter, Miss Marguerite, and Mr. Clifton C. Muhn. Miss Roan is stenographer to Storekeeper W. H. Dean. We extend our congratulations.

"Ed." Caffery is now breaking in on position of caller, Crew Dispatcher's office, this station.

Fireman C. N. Schlosser, has returned from Napoleon, Ohio, where he was called on account of the death of his father. We extend our sympathy to Mr. Schlosser.

Peter Miese, for years a resident of this city, died at Sacred Heart Hospital, on September 27 from wounds received when he fell from a load of hay. Mr. Miese is the father of Machinists F. C. and Henry

Chicago Division Interlocking Tower, Alida, looking West

Please mention our magazine when writing advertisers

Miese and Fireman A. E. Miese of this point. We wish to extend our sympathy to the family.

Mrs. L. S. Ziegenhein and baby daughter have gone to Baltimore to make their home. Mr. Ziegenhein has been transferred to that point as electrician at Riverside. He was formerly tool foreman at this station.

We extend our heartfelt sympathy to Mrs. H. S. Wright and family in the loss of their husband and father, the late Hobart S. Wright, for years an engineer on this division, who passed away at his home on South Randolph Street on September 8.

Machinist and Mrs. F. M. Galloway are the proud parents of a son, William Clayton, who arrived on August 30.

Wreckmaster A. E. Treesh is recovering from an operation which he underwent on August 29.

Conductor Roy McKinley is now recuperating from a serious attack of typhoid fever.

Electrician and Mrs. W. J. Dreher announce the arrival of a daughter at their home on September 22. Mrs. Dreher will be remembered as Miss Bermadetta Cogley and was employed before her marriage as clerk, Stores Department.

Joint General Car Foreman and Mrs. E. H. Mattingley were recently presented with a bouncing baby boy, Robert Kenneth. Congratulations are in order—but where are the cigars and candy?

Marion Rink, son of Engineer and Mrs. Jacob Rink of this city, and Miss Waunetta Soule, of Auburn, eloped to Hillsdale, Michigan on September 13, where they were married at the Courthouse by Justice J. M. Weaver. Mr. Rink is a machinist apprentice, in the Motive Power Department of the local shops.

Chief Dispatcher H. S. Carroll resumed his duties on September 1, after an illness of several months.

Mrs. Maud Cameron, wife of Conductor W. G. Cameron, died at Sacred Heart Hospital on Monday, September 26. Funeral services were conducted at the M. E. Church on September 29, after which the remains were taken on train 10 to Canton, Ohio, for burial. We extend our sympathy to Mr. Cameron in his loss.

We have noted for the past few days that there are a number of fireman, engineers, conductors and brakemen passing around thru the local shops and grounds with air brake books under their arms. There is a reason, the air brake car is at this point.

Miss Margaret A. Galloway, assistant shop clerk to master mechanic, resumed her duties recently, after several months absence because of undergoing a very serious operation. Miss Galloway will also resume her duties as *MAGAZINE* Correspondent, and will be pleased to receive from employees on this division items of interest; photographs of employees, of their families and their homes. Short articles, poems, and suggestions are all in order.

Friend Ed—A few years ago "Paw Stork" brought two fellows from his farm in that unknown land to this world. One of them, a Welchman from old Swansea, after fighting his way through school, became a marine engineer. At one time, on receiving shore leave at one of our eastern coast cities, he happened to visit one of the great shops of the Baltimore and Ohio and was so impressed by their modern methods and ultra modern machinery, that he applied for and secured a position as machinist.

From this position he rapidly arose to the responsible position of general foreman. This position he now holds with the Baltimore and Ohio at Garrett, Ind., where he is known to his fellow employes as a good, square fellow.

The other person referred to went to school and absorbed all the dope he could until he was old enough to start on his apprenticeship as pipe fitter, when under the efficient supervision of "Alex" Cross, he became one of the best sheet metal workers Garrett has ever turned out. He has been in charge of Tin and Pipe Shop since the retirement of his superior officer and now occupies the position of assistant to general foreman at Garrett.

In some way or other, it was learned that the above mentioned parties were born on the same day, September 30, but not in the same year, however. The rest of the foremen at Garrett were quick to see the opportunity of having some fun and in the afternoon of September 30, they hatched a plan to have a little party as a surprise on the general foreman and his assistant, whom you probably know by this time as Harry Rees and A. B. Galloway.

Roundhouse Foreman Moses was assigned to the job of kidnapping Rees, while "Joe" Gordon took care of Mr. Galloway. Each was told that the surprise was to be on the other fellow, so that it was easy to get them away from home. Although each had his little celebration at home in honor of the event, their wives finally consented to let them loose for just one evening.

After buying the oysters, milk, crackers, butter and pickles, they all jumped into waiting Lizzies, Buicks, Studebakers, Chalmers, etc., and headed for Hamilton Lake, about 20 miles away to the cottage of B. O. LaRue at Penn Park. Ora Bennett got there first with his Lizzie, although he went up the Wabash Railroad tracks for a couple of miles trying to find a crossing to get on the road again. By the time they had all arrived, Cook O. W. Longbrake had the oysters stewing, and, after stirring them for two hours while the rest stood around with their tongues hanging out, he finally announced that they were done and the bunch proceeded to fill up. Most of them had eaten no supper in anticipation of an early stew, so by the time that the announcement came, they were ready for it. Ora Bennett proceeded to fill his silo to such an extent that his Lizzie refused to take him up the hill out of the park when he was ready to start home. The fact that he filled his radiator with the remains of the oyster soup may have had some effect on Lizzie, but after doubling over two or three times, he finally made the hill.

L. E. Smith says it was due to bad rail, but L. W. Eberle said she could not make the hill account of her flues being stopped up. F. W. Fouch claims it was due to too much tonnage but old "Liz" finally rolled into Garrett about 12.30 a. m.

On arrival of the bunch at the cottage, it was found that the electric current was off, so the 17 huskies had to be content with one smoky oil lamp, by the aid of one lesser light in the shape of a night candle, which "Chub" Clark dug out of the ear from under a ton of tools. After lighting it, he had to light a match to see if it was burning. The card players "hogged" the one lamp while B. H. Groves told the others that old, old story of the great Pennsylvania Railroad shops at Altoona. John Biedrzycki wanted to know why the road went down hill all the twenty miles over here and how we were going to get back, and wanted everybody to be sure and have plenty of gas. (No wonder Master Mechanic McSweeney accused him of taking on too much red lemonade). Fred Moses did not want to stop the

card game to eat and had to be forced away from the table; this was because he had the best hand that he had drawn that evening and did not want to give it up. "Joe" Gordon spent some time trying to get the spotlight on his Lizzie fixed so that it would shed some light in the window, but failed. Allie Grant had to take his coat off as the rest said he was shoving the cards up his sleeve. We found out afterwards that he wanted the gang to see that he had on a clean shirt.

"Lew" Eberle ate so much oyster stew that he could not eat breakfast the following morning. This made his wife suspicious but we did not see "Lou" running to the drinking fountain much the next morning, so the fears of his wife were groundless. Poor "Chub" Clark had to eat crackers and milk as the oysters didn't like him.

F. W. Fouch, could not wait for the stew to be cooked but made himself a cup of coffee to keep from starving. L. E. Smith chewed up six cigars in the card game; then accused the gang of stealing them from him. W. H. Dean got by all right until he tried to set his bowl of stew on the thin air, whereupon it deposited itself in his lap and later LaRue skidded on one of the oysters. Cook O. W. Longbrake tasted the stew so much that he could not eat any when it was done.

H. Rees made a good toast but the rest of us were too busy gargling soup to respond. The undersigned swear that we had a good time and hope for more like it: H. Rees, general foreman; A. B. Galloway, assistant to general foreman; F. C. Moses, roundhouse foreman; J. T. McSweeney, smith foreman; B. H. Groves, planing mill foreman; O. Bennett, boiler foreman; J. Biedrzycki, labor foreman; W. H. Dean, division storekeeper; O. W. Longbrake, engineer in charge; J. Longbrake, W. L. Clark, B. O. LaRue, J. F. Gordon, J. A. Grant, L. W. Eberle, F. W. Fouch, L. E. Smith.

Correspondent, A. E. ERICH, *Secretary to Superintendent*

Courtesy always pays because it makes friends—friends for the individual and for the Road. And service brings its own reward in a consciousness that work well done is worth while. Make friends, and when they contemplate shipping goods, or desire to travel, BOOST THE BALTIMORE AND OHIO!

It is with deep regret that we announce the death of Brakeman Richard Parks, who was instantly killed while on duty at Broad Street, Columbus, Ohio. Mr. Parks was looking after coupling between caboose and last car, when in some unknown manner he was crushed beneath the wheels.

Brakeman Homer Smith has taken a new run, not through advertisement or through the trainmaster's office, but through "Dan" Cupid. Congratulations and best wishes!

If YOU owned the business and had to make good for all the damages, how would you like to have freight handled? There's only one answer: with thought and care, of course! "Think and Act," prevent loss and damage of freight and at the same time PREVENT CLAIMS.

We announce the marriage of T. Hobensack, pipefitter. Congratulations and good luck!

We have been informed that the stork has paid another visit to the home of Hostler Homer Riley recently and left a boy. Congratulations!

Machinist apprentice school, which has been closed for the summer, has reopened at Chillicothe, with Draftsman Herman Edmondson in charge.

The accompanying picture is of the home and family of Engineer W. Patton, Chillicothe, Ohio. This home was purchased through the Relief Department. Mr. Patton says that this is the real way to live, particularly in this "high rent period."

OWN YOUR HOME AND STOP PAYING RENT!

Ralph Rhodes, messenger in Superintendent's office, has transferred to Car Department to learn to be a car repairer. He is succeeded by Vernon Duffy. We wish these two boys success.

In the accompanying photograph we have, left to right: William, Robert and Mildred Elaine, children of Engineer R. ("Slim") Mather.

Indiana Division

Correspondent, H. S. ADAMS, *Chief Clerk to Superintendent*

Seymour, Indiana

Bert Ulm, maintenance of way timekeeper and Miss Lucille Misamore were quietly married at the home of the bride's parents on Sunday, September 4. Mrs. Ulm is the daughter of the Rev. O. G. Misamore, who officiated at the ceremony. Mr. Ulm's marriage was a complete surprise to the office force. To pay him for putting this over, a party of them called upon him a few evenings after the ceremony, and entertained him with a ride through town on the hood of an automobile. Next, he was taken to the city limits, blindfolded and walked for a considerable distance, and secured to what he thought to be a fence post. After some difficulty, he succeeded in freeing himself, only to discover that he had been tied to a tombstone. He was then picked up by the boys, and the experience just cost him the price of twelve good meals at the Palace Restaurant. It is stated that if anyone else tries to "put one over" on the boys as Bert did, his adventure will be far more thrilling.

Accounting Department

WANTED: A first class mechanic to keep the typewriters and check writing machines in working order. Apply at this office.

Attractive home and family of Engineer W. Patton, Chillicothe, Ohio

A certain young lady was planning a trip East, and had never had the pleasure of riding in a sleeper, so she made a special trip to St. Louis for the experience, in order that she would not be green and make a mistake should she ever ride with some of her companions.

Toledo Division

Correspondent, EDWARD M. MANNIX

East Dayton

In Memoriam

One morning recently the sad news reached us of the death of Miss Anna Jackson, sister of our assistant car foreman, Walter Jackson, and until recently a valued employe of the Stores Department, East Dayton. Miss Jackson is survived by her mother and brothers, Walter and Harry. Her father died several years ago.

Children of Engineer R. "Slim" Mather

She only relinquished her position when her health no longer enabled her to continue. She was a lovable girl, possessing qualities and endowments that endeared her to all.

Many and beautiful were the floral offerings from all departments of the East Dayton Shops, for rarely, if ever, was a girl held in higher esteem.

The Vose Grand

represents 70 years of experience devoted to the attainment of an ideal. Its incomparable tone brings a lifetime of satisfaction to the lover of good music.

We Challenge Comparisons

Write for our beautifully illustrated catalog and floor pattern of the Vose Grand, also our easy payment plan.

Vose & Sons Piano Company
165 Boylston Street
Boston, Mass.

A solemn high mass at Holy Trinity Church was celebrated by Rev. Father Lysing and assistant. As the mourners left the church, the choir sang "Some Sweet Day."

She was laid to rest in the family lot in Calvary Cemetery, and, as the many moist eyes gazed for the last time upon her, it was with the peaceful prayers of "Peace to her Ashes, Rest to Her Soul."

Again we have demonstrated the ability of the Toledo Division in the "Save a Dollar a Day" Campaign which has just closed. Proud are we that the appeal of Superintendent R. B. Mann has fallen upon willing hearts and helping hands and prouder still that the banner came to our division. This again only proves our loyalty.

The vacation period is now well on the wane and all have returned greatly benefited by the rest, ready to jump right in and boost the good old Baltimore and Ohio with renewed vigor and confidence.

Excuses don't go with Master Mechanic A. E. McMillan or General Foreman W. A. Gilmore; in a recent talk to the men, our master mechanic told them that the Excuse Factory turned out some mighty poor products that would find no market on our division.

Mrs. William Finley, wife of Machinist William Finley, underwent two serious operations recently, but the good word reaches us that she is convalescing nicely and will soon be able to be about as usual.

Isenogle, our hustling storekeeper, has everything in ship shape order over at the store-room; he says he is ready for the boom which is sure to come to us in a short while. That's right, old boy, you have the right dope.

Miss Hoban, telephone operator, Superintendent's office, surely has a lot of patience, always smiling and pleasant. She believes in giving a joy receipt when things go wrong, and it always wins out.

Safety for the month of August, 100 per cent. at East Dayton Shops and Round-

Miss Luella Clayton (right)

house. The lesson has been well learned: "It pays to be careful."

Our old eagle-eyed foreman, F. G. Sehr, is pretty hard to fool. When that old boy holds a Post-Mortem on an engine, it's a pretty safe bet that she isn't ready for the morgue by the time he gets through with her.

Quite a novelty was sprung the other day at lunch period. The men were discussing various subjects when suddenly "Jack" Bellmyer said that he knew where to get the real 4½ per cent. "Where?" shouted several voices. "At the Merchants National Bank," replied "Jack."

Did "Dave" Nash tell you about the fish he caught on his vacation? He can tell 'em, all right. He said he caught a fish in a lake at Minneapolis that weighed nine pounds, five ounces exactly. Andy Bean asked him how he knew it weighed that much. Dave replied that it was true because he had the scales on his back.

East Dayton Round-house has been the recipient of several visits from our executives of Baltimore and Cincinnati. It is pleasing to note that they left with the impression that East Dayton was all we claimed for it—a criterion.

Division Accountant's Office, Dayton, Ohio

Assistant Correspondent, G. M. MCBRIDE

Born to Mr. and Mrs. Beringer, on August 21, an eight pound girl. The Division Accounting office is looking forward to another stenographer about twenty years from now in the person of Evelyn Jean Beringer.

A. Walter Boorum and Miss Mary Cecil Hancock were united in marriage at the home of Rev. J. Harmon Dutton at 8.45 a. m. on August 20, after which they left for

Lawrence A. Daley

their honeymoon. Walter says they went to Chicago and had a wonderful time, but his memories of Chicago are vague; he remembers seeing only "two people."

"There's many a task that flaunts the nerve,
There's many a heart that's weary—
But the man worth while is the man with
the smile

In spite of the things that are dreary."

Notwithstanding the fact that the correspondent has never been pierced with Cupid's darts, he listens in strict confidence. The latest thing he has whispered to me is the approaching marriage of D. F. Harker and Miss Myrtle Becherer.

No doubt Kinzig, timekeeper, received quite a lot of towels when he was married recently, as we noticed a towel in his hip pocket. (We presume he is using them for handkerchiefs.)

Lives of babies oft remind us,

That our lives would be less rough

And we'd get our heart's desires

If we'd holler loud enough.

Miss Winifred Flora and John Hogan have returned to the office after enjoying their vacation. Unfortunately John did not pass the cigars but we feel that they are coming our way.

The accompanying picture is one of our Division Accounting office girls, who is also a member of Mr. Williams' choir, Miss Luella Clayton. The picture was taken at Winona Lake while the choir was there during conference. Miss Clayton is the girl dressed in the white.

The accompanying picture is of Lawrence A. Daley, general time-keeper, Division Accountant's office, for many years at Dayton, Ohio. Mr. Daley recently resigned his position here and has made his residence in California, where he is associated with his cousins in the moving picture business. He was a valuable employee of the Company, and our best wishes for success follow him.

Lima

Assistant Correspondent, RAY GARRIGUS

Walter Calvert, mill foreman, has returned from a two weeks' trip through northern Michigan.

E. H. Thompson, night baggagemaster, Lima, has been transferred to second trick operator at Bates. Our best wishes for success go with "Ed."

The old tank shed near the roundhouse has been torn down and the engine yard is now in one hundred per cent. fine condition.

'Tis rumored that J. Lyons, boilermaker helper, is to be married. In fact, James admits it, but as yet her name seems to be a secret.

Neal Shockey, chief clerk to general yardmaster Murphy, has returned from a much needed vacation. Things will fly around North Lima now.

Steel car foreman Tunks has been busily engaged during the last week, building a dope reclaiming plant for the car department. The old office building was sheeted with tin, painted white, tanks, vats and presses installed for the boiling, soaking and pressing of old dope.

All of the machines were made at Lima and Mr. Tunks has been highly complimented on the finished plant.

The night was dark. Under the dim twinkling street light stood a lonely policeman. Suddenly a faint buzzing sound broke into the stillness. It came closer, grew louder, and finally there turned into the road a line of automobiles with mufflers

"All by myself"—Ruth Schindledecker, 10 months old, granddaughter of Conductor J. M. Barnett, Lima, O.

wide open and traveling at the rate of fifty miles an hour. The frenzied policeman ran into the street waving his arms like a madman. Unheeding, the line of machines, like so many devils tore on down the road. No, dear readers, they weren't whisky runners. But listen, and don't tell anyone, 'cause it's a secret. 'Rus' Holmes went and did it. Yes, got married—in other words—"tied up for life." The automobiles arrived at the depot just as the train whistled out. Oh yes, they caught it. At least the bride did, and 'Rus' was only a few yards behind and gaining fast when the train rounded a curve just outside of the town. Mr. and Mrs. Holmes enjoyed their honeymoon in Lancaster, Pa. They have our sincere wishes.

Mr. Maselli, first shift roundhouse clerk, has returned from a visit through southern Ohio and Kentucky.

W. Wagoner is checking the cars at Pearl Street in place of Wilbur Smith, who is acting chief clerk to the general yardmaster.

Miss Manila Britt has resigned from the stores department office force. We are sorry to lose her cheery smile but rumor has it that Miss Britt is soon to take a course in housekeeping.

"Morning Judge."

A titter ran along the waiting line of bootleggers, second story men and pickpockets. The judge gave them a harsh look and the line again became silent.

Judge to prisoner—"Young man, don't get fresh."

Prisoner—(Not a word.)

Judge—"Officer, with what is this young man charged?"

Officer—(Softly) "Might have been root beer" (Aloud) "Parking his car on the wrong side of the street, your honor."

Reclaimed material in Car Department, Lima

Engine of K. & I. T. Railroad at Kentucky State Fair

Judge to Prisoner—"Guilty or not guilty?"

Prisoner—(Meekly) "Guilty."

Judge—"Ten and costs."

Prisoner—"Thank you, Judge."

Judge—"Don't get fresh, young man. Make it twenty."

Prisoner. (Not a word) Fished over the twenty and leaves the courtroom.

Judge to officer—"By the way, officer, what was that fellow's name."

Officer—(Looking at his note book) "Lawrence E. Barrett, chief clerk to general foreman, Lima, Ohio."

K. & I. T. R. R.

Correspondent, J. L. SIGMON,
Industrial Agent, Louisville, Ky.

A feature of this year's Kentucky State Fair was the exhibition by the Illinois Central Railroad Company of one of their first locomotives, used in 1839, and one of their latest type locomotives. Also, the Kentucky & Indiana Terminal Railroad Company had on exhibition their superheater switch engine No. 15, one of the five of this type in operation, which have enabled this gateway to be kept open for the past four years without issuing an embargo. The accompanying picture shows this engine on the Fair Grounds.

This year we handled 822 cars to and from the State Fair, compared with 754 cars last year, and our revenue increased proportionately. The Kentucky & Indiana Terminal Railroad Company owns the only tracks leading to the State Fair Grounds, and our owner lines are thereby greatly benefitted.

Washington, Ind. Shops Safety Don'ts

Don't use an emery wheel without wearing goggles.

Don't use the emery wheel unless it is properly guarded.

Don't use a cracked emery wheel—report it.

Don't do any chipping without wearing goggles and having a shield placed to catch flying chips.

Don't sand blast without using a mask over nose and eyes.

Don't watch an electric welder or acetylene welder at work—it is dangerous to the eyes.

Don't cross a track without looking both ways and listening for trains.

Don't crawl under a car without proper signals displayed at each end of car.

Don't come out of a hot firebox and get in a draft to cool off.

Don't leave tools or material lying on running boards, on top of boilers or cars—they might fall or get knocked off and injure someone.

Don't use jacks that are not in good working condition.

Don't forget to chock engines or cars when leaving them—they might roll.

Don't kick a knuckle open—you might lose a foot.

Don't move an engine or car until you are absolutely sure no one is under it.

Don't fail to practice and preach "Safety First."

Don't fail to report unsafe and unsanitary conditions.

Don't put your lips on the spout in drinking fountains—open up the valve; you are past the bottle age.

Don't wear gloves when working on machines.

Don't spit promiscuously around the shop—contagious diseases are spread in this manner.

Don't "hop" a freight car for a ride. A yard clerk did this going to lower yard, the car hit another car making a coupling, and he fell on rail, breaking his ribs and barely escaped death.

Don't fail to report injuries to medical examiner or infection may result.

Don't take chances.

Don't fail to heed "Safety First" Bulletins displayed on Bulletin Boards.

Don't make fun of the man practicing Safety-First. Try some of it yourself and you will live longer, feel better and be the better enabled to support yourself and family.

Hence These Tears

Visitor (comforting Tommy, who has upset a bottle of ink on the new carpet): "Never mind, my boy; no use to cry over spilled milk."

Tommy (indignantly): "Any dunce would know that. If it's milk that's spilled all you have to do is to call the cat an' she'll lick it up cleaner'n anything. But this ain't milk, an' mother'll do the lickin', is what ails me."—*Baptist Boys and Girls.*

Think smiles, and smiles shall be;
Think doubt, and hope will flee.
Think love, and love will grow;
Think hate, and hate you'll know.
Think good, and good is here;
Think vice, its jaws appear!
Think joy, and joy ne'er ends;
Think gloom, and dusk descends.
Think faith, and faith's at hand;
Think ill—it stalks the land.
Think peace, sublime and sweet,
And you that peace will meet.
Think fear, with brooding mind,
And failure's close behind.
Think this: "I'm going to win!"
Think not on what has been.
Think vict'ry; think "I can!"
Then you're a WINNING MAN!

—Exchange

Where Pat Scored

An Englishman was boasting to an Irishman about the fastness of English trains.

"Why, Pat," said the Englishman, "we run our trains so fast in England that the telegraph poles look like a continuous fence."

"Do they, now?" said Pat. "Well, sir, I was on a train one day in Ireland and we passed first a field of turnips, then wan of carrots, then wan of cabbage, and a large pond of water, and we were going so fast that it looked like soup."—*Ax-I-Dent-Ax*

Grown Ups' Mother Goose

There was a little brakeman who wouldn't mind his rules. "Safety is good dope," he said, "but just for railroad fools." And then he kicked a coupler while the forward end came back—And they had to haul him to his wife in an undertaker's hack.

Thomas B. Athey

(continued from page 27)

Two years later they moved to Keyser, W. Va., where Thomas worked with his father, a contractor, taking contracts for the paving of the streets of the town.

On August 11, 1875, Mr. Athey entered the service of the Railroad as freight brakeman. In 1877 he married Miss Carrie Mythinger. The next year he was made conductor. He continued to work out of Keyser until 1891, when he was transferred to the Cumberland Division, working out of Brunswick, where he continued to live until the death of his wife in 1916, when he moved to Cumberland.

Mr. Athey has four children, all married. One of his boys is a machinist at Washington, D. C., one a Baltimore and Ohio conductor, and one a car repairman of the Western Maryland.

The accompanying letters from Vice-President Galloway and General Manager Scheer show the appreciation of the Railroad officers for Mr. Athey's loyalty and faithfulness.

BALTIMORE, MD., July 8, 1921.

THOMAS B. ATHEY, Esq.,
Cumberland, Maryland.

My dear Sir—It has come to my attention that you have been placed on the

retired list of the Baltimore and Ohio Railroad Company after having served the Company for a period of forty-five years.

Because of the splendid service you rendered as an employe during the time you were in association with the Company, I wish to express to you my personal appreciation of your loyalty and faithful attention to duty.

It is my earnest wish that you may spend your remaining days in comfort and contentment. While you have retired from active duty, I hope you will continue to take an interest in the Baltimore and Ohio Railroad, and still consider that you are a member of the railroad family.

Very truly yours,
(Signed) C. W. GALLOWAY,
Vice-President, Operation and
Maintenance

BALTIMORE, MD., March 29, 1921.

MR. THOMAS B. ATHEY,
Conductor,
Cumberland, Md.

Dear Sir—To-day I had the pleasure of approving and forwarding to the Management for their favorable consideration, your application for pension. I note that you have been in the service of the Company for 45 years, which is, indeed, a splendid record and one of which to feel proud. I desire to take this means of expressing to you my sincere congratulations and to wish you much health, happiness and prosperity.

Yours truly,
(Signed) E. W. SCHEER,
General Superintendent

A Real Champion Baseball Team Represents the K. & I. T. R. R.

By J. L. Sigmon, Industrial Agent

THE Kentucky and Indiana Terminal Railroad is owned and jointly operated by the Baltimore and Ohio, the Monon and the Southern Railroads, and boasts one of the best amateur baseball teams in the country. In 1921 it won the Louisville City Amateur Championship for the third successive time. In 1919 it won 12 out of 14 games, winning the championship in the Industrial League, and then defeated the champions of the other five

leagues in Louisville, thereby winning the championship of Louisville and the State of Kentucky in the Kentucky Amateur Baseball Federation.

In 1920, the Industrial League had 16 teams, 2 divisions of 8 teams each. Our team played 14 games in its division without a loss. The Mengel Box Company played 14 games in their division and lost 2. We played off with the Mengel Box Company, winning two out of three

games, making us again champions of the Industrial League for 1920. We then played six championship teams of the six leagues affiliated with the Kentucky Amateur Baseball Federation, without a loss, which made us champions of the Kentucky Amateur Baseball Federation.

Our third year, 1921, we played in the Industrial League, which was again divided into two divisions, playing 16 games in our division without losing a game. We won two out of three games from the Standard Oil Company team, winners of the other division, making us again champions of the Industrial League. We then played in the elimination against the champions of the eight leagues affiliated and won the championship for the third time in the Kentucky Amateur Baseball Federation. This made 22 consecutive games won without a loss.

Our fielding average for the 22 games was 961, and batting average 411. We scored 224 runs against the opponents' 47. Our pitchers had 168 strikeouts, walked 29, hit 7, allowed 120 hits in 164 innings.

Our last game of the season was played with the Montour Falls, N. Y., team, by winning which we also won the National Championship of the Industrial League.

The members of our team, as shown in the accompanying picture, are: John Louis Held, mascot; L. J. Gross, Engineering Department, outfield; L. L. Ayres, Engineering Department, catcher; Guy Long, clerk (captain), infield; Edward O'Leary, crossing flagman, outfield; William Brooks, yard clerk, infield; "Eddie" Bacon, yard clerk, pitcher; William Thompson, car service clerk, pitcher; "Len" Higgins, yard clerk, catcher; Clarence Hall, revising clerk, outfield; George Mayer, clerk, infield; "Al" Thieman, route clerk, outfield; H. Townner, Bridge Department, pitcher; and R. Symson, clerk, infield.

Optimism

Remember the steam kettle—tho' up to its neck in hot water it continues to sing.

Send coupon. No obligation. Get our completely illustrated catalog, FREE. Learn about our special factory output offer:—

5,000 Genuine Gold Medal Electric Washing Machines, 1921 Model, while they last, only \$99.50! The exact equal in value to the best washer you ever saw at \$150. And on easy monthly terms—two weeks' free trial. First come, first served. Don't be disappointed—get the free catalog now!

Madam: It is time to get through with the drudgery of the washboard which has killed more women than war has killed men. Surely the family can save enough for the small monthly payment to keep the mother well and happy. Send this coupon for free catalog NOW.

5000 of these Gold Medal Washing Machines must be sold at once. The manufacturer was overstocked; his dealers wouldn't give up their fat profits, so they couldn't sell. So, the manufacturer offered these 5000 machines to Straus & Schram at the factory cost for quick sale. We offer them now to our customers direct at the factory price, while they last. When these 5000 are gone, we won't say how much more the price will be.

These machines at \$99.50 are the exact in value of other machines at prices from \$150 to \$165 and up. We guarantee that these Gold Medal machines were formerly priced by the factory to sell at \$150 to \$165. Now note this: Formerly priced \$150 to \$165, and now on a lot of 5000 finished best machines—\$99.50. Rock-bottom price and a two weeks' free trial and easy terms thereafter. Send coupon for free catalog now.

REMEMBER—We'll prove by two weeks free trial that this machine at \$99.50 is equal to the best on the market. You alone, to judge. If not satisfied, return it at our expense. No obligation, no arguments, no risk to you! You, madam, decide.

The Comfort of Your Own Home

There is no use in talking—you cannot get as much real comfort out of a rented house or apartment, even if it is a palace, as you can out of your own little home.

When the Missus needs new shelves in her pantry—

When the kids keep after you to build that little "jim crack" for them—

When you want to build that storm door for your front entrance, to keep out old winter and to keep down your coal bills—

When the warm spring sun makes you feel like getting out to dress that side of your lawn with a pretty flower bed—

When, in short, the natural impulse of self-improvement comes over you in any of the thousands of ways it can—

You will obey that impulse and hop to the job with all the energy and interest imaginable, *if you own your own home.*

George O'Brien, engineer, New Castle division, Youngstown, Ohio, his wife, and his children, Eleanor, age 13 and George, age 9.

But it is different when such improvements mean merely improving the property of the landlord, at your own expense and with no permanent value to yourself.

Engineer O'Brien is one of the thousands of Baltimore and Ohio employees who now has the opportunity, at a small expenditure of money to beautify and improve his own property, as shown in the picture. For he is buying this on the easy installment paying plan of the Savings Division of our Relief Department.

Don't let another Thanksgiving go by in your home, unless, among the hundreds of other things you have to be thankful for, you can include a real home for yourself and family, and for your declining years. Write to

Division "S" Relief Department
The Baltimore and Ohio Railroad Company
Baltimore, Md.

Begin it with a Smile

Quite Obliging

"Miss," said the conductor, severely, "if you are going by this train you must get aboard at once."

"Oh," gasped the dear young thing, who had been chatting with another damsel ever since the train arrived, "do let me have a minute more; I must kiss my sister."

"Get aboard, Miss; get aboard!" said the conductor, obligingly, "I'll attend to that for you."—*New Success*.

Fish Are Biting

Mr. Jones keeps a shop where he sells fishing tackle. For the sake of advertisement, he has a large rod hanging outside, with an artificial fish at the end of it. In the early hours of the morning a man, rather the worse for sight of the fish, went quietly to the door and knocked. Jones, being in bed, looked out of the window and asked: "Who's there?"

"Don't make a noise," was the reply, "but come down as quick as you can."

Thinking something serious must be the matter, Jones dressed like lightning and came down as quickly as possible. "What's the matter?" he asked breathlessly.

"Hush!" was the reply. "Pull your line in quick. You've got a bite!"—*Exchange*.

Insatiable Birds

An old southern negro was asked by the proprietor of a store how he happened to need credit when he'd such a good cotton crop.

"De ducks got 'bout all dat cotton, sah," was the mournful reply.

"What do you mean the ducks got it?"

"Well, you see," explained the old man, "I sent dat cotton up to Memphis an' dey deducts the freights, an' dey deducts the storage charges, an' dey deducts the commission, an' dey deducts the taxes—yes, sah, de ducks got 'bout all dat cotton an' dat's why I'm here."—*Boston Transcript*.

Wishes He Still Hung

He hung on the words

Of beautiful Kate,

And also hung

On the old front gate.

They've been wed now

Ten years, I'd state,

And he wishes he'd hung

On the old front gate.

—*Columbus Dispatch*.

Surely a Catch

Applicant—And if I take the job, I am to get a raise in salary every year?

Employer—Yes, provided your work is satisfactory.

Applicant—I thought there was some sort of a catch somewhere.—*Anon.*

A negro soldier coming back to the dressing station with his right hand missing was seen to stop suddenly and start briskly back towards the front. When questioned as to why he changed his mind, he said:

"Well, sah, I was starting back to find mah hand."

"But," he was told, "you can't grow it on again."

"No, sah, but mah dices was in dat hand."—*Cottonyarns*.

How Many Objects in This Picture Start With the Letter "T"

Here's a Picture Puzzle which contains a number of objects beginning with the letter "T." Just take a good look at the picture—there are all sorts of things that begin with the letter "T"—like train, trap, top, etc., and all the other objects are equally clear. See how many you can find. This is not a trick puzzle; nothing is hidden and you don't have to turn the picture upside-down or sideways.

Twenty cash prizes will be given for the 20 best lists of words submitted in answer to this Puzzle. The answer having the largest and nearest correct list of visible objects shown in the picture that start with the letter "T" will be awarded first prize; second best, second prize, etc.

It Costs Nothing to Try

All can participate in this great Fun-Game from the thirteenth child to Grampa and Grandma. Right after the dishes are done this evening gather all the members of your family together; give each one of them a pencil and sheet of paper and see who can find the most "T-Words." You'll be surprised to find how large a list of words you can get after a few minutes' study. Sit down and try it—then send in your list and try for the big prizes.

This is just a subscription contest. You don't need to send in a subscription to win a prize unless you want to, but our Bonus Rewards make the Prizes bigger where subscriptions are sent in. For instance, if your Puzzle answer is awarded First Prize, you will win \$35, but if you would like to win more than \$35, we are making the following Special Offer, whereby you can win bigger Cash Prizes by sending in \$3 or \$5 worth of subscriptions for *Gentlewoman Magazine*.

You Can Win \$1000

HERE'S THE PLAN: If your answer wins First Prize, and you have sent in \$3 worth of subscriptions, you will win \$500.00 instead of \$35.00; 2nd Prize, \$375.00; 3rd Prize, \$250.00, etc.

Or, if your answer is awarded First Prize by the judges and you have sent in \$5 worth of subscriptions to the *Gentlewoman Magazine*, you will receive \$1,000 as your prize, (or a new 1922 model Buick automobile, freight to your home and war tax paid), instead of \$35; Second Prize, \$750; Third Prize, \$500, etc. (See 3rd column in Prize List).

Isn't this a dandy offer? But look, extra amounts will be given on all prizes in the same manner. It takes but \$5 worth of subscriptions to qualify your answer for the big \$1,000 reward. At once, \$5 worth is all.

GENTLEWOMAN MAGAZINE: 3 YEARS, 50 CENTS

THE PRIZES

	If no subscriptions are sent	If \$3 worth of subscriptions are sent	If \$5 worth of subscriptions are sent
1st Prize....	\$35.00	\$500.00	\$1,000.00
2nd Prize....	30.00	375.00	750.00
3rd Prize....	25.00	250.00	500.00
4th Prize....	20.00	150.00	300.00
5th Prize....	15.00	100.00	200.00
6th Prize....	7.50	50.00	100.00
7th Prize....	5.00	35.00	75.00
8th Prize....	3.00	25.00	50.00
9th Prize....	3.00	15.00	30.00
10th to 15th	2.00	10.00	20.00
16th to 20th	1.00	5.00	10.00

In event of a tie, duplicate prizes will be given.

AUTOMOBILE FREE: As a special prize for the best effort shown in answering the puzzle we will allow the participant winning first prize (if fully qualified with subscriptions) the choice of \$1,000 cash, or a new 1922 BUICK TOURING CAR, value \$1,095, freight to your home and war tax paid.

RULES

1. Any man, woman, boy or girl living in the U. S., but residing outside of New York City, who is not an employee of the *Gentlewoman Magazine*, or a member of the employee's family, may submit an answer. It costs nothing to try.

2. All answers must be mailed by December 10, 1921.

3. Answers should be written on one side of the paper only and words numbered consecutively, 1, 2, 3, etc. Write your full name and address on each page in the upper right-hand corner. Do not write subscribers' names or any thing else on same paper with list of words; use separate sheet.

4. Only words found in the English dictionary will be counted. Do not use compound, hyphenated or obsolete words. Use either the singular or plural, but where the plural is used the singular cannot be counted, and vice versa.

5. Words of the same spelling can be used only once, even though used to designate different objects. The same objects can be named only once; however, any part of the object may also be named.

6. The answer having the largest and nearest correct list of words of visible objects shown in the picture that begin with the letter "T" will be awarded First Prize, etc. Neatness, style or handwriting have no bearing upon deciding the winners.

7. Candidates may co-operate in answering the Puzzle, but only one prize will be awarded to any one household; nor will prizes be awarded to more than one of any group outside of the family where two or more have been working together.

8. All answers will receive the same consideration regardless of whether or not subscriptions for the *Gentlewoman Magazine* are sent in.

9. Three New York business men, having no connection with the *Gentlewoman Magazine*, will be selected to act as judges and decide the winners, and participants agree to accept the decision of the judges as final and conclusive.

10. The judges will meet directly following close of the contest and announcement of winners and correct list of words will be published in the *Gentlewoman Magazine* just as quickly thereafter as possible.

Extra Puzzle Pictures Free On Request

You will find it easy to get a few subscriptions to *Gentlewoman Magazine*. It is by far the best home magazine published for the price. It is filled with splendid stories, fashions, department for fancy work, gardening, etc.

Their Good Night Message

It was evening and several callers were chatting in the parlor, when a patter of little feet was heard at the head of the stairs. Their mother raised her hand for silence. "Hush, the children are going to deliver their good night message," she said softly. "It always gives me a feeling of reverence to hear them. They speak the love that is in their little hearts never so fully as when the dark horse has come. Listen!" There was a moment of tense silence. Then, "Mama," came the message in a shrill whisper, "Willie found a bedbug."

Ax-I-Dent-Ax

A Mystery Solved

A railroad president, weary of listening to the cause of and the cure for the existing industrial depression, decided recently to change barbers. He didn't find relief, however, because the new artist proved to be a railroad specialist.

Among other things the president learned from the barber that railroad wages were too low, freight rates too high, the salaries of

Double Your Mileage Save Your Money

Long Wear Double Tread Tires have double thickness, which insures them against punctures and blowouts; also weather proof. These tires are guaranteed on a 6,000-mile basis, but often give the user 8,000 miles. Take advantage of this great offer and order at once while our stock is complete.

remedy, according to the barber, was government operation with private owner ship.

"You seem to have absorbed a good deal of information on this subject," finally interrupted the fatigued railroad president.

"You bet I have," replied the barber. "What I don't know about railroads is too big to get into a man's head. It they kept McAdoo on the job the roads wouldn't be in this here muddle."

Then the barber added as an afterthought, "you know, I used to shave Mac before he went down to Washington, and he got an awful lot of good railroad dope out of me."

Think It Over

A VIRGINIA farmer had an ox and a mule that he hitched together to a plow. One night, after several days of continuous plowing, the ox said to the mule, "we've been working pretty hard; let's pretend we are sick tomorrow and lie in the stalls all day."

"You can if you want to," returned the mule, "but I'll go to work."

So the next morning when the farmer came out to hitch them up the ox pretended he was mighty sick. The farmer bedded him down with clean straw, gave him fresh hay, a bucket of oats and bran, and went out with the mule to plow.

All that day the ox lay in his stall, chewed his cud, nodded, slowly blinking his eyes and gently swished his tail.

That night when the mule came in, the ox asked him how he got along plowing alone all day. "Well," said the mule, "it was hard and we didn't get much done, and—"

"Did the old man have anything to say about me?" interrupted the ox.

"No," replied the mule.

"Well, then," said the ox, "I believe I'll play off again tomorrow; it was certainly fine lying here all day and resting, with plenty to eat."

"That's up to you," responded the mule, "but I'm going out to work."

The next day the ox played sick again. The farmer fixed him up just as carefully as the day before and went off to plow with the mule.

That night the ox asked the mule again how they had made out and the mule replied as before. "Did the old man say anything to you about me?" the ox inquired again.

"No," answered the mule, "but I noticed he had a long talk with the butcher."

It is the real workers of an organization who are rewarded. The man who lays down on the job doesn't get very far, and it is to the steady, dependable men of any organization that the credit for their company's success is due.—*Firestone Non-Skid.*

Another Verse

If a chicken smiles at you,
Safety first.
Please be careful what you do,
Safety first.
You may not mean any wrong,
She's but one girl in a throng,
But your wife may come along,
Safety first.

—The Bethlehem Booster.

Autumn

By Dr. Royal De Forest Sykes

Assistant to Medical and Surgical Director, Relief Department

The sun, whose burning summer rays filled nights and days with sighs,
Has moved along its orbit to the southern fields and skies.
Jack Frost, with brush and palette and in many a varying shade,
Has transformed verdant woodland gay, and hill, and plain, and glade.

Where once the thrifty woodbine climbed high on its oaken spire,
In summer clothes of richest green, is now ablaze with fire;
The sumac and the maple trees their Springtime garb remould,
And fleck their frills and flounces bright with spots of red and gold.

The fields along the river, where the waving corn spread o'er,
Are now all wigwamed over from the hills down to the shore
With shocks of ripened fodder, all dry and brown and sear,
Each one a sombre warning that King Winter's drawing near.

The Interstate Commerce Commission Presents Tentative Plan for the Consolidation of the Railroads

PARAGRAPH 4 of section 5 of the Interstate Commerce Act reads as follows:

(4) The Commission shall as soon as practicable prepare and adopt a plan for the consolidation of the railway properties of the continental United States into a limited number of systems. In the division of such railways into such systems under such plan, competition shall be preserved as fully as possible and wherever practicable the existing routes and channels of trade and commerce shall be maintained. Subject to the foregoing requirements, the several systems shall be so arranged that the cost of transportation as between competitive systems and as related to the values of the properties through which the service is rendered shall be the same, so far as practicable, so that these systems can employ uniform rates in the movement of competitive traffic and under efficient management earn substantially the same rate of return upon the value of their respective railway properties.

The tentative plan prepared under this act for the consolidation of the railway properties of the continental United States into 19 systems with one alternative plan for the New England lines, was made public by the Interstate Commerce Commission on Wednesday, September 28, and served upon the railroads and state authorities as the basis for a plan to be ultimately adopted by the commission, after public hearings, the dates for which have not yet been announced.

Under the commission's direction, Professor William Z. Ripley of Harvard University has prepared a report which is printed as the appendix to the commission's report. In some respects the commission's tentative plan does not follow his recommendations, which propose 21 systems, but presents alternatives thereto for like consideration, the main differences being indicated. The commission says it has sought to minimize dismemberment of existing lines or systems and that this tentative plan is put forward in order to elicit a full record upon which the plan to be ultimately adopted can rest, and without a prejudgment of any matters which may be presented upon that record. Whenever a property is referred to in the tentative plan, the properties controlled thereby under

lease, stock ownership or otherwise should be understood as included unless otherwise indicated.

System No. 1 is the New York Central; System No. 2 is the Pennsylvania; and System No. 3, the Baltimore and Ohio, as proposed, is as follows:

SYSTEM NO. 3.

BALTIMORE AND OHIO.

Baltimore and Ohio.

Sandy Valley & Elkhorn.

Staten Island Rapid Transit.

Reading System, comprising the Philadelphia & Reading, Central Railroad of New Jersey, and various others.

Cincinnati, Indianapolis & Western.

Chicago, Indianapolis & Louisville.

New York, New Haven & Hartford.

Central New England.

Lehigh & New England.

Lehigh & Hudson.

NOTES:—The Baltimore & Ohio Chicago Terminal is reserved for consideration in connection with terminal situations.

The New York, New Haven & Hartford; Central New England; Lehigh and New England; and Lehigh and Hudson may be included in System No. 7, New England, or System No. 7a, New England-Great Lakes.

Professor Ripley's report does not include in the proposed Baltimore and Ohio group the four last railroads included in this group as proposed above in the tentative plan of the Commission, namely, the New York, New Haven and Hartford, Central New England, Lehigh and New England, Lehigh and Hudson. This fact should be remembered in reading Professor Ripley's discussion concerning his Baltimore and Ohio group, viz.:

Next in order of importance in trunk line territory is the Baltimore and Ohio system. Its location appears on map 4. (Note 1 below.) This property has less than one-

half of the mileage of the Pennsylvania. Its revenue ton-mileage in 1917 was scarcely more than one-third as great. It has a considerable extent, reaching Chicago and St. Louis and the neighborhood of Philadelphia upon its own rails, but it has no access of its own into New York, being dependent upon the favor of the Reading and the Central of New Jersey. It is a powerful trunk line, but with an extensive development only in the middle field of Ohio, West Virginia, and western Pennsylvania. It is attenuated both east and west. And in order to strengthen it financially and as a competitive factor throughout trunk line territory it needs upbuilding at each of its extremities. The problem with the Baltimore and Ohio, therefore, is to incorporate it with other properties which shall let it into New York and into good traffic-originating eastern territory and which shall also extend its mileage to the Michigan peninsula and far and out across Indiana and Illinois to connections other than through Chicago with trans-Mississippi systems. The first of these objects is accomplished by re-assignment to the Baltimore and Ohio of the Cincinnati, Indianapolis & Western Railroad. (Note 2 below.) This property was formerly a part of the Cincinnati, Hamilton & Dayton but was set off from it under reorganization. Its inclusion in the system, if this road were physically improved to standard, might also lead on, by means of trackage over the Chicago & Alton or the Illinois Central, for example, as shown by map 4, into the common gateway set up as a meetingpoint for all systems east and west at Peoria. (Note 1 below.)

The Baltimore and Ohio is also strengthened at its western end by inclusion of the Chicago, Indianapolis & Louisville, otherwise known as the Monon. (Note 3 below.) This road is now jointly controlled through stock ownership by the Southern Railway and the Louisville & Nashville; but as elsewhere set forth in chapter IV, it seems to be of little use to the Louisville & Nashville, which exchanges Chicago business primarily at Evansville. And, furthermore, the policy is definitely adopted in this plan of confining the southeastern systems closely within their own territory; stopping them, that is to say, at the Ohio River gateways.

Where to get Copies

Copies of the tentative plan of the Interstate Commerce Commission for the consolidation of railroads (document No. 12964) may be had from the Superintendent of Documents, Government Printing Office, Washington, D. C., at a cost of 30 cents each.

NOTE 1. Lack of space prevents the reproducing of the map in our magazine.—Ed.

NOTE 2. The Cincinnati, Indianapolis and Western runs from Cincinnati through Indianapolis to Springfield, Ill.—Ed.

NOTE 3. The Chicago, Indianapolis and Louisville has its principal northern terminals in Chicago and Michigan City; its principal southern terminals in Cincinnati and Louisville.—Ed.

This policy releases the Monon and permits it to be built into the Baltimore and Ohio, giving it direct connection between Louisville, Indianapolis, and Chicago. An identity of interest, manifested in the past by the joint maintenance of passenger and freight service by the Baltimore and Ohio and the Monon between Cincinnati and Chicago, is thus revived.

The outstanding problem as respects up-building the Baltimore and Ohio system has to do with the status of the Philadelphia & Reading Railroad. Shall it be incorporated therein or treated as an independent terminal not unlike New England? Its location is such that close relationship through ownership and interchange of traffic with the Baltimore and Ohio has subsisted for many years, and it is now proposed that it be completely merged in the Baltimore and Ohio system. But the relationship of the Reading to the other trunk lines and its strategic location in the heart of one of the greatest industrial districts in the United States render this a difficult matter to decide. On the one hand its essential relation to the Baltimore and Ohio must be conceded, but on the other it is of the utmost importance that the general interest of the other trunk lines in this territory should not be placed in jeopardy.

Independent entrance into New York over its own rails is essential to a Baltimore and Ohio group if it is to continue to compete effectively with the other systems. At present it is dependent upon the Philadelphia & Reading and the Central of New Jersey, not even having trackage rights, but turning over its trains beyond Philadelphia to those roads for operation. It is necessary for improvement of the service, and the public would be correspondingly benefited, if the Baltimore and Ohio were enabled to operate its own trains with its own crews and engines into New York. It already owns substantial freight terminals on Staten Island, with a warehouse and delivery yard on Manhattan Island. But these properties, operated with Baltimore and Ohio forces, are obliged to use other roads as an approach. The satisfaction of this need is imperative. Either full trackage rights from Philadelphia to New York must be given, or the Reading and the Central of New Jersey should be incorporated in the Baltimore and Ohio system. Decision upon this important point compels a somewhat detailed examination of the relation of the Reading and of the Central of New Jersey to the other trunk lines. Choice must be made apparently between the alternatives: first, of treating the Philadelphia & Reading and the Central of New Jersey as a part of the Baltimore and Ohio system; and, secondly, of conceding the joint interest of the other trunk lines in this great industrial section by assignment of an independent neutral status to these properties, treating them primarily as open terminals.

As to corporate relationships, the Baltimore and Ohio seems to have sought, first

among the trunk lines, to protect its interest by a purchase in 1901 of 43.3 per cent. of the stock of the Reading Company. Then through partial control by the Pennsylvania system of the Baltimore and Ohio Railroad, and because of powerful banking interests in New York, a so-called gentlemen's agreement for the preservation of the status quo in trunk line territory was entered into. The outcome was the assurance of a balance of power through division of the Baltimore and Ohio investment in the Reading in equal measure with the Lake Shore. The New York Central, owning 90.6 per cent. of stock of the Lake Shore, thus got 21.66 per cent of the stock of the Reading, an amount precisely equal to the investment of the Baltimore and Ohio therein. The Pennsylvania, under pressure of public opinion, after 1906, withdrew from this Baltimore and Ohio investment. But the New York Central has remained an equal participant in ownership. The combined holdings, in equal shares, of the Baltimore and Ohio and New York Central in the Reading are as follows:

	Stock owned.	Percentage of whole.
First preferred.....	242,600 shares	43.32
Second preferred.....	570,600 shares	67.93
Common.....	400,100 shares	28.58
Total.....	1,213,300 shares	43.33

This intercorporate relationship, it is believed, is not in the public interest in the long run. It savors too much of a deadlock. Responsibility for efficient management shall be focused upon one prime owner. The complete merger of the Reading railroad properties in the Baltimore and Ohio

should, however, if it be recommended, recognize the traffic interest of the New York Central, which should be afforded every measure of protection short of actual ownership.

The geographic location of the various properties, and especially the part played by the Reading in the formation of through routes to the west, is set forth in the accompanying (folded) map. (Note 1 below.) This shows that the Baltimore and Ohio, which terminates at Philadelphia, is absolutely dependent upon the Reading, and through it upon the Central Railroad of New Jersey, for an entrance into New York. But the same map shows that the New York Central Railroad is also dependent for a direct route from the west from Newberry Junction (Williamsport) both into New York and into Philadelphia and the surrounding industrial territory. This dependence of the New York Central is even more clearly indicated upon the large map (3). (Note 1 below.) Large quantities of coal and other freight from the lines west of Williamsport reach tidewater at New York in competition with both the Pennsylvania and the Baltimore and Ohio. Furthermore, the New York Central owns 80,000 acres of coal lands in Pennsylvania which deserve protection. A similar relationship on the part of the Pennsylvania obtains at Harrisburg. The Reading from this point, and especially in connection with the Central Railroad of New Jersey through Allentown, affords a line which cuts straight across to New York, avoiding the congestion about Philadelphia entirely. But it is also true

NOTE 1. Lack of space prevents the reproducing of the map in our Magazine.—Ed.

"Cincinnatus" Sends a Bouquet to Mr. Baugh

"Cincinnatus" is the pen name of a writer who conducts a department in the Cincinnati Post.

Remembering that newspapers have an almost unvarying rule to sell advertising and not give it away, it strikes one that the writer of this editorial compliment to our dining car service must have had a square meal, indeed, when in a recent issue of his paper, he said:

To Dining Car Stewards—

Dear Stewards: Some of you probably never glance at the menus of first-class hotels and restaurants and fix your prices accordingly. Eating on dining cars on some railroads is almost prohibited by prices. I want to take this opportunity to compliment the Baltimore and Ohio dining service. The food is good and the prices are reasonable. Others could be of more service to travelers if they followed suit. Yours for cheaper food.

Cincinnatus.

Come again, "Cincinnatus"—we feel sure of your continued appreciation so long as it waits on appetite and satisfaction, when you visit the Baltimore and Ohio!

that in even greater degree the Baltimore and Ohio is dependent upon the Reading, not alone for its entrance into New York north of Philadelphia, as above stated, but also because of its dependence upon a cross-country interior route for its immense coal tonnage destined for the Reading industrial territory and for all of New England, which lies beyond. This interior route is best shown upon the large map (4) of the Baltimore and Ohio system. (Note 1 below.) For a generation an enormous coal tonnage has customarily left the line of the Baltimore and Ohio west of Hagerstown Md., and has passed north from that point up the Cumberland Valley (Pennsylvania Railroad) to Shippensburg on the Reading, and so on to the northeast over the connecting link of the Lehigh & Hudson to Maybrook, N. Y., and the entire New Haven system. Another connecting link is the Western Maryland, which parallels the Cumberland Valley and admits the Baltimore and Ohio to the Reading rails at Lurgan. This is the historic interior short route, avoiding Philadelphia and New York, parallel with the seaboard, up to the northeast. The interest of the Baltimore and Ohio in the full utilization of this route must be conceded. The detail may, for a moment, be neglected of the dependence for a connection between the two systems upon either the Cumberland Valley (Pennsylvania Railroad) or the Western Maryland over the short stretch of intervening country. The dotted lines of the Western Maryland on the large map (6) indicate this relationship. (Note 1 below.) And it will in due time call for consideration of the status of the Western Maryland itself. But for the moment attention must be concentrated upon the Reading alone.

Such being the geographic conditions, what is the relative participation of these surrounding trunk lines in the Reading car movement? If it be established that the great trunk lines all participate in fairly equal measure, then the claim of the Baltimore and Ohio to inclusion of the Reading reduces itself solely to consideration of the terminal situation at New York. But if, on the other hand, a heavy predominance of Baltimore and Ohio interchange be established, its claim to control assumes a dual basis rather than one which is sole.

The facts as to car interchange for the typical month of October, 1920, are set forth in the accompanying diagram. (Note 1 below.) This shows the number of cars received by the Reading from each of its connections and in turn delivered over to them. The heavy New York Central interchange through Newberry Junction is at once apparent. It is sufficiently heavy to merit protection of this route, which is a direct freight line of importance to the country. It is, moreover, in effect a double-track road with one low-grade track. But, of course, the major interest of the New York Central in through business lies elsewhere. The suggestion has been made that the Central of New Jersey might be separately allocated to the New York Central to complete this route and also to give that system terminals on the West Shore. This will be considered in another connection. As to car interchange, the Baltimore and Ohio traffic enters not alone directly at Philadelphia, but, as above described, practically all of the Cumberland Valley and much of the Western Maryland business from the southwest originates on the Baltimore and Ohio. The net result is indicated for a typical month, October

1920, in the following table of car interchange with the Reading.

	Received.	Delivered.
Baltimore & Ohio (all points) ..	30,588	33,075
New York Central (all points) ..	21,773	17,586
Pennsylvania	19,313	21,285

This establishes the substantial interest of the three great trunk lines. But it also makes plain the predominant interest of the Baltimore and Ohio. The Reading received almost 40 per cent more cars from the Baltimore and Ohio than from the New York Central, and its deliveries were almost double. Baltimore and Ohio records indicate a total interchange of from 1,400 to 1,600 cars per day, which appears to be more than three times as much as the interchange with the other trunk lines. And this, business, be it observed, is more largely through business; whereas for the New York Central the preponderance is local to Reading territory, although New York takes a good deal. Furthermore, many of the large steel interests, at Bethlehem, for example, are entirely dependent upon Baltimore and Ohio coal. All of the facts, after duly weighing them, substantiate the claim of the Baltimore and Ohio on this ground alone to merger of the Reading. But it is equally true that the public interest will be subserved only by assurance of free utilization of the Reading and Central of New Jersey rails by the other surrounding railroads, especially the New York Central. This might be afforded in either one of two ways: The first would be as above mentioned, the consolidation of the Central of New Jersey with the Reading, reserving, however, to the New York Central trackage from the Williamsport gateway (Newberry Junction) through, by way of Tamaqua and Allentown, to Bound Brook and Jersey City. The alternative would be to give the main line of the Central Railroad of New Jersey (map 4) from Tamaqua to Jersey City to the New York Central, together with trackage on the Reading from Tamaqua on to Williamsport (Newberry Junction). (Note 1 below.) Possibly, also, the line up to Scranton might go with this main line. In this event there should be reserved to the Baltimore and Ohio, the Reading trackage rights from Allentown north and east. This would protect the Baltimore and Ohio through line via Harrisburg and Reading to New England and New York. The significant point is that both the New York Central and the Baltimore and Ohio have an interest in this Central of New Jersey property; and, whichever one takes it, protection for the through route of the other should be afforded. Incidentally, of course, provision would have to be made for some joint use of the valuable terminals of the Central Railroad of New Jersey at Jersey City, although the New York Central's West Shore yards certainly give it already more elbow room than the other roads enjoy.

The terminal situation at New York constitutes the other claim of the Baltimore

An Old Story on a New National Condition

Have you ever known one of those fellows who always knows of a story that will illustrate a point or condition that is not clear?

We have all read about Capital vs. Labor until we are sick of it and wish that there was a censor on the newspapers to prevent them printing any more stuff on this subject. But in the Philadelphia Ledger one morning recently, one of these "story" fellows pulled a good one on Capital and Labor and the story he told is older than you or I.

Read it:

"One fine day it occurred to the Members of the Body that they were doing all the work, and the Belly was having all the food. So they held a meeting, and after a long discussion decided to strike work 'till the Belly consented to take its proper share of work. So after a day or two the Hands refused to take the food, the Mouth refused to receive it and the Teeth had no work to do. But after a day or two the Members began to find that they themselves were not in a very active condition; the Hands could hardly move, the Mouth was all parched and dry, while the Legs were unable to support the rest. So thus they found that even the Belly in its dull, quiet way was doing necessary work for the Body, and that all must work together or the Body go to pieces."

Where do you suppose that is to be found?

Right you are, in Aesop's Fables.

—Thermoid News.

Note 1—Lack of space prevents the reproducing of the map in our Magazine.—Ed.

and Ohio to the Reading and the Central Railroad of New Jersey. The Baltimore and Ohio has a substantial investment in terminals on Staten Island and a large and constantly growing volume of traffic into New York. It ought not to be dependent upon mere running rights north of Philadelphia; but it ought to be in position to operate its own trains with its own crews and engines clear into the terminals. The coal and merchandise docks on Staten Island and the warehouses and delivery yards on Manhattan Island are operated with Baltimore and Ohio forces; but from Cranford Junction to Philadelphia the Reading and the Central are merely used as a bridge. Some train crews run through to Cranford, and, contrariwise, some Reading crews run south to Wilmington. But much more efficient and satisfactory operating conditions would certainly result from single ownership and unified operation. The advantages were so manifest that under federal control the Director General placed the Reading, the Jersey Central, the Baltimore and Ohio, and the Western Maryland under one regional director.

Shall the Western Maryland be included in the Baltimore and Ohio trunk line group? Consideration of the large map (4) and the preceding text has indicated its importance as a connecting link from Cherry Run on the Baltimore and Ohio for an interior northeast route to New England and New York. (Note 1 below.) In some respects the Western Maryland would thus build in satisfactorily; but, on the other hand, it is apparent that the two lines practically parallel one another from the seaboard to western Pennsylvania. The Western Maryland would appear more satisfactorily to serve the public interest as a western outlet for a through route from Lake Erie via Pittsburgh. One such route by a short piece of intermediate construction could be formed with the Wheeling & Lake Erie. This is developed on map 6 by construction to Wheeling for the Nickel Plate-Lackawanna group. (Note 1 below.) Such was the relationship set up in the ill-fated Gould system many years ago. The project was actively revived before the war by Western Maryland interests. A natural through route is indicated, especially in connection with the now reorganized Pittsburgh & West Virginia terminals in Pittsburgh. This plan apparently succeeded the arrangements effected by the New York Central about 10 years ago under which the Western Maryland was built through from Cumberland, Md., to a connection at Connellsville with the Pittsburgh & Lake Erie (New York Central). But the elaborate traffic arrangements yielded little fruit. The Western Maryland is primarily a soft-coal road, with an eye to a trunk line future. And the New York Central with its heavy Pennsylvania coal investments is a direct competitor in the one respect as well as the

other. Moreover, the New York Central is already overwhelmingly predominant in the trunk line territory, while, as will appear, the minor systems are in need of upbuilding. These 750 miles of trunk line, therefore, ought to go elsewhere, as this experimental relationship has amply demonstrated.

The real question in case of the Western Maryland, then, reduces itself to choice in its disposition between the Baltimore and Ohio and the Nickel Plate system. For it fails entirely to fit in with the Erie. From a traffic point of view it would strengthen either one. But then, again, there is a legal consideration which is significant. The ordinance of 1902, providing for the sale of the interest and claims of the city of Baltimore in the Western Maryland "as mortgagee, guarantor, stockholder, creditor, and lessor," contained the following proviso in section 1, paragraph 9:

That no title shall vest in the purchaser or purchasers of the stock of the Western Maryland Railroad, if sold to a railroad company now controlling, owning, or operating any lines or system of lines centering, terminating, or operating in the cities of Baltimore or Philadelphia. * * *

This legal obstacle, aiming to preserve competition at this port with the Baltimore and Ohio, taken in connection with the foregoing traffic considerations, leads to the conclusion that the Western Maryland must be treated otherwise than as a convenient supplement to the Reading and the Baltimore and Ohio. Nevertheless it is important that the Western Maryland be not pocketed at Baltimore against free movement to the northeast. Before 1906 the Baltimore and Ohio delivered all of its traffic to this company at Cherry Run. But when the Western Maryland became a competitor by westward extension to

Connellsville, the Baltimore and Ohio opened up a new connection at the Cumbo yard, dividing its business through the interior Reading route between the Cumberland Valley (Pennsylvania system) and the Western Maryland. Adequate protection through trackage or, possibly, with the development of business, through the construction of a new connecting link to supplement the existing lines constitutes a detail not necessary to work out in this plan. But the recommendation to exclude the Western Maryland from Baltimore and Ohio control is final.

A natural extension of the Baltimore and Ohio, based upon corporate and traffic relationships, would be the inclusion of the Pere Marquette. It is lightly dotted on map 4. (Note 1 below.) This property now drastically reorganized, would be an element of strength. Its inclusion would reestablish relationships disrupted by bankruptcy. The two roads have direct connection at Toledo, and operate a joint passenger service from Detroit to Cincinnati. The Pere Marquette makes use at Chicago of the Baltimore and Ohio terminals, and there, also, engages in certain joint operations. This would give the Baltimore and Ohio access freely to a Michigan ferry route, and an outlet to the northwest for its soft coal. But, after due consideration, as elsewhere discussed, it has appeared best to constitute an independent group of all of these Michigan properties, rather than to tie them up one by one to the five trunk line systems, permitting each one a line to the northwest by itself. The Baltimore and Ohio has no need of the Pere Marquette, if such action be taken. It does not seek preferred treatment in the peninsula, but should be protected against a closure of these ferry routes if the available lines are parceled out to others.

Stories of How Veterans and Other Employees Have Secured Substantial Business for the Baltimore and Ohio

Carloads of Freight to October 29 Are 2234; Passengers to October 24 Are 345

THE total number of cars of freight secured through the campaign started by our Veterans has now reached almost 2200. The work has been in progress for over six months, and although the Management is deeply appreciative of the work that has been done and the interest shown, it would belie the facts to say that we as employees have done as much as we could. The average revenue car loading a day on the Railroad is now between nine and ten thousand, a most encouraging increase, by the way, over what it was when the business getting drive began. But when it is considered that as a body of 50,000 and more employees, we have, during a period of over six months, been able to secure through individual solicitation only about one quarter the number of carloads that are daily being received on the system, it will be seen that through a drive that enlists any considerable proportion of all of those in the Baltimore and Ohio family, we would attain results that have not yet been approached.

We have tried through the MAGAZINE to make this campaign of as

much interest to our employees as possible, by letting the men on the firing line tell the stories of how they got the business, for we felt that in this way we would suggest to other employees as many avenues of solicitation as possible. We have told of solicitations on the trolley car, on the train, in the station, by way of club, lodge or other social affiliation, through relatives and through friends, and, best of all, in the way exemplified by some of our fine old veterans, namely, by "pounding pavements." In fact, every solicitation is a bit different from the other and each one offers a new suggestion to those other employees who would like to go out and get business.

The following stories are particularly interesting because they approach the subject of business getting from entirely different standpoints, and they all resulted in substantial business.

It is our hope that within the next few months the Management will see fit to make a fresh start in this campaign, and to organize the railroad thoroughly for it, for in our belief we have scarcely scratched the surface.

Here is a part of the very suggestive and interesting letter that Mr. Pritchett wrote us as to his method of getting business. The names of the firms have been eliminated for apparent reasons:

FLORA, ILLINOIS,

September 12, 1921.

My Dear Mr. Editor:

In passing over the division in the regular performance of my duties of trainmaster, I never pass an opportunity to solicit business. And I am constantly on the alert to secure, not only new business, but to hold that which we have. I find that this can be done in many ways, not only by personally soliciting the movement of freight itself, but in little acts that bind our patrons to us with bonds of friendship that naturally bring business.

There are so many different ways in which you can work to the interest of our patrons without detriment to the Company, that it would fill volumes to try to enumerate them. Here is a concrete example:

We have located at Vincennes, Indiana, a certain industry. Their conditions were bad, due to lack of room and their lack of ownership of ground for extension. I was after them constantly on account of close clearances which created a hazard to the switchmen. Yet with all of the nagging I did, I still retained them as friends and finally corrected the condition. This was due entirely to the fact that on each and every visit I made them, and they were frequent, I observed some condition of the plant or bad practice which meant waste to them, and in each and every instance I called their Superintendent's or General Manager's attention to it with the recommendation as to how it could be corrected.

While they realized that I came for the sole purpose of transacting company business and to bring pressure to bear upon them to provide proper clearance along the tracks, yet I was always welcome and cheerfully received. Their General Manager and Superintendent will tell you that it was through my efforts and recommendations with their President and Board of Directors that this plant was equipped with overhead traveling cranes at an expenditure of \$60,000, which worked great benefit to the company and at the same time enabled them to correct the conditions of complaint.

do

Trainmaster Pritchett Tells How He Got \$20,000 Worth of Business.

"Be fair, be friendly and courteous, and help the other fellow as you expect to be helped."

DURING the summer months. K. S. Pritchett, trainmaster at Flora, Illinois, secured almost \$20,000 worth of business from a single concern for the Railroad. It took a great deal of coaxing to get him to tell the story. He said that he only did his duty and that he didn't like to "blow his own horn," but he was finally persuaded that it was not for his benefit that we wanted the story, but for the good of the whole Railroad. Then he "came across."

This business did not come to him easily. It took many a solicitation, and from people who were well disposed toward him personally and to-

ward the Railroad, but who thought that we could not handle the business, the movement of trainloads of oil, to their satisfaction. Finally the chance was given us. It was, apparently, handled to the satisfaction of the shipper, but not to the entire satisfaction of Mr. Pritchett, and this notwithstanding the fact that he gave the movement his personal supervision. But he explained the slight delays in such a way to the shipper that the handling of the first train brought three more trainloads to our lines, and the prospect is that we will get considerably more of the business in the future than we have ever had.

Another time the—Company in converting their pumping station at—from steam to internal combustion engines, had sold eight carloads of pumping machinery to a firm in Lima, Ohio, on time limit delivery. They then found that they were up against it because it would take more time to secure authority to build a spur in their plant to enable them to handle machinery, than the time limit would allow. Their General Superintendent appealed to me. I surveyed the situation and recommended they make request upon us for the use of our relief derrick and train. This they did, and we loaded out this machinery for them in eight hours without the necessity of building a spur. We charged them a nice, but reasonable sum for the use of the derrick, secured eight carloads of business for Lima, saved them about \$1,100

in the handling and made friends of the local officers of this company. I feel sure that this will be of value to us for all time.

These are some of the few things that get business for the Railroad, and if our people who are constantly soliciting business are not making friends in ways other than a glad handshake, they are wasting their efforts in asking for the business. I find that when you are ever ready to help the other fellow it only requires a hint to have him repair to your relief when needed. I could write a book on how to get business, but it could all be summed up in the few words, "be fair, be friendly, courteous and help the other fellow as you expect to be helped."

Cordially yours,
(Signed) K. S. PRITCHETT,
Trainmaster

ture. Our individual station receipts will not be any heavier, because we are bound to get the freight at this point, but if we can get the entire haul instead of only a percentage, the Company's revenue will certainly benefit to some extent.

It seems to us that it would be a very good idea to watch the interline billing from points where we compete with other lines and solicit the entire haul for our Company at every receiving station which is not competitive.

In case you refer to this in the MAGAZINE, do not give the credit to the agent alone at this station, as Clerk Inhoff helped to get this business. We are not trying to advertise ourselves but would like to see more business on the line.

Yours truly,
(Signed) C. F. ENOCH, Agent

Agent Enoch Offers Practical Suggestion for Increasing Revenue at Non-Competitive Stations

ALMOST all of the business reported in our Veterans' solicitation campaign has been secured at competitive points—which is, of course, as it should be. There are undoubtedly many employes at non-competitive points, however, who have been anxious to do their bit in the campaign, and to them the following letter will be of especial interest:

BOSWELL, PA., September 28, 1921.
Editor, BALTIMORE AND OHIO MAGAZINE,
Baltimore, Md.

Dear Sir—We have been very much interested at this station in noting result of the freight solicitation campaign at the various points along the line. We note, however, that the business is solicited at competitive points, which is no doubt as it should be. It has occurred to the employes here that good results can also be obtained in various ways at points that are non-competitive, even at such stations as small as this. To illustrate:

A short time since, we noted a party of six Italians who desired to purchase tickets to Johnstown, Pa. As they had quite a quantity of baggage with them, inquiry was made as to their actual destination, when it was found they intended to travel from Johnstown to New York over another line. It took some hard work to get this party over our line to New York City, but we got them.

A few days later, we managed to get two and one-half fares to St. Louis and, as in the previous instance, the people had intended to travel via Johnstown. The difference in passenger revenue to our Company for the two cases was \$155.11, while we also had excess baggage amounting to \$18.77 which was about \$15.00 more than if we had permitted them to travel to Johnstown only over our line.

The following instance is somewhat dif-

ferent and the moral plain: A shipment of freight from a point on our lines was badly delayed. When it arrived, we found that it had been billed out over another line, which accounted for a delay of about ten days. We called the consignee's attention to the cause of the delay and advised him that if he had ordered the goods shipped via the Baltimore and Ohio, we would have been able to deliver it to him in 48 hours and that there would have been no transfers en-route. As the shipment was made from Pittsburgh and that point loads a merchandise car to Boswell, the consignee readily understood how he could benefit by ordering his shipments over our line and promised us that he would see that we got the entire revenue in the fu-

Agent Mulvey Changed Their Minds!

PITTSBURGH, PA., October 6, 1921
Editor, MAGAZINE
Baltimore, Md.

Dear Sir:—On September 21, T. O. Mulvey, agent at West Newton, Pa., received information of a party of 17 who were contemplating a trip to Washington, D. C., from Monesson, Pa. to Pittsburgh, Pa., via the ——— R. R. and from Pittsburgh, Pa., to Washington, D. C., via the ——— Railroad. He got in touch with one of the party and solicited this business, securing 16 tickets, including Pullman transportation from West Newton, and arranged for one from Pittsburgh and

Brakeman Artman Gets Passenger Business

The following is but one of many appreciative letters sent by our officers to employees who have secured business for the Company:

CINCINNATI, OHIO,
September 9, 1921.

MR. FRED ARTMAN,
Passenger Brakeman,
Indiana-Illinois Div.,
Cincinnati, Ohio.

Mr. E. D. Ainslie at St. Louis, advises that you have been very energetic in securing passengers via our line to St. Louis, just recently securing two tickets for San Francisco. You can rest assured that we

appreciate this very much indeed, and hope you will find it consistent to keep up the good work, as we certainly need all the business we can get, and with this kind of cooperation can no doubt secure a great deal of business which would otherwise be lost to us.

Thanking you for and assuring you of our appreciation of the interest you have been taking, I am,

Yours very truly,
(Signed) GEO. W. SQUIGGINS,
G. P. A.

Visualizing the Railroad

By J. A. Rupp

Office of Assistant Comptroller

AN official of the Company once told his office workers that they should learn to visualize the Railroad. He said:

"We ought to see the wheels go 'round, by visiting the stations, yards

Passenger Brakeman Fred Artman

and shops, and observing what 'the other fellow' is doing."

This is indeed sound advice, and it behooves us, for instance, when, day after day, and month after month, we are putting down figures pertaining to the cost of fuel, to actually picture in our mind's eye the fireman shoveling the coal from the tender.

We can broaden our vision by making trips along the road (made easily possible by means of the passes provided us through the courtesy of the Railroad). Here we can see the whys and wherefors of our own work, and so be enabled to get out of the rut into which we may have unconsciously drifted.

Errata

On page 26 of the August issue the name of the man whose picture was reproduced in the lower left hand corner should have been given as Boilermaker William Guinch, instead of Master Mechanic Deems.

On page 6 of the October issue, the middle initial in the name of the author, Engineer of Bridges Lang, was given as "H" and it should have been "G".

No Secret

There is no secret about the way our Veterans have been getting business.

They believe in the
Baltimore and
Ohio! Do
you?

Then won't you try to do likewise?

RETURNS OF PASSENGER SOLICITATION CARDS BY BALTIMORE AND OHIO VETERANS AND OTHER EMPLOYES, FIVE WEEKS ENDING OCTOBER 24

VETERAN	PERSON SOLICITED	No. PASSENGERS	MOVEMENT
W. H. Arnold, 115 Elmwood Ave., Newark, Ohio.	Earl E. McMahan, Newark, Ohio.	1	Newark, Ohio, to St. Louis, Mo.
W. H. Arnold,	Earl E. McMahan, Newark, Ohio.	1	Newark, Ohio, to St. Louis, Mo.
Christian Ritter, Baltimore, Md.	Rose Kelly, Baltimore, Md.	1	Baltimore, Md., to Killdeer, N. D.
H. B. McKinley, Washington, Pa.	J. F. Curran, and one Washington, Pa.	2	Washington, Pa., to Atlantic City, N.J.
John Cummins, Wheeling, W. Va.	George Cummings, Wheeling, W. Va.	1	Wheeling, W. Va., to Minneapolis, Minn.
D. H. Moriarty, Newark, Ohio.	Mr. & Mrs. H. O. H. Buchanan, Newark, Ohio.	2	Newark, Ohio, to Kent, Ohio and return.
D. H. Moriarty,	Mr. & Mrs. Henthorne.	2	Newark, Ohio, to Toledo, Ohio.
F. J. Schultz, asst. freight agent, Toledo, Ohio.	Knights of Khorasan, Toledo, Ohio.	97	Toledo, Ohio, to Chattanooga, Tenn., and return.
F. J. Schultz,	Knights of Khorasan, Detroit, Mich.	40	Detroit, Mich., to Chattanooga, Tenn. and return.
G. W. Shepard, 408 S. Calhoun St., Baltimore, Md.	William Mallson, Baltimore, Md.	1	Baltimore, Md., to Philadelphia, Pa. and return.
A. S. Wilson, agent, Niles, Ohio.	Mrs. James Bowden, Niles, Ohio.	1	Youngstown, Ohio, to Philadelphia, Pa. and return.
A. S. Wilson, agent,	Harry Slick, Youngstown, Ohio.	1	Youngstown, Ohio, to Hagerstown, Md.
J. B. Tichenor, cashier, Niles, Ohio.	Clarence Hall, Youngstown, Ohio.	1	Youngstown, Ohio, to Chicago, Ill., enroute Albuquerque, N. M.
J. L. Montgomery, Newark, Ohio.	Miss Emma B. Shrock, Newark, Ohio.	1	Newark, Ohio, to St. Louis, Mo.
C. Ritter, signal rep., 2608 Huntington Ave., Baltimore, Md.	Mrs. Eugene F. Cordell, 257 W. Hoffman St., Baltimore, Md.	1	Baltimore, Md., to New York City and return.
Mr. Rose, agent, Renfrew, Pa.		6	Homestead, Ky., to Cincinnati and Pittsburgh, Pa.
Howard Huddman, pensioned train baggageman, Zanesville, Ohio.		1	Zanesville, Ohio, to Sidney, Neb.
Howard Huddman,		1	Zanesville, Ohio, to Cedar Rapids, Ia.

Historic Relay

By J. A. Byrne
Baltimore and Ohio Gardener

COMPARATIVELY few of the many railroad men and passengers who daily pass the station at Relay know the interesting history of the town and station, or how the place came to be called by that name. Yet there is no place on our line more intimately connected with the development of our great railroad system than this pretty Maryland town. Relay was the first terminal of the Baltimore and Ohio and on the line between Baltimore and Ellicott's City (then called Ellicott's Mills) where was run the historic race between the horse and the locomotive.

When the Baltimore and Ohio Railroad commenced operation in 1828 the cars were drawn by horses. The first station was in Baltimore, on Pratt Street near Charles. From there the tracks ran out Pratt to Poppleton Street, where the second station was built. This building, the oldest railroad station in the United States standing, is still being used and on it is a bronze tablet giving its interesting history.

From this station the line ran to a point just west of the present St. Denis station, following about the same route as do the present freight tracks from Mount Clare. From this point it ran straight ahead until the county road was crossed. There the first terminal station was built, upon the site now occupied by the stables connected with the coal and lumber yards, which can be seen in passing.

The First Terminal

This station remained the terminal of the road for some time. Then the

line was extended to Ellicott's Mills. Fresh horses, called a "relay," were required to cover this additional distance, and, as the change of horses was made at the terminal, the name "Relay" was gradually applied to the station and its vicinity.

Changes in the Line

When the line was extended to Ellicott's Mills the tracks ran along the bluff at the southern edge of what is now the park at Relay station, passing close to where the monument at the end of the stone bridge now stands, and following the windings of the Patapsco to Ellicott's Mills. The rails used on the entire line were flat bars of iron, fastened to long blocks of granite. The ends of these bars occasionally became loose and sprang up, with disastrous results to the floors of the passing cars. Some of these granite ties, with the rust marks from the rails still showing plainly, were found near the Relay station not long ago.

Later, when the Washington Branch was being built, the tracks were diverged from the old road-bed just west of the present St. Denis station and the line constructed over the same ground as the present one. A new station was built about where the freight house on the eastern end of the Relay platform now stands. From there the tracks swerved a little toward the north, hugging the base of the hill, and crossed the other tracks at grade. There were a number of bad accidents at this crossing and it was done away with (about 1852) by opening a cut where the Main Line now runs.

Famous Viaduct at Relay

While the stone bridge at Relay was being built it was called "Latrobe's Folly." In the years of 1834 and 1835, while under construction, this eight arch stone bridge, 725 feet long and 65 feet high, was considered a great engineering feat. H. B. Latrobe, the engineer who designed the structure, met with much opposition, many other engineers thinking that it was impossible to build a railroad bridge according to his plans. He persisted, however, and time has fully justified his faith in himself and in his bridge, for the bridge is still in service—one of the oldest stone-arch railroad viaducts in the world. Notwithstanding the enormous increase in the weight of trains it has proved itself capable of bearing any required weight.

The mound of rock that was left when the Main Line cut was being made was later removed and the stone used in ballasting the road-bed of the cut-off between Carroll's Switch and West Baltimore.

First "Mealing Stations"

A few years later the Baltimore and Ohio decided to build a hotel or "mealing station" on this site. While there were rooms where an ill or very tired passenger might rest for a day or so, there were no accommodations for permanent guests and the railroad's sole desire was to increase the comfort of its passengers. Up to that time passengers on both steam and stage lines were inclined to look upon mealing stations as rather gruesome jokes. The food was usually so hot, or else delayed so long, that the time allowed for the stop had almost expired before the hungry travelers could commence eating.

In order to remedy these conditions, the Baltimore and Ohio determined to establish its own mealing stations, and to see that its patrons got plenty of good food and had a comfortable period of time in which to eat. To keep the passengers from being made uneasy by the fear that their train would leave without them, the conductor was served at a table in full view of all the others in the room, and did not rise from his place until it was almost time for the train to leave.

For the convenience of those who only desired light refreshment, a lunch counter was established in the large waiting room. The hotel was surrounded by beautiful grounds, where those who so wished could wander among the flowers and shrubbery. This building is said to have been the first in the United States to

be erected by a railroad for the comfort and convenience of its patrons. The Viaduct Hotel was famous, and I have often heard people say that they would not think of passing Relay without entering the hotel to drink a cup of coffee. Mr. Sharp, at that time the head of the hotel service, would often say that he was not at all dissatisfied if the hotel did not make a profit—that the good will and advertisement secured by our road was a sufficient return on the investment. The officials of the Baltimore and Ohio Railroad thought then, as they do now, that the public appreciates good service, and that if everything possible is done for the comfort and convenience of travelers, they will use our road again, and induce their friends to use it.

The small station on the site of the present freight house was used until about 1860, when a much larger one was built on the opposite side of the track, just west of where the switch tower recently stood. This station was used during the Civil War and until October 1873, when the Viaduct Hotel was opened.

The Patron "Saint Denis"

Although Relay and St. Denis are practically the same town, St. Denis, until quite recently, was the post office. In the early days of the railroad a politician of some note, one Denis A. Smith (I think he was State Treasurer) bought property at the junction of what is now Sutton Avenue and the Washington Road and built the stone house which still stands there. Mr. Smith was a high-roller and entertained extensively. On account of the wild doings at his house some of his associates sarcastically nicknamed him "St. Denis." When the postoffice, which he was largely instrumental in having established, was built, it was named after his nickname, and continued to be so called until quite recently.

There are several interesting old houses in Relay. Among them is one on the Company's farm, built of bricks brought from England. The interior woodwork also came from over the sea.

How Rolling Road Got Its Name—Other Historic Roads

A hundred years ago, when Maryland was a great tobacco growing State, there were no railroads to ship by, and few, if any, of the wagons and carts of the period were strong enough to carry a hogshead of tobacco. So other means of getting the tobacco to market had to be devised.

The method most in use was to put a stout pole through the center of the hogshead, allowing it to project about three feet at each end. Three or four men were required to handle each hogshead, two of them being provided with stout handspikes. They rolled the hogsheads along the road, and, if one end got too far ahead, one of them would put his hand spike in front of the pole and hold that end back. It was hard work getting these hogsheads up hill, and pretty nearly as hard work getting them down. Going down hill a man would stand at each end and put his hand spike in front of, and under, the pole, to act as a brake to check the speed. The other men kept in front and backed down hill, pushing against the hogshead to keep it from getting away from them. This method of transportation accounts for many of our crooked roads—they were built to avoid hills and soft spots.

Rolling Road, which crosses our tracks near the station, got its name from this method of taking tobacco to market. The low field along the river bank, opposite the end of the road, was once a part of the river bed and there was a wharf there. Tobacco planters from Howard and Baltimore Counties, as well as those from Carroll and Frederick, rolled their hogsheads of tobacco to this wharf, for shipment in coasting schooners. Nearby was a shipyard, in which some of the best boats that traded along the coast were built. A man who died in Elkridge a few years ago remembered loading boats at the Elkridge wharf, in existence after the Relay wharf had disappeared.

In revolutionary days troops and supplies had to be moved over dirt roads. The upper part of the road which runs along the Patapsco, on the Baltimore County side, was built under the direction of General Washington. This road, known as the Gun Road, started from the Frederick road above Ilchester and ran down along the river to Avalon, where the troops either forded the river, or crossed in boats, and continued on to the Washington Road. This road was in use until the big freshet of 1868, when a good part of it at and below Ilchester was washed away.

On Rockburn Branch, about a mile west of Relay, on the Howard County side of the river, were two iron furnaces, in which was smelted the ore dug out of the hills above Upper Elkridge. On the Baltimore County side of the river was the Avalon Iron Works—a bustling plant that manufactured iron plates, bars and nails. These works were destroyed by the freshet of 1868.

Steamboat at Relay

It is not generally known that a small steamer plied the Patapsco as late as 1868. The owners of the iron works and Ross Winans (who did much toward the perfection of the freight locomotive, and who was owner of 700 acres of land in Relay), spent a great deal of money in straightening and deepening a channel as far up the river as the stone bridge. They then purchased a small tug and a number of scows. One wharf was built just below the stone bridge, on the Baltimore County side, and several on the shore of the Winans' farm. Pig and scrap iron was loaded on the scows at Baltimore and transported to the

Part of the garden at Relay station showing train from Washington Branch crossing old Thomas Viaduct

The Thomas Viaduct was once called "Latrobe's Folly," but is still in service—one of the oldest stone-arch railroad viaducts in the world

wharf at the bridge. It was then wagoned up to Avalon, and the manufactured iron hauled back and loaded on the scows, to be taken to the city.

The steamboat made several trips a week until the freshet of '68 completely destroyed both the channel and the wharves. On the morning of the freshet the boat was moored to a large willow tree at one of Winans' wharves. When the river began to rise four men climbed into the tree to make the rope fast higher up on the trunk. So rapid was the rise of the water that the fields were flooded while the men were working, and the tree washed away. One of the men remained on the tree until rescued near the Light Street bridge, but the others were drowned. This freshet carried away many houses in Ellicott's Mills, and many people lost their lives.

Before the opening of Druid Hill Park in Baltimore, Relay was a popular excursion ground and breathing spot for Baltimoreans. Near the station there was a grove of trees, in the center of which was a dancing pavilion and a band stand. During the summer scarcely a week passed without one or more excursions. Special trains brought the people from Baltimore early in the morning and in the evening, by loud whistle blasts, notified them that it was time to return home.

There was another excursion place at Relay, where there were various kinds of amusements, swings, flying horses, etc. The flying-horses were very different from those of the present time. A large pole was set up and guyed. It had four booms running out from it, securely guyed from the ends to the top of the pole. From the end of each of these four booms was suspended a frame in which there was a seat for two persons. When all these seats were

filled two men stationed near the center would push the booms around. A bowling alley was another popular place of amusement.

In my boyhood the gudgeon fishing was very good and was enjoyed by crowds of anglers from Baltimore. I

Relay station was formerly the Viaduct Hotel, the first railroad "mealing station." A glimpse of Mr. Byrne's property on the hill behind

have often seen both banks of the river so crowded with anglers that it was difficult to find a place from which to cast a line. This sport, and the places of amusement, were broken up by the Civil War.

Civil War Times

Although only one Confederate soldier ever appeared in Relay in uniform (he came to visit an aunt early in the war, before the Federal soldiers occupied the town, and was allowed to depart without molestation), the place was fortified, and soldiers were present in varying numbers all during the four year struggle. On account of its position, Relay was used as a concentration camp for troops who were held in readiness to be moved either south or west, as the needs of the military situation might require.

At the outbreak of war the military authorities realized that Relay was a point of great strategic value, and decided to occupy and fortify it. At that time it was the junction point of the Main Line and the Washington Branch, and the place where all passengers between the west and south had to change cars. All the traffic between north and south also passed this station, as the cars of the Pennsylvania were hauled from Baltimore to Washington over our tracks. There was then no Metropolitan Branch connecting Washington with the Main Line, so the capture of Relay or the destruction of the stone bridge by the Confederate troops would have been a great advantage to the cause of the South.

A few days after Fort Sumter was fired upon the writer's father, Andrew Byrne, who was baggageman at Relay, noticed two men, who had driven out from Baltimore in a carriage, engaged in examining the bridge. The men finally seemed to agree upon a spot suitable for their purpose, and drove away. My father, who had become suspicious, at once went to Baltimore and informed Mr. England, one of our railroad officials, that he suspected a

Looking up the valley through which the winding Patapsco flows

plot to destroy the bridge. Mr. England gave orders that trackmen were to guard the bridge day and night. This was done for a few days, until, one Sunday morning, a train discharged a detachment of soldiers at the Lawyers' Hill crossing. These soldiers took possession of the roads and the stone bridge, making all who wished to cross the river go around by the Washington Road bridge. After some delay they marched to a nearby hill and encamped. They soon built a small fort on this hill, mounting two guns and commanding the stone bridge. Later they built another small fort, just west of the present Relay station, also mounting two guns and commanding the bridge.

This detachment was soon followed by other regiments, who encamped in the neighborhood. Barracks and a hospital were built on the Walze property.

When the engineers who had charge of building the Federal Hill fortifications in Baltimore finished that work they came to Relay and laid out earthworks, mounting seven twelve-pound guns, a thirty-four pounder and a heavy howitzer. There were also two twelve-pounders mounted outside the gate of the fort. This fort, which stood on the bluff above the Viaduct Hotel and commanded the stone bridge and the river valley, was called Fort Dix, after General John A. Dix. These works have long since been leveled and my house stands on the spot where the thirty-four pounder was mounted.

Soldiers occupied Relay until the end of the war. The drill ground was where the village of St. Denis now stands, then open fields. Almost every day the regiments, a band or drum and fife corps at the head of each, would march from their encampments to the drill ground, there to go through their drills for hours at a time.

The soldiers were usually dissatisfied with their food and would often forage around the surrounding country, searching for something better, robbing chicken coops, meat houses and dairies—no place that contained anything eatable was safe from them. When caught in these depredations they were punished, often in a way amusing to bystanders but decidedly uncomfortable for the offender. The usual way of punishing a chicken thief was to knock the head and bottom out of a barrel, fix it over the body so that the head and legs protruded and place cards, bearing the words "CHICKEN THIEF" in large letters, at the front and back of the barrel. Thus attired the guilty

one was forced to march up and down the Relay station platform all day—the guard on duty there keeping him moving. For other offenses the culprit was forced to march up and down the platform with his knapsack filled with stones.

When the soldiers needed wood or straw they usually took it without troubling the owner by asking his permission. One day a party of soldiers, under the command of a non-commissioned officer, struck a snag while engaged in a search for straw.

They went to a farm and started to take the straw from a stack. The farmer, not wishing to get in trouble, made but slight objection. Not so his wife.

"Have you a quartermaster's order for that straw?" she demanded.

"Don't need one," replied the non-com. "Go on—load it up," he added to the soldiers.

The farmer's wife drew a pistol from under her apron.

"I'll shoot the first man who puts a fork in that straw without an order," she declared, a dangerous glitter in her eye.

The non-commissioned officer got the order and the woman allowed them to take the straw, knowing that, on the strength of the order, the government would pay her its value.

Toward the end of the war, and even after its close, passengers from the south and west would often ask where the great battle of Relay had been fought. They were incredulous when told that there had been no fighting anywhere near Relay, insisting that they had read accounts of the battle in their home papers.

A few Confederate soldiers got as far as Woodstock on the Main Line, and Beltsville on the Washington Branch, but no further. Relay was never seriously threatened.

In the territory that has been called Relay ever since the coming of the railroad there are now two thriving towns, one called by the original name of Relay and the other St. Denis.

At the time of the Civil War, when this section of the country was under martial law, there was little or no chance for real estate development. On Rolling Road there had been built but eight houses, five on the north side of the Railroad and three on the south side. Shortly after the war, a man bought a piece of property south of the present St. Denis station, and had it laid out in building lots. He then chartered trains to bring excursionists out from Baltimore to attend auctions of these lots, offering as an

inducement to buy, \$100 to the first purchaser, \$75 to the second and \$50 to the third. The first house was built by Michael Ready. This proposed village he named St. Denis.

Later on a Mr. Colbert bought some property on Rolling Road, just north of the present public school and built three or four houses on it. Then a Mr. J. P. Richardson bought the ground south of this to the railroad, on which he built two houses, and a Mr. McDonald, three. A Mr. Wallze afterward bought the property between the St. Denis estate and the Washington Road and sold it off in building lots. These men may be styled the "boomers" of Relay, for from their individual efforts has grown a suburban village which is a credit to the county.

Bonehead Dan

*Verses and Illustration by
Robert L. Heiser*

When th' rain is fallin',
Local comin' back,
Queer mysterious stranger
Walkin' up th' track.
Look out local!
Look out man!
Somethin's gonna happen
To bonehead Dan.

Umbrella open,
Can't see a thing.
Nothin' in his head—
Ring bell, ring!
Got a head all right,
Plain you can see that,
But th' only thing it carries
Is an old derby hat.

Hear th' bells a ringin'?
Loud and long!
Naw—'tain't no weddin'
Nor 'tain't no song,
Somethin's gone and happened
Just like I said,
That old derby hat
Ain't got no head.

By P. G. Lang, Jr., Engineer of Bridges

ON October 1, 1921, the Baltimore and Ohio Railroad opened to traffic the new double-track bridge crossing the Great Miami River, between North Bend, Ohio and Lawrenceburg, Ind. This structure consists of six 210-foot through truss spans, with two 45-foot deck plate girder approach spans at each end, and has a total length of 1,441 feet.

The vicinity in which this bridge is located is of historic interest. At various times when excavation has been made in connection with masonry work at this point, Indian relics have been found, including stone tomahawks, mortars for grinding small quantities of meal, and flint arrow heads. The homestead of President William Henry Harrison, "Old Tippecanoe," was near the site of this bridge, and his tomb is located at North Bend, Ohio, three or four miles east of the Great Miami River crossing.

The portion of the road on which this crossing occurs, namely the line between Cincinnati and East Saint Louis, was originally known as the Ohio and Mississippi Railroad, incorporated February 14, 1848, and opened to traffic in 1857, prior to which latter year, undoubtedly, the first bridge crossing the Great Miami River at this point was completed.

The original structure consisted of truss spans, probably of timber construction. It is apparent that, at some later date, the bridge was changed to a structure consisting of three spans of iron Fink trusses. In 1894 the bridge was again reconstructed, and three 210-foot through truss spans were placed, with a 48-bent trestle approach at the west end. This bridge contained 1,013,000 pounds of metal, and its total length was 1,350 feet.

During the great flood which occurred in Ohio, Indiana and Illinois in March, 1913, the west pier of the

structure built in 1894 was destroyed, the two west spans carried out, and the major portion of the west end approach destroyed. The high water crest at this time was $2\frac{1}{2}$ feet above the base of rail. The construction of a temporary trestle spanning the river and the rebuilding of the trestle approach was begun on April 7, 1913, and traffic was restored at noon April 27, 1913, immediately subsequent to which the reconstruction of the west pier and the erection of two new steel spans proceeded. The pier was completed December 27, 1913, and the erection of the steel completed and traffic carried on the new pier and new steel spans January 31, 1914. This structure and all of its predecessors were single track.

Unusually severe weather occurred during the winter of 1917 and 1918, and, between 2.30 and 3.00 p. m., February 12, 1918, the three spans of this structure were overturned and destroyed, due to an accumula-

tion of ice above the bridge, which attained a height varying from 8 to 10 feet above top of rail. This condition was caused by a heavy ice gorge in the Ohio River, below Lawrenceburg, which retarded the flow of ice in the Great Miami River. When the ice gorge in the Ohio River, at Rising Sun, Ind., broke, at 2.05 p. m., February 12, 1918, the water in the Ohio River fell very rapidly, drawing the ice and water from the Great Miami, and created an ice pressure which it was impossible for this bridge to withstand. Between February 12, 1918 and October 1, 1921, when the structure was opened to traffic, Baltimore and Ohio Railroad trains were detoured.

The new bridge has its base of rail 10 feet higher than the other structures which existed at this point. This increased height, in conjunction with flood prevention work, has placed this bridge out of danger from floods. The substructure, consisting of seven main piers, two bank piers and two bank abutments, is entirely new; the seven main piers were carried down under air pressure to suitable foundation, the distance from base of rail to bottom of foundation being approximately 100 feet. In the sinking of these piers, reinforced concrete caissons, built at the sites of the respective piers, were used. In the new structure, the following quantities of material were used: concrete, 18,200 cubic yards; concrete piling, 4,300 linear feet; steel in superstructure, 8,000,000 pounds; timber in deck, 205,000 feet board measure.

In conjunction with the reconstruction of this bridge, a revision of line was made at the east end.

A total of 210,000 cubic yards of earth embankment was placed.

The new bridge, opened to traffic on October 1, is modern in every respect, designed for the heaviest motive power, with 14-foot track centers and overhead clearance of 25 feet. The total cost of the work is somewhat above \$2,000,000.

This work was handled by the Engineering Department of the Baltimore and Ohio Railroad, H. A. Lane, chief engineer, P. G. Lang, Jr., engineer of bridges, A. H. Griffith, district engineer. The superstructure was fabricated and erected by the American Bridge Company; practically all work in connection with the substructure, grading, etc., was done by the Vang Construction Company, Cumberland, Md.

Changes in Claim Department

The following changes are announced by C. W. Egan, general claim agent, effective November 1, 1921:

George W. Hesslau, division claim agent, Chicago Division, at Garrett, Ind., is transferred to the New Castle Division with headquarters at Youngstown, Ohio, vice Robert Childers, resigned.

J. L. Allen, division claim agent, Connellsville Division, at Rockwood, Pa., is transferred to the Chicago Division with headquarters at Garrett, Ind.

P. C. Dix, claim agent, located at Pittsburgh, Pa., is promoted to Division claim agent of the Connellsville Division with headquarters at Rockwood, Pa.

W. W. Baldwin is appointed claim agent; not assigned to any particular territory.

Bailing or Calking?

By F. L. Charles,

Assistant to General Freight Claim Agent

Like fishermen out on a choppy sea,
We were sailing along quite merrily,
When our old boat sprang a leak.
Excited and nervous we heard a shout
And all hands started to "bail her out."

But, while we were bailing we could not row;

With an offshore wind and without a tow,

We were driven to sea in an open boat,

Bailing our darndest to keep afloat.

The word comes back, "Boys, close the leak."

So calk it up and get back to the oar
And pull like the devil to get to shore.

Are you *Bailing*

(Recovering Lost Packages)

and just drifting aimlessly with the wind,

OR

Are you *Calking*

(Preventing the Loss of Packages)
And getting somewhere?

If you can't be a pine on the top of a hill
Be a scrub in the valley—but be
The best little scrub at the side of the rill—
Be a bush if you can't be a tree.

If you can't be a bush, be a bit of the grass
Some highway to happier make;
If you can't be a muskie, then just be a bass
But the liveliest bass in the lake.

If you can't be a highway, then just be a trail,

If you can't be a sun, be a star;
It isn't by size that you win or fail
Be the best of whatever you are.

—Exchange

A view showing the substantial, yet chaste and beautiful appearance of the new bridge

What Nellie Did to Hardtack

By Frank Kavanaugh

PEGLEG" MURPHY'S train was made up and ready to make its daily trip up the mining branch. As the single coach at the end of the string of cars seldom carried a passenger, Pegleg did not trouble to have the train backed to the station and was naturally surprised when the agent came out of the building and called:

"Back her up, Pegleg, and load a coupla trunks and some other junk."

"What the—" The old conductor hesitated in amazement. In all the years he had run the branch train he couldn't recollect carrying a passenger that had more luggage than a suitcase.

"Back her up," the agent repeated. "You're about due to get out of here and you wouldn't want a pretty girl to soil her shoes walking through those cinders, let alone leaving her baggage behind."

"A—a girl!" Pegleg exclaimed.

"The prettiest that's hit the Junction in a year," the agent replied. "And she's one of us, too; she's the new agent at Hardtack."

"The world is coming to an end, or maybe Volstead is but a myth," said Pegleg, "or I haven't woke up yet and this is all a dream. A girl for agent at Hardtack! Why, the last man the Central had there was run out of town and had to walk clear back here."

"I know it," said the agent, "but this girl says she's the new agent, and her pass says so. Back up and load her baggage."

Hardtack, the new mining town half way up the Central Branch, was the product of a demand for lead and zinc. The ore was shallow and the mining easy, and the scattering town was built about the shafts. It was what is known as a shack town—buildings half lumber, half canvas, constituting the place. There was no residence section, as none of the miners cared to bring families to such a place. Half the business places in the town inferred practically that the Volstead law hadn't been adopted yet, while others sold rough clothing, rougher food and roughest hardware.

Miss Nellie Campbell, known to her associates in the general offices as "Nell," conceived the idea of a great adventure. She had the road's business at her fingers' ends, and therefore she knew that an agent at Hardtack had about as much chance as an aviator in a submarine. The town was "hostile" toward the road, to say the

least. Then both the Midland Valley and the Copper River railroads operated main lines through the place, while the Central had nothing but a decrepit branch line with which to serve the town. And the Central, instead of maintaining a decent station, had nothing more elaborate than two pensioned box cars, their trucks removed, stuck end to end. And the whole service consisted of Pegleg Murphy's "mixed" train, which made the round trip once a day, Sundays excepted.

When Miss Campbell broached the subject of her great adventure to her boss, he listened patiently, fearing that one of his best clerks had become slightly insane from the heat. But she persisted:

"If you want to change to a position like that," the boss had argued, "I'll send you down to Rankin's Corners, on the main line. There's excellent society there, rich farmers, autos, dances—"

"I'd rather try Hardtack," Miss Campbell countered.

"There's no women there."

"You forget the Salvation Army."

"The drunks shoot holes in our station."

"I'll stay behind the ticket case when the shooting begins."

"There's a den of rattlesnakes under one corner of the station."

"I'll make pets of the cute little things."

"Make out a pass for Miss Campbell," the boss said, turning to a clerk, "to Hardtack and return." He emphasized the last word.

So it was that on the following morning, Pegleg Murphy's train received its first female passenger within a month of blue moons.

Left to herself as Pegleg's train slowly ambled on up to the end of the branch, after a short "checking in" by the traveling auditor, who evidently chose one of the other roads on which to reach Hardtack, Miss Campbell walked to the edge of the platform and took stock. A hundred yards away stood the tippie of a mining shaft. An equal distance away, in the opposite direction, was what could be termed the business portion of the town. As she looked, a man staggered out from a shack, over which swung a sign, "Restaurant." He started in the general direction of the Central boxcar station, covering the road in diagonal gyrations. For a moment the heart of the girl sank. But the fellow, after

having covered half the distance, ran up against a telegraph pole, hugged it, and subsided to the ground, where he lay motionless.

A cable whirled in the tippie and several men came to the surface. A big man led the way to where a large motor car stood, evidently out of commission. The other men followed and they set about to repair it. The girl heard high words pass between the big man and the driver of the car.

Straight in front of her the smoke of a locomotive appeared. A little to the left another came in view. She knew them to be the trains of the two competing roads, the Midland Valley and the Copper River. It was those big roads she had to buck. The Midland train reached the crossing first, got the block and she could hear the rattle of the wheels across the intersecting frogs. A few seconds later the Copper River train took the crossing, its big locomotive scarcely slackening speed. Mentally the girl compared the trains with the decrepit little engine and dirty coach engineered over the branch by Pegleg Murphy and his crew. A touch on the shoulder startled her.

It was an elderly woman, wearing the bonnet of the Salvation Army.

"You are Miss Campbell?" she asked. Then she continued, not waiting for an answer. "Why did they send you here? This is no place for a young woman. Look at it!" She swung her hand in the direction of the sunbitten little town of shacks and iron roofs, sweltering in the glare.

"I came," Miss Campbell replied, because I want to try my business skill. The Commander in the city directed me to write to you. I would like for you to stay with me for a few nights."

"I will come over tonight. My daughter and her husband are in charge here. But it is a disheartening place. Everyone who does not sell intoxicants drinks them. And drinks to excess."

"And the officers?"

"Are at the county seat, forty miles away. They care nothing for this place. The town is not incorporated and we have no local officers."

"I will clean up the station and make ready my stove. You and your people must come and dine with me."

Two hours after, the station cleaned even to the hanging of bright chintz curtains on the windows, Miss Campbell welcomed the return of Murphy's train on its down trip. She had sold no tickets, nor was there freight to load or unload. The big roads got it all.

Half an hour later the girl again

looked over toward the nearest mine. The big man still tinkered with the motor truck and it appeared that mining operations had ceased, for the men loafed around. Struck with an idea the girl secured her parasol and walked across the sand to where the big man worked.

She was at the truck before the big man noticed her. When he did he stopped in the act of turning a bolt and looked at her as if she had escaped from an asylum.

"I am the new agent for the Central," she introduced herself. "You're having trouble?"

"Ay bane," the big man said slowly, with an accent that told of his birthplace. "Da fule driver, he run her over the ditches too fast. She bust."

The girl measured the distance from the mine to the Central station with her eye.

"There's no ditch between here and the Central's siding," she said.

"We bane ship over da Midland," the man informed her.

"And lose half a day because of the haul with the motor truck. I'll have a car over there tomorrow if you'll give me a load."

"And tomorrow after that you go way and we bane lost the car. Aye lost one car that way. Twelve hundred dollars it was and more than a month before we got the returns."

"But I'm going to stay. Fix that car and let me know."

"Ma pardner, he below. We bane talk about it."

"Bring him over to the station at six and I'll have a surprise for you. And I'll promise not to talk shop unless you start the conversation into that channel."

The big man wiped a piece of greasy waste over his forehead.

"We bane come."

Billy Grieves, late graduate of a western mining college, was in the dumps in more ways than one. The dilapidated truck owned by him and his partner, Oleson, would get tantrums just as they had a lot of ore to send to the smelter. And until ore was at the smelter no funds could be drawn on it. The truck was the best they could afford. And as he fumed below, searching sump holes in which to store the ore, his partner fumed above, trying to fix the motor car. Finally he came to the top. It was quitting time. The men stood around.

"How the devil are we going to pay off Saturday with all this ore here?" he asked Oleson, as they washed up.

"We've got at least ten cars of free ore down there, but it isn't worth ten cents to us. I'd better run into the city tomorrow and try to raise the

payroll. With twenty times its amount here in ore I should be able to raise enough." Oleson grunted.

"There bane new Central agent," he remarked.

"Another willie boy that'll let them run him away tonight, eh?"

"This one bane purty girl."

"What!"

"She bane peach; yust like my Helga. Aye tank aye look around the depot this night to see no bums raise hell."

There was nothing but the sound of faces being washed for a few seconds.

"We bane go there now," Oleson said. "Aye got idea."

"Not in these dirty clothes," Grieves said.

"Come on—you're a miner—not a willie boy."

"That's so—I'm game."

A homey, unaccustomed smell of cooking foods greeted the two miners as they neared the station. A make-shift table covered with white linen appeared as they walked to the door. And they were welcomed by the girl! It was so different from the greasy, dirty shack-restaurant at which they usually ate!

An hour after, as the men, having put away a good meal, smoked, Miss Campbell broached the subject of business.

"We'll have little freight to offer you, I'm afraid," Grieves explained.

"We've got the ore here, all right, but we have been slow getting it to the

cars. You can't borrow money on ore at the mines, and if we fail to pay off Saturday it means that we will have to close for a while, until we rake up more capital."

"I could have a car set out tomorrow and it would reach the smelter within twenty-four hours after it was loaded. The Central has a red ball freight that passes through the Junction about midnight."

"That would be about twelve hours too late. As soon as we have a car at the smelter we can have half the approximate value of it placed to our account. If the car reached there, as it would, Monday, it would be Tuesday or Wednesday before the money was placed to our credit. These business men send a man down to the bank Monday morning to cash the checks. Our checks would be turned down."

"Why not load a car tonight? That would give you forty-eight hours leeway."

"But you have no car here, and we can't load on a Midland car—it's too far."

"There's an empty ore car two miles down the branch. It was set out bad order and the men came up to repair it today. It must be all right by this time."

"But it's farther away than the Midland cars."

"Try pulling it with your motor car. It's level track all the way and dirt ballast."

"You're having trouble." "Ay bane," the big man said

"The motor could pull it, I believe."
 "It could!" Oleson interrupted.
 "We bane pull it up here! We load!
 We sell!"

"It's a crazy proposition, I know," Miss Campbell said, "but try it. It may give the Central a sort of prestige."

"It'll give the Central more than that," Grieves said. "I happen to be president of the Mine Owners' Association of Hardtack."

That night Oleson and young Grieves worked the clock around, while Miss Campbell, too excited to sleep, walked back and forth and encouraged them, in addition to carrying them hot coffee and a lunch at midnight.

* * * *

"What's the matter with Miss Campbell?" asked a man from the traffic department a few days later, as he entered the boss' office.

The old man started. "Why?" he asked. "Has she been hurt?"

"Evidently not," the freight man replied. "But she sent in an order for twelve ore cars yesterday, and I just called to see if she was all right in her head. You know what Hardtack is?"

"She has that much haul for us," the boss said.

"But how did she do it?" questioned the freight man. "Ever since we had that fight over the right-of-way proposition those people have boycotted us."

"Besides that," continued the freight man, "one of the dispatchers tells me the Hardtack folks loaded a whole crowd of rowdies into an empty freight car the other day and made us haul them to the Junction."

"Probably Miss Campbell's organized a better government league there. There's a fine opening for one."

For two months the boss watched the reports from Hardtack. The outward haul averaged about ten cars a day. Then one day the car orders ceased. For two days nothing came. The third day was absolutely void of business. Attempts to get the station on the telephone were fruitless. The boss waited two more days.

"I'm going up there. Murphy says Miss Campbell has vanished and the station's closed," he told the freight man. "We'll take the division engineer's gasoline car."

"I'm with you," the freight man asserted.

The boss, recollecting his start in life, turned the switch leading to the branch and headed the little car up its rails. Murphy's train had an hour's start, and there was nothing else on the line. But a mile from Hardtack the gasoline car turned a

sharp curve and stopped about ten feet from the rear end of the dilapidated passenger coach which ended the branch train. On the platform of the car the brakeman smoked.

"Why aren't you flagging?" the boss asked.

"Didn't you hit the torpedoes?"

"No."

"I'm in 'or it, then," the brakeman said. "I've just returned from setting them. I'll bet some of those blamed celebrators swiped 'em."

"What's holding you here?" the boss asked again.

"The procession. The wagon road was too dusty and they're walking up the track. Miss Campbell's—"

"Her funeral procession?" the boss asked, fearing the worst.

"Naw," the brakeman said. "It's her celebration. She married a mine owner a few days ago. Tried to keep it secret, but they all thought she'd been kidnapped and quit mining to hang the man who did it. Now the whole town's celebrating. All with soft drinks, too. They've chased the bootleggers and bums long ago. Town's gone on the W. C. T. U. lay."

The engineer signaled to start. The brakeman gave him a highball and the gasoline car followed the coach. At the station a crowd had congregated. The girl who had once been Miss Nellie Campbell greeted her boss with pleasure and introduced him to Billy Grieves, her husband and other notables of the town. Then she took him into the office.

"They'll start shipping again tomorrow or the day after," she said breathlessly. "We've cleaned up the little town and the men are beginning to bring their families here. It'll be a good town from now on. Billy's going to build us a bungalow. You know Maggie, my chum in the office? Send her up here to take my place. There's no end of young mining men here. And after her, there's Frances. She'd just suit a young mining man I know. She's such a pretty blond. He owns half interest in No. 15, and it's a good paying proposition, too. Better than Billy's. And after her, there's—"

"But young lady, or Mistress Grieves, I should say," the boss interrupted, "the Central's a railroad, not a matrimonial agency. We can't take a contract to furnish wives for Hardtack miners."

"But think of the haul you'll get when all the wives of the shippers are partial to the Central! Effie would just suit a young miner I know. He's—"

"I'll give it due consideration," the boss said. Turning to the freight man he motioned toward the gasoline car. "Let's get back and start hunting new

girls for the office force. I'm afraid Hardtack will play the deuce with our force, now that it's started."

Here Lies—

By G. R. Merrymann
 Shop Clerk, Riverside

THE waste basket is a symbol of oblivion. To it are consigned the failures and the "has beens," old love letters, appeals that met with no response, things emptied of their significance by Time.

It is the grave of dead thoughts. What a mass of human effort and emotion its contents represent! The merest printed circular, flung there with hardly a glance, stands for long hours of eager planning by somebody, and the skilled labor of many hands. Men have striven with their utmost of ability to win your interest, and have failed. The waste basket records their failure.

Those little ink-inscribed bits of paper that lie submerged in its depths, are pieces of human documents; letters of friendship, full of cordiality, and harking back to pleasant experiences; family letters, expressing loyal affection, and giving word of those at home; letters that once made the heart beat quickly. At first a joy, they became an accumulation, and are now a "good riddance."

There is day-before-yesterday's newspaper. The events it describes are already remote. The issues heralded in its fervent editorials are now either settled or in the background. It is as ancient as Rip Van Winkle.

With the newspaper is a popular magazine of last January. How utterly flat and stale it seems! The heroes and heroines who stalk, chatter and pose through its pages, are now forgotten. The great man eulogized in a glowing article has since fallen into disfavor. The big names flaunted on the cover have a look of mockery. The "most gripping story ever written" has been superseded by a score of others. The "brilliant comedy success," puffed by the critics, has left the boards forever.

In among these "has beens" are a host of "might have beens"—inchoate ideas, jotted down but never consummated; letters that were written but never sent; plans for homes that were never built; dazzling schemes abandoned out of fear that they were visionary. Aspirations, gropings—how they might have changed fate for some of us!

Few things escape you long, old Juggernaut! One after another, they lose their hold, and fall into you. And you are always waiting.

Over a Million a Year for Train and Engine Supplies

Yet a Conductor on the Toledo Division is still Using the Lantern Issued to Him Thirteen Years Ago

By C. J. Kearney

Supervisor Train Supplies and Expenses

THE expense to the Baltimore and Ohio for train and locomotive supplies, including such items as fusees, lanterns, marker lamps, together with labor of handling them, amounts to more than one million dollars each year. It is estimated that from one quarter to one half of this expense results from the waste of supplies and every employe in train and yard service can help to reduce this expense to the extent of a total saving of at least a quarter of a million dollars per year. The expense for engine sand amounts to about \$100,000 per year. Some of the articles of train and engine supplies in common use, which it is in the control of individual employes to use carefully and economically, are listed below with the approximate number used in a year and the cost of purchase:

Item	Number Used	Cost
Fusees	952,899	\$85,761
Lanterns	35,930	48,506
Marker Lamps	4,874	41,275
Torpedoes	1,776,018	26,640
Scoop Shovels	22,109	26,531
Long Spout Oil Cans	17,200	21,500
Water Coolers	3,924	18,239
Flags	91,024	8,208

In the order of relative expense the item of fusees stands first on the list. The Company buys one half as many fusees as torpedoes. This would appear to be out of proportion to the number of each article that is actually required for flagging and full compliance with the rules for the protection of trains. This proportion means that one fusee is used or lost for every two torpedoes that are used.

Unnecessary Supplies in Cabooses

In checking cabooses recently, it was found that several of them had over 200 torpedoes and from three to four dozen fusees each. A great many caboose crews will put in a requisition for fusees and torpedoes when their cabooses already contain several times their allowance.

The 35,000 hand lanterns used per year cost the Company nearly \$50,000. The average number of train and engine employes is 13,000. This means an average of one lantern per man each five months. There is a conductor on the Toledo Division who has the first lantern issued to him 13 years ago. Undoubtedly the majority of employes use one lantern

for several years. From this it is easy to see how large a number are destroyed by the occasionally careless employe.

Marker lamps cost the Company \$41,000 each year and there are locations on the Railroad where as many as 50 markers have been picked up in a period of a year. These had dropped off locomotives because of their being carelessly handled. This large expense can be materially reduced by greater care in the use of marker lamps.

The 22,000 scoop shovels used per year cost the Company \$26,000. The average life of a scoop is apparently about two months. Many firemen use a scoop for several months and some firemen for a year or more. This means that many are destroyed or lost through the carelessness of a small percentage of employes. One supply train recently picked up 100 scoops, 50 of which were in serviceable condition.

Over 17,000 long spout oil cans are used per year, an excessive number when it is considered that one of these will last a number of years if properly cared for. This is the case with many engineers, who even put their names on their cans, when they receive the same care and attention as if their own personal property. These articles seldom wear out but are broken through rough handling in taking off and putting on supplies at the engine supply houses. A great many are broken by being thrown off on the ground and having other supplies, such as rakes or shaker bars, thrown on them.

The same is true of water coolers. It is rather significant that where these coolers are permanently at-

tached, as they are on cabooses, there are only one sixth as many used per year as there are on locomotives where they are taken off and put on at the supply rooms. When it is considered that all the Western Lines and some points on the Eastern Lines are using jugs, 3,400 coolers per year for locomotives seems to indicate that these articles are being handled rather severely. A great many of them are rendered unserviceable by having the spigot broken off by rough handling at the terminals or by being put on the tank in such a way that they jar off and are broken.

Although 91,000 flags per year does not represent a great item of expense as compared with some of the supplies mentioned above, it is felt that this could be greatly reduced. Over 80 per cent. of these were put on locomotives; this seems out of proportion. An inspection of a number of engines showed that these flags are generally rendered unfit for service by being left around until they become too dirty for use.

Thanks to the Savings Feature

June 25, 1921.

Mr. W. J. DUDLEY, Superintendent, Relief Department, Baltimore, Md.

Dear Sir—I must say many thanks to the Relief Department for the way they handled my business, as I now have a clear title to my home.

Yours truly,

(Signed) Thomas W. Miller,
Engineman,

Chicago, Ill.

Murphy—Do you like codfish balls, Mr. Dolan?

Mr. Dolan—I don't know, Mr. Murphy, I never attended any.

Engineer Martindale a Saver

Engineer Martindale of the Toledo Division, who pulls locals between Dayton and Hamilton, has been giving some attention to picking up firing tools which have been carelessly discarded by other crews, and bringing them into the shop for re-issue. On one day he brought in seven clinker hooks and within a period of six weeks it is estimated that he has recovered 35 or 40 hooks.

Passenger Department

Beginning with this number of the Magazine the Passenger Department will, from time to time, print items concerning our Passenger business, which will be of interest to the employees of other departments

Selling a Service

ONE of the important factors in a successful organization is the close co-operation of the different departments; and one department can be of immense help to another by having a sufficient knowledge of the other department that could be used to advantage.

This is particularly true in regard to the Freight and Passenger Traffic Departments in their relations to the other branches of the service. The commodity for sale by the railroads is transportation; the Traffic Department makes the sale and the Transportation Department delivers the goods.

It is logical, therefore, that the selling points of the Traffic Department should be known so that the other departments can assist in making a good sale, or perhaps make the sale themselves.

On these lines the railroad business, as well as any commercial business, must be built up.

From Everywhere to 7th Ave. and 32nd St.

THE Baltimore and Ohio has recently entered into an agreement with the Pennsylvania Railroad Company for the continued use of the Pennsylvania Station as its passenger terminal in New York City. This arrangement not only gives our local patrons a convenient entrance into New York, but it fortifies the line generally for business coming to it from other lines.

While this information has been given wide publicity through the newspapers and in various other forms of advertisements, there are thousands of people who do not see or read them. All employees will help if in every way they try to spread the information.

Tank Cars for Milk

THE Baltimore and Ohio has "pioncered" in many things, the latest illustration of which is the Milk-Cream Tank Car, which was on exhibition at the National Dairy Show at Minneapolis during the week of October 10-15. Much interest was displayed in this most revolutionary method of transporting milk and

cream, and among the twenty-five thousand who inspected the car were the proprietors of the largest dairies and restaurants of America, government dairy agents from foreign countries, representatives of various chambers of commerce, state dairy and health officials, the editors of dairy publications, etc. A complete illustrated description of the car will be given later in the columns of our MAGAZINE.

The "Velvet" of Passenger Revenue

IT behooves all of us to sit up and take notice at this time when business is at ebb tide and see what we can do individually to put our house in order and hustle for new tenants. A freight train is run when there is freight to haul; but a passenger train is put on a schedule, advertised, and must run whether it hauls anybody or not. Every passenger fare may therefore be said to be "velvet." It is this "velvet" that helps mightily to pay our wages. Let the freight man figure on the average revenue obtained from a carload of freight from New York to Chicago. Let the operating man figure on what it costs to haul it. Then make the comparison of the net revenue with the price of a ticket from New York to Chicago and you will find a convincing argument that it is more than worth while to secure a passenger wherever it is possible.

The Human Equation

COMPETITION is always keener when business is dull. Hence unusual activity in the Passenger Department is noticed on many sections of the line.

The excellent service of the Baltimore and Ohio between Washington, Pittsburgh and Chicago has been given particular attention. It is not only the short route, but the excellent through trains, splendid equipment and courteous service sell themselves to the public. A man or woman traveling feels that he or she is entitled to the best dining service, and they are not disappointed on the Baltimore and Ohio.

The whole proposition of "service" is dependent upon the human equation. Something may go wrong in

the dining car, or a train employee forget and be discourteous, and the passenger who pays his good money gets the worst of it, and naturally condemns the whole railroad.

It remains therefore for each employee to watch his own job—when the chances are few that the standard of excellence will be lowered.

Unsolicited letters of commendation are received by the hundreds, but when a complaint is made there is nearly always a just reason for it.

A few paragraphs from letters received recently are quoted in illustration:

"The writer has noticed particularly the excellent service, and above all the most courteous attitude of employees at all times, which is quite a contrast to the rather gruff manner in which the traveling public is handled over some other well known lines."

In this case it is quickly noticed that the writer was making a comparison with some other trip on some other line where his treatment was not what it should have been.

Another:

"Your roadbed is in good shape and there is an absence of jar in stopping and starting your passenger trains at night * * * and one particular thing which appeals to me is the marked courtesy of your trainmen to the traveling public on these trains, etc."

If the engineer of a switch engine, who carelessly jams a sleeping car at night, should fall into the hands of the passengers he disturbs and knocks about, wouldn't you think that "turn about" would be fair play—that resentful passengers would be cleared by any jury in the land, on the plea of self defense?

Keep Your Eyes on Washington

THE eyes of the whole world at the present time are turned on Washington. It is not the first time, nor will it be the last time. It is the greatest capital city in the world. From it has come decisions which have settled the destinies of dynasties.

Washington is peculiarly associated with the Baltimore and Ohio. It is virtually the hub of our railroad, the only line which centers its activities to and through the great capital between the east and west. This, the oldest railroad in the world—94 years—gave the best it had in defending the capital in the great civil war. All through trains between New York, Philadelphia, Chicago, and St. Louis enter the threshold of Washington before continuing their journeys.

Maryland's Queen City

PERSONS passing through Cumberland, Md., on the Baltimore and Ohio, obtain a very imperfect idea of this beautiful town, which has been named "The Queen City of the Alleghanies."

Cumberland, like Rome, is built on seven hills, which, in addition to the beautiful valleys of the Potomac River and Wills Creek, give to it that picturesqueness for which our railroad is noted.

Within the past few years Cumberland has gained rapidly as a manufacturing city. The Kelly-Springfield Tire Company has erected here a factory which by the first of January next will be employing forty-five hundred persons and manufacturing forty-five hundred tires each day. This plant when entirely completed will have a capacity of ten thousand tires per day, which means that eventually it will employ ten thousand persons.

There is also the American Cellulose and Chemical Factory, which is a branch of an English Company. It is understood that this plant will soon be in operation and that its product will be artificial silk.

The Paragon Automobile Com-

pany is erecting a factory at Cumberland, which, when completed, will give employment to three hundred persons.

Cumberland also boasts of the Cumberland Steel Company, which makes a specialty of steel shafting. Their product is not only used extensively throughout the United States but is exported to all parts of the world.

The N. & G. Taylor Tin Plate Mill is also located at Cumberland, as well as several large glass factories.

The United States Steel Rail Mills are located at Cumberland, where rails for narrow gauge railroads, etc., are manufactured.

Cumberland is growing by leaps and bounds. At the present time there are more than seventy-five dwelling houses in course of erection, while business houses are springing up all over the city. It is a good place for capitalists to invest their money.

Passengers holding tickets reading via the Baltimore and Ohio Railroad have the privilege of stopping over at Cumberland, and if this is taken advantage of they will not only be repaid by seeing a beautiful city, but may be able to embrace the opportunity to make satisfactory investments.

A Short Step from Automobile to Train

THERE are two important passenger stations on the Baltimore and Ohio to which the attention of automobilists should be called, for the conveniences offered them.

Mt. Royal Station, Baltimore, is perhaps the most ideal "automobile" passenger station in America. It is on the principal automobile thoroughfare north and south through the city. It is easy of access, has plenty of parking space within its enclosure, and passengers are landed within seventy-five feet of the trains, with no steps to climb.

Our station at 24th and Chestnut Streets affords the same station conveniences.

Thanks!

TO the many employes of the Railroad who have brought passengers to our lines, we extend sincere thanks!

A pleasant smile from the conductor when he takes up the transportation; intelligent information, pleasantly given to inquiring persons by employes; a good-natured suggestion to Jones or Smith that "we have the service;" in these ways we can help increase our friends and our revenues.

Protection from Cancer

Written at the request and with the approval of the Maryland Cancer Committee, representing The American Society for the Control of Cancer

THE object of Cancer Week is not to spread alarm about cancer, but to bring hope. The surgical experience of the past few decades has proved clearly that cancer, in most cases, can be prevented—that early treatment will dispose of it and work a complete cure. Furthermore, this experience has also demonstrated that a cancer does not begin as a cancer—that at first it is always something else; a lump, a wart, a mole, an ulcer, a bruise, a burn—something that, in itself is harmless enough. How such things turn into cancer is not known, but that they do is abundantly proved. The aim of the cancer education is to cause the public to take notice of such pre-cancerous warnings. If they are treated in time, then all danger of cancer is disposed of. If they are neglected, there is always the chance that they will suddenly turn malignant, and bring about a condition that even the most desperate surgery cannot remedy.

Cancer is not inherited. It is not a blood disease. It is not contagious. A patient with cancer is no more dangerous to those around him than a patient with a broken arm. Just why and how a cancer starts no one knows accurately, but a great deal is known about its progress after it has started. It spreads from the site of its beginning, destroying the healthy tissues of the body as it goes. It sends forth living cells which start other cancers in other parts of the body. It gradually reduces its victim to such a condition that nothing whatever can be done for him; save palliative measures to relieve his agony. He is hopelessly ill, and will certainly die.

But this is only after the cancer has become fully developed. In its

early stages there were plenty of chances to cure the patient. The best of these chances were at the very start, before the lump, the pre-cancerous wart, or ulcer or bruise had become a genuine cancer. But there were still good chances after it had become a cancer, but before it had begun to spread. Once that spreading had begun, the patient's outlook began to be dark. Slowly the odds against him mounted up until they were beyond a hundred to one. But at the start the odds in favor of him were even greater.

The pre-cancerous lesion—the lump, the wart, or ulcer, or unhealed bruise or burn—behaves differently in different cases. Sometimes it remains harmless indefinitely, and the patient dies years afterward of some disease other than cancer. Sometimes a cancer develops within a few weeks. Sometimes it takes years. But the pre-cancerous lesion is always menacing—it is always a sword suspended over the patient's head. He should get rid of it while there is yet plenty of time, for once it is gone no cancer will develop where it was. A good doctor will be able to decide what it is, and how dangerous it is; no layman can hope to do so without grave risk of fatal error. If it is of the dangerous variety, simple and painless treatment will usually dispose of it. If it is neglected and a cancer appears, then only the most radical treatment can cope with it. And in its later stages not even the most appalling operation can do more than prolong the patient's life. A pre-cancerous lesion is always curable. An early cancer is usually curable. But a late cancer is usually absolutely hopeless.

The records of every great hospital show how steadily the patient's

chances of recovery decline. In some varieties of cancer, in the early stages, nearly every patient who submits to proper treatment gets well, and the majority of them stay well. But as each successive stage is reached the percentage of recoveries falls, and toward the last stage it suddenly falls to zero. This last stage comes when the original cancer begins to send out colonies. These colonies start other cancers elsewhere—usually in the internal organs, beyond the reach of operation. The patient, starting with one cancer, now has many cancers, and it is quite hopeless to try to remove them. All that can be done for him is to try to relieve some of the terrible suffering of his last days.

No one knows precisely what causes a cancer, or what it is. But the enormous study that has been given to the problem in late years has at least shown surgeons how to deal with it, and so the struggle against the disease begins to be hopeful. It can be cured—if taken in time. But the time to take it is before it has definitely developed—in the stage of warning. A coming cancer almost always gives warning beforehand. The patient is conscious that there is something wrong. A lump is felt, there is a growth on his lip, or a sore spot on his tongue, or pain in one of his joints or bones, or a hurt or a mole somewhere on his skin, or a burn or a bruise that won't heal, or he feels discomfort in his stomach or abdomen. If a woman, the patient notices a lump in the breast, or a discharge that is unnatural. This is the time to seek competent medical advice. Nine times out of ten it will turn out that there is no danger of cancer—that simple treatment will suffice to remove the danger signal. And even if cancer is threatened, the treatment at this early stage is simple and painless, and the cure is certain. But every day's delay means a graver danger. When the cancer is fully developed only the most radical treatment can do any good, and even this is usually unavailing.

But there is no reason why the great majority of cancer victims should ever get into this last stage. The proof that early treatment might have saved them is now overwhelming. If laymen will only heed that proof—if they will seek competent advice about the signs that go before cancer—then the present high death-rate from the disease will be greatly reduced, and the world will be saved much intolerable suffering. The cancer situation is anything but hopeless. On the contrary, it is full of hope.

"Just Like Dad"

An Editorial in the Chesapeake and Ohio Employees' Magazine

OUR artist has drawn a picture for the cover of this MAGAZINE that suggests an interesting conversation between a conductor and one of his brakemen. The little chap in overalls with his lunch bucket on his arm rushed down to the railroad track as a well remembered whistle and the curling smoke announced the approach of the local freight upon which his Dad was brakeman.

As the train rushed by, the little chap waved his chubby hand "high ball" and smiled; and the brakeman in the cupola threw a kiss to the boy and another to the house on the hill, and smiled too.

"Your boy?" said the conductor.

"Yes," replied the brakeman, "that's my oldest."

"And is that your home up there on the hill, and your wife on the front steps with the baby in her arms?"

"Yes, My Wife, My Baby, My Home."

"Got your home paid for, I s'pose?"

"Well no, but I'm paying something on it every month, and if I don't have any bad luck, I'll finish in about two years."

"How much insurance do you carry," said the conductor, "to protect your wife and babies and your home?"

"Sixteen hundred with the Brotherhood," replied the brakeman.

"Listen partner," said the conductor, as he stepped over and sat down in front of the brakeman, with his hand resting on his knee, "this is your first trip with me, and I want to talk to you seriously."

"Going to make a railroad man of that boy?"

"You bet I am, it is a good business."

"Do you want him to be the same kind of a railroad man that you are?"

"Oh, I don't know," replied the brakeman without raising his eyes, "I'm not 'so worse.'"

"Let's see about that," said the conductor, as he lighted his pipe and settled himself for his customary conversation with new men.

"As this engine was coming down from the roundhouse through the yard this morning, I saw you riding on the pilot. Do you want that boy of yours to be a pilot rider, a violator of the rules?"

"When we were shifting our train a while ago, I spoke to you about ad-

This is the splendid cover of the August issue of the Chesapeake and Ohio Employees' Magazine. With the article accompanying it, a strong appeal for safety was made, and we are glad to reproduce with full credit to the C. & O.

justing coupler with your foot as cars were about to come together.

"How does it strike you to imagine the fellows bringing that boy of yours home a few years from now, with his foot crushed off, because he was trying to be a railroad man 'just like dad'?"

"The other boys tell me you are in the habit of going between moving cars, adjusting couplers in front of moving cars and doing a number of other dangerous things where a single slip would mean your death.

"In what sort of a fix do you think you would leave that wife and those kids in the house on the hill if you should make that slip, with only sixteen hundred dollars between them and the loss of that home?"

"How do you like the idea of your wife leaving the kids with the neighbors and going to work all day?"

"How about the other widows and orphans that would result from collision which might be caused by your 'short flagging' or by an open switch?"

"Suppose that boy of yours should get in trouble later on because of some such careless act, how much defense would he find in the claim that he was doing his work 'just like dad'?"

"If you want your boy to be the kind of a railroad man that really amounts to something, you have got to be that kind of a dad, and you are not that kind of a railroad man, nor that kind of a dad if you take the chances that I have talked to you about.

"If you want to railroad on this crew, you'll have to cut 'em out for good and all. This is known as the 'Safety crew,' and an unsafe man finds no welcome with us."

How about it, fellows?

Apply this conversation to the section foreman driving his motor car, to the mechanic chipping without goggles—the idea is the same.

If you would have your boy be a railroad man, 'just like dad,' be sure that you are the right kind of a dad.

Don't Use Unsafe Tools

Indiana Division: When attempting to remove a drifting valve from an engine, a machinist and his helper were pressing against a Stillson wrench and it slipped and the machinist's finger was caught between the wrench and the running board and mashed. The machinist stated that the jaws of the wrench were worn and he knew it before starting on the work, but that it was the best wrench he could find and that he thought it would hold.

The Easiest Way

Many of us make mountains out of mole hills. Given a task, we do not seem to have the qualifications to attack it intelligently. We go after it in a haphazard, excited or indifferent way and the job is bungled in the end.

The illustration is of two conductors who alternate in taking a commuter's train out of Camden Station, Baltimore. One of them, as soon as the train starts moving, opens the door from the baggage room into the smoking compartment and, holding his head up, with a voice which carries, says: "All tickets, please." The result is that the passengers are ready with their transportation as he proceeds down the aisle and he is seldom slowed up while the requisite pasteboards are being hunted.

The other man, of long service, of splendid appearance and a credit to the Railroad in every way, makes the mistake of not announcing what his mission is when he goes into a car. The result is that he is unnecessarily slowed up and loses time in his work.

Studying the respective methods of the two men indicates that the former, who announces his mission when he steps into a car, really does the passengers in that car a favor. It is easier to have your ticket or pass in your hand when the conductor approaches, even while talking to your seatmate or reading your paper, than it is to be brought up with a sudden jerk when he arrives at your seat and then have to fumble around for your transportation.

On occasion the difference in method between the two men means a real difference in revenue to the Railroad. For on certain days the train is unusually crowded and the conductor of the slower method is unable, with the rest of the crew, to cover the entire train before the first station is reached. This means that certain passengers sometimes get by without surrendering their tickets.

There are mighty few of us who cannot learn something of advantage and profit to our work, if we will observe the up-to-date methods used by successful employes and officers with whom we are associated, and take a leaf from the book of their experience.

Sportsmanship

About two weeks before the World Series opened, the New York National team played a team of the old Giants, men who were players on League Championship-Giant teams of a decade or more ago. The spectacle was more than interesting. It was affecting, for was not the game staged as a benefit for "Christy" Mathewson, "Big 6," probably the most idolized and the most ideal

of all baseball players, now fighting hard for his life against the White Plague at Saranac Lake, New York.

The benefit created wide-spread interest and support among New York fans and there were many beautiful tributes paid to the old Spartan and his fighting qualities by the sports writers of the New York press. None, however, was more to the point than the following, run, strange to say, as a display advertisement in several New York papers by the well-known merchants, Lord & Taylor:

To a Square Sportsman and a Hard Fighter

There is a great pageant at the Polo Grounds to-day. And despite the names and presence of the old-time Giants, it is not a pageant of baseball alone. For, in spirit, an odd troop walks across that field.

Frank Merriwell and Ivanhoe are there—Leonidas, Hector and Hercules. King Arthur and his Knights march proudly on and with them Roosevelt and Anthony Wilding.

The list is long. Sportsmen All—there they are. They march today invisible across that field to honor Matty—a square sportsman, a hard fighter and a lineal descendant of their immortal line.

In that number of immortals, who of us will fail to find the names of several who have been ideals at one time or another in our own lives? From Hercules, mythological hero of the ancient Greeks and the reputed founder of the first Olympic games; past Leonidas, King of the Spartans and who was killed at the Pass of Thermopylae; to Wilding, perhaps the greatest tennis player who ever lived and who perished with thousands of his fellow Australians in the ill-fated attack on Constantinople in the Great War, and to our own beloved Roosevelt—their fighting qualities and standards of square sportsmanship have thrilled and uplifted whole peoples.

It is an interesting thing to note in this day, when many people are prone to say that our morals are retrograding, that standards of sportsmanship are being put on a higher and higher plane.

In baseball there is much less umpire baiting than there used to be. And rowdiness of every sort, although sporadically evident at all times, brings down general and unqualified condemnation on the offenders.

The value of universal physical education and training is becoming more and more widely recognized and it is but fitting that with this greater participation in sport by our people should also come the higher standard of sportsmanship.

What real sportsman wants to see a horse race in which one of the runners has been doped? What real hunter or fisherman goes after his game out of season? Who, but the most ignorant, will applaud umpire baiting and rowdiness on the ball field, or slugging in a football match? What man worthy of the name, will hit below the belt in a fair fight?

One of the most interesting developments of recent years on the Railroad is the number of employes engaged in interdivisional and interdepartmental games; bowling, basketball, baseball, and the like. Besides providing real recreation for the players, these games have gotten many other employes out into the open, or brought them together for better acquaintance and finer sociability in athletic halls.

The ideals of true sportsmanship, if practiced on the field or in the gymnasium, cannot help but inculcate the same ideals in our other relationships in life. But if our games of physical competition are played on the basis of "go out and win, no matter how you do it," the same unfair and unsportsmanlike methods will get a foothold in our business and other activities.

The management of the Baltimore and Ohio is in the hands of fair fighters, of men who play the game of business absolutely on the level, of men who practice the square deal, always. This should be of the greatest encouragement to the rest of us who are trying to keep the big and complicated machine moving smoothly—to know that in giving a square deal to our employers we will most certainly get a square deal in return.

To Those Interested in a New Industrial Relationship—

Writing in *The Human Side* for October, Kingsley Moses has this to say, in part, about the Industrial Conference of the Y. M. C. A. held at Lake George, New York, in September:

No general discussion of the consequences of the Silver Bay meeting would be either fair or complete without reference to the various plans there outlined for improving the conditions of employees in industrial enterprises.

Most important of all, as the most successful experiment along lines commonly considered radical, is the report of the Duchess Bleachery of Wappinger's Falls, New York, a plan that is an out-and-out partnership division of the profits and losses—and Mr. Hatch emphasized the latter word—of the industry. To quote Mr. Hatch, who is the president:

"Our profit sharing is a fifty-fifty proposition. The Market wage for our industry is paid to labor and a minimum of 6% is paid to capital. After these have been paid, together with regular operating expenses, depreciation reserve, taxes, etc., and after the Sinking Funds have been provided for by setting aside 15% of the net profits for labor and 15% for capital, the remaining net profits are divided 50% for capital and 50% for the operatives, and the latter sum divided in proportion to the amount of each one's pay for the period. This is the outline of the general plan, the only explanation necessary being that the Sinking Funds of, respectively, 15% for labor and 15% for capital are intended to guarantee capital its minimum return of 6% during periods when this shall not be earned, and to provide unemployment insurance for the operatives, paying half wages when the company is not able to furnish employment."

By "partnership," Mr. Hatch means first, a just and proportionate share of the profits and losses of the business; second, an appropriate share in the management; third, a knowledge of the affairs of the company.

The partnership plan of the Duchess Bleachery has been in operation for about four years. In that time production per man has risen on an hourly basis from 38 to 40 yards, then to 48 yards, and in April of this year, under peculiarly favorable conditions, to 58 yards; an improvement in production of very nearly 100 per cent.

Economists may find that this plan is not fool-proof but it is certainly an experiment that should be followed and studied very closely.

“———, but he's never out.”

Four or five years ago a publisher, perhaps the best known in the United States, was walking through the editorial rooms of his nationally known New York newspaper. His glance fell upon a gray haired fellow sitting over a copy desk. Turning to the managing editor, who accompanied him, he said:

“Who's that?”

“So and so,” was the reply. “He has been with us for years—used to be a star reporter—but now we give him only easy assignments, stuff that doesn't tax him too much.”

“He's getting too old for this game,” snapped the publisher. “Let him go.”

And the next pay envelope to the old Roman carried the telltale blue slip—the “not wanted” notice that has crushed the spirit and sinew of many a man.

* * * * *

Within a fortnight there began to appear daily in another New York City newspaper, the greatest rival of the one above mentioned, a new kind of feature article, signed (we will say) “X. Y. Z.” The editor who had accepted it wasn't sure that it would “go,” but decided to give it a trial, with the result that very soon its unusual style, homely truisms and attractive philosophy were making an ever enlarging circle of pleased readers. And the editor began to feature it.

As the weeks went on this copy went bigger and bigger, so big, in fact, that the man responsible for it, the old reporter, now gets practically what he wants for it—ten times and more the money he made in the old days—and this for just a few hours work a day. His feature is now being syndicated and his income mounts higher and higher.

“A man may be down, but he's never out!”

The Systematic Clerk.

The clerk who keeps an orderly desk uses much the same sort of ingenuity and method used by the manager who keeps an orderly business. When the clerk keeps his desk free of chaos, deadwood and red tape; when he handles a multiplicity of detail with methodical precision and dispatch; when he completes each task and proves its accuracy before passing it on to someone else; when he checks up each day's work at night and satisfies himself that he has overlooked no promise and forgotten no task; when he makes these things an unchanging part of his day's routine, and does them with the unflinching certainty of a machine, week in and week out—he is training himself in the very basic principles of business organization—training himself in capacities that will enable him to handle with ease the heavier tasks that will come with promotion later on.

—Clipped by Traveling Freight Claim Adjuster Shultz.

Born before the Baltimore and Ohio, Noah W. Ratcliff is probably the Oldest Railroad Man Living

By Margaret Talbott Stevens

For the interesting and beautiful motor ride to the home of the subject of this story, I am indebted to Frank Keane, machinist and veteran of Grafton, W. Va., to his good wife and to their relatives, Mr. and Mrs. Beveridge.)

HIGH up near the top of Sand Run Mountain, West Virginia, and looking down upon the town of Buckhannon, there stands a little cottage—a typical mountaineer's cabin—surrounded by a tiny yard around which runs a wooden fence. Almost apart from civilization, yet not forgotten by his friends, who, in spite of the long and rugged road that leads to his door, manage to visit him occasionally, there lives a man, Noah Washington Ratcliff, whose age lacks only three years of being a hundred, spending the few remaining days of his life in the peacefulness of the mountains.

Some time ago J. O. Martin, division claim agent at Clarksburg, was asked to visit Mr. Ratcliff and to make a report of the conditions under which the aged gentleman was living. This was done. At this time, Mr. Ratcliff was able to give an account of his early life and service with the Railroad. His statement was as follows:

"My name is Noah Ratcliff. I was born in Hardy County, Virginia (now West Virginia), on July 17, 1824. Here I lived until I was about 16 years old, when I went to Pendleton County, West Virginia, to learn the blacksmith trade. I then went to Fetterman (now called Grafton), West Virginia. This was when the Railroad was being graded from Fetterman to Wheeling. The grading was then about completed, but none of the rails had been laid. I worked at my trade until the railroad was completed, then I went to work for the Baltimore and Ohio Company. My first job was as laborer with the wood train, but I worked only for half a day at loading wood, when John Jacobs, travelling engineer, came along and gave me a job as fireman on a locomotive.

"Sometimes when the officials desired, I would go into the shops and work at my trade; at other times they had me repairing telegraph lines; I also worked in the machine shop at Fetterman.

"I had been firing between Wheeling and Fetterman, sometimes running through to Piedmont, for four or five years steadily, when in the year 1856—I do not remember the day—I started in with "Bill" French as engineer, running a train from Wheeling for Fetterman, camel-back No. 255. "Bill" was a new man on the Road, so I was running the engine and he was firing. When we were nearing Rosby's Rock, I was running about 40 miles an hour and trying to make up time, for we ought to have been at Glover's Gap then. The delay was due to a stop which we had to make at Moundsville to fix the escape pipe. Rounding a curve, I saw the rear of a train ahead of us. It was impossible to stop and we crashed into the

rear, going through three house cars, loaded with bacon, flour and whisky. The steam pipe burst and I was scalded on the arms, hands and face. French jumped and was not injured. I remained in the cab.

"Later I was compelled to give up my job as my eyesight failed. Then I went back to my trade at Grafton. In the fall of 1860 I went blind. During the Civil War I kept a little store in Grafton and sold pies and cakes to the soldiers and railroad men. After the war I moved to Bellaire, Ohio, and from there to Columbus, where I attended a school for the blind and learned to make brooms. I then moved to Wheeling, where I worked at this trade. I moved from Wheeling to Upshur County, West Virginia, in 1877, where I have lived ever since.

"At the time that I was with the Railroad, there were working with me Engineer Harding Arnold, Engineer George Butler, Conductor Thomas B. Davis, of the Third Division; Henry G. Davis, car clerk, Piedmont, who afterwards became United States senator, and who died a few years ago; Engineer Mills Slagel was another; "Jim"

Murphy was boss of the shops at Fetterman and John Shaffer was the head man; C. D. Ford was the head man for the Company at Wheeling.

"For the past 36 years I have lived with my cousin, Richard Ratcliff, who died a few years ago. I now live with his widow."

Here, on Sand Run Mountain, he made and peddled brooms for a living until two years ago, when he became too feeble to get around. Mrs. Ratcliff says:

"He has always tried to make his own living so as not to be a burden to anybody. Even now he makes up his own bed and won't let anybody else help him. His appetite has never failed him; that is probably the reason for his long life. Why, he can digest nails! His stomach has saved him. He still chews tobacco, although he no longer smokes."

On the afternoon that the writer called on him, Mr. Ratcliff was in bed. However, he arose, dressed himself, and hobbled out to his chair on the porch in order that we might get a picture of him. A few minutes later he lay aside his cane, put his hands down on the floor, then stretched himself at full length on the porch.

"I want to lie down awhile," he said as he rolled over into the sunshine.

"That's his favorite resting spot," remarked his niece as she led us into the front room of the house, "just let him stay there and he's happy."

The front room of a mountaineer's house is a combination bed room, parlor and

This is the Way that Money Goes up in Smoke

Our grandparents taught us the old saying, "Where there's smoke, there's fire," meaning, of course, that no trouble ever arises without a reason. This old maxim, however, holds good literally; moreover, we know that there has never been a fire without a cause for it. It is the job of our fire prevention men to find out the causes of the fires which occur each month, destroying thousands of dollars worth of property and equipment. Losses through fire represent money that truly goes up in smoke.

The estimated damage by fires on the Baltimore and Ohio during the month of August, 1920, is \$9,620.54; of July, 1921, \$7,381.86; of August, this year, \$3,233.30. From these figures it may be seen that it is possible to cut down this waste. It shows that somebody has been working somewhere. In the record for August, this year, we find the names of 9 divisions which had no fires to report. These are: New York, Philadelphia, Wheeling, Connellsville, New Castle, Cleveland, Newark, Charleston and Illinois. This is good work, a big goal to attain. Let the other divisions follow these nine.

Here are a few of the causes of some of the recent fires and recommendations for their prevention:

ORIGIN

Sparks from locomotives.

Fire in adjacent property setting fire to car on sidetrack.

Tramps and trespassers building fires in cars.

Lamp setting fire to ceiling of car, account of being turned too high.

FIRE PREVENTION RECOMMENDATIONS

Proper inspection of spark arrestors and appliances in front ends of locomotives at least once weekly. Nettings and spark arrestors must be in perfectly tight and serviceable condition at all times.

Cars should not be stored near hazardous risks; ample facilities should be arranged for prompt removal in case of fire.

Efficient watchman service should be maintained in yards and proper closing and securing of car doors when not in use.

Proper guards should be placed over lamps in baggage cars to protect ceiling and woodwork; Pintsch gas or electric lights should be substituted.

reception hall. In this room were two high, four-poster beds, spread with quilts of the old fashioned "log cabin" design, several chairs, a fireplace with a grate, and a mantel. Around the walls hung the family photographs, including one of Mr. Ratcliff which was taken several years ago. There were paper baskets of artificial flowers, turkey-wing fans, calendars and other pictures framed in buttons, chains, and other knick-knacks. Back in the kitchen hopped a pet crow. On the right of the kitchen was the little bedroom occupied by the old rail-roader. Clean and comfortable, situated where the cool breezes of the mountains can sweep through from all directions, there is perhaps no place more fitting for one who is accustomed to a life of activity to spend his declining years.

In the front yard there were beds of larkspur, dahlias, zinnias, marigolds and cosmos; and although we could not see them, we felt that somewhere in the back of the house there must be a patch of corn and pumpkins and another of tobacco. In a large pen, alongside of the front fence, lay a good sized porker, gruntingly proclaiming

that he is to furnish a part of next winter's meat supply.

Mr. Ratcliff had retained his memory up until a few months ago. Even now he recalls the names of some of the old-time rail-roaders. Among those not already mentioned whom he knew particularly well were: Master Mechanic Perkins, Road Foreman of Engines Ford, Conductor Smallwood, "Captain" Walker and "Uncle Buck" Williams, who died recently. Mr. Ratcliff also fired for "Pete" Moran; he does not recall the number of the engine, but thinks it was No. 105.

"Uncle Noah," blind and deaf, and groaning with weakness, has not far to go before he reaches the end of his journey. About once or twice a year, the Veterans pay him a visit and look after his needs. There is little now that can be done for him in a material way, but you who go to Buckhannon will do well to look toward Sand Run Mountain and say a prayer for Noah Ratcliff, a pioneer who helped blaze the trails and suffered hardships that you and I might have the pleasure of riding in comfort over the mighty rails of the Baltimore and Ohio.

Why Government Ownership is Inefficient and Destructive

(From the *Efficiency Magazine*, Edited by Herbert N. Casson, London.)

SPEAKING quietly, without rage and prejudice, can any one tell why it is that all government departments in all countries, are slow, wasteful and incompetent?

There must be some basic reason for this, as the individuals in these departments cannot all be inferior to the individuals in private firms.

Almost invariably an able man becomes disabled when he is placed in a government department.

He becomes timid, procrastinating, non-committal, evasive and unprofitable. He becomes a mere chattel of routine.

Why is this?

The fact seems to be that man simply can-

not be competent in a government job, for the following reasons:

(1) There is not payment by results.

There is no piecework. There is not profit-sharing. A man gets as much for doing badly, as he does for doing well.

(2) There is no fear of discharge.

A man may be transferred, but, as long as his conduct is satisfactory, he cannot be discharged for incompetence. Any sort of a fool can hold a job forever in the civil service.

(3) There are no profits to be made.

There is no possibility of bankruptcy. If the department doesn't pay—very well. The treasury has plenty.

(4) There is no danger of losing customers.

A government department does not depend upon its customers, so that it has no incentive to be quick and courteous and obliging.

(5) The main thing is accuracy, not success.

A government employe has simply nothing to do with success. His aim is to avoid mistakes. The less he does—the fewer mistakes.

(6) Time is of no consequence.

As all government employes are made into clerks, they come to have a clerk's disregard of time. To clerks, as to lawyers, a delay is a relief and a comfort—the more the better.

(7) The work is impersonal.

There is very little personal responsibility in a government office. The clerks have arranged a system whereby nobody is to blame, no matter what happens.

(8) There is no competition.

A government department is always a monopoly. If it were not, it would soon be thrown aside. It has no competitors to battle with, and it can take its ease and do as it pleases.

(9) Routine is put ahead of service.

In government departments all the workers (I may use the word) are tied with red tape. They are all the slaves of a system of procedure.

(10) There is no enthusiasm.

If a man stays in a government job long enough he becomes mummified. He loses all the energy and joy of living that are so necessary to efficiency and success.

These are a few of the reasons why nationalization always has failed and always will.

Just put yourself in the place of these poor government automats. No matter how able you are, how could you be efficient if you had:

No hope of profits; no fear of failure;

No competitors; no customers;

No reason of hurry; and

No danger of being found out.

Nationalization is not only a destroyer of trade and commerce. It is not only a coral reef built across the harbor of prosperity.

It is worse. It is far worse. It is a destroyer of men. It takes an able man and grinds him down until he is a clerical drudge.

It lowers the spirit and hardihood of a nation. It pauperizes. It dulls the mind and benumbs the feelings. It changes lions into rabbits. What could be worse?

(From a furloughed brakeman)

"Nowhere else have I ever found such pleasant and congenial associations."

Charleston, W. Va.,

Sept., 20, 1921.

Editor, Baltimore and Ohio Magazine,
Baltimore, Md.

Dear Sir:

Will you kindly furnish me with subscription rates of the Baltimore and Ohio Magazine, or advise me where I may be able to secure copies of same in this city.

Unfortunately I am not in active service now, having been furloughed from the Connellsville Division, on account of depression in business on March 26, 1921. I am, however, a loyal Baltimore and Ohio Booster and I am hoping that I shall be called back in the near future. One might suppose that in an organization as large as the Baltimore and Ohio all dealings would be coldblooded and human interest would be lacking, but I find that the very opposite of this is true. Nowhere else have I ever been shown such consideration and nowhere else have I ever found such pleasant and congenial associations. I am young and I hope to live long enough to consider myself a "Veteran."

Kindly advise if you can supply me with copies since the April issue and of all future issues.

Very truly yours,

(Signed) R. B. Colerider.

Employees Who Are Taking the "Curt" out

J. P. Kane, Train Porter Extraordinary

THOSE of our readers who have had occasion to ride train No. 17 from Baltimore to Pittsburgh when J. P. Kane officiates as porter, will agree that it would take a talking machine and a motion picture machine combined to provide an adequate description of this employe in action. For the clarity of his diction, the polish of his manner and the pride which he takes in caring for the coaches under his supervision, can hardly be pictured in words.

"This train for Relay, Washington, Harper's Ferry, Shenandoah Junction, Martinsburg" and he sounds off the names of the rest of the stations at which No. 17 stops with the precision and enunciation of an old regular army top sergeant drilling rookies—then concludes with: "The next station stop is Relay."

Not a passenger with any appreciation of a polished, clean-cut and entertaining announcement by an employe of a railroad, can fail to feel a little bit happier after having heard Porter Kane in an announcement of this sort.

And he does not stop there. He is constantly on the job looking out for the cleanliness of his cars, giving information to passengers who request it, raising windows here and lowering them there, making women folk and their children as comfortable as can be in a day coach, assisting passengers with heavy luggage on and off trains, notifying them at each station stop

not to forget their parcels and umbrellas, and doing all the other things that an ideal train porter should do.

Naturally, his work is appreciated. Scarcely an official of the Railroad who has heard him in action has not complimented him on the way he handles his job. Our passengers, too, have on frequent occasions referred in enthusiastic terms to his performance and written our Management that it should be proud of having a train porter who is so nearly perfect in the carrying out of his duties.

One of the letters which recently reached the MAGAZINE office about Porter Kane follows:

NATIONAL FRUIT PRODUCTS COMPANY
APPLE PRODUCTS
WOODWARD BUILDING

WASHINGTON, D. C., January 17, 1921.

THE EDITOR,
BALTIMORE AND OHIO MAGAZINE,
Baltimore, Md.

Dear Sir—In the past three years I have, at one time or another, ridden all of your Main Line trains, and I have yet to find a train porter on any of these trains to begin to compare with J. W. Kane. If the Baltimore and Ohio had more porters of the high quality of Kane their reputation for courteousness and cleanliness would be a standard for the rest of the railroads in this country. One could not say more than that in commendation.

Very truly yours,
(Signed) EUGENE G. GRAB.

J. W. Kane, train porter, Baltimore Division

Quite recently Mr. John Glerchman, of the General Chemical Works, Race and Winder Streets, Baltimore, called up the MAGAZINE office and told of a particularly interesting and gratifying experience he had had with the subject of the story. He also suggested that so unusual a train porter be given some recognition in the Railroad MAGAZINE. This we are glad to do and also to add in conclusion that Porter Kane has been with the Railroad since January, 1913, and that his record to date is a clear one.

Engineer John Snyder

June 17, 1921.

Mr. John Snyder,
Chillicothe, Ohio.

My Dear Mr. Snyder—On last Tuesday, June 14, my brother was taken on Baltimore and Ohio Train No. 3 to Winton Place. He was a very sick man and being removed to the Jewish Hospital. His condition was such that any sudden jar would cause the most excruciating pain. We had all dreaded the journey very much on this account. I want to tell you that he made the trip much more comfortably than was anticipated and it was due in a great measure to the very careful way you brought your train to a stop. The same extreme care was noted again in starting. Not once on the trip from Greenfield to Winton Place was there any sudden jerk or jar.

I hope to have the opportunity at some time of thanking you personally for the very careful way your train was handled. Lest this opportunity may not come to me I am writing you direct. This was a matter of favorable comment by the doctor who accompanied us and my brother wishes me to tell you he is very grateful.

Sincerely,

(Signed) CHARLES MAINS, SR.
President American Pad & Textile Co.
Greenfield, Ohio.

The World Speaks.

CHAMBER OF COMMERCE

McKeesport Pa. July 7, 1921.

Mr. C. F. GRIMM, Agent,
Baltimore and Ohio Railroad Company,
Cumberland, Md.

My Dear Mr. Grimm—I take this opportunity of voicing my appreciation and saying that in the midst of disappointment July 1, 1921, when the engine of my car suddenly went out of commission, needing factory attention, myself and party found real pleasure in the service rendered by your staff.

After being towed 21 miles to your city, arriving after office hours, we found a couple of your men at the freight office, who, in the most pleasing and courteous manner, took a fatherly interest in us, had a freight car placed at your station, superintended the loading of our car into same by ourselves, then had it attached to train 97 and delivered in McKeesport early Saturday morning. In my many years in business I never received more interested attention.

Again I express my hearty appreciation of your most satisfactory cooperation and firmly believe that such efficiency and conscientious service should become the knowledge of those who have charge of promotions.

Yours very truly,
(Signed) R. F. DULANY,
President.

PUBLIC LEDGER COMPANY

Independence Square, Philadelphia
July 12, 1921

MR. E. V. BAUGH,
Superintendent of Dining Cars,
Baltimore and Ohio Railroad,
Baltimore, Md.

Dear Sir—On July 5 the writer had luncheon in your dining car No. 1030, enroute from Washington, D. C. to this city. Within the previous week he had eaten in dining cars of five different railroads, eastern and western, and including several of the best known in the country.

The general excellence of the food and service in your diner was so far superior to that so recently encountered in the diners of the other roads that the writer feels constrained to inform you of that fact. He has handed out "knocks" where he believed they were deserved, in the past, and feels that genuine service should not go unappreciated.

Very truly yours,
(Signed) HARRY A. SHINNICK,
Copy Editor,
The Public Ledger.

Service Cannot Be Excelled

Missouri Christian Endeavor Union

Next State Convention—Kansas City
October 13-14-15-16, 1921

July 20, 1921.

To All Concerned:

It is a great privilege to be able to say a few kind words for the excellent service rendered by the Baltimore and Ohio Railroad.

After operating a special train carrying Christian Endeavor young people of the State of Missouri from New York City to St. Louis we are convinced that the Baltimore and Ohio is one of the best roads in the East. Our train was under the personal supervision of their splendid city passenger agent, Mr. L. L. Horning, who was at all times watching for a place to serve our party and to make the trip more enjoyable. They carried their contract out to the last letter—there was not a hitch in the entire trip.

For scenery this route cannot be excelled in any way.

We can highly recommend the Baltimore and Ohio Railroad to anyone who desires service, scenery, enjoyment and anything that is necessary to make the trip the very best.

Very sincerely,
(Signed) R. L. LANNING,
State Field Secretary of Christian Endeavor.

Telephone Operators, Ahoy!

BALTIMORE, MD., September 22, 1921.
MR. C. A. PLUMLEY,
Superintendent of Telegraph,
Baltimore, Md.

My dear Mr. Plumley—There has been a great deal said relative to the good work that some of our employes are doing in a great many branches, in the operation of the Railroad, but it seems no one has mentioned what good things are done in your department. Therefore I am taking the liberty of advising you that I constantly use the telephone and have always received the most courteous treatment from the young lady operators.

One of the operators in particular, by name Victoria Sabistan, always seems very polite and has, to my knowledge, exhausted her patience in my interest as well as in the Company's.

Yours truly,
(Signed) G. A. BOWERS,
General Foreman, Riverside

Any and every employe can help get business by just being courteous.

An automatic life-boat launching device, the invention of F. F. Pease, of the Bethlehem Shipbuilding Co. Here the life-boat is shown in the cradle from which it is launched. The device, by means of a one-man operated lever, throws the life-boat a distance of 40 feet from the vessel, landing it on the crest of the waves with a momentum, if the ship is standing still, to carry it at the rate of five knots an hour. The arm is then swung back and another boat slips automatically into place.

Weston, West Virginia, Headquarters of the Charleston Division

By M. W. Jones

Secretary to Superintendent

(This is the first of a series of articles which we hope to run in the Magazine on various cities and towns along our lines. We want all the communities reached by the Baltimore and Ohio to feel that the Railroad is, indeed, a good neighbor, and one of the ways that we can do this is to tell our readers something about these communities, their people, industries, historical associations, progress, public spirit, schools, churches, local government, etc., and the part the Baltimore and Ohio plays in their development. This article was written by Mr. Jones in 1920, publication having been delayed solely because of lack of space. Such articles should be of interest, also, to the people whose municipalities are described. If you happen to be a booster for YOUR town, write the undersigned as to how you can get it included in the series.—Editor)

ON JUNE 24, 1916, at Deer Park, President Willard made a statement to the officers of the Baltimore and Ohio, there assembled in convention, that holds as good today as it did then, and always will be the public policy of the best and safest railroad—the Baltimore and Ohio. Mr. Willard said:

"It will be the policy of the Baltimore and Ohio, first of all, to endeavor to do efficiently all of the things that a public servant should do. It will earnestly try to satisfy the reasonable requirements of the public for transportation. It is our desire that the people living along our lines should feel that the Baltimore and Ohio is a *good neighbor* and if they are visited by fire, flood or epidemic, they should instinctively call upon us first for assistance, because of our potential strength and our willingness to help them. We will treat our shippers and patrons with absolute fairness and full consideration. When we make a contract we will do our utmost to live up to it. We want to deal with our patrons, shippers and passengers as two honorable men deal with each other."

It is our feeling that no more inspiring text could be taken as the keynote of this article than President Willard's policy—courtesy, fair and honorable dealing, and the good neighbor idea. It is this we are trying to impress on the people along the line of the Baltimore and Ohio on the Charleston Division, and the results speak for the measure of our success.

On July 1, 1918, the Charleston Division was formed, with headquarters at Gassaway, W. Va. It comprises the old Coal and Coke Railway, from Elkins to Charleston, the old West Virginia and Pittsburgh District, from Weston to Richwood, and the Pickens Branch from Weston to Pickens, together with the small branch lines incident thereto.

W. Trapnell was the first superintendent appointed. Little need be said of him, as he is well known on the entire System. He entered the service as assistant engineer on the Cumberland Division on February 15, 1901, and has held, successively, positions, on the Philadelphia, Shenandoah, Baltimore, Wheeling, and other divisions. Mr.

Trapnell broke away from the Baltimore and Ohio twice, once to become vice-president of the Hampshire Southern, which he constructed, and which is now a part of the Baltimore and Ohio, and again to become superintendent of the Coal and Coke Railway, now also a part of the Baltimore and Ohio, returning each time after his work was completed, to his first love. Educated at the Charles Town Male Academy, Shenandoah University School, and Purdue University, he is a man of wide experience, beloved by employes and patrons alike for his absolute fairness and integrity.

In December, 1919, for various reasons, it was decided to move our divisional headquarters from Gassaway, W. Va., to Weston, W. Va.

Weston is the county seat of Lewis County, has a population of approximately 10,000, and is in the heart of the lumber and coal regions of West Virginia.

The first settler of Weston was Henry Fleisher, a revolutionary war scout, in the year 1777. In those days the town was called Fleisherville. In 1817, the county seat of Lewis County, which was then at Westfield, was moved to Fleisherville. The present Weston then consisted of only a few houses. In 1819 the name was changed to Preston, and in 1820, to Weston. The present town of Weston was incorporated in 1854.

The first effort to run a railroad into Weston was in 1878, when a narrow gauge line was surveyed from Clarksburg to Macpelah Junction, about one mile from the present Weston passenger station. This road was built in 1879, and was known as the Weston and West Fork Railroad, the name being changed the same year to Clarksburg, Weston and Glenville. During the same year the road was extended into Weston proper.

In 1883 a narrow gauge line was surveyed and built from Weston to Buckhannon. This was known as the Weston and Buckhannon Railway. In 1890 both these railroads were changed to standard gauge, and on September 1, 1890, both were taken over by the Baltimore and Ohio.

The West Virginia and Pittsburgh Railway, now a part of the Baltimore and Ohio, was built from Weston to Sutton in 1890

and 1891, the first through passenger train entering Sutton in June, 1891. The road was extended, Flatwoods to Camden-on-Gauley, in 1892 and 1893, and the final link from Richwood to Camden-on-Gauley was completed in 1893.

At Weston there is located the State Hospital for the Insane, which is the oldest public institution in the State of West Virginia. When work was commenced on this hospital, Weston was in the State of Virginia. The first appropriation was made on March 22, 1853, a \$25,000 hospital being built to accommodate 250 patients, and it was known as the North Western Asylum. This hospital was taken over by the State of West Virginia immediately on her admission to the Union of States. The first superintendent was Dr. R. Hills of the Central Ohio Insane Asylum, Columbus, Ohio. At present the property of this hospital comprises 335 acres purchased, and 204 acres leased. The buildings consist of main administration and ward buildings, 1,290 feet long, with several wings, fronting on the West Fork River, also a number of good sized buildings in the rear. The main building is the largest hand cut stone structure in the United States. The present number of patients accommodated is 610 male and 498 female, or a total of 1,108. The staff in charge today consists of Dr. C. E. White, superintendent, Dr. J. G. Pettitt, Dr. M. R. Casey and Dr. Cecil Dunham. Dr. Dunham joined the Medical Reserve during the recent war. The estimated cost of the State Hospital for the Insane as it now stands is approximately \$500,000.

Another of the beautiful buildings of Weston is the Masonic Temple, which was built in 1917, at a cost of \$115,000, the money being furnished by members of the Masonic Fraternity in Weston. It was built by A. J. Breiternitz, of Clarksburg. The present heads of the Fraternity are H. R. Gaston, Master, M. B. Spriggs, Junior Warden, and J. G. G. Heavner, Senior Warden.

Weston has probably as fine a lot of churches, of all denominations, as any other town of its size in the United States. These are: St. Paul's P. E.; Clawson Helmick Memorial M. P.; St. Patrick's R. C.; First Methodist Episcopal; First Baptist; First Presbyterian; First A. M. E. and the United Brethren. Particularly beautiful from an architectural standpoint are the Roman Catholic and the Baptist, pictures of which will be found on accompanying pages.

Weston's educational facilities are of the best. The high school was built in 1911, at a cost of \$80,000. Here all courses such as Domestic Science, Commercial, etc., can be taken as desired. It also has a gymnasium which will accommodate 800, the auditorium 850, and swimming pools. There are four suburban schools, where all grades are taught. In addition, we have St. Patrick's Parochial and High School and a colored school, where grades from the first to the twelfth are taught. Weston's present

First Baptist Church

School Board consists of R. R. Hale, president, F. E. Jarvis and J. W. Ballard, commissioners, Dr. Costa Smith, secretary, and Professor F. R. Yoke, superintendent.

There are two theatres, the "Camden" on Second Street, and the "New Theatre" on Main Street, seating approximately 500 each. Visitors to Weston will find two up-to-date hotels, the "Camden" and the "Bailey House," the latter dating back prior to the Civil War. The Bailey is generally known as the "Chicken Hotel" on account of their practice of serving chicken for dinner daily the year round.

The principal factories of Weston are the Crescent Window Glass Company, which employs 375 men; the Weston Glass Company, employing 100 men; the Weston Brick and Tile Company; the Sun Lumber Company; Westwood Manufacturing Company; Central Lumber Company; Sprigg Lumber Company; Danzer Manufacturing Company; Weston Ice Company; Hope Lumber Company; Holly Elk Lumber Company; Eakin Lumber Company and Acme Lumber Company; the Keener Oil and Gas Company, and many others.

At Weston are located the headquarters of the West Virginia and Pittsburgh Shippers' Association; H. B. Curtin, president, J. H. Brewster, secretary and treasurer; also the Elk River Coal Association; C. L. Voglesang, president, and E. V. Shorr, secretary.

The principal industries of the town are dressed and rough lumber, window glass, tableware (glass), coal, gasoline, oil, gas, brick for buildings, tile, ice manufacturing, wholesale groceries and iron founding. It is also a large center for the distribution of automobiles.

The system of government is municipal, and the personnel this year is Mayor O. L. Harrison, Councilmen Henry Brewster, O. Harper, M. S. Fleming, J. R. Davis, George H. Wilson and Chief of Police G. L. Skinner.

A membership of fifty-four comprises Weston's contribution to the Rotarians of the World, the Rotary Club being governed by President E. G. Davisson, Vice-President

Burr M. Spriggs, Treasurer Charles M. Snaith, Secretary Frederick D. Petty.

Superintendent Trapnell

The Monongahela Valley Traction Company operates interurban trolley service

Weston passenger station. Insert—J. P. Ryan, agent and general yardmaster

between Weston and Clarksburg, every hour of the day. From Clarksburg radiate in all directions, east and west, connections on the main line of the Baltimore and Ohio for any point in the States.

No story of Weston would be complete without reference to the Old Jackson House and Mills, located about four miles from Weston, where the famous Stonewall Jackson spent his boyhood days, as shown in part in the accompanying picture.

The Old Jackson House and Mills are situated on the West Fork of the Monongahela River. Here Stonewall Jackson lived and worked, and the place, then so little known by the outside world, by association with his name has become historic.

Cummings E. Jackson, the uncle of Stonewall, and owner of the house, mills and adjoining farm, took him after the death of his father, when the boy was about 12 years of age, to live with him, and taught him to work in the mills and on the farm.

The old house where Stonewall passed his boyhood days no longer stands, having been destroyed by fire some time ago. The only buildings remaining are the mills, and the two small store houses seen to the right of the residence in the picture.

Today, the place is known as Jackson's Park, and is used as picnic grounds, being conveniently situated on the lines of the Monongahela Valley Traction Company. Each year an annual reunion is held at the Jackson Park under the auspices of the Stonewall Chapter of Clarksburg and the Robert E. Lee Chapter of Fairmont of the Daughters of the Confederacy, in memory of the hero general.

There are many other places of interest in the surrounding neighborhood, but lack of space prevents dwelling on them.

A local representative of the Railroad Company has discussed with our patrons in Weston the question of recent increases in rates granted the railroads. They seem generally satisfied that the railroads should be given sufficient revenue to meet the grants of the Labor Board and the de-

This Army Reserve Depot at Columbus, Ohio, covers 471 acres and has 14 miles of tracks. Its yard capacity is 800 cars—35 cars along each warehouse—with 8,581 carloads of material in storage

mands for new equipment. They wish service, and they are willing to pay any reasonable rate to get it. They recognize and appreciate the "good neighbor" policy, and express satisfaction with the treatment they are receiving from local railroad men. The only complaint that they have against the service is the prevailing difficulty throughout the country—car shortage.

In conclusion, the writer gratefully acknowledges assistance rendered him in securing the historical data required for this article to J. P. Ryan, local agent, Baltimore and Ohio; J. B. Gisse, local photographer (for the pictures); R. L. Bland, and Sheriff Hale.

The Army Reserve Depot at East Columbus, Ohio

By J. V. Price

Chief Clerk, Agent's Office

IN THE Spring of 1918, the United States Government purchased a tract of land five and one-half miles east of Columbus on the lines of the Baltimore and Ohio, the Pennsylvania, and the Toledo and Ohio Central Railroads and erected a mammoth storage warehouse.

The construction work was done under the direction of Major T. Frank Quilty, a prominent construction engineer of Chicago,

Ill., and the actual work was done by the Hunkin Conkey Company, of Cleveland, Ohio.

The original buildings were erected in record time and were complete for occupancy by the middle of October, 1918. There are eight brick and tile warehouses, 160 feet by 1,518 feet, one open shed, same size, 17 steel hangar buildings, 66 feet wide by 500 to 800 feet long, with a total floor space of 3,488,434 square feet.

The reservation covers a space of 471 acres, has 14 miles of standard gauge railroad tracks. The capacity of the yards is 800 cars and 35 cars can be spotted at each warehouse; there is also a standard track scale in the main yard.

There have been stored in these buildings and grounds 13,843 carloads of freight, and 5,262 carloads have been re-shipped since January 1, 1919. They have almost anything in stock from a can of pork and beans to a 70 ton pile driver.

The accompanying photograph was taken from an aeroplane and gives a fine illustration of the magnitude of this reservation, showing the hangars in the foreground and the brick buildings in the background. The Baltimore and Ohio and Pennsylvania lines cross the upper background, and the Toledo and Ohio Central, between the hangars and the brick buildings.

A Real American

What is a Real American?

He is a Patriot, not a Partisan.

He votes.

He pays his taxes honestly.

He keeps informed on public questions.

He hates militarism, but is ready to serve in army or navy when his country is at war.

His heart beats a little faster when he sees the Stars and Stripes.

He honors those who work, and has a wholesome contempt for idlers.

He speaks slowly, and means a little more than he says.

He is tolerant of anything except intolerance.

He does not care what your religious belief is, so long as you are decent.

He likes to make money, but likes to see everybody around him making money also.

He does not enjoy riches in the midst of poverty.

He wants a family of his own, a business of his own, a house of his own and an opinion of his own.

When laws do not suit him he does not break them, he changes them.

He wants nothing for his own country he would not be willing for other countries to have for themselves.

He does not want the United States to rule the world, but to be the Big Brother to the world.—*Exchange*.

Where the Latchstring Hangs Outside

NOTE: Back in the early days of American history, when style, custom and financial conditions demanded that our forefathers live in log cabins, a lock on a door was practically unknown. To guard against the invasions of Indians, a heavy wooden or iron bolt was placed on the inside, but to one's neighbors there was always extended the hospitality of the latchstring. A latch that lifted up and down was placed on the inside of the door. Above the latch was a small hole. A string was fastened to the latch and passed through the hole to the outside, so that he who entered needed only to pull the string and the latch would fly up. If, however, the good housewife peeped from her window and saw an unwelcome guest approaching, the latchstring was pulled inside, and the visitor, not seeing the latchstring hanging out, would go his way. In this manner, the latchstring took the place of "Please take a seat, Madame will see you in a minute," or "Madame wishes me to say that she is not at home today." Thus it became customary to welcome a friend by telling him that your latchstring hung outside whenever he wished to honor your house with a visit. We still hear this old expression among American people. May it live forever as a memorial to American hospitality!

*Oh! it's great when they're glad to see you, when the front door's open wide,
When your cares are all forgotten in the home where peace abides,
Where Mother waits to greet you,
And the dog runs out to meet you,
When you go home for Thanksgiving, and the latchstring hangs outside.*

*Oh! it's great when they're glad to see you, when the corn is in the bin,
When you hie back to the country, far away from the city's din,
Where the turkey's fat for killing,
Where the pantry shelves are filling
With good things for Thanksgiving that will feed your kith and kin.*

*Oh! it's great when they're glad to see you, where the good old folks are found,
When Grandmother calls you "dearie," and Grandfather hobbles 'round,
And pats you on the shoulder,
Saying "H'm! It's blowin' colder,"
When you go home for Thanksgiving and the frost lies on the ground.*

*Oh! it's great when they're glad to see you, when the chairs are side by side,
And you sit by the open fireplace, and your heart fills up with pride,
When they tell you how they've missed you,
And when Mother's lips have kissed you—
Then you're grateful for Thanksgiving where the latchstring hangs outside.*

The Pilgrim

A true story

IT WAS on a late November evening that Professor Georgius, surrounded by a host of dictionaries and reference books, was seated in his study deeply engaged in tracing the origin of a certain French verb. Although it had been hours since he had actually smoked, his Meerschauum was held in a vice-like grip between his teeth. Nearby in a rocker sat his sister Jane, his constant companion whenever he studied. She always knew when to speak and when to keep silent. Tonight, as the winter winds whistled around the treetops and swished about the corners of the house, it was a wonderful hour for studying, and

she kept silent. She knew that there would be a word for her shortly.

Presently her brother lifted his head, and a smile that might have done justice to the face of the father who welcomed home his prodigal son overspread his countenance.

"I have it! I have it!" he shouted as he reached for his tobacco jar.

"Tell me about it," urged Jane.

The brother began, but hardly had he put together the two Latin derivations when the clang of the big knocker on the outside door startled the two of them, for this was not a night when one might have expected company.

The professor arose and went to the door. As he opened it, a gust of wind nearly blew away the papers which he held in his hand. Catching them quickly, he looked again and saw the figure of a young woman standing there.

"Come in! Come in!" he cried, not waiting to see who she might be, for it was too cold to hold a conversation in a doorway.

The girl entered and the professor led the way to his study. Jane arose to meet them. The visitor was a dark-haired, plump little creature, with eyes that sparkled under the bright light of the room like the ripples of a river under the glare of noonday sunshine.

"I am Sophia Minoff," she said simply, taking the comfortable seat that was offered her. "A friend have tell me that you teech Aingleesh. I come for ask you for give me lesson. By the week I work an' I mek twelve dollar. I can pay what you say, but I come for my lessen only at the night."

As she spoke, her cloak, which she had loosened at the neck, slipped from her shoulders, revealing a short black frock and a red, hand-crocheted jacket. She was the living model of the pictures of Russian peasants painted by the great masters. The brother and sister exchanged glances. The fires of ambition stirred the girl's heart and shone in her gestures.

For a long time they talked, the professor seeking to find out the extent of her education. Arrangements were made for her lessons.

"I have a holiday at my place tomorrow," she said, "I can come tomorrow, if you say. What you call tomorrow?"

"Thanksgiving Day," answered Jane.

"Ah, yes, and what is this you call Thanksgeevink?"

Then Professor Georgius explained in simple language the meaning of the American Thanksgiving Day; of how and why it was celebrated by our Pilgrims forefathers; of how it had been set aside each year as a day of prayer and feasting. Sophia's eyes sparkled.

"What have you call theese peoples?" she asked.

"Pilgrims," they replied.

"Then," said the little Jewess, "I theenk I am a Peelgrim."

"And I have a Thanksgeevink Day, too, I theenk," she added as the brother and sister looked at her wonderingly. Sophia went on.

"I am born in Russia. When I am a baby my fatha take my motha, my two sista, my brotha and me down to leeve in Jerusalem. My fatha he issa rabbi, but he keep a store, too. I learn to help keep store. When I am eight year old, we go to South America, to Rio de Janiero. There I learn spik much Spanish. But my motha and fatha have sadness, you call trouble. They no spik togetha. Then my fatha take me—I am eleven year old—and bring me back to Jerusalem. Leave my motha, sista and brotha in South America.

"In Jerusalem my fatha have no frien's,

maybe one, maybe two. He do not go out to mek great many frien's; he spend mucha time with his books. He teech me much, but I work much in store. But thees is not for long. Sis month after we have arrive, my fatha tek seek and die. I am alone. Oh, for day and day I can theenk of nothink but my fatha. I cry also for my motha, but I have no money for go see her. I have nothink. A man who tek the store say he will tek me to care for store. I stay, but oh, I work, work, work. At night I am seek. The man nio treat me well—mad, angry all time. I say myself I will run away.

"One day a many peoples, Jewish like me, say they goink to Greece. I ask if they will tek little Sophie along. One man say, 'Let the little girl go; I can hide Sophia on the ship weeth my little ones.'

"And so, I go. But after many days we are on a ship in the Mediterranean Sea. A Turkish ship have take us. They say we must go to Constantinople. I am so frighten' I do not know what I shall do. They say we must go to prison. At Constantinople they take each family at a time. I do not wish to make trouble in the family I am with, so I hide, then come out alone.

"Soon a man spik to me in Jewish language. I make to belieev I do not understand. I answer him in Spanish. He do not understand me. Then a man spik to me in Spanish. He is Aingleesh consul. He ask me where I am goink. I tell him I believe I am goink to America, (for you see this is where I always weesh to go). He ask if I spik Spanish, why I am with these Jews. I tell him my father is dead and I weesh go to America. He shake his head. He say to Turks I am a silly little girl who believe I am goink to America on this boat.

"In this office is a lady from England say her husband is in Paris and she weesh go to him, but she is very ill. She have a child. If I will tek care of child, she tek me with her to Paris, then to England. The Turk say all right. He glad. I am glad. I promise, and I am happy. Soon we sail for France.

"For two year I have stay with them in Paris. I am now fourteen. I learn to spik some French. Now I have three language.

"This lady now say she is goink back to England to see her fatha and motha. The baby is four year old and it is not necessary that she need me. I beg her tek me with her. I want learn Aingleesh, you see, so I will be ready to come to America some day. The lady say no, her husband say yes, so I go. At Liverpool she say to me, "Sophie, I give you my address. You go now. When you get money to pay me you can send it. I leave you now."

"Oh, I am sorry to leave the frien' who has been so good to me. And now what will I do? I tek my bundle of clothes and walk down the street. Soon I see a Jewish man with long beard, I go to him and ask is there a home in Liverpool for girls who have no motha. How happy I am when I find he can spik my language. He say he

will tek me there. It is a good place. There I find work in factory. In two year I save money enough to pay Mrs. Winston and fifty dollar for myself. Now I know I can come to America and I am so glad I know how to spik a little Aingleesh. Last year I meet a girl coming to Philadelphia. I have hear my motha say she have a sista in Philadelphia. I will go with this girl. I will use my head to find my motha's sista. I come to Philadelphia and find work. After long time I find my aunt. But she tell me she is come to Baltimore. She say I come with her. I come.

"So now I am in the Unite' State. I am in Baltimore. I write my motha. Last week I get a letter. She is well and she say my sista Beckie is come next month to live with me. I want learn much Aingleesh so I can teech my sista. Oh, it is so good I shall see her again. And how happy I am, and so thankful I am livink in the Unite' State, the land where I have dream of for so many time! Do I not have a Thanksgiving Day, too? I theenk I do."

Sophia arose to go.

"Come tomorrow, Sophia," said the professor as she went out.

When they had closed the door after her the brother and sister came back into the study.

"What a little Pilgrim!" he said as he carefully refilled his Meerscham.

"And we," added Jane, "were born in the United States."

Hot Rolls Comin'!

By Chef William Kennedy

Baltimore and Ohio Railroad Dining
Car Department

2 quarts flour
1 ½ cakes Fleishman's yeast
1 heaping tablespoon Crisco
Butter size of a walnut
Small handful of salt
1 teacup sugar

Mix well and set in warm place over night. In the morning make out into rolls and let them "proof." (See letter to women readers). Bake in moderate oven for 45 minutes.

Dear Women Readers:

Ye who think that your kitchen space is small should take a peep into the kitchen of one of our up-to-date dining cars, where you will find everything arranged more compactly than it seems possible to arrange it.

On a recent trip from Cincinnati to Baltimore, I happened to be in the dining car of Steward Spingler, who invited me to inspect his kitchen. Scenting a chance to get some good recipes, I followed on.

There, presiding over the pots and pans, quite as fat and as pleasant as the kind you read about, was Chef William Kennedy. He and his three able assistants were busy at serving hot rolls, honey dew melon, pancakes, crisp bacon, omelets, and all sorts of good things for breakfast—all in a little kitchen with an aisle only about two feet wide. On one side there is a combination table and refrigerator; on the other is the long stove with its broilers, its ovens, and all kinds of snug little warming closets. On a stand beside the stove there stood something all covered up with a snowy cloth.

"What's that?" I asked, consumed with curiosity.

"That's rolls a-proofin', Mum," replied the chef.

"A-what?" I cried as he lifted the white covering, displaying a lovely pan of rolls, "You mean rising, don't you?"

"A-proofin', Mum," said Kennedy, explaining, "we calls it 'proofin'."

"Well, proofing it is then," said I, "you're the cook and whatever you say goes. Now how about giving me a recipe for those rolls? I had a good sample of them for breakfast and I know how good they are."

"Yes, Mum," and his face beamed out from under his white chef's cap until he looked like a genuine advertisement for Campbell's soup or the Cream o' Wheat man.

So I got out my pencil and wrote down the directions just as he gave them to me. You will find them in the recipe column, and I trust that you will enjoy these rolls for breakfast on some fine morning.

Yours sincerely,

Margaret Talbott Stevens

Associate Editor

Lesson In Home Dressmaking

A Slip-Over Sleeveless Dress which can be Frequently Varied by a Change of Blouses

THIS serviceable and smart looking sleeveless slip-over frock is fashioned in dark blue poiret twill, trimmed with black silk braid. The front of the dress is slashed and rolled with the collar forming revers. If desired, the collar may be overlaid with a contrasting material. With the dress separate blouses may be worn to change its appearance. Medium size requires $2\frac{3}{4}$ yards 44-inch material.

The front and back of the tissue are laid along the lengthwise fold of material for proper cutting, as shown in the cutting guide. The pockets have the large "O" perforations resting on lengthwise threads. To cut the collar and facing, however, the twill must be folded over from each side, so that the selvages meet in the center. Then the tissue sections with triple "TTT" perforations are laid along the lengthwise fold to be cut so that they will not have any seams.

9655
Blouse 8950

Be sure to indicate the perforations and notches before starting to put the dress together. Arrange facing on the front, with center-fronts and corresponding edges even. Stitch to position $\frac{3}{8}$ inch each side of center-front, at the upper edges and graduate into nothing at the upper large "O" perforation in front section. Slash through the fold at center-front of front section and facing, from the upper edge to about $\frac{1}{8}$ inch above

lower edge of stitching. Turn the facing underneath to the inside of dress with neck and shoulder edges even and press to position. Close under-arm and shoulder seams as notched.

Autumn Top Coat in Unusually Fetching Style, Engaging New Coat Dresses, Deep Cuffs and Choker Collars—Other Items of First Importance

By Maude Hall

DISTINCTIVELY different, yet irreproachably correct are the frocks, wraps and tailleurs for Autumn and Winter wear.

Broadcloth in one of the new check patterns is used for a striking model with straight silhouette. There is a plain foundation consisting of long-waisted blouse and skirt, which serves as a background for a sleeveless overdress which is slashed in a deep V at the front. The fronts are then underfaced and rolled back with a standing collar which is trimmed with fancy braid buttons. The button arrangement is repeated on either side of the front, while the fulness is held in with a narrow band of velvet ribbon. The sleeves, which reach almost to the wrists, flare widely and are faced with silk to correspond with the collar, revers and vestee.

There is no doubt of the popularity of the coat-dress, for not only is it becoming to slender figures, but it slenderizes stout figures as well. There's a point worth remembering if one is stout—make the V-

Now, sew collar to neck edge, with notches and center-backs even. Leave collar free forward of small "o" perforation. Roll collar and front of dress as shown in the illustration.

Arrange one pocket section on front of dress, matching the small "o" perforations. Stitch straight across about $\frac{1}{8}$ inch above and below the perforations, then slash along the perforations. Draw pocket through the slash to the inside of dress and press. Arrange another pocket section underneath with edges even. Stitch braid around the collar and lower edge of the skirt and arrange belt as shown in the picture.

Sleeveless Dress No. 9655. Sizes, 34 to 50 inches bust. Price, 35 cents. Blouse No. 8950. Sizes, 34 to 44 inches bust. Price, 30 cents.

Cheese Souffle

By Mrs. F. H. Redding

One pound cream cheese, dissolved in 1 pint of milk in a double boiler. Add 3 egg yolks. Beat the whites to a stiff froth. Remove mixture from fire and add 1 cup cracker dust, $\frac{1}{2}$ -teaspoon dry mustard, salt and cayenne pepper to taste; 1 heaping teaspoon of Armour's extract of beef. Fold in the beaten whites. Bake for 10 minutes in hot oven.

shape vest long and narrow. This rule is invariable with designers who know the technique of artistic dressing and who study to make their creations approved by the women who wear them. The new French broadcloth is used for still another coat dress of distinguished appearance. The color is dark gray. The dress has an open front finished with an inset chemisette which closes at the center-front. It is built upon a foundation either of silk or less expensive lining, and over this the two-piece skirt is laid in plaits.

Satin figured serge plays its part in the development of the coat-dress, for it is serviceable as well as good-looking. A design that may have either a round or square neckline with collar of contrasting material, is carried out in the new serge, the waist having an open front finished with a long, narrow vestee of self-material. Black silk braid outlines the front, the straight girdle and the flowing sleeves. With the figured materials, plain braids are generally used, while embroidered and otherwise decorated braids are employed to embellish fabrics of plain color and smooth surface.

Since wraps stand out among the essential garments of the fashionable wardrobe when one is planning a little while ahead, it is well to take note of the lovely new coats, fashioned in soft, pile fabrics of unusually rich coloring. Dark gray and brown are in

great demand, being quite as fashionable as black and blue, also equally serviceable. These coats are wearable on all occasions, in many instances corresponding with the color of the tailleur or one-piece frock over which they are worn.

For the elegant Autumn tailleur, tricotine offers perfect smartness. There comes a splendid model in midnight blue, with long jacket and straight gathered skirt. The revers of the jacket are cut long, and for the sake of novelty, there are two pockets on either side of the front, instead of one. Turn-back cuffs trim the long, close-fitting sleeves, and the belt may be of self-material or of rich embroidery.

A wrap in very dark brown possesses unusual individuality. It closes to the neck with a high collar, yet provision is made for rolling the fronts and collar back together to gain the cape effect so much in vogue. The sleeves are cut in one with the back of the coat and lengthened with deep cuffs that are finished with turn-back cuffs.

DRESS No. 9609. Sizes 34 to 46 inches bust.

DRESS No. 9736. Sizes 34 to 44 inches bust and 16 to 20 years.

SLEEVELESS OVERDRESS No. 9721. Sizes 34 to 48 inches bust.

WAIST No. 9715. Sizes 34 to 46 inches bust and 16 to 20 years.

DRESS No. 9711. Sizes 34 to 42 inches bust and 16 to 20 years.

DRESS No. 9575. Sizes 34 to 44 inches bust.

DRESS No. 9741. Sizes 6 to 14 years. Price, 30 cents.

DRESS No. 9699. Sizes 2 to 6 years. Price, 30 cents.

DRESS No. 9714. Sizes 2 to 6 years. Price, 30 cents.

DRESS No. 9698. Sizes 34 to 42 inches bust and 16 to 20 years. Price, 35 cents.

Recipes

By Mrs. H. F. Reddig

Wife of Superintendent, Rock Island R. R.

Gold Cake

Whenever I make an angel cake, I find it convenient to use the yolks of the eggs in making a gold cake.

8 egg yolks

Put these in bowl and beat with a Dover egg beater.

½-cup lard or Crisco

1½ cups sifted granulated sugar

1 cup water

2 heaping teaspoons baking powder

Salt and flavor to taste.

Measure and sift flour and baking powder.

Cream the sugar and Crisco with a tablespoon of water. Add rest of water and flour

alternately. Add salt and flavor. Lastly fold in the egg yolks. Bake in moderate oven, not too intense, increasing the heat.

White Cake

Use same ingredients as for gold cake, except that instead of the egg yolks, use the whites of 4 eggs. Mix as in the foregoing, leaving the egg whites to be folded in last. Bake in a moderate oven, allowing the cake to raise completely before it begins to brown. This cake took first prize in a contest in Oklahoma.

Hypocrisy

By E. H. C.

When friends are friends in sight, not mind,
With honeyed words and smiling lips
Concealing malice heart enshrined;
And these to you are known, beware!
The demon tries you to ensnare.
Trust not his lips, his smiling face,
They will but lead you to disgrace;
A hypocrite no friend can be,
To friend and foe alike is he.

Genevieve

*I saw her knitting yesterday, a garment of an orchid hue,
And stitch on stitch laboriously, she plied her needle through and through.
A frown upon her forehead white, a pout that gathered on her lips,
"There's something wrong," this maiden said, "I'm very sure this needle slips."*

*I saw her knitting yesterday; today her needles idly lie
Neglected in a muslin bag; I sought the maid to ask her why.
I found her with her favorite book, and curled up in her easy chair,
Upon her lips that pucker still; the breeze blew lightly through her hair.*

*"I hate that wool," she said to me, "those needles always drop the thread,
I'd never wear it anyway, I wish I'd bought some blue instead.
I couldn't make the stitches right, they puckered up in every row,
I'll take the wool back to the store, I hate those sweaters, don't you know?"*

*I saw her late this afternoon, her hair was curled, her cheeks were pink,
She ran to meet me down the street, "My dear," she gasped, "what do you think?
Jane Andrews just went by the gate, an orchid wrap she wore. Oh, my!
'Twas simply lovely, I could make one just as pretty, if I'd try.*

*"I'll pull out every single stitch, I'll wind the wool into a ball,
I'll get my needles right away, and knit until I've knit it all!"
Tonight her needles click and clack, the orchid wool lies on her lap,
And if I know my Genevieve, she'll have, like Jane's, an orchid wrap.*

The Brownie and the Thanksgiving Turkey

"COME, dear," said Grandma to little Ned Saunders, who was stretched out before the big fireplace reading his new brownie book, "it's time you were in bed."

It was the night before Thanksgiving and little Ned was tired. He had helped Grandpa pluck the feathers from the big turkey that was to be roasted for tomorrow's dinner, he had carried three heavy pumpkins from the barn for Grandma to

make into pies, he had helped to bring in the firewood, he had gone to the store for sugar and cinnamon, and he had beaten up the foamy egg whites for the big cake that Grandma had made. Now you may be sure that it was a sleepy little boy that Grandma tucked into bed.

The hired man had said there would probably be snow in the morning, and Ned wondered if there would be coasting. He hoped so, but.....

"Tap, tap, tap," sounded something at the foot of his bed.

"What's that?" asked Ned, sitting bolt upright and blinking his eyes, for the room had become as bright as day.

There, astride on the footboard, sat the funniest little man that Ned had ever seen. He was dressed all in brown with a long red hat, a long red beard, and long, pointed, red shoes. He was no taller than Ned himself, and yet he looked very old. He rocked back and forth and shook himself with laughter until the tears ran down his cheeks and into his beard. Ned was so astonished that he could think of nothing to say.

"Hello, little Ned Saunders," said the little man presently, "I have been with you all day and I'll bet you didn't know it. Ha! Ha!"

"With me?" asked Ned, wonderingly.

"Yes, with you. You see, I'm a brownie and can make myself invisible."

"That means that you can see other people when they can't see you," explained Ned, who remembered about the brownies in his book.

"Exactly," declared the little fellow as he hopped down to the floor. "Now I want you to come with me."

"But I'm not dressed," began Ned.

"Hop into this," commanded the little man, flinging him a red cloak.

As Ned stepped out of bed the red cloak fastened itself all around him. It was very warm and comfortable, and Ned thought he had never seen so fine a cloak. It covered him from head to foot, leaving only a little space for his mouth, nose and eyes. In less than a minute, Ned was at the Brownie's heels.

"Let us go down to the pantry," said the little man.

"But Grandma has the keys," protested Ned.

"So have I," declared the little man, dancing a jig in the middle of the floor, "come along."

In two seconds they were at the pantry door. The brownie reached into his pocket and pulled out a key quite as long as his little arm. In another second the pantry door was open and they were inside. Here it was very bright, too, but Ned couldn't find out where the light came from. There hung the turkey that was to be baked for

tomorrow; there lay the lovely brown pies, and the big white frosted cake. The brownie leaped upon the pantry shelf and waved his key in the air.

"See!" he shouted.

As Ned looked he saw the big market basket roll out from under the shelf; then four of the biggest pies jumped down and fastened themselves to the basket. Ned's eyes were nearly as big as the pies, for here was a basket carriage with pie wheels. The brownie tapped a big jar and out jumped two long sticks of macaroni, which fastened themselves to the carriage for shafts.

"I wonder where the horse is," thought Ned to himself. But he had not long to wonder, for in another minute the turkey was backing into the shafts. The brownie tucked the shafts under the turkey's wings, seized the big white cake from the shelf, and hopped into the carriage.

"Get along, old gobbler!" he cried gaily, waving a stick of cinnamon in his hand. Soon they were galloping up and down the pantry floor.

"Hop in," called the little man to Ned.

"I'm too big," declared Ned.

"Nonsense!" cried the brownie, seizing the boy by the hand and pulling him into the carriage. To his astonishment, Ned soon found that he and the brownie were both comfortably seated on the top of the big soft white cake. Then the turkey started to run. Just as Ned thought his head would strike the wall, a door opened and they found themselves riding on a beautiful country road.

"Where are we going?" asked Ned. The brownie laughed.

"We're going to Gnometown," he said. "Do you see that tall spire? Well, that's the castle where the Gnome king lives. It's a lovely place, but once you're there, you can't find your way out."

"Then I'm going home right now," declared Ned, "let me out!"

"Too late now, we're a hundred miles away from your home," laughed the little man, urging the gobbler on with his cinnamon stick. But Ned was so frightened that he jumped from the carriage and landed in the middle of the road.

* * * * *

"Come, little Ned, it's time to get up," called a voice. Ned opened his eyes. There stood Grandma in her pretty white cap and apron that she always wore on Thanksgiving Day. Ned was bewildered, he didn't know whether he was asleep or awake.

"What's the matter, dear, have you been dreaming?" asked Grandma.

"Yes—yes'm, I s'pose so...." began Ned.

"Well, hurry and get dressed. Breakfast is ready and there are two inches of snow and a hard crust on the ground."

"Hooray!" shouted Ned, as he bounced out of bed and hustled into his clothes.

When he had finished breakfast he followed Grandma into the pantry, for al-

though he had told nobody about his ride with the brownie, he felt quite sure that the turkey, the pies, the basket, and the cake would be gone. But they were all there.

At the dinner table he told them about his strange dream.

"Ha, ha!" laughed Grandpa, "I'll bet

that was because of the brownie book that he had been reading before you went to bed."

And everybody laughed, but for many weeks afterward whenever Ned thought of his ride behind the Thanksgiving turkey he wondered what would have happened if he had stayed in the carriage with the brownie.

Christmas Presents from the Fields and Woods

THOSE who will keep their eyes open when walking through the November woods will find hundreds of beautiful things from which to make gifts for Christmas. The woods and fields that lie along the river produce a greater variety of decorative plants, trees, etc., than those farther inland.

On the branches of the gum tree there may be found a kind of fungous growth that gives to the branches the appearance of gray fern. These may be gathered, cut into proper lengths, and fashioned into picture frames, by means of brass-headed tacks. An acorn or two fastened into each corner by means of putty, and the whole given a coating of silver paint, will make a lovely frame for an outdoor picture.

Cushions made of pine needles or of the leaves of life-everlasting make gifts that will long be remembered.

Fetching little ornaments may be made from the big lichens that are to be found on

decaying tree stumps, if one has the gift of being able to paint simple landscapes. Use the smooth sides for landscapes, painting mountains on the rough backs. Edged with the tiniest bit of gilt, these give the appearance of dawn on the mountain side.

Birchbark glued to heavy cardboard makes an artistic background for a hand-painted match scratcher. A little girl in Southern Maryland made a pretty smoking set for her father from a bit of smooth board, two clumps of lichens, sandpaper and iron glue. Pine cones make admirable porcupines to hold placecards; milkweed pods may be transformed into beautiful birds, and even the homely wild bean pod will make a handsome alligator—that is, if an alligator may be called handsome.

The lovely partridge-berry grows close to the ground in sandy woodland. Put a small bunch of it into a little glass bowl, in the bottom of which has been placed a carpet of green or gray moss. Sprinkle generously

HURRAH FOR THE BALTIMORE AND OHIO YOUNGSTERS!

1. "Bill", Jr., son of Assistant Foreman W. L. Stephens, Martinsburg Shops. 2. Chester, son of Machinist Fred Massie, Illinois Division. 3. Melville Robert, son of Melville Gemmill, secretary to freight traffic manager. 4. Etta, daughter of W. H. Tarr, Magazine correspondent, Baltimore Terminals. 5. Marion and Gerald, sons of Machinist F. M. Fletcher, Mt. Clare Shops. 6. Vera, daughter of Engineer George W. Wendall, Washington Terminals

with warm water, place one top on, and tie with a bit of red ribbon.

For bouquets that will last all winter, get out some of those left-over Easter-egge dyes, a bit of gold and silver paint, some bouquets of life-everlasting, acorns on their stems, pine cones and wild cucumber burrs on stems, milkweed pods, and anything that looks as though it might be made over into something decorative. The open burrs of the Jimson weed have a smooth interior and are especially adaptable. Dip your brush in silver paint and go over the outside. With red or pink oil colors, paint the center of the inside. Dye the flowers of the life everlasting red and yellow with the egg dyes. Give the acorns and cucumber burrs a coat of gold paint, treat the milkweed pods like the Jimson burrs. With branches of the mountain laurel as foliage, you may arrange bouquets that cost a small fortune in the fashionable shops.

Examination

Question: What animal is satisfied with the least nourishment?

Answer: The moth. It eats nothing but holes.—*Exchange*.

Thanksgiving Is Here

By Louise Perry, Ida Smith and Marie Le Chener

Dorsey, Md.

THANKSGIVING time is here to make children happy. There will be lots of good cheer. The turkey is fat and saucy; perhaps he doesn't know what a good big roast he will make. The great big pumpkin in his pretty yellow jacket has just said goodby to the cornfield, for he knows what is going to happen.

He'll be cut into pieces
And cooked in a pot,
Then baked in a pie
And we shall eat him hot.

There are lots of cranberries
To garnish the dishes,
And each one may eat
Just as much as he wishes.

And Oh, for the pumpkin pie
And the great big chocolate cake,
But ah, they make me sigh,
For they give me tummy ache!

The Little Wild Birds

By Dorothy Cassady

Marysville, Ind.

We love to see the wild birds,
We love to hear them sing,
We hate to see them leaving,
Though they come back in the Spring.

Some folks like to shoot them,
But I don't call that fun,
For the birds eat the worms in the gardens
'Till after the harvest is done.

Indian Life

By Frances Riley.

Dorsey, Md.

The Indians lived in the Western lands,
And spread their wigwams in the sands,
They loved to hunt from day to day,
While their children were at play.

And never could they read or write,
Though always they knew how to fight,
They never went to school one day,
But always were at fight or play.

An Oversight

"John," asked father, "do you practice on the piano while I am away at business?"

"Yes, father, every day," replied the boy.

"How long did you practice today?"

"Three hours."

"Well, I am glad to hear that you are so regular."

"And the next time you practice be sure to unlock the piano. Here is the key. I locked the instrument last week and have been carrying the key in my pocket ever since."—*Exchange*.

Teacher, to little boy: "What is your name, dearie?"

Little boy: "Jule, Teacher."

Teacher: "Don't say 'Jule,' you should say, 'Julius.'"

Then to the next boy: "And what is your name?"

Second little boy: "Bilious, teacher."

—*Exchange*.

A school teacher who had been telling a class of small pupils the story of the discovery of America by Columbus ended it with: "And all this happened more than four hundred years ago."

A little boy, his eyes wide open with wonder, said after a moment's thought: "Gee! What a memory you've got!"

—*Boston Herald*.

Please ask your mother to do her Christmas shopping early.

Aunt Mary

Dear Boys and Girls:

When I begin to write a story, like the one about Ned and the brownie, there's a peculiar thing that always happens. My old typewriter keys just keep on going so fast that I can't seem to stop them, and the story grows longer and longer, until it threatens to take up all the space in the MAGAZINE. Then the editor man gets out his blue pencil, the scissors man gets his shears, and they both get to work to see what they can do to make it short enough to fit our pages. The printer man says if I do not make the stories shorter he won't be able to print anything else that the boys and girls send in. So that's one of the reasons why we don't get all of your contributions in the issue of the MAGAZINE for which they are intended.

Another reason is that it takes so long for the MAGAZINES to get to some of you by the time your contributions have reached me, the printer man has shut up his doors for that month and refuses to take anything more. However, you may be sure that when anything is left out, it will be sure to appear in a later MAGAZINE.

Now I am going to tell you a little secret. You do not need to wait until you get the MAGAZINE before you write, for if you send in something nice we shall use it anyway. And in order that you may know just what to send, I shall tell you for several months ahead. The January number will be all about winter time; the February number about George Washington, Abraham Lincoln, and valentines. I want somebody to write and tell me what you think we ought to have in the March number.

Next year we are going to make our Children's Page better than ever, and I hope that we shall have lots of new little folks to join in our fun. Send all letters to Aunt Mary, Baltimore and Ohio MAGAZINE, Mt. Royal Station, Baltimore, Maryland.

I send you my love.

Aunt Mary

Safety Roll of Honor

Baltimore Division

On September 17, Foreman A. Long, on Section No. 26, Washington Branch, observed a piece of iron hanging from side of engine 5214, train No. 21. He called this to the attention of the fireman, who had engineer stop the train. The piece of iron was removed. Had not Foreman Long observed same in time, it would have caused damage at Hyattsville, with possible personal injury.

Engineer J. I. Way and Fireman J. H. Gunter, in charge of engine 5201, train No. 503, September 18, discovered ties on fire on the Susquehanna River Bridge. They stopped and put fire out. They were further delayed by light out at Hall signal at Bush River. Notwithstanding these delays to the schedule of No. 503, it arrived at Baltimore two minutes late and in Washington on time.

On September 28, Conductor J. F. Tobin, in charge of engine 1275, Hagerstown Rambler, observed that there was a concrete mixer in a gondola that was too high for bridge at Keedysville, Md. He had train stopped before going under the bridge and averted serious damage.

On the night of October 22, as the engine of No. 171 was slowing down to stop at the Halethorpe station, the fireman noticed that the platform around the tracks at station was on fire and burning hard. Before the train had stopped he jumped from the engine, ran back with his scoop and by throwing ashes from the embankment on the platform, tried to put the flames out. They had gotten too great headway to enable him to do this and Trainmaster Mewshaw being on the train, it was backed and the flames were quenched with water from the tank. The fireman's name was J. C. Moore, and we are glad to commend him for his interest and prompt action.

Charleston Division

Mr. Clarence Feagans, Weston, recently found a tree across the track at Smith's Curve. He walked in and told us about it. He has been appropriately thanked by the superintendent.

Conductor Condry has been commended again for careful inspection of his train.

Car Repairman N. A. Skinner of Burnsville has been commended for making temporary repairs to telegraph wires near Burnsville, thereby promptly restoring interrupted communication.

Brakeman J. D. Fury has been commended for discovering defective car in his train.

Everett Coleman, Sutton, discovered a broken rail on the Sutton Branch. He flagged engine 1205, and advised the engineer of the difficulty. The superintendent has written him an appropriate letter of commendation.

Mr. G. T. Carpenter, Lorentz, while walking down the track, found two telegraph poles broken and lying across the rails. He flagged passenger train 53 and

advised the crew, for which our superintendent has written him an appropriate letter of thanks.

Agent L. E. Woofter has been commended for making temporary repairs to telegraph wires broken down near his station. A similar commendation has been sent Agent M. F. Hutson of Bower for his action in like case.

Conductor S. R. Mathews has been commended for finding and reporting a rail broken near Holcomb.

Connellsville Division

CONNELLSVILLE, PA., October 8, 1921.

Personal.

L. E. BOWERS,

Roundhouse Foreman.

CHARLES SPENCE,

Assistant Roundhouse Foreman.

Dear Sirs—It gives me considerable pleasure to commend you for the action taken last evening when the relief out-fit was ordered to clear up derailment of one of our passenger trains at the helper siding at Woodward. Although you had completed your days work you did not hesitate to take the place of the missing members of the relief crew and by doing so prevented further delay in the movement of that train.

The loyalty shown by you as members of our supervising force makes possible a successful operation on the division, and as superintendent of the Connellsville Division, I am very proud to have you members of our organization.

Yours truly,

(Signed) R. W. BROWN,
Superintendent.

Chicago Division

On August 28, Fireman D. C. Russell, called for first 94, Garrett, discovered fire starting in K. & M. 6714, first or second car out on track No. 5 in eastbound yard. He called attention of Engineer H. E. Shaffer to his discovery. Engineer Shaffer, in turn, moved engine slightly, thereby enabling Fireman Russell to extinguish the fire with use of squirt hose. Damage to car was of no consequence; however, had it not been for the alertness of these employes, serious damage might have resulted.

On the morning of October 12, as 4268 east was passing Wellsboro Tower, Operator A. G. Lemert discovered a bad hot box. He got signal to the train, which was stopped and the car set off for repairs.

Ohio Division

The following congratulatory letter has been written by the superintendent to Engineer P. A. Rhulman and Fireman Charles Hood:

We have just had the pleasure of seeing a report made by Road Foreman of Engines J. M. Mendell, relative to the performance of engine 5108, handling train No. 1, consisting of nine cars, Chillicothe to Cincin-

nati, on September 24. The report indicates that 8015 gallons of water were evaporated on the trip, and 450 scoops of coal used, which equals 6300 pounds. These figures indicate that 10.6 pounds of water were evaporated for each pound of coal consumed, which is an excellent performance. We also note that 7.14 pounds of fuel were consumed per passenger car mile, which is a very creditable performance.

I desire to congratulate both of you gentlemen on this performance and particularly hope you will continue this good work.

On September 24 as No. 88, engine 2789, in charge of Conductor J. H. Howard, was passing Maderia, Operator O. E. Marsh, on duty at that station, observed brake beam down on C. C. & St. L. 20240, and upon observing this condition signalled to conductor and flagman, who stopped the train and removed the brake beam from the car.

Section Foreman J. Conway observed tie bar down on Baltimore and Ohio 222967, which was passing O'Bannon; he immediately signalled conductor, who stopped train and after making necessary repairs to car, proceeded.

Mrs. Robert Spangenberg, wife of freight conductor and sister of Engineer H. Baucus, recently discovered a broken rail in the main track at Fifth Street crossing, Portsmouth, Ohio. She immediately sent her son to the yard crew, who were switching in that vicinity, and arrangements were made to have rail repaired. There is no doubt but that the alertness shown by Mrs. Spangenberg, and interest displayed on her part, averted an accident to a circus train which was near that point. She is commended.

Indiana Division

While second 94, engine 2783, 39 loads, 1338 tons, moving about four miles per hour, was pulling by telegraph office at Cochran, Operator J. R. Young noticed a loose wheel, north side west pair trucks, lead wheel on Baltimore and Ohio 173305. He immediately notified conductor and in pulling car down to set in passing track for repairs the loose wheel was derailed, blocking main track between switches. The discovery of this defect by the operator permitted of car being set out and repaired, thus averting loss or damage to contents. Mr. Young's photograph appears herewith.

J. R. Young, operator, Cochran, Indiana

On September 25, when extra 2618 west, in charge of Conductor Henderson, was passing Brownstown, Track Foreman C. Heller noticed something dragging about 12 car lengths from caboose. He reported the matter to the operator; the train was stopped about one mile west of Vallonia and parts of the broken beam that were dragging and not safe were removed.

Toledo Division

DAYTON, OHIO, October 6, 1921.

Mr. J. H. McNUTT:

It is gratifying to learn of employees in this department taking an interest in matters which mean saving of property and expense to the Company and in a number of cases, the loss of lives or personal injury.

I assure you that the management appreciates the close observance on the part of employees, as in the particular instance where you noticed brake beam dragging on car in train No. 41 while heading into roundhouse head at Hamilton. This was removed by trainmen after you had notified them, and enabled them to correct the condition before any damage was done.

(Signed) R. E. CHAMBERLAIN,
Division Engineer.

On August 4, Operator E. F. Stenger, Miamisburg, Ohio, observed a bad order car in work train No. 2930, which was passing Miamisburg. Mr. Stenger brought this to the attention of the conductor in charge and notified the dispatcher so that the car might be repaired. Upon examination it was found that there was a nut missing

from the box bolt, which permitted the box to work in the arch bar; sooner or later, the box would have dropped out, resulting in an accident.

On September 17, as extra 2887 north was pulling out of east siding at Cridersville, Agent I. J. Fischer noticed brake beam down on M. P. 6711. He immediately notified the train crew who stopped train and set bad order car out.

DAYTON, OHIO, October 3, 1921.

Mr. ROBY PRICE:

It gives me great pleasure to be advised by Supervisor McCarthy that through your close observance you probably averted a serious accident, which in addition to damaging property, might have resulted in the loss of lives, by discovering brake beam dragging on train No. 88, two miles west of Washington Court House.

You notified train crew, enabling them to put the equipment in safe condition for transit.

(Signed) R. E. CHAMBERLAIN,
Division Engineer.

As extra 4048, south, with 75 cars, in charge of Conductor H. E. Peters and Engineer J. W. Fife, was passing Sidney on October 10, Engineer T. Tehan and Fireman F. N. Roshon, on train 82, who were standing on side track for this extra to pass, noticed a bad wheel on extra 4048's train. They immediately whistled a stop signal to rear end of train and also flagged them down.

Conductor Peters applied air on rear of train and stopped train just a short distance south of Sidney. About the time the train stopped, one pair of wheels on Baltimore and Ohio 76774 dropped off rail, account broken wheel.

Agent C. J. Brown also noticed defective wheel and endeavored to get train stopped.

Very Open Letter to Mr. Trotzky

Mr. Trotzky, you and Lennie have remarked, I understand, That you'll Bolshevize our country—even got your posters planned;

And you will take our wives and children for the welfare of the mass,

Taking, too, our homes and money and our flowers and our grass.

Mr. Trotzky, you are thoughtful to have planned for us this way;

You're a mighty busy feller, Bolshevickin' every day.

So we're giving you this tipsky—better study it as such—

We've a home-made Yankee Government and like it very much.

We are just a bit old-fashioned when it comes to wife and home—

And a man who tried to swipe 'em might get dotted on the dome.

As to property and money, while we haven't such a "slew,"

We will keep it as we have it, if it's all the same to you.

We're fed up on all your theories and your worthless, workless dope—

All your scheme to wreck ambition; plans to bury faith and hope.

In conclusion, briefly speaking, we have only this to say:

"Mr. Trotzky, take your plotzky clear to hellovitch and stay!"

—C. L. F. in N. Y. Sun

In Memory of Patrick Judge

Ignatius Brennan, the well known writer, has penned the following lines to the memory of Patrick Judge, prominent Baltimore and Ohio Railroad man of this city, whose death occurred September 6, 1920. Mr. Judge had many friends throughout this county and this section of the state who will read the beautiful tribute with interest. It reads:

I knew a home wherein there dwelt,

"One to the manor born!"

A gentle man at eventide,

A gentle man at morn.

A gentle man throughout the day,

A gentle man at work or play,

God-loving and God-fearing man!

The humble, righteous, Christian plan!

Within this home the years went by,

And all was best routine;

This gentle man, the family king;

A gentle woman, Queen.

This rule was ever theirs to view:

"Do as you'd have the others do!"

They ruled their own by laws of Right;

Not by the rod of brutal Might!

Ne'er was a cloud, though dark it be,

To flash upon the scene.

But silver flecked its every mesh,

With bits of gold between.

No shadow dare hang o'er the heath

Where Love and Wisdom dwell beneath.

The God of sorrows flees from out

The hearth with Happiness about!

There came a day! The morn was bright!

Dame Nature at Her best!

A day when brain and sinew halt—

All labor is at rest!

This gentle man is called above,

To rest with Him he always loved.

To rest! from honest duties here!

To take the ordained route, the bier!

An earthly pall hangs o'er this home,

Where once Joy reigned supreme!

Joy, in her fullest, brightest sense,

Not merely joy, a theme!

But Joy in all the word implies,

Within a home of sympathies!

A home where Right and Honor trod!

A home where dwelt the love of God!

(THE EPITAPH)

He boasted not of reign nor realm!

His scepter always sheathed!

He drove no conquering hosts to claim

What was not theirs, bequeathed!

He asked that no one do what he

Would not have done most cheerfully.

His place was at the vanguard's front

To share with ALL the battle's brunt!

He paid no court to spangled god;

He craved no tinsel'd fame;

He lived aright, and left behind:

A pure and honored name!

Those of his kin and friends are blest

When this thought comes, "We knew him best!"

When e'er we speak his name we'll say:

"REQUIESCAT IN PACE!"

Grafton Sentinel.

Grafton, W. Va.

So Long Judge!

Judge: "Now I don't expect to see you here again, Haggen, for speeding."

Haggen: "Not to see me here again, Mr. Judge. Why, you ain't going to resign yer job, are yer, Judge?"

—A. W. Employees Booster.

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department

Correspondent, GEORGE W. HAULENBEEKS

No, I do not concede that corporation are soulless. In my forty years service in the Law Department I have observed too many instances convincing me that the reverse is the case.

How can we charge a corporation with being in this condition when it has a Welfare Department; Relief Department; Associations of Veterans; a Pension Department, and other organizations operated in the interests of employes, as in the case of The Baltimore and Ohio Railroad Company?

I have read from time to time in our MAGAZINE of the doings of the Veterans, but it remained for me to join and participate in the last picnic for the year at Martinsburg in September, to appreciate them fully.

At Camden station there stood a long train of coaches with a snorting and puffing engine away at the head, anxious and eager to start; with men, women, children—even grandchildren passing through the wide open gate to take seats for the trip. I occupied a car surrounded with my comrades, veterans and their families. They all impressed me as being infused with loyalty and sincerity and I enjoyed it. The trip was too short.

I am charmed with Martinsburg. The ladies of the committee were courteous indeed and I never shall forget their fried chicken. Heretofore I thought the Baltimore girls were the only ones skilled in the art. I found I was mistaken.

Many dwellings in the residential section of Martinsburg attracted my attention. I advise young men in our service to secure building lots in the neighborhood of Rosemont Park, through our Relief Department, while prices are within reach. West Martinsburg will be of some moment in the near future. Young men ought to be thinking about this now. It is a good plan to get a cage before securing the bird.

Three speeches were made after luncheon—by Vice President Charles W. Galloway, General Manager E. W. Scheer and General Superintendent R. B. White. They were all good and the sentiments went right to the spot.

Alfred J. Anderson

Alfred J. Anderson, who died suddenly in September, was faithful and loyal to the Company. He was assistant general freight

agent and was most efficient and capable. Our Charles Radley Webber, in attending hearings before the Interstate Commerce Commission, was helped by Mr. Anderson's services. I am glad to add a word of praise to the memory of this faithful employe.

My limited space prevents me from dilating on Law Department doings. Every one is well, thank you, and doing his best. Duncan K. Brent, general attorney, had a birthday on October 9 and the MAGAZINE correspondent was in the same boat, same day, but there was quite a difference in their ages.

Freight Tariff Bureau

Correspondents, F. W. RUPPERT and C. A. WAGNER

William Rappe, a former clerk of this bureau and a member of Company "C," 111th Inf., who lost his life in the World War at the battle of Montfaucon, was buried from his home, 610 Nichol Avenue, Govans, on Sunday, October 2.

To whom was Maryland License No. 95-400 issued to? We do not know but understand that little "Ruthie" is learning to run the "fliv." One may see her any morning alighting at the main entrance of the Annex Building. She says she must have a pillow in back of her to enable her to apply the foot brake effectively.

Elizabeth C., daughter of Magazine Correspondent Caspar A. Wagner

The old saying "You don't know what you will have to do before you die" has made W. L. H., better known as "Lew," sit up and take notice. Since he became a benedict, he now carries his own little lunch. The Merchants' and Wright's hash parlors miss Chester's face nowadays.

W. J. Kernan was married on September 19, as per schedule. Now we all get the inside dope on lodge nights, wonderful saving made possible, why married life is the best, etc. We congratulate you, Joe, and wish you both all the happiness possible.

Well, fellows, the bowling season is open and we have some wonderful games every Wednesday night. Be there and shout for your office. Games start at 8.30 sharp and are held at the Victoria Bowling Alleys until further notice.

We suggest that Pierpont Roberts be elected next fire chief of Baltimore. On October 14 he led 313th discovery squad to the north window of the Annex Building to view the spectacular blaze which made its appearance over the roof of the F. A. Davis warehouse. Roberts claims to have summoned the Fire Department, which made a quick appearance, and thinks he should have some reward for his quick action in the matter.

Wonder how many of the employes of our department have gotten any business, freight or passenger, for the Company. It won't hurt us to try. Let's go!

Transportation Department

Correspondent, L. K. BURNS

Lillian Foster was the cause of a great deal of comment when she came into the office the other day minus—yes, she had her hair bobbed! But we are all of the opinion that it is becoming to her.

H. A. Burns, traveling car agent, whose home town is Midland, Md., likes Baltimore so well that he has even chosen a wife from Baltimore—Miss Helen Hild. The couple were married at St. Cecelia's Church, Baltimore, on October 11. Immediately after the ceremony they left for a short trip to Niagara Falls and other places of interest on our own line. We extend our congratulations.

On September 25, our office baseball team played an interesting game at Patterson Park with the Pittsburgh Traffic Depart-

"Hank" Evans and "Jessie" James

W. H. Shaw

ment of the Baltimore and Ohio. It was anybody's game up until the sixth inning but in that stanza our boys put things on ice by scoring three runs. The game ended in a 7 to 3 victory for our team.

Hall lead in the offensive for our team, making five hits in as many trips to the plate, and scoring three runs. Hatton also collected four hits, one of which was a triple and another a double. Bradley hit best for the Pittsburghers.

The Pittsburgh Team was well represented, as there were thirty-six in all who made the trip. This included a number of young ladies from that department.

The baseball season is now at a close; nevertheless, Manager Mansfield is still keeping the boys up with the sports. He has a crack bowling team which is now making a strong showing in the Baltimore and Ohio Bowling League, Section B. At this writing it stands in third place. The members are as follows: Mansfield, captain; Ackler, Wood, Collins, Hatton, Guerke, Fowler, Seeds, Poole, Roth.

Well, well, well! Who would have thought that Old Man Stork would roost on "Brose" Hardwick's roof again after 12 long years? But he did, for on Sunday, October 16, little Miss Marjorie Virginia was handed down his chimney. Although we wish her all kinds of good luck, "Brose" had to go and spoil it all by telling us that she looks

like him. Perhaps she'll outgrow it; they do sometimes. We herewith hand out three cheers and a tiger. On with the smokes!

Car Service Department

Correspondents,

J. T. LEAN and H. V. OBERENDER

We welcome back to the fold our old friend, W. H. Shaw, veteran employe. Mr. Shaw has been on a long vacation to Asheville, North Carolina. He is now back with us, in good health, and able to pound away at his work like a good fellow.

The picture below shows the employes of the Car Service Department in September, 1892. The office at that time was located at Camden Station and consisted of a couple of small rooms just above the smoking room. A few of the clerks shown here are still in our office, the others having passed away. Our office now occupies one floor in the Central Building, covering about 15,000 square feet of floor space. Also comparing about 35 to 300 employes helps to show the tremendous growth of our office and railroad since 1892.

Auditor Disbursements

Correspondent, JOHN C. SVEC

The baseball team of the Auditor Disbursement's Office, with J. F. Donovan as manager, took a trip to Connellsville, Pa., on Saturday, October 8, to play the "All-Star Team" of that city. Upon their arrival they were pleasantly entertained at the Y. M. C. A. Because of rain the game came to an end in the 5th inning with a score of 11 to 1 in favor of our team. The boys were entertained by Mr. Underwood, secretary of Baltimore and Ohio Y. M. C. A. and Superintendent Brown, of the Frick Coal and Coke Company, who conducted the party through the oldest mine of the Frick Company, explaining the details of mining. We all hope to have the pleasure of visiting Connellsville again in the near future.

On Sunday, October 9, a party was gotten together in the office and took an enjoyable trip to Harper's Ferry.

The stork visited the home of Joseph G. France on Sunday, October 16, leaving a little baby girl. Congratulations!

Baltimore Terminal Division

Locust Point

Correspondent, J. ROSS GOULD

Here is a picture of our janitor, James A.

Janitor James A. Turner

Turner, Locust Point Freight Office. He is a faithful and efficient worker and his pleasant and respectful manner has gained him many friends. Previous to his employment with the Baltimore and Ohio he had served eight years and three months on U. S. battleships. He remembers with pride the pleasure he had in shaking the hand of the late President Theodore Roosevelt when he took his eventful trip on the U. S. S. Connecticut.

Trials of Andy

"What Ho! What Ho! My kingdom for a cook!"

Thus spake our noble worthy Andy Miles, When Pansy made her exit, without deigning e'en a look, Which changed our Andy's customary smiles.

His manner has grown grouchy, there's a wild look in his eye, His countenance is pallid and forlorn; Yet he shows determination, that he will do or die, As he fries his eggs and bacon every morn.

When misfortune comes upon you, and you are sorely tried, As it happened in this case to Andy Miles; You will work the hen fruit overtime—scrambled, boiled and fried; And help in part to mitigate your trials.

So let's sympathize with Andy, who's a man both fine and dandy, Whose trials appear to be about just double; And suggest that he get married, for he too long has tarried, That cooks may ne'er again cause him this trouble.

OLD TIMERS OF THE CAR SERVICE DEPARTMENT

Left to right, front row: Duvall, Hogan, Moore, A. Mitchell, Dukehart, Canton, Hutchinson, Galloway, Fauble. Middle row: Woods, Graney, McCaulley, Murphy, E. Mitchell, Gordon Smith, G. H. Smith, Whaland, Hart, Carroll, Lyons, McFarland, Fisher, Cooper, A. H. Greenfield, G. Kistendorff, J. W. Galloway. Back row: Toner, Eder, Vincenheller, Dunn, Gilbert

John Lloyd

We present herewith a true picture of our old friend, John Lloyd, former captain in the Baltimore and Ohio Police Department. After 30 years of faithful service with the Railroad, John has earned retirement. He is 84 years old and in full possession of his faculties. His reminiscences of the many stirring times he has had while in the service are quite interesting.

Your correspondent was extremely fortunate to have been in his company at the banquet given the late General Manager Fitzgerald at Fairmount, W. Va. in 1904, which no doubt will bring back to Mr. Lloyd pleasant recollections, when he reads this article.

We were fortunate in obtaining this picture of Daniel Reimsnider, Dorsey, Md.

This gentleman entered the employ of the Baltimore and Ohio Railroad on September 13, 1892, as a trackman; in 1895 he was transferred to the carpenter's gang as a helper; after working at this for eight years, he was promoted to engineer of the pile driver, which position he filled until 1915. He was then transferred to pile driver No. 2, as a carpenter, which position he has filled since. He, like "Teddy" Roosevelt, is bitterly opposed to race suicide, as is evidenced by the fact that he and his wife are the proud parents of nine children, three of whom are now working for the Baltimore and Ohio. Some who are not yet old enough intend to follow Daddy's footsteps.

The horse he is riding is called the "Pride of Dorsey's" and with "Dan" aboard, makes quite a spirited picture on the Washington Boulevard on Sunday evenings.

We are pleased to report the safe return to Locust Point of our genial assistant freight agent, J. J. Geigan, from the first vacation he has taken in twelve years. He

Daniel Reimsnider, pile driver and engineer, aboard his favorite nag

appears to be in splendid health and perfectly fit to enter the fray; and he, with his associates at Locust Point, are fully prepared to meet the rush of the increase in business which we anticipate for the coming season. We regret to report that he is still "heart whole and fancy free." We anticipated that after having looked over the field very thoroughly, he would bring home with him some fair belle of the Southland, whose ready wit and flashing eye had stormed the citadel of his heart, captured the redoubt and forced him to surrender. But, alas! such was not the case, and we must forego the pleasure of congratulating him. Yet we are sure that some girl will realize too late the opportunity she has missed.

Mr. Geigan entered the employ of the Baltimore and Ohio at Locust Point in the summer of 1882, as messenger, and from that position, by his close attention to business and his indefatigable efforts in promoting the Company's interests, he has risen to the position of assistant freight agent. This he has filled for the past six years with credit to himself and honor to the Railroad. That he may continue to rise is the earnest wish of your correspondent.

The Sapp brothers, messengers, Locust Point

Allow me to introduce to you, dear readers, the Messrs. Sapp, of Pikesville, Md., otherwise known as the heart breakers of Andre Street, Locust Point.

They are employed at this station as messengers, and whilst this position rests on the bottom rung of the ladder, it carries with it responsibility, which if properly administered, will force them to the top. These young men are closely attentive to the duties of their position and are pleasant and accommodating, and the writer feels positive that if they continue to serve in this manner they will speedily earn promotion. There is many a long drawn sigh emanating from the lips of the belles of Andre Street, Locust Point, as the Sapp brothers pass them on their daily trips, entirely oblivious of the havoc they are creating.

Lieutenant DeScheff, retired, formerly of the 12th Calvary, U. S. Army, has given the office force at Locust Point some rather interesting lectures on the exciting moments that he spent in the western states and the Pacific islands. We wait with pleasurable anticipation his recital of the stirring times that he and Joseph Lubinski had in (dis) organizing the first arrivals at Camp Meade.

G. R. Ball, caller, B Yard, Mt. Clare
—Photograph by Brakeman L. C. Piper

Mt. Clare Junction

Brakeman S. C. Piper, Mount Clare Yard, recently visited the MAGAZINE office and showed us some examples of his ability as a photographer. He has given us a number of interesting pictures of Mount Clare employees and we wish to extend our thanks to him for the courtesy. These pictures will appear in the MAGAZINE from time to time.

The accompanying photograph is of G. R. Ball, who has been in the service of the Baltimore and Ohio for 41 years. He was first employed in the blacksmith shop at Mount Clare in 1880, was transferred as watchman in 1891, as caller at Fulton Street, Mount Clare, 1897, and is still holding down that job.

Mr. Ball was one of the very first men in Baltimore to join the Veterans Association when it was organized at Riverside by the late E. L. McCahan, its first president, when the boys met in the Y. M. C. A. building at Riverside.

To a man coming from another business into railroading, and getting pretty well acquainted with the men of the rail and their families, one of the things which surprises and interests most is the large number of unusually big families which exist in the railroad fraternity. A fair sample of this is pictorially given on the next page, the family of Yard Engineer A. E. Richardson, Mt. Clare Yard. In the picture from left to right, lower row is Mr. Richardson; Melvin; Mrs. Richardson. Back row: Arnold and his wife, Elizabeth; Elsie; Bertha; Ola; Ethel; Gertrude and Myrtie. In addition to the eight shown in the picture, two of his children are deceased.

We often wonder how men support comfortably families of this size, and when I

Assistant Yardmaster Sullivan, B Yard, Mt. Clare
—Photograph by Brakeman L. C. Piper

asked Mr. Richardson about his experience, he said:

"I was left absolutely on my own resources when I was younger than the youngest boy who appears in this picture. But I also had the great advantage of having firmly implanted in me the desire to live a clean and wholesome life. I have never been a blasphemer, nor have I ever had a drink of intoxicating liquor. My principal weakness is for this old pipe.

"My wife and I have always worked in closest harmony, and although there were times when we had to wear cheaper and poorer clothes than we would have liked to, we only did this because we were anxious to have our children appear well dressed and to give them the outer appearance of self-respect. This we have always done. Then, we have had little sickness and my job has been a good and steady one. Four of the girls and my oldest son are now married. So the family at home is comparatively small."

Mr. Richardson entered the service in 1886 as car repairer; in 1888 he left the Railroad, to return in 1889 as a fireman; he was promoted to engineer in 1891 and has continued in that position ever since.

Baltimore Division

Correspondent, W. H. TARR, *Superintendent's Office*, Camden Station

On our trip West recently we were glad to meet Signal Supervisor J. P. Buzzard, Pittsburgh, formerly of the Baltimore Division. We regret to learn of the death of Mr. Buzzard's father, who was buried at Berkeley Springs, W. Va.

Members of our office force have started a checker league for championship. It has been demonstrated that "Ben" Bell, our office boy, can win once in a while.

On October 10, Mrs. A'Liccie Lawrence gave a surprise party during the noon hour to Harry Fox, file clerk, who was 21 years of age on this date. Members of the office force congregated in the file room when Mr. Fox was presented with a cake. Mr. Fox had been absent from the office several months account of sickness and we wish him good health.

Foreman C. C. Foxwell and "Billy" Webster, with their catch of raccoons

of his quarry. As the result of shrewd management and excellent sport, chiefly carried on at night-time, the season's bag of game since last November totals 36 raccoons, 3 opossums and 25 pole cats.

The splendid dogs "Music" and "Jack," hailing originally from Florida, do their part in stirring up the game. The raccoons shown also in the photograph, weigh respectively, left to right, 18, 16, 12 and 10 pounds each. They were bagged inside of 30 minutes.

Washington, D. C., Freight Station

Correspondent, W. L. WHITING, *Chief Clerk*

Recently there was held in this city a convention that was of great interest to all railroad people, but especially to those of the Baltimore and Ohio.

The Traffic Group of the National Dry Goods Association met at the Raleigh Hotel to discuss the all-absorbing topic of efficient transportation. Among the invited guests were the following representatives of the good old Baltimore and Ohio: G. S. Harlan, division freight agent; F. L. Marshall, Jr., district freight agent; M. J. Bevans, division freight agent, New York; W. A. Kraft, supervisor of fast freight service, and last, but not least, our own freight agent, D. M. Fisher.

Representatives of the trade from all over the country attended. Mr. McElroy, from Boston, Mass., presided. The railroad systems naturally came in for their usual share of praise and criticism; and it was a noticeable fact that Baltimore and Ohio methods were highly commended.

What results will accrue to the railroads from the deliberations of the Association? These have already begun to show themselves; our agent has received several letters, from merchants in this city who have not been in the habit of patronizing the Balti-

1. Left to right, back row: James Parsons, lumber inspector; Daniel Jackson, Vocational Board trainee; William Kenneally, lumber inspector; Henry Bushelberger, helper; front row: J. J. Tatum, superintendent car department; George H. Emerson, chief of motive power; R. R. Ricker, storekeeper; John Dolch, saw man. 2. Left to right: Laborers Ben Sochem, George Fairbanks, Limes Givens, Charles Griffith; Foreman R. S. Davis. 3. Left to right, front row: M. Ruinsky, laborer; Howard Sullivan, crane conductor; William Kenneally, lumber inspector; M. Holtman, clerk; H. Walker, laborer; above: H. Snyder, acetylene burner; John Baker, crane operator

more and Ohio, asking for shipping information. Let them all come with their requests; they will receive prompt attention. Once they realize what they have missed in the past, we need have no fear of a slackness in business at the corner of New York and Florida Avenues.

A feature of the program of the Convention was an informal reception of its members by President Harding, at the White House. The President had a pleasant word of welcome for them all.

We have recently undergone a transition from time-work to piece-work in some of the departments. This has necessarily caused some changes and readjustments in our force. Mrs. Bertha Perry and Mrs. Isabel

Hamilton Watch

The Railroad Timekeeper of America

Where safety and schedule time are absolutely demanded—you will find the Hamilton Watch

While the Broadway Limited is pounding along, eating up the miles between New York and Chicago, a Hamilton Watch does the timing. And, in spite of the ceaseless jarring and jolting of the engine, that Hamilton runs accurately. That's a characteristic habit of all Hamilton Watches—they keep accurate time under the strenuous conditions of railroading.

*The Broadway Limited
Pennsylvania R. R., and
its engineer, O. P. Heller,
who carries a Hamilton
Watch.*

The Hamilton which your jeweler will be glad to show you is guaranteed to have exactly the same habit of accuracy, and when you buy a Hamilton you will be buying a watch that will give you perfect satisfaction for a generation or longer. For time inspection service, Hamilton No. 992 (16 size—21 jewels) is the most popular on American railroads.

Write for the Hamilton Watch Book, "The Timekeeper." It pictures and describes all Hamilton models, stating prices, which run from \$22.00 (\$25.00 in Canada) for a movement alone, to \$200.00 for the superb Hamilton Masterpiece in an extra-heavy 18k. gold case. The book also contains much valuable and interesting watch information.

Hamilton Watch Co.
Lancaster, Pennsylvania

Cooke, both of whom have been with us for some years, have left us; and Ralph V. Montgomery and Allan S. Kidd, a former employe of the Washington Terminal Company, have entered our service as index clerk and record binder respectively. "Jack" Mullikin, another from the Washington Terminal, has come to us as collection clerk. We extend a welcome to our new-comers.

"CLAIM PREVENTION" is one of the things we pride ourselves on at this station. The following statement and letter of commendation show that our claim clerk, J. T. Carr, is still very much "on the job."

"BALTIMORE AND OHIO RAILROAD COMPANY"

WASHINGTON, D. C., October 1, 1921.
Statement of claims filed at Baltimore and Ohio Freight Station, Washington, D. C., during September, 1920 and September, 1921.

	NO. OF CLAIMS DAMAGED	NO. OF CLAIMS SHORTAGE	TOTAL NO. CLAIMS	AMOUNT DAMAGE	AMOUNT SHORTAGE	TOTAL AMOUNT
Sept. 1920.....	81	30	111	\$3,687.83	\$1,256.65	\$4,944.48
Sept. 1921.....	42	8	50	\$809.02	\$183.43	\$992.45

BALTIMORE, MD., October 11, 1921.
1951-Washington, D. C.

Mr. D. M. FISHER:

Thank you for your letter of October 1, enclosing statement of freight claims handled at Washington, D. C., during the month of September.

This statement is indeed gratifying, showing that the reduction is not all due to the falling off in traffic, but to the good conscientious work done by our employes, and all concerned are entitled to credit, enabling such a showing to be made at one of our largest freight stations, Washington, D. C. We take this opportunity to commend you and your force.

(Signed) C. C. GLESSNER,
General Freight Claim Agent.

Talk about 50 percent reduction, look at that.

Brunswick

Correspondent, R. L. MUCH, *Conductor*

H. C. Litchfield, the popular store-keeper here, and his wife, have recently returned from an extended trip to Boston and Niagara Falls. Their trip was very beneficial to both, so Harry is getting down to his usual daily routine.

Here we have a picture of Miss Kathryn Hogan, the bright and cheerful bookkeeper, Baltimore and Ohio Y. M. C. A., who

Kathryn Hogan

greet everyone with a pleasant smile. We couldn't get along without Kathryn.

Here is W. S. ("Joe") Sigafosse, yard brakeman, Brunswick's all-round athlete and promoter of athletics. "Joe" is a wrestler of some note, having several wins to his credit.

He is open to all comers. Look him over!

Train Crew Efficiency

Extra 4413, Engineer "Jackie" Harner, Fireman F. J. Mencer, Conductor C. W. Staadman, Flagman R. L. Much and Brakeman D. H. Ambrose, called in Keyser 7.00 p. m. on September 14, for 65 loads of coal, 6025 tons adjusted; left Keyser 7.10 p. m.

Train crew looked over every car in train, examined every knuckle pin, carrier iron, locker, let off 24 hand brakes, tested air and watched every car as it pulled out of yard.

W. S. "Joe" Sigafosse

caboose. Behind the stove is a water tank, brass bound, with pipe running to a porcelain lavatory furnishing hot water, while pipes running from another tank furnish the cold water. Highly polished brass is very much in evidence and all wood work is tastefully painted and grained. Well built cupboards take care of all supplies, clothing, etc. It has a place for everything and everything is kept in its place. Many pictures—not too many—adorn the wall. Among them are five scenes taken along the right of way in 1868. One of them shows the old brick Viaduct at Cumberland, with a wood burning locomotive standing on it. A couple of highly polished brass lamps furnish light at night.

The members of the crew are proud of their railroad "Palace car" and take much pride in its upkeep and appearance.

Conductor C. E. Savage died suddenly at his home on west Piedmont Street, Keyser, on October 3, of acute indigestion. He had been complaining for several days but his death came as a great shock to his family and friends.

Mr. Savage had been in the employ of the Company for thirty years and was one of the best trainmen in the service. He was a member of the O. R. C. and of the Knights of Pythias Lodge. Surviving him are his wife, two daughters, Mrs. Howard Swadley of Keyser, and Mrs. Barbe of Kittanning, Pa., and two sons, Raymond and Columbus, at home. The funeral was held on Thursday and the interment was in Queens' Point Cemetery, Keyser. We extend to the family heartfelt sympathy in their great loss.

Keyser was shocked a few days ago when the news was heard that the little 5 year old son of Lieutenant of Police ShROUT, had been run over by an auto and instantly killed. We extend to Lieutenant ShROUT and his family our profound sympathy.

Your correspondent, Harry B. Kight, has resumed his duties as day ticket clerk at Keyser, after having acted as agent at Deer Park Hotel during the summer season. Send him all the notes that you have and let us put the Cumberland Division on the map. Do you receive each issue of the MAGAZINE and do you read it? We have a MAGAZINE to be proud of and should do all we can to help it along. If you are not receiving it and will let the correspondent know, he will see that you are furnished with a copy of each issue.

Machinist Ralph Wolford came to work the other day all smiles. The stork had paid him home a visit and left him a fine boy.

"Cob" Parsons, rate clerk, and "Jim" Steadman, night ticket clerk, went to Pittsburgh to attend a football game (so they

said), but we heard there wasn't any game being played there. They are a foxy pair and we are watching the Michigan papers for notice of a marriage license or a wedding.

Every once in a while we hear the saying that "the cat came back." Well, out at Hardman there was a cat that went away. On the morning of October 6, Engineman Burke helped a coal train up Newburg grade. The train stopped at West End and Engineman Burke got down to look around his engine. He discovered a cat perched up under the boiler. With the aid of a flagstaff he routed the cat which took to the mountains.

"Pete" Ervin, chief clerk to the trainmaster, has purchased a Cleveland Six, and he and his family are seeing the country in it.

Conductor J. L. Robinson died at his home on October 20, aged 55 years. Mr. Robinson had been in ill health for several years. Surviving him are his wife, two daughters and two sons. He was a member of the B. of R. T. and of Olive Branch Lodge No. 25, Knights of Pythias. The funeral was held from his late residence on October 22. Interment was made in Queen's Point Cemetery, Keyser. We extend our profound sympathy to the bereaved family.

Keyser shows first with two local advertisements. Patronize the advertisers and help pay the cost of the MAGAZINE.

Sabraton, W. Va.

Correspondent, L. M. GUMP

The accompanying photograph is of the children of Machinist Helper George Bokey, of Sabraton. They are Isabella, aged 8 and James, aged 5. Mr. Bokey entered the service of the Baltimore and Ohio as a fireman in 1913 and continued as such until 1919, when he was made a brakeman. In December of that year he unfortunately lost his left foot. After he recovered he accepted the position of machinist helper in the local shops, which occupation he still holds.

Isabella and James, children of Machinist Helper George Bokey, Sabraton, W. Va.

"I must stop making steam for the other fellow!"

"I've been firing all these years in road service and no promotion simply because I've been contented with my job. Soon I'll outlive my usefulness as a fireman and I'll have to do yard work for the rest of my days. I must stop making steam for the other fellow. I must get busy and prepare for my final examination or I'll fail to pass and never will become a Locomotive Engineer."

Men all around you in railroad service are missing promotion because they are not well informed on their work and cannot qualify for positions requiring greater skill.

The International Correspondence Schools can help you, in spare time, to qualify for your examinations. More than two million men and women in the last 30 years have advanced them-

selves through I. C. S. help. Over 130,000 are studying right now. You can join them and get in line for promotion. The first step to success—to the right-hand side of the cab—is to choose your career from the list below and mark and mail the coupon.

We regret to report the death of one of Sabraton's old timers, Eugene Davis, familiarly known to all his friends as "Dad." After an illness of approximately sixty days, he quietly passed away on October 11. He was buried on the 13th, six of his friends from the shops acting as bearers.

Shop Clerk R. E. Sigafosse has been transferred to the Riverside Shop Office. During his stay here he made many friends, who, while regretting his departure, wish him well in his new position.

Electrician G. C. Fletcher has left the service to engage in other business. Mr. Fletcher was a nold hand here, and was well

liked by everyone who knew him. His position has been filled by James E. Ware, of Baltimore.

Local Storekeeper "Red" Farrell, recently purchased a rabbit dog. Boiler-maker W. C. Johns reports a heavy mortality rate among the rabbits; however he states that indications are that the greater number of them laughed themselves to death.

Dempsey Fleming, stenographer and correspondent, has resigned his position to engage in other business; his position being filled by Miss Ella Grubb, of Rowlesburg.

E. N. FAIRGRIEVE, *Car Distributor*, Office of General Superintendent

ELMER H. STOLTZ, Pittsburgh Freight Station

The regular meeting of the Pittsburgh Division Veteran Employees' Association was held in Odd Fellows Hall, Hazelwood, on October 10, with a large attendance. This was the night set for the nomination of officers for the ensuing year. It resulted in our popular and hard working W. C. Cox and G. N. Orbin being nominated for president and secretary, respectively, without opposition. Their election is assured.

Mr. Cox and Mr. Orbin are largely responsible for the rapid and enthusiastic growth of our organization, and both take pride in promoting our principles. It is no wonder that our annual picnics are such successes with such men as these in charge.

By special invitation, the Ladies' Auxiliary met with us on this occasion, and their presence added considerably to the pleasure of the evening. After the ladies put on some special exercises, and appropriate remarks were made by the members of both organizations, a splendid lunch was served by the ladies.

Thirteen applications for membership were received and acted upon, and from the number of application blanks asked for, we can look forward to a prosperous year.

Charming music was furnished during the evening by Miss Mary Hull.

Our sympathy is extended to Fireman and Mrs. G. W. Poellot in the death of their daughter, Mae Irene, on August 1.

The accompanying pictures were taken by Stationmaster Drake in the Pittsburgh Yard during the later part of May.

Here we see Conductor Daniel Hunt, who operates trains Nos. 70 and 69 between Pittsburgh and Fairmont, W. Va. Careful observation will show on left lapel of coat two stars and one bar, indicating the completion of fifty-five years of service with the Company. A noble record.

To the right of Conductor Hunt is Conductor P. F. Rhodes, with a service record of 41 years, one star and three bars. Conductor Rhodes, who ranks second oldest passenger conductor on the Pittsburgh Division, is at present employed on our heaviest commuter trains between

Pittsburgh and Versailles. Conductor W. B. Rector, with a service record of forty-one years, is also employed on local trains between Pittsburgh and Versailles. The picture of Conductor Harry Swarner shows 28 years of service.

We feel proud of the records of these men and congratulate them for their faithfulness and devotion to duty.

The accompanying photograph, made by an inspector of the Bureau of Smoke Regulations of Pittsburgh, is of engine 4574 pulling 4500 tons, in charge of Engineer C. L. Kinnan and Fireman E. H. Garner, moving west from the Wilmot Street bridge. It will be noted there was no trace of smoke. This indicates splendid work on the part of the crew, and shows what can be accomplished by cooperation in solving the smoke problem. Both Engineer Kinnan and Fireman Garner were congratulated by the superintendent for this excellent performance.

Our old friend, "Charley" Richardson, who was an "eagle eye" in the Pittsburgh Yard for years and years, has taken up a new position in Baltimore. He is with the Commerce Trust Company in that city.

A recent letter from "Charley" says he is enjoying the best of health. He extends to his old Pittsburgh friends a greeting and a cordial invitation to visit him in his new headquarters at any time, and he wishes to be remembered to all of his friends.

Well, well! Our old friend Dan Cupid is around again. Miss Lena Vannort, employed in the Division Accountant's Office, Pittsburgh, is the latest victim of his wiles. This charming young lady changed her name from Miss to Mrs. on October 8, and is now known to the community as Mrs. Mischler. Congratulations and best wishes to you and your husband!

Glenwood Round House

Correspondent, MARY A. BREEN, *Stenographer to Master Mechanic*

On September 9, while one of our shop foremen and his wife were going west on No. 9, they engaged in conversation with a nun, who was traveling from New York to Chicago. In the course of the conversation, the subject of traveling and railroads was broached, and we were awarded another send-off for our passenger crews. This lady

Engineer Kinnan and Fireman Garner handle this heavy freight engine 4574 without smoke

stated that while it did take a little longer to make the trip over our line, everyone is so courteous that there is really no time for the trip to become boring. She also said that within the next week, she and seven other nuns intended to make the return trip to New York and would certainly use our line.

It was with deepest regret that we learned of the death of the wife of Chief Caller Baker. We realize how little any words on our part will lessen his grief, but nevertheless, we all extend heartfelt sorrow.

We notice that since General Foreman Appelbee has returned from Philadelphia, our passenger engines have taken a brighter outlook on life. When one stops, looks and listens, as he should, at the sound of an approaching locomotive, he sees something that is not only big and black, but an engine that is well worthy of comment so far as cleanliness is concerned. It isn't easy to keep them looking that way, but it is worth while.

Aint we got fun? You should hear the girls in the office talking matrimony. They take inventory of their hope chests about once a month, but sad to relate, it seems as though the chests consist largely of hopes and nothing else.

After his return from a recent vacation, we noticed a far-away look in Electrician Fisher's eyes. A little sleuthing developed the fact that the vacation was not a vacation but a honeymoon. Well, E. A., we might forgive you for getting married, but for the failure to hand out the cigars—we can't forget that.

Another brave man in our midst—Machinist E. J. Sutter, who has embarked on the sea of matrimony, the plunge having been taken on September 27. We regret that we are not acquainted with his better half, but we all wish them a long and happy married life.

"Jim" Meyers, of the Road Foreman's Office, has taken himself unto Florida, so we understand. He left single, but we are watching, fearing that he may double-head back.

Well-known sayings

Mr. McGann: "Where's Conlin?"

Mr. Stock: "Beg to advise—"

Mr. Rider: "If that's Margaret, I'm not here."

Mr. Elmore: "Had some good butter-milk today."

Miss Partick: "Huh!"

Miss Kartub: "Shut the door."

Mr. Conlin: "Say, boss, how about a sponger on the third track?"

Mrs. Francis: "Hello, Fred!"

Any person who enjoys really good music should hear the Glenwood Roundhouse trio. There is some thought of converting it into a quartet. Any person who can make noise of any kind is asked to submit an application.

Four Pittsburgh Division conductors, whose service records total 164 years. 1—"Billy" Rector, 40 years of service. 2-P. F. Rhodes, 41 years; and Daniel Hunt, 55 years of service. 3-Harry Swarner, 28 years of service

We have with us tonight, Charles E. McGann, Jr., who made his entry on September 4. "Finest boy in Pittsburgh," so his Daddy says. Well, Mr. McGann, when shall we get the machinist apprentice application ready?

See the dentist's easy chair, with "Billy" Hotel in it, squirming 'round and yelling out, "Oh, Doc, please wait a minute!". "No use," declared the doctor, "for you to yell and shout, don't you know the pain is over? Your teeth are all pulled out." "Without pain?" asked anxious "Bill." "Oh, the pain will soon begin. When for special service, the bill comes trailing in." And "Billy" laughed disgustedly as the doctor closed the door, "Never shall this place of torture see me any more!"

Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent*, Weston, W. Va.

"You hadn't ought to blame a man for the things he hasn't done,
For books he hasn't written or for fights he hasn't won,
The waters may look placid on the surface all around,
And yet there may be an undertow,
a-keepin' of him down."

Dear folks:

The Editor in Baltimore wrote me a few days ago that I should write him a few lines and tell him what was going on in West Virginia, not later than October 15, and that I should keep my letter down to 3 pages, typed in my best and most grammatical style, and so—here goes.

Since I last wrote you business seems to have picked up a little bit on our Division. The business handled for the month of September exceeded that of August by a couple of hundred cars; although small, this is encouraging. It seems like a step in the right direction. Next door to us, at the little village of Clarksburg, a steel plant has opened up full blast, and a window glass plant has started working full force. On our own Gauley Line lumber seems to be

"If you have tears, prepare to shed them now!"

moving a little heavier. Taking all this as a sign of the times we may figure that the sun is coming out again from behind the clouds, and "Normalcy" is approaching.

I believe we told you that the powers that be had sent us F. M. Jordan to take the place of "Sam" Strachan as Division Freight Agent. We have had the pleasure of seeing Mr. Jordan at our headquarters several times during the past month. He and our superintendent have covered the entire division, and started things moving. When you see Mr. Jordan coming, don't be scared; he's 6 feet or over in height, 'tis true, but every inch a real good fellow. He's a worthy addition to the Charleston Division family, so, boys and girls, help him all you can.

By the way, Cora Harsha of the Division Accountant's Office left us the other day. We are told she will be married very soon; the name of the happy man is not known to the writer, but we wish them every possible bit of good luck.

We were disappointed the other day to receive a letter telling us that in the recent "No Accident Campaign" the Charleston Division stood in FOURTH place on the Eastern Lines. Not up to our usual standard, and yet the total damage, wrecking, etc., amounted to something less than \$400.00 for the period, or some \$1300.00 less than the average cost for the first six

How To Earn Up to \$100 a Week in a Field where there's Room for You

EASY to EARN \$35 to \$100 PER WEEK!

Learn Drafting

Trained draftsmen throughout the country are earning from \$35 to \$100 or more per week. They saw the "way out" from dragging work, long hours and small pay -- and took ACTION.

They got out by training for practical drafting (mechanical drawing) - That's YOUR way out, too.

The Columbia School of Drafting makes it easy for you to earn a big salary and quick promotion in the drafting field. This course has been made so simple and easy that you'll be able to grasp draftsmanship in from six to ten months of pleasant home study.

FREE DRAWING EQUIPMENT.

All your drawing and drafting equipment will be furnished you free of charge. After you have finished the course our Employment Bureau helps you get a well paying drafting position.

months of the year. While the Campaign is over, our superintendent asks every one to THINK ABOUT his work, and to keep up the campaign at all times, so that we may still continue to show a very low cost for wrecking damages, etc.

Today we received an invitation to attend a social at the Y. M. C. A. in Gassaway, and we're sorry we can't all go. However, we sent one or two representatives to take our places. Some live wire bunch over there, we'll say. They have a social every few weeks, and certainly do have a good time. The other day, the Masonic Lodge laid the foundation of a new high school over there. Mr. Trapnell was asked to go

Home of J. L. Rhoades, car inspector, Belington, W. Va., purchased through the Relief Department

Please mention our magazine when writing advertisers

and do a little talking, but unfortunately Baltimore and Ohio business prevented his being there.

Dispatcher Young of Gassaway is now working third trick at Weston. "Pee Wee" is a welcome addition to our force. John Staples is away down in old Virginia on his vacation. Never sent us even a card since he left, and so we don't know exactly where he is. S. W. Pickens is back on the job after taking a little time off for digging potatoes, stealing apples, etc. on the Ohio River. His family went with him too. Mrs. "Pick" says it is impossible to trust that man away from home by himself.

Did you know our folks have figured out that it costs the Baltimore and Ohio 5 cents a mile to move an empty car? Think about it, and don't chase empties all over the system when you don't have to. Food for thought in that, sure enough.

Safety Agent Allison dropped in the other evening. He comes from Chillicothe, but has charge of our territory also. He spent a day going to Richwood and another day going to Pickens. Told us he wants Mr. Broderick to let him have his headquarters to Pickens too. Seems to like that town. He says the Charleston Division stands high in Safety work. Let's see that we live up to his expectations.

The other day Old Man Schide came to the office with a bandage on his neck. After careful and courteous inquiries around, we concluded that Mrs. Schide had an iron rolling pin, but after making a special call on the telephone to ask her, we found it was only a boil. We are glad to say he is out of danger, and that with proper care he will soon be his natural self. By the way, congratulations also to Mrs. Schide, who has quite recovered from her recent serious illness.

Everett True (in other words Division Accountant Severns) spent the first vacation he has had in some fifty years of service for the Baltimore and Ohio, in the wilds of Maryland and Pennsylvania. He and his wife returned recently, much benefitted by their trip.

Bottom of the third page. Gee—wish I had that Editor here; I don't like to have to stop now, as there is a lot more news to tell you, but it will have to wait until he gives me some more space.

Let's know what's going on in your part of the division, so we can tell the other folks

Anna Dolores, Mary Patricia and Joseph, children of Joseph Marchani, chief clerk to storekeeper, Benwood, W. Va.

about it. Don't be so stingy in keeping all your news to yourself.

Yours as always,
The Correspondent.

Wheeling Division

Benwood Shop

Correspondent, ANGELA J. APPLEGATE

Mrs. W. M. Queen and children wish to extend their sincere thanks to the Baltimore and Ohio employees for their expressions of sympathy during the illness and at the death of the husband and father, Wesley M. Queen, former train dispatcher, Moundsville, W. Va. Mr. Queen died on September 19.

The pretty children in the accompanying picture are Anna Dolores, aged 9, Mary Patricia, aged 6 and Joseph, Jr., aged 2 years, children of Joseph Marchani, chief clerk to storekeeper, Benwood.

Western Lines

Cincinnati Terminals

Correspondent, JOSEPH BEEL, Chief Clerk to Superintendent of Terminals

Our genial boss, John Zurick, has joined a new cult, who use fine sand as a substitute for salt—said to be great aid to good digestion.

Charlie Arnold has a nasty cough. Starts way down in his boots, but we can't do anything for him; we have a tough time getting cough medicine for ourselves these days.

Our gigantic engine inspector, Freddie Nolte, is a busy man these days, as chief cook and bottle washer of the new inspection pit. We believe the company should furnish Freddie with a distinctive uniform, something nobby, like a combination deep sea diver and white wings outfit.

We are sorry to report Vincent "Red" Duff as again on the sick list. Old man Sickness surely has had a "half-Nelson" on "Red" this year.

Speaking of the sick, Morgan Lawarre is back after a short siege and is still pale around the gills.

"Pat" Mullaney is the first Harp we ever knew who could not remember the "Night of the Big Wind".

Should the day ever arrive that gas engines would replace steam as railroad motive power, we believe Ivorydale would be in a position to supply the system with expert gas engine mechanics. Most of our executives are wizards at keeping their old wrecks off of the "1150," and most of the old "cans" are running on imagination and warm air.

Our air brake foreman, Paul Haaf, has again been presented with a daughter. The little miss is doing splendidly.

It is reported that one of our apprentice boys has been wearing socks without feet all summer. Since cold weather will soon be here, "Willie" Schramm will have to invest in some "whole" socks instead of "hole" socks.

"Pete" Lyons, our faithful back shop laborer, is back on the job after being away for several weeks on the sick list. Steve Monar, painter, is also on the sick list.

The See-Saw.

Note the timely cartoon here from the pen of Switchman F. H. Stilt.

Claude Williams, timekeeper, Maintenance of Way Department, has embarked upon the Sea of Matrimony. Hearty congratulations!

The following letter, received from Operator James T. Wiley, Glendale, Ohio, dated September 10, will be of interest to our readers:

"Thought a letter of this kind might interest you. I finished today forty-five years of continuous service with this Company. I have never in that time been suspended one hour. The officers on September 10, 1876, when I entered service were: L. Williams, general superintendent; Samuel Stevenson, general passenger agent; Joseph P. Cox, general baggage agent; William Salters, roadmaster; "Al" Evans, superintendent, C. H. & D.; G. M. Lane, superintendent of telegraph; "Pat" Hickey, purchasing agent; W. H. Allison, master mechanic, "Al" Griggs and "Ed" Hunsacker, train dispatchers. The passenger conductors as I remember them were: "Dick" Skinner, father of E. C. Skinner, late agent, Cincinnati; John Devening, Charles Rodinberg, John Short, Oliver Short, "Al" Paul, James Stone, "Al" Barber, William Harrison, E. B. Thomas.

"A sample of train orders those days follows: "Run from Hamilton to Cincinnati, avoiding regular and flagged trains." When order was signed and repeated you got the response—"Order 15 all right."

"I am pleased to be working in Cincinnati Terminals and have always liked all the officials I ever worked with. If a man will try to do his part, he need never worry about what the official will do.

"There are two things I always had foremost in view. First—to be thoroughly honest in dealings with the Company and the public; Second—to give the Company the best there was in me in service and to do it cheerfully. It doesn't cost any more to do it that way than to do it because you know you have to do it.

Yours truly,

JAMES T. WILEY."

The accompanying pictures will be interesting to our old employees. They are of Yard Trainman C. I. Roush. One picture (alone) was taken 20 years ago; the other, with his little grandson, C. I. Jr., was taken recently at Mr. Roush's home, Norwood, Ohio.

New Castle Division

Correspondent, J. A. JACKSON

Perry I. Eilbeck, time clerk, Division Accountant's Office, New Castle, and Miss Lavenia N. Warnock were married on Saturday, October 15, the Rev. A. J. Randalls officiating. The beautiful ring ceremony was used during the exchange of vows, which was witnessed by only a few of their most intimate friends and relatives. A wedding dinner was served in the private dining room of the Elks' Club, after which the happy couple departed on an eastern honeymoon trip, including New York, Washington, Philadelphia and Lonaconing, Md. Mr. and Mrs. Eilbeck will be at home on West Wallace Ave. after November 1. A circle of admiring friends are extending to the happy couple their wishes for an abundance of happiness and good luck in their wedded life.

One hundred and fifty relatives and friends of Pensioned Yardmaster and Mrs. W. D. Reed called on them at their home in DeForest, Ohio, on October 3, the occasion of the 50th wedding anniversary of this venerable and beloved couple.

The wedding of Mr. and Mrs. Reed occurred in Meadville, Pa., in 1871, the Rev. Robert H. Austin officiating. Mrs. Reed's maiden name was Elizabeth C. Smith. Three children were born to them; William, Jr., the only one now living, resides in Pittsburgh.

The 50th anniversary of their wedding was spent in a most delightful manner, and all formalities were forgotten for the day,

C. I. Roush

21 JEWEL HAMILTON Famous 992 Model
21 Sapphire and Ruby Jewels set in solid gold cups, adjusted to five positions, temperature and iso-chronism. Adjusted to the second, 16 size. Double-roller escapement solid steel escape wheel, brequet hair spring. Complete in gold filled case, guaranteed 20 years.

30 Days' Free Trial
Give this watch a 30-day trial, have it inspected by a railroad time inspector—place it to the most vigorous use. If you are not satisfied, return it at our expense and your deposit will be refunded.

Don't Send a Penny
You receive the watch all charges prepaid. Examine it—it pleased, make first payment of \$12.50. Wear the watch 30 days. If you are not satisfied after the trial, return it. Your deposit will be refunded immediately. If you buy, pay only \$1.20 a month for 12 months until \$62.50 is paid. **ORDER NOW!** Write your name and address on a post card. Just say "Send me 16 size, 21 jewel 992 Hamilton as you advertise." We will do the rest. The largest jewelry catalogue of Xmas Gifts issued is yours for the asking. Write for it now to Dep. 406.

ROYAL DIAMOND & WATCH CO.
ESTABLISHED 1851
35 Maiden Lane, New York

their numerous friends and neighbors making pleasant social calls, while an abundance of cards, letters and flowers were showered upon them. Among the numerous and useful gifts received by the couple was a set of cut glass vases and three purses of gold, one of the latter coming from their old friends of the Baltimore and Ohio.

Mr. Reed's railroad career began in December, 1877, when he entered the service of the P. & W. as agent at Clarion, Pa. Later he occupied the positions of trainmaster and assistant superintendent at Sharpsburg and Foxburg, Pa. On September 1, 1882, he was appointed superintendent of the B. B. & R. Division, with headquarters at Foxburg, holding this position until the P. & W. was absorbed by the Baltimore and Ohio. On October 1, 1891, he was appointed yardmaster at DeForest,

Yard Trainmaster C. I. Roush and little C. I. Jr., at their home in Norwood, Ohio

Ohio, which position he held until April 1, 1916, when he was placed on the pension list.

Mr. Reed's long and faithful service with the Railroad has earned for him the respect and admiration of his officers and fellow employes, and by his pleasing personality has endeared him to the hearts of his fellow employes on the New Castle Division. For the past 21 years Mr. and Mrs. Reed have made DeForest their home, and are numbered among its most highly respected citizens. Mr. and Mrs. Reed are both enjoying the best of health, and their many warm friends extend to them the season's greetings on this, their golden wedding anniversary, and wish for them continued good health and prosperity, and the hope that they will live long in the sunset years of their lives, ever happy, ever joyful, ever blessed.

W. E. LAIRD, *Chief Clerk*, Newark, Ohio
A. D. LIST, *Newark (Ohio) Shops*

An enjoyable occasion was a joint meeting of the Newark Division Veterans and Ladies Auxiliary, held in Engineers' Hall, Newark, Ohio, on the evening of October 6.

There were about 250 present and after the transaction of regular business, the meeting was addressed by Grand Vice President J. M. Garvey from Wheeling. He gave a splendid talk on the progress of the Veterans' organization on the system, and specially complimented the Newark Division Veterans and Ladies on their aggressiveness and rapid growth, and ability to make their meetings a success. He also took occasion to urge a revival of interest in the matter of soliciting business for the Baltimore and Ohio, pointing out that the welfare of the Railroad was in the end the welfare of the Veterans' associations and their auxiliaries.

Twelve new applications for membership in the Veterans' Association, and fifteen for the Ladies' Auxiliary were presented, voted upon and accepted at this meeting.

Following Mr. Garvey's talk, the local president, D. H. Moriarity, in an impressive manner, presented "fifty-year" buttons to the following well known veterans: W. G. Harrison, John Ryan, S. W. Higgs, J. S. Price.

The balance of the evening was devoted to various social recreation, and the serving of a choice lunch by the ladies.

Stenographer C. A. Budd, Division Accountant's Office, has finally "went and done it." It happened in the Storr's Congregational Church, Cincinnati, Ohio, on October 15. The happy young lady was formerly Miss Phoebe Meinders, niece of John Meinders, Cincinnati Terminals.

After a trip through northern Michigan, Mr. and Mrs. Budd will be at home to their many friends at 158 Moull St., Newark, Ohio.

We wish them success and happiness.

Following are recent vacations reported: Harry L. Kent took a "flying flivver" trip through Harrison County. "Tom" Brookes is trying to lose himself in old Virginia; Frank Cole said he was going to see the Ohio State-Michigan foot ball scrap.

Somehow it sounds kind o' good and like old times to hear about not enough cars to take care of the business, or power to move it. Looks like business is picking up, at least on this part of the Railroad.

Cleveland Division

Correspondents

A. F. BECKER, *Secretary to Superintendent*,
E. L. MILLER, *Chief Clerk to Division Freight Agent*, Akron, Ohio

H. B. SMITH, *Supervising Agent*, Cleveland, Ohio

W. E. BRUGH, *Clerk to Trainmaster*, Massillon, Ohio

We have long known and appreciated the co-operation which Agent Barry, Elyria, affords the Traffic Department by his constant and successful solicitation of shipping and receiving concerns located at his station. However, inasmuch as all of the agents are rendering all assistance possible to this department, we never felt quite justified in writing up Mr. Barry's accomplishments. We do feel justified, however, in telling you about an instance which occurred recently:

A large automobile company had placed an order for some steel with one of the concerns located at Elyria, requesting that they route the business via competing lines. Mr. Barry fortunately secured the information of the order and, learning that the consignee had requested adverse routing on the business, he asked the vice-president of the steel concern to write the traffic department of the consignee, requesting that they be permitted to route the shipments via our line. This the vice-president did, and upon our following the matter up we were advised by the consignee that they were agreeable to this business being routed via our line.

It has since developed that there is to be a more or less regular movement of this business and we feel that Mr. Barry is to be complimented on the success of his efforts.

On a recent trip of the Traffic Department over the Cleveland Division, the accompanying picture was taken at the freight house at New Philadelphia, Ohio. Returning from left to right: J. E. Fahy, assistant

Some members of the Traffic Department, snapped on a recent trip on Cleveland Division

superintendent; C. F. Farmer, division freight agent; A. R. Strone, assistant chief clerk to assistant general freight agent; J. C. Kimes, assistant general freight agent; E. G. Slater, signal foreman.

George Coon, chief clerk to master mechanic at Lorain, Ohio, is reported a victim of cupid. Congratulations!

Massillon, Ohio

Mason Foreman Stonewall Jackson Johnson is now assisting J. T. Sidaway, bridge inspector. Mr. Sidaway will probably get along fine with Mr. Johnson, who is not a very small man, and who will, no doubt, succeed with the work.

All of the employes here enjoyed some very good smokes on Brakeman Harold U. Brugh. Of course, nothing but a special occasion would bring smokes around. Mr. Brugh had been persuaded that two could live more cheaply than one, and he decided to give it a try. On October 12, Miss Anna Mitner of Massillon became his bride. We wish to congratulate them and wish them a successful and happy future.

The Better Operation Drive has now been on for about three months, and nearly all employes seem to be interested in it. There have been, and will be, some very good results obtained, which will save many dollars for the Baltimore and Ohio and promote better operation.

We regret to learn of the recent death of the father of Agent L. T. Kegler. We hereby express our sympathy to the agent and his bereaved family.

J. E. Campbell, conductor on Lorain and Massillon pick-up local, who has been on the Lorain Monday layover, change 1 over to the Lorain Sunday layover. The change was probably made to avoid wash day on Monday. Pretty clever, John.

In the accompanying picture, we have one of the several sets of brothers working on the Cleveland Division. They are George, William and Harold Brugh. George is a brakeman, working out of Dover; William,

Brugh Brothers of the Baltimore and Ohio - George, William and Harold

Betty Mae Guleff

a furloughed brakeman, and clerk to trainmaster, Massillon; and Harold, a brakeman, working out of Massillon. All three have been promoted to conductors.

Here is Betty Mae, 4 months old daughter of Car Inspector "Nick" Guleff. This is "Nick's" only child. She must be looking for her daddy to come home from work.

G. H. McCoy, ticket clerk and operator at Massillon, recently had to get another pair of "eyes," the kind with black rims. They are becoming to you, George. I suppose all of us will come to that, when we get up in years.

Brakeman G. H. Brugh and Fireman U. H. Wallace enjoyed a trip to Detroit, Mich., to see the Massillon football team play the Detroit Herald's team.

Dover

C. E. Bryant, brakeman, has been contemplating a trip out West. You want to watch out, "Slim," the Indians will get you.

Conductor W. F. Stapleton should be able to give a good description of Canada. He was there long enough to learn a good bit about that country.

Brakeman D. C. Bilby was unfortunate enough to let part of the burning substance of a fusee fall on his shoe. Consequently he burned his foot badly before he could get his shoe off.

Thomas Thomas, formerly clerk in the Motive Power Department, has been transferred to yard clerk. We hope you succeed in your new line of duties, "Tommy." The only conflicting thing in your way, is that there are two "Toms."

Chicago Terminals

Correspondent, THOMAS H. WILLIAMS

The accompanying picture is of Irma Ditori, the three year old daughter of Louis Ditori, chief elevator man, Grand Central Station. Mr. Ditori is one of the most accommodating and faithful employees we have, having served for twelve years.

Mr. and Mrs. E. H. Mattingley are rejoicing over the arrival of a ten pound baby boy.

Miss Rose Byrnes, telephone operator, who recently underwent an operation for appendicitis, is recovering nicely. We all miss her pleasant voice over the wire and hope she will soon be back on the job.

Many friends sympathize with Joseph Kennedy and family in the recent death of Mr. Kennedy's mother and brother, both having passed away within the past month.

E. L. Jones has been appointed agent at Chicago Heights, vice E. Ruble, resigned.

Miss Alice O'Connell, telephone operator, resigned recently to accept a similar position with the Chicago and Northwestern Railroad.

After waiting for the stork's arrival for the last month or so, the fickle bird has finally paid a visit to the home of Chief Clerk and Mrs. Rodgers at Harvey, with a healthy ten pound boy, looking every bit like his happy "Pa" (with the exception of the vanity spots, freckles, that he still has to get). Our overjoyed chief clerk is rather upset about the youngster's name, however. He thought it would be a girl and he would call her "Violet" in harmony with the other members of his flower garden (Pansy, Mrs. Rodgers, June Rose, his little daughter). We would not make any suggestions on that, except to ask him not to afflict the little fellow with a name like he has to put up with, i. e. "Esthes," because people get that mixed up and think his name is really "Esther."

Everybody at Harvey, Harvey Junction and Blue Island seemed to think that our chief operator, Mr. Wilhoit, has been enlarging his family. To this gossip, Mr. Wilhoit objects, of course, and wants to see a note about it in the MAGAZINE so that everybody can see that it was all gossip.

Mrs. Weiss and Marion Weiss, the agent's wife and daughter, were here lately to see what kind of a place Harvey was and how the office looked. We think now that old wise Ben Akiba did not know everything either, for Mrs. Weiss said that the office was clean and tidy, and I don't think that any lady ever before said that about a place that was kept in trim by a bunch of mere males.

C. Schwartz, back up man, who handles passenger trains between Coach Yard and Grand Central Station, is to be commended. The other day, upon arrival of No. 7, Mr. Schwartz found a pocketbook and later returned it to its owner upon proper identification. The purse contained \$68.00 in bills and some change. Officials take this means of commending Mr. Schwartz.

Irma Ditori, 3 year old daughter, chief elevator man, Grand Central Station

J. M. LYON & CO.
4 Maiden Lane, New York, N.Y.

C. W. Butters, distribution clerk, was married to Miss Irene Warder on September 10, much to the surprise of his fellow workers, whom he never let in on his secret. Mr. and Mrs. Butters spent their honeymoon visiting points of interest through the western states.

The traffic Department, with the co-operation and able assistance of W. P. Finnegan, assistant agent, and Edward Grussendorf, engine foreman, Cicero, Ill., has been able to show what a little courtesy, coupled with hard work and energetic persistency, can accomplish for the Railroad.

Timekeeper Eddie Ryan

This is a highly competitive district, and requires active solicitation in order to secure results. Of the total number of cars handled, our road secured: July, 1921, 68 per cent., August, 1921, 71 per cent., September, 1921, 72½ per cent.

While our own C. T. benefited to the extent indicated above, the Baltimore and Ohio also received a substantial percentage of the traffic, which is gratifying. What is being done in this district can be done all over the railroad and it will be to our mutual advantage to work diligently toward securing every carload of freight that we can handle.

The future of our Terminal and the Baltimore and Ohio depends upon the ability of its employees to think and act. These are not mere sentiments. They are practical considerations; they are considerations which must be brought home to all of the employees of this great System, from highest officer to employee in the most subordinate position. Unless we can make every employee know, and can induce him to act upon his knowledge that both companies cannot be prosperous unless we all assist, we shall not have fulfilled the obligation or the opportunity resting upon us.

Meet your friends, exploit the advantages of our own C. T. and the parent company, and you will be surprised at the results obtained.

Dave O'Leary spent his second honeymoon in Cuba. Dave claims the weather out there is very dry. On his return trip he visited New York, Niagara Falls and other eastern points.

Morris D. Carothers, assistant engineer maintenance, better known as "Mike," has bought a handsome home through the Relief Department. Might say we expected this, because "Mike" is one of our hustlers.

John Boos, night car foreman under P. Healy, fell and severely lacerated his forehead. John is game and went back to work. Said that he was tough, and a little thing like that would not hold him out of work.

Dr. E. A. Courrier, assistant to our medical examiner, is covering the district at Washington, Ind. for a few weeks.

Bill Henning, star bowler, Transportation team, is on the war path again. Bill isn't satisfied unless he gets at least a 190 average. Judging from the start the boy has made, there won't be any prizes left at the end of the season. Right now he is holding the league with a 234 game and is still going.

Miss Cordt, former clerk, Barr Yard, has been transferred to the Superintendent's Office. Her many friends out at Barr Yard find it pretty hard to get along without her.

The accompanying picture needs no introduction to our employees. It is the smiling Eddie Ryan, timekeeper, better known as "Schultz." He certainly missed his calling, as his gay repartee would win him a place among the vaudeville stars.

Judging from the number of packages "Te'l" Shea and "Rudy" Lindeman carry home, they must be figuring that there will be times when it will be impossible to get out of their Mount Hope home during the coming winter; hence they are stocking up accordingly. Why worry boys? There are plenty of helping hands here in case you get snowbound.

After six months absence, Clarence Grobner resumed his duties as messenger in the Superintendent's Office. Clarence claims it is pretty hard to keep away from the old nest.

John Daly, who has been off for some time with an injured foot, is getting along very nicely, and will soon be back in harness.

Thomas J. Hasey, who has been sick for a long time, is slowly improving. "Tom" is one of our old timers.

Mabel Allen, one of our clerks, met with a painful accident on October 10, by severely spraining her ankle. Mabel has the sympathy of all the young men, as she is one of our attractive young ladies.

At Harrison and Wells she started to balk, Sneezed a gallon of oil all over the walk; The curtains leaked rain, the tires needed air,

But as long as she ran, we didn't care; Reached Michigan Avenue in a haphazard manner,

Slipped across the street on an old "bananer" Headed her south with the engine running nice,

And got a bad puncture on an old hunk of ice.

At 53rd Street, met a big trolley car, (Never expected her to run that far). She ran so fast she began to quiver, Then passed up a hearse and a three wheeled flivver.

On she charged like the light brigade, Missed that old trolley just by a shade. At Garfield Building on went the brake, Everything shook like the Frisco earthquake.

The brakes were good, but they worked too slow,

And Lizzie wouldn't stop unless you hollered "whoa."

The fenders were loose, so was every rim; The lights wouldn't work, except on dim. The steering wheel wobbled and the axles reared.

The minute you sat in her you began to get skeered.

The windshield was cracked and the tires didn't last,

Whenever he went out they picked up glass. The cam shaft reeked and the long spokes squeaked,

He bought spark plugs most every week. The gas line was plugged, so was the exhaust;

Looked like a hack that had got lost. The motor ran, but it wasn't very good.

Sounded like a track gang sawing wood. Took her apart and found she needed a gasket,

The garage man said she belonged in a casket.

Then to the museum they sent her as antique.

And now we only get to see her once every week.

The above poem was written after Mr. Wilmsen, home route clerk, Car Record Office, had taken a ride in Mr. Ruth's "Dodge" on the first day that he tried it out.

The eldest son of E. J. Reicke has recently recovered from an injury to his head, caused by a baseball bat. The injury sustained was light, because of the fact that the boy is a "chip off the old block."

Chicago Division

F. N. SHULTZ, *Division Operator*, Garrett, Ind.

ESTHER J. SPREENBERG, *Clerk*, South Chicago
MARGARET GALLOWAY, *Assistant Shop Clerk*, Garrett, Ind.

The picture shown below is of Dispatcher J. M. Trimble, holding up for our observation a day's catch at Lake Wawasee.

South Chicago

E. H. Mattingly, joint general car foreman, South Chicago, was elected president of the Car Foreman's Association of Chicago at their annual meeting in the Hotel Morrison. Congratulations!

We are sorry to learn of the death of Mrs. George Miller, wife of George Miller, veteran blacksmith, South Chicago. Mr. Miller and family have the deepest sympathy of all at South Chicago. Mr. Miller has been in the service of the Company for 47 years, and has gained and retained many friends. Mrs. Miller passed away on September 21.

Our deepest sympathy is extended to David Griffith in his recent bereavement, the death of his brother, George Griffith, after a short illness.

Ohio Division

Correspondent, A. E. ERICH, *Secretary to Superintendent*

On October 1, R. W. Brown, former superintendent of the Ohio Division, was appointed superintendent of the Conneville Division. Mr. Brown first entered the service as ash pit laborer, serving as fireman, engineer, air brake inspector, road foreman of engines, supervisor of locomotive operation, trainmaster, coming to the Ohio Division as assistant superintendent on October 1, 1917, and promoted to superintendent on September 1, 1920.

A pleasing tribute was paid Mr. Brown by the officials and men of the Ohio Division before he left for his new location. So complete was the surprise to him, that he was forced to acknowledge that when friends arrived at Chillicothe from the different parts of the railroad without his knowledge, he would almost believe that the railroad

J. W. Trimble and a day's catch

Chillicothe Shop Fire Department

could "run" without a superintendent. All the guests, to the number of 150, were assembled in the Warner Hotel dining room, where the guest of honor had been escorted, on a pretense that he was wanted on business. The dining room was darkened and it was not until Mr. Brown was in the room that the lights were turned on and the truth burst upon him. For a moment he could do nothing but stand and look about him. An excellent dinner was served, after which Agent W. R. Moore, acting as toastmaster, briefly explained the nature of the gathering, and called upon various speakers. Among those who responded were General Superintendents F. B. Mitchell and E. W. Hoffman, Superintendent of Transportation G. D. Brooke, Assistant to General Manager J. B. Carothers, General Master Mechanic Galloway, Division Freight Agent Settle, Superintendents R. B. Mann, D. F. Stevens, H. B. Green and H. G. Kruse.

The main speech of the evening was made by Hon. D. E. ("Senator") Dick, fuel inspector, who in an eloquent speech presented Mr. Brown with a picture. On being opened, this package was found to contain an Ingersoll watch. Hurriedly snatching it away, in well assumed confusion, muttering, by what he claimed was his own stupidity, as having presented the wrong package, "Senator" Dick then produced another which was a Howard railway watch of the highest grade, suitably engraved. Mr. Brown tried to thank his friends, but failed, stating he had no words to express his feelings. All present, however, felt assured of the genuine friendship he feels for them and the regret he experiences in leaving them. We extend our best wishes for Mr. Brown's continued success in his new field.

A. A. Iams, superintendent of the Indiana Division, succeeds Mr. Brown on this division. Mr. Iams is too well known to be introduced, having been superintendent on the Ohio Division several years ago. We welcome him back again and assure him of our hearty co-operation.

On September 15 F. T. Sturtevant was appointed division freight agent at Chillicothe, vice H. G. Settle, transferred to Seymour, Ind., in similar position. We wish both these men success in their new locations. Mr. Sturtevant is well known on the Ohio Division, having worked here previously.

Our sympathies are extended to Miss Bertha Streitenberger, stenographer to chief clerk, Superintendent's Office, on the death of her father on September 20, after a lingering illness.

The little fellow on the table is Ralph Howard Kemmerer. His daddy is E. F. W. Kemmerer, ticket agent, Union Station, Chillicothe, Ohio.

Another one of our young eligibles has slipped on the "peal" of a wedding bell. "Don" Sullivan, time clerk, Division Accountant's Office, took the plunge and "committed" matrimony. Congratulations and best wishes for its joys and blessings!

The accompanying picture shows the Chillicothe Shop Fire Department. Top row, left to right: P. L. Miller, chief; George Churchus, John Farnham, H. Brown, firemen; Merl Weagle, nozzlemaster; J. E. Hatfield, fireman; Carl Eisnaugle, nozzlemaster; F. L. Kline, first lieutenant; Fred Darding, fireman. Bottom row: Owin Hollis, Robert Titus, William Barker and E. E. Reagin, firemen.

Conductor "Tom" Brown was given the surprise of his life during the latter part of September, when he arrived at Chillicothe on train No. 4. He went to the dispatcher's office, as usual, for his orders, where he was backed into a corner by a crowd of his friends and handed a fifty-year service button by W. R. Moore, president of the Veterans' Association. Even as accustomed to surprises as Mr. Brown has been, keen witted and ready of repartee, as has been his wont, he was carried off his feet, for the whole proceeding was out of a clear sky. Mr. Brown has had a long and honored career on the Baltimore and Ohio, entering the service of the old M. & C. in 1868 as laborer, then taking positions as brakeman and conductor successively, and later that of passenger conductor. May his service continue for a long time to come.

A "SAFETY FIRST" Fable

Once on a time there lived a man
Who was always known by the name of Dan,
He wouldn't believe in Safety First,
Of it he always said the worst.
He hee le l not the signals red—
He doesn't yet—for he is dead!

Engineer John Snyder acted as host at his home in Cincinnati to a number of friends, celebrating the forty-fifth anniversary of his career "on the rails." We wish him long continue in service.

Indiana Division

Correspondent, H. S. ADAMS, Chief Clerk to Superintendent

Sometime ago a Railroad Company in Chicago ruled that female clerks would not be permitted to wear short skirts and low-necked waists during office hours because it detracted the male employee's attention from his work. Things like that never happen in this office, do they fellows?

Well "SHE" is back from the East, but I am sorry to report that she did not find her mate. We feel rather bad to think that she traveled such a distance and then was not successful. She says, however, she did have the pleasure of seeing the Catskill mountains. Can you believe that?

SOMETHING TO THINK ABOUT:

Friendship is essential in commanding good work. The man who likes you will work harder without thinking whether you

are watching him. Learn how to get along with the men you work with. I can show better results, and so can you, working with a lot of good fellows of ordinary talents, than can anybody surrounded by a bunch of experts who are bad friends.

During the flood of 1918, Baltimore and Ohio bridge over Miami River just east of Lawrenceburg was destroyed by effects of ice gorge on the Miami and Ohio Rivers.

The last train over this bridge was No. 43 on the afternoon of February 11, 1918, and

Would You Like to Earn \$75 a Week?

HERE is a splendid chance to step into an important, high-salaried position with unlimited opportunity for advancement.

Thousands of men must be found at once to become Traffic Managers for railroads, large corporations and shippers throughout the country.

No Experience Necessary

You need no special qualifications. An amazingly easy way has been devised by which you can qualify for one of these positions in your spare time at home. The American Commerce Association offers to prepare you by mail. Its great staff of nationally-known Traffic Experts will give you the training required to become a Traffic Manager without interfering with your present work in the least.

FREE BOOK Tells How to Get One of these Big Jobs

Think of it! In just a part of your spare time at home you can quickly qualify for a fascinating, important position as Traffic Manager, at a salary of from \$2500 to \$5000 a year and more.

Mail the coupon below at once for the Free Book, "Opportunities and Requirements for Traffic Work." See what this big-pay field offers you—see how the great staff of experts of the American Commerce Association will help you every step of the way—how its Employment Service is at your disposal free, in obtaining a position as soon as you are ready and qualified. There is absolutely no cost or obligation in mailing the coupon. Send it NOW, while it is before you.

Please mention our magazine when writing advertisers

since that date until October 1, 1921, all traffic on the Indiana Division west of Cincinnati has been detoured over Big Four rails between North Bend and Lawrenceburg.

A new bridge which has been in course of construction for a number of months, together with new double track between Finney and Dearborn, was completed and opened for operation on October 1, this year. Train No. 44 at 11.30 a. m. was the first train to go over the new bridge.

Superintendent Iams, Assistant Superintendent Telegraph Ambach and Trainmaster Purkhiser rode the engine, while A. H. Griffith, who had charge of the construction of the new work, Mr. Hunter from the Bridge Engineer's office at Baltimore; Division Engineer Herth and Supervisor Cassin rode rear end of train No. 44.

This train was handled by engine 1427 in charge of the following crew: R. E. Nichols, conductor; O. Clark, baggagemaster; H. R. Kelso, flagman; H. Durham, engineer; R. V. Downing, fireman.

When it became known in the town of Lawrenceburg that the new bridge was to be opened and No. 44 to be moved via that route, citizens became enthusiastic and a large number of people came out into the street to see the train start over the new route, and one could hear the words whispered from one to the other, "They are going over the new line."

As the new bridge was approached, a whistle was sounded and all workmen on fills and on the bridge stopped and waved their caps and cheered as the train passed over the bridge. On arrival at the end of double track at Finney there was more cheering.

Trainmen and employes on the Indiana Division are very happy that we are again at home on our own line between Dearborn and North Bend, and that it is no longer necessary to detour.

The new bridge is one of the finest in the country and the double track on each side of same cannot be surpassed, either from the standpoint of beauty or construction.

We were very much surprised recently to hear that our superintendent would be transferred to the Ohio Division at once. Mr. Iams had been in charge of Indiana Division for about three years and his sterling qualities were thoroughly appreciated by division officers and employes alike. During his incumbency he made many warm friends, personally, and for the Company, among the business men and citizens along the division and especially at Seymour. We are selfish enough individually and collectively to be glad to have had him with us for a number of years; however, we congratulate him on the promotion and the Ohio Division for securing a man of his caliber.

J. B. Carothers, assistant to general manager, has been appointed acting superintendent, and is in charge of the division pending permanent appointment of a successor to Mr. Iams. Mr. Carothers has served in many official capacities in various localities on the System, including superintendency of the Illinois, Ohio and Philadelphia divisions, and we are glad to have him with us.

R. L. Gallaher, division freight agent, Seymour, has been promoted to assistant to general freight agent, with headquarters at Cincinnati. While Mr. Gallaher has been with us less than a year, his very affable manner has won for him a very close relation with shippers, division officers, agents and employes. We congratulate him on his promotion and wish him a full measure of success in his new field.

H. G. Settle, division freight agent, Chillicothe, has succeeded Mr. Gallaher, and we extend to him a hearty welcome. Mr. Settle has been associated with the management in various capacities for a number of years.

In the "No Accident" campaign previously conducted we have not been able to earn the prize awarded; however, I am glad to say Indiana Division has the distinction of heading the honor roll in the Better Operation Drive, conducted during August and September. The drive is to be continued throughout October and I hope the good work will be continued. Earnest work is necessary to hold the high place we have attained in this particular drive.

Do not overlook "Think and Act" drive, and always get it straight. We have seen instances where it appeared the words had been reversed—ACT and THINK later.

Henry Barkman, veteran car repairer, 39 East High Street, Seymour, secured information that Mr. A. Kane, with his wife and daughter, had made arrangements to go to Santa Rosa, California, leaving Seymour via a competing line. Mr. Barkman immediately called upon Mr. Kane and solicited their transportation via Baltimore and Ohio to St. Louis and was successful in having them change their route accordingly. This party left Seymour on No. 1 on October 3, tickets being purchased through to Santa Rosa, California.

Illinois Division

Office of General Freight Agent,
St. Louis, Mo.

Correspondent, FRANCIS PIGLOSKY

Our bowling team, composed of "Gassaway" Cannan, "Butterfly" Haack, "Vamp" Turgeon, "Kewpie Doll" Bradley, "Feroocious" Frawley, "Pee-wee" Coppedge and "Hook" Manier all bowled over 200 average in the elimination contest. (Beware, Cincinnati).

Mr. Cannan reports that increased facilities have been provided for at Murry's Mine, with the assistance of Live Stock Agent Howard, and while amount of future business is "undeterminable," a shortage of Baltimore and Ohio equipment is inevitable.

Again the swirl of matrimony has claimed a victim. This time it was Miss Schneeberger. Good-luck Elsie, dear girl.

We take pleasure in adding to our force Edwin Schlag, our former tracing clerk, and Messrs. Frank A. Frawley and Ray McGrath, from our East St. Louis office.

Know all men by this fact, that when Mr. Farrar is standing by the window with the telephone (station 13) he is talking to Main 4723. Its alright "Arnie," we're for you.

A short time ago Mr. Bradley, our chief clerk, was requested to have a car placed for shipment of household goods to Washington, D. C. He quickly 'phoned Mr. Horning, our passenger agent, giving him name and address of shipper and about an hour later Mr. Horning called him on the telephone and said "I got them all to travel Baltimore and Ohio." That's killing two birds with one stone.

Toledo Division

Correspondent, EDWARD M. MANNIX
East Dayton

The accompanying photograph is that of little Genevieve Grace, 5 years old, daughter of Machinist Helper Ryan, and a popular little miss.

The glad season of Thanksgiving is with us, and as is customary, Superintendent R. B. Mann and Master Mechanic A. E. McMillan send their proclamation of thanks to all of the employes, wishing them the choicest blessings that the season affords.

Business is moving along very nicely and improving daily, double-headers every day and night, the look of gloom gone, the pessimists dead, optimists springing up on every hand.

"Tell 'em things are going fine
Make 'em feel it—never whine.
Dress the part and act it too,
That's the stuff, I'm telling you."
Remember our motto is "Oil her up and let her go."

Let us hope that we will soon dig up the furloughed list, and see all of our old boys back to work. There is only one way to do that—keep pushing—and just as sure as Fate, it is coming. Remember that we are all brothers under the skin.

"Sometimes strong and sometimes weak,
Sometimes brave and sometimes meek,
Sometimes whipped, but not for long,
Heads up—let's push along."

William Wade, boilermaker at our shop, recently underwent a serious operation. Word from his bed-side is that he is convalescing nicely, and that the operation was successful. Our best wishes are with "Bill" for speedy recovery.

It is most pleasing for us to offer to the representatives of the International Correspondence School, Locomotive and Air Brake Instruction Car No. 100, in charge of Manager A. C. Dryden and Instructor W. A. Reese, our thanks for their two weeks stay with us. These gentlemen left a lasting impression. Having capacity meetings at all times, nothing was left undone in their line of instructions. Come again.

An illustrated lecture on "Safe Transportation of Explosives" and other dangerous articles by Col. James L. Taylor, was listened to by a highly appreciative audience on September 28 at the Y. M. C. A. auditorium, thanks to courtesy of our Railroad.

We are going to give some of our selected merchants a chance to advertise their business at various points along the system, and Dayton has been one of the selections. Of course, this will be for our local merchants, soliciting the trade of our employes. We have several good, reliable merchants who will take advantage of this opportunity through the MAGAZINE.

Genevieve Grace, daughter of Machinist
Edward Ryan

General Foreman W. A. Gilmer and his little grandson, Charles Edward Wade

The accompanying picture is of Charles Edward Wade, of Newark, Ohio, grandson of General Foreman William A. Gilmore, Dayton, Ohio. Master Wade is 14 months old and he and his grandpap are some chums. His father, Charles E. Wade, is a machinist at Newark Shops.

The accompanying pictures are those of the store room platform at East Dayton, Ohio, which we take pride in saying is a model on the Southwestern Division. Also some of our boys there: Reading from left to right are storekeepers Robert Smith, E. L. Horne, M. Abel and E. B. Isenogle.

A look through our Master Mechanic's Office at East Dayton shows a bunch of hustlers; under the jurisdiction of Chief Clerk R. E. Morris, everything runs as smoothly as clock work.

General Foreman W. A. Gilmore is away out there for suggestions and improvements, and needless to say the men are behind him in anything that will improve conditions for the Company and keep East Dayton in the front, where he has striven so hard to place it. "East Dayton First," is our motto. Let the rest follow.

Toledo

Assistant Correspondent, FRANK J. McMANUS

The movement of lake coal to the Northwest during the season 1921 has been unusually heavy. Up to October 1, our coal docks at Toledo had dumped 2,100,000 tons, the second heaviest dumping up to that period in the history of the docks at Toledo. The Port of Toledo will handle approximately 40 per cent. of the coal that is shipped by boat to the northwest.

Stanley A. Zion, crew dispatcher, has resumed studying philosophy. The cards read that "they" will be home after December 1.

Copyrighted, 1920, by L. W. Sweet, Inc.

Toledo Terminals employees lost considerable money on the automobile races held at Miami Fair Grounds between the speed kings, Schoenberger, Phares, Schultz and Freck. Freck, with his Cleveland 6 was picked a sure winner, but Schoenberger,

Casting platform, East Dayton, Ohio

A trip through the Superintendent's Office impresses one that the members of the office force are all dispensers of joy; everybody busy, yet they find time to look up from their work with a cheerful "Good Morning." I hopped right into the Train

Storekeeper's Office Force, East Dayton, Ohio

Master's Office and found things the same way. Blew over to the Train Dispatcher's Office to be greeted with "Hello Edward, how's the MAGAZINE?" Had to get out of there; too busy for me. Side-stepped over to Division Engineer's Office, got the glad hand, and left with the impression that they were all a good bunch of Baltimore and Ohio Boosters.

Heard that L. E. Fenner smiles occasionally, but then a person doesn't have to believe everything he hears. How about that, "Lou?"

George Stoecklein, assistant to Chief Clerk L. E. Fenner, is the boy with the pep. He's away out there when it comes to throwing sunbeams and he has promised to dig up a whole lot of news for our MAGAZINE. Some scout!

Ever hear of an automobile driver running over himself? Well, that's what they told me in the Agent's Office today. The driver stopped near a cigar store, and asked a little boy to run over and get him a box of matches. The little boy refused, so the driver ran over himself. WHAT!

Division Accountant's Office, Dayton, Ohio
Assistant Correspondent, G. M. McBRIDE

We extend congratulations, A thousand times and more, And trust you journey safely O'er to that blissful shore.

There are many here who envy—Of that we feel quite sure,

ger, with his galloping Elizabeth, surprised the crowd by running away from the field. Schoenberger made three laps, while Freck, who finished second, made but two. The speed of Schoenberger's car was so great that in endeavoring to pass Schultz with his Chevrolet, the exhaust from his "Lizzie" forced Schultz into the ditch. Johnnie Phares did not get started, as when he crawled into his car he broke two axles. It was necessary for the victor, Schoenberger, to tow Schultz' and Phares' cars back to town.

Another issue of the MAGAZINE is going to press and still Dockmaster Arnold hasn't caught a fish.

Harry R. Coss, yard brakeman, Toledo terminals, died on September 27. Mr. Coss entered the service at Toledo on June 30, 1915. On September 16, he suffered an attack of spinal meningitis, from which he did not recover. His sudden death was a shock to employees at this point.

Mrs. F. L. Freck, wife of chief clerk, Assistant Agent's Office, reports that Fred hasn't had a good night's sleep since he got his Cleveland 6. She states that he tosses all night long and that occasionally he grabs the head of the bed, believing it to be the steering wheel. What she can't understand is why he kept saying "whoa" for the first few days that he had the machine.

But that doesn't make a difference
To the girl whom you adore.

May your life be full of sunshine
As the days go flitting by,
And when the clouds look blackest—
Turn to wifey—she will try—

To change the clouds to sunshine
And blot out the deepest gloom,
And help you to remember—
You've met a happy doom.

Just a token of remembrance
Something we can all partake.
(Now, don't forget to give us
A piece of wedding cake).

Miss Gertrude Hutzell, together with other Baltimore and Ohio beauties, has just returned from a pleasant vacation trip through the Yellowstone National Park. Gertrude thinks she'd like to go back. Why, Gertrude? What was the big attraction? You get nice boxes of candy here.

Joe: What is the correct pronunciation of your name, Boorum or Broom?
Boorum: Bar room.

Cupid has just informed me of another sparkler given by one of our number. Oh, boy—more candy and cigars! Now, Jack, please don't make us wait until next May or June for these sweets.

Miss Mary Blandford was called to Louisville, Kentucky, on account of the death of her father on September 22.

L. S. Risley, aged 67 years, passed away on October 8, after an illness of about two months. Mr. Risley was employed, at the time of his death, in the office of the Division Accountant, Dayton, Ohio, where he was held in high esteem by his co-workers. Previous to this he was employed as an operator at North Dayton and had been in the service of the railroad for a number of years.

Lima

Assistant Correspondent, RAY GARRIGUS

Miss Katherine Fitzgerald, stenographer in General Foreman O'Brien's office, has returned from a visit to New York City and Baltimore.

It is with deep regret that we note the death of Mr. W. Kennedy, brother of "Pat" Kennedy, car inspector at Lima Depot. We extend our sincere sympathy.

Have you noticed the spik and span condition of the yards lately? We congratulate Mr. Bowdle and his loyal little group of laborers. Let's make Lima shops a model of cleanliness.

We would like to have every reader visit the best little casting room on the Baltimore and Ohio. Storekeeper T. E. Britt has certainly worked wonders at Lima. In former times the freight yard casting building and bolt room were in different buildings. Now the two have been combined. The present building is 200 feet long and 50 feet wide. The smaller castings are arranged along the walls in bins, freight and passenger material being kept separate and these sub-divided into cast, wrought, malleable, etc. All castings are arranged in numerical order and each bin is stenciled. It is an arrangement that saves much time, and anyone, even though not familiar with this material, could get any desired piece in quick order. The bolt room occupies the north quarter of the building. All bolts are piled neatly in bins in order of their size, and best of all, they are kept that way.

Storekeeper Britt has every right to be proud of his casting room, and he extends a cordial welcome to all visitors.

The following classic, "In memory of 'Spike'," was contributed by a very good

friend of Mr. Hennesy, who, for various reasons, has requested me not to give his name. The reasons follow.

In Memory of 'Spike'

'Spike' Hennesy, boss of Section number 10, was sitting in place on the front end of a hand car in an attitude of grace. He had just remarked to "Clancy" as he gazed along the track, that he would hand him his identity if he did not bend his back. The hand car was moving swiftly, they were going out of town. The high ridges and low centers kept them bobbing up and down.

"Clancy" grew indignant and was going to answer back, when they struck a broken rail and the handcar jumped the track. The foreman turned a flipflop and landed on his ear; the spike mauls and claw bars were scattered far and near. The water keg was balanced on the bridge of Murphy's nose, and Baker had the oil can on his ear when he arose. The monkey wrench hit Brennan in the middle of the back, while little "Patty" Murphy looped the loop a-down the track. The contents of the dinner pails were scattered on the dirt and the coffee pot was hanging on the tail of Jennings' shirt.

"After they had cleared the wreckage and found that none was dead, the foreman wrote a letter to the road master which read: 'Hand car number 63 jumped off the track today, but not a man was injured, I do regret to say. I will need another hand car, likewise another crew, for the shiftless bunch of turners I am sending in to you, are not fit for a position that requires intellect. They have not yet learned to treat their mighty foreman with respect.'"

Dining Car Conductor Beats Train in Air Race

An automobile and an airplane were recently pressed into emergency service by a dining car conductor, W. Shields, on train No. 49 of the Southern Pacific, running from Los Angeles, Cal., to San Francisco, when his train left him at Fresno. A chase of two miles in an automobile was a failure, and Shields, seeing an airplane preparing to ascend from a nearby field, hurried over and explained his predicament to the pilot. The race ended at Chawehilla, where the train stopped, and Shields climbed aboard.

A Dancer

She swirled on a stuffy dance floor, though she should have bloomed on a tree.
Under the moon and the soft cool wind that woos so tenderly;
And "I'm having a lovely time," she said;
"oh, dancing's a lot of fun—"
She, who was like an apple tree under the soft spring sun.

And an angular chap, with a pasty face fit only for growing hair,
Held her and twirled her around and about till pleasure became a care;
"I'm having a lot of fun," she thought, though she yawned to hide a sigh,
She, who was sweeter than lilac blooms under an April sky.

—H. P. L., in the New York Evening Post.

Slim: How come you don't like duck shooting?
Smoke: 'Cause crap shooting's ma hobby!

American Red Cross
"In the service of those who suffer"

This Superb 110-piece Set, with initial in 2 places in wreath with 5-color decorations on every piece and gold covered handles, consists of:
 16 Dinner Plates, 9 inches
 12 Breakfast Plates, 7 inches

Mrs. Casey (sitting up in bed): "Moike, did yez put out that cat?"

Mr. Casey: "Oi did."

Mrs. Casey: "Oi don't belave it."

Mr. Casey: "Well, if yez think Oi'm a liar, get up and put 'er out yourself."

—Anode.

A Psychic Problem

Two powerful colored stevedores, who had had some sort of falling out, were engaged in unloading a vessel at a St. Louis dock. Uncomplimentary remarks and warnings of intended violence were exchanged whenever the two passed each other with their trucks.

"You jest keep on pesticat'ing around wid me," declared one of the men, "an' you gwine be able to settle a mighty big question for de sciumtific folks!"

"What question dat?" asked the other.

"Kin de dead speak."—Harper's.

Department Store Specials

Why, Hello, Pat, I hear you lost your job in the Department store.

Oh, yes, I got fired.

You got fired? How did that happen?

Oh, I just took a sign from a lady's shirt waist and put it on a bath tub.

And you got fired for that? Well, tell me what the sign read.

It said, "How would you like to see your best girl in this for \$2.75?"

—Keeping in Touch.

She was a bride of less than a year, but she had her troubles, and naturally made a confidante of her mother.

"My dear child," said the mother, "If you would have neither eyes nor ears, when your husband comes home from the club, you might be happier."

"Perhaps so," answered the young wife, with an air of weariness: "but what am I to do with my nose?"

—Exchange.

Etiquette

Sam (to wife at show): Mandy, tell dat niggah to take his hand away f'om aroun' yo' waist.

Mandy: Tell him yo'self. He's a puffict stranga to me.—Brown Bull.

School teacher (to little boy):

"If a farmer raises 3,700 bushels of wheat and sells it for \$2.50 per bushel, what will he get?"

Little Boy: "An automobile."

—Western Christian Advocate (Cincinnati).

Safety First

That President Harding, normal as he may be, is an extremely cautious man is, it seems to us, indicated beyond all doubt by snap-shots of him at Point Pleasant, showing that he wears both belt and suspenders.

—Ax-I-Dent-Ax.

Dedicated to Little Brothers

John asked Mary for a walk,

He said they'd gather flowers.

Mary's little brother came tagging along,

And so—they gathered flowers.

—Brown Bulletin.

\$1 Starts You for the Winter With Three Warm Union Suits

Nothing helps so much to protect a man from cold winter winds and drafts as warm, snug-fitting, heavy union underwear. Here is a remarkable opportunity to protect your health and make yourself warm and comfortable for the balance of the winter at very small expense.

The splendid union suits in this offer are woven on Genuine Spring Needle Machines of heavy, selected yarns in the natural wool colors. They are soft and pleasant to the skin; no scratching or irritation. Made with flat locked seams, reinforced shoulders straps, specially knitted, shape-retaining wristlets and anklets, and pearl buttons. Their splendid quality, fit and finish assure long and satisfactory wear. This special offer now enables you to get

Three Fine Snug
Union Suits
for Only

\$6.95

Six Months
to Pay

Three Suits for Less
Than Cost of Two

If you have priced union suits of similar quality in retail stores you know that they have been selling for \$5 and more. Even at the somewhat lower prices now prevailing you would have to pay more for only two similar union suits, than you would pay us for **three**—and you would have to pay cash. Our offer saves you money, gives you immediate warmth and comfort at an outlay of only \$1.00 and you have six months in which to pay the small balance. Don't put it off—

Order Today
On Approval

You run no risk in buying from us. Our business and reputation have been built upon furnishing better goods for less money. Every order is shipped **on approval**. You are entirely satisfied or you return the goods and get back every cent paid including return postage. Our complete catalog offers everything you need in wearing apparel at equally low prices and on similar easy terms. Ask for it, whether you send an order now or not.

When ordering this outfit of three union suits be sure to mention style B-3271 and give size wanted. Sizes 34 to 46. Send us \$1.00 today and be comfortable the rest of the winter.

Published monthly at Baltimore, Maryland, by the Baltimore and Ohio Railroad, to improve its service to the public and to promote a greater community of interest among its employes. Contributions are welcomed. Manuscripts and photographs will be returned upon request.

The Reader and Advertising

Circulation of the Baltimore and Ohio Magazine is over 39,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employes of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can.

Double Your Mileage Save Your Money

Long Wear Double Tread Tires have double thickness, which insures them against punctures and blowouts; also weather proof. These tires are guaranteed on a 6,000-mile basis, but often give the user 8,000 miles. Take advantage of this great offer and order at once while our stock is complete.

Size	Tire	Tube	Size	Tire	Tube
30x3	\$5.50	\$1.75	34x4	\$8.75	\$2.65
30x3½	6.50	1.75	34x4½	10.25	2.75
32x3½	7.00	2.05	36x4½	10.50	2.75
31x4	8.00	2.35	36x4½	11.00	2.75
32x4	8.25	2.45	36x5	11.75	2.75
33x4	8.50	2.50	37x5	12.25	2.85

When you order, state whether you want straight side or clincher, plain or non-skid tires. Send \$2 deposit for each tire ordered, balance C. O. D., subject to examination. We allow a special discount of 5 per cent if you send full amount with order. **Rebates free with every tire.** We ship the same day order is received.

Don't Stop

If you stop to find out what your wages will be

And how they will clothe and feed you,
Willie, my son, don't you go on the sea,
For the sea will never need you.

If you ask for the reason of every command

And argue with people about you,
Willie, my son, don't you go on the land,
For the land will do better without you.
If you stop to consider the work you have done

And to boast what your labor is worth dear,

Angels may come for you, Willie, my son
But you'll never be wanted on earth dear!—*Rudyard Kipling.*

A California Maid

A lady stopping at a hotel on the Pacific coast rang the bell the first morning of her arrival, and was very much surprised when a Japanese boy opened the door and came in.

"I pushed the button three times for a maid," she said sternly, as she dived under the covers.

"Yes," the little fellow replied, "me she."—*San Francisco Chronicle.*

Magistrate: What is the charge?

Policeman: Intoxication, your honor.

Magistrate (to prisoner): What's your name?

Prisoner: Gunn, sir.

Magistrate: Well, Gunn, I'll discharge you this time, but you mustn't get loaded again.—*London Tid-Bits.*

A St. Paul man was fishing in Lake Traverse recently. He caught a great northern pike, the biggest he had ever landed in his long and busy life. He was elated. He was crazed with joy, and he telegraphed his wife: "I've got one. Weighs seven pounds and is a beauty." The following is the reply he got: "So have I. Weighs 10 pounds. Not a beauty—looks like you, come home."—*Exchange.*

A boy went into a butcher shop looking for work. The following conversation took place.

Boy: "How much will you pay?"

Butcher: "Three dollars a week. But can you make yourself useful around a shop?"

Boy: "Sure."

Butcher: "Can you dress a chicken?"

Boy: "Not on three dollars a week."

Old Santa Claus and the Naughty Boys

By Margaret Talbott Stevens

Old Santa, on a Christmas Eve, first hitched his reindeer to a sleigh,
Then threw his pack upon his back, and soon was driving far away.
The wind was howling through the trees, the snow was falling thick and fast.
"I'll hurry on," quoth good St. Nick, "the winds may blow their loudest blast,
"The snow may fly, Jack Frost may cry, the wind may whistle as it will,
"But down the chimneys I shall go, a million stockings I must fill!"

Now in a town on Santa's route, there lived two naughty little boys,
Who planned a joke on Santa Claus—to take away his dolls and toys.
"Tonight," said they, "we'll have some fun; we'll climb the roof to play this trick,
"We'll hide behind our chimney tall and seize the pack from Old St. Nick.
"Twill be such fun to see him run and drive away in his old sleigh,
"While from his pack we'll help ourselves, and we'll have toys for many a day."

But ah! These boys had never heard that Santa has a magic pack
That opens wide when Santa's near and shuts whene'er he turns his back—
And so they waited half the night; old Jack Frost came up from the vale,
He pinched their toes and bit each nose, their ruddy cheeks grew stiff and pale.
At last the sound of jingling bells came ringing through the frosty night,
And soon good Santa's reindeer stopped upon the housetop, snowy white.

The greedy boys were watching now, they saw the good saint take his pack
And bring it to the chimney top—a load of goodies on his back—
He opened up the treasure bag and drew from it a lot of toys.
Then from behind the chimney tall crept stealthily the naughty boys.
But Santa Claus had seen them first; naught e'er escapes his watchful eye—
"Ah, Boys," he cried, "come help yourselves! Jump down into this sack! Do try!"

The boys could scarce believe their ears, but at his word, into the sack
They jumped, while cunning Santa Claus so quickly laughed and turned his back.
Alas! With click and snap the pack closed tightly o'er each foolish head,
As Santa down the chimneys went with toys for other boys instead.
And then at last he seized the pack and lifted it into his sleigh,
A word to his swift reindeer spoke and o'er the roofs they pranced away.

'Twas Christmas morn. The boys awoke. "Oh, where are we?" they loudly cried,
When right upon the chimney shelf their empty stockings soon they spied.
And on each stocking, pinned with care, a letter from the good St. Nick:
"Dear Boys," it ran, "I took you home. You'd best not try another trick.
"My magic pack will hold you fast and cover up your foolish heads.
"Until you go where you belong—straight back into your little beds."

Lest We Forget

IT was Christmas Eve, 1881. For weeks Jerry Wright, engineer, had been planning his work with the Holiday of holidays in view. It had been a long time since he had been privileged to spend Christmas with his family, but this year the prospects were promising and it was with a feeling of assured anticipation that he picked up his axe and walked up the hill behind his house for the purpose of chopping down the little spruce pine which he had been watching for the past year.

A few years before Jerry had been a young farmer boy, whose father's farm lay along the right of way not far from Martinsburg in the state of West Virginia. In those earlier days Jerry liked the farm, and he liked to attend school during the winter months. But best of all, he liked to listen to the tales that the old Baltimore and Ohio men, whose way took them past his house, told.

These veterans of the rail, some seven or eight of them, often came to the farmhouse on winter nights to help Farmer Wright dispose of his choicest apples and to wash them down with a bit of sweet cider from the barrel in the smokehouse. Several of them had outlived their usefulness as engineers, firemen and trackmen, but they would carry their railroad tales with them until the end of their days. Needless to say, when these yarns were tempered with a glass of cider, they grew to amazing lengths, and each time they were retold they seemed to have some new feature added.

Nevertheless, Jerry was a bright boy and therefore he was able in a measure to separate the wheat of their stories from the chaff. Living near a railroad and having the natu-

Tap, tap, tap. Someone was at the door

rally observant eyes of the average youngster, he knew just about how much to believe and what to reject, and many a hearty laugh had he and his chum, John Davidson, over the peculiar changes in the re-spinning of the yarns. And yet, these held the boy's interest sufficiently to make him long for the opportunity to bid goodby to the farm and to take up railroad work.

The chance came at last. Farmer Wright had a good offer for his place. He decided to sell out and go west

with a brother who was anxious for a partner in the hardware business. Jerry had an opportunity to follow Horace Greeley's advice, too, but he preferred railroading in the East. Jobs on the Road were scarce in those days, but if Jerry had one characteristic it was "stick-to-itiveness," and after a long siege of persistence, he landed a job with a maintenance of way gang.

But Jerry's heart was set on the day when he would be elevated to the right hand side of the engine, and when, with his hand on the throttle, he would be able to guide the progress of the big consolidation engine, and behind her the cars of a crack passenger train. So, when, on the very day that Jerry took up the pick and shovel of the maintenance of way gang, he happened to see going by the master mechanic (who, in those days, had charge of all engine service), he was bold enough to tell him that at first opportunity he would like a job in the train service.

The maintenance of way job held Jerry for only a year. At the end of that period the opportunity came for him to enter train service, and it was with the whole-hearted regret of his comrades of the gang, of the section foreman and of the supervisor, that he laid down the ballast shovel and pick and took up the shovel and firebar of the fireman.

The rules of seniority then were not so binding as they are today, and Jerry's aptitude in his new job, combined with his ability to make steam under any and all conditions, soon came to the favorable attention of the master mechanic, and he found himself in the coveted position on the right hand side of a cab, pulling a local freight.

It was but a few years from that day to the time at which our story begins. Jerry was now the crack engineer of his division, prosperous, proud of his work, and contented; besides, a glimpse from the track as his engine went thundering along beyond the hamlet of Martinsburg, would have disclosed on the hillside about a hundred yards away, an attractive little old-fashioned home, painted white, and glistening in its setting of old trees and the few surrounding acres of pasturage and garden patch. And from here might have been discerned, as Jerry flashed by, the figure of a comely young woman, a little boy tugging at her skirts and a baby on one arm, all waving to the husband and father.

And so, as Jerry climbed the hill to his home on this Christmas Eve, his steps were light, for his thoughts were of tomorrow. This was the first year that little Jerry, Jr., would be old enough to appreciate a Christmas tree and Santa Claus. It would be great to see the little fellow when he delved into his stocking in the morning. And there was the pair of chickens for dinner tomorrow, for Pete Finney and his youngster were coming over to spend the day. Pete's wife had died last winter and he and the boy had had quite a time of it, cooking for themselves and keeping the little house in order. So, after talking it over with his wife, Jerry and she had decided to ask Pete and little Jim to spend Christmas with them.

Jerry found the tree to be larger than he had bargained for, but, as he said to himself, that didn't matter; you can always cut away the lower part of the trunk and trim off the lower branches. So he swung it over his shoulder and walked toward the house. The pine needles brushed against his face, but his heart was so full of thoughts for the morrow that he did not feel them, but unconsciously lifted the burden from one shoulder to the other.

It was dark when he halted at the kitchen door. He set down his precious burden and entered.

"Good night, Daddy," called Jerry Jr., letting go his mother's hand and running to Jerry for his good night kiss.

"Good night, old fellow," said Jerry, giving the youngster a real bear hug, "go to sleep and dream about Santa Claus."

"Yeth Thir, an' will you tell him not to forget my thled?"

"You bet!" said the father, gathering the boy in his arms again and carrying him upstairs to the bedroom, where the little sister was already asleep.

"Did you get the Christmas tree, Jerry?" asked his wife, as she poured the coffee for their supper.

"Look outside the door and see for yourself," replied Jerry, "and if that's not the best looking spruce pine this side of New England, I'll eat it."

"It's a beauty," his wife declared as she closed the door, "and I'm so glad that you will be here until tomorrow afternoon to help us enjoy it."

After supper they pushed aside the dishes, brought in the tree and cut it into size and shape to fit the corner of the cozy little parlor. Then they got out the ornaments, candies and candles with which to trim it. The miniature landscape at its base came in for a share of attention, too, and when the job was finished they were both surprised to hear the kitchen clock striking eleven.

"Come along, Old Lady," said Jerry, teasingly, "bring on your fruit cake and let's celebrate before we go to bed." And Jerry refilled the coffee pot and set it back on the stove.

"Well, of all things!" began the good wife. But remembering how few were the occasions of this kind on which she and Jerry could celebrate together, she opened the door of the old-fashioned sideboard and brought out the tin box from which she lifted the big fruit cake. Jerry brought up the chairs and they sat down.

Tap, tap, tap!

Someone was at the door. Jerry arose and went to see.

"I wonder who that is," said his wife anxiously, "it can't be the caller."

"No, no!" laughed Jerry, pausing as he put his hand on the door knob. "I guess it's old man Stokes. Probably saw our light and thought we might have a bit of egg-nogg on hand. Well, if he can appease his appetite with fruit cake and coffee, he's welcome." He opened the door. Jerry's countenance fell. It was the caller.

"I'm sorry," began the young fellow, scenting the atmosphere of Christmas that hung about the room and noting the disappointment that was plainly written on the faces of Jerry and his wife, "but here's orders for you to take the fast freight out to Keyser tonight. She's been badly delayed by the storm down the valley and you've got to take the place of her regular engineer who's gone west with an extry engine tonight to help pull Number 1 east through the drifts. You'll have to be leavin' now. How're you, Mrs. Wright?"

Jerry's wife turned to her husband. A sigh nearly escaped from her lips and her eyes were moist. But being an

engineer's wife in 1881, she had schooled herself against disappointments like this. She went to get Jerry's overcoat and scarf.

"Too bad you can't wait to get the fruit cake and coffee," was all Mrs. Wright said as she helped her husband into his coat.

"Never mind, Old Girl," said Jerry, "just cut me a hunk and I'll eat it going along." So Mrs. Wright cut two generous slices, one for Jerry and one for the caller.

"I'll be back by day after tomorrow," called Jerry as they left the door, "then we can have another celebration. Don't forget to save me the drumsticks—all four of 'em." And he was off.

Comes Christmas Day, 1921, but not in the little home on the side of the hill, for that has long since been replaced by a large, comfortable house, the home of Jerry, Jr., now with a family of his own. Yes, there is even a grandchild to enjoy the Christmas festival. The gas log burns brightly in the living room. In front of it sits an elderly couple, Old Jerry and his wife. Nearby sits the daughter and son-in-law of Jerry, Jr., teaching their little son Jack to pile up his blocks. Old Jerry's wife, now Greatgrandmother Wright, drew her chair up close to that of her husband.

"Jerry," she said softly, placing her hand in his, "isn't this a wonderful re-union? Just think, there's Jerry, Junior, an engineer just like you were; he's rounding out his twenty-fourth year of service for the Baltimore and Ohio, and every year for the past——"

The door opened and two boys, aged twelve and sixteen, respectively, came bounding in.

"Dad's home!" they shouted. "Hooray! We can all have dinner now. We're nearly starved. He's brought Aunt Bess with him. Hello, there, Grandpa and Grandma!" And soon the family re-union was complete.

Dinner was served in the spacious dining room, and everybody, from Greatgrandpa Wright on down to Baby Jack had a share in the big turkey.

"Don't you have to go back at all today, Jerry?" asked the old man of his son.

"Not on your life," shouted the two boys, "why Dad always spends a part of Christmas Day with us. He always has Christmas dinner with us, and now he's going to be home until tomorrow morning."

"Keep quiet, Boys," said Jerry, Junior, "if you only knew how few Christmases your grandfather spent

at home when he was an engineer, you wouldn't think his was a strange question."

"Honestly," asked Bill, the elder of the two boys, "couldn't you even get home for Christmas dinner?"

"Not if we had the luck to be called out the day before Christmas," declared the old engineer. "You know," he continued, "an engine man's job isn't what it used to be by a long way."

Bill laid down the nutcracker. "Tell us about it," he said. Old Jerry began.

"Forty years ago today your grandmother, with your daddy and your Aunt Bess, then only a baby in arms, spent Christmas alone in the little house on the very site on which this one now stands.

"For the whole week preceding Christmas I had put in upwards of fourteen hours a day on the road, and the Master Mechanic had promised me that because of my extra duty I would certainly be able to spend Christmas day at home. And so I thought up until almost midnight of Christmas Eve.

"Your grandmother and I were having a little snack to eat before bed. There was a sharp rap on the door. It was the caller, and he told me that because of the heavy storm down the valley and the extra work it made for the engines, I would have to leave right away to take the fast freight from Martinsburg to Keyser. It was the first year your daddy was old enough to know what Christmas and Santa Claus meant and it hurt me to leave. But your grandmother knew my duty as well as I did and as she helped me on with my coat, she patted a Godspeed on my back." And he nodded affectionately to the old lady near him, with the great grandson on her lap.

"Engines were not ready for their crews at the terminal in those days, and I had to report to the foreman and then go to the roundhouse to get an engine. The regular engine assigned to me had been put on another train in the emergency and I got one which was not in nearly as good condition as mine. Then I had to take the engine from the roundhouse over to the waiting track, oil her up, put my tools on and go with the conductor to the yard office to get orders. I left our little old home just before midnight and it was well on towards two o'clock when we finally pulled out of Martinsburg yard."

The old engineer sighed as he recalled the event so vividly, then put some fresh tobacco into his pipe and went on:

"I knew as soon as we started that

we were in for a night of it, because, when only a short distance from Martinsburg, we ran into a snow squall swirling down the mountains which soon developed into a driving storm. My engine was working badly and right after our first stop for orders (you know there were no automatic signals then and we had to stop from time to time to get orders to proceed) we felt a sudden jerk, the bell on the engine began to ring and I knew that we had broken in two.

"You see the bell cord from the engine ran over the tops of all the cars to the caboose in those days and as soon as we had a break in two, it jerked the bell cord and started the bell ringing. Then, instead of slowing down, as we would today, I had to keep on moving until I was sure that the conductor and brakeman on the rear end had run out over the cars and set enough brakes to hold the rear end. There was no automatic air and unless the engineer kept the forward part of the train well ahead, there was danger, particularly on a down grade, of the rear end running on and colliding with the front end.

"Leaving the fireman on the engine and walking back a half dozen car lengths, I found the trouble, not in one of the old link and pin couplers, but in an even more antiquated mechanism for coupling the cars. The break came between two cars, and the sill of one was fully a foot higher than the sill of the other. They had been coupled with a chain of three or four links which had parted when the slight jerk came.

"That was the first break of several before we got to Keyser. And how long do you think it took us to make that one hundred and two mile run? All that night and until almost dark of Christmas day!

"You see, besides the handicap of the storm, all our equipment was much inferior to the kind provided on the Railroad today. The engines were small and light. The water capacity of the tenders was small and there was no way of taking water while the train was in motion. Then the handling of the engine was so much harder than it is today. We had to use a lot more sand, particularly on a stormy night, because of the lightness of the engine. There was no power reverse gear, and it often tested an engineer's strength to the limit to handle his reverse. If I had had a full tonnage train of twenty cars on the fast freight that night, I probably never would have gotten to Keyser without help. As it was we had only twelve cars and it was a man's job getting them through.

"When I had turned my engine in at the roundhouse, my first thought was of the quickest way to get back home to have my belated Christmas celebration. But the first train eastward which stopped at Keyser was No. 1, leaving there at 2.05 a. m., and it was well toward noon of the day after Christmas before I reached home to claim my share of what was left of the turkey.

"Today on the Baltimore and Ohio, and on all the railroads, a man in train service must be out of luck indeed, if he cannot arrange in some way to celebrate the day as it should be celebrated, with his family, especially if he is very anxious to do this and has planned, as I had planned, years ago, for the celebration, several days in advance. Forty years ago it was not an uncommon thing for trainmen to be on duty for two days and more at a time. Usually this was in an emergency, but the equipment, track, method of running trains, method of assignments and other things were such that when a trainman left home he could hardly count on getting back at any particular time within the next twenty-four hours. And he might be delayed beyond this to the extent of four or five days."

Then, nodding his head toward the stalwart form of his son, Jerry, Junior, the old engineer said:

"Your daddy remembers many times when he was a boy just like the one I have been telling you about. He got just a taste of the hardships of the old railroad days when he was a youngster firing, so he can appreciate the great advantages of present day railroading as compared with the hardships of the old, and how much it means to an engineer to be able to figure ahead and know just when and how long he is to be on duty. Isn't it so, son?"

"Sure is, Dad," cheerily responded Jerry, Junior, "and it is only one of the many things we have to be thankful for in these modern days."

"Hurrah for Grandpa, I say!" shouted Bill, waving the nutcracker above his head. And the other members of the family joined in the merriment.

"G'andpa," said little Jack, drawing his toy engine by a red string up to Jerry, Junior's chair. "G'andpa, me's goin' to be a nengineer."

Jerry patted the youngster on his head. "I reckon you will be, Sonny," he said, "it's in the blood."

Passenger Traffic on Our Staten Island Lines Is the Most Intensive of Any Part of the System

By B. F. Kelly, Trainmaster

IT will undoubtedly be of some interest and a matter of considerable surprise to many of the employees of the Baltimore and Ohio to know of the extent of the passenger business on our Staten Island Lines. Like all other sections near Manhattan Island, the site of New Amsterdam, which has now grown into the great metropolis of New York, Staten Island has, for the last few decades, seen the phenomenal growth of the passenger traffic of the city, and our lines there have been called upon to absorb their share. For instance, during the months of June, July and August of 1921, in addition to the daily traffic of 328 trains, extra passenger trains were run, involving thirty-one crews.

Staten Island (Richmond Borough) is one of the five boroughs composing Greater New York. The population of this borough is about 120,000. The Baltimore and Ohio rail entrance into the island is over the Arthur Kill Bridge, which spans the Kill Von Kull (Staten Island Sound) between the states of New Jersey and New York. The bridge is situated just south of the City of Elizabeth, N. J., and is said to be the second largest drawbridge of its kind in the world. When traffic is normal, an average of thirty freight and coal trains pass over this bridge daily, moving approximately 1200 cars east and west between Cranford Junction, Arlington and St. George. The bridge is shown in the accompanying group of pictures.

There are six ferries running between Staten Island and the following points:

Port Richmond and Bayonne, N. J.
Linoleumville and Carteret, N. J.
Port Ivory and Elizabeth, N. J.
Tottenville and Perth Amboy, N. J.
St. George and Manhattan, N. Y. City.

St. George and Brooklyn, N. Y.
At least sixty-five per cent. of the passengers using these ferries patronize the Staten Island Lines instead of connecting electric lines, the steam lines being quicker, more comfortable and more regularly on time. Five boats of the Richmond type as shown in the accompanying group, owned by New York City and each having

a capacity of 3,000, are operated, in addition to two others of a small design. The Municipal Ferry alone on each Sunday and holiday during the months of June, July and August, weather permitting, carried approximately 65,000 passengers from New York to St. George, and a like number from St. George to New York. The St. George Terminal for our trains is here illustrated. St. George is the main landing place of the ferry lines, and is the principal terminal station for trains to all parts of the Island.

South Beach

South Beach, terminal of our East Shore Division, is noted for its fine bathing and amusements, its excellent boating and fishing. This beach is situated on the southeast shore of the Island, bordering on the Atlantic Ocean.

On Sundays and holidays during the summer of 1921, the Staten Island Lines carried to and from this beach approximately 40,000 passengers without delay, congestion or accident.

Midland Beach

Midland Beach is situated one mile south of South Beach and is reached by trolley from South Beach depot. The beach has the customary resort attractions, with band concerts, dancing and roller skating, as well as its fine bathing. Between South Beach

and Midland Beaches, large bungalow colonies are maintained along the ocean front from May until September, the residents of which number thousands.

On Sundays and holidays during the summer months the local lovers of outdoor recreation also go to Grant City, New Dorp and Great Kills, there being in these localities ample room for baseball, golf and tennis. For those who enjoy fishing the year around Great Kills is the happy hunting ground.

The Staten Island Lines parallel the water front on the east and north shores of the Island, from South Beach to Port Ivory, and from Clifton to Tottenville, on the south shore, but more inland.

On many of the Sundays and holidays during July and August, in order properly to handle the passenger traffic between St. George and South Beach, trains were run in each direction under a six minute headway.

To give one a fair idea of the number of passenger trains run, cars hauled and passengers carried on this property beginning with July 3 of this year and on every Sunday and holiday thereafter, ending August 28, the table at the top of the next column is shown. Each year Staten Island is a more popular playground for New York's millions.

Safety Record for Staten Island Lines a Marvellous Achievement

The Staten Island Railway between Clifton and Tottenville has been in existence since 1860, and the Staten Island Rapid Transit Railway from South Beach to Arlington, since 1888. Both of these lines are now owned and operated by the Baltimore and Ohio Railroad.

During the whole time these railroads have been in operation, approximately 3,369,400 passenger trains have been operated, and not a single passenger has been killed.

There has never been a passenger train accident in which a passenger was injured and died from the result of such injury.

The large number of passengers carried is shown by the following:

1916.....	9,144,157
1917.....	8,454,202
1918.....	9,269,902
1919.....	10,204,511
1920.....	13,011,958

Efficiency in all things, the pride which our employes take in their work, and the fact that we are con-

A picture of our ferry terminal at Tottenville, where connection is made by ferry to Perth Amboy, N. J., is shown in the illustration. This ferry is owned and operated by the Staten Island Lines of the Baltimore and Ohio. During July and August, 1921, these being the two hottest months, approximately 203,500 passengers were carried, in addition to 77,994 vehicles. On August 21, the banner day, there were 3,800 passengers and 2021 vehicles carried over this ferry.

During the year 1920, the Municipal Ferry carried between the Boroughs of Manhattan and Richmond (New York City) 20,504,749 passengers, and 596,103 vehicles. For this year the figures were much larger, suggesting that Staten Island is the coming borough of the Greater City of New York.

The City of New York has about completed the construction of eleven large steamship piers between Tompkinsville and Clifton, all of which will be served by the Staten Island Lines of the Baltimore and Ohio.

If plans do not fail, Staten Island will, within the next five years, be connected by tubes with the Borough of Brooklyn, thereby establishing direct rail service to all parts of the Greater City. With this accomplished the growth and prosperity of Staten Island will be difficult to predict.

Remarkable "On Time" Record

Our passenger train performance for June, July and August, 1921, is a remarkable one, and, considering the number of trains operated and the density of the business, it sets a high standard for the system, viz:

stantly preaching the gospel of safety, enabled us to go through not only the summer months of 1921, but the entire year of 1920 without loss of life or train accident.

Our Future on Staten Island

Mention has been made above of the enormous new pier development, eleven steel piers to accomodate the largest ships, now under completion by New York City on Staten Island. If all of the employes of our Railroad could see this development, and could realize, as few people can, the dominant place which New York has in the industrial and commercial life of the nation, as well as the greater and greater congestion of the even large water front facilities of this port, they would immediately appreciate the unusually fine opportunity for the growth of our System's traffic, in and out of Staten Island. It is the hope and belief of the employes and officers here that our local territory has practically unlimited possibilities for the up-building and strengthening of the Company's business. And we are all working toward that end.

J. J. Herlihy, Master Mechanic, Illinois Division

On November 15, J. J. Herlihy was appointed division master mechanic of the Illinois Division, headquarters Washington, Ind., vice C. M. Newman, promoted.

GROUP OF OFFICERS, STATEN ISLAND LINES

Left to right, top row: John D. Gibb, trainmaster; Floyd Van Name, trainmaster; W. A. Deems, master mechanic; Jas. A. McCaffrey, road foreman of engines; B. F. Kelly, trainmaster. Standing on top of steps: A. J. Conley, road foreman of engines. Below Mr. Conley: W. J. Ivers, division car accountant. Bottom row: J. F. McGowan, division operator; E. E. McKinley, trainmaster; E. A. English, marine supervisor; E. J. Hamner, superintendent; J. L. Suesserott, division engineer; A. L. Mickelsen, assistant terminal agent

Every Employe an Inspector

Think and Act to Prevent Loss and Damage!

ONCE upon a time a railroad man boarded a train for the West. At a certain station along the way there passed a freight train. Glancing from his window, he espied a box car whose door was partly open, exposing a number of bags of flour bearing the name of a well-known milling company. He shrugged his shoulders.

"Carelessness, dumb carelessness!" he said as the train moved on and he turned again to his newspaper; "Men are paid to look after that sort of thing. That's the way the railroads lose money." Then he shrugged his shoulders and turned to the editorial page, proceeding to forget the box car, its contents and all connected therewith.

Several weeks later he happened to be in the office of a department which handles claims for loss and damage. Two of the men were discussing a claim for loss of flour in transit. They mentioned the name of the company making the claim. It was then that our friend recalled what he had seen from the train window. He thought of what he might have saved had he reported the incident

at once instead of laying the blame on somebody else. **But he thought too late!**

On August 15, this year, the Baltimore and Ohio launched a campaign known as the THINK AND ACT DRIVE. Had our friend of the preceding story realized in time what it meant to the Railroad to have a car door open and contents exposed, he would have become a member of the Think and Act Club immediately. Let us see what a little thought and action on his part might have accomplished:

First: it would have saved the Railroad a claim.

Second: he would have been listed as a careful observer, an interested employe.

Third: if he had read the little yellow booklet that tells all about the Drive, he would have already had a big idea of the enormous waste on the Railroad each year through oversights like the one described, and he would have been on the alert for any irregularity that might have occurred.

Keep Your Own Record

On the front of this little booklet which is available to all employes, there is the design representing a drive wheel, marked off in sections of various sizes to show the respective causes of loss and damage claims during the first five months of the year. Along with the booklet is a "work sheet", devised for the purpose of enlisting individual interest in the careful performance of work and in the observation and correction of the faults of others.

"Particular conditions," says this leaflet, "and kind of work involve the principal risks, which risks may be avoided if thought and action are brought to bear. Each employe can in some way contribute to raising the standard of service, which is positive prevention against loss and damage."

The record, blanks for which are arranged in columns A, B, C and D, to designate the numbers

and descriptions of "wrongs," risks, conditions, violations, or failures discovered, may be conveniently kept by tally in respective columns. At the end of the month the tallies may be erased and the total figures set in.

Now to explain by illustration:

Do It This Way

Assuming that a superintendent or other officer on visiting a freight station observes a barrel of liquid leaking, or a barrel of sugar with its head broken in or knocked out—he immediately calls it to somebody's attention, the barrel is repaired or its contents transferred. He has made a correction. There are thousands of observations of this character made by employes each day, which, if corrected, would mean a big saving for the Railroad. A number of these are being corrected and reported, but there are many which are not. This Think and Act Drive is being effected for the purpose of helping employes to think and act in just such cases as these. Everybody can help. Oftimes the checker or tallyman thinks that he has checked up everything, when there is really something that he has overlooked. Human errors are always happening. The accountant may make a mistake that is caught up by an ordinary clerk. This does not signify that the accountant is less competent because the error has been found. It simply means that the man who has discovered it has made a correction and will be credited for it.

Fourth: our friend would have known that this drive is different from any other campaign that we have launched. Like the Safety drives and No-Accident Campaigns, it includes every employe, but unlike these, it prevents the causes for the claims which it seeks to eliminate before it is too late. If an accident occurs in which a man's leg is crushed, he is taken to a hospital, given good treatment, possibly a wooden leg, and otherwise made comfortable. But accidents happen so suddenly that once they have started it is impossible to stop them; the man's foot could not have been saved. But the carload of flour could have been saved had our friend done a little timely thinking.

Not a Campaign of Criticism

Fifth: he would have understood that the management of the Baltimore and Ohio realizes that men are human and that nobody is perfect. *This drive is not one of fault finding from a personal standpoint, but a campaign of helpful, constructive criticism.* It is based only upon observation and correction, and from

these two points derives its name—Think and Act. It is a practical plan that lends itself to being handled by everybody on the Railroad, no matter what his department and division. Wherever a condition may be corrected or improved upon, the employe has an opportunity to think and act. Moreover, the employe has the authority to take the time from his work that is necessary to report an irregularity. For example, if a trackman sees something wrong about a passing train, he is justified in taking the time from his work to report

pany's address on it, it comes back to that firm in Baltimore. Meanwhile, in Cumberland we are short a package; we cannot prove delivery; therefore, unless the package is discovered at Henry Blank's and the error corrected, we pay the claim for the loss of the package.

The results of the Think and Act Drive which are reported are compiled in a weekly report. This record is showing some fine results. The report for the week ending October 1 shows the following corrections made:

Failure to check articles against shipping orders.....	129
Two or more names of consignees or destinations on packages.....	1669
Failure to use ballot.....	75
Ballots not verified promptly as loading progresses.....	64
Failure to locate packages erroneously loaded and move to proper cars.....	43
Carelessly checking articles against shipping orders when freight is loaded.....	32
Callers failing to call all marks or packages.....	60
Truckers moving truck loads without ballots.....	66
Truckers' failure to examine ballot for spot or block numbers.....	201
Seals not locked, failure to test.....	40
Failure to take seal record after seals are applied.....	12
Failure to revise waybills against shipping orders.....	26
Lack of positive method for correct pouching address and dispatch of waybills.....	45
Failure to make over and astray bills for freight checking over.....	201
Moving local cars without waybills.....	10
Local conductors' failure to check article against waybills.....	8
Local conductors' failure to make slips and give to agents for packages carried past and unloaded at stations to be returned.....	4
Local conductors' failing to respect sealing instruction.....	17
Local conductors' picking up shipments without bills of agency stations.....	6
Local agents' failure to check freight with conductor at time of unloading.....	7
Local agents' failure to protect freight in cars set off by locks or seals.....	2
Local agents' failure to present and check freight when delivered to consignee or drayman and obtain receipt.....	5

it. The idea is not to censure a person for carelessness without a cause, but to bring it to his attention through correcting it before it has gone too far.

One of the big causes for loss and damage claims is the mishandling of package freight. A campaign for the proper packing and marking of freight of this class has been in progress for several years, but the recent progress that has been made in this direction further emphasizes the results which appear on the periodical reports of which we shall speak presently.

Let us consider an example of how a package may be lost enroute. The Henry Blank Company, Baltimore, receives an order for material from William Smith, Cumberland. Henry Blank must send to New York for the goods. When the package is received from New York, Henry Blank's shipping clerk marks it out to William Smith, but in thus consigning it, fails to erase the original address to Henry Blank Company, nor does he change it (a simple method of procedure) to read "From Henry Blank Company." Now it so happens that this package is loaded into the wrong car and goes to Philadelphia; having Henry Blank Com-

If this number of corrections was made, how many others must have gone by unnoticed? Our claims are still high. There is always a chance for somebody to discover something. Let each employe consider himself an inspector and help to reduce the great number of claims for loss and damage that annually eat great holes into the Railroad's revenue. There is no loss more discouraging than that from poor handling of freight. There is no phase of our work which can increase our prosperity for 1922 as much as a concerted and effective drive against it.

Legend of the Christmas Tree

THE origin of the Christmas tree is lost far back in the dim shadows of antiquity. Very early records claim that the lighted and decorated tree was used in celebrating the feasts of heathen gods, and the custom was later adopted by Christendom.

The early Greeks called Christmas the "Feast of Lights," and there is a Hebrew feast of the same name, to which we may trace the idea of illumination at Christmas.

St. Boniface, an early missionary to the Germans, is the hero of one

narrative explaining the Christmas tree's origin. It is said that when he went into Germany to destroy the people's worship of the Druids or forest gods, he hewed down an ancient oak, long an object of worship, and there instantly sprang up in its place a strong fir tree. Addressing the group of newly converted Christians, St. Boniface said:

"This little tree, a young child of the forest, shall be your holy tree tonight. It is the wood of peace, for your homes are built of fir. It is the sign of an endless life, for its leaves are ever green. See how it points upward to heaven. Let this be called the tree of the Christ Child. Gather about it, not in the forest, but in your own homes. There it will shelter, not deeds of blood, but loving gifts and rites of kindness."

In Charles Dickens' famous vision of the Christmas tree there is a message for all the tree's lovers that will bear repeating year after year.

"Now the tree is decorated with bright merriment and song and cheerfulness. And they are welcome. Innocent and welcome be they ever held beneath the branches of the Christmas tree, which cast no gloomy shadow! I hear a whisper going through the leaves: 'This, in commemoration of the law of love and kindness, mercy and compassion. This, in remembrance of Me!'"—

Consolidated Mutual Magazine.

Freight Cars

By Thelma Stillson

(In Metropolitan Magazine)

All day long the cars go by
'Neath the sleepy autumn sky;
Frisco, L. & N., they say,
B. & O., and Santa Fe.

Rumble, grumble, clash and clank,
Creeping past the water tank,
Grim and dusty, car by car,
What a sorry lot they are!

Yet they carry wondrous things—
Stoves and bricks and coal and springs;
Garden bulbs and tires and chains,
Tractors for the Western plains;

Marble for the carver's tool,
Books to study in a school,
Dainty things from Spain and France,
Little slippers for a dance.

All day long the cars go by
'Neath the sleepy autumn sky,
But the open swinging door
Seems a gaping mouth no more:

It's an eye that twinkles—so—
"How much more than you I know!
While you stop and work all day,
I'm forever on my way!

"Always onward, leisurely,
All the world is mine to see;
Town and mountain, sea and pond,
Earth's eternal vagabond."

CABOOSE C-1386

No. 1. Its cushioned seats, lamp, etc. No. 2. The "rear end" with clean curtained windows and substantial stove. No. 3. Another view of the "rear end" showing a bit of the art gallery. Note the "no spitting" sign. No. 4. A corner constantly inviting to get and keep clean. No. 5. The prize housekeepers themselves, Conductor McMakin on the platform, Brakeman Fisher below

"Home Sweet Home" Has Nothing on "Cab C-1386"

Conductor McMakin and Flagman Fisher Are Prize Housekeepers

THE "G. M." opened the door of the caboose, stepped inside, and, with one sweep of his eyes, got a picture of the interior. Then he turned to the general superintendent who accompanied him.

"Whew," he said, "guess I'd better step outside again and clean off my shoes." And he suited his action to the word.

It was Caboose C-1386, assigned to Conductor J. W. McMakin and Flagman Fisher, and it is the pride of the Cumberland Division. The pictures in the accompanying group tell the story better than words can.

It is probably not known to most of the readers of the MAGAZINE that the caboose, unlike engines and cars, is the only kind of rolling stock on the railroad which is not pooled. Caboosees are assigned to regular crews, and it depends upon the interest which the crews take in them whether they shall approach the cleanness, comfort and attractiveness of C-1386, or be just ordinary caboosees.

McMakin and Fisher have had this caboose for a number of years and have neglected no opportunity to fit it up to the taste of—shall we say—the "G. M." himself. Lavatory and other toilet fixtures, closets, stove, lamps, bunks, cushions, carpets, brass rails and other fittings, all these have been picked up from time to time, and installed with care and good taste, so that now the caboose is just as comfortable and attractive as the living room in the cosiest cottage on the railroad. And the walls are a veritable art gallery, with the pictures of famous Americans, Railroad officers, landscapes and the like, all neatly framed and attractively hung.

Not having met either Conductor McMakin or Flagman Fisher, I wondered, when the story of their prize caboose was told me, just what sort of fellows they were; what they looked like, and if their personal appearance was as neat as is that of the interior of their Railroad home. Then the pictures came and you can see from the one in the group that in this case as well as in others, "handsome is as handsome does."

Conductor McMakin entered the service as a brakeman on May 19, 1891, was promoted to conductor in 1900 and has served in that capacity ever since. On October 30, 1915, he

discovered nine inches of rail broken off on the high side of curve of west-bound track on the Deer Park grade, flagged down No. 1, which was approaching, and called trackmen for repairs. Flagman Fisher was born in 1881 and entered the service of the Baltimore and Ohio as a brakeman on the Cumberland Division in 1899. He served in various capacities on this division and at Baltimore until October 2, 1911, when he was made extra freight conductor on the Cumberland Division, which position he still holds.

The mark of a man's respect for cleanness and orderliness shows in all that he is and does. If he comes to work in the morning unshaven, unkempt and slovenly looking, chances

are ten to one that his work has the same characteristics. But if he is neat and clean, his work *may be depended upon* to be the same. And by the same token the Railroad—its cars, engines, stations, warehouses, offices and the property in general, will reflect to a large degree the belief which those in charge of these places have in the importance of "good housekeeping" and all that it means.

The Management of the Baltimore and Ohio believes unqualifiedly in the virtue of "good housekeeping," not only in the appearance of the property but in the appearance of the personnel. And it appreciates everything that our employes will do to "pick up" and "clean up" everywhere and at all times on the property. Public opinion counts a great deal in helping us to prosperity. If we look orderly, systematic, clean and careful, we will inspire respect and confidence, and business in abundance will be trusted to us to handle.

Miss Mabel T. Gessner—the First Woman Passenger Representative

OUR employes in and around Baltimore are well aware of the fact that the Baltimore and Ohio put into the traffic field on December 1, the first woman passenger representative. For Miss Mabel T. Gessner, the incumbent of this position, has been featured in no less than four editions of the Baltimore papers, in at least three of which a most attractive picture of her has also appeared.

As is not unusual with newspapers, the stories concerning the new appointment were quite incorrect in some respects. Miss Gessner was described as being a sort of a glorified chaperone, whose business it would be to see that young ladies in the boarding and finishing schools and colleges succeeded in making their way from their homes to the seats of learning, and back again, on our trains, without creating too much interest and curiosity among the sterner sex. Such, however, will not be Miss Gessner's work. She will do exactly the same kind of work as do our other passenger representative, except that her work will be principally among prospective women passengers of the Railroad.

Miss Gessner entered Baltimore and Ohio service in 1905 as a clerk in the Car Service Department, soon after she came to Baltimore from her birthplace in Mount Vernon, Ohio. In 1912 she was transferred to the office of J. C. McCahan, Jr., then

supervisor of mail traffic, later becoming assistant chief clerk in that office. In 1919 she became secretary to J. T. Broderick, superintendent of safety, and continued in this work until her appointment as passenger representative.

Besides demonstrating her ability in the various positions which she has held, Miss Gessner has also taken an active part in outside activities affecting the interests of the Railroad. She was vice president of the Bando Club and as such was largely responsible for the success of that organization in its participation with the Baltimore and Ohio Glee Club and the Orchestra, when the splendid performances of Pinafore and The Mikado were given in Baltimore and Cumberland.

Her help in the several concerts of the Glee Club and in other social affairs arranged by our employes are well known. It is apparent that her ability along these lines will be of considerable value to her in her new work.

The appointment of Miss Gessner as representative in the Passenger Department was made only after mature deliberation by the officers of the Traffic Department. It was rightly felt that there are many situations in which a woman representative can be considerably more effective than can a man. Miss Gessner has already started the new work and her enthusiasm for it and

her belief in its possibilities indicate that The Baltimore and Ohio will henceforth have the pleasure of serving an increasingly large number of women patrons on its trains.

Harry M. Jouver, General Freight and Passenger Agent, Baltimore and Ohio Chicago Terminal Railroad

NO appointment ever made in the Chicago District caused more satisfaction than the promotion to full title and authority of Harry M. Jouver, made general freight and passenger agent of the Baltimore and Ohio Chicago Terminal Railroad late last summer, he having been acting in that capacity since October 1, 1920.

Harry M. Jouver entered the service of the road April 1, 1910, as yard clerk. He merrily "hopped the ties and grabbed the numbers" for a full year, then advanced successively to demurrage, bill and switching clerk, getting the detailed knowledge which is now invaluable to him as an official, and which has proved him to the shipping public, "a fellow who knows what he's talking about."

The difficult job of rate clerk next claimed him in the Auditing Department from November 18, 1912, until he was made chief clerk, Traffic Department under P. F. Finnegan, then general freight and passenger agent. Mr. Jouver's host of friends—gained him by personal service and expert handling—attest to his success in that position, and when his predecessor, Philip Meininger, resigned, Harry merely tightened his grip upon

The many friends whom Miss Gessner has made during her service with the Baltimore and Ohio, will watch her work in the new and attractive connection with great interest.

the reins of hard routine, "dug in" and justly won his spurs, being made acting general freight and passenger agent, October 1, 1920, assuming full duty on July 25, 1921.

The Chicago Switching District presents more difficult problems than any other like section in the country, and our terminal railroad, a universal switching line, comes in for its full share of situations requiring an accurate knowledge to handle, keen judgment to analyze, and direct methods to adjust. During a year fraught with vexations, clearly understood by the railroad family, Mr. Jouver has carried his trust intelligently, efficiently and with high honor, and it must give his superior officers satisfaction to witness a performance they expected when their confidence was reposed in him.

Hugh Fitzpatrick

Fifty-one Years in Active Service

For the facts used in "Lest We Forget," the leading story in this issue, we are indebted to Hugh Fitzpatrick, engineer, Baltimore Division.

Mr. Fitzpatrick began firing in 1870, when seventeen years of age, for the Chicago and Great Eastern Railroad. In 1874 he came with the Baltimore and Ohio as a fireman at Newark, Ohio, and was promoted to engineer in the Centennial year of 1876.

He left our Western Lines ten years later and was in charge of one of the first engines to haul a train over our old Philadelphia Division when it was opened in 1886, partly as a single track and partly as a double track line, between Baltimore and Philadelphia. He has been in the passenger service ever since, mostly on the Philadelphia and Baltimore divisions.

Despite his years of long service, Mr. Fitzpatrick looks and talks as if he were good for rounding out a record of fully sixty years in railroading. He says that he feels as young and alert, both physically and mentally, as he did twenty years ago. He is living comfortably in the home of one of his six daughters in Baltimore. He also has a son.

It is safe to say that the destinies of the Baltimore and Ohio Chicago Terminal Traffic Department will be guided aggressively forward and that the close contact with the shippers—and of which they are so appreciative—always demanded by Mr. Jouver, will be maintained and cemented.

His friends know of his fine training and sincerity and predict big results from his greater opportunity.

Guinnesses Stout

By GEORGE K. SEIBERT,
Dispatcher, Camden Station

WHILE in England I wished to visit a pretty suburb and as I do not care to be whisked about while sightseeing I hailed a carriage which slowly drew up to the curb. It was drawn by an old and anemic looking nag. The coachman was dressed in a black suit, or a once black suit, I may say, for it was turning green and the front of his coat, as well as its sleeves, was liberally grease spotted, and his topper well worn. All this, with two or three days growth of beard upon his very red face, made as perfect a coachman as Charles Dickens ever described.

"To Hackney," I said. "Drive slowly and talk."

We had gone but a short distance when a drunken man reeled across the street. At the sight of him my coachman gave vent to many oaths and imprecations.

"——— a rollin under the 'eels 'o my 'oss." The bloody drinkin' fish."

"What has he been drinking?" I asked.

"Stout, sir. Guinnesses stout," he replied.

Soon we saw another drunkard.

"The dirty rum," he cried. "The dirty dog, a spendin 'is time an shillins in a grog shop."

"What has he been drinking?" I asked.

"Stout, sir. Guinnesses stout."

Hardly had he finished when he saw a third, and again I listened to the same vehement tirade. This man also had been drinking stout—Guinnesses stout. I then concluded that my coachman was old Pussyfoot himself in disguise getting first hand information.

Presently we passed a tavern where my coachman hailed some friends and cracked loudly his whip.

"What is that?" I asked.

"That's where I spends me shillins and passes me evnins. That's where they makes the best o' stout. Guinnesses stout. That's Guinnesses."

Harry M. Jouver

It Pays!

By Walter Grahame

JOSIAH HEMMINGWAY sat in his big, grim library, alone, reading the obituary notice of a man whom he had known since childhood—a man five years younger than himself.

Care of his health had been the paramount interest of Josiah's eighty years of life. Now he was a fragile-looking old man, with a waxy white skin, through which purple veins showed with startling plainness. A pipe between the thin lips, a glass of wine at his elbow, a white-haired mate knitting across the table from him, or perhaps grandchildren playing at his knees, would have given to the slight figure in the big arm-chair the added touch needed to make the picture one of elderly contentment—but none of these things had entered into Josiah's scheme of life. A good old age had been his ambition, and he had attained it.

So it was that he sat alone in the quiet room, reading a line or two of the obituary notice of one of his oldest friends, and giving expression, in a quivering voice, to the thoughts that the account of the other man's death brought to his mind. He read:

John Sullivan Melrose died at the home of his oldest son, Colonel John S. Melrose, Jr., in this city, late yesterday afternoon. Death was caused by heart trouble, from which he had suffered for some years. . . .

"Tobacco," said Josiah, with a grim smile. "I often told poor John that it would be his end. I can remember how he started—smoking his father's cigars back of old Hen Fanning's barn."

. . . Mr. Melrose was a veteran of the Civil War, having enlisted at the outbreak of the struggle, when only sixteen years old. He fought in many of the bloodiest battles, and was twice wounded. . . .

"They almost got me, too," chuckled Josiah. "Drafted in '63, but I'd been making money hand over fist, and could afford to hire a substitute. Those wounds and hardships are what broke John's health."

. . . After the war he went West and was one of the men who helped build the Union Pacific, the first transcontinental railroad. . . .

"And got an Indian bullet in his hip that made him limp for the rest of his life! I had too much good sense for that sort of foolishness!"

. . . After a few years of this rough work he returned to his home city and engaged in the stock brokerage business, specializing in railroad stocks. More than once he won and lost fortunes. . . .

Josiah nodded. "John was a gambler, always. Nervous strain—"

. . . He never lost his keen love of sport, and made many hunting and fishing trips into wild country. . . .

"That trout fishing trip that he took last month gave him the cold that brought on his last sickness," said Josiah, solemnly. "Why will a man risk pneumonia for a few fish that he could buy in the market?"

. . . He was known as an expert billiard player. . . .

"Late hours!"

. . . and as an opponent at golf was feared by many of the younger men, among whom he was very popular. . . .

"More foolishness," snapped Josiah.

. . . Mr. Melrose was also an expert and daring horseman, and while riding a few years ago sustained injuries that it was feared would result fatally. . . .

"Never caught me risking my neck on one of those skittish brutes of his," mumbled Josiah.

. . . After his return from the West he married Miss Nancy Brunner. . . .

"Sweet on her myself in those days," cackled Josiah. "But the cares of bringing up a family wear a man down."

. . . He is survived by three sons; Colonel John S. Melrose, Jr., who commanded the local National Guard regiment in the European War; George C.

Melrose, a member of the board of aldermen; and Dr. William K. Melrose, a prominent local physician. . . .

"Many a gray hair those boys brought into John's head with their pranks while they were at college," said Josiah.

. . . Mr. Melrose often said that he had but one rule for life—to live. His loss is one . . .

"Never took proper care of himself," Josiah summed up. He glanced at the clock ticking over the mantelpiece, then pressed a button. A sour-faced housekeeper entered with a glass of warm milk, which she placed on the table. Then, without a word, she went out.

Josiah Hemmingway took a clinical thermometer from the desk-drawer and tested the temperature of the milk. Then he sipped it slowly.

"A man's got to be careful," he said, thoughtfully. "I've always been—poor John never was. That's why I'm alive and hearty while he's lying in his coffin. It pays—it pays."

Credit for Business Secured

IT has come to the attention of the editor of the MAGAZINE that some of our employes who have secured nice orders for business for the Railroad have wondered why credit has not been given them in the traffic summaries which we have been printing each month. We are glad to repeat here, therefore, what has been published in several issues during 1921, namely that employes securing business should report it to H. O. Hartzell, manager Commercial Development, Baltimore, who will see that the report is sent to us for publication. It is only in this way that we can get the necessary information.

Christmas Dinner Home for Every Possible Employee

On November 28 Vice President Galloway wrote to General Managers Begien and Sheer and requested that a special effort be made to see that operations be so arranged that every possible employee have the chance to spend Christmas, and particularly to have Christmas dinner at home.

Mr. Galloway said that although this has been the practice of the Baltimore and Ohio for the last few years, there is the opportunity for making it unusually effective this year because business is light and because Christmas will be celebrated on Monday, with the Sunday holiday preceding. He suggested that the plan be made known to the officers of the divisions so that they could develop the idea with the men and thus permit of the widest application of it possible.

Passenger Department

Army vs. Navy

PROBABLY the greatest national society event is the annual foot ball game between the midshipmen of the Naval Academy and the army cadets of West Point.

For a number of years the teams of the Army and Navy have met on neutral grounds and on account of the seating capacity of the Polo Grounds, the contest has been played at New York. It is the most spectacular sporting event of the year and the holder of a little pasteboard ticket, permitting entrance into the great arena, is the proudest person to be found around Thanksgiving time, as the game always follows on the last Saturday in November. It always rains, but that makes no difference; a little rain or a little snow or a high wind for a foot ball game merely tempers the ardor. The railroads themselves get more than usually into the spirit of patriotism, for it is just that which is created by these games.

It is customary for the large classes at the Naval Academy, Annapolis, to be divided between the Baltimore and Ohio and Pennsylvania Railroads for transportation to New York. The classes at the Academy this year are larger than ever before, numbering 2500 midshipmen. These were divided into four sections, two via each road.

Each railroad endeavors to make the best possible time from Annapolis to New York, and should any delay be occasioned to any of the four trains going or returning, it is keenly felt by the railroad having the misfortune.

Both railroads take the "middies" to Jersey City, where they are transferred by ferry boat up the Hudson River to 158th Street, where they disembark and march to the Polo Grounds.

The allotted schedule this year for the Baltimore and Ohio Railroad trains between Annapolis and Jersey City was five hours and thirty-five minutes. The first section made the run in five hours and two minutes and the second section in five hours and nine minutes, beating scheduled time.

Every precaution was taken to prevent delays to the trains, as the forty or fifty thousand people at the Polo Grounds who were all in their seats by 1.30 p. m., were keenly

awaiting the grand spectacle of the brilliant marching around the field of the coming officers of Uncle Sam's Army and Navy.

No Time Like Now

YOU used to hear jokes about the "B. & O." Everybody seemed to have a license to "pan" it. A certain gentleman who had heard all the "panning," had never ridden on it, until one time he decided to use it on a trip West. He went down the long platform where the train was. A porter saw him coming nearly a block away, started to smile a friendly, pleasant, welcoming smile, and came toward him with that smile on his face, as though they had been old school friends.

"Well, how do you do today, Sah. I sunt'nly am glad to see you."

And, by George, he meant it.

He WAS glad to see him.

Now, no one can pan the Baltimore and Ohio in that man's presence. They'd have a he-battle on their hands if they tried.

And why?

Not for any great big deep reason, but just because a porter smiled, and said he was glad to see him.

"Getting along in a shop often means nothing bigger than a smile from the fellow next to you. Being happy in your work hangs on very small things.

"When you're glad to see your buddies in the morning they're glad to see you. It takes practice. And there's no time better than Right Now to begin."—*Babson's Institute.*

Burial of the Unknown Soldier, Washington, D. C.

ON Thursday, November 10, the International Committee of Young Men's Christian Association, consisting of fifty members, left New York on Baltimore and Ohio train No. 511 to participate in the services and burial of the Unknown Dead. Upon arrival at Washington an appetizing breakfast was served them in the Washington Terminal.

At one o'clock in the afternoon the entire Committee marched to the Capitol where services were held at the bier of the Unknown Soldier, whose body was lying in state under the dome of the Capitol. A most impressive talk was made by Mr. W. Sloan, which was followed by the placing of a Triangle wreath on the casket by Mrs. Theodore Roosevelt.

On Friday, November 11, the Committee, in company-formation, marched from the Capitol to Arlington Cemetery where the final ser-

Letters Like This Make the Extra Effort Well Worth While

Baltimore, Md., November 28, 1921.

Baltimore and Ohio Magazine,
City.

To the Editor:

Last spring I accepted a position in Baltimore; previously we had always used lines competing with yours in going to and from New York.

On my first trip to New York from Baltimore, I, of course, was going over one of these competing lines, when one of our buyers told me to go on the Baltimore and Ohio and get car 201. I asked the reason and she said the porter was so very nice.

On another trip the conductor spoke of the fine weather, the first time I had ever heard of a conductor being so courteous. I thought, well, we are just human after all. In the diner they certainly try to please you.

When I got back from New York, my daughter said, "Mother, did you ride the Baltimore and Ohio?" and wanted the mints.

In hurrying to catch my train I failed to get a magazine to read, but when I went to the diner there was the Baltimore and Ohio Magazine, and as so many of my relatives are Railroad men I enjoyed it hugely.

In ordering some goods the other day from Ohio, I did not fail to say "Ship Baltimore and Ohio."

I have come to the conclusion that there is only one railroad and that is the Baltimore and Ohio.

Very truly yours,

(SIGNED) Department Manager in a Baltimore Store.

International Committee of Y. M. C. A. leaving Union Station to pay homage to the Unknown Soldier lying in state in the rotunda of the Capitol in Washington

vices were held in the beautiful amphitheatre overlooking the picturesque and historic Potomac. On account of the immense crowd, possibly 100,000 people, huge amplifiers were placed on the top of the amphitheatre in order that all could hear and join in the services.

No mighty potentate or victorious general ever received a greater or more sincere homage than marked every step in the home-coming and the burial in the sacred soil of Arlington of the Unknown American Soldier, killed in battle and given temporary rest under the poppies of France. While the body was being

carried along Pennsylvania Avenue to its last resting place, the cathedral chimes pealed a requiem which harmonized effectively with the low music of the Marine Band, bringing all the population to the realization that the burial of the Unknown had a deeper meaning than the mere glory of the victory he helped achieve.

The International Committee departed on train No. 506 for New York. A special dinner was served in the dining car, the Committee particularly commending the dining car service and the Baltimore and Ohio's efficiency.

Pass It along to the Passenger Department

SOMEONE way out west in California makes the following suggestion:

"If any of your friends or acquaintances are contemplating or planning a trip abroad, let the Passenger Department have the benefit of this information, which you may be sure they can use to good advantage in encouraging exchange of business with various travel bureaus and agents of foreign steamship lines. There is no easier access for the passenger solicitor than a medium of reciprocity, which affords him an entre to a field which might have been heretofore difficult of approach."

Guides to Washington and New York

THE Passenger Department has issued two very attractive folders giving valuable information in regard to the cities of Washington and New York. Each folder contains an indexed street map of great convenience to the visitor. The Washington folder shows unusual aeroplane views of the city. Both folders are profusely illustrated.

SERVICE ALL ALONG THE LINE

Cartoon by Engineer E. F. Ryan, by courtesy of General Yardmaster C. C. Grimm, Newark, Ohio)

Do You Obey Danger Signals?

Like Signals on the Railroad, Tuberculosis Gives Definite Warnings of Danger

NO matter how many times an engineer runs his train at well-gauged speed over a certain track, he can never be sure of a smooth trip with no unexpected accidents. He is always on the watch for a warning of approaching danger. If he sees a danger signal he is ready to meet the situation and save his passengers' lives. In other words, he gets a danger signal and quickly acts accordingly. If he didn't, Heaven help him!

Everybody in the world is really an engineer. We drive our bodies instead of a train, and our trips are not always smooth and uneventful. Danger signals suddenly spring up to warn us. If we heed them all is well. If we neglect them, may Heaven also help us!

The body is really much like a train. A train that is kept well-oiled, gets plenty of cleaning and is inspected regularly by expert mechanics will give little trouble. A body that is well nourished, gets plenty of sleep and exercise in the cleansing outdoor air and is well inspected by an expert physician at regular intervals will also give little trouble. The unexpected danger signal, however, may pop out at any moment and give warning for new action to both the train and the body. The engineer of each must be constantly on the watch and then prepared to act immediately.

There are no danger signals which come to the human body and need prompter action than the ones which warn against tuberculosis. This disease which kills 132,000 persons yearly in the United States is nearly always ushered in by one or more danger signals. These signals either are not recognized as such or, if so, are too often ignored. Quick action in obeying their warning will prevent in most cases the onslaught of the disease and often death.

The average age for those who die of tuberculosis is from 15 to 45 years. This means that the men and women who succumb to tuberculosis are those who are in the most productive years of life. They can ill be spared. Dr. Louis I. Dublin, in a statistical study for the United States Department of Labor, has found that tuberculosis is the most prevalent cause of death for all occupations combined. Accidental violence causes many deaths but that percentage is only 9.3 per cent. as compared to tuberculosis which is responsible for 20.5 per cent. of the deaths at all ages.

One million persons have the disease in an active state. At least one million others have been infected with tuberculosis and have the germs in their bodies in an inactive state. It is the ones who have been infected and do not know this who need most to recognize and then act quickly on danger signals.

There are six signals which warn that inactive tuberculosis is likely to be transformed to active tuberculosis. If the engineer who is driving his train, or body, perceives any of these signals he had best look to an expert mechanic, or doctor, and take his treatment in time. These signals are: (1) Loss of weight; (2) Loss of appetite; (3) Continued tired feeling; (4) A cold or cough that persists for longer than two weeks; (5) Night sweats; and, (6) A sudden hemorrhage.

The first four danger signals are so often disregarded that it is no wonder we have so many active cases of tuberculosis. The last two are more unusual and will cause a bit of worry. They all are equally significant, however, and will not brook of being ignored.

Tuberculosis is positively a curable disease. Rest, fresh air, good food and good health habits can cure tuberculosis. What is more, (and this fact seems to be ignored by many persons) these same properties will prevent tuberculosis.

To help persons to watch out for danger signals, obey them and thus decrease the yearly death rate, the National Tuberculosis Association and affiliated agencies are carrying on the Fourteenth Annual Sale of Tuberculosis Christmas Seals in December.

A little tuberculosis Christmas seal will not carry a letter, but any letter will carry a seal—together with your good will and a desire to help suffering humanity. The picture of Santa and the children makes the little sticker a nice decoration for your gift packages and all your letters.

More Machines Mean More Men Must Help Reduce Crossing Accidents

THERE was a slight increase in the number of grade crossing accidents the latter half of this year, as compared with the first half. More automobiles were using the crossings, since there was a big increase in the number of machines in use as the year advanced. Practically every case where trains hit motor vehicles, it was because the driver of the machine did not take the precaution to properly stop, look and listen before going on the tracks.

The public does not realize the danger that is present every hour of the day at a grade crossing, and while every means is being taken to impress people with the necessity for care, there are many who are heedless and forgetful.

Railroad men, then, who do know the dangers, can do a real service to humanity by exercising their mature judgment and, when in doubt, take extra precautions.

We Can All Help

Enginemen, during these days when tourists are still abroad and when business by truck is so brisk, can do their part by sounding the whistle properly and with sufficient duration to make the sound carry to the crossing ahead.

Trainmen can guard crossings when a back-up movement or a switching movement is under way, so that no automobilist will venture across the tracks until everything is safe.

Maintenance of way employes should take especial notice of crossing planks, spikes, ballast, etc., and be sure there is nothing that will halt the progress of a machine, once it starts over the tracks, or cause any unnecessary bumping of the automobile.

Crossing watchmen can be ever alert by lowering the gates a sufficient time before the train gets to the crossing, for it is better to hold an automobile a few seconds than to have it get on the track with a train only a short distance away, and moving towards the crossing.

All other employes can do their part by talking to friends who own machines and asking them to be careful when approaching crossings. Safety committeemen have a fine opportunity for real, constructive service by looking after the condition of crossings and getting among automobile owners at clubs, meetings, etc., and dropping a word of caution.

Prohibition In America

SIR ARTHUR NEWSHOLME, late principal Medical Officer to the Local Government Board of Great Britain, has been in America for the last two years. The correspondent of the Journal of the American Medical Association reports his statement to the Royal Society of Medicine on the results of a study of prohibition.

"The results of the first year of prohibition in the United States," said Sir Arthur, "are only partial; although it is still easy for the millionaire visitor to the United States to get intoxicating drink, for the vast majority of the population, alcoholic drinks have become unobtainable or too expensive for frequent indulgence. Four out of five of the physicians in the United States have not taken out permits to prescribe alcohol.

"As the result of prohibition there is increased prosperity and the diversion of large sums to the purchase of better clothing, etc.

"Rescue work in the large cities has, in considerable part, been replaced by preventive work. Drunkenness and admissions to hospitals for acute alcoholism have shown remarkable decline. Although alcoholism is but one part of the mesh of evil circumstances the short-cut toward the removal of the evil which prohibition has provided, promises to be successful in diminishing not only disease but also poverty and crime."

Sir Arthur expressed the opinion that the fear that prohibition would lead to a similar ban on smoking is fantastic, and that the American public will endorse the action taken and will insist on the extension and continuance of prohibition.

—World Digest.

PREVENTING DANGER SIGNALS

Signals are usually given to warn against approaching danger. In the case of tuberculosis, certain symptoms if obeyed in time will usually prevent the disease. The National Tuberculosis Association and its affiliated agencies advocate periodic physical examinations as a method of capturing the disease in an early stage. At tuberculosis clinics, hospitals and preventoria, expert physicians and nurses will give examinations free. In order to establish more of these, the National Tuberculosis Association is carrying on its Fourteenth Annual Christmas Seal Sale.

Safety Section

Ladders Have Been Used and Abused since Noah Built the Ark

By W. D. Lenderking
Safety Agent

LADDERS of one kind or another have been used since the days when Noah built the Ark. But with all the experience of the ages since that time behind us, ladders continue to be a source of accidents.

One reason, perhaps, is that there are too many "home made" ladders in use, ladders which have been hastily cobbled without thought as to their safety. Rough, cheap, imperfect lumber is often used, and when the contraption is finished it is likely to bristle with splinters, splinters and protruding nails.

Ladders should receive more attention than is customary, both in the making and the maintenance.

In recent times the greater part of accidents associated with ladders has been directly due to the careless use of good ones, or to the breaking, collapsing or misuse of poorly constructed ones, that should have gone to the scrap heap before anyone ascended them.

Wood used in the construction of a ladder should be smooth, sound and straight-grained. Spruce, Oregon fir, Norway pine and other woods of equal strength are best. Care should be taken that the wood is free of knots. The rungs are best when made of oak, white ash or hickory. There are some other tough woods that could be used.

Next in importance is to have the ladders of sufficient length to insure proper support when they are in use. It is recommended that they be at least 3 or 4 feet above the floor level or supporting stringers if used in shops. This will facilitate stepping off and on. It will also be conducive to safety, as the men using the ladder can keep a secure hold on the side bars.

Ladders should be equipped, if they are portable, with safety feet, or shoes, to prevent their slipping. These kinds of appliances can now be obtained to meet all requirements, whether they are to be used on wood floors, or on concrete, or steel plates.

Those using ladders should be sure always to face the ladder, whether

ascending or descending it. Always use the rungs of the ladder in descending. In sliding down a painful injury is likely to occur if the hand encounters a splinter or a protruding nail.

Inspection of ladders should be

Live Safety Organization at Pittsburgh Freight Station

THEY have a live Safety Committee at the Pittsburgh Freight Station, consisting of J. F. Hines, J. J. Donahue, Miss G. Forney, secretary, P. Sharpe, W. Bistenderfel, J. A. Kelly and J. T. Campbell, chairman.

At their meeting on September 17, addressed by the chairman, Mr. Campbell, it developed that during the preceding month 3,333 specific illustrations of good work done for the Safety cause were reported by this committee. One of the best

made frequently, for one that is apparently in good condition today, may be dangerous tomorrow.

Whenever a defect is found in a ladder, it should be removed from service at once, and placed where it cannot be brought back on the job again until repairs have been made. When a workman finds a ladder that is not worth repairing, he should see that it is destroyed. Think not only of yourself, but of your fellow workman. Action on the part of the man who discovers a defect might be the means of preventing the serious injury, even death of a fellow employee.

Foremen can help in this important matter by seeing that ladders reported unsafe are promptly repaired or destroyed.

features of the report was the fact that every person on the committee made a good showing, illustrating the kind of teamwork which wins. Most of these cases were of persons spoken to in behalf of the Safety work. Others included drivers cautioned not to smoke on the platform, protruding nails eliminated and holes in boxcar floors repaired.

As a fitting conclusion to this month's especially good work J. F. Hines, a member of the committee, wrote this attractive little poem:

Some Instances Where Safety Sense Would Have Saved Dollars and Suffering

Here are some accidents on the Baltimore and Ohio which might not have been recorded if those involved had used their Safety Sense:

Baltimore Division—When switching, a brakeman was walking backwards ahead of a moving car, adjusting the coupler. He stumbled and fell across the rail. The wheels of the car were inches from his body. By a supreme effort he rolled between the rails and stretched himself out as flat as he could. The brake rigging caught him and dragged him some distance. His foot then was caught in a switch point and he was held fast. Three cars passed over him. His injuries consisted of wounds on the leg and body. These caused him to be absent from duty several months. He violated a specific Safety Rule and paid the penalty.

Ohio River Division—A brakeman on a local freight assisting in switching, attempted to cut off a car. The cars did not separate. He gave a signal to the engineer to move ahead and then attempted to cross to the other side between the two cars so that he could manipulate the lever on the opposite side. His foot caught between the coupler shoulder and the end sill of the car as the train moved. His foot was mashed and he lost 12 days from work. He acted directly contrary to the provisions of a Safety Rule.

Cumberland Division—A yard engineer noticed that the cylinder cocks on the left side of his engine were open. He manipulated the lever controlling the cylinder cock rigging, but was unable to get the cocks closed. He told his fireman to handle the engine and got off and walked beside the moving locomotive, striking at the cylinder cock rigging with a hammer. He stumbled over a ground-throw switch stand and his hand rested upon the rail. The front driving wheel of the engine passed over his hand. Amputation was necessary at the hospital to which he was taken. He had failed to tell his foreman what he intended to do when he left his engine and, as he was working on the left side, the fireman could not see him.

At the End of the Line

By J. F. Hines

Well at last we have reached the end of the line,

The result of our "No-Accident Campaign" sure is fine,

Without any cause of pain or regret,
Our force at this station is happy, you bet.

To think that all hazards each day we go through,

With all kinds of freight that has come to our view,

Has been handled with care to avoid a mishap,

For not a chance taker have we on our map.

Ours is a good record that no place can beat,
And we're surely entitled to take a front seat,

For Pittsburgh Freight Station, as you all may know,

Is one of the largest on the whole B. & O.

So try, one and all, to do what you can,
To make this place safer for each working man;

And let every day start another campaign,
To keep all the chance takers out in the rain.

For we are not going to stop the good work,
But will "pep up" on Safety, from boss down to clerk,

And then we can say wherever we roam,
"You're just as safe here as you'd be safe at home."

Blind

THE other day President Harding' in addressing a group of the blind, said: "I want you to know that if there is anything I can do to set a glow aflame in the soul that is denied the light. God helping me, I mean to do it. I would like to make you understand, by my voice, how deeply I want to bring you some light in your hearts, and I wish for you all the joy that you can find, in compensation for the loss of the great light."

Go outside and walk with your eyes closed and see how quickly the uncertainty and darkness of it appals you. Or imagine never seeing your wife's face again—nor being able to watch the growth of your children. Shut out the sight of hills and rivers and meadows and all of the beauties of the Creator's handiwork—shut out the sunlight and the moonlight—and dawn and sunset—and the bediamonded blue of the heavens at night from your view—shut out these things in your imagination, if you can, and then ask yourself if it pays to leave off your goggles and run the risk of making all too true this eternal darkness.

The Gift of Giving

There is a little story in the Woman's Department of this issue of the MAGAZINE that I greatly admire, largely, I suppose, because "them's my sentiments too." The author makes a plea for a greater willingness on the part of her friends and business associates to help others. And she suggests experiences in which she has asked people to lend a hand in some worthy cause and has been refused. She does not understand such people—any more that did I one morning recently when I struck a Tartar coming in to business on the train. I tried to sell him some tickets for a regular theatrical performance, at regular prices and for the most worthy cause I know. He and his wife are steady theatre goers—yet when I mentioned the word "benefit," he froze up tighter than an oyster shell. And that is just how "tight" he was, is, and always will be. But—I didn't tell him so.

There is another man in Baltimore who, for the past 30 years, has been heaping up the enmity of his business associates by his utter stinginess. Poor devil, he thinks he is a Christian, but he knows not the Man who satisfied his hunger with a handful of grain from the wheat field. And the tragedy of it now is that, just after the prime of life, he has been attacked by an incurable illness which is destroying the sense on which he depended most for his living. He goes on his way alone. His greed has embittered his associates so that they keep out of his path. "Terribly sad case," they say, but few are the words of sympathy they give him, and these are obviously strained and better unsaid. Rightly or wrongly they feel that there is a direct connection between his selfishness and his affliction.

Look around among the people whom you know. You will find some whose god is money or pleasure or clothes or an automobile or a home in Florida. Then compare, any or all of them, with other folks you know whose lives have been blessed with the "gift of giving." Put the one set up against the other, the people who live for themselves against those who live for others, and see if you don't agree that the unselfish ones are infinitely happier than the others.

One of the men I most admire is one of the most righteous men I know. He is a tither. Yes, with an income of not more than \$1,500 a year, he gives a tenth and more to the church, the poor and other worthy causes. And he says without qualification that his gifts have never failed to bring back to him many-fold their value. He believes in the literal interpretation of Holy Writ on the subject of giving. There are other tithers of my acquaintance who do not so believe, but their lives are the most sunshiny, beautiful and helpful I know.

I do not think that it is necessary to give one-tenth of your income to be happy and helpful. But I firmly believe that the closer we come to it, the greater will be our blessing. And so, in this homely and unusually personal Christmas message to the readers of the MAGAZINE this year, I say that the greatest gift you can bestow upon yourself is the "gift of giving." Try it for a year, earnestly, sympathetically, intelligently, happily, and see if at the close of 1922 you do not agree with me.

Friends of Yours

Leaving Grand Central Station in Chicago one morning recently on Number 8, I was impressed as never before with the unending line of factories of one sort or another which border our track leading out of that great terminal city. And as we sped along our main line across the states of Indiana and Ohio, and I saw the prosperous and productive looking farms bordering the right of way, the idea of the intimate relationship of the Railroad to the people in the communities it serves, again appealed to me. I wondered how close we of the Baltimore and Ohio have come to a realization of the ideal laid down by President Willard on June 24, 1916 at Deer Park, to the officers of the Baltimore and Ohio in convention assembled:

"It is our desire that the people living along our lines should feel that the Baltimore and Ohio is a Good Neighbor and that if they are visited by fire, flood or epidemic they should instinctively call upon us for assistance because of our potential strength and willingness to help them."

After all is said and done, these words strike the key note of the very existence and prosperity of our Railroad, especially in relation to the people living and working along its tracks.

The yardmaster and his assistant, those men who are on the ground to provide the service which we give to industries—I wonder if they realize what tremendous factors they can be for the upbuilding of a friendly spirit between these industries and the Railroad? They can, on the one hand, do just so much as custom and their jobs declare they should do. And on the other hand they can do so much more by exhibiting at all times the real spirit of neighborliness and friendship so well expressed in the quoted paragraph.

The rate clerk, the delivery clerk, the notice clerk, the receiving clerk—all in the big freight station: what potent factors these are to make shippers who once try our service come back again and again because they feel that the Baltimore and Ohio Railroad and its men are a friendly institution and anxious to be all and do all that real friendship in business implies.

The crew of the local freight, that nondescript but interesting train which seems to me (along with the local passenger train) to be by far the most friendly train on the line! Do you see it as I do, dropping in unexpectedly at the villages and hamlets, where it sets off small consignments of food, merchandise, machinery, etc., to stock country stores and barns and the larders of country folk? What wonderful opportunities the crews of this kind of train have to make friends with the really friendly people they meet at the little stations and in the little towns!

Then the agent, often called the "railroad," if you please! To tell his opportunities for propagating the friendly spirit would be almost to describe the whole meaning of public relationship on the railroad.

Since his place in history ante-dates the building of the First Railroad by two centuries or more, Hamlet could not have had in mind the Baltimore and Ohio when he said:

*"The friends thou hast, and their adoption tried
Grapple them to thy soul with hooks of steel."*

He did, however, enunciate a metaphor which is peculiarly applicable to our situation.

The possibilities of real friendship between the people we serve and ourselves are infinite. And they depend primarily upon our willingness to take the initiative and to be always friendly.

God's Plan For Disarmament

The Vision

Many nations shall come, and say, Come, and let us go up to the mountain of the Lord, and to the house of the God of Jacob; and he will teach us of his ways, and we will walk in his paths.

And he shall judge among many people, and rebuke strong nations afar off; and they shall beat their swords into ploughshares, and their spears into pruning-hooks: nation shall not lift up a sword against nation, neither shall they learn war any more.

But they shall sit every man under his vine and under his fig tree; and none shall make them afraid: for the mouth of the Lord of hosts hath spoken it.—*Micah IV: 2-4.*

The Omnipotent Ruler

Unto us a child is born, unto us a son is given: and the government shall be upon his shoulder: and his name shall be called Wonderful, Counsellor, The Mighty God, The Everlasting Father, The Prince of Peace. Of the increase of his government and peace there shall be no end.

I am God, and there is none else. Unto me every knee shall bow.—*Isaiah IX: 6, 7 and XLV: 22, 23.*

The Law of Love

Ye have heard that it hath been said, Thou shalt love thy neighbor, and hate thine enemy. But I say unto you, Love your enemies, bless them that curse you, do good to them that hate you, and pray for them which despitefully use you, and persecute you.—*Matthew V: 43, 44.*

The Proclamation

Glory to God in the highest, and on earth peace, good will toward men.—*Luke II: 14.*

The Benediction

The God of Peace make you perfect in every good work to do his will, working in you that which is well pleasing in his sight.—*Hebrews XIII: 20, 21.*

Gifts

May these be yours . . .

The Gifts that make the Dreamers into Doers,
The Gift to work
Through Joy and Sorrow, Light or Murk,
To play, with all your soul and heart,
A manly part!

The Gift of Discontent, to keep you driving
Forward and up, forever striving
For something better in the days hereafter;
The Gift of Kindness and the Gift of Laughter,
And all the gifts of Love and Faith and Friends,
Of Justice and of Truth,
And in your heart, until life's journey ends,
The Priceless Gift of Youth,
Hope that inspires and Courage that endures,
May all these Gifts be Yours!

—Berton Braley.

Superintendents!

A Job for the ex-Service Man!

It is said that there are over 5,000 ex-Service men out of work in and near Baltimore, and that conditions are even worse in other cities. Many people and a few organizations are trying in diverse ways to help, and something is being accomplished.

To the credit of the Baltimore and Ohio be it said that in Baltimore in the General Offices, after furloughed employes are taken care of, the ex-Service man is given the preference in the filling of positions by our Bureau of Employment.

Is the same preference given all over the System? There is no question that it should be given. The country owes its salvation to the Americans who served during the Great War and it is but paying a small part of the debt to bend every endeavor to put these men into positions for which they are fitted.

There are many angles to the problem and just criticism has been made against certain of the jobless ex-Service men. But they are exceptions to the rule of the many who are willing and anxious to work so that they may keep off the streets, out of beggary and worse. Most of them want no charity—just a chance to show their worth.

The spectacle of a dozen of them coming into the American Legion Employment Bureau in Baltimore after the recent snow storm without decent shoes on their feet is enough to suggest the real need for all possible help.

We hope that wherever employment conditions are such on the Railroad that our own furloughed employes are taken care of, and where it does not interfere with our contractual relations with the employes, supervising officers will see that the next chance is given to the jobless ex-Service man.

The American Plan

Men differ in their opinions as to personal rights and as to forms of government. But the most rapid advances of civilization and industry are recorded under that form of government which, within proper limits, and with justice to all, has permitted of individual initiative and action.

Such is the American Form of Government.

Some men will always outstrip their fellows and thus acquire advantage and benefits to which they are justly entitled, under the American Plan of Employment. This system gives all men an equal opportunity for advancement, but places no premiums upon laziness. Merit counts, plus individual effort, and this will always make for advancement and progress under the present industrial system. While it is true that all individuals are not equal in natural capacity, it is also true that all individuals are not equal in their willingness to make sacrifices and wisely apply their efforts.

Such is the American Plan of Employment.—A. W. Booster.

Retired from the Railroad, He Yet Has Two Jobs

C. A. Richardson is a business getter for his bank, but he doesn't forget the Baltimore and Ohio

SIXTY SEVEN years old and honorably retired from service with the Baltimore and Ohio, yet he couldn't stay idle and took a new job.

"Yes," said Mr. Richardson, "the chance came for a man of my years and experience to fit in nicely in a new position. I didn't like the idea of loafing after handling a throttle for 38 years, so, still feeling like a youngster, I accepted the offer, and they tell me I am making good."

Hundreds of veterans of the Railroad, and particularly those about Pittsburgh, know Mr. Richardson. But many of them don't know that he was born on May 1, 1854, at Middletown, N. C. He got but little schooling because of the early death of both parents. In 1864 he went to Philadelphia to live, but went to Newburn, N. C. after the war. He got a taste of the sea in his first job, as a sailor before the mast, in a run from Newburn to Providence, R. I., where the master of the ship put him to work on his farm.

This task held him for four years when he drifted out to Western Pennsylvania and got work with the Atlantic and Great Western (now the Erie R. R.). He started firing on an old engine running on a six foot gauge track, and was made an engineer before he was nineteen. He then went with the Allegheny Valley R. R. (now the Pennsylvania) and from there entered the service of the Baltimore and Ohio on December 31, 1882, at Pittsburgh. His first job was to make an inventory of the cars from Pittsburgh to McKees Rocks. In doing this he met a traveling engineer, fired for him and learned the road, then took his examination and was made engineer on February 2, 1883.

The supervising forces at Pittsburgh had been having a great deal of trouble because of the large number of cars roughly handled and hence damaged in the yard there. At the request of the general yardmaster, Mr. Richardson was given the night switching trick, and after he took hold, the trouble

with shopped cars ended. He then got a daylight job at the same place and in 1887 took the passenger switching job at Water Street Terminal, and held it for 34 years. This is believed to be a record for the Baltimore and Ohio and probably for all the railroads in the country.

When Mr. Richardson was pensioned in August of this year he came to Baltimore to make his home with his daughter and his son in law and soon got wind of the fact

that the Commerce Trust Company needed a "handy man" in its offices. Mr. Richardson applied for the position and is now a member of the Baltimore banking fraternity. He has endeared himself to the officers and the employes of the bank, just as he did in the old days at Pittsburgh, where he was known as one of the most careful engineers handling the switching of passenger cars. In the bank they call him "Uncle Charlie," "Dad," and "Pop." They also have a habit of asking him if he is working for them or for the Baltimore and Ohio.

For Mr. Richardson has not forgotten the 38 years he served the Railroad and he is still interested in its success. He has gotten any number of passengers for our lines from among the customers of the bank. The following letters to and from Vice President Galloway, also suggest how he has lined up freight for us:

MANUFACTURERS' FINANCE COMPANY

BALTIMORE, MD., October 7, 1921.

MR. C. W. GALLOWAY, Vice-President,
Baltimore and Ohio Railroad,
Baltimore, Md.

Dear Sir—The solicitation of Mr. C. A. Richardson, a retired and pensioned engineer of your road, now in the employ of the Commerce Trust Co., and the interest he has manifested, make it incumbent upon us to bring the same to your notice and let

A Letter Worth Treasuring

The Baltimore and Ohio Railroad Company

OFFICE OF GENERAL SUPERINTENDENT

PITTSBURGH, PA., AUGUST 3, 1921.

My Dear Mr. Richardson:

In signing up payrolls today and glancing over names of our employes, I notice application for pension beside the name of C. A. Richardson.

It is hard to realize that you have decided to leave the active service of our company, and that in my frequent walks through the yard I will miss you.

Your services for the railroad were unusual—you left a record behind that shows you entered the service as clerk on the last day of December, 1882. Within one week's time you realized the greatest opportunity in the railroad game was in train service and you immediately took a position as yard fireman. From that you were promoted to position of yard engineer, and for thirty-nine years you have served your employers in a whole-hearted way at all times, whether on the engine or in your leisure hours when you solicited business for the Company, that was badly needed.

I am sure that you will find your Baltimore home, with those so near to you, an ideal place to live. In my business I frequently get to that city and I hope the demands of my time will not be so great as to prohibit getting to see you. I know that a "banker's life" is the dream of all railroad men, and for one it has come true. I trust its realization will be as pleasant as its anticipation.

Sincerely yours, from an old forty-niner.

(Signed) E. A. Peck.

Mr. C. A. Richardson,
Care of Mr. A. B. Lockhart,
Roland and Lake Avenues,
Baltimore, Maryland.

you see the results so far attained through his efforts.

Upon various occasions it becomes necessary for us to liquidate collateral, thereby necessitating a considerable amount of shipments, and this condition has existed recently with the result that we have shipped over your road approximately seven carloads of commodities.

I am merely bringing this to your attention so that you will know the interest that has been manifested by Mr. Richardson, and the esteem in which he is held by us, as I feel assured that you will be very glad to know this condition.

As long as we can feel satisfied as to service, it will be the writer's efforts to give whatever patronage he can to the Baltimore and Ohio Railroad, which we feel assured you will appreciate.

Very truly yours,
(Signed) WM. T. KAROW,
Credit Manager

THE BALTIMORE AND OHIO RAILROAD COMPANY

Office of Vice-President
OPERATION AND MAINTENANCE

C. W. GALLOWAY,
Vice-President

BALTIMORE, MD., October 8, 1921.

Mr. W. T. KAROW, Credit Manager,
Manufacturers' Finance Company,
Fidelity Building, Baltimore, Md.

Dear Sir—I am in receipt of your letter of October 7 relative to the interest manifested by Mr. C. A. Richardson, a retired and pensioned engineer of the Baltimore and Ohio Railroad, in securing traffic for shipment over the lines of this Company.

It is very gratifying for me to learn of Mr. Richardson's activities in this direction, and I desire to express my appreciation of

C. A. Richardson at the Somerset Picnic of 1921

your thoughtfulness in bringing it to our attention.

I am also pleased to know that your Company has recently routed seven carloads via the Baltimore and Ohio and you may be assured that business is appreciated and that we will continue our efforts to handle any such shipments to your entire satisfaction.

Yours truly,
(Signed) C. W. GALLOWAY

But his loyalty to his present employers is just as strong, and he has done not a little among his old friends on the railroad to get them to open accounts with the Commerce Trust Company.

It was last summer, just after Mr. Richardson had taken up his new position, that news of the Somerset Picnic of our veterans reached the offices of the bank.

"See here, Uncle Charlie," said one of them to him one morning, "aren't you going to the Veterans Picnic at Somerset?"

Surprised that the officer of the bank knew of the picnic, the reply was:

"No, I have been here only a short time and I didn't want to ask for the day."

"Well, we want you to go and to keep in touch with your old friends and your old railroad all you can. And tell them that you are here with us and that we will be glad to make them just as welcome as we have tried to make you."

And "Uncle Charlie" is carrying on, working two jobs at one time, only one of them for money but both of them for love, and he is making good with a vengeance.

The attainment to ripe old age may not of itself help our veterans get business, but it certainly isn't slowing them up at it!

A Merry Christmas?

Mr. Zimmerman Knows the Secret after Fifty Years of Faithful Service

Cameron, W. Va., May 9, 1921.

Mr. F. E. FUQUA, Division Operator,
Wheeling, W. Va.

Dear Sir:

It has been my great desire and hope that I would be able to give The Baltimore and Ohio Railroad Company fifty years of service. I thank God that my hopes and desires have been fully realized, as I arrived at the coveted goal on Saturday, May 7, 1921.

I entered the service as messenger in the Grafton, W. Va. office under Mr. A. T. Cline on May 8, 1871, for \$15.00 per month, half from The Baltimore and Ohio Railroad Company and half from the Western Union Telegraph Company. Have been in the service continually since, with the exception of four months from October 1, 1901, to February 2, 1902.

I have been treated WHITE by all of the officials. I appreciate this, and hold them in the highest esteem, and as far as I am concerned, my intercourse with them all has been pleasant and congenial.

I have been here at Cameron since March 25, 1886; have seen many changes take place in the fifty years' service on the Baltimore and Ohio. Many of the old timers have passed away to the "Great Beyond," others have left the service for parts unknown, yet I remain at my old post, a spared monument through the mercy and loving-kindness of God. I have stood the storms of many winters and the sunshine of many summers; have been abused, cussed and called most everything in the catalogue but a gentleman, because I would allow nothing to sway me from my path of duty. I always carried out the rules, preferring abuse and insinuations rather than to be patted on the back and called a good fellow while jeopardizing the lives of the traveling public and railroad men, and the Company's property, by violating the rules. No doubt I have made many errors, but I assure you they were of the head and not of the heart, for I have tried to do my duty as God gave me the light and understanding, as well as my trust in Him for guidance. My help cometh from Him who doeth all things well.

As I have, through the help and tender mercy of God, reached the goal (half-century service) desired, I am at your command to continue in the service or to step down and out for someone else. My sixty-five years fall lightly upon me and I feel as much like work as I did some fifteen or twenty years ago. Years do not count in my case, as I am going to remain young in feelings. Whether you desire my service longer or not, I would appreciate your kindness if you will secure for me my service record now for fifty years, from May 8, 1871 to May 7, 1921. I greatly desire this for my boy, to show that through the HELP OF GOD a man can do his duty working for The Baltimore and Ohio Railroad Company, if he will obey the rules and attend strictly to business.

Hoping to hear from you, I am,

Very truly yours,

(Signed) J. HARRY ZIMMERMAN,

Operator "CX" Tower.

Cumberland Employes Honor Memory of the Late Frank Oscar Eklund

IT is with regret that we report the death of Frank Oscar Eklund, superintendent of the Cumberland Locomotive Shops, at 9.30 p. m. on November 1, 1921, at the Allegheny Hospital, Cumberland, Maryland, from a complication of diseases.

Mr. Eklund was born in Sweden, August 31, 1880 and came to the States in 1896. He entered railroad service as apprentice to machinist on the old Fitchburg Railroad, at Keene, New Hampshire, served as machinist and machine shop foreman respectively, at that point, and was promoted to general foreman of the Boston and Maine Railroad at Mechanicsville, N. Y., in 1908. He held this position until, on December 1, 1918, he came to the Baltimore and Ohio as assistant superintendent of the new Cumberland Locomotive Shop. He was promoted to Shop Superintendent on June 1, 1920, which position he held at the time of his death.

Mr. Eklund had been complaining from disease of the limbs and feet for about three months, although he kept in touch with shop operations by spending part of each day on the grounds until three weeks prior to his death, when he was ordered to bed by his attending physicians. One week prior to his death, his condition was such that he was removed to the Allegheny Hospital, where it was thought that the amputation of his limbs would probably save his life. He continued to decline until his death, his weakened condition having prevented the operation.

In his death the Baltimore and Ohio has lost an excellent mechanical officer, whose broad knowledge of shop practice and opera-

The late Frank Oscar Eklund

tion could not be disputed. His untiring efforts were an important factor towards placing Cumberland Locomotive Shops on its present high plane of efficiency.

His remains were sent to his former home at Keene, New Hampshire, leaving Cumberland on train No. 2, on November 3.

An impressive ceremony marked the departure of the train. The employes of the Cumberland Locomotive Shop remained bareheaded at their places in the shop, while the Shop Quartette sang a verse from a sacred hymn, as a token of the respect and esteem in which Mr. Eklund was held.

He is survived by his widow, his mother, Mrs. Frank Eklund of Concord, N. H.,

three brothers: Karl, of New London, Conn.; Knute of St. Albans, Vt.; and Eric of Mechanicsville, N. Y., and one sister, Mrs. Eric Swenson, of Concord, New Hampshire.

Here's to You and Your Men, Foreman Isabella!

THE accompanying photograph is a view of our Engine Terminal at Butler, Pa., showing water tank, ash pit, sand house and engineers' rest room. On the right is a fence 470 feet long, resting on a retaining wall from 4 to 25 feet high, built by Foreman M. Isabella and his force. In the picture they appear from left to right: Kenneth McCandless, fire knocker; M. Isabella, foreman; P. Mantova, fire knocker; Joseph Zaccari, fire knocker; Joseph Bartolott, hostler; A. Priore, fire knocker; Joseph Falascini, fire knocker; L. Isabella, hostler; L. DeRose, fire knocker.

In sending this picture to the MAGAZINE, Superintendent Beltz, Pittsburgh Division, wrote:

"Mr. Isabella is our foreman at Butler and has taken extraordinary interest in the handling of the work and is continually doing what he can to improve our property at that point.

"We can also say for Mr. Isabella that he has been active in securing new business for this line, both passenger and freight, and has been very successful, considerable revenue having been derived from his activities. I consider him one of our most loyal employes."

Mercy

Oh, her name was Irene,
And she wore crepe de chine:
You could see more of Irene
Than you could crepe de chine.
—Exchange.

The payments to pensioned employees constitute a special roll contributed by the Company.

During the calendar year 1920, \$342,993.35 was paid out through the Pension Feature to those who have been honorably retired.

The total payments since the inauguration of the Pension Feature, October 1, 1884 to September 30, 1921, amount to \$4,534,062.25.

The following pensioned employees, after serving the Company faithfully for a number of years, have died:

Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—
Retreat from care that ever must be thine;
How blest is he who crowns, in shades like these,
A youth of labor with an age of ease.*

GOLDSMITH—"The Deserted Village"

Reuben Stoneking

Reuben Stoneking was born near Burton, W. Va., on August 3, 1856. He attended public schools and then engaged in the occupation of farming until he reached the age of twenty. He then learned the flour milling trade and followed this business for ten years. In 1883 he was married to Miss Mary E. Haskins, who is now deceased.

Mr. Stoneking began working for the Baltimore and Ohio on July 8, 1895, as trackman, Terra Alta, W. Va. He was soon promoted to foreman and worked in that capacity at Newburg, Independence and at Smithfield, W. Va., also at Holloway and at Fairpoint, Ohio. Later his health failed and the remainder of his service with the Baltimore and Ohio was as a pumper, at Maynard, Ohio. Mr. Stoneking was a faithful employe. He was pensioned on October 13, this year.

W. F. Cook

W. F. Cook, pensioned fireman, was born on September 4, 1856, at Green Springs Furnace, Washington County, Maryland. He entered the service of the Baltimore and Ohio as fireman, working out of Martinsburg, on October 17, 1888. He continued in this service until his retirement, on October 10, this year.

Charles M. Lindsay

Charles M. Lindsay, retired machinist, was born in Leetown, W. Va., on September 11, 1855. Later his family moved to Martinsburg. At the age of 17, Mr. Lindsay entered the service of the Railroad as machinist apprentice.

In 1881 he was transferred to Garrett, Indiana; in 1883 to the Newark, Ohio, Shops. In 1887 he left the service. In 1891 he re-entered the service at Newark, where he worked as machinist apprentice until he was pensioned November 1, this year.

Mr. Lindsay has one son who has also been a Baltimore and Ohio machinist at Newark.

Ludwig W. Kroh

Ludwig William Kroh, pensioned clerk, was born on April 27, 1845, in Westphalia, Prussia. At the age of 15 he left school and served for seven years as apprentice in a textile factory. In 1867, in order to escape militarism, he came to the United States. In Rochester, N. Y., in order to learn the English language, he peddled notions from house to house. One day his peddling came to an end when he was bitten by a dog.

He left Rochester and went to Williamsport, Pa., where a cousin gave him a position in his wholesale and retail tobacco business. In 1872 he was made assistant postmaster at Minnequa Springs, Pa.; he was sworn in for this position two days after he received his naturalization papers. When this season had ended, he secured a position as travelling salesman for Marburg Brothers, Baltimore, Md., and later he became bookkeeper. He married Miss Augusta Nesse on April 26, 1876.

After holding several positions with various business concerns in the South, he came to the Baltimore and Ohio in 1908 as clerk, Chicago Terminal. In 1916 he was made material distributor, and in 1920, clerk. He was retired on August 5, this year.

Jessie Moran

Jessie Moran, pensioned trackman, Newark Division, was born in Rochester, New York, on May 30, 1852. He entered the service of the Baltimore and Ohio as trackman, Newark Division, in 1882. He was pensioned this year and now lives at his home at Summit Station, Licking County, Ohio.

Nicholas H. Toomey

Nicholas H. Toomey, pensioned engineer, Philadelphia Division, was born on February 20, 1854. He entered the employ of the Baltimore and Ohio on February 2, 1873, as laborer, Baltimore Division. On October 5, 1874, he was made stationary fireman; on May 1, 1876, freight fireman; in 1880, freight engineer. During the next year he was transferred to Pittsburgh. Three years later he came back to the Baltimore Division in the same capacity. In 1885 he went to the Philadelphia Division.

Glee Club Boys Busy Preparing Their Most Ambitious Program

THE accompanying picture suggests the greater grip which the Baltimore and Ohio Glee Club is getting on the interests of the music loving men employees in the service in Baltimore. The picture shows forty-one men out at one of the regular Monday night rehearsals. This is not an unusually large number, for as many as fifty men have attended recent rehearsals and more than that number are now on the roll.

The Club has already made a half dozen or more public appearances during the current season, singing the lovely program which was given last year at the Annual Concert. Rehearsals are now devoted to the preparation of the music for the 1922 Concert. Friends of the Club who have heard previous concerts will be delighted to know that this year the Club is making a big step forward in the music it will present. One of the numbers takes about

fifteen minutes to sing and is by far the finest composition yet attempted. It is hoped to present this and one other big number at the Annual Concert, with orchestral accompaniment.

Not all of the music is heavy, however, there being several of the most lilting and attractive humorous numbers, as well as some charming and comparatively simple numbers of the lyric form.

The Glee Club has what is probably a unique record among musical organizations, namely that it has never turned down a single applicant for membership. Men with only mediocre talent as singers have joined and have found the training of inestimable value and pleasure. There are still men with splendid voices in the service in and near Baltimore who should belong. They would enjoy it and the Club wants them. They would be made welcome any Monday night at rehearsal in the Assembly

Room, fifth floor, Baltimore and Ohio Building.

Already two Club nights have been held during the current season. Each member is permitted to bring one guest who, after the brief rehearsal, may listen to a program of song and story by individual talent from the Club ranks and also from the outside.

On the night of Monday, November 21, the last of these Club nights was held. W. W. Wood, chief of Welfare Bureau, gave a splendid talk on music. Mr. Smock entertained with a selection of readings and stories. The other entertainers were Miss Ethel Buckless, reader, employed in the office of the Vice-President of Operation and Maintenance, Miss Jeanette Heydenreich, soprano, Mr. R. V. Mossloh, violinist and Mr. Harry Rosenberger, one of the leading baritones in Baltimore and manager of the Remington Typewriter branch house in this city.

The Club is now working on a plan of associate membership, through which it hopes to work out on a fair and attractive basis, a plan for the financing of the Club's expenses. These are considerable and the Club feels that it should have no hesitancy in asking its friends to subscribe, because of the fact that in its existence of almost eight years it has never had financial support from the Railroad, except through the medium of the ticket sale to individuals for the annual concerts. In other respects also the Club has an enviable record, for instance, in that its members have been so interested in their work that they have been glad to use year in year out their own time on Monday nights for rehearsals.

On the other hand the Club has always received splendid cooperation from the officers and employees of the Road, and its

The Assembly Room in the Baltimore and Ohio Building is in use on many evenings for social organizations of employees. Here are forty-one members of the Club at rehearsal. On the wall is the standard of the Baltimore and Ohio Post of the American Legion, which also meets here

annual concert in Baltimore has been a most creditable affair both from the standpoint of the character of the program and

entertainment offered, and the interesting illustration it is of fine sociability as an outgrowth of business association.

Student Course in Traffic Strongly Supported by Baltimore Employes

AN invitation extended by Samuel House, general freight agent at Baltimore, to the various traffic offices at Baltimore and the agencies at Camden, Locust Point and Claremont, brought out sixty-five employes for the first meeting of the student course on November seventh.

This course, planning to widen the range of the worker's knowledge and to acquaint him with something of the nature of the others fellow's job, has been organized by Mr. House and R. J. Beggs, chief rate clerk of the General Freight Office, into a series of one hour weekly lectures. The various departments of the railroad have been considered in the program and will be represented by lecturers. So, on each Monday night from seven until eight o'clock in the Conference Room of the Baltimore and Ohio Building, our employes will be given this opportunity to widen their field of information.

After opening the first session, Mr. House turned the meeting over to C. N. Cox, travelling coal freight agent, who proceeded with the election of a presiding officer. Mr. House was elected to the position and three vice-chairmen were chosen to serve in the order of their election as absences necessitated. These were R. J. Beggs, chief rate clerk, and R. H. Graham, chief clerk; both of the General Freight Office; and C. W. Shinnamon, chief clerk to the coal traffic manager. J. F. O'Toole,

freight representative, was selected as secretary.

The first meetings will be devoted to a discussion of some of the mooted points on rates, etc., and subjects related to them. For instance, on the night of November 28, F. L. Schepler, assistant to the general freight claim agent, was the speaker, and put the subject of commodity claims before the members of the class in a most helpful and interesting way.

One of the best indications of a good meeting of any kind is the number of people who are willing to take part. And in this respect this student course is most successful, it being a not uncommon occurrence to find several of the members trying to get the floor at the same time. Leadership is also an important item, and in this respect also, the organization is fortunate, for in Mr. House and Mr. Beggs, who have had charge to date, study has been attacked in a

methodical and constructive way, and yet with so much directness and so well considered a plan, that the hour is up before one knows it and the time limit could easily be doubled with little chance of losing the interest of the members.

This course, in our opinion, with the idea back of it, is one of the most encouraging signs recently manifested on the Railroad. If any department is looking to handle its work in an expert and thoroughly efficient way, it cannot permit office boys just to grow up like Topsy, and then to make officers out of them. And how can office boys, junior clerks and employes of higher rank get the viewpoint on the larger aspects of their work and hear the discussion of constructive questions, unless they have an opportunity like this? There isn't time to get these contacts during the busy business day, and they must look to this extension work on the outside. Probably the best place outside is under the direction of their own superiors right on the Railroad.

The surprising thing about these meetings is that, despite the fine attendance and interest already shown, every young man in Traffic and related lines (having his future before him) does not attend and get the splendid training offered.

Welfare Association of Cleveland Stages Dance and Hallowe'en Revel

By C. H. Groninger,
Secretary

ON Monday evening, October 31, the Baltimore and Ohio Welfare Association of Cleveland gave a Hallowe'en masquerade dance in the Rainbow Room of the Hotel Winton.

Promptly at 8.30 the masqueraders formed in a grand march around the hall, led by Topsy and Uncle Tom, followed by Turks, Arabs, Indians, Chinese, Colonial gentleman and gentlewomen, spooks, gob-

The Traffic Study Class, Assembly Room, Baltimore and Ohio Building, Baltimore

lins, spaniards, clowns, tramps, and in fact such as ensemble as P. T. Barnum would have described as a "marvelous spectacle unrivalled for beauty and variety of peoples represented." Nearly two hundred couples, filled with the spirit of the occasion, revelled until midnight, refreshing themselves at intervals with doughnuts, cider and other seasonable goodies.

At eleven o'clock prizes for the best costumes were awarded by a committee composed of Superintendent Green, Division Freight Agent Farmer, Division Accountant Jewett, Terminal Agent Littell and Mesdames Kimes, Green and Jewett.

The first prize, a gold ring with emerald setting, for the best costume for ladies, was awarded to Miss Isabelle Fuchs.

Prizes of boxes of chocolates were also awarded to Mrs. L. N. Roller, Mrs. Joseph Boyer and Miss Heller.

The first prize, a smoking stand, for the best costume among the men, was awarded to C. H. Groninger, dressed as an Arab chieftain.

Prizes of boxes of cigars were also awarded to Messrs. Davidson and Brady.

G. H. Smith and wife were awarded a prize for best costumes for married couples.

The affair was really the first of many big social activities planned by the Welfare Association of Cleveland. In addition to social activities, the Welfare Association has formed a glee club and will back a basketball team, composed entirely of its members, in local amateur leagues.

The Ladies Auxiliary of the Veterans at Pittsburgh

By a Member

OUR Ladies Auxiliary of the Veterans at Pittsburgh was organized on January 10, 1921, with about 100 members. The following officers were elected for the year 1921: President, Mrs. Frank Applebee; Vice-President, Mrs. James Martin; Financial Secretary, Mrs. John Haggerty; Recording Secretary, Mrs. Cora Irwin; Treasurer, Mrs. Robert Hill; Marshall, Mrs. John McMunn; Chaplain, Mrs. D. L. Burns; Pianist, Mrs. Peter Klaus.

We have been steadily increasing in membership during the year and now have 177 members. We have met with the Veterans twice during the year, our last meeting being on October 10. At the close of their meeting, we had a short session, after which the ladies served a lunch to the Veterans and their wives, which was heartily enjoyed. We are gaining new members at every meeting and hope to have the wife of every Veteran join us by the New Year.

Let us *boost* our organization and show what we can do by organized effort. Let us attend every meeting if possible and do what we can to make the coming year the banner one in our organization.

Akron Welfare Club Celebrates Hallowe'en

THE following invitation brought two hundred and fifty members of the Baltimore and Ohio family and their friends to the American Legion Hall, Akron, Ohio, on Friday the 28th, for an evening of pleasure:

BALLY HO——BALLY HO
WE ARE SURE GOING TO THE
MASQUERADE DANCE
OF THE
B AND O
IT IS GOING TO BE SOME BALL
AT THE
AMERICAN LEGION HALL
NOW DON'T FORGET THE DATE
FRIDAY, OCTOBER 28.
COME WITH YOUR FAMILY—BEST
GIRL AND BOY FOR A FULL
EVENING OF FUN
AND JOY

REFRESHMENTS—GOOD THINGS
TO EAT
AND
AN ENTERTAINMENT HARD
TO BEAT

Everywhere there was the spirit of Hallowe'en. The entertainment committee under the guidance of C. M. Groninger, our affable district freight agent, had decorated the hall in an appropriate manner. The guests, in masks and costumes of every kind and hue, forgot for a time the daily grind and lived in the make-believe world of jester and clown, harlequin and troubadour, fairy and queen, tramp and mighty lord, and all the other characters that make the make-believe real. A. Richards, of Howard Street Station, sang two songs. Pumpkin pie and cider were served during the evening.

Fairmont Veterans Hold Hallowe'en Ball

ON the night of Hallowe'en, the Fairmont chapter of Baltimore and Ohio Veterans, together with the Ladies' Auxiliary, enjoyed an old-fashioned party. Dancing was the feature of the evening, but not the variety to which we are so accustomed to seeing, for when the West Virginia Veterans get together, they show the present generation what real dancing means. Old fashioned square dances, the Lancers, Virginia Reel, Pitch-In-Tucker, and Hook-'em-up-Sneezer, are but a few examples of how they trip the light fantastic.

Large numbers of Veterans and their wives and families were present. The affair was held in the Masonic Temple at Fairmont. Many attractive costumes lent a festive air to the occasion. No prizes were given, but it was generally voted that the honors of the evening belonged to Mr. and Mrs. George Swisher. Mrs. Fred Wittman as a Gypsy maid, and Mrs. Harry Fleming as a Spanish dancer were among those who helped make the evening a memorable one for the old timers.

The hall was prettily decorated in keeping with the Hallowe'en season. The music was furnished by the Douglas Fleming Syncopated Seven, a popular Fairmont orchestra, with Douglas Fleming as entertainer. Preceding the dance a delightful program was given. Those who helped to entertain were Marguerite Frischkohn, Master Noel Clelland, Mary Clelland, Lucile Stealey, Helen Fleming Rollins.

A Veteran's entertainment is incomplete without refreshments, and this one was not an exception to the rule; there were goodies a-plenty. The whole evening was most enjoyable.

Grand President Sturmer, who always adds zest to any occasion that demands any sort of foot exercise, arrived at Fairmont in the afternoon for the purpose of attending the dance, but much to the disappointment of the onlookers, he was called back to Baltimore soon after his arrival.

This is the first dance given by the Fairmont Chapter, but because of its success, it will be followed by a number of others.

Join the Legion!

It is a safe bet that if all ex-service men knew what the American Legion has already accomplished in their behalf, and that it is the only organization of ex-Service men which can point to a real record of accomplishment, they would join the Legion almost to a man.

The advantages of Baltimore and Ohio ex-Service men joining the Baltimore and Ohio Post of the Legion in Baltimore are many. Principal among them is the fact that we have the common Railroad interest and that through the meetings planned for 1922, to be addressed by the officers of the Company, we will have the chance to learn important facts about our business obtainable in no other way.

For instance, the meeting on December 13 will be addressed by our Vice President Galloway. President Willard and other officers will be with us early in the New Year. Motion pictures will be shown at each meeting and there will be plenty of good entertainment.

The Legion needs every ex-Service man and every ex-Service man needs the Legion. A telephone call to H. C. Weber, Adjutant, Mt. Royal Station, (Tel. 312) will bring you literature and an application card.

Women's Department

Edited by MARGARET TALBOTT STEVENS

Three Lights

*'Twas a star in the sky on that first Christmas morn
That guided the Wise Men to Nazareth Town,
And they followed its light
Through the darkness of night
As it spread out its beams all radiant and bright
'Till it hung o'er the manger so rugged and brown.*

*'Twas a lamp gleaming bright in a lighthouse at sea
That guided the crew of a ship through the night,
And they followed its ray
While the storm went its way,
And they anchored in safety at dawn of the day,
When the gleams of the sunshine put darkness to flight.*

*'Tis the light of a soul 'mid the sorrows of earth
Bringing cheer to the fellow who toils at your side,
A smile and a song
As you journey along
With a heart full of love that will right every wrong
And welcome the Christ-Child therein to abide.*

The Railroad of Progress

(A Christmas Letter)

IN our joyful celebrations of the blessed Christmastide, let us pause a moment and think of the woman upon whose head fell the greatest honor of all history—Mary, the Mother of Jesus.

Perhaps, as many illustrious writers have told us, the shepherds of old dreamed dreams of a wonderful Saviour; perhaps they thought that he would be a great prophet from some distant land who would come suddenly into their midst; they may have dared to dream of one among themselves who might be chosen to receive the kingly diadem, but certainly none knew that the wondrous King would be accorded so humble a birth as that in the Bethlehem manger. Only to the Virgin Mary was imparted the knowledge of the Immaculate Conception, for this was to be her own child. Joseph, the husband of Mary, was present at the birth of the Christ, but it was not given to him to have charge of the Infant; this was Mary's child. And thus it seems that from the beginning of the Christian era, the mother has been the divinely appointed guardian of her child. Certainly it is the mother with whom the child spends his infancy. Because this is true, there is none so capable of influencing the little one than she, who gives him birth.

During his first years the child has everything to learn and nothing to unlearn. His little mind and body grow rapidly under the tender guardianship of a loving mother. It is she who not only understands, but who can impart to him at that tender age an understanding of right habits of living that will be remembered long after her words are forgotten.

Among the various nations the regard of parent for child and child for parent has many different aspects. Ask your Chinese laundryman if his children are well, and he will be apt to reply that the miserable little wretches cause him more trouble than all the collars and cuffs in America; and yet, we find that in his home the Chinaman adores his children. Many are the Chinese books that aim to teach their ideas of filial relationship. How the child is exhorted to respect his parents or run the risk of being eaten alive by some fierce monster!

Slowly, but surely, Christianity is gaining a foothold, and slowly, but surely, Americanism is taking the place of heathenism. How quickly this same laundryman apes the habits and customs of this land! It is not unusual to find Chinese-Americans taking an active part in the organization of our Christian churches and Sunday schools.

And the Chinese represent but a small percentage of the other foreigners who are creeping into our business, religious, and social relationships. Is it not then the duty of Christian America to set examples for these to follow, since they are making their homes in our land? And an ideal American family life should be the most sublime inspiration of all the other ideals which it is our privilege as Americans to pass on to the strangers among us.

There is nothing in family life more beautiful than a sympathetic understanding between parent and child. We are constantly discovering that some famous man or woman was started on the road to success by the encouraging words of a parent. In this connection we have recently received a letter from James D. Brown, General Agent, Passenger Department, Erie Railroad, written by Brigadier General Sawyer to his grandson. General Sawyer, you remember, has for years been the personal physician of President Harding and continues to have charge of the physical well-being of the first citizen in our land. What more appropriate Christmas gift from parent to child or grandparent to grandson could be offered than such a letter as this—a letter which breathes the spirit of good will and points out to the youth the way of success?

Christmas, 1916

My Dear Grandson:—Providing you follow the rules of the line over which the ticket reads, the enclosed coin will buy you a ticket over the "Railroad of Progress" from "White Oaks Farm," Marion, Ohio, to Prosperity, Worthy Man's Land, Universe.

On this Railroad of Progress stop-over is allowed at:

Good Health and its sub-stations, Exercise, Rest, Recuperation, Good Cheer and Smile—

Achievement and its suburbs, Energy Enthusiasm, Resolution, Determination, Opportunity and Ambition—

Mrs. R. L. Much, wife of conductor, Brunswick, and Mrs. Mack Dean, wife of switch operator

Satisfaction and its boroughs, Accomplishment, Influence, Prestige, Honor and Renown.

You will be entitled to carry baggage as follows: Hope, Good Cheer, Joy, Courtesy, Confidence and Self Respect, each without limit.

Owing to an embargo of practical experience the following baggage is prohibited: Suspicion, Complaint, Dissatisfaction, Fault-finding and Blues.

This road is operated on central standard time which demands: Punctuality, System, Order, Promptness, Action. This road has but one terminal, Success, and all trains run on the same schedule.

It has but one track and that is a single rail, energized by willingness to work, sticktuitiveness and determination to succeed. There is no speed limit, no red lights, no stop, look and listen signs and the track is always clear, due entirely to good business management influenced by common sense.

You will find but few through passengers because most people buy their tickets over routes where inefficiency and incompetency cause delay and obstruct the way.

The directors of this "Road of Progress" are men of Good Judgment and Honesty of Purpose.

The engineers and firemen are sober and industrious.

The conductors and brakemen courteous and respectful.

The stockholders are reasonable and considerate.

The passengers are agreeable and content.

All concerned and connected are willing and worthy.

Be sure that your ticket reads over this line and you will finally be able to register in, at the terminal, as a man worth the while.

December

By Katye Coplan

December now is here anew,
The year is almost ended;
Gay spring and summer—autumn, too,
Their separate ways have wended.
All birds are gone, all flow'rs are dead,
The stately trees are bare,
Old Mother Earth is brownish red,
And crisp, cold, is the air.
How different, think you, is today,
From few, short months ago?
Then everything was bright and gay,
Now all is filled with woe;
If you with May were loathe to part,
Here's something to remember:
You can have May within your heart
When outside 'tis December.

The "Pumpkin Pie that Mother Used to Make"

WE always like to get hold of recipes that have stories in connection with them. Everybody knows the old story about the man who sighed for the "pumpkin pies that Mother used to make." Well, here's a man who got the recipe from Mother and handed it over to the Missus. The result is, Missus always makes her pumpkin pies after this fashion, and we consider ourselves fortunate in securing the recipe for our columns. Three cheers, we say, for the man who can coax his wife into baking pies after his mother's recipe. The man in the story is Charles W. Hamilton, clerk, Agent's office, Philadelphia, whose home is near Wilmington, Delaware. His wife—well, 'twould do you good to know her. We regret that we did not have the recipe in time for the Thanksgiving number of the MAGAZINE, but the real Christmas must have its quota of pies as well as cakes and other goodies.

First, get the pumpkin—one grown in a cornfield is preferred. Cut into small pieces with a sharp knife, but, for goodness' sake, don't cut your fingers. Stew these—the pieces of pumpkin, I mean—with the rind on them; it gives the pie a better flavor. When soft, strain through a colander. Add eggs, few or many, according to the scale of present prices. Then add milk, molasses or sugar, ginger, and salt to taste. Do not mix other spices with the ginger, for the compound is not pleasant. Taste the mixture to see that it is just right. Line deep

plates or pie tins with a good crust, and fill with the pumpkin mixture. Don't be too sparing in filling the plates; when folks eat pumpkin pie, they want pumpkin. If you would have it look like Grandmother's pie, decorate the top with several narrow strips of pastry, with tiny diamond-shaped pieces artistically arranged in between the strips.

The pumpkins around Wilmington are pretty juicy, so we do not need much water for stewing the pumpkin; use just enough to keep it from burning.

Be generous with your slices.

The Girl of Today—God Bless Her

*By F. N. Shultz,
Division Operator,
Garrett, Indiana.*

Oh, why do we sigh
For the days gone by,
And the sweet little girl of old,
With her modest ways
And her listless days,
And her heart as pure as gold?

The girl of today
May be bold, in a way,
But her heart rings as true as steel,
She's a sweet little girl,
And a neat little girl,
So let's give her a good, square deal.

She's as pure and true
As the morning dew,
And her friendship will never sever,
The days of yore
We'll see no more—
They have come and gone forever.

Dear Women Readers:

A Merry Christmas to all!

When Christmas time comes rolling around, I like to have a special wish to "wish on" my friends. Health and Wealth are the usual things that make up Christmas and New Year wishes, but the next best thing is Good Cheer.

Now good cheer may come to us naturally, or it may be cultivated. If everything goes well with us at home and in business, and if we are blessed with good health, it is only natural that we should feel on good terms with the world in general. But if we wake up in the morning and everything seems to go wrong from the start—Well?

In one of the general offices at Baltimore there is a messenger boy. He is just the everyday sort of boy, bubbling over with mischief and fun, but he has one expression that is peculiarly and distinctly his own. No matter where he is, at what time of the day it may be; no matter how he feels, mentally or physically, whenever anybody speaks to him with the usual "Hello, 'Gus, how are you today?" the answer comes back like a flash of a sunbeam on a prism:

"Fine!"

That boy *cultivates* good cheer, and of the quality that is contagious. It is the kind of good cheer that counts, and every time I hear him say it, I feel like shouting "Hurrah for Gus!"

That's just what I am wishing you, not only for Christmas, but for the New Year, and for the rest of your lives—that if good cheer does not come naturally through health and wealth, you will have the everlasting power to cultivate it.

Yours sincerely,

Margaret Talbot Stevens

The Spirit of Fellowship

By Dorothy Rubenstein,
Freight Traffic Department,
Baltimore, Md.

NOT long ago I asked a friend of mine to accompany me to a complimentary luncheon tendered by a charity organization. Great was my surprise when she refused my invitation on the ground that she might be requested to solicit donations and feel obligated to do something in return for the dinner.

To my regret, this is the attitude maintained by a great many people—they are afraid that they will be called upon to do something worth while for the sake of suffering humanity. Could they but realize that in helping others they are helping themselves more—broadening their own views and expanding their narrow souls.

What is the good of living if we are of no use to our fellow creatures? Why are we put upon this earth, if not to help those who cannot help themselves?

I ask these questions, not from any desire to preach, but to point out if I can, the need for people who will be ready at all times to help, people who are not afraid to come forth and offer their services when called upon to do so. I know that there are many people who do not hesitate to help, and who do more than their share, but I am speaking to those who shirk their duty and responsibility to humanity, and in many cases not because they are unwilling to help, but because they are thoughtless and do not realize the good they can do with a little effort.

To these people I make my plea: Be ready, like the soldiers on Flanders Field, to do your bit when you receive the call.

Travel via The Baltimore and Ohio

By Mrs. L. W. Delmar,
Wife of Carpenter Foreman,
St. George Yard, S. I.

MINERVA has heart trouble. She coughs and groans, and says that she will not go on that awful journey from New Dorp to Arlington on those little, red cars. Sometimes they go and sometimes they don't. Then, too, the windows are open. The last time that I rode on one of them, the wind travelled down my back at the rate of 25 miles an hour, and I still have the cold. And then, there is the changing. Sometimes we have to change twice, and there's no fun standing for an hour each time in the wind.

We shall have to wait until we can take the day off to make the trip, or until Minerva has a new heart. I wish automobiles wouldn't get out of order.

What is that you say? Go via the Baltimore and Ohio? Why, surely, I never thought of that. Of course, we can be in Arlington in forty minutes, travelling in nice, warm, comfortable cars with polite employees. Just the thing! Let's start now. We'll catch the next train and be back by nine o'clock.

It isn't bad at all when the car is out of order, when we can travel via the Baltimore and Ohio. By the way, we are mighty grateful for the pass given us this year, and we are glad to boost the service that Our Road gives to Staten Island.

Three Cheers for This Business Getter!

JUST another instance which illustrates what has already been said in the MAGAZINE about what women can do toward getting business for the Railroad, we quote herewith a little poem from a Long Beach, California newspaper. This poem was received by Mrs. T. Parkin Scott, wife of chief clerk, Savings Feature, Relief Department, from a party of people who stated that they had travelled from Chicago west on the Baltimore and Ohio. Although this party evidently did not know the extent of our Railroad, we appreciate the spirit.

The poem was an outcome of a one-person business getting campaign recently conducted by Mrs. Scott. On a trip to Cleveland she secured five passengers for Our Road from Baltimore to Cleveland, and one from New York to Cleveland.

Only a Dream

By Philander Johnson

I dozed while on the railroad train.
Through miles of blissful ease,
The wheels clinked out a soft refrain
The languid ear to please.
Attendants came without a frown,
All noiseless and polite,
And put the windows up or down,
Whichever I thought right.
No cinder drifted near the eye.
No vapor clogged the air.
The diner prices were not high
And dainty was the fare.
"This must be heaven," then I sighed.
I woke amid the roar.
"Not yet," a weary porter cried.
"It's only Baltimore."

A Merry Christmas

to all
Baltimore and Ohio
Boys and Girls

A Dispute

By Sarah Pennington,
Daughter of Crossing Watchman,
Cumberland, Md.

FOR goodness' sake, lower that picture! It looks ——— up there: indeed, no one can see it!" exclaimed Mrs. Noitall, as she entered the room.

"You don't want it any lower than that, do you?" asked Mrs. Stilish, gazing at the picture which she greatly admired. It was "The First Love Letter."

"Dear me, yes," declared Mrs. Noitall, and seeing that Mrs. Stilish made no move to lower it, she almost shrieked, "Lower that picture!"

"I shan't budge it," was Mrs. Stilish's sharp retort. She had descended the ladder and was glaring at Mrs. Noitall. Then she added, "Pictures look better when they are high. I suppose that I know."

"High?" Mrs. Noitall's voice was as shrill as a whistle. "You poor thing," she said, chuckling disagreeably, "you have something to learn; they are supposed to be hung low."

Mrs. Busybody, who had overheard the quarrel, entered the room and addressed them.

"Ladies," she said, "the doorbell has rung, but I am so untidy, I wish you would go down to see who it is."

Both Mrs. Noitall and Mrs. Stilish rushed downstairs, but to their surprise, when they reached the door, they saw no one. Then, being rather stout, they decided to rest for a few moments before ascending the staircase. When at last they were back in the room where they had held their disagreeable quarrel, they found it ended, for Mrs. Busybody had arranged the pictures according to her own taste.

Santa Claus Is Coming

By Ida Smith,
Daughter of Nelson Smith, warehouse man,
Camden Station, Baltimore, Md.

Dear Christmas is coming,
The snow is, too,
And the wind will make
Our fingers blue.

Santa is coming
With lots of toys,
Let's all be good
Little girls and boys.

Sleeves Assume Superior Role in the Embellishment of New Frocks

Cascade Panels and Jabots Suggest Clever Ways of Combining Materials

By Maude Hall

THE lines of the new sleeves, which assume the premier place in the embellishment of the latest frocks, surrender to the carefree swing of youth. One may have them long and close-fitting, short and flaring or as deep as the waistline and flowing.

A smart conceit for a house dress is in Malay brown Canton crepe. The skirt follows the whim of the moment, with its uneven hemline, and the simple embroidery down either side of the front makes it doubly interesting. Dark brown and gold are combined in the embroidery. The sleeves are cut in one with the side-front and side-back of the blouse, and are as deep as the waistline. They are adjusted to a front-closing underbody. The applied front and back close on the left shoulder, while the fullness at the waist is held in with a narrow belt of self-material. Attached to the blouse under the belt is a two-piece gathered skirt with long panels.

Fashion never had so many ways of giving distinction to dresses of simple design as this season. She uses little tassels of silk and jet in the most fascinating manner, arranging them in border effects on skirts, sleeves and blouses or adding them to the ends of sashes, belts, streamers, etc., to lend brilliance and scintillating effect. A black satin crepe model for afternoon wear is

fashioned in one-piece effect and slips on over the head. The skirt and full sleeves are trimmed with black silk pendants hanging from threads of jet beads. A casing is adjusted underneath the dress at the waist

9694
EMB-12426

9725
9579

line and an elastic inserted to regulate the fullness. Over this a girdle may be worn, if desired. A narrow bias fold outlines the round neck and where the front of the blouse is slightly slashed, two large jet buttons are placed.

The demand for the new brocades is increasing and they are remarkably chic. Although they are unusually rich in appearance their design and coloring are dignified and restrained so that they can be worn with assurance by the most conservative of Fashion's followers.

LADIES' BLOUSE No. 9677. Eight sizes, 34 to 48 bust. Size 36 requires 2 yards 40-inch material, 3 $\frac{3}{8}$ yards plaiting. Price, 30 cents.

LADIES' BLOUSE No. 9719. Seven sizes, 34 to 46 bust. As illustrated 36 requires 2 $\frac{1}{2}$ yards 40-inch material, $\frac{7}{8}$ yard 36-inch lining for underbody. Price 35, cents.

LADIES' SLIP-ON BLOUSE No. 9718. Seven sizes, 34 to 46 bust. Size 36 requires 1 $\frac{7}{8}$ yard 40-inch material. Price, 35 cents.

Transfer pattern No. 12419, blue or yellow 30 cents. The pattern supplies 6 yards of border 5 inches wide.

Lessons In Home Dressmaking

A Slip-On Negligee That May Be as Simple or Elaborate as Fancy Dictates

LADIES' DRESS NO. 9703. Six sizes, 34 to 44 bust. Width at lower edge about $1\frac{3}{4}$ yard. Size 36 requires $4\frac{5}{8}$ yards 54-inch material, $\frac{3}{8}$ yard fringe. Without lining; slashed and closed at center-back. Dress is slashed in from the underarm edges, front and back, and the lower slashed edges gathered. The one-piece flowing sleeves are perforated for shorter length. Price 35 cents.

Transfer pattern No. 11823, blue or yellow, 20 cents. The pattern comprises 4 large and 3 small motifs with 2 yards of border 2 inches wide. For 1 yard of border it takes 6 yards of braid for large motif $6\frac{1}{4}$ yards, and for the small motif 1 yard is required.

LADIES' DRESS NO. 9694. Six sizes, 34 to 44 bust. Width at lower edge about $1\frac{1}{2}$ yard. Size 36 requires $3\frac{1}{4}$ yards 54-inch material 26 yards braid, $\frac{7}{8}$ yard 36-inch lining for underbody. Slashed and closed at center-back. Long, plain one-piece sleeves perforated for shorter length, or one-piece flowing sleeves. Sleeves are sewn in the armholes of a front-closing underbody. Price 35 cents.

Transfer pattern No. 12426, blue or yellow, supplies 6 yards of 4-inch border, 25 cents. To braid one yard of this border $10\frac{1}{2}$ yards are required.

LADIES' TUNIC BLOUSE NO. 9725. Eight sizes, 34 to 48 bust. Size 36 requires $2\frac{1}{4}$ yards 54-inch material, $\frac{7}{8}$ yard 36-inch lining. Two styles of sleeves are provided in pattern. The back of blouse extends over the shoulders forming yoke effect and is joined to the gathered fronts. Three-piece gathered tunic attached to lower edge of blouse and open in front. Price, 35 cents.

LADIES' TWO-PIECE GATHERED SKIRT. Seven sizes, 24 to 36 waist. Width at lower edge about $1\frac{3}{8}$ yard. Size 26 requires $1\frac{1}{2}$ yard 54-inch material. Price, 30 cents.

IF YOU have but two or three hours in which to make a negligee, select this design. It is easy to make, easy to wear and inexpensive. Of course, fringe or embroidery may be added to beautify the negligee, but it is charming without decoration of any kind also. Medium size requires $4\frac{3}{4}$ yards 32-inch or $3\frac{1}{4}$ yards 36-inch material. The front and back of the negligee are slashed below the waist-line and gathered. A stay is adjusted underneath the gathers and elastic inserted to regulate the fullness. The narrow straight belt is slipped through straps at the side. It is not, however, provided with the pattern. If fringe is used, $1\frac{1}{8}$ yard narrow, and $7\frac{1}{2}$ yards wide, will be needed.

The back and front are in one piece, so in order to cut them properly, lay the sections of the pattern with triple "TTT" perforations along the lengthwise fold of material. A straight strip of material may be cut along the selvage edges to form the belt.

Now, to make the negligee, gather the lower slashed edges in front and back sections between "T" perforations and join to upper slashed edges with notches even, making seams $\frac{3}{8}$ inch wide at under-arm edges and graduate into nothing at inner edges of slashes.

Close under-arm and sleeve seam as notched. Close shoulder seams as notched. Turn hem at lower edge of sleeve on small "o" perforations. Next, adjust the stay underneath the gathers, matching the single large "O" and small "o" perfora-

tions at end of stay and in front and back of negligee. Bring the small "o" perforation at center of stay to under-arm seam. Insert elastic to regulate the fullness.

Tack a piece of material about $2\frac{1}{2}$ inches long and $\frac{1}{4}$ -inch wide (when finished) at the under-arm seam, with the lower edge of strap at the small "o" perforation in front section. Trim negligee with bands of fringe about $4\frac{1}{4}$ inches wide, with the upper edge of upper band along indicating crossline of small "o" perforations. Adjust the belt by slipping through the strap at under-arm seam. Tie as desired. The belt should be about $1\frac{1}{4}$ inches wide and $2\frac{1}{2}$ yards long.

NEGLIGEE NO. 9563. Sizes, 36, 40, and 44 inches bust. Price, 35 cents. (Lesson in Home Dressmaking.)

DRESS NO. 9575. Sizes 34 to 44 inches bust.

DRESS NO. 9761. Sizes 34 to 44 inches bust and 16 to 20 years.

DRESS NO. 9740. Sizes 34 to 48 inches bust.

DRESS NO. 9736. Sizes 34 to 44 inches bust and 16 to 20 years.

DRESS NO. 9731. Sizes 34 to 42 inches bust and 14 to 20 years.

The Little Darkey's Chris'mus Wish

*Ah wants to say dat Sandy Claus
Is de goodest man Ah know, because
He comes 'roun' Chris'mus time. Ah bet
Dere ain't no man kin beat him yet.*

*On Chris'mus Eve Ah goes to bade
An' pulls dem covers 'roun' my hade,
Den, when Ah's snorin' fas' asleep,
Right down my chimbley Sandy creep.*

*Mah chimbley's got a great, big flue,
But dat aint nuttin', he gits froo',
An' brings me candy by de peck,
Enough to fill me to my neck.*

*Yo' reckin yo' gwine stay awake
While yo' Mammy make de Chris'mus cake?
Yo' reckin yo' gwine see ole Chris?
Well, 'taint no use to think 'bout dis.*

*Ole Sandy Claus jes' won't come nigh
'Till ebry chile done shet his eye.
An' mebby 'taint right to feel dis way—
But Ah wish 'twuz Chris'mus ebry day.*

The Olive Tree (A Christmas Story)

LONG, long ago, on the plains of Judea, there grew an olive tree. It was a crooked old tree; its branches were gnarled, its leaves were small and it bore no fruit. It was not even a good shade tree. Nobody seemed to know why it had been allowed to stand there all alone in the field near the roadside. Perhaps it was because the shepherds, who tended their sheep on the hillsides, often came here to sit and to talk to each other on the late afternoons. And the old olive tree loved to have the shepherds there beside it, for it loved to listen to what they had to say. Sometimes they talked of the coming of a great king. Once, the tree remembered, there was a shepherd boy who used to bring his harp and sit on the big roots of the tree that extended above the ground. There he played on his harp and sang beautiful songs which were called psalms. This boy's name was David. But years had passed, and the

boy had come no more, for olive trees, as you know, live to be hundreds of years old.

One day, at twilight, there came a number of shepherds on their way to the sheep-folds. Their sheep were with them. They stopped to rest for a moment right under the branches of the tree.

"What a pity it is," said one of them, "that this is not a good tree. Why, if it were only a little taller, one might climb to its top and see far, far across the country."

"True," replied another, "we could see across Bethlehem, and perhaps to the walls of Nazareth."

Then they passed on, and the old tree bent its branches in sorrow, for this was not the first time that people had remarked about how useless it was. Presently it folded its leaves and fell asleep.

It was later in the evening that the tree awoke. A breeze was stirring the leaves and shining down from the dark blue skies,

just over toward the city of Bethlehem, was the most wonderful star that the tree in all of its long life had ever seen. Nay, there had never been a star quite so large and so bright as this one. What could it mean?

Hark! There were voices as of angels singing. What was this exquisite song? Ah, the tree could hear it plainly now:

"GLORY TO GOD IN THE HIGHEST, ON EARTH PEACE, GOOD WILL TOWARD MEN!"

Then came the shepherds running from the folds.

"It is the Master," they shouted, "the long-promised Messiah! Let us make haste. He is in Bethlehem, for the star shines over the city. Come, brethren, let us seek him!" And they ran toward the city.

How the old olive tree wished that it might tear itself away from its own roots and follow the shepherds to Bethlehem to see the King of whom they had spoken! But this could not be, for a gnarled old tree that bore no fruit could not hope to catch a glimpse of anyone greater than a shepherd. And again, the branches were bent in sorrow.

After a long time the shepherds returned. The tree called out to them, but they did not stop. They thought the sound was only that of the wind whistling through the leaves.

"Alas," cried the tree in despair, "it were better that I should die. Shall I never hear more about the King, the Saviour who is coming to redeem the world?"

After a time the beautiful star disappeared from the sky. Other stars were shining, but the earth did not look as beautiful as it had when the star was there. Then the light died from the sky. How dull it seemed!

"Even the shepherds have forsaken me," thought the olive tree. "I do not wish to live any longer. Perhaps I shall die to-night."

But it did not die. Time went on, and at last there came another night when the tree seemed to feel a stirring within itself that bade it stay awake. The stars were shining, but their light was not great. The earth was almost in darkness. The tree itself cast a deep, dark shadow on the ground.

"What is this that I see coming from the Bethlehem Road?" asked the tree of itself, as it became suddenly aware that there were figures approaching. As they came nearer, the tree could see that there was a man on foot, leading a donkey on whose back sat a woman, carefully holding a bundle in her arms. When they were within the shadow of the tree they paused.

"Are you sure that this is the way?" asked the woman anxiously.

"This is the way that we were told to come," answered her husband, "but it is a road that I have never travelled. I wish that it were possible to see what lies before us."

"Is not this an olive tree?" asked the woman, "If you would climb to the top—"

most bough, you might be able to see something of the country beyond."

"Yea," replied the man, "but can you not see also that the tree has no topmost bough? True, it is an olive tree, but its branches are all of the same length; its trunk is so twisted that I should not be able to climb it. The branches that extend upward are only twigs, and these would not bear a man's weight."

"Then," said the woman, "we must press onward for the Child's sake. Is it not wonderful that the Saviour of the world should be this tiny baby of mine?" And she leaned over to kiss the bundle that she held in her arms.

The Messiah! The Saviour! Now the tree understood. But could it be true that this Child was the great King of whom the shepherds had spoken? Ah, and it could be possible that this gnarled old tree was to see the Messiah after all? Oh, how the tree wanted to live, for now it was glorious to be alive!

"Joseph," said the woman, "I would that we were returning to our old home in Nazareth."

"Yea," replied her husband, "but remember, Mary, the angel hath warned me to flee into Egypt, for Herod seeks to destroy the life of the Child."

Then the tree knew that these were Mary and Joseph of Gallilee, who had come to Bethlehem. The Babe must have been born there on the night that the tree had seen the beautiful star.

At that moment the mother lifted the shawl and the face of the Child appeared. A great halo encircled its head, and by its light the tree could see the face of the mother also. And so beautiful, so divine, so wonderful was this picture that the tree was thrilled with the sight of it.

"Truly this is the Messiah!" whispered the tree. And as these words were spoken, the leaves of the tree unfurled and became larger than any leaves of any olive tree in Judea; the branches began to spread outward and upward; the veins of the tree began to fill themselves anew with their life-blood, moisture from the Mother Earth, and the gnarls in the trunk became straightened.

"Look!" cried Joseph, "the tree is growing taller, the tree is becoming straight!" and as he said these words, he set about straightway to climb into its branches.

"I can see across the country, I am sure of the way now!" he shouted down to the woman from the topmost branch.

"Yea," replied Mary, replacing the shawl, "it is the face of the Child that has caused the tree to become straightened."

Then Joseph came down and they set out once more on their journey toward Egypt. And the old olive tree remained as straight as a palm tree of the desert.

On the next morning as the shepherds went by, one of them stopped and called out suddenly:

"See! Is this the olive tree that we passed last night?" And they all stopped and looked in astonishment. "It cannot be," they said.

"Ah!" said one as he happened to look down upon the ground, "Here are tracks of a man and a donkey."

"Then, it must have been Joseph and Mary and the young Child," said another.

"It was! It was!" cried another, "for none other than the Christ Child could have made this crooked tree straight!"

Then they fell upon their knees in prayer. And every evening afterward, as they passed by with their sheep on the way to the folds, they stopped under the shade of the olive tree to pray. And the tree grew large and strong, and the next season it bore fruit. And it came to pass that people came from far and wide to see the great miracle that had been wrought. And always the shepherds told the story of the passing of the Christ Child.

Our Christmas Turkey

By Gertrude Cassell,
Daughter of Machinist,
Morgantown, W. Va.

Christmas is near,
Hark, how we cheer!
Hurrah, hurrah, hurrah!
We like our chicken and other meat,
But we like our turkey best to eat,
Hurrah, hurrah, hurrah!
'Tis Christmas Day,
So let's be gay,

Hurrah, hurrah, hurrah!

We'll have some goose and other meat,
But we like our turkey best to eat,
Hurrah, hurrah, hurrah!

Dear Girls and Boys:

A Merry Christmas to you all! I just read a clipping from a paper published in Santa Claus Land, and it says that Santa was ready to start weeks ago. His packages are all tied up, and he's coming to visit every one of you. By the time you read this he will be on his way.

I've tried hard to think of something nice that would make the Christmas of our little girls and boys happier, and I think that I've found it. But first let me introduce you to Howard Deering, whose daddy is a warehouse man at Camden Station, Baltimore; Ruth Jones, of Forest Park, Md., whose daddy is an accountant; Gertrude Cassell, whose daddy is a machinist at Morgantown, W. Va.; Francis Riley, whose brother is secretary to the General Manager, Eastern Lines, and Lenore Taylor, whose daddy is a towerman at Aiken, Md. These are the new little folks that have come in since our last MAGAZINE. Lenore—but wait for the January MAGAZINE, and you'll have quite a nice surprise.

Now for the something nice. On my list of little people, I find thirty Baltimore and Ohio towns represented. How would you all like to go with me to visit all of these towns? What? You don't think you can? All right, let's see.

If I wrote and told you all about the pretty buildings and parks, and libraries, and department stores, and streets, and churches, and lakes, and all of the other things about Baltimore; and if, together with this I should send you a picture of Druid Hill Park and the new baby lion, you would then know almost as much about my town as if you had visited it, wouldn't you? Well, we are all going to visit each other's town. And, best of all, there are six nice prizes to be awarded for the six best descriptions of our home towns. Read in the January number about the prize contest, then let's see who will be the first. I want to hear from every little girl and boy who reads the Children's Page.

SANTA CLAUS IN FRANCE

This picture was made for our Page by Jacques de Meslon, whose home is in France. He tells us that there are so many places for Santa to visit in his country that he has to have little "spirits," like those in the picture, to help him distribute the gifts. Instead of hanging their stockings, the French children set their shoes in the chimney place.

With lots of love, and with the hope that
we'll have lots and lots of answers, I am,
Yours lovingly,

Aunt Mary

Good Old Santa Claus

By Ruth Jones,

*Daughter of Traveling Station Accountant,
Forest Park, Md.*

ON Christmas Eve, just as Santa was about to leave his home at the North Pole, he said:

"Wifey, dear, is there anything that you want?"

"Nothing that I can think of," replied Mrs. Santa.

So, with a kiss and a hug, he left her.

Poor Mrs. Santa! She was very tired. More than a hundred dolls had she dressed. Ah, and what was she thinking of, as she sat in her easy chair? Of happy children on Christmas morning; of the toys and toys that Santa had in his pack. Many, many children would be happy. Girl dolls, jumping-jacks, boy dolls, Teddy bears, carriages, beds, balls, tables, etc. (Every good little girl and boy knows that Santa will be here soon with his pack, his reindeer, and his red suit with fur on it.)

Into one house that Santa found, there was a poor little girl in a broken bed. Her stockings had big holes in them. But Santa knew what to do. He put a big orange down into the toe. Then he filled each stocking to the very top. On the table he put a warm coat and hat, some pretty gloves, and a turkey, and lots of good things to eat. Besides these there were a doll, a doll's bed, a carriage, and a real Christmas tree.

Then Santa went to many, many other houses. And when he got home, what do you think had happened? Mrs. Santa was fast asleep in her bed.

Christmas Time

By Howard Deering

Son of William Deering,

Camden Warehouse, Baltimore, Md.

The days are growing shorter,
The nights are growing long,

Howard Deering

Glad Christmas Time is coming,
We'll brighten it with song.
Let's thank the little Christ Child
For blessings on our way,
And make His birthday happier
By giving gifts today.

Dear Santa Claus

By Louise Perry,

Dorsey Md.

Good Christmas Day is here at last,
The snow is falling thick and fast,
The trees and bushes covered full,
As if they're trimmed with balls of wool.

When Santa comes, then he will say,
"Dear Children, you've been good today,
And next year when I come, I'll bring
You lots of toys and everything."

A Christmas Surprise

By Beulah Hoar,

Brunswick, Md.

ONCE upon a time there was a little girl named Bess. She lived in a little log cabin in the country. Her parents were living, but they were very poor. Her father was a wood-cutter and they lived four miles from the woods. There were a few houses nearby, but these were far apart. It took her father so long to reach the woods that he did not have much time left for his work.

One day in the winter, when Christmas was drawing near, the little girl said to her mother, "Mother, shall I get any toys or clothes for Christmas?"

"Bess," replied her mother, "we haven't any money this year, except just enough for food, so I am afraid that you won't get any of these things."

So Christmas Eve came, and the little girl went to bed sorrowfully. She left her window open a bit so that the room might be aired. In a short time her little eyes were closed.

In the morning when Bess awoke, thinking that it would be a sad Christmas without any toys, she happened to look down at the foot of her bed. There she saw a package sticking out from under the bed. She pulled it out and found it to be a great, big package. She called her mother and father and they opened it. There were money, clothing, food for them all, and lots of nice toys for little Bess. These things had been sent to them by some relatives in another country and by Santa Claus.

This package seemed a good luck package,

for ever after this they were rich and had plenty of things to eat.

Christmas Candies

Here is an easy way to make some nice Christmas candies. This fondant may also be used for stuffing dates. Before making the candies into different shapes, dust your fingers with corn starch.

Melt $\frac{1}{2}$ cup of butter. Add all the XXXX sugar that the oil will take up, then thin with cream to the desired consistency.

Divide the mass of fondant into as many parts as you have flavorings, the most satisfactory of which are vanilla, chocolate, orange and peppermint. Flavor each part separately, using cocoa to color and flavor the chocolate section. Vegetable colorings and nuts may be added to any of the above. Take a tablespoon of fondant, roll into a ball, then into an oblong shape. Lay on waxed paper, and allow to remain for about 15 minutes. Decorate with dots or strips or little designs made from tiny bits of fondant of different colors, or dip the whole in melted chocolate. Wrap in waxed paper.

Dear Girls and Boys:

*Don't forget the prize contest.
Read about it in the next Magazine.*

Santa Claus

HAPPY CHRISTMAS

(Drawn by Marguerite M. McDonald,
Staten Island, N. Y.)

Safety Roll of Honor

Staten Island

On October 10, in West Yard, Cranford Junction, Engineer Frank E. Horan, in charge of Baltimore and Ohio engine 1632, discovered broken flange and reported it to proper authority. Repairs were made. Engineer Horan is commended for his keen observation and prompt action.

Baltimore Terminal Division

BALTIMORE, MD., November 14, 1921.
Mr. J. B. HOWARD,
Brakeman,
Curtis Bay, Md.

Dear Sir—My attention has been called to the fact that about 11.30 p. m., November 12, while on your way home, you discovered a broken rail on No. 3 track, Brooklyn, and promptly reported same.

Your prompt action in this case possibly averted a derailment and I desire to thank you for the interest taken by you in the matter.

Yours truly,
(Signed) C. M. SHRIVER,
Superintendent.

Baltimore Division

The following from W. E. Cavey, supervisor of Locomotive Operation, is self-explanatory:

While going west on engine 5001, No. 11, on October 4, I saw engine 1440 standing at Laurel, and engineer down in front of engine working. I got off No. 11 and went over and asked Engineer R. P. Murphy what the trouble was. He told me that he had broken the valve stem at Langdon but that he kept on coming and the clump pulled off at Muirkirk. He managed to get to Laurel and at that point the valve was so far ahead that he could not get started. He had a monkey wrench on the valve stem trying to pull the valve back but was unable to do so. Engineer R. P. Murphy and Fireman D. L. Adams removed the front valve head on the right side and found the breaking of valve stem was due to exhaust packing ring breaking and dropping down behind the spool, which prevented them from pulling it back. The packing ring, which was broken in four parts, was removed, the valve pushed back and elamped and valve head put back on and engine brought train forward with 44 minutes delay.

Messrs. Murphy and Adams have been commended for their good judgment and the manner in which they handled the situation.

On October 4, while No. 91 was passing over Bridge 1-A, Alexandria Branch, at Bladensburg, Carpenters J. R. Carey and W. H. Delauder noticed brake rigging down and dragging, ten cars from the engine. They notified the conductor of the train and air was applied from the rear and train stopped. The brake rigging was removed. The action of these men possibly averted a derailment.

On October 6, Mr. G. Clark, a resident of Ellicott City, Md., and night watchman at Granite Quarry, discovered a broken rail

in the eastbound track opposite the quarry. Mr. Clark walked to Ellicott City and notified the operator of the track condition. The action of Mr. Clark, who is not an employe of the Railroad, is highly appreciated.

When No. 90, engine 4445, passed Barnesville, Md., at 7.38 p. m., on October 7, Operator F. Phillips discovered something dragging about the middle of the train and had the train stopped at Boyd, where a broken brake hanger was found under Baltimore and Ohio 169893. Mr. Phillips by his close observance possibly averted a derailment.

Cumberland Division

October 6, Green Spring. J. D. Rockwell, operator. 5.47 a. m., while extra 4402, west, was passing, he noted brake rigging down under N. Y. C. 287286. Notified conductor who removed it.

October 13, Hancock. O. J. Rash, operator. 10.09 a. m., brake rigging down, 10th car, train extra 4420, east. Train stopped at Sleepy Creek for correction of trouble.

October 16, Hancock. O. J. Rash, operator. 9.45 a. m., defective side on car in train extra 4417, east, coal falling out. Crew informed at Sleepy Creek.

October 18, Hancock. J. M. Fuss, section foreman. While between Hancock and Sleepy Creek, noted Baltimore and Ohio 224225 in eastward train passing at 3 p. m. Notified crew who found defective truck and set car off.

October 19, Martinsburg. J. L. Schroder, operator. 2.47 a. m., noted hot box on car in middle of train 4408, west. Notified crew who set car off at West Cumbo.

October 21, Hancock. J. E. Powell, brakeman. 9.10 a. m., while extra 4432, east, was passing, noted broken spring hanger on C. N. J. 48275, 10 cars from caboose. Notified conductor Ambrose who stopped train. Car set out by engine 4852.

October 30, Millers. S. N. McCullough, operator. 4.15 p. m., as extra 4419, west, passed, noticed swinging door C. C. C. & St. L. 52531, 15th car from engine. Handed conductor a note regarding it as caboose passed.

November 3, Hancock. O. J. Rash, operator. 10.17 a. m., noted car door open 35 cars from engine, contents appeared to be merchandise. Arranged for inspection at coal tipple, Sir John's Run.

November 4, Martinsburg. J. L. Schroder, operator. 5.08 a. m., noted hot box on W. M. 11494, 12 cars from engine. Informed conductor as caboose passed; car was set off at West Cumbo.

November 12, Orleans Road. C. G. Bitdorf, operator. As extra 4411, east, passed, observed wheels hot under C. G. T. 990, 28th car in train. Stopped train at Great Cacapon, where car was given attention.

Charleston Division

Brakeman Older has been commended

for interest in safety work and claim prevention.

Conductor C. A. Barrett and Brakeman D. B. Curtis have been commended for interest in saving delays to cars, by personally packing hot boxes.

Conductor C. W. Cogar has been commended also for his action in personally packing boxes and avoiding delays to cars in his train.

Engineers R. N. Jeffries and J. M. Williams, Fireman H. W. Carpenter and W. M. Malcomb, Conductor D. Bright, Brakemen M. A. Payne and H. A. Brady have received commendatory letters from the superintendent for good movement of their train under trying circumstances.

Brakeman D. Harmon has been commended for close attention and observation in handling his train.

F. E. Friend, agent, Gilmer, has been commended for close observation of passing trains.

Mr. Jobe Thayer, of Prestonia, found a broken rail and flagged passenger train 64, advising the crew, for which he has been thanked by the superintendent.

Agent R. L. Moore of Dundon, recently, through personal solicitation, secured two New York passengers who intended to use a competing line. For this he has been commended.

Engineer J. L. Davis has been specially commended by the superintendent for valuable assistance in opening the line up for traffic during recent washouts at Richwood.

Following engineers have been commended for making 100 per cent. or better in fuel performance during October, 1921: W. T. Spencer, W. T. Powell, W. E. Paisley, W. J. Johnson, H. Robinson, M. A. Henderson, R. E. Murphy, Thomas Farry, E. L. Jarrett, W. P. Paxton, R. J. Vassar, A. Morrison, Scott Mullins and A. B. Nicholas.

Wheeling Division

At 1.02 p. m., on July 30, Obie Matheny, son of Section Foreman I. Matheny, Mannington Section, while enjoying a swim at West Mannington, observed a car in a passing freight train making a peculiar noise and immediately left the water, ran to the track, and on examination found that the rail bore indications of a broken flange. He at once went to the nearest telephone booth and reported what he had found to the dispatcher, who immediately stopped the train at Glover Gap, had crew examine train and found Baltimore and Ohio car 142772 with sixteen inches of flange gone. This action which probably averted a serious accident, readily shows the interest taken in the Company's affairs by Foreman Matheny, displayed through his son. On being advised of his actions an appropriate letter of appreciation was written by Superintendent Gorsuch to Mr. Matheny, extending his sincere thanks for the son's vigilance.

New Castle Division

On October 25, while Track Foreman B. Shatto was walking along the track in his territory, he noticed broken flange on Grand Trunk car No. 76280. He signalled train crew, who stopped train and found 22 inches of broken flange on rear wheel of above car. His close observance in the safe movement of trains averted the possibility of an accident. Superintendent Stevens has written him a letter of appreciation.

Newark Division

On the night of November 12, during passing of No. 48, just east of the tower, Operator W. A. Romine, Bridgeville, Ohio, observed that there was something wrong with train or track. Upon investigation he found 4½ inches broken from ball of rail at joint. He immediately notified the dispatcher and prompt repairs were arranged for. He has been commended by the superintendent for his watchfulness and prompt action.

Operator C. I. Price, Heath, Ohio, observed something dragging while extra 2733 east was passing his tower on November 4. He signaled men on caboose and had train stopped. Inspection showed drop door on empty gondola dragging. Door was fastened up and car taken to Newark for repairs. Mr. Price has been commended by the superintendent for his vigilance and prompt action.

Cleveland Division

CLEVELAND, OHIO, November 7, 1921.
Mr. G. C. LOVE,
Conductor,
Lorain, Ohio.

Dear Sir—Understand that on November 7 you were in charge of engine 4007, west, and discovered a broken rail at Seville, Ohio. In order to prevent any other trains from passing over this, you stationed your flagman at this point and also notified sectionman to make repairs.

You certainly deserve credit for the manner in which you handled this situation and I want to commend you and assure you that I appreciate this kind of service.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent

CLEVELAND, OHIO, October 31, 1921.
Mr. M. R. REESE,
Operator,
Lake Junction.

Dear Sir—My attention has just been called to the fact that on October 13, when you were coming to work, you found the wing of frog in track just west of "CA" Tower standing open, and that you drove it back. This new spring frog was placed in the track on the previous day, but because of its being rusty and having a weak spring, it would not throw back. Also learn that you immediately notified the section foreman.

I certainly appreciate your careful observation and know that you probably averted an accident. I have arranged to place a commendatory entry on your record.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent

Chicago Division

GARRETT, IND., November 15, 1921.
Mr. CLADE BOWERS:

I have your note of November 9 stating that you notified train crew of engine 4320 of brake beam down on car; that train was stopped and the brake beam removed.

In all probability, if you had not noticed this an accident would have occurred. We desire to commend you for discovering this and the prompt action you took to stop the train.

Yours truly,
(Signed) S. U. HOOPER,
Superintendent

On November 12, Fred Eckert, second trick switchtender, West End, South Chicago Yard, played the role of hero. A woman had been struck by an Illinois Cen-

tral engine and was being tossed, when Fred grasped her and dragged her out of danger. Had he not been so quick-witted, she probably would have rolled under the engine and met death instantly. As it was she was just slightly injured. Mr. Eckert deserves much credit for his bravery. Fred has been in the service for about two years.

GARRETT, IND., October 27, 1921.

Mr. A. G. Lemert,
Operator,
Wellsboro, Ind.

Dear Sir—It has just come to my attention that on the morning of October 12, alertness and prompt action on your part in discovering hot box on car in extra east 4268, passing Wellsboro, resulted in having the car set off for repairs, thereby averting a possible serious accident.

We desire to commend you for your action in this connection.

Yours very truly,
(Signed) S. U. HOOPER,
Superintendent

GARRETT, IND., October 11, 1921.

Mr. R. W. RUGMAN,
Ticket Clerk,
Auburn Junction, Ind.

My dear Mr. Rugman—It has just come to my attention that on September 17, while train No. 9 was passing the station at Auburn Junction, action on your part averted a possible serious accident.

I desire to take this occasion not only to commend you, but to thank you for this display of interest and thoughtfulness.

Yours very truly,
(Signed) S. U. HOOPER,
Superintendent

GARRETT, IND., November 15, 1921.
S. U. HOOPER:

On November 12, at about 4.15 p. m., Track Foreman H. Culp, Indiana Harbor, noticed brake beam dragging on N. & W. 77408, loaded with coal. The train was pulling out of westbound siding at Indiana Harbor, and Mr. Culp, notified the train crew, who, with the assistance of Mr. Culp, made light repairs which permitted the train to proceed with but little delay.

Yours truly,
(Signed) F. D. BATCHELOR,
Division Engineer

Toledo Division

On October 21, while riding in tool car with wreck train coming from Carlisle, R. O'Neil noticed broken arch bar on train extra No. 4554 that was passing. He signalled Conductor Coats, who stopped the train. The trucks were changed and Mr. O'Neil took the defective car to Dayton. A complimentary letter has been sent to Mr. O'Neil by Superintendent Mann. The accompanying picture shows the broken arch bar.

Broken arch bar detected by R. O'Neil

Mr. W. H. CRIST,
Chief Dispatcher,
Dayton, Ohio.

Operator C. Morris, Wayne Avenue, noticed something dragging on No. 55's engine going by. He notified conductor at depot and found brake rigging down. He also noticed brake rigging and beam down about 15 cars from caboose on Big Four 6009, west, following No. 55. He stopped them on bridge and found brake beam down and in bad shape. This would have caused a derailment at Miami City or going through bridge. Good work for this operator.

(Signed) G. E. REEL,
Dispatcher

Ohio Division

After the distribution of the August issue of the MAGAZINE, in which mention was made of the assistance rendered a sick passenger on No. 12, July 11, by Miss Lula Werring of Lowell, Ohio, it was brought to our attention by another employee, that brakeman C. S. Roberts, on duty on this train, also rendered valuable assistance to this sick passenger. After train departed from Chillicothe, while passing through the coaches, he observed her condition and immediately offered his assistance. As the sick lady continued getting worse, he accompanied her to the Pullman, where she was given a berth in the drawing room by the Pullman conductor. After Miss Werring offered her services and Brakeman Roberts saw that the sick lady was being taken care of, he sent a telegram to the relatives notifying them as to her condition, doing this at his own expense. He has been commended for the action taken and for the assistance rendered.

On October 9, while extra 2862 was passing through Blanchester, Crossing Watchman "Tim" Ludden, called conductor's attention to brake beam down on one of the cars. By the time air was applied and train stopped, car with brake beam down was passing over the crossing and had torn several crossing planks loose. Action taken by Crossing Watchman Ludden in this instance indicates that he has the interest of the Company at heart. He has been commended.

Epigrams of W. C. Bowhay

Special Agent

Did you ever see a man make use of the tin foil he saved? Neither did we.

The first talking machine was originated in the Garden of Eden, but "Tom" Edison copped the credit.

A number of widows realize that Hubby's obituary was more beautiful than truthful.

Many a true heart beats beneath a dirty shirt, but somehow the girls don't seem to discover them.

When the 1921 model June bride finds the green lines made by the lavalliere charm he gave her, the honeymoon is embalmed.

When you look at some girls' husbands it's easier to believe that a woman doesn't know what she wants.

Lying may not get you anywhere, but it often keeps you away from places you don't want to visit.

If there is some good in the worst of us then there must be some honey in a garbage can, but it takes a "durned" good bee to get it out.

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department

Correspondent, GEORGE W. HAULENBECK

Merry Christmas!

If at any time the present Law Department correspondent of the MAGAZINE should relinquish his pen, J. Ronald Horsey of this office is hereby nominated to succeed him. Mr. Horsey, secretary to Charles Radley Webber, is always cheery in his manner. He says he reads the Law Department contribution to the MAGAZINE first, and then he follows Mr. Young's practice of making a commendatory observation regarding it, that is, if the contribution calls for it; a sort of putting yourself in the other fellow's place. Such treatment is buoyant. Mr. Horsey's newspaper letters are worth reading. I find them in the Sun and in the News, and he is not afraid to sign his name.

The Ticket Supply Department

In my meanderings about the building I have run across the Ticket Supply Department on the first floor. J. E. Beatty is in charge, and it is proper that his work be placed upon the front page, so to speak. His force of eight workers carry out the practice of getting business for the Baltimore and Ohio whenever possible, and this is Mr. Beatty's custom on all occasions. Moreover, it is his custom to vacate an eligible seat to a pay passenger on our trains, whenever required. He says he feels better after doing it.

Yes, thank you, the Law Department is still at it, winning cases here and there, and losing very few. It might have some leisure if it were only possible to check litigants from plunging into court and giving us worry and trouble. And then too, litigation is expensive. This is a thing the litigant realizes afterwards.

Now that we are well launched for the winter's work, battling for the Baltimore and Ohio, let us get down to business and to our best. A young gentleman on the Staten Island boat the other Sunday told me that he always reads the Law Department's contribution in the MAGAZINE, and some of my friends away out in Chicago do the same thing, so with an audience extending along our entire line I am inclined to sermonize just a little.

I think we ought to keep at the work of getting business for the road whenever we can. In the diner on No. 503 from New

York, on last Sunday night, I made it clear to my *vis-a-vis* that our equipment was of the best; that our scenery is unexcelled, and that I set my watch time and again by the running of our trains.

I wish I had seventy pages of space instead of three in which to expand on this very topic.

Office of Vice President, Operation and Maintenance

Merry Christmas!

J. C. Wilkins was born April 1, 1890, Baltimore, Md., ("Goose Hill," now "Webster Heights"). Spent most of his boyhood days in the vicinity of Ferry Bar and Back River, where he learned the art of swimming, which later assisted him in winning the State Championship (1910).

Entered the service of the Railroad in 1916 and has steadily won promotion until he attained the sublime degree of inspector Fuel Service.

Mr. Wilkins was a member of the American Expeditionary Forces, located in Chillicothe, Ohio, and while in the army cultivated a rare taste for *Beans*, and it is understood that in anticipation of the recent car shortage, Mr. Wilkins stocked his larder with sufficient of his favorite vegetable to last through the winter months.

Mr. Wilkins and Fuel Distributor C. N.

J. C. Wilkins, fuel inspector

Beyerly, are dancing masters of rare ability, having served as dancing instructors at Gwynn Oak Park and Riverview, respectively. However, it might be here stated that while they are both masters of their own line, both differ, in that Mr. Wilkins' instructions are of the cake-eating variety, while Mr. Beyerly's are of the classic.

Mr. Wilkins is honored by a wife and one son.

Car Service Department

Correspondents,

J. T. LEAN and H. V. OBERENDER

The correspondents take this opportunity to extend to our department a Merry Christmas and a Happy and Prosperous New Year.

We claim to have the best bowling team in the league, barring none. Our record at the time this note was presented for publication shows how we stand. The team has rolled 30 games, has an average of 480.9 pins per game. The team is nobly manned by Bortner, captain; Donald, Guerke, R. O. Smith, J. T. Lean and Bryan, five of whom constituted the regular team. The lowest individual average for the team bowler is 96.4 for 26 games. R. O. Smith has the highest individual average in the league for three games, it being 115.3 pins.

Misses Marie Bopp, Aline McKnew and Mrs. E. Weller, returned from their vacation a few weeks ago after thrilling experiences. They travelled to Miami Shores by rail and returned from Savannah by water. They struck a storm and the captain asked them if they wanted to get off at Jacksonville or keep on to Baltimore. "No, captain," they said, "We'll brave these storms all the way." All they saw on the trip was their stateroom, nor did they eat any meals. They enjoyed the trip through all of this.

Wedding bells have been ringing in this office quite frequently here of late. Carl Wolf joined the ranks of benedicts on October 19. The office presented him with a beautiful mahogany clock.

Hartman Barber and Miss Mamie Price surprised us all when they let us know that they had been secretly married at Alexandria, Va., on September 18, 1920. Well, Hartman, old boy, you certainly did fool us all.

Harry Bredehoeft, another one of our local record clerks, journeyed to New York on November 14, where he was married. He will spend his honeymoon at New York and Niagara Falls.

Miss Edith Weickert recently resigned from the service to be married on Thanksgiving Day.

Best Wishes to the brides and grooms!

It is with regret that we learn of the death of Mr. Owens, father of Miss Mercia Owens, one of our foreign record clerks.

We are glad to have George McClelland, clerk, Demurrage Bureau, with us again.

Mrs. Pearl Murray has recovered from a recent operation and we hope to have her back with us very shortly.

Miss Ruth Norris, one of our local recorders, recently resigned from the service to accept a position in Washington. We wish her luck.

"Robbie" seems to think this is daylight savings time or else he has something on his mind. The other day he started out to lunch at 11 o'clock. Evidently he was hungry.

Oh, you Engineering Department!

Our Mr. Wette, trace clerk, recently celebrated his 40th birthday. He was kindly remembered by his fellow clerks, who presented him with many useful gifts.

Engineering Department

Correspondent, OSWALD EDEN

To the members of this department, and to the other employees of this great system, I extend the heartiest of best wishes for a Merry Christmas and a Happy New Year. Let us all be thankful that we have all been spared through another year. Let us look back over the past year and try to point out to ourselves where we, individually, fell short of our ideals. Let us, on the morrow, 1922, make a resolution that we will try to do each task that is assigned to us a little better than we did the year before.

Boys, don't go gunning! I tell you 's no use! Milton Fleagle shot 'em all on Armistice Day.

No mention has been made in the preceding issues of the MAGAZINE concerning the two bowling teams that represent the engineering department. At this writing, November 14, the engineer of buildings' team has played 30 games, winning 19 and losing 11, with a percentage of about 632. The chief engineer's team has also played 30 games, although only winning 17 for a percentage of 566. But look out, E. of B.! The C. E. is after your scalp, as are the rest of the teams who come between them and top place.

"Spike" Schanze will hereafter be known in these columns as "Count." We want to please him, as he imagines that his blonde mustache disguises him. It has now been growing very steadily for seventeen months and can be seen with the naked eye at a distance of five feet at mid-day (when the sun is shining bright).

When "Jerry" took his vacation the office was as quiet as a church mouse.

One of our "engineers" has been recently hard at work preparing his property for the coming winter. He hid himself down to the local office of a nationally known roofing company, purchased several large buckets of tar, and armed with a large

brush, set out to cover the roof. His first ascent was made under somewhat adverse weather conditions; the wind on that day being quite high. After he had passed over the cornice via a ladder, he heard a loud crash. Looking around and down he discovered that he and the ladder had parted company, for far below on the sidewalk he saw that which had made his ascent possible. His hair stood on end. Why? Because he was marooned on the roof and there was not a trap-door in sight, that is, not on his side of the street. What was he to do? Ah-ha! A thought struck him. The faithful spouse was in-doors, but if she knew of his predicament she would rush to his assistance. Leaning over the edge of the roof he yelled with all his might "OH WIFE! COME 'ERE QUICK!" Thereupon the expected happened. The door flew open and a feminine figure rushed out, gazing skyward. "Yes Dear," floated upward to our hero. A "Romeo and Juliet" scene then followed, after which the "engineer" lowered a rope (which his fairy god-mother had sent up with him). Friend wife tied the rope to the ladder, our hero pulled it upward, came down by way of the ladder and the two of them lived happily ever after. (Note—Farbeit from my disclosing your name, Alvie—Correspondent.)

"Field work" on a Saturday afternoon during the "fall season" turned out to be quite profitable for a number of people in our office.

September was a banner month in our department so far as "Pa" Stork was concerned. To Mr. and Mrs. J. Ford Collison he brought a baby girl; to Mr. and Mrs. J. E. Burke he brought a baby boy; to Mr. and Mrs. R. H. Bell he brought a baby girl. Uncle Sam is deprived of more money. Congratulations have already been passed around.

And she says she is not in love. Ask Miss Delahay what was uppermost in her mind on the day she paraded up Charles Street with her work apron on—and on the morning that she got off at the 12th floor and wandered around trying to get her bearings.

At this time of the year thoughts turn to animated Christmas gardens. We wonder how many of the proud fathers of the engi-

neering department will follow the examples of last year set by Messrs J. E. Schueler, J. W. Linnbaum and a few others. "Joe" Kemp should certainly be in this class this year.

Who is the "sweet young thing" that M. T. generally meets during his lunch hour at the Charles Street entrance?

For some time J. Ford Collison, correspondent, district engineer Mather's office, sported a "rum blossom." We know the pain must have been intense while you had it, Ford, and we sympathize, but honestly you looked so cute with the added ornament that we could not help but comment on it.

"Mrs. Nellie Meyers Hunter, daughter of Dr. and Mrs. S. N. Meyers, Martinsburg, W. Va., was married yesterday in Washington to Captain Richard Stuart Hunter, Winchester, Va., and Baltimore, son of the late Major Robert W. Hunter. The ceremony was performed by the Rev. Dr. Charles Wood, pastor of the church of the Covenant. The bride was given in marriage by her father, only the immediate families being present. The bride was the widow of Edmund Pendleton Hunter. Captain Hunter is a graduate of the University of Georgia, and for 20 years had been chief bridge inspector of the engineering department of the Baltimore and Ohio Railroad. After an extended wedding trip Mr. and Mrs. Hunter will be at "home" at the Gilman Apartments."—Baltimore Sun, November 13.

The members of the Engineering Department extend their congratulations.

"What was the matter with the Engineering Department?" was one of the few queries flung at me a few hours after the October issue of the MAGAZINE had been received and distributed. It is no easy job to keep track of a hundred or more persons scattered all over the system. To those who have, I quote below a little poem taken from the Water Tower:

If you have a bit of news, send it in;
Or a joke that will amuse, send it in;
An incident that's true,
A story that is new,
Or a photograph or two—send it in.

Will your story make us laugh? send it in;
Never mind about the style,
If the story is worth while,
And may help, or cause a smile, send it in.

Grateful acknowledgement is made to those who have from time to time contributed to this column, and who have also helped me in putting our department "on the map."

Freight Tariff Bureau

Correspondents,

F. W. RUPPERT, C. A. WAGNER

To all readers we extend our best wishes for a very Merry Christmas and a Happy New Year. It is our sincere wish that business soon goes back to pre-war volume.

We have a bright outlook for the future so we should all join in the Christmas Spirit, laying aside our troubles and worries to make merry for the most wonderful season in all the year.

GOOD LUCK TO ALL! Correspondents,

Freight Tariff Bureau.

A poet in our midst!

October

October, Oh October, you're as lovely as the May,
The mocking birds and cardinals are with us every day.

The woodpeckers are tapping at the willows
in the lane,
The flowers blooming just as if old Summer'd
come again.

(Second Spasm)

The gray squirrel comes a hopping, his
bright eyes seem to say,
"I wonder if the lady has a nut for me
today."
The butterflies are dancing in the garden all
day long,
The cricket in the evening chirps his cheery
little song.

(Grand Finale)

Our coal is in the cellar, eleven tons or more,
And we don't care how soon J. Frost comes
rapping at our door.

C. C. S.

We feel for you, Mr. Schwartz, but we
fear it is a gone case.

More Bunk

To Miss———
Her cheeks like mirrors
Do reflect the tints of radiant roses,
Her lips the bloom of cherry blossoms in
merry month of May.
The star shine in her eyes reveals the sky
blue color,
She is delight; I have no more to say.

(Inspired)

Dear Readers—There is no sense to the
above nor does it sound like poetry, but the
author says he can do much better, al-
though up to the present all the rest has
been worse.

N. E. O.

We feel it our duty to extend sympathy
to John F. Hager and his great nightmare,
a Hupmobile. At anytime whatsoever one
may find said "Hup." in repair shop, under-
going an operation of some sort for the
popular automobile diseases. I appeal to
the employes of the Tariff Bureau and their
sense of humanity to make an ante for the
purpose of presenting Mr. Hager with a
regular car, possibly a Ford, if we can
"a-ford" it.

The following is list of members of Duck-
pin League representing Tariff Bureau:

M. E. Prenger, E. M. Hoos, F. E. Heisey,
B. E. Miller, F. W. Ruppert, M. I. Zimmer-
man, W. P. Roberts, E. J. Lynch, W. N.
Oren, G. Herschel and R. F. Mullinix.

Although they had a bad start, losing
each and every game, in their last set-to,
they won by a great margin. Their oppo-
nents did not show up. (Forfeit) (Great
players, these.)

As had been predicted, Chester was set
to St. Louis to O. K. some proof on a certain
tariff, but he left his better half at home,
forgetting he had proof in Baltimore to at-
tend to.

When last mentioned proof was received
and data could not be found, it was learned
he had carried the dope along with him, but
we accepted his apologies, as it seems he
was just recently married and had not as
yet got his full mind down to tariff work.
However, the wires were kept hot with
Lew's information on the subject.

We regret very much the death of Mrs.
Sarah Kernan, inother of William J. Kernan,
one of our esteemed clerks.

Mrs. Kernan died on October 26, after a
long spell of sickness.

The sympathy of the office was expressed
and a floral design presented in token of
our sorrow.

Our Honor Roll

On November 15, Lindsay L. Bawzel,
rounded out 35 years of service with the
Railroad, having entered the service on
November 15, 1886, as a clerk at Mt. Clare

Freight Station. On April 4, 1901, he was
transferred to the Tariff Bureau; in 1902 and
1903 he served as a member of the House of
Delegates at Annapolis, Md.

Mr. Bawzel is one of our oldest employes
and has given the best of service throughout
his whole career. We congratulate him
and wish him the best success in the many
years we hope he will remain with us.

Fuel Agent's Office

Correspondent, P. L. EBAUGH

Merry Christmas!

Thomas H. Moore, chief clerk to Fuel
Agent, has returned from a recent cruise on
the Great Lakes, on the "palatial" Steamer
Denmark. Incidentally Mr. Moore has
rounded out over thirty two years of service,
and he has our best wishes for many more
years of usefulness among us.

A certain young lady of our office has
been going weekly to the Peabody Institute
for piano lessons. We can all look forward
to having a Miss Paderewski in our midst.
Keep it up, Jennie.

It has lately been customary that when-
ever the team representing our office in the
bowling league won a game some one treated
the members of the team and their ladies.
We are not mentioning any names, but one
J. R. S. should take notice that his turn is
about due.

J. A. S. recently announced that he was
having trouble in sleeping at night. We
suggest as a cure that he try walking the
floor with it.

Mail and Express Traffic Department

Correspondent, T. E. REESE, Chief Clerk

Merry Christmas!

On Saturday evening November 5, a
party in honor of the "bride and groom"
Mr. and Mrs. George M. Gorman, was given
at the residence of J. C. McCahan, Jr.,
manager, Mail and Express Traffic Depart-
ment. Mrs. Gorman was formerly Miss
Jewell R. Hilton, secretary to Mr.
McCahan.

— "E.M.B." IS AN ENERGETIC SEEKER
AFTER A CERTAIN CARTOON-MAKER —

Pictorially speaking in the Valuation Department

Entertainment was planned by Mrs.
McCahan, to whom all are indebted for a
most enjoyable evening. Decorations were
composed of autumn leaves and chrysanthemums which were artistically arranged.
Miss Mabel H. Cross accompanied by Miss
Margaret McCahan, sang "Perfect Day"
and "At Dawning;" Mr. David E. Green
gave several of his comic recitations; saxo-
phone and clarinet duets were played; the
"groom" performed several new sleight-of-
hand tricks; Mr. Glen McCahan gave a
violin solo accompanied by Miss Kissling.
Refreshments were served; followed by a
dance and games.

Those present from the office were:
Misses Cora E. Rhodrick, Mabel H. Cross,
Hilda M. Spedden, Virginia L. Kennerly;
Messrs. R. W. Allison, David E. Green and
wife, T. E. and Mrs. Reese, and numerous
others.

After such a delightful evening the ques-
tion "Who will be the next?" was unani-
mously raised.

Telegraph Department

Correspondent, DELLA M. HAIN

To the Officers and Employes of the Balti-
more and Ohio Railroad:

I take this means of expressing to you
my best wishes for a Merry Christmas and
a very Happy New Year. I also desire to
thank you for the many expressions of
sympathy and good cheer received during
my illness, which covered a greater part of
the past year. These acted as a stimulant
and had much to do with my ultimate re-
covery.

As to the business outlook of the future
—many of the misunderstandings, with their
subsequent difficulties—seem to have been
cleared away—and I am optimistic as to
the results to be obtained in 1922. Full
steam ahead!

C. A. PLUMLY,
Superintendent Telegraph

Transportation Department

Correspondent, L. K. BURNS

Merry Christmas to Everybody!

The condensed schedules recently passed
out by W. B. Calloway, passenger traffic
manager, when he gave us a little talk re-

garding the boosting of passenger business between here and New York, seem to be bringing forth results.

A few weeks ago Travelling Car Agent Molz handed one of these condensed schedules to a friend at his club, who, he felt, could make use of it. About a week later, while at the club, Mr. Molz overheard a little argument between the man to whom he gave the schedule and another as to what line should be used to New York. The party to whom the card was given certainly gave the Baltimore and Ohio a boost, and through his persuasion, won the other fellow over to at least give us a trial. We feel that the trial will be a means of his using our line from now on between Baltimore and New York, as well as between other points.

Misses Blase and Jones, representing the Transportation Department, attended a meeting of the Near East Relief, at which a motion picture "Alice in Hungerland" was shown. This picture, together with the talk given by Mrs. Florence Duryea, national director of the Woman's Division of the Near East Relief Committee, brought home to those present the suffering of these people through sickness and starvation. Our department responded very generously to the appeal, \$75.00 being raised.

Three of the young ladies of this department, viz: Misses Clark, Foster and Kepler, are taking a course in business English at the Polytechnic Institute.

George Loeblein continues to make purchases—this time, however, it was not a dog license but a pair of shoes. After bringing the shoes home George discovered he had bought a pig in the bag, for close examination developed that another person had worn these shoes over some rough roads. Loeblein, with a delegation from the office, went to the store and had the money refunded, but only after a hot debate in which George showed the store-keeper that some cinders were embedded in the soles of the shoes.

We had a surprise sprung on us when our friend Genevieve McCann informed us about the last of October that her name had been changed about ten months ago. Yes, she is now Mrs. A. W. Kabernagle, they having been married in Philadelphia prior to Mr. Kabernagle's leaving on a voyage to South American and European ports.

Mr. Kabernagle is at present an officer of the Merchant Marine, having served during the war in the United States Navy. He is a graduate of Baltimore Polytechnic Institute as well as the University of Pennsylvania.

During the time the former Miss McCann was with us she made a host of friends and the absence of her smiling countenance is felt by all. Our best wishes have been expressed to Mr. and Mrs. Kabernagle through our presenting them with a sterling silver carving set and six salad forks.

In this group are Mrs. F. N. Daugherty, wife of special representative; Operator F. J. and Mrs. Demmer and their young "skipper" about to start on a fishing party.

Timber Preservation Department

Mt. Royal Station

Correspondent, HARTMAN BRIGHT

To the Employees of the Timber Preservation Department:

May your Christmas be a merry one, and the New Year find you in the full enjoyment of health and happiness—is the sincere wish of

Your friend and co-worker,

(Signed) F. J. ANGIER,

Superintendent

Auditor Disbursements

Correspondent, JOHN C. SVEC

Merry Christmas!

Miss Coster, our efficient stenographer, spent Armistice Day visiting her parents at Solomon's Island. She reports that ducks are growing feathers and most rabbits fur, which would seem to indicate a severe winter.

The accompanying picture is of Miss Anna A. Fitzpatrick, John Doyle, Miss Bessie M. Cusack and H. R. Meagher. From expressions it looks as though all are having a splendid time.

Office of Auditor Merchandise Receipts

Correspondent, P. HENRY STARKLAUF

The operative on Desk 4 dotes on this one—A very learned Englishman arriving in this country was about to put up at an inn where an old war-darkey was hostler.

The learned Englishman, feeling in a happy mood and wishing to have some fun at the darkey's expense, addressed him as follows:

"Extricate my quadruped, stabulate him, give him a sufficient quantity of nutritious ailment and when the aurora of dawn shall again illuminate the Oriental horizon, I shall reward thee with pecuniary assistance. At the same time you will oblige me by elevating your golgotha to the summit of your perecranium and make yourself familiar with that mode of egress, namely—the door of my apartment."

The darkey was quite overcome and rushing in to his master, he exclaimed, "Master, there's a Dutchman outside and he can't speak a word of English."

Weddings

Miss Florence E. White to J. Wilbur Fishpaugh, Revision Division, September 17, at the parsonage of the Hamilton Presbyterian Church by the pastor, Rev. L. S. Reichard.

Miss M. Vertalee Nieman, Interline Division, to Mr. Thomas McCusker, deputy United States shipping commissioner, at the home of the bride, October 26, by the Rev. W. F. Sauer of St. Ambrose's Church.

Miss Margaret Reinhold, Interline Division, to Mr. Clarence Sutch, November 12, by the Rev. B. F. Hynson of the Rogers Memorial Church.

A traveller on No. 1 on last Christmas eve, recently telling me of his varied experiences, said that shortly before midnight as train was proceeding under slow orders, it being quiet in the sleeper, he heard someone remark "Look at that, isn't it beautiful?" There on the mountain side somewhere between Clarksburg and Parkersburg, in the moonlight, was the Community Christmas tree with the assembled villagers singing the old, old Christmas Carols. Who can say where this was? At any rate, the traveller enjoyed his trip on the Baltimore and Ohio.

Oh, you rivals! Auditor Disbursements Office

Your correspondent was a passenger on No. 15, Cumberland to Pittsburgh, Saturday afternoon, October 1. Somewhere about Markleton Sanatorium, a young mountaineer girl got on with her brood of three. The gallantry of the conductor in assisting this young woman in finding seats, getting her children settled, and of the "brakie" in keeping his eye on her comfort and carrying the little tots off the train at Connellsville, caused many a passenger to take note. Your correspondent's attention was attracted by a fellow traveller who said, "What fine home men that crew must be," and there wasn't anything for me to say but "I'll tell the world they are the goods all right." So I'll tell 'em! To you and your crew, Cap'n S. M. Hebb, we extend our best wishes that you live long to so well represent the Baltimore and Ohio.

Quite evident that our passengers are still our guests.

Irving M. Hudgins, head clerk, Revision Department, is looking quite large, fine and handsome nowadays despite the fact that he is eligible for membership in the "Vets," rounding out 20 years service on October 18. Congratulations "Irv.!" (Lamped again.)

The spirit of our organization is one of "creating an atmosphere." Good fellowship should prevail and, with team work, results will come. This is Baltimore and Ohio spirit but should be felt and manifested at all times. Sincerest wishes for a Merry Christmas and a Happy New Year!

New York Terminals

Pier 22, North River, N. Y.

Correspondent, FRANK A. J. MANTHEY

We are again approaching the Christmas time. There are many things that we railroad employes, part of a great country's greatest machine, have to be thankful for. America's ideal is a true Democracy—a free nation built upon free labor—a country in which every man has a chance, and knows he has it. Work in this country is dignified and noble. Idle people of any class are despised. They menace the welfare of their fellow men. "The life worth living is worth working for."

In other countries, with social unrest, governments tottering and the "Red" propaganda of destruction everywhere, our fellow men have been less fortunate than we. America offers civil liberty to all, and with it an established and sturdy government insuring protection under the law to every citizen. Workers are compensated according to their ambitions. They are not suppressed, and special favor is the exception and not the rule. A year of adversity with us has been better than the best year in other countries.

The upward road is open to anyone. Men like Andrew Jackson and Abraham Lincoln, born in poverty, were able, by work, to become great presidents and great benefactors, and we should be thankful that every honest, earnest man has the same opportunity. The correspondent takes this opportunity to bid everyone in this division A Merry Christmas and A Bright and Prosperous New Year. He also thanks those who have so generously aided in preparing our monthly letters for the MAGAZINE.

Merry Christmas!

Staten Island Lines

Correspondent, G. J. GOOLIC

Merry Christmas!

The Second Annual Ball of the Employees' Mutual Benefit Association of the Staten Island Rapid Transit Railroad, was held recently at the Stapleton Club Rooms, Stapleton. The hall was crowded and was beautifully decorated. The stairs leading into the dance hall were draped in trimmings of white and gold, while the dance auditorium took the crowd by surprise when they entered. Every nook and corner was covered with white and gold decorations, and along the walls were large clusters of colored lights. The large stage was set off with ferns and palms and behind these all the latest dance hits were rendered by Capt. J. J. Price's full orchestra.

During the dances, song hits were rendered by Peggy O'Neil of New York, who had to respond to many encores.

The following were in charge: B. F. Kelly, president; E. E. McKinley, vice-president; J. B. Sharp, treasurer; G. J. Goolic, recording secretary; J. V. Costello, corresponding secretary.

Executive Committee: J. F. McGowan, W. P. Slattery and C. Wynans, Jr.

Floor Committee: F. T. Metcalfe, chairman; W. J. Raburn, H. Miller, H. Schneider, J. V. O'Reilly, C. Donnelly, W. Connell, F. Rebhan, D. McMullen, J. Trainor.

Reception Committee: E. J. Hamner, chairman, J. D. Gibb, J. L. Suesserott, E. Van Name, W. L. Dryden, A. L. Mickelsen, W. A. Deems, A. J. Conley, E. A. English.

Arrangement Committee: W. P. Slattery, chairman; G. J. Goolic, J. J. Lestrangle, J. B. Sharp, L. R. Van Horn, A. Roring, J. V. Costello, J. F. McGowan, H. W. Orde-man, P. Santoro, J. W. Turner.

Miss Helen Decker of Long Neck was pronounced "Queen of the Hot Dog Roast"

Conductor C. H. Bards and Extra Conductor C. H. White

held in that town, Election Night, November 8. Everything is hot-dogs with her now.

Fred Knaeble, clerk, Car Accountant's Office, has returned to duty after an extensive vacation trip throughout the South.

Miss Madaline Graebe, Lighterage Department has fully recovered from a nervous breakdown.

The friends of Mrs. K. O. Purcell extend their heartfelt sympathy in the loss of her father.

There is a certain young fellow at Pier 6, St. George, who roots for a first class foot-ball team from Port Richmond, which books, however, only second-class teams. His brother is on this team.

Trackman "Nick" Vitali is receiving congratulations over the arrival of a baby boy.

Clifton, Staten Island

The accompanying picture is of the Stores Department office force at this station. Reading from left to right we see: R. A. Mullings, clerk; W. G. Traister, division storekeeper; Eva Runnow, stenographer; M. M. Williamson, chief clerk; A. H. Anderson, clerk; L. Blake, clerk; A. W. Godfrey, clerk.

These make an efficient "crew" to handle the important work of issuing material.

B. F. Kelly, trainmaster, Staten Island, Mrs. Kelly, and their children, Bernard and Patricia

Baltimore Terminal Division

Agent's Office, Camden Station

Correspondent, W. H. BULL

We wish to extend to our forces hearty good wishes for a Merry Christmas and a Happy and Prosperous New Year.

(Signed) W. E. NEILSON, Agent.

P. J. TRUESCHLER, Asst. Agent.

Assistant Agent and Mrs. P. J. Treuschler are receiving congratulations from the office force and their many friends. Santa Claus, working overtime, and in the guise of the stork, has left them a fine boy. Mr. Treuschler's family is a growing one; it now numbers six, himself, wife, two boys and two girls.

The same old Santa Claus made an early visit to the house of C. E. and Mrs. (Emily Brown) Davidson, and left a daughter, who will be named Frances Arlene. Congratulations!

Bauernschub is telling some of our stories pictorially on the next page. Be sure to look them over and watch for others in future issues.

These cartoons put Camden on the map with other stations who have been telling their stories in pictures.

Superintendent's Office

Merry Christmas!

Boy, page Sherlock Holmes— Camden Station has a mystery that will go down in fame with those unanswerable queries "Who hit 'Billy' Patterson?" and "How old is Ann?" Our curly headed "Nick" Carter has turned Nimrod, and recently ventured into the wilds of Howard County in search of game, and, incidentally, a Sunday dinner. Next time we saw our "Nick" he acknowledged bagging one rabbit. Now we have the word of a certain gentleman (name furnished on application) that "Nick" could not hit the side of Camden Warehouse at twenty paces. Now for the mystery: How did Brer' Rabbit meet his end? Did he, with remarkable eyesight, see "Nick's" funny little mustache and laugh himself to death, or did he stumble over "Nick's" feet and break his fool neck; or did he die of untimely old age? Still again, far be it from us to cast aspersions at our gunner's veracity, but we saw bunnies on sale in Lexington Market for four bits per one.

Stores Department Force, Clifton, Staten Island

Mount Clare Shops

Correspondent, MISS MOLLIE ALBRECHT
Secretary to Superintendent

Merry Christmas and Happy New Year!

All Mount Clare employes join me in wishing our fellow-workers over the system

OH! HOW I WISH I COULD SLEEP DAVIDSON.

the happiest holiday season they have ever had! Funds may be slim this year, but we are all full of the holiday spirit, nevertheless, and we want you all to feel the same as we do!

Welfare News

The Mount Clare Welfare, Athletic and Pleasure Association opened the winter

NO USE OFFICER. KNOW DON'T BELIEVE IN SIGNS -

season with a carnival and dance at the new Lithuanian Hall, Hollins and Parkin Streets, on November 10. There was fun enough for all! The young men (with their ladies, of course), had the music to make them "shake their feet," and confetti to make them shake their heads and shoulders, so they were kept happy. The kiddies and "dads" had the ice cream and soft drinks to fall back on when the music held no more charms for them, and the "Mrs." has the drawing for the ham, 1/2 barrel of flour, 50 pounds of sugar, and the aluminum ham boiler to keep her busy. A little bit of entertainment was furnished by several members of the Wampole family, which was enjoyed by young and old alike. Now that the Welfare is in full swing again, we are looking forward to lots more entertainments, minstrels, and dances, so it's up to you, Mr. President, to give us what we want!

Tool Department

G. F. Kline, supervisor of shop machinery and hand tools, was married during September. We wish to extend our congratulations and best wishes, (although we think you have lots of nerve getting married right now, old dear, with everything so "turribly" high)!

SILVERMAN'S EIGHT-HOUR DAY NOW A THING OF THE PAST.

SIMPLY OUTCLASSSED

You will recognize some familiar faces about Camden Station in the above

Charles Weiner, assistant to surgeon,
Mt. Clare

Doctor's Office

The accompanying picture is that of our old friend Charles Weiner, assistant to the surgeon, Mt. Clare Shops. Charlie entered the service on February 1, 1910, as painter's assistant, under Mr. Wright. He served faithfully in this capacity for about six years, after which he left to take up his present duties as assistant to the surgeon at Arlington Avenue Gate. Here he is ready to attend to your cuts and bruises in a cheerful manner, and to remind you that "it might have been worse," or "50 years from now you won't know anything about it." He is well liked by all and is one of the famous Mt. Clare trio, Stempler, Garber and Weiner.

Drawing Room

Another boy has come to the household of W. R. Hedeman, to salute his "daddy." When Baby Hedeman looks up and sees his dad, he'll sure know that he is going to get up high in this world! Congratulations, Mr. Hedeman!

Little Miss Connelly is back with us again, and we are glad. Miss Connelly hasn't come in with her hair waved recently so she must be sure of the fellow. How about it, Miss Connelly?

"Els" Demitz is still with us, with her numerous love affairs. We don't need an "Aunt Ada" at Mt. Clare. Just go to "Els," and she'll give you advice. Good, sound advice, too. Try it once, and see!

Superintendent's Office

We are not at all surprised to see the rain today. Davis managed to get in early the other morning and was presented with a bouquet of flowers! We haven't found out yet whether or not the fragrance of the flowers drew him to the office earlier than usual, or whether the "Mrs." forgot to get his breakfast!

Now, if somebody would put flowers on my desk, it might bring me in at eight o'clock! You never can tell!

Gilbert and Curtis Raeuchle

Flue Plant

The accompanying picture will give you an idea of what kind of sons our men have. They are Gilbert and Curtis Raeuchle, sons of our Flue Plant Foreman. As you will note, they are quite able to "sit up and take notice."

Locust Point

Correspondent, ROSS GOULD

Merry Christmas!

On studying the accompanying picture very closely one would naturally fall into the error of supposing that the upper figure represented Lord Keddeston and the lower the Shah of Persia, the picture being taken on His Majesty's Imperial yacht. I regret however, to disillusion you on this matter, dear readers. The picture was taken on a steamer lying at Pier 9, Locust Point, and features two of our World War Veterans, members of the A. E. F. and incidentally clerks of the Baltimore and Ohio at Locust Point Freight Office.

You will no doubt notice the difference of expression on the faces of these two gentlemen. The upper one, that of John F. Pringer, registers annoyance; the lower that of J. Deschef, pleasure, indicating "She looks good to me." It is evident they were intently watching one of the fair sex when this was snapped.

Mr. Pringer's social engagements take up much of his time; in fact it has been rumored that he contemplates employing a social secretary to keep account of his dates. Mr. Deschef is better situated, he now has a secretary in the person of Mrs. Deschef; she will also have as an assistant, the young gentleman represented in the picture

Louis de Goey

on the Children's Page, "Jack" Deschef, (aged 1 year) who will help to provide "indoor sports" for his daddy.

The barn at the old homestead of our fellow clerk, James Dudley, was the scene of another glad gathering of the clerks and their friends at the barn dance given on Hallowe'en night. Some of the costumes were original. The burlesquers were there in full force, especially "Jim" Turner and L. DeGoey, who were masked as Uncle Tom and Little Eva. F. Berghoff made a hit as the Slim Princess.

The wife of our fellow clerk, J. S. Monaghan, is again in the hospital. We all wish her a quick recovery.

"Full many a gem of purest ray serene
The dark unfathomed caves of ocean bear.
Full many a flower is born to blush unseen,
And waste its sweetness on the desert air."

Thus we take pleasure in introducing to our readers Louis B. DeGoey, the gentleman in the accompanying photograph, and who now occupies the position of assistant to Chief Claim Clerk Brower, at Locust Point Freight Office.

His innate modesty and retiring disposition (not unlike the modest violet) have retarded my efforts in presenting him ere now, by by consistent efforts, and the help of friends, we have at last succeeded in getting his picture.

While it is a good likeness, it fails to portray the many fine qualities of the man as we know him and that we have discovered since our association with him.

"By your works ye shall know them" is well exemplified in the person and character of Mr. DeGoey, a loyal employe, a faithful friend and a Christian gentleman, one who is always seeking to benefit his fellow men. He entered the service of the Baltimore and Ohio, Chase's Wharf, in 1878. Since that date his loyalty to the Company has been unquestioned and his duties have been performed with conscientious fidelity. His pleasing personality has endeared him to us all, and we sincerely hope that we may be permitted to enjoy many more years of his companionship. He is a member of the Veterans' Association and takes great interest in the deliberations of that body.

Business is slightly better with us but we can stand a whole lot more!

John Pringer and J. Deschef

Office force of yardmaster, Mt. Clare

—Photograph by Brakeman L. C. Piper

The accompanying picture is of the Yardmaster's office force at Mount Clare Junction—left to right, standing: E. J. Farley, clerk; J. C. Pundt, clerk; J. F. Tierney, clerk; G. F. Judge, clerk.

Sitting: C. G. Deems, chief clerk; C. M. Gray, yardmaster; A. G. Hopkins, general yardmaster; J. M. Brennan, clerk.

Baltimore Division

Correspondent, W. H. TARR,

Superintendent's Office, Camden Station

Merry Christmas!

Assistant Train Master J. C. Basford and Division Operator H. K. Hartman enjoyed their vacation by shooting duck on the Susquehanna River. We are told that ducks were plentiful. It is also stated that G. D. Coleman, assistant road foreman, went duck hunting and brought down thirty-six ducks with one shot. We are from Missouri, Barney.

Several furloughed brakemen have been called back on the east end and two cabooses were put on during the month of November, one in way train service and the other in pool service. This is an indication that business is picking up.

Train Dispatcher W. S. Eccleston, "DO" Office, had the misfortune to cut off his thumb while sawing wood. The wound has healed and he is now back at the key.

Miss M. M. Hogan, GS-1 clerk, "DO" Office, has left the service. The position has been filled by D. E. Reese.

George K. Seibert, after taking a tour of Europe on his honeymoon, is now back at the key. Mr. Seibert is an extra train dispatcher, "DO" Office.

Brakeman G. C. Hammond, who was gassed over seas, has had a relapse and is in the hospital at Philadelphia. He is getting along as well as can be expected. We hope for a speedy recovery.

Brakeman E. F. Enochs, who was injured at Singerly on October 20, is in University Hospital, Baltimore, and is recovering as well as can be expected. Mr. Enochs slipped on ties loaded in a gondola car and fell and injured his back.

During the racing season at Laurel in October, or for a period of 23 days, 117,800

persons were hauled without injury to a single individual. The equipment was first class and the handling of the people to and from the race track has brought forth compliments from various sources.

Chief Train Dispatcher A. N. Peters, Train Dispatcher A. P. Level and R. J. Manning, secretary to the superintendent, Monongah Division, paid us a visit during the Laurel Races.

East Side, Philadelphia

Correspondent, CHARLES MINNICK,

Boiler Clerk

Merry Christmas!

The "ETERNAL QUESTION" in the Yardmaster's Office every morning, "Where ARE those books from the West?"

The "OFFICIAL" song of the Index Clerks—"SUNNY TENNESSEE" as rendered by "Bobby" Miggins and Arthur Needham.

We are glad to see that the "OLD DODGER," alias "Jim" Simpson, is back with us again after an absence of about 5 months.

We hope he keeps the job permanently. Long may he wave.

"Bobby" McKeown is the sole owner of the one and only penknife in the office since "Charlie" Mahoney's knife disappeared mysteriously.

It is reported that there has been an increase in the crops this season. Just look at Claude Jackson's new mustache and you will understand why.

We have a new chief clerk in the Master Mechanic's Office, Mr. "Bob" Merryman, formerly of Riverside Shops. From all indications he seems to have made a favorable impression. We wish him all success and assure him of our heartiest co-operation.

Passenger Station, 24th and Chestnut Sts.

Correspondent, CHARLES T. ALLEN

Merry Christmas!

The clerks of the Philadelphia Division extend their best wishes for a "Merry Christmas and Happy New Year" to all.

Our stationmaster, H. S. Biser, recently enjoyed a motor trip to Cumberland, Md.

Mrs. Metzger, matron at this station, who has been ill for some weeks, has returned.

The cause of "Bill" Le Brocq's happy smile is the arrival of a son. We wonder if his vocabulary will be like his Dad's. We wonder. "Ship Ahoy."

Brunswick

Correspondent, R. L. MUCH, Conductor

Merry Christmas!

The Baltimore and Ohio Veterans held a social on November 4, in the auditorium of the Y. M. C. A. About 60 members were present. Sandwiches were provided by the Ladies' Auxiliary, under their able president, Mrs. H. C. Allgire. Coffee was served by the men under W. R. Smith, their president, assisted by Kirk Compton, the popular train dispatcher, west-bound yard. New resolutions were adopted and plans made for a stronger organization of Baltimore and Ohio men and their wives.

One of the busiest men on the Baltimore and Ohio is Trainmaster John McCabe. He is here, there and everywhere; always wearing a pleasant smile. But look out boys, when he wants to see you for something you "didn't do."

SOME OF THE "FAIR ONES", DIVISION ACCOUNTANT'S OFFICE

1. O. L. Hamilton, R. H. Richardson, H. A. Gilchrist and C. M. Machin, the Accountant's Office "Reckling Crew,"—we reckon so. 2. Standing, Misses Isabel Gillin and Dorothy Pierce; seated Misses Alice Abel and Helen Dean. 3. Chief Clerk H. S. Benedict and his stenographer, Fred Held. 4. Miss Gladys Davis, enjoying the sunshine of lunch hour. 5. Isabel Gillin, Mr. Jones and Helen Dean

Washington, D. C. Freight Station
Correspondent, W. L. WHITING, Chief Clerk

A Merry Christmas and a Happy New Year to All!

And, if by one little word of kindness or one little kind act it is possible to make our neighbor's Christmas a little merrier and his New Year a little happier, let the word and act be forthcoming. By so doing we shall also add to our own pleasure and happiness during the coming year.

After all it is service that counts, not only in our personal relations with one another, but in business matters as well. This is evidenced by the following letters that were recently received at this office:

CHEVROLET MOTOR COMPANY OF MARYLAND

BALTIMORE, MD., October 31, 1921.

D. M. FISHER, Agent,
Baltimore and Ohio Railroad Company,
Washington, D. C.

Dear Sir—We want to thank you for the attention given our letter of the 24th inst. M. C. Car 91587 arrived at your station at 1 a. m. on October 28 and we received your letter at 8.30 a. m. on October 29. Service increases the Railroad revenue more than solicitation.

Yours very truly,
(Signed) H. G. SEMMONS,
Sales Manager

THE CUDAHY PACKING COMPANY
CHICAGO, October 21, 1921.

D. M. FISHER, Freight Agent,
Baltimore and Ohio Railroad Company,
Washington, D. C.

Dear Sir—Referring to your letter of October 14, suggesting the cancellation of Demurrage Average Agreement: No Sir, we do not want you to cancel this agreement. From now on you will probably receive more business than in the past for the reason that our produce business will be handled in carloads instead of L. C. L.

We commence to route our meat shipments Baltimore and Ohio commencing Monday of this week.

Yours truly,
(Signed) THE CUDAHY PACKING CO.
O. O. Rex.

Such letters as these speak for themselves, and it is only right to add that the promise contained in the letter from the Cudahy Company has been nobly fulfilled.

The Grim Reaper has once more visited our little community. On October 19, the wife of our co-worker, Paul K. Lee, passed to her rest Above, having succumbed to the dread disease of dropsy, from which she has suffered for about five months. This is the second death in Paul's family within a few months, his father having died a short

time ago. The heartfelt sympathies of all his friends are extended to Mr. Lee in his hour of great bereavement.

It is a pleasure to report that the ever watchful stork was hanging around the town of Laurel, Md., lately, and paused long enough over the home of Yard Delivery Clerk W. S. Coates, to convert that gentle man into a genuine floor-walker. Daddy was absent from his post in the yard one day, and when he appeared on the following morning he seemed to have grown several inches. There were few prouder or happier men around this station than "Bill" Coates, when with his usual happy smile he reported the addition of seven solid pounds of good, healthy baby boy stock to his home.

Congratulations, Bill! Let the good work go on!

Referring to previous paragraphs regarding service, the following letter is interesting:

Re Campaign to increase business—
At Philadelphia, November 9, 1921.
D. M. FISHER, Agent,
Washington, D. C.

I am very glad indeed to receive your letter of November 3, advising comparative statement for August, 1921, and October, 1921, and wish to take this opportunity to congratulate you on the fine showing you have made and assure you that it is very much appreciated.

(Signed) F. G. HOSKINS,
Superintendent

In connection with the above letter the following figures will be of interest, showing the work done in this district on account of the Increased Revenue Campaign:

REVENUE AUGUST	REVENUE EXPECTED OCTOBER	REVENUE OBTAINED OCTOBER	INCREASE EXPECTED	INCREASE OBTAINED
\$683,285	\$779,773	\$837,938	14.1%	22.6%

This is for the entire Washington District, including the outlying stations as well as the New York Avenue Station. It is gratifying to state that the New York Ave. Station made an increase of 28 per cent. in October over August.

This record is the highest on the Baltimore Division.

Merry Christmas!

A. M. Wilt

On October 27, Engineman A. M. Wilt, a popular railroader and one of Keyser's most promising citizens, passed away. His death was caused by appendicitis, for which he had just been operated on.

Mr. Wilt was 43 years old. Besides his wife, four children survive him. These are Mabel, Virginia, Hilda and Robert. He also leaves a mother, two sisters, and eight brothers.

He was a member of the Brotherhood of Locomotive Engineers, of the Masonic Lodge, and of the Methodist Episcopal Church, South. His funeral was held on Saturday, October 29, interment in Queen's Point Cemetery, Keyser.

J. W. Ravenscraft, member of the Cumberland Division Veteran's Association, who has been bedfast at his home, 107 West Piedmont Street, Keyser, W. Va., since September 16, as a result of paralysis, was presented with a Fifty Year Active Service Emblem, by Harry Allison, president of the Association, on October 30.

The emblem was in commemoration of the esteem in which Mr. Ravenscraft is held by his fellow employes and in honor of his service record with the Company of 53 years and five months.

Mr. Ravenscraft entered our service in the car department at Piedmont, his birthplace, on May 1, 1868. He remained in that department until September 16 this year, when he was stricken with paralysis. In addition to Mr. Ravenscraft's long record he is the oldest supervisor in that department.

Mr. Ravenscraft was informed by the visiting committee that at least 500 fellow members of the Veteran's Association have pledged themselves to render any assistance their comrade might require, while incapacitated.

Two sons of Mr. Ravenscraft are in the Company's service; one has served the company for 18 years and the other for ten years.

Mr. Ravenscraft has been very active in the Veteran's Association, having secured more than 100 members. During his long service with the Company he has been on the relief list but twice, once in 1888 and at the present time. He was never furloughed nor suspended.

We are sorry to report the continued illness of Yard Engineman George P. Warner,

at his home on Mineral Street, Keyser. Mr. Warner has been a faithful employe for a great many years and his prolonged sickness is regretted by his fellow employes.

ELMER H. STOLTZ, *Pittsburgh Freight Station*

Merry Christmas!

A number of friends and neighbors surprised D. L. Burns, popular Baltimore and Ohio conductor, running between Pittsburgh and Cumberland, on Halloween night at his home in Hazelwood. This was the occasion of Mr. Burns' sixty-second birthday. The guests were masked. After masks were removed, the evening was spent in music and the donkey puzzle. The birthday cake was not forgotten.

Mrs. Burns assisted by her daughter-in-law, Mrs. S. J. Burns, served a splendid lunch, which was heartily enjoyed.

The following persons were present:

Mrs. S. J. Burns and daughter Vesta; Mr. and Mrs. H. E. Rodgers and son; Mr. and Mrs. W. J. O'Neal, three daughters and two sons; Mr. G. W. Long and Miss Long; Mrs. Lewis and daughter, Velma; Mrs. C. B. Lane; Mrs. H. K. Daugherty; all of Hazelwood, Pa.; Mr. and Mrs. John Brewer, Mrs. Higgs and son, Samuel, all of Brad-dock, Pa.

David Lewis Burns was born on October 31, 1859, at Palo Alto, Bedford County, Pennsylvania. He was a son of James Burns and Jane (Evans) Burns. He was educated in the public schools at Burns Mills. In October, 1882, he entered the service of the Pennsylvania Railroad, and in May, 1885, he was transferred to the Baltimore and Ohio Railroad as trainman. He was promoted to passenger conductor in August, 1896, which position he still retains.

He is a member of the Order of Railway Conductors, the I. O. F. and the Benevolent and Protective Order of Elks, of Morgantown, West Virginia. He is a member of the Christian Church of Hazelwood, and treasurer of the Veterans Association of the Pittsburgh Division.

Mr. Burns was married on June 8, 1884, to Mary Catherine, daughter of Samuel and Lavinia (Baker) Miller, of Hyndman. They have been the parents of five children, of whom only one, S. J. Burns, Baltimore and Ohio fireman, survives. All his friends join in wishing Mr. Burns many more happy birthdays.

Glenwood Round House

MARY A. BREEN, *stenographer to Master Mechanic*

Merry Christmas!

To Engineer W. N. Gallagher, in the loss of his wife, our most sincere sympathy is extended.

Machinist Oyler can now boast quite a representation—twin girls. Mercy, "Bill"! Girls are an awfully expensive proposition.

Pipefitter E. V. Gisbert is also walking on air. It's a boy, and Vince tells us that from the way it yells, he thinks it won't be long until he's calling signals in the best football games in town.

Please mention our magazine when writing advertisers

Passenger Conductor D. L. Burns

We have several good hunters in our midst—in fact, they are so interested in hunting that when they go on a trip, they fall fast asleep. One of them, "Hornie," was dreaming dreams that must have been pretty excitable, for he wakened to find himself staring into the countenance of a bear which later turned out to be a rabbit.

"Louie" Edwards and "Bill" Smith decided that they would try their luck in the hunting session. Forthwith, they betook themselves to the wilds of Callery, Pa., and wasted eight good shots on a supposed-to-be rabbit. Tender-hearted persons that they are, they went to pick up the silenced creature and found it to be, not a rabbit, but a groundhog. Some hunters!

Clarence Rush, pipefitter apprentice, stole a march on us and signed up for life. He singled it to the town of Wellsburg, W. Va., several months ago, but decided it would be pretty nice to double-head back. We haven't seen any cigars on it but you know, "Rushie," better late than never. Even cigarettes will do.

Pipefitter Norman Downing also entered the bonds on November 5. A short wedding trip was taken but as yet we have been unable to ascertain whether it was to Soho Beach or to Versailles. The most interesting feature of this wedding was the fact that Machinist R. M. Irwin was drafted (yes, actually drafted) into service as best man, and we are led to believe that he was the busiest person at the wedding, taking all kinds of notes. This looks as tho' he's getting lined up for himself. Of course, our suspicions may be groundless, but then—

A certain young lady has been rather down in the mouth lately, over the loss of her diary. Surely, all the boys in the Round House have had time to read it over since it was taken and the poor girl is about heart-broken. Come across, boys; it is awful to be in love and then wake up to find your romance (in the shape of a diary) exposed to the Glenwood Round House.

Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent, Weston, W. Va.*

Merry Christmas and The Best of Luck to Every One for 1922!

Dear Folks—When these few lines reach you, Christmas will be with us once again, and a few days later, 1922 will be here. Here's a little thought for you for 1922:

"If you want success

It will come your way,
Just work while you work,
And play while you play.

"This little method
If used each day
Will hasten your success
Along Life's way.

"Just work while you work
And play while you play
And you will soon find
That you'll win some day." Selected.

During the past month the Charleston Division has had a good month's business, the best so far this year. We hope it will continue.

Great excitement has occurred in this far away neck of the woods. I know you will all be interested in knowing that our confirmed old "bach," John T. Staples, chief dispatcher, has taken unto himself a wife. You don't believe it? Well it's true just the same. If you want to come down to Weston we'll prove it. John took his vacation and told everyone he was going to visit his folks in Virginia. He did, but on way back, he stopped somewhere, met the future Mrs. Staples, and the deed was did. He certainly put one over on every one. However, we extend our sincere and hearty congratulations to the happy couple.

Did you ever give any serious thought to our Relief Department, and realize what a fine thing it is? Do you know that it's the cheapest and best insurance there is, and do you know that they make deductions from your pay if you want them to and put this amount in a bank book for you every month, paying good interest, without your having any trouble banking? Do you know that if you want to buy a home there's no way better than through the Relief Department? THINK IT OVER and come on in, the water's fine. The Superintendent's Office is now 100 per cent. Relief Department members, and Savings Feature too. We believe that if we are not mistaken, the whole building with the possible exception of a few, are also in it, and we are after the others to make it absolutely 100 per cent. Even the "Baby" of the office, the only one in the building under 21 is in the game. Ask her, she'll tell you.

Did you folks ever hear the tale of the Rusty Wire Chaser. If not ask Mrs. Trouble Shooter. She will give you a good story. Then there's another story about one of the girls in the Superintendent's Office having become the proud possessor of a flashing diamond. We cannot vouch for it absolutely, but inquire for yourselves. We are sorry to report that we have missed the smiling face and stogie of Assistant Chief Clerk Pickens, who has been laid up with rheumatism. Latest reports indicate

that he is progressing favorably, and hopes to be out shortly. We all wish him the best of luck and a prompt return.

Over in Gassaway we have a new young lady stenographer. She heard all about the Charleston Division away out in Chilli-cothe, and decided she would like to be one of our family; so we introduce to our folks Miss Helen Byerley, and bid her welcome to the fold.

Too many foreign cars on the Division today, boys. Get out your guns and chase them home. Remember a dollar a day soon mounts up.

Did you know that "Peg" and Irene McCormick went all the way down to San Antone, Texas for their vacation last month? We were all quite worried while they were absent. You know their home is in Ellamore, and there's SOME difference between the two cities. However, they are back safe and sound, and report having a fine time. They also saw Miss Helen Lloyd, formerly of our office here, and report her doing well.

Superintendent Trapnell, Major Brooke and Master Mechanic Burkely recently spent a couple of days going over the Cumberland, Connellsville and Pittsburgh Divisions. They were much impressed with what they saw. By the way, it's just as easy to keep your place clean and tidy as it is to keep it dirty, and when our general officers make the trip over the Division, it's more creditable to your officers and yourselves if you show that you are a "Go o Housekeeper."

The family of Trainmaster Deegan has moved to Weston, much to the joy of W. C. D., who has been looking for a house for some time. We welcome them to our town.

"Pee Wee," from Gassaway, comes over every few days to look after what he calls the "Branch Line," and then he returns for a few days more to what he calls the "Main Line." So both sides are in good hands. He says he will finally get things straightened out to his satisfaction if he can travel a little more.

Cumberland Shop Band and others, look to your laurels!

The accompanying picture is of the Charleston Division Band, Weston, W. Va. The members are:

Standing (left to right): Lloyd Clem, tuba; Harry Kurtz, baritone; Jess Clem, tenor; Kelly Bragg, tenor; R. R. Hutchison, trombone; W. C. Burroughs, alto; Herbert Jarvis, trombone; Harvey Clem, alto; Dorr Bright, tenor; Dominick Bell,

The Vose Grand

has the incomparable **Tone**—the one quality above all others which makes a real piano. The exquisite tone of the Vose Grand distinguishes it from all other pianos.

clarinet; Victor Serrino, clarinet. Front row (left to right): J. L. Thrash, clarinet; S. P. Reese, piccolo; Warder Berry, B-flat cornet; Thomas Jarvis, bass drum; C. D. Vassar, director; James Ferry, Jr., snare drum; Arvil Ramsburg, B-flat cornet; Argyl Butcher, B-flat cornet; Frank Butcher B-flat cornet; L. G. Thrash, B-flat cornet.

Just got comfortably started writing my letter, and here we are at the bottom of the third page. Your correspondent hopes to get a vacation soon, and when he does he's going to make a point to go to Baltimore and see that Editor man, and ask him how he expects us to tell all the news of an important Division like ours in three pages. Might as well ask one of you girls to tell you where they went last night in a FEW words. However, he's the boss, and so we'll have to stop. Read that letter from Mr. Willard in the last issue of the MAGAZINE, and see what failure to be COURTEOUS to our patrons means. It's a good lesson. THINK ABOUT IT.

A bully picture of a bully lot of men—the Charleston Division Band

Hillell says "Do not do to any other what thou wouldst not have him do to you; this is the whole law, the rest is merely comment." True, isn't it?

Wheeling Division

Benwood Shop

Correspondent, ANGELA JUNE APPLEGATE

Our superintendent takes this occasion to wish all of the employes a Merry Christmas and a Prosperous New Year. He also extends his appreciation for the good performance during the past year and requests that the good work be continued during the ensuing one.

R. R. Price, chairman, Engineering Corps, Wheeling, and Miss Agnes Anderson were quietly married in Baltimore on October 22. Congratulations and best wishes for a happy future!

Holloway, Ohio

I wish every employe under my jurisdiction a Merry Christmas and a Happy and Prosperous New Year. I also desire to thank each one for his hearty cooperation during the past year.

(Signed) H. C. FOWLER,
General Yard Master

I wish to extend to each and every employe under my jurisdiction, who has faithfully cooperated during the past year of 1921 and put forth his best efforts to make our work a success, my heartiest Greetings. I hope that each and every one will feel the real Christmas spirit and use it to bring to him and to me the peace of mind that one feels when a year is well spent in doing what is best for the Company. With this Christmas spirit let us hope that a close companionship can be formed between us that will engender a spirit than can be carried into the next year and make our work together one grand success.

(Signed) M. STEVENS,
Car Foreman

With the year 1921 drawing to a close, I wish to express to my fellow employes at Holloway appreciation of the loyal support and hearty cooperation manifested. Holiday Greetings to all!

(Signed) W. J. DIXON,
Assistant Master Mechanic

The foregoing letters from the officials of Holloway to the employes of this vicinity are sufficient explanation of why our operation has been such a success.

We have several new arrivals at Holloway: H. E. Whitner, of Parkersburg, W. Va., is now day general foreman; E. C. Beck, of Clarksburg, W. Va., is now night general foreman; C. Wilson, of Columbus, Ohio, is the new chief clerk to the master mechanic.

Jerry Hamilton, of Parkersburg, W. Va., is now on the coal billing agent's staff.

It has just been learned that there is a new arrival at the home of Brakeman H. R. Sweeney. It's a girl. Felicitations!

We all wondered why Brakeman "Shorty" Phillips is among the missing every Sunday, but upon making inquiries we discovered that "she" has moved somewhere on the Newark Division. Mr. Phillips also confided to us that in the near future a certain young lady is to become Mrs. Phillips. We extend congratulations to "Shorty."

Miss White, Car Department, promised us some notes from that department and to date has failed to deliver same, but as we failed to specify that we wanted them for

this issue, perhaps she will have them for the January or February issue.

Carl Miller, former correspondent, "put one over on us" completely. It seems that Carl and Edna had been married for some time, but kept the little secret to themselves. We extend our heartiest congratulations.

Grover C. Hamilton, baggagemaster on trains 61 and 62, has returned to his duties after a long illness. While we regret to lose G. E. Glover, we are all very glad to see "Red" back.

Western Lines

Cincinnati Terminals

Correspondent JOSEPH BEEL, Chief Clerk to Superintendent of Terminals

Merry Christmas!

Our most eminent statesman, John R. Zureick, councilman of Elmwood, says, "I am for the People and against the Public." What do you mean, John?

Car Repairer "Ben" Galway has taken unto himself a better half for the second time. Our best wishes go with him and his wife.

Martin Moran, Sr., passed from this life on October 31. He had been turn-table operator at Ivorydale since 1917 and is missed from his post. He was a faithful employe.

Great Work!

Much activity and interest is being shown at present in the reclamation of outside metal car roofs at Ivorydale shops. Approximately 260 roofs having been reclaimed and applied to cars since August 15, an average of 30 roofs being applied each week at this point. Much credit is due to General Foreman Haas, along with Mr. Hesselbrock, tool room foreman; H. Hill, assistant car foreman, and Pipefitter and Air Brake Foreman Paul Haaf, for the ingenuity in devising labor saving machines which are being used in the tin shop. Credit is also due Car Foreman W. L. Morton for his untiring efforts to keep Ivorydale to the front in this work.

Wonder why "Bert" Golden makes so many trips to Sanders, Ky? Perhaps its moonshine ! ! ! !

We regret that our fellow-employe, Martin M. Madden, Stores Department, Storrs, has been off duty for several weeks with a fractured heel resulting from an accident while performing his duties as section stockman. We hope to see "Mart" back on the job in the near future.

Our local storekeeper, E. Westlund, has recently moved from Cincinnati to Ludlow, Kentucky. We now fear that Mr. Westlund will be obliged to give up his American citizenship and become a subject of that nation.

Terrible Tragedy at Storrs

J. M. Shay left a partly smoked cigar in the Storeroom Office recently, which was unintentionally "scrapped." Mr. Shay tried to "reclaim" it, but found that it had been stepped upon.

Harry J. "Kid" Hocks, star boxer and wrestler at Storrs, will meet all comers at his weight (provided that each challenger is blind in one eye and cannot see out of the other).

New Castle Division

Correspondent, J. A. JACKSON

We extend to the readers of the MAGAZINE, and especially to the employes of the New Castle Division, our greetings for a Happy Christmastide. May the season kindle in our hearts the spirit of helpfulness and willingness to give. May we remember the sick, the crippled and the hungry, all the unfortunates whom it was the special pleasure of the Master to serve.

Congratulations to Chief Dispatcher and Mrs. G. H. Sarf on the arrival of a ten pound baby girl, Marion Lucille.

E. M. Forbes, freight conductor, New Castle Division, was elected to the office of councilman at Willard, Ohio, at the November election. Mr. Forbes is one of the oldest conductors on the division, having been in the service of the Baltimore and Ohio since September 5, 1894. His host of friends on the New Castle Division are extending him congratulations on his successful campaign.

J. S. Gaston, yard clerk, New Castle Junction, is passing around the "best smokes in town," the result of a visit from "Old Friend Stork," who left an eight pound baby boy on November 2.

Master Mechanic J. A. Tschuor, New Castle Junction, has purchased a new home on West Madison Avenue. He will occupy it after the holidays.

Don't forget that friend of yours who is going to take a trip. Just remind him of the safest and best Railroad in the country—the Baltimore and Ohio. You will be doubly repaid for your efforts in the satisfaction of knowing that he will be extended every convenience and courtesy possible, for his welfare and comfort. Moreover, you will be surprised to learn how easy it is to make new friends for yourself and the Baltimore and Ohio. TRY IT.

The best resolution for continued happiness in your home for the New Year; "SAFETY FIRST," today, tomorrow and every day of your life.

Here are pictures of Mr. and Mrs. W. D. Reed of DeForest, Ohio, who celebrated their Golden Wedding Anniversary on October 3, an account of which appeared in the November issue of our MAGAZINE.

G. W. Miles, car distributor, New Castle Junction, J. L. Thoman, yardmaster, DeForest Junction, and P. E. Baker, freight conductor, succeeded in bagging 23 "cotton tails," on a recent hunting trip through the wilds of Trumbull County, Ohio. We always knew this trio would make a name for themselves some day, and they are already planning on going after the big stuff next year—(save me an old grizzly bear and a couple of small elephants).

Newark Division

Correspondents

W. E. LAIRD, Chief Clerk, Newark, Ohio

A. D. LIST, Newark, (Ohio) Shops

Greetings—A Very Merry Christmas and Happy New Year To All!

It is reported that our esteemed third trick chief dispatcher spent a day at Buckeye Lake not long ago in company with one of the high state officials. We are unable to say who rowed the boat.

If you want a hunting license, ask for Mendenhall.

Word reaches us that "Bob" White, with his \$100.00 traveling bag has left us

bound for Chicago, and that the trip is being made in the interest of the "Grape Fruit King" at Lore City.

After wondering a long time, we have just discovered that the big noise occasionally jarring our ear drums was not from the Baltimore and Ohio Boiler shop, but that it was Dispatcher "Barney" Freill out for an afternoon spin in his automobile.

Brakeman F. D. Elder comes in for special mention. At different times while back flagging he has picked up a total of 100 pounds of nuts along the right of way and turned them over to the master mechanic at Newark. Fine!

We have information on which we feel we can safely predict that by the time this goes to print, Time Clerk Evan D. Lloyd will be introducing a happy young lady to the force in the Division Accountant's Office and buying cigars for the boys.

Employees of the Newark Division generally were much shocked and grieved to learn of the recent fatal accident to Bridge Foreman Van Huffman, who was struck and instantly killed by engine of train 47 at Zanesville, Ohio. Mr. Huffman had been in the employ of the Railroad for 27 years. He was well known by the larger number of employes on the Newark Division, all of whom held a warm friendship for him, and sincerely mourn his sudden death.

It is with a good deal of disinclination that one attempts to draw a lesson from the tragic death of a fellow workman whom everybody respected and loved. The circumstances of the untimely death of Foreman Van Huffman, nevertheless, point to an instant's forgetfulness, and if there is any good that can be gotten out of an accident of this kind, which brings sorrow to a host of friends and loved ones, it is the lesson of carefulness. This is the thought that our safety warnings bring home to us—to stop, look and listen before crossing railroad tracks.

The Railroad has lost a useful and efficient employee; the family has lost a loving husband, father and grandfather. We extend to the family our deepest sympathy.

Correspondent, C. H. GRONINGER
 Merry Christmas!

Have you noticed the diamond ring that Miss Mabel Gaser is flashing on her left hand? Some of the boys are ready to congratulate "Pat" Dugan, valuation man, who has his office in the passenger station, Cleveland.

G. H. Kaiser, road foreman of engines, reports having a restful vacation, only making a few local trips.

We regret to announce the death of Engineer J. H. Courtright on October 16, when crown sheet on engine 2077 dropped one-half mile east of Seville, Ohio. Our sympathy is extended to his family.

Please help the correspondents of the division by reporting to them all interesting items concerning employes and their families.

Chicago Division

F. N. SHULTZ, *Division Operator*, Garrett, Ind.

ESTHER J. SPREENBERG, *Clerk*, South Chicago
 MARGARET GALLOWAY, *Assistant Shop Clerk*, Garrett Ind.

Garrett, Indiana

A Merry Christmas and Happy and Prosperous New Year to each and every member of The Baltimore and Ohio Family!

Business on the Chicago Division is on the pick up and has improved to the extent that employes are being recalled in all departments.

Say, Girls, I'm going to give you a little confidential news. Are you aware that we have among us a new stenographer? Well, we have, in the person of John Dwyer. He is now stenographer to Storekeeper W. H. Dean, vice Miss Marguerite Roan, who has resigned to enter the big ship Matrimony. Here is what information I have been able to gather concerning this new stenographer: He is single, aged 27 years, good looking, brunette. He was transferred from Newark, Ohio. Mr. Dwyer, we welcome you to our midst.

John E. Ellington, machinist helper, Garrett, and Mrs. Daisy Griswold, of Kendallville were very quietly married at Albion, on November 12. After a brief honeymoon spent at Cleveland and Canton, they will be at home to their friends at 703 South Randolph Street, Garrett. Congratulations!

Fireman A. W. Bauer, who was injured on engine 5101, train 37, at Wolf Lake Yards, some time ago, is recovering nicely.

F. S. Deveny, superintendent Chicago Terminal, and former engineer on Chicago Division, spent several days with friends in this city and also attended to duties in connection with his office. We are always glad to see you, "Fred," call again.

Fireman J. E. Cripe, who is a patient at Sacred Heart Hospital, is recovering nicely from an attack of typhoid fever.

Engineer and Mrs. J. F. Mitchell are leaving in a few days to spend the winter in Florida. Engineer Mitchell is the oldest engineer in point of service on the Chicago Division.

Mrs. George Bowersox, widow of the late engineer, is contemplating leaving within the next few weeks for Los Angeles, Cal., where she will spend the winter with her son John, who is a movie star with Goldwyn.

Superintendent Stevens, New Castle Division, spent a few hours in this city, on Company's business. Mr. Stevens was former trainmaster on this division, and we are always glad to have our former associates call on us.

W. G. Hesslau, for more than a year claim agent, this division, was transferred to New Castle Division and Painsville District, effective November 1. His successor at this station is J. L. Allen, transferred from Pittsburgh. We extend good wishes to both these gentlemen.

Boilermaker Barney Johnston is recovering from an operation which he recently underwent at Sacred Heart Hospital. We wish him a speedy return of his former good health.

Brakeman and Mrs. Walter Burch announce the arrival of a son, Walter, Jr., at their home on October 1.

Machinist Helper and Mrs. Harold Kast announce the birth of a daughter, on October 8.

How To Earn Up to \$100 a Week in a Field where there's Room for You

EASY to EARN \$35 to \$100 PER WEEK!

Learn Drafting

Trained draftsmen throughout the country are earning from \$35 to \$100 or more per week. They saw the "way out" from dragging work, long hours and small pay -- and took ACTION.

They got out by training for practical drafting (mechanical drawing) - That's YOUR way out, too.

The Columbia School of Drafting makes it easy for you to earn a big salary and quick promotion in the drafting field. This course has been made so simple and easy that you'll be able to grasp draftsmanship in from six to ten months of pleasant home study.

FREE DRAWING EQUIPMENT.

All your drawing and drafting equipment will be furnished you free of charge. After you have finished the course our Employment Bureau helps you get a well paying drafting position.

Get in line today to earn a big salary in the drafting profession. You can do it.

After an illness of more than seven years, William G. Kennedy died at his home, 307 Cowan Street on October 11. Mr. Kennedy was born on January 1, 1875, in Noble County. He was a resident of Garrett for the last seventeen years, and was employed as car repairman at the local shops, until ill health interfered. He is survived by the widow and two children, Carl and Jane, four brothers and three sisters. Funeral services were held at St. Peter and Paul's Church, this city, interment in Calvary Cemetery. We extend our sincere sympathy to the family in their sorrow.

Boilermaker Helper Apprentice E. L. Bapst has resumed his duties at the local

shops after an absence of several weeks because of an operation.

**South Chicago
A Merry Christmas
and a Happy New Year!**

We were delighted to receive a friendly note from our old friend, West Burke, from Grafton, W. Va., and to hear that he is again with the Baltimore and Ohio. Greetings from South Chicago and the West! Much success be yours!

Our assistant agent, Maurice Altherr, as chairman, has organized a Committee of Office and Yard Men. Meetings are held on each Tuesday afternoon, the purpose of which is to improve operating conditions in the South Chicago Terminals, and get a better understanding of Car Service Rules and general car handling. These meetings, it is thought, will be of great benefit to our Company.

Read the note on the Honor Roll page about Switchtender Fred Eckert, who saved a woman's life.

The accompanying photograph is that of little "Buddy" Lester, son of Mr. and Mrs. John Lester. Little "Buddy" has been entered in the Baby Contest just opening at Ascher's South Chicago Theatre. His Entry Number is 30. Keep this number in mind, cast your vote for "Buddy," and let's make him THE winner.

The local car department Bowling Team, L. Stack, captain, defeated the Locomotive Department Team, Thomas Hunter, captain. Score 2795 and 2771, for a total of three games.

Chicago Terminals

Correspondents

THOMAS H. WILLIAMS, F. S. DE VENY
Merry Christmas!

The accompanying photograph is of Miss Rose Byrnes, one of our competent telephone operators on the Chicago Terminal. She, like all our other "hello girls," is always ready to give any information she can, not only to employes but to the public in general. We appreciate her work.

"Charlie" Stewart, Accounting Department, better known as "Handsome Charlie," is making frequent visits to the Superintendent's Office. The boys are wondering what the sudden change in temperature is. Charlie, let us hear the good news.

"Buddy" Lester

John Maloney, special clerk, Superintendent's Office, claimed that his eyes were in A-No. 1 condition until a few days ago when John got orders to locate a car of "ELEPHANTS" in the depot. He failed to find them and the boys kindly donated the price of a good telescope for his close observation.

Charlie Hegley, examiner and recorder and veteran employe on the Chicago Terminal should get the "Carnegie" medal for speed on his typewriter. Judging from the repairs made to his machine lately, Charlie is not as slow as he looks. It was necessary to renew the crank shaft, repair the bearings and weld the frame.

"Mike" Carothers, the all around bowler on the Engineering team certainly gets the pins for his team with his famous "college" yell. Chief "Bull Rush" had nothing on "Mike" when he gets going.

It is rumored that a certain young lady from Lincoln Street is out in Sunny California and it is believed a certain fellow by the name of "Mack" is going to be there shortly.

Quite a few rumors have been floating around lately regarding the numerous trips to Terre Haute by one of our telephone operators. We have seen the finger several times but there seems to be nothing new, so there is only one thing to do—that is guess.

"Ye Ed." from Baltimore was recently a pleasant caller. While here he made the rash statement that the December issue would be out on December 5. The correspondent admired his optimism but suggested

Miss Rose Byrnes

that the promise was worth a wager, the result being that a box of cigars hangs in the balance. We thought it no more than fair to advise our friends of this and to notify them that as the Havanas will soon be on the way from Baltimore, we will not need any additional supplies of the same sort from then until a few days before Christmas—T. H. W.

Ohio Division

Correspondent, A. E. ERICH, *Secretary to Superintendent*

To all employes of the Baltimore and Ohio and every reader of the MAGAZINE, hearty Christmas Greetings are extended. May good health, prosperity, happiness and contentment abound to each one for the coming new year.

Due to increased business on the Ohio Division, it has been necessary to put five men on the right side of the engine and to recall that number of furloughed firemen. Several conductors and brakemen have also been "put back" on their old jobs. The more business, the more furloughed men recalled. **BOOST THE BALTIMORE AND OHIO AND GET BUSINESS!**

Our sympathy is extended to the family of Conductor Robert Spangenburg, who died at his home in Hamden, Ohio, after an illness of chronic stomach trouble for six months.

Elmer E. Dickson, conductor, passed away at his home on Carlyle Place, Chillicothe, Ohio, on Sunday, October 23. His death was caused by acute indigestion. His family and a host of friends mourn his death. To his sorrowing family goes the sympathy of all those who knew him.

It is with regret that we learn of the sudden death of Wilburt Oakes, fireman, on October 24. Our sympathy is extended to his widow.

Boiler Foreman F. J. Rahle is again smiling over the arrival of his second grandson, who is the son of furloughed Machinist Lawrence Rahle.

Our sympathy is extended to Machinist Helper S. Dray, in the loss of his small son, who died on October 25.

Locomotive Engineer Albert Mallow died at his home in Chillicothe on October 27, following an operation. He had been suffering for many weeks. He was in the service of this Company for twenty-three years,

1-Engineer Stone, Roundhouse Foreman Mershan, Drop Pit Foreman Wright, and General Boiler-maker Foreman La Flare. 2-Assistant Trainmaster J. F. Walsh, Lincoln St., and some of his admirers. (We'll trade places with him at any time). 3-A bit of standard track, Whiting, Ind. 4-Assistant Agent Battles, Lincoln St., and part of his office force

Crossing Watchman Forest A. Liebe and "Herb" Harris, coal shoveler, Greenfield, Ohio

and has many warm friends among the employees and his associates all of whom extend their heartfelt sympathy to his family.

Operator H. W. Jenkins "put one over on us" by taking unto himself a wife. Congratulations!

We regret to report the death of Brakeman E. A. Holley, who, while on train 1-97, at Athens on November 3, fell between cars of that train, having both legs crushed. He was rushed to the hospital and all efforts made to save his life but he did not rally.

Do not forget the blue flag when you go under a car or engine to make even minor repairs. It is furnished to be used, and its use may result in the saving of your life, as well as that of another. A miss is as good as a mile, but remember you are not always missed. **THINK AND ACT SAFETY FIRST.**

The William Henry Harrison tomb is located on a hill adjacent to the Baltimore and Ohio and may be seen from car window

ANSWER THIS PUZZLE WIN OAKLAND or \$1000.00

The operator of the movie machine in this theater decided to play a joke on his audience, so he threw these re-arranged "Movie" players' names on the screen.

To solve the Movie Puzzle, all you are required to do is to re-arrange the letters, so that they will spell the correct actor's or actress' name. No. 10 is Charlie Chaplin. If you can guess all ten you can win OAKLAND Automobile or \$1,000.

WHO ARE THEY?

- ① I PARCK MY FORD ⑥ WIRE THE PAL
- ② A FOUND A GLASSERIK ⑦ FUN MUST DRAIN
- ③ MAKER A CUTER GIRL ⑧ A LETS BEN CHEW
- ④ A BAD HEART ⑨ NEVER LYE BABY
- ⑤ WET A SATIN RAT ⑩ I PREACH ALL CHIN

Can You Answer This Puzzle? 25 Prizes Given

Probably you know the names of most of the famous "stars," but just to refresh your memory, we mention below the names of a few of the most popular "movie" players.

Charlie Chaplin, Charles Ray, Mary Pickford, Thomas Meighan, Dustin Farnum, Theda Bara, Douglas Fairbanks, Blanche Sweet, Mabel Normand, Marguerite Clark, Pearl White, Douglas McLean, Wallace Reid, Beverly Bayne, William Farnum, Alice Brady, Gloria Swanson, Anita Stewart, Pauline Frederick, Dorothy Gish.

ONLY 185 "POINTS" WINS AUTO

For each name that you arrange correctly, you will receive 10 "Points" toward the OAKLAND Automobile, or 100 "Points" in all, if you arrange all names correctly. You can gain 60 more "Points" by "Qualifying" your answer. That is, by proving that you have shown a copy of Mother's Magazine to five people during this Big Booster and Advertising Campaign. The final 25 "Points" will be awarded by three independent judges on the neatness, style, handwriting, and spelling of your answer.

The answer gaining 185 "Points" (which is the maximum) will win the OAKLAND Automobile, or \$1,000 in cash. Second highest will win \$750; third prize, \$500; and so on down the list of 25 big prizes. In case of a tie, both winners will receive same prize. Send in your answer TODAY. As soon as your answer is received, samples will be sent FREE, to assist you in qualifying. Contest closes January 14, 1922.

COSTS NOTHING TO TRY—YOU CAN WIN

You will not be asked to subscribe to Mothers' Magazine, nor spend one penny in order to win. We have given away THOUSANDS OF DOLLARS in Prizes. Jay Merry, Fairmont, Mont., just won \$1,000. You may be the next lucky winner. Write your answer to the Puzzle on one side of the paper, name and address in upper right hand corner. You can win—Answer the Puzzle NOW and send your solution to

W. C. WILSON, MOVIE EDITOR, MOTHERS' MAGAZINE, CHICAGO, ILLINOIS

Section Foreman Luther A. Huffman

when train is about 50 feet west of North Bend station.

William Henry Harrison was the ninth President of the United States and the first Ohio son to sit in the chair of the chief magistrate, all of which is of interest to the traveler and adds materially to the interesting points along our line.

We would like to know:

Why Miss Fox went to Indianapolis?

Why Becker is wearing an engagement ring?

Why Harrington goes to Chicago for "dancing lessons?"

Why Owens came to work in good clothes

the other day?

Why somebody else does not get married?

E. G. Mashcr, secretary to the superintendent for the last several years, became a benedict on November 8. The happy couple are now receiving congratulations of their many friends.

This being the last issue of the MAGAZINE for the year 1921, your correspondent desires to take this opportunity to thank all who have in any way assisted during the year, and to ask for a fuller cooperation during the succeeding months to the end that our allotted space in the MAGAZINE will be more interesting to all employees.

Some branches of the service seldom contribute and I am anxious to hear from anyone having something of general interest.

May I extend to you best wishes for A Merry Christmas and A Happy New Year.

Toledo Division

Correspondent, EDWARD M. MANNIX

East Dayton, Ohio

Superintendent R. B. Mann, Master Mechanic A. E. McMillan, and General Foreman W. A. Gilmore extend to the employees their Christmas Greetings, and wish to each and all "A Merry Christmas and a Happy New Year."

The men desire to acknowledge the kind greetings from our superintendent, master mechanic and general foreman, wishing to them and theirs full measures of blessings, with a renewed pledge of friendship so that we may remain as one big family for the year 1922.

Ere the appearance of the next issue of our MAGAZINE, the year 1921, will be past history. We bid the New Year Welcome, and receive it with a full determination to avoid the errors of the past, and a firm resolve to profit by the lessons it has taught.

We can refer with pride to the statement in the September Issue of our MAGAZINE, of President Willard, when he concluded his letter by saying: "I have never seen the men do better Railroading than they are doing today, never before in my experience of 40 years." This speaks volumes, and only proves that our men are loyal, obedient, conscientious and capable, and deserve great credit.

Edward Martindale, engineer on the South Local recently took his watch to one of our leading jewelers for repairs. When asked what he wanted done to it, he absent mindedly replied: "Set up the wedges."

The year goes by with a proud record for the East Dayton Roundhouse—not one delay in dispatchments in either yard or road service. This speaks well for our official forces, both day and night, and is fully appreciated by our general foreman and master mechanic.

As this is the closing issue of our MAGAZINE for the year, it is the desire of the writer to thank all for their kindness and consideration. We trust that the coming year will be one of peace and tranquility, where strife and dissention will be obliterated; where employers and employees will live according to Christ's proclamation, "Peace to all." I wish to all a Merry Christmas and a Happy New Year.

In Memoriam

On Thursday morning the sad news reached us of the death of Mrs. Richard Whitfield, mother-in-law of M. P. Hoban, road foreman of engines, Toledo Division.

Mrs. Whitfield had made her home with her daughter, Mrs. M. P. Hoban, for a number of years, and was known to all the residents of East Dayton as a saintly, pious and charitable woman, loved by the grown as well as the little children. Her generous heart and acts of charity will long be remembered.

She was buried from Holy Family Church, with solemn requiem mass, and laid to rest in the family space at Calvary Cemetery.

To those surviving her we extend our sympathy.

Toledo

Assistant Correspondent, FRANK J. McMANUS

Merry Christmas!

The Toledo Passenger Club was organized on October 5, with 45 chartered members. Its first regular meeting was held on November 9 at Hotel Secor.

Messrs. J. P. Corcoran, D. P. A., Big Four R. R., was elected president; G. W. Norman, D. P. A., Pere Marquette R. R., vice president; Joseph O'Bryan, chief clerk, Passenger Department, Ann Arbor R. R., secretary; Clarence Haefner of Toledo Union Depot, treasurer. The organization is practically a social club. Passenger representatives, including ticket clerks outside of Toledo, are eligible to honorary membership.

ships, active membership being confined to Toledo representatives. The Club will give several yearly dances. It is now organizing a bowling club. It also expects to have a baseball club.

George Schaeffer, ticket seller, Consolidated Ticket Office, spent a part of his vacation working on his flivver in order that one of the young ladies in the auditing department at Union Station will not be compelled to walk to and from work.

The Union Depot and Consolidated Ticket Office Bowling teams have held two contests, each team having won one game. Had not the Consolidated Ticket Office boys reinforced their team with outside talent, the Depot boys would never have known they had an opponent.

Miss Betty Langly, telephone and information operator, Consolidated Ticket Office will leave on her vacation shortly. She is anticipating one of the new \$1.25 dinners aboard the Baltimore and Ohio enroute to Washington.

Division Accountant's Office, Dayton, Ohio
Assistant Correspondent, G. M. McBRIDE

Merry Christmas!

Walter Myers has returned from a pleasant vacation, visiting several cities of interest. At Columbus he spent some time in the Ohio penitentiary. Don't misunderstand me—Walter is a fairly peaceable chap and went there of his own volition.

Donald F. Harker and Myrtle Jane Beck-er were united in marriage at the Holy Angels Church at 7.30 a. m. on October 19. They left on a honeymoon to eastern points. "Don" is the son of C. H. Harker, travelling timekeeper out of Baltimore. Those attending the wedding from the Division Accounting Office where the groom is employed are: Misses Mary Myers, Mary Blandford, Luella Clayton, Gertie Mae McBride, Gertrude Hutzel and Mrs. Frances Townsend, "Dan" Kinninger and J. E. Fortman. Did "Don" get a beauty? I'll say he did.

Miss Sara McKenna spent her vacation in Louisville, among former friends. When Sara returns she will be ready to smile and get busy again.

R. R. Rose is spending his vacation in Sidney or on a farm near there. We understand that "Jack" is interested in chickens. What kind?

Miss Jessie Munch is recovering nicely after undergoing an operation for appendicitis at St. Elizabeth's Hospital. Everybody will be glad to welcome Jessie back on the job soon.

BOYS—Take note. "Ham" says you can have more fun hauling pretty girls around on a hand truck than you can if you buy a Ford and haul them around, and the girls enjoy it a great deal more.

"Joe" Kienhoefer spent his vacation somewhere between Cincinnati and Toledo. "Joe" says he was at home. Yes, but whose home?

Suggestions of the beautiful landscaping and horticulture maintained by the Kentucky and Indiana Terminal R. R. at Louisville, Ky. This property is owned in part by the Baltimore and Ohio and affords our entrance into Louisville

Lima, Ohio

Assistant Correspondent, RAY GARRIGUS

Merry Christmas!

Again our great world completes its mighty swing around the circle and the glorious Christmas Day is at hand. We wish all the officers and employes of the Best and Only Railroad a most Merry Christmas and Happy and Prosperous New Year.

Andy Stratton, yard conductor, is a real "Sherlock Holmes." It seems that two prisoners had escaped from the Lima State Hospital and were wandering around in the north yards, waiting for a freight train to pull out. They asked Mr. Stratton where they could go to get warm. "Andy" directed them to the scale house and then turned the key. The police were called and Mr. Stratton came in for several columns on the first page.

Ed. Bowdle was much troubled with a cold lately. "But I didn't think much about it," he says, "after I took a spoonful of furniture varnish by mistake for cough syrup."

Frank Barrett, car repairman, bought a pair of suspenders at a bargain. The price was so low he felt the wouldn't lose much even if they were no good. "I was wrong about that," he says, "I nearly lost my pants."

Mr. and Mrs. Roger Clay, blacksmith helper and wife, announce the arrival of a baby girl, Evelyn Margaret.

R. T. Ireland, work checker, and "Andy" Waller, car repairer, are on a hunting trip in western Canada. "Red" left with great hopes and chances are that he'll come back with the same thing.

"Sam" Wannamaker is still hunting "house bills."

Britt—"Gracious! Your mud guard is all smashed. Did you bump into something?"

Chew—"No, we were standing perfectly still when a fire hydrant skidded into us."

William Van Worner, freight conductor, was seriously injured in an accident at Sidney. When just out of Sidney, an air hose connection was broken and Van Worner was thrown to the floor of the caboose with such force as to inflict the injuries. He was rushed to a Lima hospital. We hope for his early recovery.

Congratulations! Born to Mr. and Mrs. Roland Baker, twins.

John Sellers, car repairer, and Earl Cornnes, switchman, are both passing around the cigars. Married? Of course!

A Real Officer

By E. W. Spille,
Pass Clerk, Cincinnati

THE Baltimore and Ohio Police Department boasts of one of the bravest officers in the business. His name is C. J. Booth, trainrider, Indiana Division, Cincinnati, Ohio. It certainly takes a great deal of nerve and grit to attempt to do what this man accomplished. The story is as follows:

While patrolling the Yards at Winton Place, Ohio, Officer Booth discovered five men (4 negroes and 1 white man) coming down the Baltimore and Ohio Railroad tracks, about 1.10 p. m. November 10. He stopped them and asked what they had under their coats; they told him they had some cabbage which they found lying along the railroad tracks. They looked suspicious

(Continued on page 64)

Trainrider C. J. Pooth

and Officer Booth began searching them for weapons; suddenly he heard some-one say "Stick up your hands or I'll kill you." As he turned around, one of the negroes who stood beside him, stuck the point of a 38 calibre revolver against his stomach. He threw up his hands and the negro asked him if he had a gun; he replied in the negative and the negro felt in his right hip pocket, in which he carried a hammer. The negro then felt on his left side and discovered his gun. As the negro was about to grab the officer's gun, Officer Booth grabbed hold of the negro's revolver and struck him in the face with his fist and they both fell to the ground, Officer Booth on top.

During the scuffle that ensued the negro bit the officer on the left hand between the thumb and first finger and on the back of the hand, but Booth would not release his hold. While still on the ground he saw the negro was getting ready to point the gun towards his stomach to shoot, and he instantly pulled his gun and fired, the bullet striking the negro in the stomach. After he was shot the negro tried to get to his feet, but fell to the ground on his side. The other three negroes then ran down the tracks and got away. The white man stood there and the officer placed him under arrest. The Patrol wagon was called and the negro was taken to the General Hospital. From latest reports he will live.

This is the type of man that makes up the Baltimore and Ohio Railroad Police Department, which can boast of one of the best organizations of its kind in the Country. We are justly proud of a man of this caliber.

Your Overhead

By Dr. William E. Barton,
In The Toledo News-Bee

ABOUT the middle of the day as you journey, there passes through your car a colored man clad in a white jacket, and distinguished from a Pullman porter by the fact that he also wears a white apron. As he returns he will call out in each car:

"Lunch is now served in the dining car. Meals a la carte. Dining car in the rear. First call for luncheon."

If you make it your rule to go always at the first call, and have washed your hands and brushed your hair a little before in anticipation of this announcement, you will get a better seat.

You are met at the door by the steward, who shows you to your seat. A colored

waiter brings you a glass of water with a lump of ice in it, and fills the remaining space within the glass with water. He also spreads out for you a clean linen napkin. Up to that moment, your meal has cost the company 57 cents.

It cost \$50,000 to build the dining car and you must pay your part of the interest on that sum, and some more for the repairs, upkeep and depreciation. The car is fitted with ranges, refrigerators and tanks, and you must pay for your share of the fuel, the ice and the cost of procuring and filtering the water. The laundry bill is enormous, and a part of it is charged to you. The

steward must be paid, and so must the four cooks and five waiters. This is what makes up the total of your 57 cents, and there are at least 57 varieties of expense to absorb it.

The problem of the company is not how to recover the cost of what it actually feeds you, but to distribute this 57 cents over the prices of the various articles of food you are to order, so as not to make any price prohibitive. For if they charge you too much you will eat your lunch out of a shoe box. So it is a problem in psychology as well as in political economy.

All in all, I rather wonder that they do as well as they do. Don't you?

Where the Trained Man Wins

"Arrangements have been made with the International Correspondence Schools to conduct their system of instruction among the employees of the Canadian Government Railways, as they have been doing for years among the employees of other railroads throughout the Dominion with great success. Years of observation have convinced the management that the work of the Schools is beneficial to railway employees and the service generally."

—CANADIAN GOVERNMENT RAILWAYS. Circular No. 11.

Whether you are in the engineering, operating, maintenance or clerical departments, your advancement will depend largely on the thoroughness of your training. And whether you are going to be a trained man or not—whether you are going to advance or stand still—is largely a matter for you to decide.

If you really want a better job and are willing to devote a little of your spare time to getting ready, the *International Correspondence Schools* can help you. More than

two hundred and fifty of the railroad systems of the United States and Canada have endorsed the *I. C. S.* method of instruction and recommended it to their employees.

You're ambitious. You want to get ahead. Then don't turn this page until you have clipped the coupon, marked the line of work you want to follow and mailed it to the *I. C. S.* for full particulars.

Marking the coupon is simply the act of investigation—in justice to yourself you can't afford to do less—and it doesn't obligate you in the least.

Nicholas H. Toomey

Continued from page 31

sion. The next year he became passenger engineer, and held this position until November 10, this year, when he was retired on a pension. Forty-eight years of faithful service!

George W. Curtis

George W. Curtis, pensioned machinist, Baltimore Division, was born in Baltimore County, on June 23, 1856. In 1880 he entered the service of the Baltimore and Ohio in the old No. 10 Freight Car Shop, Mt. Clare. He was transferred from there to the iron foundry as laborer, then promoted to gang leader. In 1891 he resigned from the service.

In 1899 he was re-employed as machine hand. In 1902 he was made a machinist, retaining this title until his retirement from active service on July 16, this year.

Mr. Curtis says:

"I wish to express my heartfelt thanks to officials and employes alike for their many courtesies to me at all times while I remained in the service of the Baltimore and Ohio."

William H. Cunningham

William H. Cunningham, pensioned engineer, Indiana Division, was born in Gibson County, Indiana, on October 4, 1855. His parents were Marshall and Nancy (Adams) Cunningham.

Mr. Cunningham attended school in Gibson County and later at Lawrenceville and Friendsville, Illinois. Early in 1874 he left school and worked on a farm with his father. In the latter part of the same year he obtained employment with the O. & M. R. R., now Baltimore and Ohio, as section man. He remained here for two years and then went back to the farm.

In 1883 he obtained a position as fireman and was promoted to engineman in 1895, and in this position he remained until he was pensioned.

Mr. Cunningham was married in 1877 to Miss Lydia Truckey, who died in 1891. By this union there are two children living, Mrs. Helen Bennett and Mrs. Mable Mills, both of Indianapolis, Indiana.

He was again married in 1902 to Mrs. Annetta M. Witherby.

James Fitzhannary

James Fitzhannary, pensioned trucker, was born in County Wexford, Ireland, sixty-eight years ago. He came to America at the age of eighteen years, and landed in Chicago, Ill., in 1870, the year before the great fire. He did various kinds of work, until he came to the Baltimore and Ohio in 1896. It happened that "Jimmy" had a sweetheart in Ireland, who came over ahead of him, and he acknowledges that this had something to do with his coming. He was soon married to this lady, Mary Maurice, and they lived happily for twenty years, when Mrs. Fitzhannary died. She

left a son and a daughter to care for and comfort their father. Mr. Fitzhannary entered the service as laborer, Chicago Terminal. In 1916 he was made truckman, and later, sweeper.

"Jimmy" has always been a faithful, hard working employe, and is very grateful to the Baltimore and Ohio for his pension. The boys will miss him about the freight house.

Agent B. S. Rush of Meyersdale, Pa.

WE are glad to pass on to the "man who lives up to his name" the following, reprinted from the Ohio Redpath News Letter of September 1, 1921, under the title:

FLOWERS FOR THE LIVING

We take off our last season's panama to the Baltimore and Ohio ticket agent at Meyersdale, Pa. His name is Rush and he lives up to it.

On the morning of August 25, twenty of us planted our baggage in the waiting room and crowded about the window, fully expecting to spend an hour or two learning the details of transportation to Columbus, New York, Pittsburgh, Chicago and almost as many other cities as there were members of our party. Without the bat of an eyelash or a moment's hesitation, Agent Rush stood behind the wicket and answered as fast as we questioned. He knew the Pullman fare from Cumberland

to New York, Meyersdale to Chicago, Pittsburgh to Columbus, plus war tax. He gave train connections in a half dozen cities as though he had known our inquiries a month in advance. He reeled off railway fares to Zanesville and Chicago, Wheeling and New York, as though that were his steady diet. We do not exaggerate when we say that he answered one hundred and one questions in less than fifteen minutes.

We are for you, Brother Rush, for a life term as G. P. A. of the P. D. Q. To that end we are sending a copy of this unsolicited boost to the G. P. A. of the B. & O.

The Baltimore and Ohio Says So

By JOE MARSHALL, Special Representative
Freight Claim Prevention, American Railroad Association

Let every man on the B. & O.
To loss and damage be a foe;
Don't give it even half a show,
For if you do it's bound to grow.
To every man who does not know,
It is a thing to overthrow,
Which should have been done long ago.
We might say, however, though,
If our thoughts we should bestow
On this menace to our "dough,"
We can kill this thing of woe
And stop the damage overflow.
Stand with me and say 'tis so;
We shall bring the claims down low
As a duty which we owe
To those who use the B. & O.

Hamilton Watch

"The Railroad Timekeeper of America"

Engineer Frank Fitzsimmons of the Rock Island Lines

The Tiny Wheels of the Hamilton Watch Regulate the Big Drivers

On America's fastest trains, it is the Hamilton Watch that helps the engineers to bring their trains in on time. They carry Hamiltons because they have found them to be entirely trustworthy as timekeepers under all conditions of railroading.

Are you worrying along with a slightly inaccurate timepiece? Does the time inspector ever shake his head over your watch? Then it's time for you to think about getting a Hamilton.

When you buy a Hamilton you buy accuracy and durability—you buy a watch

that will give you a lifetime of satisfaction and safety.

For time inspection service, the most popular watch on American railroads is the Hamilton No. 992 (16 size—21 jewels).

Write today for the Hamilton Watch Book—"The Timekeeper." It pictures and describes the various Hamilton models, with their prices, beginning at \$22 (\$25 in Canada) for a movement alone, up to \$200 for the Hamilton Masterpiece. Also other interesting watch information that makes it especially valuable to railroad men.

1922

THE BALTIMORE AND OHIO RAILROAD COMPANY

TELEGRAM

BE BRIEF

Baltimore, Md., Jan. 1, 1922

TO ALL MEMBERS OF THE BALTIMORE AND OHIO FAMILY:

It gives me pleasure to extend once more to all members of the Baltimore and Ohio family, my greetings and best wishes for the coming New Year.

While the year which has just ended has no doubt brought disappointment and perhaps sorrow to many, upon the whole I think we have much reason to feel thankful. The Baltimore and Ohio, in common with other railroads, and in fact with all other industry, has felt the serious depression in business and for that reason has been forced, temporarily at least, to curtail its operations and expenditures wherever possible. In short, the Baltimore and Ohio Company has been forced by circumstances resulting from the war, to face the problem of living upon a lessened income, just as we have all been forced to do as individuals.

As a nation and as individuals we are gradually regaining the habits of thrift, economy and well-ordered industry which existed before the war, and it is hoped this will be reflected in a larger and more profitable business in the coming year, and I trust, with the continued co-operation of all—officers and employes alike—that the Baltimore and Ohio Company and all in its service may secure a fair share of the prosperity which I firmly believe the future will bring to us all.

I have been much pleased by the manner in which Baltimore and Ohio officers and employes of every rank have responded to my request a year ago, for their helpful support and cooperation. This cooperation has been manifested in many different ways, such as efforts to obtain additional business for the Company, efforts to improve the service, to reduce and prevent accidents, to reduce loss and damage, and by a more general desire, or rather a more general effort, to cultivate courteous and sympathetic relations with the public.

I gladly make acknowledgment of my appreciation of your effective and helpful response to my request, and I venture once more to invite your support and cooperation during the coming year, in order that by so working together we may not only be more prosperous and better contented as individuals, but that we may also bring a greater measure of prosperity to the Company with which we are all identified.

DANIEL WILLARD,
President.

HEISER

Brings HARTMAN'S Richly Upholstered 7-Piece Suite

Quarter-Sawed and Solid Oak
Send only \$1 for this complete suite
of library, parlor or living room furni-
ture—seven splendid, massive pieces.

Use it **30 days**, on **free trial**, then if you don't say that it
is even more than you expected, ship it back and we return
your \$1 and pay transportation charges both ways.

A Full Year to Pay

Only by seeing this splendid quarter-sawed and solid oak suite can you realize
how it will add to the appearance of your home. Only by examining it can
you appreciate what a record-breaking bargain it is at our **smashed price**.
Furniture like this—elegant, comfortable, massive—can be bought no-
where else at anywhere near the price, nor on such liberal terms.

Handsome Fumed Finish! TABLE, solid oak with top 24x36 inches.
ARM ROCKER, solid oak with quarter-
sawed oak top rail; seat 18x19 inches. SIDE ROCKER, solid oak with quarter-
sawed oak top rail; seat 16x14 inches. ARM CHAIR, 37 inches high, and SIDE CHAIR, 36 inches
high, with seat 16x14 inches. Table and chairs stand on noiseless slides. BACKS and seats up-
holstered in durable, imitation Spanish brown leather. Comfortable spring seats. TABOURETTE,
16½ inches high with 10-inch top, is solid oak. BOOK BLOCKS, heavy enough to support a
liberal number of volumes. Shipped (fully boxed, "knocked down" to lessen
freight charges) from factory in Central Indiana, Western New York State
or Chicago warehouse. Send the coupon **today**.

Order by No. **112DMA7**. Reduced Bargain Price, **\$37.95**.
Send **\$1.00** now. Pay balance **\$3.00** per month.

Change of Ownership

Patrons of an Indianapolis restaurant noticed tacked on the wall a sheet of paper on which was painted in bold characters: "The umbrella in the stand belongs to the champion heavyweight fighter of the world. He is coming back."

Five minutes later umbrella and paper had disappeared. In their place was another notice: "Umbrella is now in possession of the champion marathon runner of the world. He is not coming back."—*Forbes Magazine*.

Not on the Card

They were in a railway train and were discussing Dickens. "Well," said one, "John puts 'Bleak House' first and 'Martin Chuzzlewit' second." "Excuse me, gentlemen," said a husky voice from the seat behind, "I don't know your pal, John, but you're bein' steered. There ain't no such horses runnin'."—*Fort Worth Star-Telegram*.

A negro employed at one of the movie studios in Los Angeles was drafted by a director to do a novel comedy scene with a lion.

"You get into this bed," ordered the director, "and we'll bring the lion in and put him in bed with you. It will be a scream."

"Put a lion in bed with me!" yelled the negro. "No, sar! Nat a-tall! I quits right here and now."

"But," protested the director, "this lion won't hurt you. This lion was brought up on milk."

"So was I brung up on milk," wailed the negro, "but I eats meat now."

Suspicious Unwarranted

One morning one of the new employees who had never worked on a ten-per-cent-plus job, went to the boss with a grievance.

"Look here," he said, "I may be a new man, but you don't need to have that detective follerin' me around all the time."

"What's eatin' you?" curtly responded the chief.

"That sneaky lookin' guy that's been trapesing around after me the last two days. What's the big idea?"

"Gosh, man," bellowed the boss, "he's not a detective. He's your helper."

Just a Little Better

By W. G. Dee

Foreman, Valley Warehouse,
Cleveland, O.

IF you do your work just a little better than it has been done before, you will be a success no matter what your job. There are two many people in this world who are doing mediocre things, just trying to "get by." But I notice that the biggest people are those who never think they are good enough.

Do your work just a little better than has been done before, and you will have no need for worry.

There is satisfaction only in doing one's best, and doing better today than we did yesterday will increase our climbing ability for tomorrow.

Never think that you are very good at what you do but that you are going to do "better." Thinking and working will bring you to the turn in the long lane.

THE READER AND ADVERTISING

Circulation of the Baltimore and Ohio Magazine is over 40,000 copies per issue, our aim being to place it in the hands and in the homes of practically all English speaking employees of the Railroad. An examination of our advertising will show that it conforms to the highest standards. We do not guarantee it, but we believe that it means exactly what it says, and for that reason feel free to urge our readers to patronize our advertisers whenever they consistently can.

Setting Slope Stake

(From the January, 1920, monthly report of the Department of Public Works of Nebraska.)

"What is that, Mother?"
 "The Rodman, my child.
 His footsteps are weary, his accents are wild,
 His hair how disordered, his eyeballs how blear!
 And see, there his necktie hangs under his ear!"
 "Rod up there! Hold her steady. Go on down the hill!"
 7.8 cut 2.2—No, begosh it's a fill!

Half the roadbed, 13 plus the slope one to one,
 No, it's one and a half, though, as sure as a gun,
 Well, that makes, let's see—O stick her in there.
 It'll do, perhaps the contractor will swear.
 But no difference—we're the big dog in the fight,
 No matter what's wrong, just swear it's all right.
 A contractor don't know beefsteak from bone,
 Now pick up your tools, and let's pull out for home."

Three Days Grace

Maggie's sweetheart, a proverbially tight-fisted Scot, had taken her out for the afternoon, and that was about all. They rode some distance on the trolley, turned around and rode home again. Never was mention made of food or entertainment.

Back within her own gateway, Maggie, who had keenly felt the neglect, sarcastically proffered Sandy a dime.

"For the carfare you spent on me," she said meaningly.

"Hoots, toots, woman," returned Sandy, pocketing the coin. "There was nae hurry. Saturday wad hae been time enough."

—*Railroad Red Book.*

A negro preacher after a sermon on "Salvation Free" proceeded to announce a collection. A colored brother took him to task after the service for not practicing as he preached. "Patience, brudder, patience," said the parson. "S'pose yo' was thirsty an' come to a ribber. Yo' could kneel right down and drink yo' fill, couldn't yo'? An' it wouldn't cost yo' nothin', would it?" "Ob co'se not. Dat's jes' de berry t'ing." "Well, s'posin' you was to had dat water piped to yo' house yo'd hab to pay, wouldn't you?" "Yassur, but,"—"Wall, brudder, so it is in dis case. Salvation am free. It's de habin' it piped to yo' dat yo' got to pay for."—*The Frederickton Mail.*

Johnny—"The camel can go eight days without water."

Freddy—"So could I if ma would let me."
 —*Harpers Bazar.*

My Dog

By Henri Vibert

There is a loyal friend I own
 Who lives for me—and me alone,
 With love notes in his every tone—
 My dog!

He loves just me, nor questions why,
 He lives for me—for me would die,
 Soft, faithful love is in his eye,
 My dog!

He greets me with the morning bright,
 And fairly bounces with delight
 When I approach my home each night,
 My dog!

When I would play he leaps with joy
 And makes me once again a boy,
 His heart is gold without alloy,
 My dog!

If I am gay or I am sad,
 When Fortune smiles—or things look bad
 He's just content to be my Lad,
 My dog!

When'er I go on hunt or hike,
 You find him there, the busy Tyke,
 By moor and woodland, lake or dike,
 My dog!

Whether I be with rod or gun
 He gaily joins in all the fun
 And leads me home when I am done,
 My dog!

Then by the hearthstone's welcome heat,
 He stretches out before my feet,
 And snores and grunts my ears will greet,
 My dog!

When I am laid beneath the sod,
 Beside me lay my gun and rod,
 And I believe I'll find with God
 My dog!

No Better Way to Get a Home

WEVERTON, MD., February 24, 1921.

MR. W. J. DUDLEY,
 Superintendent, Relief Department,
 Baltimore, Md.

Dear Sir—Received letter which contained policy of fire insurance in force, policy of fire insurance expired and several tax receipts; also abstract of title.

I would urge all railroad men to start buying a home this way—it is the easiest and best way. Had it not been for the assistance of the Relief Department I no doubt would not have a home.

Yours truly,

(Signed) A. L. GERHART,
 Telegraph Operator,
 Weverton, Md.

He was a professional conjurer. "Now ladies and gentlemen," he said, with a wave of the hand, "this is the magic cabinet. I invite any lady in the audience to enter this cabinet, I will then close the door, and when it shall be opened again the lady will have disappeared, leaving no trace." There was an impressive silence until a little undersized man in the second row turned to an enormous woman who sat by him and breathed eagerly: "Marie, dear, won't you oblige the gentleman?"

LIGHT AND REDWOOD STREETS

BALTIMORE, MD.

The Fireman

By James Edward Hungerford

Illustrated by Robert L. Heiser

It ain't no fun to shovel coal, for keepin' up a train;
It ain't no cinch to have a mountain run;
It ain't no joke to have your muscles fairly twinge with pain,
When you've got some hours to work before you're done;
A heap of jobs are *easier* than boostin' up a gauge,
To make an engine tear along a track;
Sometimes I get so weary heavin' coal, I reach the stage,
When I feel like every heave'll break my back!

And yet, I love the good old sound
Of hiss'n', spittin' steam;
I love to hear the drivers pound,
And see the rails agleam;
Guess *that's* the reason why I stay
Along, from year to year,
My mind upon that happy day,
When I'm an Engineer!

The Engineer has got a snap, compared with what I do;
The brakey's job is plush, compared with mine;
Fact is, I've got the toughest job of any of the crew,
And perhaps the hardest lay along the line;
It takes a heap of toil and sweat to make a boiler boil,
And keep an engine's pulses all athrob;
Sometimes I get so weary of the grillin', grindin' toil,
That I feel like throwin' up the bloomin' job!

And yet, I love an engine bell;
A cab-floor's pitch an' roll;
The gleamin', roarin' furnace hell,
That eats up tons of coal;
Guess *that's* the reason why I stay
Along, from year to year,
My mind upon that happy day,
When I'm an Engineer!

Can the Railroads Safely Make Further Rate Reductions?

Geo. M. Shriver, Senior Vice-President of the Baltimore and Ohio Railroad Company, and General Chairman of the Accounting Committees, who appeared on December 15 before the Interstate Commerce Commission for the railroads of the country as a whole and for the carriers in the Eastern District particularly, summarized his conclusions, based on the detailed statistical presentation made by him of the financial position of the railroads, as follows:

IT is shown that the net railway operating income of the Class I Railroads of the United States for the 12 months to September 30, 1921, was \$542,409,582, or 2.75 per cent. on the property investment; that because of decreased operating income and increased charges and taxes, the net corporate income has been so diminished that some carriers have been compelled to suspend, and others to reduce, the customary dividends, while some have maintained customary dividends only by drawing upon surplus earned in previous years; consequently, of course, the surplus and margin to sustain credit have been reduced.

Roads Earned Only Half of Anticipated Return

That because of lowered rates, and falling off in traffic, the railroads have failed to earn more than one-half the anticipated 5½ per cent. and nothing towards the one-half of one per cent. contemplated as a contribution towards additions and betterments and to sustain credit.

That the railroads have large accounts pending settlement with the Government, and the manner in which these are disposed of will have a material bearing upon their cash position.

The Eastern carriers have shown that their operating income for the 12 months to October 31, 1921, was \$234,594,277, or 2.67 per cent. on the property investment, and fell short of meeting the fixed charges of these carriers by \$70,000,000.

That when the operating results of this year are restated to reflect the effect of lowered rates and lowered costs to do over again the business of 1921, the estimated net operating income of the Class I Railroads would be, say, \$473,984,331, affording a return of about 5.40 per cent, but without having made any provision for many important items of maintenance which were deferred in that period.

Need Large Sums for Improvements

That it will require extensive work to fully restore the condition of the properties, particularly equipment, to meet the requirements under normal traffic, and that large sums must be raised for additions and betterments, if the railroads are to be prepared to help, and not to hinder, the future commercial and industrial expansion of the country.

In this situation the railroads are not in position to experiment (beyond what they have already done) by a lowering of rates at this time, and having in mind the prime importance to the country of having a strong and effective transportation system, it does not appear in the interest of the public that they should lower rates unless and until the processes now operating towards a pre-war level of costs have been more completely realized.

A detailed statement and chart covering a period of more than thirty years indicates, even without taking into consideration the decreases recently made and arranged for, that freight rates were not relatively higher than the average commodity prices.

This statement and chart also shows that the railroads for a number of years were compensated on a much lower basis than were the producers of other commodities, and that the railroads did not relatively participate in the high prices prevailing from 1915 to 1920.

In other words, the railroads did not realize abnormal prices or profits, and were so less able to respond with lower rates when prices generally declined.

Rail Transportation Again to be the Lowest Priced Commodity

While the preliminary figures for November show again a sharp falling off in traffic, and the car movement reported so far for December indicates an even more serious decline, this is believed to be only temporary (influenced perhaps by the actual decrease in charges with the cancellation of the transportation tax at January 1, 1922, and no doubt in part pending conclusion of this hearing) as the underlying conditions in the United States and the world at large appear to be improving generally.

While currently railroad operating costs are on a basis which affords an inadequate return, the basic elements of cost are declining and will no doubt continue, so that in the not distant future railroad transportation can again be brought to the relative position it had heretofore occupied of being the lowest priced commodity in the country, and continue—as it now is—lower than in any other country.

"This is the Baltimore and Ohio Way!"

Note:

On Friday, January 6, President Willard was looking over the final page proofs of this issue of the Magazine. When he came to the item appearing below, but which was then set in much smaller space on another page, he paused, read it carefully, and pointing to it said:

"This is the Baltimore and Ohio Way. I would like to have every employe of the Company read what Agent Brown thinks and says, in this entirely unsolicited article, of how he feels towards the Railroad. Please arrange to feature it so that as much good as possible will come from so fine an expression of truth, common sense, friendliness and loyalty."—Ed.

What I Would Do if I Owned the Baltimore and Ohio Railroad

By W. W. Brown, Agent, Apple Grove, W. Va.

1. I would use every means to enable this Road to become a good dividend payer, because in so doing I would best promote the prosperity of all connected with it.
2. I would try to reduce Loss and Damage to a minimum.
3. I would handle all freight as if it were my own, and strongly impress upon others the importance of doing likewise.
4. Before signing that legal document known as the Bill of Lading, I would satisfy myself that all articles described therein were in the possession of the Company, and that they conformed in every particular with the Classification requirements.
5. I would be as courteous to the public as if I were operating a department store in a large city where the keenest of competition is met.
6. On my vacation, or wherever I went, I would tell my friends and others I came in contact with about our fair and courteous treatment, our good dining car service, and other essentials that bring trade to our Company.
7. I would ask the lumber man who inquires for rates from the South, to route his freight so as to give my Company the long haul. Ninety-nine times out of a hundred he will do it, provided it does not cost him more.
8. I would practice the strictest economy, thereby helping not alone the Company but all its employes.
9. I would study myself to be approved.
10. Conclusion—I *will* work as though I *do* own the Baltimore and Ohio Railroad in the firm belief that every employe has a real interest in his road.

A Bonus System Which Is Making Good

With the Proven Record of Reduced Costs in Handling Freight at Stations
Come the Statements of the Handlers that They Favor the Plan

GREAT as was the pre-war striving for efficiency in industrial America, post-war conditions indicate that if we are to maintain our industrial supremacy, we will have to reach an even higher standard of efficiency than ever before.

Cheap Foreign Labor

Even current developments indicate this, as witness the influx during the past Christmas season into this country of boat load after boat load of German toys, which found a ready market. Germany was so stripped during the war of its material wealth,—its agricultural, stock raising, and dairy resources, its shipping, steel and iron, its factory facilities, etc., that the payments now being made to the laborers in Germany for the work they do just about enable them to keep body and soul together.

Low Standards of Living

Travelers report the inadequacy of the German food ration and the low standard of living generally among the working classes. This means that labor is being paid very little for its work and that because of this low cost of labor, industrial Germany is able to produce material and ship it to America where it actually undersells our own products, manufactured from an abundance of natural resources, but at a multiplied cost for labor. The same condition applies to a degree in the other war stricken countries of Europe. It is up to America, therefore, in order to maintain its high standard of wages, to put the utmost of efficiency into its manufacturing and commercial effort.

World Conditions Affect Our Work

The illustration of the cheap German toy may seem very far afield from the subject of rail transportation in which we, as railroaders, are all interested. But even these two things, the cost of a German-made toy sold in an American store, and the cost of producing transportation in this country, are related, as are all the other factors involved in the intense competition for world trade already under way.

German toys are, presumably, in part manufactured by power generated from coal. Germany imports practically all her coal, and if it

costs more for the American mine owner to put down coal in the ports of Germany (and the charge for transporting coal in the United States is a factor in this cost) than it costs France or England, we will be undersold in the German market and in other markets, and find the balance of trade rising against us. And this would be a fatal development for the world trade position of the United States because, as a nation producing a great surplus of foodstuffs, coal, etc., above our own needs, we must market the surplus in foreign fields at prices with which we can compete with the prices demanded for the same or similar commodity by other nations.

Efficiency an Individual Problem

The problem of efficiency in the transportation field is therefore not a banking problem, nor one of railroad management and organization alone. It is one in which every railroad worker of the United States should be interested in order to permit him to compete effectively with the poorer paid industrial workers in other parts of the world.

Direct Profit to Employee

The transportation or industrial worker in the United States, however, is interested not alone in this, as it may appear, rather an abstruse proposition, but also in how he may share in the immediate and more tangible results of the increased efficiency which he is producing. And the Baltimore and Ohio, in at least one phase of its operations, is offering this immediate opportunity to the men on its payrolls.

The bonus plan for the handling of freight, put into effect at the Locust Point piers in March, 1921, and since extended to other large stations on the Railroad, is outlined in the following plan issued by J. K. Graham, manager Station Operation:

Uniform Gang Bonus System Applied to Handling Freight at Freight Stations

Purpose—The purpose of bonus is to stimulate efforts of freight handlers; to eliminate waste or time through continual engagement; to increase production based upon reasonable standards and to provide

recognition in the way of increased compensation for employees performing duties expeditiously and in a workmanlike manner.

Plan—The plan can in no way be construed as a piece work proposition. There will be no conflict with present method of operation at stations or change in compilation of essential statistics, but there will be added interest in the promise of increased compensation to employees. The principle of daily or hourly guarantee is recognized in that excess handlings one day will not be offset by falling short of standard another day, so that the handlers have nothing to lose but have an opportunity to increase earnings for efforts in raising production above a reasonable standard for guarantee rates of pay.

Guarantee—Authorized rates of pay will be guaranteed.

Applicable to Stations—Bonus System will be applicable to all freight stations where there is sufficient tonnage handled to justify continuous employment of three or more standard gangs.

Standard Gang-Five Men—1 Tallyman, 1 Caller, 3 Truckers.

Limitation of Gangs—Gangs with less than five men will not participate in bonus, except in extreme cases of shortage of men, when four men may be worked temporarily.

Gang Units—Each gang will operate as a distinct and separate unit, each man sharing equally in bonus earnings, pro-rated upon number of hours engaged.

Checking and Loading as Freight is Received—Stations where outbound freight is checked and loaded as received may not admit of operation by standard gangs. Under such conditions receiving clerks acting in capacity of tallymen will participate in bonus plan with callers and truckers collectively. That is, the total number of receiving clerks, callers and truckers will be considered as one unit. This will require separate standard per man hour, to be determined under provisions for obtaining standard for gangs.

Tonnage—Tonnage will include first and second handling moved through freight houses and freight left in cars which is checked regardless of whether moved or not. Credit will not be allowed for freight left in cars not checked or handled.

Standard Tons—Standard tons will be the highest average tons handled per man hour per standard gang, based upon test for one month at full time at guarantee rates, unless the general average tons per man hour for any one of three preceding months

exceeds the average tons per man hour during test period, in which case the highest average per man hour for any of the four months will be the standard proposed for approval.

Bonus Tons—Bonus tons will be the tons handled in excess of standard tons to be handled per man hour for guarantee rates of pay.

Bonus Rates—Bonus rate per ton for bonus tons will be fifty per cent of cost per ton based upon standard tons per man hour and guarantee expense for one day of 8 hours for a standard gang of five men. When change is made in guarantee rates of pay, the bonus rate will be changed in

hours of all men in gang, tons handled and average tons per man hour.

Statement of Operations—Statement of operations for test period and comparative figures for three previous months will be rendered by agents to superintendents and usual course for approval and authority for establishment of bonus system will be pursued.

Statement of Handlings—Statement for test period will be rendered by days under name of each tallyman, showing date, number of men in gang including tallyman, total hours for all men in gangs, tons first handling, tons second handling, tons left in cars checked, total tons left in cars not

What the Men Think of Bonus

Let us turn now from the plan itself and see what the truckers and tallymen, who have participated in the bonus at Locust Point for the last eight or nine months, think of it.

Said Trucker Howard Hutton, who has been an employe at Locust Point for a number of years:

"I make as high as ten dollars a month through the bonus. It is hard work making it but it isn't killing me and I am glad to have the chance of picking up this extra change."

Said Trucker John Calhoun, five years service:

"I have been averaging between five and ten dollars a month extra, and I like the work better now, with the bonus, than when we didn't have it."

The next man approached was G. Craig, tallyman, who has been in the service a number of years at Locust Point. It will be seen that he was the least enthusiastic of all the men questioned on the plan. He said:

"I am in favor of the bonus in one sense of the word, but I think it has a tendency to overwork the men. For instance, today two of my men are laying off because they worked too hard yesterday to make their bonus, handling oil cake in units weighing 340 pounds and starch in boxes weighing 140 pounds."

Asked how much the two men who

ILLUSTRATION OF BONUS RATE

1 Gang five men 8 hours each.....40 hours per day, \$19.20 standard gang wage.
Standard tons per man hour.....1.5 tons.
40 hours x 1.5 tons per man hour.....60 tons, standard gang handling per day.
19.20÷60 tons per man hour.....32 cents, cost per ton.
50 per cent. of 32 cents per man hour.....16 cents, bonus rate.

Form of Statement and Illustration

Station.....Month.....1921

relative ratio.

Time Keeping—Form 765-N, Time Sheet, will be used by tallymen, who will show full name, number and names of caller and truckers, and time of each, to bear approval of foreman.

Tonnage will be compiled on daily time sheet by entries under headings—Inbound, Outbound, Transfer and second handling—showing on same sheet, average per man hour, bonus tons, bonus rate, bonus earnings and distribution per man.

Bonus earnings per man per period to be entered on pay roll under head of piece work and included in aggregate earnings.

Handlings to be Posted—Handlings will be compiled and posted each day following the day work is performed. This record will show name of tallyman and number of men in gang including tallyman, total

checked, average tons per man hour exclusive of tons left in not checked.

Total hours and tons for each gang, average per man hour for the month. Summary for all gangs and average per man hour. Comparison with total hours, tons and average per man hour per gang for each of three preceding months. Summary for all gangs and average per man hour for each of three preceding months.

DATE	MEN	TALLYMAN TOTAL HOURS	TONS 1ST HDLG.	TONS 2ND HDLG.	TONS CHKD LEFT IN	TOTAL TONS	TONS NOT CHKD. LEFT IN	TONS AVER- AGE PER MAN HOUR
1	5	40	48	10	2	60	1	1.5
2	5	40	48	20	2	70	2	1.75
3	5	40	50	20	0	70	0	1.75
Total		120	146	50	4	200	3	1.66

Left: Gang of F. H. Born, platform foreman, who has been in the service for 31 years. Right: Tallyman G. Craig and his gang of truckers

Left: Tallyman J. P. Ward, who entered service in 1915, and his gang. Right: J. M. Garnett, tallyman, who entered service in 1889, and his gang

laid off had made the preceding day, he said that each one of them had made a bonus of \$3.50 in excess of their standard guarantee. Mr. Craig's bonus average per month has been in the neighborhood of \$12.00. In contrast to his statement in regard to the men overworking themselves, was the opinion expressed by Tallyman J. M. Garnett, who entered the service in 1889, as follows:

"I have never seen a man in my gang overwork himself on account of the bonus. It is a benefit to all of us. I have made as high as fifteen dollars a month and as low as eight dollars a month."

Said Trucker C. Wancowicz, who entered the service in 1903, and has the reputation of being an unusually good worker:

"My highest bonus has been nine dollars per month. Whether the bonus is big or small depends on the kind of freight we are given to handle. As for me, I am always glad to get a chance at freight like barrelled apples, barrelled cement, baled cotton and oil cake, because it means that I can increase my tonnage and make my bonus."

Trucker Clark said that he never felt played out at night and that he was glad to pick up the extra eight or nine dollars per month of bonus money and do the extra work for it.

In relation to the statement of Tallyman Craig that under the bonus plan it was the tendency of the men to overwork themselves, Tallymen Garnett and Ward said that only infrequently do they find a man who is so anxious to run up a big bonus that he overdoes it and that in their opinion this is unmistakably the fault of the individual and not of the bonus plan.

Foreman J. A. Johnson, who has charge of Piers 6, 7, 8, 9, 10, said that the bonus plan was unquestionably a good thing for the men who make it and for the Company, and that his only objection to it is the fact that

the plan does not permit of the participation of foremen in the bonus. He maintained that under the bonus the foreman's job is much harder to handle than under the no-bonus plan, because the distribution of the various kinds of freight to the various gangs has to be handled much more carefully. Otherwise each gang would not have an equal chance of making a bonus by being given their fair proportion of freight which is shipped in compact, heavy units, and which permits of a large amount of tonnage being handled.

In this connection it should be said that there are certain kinds of freight of such bulk and light weight that, no matter how efficiently handled, do not run to a sufficient amount of tonnage per gang day to enable the men to make a bonus on it. Such freight consists of loose hides, inch lumber, glassware, clothes pins, light import case goods and, generally, L. C. L. shipments. In the heavy unit weight class come benzol in barrels, burlap in bundles, canned goods in cases, car wheels and in fact anything which, because of the size and weight of the units, pushes up the tonnage quickly.

Robert Barkley, general foreman at Locust Point, and whose service record goes back to 1877, said that in one respect the present time is a particularly good one to bring about good results from the bonus plan. The large supply of labor permits of picking the best men, and slackers have poor chance of retaining their jobs because their fellow workers in the gang will not stand for their slackerism, which, if permitted to continue, cuts down tonnage and eliminates the chance of their making the bonus.

General Observations

The lowering of the per ton cost of handling freight since the bonus plan was put into effect at Locust Point, has been most gratifying. It has

meant an appreciable saving in the expenses of the Company, a most desirable thing, particularly during a year in which business has fallen off so considerably and when difficulty has been experienced in reducing expenses.

It should be clearly understood that the bonus system does not in any way affect the eight hour day or the standard wage prescribed for employees by the United States Railroad Labor Board. The bonus plan is worked out on a daily basis and if, on one day, a gang does not make the standard of tonnage which the test period has shown to be a fair one, this has no effect on the same gang's attempting on the succeeding day to exceed the standard tonnage and hence make their bonus.

Here there might appear to be a chance for certain gangs to deliberately ease up and fall way below the standard of tonnage handled when trucking bulky and light unit weight commodities on which they are unable to make the bonus. Such, however, is not the case, because gangs are assigned in turn to handle such non-bonus producing freight and are anxious to clean it up as quickly as possible so that they can get to the more compact and heavier unit freight which offers the possibility of making the bonus.

Importance of Good Tallymen

It has been proved that competent tallymen have much to do with the efficiency of the gangs. Methodical, experienced and industrious tallymen are able so to arrange the work for their gangs as to bring about the best results.

The number of men in the gang also has a bearing on the tonnage handled. For instance, it has been shown that the tonnage per man hour is relatively low when there are seven or eight men in the gang as compared to the handling when there are only five or six men in the gang. The

larger number of men seem not to be able to work as efficiently as the smaller number.

The effect of good supervision is also shown by increased tonnage being handled through the adoption of certain means and devices. For instance, where freight is being handled in small packages and a number of these packages can be placed upon a truck, it has been proved that the addition of one extra package to each truck load has meant the difference between not earning the bonus and earning it. The drop truck system has also proved helpful in certain cases. This system permits of extra trucks being available for truckers who, having delivered a loaded truck where freight is being piled or stored, do not

have to wait for it to be unloaded, but drop it, pick up an empty truck and return to the place of loading; there they do not have to wait for their truck to be loaded, but drop their empty truck and pick up a truck which is already loaded for them.

Conclusion

From every viewpoint this bonus plan is proving itself successful and we are confident that every station adapted to its use will not alone produce greater efficiency in handling freight for the Company, but will also have on its payroll the names of truckers and tallymen who will be glad that they have been given the opportunity to share in the benefits of the plan.

the transportation companies and themselves there is, always has been and always will be, a mutuality of interest.

Agents of the Baltimore and Ohio have taken an unusual interest in the "Perfect Package" drive, if the activities of the agent-operator at Kanawha, W. Va., and his efficient co-worker, whom we introduce on this page, are criterions by whom we may judge others who are serving the Baltimore and Ohio in like capacity.

The representatives of this great railroad system at Kanawha, W. Va., are none other than L. W. Graham and his wife—the latter second trick operator and clerk—than whom there is none more efficient on the Monongah Division. She is a helpmeet of Mr. Graham's in the strictest sense of the word, and in turn Mr. Graham is ever careful of her and stands nearby to lighten her burdens when occasion requires. They have put their hearts into the drive for "perfect packages," talking it up among shippers until *their* hearts, too, were in it.

In all shipments that have gone out from this point during the present month Mr. Graham could not have been more careful and painstaking had they been his own, and it is not too much to say that shippers have never found him otherwise at any time. He adheres religiously to the paraphrased scriptural injunction, "handle other shipments as you would have others handle your shipments." Such a statement from a disinterested person concerning a railroad employe may appear rather strange, but that it is the truth, unvarnished, every shipper at this point will attest.

The accompanying picture shows Mr. and Mrs. Graham on the station platform looking after the interests both of the railroad company and the public. Mr. Graham is shown in action, preparing an outbound shipment, using marking brush so as to prevent its delay, going astray or possible loss in the event the card should become mutilated or torn off—a most estimable precaution.

Mr. Graham has been in the service of the Baltimore and Ohio for the past thirty years, and is a "booster" for every good feature connected with it. Mrs. Graham has been in the service for twenty years, her efficiency as an operator having elicited words of praise from her superiors. She enjoys the thrill which attends the handing on of "19" train orders as trains speed by at a lively clip, and she never delays them whenever it is possible to keep them moving.

Perfect Handling of Perfect Package Month by Kanawha Agent and His Helpmeet Wife

Shipper Writes Unsolicited Appreciation of Team Work of These Employes

By R. Allen, Shipper

NOVEMBER, 1921, will long be remembered as "perfect Package Month" by the vast army of employes associated with the Railroad and express companies.

That the campaign for proper marking and packing of shipments, whether by freight or express, has been highly successful, goes without saying. In various and sundry ways the campaign has meant the saving to the railroads and express companies of thousands of dollars by reason of the fact that shipments destined to distant points have, in

almost every instance, reached consignees intact. And again, the campaign has been educational from a shipping point of view. Shippers are beginning to understand as never before that it is to their interests as much as to the interests of the transportation companies to have their packages, both large and small, done up as neatly as skillful hands can make them; and in the campaign which is drawing to a close it may be said that it has inured to the benefit of all, as shippers realize now, perhaps for the first time, that between

A "pair" of agents who "trump" two tricks at Kanawha, W. Va.

Better Letters

By George Dobbin

Freight Claim Department

A LETTER is not more a matter of English and spelling than of psychology. The idea in question is clear as a picture displayed under a strong light, so it seems to us, and the problem is to paint a word picture that will transfer this mental vision to the mind of the recipient of our letter without changing it in any way during the process. The use of hackneyed phrases and meaningless expressions which are supposed to convey various sentiments intended to soften the blunt statements apparently necessary in the compositions of some correspondents, is a practice on a par with the destroying strokes of the brush of a mediocre dauber upon a masterpiece. The effect is the same—both persons ruin the original clarity of the original idea by obscuring the real meaning and making it more difficult to grasp.

How often we burden our stenographers with or have to wade through such meaningless phrases as:

"I beg to acknowledge receipt of—"

"Permit me to advise that—"
 "I take great pleasure in—"
 "I beg leave to call your attention to—"

These phrases are not in the letters of the efficient correspondent. He gets right to the point, using simple, direct English and conveying the thought in the fewest possible words consistent with courtesy.

Some of our errors in this respect come from a striving after ornateness or a new way to express an old thought. Take the case of the conscientious but indifferently educated and directed supervising clerk. He sent a letter to the printer to have 5,000 copies of it made, and he started it:

"Your epistle of the — inst. is at hand."

The printer immediately caught the misuse of the word "epistle" in the sense of "letter," and it required quite a bit of persuasion on his part to get the young man to the dictionary to see that the definition of "epistle" as a letter is "more formal than letter and especially applied to ancient epistolary writings of sacred character or of literary excellence; as the epistles of St. Paul." The sending of that letter would have caused much merriment among the recipients

but it would not have reflected much credit on the young man or his organization.

Correct Speaking Helps

The continued practice of using correct English in all our conversations will greatly improve our letters if we make it a practice to dictate in the same style as we speak. The elimination of slang and those supposedly "humorous sayings" from our speech will be reflected in our writings. And, as the mind methodically places one thought after another in a clear and consecutive manner from pure force of habit, our letters will become perfect reflections of our coherent thoughts, as apparent to the writer as to the person for whom intended, because the true meaning will not be hidden by a lot of stereotyped and worse than useless phrases.

Every time a letter is written, that intangible but absolutely essential part of any successful enterprise, GOOD WILL, is being added to or subtracted from.

Don't let the reflection of your personal grouch hurt OUR ROAD.

When you write, remember that you do so in the name of the Railroad and do your best to uphold its reputation for fair dealing and courtesy.

HERE ARE SOME OF OUR LITTLE FOLKS WHO HAD VISITS FROM SANTA CLAUS

1. W. D. Lindsay and his granddaughter, Dorothea, whose daddy is a helper in Cumberland shops. 2. The little brother of Marguerite McDonald, Staten Island, who draws pictures for the Children's Page. 3. Anna Shipley, 2 1/2 years old daughter of F. H. Ways, Cashier's Department, Camden Station. 4. Katherine Anna, 17 months old daughter of Section Foreman J. L. Shannon, Lebanon, Ill. 5. Jack, son of J. Deshey, Locust Point. 6. Merrill, son of F. D. Green, Cashier's Office, Camden Station. 7. Bernardine Louise O'Connell, feeding her geese. Her daddy is in the Division Accountant's Office, Dayton, Ohio. 8. Frances Riley, Dorsey, Md., and her pets. Frances is a Children's Page contributor. 9. Cecil A. Brown, 5 years old, whose daddy is a tariff compiler, Tariff Bureau, Baltimore, Md.

The Greatest Monument to the Loyal Order of Moose—"Mooseheart," the Home for Orphan Children

Some Observations on Industrial Fraternalism

BY HON. JAMES J. DAVIS,
Secretary, Department of Labor,
Washington, D. C.

ABOUT thirty-five miles west of Chicago and a mile or two beyond the town of Batavia, Illinois, the traveler will notice a community of buildings and houses set in the typical rolling farmland and woodland of that locality. The name "Mooseheart" may be seen at its winding entrance. Within that entrance is an enterprise—we prefer not to call it an institution—which it has given the Order of the Moose the greatest pride and satisfaction to develop. Here are 1030 children, who are as different as possible in age and individuality, but who are alike in once having been helpless orphans. These are being trained for usefulness to themselves and to their country.

Brothers Who Know Not Each Other

Years ago, when I was a mill-hand in Pittsburgh, it was a common sight to me to see the bread winner of the

family brought to his home from the mills either fatally injured or killed outright through some unavoidable accident. What that tragedy meant to the household called upon to bear it, no one can know. No one can picture, who did not see it as I did, what sorrow would follow. I have seen families thus left without a head and without support, scattered to the winds. I have known brothers in such families to drift apart and sometimes to lose track even of their names, so that in future years they have not recognized each other, even if some whim of circumstance had brought them together.

A workman once said to me, "You are fortunate in having your parents and brothers with you. I have brothers also, but I have not seen them since boyhood. I have not the slightest idea where they are or what their names are. They are strangers to me."

The sight of these orphan children, forced into the world to work at a tender age and unequipped to compete with the educated, so impressed me that I determined that if the time and opportunity ever permitted, I would interest public-spirited people in the founding of some community planned to take care of just such cases as these helpless orphans. Now that enterprise, established in a modest way some years ago, has grown to a usefulness that gives us one of the great satisfactions of life. Here we welcome the children of Moose members who have died without the means to provide an education for their children. Year by year this enterprise grows in equipment and resources. Yearly the number of orphans coming to us increases. We are planning to establish in the near future, similar enterprises in various parts of the country. And I believe

Loyalty Hall, boys' dormitories at Mooseheart, the home and school for children of deceased members of the Loyal Order of Moose, Mooseheart, Ill.

Some of the fatherless kiddies at Mooseheart. Did you ever see a happier or more attractive group?

that for all the good that our many fraternal organizations are accomplishing for America and Americans, this one of ours takes high rank for the character of its service.

Some Come with Their Mothers

At Mooseheart we accept children of any age; some of them are so young that their mothers come with them. In fact, we have provided a home there for mothers also, so that they may be spared the pain of any parting and enjoy instead the comforts of a home for themselves and the pride of watching their children blossom under the influence of a friendly care and an educational system as good as, or even better than, the schooling enjoyed by the well-to-do.

Babies have been born at Mooseheart. They stay with us, not as inmates of an institution, but as contented and happy brothers and sisters and playmates, until we have prepared them to enter the battle of life with a training that insures them the utmost measure of success within the abilities that nature has given them.

A Trade to Depend On

The training we give these children is of a double nature. Years ago I became convinced, from my own experiences and observations, that no fortune is secure from the hand of circumstance. The most prudent man, having made the most cautious investments, may find near the close of his life that his best foresight has been defeated; he may see his fortune

eaten away by circumstances beyond his control, so that at his decline he has nothing to give to his family. The soundest man may be stricken down in the years of his success or in the years of his preparation for success; his health may fail him, or some accident may befall him so that his income is reduced or obliterated. In short, the vagaries of chance are so many, so subtle, and so unexpected that no one may feel absolutely secure in the best of circumstances. It seems to me that the prudent thing for every person is that he be provided with training in some trade, so that if disaster cuts short a promising professional career, he may not suffer the humiliation of becoming a charge on charity, but that he may still maintain self-respect and the earning of an honest living.

With that end always in view, we give our children at Mooseheart a double training. At the earliest school age they are placed in the kindergarten. There they begin to receive the most scientific and yet the most human education that we can devise. Skilled experts have been called in to mould this system of education. From this time onward, that system is taught to all our children alike, through the primary and grammar grades to the finish of the last year of high school. The system is almost the only one of its kind now and we are constantly improving it. The child who enters Mooseheart as a helpless orphan, and who might otherwise have been pushed into the battle of life without a weapon whatever, to fight onward to success, is enabled to enter the world instead

with a mental equipment equal to the best enjoyed by the children of the more fortunate.

This is only a half of the training received. The other half of the training consists of education in a trade. The trade may be printing, or carpentry, or farming, or anything within the preference or capabilities of the child who selects it. Each child is guided in the selection of his trade by wise and humane experts skilled in vocational work, so that each of these children undertakes the occupation for which his tastes and aptitudes are especially fitted. The result is that when our wards have reached the age of graduation from high school, an age at which the world expects them to make their place in it, they go out with an education of the head such as to enable them to take any place that their abilities and character may entitle them to, and with a manual training that will support them in any hour of need, and at all hours, in case the young boy or girl has been denied by nature the intellectuality necessary to what we call a career.

Our Graduates Enter Colleges

Many of our recent graduates have been so quickened mentally, their ambitions have been so stimulated, that they have gone through our high school and have entered college with high hearts and with a will to endeavor that must insure them progress in some professional or business or artistic career. But if these high hopes should fail them, they are still able to take an honorable if not a high place among their fellows, and

all are virtually insured the possibility of earning a livelihood.

Systematic, Purposeful yet Real Play!

Nor is this all. We are not content with teaching our children only to work. They are taught to play. They live a life in the out-doors. They may work or romp over our thousand-acre farm. They are encouraged to take up athletics. Their bodies grow as their minds gain in knowledge and as their hands gain in cunning. More than this, they are taught the love of beautiful things, an appreciation of nature, a love and an understanding of good books, proficiency in music, and a sense of art. We try to quicken their interest in the current events of the day. So that these children of ours are more than workers; they go out to become useful citizens, but even more than that, they are fitted to be interesting companions to each other and to anybody. They are not only enabled to make a living and a place for themselves, they are trained to enjoy life and make the most of it.

We feel justified in regarding this enterprise as a real expression of humanity's regard for humanity. We like to think of it as a practical and useful expression of the spirit of fraternity. We hope to see more of these enterprises established about the country. We want this work to go on and to broaden and increase in usefulness; we want our words of fraternity to mean something.

"Moose" Popular among Railroaders

All this may not be news to many of the readers of the Baltimore and Ohio MAGAZINE. A great number of railroad men, many of the great executives as well as hundreds of the employes, are already members of the Moose. They already know something of Mooseheart and already share in the benefits of the Order—the sick benefits, the burial expenses, the association of a congenial brotherhood during life, and the privileges of a home that we open at Mooseheart also for men broken in health, wealth and years—all these open, at a fee made purposely low, to any white man of good character and of any race or creed. Mooseheart and its care for the orphaned children of Moose members is only one, though perhaps the best, of the privileges of the Order.

Fraternalism in Industry

Nor am I saying that Mooseheart is the only possible expression in practical form of the spirit of fraternity. And by fraternity I do not

mean only the bodies of men in the various orders we know. I mean fraternity in the broadest sense. It is something that we all can practice in the most practical form. As Secretary of Labor, I am constantly seeing the need of a practical fraternity in industry, and I am constantly preaching it as a gospel in all the controversies that are referred to me for settlement. For too long a time we have been regarding the employer and the employe as two hostile antagonists, whereas we should regard them and they should regard each other as friendly partners in the common business of producing wealth for themselves and for their country.

It seems to me unfortunate that our magazines and newspapers regard industrial controversy, strikes, lockouts, and similar misfortunes as the sole items of industrial news. Discord seems to be the best advertiser. Harmony sits tight and saws wood. Thus we get an exaggerated idea of the amount of disturbance in American industry. We lose sight of the fact that the great body of it goes smoothly along its way, with friendly feeling, friendly understanding, and full sympathy between managers and employers and their men. No industry can succeed in a state of warfare, or when the Boss and his men are in constant antagonism. America has grown great because her industry is managed better than that. We are rich as we are because, in the main, we get on together as well as we do.

But there is always room to preach the gospel of genuine fraternity in industry. We never can have too much of it. We are all so eager for success, we are all so ambitious for advancement, and competition among us is so keen, that even the most confident man, the most humane employer, will get at odds and fly into fits of impatience. Good judgment deserts the best of us at times. Harmony and good fellowship in industry is like Liberty in a nation, in that both come to us only at the price of eternal vigilance. For that reason fellowship in industry should and must be more than a word with us that we like to spout on state occasions. It should be an everyday working rule with every one of us. No man can be happy at his work while he is in a state of hostility to his Boss. The manager himself may be successful as you please, but in his heart he is not a happy and contented man, he has not his own self respect, if he is not sure that he enjoys the respect and good will of his men.

Nothing in industry, in any indus-

try, no amount of high wages, no volume of profits can make up to us the bottom satisfaction that every man must find in his daily occupation, whatever that occupation may be, high or low. That bottom satisfaction is the comfort and contentment and peacefulness and happiness of getting on well with his fellow workers, be they high or low. Fellowship not merely makes for the contented man, and the contented group of workers in each individual industry, it makes for successful industry as a whole, it makes for a contented country, it makes for a country of citizens who make their country happy because they themselves are happy.

It is not for me alone to preach good fellowship in industry; it is for you who read this to preach the same gospel, every one of you, not once in a while but every day. It is not enough that you preach it; nothing will do but that you practice it as well. I am willing to give a written guarantee that fellowship, as an actual, practical workday principle in American industry, faithfully observed by us all, will make this country once more the prosperous, peaceful and progressive nation that it was six years ago before the curse and disruption of war.

Section Foreman Meier on the "Think and Act" Drive

THAT the "Think and Act" Drive and its mission have gotten into the hearts of the men in our rank and file is suggested by the following letter sent to Division Engineer Chamberlain of the Toledo Division by Foreman Meier of Section 6 at Kirkwood, Ohio:

Your "Think and Act" request is at hand. Here is the way I feel about it:

Those two, Think and Act, go hand in hand. "Think" is brain work and "Act" is hand work. Now to think and act in the right way, I must have the interest and welfare of my employer at heart. In other words, I must think and act all the time under any and all circumstances, as though I were running my own business. To do this I must think about Safety, Economy, Faithfulness, Honesty and so on. But I must not only think about them but I must act on them and act promptly and with good common sense. If I do all this, I not only think and act for the welfare of the Company but also for the welfare and safety of my fellow workmen, and for the public.

Thinking it's better to think two times before acting once, I am, etc.

Mr. Meier has coined a most sentiment phrase in his last paragraph—"to think twice before acting." Let's have more of this spirit.

The Cumberland Division Vouches for the Truth of This Story

At sunset one evening during the month of November, the trainmaster, accompanied by two other division officers, coming down the Petersburg Branch on a motor car, flushed a flock of six wild turkeys which were feeding along the track.

A wail of regret went up for the reason that no one had a gun. But the trainmaster was equal to the occasion and said, "steady boys, watch my smoke."

He turned on the electric spot light used as a headlamp, flooding the track ahead with a very bright light, through which the gobbler flew just a few feet above the track. Giving the car more gas it was but the work of a moment until a position directly under the flying turkey was obtained, when up reached the trainmaster, grabbed the bird by the legs and thus, without the firing of a shot, bagged the choicest Thanksgiving dinner of the season.

The Old Fifty-Two

By Dr. William E. Barton,

In the Cincinnati Post

MANY years ago there was a World's Fair in Buffalo. And there was a Railway that ran into Buffalo from the region toward the going down of the sun. And its officers said among themselves, Go to, let us run a train against time, and beat the World's Record or a Long Run.

And they took two fine new Locomotives that had been built to haul the Empire State Express, and they brought one of them to Chicago, and the other they placed at Collinwood, which was midway and nigh into Cleveland.

And the first of those fine new Locomotives left Chicago hauling a Baggage Car and a Day Coach and a Parlor Car. And in the Parlor Car were the officers of the company. And they had Instruments whereby to Register Speed.

And the fine new Locomotive pulled out of Chicago and hastened toward the Sunrise. And it made a good run, but when it pulled into Collinwood, it was Three Minutes under the World's Record for that distance.

And the Officers said: This will never do. The other new Locomotive must do better.

And as they were starting to hook up the other new Locomotive, behold, they discovered a Broken Valve. And they said, We cannot use that Locomotive.

Then were their hearts heavy.

But they said, Give us an Engine of some sort, for we must get to Buffalo.

And the Yardmaster said, Behold, we have only one Locomotive in the Yards with steam up and this is Old Fifty-Two—that years ago went off the main line and hath long been hauling Local Freight on a Branch Line.

And the Officers said, Give us anything that hath Wheels and a Boiler, for we must get on to Buffalo.

So they hooked up Old Fifty-Two.

Now the Engineer of Old Fifty-Two was no longer young, but in his day he had been a Great Engineer, and he knew his Engine. And he said,

Old Girl, we will give them a Run for their Money.

Now the officers were sitting in sackcloth and ashes, when they chanced to look out of the window, and behold, the Telegraph Poles went by like a Picket Fence. And they looked at their Instruments, and behold, they were going Sixty-Four Miles an hour.

And they began to Sit Up and Take Notice.

And after a time, they looked, and Behold, they were going Seventy Miles an Hour.

And they became Greatly Interested.

And the fireman was sprinkling in the coal, and keeping the steam pressure just where it belonged, and, behold, the train climbed up to Eighty-Four miles an Hour.

And when they pulled into Buffalo the telegraph instruments along the way were hot with the reports of the flight of that train.

And the World's Record for a long-distance run was broken.

Now listen unto me, all ye men who stand idly upon life's Side Track thinking that there is no great place in life for you. Hauling freight on a Branch Line is no disgrace, but highly honorable. Yet are there men who are fooling away life on Short Hauls of Less Than Carload Lots, who ought to get out onto Life's Main Track, and actually Get There.

I am no longer young, but I am running on the Main Line, with the Throttle Wide Open, and the Track Clear; and I invite other men who are no longer young, but who are capable of Going Some, to back out of the Round House and undertake some job worth while and renew their Youth.

A Good Example of How Not to Load Freight

By M. W. Jones

Secretary, Charleston Division Freight Claim Prevention Committee

A recent arrival at Weston was a car containing some 100 boxes of "pop," loaded in the manner shown in this picture. Car contained in addition to the pop 20 bags of feed and 50 bags of bran, loaded on a floor which had

"Pop" which looks as if it had accumulated a "jag"

molasses on it, which had not been cleaned off before loading. Fortunately the pop did not break, and lading was damaged very slightly, but a good way to prevent claims would be to see that such stuff as this is loaded properly, and also that floors are clean before damageable products are loaded.

Airplane Picture of the Capitol

Washington

Who created it—who planned it—and how it was made the most beautiful capital city in the world

AT the beginning of our national existence, Congress was like the proverbial Arab—a wanderer. Its places of meeting were usually determined by force of circumstances. Not until 1800 could any one community really be called the seat of government.

Just where the national capital should be located was a problem of no easy solution. The rivalry among the states was keen, for each one coveted the honor of having the capital city within its borders. Many places, now almost unknown, were assiduously put forward by their citizens as the logical and permanent seat of government. New York, for example, urged the town of Kingston. Morrisania, the home of the Morris'es, was also offered. Maryland claimed Annapolis as the ideal site, also Charlestown. The legislature of New Jersey offered Nottingham, Elizabeth, Trenton and Princeton. Williamsburg, at that time the capital of Virginia, and Germantown, Philadelphia's choice, also presented their claims.

General Washington, with characteristic foresight and prudence, recognized that states as well as men are apt to be selfish. He quickly foresaw that the only solution of the

problem lay in compromise, and advocated the setting aside of a tract of land that should belong to no state in particular and all states in general. After much discussion the decision was taken, and the offer of Maryland and Virginia to cede to the Federal Government a certain section of land on the Potomac, was accepted. This Federal territory was then named the Territory of Columbia, but after many years it was changed to the District of Columbia.

To this city was given the name of the one man whom all Americans united to honor, and the capital of the nation was called the City of Washington. Washington himself, however, modest as he was great, never associated his name with it, but in speaking and writing he always called it the Federal City.

Who Planned It?

Washington, the man, had a vision of what Washington, the city, should be like. He communicated these impressions to a Frenchman—Peter Charles L'Enfant—who had fought for American freedom, and for whose genius as a civil engineer Washington entertained the highest regard. To

him was entrusted the planning of the Capital.

L'Enfant proceeded on a scale at once so generous, so colossal and, apparently, so impossible, as to inspire the ridicule of many well meaning men in the councils of the Government. While they admired the conception of the plan, they were unsparing in their criticisms of a "project of such dazzling magnificence and unheard of costliness."

But Washington looked beyond the needs of the immediate present. He was building for a future Republic whose destiny, he saw, was to be a world power of the first magnitude. Undaunted by the criticisms of the project by many who were in his confidence, he ordered the execution of the proposed plan with all of its original elaborate embellishments unchanged.

L'Enfant took Capitol Hill as the pivot around which his scheme of planning was to revolve. This was to be the hub of his municipal wheel, and from it streets and avenues were to radiate in much the same fashion as the spokes in a wheel, intersected by cross streets and liberally punctuated with parks. These streets and avenues were named after the states of the Union.

Made Seat of Government in 1800

The city very slowly grew out of the chaos of forest and swamp in which it was built. The Government took possession of it in 1800. It was as yet far from completion. The White House at one end of Pennsylvania Avenue and the Capitol at the other end were as yet unfinished. This thoroughfare was a broad, muddy street, fringed on both sides with a thick growth of underbrush in all of its pristine wildness.

Many foreign visitors to our Capital in those days were wont to laugh more or less derisively at its unkempt streets, shacks, unfinished public buildings and frontier-like aspects. It is said of Thomas Moore, who visited Washington in 1806, that he sneeringly referred to it as a "pretentious impossibility."

Viewed in its roughness in those days, such uncomplimentary remarks may have had more or less justification. In fact, for sixty years Washington was far from attractive.

Not until after the close of the Civil War and when this country became more truly and more intensively American than ever before, did the realization for the need of a capital city of real pretensions and beauty manifest itself.

It was then that our Capital began to assume something of the grandeur that Washington visioned and L'Enfant planned. Hills were leveled, swamps drained and streets laid out and finished. New and beautiful buildings were erected; fine residences sprang up here, there and everywhere. Thousands of beautiful trees were planted. Parks were skillfully laid out and richly adorned with plants of every description.

The population grew with amazing rapidity, and the new Washington that you see today—the city that for so many years stood at a standstill and seemed destined never to be any different—is the tangible evidence in stone and metal of the great dream of the Father of our Country.

New St. Louis Division a Consolidation of Indiana and Illinois Divisions

WITH a view to effecting more economy in the operation of the Southwestern lines of the Baltimore and Ohio Railroad, on January 1 the Company consolidated its Indiana and Illinois Divisions into the "St. Louis Division," with headquarters at Washington, Ind., the central point between Cincinnati and St. Louis.

With this rearrangement, C. G. Stevens, formerly Superintendent of the Illinois Division, becomes superintendent, with the following staff:

This arrangement is in line with the Company's aim to effect economies wherever possible without danger or detriment. The change was decided upon only after the subject had been given the most careful study from various viewpoints for some time past.

The mileage of the consolidated division will be approximately 640 miles, covering the main line and branches between the cities of Cincinnati and St. Louis, composed of 400 miles of the original Illinois Division with its branches to Springfield

and Shawneetown, Ill., and 240 miles of the Indiana Division, including the line to Louisville, Ky.

The territory embraced in the new division can be readily handled from the new headquarters at Washington, Ind., which is conveniently located at the center of the division.

Hanford MacNider, National Commander, American Legion

HANFORD MACNIDER, National commander of the American Legion, was born October 2, 1884, at Mason City, Ia. He was graduated from Milton Academy, Milton, Mass., in 1903, and from Harvard College in 1911.

He served on the border as a first lieutenant, Second Iowa Infantry. At the outbreak of the World War he entered the officers' training camp at Fort Snelling and was commissioned as second lieutenant.

He arrived in France September 20, 1917, as an officer in the Ninth Infantry. During his overseas service he was promoted to major and later served as lieutenant colonel of infantry. He was wounded at St. Mihiel and holds the following decorations:

Distinguished service cross and one cluster, chevalier de legion d'honneur, croix de guerre (five citations, five palms, one gold and one silver star), fourragere and the Italian war cross. He was cited three times in general orders.

Before his departure from France he served as adjutant of the Second Division under Major General John A. Lejeune.

Since his return to civilian life he has been prominent in Legion work in his state, having served as commander of his post at Mason City and later as commander of the Iowa Department.

The Speed Mania

HUMAN nature is alike in every clime and in some instances we are very little removed from animals. We all do funny things.

It is the general observation that a hen crossing the road in front of an automobile will change her mind and hurry back across her tracks just about the time and place the automobile is moving.

A visitor to New York has found out that when people use the escalators in department stores and at high elevated and subway stations, they never use them for what they were intended; that is, to mount the step and remain stationary to be carried to the top in order to save energy. Instead, people invariably run up these steps one or two at a time while in motion, endeavoring to beat the thing to the top.

Another observation is that there is a tendency of a traveler to take the fastest train between two points. This is logical and natural if one is actually, through necessity, in a hurry to get from one point to another.

But it is known that many persons take the fastest train available, although they may be placed to considerable annoyance and expense in so doing, reach their destination without any immediate object in view and are obliged to kill several hours' time without reason. They might take a much more convenient train, better adapted to their purposes, at less expense, and reach their destination at a more convenient hour; but they won't take the train for the reason that it is not as fast as the other train.

This is a well known fact, even in instances where there is but a slight margin of ten minutes between the running time of the inconvenient train and the convenient train and the elements of safety, comfort and dependability are in favor of the latter.

Good Morning!

The greeting is a good appetizer for breakfast

THE recent announcement of our table d'hôte breakfasts caused this comment in the *Baltimore Sun* of December 16:

Fifty-cent breakfasts will appear tomorrow on the menu cards of the Baltimore and Ohio Railroad dining cars for the first

time since dining-car prices have started back to normalcy.

One of the features of this new breakfast menu is the line at the top, which is "Good morning! May we help you select your breakfast?" The table d'hôte menus range from 50 cents to \$1, while the old à la carte remains "as is," according to E. V. Baugh, superintendent of dining cars.

Luncheons and dinners on the table d'hôte order have been in effect on the different lines since last summer or before, but this is said to be the first time that the Baltimore and Ohio has arranged table d'hôte breakfasts for its patrons.

Here is a sample of the wide and attractive variety:

GOOD MORNING!

May we help you select your breakfast?

Like Oysters?

CHESAPEAKE Bay oysters are featured in an unusual way on the diners between New York and Cumberland. Twelve different styles of serving oysters, from cocktail to omelet, are on this menu, which is oyster-shaped and oyster-colored. Can you imagine how this choice, offered by the Railroad to its patrons, would whet your own appetite?

The Longest Non-Stop Railroad Run

THE Cornish Riviera Express from Paddington Station, London, to Plymouth, England, a distance of 226½ miles, makes the run in four hours and seven minutes, passing through 68 towns.

This makes the run of a mile in about one minute and eight seconds.

Appreciation

IN all the advertising matter placed by the Passenger Department in recent months, stress is laid upon the efforts of the Company to "provide service that incorporates safety, convenience, comfort, dependability and courtesy, supported by a dining car service that meets every reasonable requirement."

It would appear from the many complimentary letters we are receiving that we are succeeding in delivering the goods.

We quote a number of expressions from letters from prominent persons in sections covering our entire territory, which would indicate that the good service is not confined to any particular locality. These letters, because unsolicited, are especially appreciated:

"I have recently returned from Bermuda. The trip to New York over your road on October 28 was an example of such excellent service that I do not feel that I should let it go unnoticed. The manner in which I was assisted in securing reservations and arranging for the delivery of the trunks to the Furness Bermuda Line, the placing of the trunks in the hold without awaiting the presentation of claim checks, all through your representative's valuable assistance in New York, when my family and I arrived, and the excellent service on the train, combined to make a delightful trip and an example of perfect service."

* * * *

"Just a line to tell you how much I appreciated the service on the Baltimore and Ohio between Wilmington and Chicago. You will remember I purchased a round trip ticket to San Francisco for my wife, using your lines to and from Chicago. It was my privilege to get your Number 8 out of Chicago and I assure you that it was a pleasant trip, and one made very expeditiously."

* * * *

"I wish to register my sincere appreciation for the efficient and careful manner in which you took care of the reservations, as far as Pullman service was concerned, for the men from my district, during our convention last week.

"Every man who attended this convention and availed himself of the facilities provided by your Company is deeply appreciative of the personal effort put forth by yourself to make the trip a pleasure instead of an annoyance.

"You can rest assured that it is our belief that your personal attention in this matter is the prime reason for the splendid service we enjoyed and I feel that it is due to you that we express our appreciation for your efforts in our behalf."

Growing

"If all the trees were one big tree, what a great, great tree it would be."

The above quotation, from an old, old tale, is applicable to the railroad:

"If all the employes keep the Company's interests in mind, what a great, great railroad we will be."

There is hardly an employe of the railroad, in any capacity, who at sometime does not have an opportunity of securing a passenger for the railroad.

We quote a letter received by one of our superintendents from an agent who had his Company's interests in mind.:

Dear Mr. ———

Superintendent.

I read in the last Baltimore and Ohio MAGAZINE about Mr. ———, agent at ———, securing a passenger for Cleveland.

Yesterday a party came in after freight and stated he was going to Washington, D. C., to-day on the ———-railroad from Cleveland. I said, "we can give you as good service over the Baltimore and Ohio, and I will have your Pullman reservation for you." He said, "All right," and I wired Cleveland at once for the reservation, and before the party could drive from station to his office I received reply to my message and gave him the berth number. I call that "service;" and the party called me up and thanked me for it.

This is only one case in a dozen that have happend at this point that I could report.

—————Agent.

Alert

OUT in a little town on the Charleston Division that is not generally known, the ticket agent was on his job and has been commended by his superintendent.

Two passengers going to New York, came to him to route them a certain way, which included a competing line. He took the trouble to figure out the cost and explained to them that they could save money and time by using his line all the way. This had not occurred to the passengers. He got the business.

Open the shell and find the OYSTER! The Dining Car Department's assortment of oyster dishes (12 of 'em and they're all good) is presented to patrons in our attractive menu card with this cover—shape, size and color, *au naturel*—front and back

Safety Section

What I Intend to Do to Make Safety Count in 1922

By J. E. Faherty, I. C. C. Inspector, Benwood, W. Va.

Note: This is the best article written by a Baltimore and Ohio employe on Safety that has come to the Magazine Office in months.

—Ed.

WHAT do I intend to do to make safety count in 1922?

I intend, first of all, to recognize the fact that membership on a Safety Committee imposes a responsibility, the fulfillment of which demands active, interested service, instead of mere passive or perfunctory service. Accordingly, I intend to familiarize myself with the rules established by the Safety Department, and to read carefully and consider the recommendations and suggestions contained in the bulletins issued from time to time. I know that the ideas contained in those rules and recommendations were conceived by intelligent men who have applied themselves to the task of safeguarding workmen from all humanly preventable accidents.

Having acquired a knowledge of the rules myself, I shall endeavor to impart the same to my fellow workmen, whenever opportunity affords, and to make a practical application of them to my daily routine in the shops.

By keeping always in mind the meritorious objects of the Safety movement, I hope to be able to cultivate habits of carefully observing conditions as I go about my work, with the object of detecting, not alone obvious, but also potential liabilities to accidents.

The ability to detect the possibilities of accidents that might result from certain conditions, but which are not presently apparent, I consider one of the most essential attributes of a Safety committeeman. Perhaps some of you may have heard, as I have, following an accident resulting in injury to a workman, the regretful remark by some fellow-workman that he had noticed the condition which caused the accident, but that he did not think it was a dangerous condition. When it was too late he could easily see how the accident might have been prevented. Just here is where the usefulness of the Safety movement becomes ap-

parent. The trained powers of observation that result from an active interest in Safety would likely have enabled him to detect the danger before the accident.

Following up the thought expressed in the preceding paragraph I want to say that the regret and sympathy felt by workmen when one of their number has been injured should serve as the basis of a most persuasive appeal to line them up in the Safety movement. To stand by and see some poor fellow writhing in pain, and to feel that a little more interest taken by us in the welfare of our fellow-man might have prevented his suffering, would certainly not be a pleasant sensation. A man would be less than human who would not prevent an impending injury to another if he knew that it was in his power to do so. Yet, while we would prevent the reality if we could, there are so many of us who fail to realize that a little care and interest on our part might prevent possibilities from becoming serious realities.

Nothing is more important or more effective in the Safety movement, than a voluntary interest on the part of workmen themselves. Once the interest has been conceived, the reason and judgment of any intelligent person will direct him in the course he should pursue to produce desired results. It follows, then, that it is the duty of every person who accepts service on a Safety Committee to do what he may to induce his fellow-workman to take an interest in the Safety movement. That I intend to do.

I started out to tell what I intend to do to make Safety count in 1922; but the subject suggests so many ideas which I have thought might be of benefit to others that I hope I may be pardoned for indulging in a few suggestions instead of confining myself strictly to a formal declaration of my intentions.

There is another subject upon which I would like to make com-

ment—the chronic scoffer—the fellow who is generally disposed to be censorious, or sarcastically critical of anything and everything that does not originate in his own mind. This fellow, when he sees an unsafe condition, generally to excuse himself for a lack of ambition to interest himself to the extent of changing the condition, or calling it to the attention of others who would be glad to do so, indulges in sarcasm or cheap wit directed against the Safety movement. None but a fool would be spiteful against, and attempt to belittle a movement designed to safeguard him in the conditions incident to his work. There may be, and no doubt are, unsafe conditions known by them to exist, and which have existed through long periods, upon the basis of which they might presume to justify their conduct. But they fail to consider that while they may be aware of those conditions those who could and would remedy them may not be aware of their existence.

The persons actively interested in the promotion of Safety must depend to a considerable extent upon other persons to keep them advised of unsafe conditions. Let us, therefore, endeavor to persuade such persons to refrain from useless and senseless criticism, and to assume the more manly attitude of helpfulness. I intend to do what I can in that way.

Let us remind the man who might try to excuse his lack of interest in the Safety movement with the statement that he is not his brother's keeper, that Cain, the originator of that excuse, failed to get by with it. The laws of civilization impose upon its members a regard for the welfare of their brothers. It is also divinely commanded that we love our neighbors as ourselves. There are few of us, to be candid, who observe that commandment literally, but we can all very gracefully observe it to the extent of trying to protect our neighbor from preventable accidents.

I intend that my interest in safety shall not be suspended during my time off duty, nor confined to the department in which I am employed. I intend to take advantage of opportunities whenever and wherever they may arise, to promote the movement, and I am of the opinion that one does not have to go far out of one's way to find such opportunities. They may be found when walking along the tracks by noticing bad conditions in the tracks, or obstacles lying between them in the yards which would make unsafe conditions for trainmen, or switchmen, particularly at night. By observing

trains in the yards or passing trains, for defects readily seen by the careful observer, such as bad wheels, defective couplings, loose and dangling appliances, etc., the observer will be rewarded with the comforting satisfaction that he may have prevented an accident to a fellow-workman.

To do these things it is not necessary that we constitute ourselves track walkers or car inspectors. We have only to practice habits of careful observation and force of habit will in time enable us to recognize unsafe conditions almost at first sight.

The safety of train movement is an object worthy of our most careful attention. There are so many ways by which an interested Safety worker might help along that line that I shall not attempt to recite them here. They are obvious.

Although it may not be entirely relevant to the subject, I intend to acquaint present and prospective customers of the Baltimore and Ohio with whom I may come into contact, with the sincere efforts that are being made by the officials and employes of our Railroad to make travel over its lines as safe as humans can make it; and that they are striving to make our road the safest railroad in the country.

Wear Your Goggles!

THE picture shows the damaged condition of a pair of goggles worn by Machinist L. H. Bollens while performing duty on one of the machines in the Glenwood Machine Shop, on August 18. If Mr. Bollens had not worn these goggles, he undoubtedly would have lost the sight of his left eye. This is only one of the many instances in which goggles have proved their value to employes at Glenwood Back Shop.

Of all chance takers, the most foolish is the one who takes a chance with his eyes: and for two reasons, first—because a blind man has such a terrible handicap in life; second—because wearing the protecting goggles, furnished and paid for by the Company, is such an easy thing to do.

A tell tale picture

Care of the Feet

By Dr. C. W. Pence

Medical Examiner, Philadelphia, Pa.

ONLY those who have suffered with bad feet, or from improper care and neglect of them, can appreciate that feeling of relief to be derived from foot comfort. Proper consideration and care of the feet is essential to mental contentment, personal efficiency and good health.

Good feet are a great asset to the individual in any occupation, and in no line of employment is the possession of two good feet more necessary than in that of railroading, where the duties of the occupation demand constant alertness and ready control of both mental and physical powers of the individual so that he may be able instantly to accommodate himself to any emergency. One with bad feet, like a locomotive running with one cylinder, will expend full energy and additional labor endeavoring to complete a task, and in the end it is only accomplished at the expense of lowered efficiency. The feet bear the weight of the body, and are the means by which our movements of position may be shifted readily. To accomplish free movement in changing positions it is necessary to keep the feet in good condition, so that there will be no interference from unnatural causes.

Feel Fit with a Good Fit

In conserving health it is most important to keep the feet warm and dry, as through neglect of this preventive measure we contract such ailments as colds, pneumonia, and rheumatism, with attendant suffering and distress. All bad feet as a rule, unless congenital, are due to neglect, one of the most frequent causes being improperly fitting shoes. To secure the greatest measure of foot comfort, good judgment should be exercised in the selection and fitting of shoes. Shoes that protect and

give comfort to the feet should only be worn and should not be permitted to distort or cramp the feet. Shoes should be of proper length and width, with broad toes and heels, and good soles which will permit freedom of movement and conform comfortably to the feet.

Improperly fitting shoes contribute to foot discomfort and due regard should be paid to their selection. They should not be too long or too short; if too short, they will cramp the feet, and if too long they may irritate the feet by the rubbing of the sock, causing an uncomfortable condition, and one which may cause an infection with serious results should the skin be broken and colored socks worn. Corns, bunions and callouses are aggravating pests, marring the peace and comfort of the sufferer, and are generally caused by friction from improperly fitting shoes or socks. These conditions are hard to eliminate permanently, but temporary relief can usually be obtained by a visit to the chiropodist. It is well to exercise care and good judgment in acting as your own foot-surgeon, to get relief from a particularly aggravating corn or bunion. Avoid the use of a knife or razor. There are many cases on record where blood poisoning has resulted from the practice of trimming the corn or bunion too closely with these emergency instruments.

Nature has contributed her share to the inconvenience and suffering of the human race from foot discomfort by afflicting some with flat-foot or dropped arches, hammer toes, overlapping or crooked toes, ingrowing toenails and a nerve condition of the toe known as the "Morton Toe." These conditions are subject to correction such as would be administered by a competent chiropodist or

foot-surgeon, by removing the pressure through mechanical assistance, or in the ordering and wearing of properly adjusted appliances and suitable shoes. Flat feet are frequently responsible for pains in the muscles of the lower legs, aching feet and foot weariness, which condition is often mistaken for rheumatism and can be materially relieved by wearing properly adjusted arch supports, thus throwing the arches back into line, relieving the strain on the ligaments of the legs and feet.

Rheumatic feet, "kidney" feet, gouty feet, eczema of the feet and cold feet, although persistent, may be relieved by proper care and medical treatment. An especially aggravating condition affecting many feet, causing much unpleasantness and discomfort, known as "perspiring" or "sweaty" feet, may be remedied by frequent changes of stockings and shoes, and bathing the feet with a little vinegar or salt added to the water, then dusting the feet and stockings with some good foot powder.

The importance of the care of feet requires little argument to convince the sufferer of the necessity of following these suggestions. A large percentage of draftees presenting themselves for physical examination during the recent World War were found to be suffering with some variety of foot trouble, and this condition was largely due to neglect, and was subject to correction by the exercising of proper care and treatment. As there are many remedies and appliances for the correction of all foot ailments, one should not continue to suffer when such relief is available. In ordinary cases of foot weariness the condition may be relieved and comfort promoted by the frequent changing of shoes and stockings and by massaging and soaking the feet in hot or cold water.

A good maxim to follow is to be considerate of your feet, and never sleep with shoes on. Full foot comfort for tired and aching feet is complete foot rest, and this can only be obtained by removing the shoes, and relieving the pressure on the feet.

Rules for Cold Nights

Have your window open but do not sleep in a draft.

Use plenty of warm but light weight covering.

Don't go to bed cold; if possible, have the bed warm before getting in.

There is no virtue in having a frigidly cold room; just be sure that there is good ventilation.

A. E. Erich Awarded Prize as Best Magazine Correspondent for 1921

AT the close of 1920, through the generosity of the Railroad, the MAGAZINE was enabled to give a prize to the correspondent who had done the best work during that year. The prize was the famous fifty volume set of Harvard Classics, a small library in itself and said to contain the best selection that has ever been made of the literary masterpieces of all time.

This year we are again able to bestow this prize for the best work during 1921, this time on A. E. Erich, secretary to superintendent, Ohio Division, and MAGAZINE correspondent for that division.

An examination of the MAGAZINE for the year 1921 will show why Mr. Erich wins this prize. Each month he has seen to it that his division was represented with interesting, constructive and carefully prepared notes, although, on account of the disturbances in the printing trade, not every issue of the MAGAZINE shows notes from the Ohio Division. But they were submitted for every month or which they were requested, so in this respect Mr. Erich has a record of 100 per cent.

Mr. Erich's notes are so written as to make an almost ideal representation for his division in the Among Ourselves Department. They are personal, chatty, friendly and comprehensive. Yet there is nothing trite, overworked or picayune about them. The Among Ourselves Department is the first part of the MAGAZINE examined by most readers and if it provides an interesting introduction to the rest of the MAGAZINE, the reader is encouraged to look elsewhere for entertainment and information. Mr. Erich has shown a particularly happy ability to set forth in a friendly way the problems of the

Railroad to the employees of his division and this is the best part of his MAGAZINE work.

Mr. Erich was born on November 20, 1891 at Alma, Ohio. He began work for the Baltimore and Ohio on May 22, 1910 as stenographer in the Motive Power Department, Office of General Foreman. In 1913 he was made stenographer to the road foreman of engines and in 1918 was made secretary to the superintendent, which position he still holds.

He is mighty well liked by all of his associates and by the employees of the division and has the reputation of being extremely thorough in his work and always ready to lend a helping hand in anything affecting the welfare of the Railroad and its employees.

We congratulate Mr. Erich on having won the prize and wish him continued success in his regular work as well as that of MAGAZINE correspondent.

Mr. Erich's letter of appreciation

has just reached us in time for this issue, viz:

CHILLICOTHE, OHIO, December 27, 1921.
Editor,
Baltimore and Ohio MAGAZINE,
Baltimore, Md.

Dear Sir—I appreciate most highly the set of Harvard Classics, which you forwarded to Mr. Iams, to be presented to me. These were given me before the office force on the day before Christmas, and to say that I was agreeably surprised, does not express my feeling at that time. I could hardly realize that what was being said was intended for me. A set of books like the Harvard Classics is something I have always wanted but never expected to possess. I can assure you that, when sending in my notes I had no thought of qualifying for any reward; in fact there were times when it was my opinion that I was not even qualified to be called correspondent of this division, as it seemed to be impossible to have my items as interesting as they should be.

To express my thanks to you does not in my estimation convey my appreciation, but this seems to be the only thing I can put in words at this time.

Yours very truly,

(Signed) A. E. ERICH,

Secretary to Superintendent.

Baltimore and Ohio Service a Shining Light by Comparison

NORFOLK, VA.

YORK, PENNA.

R. P. ANDREWS PAPER COMPANY

WASHINGTON, D. C.

November 7, 1921

Mr. C. W. Galloway,
Operating Vice-President,
Baltimore and Ohio Railroad Company,
Baltimore, Md.

Dear Sir:

We business men receive so many kicks that the thought occurred to me that a few complimentary comments sometimes cause rays of sunshine on a dark day.

As President of the National Paper Trade Association I had a great deal of traveling to do last year as well as this, principally between Washington and New York and Washington and Chicago.

I have just returned from a trip to Chicago where I was attending the semi-annual convention of the National Paper Trade Association, and I cannot refrain from commenting on the splendid service that the Baltimore and Ohio Railroad is giving to the public between Washington and Chicago, and Washington and New York. The politeness and "anxious to please way" of the employees generally is so unusual that it makes the Baltimore and Ohio stand out as a shining light by comparison. Especially is this true of your dining car service, which for quality, quantity, reasonableness in prices, and excellent service should be an example for some other trunk lines which I will not mention.

Very truly yours,

(Signed) R. P. ANDREWS,

President.

Akron's Message for 1922.

There are many old fashioned folk who live exclusively by the dictum, "business is business." They don't believe that pleasure and the interests of our every day work can be profitably associated. But evidences of social organizations on the Railroad, helpfully combining recreation with a pursuit of greater efficiency and smoothness in work, belie their opinions. We have a number of such and their usefulness is unquestioned and their futures bright.

We take off our hats to our Akron friends, for the following, a sort of foreword to their prospectus for 1922:

The Baltimore and Ohio Welfare League of Akron was organized in September, 1920, for the purpose of uniting the employes of The Baltimore and Ohio Railroad Company into one large family bound together by ties of friendship, that we all might laugh and play together and so that out of our friendship might come harmony and co-operation in our daily tasks. Our aim is to make the Baltimore and Ohio Railroad in Akron the line of least resistance, i. e., that shippers can do business with us more easily and with more pleasure to themselves than with any other railroad in Akron. Let us keep up the good work and make the year that is before us a more pleasant and profitable year than the present one has been. Our Welfare League has been extremely successful, but its continued success is dependent upon the co-operation and interest of every employe in Akron District.

Let's all get together, put our shoulders to the wheel and help make the coming year a brilliant one for our association.

More friendliness in our relationship—a better understanding of each others problems—these are things we much need. Can you imagine the standing of the Baltimore and Ohio among railroads on December 31, 1922, if we should all practice the splendid spirit suggested in these paragraphs?

Two Conductors

Jim is a cheery man. Passengers on the 8.15 brighten up at his greeting. To have Jim punch your ticket is to get a good day's start. Old commuters whom he calls by name bristle with pride.

On the 8.27 is another conductor. His name is No. 444. At least, no one knows his name or wants to. He is brusquely efficient. He says "Tickets, please," in

such a way that the "please" sounds like a cuss word. Timid women passengers give him an unfailing chance to raise his voice and roar. The folks who ride with No. 444 are always talking about a committee to fight the railroad—fight it about increased fares, bad service, anything.

Jim and No. 444 both work at the same salary. One of them costs the road more than it could afford to pay its president.—*Collier's*.

The Capital City and the Baltimore and Ohio

You have seen the amount of space the newspapers have devoted to the Conference on Limitation of Armaments. You will probably read only the headlines, but you cannot help but have reached the conclusion that the eyes of the world are focused on the conference and, on that account, on the Capital City of Washington.

You have possibly seen the further proposals for an Economic Conference—to solve the problems of the receiverships which threaten many nations. You have seen it suggested that this, too, be held in Washington, and without being in the least bit egotistical, you have naturally concluded, that, in a very true sense, Washington is the world's capital.

Our country has made a reputation for itself in international affairs, a reputation for unselfishness, honesty and a willingness to help other nations who need help, without our wanting to hold the bag for any plunder. Americans can be proud of this because it is a new phenomenon in the history of the world and one in which just pride can be taken. And it is just because of the strength, clean record and the willingness of the United States to help, that other nations hesitate to enter into a discussion of problems affecting the whole world, without America's counsel.

Washington is, therefore, constantly in the strong limelight of the world's scrutiny. At the same time Washington is what might be called the hub of the Baltimore and Ohio, for from it radiate her two main lines to the East and to the West. There is scarcely a day that goes by in Washington that some event of world-wide importance does not take place—some event which it would pay almost any citizen to witness and to make a part of his or her individual history.

Remember this when you hear your friends and associates outside of the Railroad service talk of trips between points east and west which cross the line of Washington. Remember that they would probably be delighted to use our liberal stop-over privileges in that city, to attend some of the big conferences now in session or to visit the numerous spots of great historical interest. Let Washington and its throbbing political life and historical associations help the Baltimore and Ohio bring its splendid service to the attention of more people, as the Baltimore and Ohio, because of its strategic location, its progressiveness and the patriotism of its personnel, has helped Washington as the seat of our government during all our Railroad history.

Back To Verbal Orders

During the readjustment period that followed the war, we heard of a company that discarded all formal routine and went back to the old basis of verbal orders.

Price changes, cancellations and market upsets came so thick and fast that it was found necessary to handle matters directly and personally.

The president moved his desk out into the main office, and a large corps of flunkies, Court Chamberlains, First-

Gentlemen-in-Waiting, cup bearers, and warders at the postilion gate was eliminated.

Curtains were raised and doors were opened wide. Any employe or customer who wanted a decision went directly to the proper person and got his answer.

To do business this company found it had to get back to first principles.

This shows how easy it is to carry a good idea too far. System, routine, formalities and check-ups are all good, provided they are used as a means to an end. But when they begin to choke the pipes it is time to clean house.

Cast-iron routine is always dangerous in business, particularly in times of rapid changes. Routine is the curse of publicly-owned enterprises such as the postoffice, and large corporations such as railroads.

Rules are only made to be broken.

System is a means to an end. When it becomes the end itself—get rid of it.

—Brenneman's Fine Biscuit Magazine

The Thrift Idea

All great movements are built on ideas. It has often been discovered that a field is fertile for the propagation of a great idea, but the idea has never been planted and the growth has not come. The habits which nations form are strengthened by the careful planning and organization work of skilled men about an idea. The Christmas Saving Fund idea is a good illustration of this.

In Baltimore alone just before Christmas of 1921 over three million dollars was sent out in check form by the banks to depositors of the funds which had accumulated during the year through the Christmas Saving idea. That represented approximately six dollars apiece for every person in the City of Baltimore. What proportion of this went for jim cracker of no permanent value, no one can say with assurance, yet the opinion of those directing the accumulation of these funds is that most of the money was turned into trade channels in unusually profitable ways; to start a permanent savings fund; to make a needed improvement on a home; to start a nest egg for a home, etc.

It is not too late to start your Christmas Saving fund. Almost any bank offering the plan will be glad to take the accrued payments now. Start today and see how little you miss the dollar or two dollars a week, which, if not saved, would probably be spent in profitless ways.

Using Good Bait

Text: When we set a trap for a fox we bait it with something a fox likes.—Ed. Howe.

A crook never offers six per cent. and safety when he wants your money.

Six per cent. is not good bait.

The crook offers 25 and 50 per cent. and we bite because we like the bait, although our common sense tells us to keep away.

The reformers are very much like the get-rich-quick artists.

A reformer does not tell his audience that under his scheme for social reorganization it will still be necessary for all of us to work for a living and practice thrift, temperance and fairness.

He promises a three-hour day, pensions, and a governmental job for everyone.

Many people like this bait, and that is the reason crooked reformers are always able to raise enough money to pay themselves a good salary.

—Brenneman's Fine Biscuit Magazine.

The Melting Pot

It was the day before one of the annual football games between two of the members of the "Big Three." The train had picked up quite a number of undergraduates at the little junction point, bound for New York, whence, on the morrow, they would proceed to the scene of the conflict one hundred miles beyond. Four of the team's rooters, older men and presumably graduates of the university, were playing cards on a suitcase set on their knees between two facing seats. The car was filled just enough to leave a few vacant single seats here and there, and they chose one of these on the outside of the seat opposite them to deposit their heavy overcoats. On the inside of the same seat sat a well dressed, yet not especially impressive looking fellow, of the undergraduate type. He looked still less impressive as the heavy coats piled at his side dwarfed him into his corner.

At the next stop, about thirty miles from the metropolis, so many people got on the car that it was necessary for the card players to remove their coats and put them on the racks. In place of them there sat down an Italian woman of bulky proportions with four of her brood of children about her. One she put on her lap, another she placed between her and her seatmate, already crowded into the window side of the seat, the other two hanging on to the arm rest.

"Pretty full house our freshman friend has across the aisle," said one of the card players.

"Yes, I don't believe he has been quite accustomed to just that kind of traveling before," said another.

"Why?" was the rejoinder.

"Oh, just because he happens to be ————. You'd never know it, would you?—he fits in so well with his present social status."

All this was said in an undertone. The subject of the remarks did not hear them.

He was, nevertheless, just a bit embarrassed because of the proximity of the Amazon and her brood, but he was making the best of the awkward situation and perhaps enjoying it as quite a novel experience. He happened to be the son of a director and one of the largest owners of one of the biggest trunk line railroads in the United States. In fact, the mere mention of his name would suggest a vision of the conception, the building and the enormous expansion of this powerful road, in all of which his father, grandfather and great grandfather have been by far the most constructive and most dominating factors. He might have been traveling in a palatial private (not an official) car, but the history of his forebears would indicate that he, like them, understood the value of experiencing life as most people find it, and, like them also, he was not particular so long as he "got there."

—
Don't let anyone persuade you that 1922 is going to be a poor year. Determine that it will be a good year for you, at least, then get busy making it good.

An Operator Who Got "Bawled Out" and Who Came Back Strong at His Chief

An Excellent Example of a Frank but Friendly Bulletin

THE BALTIMORE AND OHIO RAILROAD OFFICE OF DIVISION OPERATOR CLEVELAND DIVISION

Bulletin

TWO LETTERS

November 20, 1921.

Mr. M. E. Tuttle,
Division Operator:

Today makes my fifth year with the Baltimore and Ohio. You have been my boss over the entire period. I wish to congratulate you on your ability in handling men because you have kept me longer than any other man has ever been able to. I have been a bit unruly sometimes. It has been necessary for you to "bawl me out" on several occasions. You have done so justly and always made me want to go back and give the best that was in me. I have always been truthful, no matter how bad it looked and I feel that you have always given me a square deal. You have come to my assistance in different ways and I assure you such favors will not be forgotten. I am going to try to give better service in the future, and try to make the next five years full of better service to our Company and hope we can arrive together and in good health. I wish you a happy Thanksgiving.

(Signed)..... Operator.

* * * * *

November 25, 1921.

Mr. _____

Your letter written at the end of your fifth year of service received. It is unnecessary for me to say that it is gratifying to get a testimonial of this kind.

The policy of the Baltimore and Ohio Railroad is to help the man who shows a desire to make good, by educating him, thus enabling him to remain in the service with an opportunity to fit himself for more important and more remunerative duties, that he may be ready for advancement when the opportunity comes.

The "bawling out" you mention is but one form of education and at times is necessary to bring about a realization of our weaknesses and shortcomings. But too few learn this until too late.

Your admission that what it has been necessary to say to you has been beneficial and has created a desire to go back and try harder, shows it was received in the same spirit in which it was given and could only result in good to yourself and employer.

I agree with you that you have "always been truthful, no matter how bad it looked." We are told that "An honest man is the noblest work of God." If we are untrue to our friends, our employers or ourselves, we are not honest. If we shirk our work in any way, or are negligent and careless, we are dishonest and jeopardize the life and limb of our fellow workers and of the people who ride on our trains. At the same time we violate the confidence placed in us by our officers when they placed the important work of moving trains in our care.

Our rules tell us SAFETY is first. To play safe, we must be honest, and obey the rules. The minute we violate a rule, we are dishonest by creating an unsafe condition, the results of which can only be guessed at.

If more of us could but realize how much better we feel, how much more independence we have, how much better our standing when the final show-down comes, if only we have told the truth, I believe we would hesitate to falsify or misrepresent to tide us over deserved criticism or discipline.

I am with you in the effort to so handle our particular part of the work that we may be here at the end of another five years. I thank you for your good wishes and am always ready to help you or any other who tries.

(Signed) M. E. Tuttle, Division Operator.

Vice-President Galloway Addresses Baltimore and Ohio Post of American Legion

THE outstanding feature of the meeting of The Baltimore and Ohio Post of the American Legion on the night of December 13 was the splendid address of C. W. Galloway, vice-president, Operation and Maintenance. It was a talk characterized by great frankness and by a liberal allusion to his own experiences on the Railroad, for purposes of illustration.

He began with a clear and interesting description of the Divisional and Departmental Organization on the Railroad, or what is analogous to it in the Army, the Line and the Staff, and showed how these two factors are necessary to a well rounded organization. In discussing this the question of "Opportunity on the Railroad" came up, and it was here that Mr. Galloway's remarks were especially helpful because of his own rise to his present position from that of messenger boy during his thirty-eight years of service.

He said that one of the constant and pressing problems on the Railroad is the one of securing men willing to assume the responsibilities which promotion, especially in the Operating Department, entails; that experience shows that there are comparatively few men who are willing to sacrifice the comfort and regularity of the standard eight-hour day for the longer day and the greater responsibilities and initiative demanded by supervising positions. And yet he pointed out the fact that there are no officers on the Railroad today whose promotions have come to them without their being willing to dig in and work, practically without stint, in order to get the information and experience requisite to the proper handling of their tasks.

Mr. Galloway also gave an interesting analysis of the financial problem facing the Baltimore and Ohio. He explained how difficult it has been during the current

year, particularly on account of adverse general business conditions, for the Railroad to earn even enough money to pay its fixed charges, and by mentioning our comparative financial records of 1902-1916-1920, he showed how greatly our net revenue has shrunk in proportion to our gross revenue, and this notwithstanding the greatest

Arthur D. Gans, Safety Department Motion Picture Operator and Magician

effort on the part of the Management to effect economy in every possible direction.

Mr. Galloway paid a nice tribute to the ex-Service man and to his biggest organization, the American Legion, and expressed the hope and belief that its future would be a most helpful factor in the development of the country and the working out of the ideals of Americanism.

The business meeting preceding Mr. Galloway's address occupied but three-quarters of an hour. Following his address Arthur D. Gans, motion picture operator of the Safety Department, through his own

and the courtesy of Mr. Broderick, showed two interesting films, "The History Making Railroad," which is a reel showing the high spots in Baltimore and Ohio history, and "An American in the Making." Mr. Gans has given freely of his time and talent not only to entertain organizations connected with the Railroad but also other organizations in and around Baltimore. Sixteen men from the Baltimore and Ohio Glee Club, with their accompanist, kept things moving with some enjoyable songs, and the meeting was concluded by the serving of ice cream and cake.

All Baltimore and Ohio men eligible for the Legion are urged to join our Post. It will meet on the first and third Tuesdays of each month. Speakers from our own Railroad staff and others have promised to address the meetings, and a liberal education in Railroad and other problems of the day are promised through the addresses of these men.

Full information concerning the Baltimore and Ohio Post may be had from Henry C. Weber, Adjutant, Mount Royal Station, telephone, Baltimore and Ohio Exchange Branch 312.

From a World Traveler

November 22, 1921.

E. V. BAUGH, ESQUIRE,
Superintendent Dining Cars,
Baltimore, Md.

Sir:—I have spent almost four years in various parts of Western Europe and upon returning to the U. S. A. I must tell you that one of the most pleasant revelations to me has been the dining car service that I find on The Baltimore and Ohio Railroad.

I have seen nothing that compares with it in quality of food, courtesy in service, and for a price that is not exorbitant.

Sincerely yours,
(Signed) M. D. DeTar,
American Vice Consul, Palermo, Italy.

Newark Division Veterans Hold Annual Banquet

By H. H. Scott,
Mayor of Newark, O.

Special to the Baltimore and Ohio Magazine,
Newark, Ohio, December 15—

THIS evening at Pythian Castle social rooms, in East Main Street there was held the largest and most successful of any of the annual banquets of the Newark division of the Baltimore and Ohio Veteran Employees' Association, and Ladies' Auxiliary. Five hundred and fifty members and guests enjoyed a sumptuous course dinner served by Jesse R. Walters, a Veteran of the telegraph service and now a landlord in this

General order by Capt. Doyle: effective at once:
No Spooning in Bristol Tunnel

city. The committee who directed the general program comprised Messrs. John H. Doyle, S. W. Higgs, A. B. Wheeler, F. M. Howard, F. S. Manhurd, and the following officers of the local lodge: Daniel Moriarity, president; J. S. Price, secretary; E. E. E. Moore, treasurer, officers of the Ladies' Auxiliary, Mrs. F. M. Howard, president; Mrs. John Powell, vice-president; Mrs. Edward Powell, secretary; Mrs. E. E. E. Moore, treasurer; Mrs. S. F. Manhurd, chaplain; and Mrs. E. M. Little, organist.

The after dinner program commenced with a short but interesting talk by W. W. Wood, chief of Welfare, headquarters in Baltimore. His subject was "Animal Life." Prof. Samuel Gelfer rendered a pleasing violin solo; Miss Cornelia Ellis sang beautifully; the Baltimore and Ohio Quartette gave several vocal selections. Jesse R. Walters, in the role of a conductor, and Frank "Brigham" Young put on a travesty on "Life on the Shawnee Division." Lots of comedy was included. The act concluded with some excellent singing by Mr. T. Young. The engine and train of cars used in the act were hand carved out of

wood by James Kindig, a Veteran, who did the work a number of years ago, and who was listed in tonight's act as "Engineer, Frank Howard's outfit."

After a few brief remarks, President Daniel Moriarity, who told of the objects of the association, which he described as purely social and not benevolent, introduced Mayor H. H. Scott, who extended a welcome to the guests. Letters of regret were then read from President Daniel Willard and from Operating Vice-President C. W. Galloway. An interesting address was then made by George W. Sturmer, grand president of the Veterans' Association. He told of the joys and satisfaction of helping to organize the association in various sections of the country, and said he had seen it grow in nine years to over 11,000 members. He predicted 25,000 members at a time in the no great distant future. He complimented the organization for its loyal work in successfully soliciting business for the "Baltimore and Ohio family," as he termed it.

At this time in the program "Captain" John Doyle headed a procession of officers who had arrived unexpectedly on the business car of the superintendent of the lines between Willard and Chicago. These were: E. W. Hoffman, general superintendent, Northwest District; Donald F. Stevens, superintendent, New Castle Division; S. U. Hooper, superintendent, Chicago Division; H. G. Kruse, superintendent, Newark Division, and H. B. Green, superintendent, Cleveland Division, all of whom had a few words to say.

J. M. Garvey, of Wheeling, delivered a short address on his knowledge of the association from its beginning until the present time.

The evening's program concluded with a dance, which was enjoyed by many.

It was announced during the evening that a contingent from this section will go to the Grand Lodge convention to be held in Baltimore in the near future to solicit support to bring the convention to this city in January, 1923.

John Ketzner, Fifty-three Years in Active Service

A Representative Employee of the Cumberland Division

By G. Frank Messman,

Report Clerk, Cumberland, Md.

JOHN KETZNER, carpenter, Maintenance of Way Department, Cumberland Division, entered the service of the Baltimore and Ohio, October 1, 1868. He has been continuously in the service since that date, never having been out for any cause whatever, so that on October 1, 1921 he rounded out 53 years with the Company, with the enviable record of not having a mark against his name.

Born at Harper's Ferry, W. Va., October 15, 1854, just prior to the Civil War, and being raised at that point, Mr. Ketzner grew up amid the stormy war scenes about that

historic spot. He has many vivid recollections of the exciting incidents that took place there as well as in the Shenandoah Valley.

After the close of the Civil War, John Ketzner entered the service of the Company as a water boy, and practically grew up on the Railroad, or, to put it better, "with the railroad." He remembers well those early days of American railroading, the small engines and cars which the "Rebels" would appropriate and drag across country without much difficulty.

It was not long after entering the service

John Ketzner, carpenter, M. of W. Dept., Cumberland, 53 years of continuous service.

that he was promoted to bridge carpenter, and then to bridge inspector, which position he held for many years. In those early days of wooden bridges this meant long days and nights of watchfulness and careful inspection, to keep them in condition for the ever increasing traffic. Particularly was this true in the early Spring, when the freshets would come rushing down the Potomac and its tributaries, and the peaceful old Shenandoah would go on a rampage, swelling down to Harpers Ferry where it joined the Potomac on its way to the sea. It meant a careful watch on the bridges to keep ice and driftwood from backing up against the piers, and sweeping the bridges along in its downward rush. It was frequently necessary to stand trains of heavily loaded cars on the bridges to weigh them down.

In December, 1902, Mr. Ketzner moved his family to Cumberland, Md., which point had been made the headquarters of the division instead of Harpers Ferry. He enjoys nothing more than working in his garden after his days' toil on the Railroad is completed, and garden space in Cumberland being scarce, he secured a small piece of the right-of-way and each year raises potatoes, tomatoes and truck vegetables which are the envy of the community. He has been long a member of the Cumberland Division Safety Committee, and is an ardent worker for the cause of Safety First.

That he is known by almost every employe on the Cumberland Division goes without saying, as well as by all the old residents along the division and numerous travelers who use our line from time to time. He is familiarly known as "Uncle John."

Of course Mr. Ketzner is a stalwart veteran, a well known and beloved figure at all picnics and meetings. At the October meeting of the Cumberland Veterans he was presented with their badge of 50 years of active service. In making the presentation, Harry Allison, president of the chapter, delivered the following address:

"We present this medal of honor to Brother Ketzner, not alone because of his remarkable service but also because we wish his example to be an inspiration to the younger generation.

"It would pay us all to emulate the career of this good man as a Christian and a worker. Though of retiring disposition, he counts his friends by the hundreds, and with the increase of his years so also his friends increase.

"I could not attempt to do justice in a few words to the career of Brother Ketzner. Ask those who, fifty years ago, stood at his side, on the heights of Bolivar, gazing at the crystal streams below them and wondering at the giant mountains standing serenely in sunshine and storm, and they will tell you that his character is not less pure than the crystal waters nor less rugged than the peaks themselves.

"He is proud of the fact that he is of the old school of railroaders, that he has covered

the branch line called "Progress," passed the station of Efficiency and with thousands of his fellow employes now stands on the shining rails of a great trunk line, the Baltimore and Ohio, the Veteran of railroads.

"Shakespeare's lines,

"The evil men do lives after them,

"The good is oft interred with their bones" does not apply to John Ketzner. When the chairman presented the badge to him and said, 'congratulations are now in order,' so many brothers and sisters rushed toward him that I felt sorry for his right hand.

"Rust may stain your sword of fame,

And dust may spoil your crown,

But you have placed your name so high,

It never will come down."

A mighty fine presentation from Mr. Allison, and one wholly appropriate to honor a really representative employe of the Cumberland Division and the Baltimore and Ohio Railroad.

Substantial Christmas Gift Surprises Pensioned Conductor Thomas Hammond

AT his little home in Frederick, Md., on December 8, in the presence of his wife, a wonderful token of friendship was presented to Pensioned Conductor Thomas Hammond by Ticket Agent C. D. Ogle of Frederick, and Conductor W. W. Cramblitt, of the Baltimore Division. With it was a typewritten resolution signed by all of the men who participated in the gift, and reading as follows:

"We, the undersigned employes of The Baltimore and Ohio Railroad Company, who in years gone by worked and associated with T. H. Hammond, knowing him to be a fearless and upright gentleman who served faithfully in his chosen line of life's duty for more than forty years, wish to contribute to this fund which is to be presented to him as an expression of our friendship."

The idea of the testimonial originated with Conductor Cramblitt who, for several weeks preceding the presentation, had gone about among the old Railroad associates of Mr. Hammond and told them of the testimonial and its purpose. The token was in the shape of a certain number of new twenty dollar gold certificates, and although we are not permitted to mention how many there were, we may say in good taste that

they were of sufficient number to make the gift a most substantial one and to reflect great credit upon the recipient and all of the donors.

Conductor Hammond was born on July 15, 1856, and entered the service of the Railroad in April, 1871 as a freight brakeman on the Baltimore Division. He was promoted to freight conductor in 1873 and to passenger conductor in 1891. He suffered a stroke of paralysis during 1921 and was pensioned on September 21 of that year. His record is a good one and we are sure that the joy of Christmastide was greatly increased in his home by the thoughtfulness of his old Railroad associates.

Baltimore Chapter of Veterans Elects Officers for 1922

FOLLOWING are the names of the newly elected officers, Baltimore Chapter of Veterans:

J. A. Wall, president; Chas. W. Allen, vice president; C. B. Snapp, treasurer; C. R. Weir, recording secretary (third term); W. H. Harrigan, financial secretary; John W. Hall, sergeant at arms.

The following members of the Board of Directors were also elected:

W. Auld and G. W. Sturmer, Baltimore and Ohio Building; W. L. Childs and Wm. L. Gordon, Mt. Clare; W. Shewbridge, Riverside; Robt. F. Burnett, Camden Station; E. B. Cox, Locust Point; R. L. Collingsworth, Curtis Bay; H. A. Culbertson and C. H. Shipley, Line of Road; J. T. Mathews, Washington Terminal.

C. H. Pennell was elected delegate to the Grand Lodge.

The secretaries of the Veterans' Chapters are invited to keep the Magazine posted on all developments of interest to our readers. This department is for you!

Pensioners' Roll of Honor

*And they who wrought out of their might,
And served the roads they loved always,
They sit by glowing fires tonight,
With memories of distant days;
And though their heads are silver-white
They still are young enough for praise.*

*And they who follow them shall know
Such seasons white with honest joy.
How wonderful like this to grow
To manhood in the Road's employ,
And say, "I did my best! and though
I'm old in years, I'm still—a boy!"*

*Honor to them! All honor still
To those who served, and served so well!
They are like cedars on a hill,
The story of whose growth men tell,
Their boughs fall not—and never will
Till God Himself shall ring the bell!*

CHARLES HANSON TOWNE—"Men of the Road."

Louis Batie

Louis Batie, pensioned machinist, was born in Hanover, Germany, on September 3, 1853. He came to America at the age of 15 and went to work in the Baltimore and Ohio shops at Piedmont, W. Va., on June 16, 1868. From here he went to Lancaster, Pa., but returned in 1870 to Piedmont, where he worked as wheel pressman.

In November, 1889, he was promoted to machinist. This position he held until he was retired on November 16, last. In 1911

he was transferred to Keyser, where he now makes his home.

Abram G. Maxon

Abram G. Maxon, pensioned crossing watchman, was born at Marietta, Ohio, on October 21, 1853. He went into the service of the old M. & C. Railroad in 1875 as substitute brakeman. In 1878 he was transferred to the main line as regular brakeman. In March, 1881, he lost his right arm. In June of that year he was made crossing watchman at Chillicothe. Nearly 9 years

later he was transferred to the K. & M. Railroad; thence to Madisonville, Ohio, on April 4, 1901.

Almon G. Archer

Almon G. Archer was born on August 27, 1851, at Bellaire, Ohio. He came to work with the Baltimore and Ohio as engine wiper. He says he did a little of everything; he washed out boilers, helped machinists, cleaned ash pits and became an engine hostler. He went firing on what was then known as Tunnel Hill, as helper for Matt Fogarty, engineer. He was promoted in 1873 to handling passenger trains over the Ohio River Bridge, the shop being on the Ohio side. The engineers and firemen got on and off engines at the depot.

Mr. Archer came to Chicago Junction from Willard in 1887. He was in continuous service as engineer at Willard Yards until November 17, last year, when he was retired on a pension. Mr. Archer says:

"I am sending the last picture that I had taken. The oil can shown (the engraver, in error, cut this out of the picture, Ed.) was presented to me when E. W. Scheer was our general superintendent. Mr. Scheer took a great deal of interest in getting this can for me. I feel very proud of it. I am now leaving the service of the Baltimore and Ohio with a clean record for all of the years I have worked there. I feel that I have always been shown great courtesy by our officers and I have a warm spot in my heart for the Baltimore and Ohio." The inscription on the can reads:

PRESENTED BY THE BALTIMORE AND OHIO RAILROAD TO A. G. ARCHER, ENGINEER ON CHICAGO DIVISION, IN RECOGNITION OF FAITHFUL AND EFFICIENT SERVICE.

(Continued on page 39)

YEARS OF FAITHFUL SERVICE HAVE ADDED THEIR NAMES TO OUR LIST OF PENSIONERS
Left to right: 1. Louis Batie. 2. Almon G. Archer. 3. J. W. McCurdy. 4. Mark A. Matson. 5. James R. Martin. 6. Abram G. Maxon

Women's Department

Edited by MARGARET TALBOTT STEVENS

That's Just the Way With a Mother

*Sewing, and sewing, and sewing, and basting and stitching with care,
But pausing a moment bestowing a kiss on her baby's soft hair,
Never too tired to bind bruises, helping this one, then another,
No matter what she herself loses—for that's just the way with a mother.*

*Now darning a stocking for Harry, and tying a ribbon for Ruth,
And pressing some ruffles for Carrie, while smiling at baby's new tooth.
Your quarrels? She makes you forget them with tales of some sister and brother,
Who never let anything fret them—but that's just the way with a mother.*

*Finding the chisel or hatchet, that father may build a new shelf;
A choice bit of lace—she must match it—for Jennie—but not for herself.
She gives to the poor and the outcast, e'en a tramp, she says, is our brother—
He, too, is quite tired and weary—and that's just the way with a mother.*

Entre the Woman Passenger Representative

*Miss Gessner Tells How Our Girls Can Help Her in Her New Work—
Getting Business for the Railroad*

PIONEER among railroads in having the first steam trains, the first trunk lines, the first electric motors, the first trains to run after dark, and many other features which make for better operation, the Baltimore and Ohio now becomes a pioneer in another movement. The first extensive employment of women for railroad work took place on the Baltimore and Ohio and for that reason it is not singular that this should be the first railroad in the East to appoint a woman to the position of passenger representative.

The announcement of Miss Gessner's appointment was made in the December issue of the MAGAZINE, but here Miss Gessner tells our girls of the Railroad and the wives of our men, something about her work. She has a message for us that is worth while. Her untiring efforts and enthusiasm will, without a doubt, win her success in her career, but it is more than personal success that Miss Gessner desires to accomplish. There are some things that we cannot do alone, and Miss Gessner has a big job on her hands.

"What I am particularly anxious to accomplish," says Miss Gessner, "can only be done successfully through the help of our Railroad women. For example, Baltimore and Ohio employes in Baltimore alone number about 14,000. The payrolls for Baltimore and vicinity amount to more than

\$2,000,000 a month, the greater amount of which is spent in the city of Baltimore. This amount cuts no little figure in the commercial life here. Now, our girls, as patrons of the various department stores, have a right to request that the proprietors of these business houses in which they spend their money shall reciprocate by patronizing the Baltimore and Ohio.

"Of course, it isn't the easiest thing in the world to ask a person pointblank for his patronage, and here is where many girls hesitate. But even then, there is an alternative. If you have an idea of the possibility of new business, put your local traffic representative in touch with it, and you will have done the Railroad a big favor.

"Although I am assigned only to the Baltimore Division, and, of course, my work is in this territory exclusively, I will welcome suggestions from other divisions and departments and will make good use of them. Our women may feel free to offer any suggestions for improvement in service, particularly those pertaining to the comfort of women travelers. We shall appreciate whatever efforts you may make to keep in touch with local conditions. If you know of prospective patrons and will write and tell us how to get in touch with them, who knows but that you may open up a floodgate of new business for the Railroad?

"My own work is chiefly among women: soliciting the patronage of women's schools and colleges, women's clubs and societies, department store buyers, and business women in general. The much-discussed topic, 'women's work,' her sphere, what she should and should not do, is altogether too much discussed; it is high time that we show some of the 'spirit within us' by accomplishing something worth while. And there is no finer or broader field in which to begin than that of railroad work. Those of us who are fortunate enough to have the opportunity of beginning here will find that the field is practically unlimited if we have the will to do. This is not meant to be a sermon, but just an honest, earnest appeal to the women of the Baltimore and Ohio. Will you do your share?"

Those in the service of the Baltimore and Ohio who are acquainted with Miss Gessner are also acquainted with her enthusiastic spirit. Over and over Miss Gessner emphasizes her enjoyment of the 16 years of service with the Railroad. Her experience has been a happy one, and we are glad to see a woman chosen from our ranks who is able to handle this important work. Moreover, Miss Gessner's appointment has practically opened up a new field of opportunity for women. For this reason it deserves the cooperative support of our women. Suggestions and information may be sent to Miss Gessner direct, or, if you prefer to send your letter through the office of the MAGAZINE, we shall be glad to forward it to her. A big job? Yes. Let's help her handle it.

The Realist

Little Freddie came home one night with his clothes full of holes.

"What in the world has happened to you?" cried his mother.

"Oh, we've just been playin' grocery store and everybody was something," replied Freddie, "and I was the cheese."

—Southwestern Telephone News.

Mabel T. Gessner, passenger representative

Echoes from Christmas

IN a certain Sunday School in Baltimore, on the Sunday before Christmas, a teacher was teaching the lesson about St. Paul. The children were trying their best to pay attention to the lesson, but what could you expect when they had just heard the story about Christmas; when they had just sung a half-dozen Christmas Carols, and when all the air was full of Christmas? At last the teacher strove to gain their attention by questioning them.

"Who was it," she asked, "that took such good care of Paul on his journeys?"

A few heads turned towards her and gazed blankly into her face. Finally one little fellow felt that it was somebody's duty to reply. Up went his hand.

"Well, Charles," said the teacher, "I don't understand why you always seem to be the one who takes the most interest in the lesson. Suppose you tell us. Who was it?"

"Santa Claus!" shouted Charles triumphantly.

Little Peggy's mother took her downtown to see the Santa Claus in one of the department stores. Poor Santa! He was so tired, for he had been working hard all day, shaking hands with little people, giving them gifts, asking thousands of them what they wanted for Christmas. So by the time that Peggy reached him, he was so weary that he did not pay much attention to her.

Peggy didn't like that much. When they came down to the street again, she walked over to a Salvation Army Santa Claus who was ringing a little bell. He stopped to shake hands with the little girl, patted her on the cheek and let her ring his bell.

"My!" exclaimed Peggy, "But you're a whole lot politer than the Santa in that store. I guess I'll have to give you something." She took out her little purse and counted out her pennies. "There!" she exclaimed, "I'm dre'ful sorry I've only got five cents with me. You see," she added as Santa Claus smiled, "I left all my big money at home."

Santa thanked her. "Now, what do you want for Christmas?" he asked.

"Well," replied the little five-year old, "I'm afraid you can't give me what I want." She lifted her little hat. "You see, my hair is so straight; I wish you would bring me some nice curly hair. Can't you?"

The Creation of Woman

A curious old Sanskrit story of the creation of woman.

In the beginning, when Twashtri came to the creation of woman, he found that he had exhausted his materials in the making of man, and that no solid elements were left.

In his dilemma, after profound meditation, he did as follows:

He took the rotundity of the moon, the twinkling of stars; the curves of creepers, the clinging of tendrils; the trembling of grass, the slenderness of the reed; the bloom of flowers, the lightness of leaves; the tapering of elephant's trunk; the glances of deer; the clustering of rows of bees, the joyous gaiety of sunbeams; the weeping of clouds, the fickleness of wind; the timidity of the hare, the vanity of the peacock; the softness of the parrot's bosom, the hardness of the adamant, the sweetness of honey, the cruelty of the tiger; the warm glow of the fire, the coldness of snow; the chattering of jays, the cooing of the kokila; the hypocrisy of the crane, the fidelity of the chakravaka; and compounding all these together he made woman and gave her to man. But in two weeks the man came crying: "O Mighty Master of Mysteries! Thou who hast made all the wonders of the world, take again the woman Thou hast given me; she teases me, she tantalizes me, and tires me, and I cannot live with her any more." And Twashtri took the woman away. But in two weeks the man came again and cried out, "Give me back the woman that Thou made; I cannot live without her."

"How, now?" came the answer. "You brought the woman to me, saying that you could not live with her. What do you want?"

"Alas, 'tis true," said the man. "I do not know what I want. I cannot live without her, and I could not live with her."

And Twashtri answered: "Take the woman now, and do the best you can together, for I made her for you and you for her."—*Ax-I-Dent-Ax.*

Mrs. Matson's Pie Crust

Here's another pie crust with a story. A. O. Herman, chief clerk to the general manager, took his family on a vacation to northern Michigan. They had the good fortune to find a boarding house at which were served most delicious apple pies. These were so good that when Mr. Herman's little daughter, who does not eat pie, received her share, she held an auction sale among the other guests there, selling her piece to the highest bidder. Before they left, Mrs. Herman secured the receipt for the crust. This she has kindly passed on to us.

Two cups of flour

Salt to taste.

$\frac{1}{4}$ teaspoon baking powder

Sift these together thoroughly, then add: 1 cupful lard (if Crisco is used, use scant cupful).

Add enough tepid water to make a soft dough. Chill thoroughly, roll out and cut several slashes in top crust to allow steam to escape. Brush over with cream before placing in oven; the thicker the cream, the better the pie. This seems extravagant, considering the fact that whipping cream is *only* 50 cents a pint, but it certainly improves the crust.

Dear Women Readers:

What are you going to write in your diaries for the New Year, or do you keep such things? I usually begin one; indeed, it has become a sort of habit with me to begin a diary whenever New Year's Day comes rolling around; but, as Grandfather used to say, "to begin a diary is one thing, to finish it is another." I can't remember ever finishing one. That's a horrible confession, isn't it? Nevertheless, it's the blessed truth I'm telling ye.

In hunting through the pile of good intentions that I always have somewhere around, I came across a diary that I had begun on New Year's Day, 1916. There I had written out all my good resolutions—perfectly good then, for they were new—in a straight, neat, little column right down the page. It might be a bit embarrassing to read them aloud, but here are two of them:

1. I'm going to try to make each minute count, so that at the end of each day's work, I can say (to quote "Fawthah" in the funny paper), "Beat it, Conscience, you don't worry me one bit."

2. I'm bound and determined that I shall save for myself one hundred dollars (\$100) during the coming year."

I don't recall my degree of success in the first resolution, but there are figures on my bank book which show (Sh-h-h-h, now, don't come around to borrow any money; those were in days gone by) that I gained the second point. All of which only goes to show that it's a blessed good thing to set a standard for your savings account, even if you never make another resolution.

So, here's a good wish that the end of this year will find us all with nice fat checks from a Christmas fund, so that we'll be able to give Mary the doll that she wants and Johnny the bicycle that he longs for.

Yours Sincerely,

Margaret Talbot Stevens
Associate Editor

Paris Approves These Smart Styles

Fur and Embroidery Supply the Little Touches of Luxury—Uneven Hems Express Extremes in Length for New Skirts—Velvet in Enormous Demand for Dresses and Outer Wraps

By Maude Hall

NEW sleeve arrangements have so changed the appearance of the one-piece straight-line frock, that, at first sight, one might take it for either a frock, a wrap or a negligee. But no variation destroys the slender silhouette, for the styles to which Paris has given her cachet for another season are straight and simple, with low waist-lines and interesting ways of defining them.

Sleeves are demanding most of the attention of the designers of artistic apparel. The most exquisite decorations are lavished upon them and frequently they are riots of color. While embroidery, beads and braid are used generously in their development, many of the best models are trimmed with bands of Chinese and Japanese silks of unique pattern which have almost the same effect as handwork. Even fine old lambrequins and bits of drapery are being divided into strips and bands to contribute to successful sleeve treatments.

A dress that follows the straight silhouette, but yields itself unstintingly to the newest fashion in sleeves, is carried out in midnight blue tricotine. The shirt, a circular model, is trimmed with bands of flat black silk braid, put on in groups. The braid, however, is rich and simple in design so that it does not detract from the general simplicity of the frock. The armholes are almost square, with a very straight line at the front. Into these immense armholes are set flowing sleeves of self-material which, in turn, have puffs of tomato red Canton crepe

gathered into wristbands of the same material stitched with black and gold braid. Red, black and gold braid outlines the round, collarless neck, and with the dress is worn a band of squirrel fur edged with monkey. The mode gives one a valuable idea for modernizing a neckpiece of former seasons, though there is nothing in the laws of Nature to reconcile the combination of squirrel and monkey. Fashion has scored one on Nature, nevertheless, for the result is stunning and bound to be exceedingly popular.

Moussyne is a new fabric representing the material with soft, thick pile. It is warm,

and when interlined and worn with small furs, can be worn on the coldest days without a heavy wrap. The colors in which it

seems to be most liked are brick red, mid-night blue, cocoa, stone gray and black. There was never such a variety of street suits as one finds this season. Coats are of all lengths, from hip to knee, with and without ripples on the sides, with godets and with flat effects back and front. Frequently they are trimmed with fur, but it is seldom that a band entirely circumscribes the entire lower edge of a jacket. Usually the lines are broken at the front or sides. Sometimes there is only a band at the back, or one at each side.

Velvet is in enormous demand for dresses and wraps, particularly dresses of the coat type. A model, typical of the best coat-frocks, is straight and has a low waist-line defined with a girdle of satin. The neck is finished in square effect, though if preferred, the fronts may be slashed and rolled back to form revers and collar. The lower edge of the skirt is trimmed with a border of heavy embroidery silk and dull black wooden beads.

WOMEN READERS !

You can get any pattern here shown by filling out the following coupon, clipping and enclosing with price shown (stamps, check or money order) in envelope addressed "Baltimore and Ohio Magazine, Mount Royal Station, Baltimore, Md."

While no great change is observed in the length of the newest skirts, designers seem to have compromised the differences of advocates of long and short models by combining both. Frocks with uneven hem-lines are seen as often as those finished in the regular way. Side panels and extended tunics are the favorite methods of proving that a skirt can be long and short at one and the same time. Maroon brown broadcloth is used for an attractive one-piece frock which says the last word in skirt arrangements. The long-waisted blouse is in kimono effect, the short, wide sleeves being trimmed along the shoulder seam with buttons and very narrow braid. At the sides are long, narrow panels, gathered under a string belt of self-material and hemmed to fall three or four inches below the hem of the skirt.

Coats are long enough to cover the dresses over which they are worn, and otherwise of ample proportions. Their lines are smartest when straight, but wide latitude is taken in the treatment of collars and sleeves. Velvet is as much in demand for wraps as for dresses and tailleurs. They are rich in effect and, for purposes of economy, one will find that the velveteens look quite as well and cost nothing like as much as the fine velvet weaves.

BOUSE No. 9784. Sizes, 34 to 46 inches bust.

SKIRT No. 9782. Sizes, 24 to 34 inches waist.

BOUSE No. 9776. Sizes, 34 to 44 inches bust.

SKIRT No. 9774. Sizes, 24 to 36 inches waist.

BOUSE No. 9779. Sizes, 34 to 44 inches bust.

SKIRT No. 9785. Sizes, 24 to 36 inches waist.

DRESS No. 9711. Sizes, 34 to 42 inches bust, and 16 to 20 years.

DRESS No. 9700. Sizes, 34 to 42 inches bust, and 14 to 20 years.

GIRL'S DRESS No. 9752. Sizes, 6 to 14 years. Price, 30 cents.

COAT No. 9669. Sizes, 34 to 46 inches bust. Price, 35 cents.

CHILD'S DRESS No. 9685. Four sizes, 1 to 4 years. Size 4 requires $2\frac{3}{8}$ yards

36-inch material. With round neck. Dress is slashed and closed at center-back; it is gathered at neck in front and back and at shoulder seams. The under-arm seams are left open part way. Price, 30 cents.

GIRLS' DRESS No. 9629. Five sizes, 6 to 14 years. Size 8 requires $2\frac{1}{8}$ yards 44-inch material. Without lining; to be slipped on over head. Front of dress is slashed at center and edges bound. Front and back of dress are slashed from under-arm edges. Price, 30 cents.

Lesson in Home Dressmaking

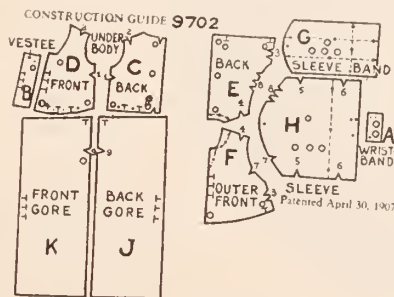

Semi-Formal Day Dress of Midnight Blue Crepe with Bead or Silk Embroidery

THE wide sleeve has exerted its influence upon this attractive frock of midnight blue crepe. It is of the conventional long-waisted type, with round neckline. The sleeves are set into the large armholes, then embroidered. The embroidery is also applied to the front of the blouse after it is finished. The two-piece gathered skirt closes at the left side seam and is attached to the lower edge of the waist. Medium size requires $4\frac{3}{4}$ yards 36-inch material, with $\frac{7}{8}$ yard 36-inch lining for the underbody.

Both gores of the skirt and the outer front of the waist must have the triple "TTT" perforations of the tissue rest along the lengthwise fold when cutting, so as to avoid seams. The sleeve is cut from an open width of material, as shown in the cutting guide. The back of the waist has the large "O" perforations laid over a lengthwise thread. In cutting the lining, place the front along the lengthwise fold and the back with straight edges running even with the selvages.

In order to have a proper foundation, make the underbody first. Close the under-arm and shoulder seams, then turn a hem in the back at notches. Plait the lower edge, and tack. Next, take the outer waist and close underarm and shoulder seams as notched. Hem the right back on large "O" perforations and allow left back edge to extend for an underlap. Gather lower edge of waist between "T" perforations.

Take the sleeve and close seam as notched.

CUTTING GUIDE 9702 Showing Size 36

Hem the lower edge and sew in armhole as notched, with small "o" perforation at shoulder seam and with seam of sleeve at under-arm seam. Hold sleeve toward you when basting it in armhole.

Now, join gores of the skirt, leaving left side free above large "O" perforations in front gore. Finish for closing. Gather upper edge of skirt between "T" perforations and sew to lower edge of waist, with center-fronts and center-backs even. Bring side seam of skirt to underarm seam. Leave back gore free on left side from center-back to left side seam. Draw gathers to the required size and finish for closing. Arrange the sash around the waist and tie at the side or in front.

DRESS No. 9702. Sizes, 34 to 42 inches bust and 16 to 20 years. Price, 35 cents.

Little Conductor New Year

*Little Conductor New Year came rushing down the stair,
Wished good day to Father Time and brushed his shining hair,
Donned his bran new hat and coat and pulled his 'spenders tight,
Started out to take his run for twelve o'clock that night.*

*Little Conductor New Year then ran to catch his train,
Slipped and fell upon his nose in all the sleet and rain,
Pulled himself up quickly, for he had no time to lose,
When, to his dismay, he found that he'd lost both his shoes.*

*Now, what on earth was he to do without his shoes tonight?
He surely must not miss his run, the engine was in sight—
"O, ho, Conductor New Year," cried someone stepping down,
"And did you come without your shoes to take this train to town?"*

*Little Conductor New Year then laughed with all his might
And told the kind old gentleman about his sorry plight.
So now, if you should meet him, you may laugh, too, if you choose,
For little Conductor New Year wears Conductor Old Year's shoes.*

The Giant of Sugar Loaf Mountain

A Fairy Tale

SUGAR Loaf Mountain stands high above the little town of Dickerson, Md., which lies between the cities of Washington and Cumberland. Here, years and years ago, there dwelt a big giant named Krushboulder. His house was right on the very tip top of the mountain. With him lived his wife and their one son. The wife, Goodisella, was terribly afraid of her husband, who was very cruel. Her little boy, Rorjan, was also afraid of his father and hid whenever he heard him coming into the house. They always knew when Krushboulder was coming, for he made so much noise.

Sometimes Krushboulder would be away from home for days at a time. It was only then that Goodisella and Rorjan lived in peace. And always the children of the village were afraid to go out of their houses, for if Krushboulder disliked anything it was a boy or a girl. Even the dogs ran away from the giant, and nobody loved him.

Years before, when Krushboulder came to Sugar Loaf Mountain to live, he had brought Goodisella, his young bride, with him. The people were afraid of him and had allowed him to build his home wherever he would; and so, Krushboulder had chosen the peak of the Sugarloaf for his home. He did no harm to the people, and

all went quite well with them until one day when Krushboulder grew angry with Goodisella. It was on a dark night that the giant took a trip down the mountain side. When he returned in the morning he carried on his back what he told Goodisella was a sack of meal.

"This meal is different from any other," he told his wife, "I want you to bake it into bread for our little Rorjan, it will make him grow fat."

Now, Goodisella at once became thoughtful, for never had she heard Krushboulder speak in any but harsh terms of the little boy. So when she heard him say "our little Rorjan," she thought that she would not bake this strange meal into bread for Rorjan until she found out what it was made of.

That night Krushboulder went away from home again. When Goodisella and little Rorjan went to bed they heard a strange noise as of somebody grinding rocks together. The people down in the village heard him, too, and were afraid.

"It must be the giant grinding his meal at the mill," they said. But Goodisella did not think so. The grinding went on and on. Finally, little Rorjan fell asleep. Then Goodisella arose, threw a shawl over her head and ran in the direction of the noise.

Now if you know anything at all about

Dickerson, you know that there are big stone quarries nearby. In those days they were only gravel pits. It was to one of these that Goodisella ran. As she came nearer she could see by the moonlight that Krushboulder was grinding together the big stones into the finest of powder. He could grind only a handful at a time, but each handful he picked up and put into the sack that lay beside him on the ground. Goodisella watched him for just a minute, then she ran home.

In the morning old Krushboulder came in with another sack of the meal. Goodisella was preparing his breakfast.

"Here is some more meal," he said, "be sure and make it into nice loaves for our little Rorjan." Goodisella did not reply.

"Where is Rorjan?" asked the giant presently.

"Asleep," replied his wife.

"Then," said Krushboulder, "you did not give him the bread, did you?"

"I did not," replied Goodisella.

"But why? Why? Why?" he thundered so loudly that he shook the mountain with his terrible voice. Little Rorjan tumbled out of his bed and came running to see what was the matter.

"Because I know that you make the meal of the stone from the pits," said Goodisella bravely.

"Who told you?" thundered the giant again, stamping one of his heavy boots on the floor and throwing the other at Rorjan.

"I saw for myself," said Goodisella.

"You saw for yourself! Then take the stone meal and make it into bread, and feed it to Rorjan, and eat it yourself. Do this or I shall kill you!" And Goodisella was afraid, but she would not let him know it.

"I shall do this tomorrow," she said.

The next day came, the giant ceased his snoring, arose and came down for his breakfast.

"Today, you remember, you and Rorjan eat bread made of the stone meal," he said.

"Tomorrow," said Goodisella.

"But tomorrow never comes!" declared the giant, stamping his feet on the floor. The house rocked. "You shall do it today, I tell you, today! At noon I shall come with my axe. If you do not feed to him and to yourself the stone meal bread before sunset, you shall see what will happen. Do you promise?"

Poor Goodisella could do nothing else. She turned sadly to her work, thinking of the hard task that the giant had set for her. Soon she heard a knock on the door. It was not a heavy knock like that of the giant; it was just a light tap, tap.

"Who is there?" called Goodisella.

"It is I, the fairy, Mista. I have come to help you." Goodisella opened the door.

"Good day to you," said the fairy, "I have heard about your trouble. I am sure that you do not wish to give to your little boy the bread which the giant wished you to give him. But I can tell you what you

can do. Bake a loaf of bread from this meal for the giant's dinner today. If it does him no harm, you may be sure that it will not harm your little Rorjan."

Goodisella thanked the fairy, who went on her way. Then Goodisella set to work to bake a loaf of bread for Krushboulder's dinner as the fairy had said. It was just done to a turn when the giant came in.

"Have you baked the bread for yourself and the child yet?" he asked, sitting down to the table.

"Yes," replied his wife. "It is too hot for us to eat now, but we shall eat it after you have finished your dinner." The giant muttered and began to fill his plate. Great mouthfuls of the food he took at one gulp. Almost the whole of the loaf was taken into his mouth at one bite. He chewed it up and swallowed it quickly. Suddenly he jumped up from the table.

"What have you given me to eat?" he shouted, rushing to the door for air.

"Only a taste of your own bread," said Goodisella, "if it will make little Rorjan strong and healthy, it will be good for you also."

But Krushboulder was out of the house and on his way down the mountainside. Goodisella watched him, for she did not know what harm he might mean to do. But as she watched, she saw him stumble and fall. Then he rolled down, down, down the mountain to the foot of it and over into the stone pit.

Goodisella and Rorjan waited and waited and waited, but Krushboulder never came back.

For many, many years Rorjan and his mother lived together on the top of the mountain. When Rorjan grew to be a man he took his mother with him into another country to live. The people of the town were sorry to see them go, for since the giant had left, they had learned to love Goodisella and her son.

And for many years afterwards, on frosty nights the people of Dickerson and the surrounding towns often heard a great scraping noise in the direction of the stone quarries.

"That is Krushboulder grinding his meal," they would say. And sure enough, when they went down to the stone quarries in the morning, they would see great rocks that had been split in two and some that had been crushed into powder.

Dear Girls and Boys:

A Happy New Year to you all!

Now, if you will hunt around on the Children's Page, you will find a nice little coupon. Do you want to know what that coupon is for? Well, first of all, read all about the "Our Town Contest" for Baltimore and Ohio girls and boys. Next, get your paper and pencil and write all you know about your own city, town, or village. If you live in the country, write about the nearest village or town. You may ask all the questions you please of anyone who may

be able to tell you anything about it, but do not copy from books. If you know any stories about your own town, tell them. If you can make up a story about your own town, send that in on a separate piece of paper. Nearly every town has some legend or fairy tale connected with it. Just for example, I'll tell you one.

Down in Weston, West Virginia, there is a hotel that serves chicken to its guests every day. It is said that the old gentleman who used to own the hotel left a provision in his will that chicken be served at this hotel at least once a day. This had been done regularly, but one day it was impossible to get enough chickens for dinner, so the meal went chickenless. 'Tis said that on that afternoon the old gentleman's picture fell from the wall and crashed into a thousand pieces. Since then the people who run the hotel have not dared to let a day go by without serving chicken.

Of course, that's only a "yarn," but it's

funny, isn't it? You can make up something just as funny about your town. All of the funny stories will be published in the MAGAZINE, so please hurry up and get yours in first.

Now for the coupon. After you have written me all about your town, get a picture or two, if you can, to send along. Then clip the coupon, fill it in, pin it in your paper, and send all in to me.

Address: Aunt Mary, Baltimore and Ohio MAGAZINE, Mt. Royal Station, Baltimore, Maryland.

I want to hear from many, many little girls and boys who have not yet written to me, as well as every single one who has already contributed to the Children's Page.

Lots of love to you all,

Aunt Mary

No, He Isn't Our President, But He May Be Some Day

HERE is a picture of little Daniel Willard Eckman, named for the president of the Baltimore and Ohio. He is just eight years old, and the youngest of ten children. His "daddy," who is Passenger Conductor Harry Eckman, Baltimore Division, brought little Daniel Willard into the MAGAZINE office to see us the other day. The little fellow sat on Aunt Mary's lap and told her he would rather play dominoes than anything else in the world. Then his "daddy" told her how he happened to give the boy the name of President Willard.

It was just past midnight on December 13, 1913, when Conductor Eckman had just finished a run on No. 15, to which had been attached Mr. Willard's car. He was on his way home when he was hailed by his family doctor.

"Hey, there!" called the doctor, "Guess what's happened."

"Can't" said the conductor, "unless—"

"Yes, it's unless," replied his friend, "the stork has paid you a visit."

"What? Again? Why, he's been here nine times already."

"Can't help that, he's come again."

"What did he bring this time, a girl?"

"No, siree, a fine little boy."

"Then I shall call him Daniel Willard," declared Mr. Eckman. And so that became the boy's name. But the two names being rather long to call such a little fellow, his parents decided that just for everyday he would be called by the last half. And so his brothers and sisters and the fellows at

Daniel Willard Eckman

school all know him by the name of Willard Eckman.

Willard had lost a big tooth in front, and

this is perhaps the reason why he smiled without showing his teeth when our picture man, Mr. Luckey, made the nice photograph of him. He is mighty fond of steam engines, and when little boys once get to liking steam engines, you never can tell about what they will be when they grow up. We hope that this boy will be as fine a man as the one for whom he was named.

"My Home Town"

A Prize Contest for Baltimore and Ohio Boys and Girls

BEGINNING at once there is a prize contest, open to Baltimore and Ohio girls and boys who read the Children's Page, known as the "My Home Town" Contest.

Many of our little folks have written letters from towns on our Railroad that the others do not know anything about. In order that we all may find out about the towns in which each one of us lives, we want each girl and boy to write a letter to Aunt Mary and tell her all about his or her own home town. Of course, the histories and geographies tell about some of the larger towns and cities, but the smaller ones are often left out. And lots of interesting things about the larger ones are forgotten, too.

Why do you like your home town? What are the things that make it interesting to you? How did the town get its name? Which is the oldest building? What kinds of parks have you, or do you have any? What is the most beautiful thing about your town? How many churches and schools have you? Who is the mayor of your town, (if you have a mayor)? How many people live there?

These are just a few of the questions that you can answer, if you wish, but these are only suggestions that will help you to describe the place in which you live.

Rules of the Contest

1. Every Baltimore and Ohio girl and boy (this includes all who have relatives working with the Baltimore and Ohio), may enter the contest.

2. The contest closes on February 28. Your letters must reach the MAGAZINE office before March 1.

3. If possible, enclose with the letter a photograph or good snap-shot of yourself.

4. If you desire, you may enclose a good, clear snapshot or postcard picture of some interesting point in your town.

5. Write your letter on one side of the paper only, allowing plenty of space between lines. Make it as long as you wish.

6. Address your letter to Aunt Mary, Baltimore and Ohio Magazine, Mt. Royal Station, Baltimore, Maryland.

7. Six prizes will be given in all: Three for the best letters from girls and three for the best letters from boys. The prizes will be the latest books for little folks: two books worth \$2 each, two worth \$1.50 each, and two worth \$1.00 each.

8. Do not copy your information. It is permissible to read all magazines, books, and newspapers that may tell anything about your town, but we want the letters to be all your own. The best way to find out is to ask questions of all the folks at home, of your teacher, your librarians, or of anybody who you think might be able to tell you something interesting. If you live

in a small village, ask some of the older folks of the village to tell you some stories about the early days. Perhaps you will uncover something that many grown folks who read the MAGAZINE never have heard about. The prizes will not be judged according to length; the principal thing is to make them interesting. Let's all try hard to win a prize. The sooner you send in your letter, the better.

I Found a Friend

BENWOOD, W. VA., October 20, 1921

MR. W. J. DUDLEY, Superintendent,
Relief Department,
Baltimore, Md.

Dear Sir—I am returning herewith your letter of the 17th inst., informing me that my loan has been paid in full, with acknowledgement of receipt of enclosures listed therein.

Now that I have, after many vicissitudes, achieved the ownership of a home, I want to express my gratitude to the institution which made it possible for me to do so. Throughout the time I was paying for the property I was treated with the utmost courtesy, patience and generosity by the officers of the Relief Department. When circumstances beyond my control caused me to get behind with my payments I was never hurried, nor harrassed but was, rather, encouraged by friendly assurances. I found a friend indeed in the Relief Department on more than one occasion. This is no mere formal expression of appreciation; every word of it carries a full measure of sincerity.

Very respectfully yours,
(Signed) MICHAEL T. WHALEN,

Engineer

Left: Francis, son of George J. Miller, chief clerk to freight agent, Chillicothe, Ohio. This healthy looking youngster was so delicate when he was born that he had to be kept in an incubator for four weeks; doesn't look like it now, does he? Our Pensioners

(Continued from page 31)

James R. Martin

James R. Martin, pensioned machinist, was born in Baltimore on September 20, 1856. He entered the service of the Baltimore and Ohio on February 1, 1873, as machinist apprentice at Howard and Lee Streets, Baltimore. Later he went to Bailey's at the foot of Eutaw Street, and then to Riverside shops, where he served as machinist up to the time of retirement. Mr. Martin has been a member of the Veterans' Association since it was organized. He was pensioned on November 10.

Mark A. Matson

Mark A. Matson, retired passenger conductor, was born in Claysville, Ohio, on October 21, 1854. He entered the service of the Cleveland and Marietta Railroad as brakeman in 1881; went to the New York Central at Zanesville in September, 1889, and to the O. & L. K. (later acquired by the Baltimore and Ohio) in 1902, as passenger conductor, on what are now known as Trains 55 and 56, running between Zanesville and Parkersburg.

The longest time that Mr. Matson was off duty was after the flood of 1913, when the track was so badly damaged by water. No. 55 arrived in Zanesville on March 25, and did not get out (as No. 56) until April 29.

Mr. Matson is now living on his farm west of Zanesville on the Old National Road. He is much interested in his standard bred horses. He has one sired by Galt, 2-2¼; another by Don Cale, dam Alice Crescus, by Crescus. His hobby is Masonry. He is a member of various lodges and commanderies. He says that the latchstring is always on the outside to his Baltimore and Ohio friends, all of whom will receive a hearty welcome.

J. W. McCurdy

John W. McCurdy, pensioned engineman, Pittsburgh Division, came to the Baltimore and Ohio on February 1, 1882, as fireman at Connellsville. In less than two years he was promoted to engineer. Connellsville was then the terminal for the Pittsburgh Division. Mr. McCurdy ran out of Connellsville for one year, was then sent to Pittsburgh Terminal for two years, and later to Glenwood. He ran on all of the branches of the Pittsburgh Division. He ran in both freight and passenger service for about ten years, there being no extra passenger trains as there are now. Then he took what was known as the Glenwood Coal Train. This run he kept for twelve years. The remaining years—until the time he was retired (October 1, 1921) he spent on the work train. Mr. McCurdy says: "I wish to take this opportunity to extend my sincere appreciation to all my friends for their every kindness during my many years of association with them."

Here and There

BY GEORGE K. SEIBERT,

Dispatcher, Camden Station

Arriving at the Hotel de Ville in Brussels we found a crowd assembled. Making inquiries we were informed the American Legion delegation would soon arrive. So we waited too, and while waiting, listened to the conversation about us.

A Belgian accompanied by his family was giving all the information he could to all desiring it.

"Papa, are the Americans rich?"

"Oh yes, my sister, very, very rich."

"Papa, are they millionaires?"

"Mon Dieu, Millionaires? They are Arch-Millionaires."

The American Color-Sergeant, evidently

imported from the Rhine watch for the occasion, was holding Old Glory at a rather rakish angle and seemed to be in a bad humor. An American (from Richmond, Va.) called to him.

"Hold her high, Old Top, so we can see it."

"Aw! This stuff gits me goat and me corns are hurtin'."

During the war there was a Major in the French army who was as deaf as an iron pot. One night while he was sleeping in his concrete walled dug-out, their position was severely shelled by the Germans and through all of it the Major slept tranquilly until a shell, bouncing from the roof of the dug-out, exploded with a terrific crash. The Major, thinking someone had rapped, jumped from his couchette and running to the door cried, "Come in."

This picture, drawn by Lenore, little daughter of Towerman Taylor, Aiken, Md., won first prize at the Cecil County (Md.) Fair, last year. Her beautiful story, "How the Susquehanna got its name," will appear in an early issue of the Magazine

Safety Roll of Honor

Baltimore Terminal Division

BALTIMORE, November 26, 1921.

MR. J. J. SANATORA,
Leverman,
Carrolls Tower,
Baltimore, Md.

Dear Sir—I am in receipt of advice that on November 24, 1921, at 11:55 a. m., while extra, engine 4873, east, with 29 loads from Mt. Winans Yard, was passing through crossovers at Carrolls, you noticed brake rigging dragging on C. & Pa. car 12936, fourth car from engine, which was loaded with coal, and that you succeeded in stopping this train by use of hand signal.

I wish to thank you in behalf of The Baltimore and Ohio Railroad Company and myself for your prompt action in stopping this train, as undoubtedly it was the means of averting a serious accident.

Yours truly,
(Signed) C. M. SHRIVER,
Superintendent.

Baltimore Division

While train second 98, engine 4259, was stopped at Stanton on October 30, Brakeman J. F. Baumgart looked over the train and discovered a broken spring hanger under Baltimore and Ohio 20931. He reported it to the conductor and car was set out. Brakeman Baumgart has been commended for his close inspection of equipment and the prevention of derailments.

Cumberland Division

CUMBERLAND, MD., December 2, 1921.

MR. A. C. HARDY,
Operator,
Okonoko, West Va.

Dear Sir—It has recently come to my attention that on the morning of November 21, while on your way to work, you discovered a broken rail on No. 4 track at east end of Little Cacapon Cut; that you flagged No. 94, engine 4416, which was then approaching, and with the assistance of Engineer Myers, blocked the rail up with tie plates sufficiently to permit of No. 94 and steel passenger special running over the broken rail at slow speed. You then had trackmen called and soon had the trouble corrected.

Your alertness on this occasion no doubt saved delay and possible accident, and I wish to assure you that it is thoroughly appreciated by the Management as well as myself.

Yours truly,
(Signed) C. W. VAN HORN,
Superintendent.

Monongah Division

GRAFTON, W. VA., December 7, 1921.

MR. WILLIAM MINARD,
Phillipi, W. Va.

Dear Sir—I am advised by our agent at Phillipi that on the morning of December 5 you found broken rail in our main track near Brick Kiln just east of Phillipi; that you left your brother to flag No. 33 and immediately came to the office at Phillipi and reported this. I understand that it was a bad break and that your prompt action

probably averted a serious accident. I assure you that your actions in this respect are very much appreciated by the Company.

Yours truly,
(Signed) B. Z. HOLVERSTOTT,
Superintendent.

Charleston Division

Conductor C. W. Cogar, Brakemen H. V. Mullins and C. L. Bright have been commended for assisting in clearing track of trees and other obstructions after a storm.

Mr. C. W. Butler, Custis, W. Va., found a broken rail near Mile Post 80 and flagged train 64, advising crew of the damage. He has been appropriately thanked by the superintendent.

Mr. A. J. Knight, Burnsville, found a broken rail near Cogar. He flagged train 61, advising crew of the trouble. He has been written an appropriate letter by the superintendent.

Engineer R. N. Jeffries, Fireman J. H. Kyer, Conductor W. E. Nordeck, Brakemen D. Payne and E. M. Burkhammer have been commended for using excellent judgment in the handling of their train on November 18.

The following engineers have been commended for making over 100 per cent. in fuel performance, November: W. T. Spencer, Hefner, W. Powell, T. Morgan, G. F. Purkey, E. Whitecotton, R. E. Smith, R. Murphy, A. B. Nicholas, W. E. Paisley, B. H. Griffin, S. Mullins and M. A. Henderson.

Pittsburgh Division

NOTE: The following honor note got into our files in error, and we regret the delay in publishing it.—Ed.

At midnight, on August 20, some of our car force at Pittsburgh Passenger Station heard a call for help coming from the river at east end of train shed. Pipefitter R. R. Eustice was on duty at the time and swam out to the rescue of a Miss Hall, who was clinging to an overturned canoe, one end of which had been broken away. As Eustice approached the canoe he directed the young lady to hold the boat and he moved it ahead of him toward the shore. In the meantime, a life boat was secured from a river steamer in the vicinity and taken out into the stream to meet Eustice. The young lady was sent to the hospital.

Inquiry developed that Miss Hall was canoeing with an unknown person. They had been run down by a tow; her companion instructed her to hold to the canoe and that he would swim to the bank for assistance, but he was drowned, his body being recovered Monday noon.

A Union newsboy followed Eustice into the river to assist, but, not being a strong swimmer, had to be rescued by others from the bank.

On November 29, Baltimore and Ohio Brakeman N. B. Copeland, Coulter, Pa., informed the chief dispatcher of the Pittsburgh and Lake Erie Railroad, that a landslide was coming down on their tracks

between Greenock and Duncan. Arrangements were made by the Pittsburgh and Lake Erie to handle the situation. On November 30, Mr. J. B. Yohe, Jr., superintendent of the Pittsburgh and Lake Erie Railroad informed Superintendent Beltz of this occurrence and his desire that we express to Mr. Copeland his appreciation of the prompt action taken.

Cleveland Division

CLEVELAND, OHIO, December 15, 1921.

MR. C. E. WOOD,
Operator,
Beach City, Ohio.

Dear Sir—I have before me a report that you were on the platform at Beach City while local No. 73 was passing on December 13 and that you noticed a brake beam down on Wab. car 77839, two cars from the caboose and immediately notified the flagman who had train stopped and necessary repairs made.

I am glad to see our employees take the interest they do in trying to prevent accidents and I want to take this opportunity to commend you.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO, November 29, 1921.

MR. C. F. LICHTENWALTER,
Engineer,
Cleveland, Ohio.

Dear Sir—Understand that on November 23, you were engineer on No. 75, engine 2075. At about 4.00 p. m., when pulling through yard on westbound main track, you noticed broken rail on eastbound running track just west of "RD" Tower, and you stopped your train at Clark Avenue Yard office and notified the general yardmaster, who called section men and had necessary repairs made.

There is no doubt that your close observance averted a bad derailment, and I want to take this opportunity to commend you for your close observance.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO, December 5, 1921.

MR. J. DONLEY,
Brakeman,
Lorain, Ohio.

Dear Sir—I understand that on November 20, you were brakeman on an eastbound train and while extra 4310, west, was passing you at Pauls siding, you noticed fire flying from Baltimore and Ohio car 232134, sixth from engine. It had broken arch bar and spring hanger on north side of car and when the caboose of the 4310 passed you, you lighted a fusee and gave them stop signal and advised them of your observation.

There is no question about your averting a serious accident and I want to commend you for your actions in this case.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

Car Repairman August Beyer, while working on repair track at Dover, noticed a stranger with an empty sack loitering around the premises. A little while later, Mr. Byer noticed that the man with the sack had disappeared and with him had gone three perfectly good journal brasses. Exit Repairman Beyer in his Oakland roadster in pursuit of the offender. He finally located him sitting on a porch in the vicinity of the yards at Dover and proceeded to ask the stranger what his sack contained, but to no avail, except that it contained some old iron. This did not satisfy the pursuer, so

he attempted to look into the sack, whereupon the stranger drew a knife and threatened Repairman Beyer. Even this did not end the argument. Mr. Beyer went to the round house and got several more of our employes and once more went after his man. But on returning to the house where he was last seen, they found that he had disappeared. Then the chase began. The man was captured and the stolen brass recovered. Repairman Beyer has always been a faithful and wide awake employe of the Company at this point, and this shows he is working for its interests.

CLEVELAND, OHIO, December 7, 1921.
MR. JOHN LANTENSCHLAGER,
Track Walker,
Canal Fulton, Ohio.

Dear Sir—I have before me a report that while you were out hunting on the evening of November 22, you heard a train go over

what you thought sounded like a broken rail at Butter Bridge Spur, near Canal Fulton, Ohio; that you immediately came to the track and patrolled same until you located the broken rail; that you immediately got your son out to flag any trains which might come along, and then telephoned to the section foreman and had repairs made.

This is indeed meritorious service and you are to be commended. I am sure that you had the Company's interests at heart as well as the safety of your fellow employes.

Very truly yours,

(Signed) H. B. GREEN,
Superintendent.

Cincinnati Terminals

As an example of the "on the job" Railroad man at Ivorydale, the following is but

one of the many incidents in the Railroad's day:

On Sunday, November 13, Machinist Frederick Berger, Ivorydale Shops, was at Ivorydale Station awaiting train No. 51. When the train arrived, Machinist Berger noticed a defect. Attention to this defect was called and engine was cut off. Had this not been noticed, a serious accident might have occurred. Machinist Berger deserves much credit for his close observance.

New Castle Division

On November 15, while engine 2889 was at Akron Junction, Brakeman F. H. Kannal discovered a broken arch bar on east end of P. R. R. Car 10426. Mr. Kannal has had a commendatory entry placed on his record for his close inspection, as by his observance of this condition, he averted the possibility of an accident.

CUMBERLAND DIVISION

The following table shows the number of observations and corrections made on the Cumberland Division from November 11 to December 9, inclusive:

Date.	Train.	Engine.	Employee.	Position.	Location.	Brakes Stick- ing.	Hot Car Boxes.	Wheels Slid- ing.	Shifted Loads.	Flat Wheels.	Brake Rig- ging Down.	Broken Rails.	Broken Flanges.	Dragging Parts.	Open Doors— Mds. Cars.

Ohio Division

On November 11, Operator C. C. Potts, Bloom, Ohio, discovered broken rail in west end of passing track at that station. He notified Supervisor Mitchell, who was on train No. 59, who in turn notified section men to make repairs.

Conductor W. A. "Pete" Burns and Engineer C. H. Baucus, in charge of No. 90, recently discovered first overhead bridge east of Walnut Creek, near East Monroe, on fire. Train was stopped and entire crew, including Conductor Burns, Engineer Baucus, Fireman DeVore and Brakemen McGraner and Wills, extinguished the fire. Track supervisor was then called and after examining bridge reported it safe for normal speed.

On November 20, while protecting rear of No. 33, Flagman J. W. Plum observed broken rail east of penstock on Midland District main, the rail being broken on north side near angle bar. He immediately reported this to dispatcher, who covered by "19" order until section men could make repairs. Flagman Plum is observant in the performance of his duty.

Operator W. E. Stanton, Dundas, Ohio, received a voucher from Hocking Valley Railway Co., with the following notation: "For appreciation of services rendered the Hocking Valley Railway Co., on October 24, 1921, account trestle just south of slate cut on Wellston & Jackson Belt being on fire." This trestle was so badly damaged that it was necessary to send work train to make repairs before trains could pass over it. Operator Stanton was walking along the track preparing to go to his home, when he discovered this condition and reported it to the superintendent of the Hocking Valley.

Indiana Division

On December 1, Brakeman Poole, on extra 2846 west, was in siding at Delhi for No. 2. When No. 2 passed, the brakeman noticed brake sticking in car on No. 2's train and immediately communicated fact to operator at Delhi, who, upon getting in touch with dispatcher, had train stopped for inspection. It developed that by reason of a defective triple valve on sleeper Hamerton, the brakes were sticking on a pair of wheels under this car and the wheel was getting very hot. Brakes were cut out of one end and train proceeded. Serious accident might have occurred had this condition not been detected.

Here is a picture of fireman Don G. Thompson, who rendered conspicuous ser-

Don G. Thompson

vice on train No. 10 on October 6. One of the running board studs on his engine blew out, causing such an accumulation of steam in the cab that both engineer and fireman were forced to vacate. Fireman Thompson crawled over running board of his engine and succeeded in bringing train to a stop by applying air from the front.

On November 13, Crossing Watchman S. H. Skimmerhorn, Mitchell, Indiana, was injured in saving the life of a child. The yard engine was switching some little distance up the track from location of Mr. Skimmerhorn, when he noticed a child, about 4 years of age, on track about 60 feet east of his crossing. He immediately started on run to remove the child from track, fearing yard engine might run down that far any moment or that some train might come up from the other direction. While running he stepped on a stone which turned, causing him to sprain his left ankle severely. He will probably be incapacitated for 3 or 4 weeks.

Mr. Skimmerhorn's action was very commendable and it is unfortunate that he should have sustained this injury.

Illinois Division

On November 20, while hunting, Yard Conductor C. Martin, Springfield Yard, discovered a badly broken rail west of Bradfordton. He immediately walked about a mile and a half to call up the office at Springfield and report this condition, which, of course, was promptly corrected by the section foreman. Had this broken rail not been found it would more than likely have resulted in an accident.

On the afternoon of September 22, Boiler-maker Helper J. C. Monical, Flora, while working in roundhouse, stepped to the west door No. 8 pit as No. 55's equipment was backing around the wye. He noticed something unusual under the train and flagged the hostler, who stopped the train. It was found that one wheel was off the track. The general car foreman, after making inspection, found that the wheel was loose on the journal. The close observance and prompt action of Mr. Monical probably saved a serious accident to No. 55, which might have resulted in injury to some of the passengers or employees.

Toledo Division

DAYTON, OHIO, December 5, 1921.

MR. JERRY MAHONEY,
Crossing Watchman,
Wayne Avenue,
Lima, Ohio.

I am advised that through your close observance you detected broken flange on equipment in extra north 4063 on November 24, and reported same to operator. This enabled us to give notice to yardmaster so that further inspection could be made of the equipment. It was found that flange of wheel was in such condition that we were unable to move car, which necessitated repairs being made in the yard.

Your action in this respect reduced chances of permitting this car to be handled any further in its defective condition and in all probability has saved the company considerable expense for damage to property, as well as personal injury. I wish to take this means of indicating to you the extent to which the Company appreciates your action.

Yours truly,
(Signed) R. E. CHAMBERLAIN,
Division Engineer

A Bachelor's Prayer

Backward, turn backward, O Time, in your flight!
Give us a maiden with skirts not so tight;
Give us a girl whose charms, many or few,
Are not so exposed by much peek-a-boo;
Give us a maiden, no matter what age,
Who won't use the street car for a vaudeville stage;
Give us a girl not so shapely in view;
Dress her in skirts that the sun won't shine through.
Then give us the dances of days long gone by;
With plenty of clothes and steps not so high;
Oust turkey-trot capers and buttermilk glide,
The hurdy-gurdy twist and the wiggle-tail slide;
Then let us feast our tired optics once more
On a genuine woman as sweet as of yore.
Yes, Time, please turn backward and grant our request,
For God's richest blessing—but not one undressed—
The Station Agent.

W. J. Bacon

THE accompanying picture is of W. J. Bacon, foreman of the third rail electrical system on the Baltimore Terminal division, and two of his helpers. Mr. Bacon was with the Baltimore and Ohio when the third rail in the Belt Line Tunnel was installed, and as this was the first electrifying of any railroad in the United States, naturally many problems developed. Some of the devices installed are the result of Mr. Bacon's own ingenuity, and he says that since the installation of the third rail there has never been a train delayed on account of its failure.

Mr. Bacon has never missed a call in case of trouble. He has had but one man killed under his supervision and that one stepped in front of an approaching train. None of his men has ever been seriously injured.

Mr. Bacon is proud of the fact that he is always glad to give a thorough trial to all new material and devices given to him for installation in connection with the third rail. He sees that they are put in under the most favorable conditions so that if they have any merit it will be shown.

We are glad to be able to give this brief notice to a man of such long and efficient service and outstanding loyalty to the Company.

W. J. Bacon and two of his men

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department

Correspondent, GEORGE W. HAULENBEEK

I could easily enumerate several reasons why so many make daily pilgrimages to John Bopp's lunch room on the 12th floor. Positive cleanliness prevails throughout the establishment, notably in the kitchen, the important section. In my examination of that important part of the outfit, I found everything spick and span. Among the patrons I have never heard anyone indulge in a murmur of dissatisfaction. The prices are fair, and the food is well prepared. The attendants are polite and render the best possible service. Mr. Bopp and Mrs. Etta Hance, the cashier, are always there, and they seem to give little thought to vacations. Perhaps it is this constant attention to details that explains the excellence of the department.

"How many did you entertain at luncheon today?" I said to Mr. Bopp a day or two ago. "Oh, we had about 930," he replied, "and all appeared to be satisfied."

Rest Rooms

A rest room for the employees of the Philadelphia and Reading Railway, adjacent to the Reading Terminal in Philadelphia, has been provided, and Mr. Oberender, a passenger trainman on the Bethlehem Branch, has spent much of his free time between his runs to provide conveniences not usually offered in places of this character.

One of our well conducted rest rooms is located at Keyser, W. Va., and it is a boon

for the men coming in from runs on the "hill," as the men call the Seventeen Mile Grade. A copy of the BALTIMORE AND OHIO MAGAZINE is furnished the Keyser room, as well as the new rest room of the P. & R.

A Word for the Enginemen

I still regard the occupants of our big engines as men of courage and bravery, and give them a salutation when I have an opportunity, notably as 524 sweeps into Camden Station every Saturday.

An Enforced Absence

Not so long ago sickness prostrated me, and I was absent from my desk for over a week. This was my longest period of absence in my Law Department service of 40 years. While confined to my room, I received a card from the four Law Department young ladies, containing this beautiful sentiment:

"Though birds fly south with Autumn rains,
And leaves may turn to red and gold,
The warmth of summer still remains,
Within the hearts of friends of old."

Sometime when these young ladies relent and remove the restriction not to put them in the MAGAZINE, by giving me *carte blanche* to proceed, I shall endeavor to prepare a paragraph for the MAGAZINE letter, giving particulars of the excellence of their work.

Apropos of my illness and recovery, I thought of this couplet:

"Better to hunt in fields for health unbought
Than fee the doctor for a nauseous draught.
The wise for cure on exercise depend,
God never made his work for man to mend"

And then too:
"Reason's whole pleasure, all the joys of sense
Lie in three words—health, peace and competence."

Engineering Department

Correspondent, OSWALD EDEN

With this issue of the MAGAZINE starts the year 1922. How many of us have made resolutions to do this or that, or not to do this or that? How many made the resolution to be on time to work in the morning?

We understand that W. O. Towson has bought himself a "bunch of nuts with a crank in front," otherwise known as a Ford. Yet he does not seem to be complaining of toothache.

The woes of country life are temporarily over for "Gus" Hauser, the "movie" man of the drafting room, as he recently moved again. But this time he went into a modern apartment within the new city limits. As the boys say "He's now in teown," even though the ride is 45 minutes and double fare. His troubles now will be with the janitor and we can almost hear him calling down the dumb-waiter shaft, "Hey there, Mr. Janitor, gol' dern ye, circulate some more heat up 'yer, d'ye hear me?" or "Say, you down below! Ain't you ever goin' to take the garbage off this 'yer elevator?"

"Herbie" has evidently sold his motorcycle and smoked glasses, for he was recently seen in a four-wheeled horseless vehicle.

Our two bowling teams are coming along splendidly, although they have changed their respective places. In the last issue of the MAGAZINE the engineer of buildings' team had an average of about 632, which was about 60 points better than the chief engineer's team could do. But now the tables are turned. At this writing, December 12, the chief engineer's team has an average of about 589, leading that of the engineer of buildings' which has only 564. Go to it, fellows! but don't stop at competition just between yourselves. Go after the others.

What makes Miss George Simpson so happy these days? We wonder if she has any "news" to tell us, or was it only joy over the thoughts of Christmas and the New Year?

On December 12 we had a visit from Chief Clerk J. E. McKibbin and Accountant J. J. Kolker, office of District Engineer Griffith, who had come down to Baltimore to look over and fix up some accounting matters.

Dramatis Personae in the Valuation Department—Cartoon by E. B. Pierce

John now has "Three Queens." We all admire your nerve, John. Congratulations!

George Kopp, Jr., stenographer, also has a new alarm clock, which wakes him up at all hours of the night. Friend Stork brought an 8½ pound girl to his home on November 19. We extend our congratulations.

Two new arrivals in one month for District Engineer Griffith's office. A pretty good record! And they tell us times are hard.

Freight Claim Department

Correspondent, GEORGE DOBBIN

The following is a facsimile of the letter presented to every employe of our office on Christmas Eve:

BALTIMORE, MD., December 24, 1921.

To the Employes of the Office of

General Freight Claim Agent:

Peace on Earth, Good Will to all men, were the joyful tidings sung by the angels on that wondrous Christmas morn so long ago. Ever since this same message has gone echoing down the ages.

I sincerely hope that this Christmas will indeed mean a Season of Peace and Happiness to the World, and particularly to you, my friends. I am glad to be able to again extend to you my best wishes for a Merry Christmas and a Happy and Prosperous New Year.

Thanking you for your loyalty and hearty co-operation during the past year, I remain,

Sincerely,

(Signed) C. C. GLESSNER.

All of us appreciate the spirit that prompted this act of Mr. Glessner and we are in an excellent position to give a practical demonstration of the sincerity of our appreciation by contributing our whole-hearted efforts toward the achievement of efficiency in our department. Our success as individuals depends largely upon the success of this office, which represents a unit of workers whose business it is to save money for the Baltimore and Ohio Railroad and to retain the good will of our patrons. The shippers and the traveling public are largely influenced by the advertising which we engender by our attitude toward our own work. Their opinions are held in high esteem and their favorable word constitutes a type of "back-fence" advertising which means eventually greater earnings and greater possibilities for us all. That "good word" is inspired by our actions as representatives of the general freight claim agent, and the type of our service may accomplish what some men think is impossible. Also, it separates the individual from "the crowd" and necessarily puts him in the lead.

This step that places one person ahead of his co-workers is not easy of achievement. The keen competition that forces us to give our best efforts in order to make a showing worthy of particular recognition, also compels us to recognize the fact that there is always that one day when we meet an emergency with nothing to fall back on but our own resources. That is the crucial test of our ability. If we have not prepared by study for this particular moment, if we have contentedly drifted along, then we should neither be surprised nor disappointed when we fail to "make good." To really win out we must possess an abundance of courage.

When the chap who sits a few desks away is in error, whether that error be a part of his immediate work or an error of conduct and not directly related to his particular job, let us not be hypercritical. A man is no greater than his spirit. Break that and you have a derelict, useless and beyond redemption. That is too much to place on

our conscience for the sake of success or for the mere gratifying of personal feeling which may run high at some real or fancied offense for the time being.

We are being attacked by the forces of Cupid and the list of casualties makes us feel about as victorious as the "late lamented" M. Georges Carpentier must have felt after his recent argument with Professor Dempsey at Jersey City.

We really expect it of the ladies—yes we do—but our own George Goeller, he who punctually (?) rings the bell at the desk of Mr. Heartt! Inspired with immense helpings of the Thanksgiving Bird, he deliberately allowed himself to say "I will" and "I do" before an honest-to-goodness audience of witnesses. Good-luck to you both, George, and welcome to the ranks of the benedicts!

The O. S. & D. Division is not to be outdone. "Little Agnes" comes forward with a life sized "rock," proving that "good goods come in little packages." Honest Injun, doesn't it get heavy sometimes, Agie, dear?

Congratulations to Mr. and Mrs. Yarnell! "Peggy" Pape is no more. You never can tell about these quiet men! Under pretense of assisting in the superdivision of our legal affairs, Mr. Yarnell entered our midst with the courteous, quiet dignity of a Kentucky Colonel, and all we can say is that our hat is off to him for quick work. Just a few short months and it is all over, wedding, flowers and rice. The honeymoon proper is to continue indefinitely. We cannot help wondering if the recent marriage of Miss Rawlings could have prompted the idea and spurred Mr. Yarnell to action.

Some weeks ago Miss Suboch, following the example of the Arabs who "folded up their tents and quietly slipped away," became the better half of the firm of "Mr. and Mrs. Reiblich." Stern remorse drove her back to her desk where, however, the strain of keeping her mind on the newly formed partnership and on freight claims, proved too much. She up and told it and left us flat. We are sorry to lose her, but we are glad too, because happiness will surely be hers.

"It is an ill wind, etc." and we wonder if the promotion of Mr. Sener may not have some effect on the capable assistant of Mr. King in the—er—near future.

Mr. Keene being such a perfect example of "how to be happy though married" has undoubtedly proved inspiring, for we see his neighbor wearing a very luminous "sparkler" and we wonder when!!!

Yes, and we have our eyes on Mr. Murphy, he who flashes a dazzling silver buckle before our eyes. Well, the ladies could never resist the Irish.

Mr. Bradburn has practically recovered from a very painful and troublesome sprained wrist and we are glad, but there are members of Boumi Temple who sometimes wonder if it wasn't a put-up job after all.

Away over in the corner of Miss Keiner's Division, on one rainy afternoon, Miss Banks returned to her desk from an important, or perhaps, improvised errand to find that "The Girls" had loaded her desk with presents. How that little Dan Cupid must have laughed at her happy tears!

"Daddy" Loane goes on record as having been, perhaps, the only Veteran from this office at a Veteran's Meeting held on December 5. Is it true that the 'Vets' are going to let a bit of snow hold them back? There is always a consolation and it does not fail in this instance. The fewer Veterans present, the more ice cream and cake for those who are among the faithful.

Having spread the known and surmised news, there remain as closing reminders, the two phrases: "Preparation is the foundation of success" and "Knowledge is power." They are old and hackneyed to some, but like old wine and old books and old friends, they are very much worth while. Do we ever look over the lessons distributed during the existence of our own School? Some of us may be benefitted.

Printing Department

Correspondents, H. R. FOGLE, *Compositor*,
O. R. PYLANT, *Stone Hand*

Otto Sherman, monotype operator, spent Christmas holidays at Cambridge, Md.

We regret to announce that A. Handley has a sprained toe. He tried to kick a football over the top of the Grain Elevator. You see, he is getting his team in good shape and thinks that it's fine training to slide down a railroad track with a football in the lead.

Mr. Fogle has been signed up for the football team.

If there is anything that you don't know, ask Harry Reay; and if you want to find out something, ask Knoepp.

I went downstairs the other day to make a correction on a press before the job was started. On my arrival I was informed by the pressman that the job should be done so and so. I told him that he had a bright idea about printing, nevertheless that I should proceed to do the job to my best advantage. Upon this, Mr. Pressman turned to me and said: "I guess you know your business, but you can't tell me anything about printing. I know this business from A to Z!" Hurrah for the "A to Z," boys!

Alas! Babe Ruth—our Babe Ruth—has shaved off his soup strainer and thus spoiled his good looks.

Wanted: Dogs of all kinds. Apply in person to George Yeager.

Ernest Rinehard armed himself with a large megaphone and a box of cough drops for the Marine football game. We judge that these will be used again next season.

It is rumored that O. E. Whitman will visit the barber as soon as warm weather sets in.

Fred Feusahrens spent the holidays in Fairfax County, yes, Suh! Goodby to the rabbits when he goes hunting down in Ole Virginny.

Our foreman, Mr. Frey, has purchased his new auto license tag for 1922. It happened to be a full house—three 4's and a pair of 6's. Good luck to you, Mr. Frey. Let the next tag be a straight flush.

Telegraph Department

Correspondent, DELLA M. HAIN

E. P. Totman, district plant superintendent, Western Union Telegraph Company, Philadelphia, accompanied by his chief clerk, T. P. Murphy, spent a day recently in this office relative to the joint business of the Telegraph and Railroad Companies.

Harry V. Hill, lineman in gang of Foreman A. J. Cornwell, Newark, Ohio, took a chance last month on a six-cylinder sedan which the Elks were raffling off. His ticket cost 25 cents and the car he won is worth \$1,700.00. Lucky guy!

A tiny bud has bloomed today
Upon a family tree;
And every branch and twig and stem,
Is happy as can be.

It's a boy, 10 pounds, born to Mr. and Mrs. S. McMullen. Steve is section lineman at Creston, Ohio, New Castle Division.

Bishop's little boy received a train of cars from Santa Claus on Christmas. Krausz's little boy received a steam engine from the same source; and one thing all of us know is that if the kids enjoy these toys as much as their parents have, they will have many happy hours.

Neil Davis' little Mary is a regular prima donna. How can she help it? Her father has a sweet voice too.

And last but not least—wedding bells! Norman Ardilius Murphy recently grasped the lines of fate and took unto himself a wife. The entire force was speechless with gratitude, as this is the first wedding that has occurred in this office in a period extending over five years. He only needed to start the ball rolling, as we are looking for Owings and Offutt to come in close seconds. A little bird told us that Murphy was in dire need of a clock so that he could leave home on time in the morning, so we banded together and got him one—a beautiful mahogany, tambo style. It will look at him every day to remind him of how much we love him, make his little wife jealous, and the like. Mr. Plumly made a speech of presentation, and a mighty good "impromptu" it was, too. Murphy responded to the call of his country and did his bit in the World War. We therefore know that he is courageous and capable of carrying through this great undertaking. Here's success to you, "Irish!"

Transportation Department

Correspondent, L. K. BURNS

On Saturday night, December 10, our bowling team journeyed to Washington to meet the Washington Terminal Railroad Y. M. C. A. team. The Terminal boys took the first game while the Transportationists came back strong and won the second and third. The results of the three games are as follows:

Transportation

	1st	2nd	3rd
Seeds.....	84	104	85
Bryan.....	89	93	103
Fowler.....	83	116	109
W. Guerke.....	79	103	104
R. Guerke.....	99	116	88

Total..... 434 532 489

Washington Terminal

	1st	2nd	3rd
Tenny.....	92	92	87
Laugley.....	94	92	96
Weeks.....	86	99	91
Trotter.....	90	100	92
Williams.....	90	104	107

Total..... 452 487 473

In the Baltimore and Ohio League, Section B, our team has a strong hold on second place and at the rate they are going it looks as if the League leaders will be given a run for the money.

Collins recently hung up a total of 146 pins in a single game, which is the highest in the League so far, and gives the other teams a nice figure to shoot at. If anyone tops him we hope it will be a Transportationist.

We almost forgot about saying something of "Phil" Wood's marriage. "Phil" tells us that before long Mrs. Wood, who was formerly Miss Doris Porter, of the Division Freight Office, Youngstown, will be living here in Baltimore. We extend her a hearty welcome to Baltimore. Our best wishes go to both of them, along with a bit of silverware.

Office of Assistant Comptroller Deverell

Correspondent, JOHN RUPP

The picture on this page is a reproduction of a well known love scene from "Faust," entitled, "Good bye, Sweetheart, Farewell." The gentleman is John L. Lubert, connected with the Comptroller's Department. We compliment the young lady on her choice.

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

Our Beau Brummel Brauer of the old Burlesque Boy fame, played the role of hero on December 15 by rescuing a Ford in front of our Annex Building.

"Bobbie" Burns (297 pounds light) while crossing the street with his eyes on the peanut vender, did not see little Lizzie coming along and as "Bobbie" was going at his usual fast pace, it was only the timely warning of Brauer that caused Bob to throw on the air, thus saving, by the smallest possible margin, said Lizzie, from total destruction.

Standing of the Bowling League, including week of December 13, was as follows:

Pull Men.....	16	Won	8	Lost.....	667
Royal Blues.....	16	"	8	"	667
Head Lights.....	14	"	10	"	583
Bumpers.....	11	"	13	"	458
Wrecking Crew.....	10	"	14	"	417
Tail Lights.....	5	"	19	"	208

A great many of our readers are no doubt aware of the fact that Spookendyke built a chicken coop around himself, but it remained for our old college chump "Pat" Spedden to build a dog house in the cellar and after it was completed, discover that it was too large to get it through the door and out into the yard. Well, as the boys say, we never learn unless we make mistakes.

Auditor Disbursements

Correspondent, JOHN C. SVEC

L. M. Douglas

On the night of November 20, L. M. Douglas, traveling car repair accountant, operating out of our office, was instantly killed at Keyser, W. Va., when No. 1 was in collision with an automobile in which he

The Late L. M. Douglas

was riding. Mr. Douglas was a resident of Keyser and was on his way to the station to take No. 12 to report for duty at Baltimore the next morning. Ordinarily he walked from his home to the station because the distance was inconsiderable, but this evening a friend, accompanied by a young lady, called at his house and volunteered to take him there in the machine. It is quite evident that the occupants of the car, which was a coupe, did not hear the approach of No. 1.

Lloyd Matlick Douglas was born at Keyser, W. Va., October 30, 1892, the son of Mr. and Mrs. A. M. Douglas. He attended the local schools and graduated from the Keyser Preparatory Branch of the University of West Virginia. He entered the service of the Baltimore and Ohio in June, 1910, as a car repairman and was afterwards promoted to carpenter foreman, Stores Department foreman, storekeeper at New Castle and was selected for the position of traveling car repair accountant on April 26, 1920.

Mr. Douglas volunteered for service in the World War at Keyser on October 6, 1917, and served with the Headquarters Company, 10th Training Battalion, 155th Depot Brigade, and also with the 40th Company of the same organization at Camp Lee, Va. He was selected to attend the Officers' Training School at Camp Sevier, S. C., was later transferred to the school at Camp Gordon, Ga., from which he was graduated with a commission of Second Lieutenant of Infantry. He was honorably discharged from the service with that grade on December 20, 1918.

Lloyd Douglas was one of those happily constituted individuals who cast a ray of sunshine wherever they happen to be. He was always optimistic and no one ever heard him lament conditions, no matter how bad they might appear. His work as traveling car repair accountant carried him over the entire System and no man ever worked that beat who was more popularly regarded than he. He had the faculty of administering a rebuke in such a way as to make the recipient a firmer friend than ever before. He was thoroughly qualified for his position and undoubtedly, had the fates been kinder, was destined for greater things in the railroad world. He had the full confidence, respect and esteem of his superiors, who were ever ready to testify to his loyal and efficient services.

The Auditor of Disbursements Office was represented at the obsequies by L. M. Martin, chief, Car Repair Accountant Bureau, M. R. Perry, chief traveling car

Too sweet for words
(See Assistant Comptroller's notes)

Miss Eileen A. Bohli

repair accountant and G. B. Williamson, F. A. Merrill and F. E. Cheshire, traveling car repair accountants, and all close personal friends of the deceased.

The accompanying photo is that of Eileen E., 16 months old daughter of Mr. and Mrs. William J. Bohli. Mrs. Bohli was formerly Miss Ruth M. Eason, of this office. Mr. Bohli is employed in the M. C. B. Bureau as bill checker.

I would like to have some other pictures of the Auditor Disbursements' young flock, which is quite large.

Auditor Freight Claims

Correspondent, H. J. BARKER

Wedding Bells

It was a great disappointment to a few of the single men of this office, when it was learned that Mrs. Laura L. Swomley had been quietly married on December 13 to Mr. Sidney Rawlings, now employed with the U. S. Mail Department.

Every single man was living in hopes of stirring up enough interest to give him en-

couragement to pop the question, but all in vain. A stranger wooed and won, but Laura's type is still remembered by the youngsters as a goal to reach, and the field is still strong.

So wishing Laura love, happiness and success, the youngsters weep in vain.

The accompanying cartoon is of Joseph R. Bowden, star left-fielder, Auditor Freight Claims Baseball Team. During the past season Joseph covered his position "a la Otis Lawry," his fielding being 1,000, and his batting 321.

Staten Island Lines

Correspondent, G. J. GOOLIC

The employees of the Staten Island Lines extend their heartfelt sympathy to the families of the following employees:

William J. Ryan, M. of W. carpenter, who was killed at Atlantic on Tuesday, November 29; William Jarvis, M. of W. dock inspector, who died of pneumonia at St. Vincent's Hospital on December 6; and Charles L. Martin, telegraph operator, Cranford, who died of paralysis of larynx, following apoplexy, at his home at Rahway, N. J. on December 2.

On November 19, Philip Ryan, section foreman, while walking on his section, St. George Yard, was struck by empty box car and received a fractured hip. Mr. Ryan was taken to St. Vincent's Hospital and returned to his home on November 23. On December 6 he was ordered back to the hospital for X-ray when they found a fractured hip. We wish him a speedy recovery.

Mr. Ryan came into the employ of the Company on June 1, 1893, as a section foreman. He was a faithful employe up to the time of his injury. It is believed that he will not be

able to return to his duties again, but that he will be placed on the Pension List. Mr. Ryan was well liked by everybody, and we are sorry to lose him.

The accompanying picture is of Trainman W. Poillion, Trainman J. P. Murtha, Engineer W. Dolan and Fireman Harold Tabor.

We have been informed that the stork made a visit on December 4 at the home of Joseph Langford, clerk, Superintendent's Office, leaving a baby girl. Congratulations!

Royal Blue Line

The Royal Blue both fond and true,
A rolling palace built for you,
From Broadway bright she steams aright,
Her mere approaching is delight.

Through rain or shine, through wind or snow
She sails along the B. & O.
As bright as sun the trail is spun,
From old New York to Washington.

Election of officers of the Employees' Mutual Benefit Association of the S. I. R. T. took place on December 15, 1921. The following will serve for 1922: B. F. Kelly,

General Agent's Office Force, Camden Station, 1894

president; E. E. McKinley, vice president; J. B. Sharp, treasurer; G. J. Goolic, recording secretary; J. V. Costello, corresponding secretary; J. F. McGowan, W. P. Slatery and J. J. Lestrangle, executive committee.

Baltimore Terminal Division

Correspondent, MARTHA V. FOX

G. T. Clarke, assistant trainmaster, Locust Point, recently toured Virginia in his Paige and from all accounts, he surely must have broken the records.

Football seems to hold the interest of a number in the Superintendent's office, which was well represented at a recent game at Walbrook Oval.

With regret we note the death of Brakeman W. Zang, of Locust Point Yard. Mr. Zang had been in the service for a number of years and was a tireless worker. We extend our sympathy to his family in their hour of bereavement.

G. A. Bowers, general foreman of engines, otherwise known as "General," has recently returned after a serious illness. We hope he will continue to improve.

It seems hard for us to understand that when I. C. Hopkins and F. H. Carter go hunting, the game leaves the woods before they arrive.

The following clipping, taken from the *Sun* of November 7, shows another remarkable grain loading record:

Makes Grain-Loading Record

One of the most remarkable grain-loading records ever recorded in the port was accomplished last week, when on Thursday at the Locust Point elevators of the Baltimore and Ohio, 200,000 bushels of wheat were placed in the hold of the steamer *Aritz Mendi* in four hours. The time for the loading of the entire grain tonnage taken at Locust Point, 225,401 bushels, was officially placed at 11 hours, an exceptional showing.

Agent's Office, Camden Station

Correspondent, W. H. BULL

Miss Butts, stenographer, Billing Department, is wearing a pleasant smile these days. 'Tis said she will be married soon.

Chester Stone, Billing Department, is fond of jokes. The other day he was told one about the police officer having found a dead horse on Cathedral Street and not being able to spell the street's name, pulled the horse over to Park Avenue. Chester said, "What did he do that for?"

We regret to learn of the death of Mrs. William Carey, mother of Clerk Adrian F. Carey, Accounting Department. We extend our sympathy to Mr. Carey and family, also to Mr. Norton on the death of his mother, and to J. B. Miller on the death of his father.

The accompanying picture is of the General Agent's office force, Camden Station. It was taken in 1894. Seated are General Agent A. J. Fairbank and C. J. Gillespie; standing, John Gephart, cashier, and Arthur Boteler, messenger. The picture was loaned us by Mr. Gillespie.

Our cartoons were drawn by A. Bauernschub, Claim Department. He is a student of the Maryland Institute and we expect to see great things from his pen and brush in the future.

"Mickey" Doyle has been flashing her sparkler in our eyes for some time. We wonder how much longer she expects to keep him in suspense. Poor man!

Dame Rumor says that some one is rather fickle as to her likes and dislikes for the opposite sex. Cheer up, Margaret, there's safety in numbers. You're young yet.

"Midge" has been assuming a rather mysterious attitude recently. We wonder what she has up her sleeve. Oh, well, "Patience is a virtue."

Blaming it on the 103

Freight Office Force of 1904, at Locust Point

Ross, Coughlin, White, Casey, Scrutten and Perkinson. Third row—Prenger, Edel, Leigh Helm, Cashier Gould, Steen, Slack and Hicken. Fourth row—Brower, Abe, Monaghan, Sterlia, Ford, Leimbach, Baker, Randolph, Elliott and Coffin.

Baltimore Division

Correspondent, W. H. TARR,

Superintendent's Office, Camden Station

Two bowling teams have been organized in the Division Accountant's Office, Camden Station. One team is composed of the married men, the other of the single men. They meet on Friday evenings at the Baltimore Bowling Alleys, 118 E. Baltimore Street. The line-up for the married men is: W. R. German, A. F. North, W. H. Thiemeyer, Morgan Hinebaugh and Frank Harten. In the single men's team are Martin Bowers, Jr., Albert Smith, Maurice

Phipps, Martin Swain, C. B. Roche. W. R. German is captain of the Married Men's Team and Albert Smith of the Single Men. A. F. North is official scorekeeper. Both teams show pep. Now for the good scores!

Miss Katharine Feeser, stenographer, Division Accountant's Office, underwent an operation for appendicitis on December 8. Her friends trust she will have a rapid recovery and be back among the office force soon.

Brunswick

Correspondent, R. L. MUCH, *Conductor*

Happy New Year!

Our main street has begun to show more of a business aspect. Several modern business houses have been erected and many improvements have been made in our town during the last few months. As a certain merchant remarked, "Brunswick will soon look like Baltimore."

Yardmaster Sprigg Hedges is now on duty at the eastbound yard; Yardmaster "Bill" Gatrell, who has been ill for three weeks of the grippe, will soon be back on the job.

Mrs. C. W. Steadman, wife of Conductor Steadman, is slowly convalescing from a serious operation recently performed at the Frederick City Hospital, where she was detained for five weeks. Her many friends are congratulating her upon her recovery.

Within 18 hours two sad accidents occurred on the eastbound hump. Yard Brakeman Ray Wyncoop was run over by a Mallet engine and fatally injured. He died a few hours later. His brother, Hector, is a conductor, Baltimore Division. Edward Moore, while setting brake on a car, was knocked off and had both legs severed above the ankles. He was removed to Frederick City Hospital, where he is now

doing as well as can be expected under the circumstances. Boys, we can't be too careful.

Some time ago, while riding on a western road, I came across a "boomer." This is the little story he told me:

At one time he was head brakeman on an engine that hit a rear end in a deep curve. Investigation was held in the trainmaster's office. The trainmaster asked the "boomer" what he knew about the trouble. This was his reply:

"Well, I'll tell you. We were coming around the curve at about 25 miles per, when I saw the stack of red on the main. I immediately conveyed this intelligence to the skillet-head, whereupon he manipulated the secret work, put her two pipes to the seashore and squealed for the pincers."

"Well, what did you do?" asked the trainmaster.

"Why," replied the "boomer," "I vanished into the atmosphere."

58th Street Freight Station, Philadelphia, and some of our employees (see note)

Passenger Station, 24th and Chesnut Sts.

Correspondent, CHARLES T. ALLEN

Walter Daroba, District Passenger Agent's Office, has been elected vice-president of the Philadelphia Passenger Association. Walter, we congratulate you!

James Lynch, Jr., weight 15 pounds, arrived via the stork route a few weeks ago, and is growing nicely. James, Sr., is now the father of five. He is as proud as though James, Jr., was the first. Congratulations, Mr. and Mrs. Lynch! Mr. Lynch is a popular member of the janitor's force.

Wesley Ford and Elizabeth Ehrisman were recently married. We wish them long life and much happiness.

Fireman Robinson of our heating plant, enjoys the distinction of being the only man in Philadelphia to honor Marshall Foch with a whistle salute; this was while the field marshal was passing our station. To quote the *Philadelphia Enquirer* "only once did a siren shriek." The Baltimore and Ohio is always on the job.

We are glad to see our matron, Mrs. Margaret Metzger, back on the job after a short illness.

Pier 22, Philadelphia, Pa.

Correspondent, J. A. MCDEVITT

Effective November 1, 1921, J. E. Sands was appointed terminal agent, this city. Mr. Sands comes from the Western Lines, where he had filled similar positions at Blanchester, Ohio, Hillsboro, Washington Court House, Portsmouth and Louisville, Ky. In addition to this he has spent four years in the Telegraph service. He has the advance assurance of the cooperation of the employes in the Philadelphia Terminal.

A. E. Rhoads, freight agent, Pier 22, and W. J. Hallahan, chief clerk to terminal agent, Philadelphia, brought about the capture of a platform thief who had stolen a case of rubbers from the Philadelphia and Reading platform, Pier 8, Chestnut Street. After he had pilfered the case he drove to Pier 22 to receive freight. Here his capture was brought about. This was an unusual case, as three railroads figured in the capture. The thief was unaware that he was being shadowed by a Pennsylvania Railroad policeman on his way to our Pier 22 freight station.

The accompanying picture is of 58th Street freight station, taken by D. L. Harten, pipefitter Eastside roundhouse. Left to right: Joseph Burke, caller; C. W. Wilson, agent, East Side; E. H. Moyer, agent, 58th Street, and Andrew Krigbaum, truckman.

Washington, D. C. Freight Station

Correspondent, W. L. WHITING, Chief Clerk

Bright prospects ahead for the Happy Young Year 1922!

The hopes of the Limitation of Arms Conference are apparently being realized. Our good friends across the Big Pond seem to have patched up their misunderstandings of many centuries. Celt and Anglo-Saxon have shaken "hands across the Sea," let us hope, for all time.

Taking one thing with another, there is a great deal to be thankful for at the beginning of this New Year. Let us, as good Railroad men, keep up with the procession, and try to realize ourselves, and make others realize also, that the word RAILROAD spells PROGRESS, and that we are here to prove that statement.

It is not always necessary to have reached the "Seer and Yellow Leaf" of life, or to be eligible for membership in the Veterans' Association, to enable us to reach out for business, freight or passenger. Opportunities will come our way at times, if only a weather eye is kept open for their approach. Your correspondent got wind of the moving of a friend to the distant shores of New England, and thinking that perhaps there would be "something doing" in the way of business, he succeeded in showing the friend how much cheaper it would be to send his furniture away by freight than by motor truck. The result was one carload of household goods for the Baltimore and Ohio.

Miss Della Porton, waybill clerk, who has been with us for a number of years, left us on November 30, for other fields. We wish those who leave us success in their new undertakings, and welcome all newcomers to our fold, with the hope that they will remain for many years. C. J. Mattimore has been appointed delivery clerk in place of W. D. Kight, who went to the Pacific Coast and found that the conditions there were too tempting for him to return to this

city. W. A. Funk has been appointed tallyman in place of J. F. Wahl, who was transferred to the General Yard Master's Office.

The stork has forgotten us in his travels lately, and even the ever busy Dan Cupid has not exerted himself to a great extent among our "co-eds." However, on the other hand, it is a pleasure to state that the Grim Reaper has also passed us by, and that sickness is not so prevalent among our force as it has been at this period in other years.

Speaking of Claim Prevention, Safety First, etc., may we suggest a little improvement that may lessen probable loss and damage to shipments by reason of non-delivery. This suggestion is that we exercise a little more care in the method of addressing envelopes. A little more time taken to write the name of the destination point will be more likely to effect delivery than to write the word "City" or "Local" on the envelope. It may be that a letter addressed to "City" will be given to a messenger to mail who does not happen to live in the city, and who inadvertently puts the letter in his pocket and upon arrival at his suburban home finds it and drops it into a letter box at that place, thus making a misdelivery certain, with all the consequent delay and unpleasantness arising from the matter. A certain letter sent recently was addressed in this manner. The result was that the letter got into the hands of a somewhat inexperienced distributing clerk in the Post Office, who took the word to be an abbreviation for "Cincinnati," and the letter was sent to that place. It was finally returned to the original mailing point. Needless to say that the person for whom the letter was intended did not receive it. It would have taken but a fraction of a second to have addressed this letter properly.

Think it over, friends, and let us start the New Year by being more careful in these apparently small things which cause claims and misunderstandings, and give to Uncle Sam's Post Office Department and our own Railroad unnecessary work.

He: "My dear girl, I've made hundreds of women suffer in my time!"

She: "What a brute you must be!"

He: "Not at all; I'm a dentist."

—London Opinion.

Hamilton Watch

"The Railroad Timekeeper of America"

This Engineer Believes In Good Companions For His Three Boys

Engineer William E. Loco, who runs a Chicago and Northwestern train out of Chicago, has been railroading for forty-five years.

For twenty-one years he has carried the same Hamilton Watch, and it has always served him faithfully.

In fact, so accurate and dependable has he found it that he has made it a pleasant duty to present each of his three sons with a Hamilton as they came of age.

There is nothing uncanny about the phenomenal timekeeping qualities of any specific Hamilton Watch. The fact that Hamilton Watches are built around the requirements of the Railroad man makes them uniformly accurate.

The factory's guarantee of satisfaction is backed up by the jeweler from whom you buy your Hamilton. A Hamilton Watch is never an orphan. It is born with a pedigree—and it will live up to its reputation for enduring, accurate service.

That is the kind of watch you need.

When you buy, inspect the Hamilton models that Railroad men favor, particularly No. 992 (16-size, 21 jewels). Hamilton Watches range in price from \$40 to \$200; movements alone \$22 (in Canada \$25) and up. Send for "The Timekeeper", an interesting booklet about the manufacture and care of fine watches. The different Hamiltons are illustrated and prices given.

HAMILTON WATCH COMPANY,
Lancaster, Penna., U. S. A.

Cumberland Division

Correspondents

E. C. DRAWBAUGH, *Division Operator*
JOHN SELL, *L. P. Clerk, Superintendent's Office*

Here we have a good picture of Malcolm Crosser, secretary to the division accountant. Crosser usually has his feet on the ground but this is one time we caught him a little "off side."

We have just learned why our night car distributor is in such a pensive mood. While on vacation, "Bennie" spent most of his time trying to dope out the stock market, but now admits it can't be done.

Winfield Price, who has received much favorable comment for the cleanly condition of the Queen City pavement and lawn surrounding the station, suffered a sun stroke during the late summer. He is now back on the job, fully recovered, and, we hope, due for a long stay.

Roy Tablor, our efficient yard clerk, states that the dope handed out by the various health authorities doesn't always work so far as exercise reducing weight is concerned. Hick has walked all over Cumberland Yard several times a day (some mileage) for the past ten years and is now around the 200 mark and still gaining. Hick, if we all had your genial nature and hearty laugh, there sure would be some heavy men playing "Number Dummy."

Harry T. Henry said he did not know street car fare could amount to so much in a month. "Hen," don't call every night!

One of the most highly regarded Irishmen we have on the Cumberland Division is the honorable Michael Laffey, who so zealously guards Bedford Street crossing. It is a pleasure to see "Mike" guiding the little school tots over the crossing. He is popular with all who happen to pass his way.

The Fire Brigade recently organized in the Queen City Office Buildings is under the able guidance of R. C. Ward as captain; his staff follows: Malcolm Crosser, plugman, R. W. Mellinger and C. K. Hickson, nozzlemen, G. Frank Messman, William E. Korniff, F. X. Spearman, W. H. Gatehouse, A. P. Conell, J. W. Kirk, hosemen. Fire drills are now being held.

The New Reclamation Plant in the Mill Yard is rapidly nearing completion. The

Malcolm can't seem to keep his feet on the ground

new plant is considered a valuable adjunct to the Eastern Lines and will add considerably to the importance of Cumberland.

Ground was recently broken for a new ice manufacturing plant and reicing station in our Evitts Creek Yards. This was a badly needed facility at this point, because of the large amount of fruit raised in this territory as well as the large number of cars of fresh meat and other perishable freight passing through this terminal requiring reicing.

The Kelly Springfield eleven million dollar tire factory, completed and put in operation, is now shipping tires to all parts of the world. This plant is located on the main line of our road at Cumberland and is a factor in placing our Division in the roll of an originating, as well as the most important division on the system.

John Howe has been appointed superintendent of the Cumberland Back Shops vice F. O. Eklund, deceased. Mr. Howe not only comes highly recommended, but he created a favorable impression on arrival.

The West End of the Cumberland Division recently made a record in car miles per day, having hit the 85-mile per day, which is a record for mountain movement.

We read in the MAGAZINE occasionally where So and So is doing some bowling. Tell them all that we teach the game and that if there is any team on the System that would like to "Read Em and Weep," to get into communication with our team at Cumberland. The Manager is G. A. McGinn.

On November 28 the school fostered by our division accountant, F. L. Sheakley, which is largely attended by clerks from every office and department in the service who are desirous of learning accounting and equipping themselves through knowledge of accounting, found time for a little diversion which proved to be the social event of the season. About thirty couples stepped the light fantastic to the strains of the Byg Set Orchestra, the leading joy dispensers of the city, and under the able leadership of the chairman of the Entertainment Committee, D. Y. Brown, surely had the time of their lives. On the committee with Mr. Brown were F. S. Cook, Georgie McCarty, Ehula McMackin, Mary Holland and Susie Rossworm. The office was tastefully decorated for the occasion with a color scheme of red and green, carried out in the way of toy balloons and streamers. It was a pretty scene, especially when we were called to lunch and found that all the delicacies of the season were on the menu. Whoever heard of a clerk that couldn't do justice when called upon to eat! E. J. Soehner and Miss Florence McDonald were awarded first prize in the waltzing contest, but it really wouldn't do to describe the prize, as the Committee rather expected life partners to win it. B. A. Noone and Shirley Jane Romiser won the honors at Five Hundred, tables being provided for those not caring to dance. The writer is earnestly hoping for another invitation to a similar occasion.

While on an inspection trip over the Division recently our division operator, E. C. Drawbaugh, dug up a message blank printed some forty years ago, which recalled some fond recollections to some of our veterans. Our esteemed relief agent, G. R. Bramble, not to be outdone, located waybill printed way back in 1884, and what's more, was able to get some historical data in connection with it, which will be of interest to the readers of our MAGAZINE. This waybill covers a shipment of hardware from Wheeling, W. Va., September 3, 1884, consigned to Springfield, W. Va., on the Romney Petersburg Branch, and was one

All set for the big show! Keyser Knights of Pythias, many of them our employees

of the first shipments made over this branch when it was opened to traffic that year between Green Spring and Romney. Our Springfield agent, W. A. Shannon, recalls that it was a gala occasion, with excursion trains, bands and flags, and a general big time at Romney when the first train arrived.

We do not believe in advertising charity, but here is a worth while note. Instead of the Division Accountant's Office force exchanging Christmas gifts, Chief Clerk E. G. Soehner provided instead, a Christmas Box wherein all clerks and visitors were invited to drop a little change each day. It was the intention to select a committee to interview Salvation Army Headquarters, secure the name of a worthy family and see that they had a real Christmas celebration. This we believe to be the proper Yuletide spirit.

I wish to extend best wishes for a Happy New Year to all officers and fellow workers of the Cumberland Division, as well as to each member of our great family on the system.

(Signed) JOHN J. SELL

Keyser, W. Va.

Correspondent, HARRY B. KIGHT

The accompanying photograph is of the Knights of Pythias of Keyser, "all dressed up" for a fine time. The occasion was that of a play, given by local talent. The greater number of those in the picture are Baltimore and Ohio boys.

The names of those in the cast follow. Railroaders' names are marked by an asterisk (*).

King, C. B. Hott; Chancellor Commander, T. A. Adams; Prelate, Charles A. Steiding*; M. of W., George Smith*; Attendants, B. E. Wells, C. L. Shaffener; M. of F., Robert E. Rice*; Headsman, J. Johnston*; Senators, G. W. Avers*, R. Rawlings, C. L. Avers*, J. A. Powell*, D. D. McKee*, Nelson Wagoner*, C. G. Scribner, B. Bradford*, J. G. VanMeter*, J. W. Johnston; Guards, Steiding*, Wiley*, Dayton*, Moomau*, Sheetz*, Clarke*; Scribe, Thomas Ward; C. C., W. I. Cheshire*; Herald, S. L. Cheshire*; Master-at-Arms, H. B. Kight*.

A meeting was held here on the night of December 13 among a number of employees for the purpose of forming a company of stockholders, to build homes on a cooperative plan.

The object is to get at least 100 men who desire to build homes and have each of them put in \$250.00 to create a fund on which to begin operations, with the total of \$25,000.

After the initial deposit of \$250.00 the home builders will keep on depositing until they have reached \$1,000 apiece, making a total of \$100,000.00, for which the company will be incorporated under the laws of the State of West Virginia and will be known as the Keyser Realty Company.

We read in the MAGAZINE some time ago, of the building of homes at Somerset. Our own Keyser needs homes badly, too. Therefore the starting of this movement.

All employees who are interested should see Agent K. H. Stover, who will be glad to explain the proposition in detail.

Engineer George P. Warner, after whom the class at the K. of P. Lodge was named not long ago, died on the afternoon of December 14. He was very popular among our employees and one of the best citizens of Keyser.

The "Safety First" meeting recently held by the M. of E. Department at this station proved a very enthusiastic one. The "Pep"

I Can Succeed

"What other men have done with the help of the International Correspondence Schools, I can do. If the I. C. S. have raised the salaries of other men, they can raise mine. If they have helped others to advance, they can help me. To me I. C. S. means 'I CAN SUCCEED.'"

Make up your mind right now that not another day of this new year shall pass until you have made *your* start toward success. Simply say "I Will." The I. C. S. will come to you with the very help you need. Whether you're a dollar-a-day man, or a dollar-an-hour man, a long-hour man or a short-hour man—there's a better job ahead and the I. C. S. will prepare you to step into it.

No matter where you live, what you now do, or how little time or money you may have, the I. C. S. have a Course of Training to fit your needs.

Hundreds of thousands of ambitious men have achieved success through I. C. S. help in the past 30 years—over 130,000 are now studying, getting ready for the big jobs ahead. Join them and make your life something to be proud of—you can do it.

Mark and mail the coupon TODAY and find out *how*; it won't obligate you in the least.

which has been lying dormant for some time past suddenly resumed active life. This, no doubt, was brought about by a forceful address made by our General Car Foreman Stanley.

H. A. Deitz, shop clerk, and wife, have secured apartments on South Main Street and are now residents of our town. Both are well pleased with their present location, as well as with the number of new friends they have met.

"Dusty" Avers, our popular car clerk, says he is thinking of resigning and taking the position as file clerk for our boiler

clerk, if her correspondence, registered letters, telegrams, etc., continue to increase.

General Foreman M. A. Graney has requested an annual pass for his wife. "Mike" was told that request would be made, but the lady would have to call for pass as soon as he had secured the necessary papers for her to prepare the "Mrs."

From the present outlook, there will be several vacancies in the clerical force in the Master Mechanic's Office, after the month of June. This is especially true in respect to the position of time clerk.

Timber Preserving Plant

Correspondent, E. E. ALEXANDER

The record for 1921 is closed. It cannot be either changed or altered. It stands for all eternity and counts either for or against us. How many of us would make corrections if we but could!

A new page has been turned; we now write it 1922, with highest hopes and aspirations.

Will the regrets for the old year be guides for 1922, making it a safer, better year for all?

Several months have elapsed since we were present in the "Among Ourselves" circle. Sometimes when we read of the "big doings" at more important points, and also all the grand things the other fellows are doing in their campaigns and various ways to promote the interests of the Baltimore and Ohio, we felt so unimportant—so small, in fact, that we imagined we would never be missed if absent from the circle. But our editor says we were; he needs us too.

Have you ever had occasion to travel some distance on a foreign road, miles away from the Baltimore and Ohio? And then when you got back on our own lines again and walked the full length of the train

before boarding, making mental comparisons, didn't you experience just a little thrill and feel just like you were home again? We have!

Since our last items appeared in the MAGAZINE, many things of small importance to the world but of great importance to many of us, have happened. Some happenings not reported have left shadows on some that last for life, while others have been made happier. Death has brought sorrow to several of our employes and a most distressing accident has seared at least one home. Several families rejoice over new baby faces and voices, seen and heard in their homes. Wedding bells have rung for others, just as in other places! There have also been some activities in the interest of property owners, mostly employes, in the fixing up of their homes in the village. This has included remodeling, painting, new fences, cleaning and other improvements which tend to enhance appearances and value.

Green Spring can also boast of a new United Brethren church. Although it was our opinion that our town was scarcely able to support two churches, nevertheless the energetic, untiring efforts of those who made it possible, deserve high commendation. It is a nice edifice and a credit to the community.

Operator J. D. Rockwell has moved into his new home, which was recently completed. We hope to be able to have a photograph of it for the next issue.

Homer Haines and Howard Adams, tie-men, are other employes buying homes recently. Homer purchased one at Springfield, W. Va., while Howard bought a nice farm about three miles south of Green Spring.

General Foreman E. M. Stottlemeyer will no doubt be occupying his new home, another addition to the steady growth of the village, when these items appear. We hope to get a picture of "Ed's" home, too, if we can borrow a camera.

Tie Foreman G. C. Conley is confined to his home with neuritis at this writing. We hope he will be with us before this is published, as we miss him daily.

Introducing our bear hunters: Messrs. Irving, Corbin and Groves. Oh yes, they got one!

We are glad to be able to report that we made the goal, reported previously, set for us by Superintendent of Timber Preservation for 1921, with a slight margin to spare.

A thought for 1922:

"Keep your eye on the big problems, but don't overlook the details. Be thorough in everything you undertake, and above all, be careful."

The Foreman G. C. Conley,
Yard Foreman H. W. Gross

Martinsburg Shops

Correspondent, W. L. STEPHENS

Clinton P. Wilson, a young Baltimore and Ohio employe, and Miss Bessie Lillian Griffith were married at the United Brethren parsonage. A wedding supper was served at the home of Mr. and Mrs. John F. Wilson, parents of the groom.

Carl Edison Baker, machinist apprentice, Martinsburg Shops, and Miss Jeanette Hull of Belington, W. Va., were recently married in this city. Baker has naturally received a vast amount of advice, and a lot of good-natured "joshing" from the boys about the plant.

Martin L. Brown, a retired Veteran, with his two daughters, is making an extended visit to his brother Henry, in Missouri. We wish him a pleasant trip.

The Grim Reaper has again invaded the ranks of the Baltimore and Ohio Veterans. This time he claimed Brother John William Davis, aged 78. The deceased had been an invalid for about 14 months; a stroke of paralysis was the cause of his death. Besides being a Veteran in the service of the Railroad, Mr. Davis was also a veteran of the Union Army, Company H, Maryland Cavalry. He was a native of Martinsburg and spent his life in this town.

As a young man he entered the employ of the Railroad and for many years was a well-known conductor on the Cumberland Division. He had a service record of 40 years. As a fraternalist, he held membership in the Veterans' Association, the Order of Railway Conductors, and Lincoln Post No. 1, G. A. R. His widow, Mrs. Betty Davis, and adopted daughter, Miss Nannie Davis, survive.

Pittsburgh Division

Correspondents

E. N. FAIRGRIEVE, *Car Distributor*, Office of General Superintendent

ELMER H. STOLTZ, Pittsburgh Freight Station

A certain gentleman, well known in the Transportation Department, after reading an article entitled "The Go Getter," decided that he would put No. 94 into Connelville on time. He felt so cheery about it that he placed a little bet on it, and we understand that he collected. How about it, T. H. R.?

Terminal Road Foreman Irwin, in some unknown way has contrived to get himself a new Velie machine (and keep the Ford too). The first trip taken in the new machine proved quite a success. Sam visited Gettysburg, Washington, Baltimore and Atglen, Pa. Well, Sam, we never turn down an opportunity for a machine ride. When do we start?

Two gentlemen, one rather inclined to avoidupois, and the other not quite so hefty and inclined to be rather dignified, have serious objections to sitting near each other at the regular weekly staff meetings. Suspecting something, we started sluthing only to find that the brand of cigars being used by Mr. Allen since July 1 is such that G. W. C. D. feels himself much better off by being several seats away from the heavy boy.

The accompanying sketch is that of the assistant chief clerk, District Master Mechanic's Office, M. R. Powell, who recently spent a week hunting in the vicinity of Mt. Jewett. Before his departure there was considerable talk of bears and "Mac" was at a loss as to how the "game" would be

"Mac" takes our Safety Slogan into the woods with him

transported to Pittsburgh. He reached the woods up in "No Man's Land" on the Northern District, and after mistaking a black sheep for a bear, and settling for it with its angry owner, he actually saw a real bear. But in some inexplicable manner, instead of shooting, he dropped his gun, and was next seen as shown in the accompanying sketch. As a result of his nimroding expedition, there are one black sheep and a few rabbits less in McKean County, but the bear crop remains the same.

Messrs Kelly, Matheny and Huggins have also been tramping through swamps and wooded plots in search of something to shoot at. We have not heard how successful they were, but several complaints have been received from irate farmers concerning their missing cats.

The following is dedicated to a charming young fellow employed in the Car Distributor's Office, who assumed to raise a patch of fuzz on that part of the anatomy known as the upper lip: There was a young fellow named Frank, Who imagined he worked in a bank, He grew some "fringe" on his upper lip, And looked as though he had the pip. The folks a'll around did rail and scoff, He could stand it *no* longer, so had it rubbed off, When the folks saw this they surely did laugh— And the joke of the tale is our Mr. Frank Staff.

Glenwood Round House

Correspondent

MARY A. BREEN, stenographer to Master Mechanic

Well, of all things! Uncle Sam didn't get all his bravest men in the army, not by a long shot. We surely think that Yard Clerk H. F. Hines should be cited for bravery, for he embarked on the stormy sea of matrimony—just when, we can't say, as it was one of those "Q. T." affairs. At any rate, here's our best wishes to Harry and the better half.

Clarence Rider has given up dancing. There was a time when we thought this impossible but this time there's no mystery about it—SHE is (according to Rider's version) 5'4" and weighs 200 or more. No wonder they don't dance, for that surely would be the long and the short of it.

General Foreman N. R. Butler, New Castle, recently paid us a flying visit. If everyone from New Castle is like him, we're for New Castle all the time.

A certain local official had the audacity to come around one day recently with an awful grouch on. We tried and tried to find out what was wrong and the cause proved to be "engine failures." Say, "Jim," maybe if we can coax those engineers of yours to learn a few tricks of running an engine, we might be able to entirely eliminate the failures on this Division and thus keep away the grouch.

Like Absalom of old, someone around Glenwood Shop evidently has all his pride in his hair. It is usually permitted to grow

How To Earn Up to \$100 a Week in a Field where there's Room for You

EASY to EARN \$35 to \$100 PER WEEK!
Learn Drafting

Trained draftsmen throughout the country are earning from \$35 to \$100 or more per week. They saw the "way out" from dragging work, long hours and small pay -- and took ACTION.

They got out by training for practical drafting (mechanical drawing) - That's YOUR way out, too.

The Columbia School of Drafting makes it easy for you to earn a big salary and quick promotion in the drafting field. This course has been made so simple and easy that you'll be able to grasp draftsmanship in from six to ten months of pleasant home study.

Charleston Division

Correspondent, M. W. JONES, *Secretary to Superintendent, Weston, W. Va.*

"Nothing is more noble, nothing more venerable, than LOYALTY."

—Cicero.

Dear People:

They say "Continual dripping wears away a stone." We've been after our Editor man to give us a few more lines for our news, and this month he has done so. (This is not the first time that we have been accused of possessing a "solid ivory" mentality—Ed.)

When this letter appears in the MAGAZINE 1922 will be here, and we wish you all a very Happy and Prosperous New Year. It is our hope that 1922 will bring with it the dawn of a new era, peace, disarmament, and a general resumption of normal business.

During the past week, the district, division traffic and local officers made an inspection trip, covering the entire territory. Those in the party were General Freight Agent H. H. Marsh, District Passenger Agent C. J. Proudfoot, Division Freight agent F. M. Jordan and Traveling Freight Agent H. M. Baker. They were accompanied by Superintendent Trapnell, Division Engineer R. Brooke and Trainmaster Deegan.

Service Is the Best Advertisement We Can Have

By the way, Mr. Agent, don't you KNOW that you must not load company material in foreign cars. And don't you know that if you load an Eastern Route car WEST, or vice versa, it means just that much money lost. Let's quit it. In this part of the country the merchants have been going in a good deal of late for what they call Dollar Days. Might be a good idea to try to make every day on the Charleston Division the "DOLLAR (SAVED) DAY." It's easy and you know it.

I have been told that in writing to you of late, I have not said much about the Division Accountant's force, and so have had my special representative dig up a few facts. Do you know "Bill" Borneman? He used to work in an office all by himself, but being young and impressionable, he decided he

wanted to get into an office where more of the fair sex were employed, so what did he do? First opportunity he bids in a job in the office where there are lots of pretty girls (of course "Bill" Severns always DID have an eye for beauty). First there's Trix—you know her—she's the girl who tried to ride on a C. & O. train one day with a Baltimore and Ohio pass. Then there's Juanita; she's trying to learn how to dispatch trains in her idle hours, and we will say that she has chosen a good teacher. Next comes Irene, apparently a very quiet little girl, but "Still waters run deep." We understand that in her spare time she is learning to cook. On the left as we enter, we find Mary Pickford. She used to have an auto to ride around in, but not any more. We have been unable to ascertain why as yet, but our sleuth is on the trail. Nell sits close to her, and so far as we can learn she is still heart whole and fancy free, because every time we meet her, she has a different one. "Bee" must not be forgotten; she spends her time trying to figure out why Ex 9000 didn't make his standard, and that's all of them. But—Linn—poor boy, he's out of luck. It has been suggested that he should come to some of us old timers for advice as to how to catch his fish, after he has apparently hooked it—because it always gets away.

A recent visitor on the Charleston Division was Samuel Strachan, assistant to the general freight traffic manager. "Sam" was a very welcome visitor. He has not lost any weight since he left the Charleston Division. We are all very glad to see him and hope he will soon come again.

Coal costs money. Save it. A few shovelfulls less per trip make a big total in the aggregate. Don't overload your tanks. Coal might fall off and hurt someone and—it's of no use as ballast.

"Bill" Longwell, our old friend, foreman at Buckhannon, has been promoted to Clarksburg. We were sorry to see him go, but congratulate him on his promotion. Many are the broken hearts in Buckhannon, Sago, Adrian, and other places too numerous to mention. In our art gallery this month, we show a photo of "Bill," and at the right you will find General Foreman O. J. Kelly of Weston. Mr. Kelly has been in the service of the Company for some 39 years, working up from the lowest position in the Mechanical Department to his present one. Mr. Kelly is a prime favorite with everyone on the Charleston Division, and numbers among his friends men of all ranks on the entire system.

Keep a clean house—good housekeeping spells economy

Your correspondent today was pleased to receive a letter from some of our friends in the joint office at Charleston, W. Va., which contains some notes of interest and which we are pleased to quote. This is encouraging, and we hope others will follow suit. As we have told you, we can't GUESS at everything that is going on, and a few local notes from all over the Division would certainly help to make the "Among Ourselves" more interesting to our local readers. Here they are:

Miss Martha Stalnaker, stenographer, and Miss Mildred Keeney, claim clerk, have recently returned from a trip to New York, Philadelphia and Washington. They do not state in their notes WHY they went, and so our readers must be left to form their own conclusions. We have learned, however, from outside sources, that Charleston holds more attractions for them than any of the big time towns mentioned.

A reward has been authorized for the lucky person making the discovery as to why the young lady bill clerk goes to Point Pleasant. For details, inquire of the Agent's Office, Charleston.

The office force has organized a basketball team, and they spend their noon hours "On the jump." It is said by those who have been present that the girls look very charming in their uniforms. Naturally, all our girls look charming at any time. We hope to have some of their photos shortly.

Mrs. James Carwithen entertained the entire office force at her home at a Thanksgiving party. Everyone was there, the refreshments were fine, and everybody had a fine time.

Our sincere sympathy is extended to Travelling Auditor L. R. Porter, in the recent illness of his wife. We understand she is progressing favorably and all extend our sincere congratulations.

Safety—Good Service—Courtesy—Loyalty—Spell "Efficiency"

Cases have come to the writer's attention of late of carload shipments of various kinds running through from New York to Charleston in 3 days. The general average is 4 days. Get this information to our patrons and show them that we can do it. The Traffic Department works hard to get new business, but it can't hold it unless we give the SERVICE. We can all help to avoid delays of any kind to either L. C. L. or C. L. Go to it!

In our gallery this month, you will also find the photo of Engineer "Jeff" Davis, taken while he was on a hunting trip in Sage Brush Creek, Wyo., this year. Mr. Davis is on the right, while on the left is his son. Judging from the photo, they had pretty good luck.

Mr. Davis entered the service of the Baltimore and Ohio as a laborer in 1883, and in 1884 became a fireman. He was promoted to freight engineer in 1887, and in 1892 became a passenger engineer, which position he has held ever since to the entire satisfaction of everyone. The name of Mr. Davis has appeared, we are glad to say, more than once in our honor roll.

Our old friend John Kennedy recently paid us a visit, and while here dropped a note on the writer's desk, which is well worth quoting. It says:

"Does a hen stop scratching when worms are scarce? Not any hen we have known. Nor does the wise business man stop going after trade because the going requires extra effort. There are always worms somewhere in the ground, and there is always business waiting to be found."

Mrs. M. W. Jones, accompanied by her son, has gone to Kane, Pa., for a visit. And

W. H. Longwell and O. J. Kelly

so, the correspondent spends his time wending his weary way between the office and the "BUSY BEE." He can't sleep in the office, and so has to go home at least once a day. (By the way, Mr. Jones, what's that old song—"My wife has gone—etc.?"—Ed.)

General Manager Scheer and General Superintendent Scott, accompanied by Superintendent Motive Power C. A. Gill, recently made a tip of inspection over the Charleston Division. While in our territory they were accompanied by Superintendent Trapnell and other division officers.

Storekeeper Remaley dropped in to see us a few days ago; he promised to get us a line on how things are moving 'round Gassaway, and we will hope to have it, together with some photos, for the next issue.

By the way, funny, isn't it, how one thing brings on another? The November issue of the MAGAZINE reached here a day or two ago, and today we have a letter from our counsel in Gassaway, C. W. Flesher, referring to the article published in connection with Weston. He gives some interesting details, and we believe they are worthy of note, in that they throw additional light on the origin of our division headquarters town.

It appears first of all that the correct spelling of the name is Flesher, and that the Henry Flesher to whom we referred as the first settler, was born in England and settled in Weston, where he built the first block house, as nearly as can be ascertained, in 1730. He brought up a family of 6 sons and one daughter. The daughter married, started for Ohio and was never heard of again. Some time later a band of Indians crossed the Ohio River at Parkersburg, and following a trail to Weston, fell upon the rest of the family at sundown and killed them all, except the mother, who escaped to a fort then located at Jane Lew, and one son, Adam, who escaped to the mountains by way of Court House Run. When the Indians killed Henry Flesher, they captured his old flint lock gun, and carried it as far as the mouth of Stone Coal Creek, where they dropped it. Half a century later this old gun was found, rusted into three pieces, and is now one of the interesting old time relics in Weston. Adam Flesher, who escaped, married Miss Mary Stots of Clarksburg, and settled about 2 miles below Weston, bringing up a family of 14 children, all of whom reached the years of maturity and married. He was a soldier in the Conti-

nental Army during the American Revolution, and fought at Bunker Hill. He was born in Weston in 1754 and died at the age of 96 years. Through tracing this matter back, we find therefore that our Company Counsel, who is an enthusiastic worker for the Y. M. C. A., and anything which will help along the cause of the Railroad boys and girls, is a direct descendant of the founder of Weston.

Guess that's about all we have to say now, except to quote for 1922 a little item on personality, which appears in "The Glassworker" which says, "It is important that we should dare to be ourselves, that we should be willing to be different. If through moral cowardice we invariably assent to the prevailing fashion in our opinions we make one more in a crowd; but a place of leadership is denied us. Life is too tame and tepid if we remain neutral and in the background always."

THINK ABOUT IT!

Yours as ever,

The Correspondent.

Wheeling Division

Holloway

Correspondent, J. S. STAMM, Coal Billing Agent

We extend congratulations to Mr. and Mrs. William Grimes, who have a baby girl at their home. Mr. Grimes is first trick locomotive inspector at the shops.

H. L. Wilson, chief car inspector, and J. O. Septer, Car Department, have been absent for some time because of sickness. D. E. Wilson has been acting chief inspector. Earl said it was pretty hard work but that he could stand it for a few more years if necessary.

Anyone wishing to purchase some nice "trained" rats or mice will see Miss Perkins at the Round House office. We understand that these can be purchased cheap. In fact Miss Perkins insists that unless someone takes them away soon she will ask Mr. Walsh, L. S. K., to mark them "surplus."

D. A. Fisher was back for Christmas. If D. A. had a \$25,000.00 a year position he would spend his vacation at the Scale office—there and looking at "Baby Shoes," wouldn't you, "Don?" We are always glad to see you come back, but why didn't you bring "Her" with you?

Conductor "Bill" Baer, Trains 61 and 62, is leaving to take a run at Massillon. Sorry to see you go, "Bill." Good luck to you!

Patrick Allen tells a funny story about F. H. Whiston, chief clerk to the general yardmaster. "Pat" said F. H. has been trying to part his hair in the middle, and that Whiston is almost bald. But why laugh at F. H., "Pat?" We have seen you pretending to brush your hair out of your eyes, and you've been bald for years.

J. F. Keller, night yardmaster, has just returned from Cuba. "Jake" tells us the "cigars" down there are fine.

"Dutch" O. R. Telle, westbound desk clerk, tells a good one about trying to sleep during the day—but, ask "Dutch," he can tell it better than we can.

P. Huff is now assistant night yardmaster, Holloway, filling the position made vacant by C. R. Bethel. Mr. Bethel has resumed his position on the road. We are glad to have Mr. Huff with us in the yard. He has an excellent record as a conductor and will make one of the finest yardmasters Holloway has ever known.

DIAMONDS

For a Few Cents a Day

Send No Money
We will send you—upon your simple request—your choice of diamond bargains—the greatest in America! Do not send a penny in advance. When the ring comes, examine it. You are the judge. If it is not, without exception, the greatest value you have ever seen, send it back—at our expense! If you decide to keep it, it is yours—for a few cents a day. You may order direct from this advertisement if you wish. Don't send a cent. You do not risk a penny.

Charge-Account Plan
By our new charge-account plan, you may pay for your choice of hundreds of pieces of exquisite jewelry in sums so small that you would never think of saving them. You are also guaranteed 8 percent yearly dividends—and a 5 percent bonus may be earned.

Send for Bargain Book
Send your name and address today for our new 128-page book, showing hundreds of unmatched diamond bargains. Sent absolutely free. It explains the dividend offer and bonus plan. Write today to Dept. 8011

J. M. LYON & CO.

1 Maiden Lane, New York N.Y.

It seems that a certain young man who is employed in the shops married a pretty miss from Pittsburgh, then came to Holloway, keeping it all a secret. But the secret leaked out as secrets will and—you won't forget the cigars, will you, Fisher? And all the girls like candy.

For the information of those who have been inquiring about the platform at Holloway Station we refer you to J. D. Tomer, who can tell when it will be completed.

The many friends of Conductor R. W. Burns were sorry to hear that he had a serious accident befall him on December 8, having lost his left hand while pulling the loads at Lansing Mine, Ohio.

Mr. Burns is conductor on the Barton Mine Run, and has been in the service for a number of years. We all hope for his speedy recovery.

General Yardmaster H. C. Fowler has been absent from the yards for the past month because of sickness. W. F. Booth, relief yardmaster, has been taking Mr. Fowler's place during his absence. Mr. Fowler expects to be back with us in the near future.

Western Lines

Cincinnati Terminals

Correspondent, JOSEPH BEEL, Chief Clerk to Superintendent of Terminals

A strange incident occurred while one of our foremen was attending court on a Baltimore and Ohio case. While everything was proceeding nicely, the person in question approached his attorney and asked to see his disposition. This evidently was very embarrassing for the attorney.

We wish to extend our sympathy to Harry Graue, who lost his mother, and to M. Kugele, whose wife died recently.

If at all consistent we believe it advisable to appoint judges to ascertain which one of the Swepton boys, Clyde or Harry, can raise the best looking soup strainer on his upper lip in the least time.

J. Harry Zimmerman, operator at Cameron, W. Va., who celebrated his 50 years of service on May 7, 1921

Edward Kroeger, clerk, Winton Place,
Cincinnati, Ohio

Another invention was made known by our Miss Thelma McNulty. On a cold morning, becoming chilled from the Iceland atmosphere, she proclaimed that if we would open the windows we would get warm. Her intentions were to close the windows and not to open them. As the old proverb says, "Take a person for what he means and not what he says."

Let us resolve for the New Year that we will each strive to do our best to make it the banner year for the Baltimore and Ohio. Every employe from the president down to the messenger boy, can help to make it so, if we will only so resolve.

G. W. Hesslau, claim agent at Garrett, Ind., has been transferred to the New Castle Division, with headquarters at Youngstown, Ohio.

We are glad to chronicle the complete recovery of S. H. Rhoads, agent at Warren, Ohio, from a very serious attack of typhoid fever, during which he was treated in the hospital at Wooster, Ohio.

Gwilym M. Lewis, timekeeper at New Castle Junction, died at his home, 510 Lyndal Street, on November 22 after a lingering illness from a complication of diseases. "Bill," as he was familiarly known to a wide circle of friends, was a young man of sterling character and his death has brought sorrow to his many old acquaintances on the Baltimore and Ohio. The funeral was held from his late home, after which his remains were taken to Connellsville, Pa., for interment. The sympathy of all employes is extended to his bereaved family.

John A. Mayberry, for the past ten years employed at Warwick, Ohio, as car inspector, died on November 20, after an illness which extended over a period of ten months. Mr. Mayberry entered the service of the Baltimore and Ohio on March 15, 1905, and was always a faithful and trusted employe, and was held in the highest esteem by his fellows. The funeral was held in New Castle on November 22 and was in charge of the Masons, of which order the deceased was a member. Sincere sympathy is extended to his bereaved family in their great loss.

Another old and faithful employe answered the final summons when Engineer W. E. Paden died suddenly after an attack of apoplexy on Monday, November 28 at his home in Youngstown, Ohio. Mr. Paden entered the service of the Company as an engineer on the Chicago Division, November 28, 1891, and was transferred to our division January 1, 1902. He was a man of fine Christian character and enjoyed the acquaintance of a large circle of friends who extend their sympathy to the bereaved family. The funeral was held from his late residence on November 30, and burial was made in the family plot at Newton Falls, Ohio.

Forty one members of the New Castle Division Veterans' Association were present at the regular quarterly meeting in Columbus Hall, New Castle on Saturday evening November 19. After the regular routine of business was transacted, the election of Officers for the year 1922 was held with the following result. President, W. D. Reed; Vice President, M. Dempsey; Treasurer, J. K. Jolly; Secretary, D. W. O'Neil; Chairman, James Aiken; Sergeant at Arms, James Moriarity; Executive Committee, W. P. Kennedy, J. O. Huston, M. L. Raney, W. S. Parker. James Aiken was elected as delegate to the next Grand Lodge Annual Convention. The Ladies' Auxiliary also held their meeting at the same place, with 34 members in attendance. Special attention was given to the solicitation of business for the Baltimore and Ohio and even better results are looked for during 1922. The veterans of the New Castle Division are making an enviable record for themselves in the way of getting more business for the Railroad. Moral! If you want to get more business, follow the good lead of the Veterans.

An extremely creditable record has been made in the Fairport Yard in the fact that not one car has been damaged since July 13, not even a draw bar or broken knuckle to report. This is indeed a record that any railroad might well feel proud of and establishes a high mark for other roads to shoot at. The record is all the more commendable because of the fact that Fairport Yard has been extremely busy during this period, with heavy traffic in ore and grain. J. O. Huston is in charge of Fairport Yard as general yardmaster, and he and the other employes in this yard are to be congratulated on establishing this enviable record.

Newark Division

Correspondents

B. A. OATMAN, *Office of Master Mechanic,*
Newark, Ohio

A. D. LIST, Newark (Ohio) Shops

William P. Lynch

Born on February 13, 1874; died November 18, 1921,
at Newark, Ohio

Mr. Lynch entered the service of the Company as laborer in the Maintenance of Way Department on August 16, 1898. He was transferred to Newark shops on March 25, 1907, as a machinist helper, and remained in the service in this capacity until his death.

Mr. Lynch was a familiar figure in the roundhouse at Newark, of a quiet disposition, but always on the job. Death occurred at the home of his sister, Mrs. C. A. Trager, of Clarendon Street Newark, Ohio. The sympathy of the shop employes is extended to his survivors.

Walter Gray Crawford

We were grieved to hear of the death of our fellow workman, Walter G. Crawford, who died at Mt. Vernon, Ohio, hospital on November 8.

Mr. Crawford was born on July 2, 1890. He entered the service of the Baltimore and Ohio at Newark, Ohio, on March 16, 1908, as patternmaker apprentice. Completing his apprenticeship on March 16, 1912, he continued in the service as patternmaker until March, 1921, when the pattern shop at Newark was closed and men furloughed.

On June 27, 1916, Mr. Crawford was married to Miss Leona Ferguson, of Newark

They celebrated their golden wedding anniversary on October 3
—Pensioned Yard Master and Mrs. W. D. Reed

The late Walter J. Crawford and little son Ernest (also deceased)

Ohio. Two children, Ernest F. and Leona Margaret were born. Little Ernest died on May 26, this year.

Mr. Crawford was considered an expert patternmaker and was held in high esteem by the Company and fellow employes at Newark, Ohio, who extend to the wife and surviving child their heartfelt sympathy.

John Anderson Ryan

Born on October 16, 1837; died November 28, 1921, at Newark, Ohio

Mr. Ryan entered the service of the Company in January, 1865, as locomotive fireman. He was promoted to locomotive engineer in January, 1866, continuing in the service as locomotive engineer until June 4, 1910, at which time he was placed on the rolls as pensioner.

Mr. Ryan was the oldest engineer at Newark, was a careful and reliable man at the throttle, and during his term of service as passenger engineer, handled many passenger trains over the Newark Division.

Mr. Ryan was married to Miss Eunice Silley of Dresden, Ohio, and to this union were born three children. Mr. Ryan and family came to Newark, Ohio 46 years ago, and made Newark his home until called to the great beyond. He was known by his fellow workmen as "Daddy" Ryan, a man with a wide acquaintance, genial and affable, and who will be missed by our Railroad family at Newark. He leaves to mourn him two sons, Edward F., a Company engineer; Francis H., a motorman, Ohio Electric Railway, and one daughter, Mrs. Charles Bounds, of Newark, Ohio; five grandchildren, eight great grandchildren, two brothers and one sister, to whom the employes in all departments at Newark extend their sympathy.

It's Up To You To Save

The old excuse, "I cannot meet my obligations now," or "I intended to but forgot it and needed the money for something else," and many other excuses, are pushed into the background by the added feature of the Relief Department, to deduct any amount you desire from your wages and credit it to you as a savings with the interest added at regular periods. You need not bother in regard to regular saving after you have made request to the superintendent of the Relief Department to make a stated deduction from your pay monthly or semi-monthly as you desire. This is an excellent plan, and to those who have secured their

homes through the Relief Department, nothing need be said as to the benefit of regular deductions from the pay envelope because the practice resulted in their owning a home today.

If you are in the old rut and cannot get started as a saver, just drop the Superintendent Relief Department, Baltimore, Md. a line that you desire to save through the Relief Department by regular deductions from the pay roll, and I am sure that you will be properly taken care of without any further trouble on your part.

Disappointed

During the three weeks prior to November 15, elaborate plans were made by four Newark shop nimrods, to annihilate Mr. Rabbit as soon as the sun was up on that day.

First, it was the selection of a wild and wooly location, then the securing of something to shoot with, then some kind of a conveyance whereby they could be hurriedly taken to the selected spot. After these were all arranged for the hunting license was secured; then the anxious waiting for the last few hours to go by, at the end of which they would start on one of the real hunting trips of their lives.

The night before was rainy and cold. At 3 a. m. they were off in a Dodge. A few miles of nice pike, then mud and mud and mud, until eight miles per hour was going some. As they traveled along they passed gangs of rabbits who were out early looking for some one to shoot them, but the driver had orders to make first stop at Conesville, Ohio.

A cold, wet day of it, home late with a number far under what had been anticipated, friends disappointed because orders given were not filled. Some hunt! And it was certainly lucky for our friends that rabbits were selling for thirty-five cents in market on the following day.

Columbus, Ohio, Freight Station

Without the invitations, rice, old shoes or publicity usually accompanying such events, Lawrence Miller and Miss Mary Wiley slipped away quietly and were married on September 29. Several weeks elapsed before the matter came to light. We were certainly a surprised bunch of clerks. Mr. Miller entered the service at Columbus as messenger boy in 1893 and has come up through the ranks until he now occupies the position of cashier. Mrs. Miller was our efficient car record clerk. Since Mr. and Mrs. Miller gave us such a surprise we retaliated by giving them a little surprise, too. Suitable gifts were bestowed

The late Engineer John Anderson Ryan

Vose

The Vose Grand

represents 70 years of experience devoted to the attainment of an ideal. Its incomparable tone brings a lifetime of satisfaction to the lover of good music.

We Challenge Comparisons

Write for our beautifully illustrated catalog and floor pattern of the Vose Grand, also our easy payment plan.

Vose & Sons' Piano Company
165 Boylston Street
Boston, Mass.

upon the newlyweds and everyone enjoyed the good time. It would be wrong to criticize Mr. Miller for any breach of etiquette, for we consider him a mighty lucky man. Our best wishes are extended to them for a happy and prosperous married life.

"Ed" Dauer recently bought a new home and has now settled down for good. The club wished to give him a house warming and November 30 was selected as the proper time. Appropriate gifts were taken along and presented. Old fashioned games afforded amusement during the evening.

Mrs. "Tim" Payne recently entertained the members of the Ladies' Sewing Club. The club is made up of the young ladies employed in the Freight House offices. These ladies are intent on making pretty things, which, when completed, are placed in the "hope chest" for future use.

C. L. Logsdon has resigned as assistant rate clerk to accept a position as traffic manager with a local concern. We wish him success in the new field.

The clerical forces at Columbus have been increased as follows: Robert Bridgely Head has arrived at the home of Mr. and Mrs. Frederick Head. Mr. Head is a clerk in the Freight office. Waneta May has arrived at the home of Bill Clerk and Mrs. F. M. Ashcraft. Jeanette Irene Mason has arrived at the home of Yard clerk and Mrs. G. F. Mason.

Cleveland Division

Correspondents

A. F. BECKER, *Secretary to Superintendent*, Cleveland, Ohio
E. L. MILLER, *Chief Clerk to Division Freight Agent*, Akron, Ohio
H. B. SMITH, *Supervising Agent*, Cleveland, Ohio
W. E. BRUGH, *Clerk to Trainmaster*, Massillon, Ohio

There is a certain young man in the Division Accountant's Office, who thinks he is putting one over on the office force. However, F. F. S., we all know that a certain

young lady extended her Thanksgiving holiday, as well as you did, and that passes were issued to the same destination for both of you. Because there is no band on the third finger of her left hand, is no reason that you should not pass the cigars and candy around the office. We would like to congratulate you, personally, but you blush so easily. Well, murder will out!

W. E. Shelton, operator in "CS" Office, desires to thank the boys in Room 8 for the beautiful flowers sent for his mother's funeral.

We are sorry to learn of the illness of our two old passenger conductors, J. E. Smith and C. B. Campbell. We wish for them a speedy recovery.

The School of Accounting dispensed with its regular meeting on December 17 and instead, enjoyed a fine dinner, held in the accounting offices. Among the various features of the evening was the dancing party which took place on the fourth floor of the Passenger Station.

On Thursday, November 24, C. F. Farmer, division freight agent, Cleveland, Ohio, was married to Miss Mary Mahoney at Wheeling, W. Va., receiving his start with the Baltimore and Ohio as a freight trucker at the Newark Freight Station, Mr. Farmer's services have been continuous. He has served at the various desks in the local freight and the superintendent's offices, and was subsequently promoted to traveling dairy freight agent in 1916. It was while serving in this capacity that he gave heed to duty's call and in March, 1918, enlisted in the 36th Engineers, with whom he served 14 months as a member of the American Expeditionary Forces in France. On his return from service, he was sent to Cleveland, Ohio, in the capacity of commercial representative as a reward for efficient service. Mr. Farmer was appointed division freight agent, Cleveland, in June 1920. He went into West Virginia territory to secure his bride; a territory which is noted for its beautiful and charming girls. Mrs. Farmer, with her charming manner and pleasing personality, has quickly won her way to the hearts of all with whom she has come in contact since her arrival in Cleveland. The whole division joins in wishing Mr. and Mrs. Farmer a life of happiness and prosperity.

Advice has been received that Ex-Capt. and Lieut. Louis F. Barada and family are happily located at Needles, Cal., and that he is now employed as special agent for the Santa Fe Railroad in that city. All the boys are requested to write. Those having children will receive a horn from his farm, if one is requested before the present crop is exhausted. His spare time is utilized in herding horned toads on an immense tract. However, this season's crop was not as much in demand as expected, because of the large importation of German toys. There is also being raised on this tract, extensive fields of gourds, which are being negotiated for by interests supposed to represent the Mexican Revolutionary Forces in Lower California, to be used as army canteens. Personal acquaintance with the Provisional Governor of Lower California, may be of assistance to any of the boys looking for army service. The open door policy exists for all friends, and tourists are welcome and cheerfully received by giving the pass word "BEST AND ONLY."

Columbus Street Freight Office

Ziegfeld's Follies this year attracted many that evidently are not worrying about the price of shoes in Russia. McGinley's titian haired fiancée had considerable competition

but Mack is happier for the experience. Miss Robbs enjoyed the performance. Miss Lake was there with Art Kroog's field glasses and Henry Mulhern is still complaining about Miss Anna Miller being late and causing him to miss the "Nature Scene." The evening closed with Mack treating at the Carlton Terrace.

Congratulations are now and forever hereafter in order. Miss Geraldine Sammon was married Thanksgiving Day. Mr. and Mrs. Thomas Kirby spent their honeymoon in the smoky city, and it must have been wonderful.

The annual Thanksgiving Dinner was served "Ritz Style" at the office. Agent Littell said grace before and after dinner. In addition to the forty young lady employees that attended, it was enjoyed by Cashier Murray, Assistant Agent Holcomb and Chief Clerk McGinley. Foreman O'Hara failed to attend because the tailor had not returned his evening suit in time for the occasion. It was also said that he was disappointed in not having an opportunity to deliver his much rehearsed after-dinner speech. Eats, eats and more eats, was the order of the day and no time was consumed with speeches. A feature was "Irish jigs by Miss Spain."

The smiling countenance of Miss Margarie Neelon is again with us and we look for her continued popularity.

To Miss Betty DuBridge we extend our deepest sympathy because of the death of her beloved sister, Grace.

We wonder why Miss Roth is making inquiry about possible openings at Canton, Ohio.

Preparations are about completed for the annual Christmas dinner, but much disappointment is being expressed because the boys are not invited. Jerry said, "There's no kick in this spinster dancing," and Medley is heart-broken. Sweitzer can get permission but Klein must keep his promise.

Dover, Ohio

Just before Christmas Conductor "Pete" C. Stevenson, on his way to work, found a lady's pocketbook containing a large amount of money. He advertised it in the local newspaper and the owner was found and money returned. Mr. Stevenson was highly rewarded for this deed. And this is the kind of people that make our country fit to live in. Mr. Stevenson has always been an honest and faithful employe and is in his 20 odd years of service.

Yardmaster B. F. Wilcoxon, took his annual vacation in November and spent most of it hunting "big game." We hear that he did bag a few rabbits, leaving only two for "seed." Yard Clerk "Tom" Adams worked as yardmaster in Mr. Wilcoxon's place.

Recently we saw in a newspaper cartoon a railroad engineer who, while driving his automobile, thought he was on his engine, leaned far out over the side and paid no attention to curves. But little did we think one of our engineers would do this very thing. A few weeks ago Engineer John R. Sharr, while driving his automobile at Dover, failed to make the turn on approaching a curve. Of course, he thought he was on his engine. Consequently he drove head-on into a tree, and damaged his automobile slightly. No, John did not get mad, he just simply had to laugh. Good for him! We did, too.

Carl Kuemerle, who some months ago accepted a position as timekeeper, Elyria, has returned to work at Dover as yard clerk,

because of the reduction in forces at Elyria. This displaced Yard Clerk T. Thomas, who is now extra yard clerk.

Night Yardmaster "Mike" Reidy is still off because of illness. "Mike" does not get in much time; he works a few days, then lays off for a few. We would like to see you improve in health, "Mike."

Conductor W. F. Stapleton had a boil and the tooth-ache at the same time, but still he kept in good spirits. All of us could not do that, "Stap."

Massillon, Ohio

Harry Malone, patrolman, and A. W. Rohr, checker, went out hunting on the first day of the season. It is reported that they had a small accident which resulted in getting them a rabbit. Said rabbit had followed them around all day to keep from getting hit with wild shots, but alas, poor bunny got too close to their feet, and one of them stepped on and fatally injured him.

A. W. Sanders, utility clerk, was seen buying a suit of clothes on Saturday, December 10, and was also seen gazing into the jewelry store windows. This looked bad. Can it be that some young lady is going to be "missed" from home in the near future? Miss Ethel Donahue, report clerk, had better keep a sharp lookout ahead.

"Ed" Richards, demurrage clerk, broke his glasses recently; his work has improved 100 percent. since this accident. It doesn't pay to get old too soon.

A. H. Brown, yardmaster, has been successful in the handling of foreign cars, getting them loaded off line or sending them home empty or loaded. Good work, "Brown," even if you do have to lie awake at nights figuring it out.

We hear that while Patrolman Harry Malone was out hunting recently, he came into close quarters with a snake. No, Harry did not harm the creature, but called for assistance from his fellow hunters. The snake was killed before any personal injuries were inflicted. Brave men!

Conductor John Hert, No. 47, recently held his train for three minutes at Easton to enable a passenger to get to the station in order to get to Wooster, Ohio, going by the way of Seville. This passenger appreciated the kindness of Mr. Hert, as it was imperative that he get to Wooster on that day.

"Mike" McGurran, boilermaker, who was furloughed some time ago on account of reducing forces, has returned to duty again.

The cook and bunk house at Massillon, in which several of the trackmen lived, caught fire on December 8. It was badly damaged before the fire was extinguished by the Massillon Fire Department. Fire was probably caused by an overheated stove pipe.

In December, Brakeman E. P. Fenstermaker became the proud father of his first son. Congratulations!

Baggage-master Charles Foss resigned on December 1. His position is now being filled by Floyd Weirick, who was furloughed a few months ago when forces were reduced. "Charlie" had big shoes, but Floyd can fill them.

Brakeman J. O. Hart recently took his first lesson in aviation. He says that he doesn't like it. While in the act of setting a brake on the top of a car box, the dog slipped out of the ratchet, throwing "Joe" to the ground and spraining his ankle. It might have been worse.

Conductor W. J. Bair is now on 47 and 48, running between Massillon and Cleveland until the return of Conductor Campbell, who is off because of sickness.

We also have P. M. Carpenter officiating as brakeman on trains 47 and 48, between Massillon and Cleveland.

Trainmaster and Mrs. J. Fitzgerald spent a pleasant vacation in the West, stopping off at Chicago, Denver, Salt Lake and Omaha.

Trainmaster H. C. Batchelder has been acting trainmaster between Holloway and Warwick, on account of Mr. Fitzgerald's taking his vacation.

Chicago Terminals

Correspondents,
THOMAS H. WILLIAMS, F. S. DE VENY

There is a nice young lady who drops down to the depot from Robey Street for her noon luncheon. Our congenial friend, John Maloney, seems to pay a good deal of attention when she is here. Are we going to loose "Johnny" from the Bachelor's Club?

✱ Hugh McDonald, our veteran supervisor, and who has been sick for more than a year, made us a call at the depot a few days ago, looking pretty well. "Mac," the boys all like to see you well and back, so hurry!

George Hesslau, former claim agent at Chicago, now located at Youngstown, is the proud father of a fine boy. George (being a member himself) says that he will put the junior in the Reilly's Bucks as soon as he is able to carry a musket.

From all reports there are more men being hit by automobiles than by box cars. On an average there are about three killed every day in Chicago; accidents have become so common that the readers of our daily papers pay little attention unless it comes to someone in the family. Our safety committee are wondering what can be done to lessen the deaths and accidents from automobiles.

It was during the time when the Chicago newspapers were distributing Smile and Cheer Coupons that Paul Bussian, our genial accountant, made an earnest effort to get as many of the coupons as possible. Just when Paul got enough to get in line with the lucky ones (by this time he figured he would take the \$5,000 prize, and doped out what he would buy for Christmas) the whole thing went "busted." In other words, the papers put an end to it. Don't worry, Paul, there are many more in the same boat with you.

Numerous reports have been floating around recently about a certain young lady in the Superintendent's Office, but being

without anything official we are unable to confirm them. Those who want more information should see Miss Cordt, Grand Central Station, or Mr. Anderson, East Chicago.

Judging from the literature and catalogs that Rudy Lindeman is receiving from a well known sporting goods house in Chicago, he must be contemplating entering the Olympic games in the near future. We might also add that a certain young lady employed by the above mentioned firm is only too glad to furnish any information over the 'phone.

Chicago Division

F. N. SHULTZ, *Division Operator*, Garrett, Ind.

ESTHER J. SPREENBERG, *Clerk*, South Chicago
MARGARET GALLOWAY, *Assistant Shop Clerk*, Garrett, Ind.

South Chicago

A Happy and Prosperous New Year to all! John Staszewski, our chief reconsigning clerk, deserves a great deal of credit, and his excellent work should be given special notice under the "Think and Act Drive." Mr. Staszewski, in handling only two cases, saved our Company \$172.96 and \$233.22—or a total of \$406.18—by being on the alert and making investigations when in doubt as to weights, etc., on these two shipments. Keep up the good work, John!

We are glad to have Mary Ryan back with us again, after a long illness.

John Cusick spent several days in Baltimore as a member of the Operating Committee.

Miss Ethel Poole spent Christmas with her folks at Mishawaka, Ind., and reports a very enjoyable time.

Ohio Division

Correspondent, A. E. ERICH, *Secretary to Superintendent*

A Happy New Year to Everybody! Make the year 1922 happy by making it prosperous, both for yourself and the Railroad. Remember, whatever helps the Railroad, helps us. Four large helps: "SAFETY," "BOOST BUSINESS," "SAVE FUEL," "PREVENT CLAIMS."

Our sympathy is extended to Engineer C. C. Ramsey in the death of his grand-daughter.

"Phil" Hixson, fuel clerk, spent a recent holiday at his home, Midland City. Before leaving he packed his grip carefully with "good things," carried it with great care and even kept it on his lap, so that no damage would occur to the contents. Lo and behold! When he arrived at his home, instead of the "good things" he expected, and which he thought made it so heavy, he found a large lump of coal carefully wrapped. Although he is a fuel clerk, we are at a loss to understand why he should carry such large samples of his trade with him.

Extra Operator E. W. Barrett and Miss Annie Townsend, third trick operator, Leesburg, quietly slipped over to Cincinnati during the latter part of November and were married. Mr. Barrett is holding down third trick at Leesburg, while his bride is enjoying a vacation in North Carolina, in company with her sister, Operator Margaret Townsend. May all the messages sent and received by the newlyweds, be happy ones.

Rosedale, Ohio, Chicago Division, looking west

Send No Money

This 21-jewel Illinois Watch—the Bunn Special sent on trial. Do not send us a penny. The Bunn Special, made to be "the watch for railroad men" is adjusted to 6 positions, extreme heat, extreme cold and isochronism. 21-jewel movement, Montgomery Dial, handsome guaranteed 20-year gold-filled case. Guaranteed to pass inspection on any railroad.

After Trial a Few Cents a Day

The watch comes express prepaid to your home. Examine it first. Only if pleased send \$5.75 as first payment. Wear the watch. If after 10 days you decide to return it we refund deposit immediately. If you buy, send only \$5.75 a month until \$57.50 is paid.

ORDER TODAY Just send us your name and address. No red tape. Just say, "Send me the Bunn Special." Do not enclose a penny. Don't delay. Write today.

Our 128-page catalog, No. 4017 shows more than 2,000 bargains in diamonds, watches and jewelry. Write for it NOW.

J. M. LYON & Co. { Dept. } 1 Maiden Lane
4011 } New York City

Brakeman Donald Ritter requested a leave-of-absence on November 25. Shortly afterward, the news drifted back that he was not only enjoying the leave-of-absence, but also his honeymoon. Congratulations and good wishes!

Second Trick Operator J. B. Simpson, Leesburg, is the proud father of a new operator who arrived at his home recently. Congratulations!

On December 2, as Miss Lillian Flynn, stenographer, Master Mechanic's Office, was coming to work, she slipped on a plank, which had been placed across a puddle of water, fell and broke a small bone in her ankle. We hope for her speedy recovery.

A son was born to Engineer and Mrs. E. O. Brown on December 2. "Brownie" has not decided whether he is to be an engineer or conductor.

Brakeman John Cahill and Mrs. Cahill (formerly Ida Parker, clerk, Freight Office) are all smiles over the birth of a daughter, who has been given the name of Virginia Marie. Congratulations!

The freight office had quite a "home coming" recently, when three of the former freight office clerks brought their "younger generation" to call on Agent Moore (or "Grandpa Moore" as they jokingly called him). At this visit Mr. Moore gave the youngsters their first lesson on how to "BOOST BUSINESS" for the railroad, in anticipation of their future employment in the freight office.

Miss Dorothy Dunlap is again with the freight office employees, this time permanently. Welcome "Dottie!"

Illinois Division

Correspondent, O. P. STANFORD, *Secretary to D. F. A. Flora, Illinois*

Many of us have observed that recent items covering the Illinois Division activities have been a minus quantity. To make the Illinois Division section a success I must depend on employees to furnish news and I sincerely hope they will give me support, thereby helping the Illinois Division keep

up its good reputation. In order to get items published in each issue it is necessary that notes reach me not later than the 5th, so I can have them in Baltimore in time for the following month's issue.

We are indebted to Chief Caller Frank H. Wright for the following: "What is the first thing we look for when we receive the MAGAZINE? We turn the pages to see news from the Illinois Division. For some time we have been sadly disappointed. We run through the pages, division by division, from New York down to Indiana, and do not see that dear, old heading, 'Illinois Division.'" 'Tis a disappointment indeed, and now that Superintendent Stevens has appointed Mr. Stanford as our correspondent, we can give him the items of interest on our division; tell him of the things of benefit to ourselves and to the Railroad which has kept many of us on her pay rolls for these many years. Let's make things interesting and let us not allow a single issue of our MAGAZINE go by during the coming year without our representation."

It is with regret and sorrow that we hear of our division officials being moved from Flora to Shops. We have been associated with these men ever since they came to Flora and have worked with them as operators and dispatchers, and we will certainly miss them. Our loss will be the gain of others, and in assuming their new duties for the coming New Year, we extend to these men our sincere good wishes.

Engineers Cass Weller and W. Wolf were called to Indianapolis last week because of the serious illness of retired Engineer R. E. Weller. Mr. Weller has been in a hospital at that point for some time and at present his condition is serious.

P. E. Olliver, Breese switching crew, was in an auto accident recently. We are unable to give particulars, except that "Pearly" says some one gave a wash-out signal and the chauffeur used the straight air, just like "Jeff" does on a 60 cut of coal cars.

L. E. K. to H. F. S.: I will tell you something if you won't tell anyone.

H. F. S.: Well, I won't. What is it?

L. E. K.: "Hoppe" went to the Shops on No. 2 with the seniority lists.

The Armistice has nothing on the "Moving to the Shops" order. Everyone seems to be "in the air."

H. M. Hogan, the efficient car distributor, in taking a few days of his "alternating vacation," showed the home guards around Omaha that he was just as efficient handling a gun as he was in handling cars.

Relief Agent Irl Hansbrough is telling wonderful bear stories of his big hunt in the wilds of Texas.

Janitor McIntire is reported as being ill. Here's hoping "Mack" pulls through O. K.

Brakeman Nyal Upton's family has been considerably increased of late by the arrival of a 12 pound boy. He is most big enough for a general yardmaster now.

Believing that all work and no play is a sure sign of a one-sided life, various of the clerks have clubbed together—athletically inclined—and purchased a basketball and other necessary material, and are now ringing 'em in at the High School Gym. The gym and the use of all its facilities was secured through the kindness of the Educational Board at a charge to cover only actual expense in the use of light and water. What are we going to do at Shops? Let's keep the good work up.

Toledo Division

Correspondent, EDWARD M. MANNIX

East Dayton, Ohio

The drama of 1922 is upon the world's stage for twelve acts. The curtain arises. It calls to our minds a vision of the future and infuses in us new ideas, new resolutions, new hopes. We see the villain, Procrastination, in the shifting scenes; we view with horror the calamities he is trying to force and it implants in us a determination that Right (the hero) shall triumph. We applaud him with might, as he gradually overtakes the Villain, and as the curtain slowly descends at the last act, we are all at peace. Right has been triumphant and Procrastination buried for all time. May this be the happy termination of the drama of 1922.

We will now see new faces on our various committees of Safety, Welfare, Sanitation, First Aid, etc. As the retiring committees hand over to their successors a record of their stewardship, we are sure we will be able to say to them: "Well done, good and faithful servant."

Russell Cable, pipefitter, on the first shift, is breaking into the poetic class of writers; we soon will see some of his work in our MAGAZINE. Come on, Russell, shoot! We can stand it if you can.

One evening recently it was raining hard when Engine Hostler Earl Shultz came into the office with the exclamation that it was raining "pitchforks" outside. Edward Ryan overheard the remark and replied that it was not half as bad as "hailing street cars." Some weather, I say, some weather.

In the recent community chest drive in our city, the Baltimore and Ohio was much in evidence. Under the leadership of Division Operator I. E. Clayton, the Railroad held its own and helped to put the drive across, successfully. Where'er you look, where'er you go, you'll never beat the B. & O.

Mr. Clayton used the words of the illustrious Lincoln, "With malice towards none and charity towards all," precepts of President Daniel Willard in his ideal that we successfully carried out in making ours "A Neighborly Railroad."

Machinist John O'Neil, on the first shift, is getting a little serious, I think, on that matrimonial stuff. He recently sent his

fair one a lovely bunch of cut flowers. When he called that evening to see her, he asked if the flowers had arrived. She replied, "Oh, yes, Dear, and so fresh and lovely; there was a little dew on them still." He replied, "Oh, never mind, I'll settle that on pay day."

Cecil Lentz, machinist apprentice in our shop, recently purchased a lovely manicure set, which I think he is going to slip to some young lady in the neighborhood. Now don't blush, Cecil, I saw you with her, and you can't put anything over on me. You can get out of your time as machinist apprentice, but, the other stuff for life—yes, for life.

The writer is much pleased to see the slogan "Best and Only" coming into prominence, but I am now adopting one which can be used on all railroads, in all factories, on the street corners, and wherever people work or travel; "BE CAREFUL TODAY—LOOK BOTH WAYS."

"If you follow this, it will follow you, Through Nineteen Hundred and Twenty-Two."

Division Accountant's Office, Dayton, Ohio

Assistant Correspondent, G. M. McBRIDE

The latest thing in dancing is the "Auto glide." Anyone desiring to become accomplished in this line should see Miss Sara McKenna, Division Accounting Office. Miss McKenna recently gave a public demonstration at the corner of Third and Main Streets, Dayton, Ohio. From all indications it is strenuous exercise.

NOTICE—There has recently been organized at the freight house in Dayton a basketball team, known as "The Ramblers," with L. D. Kinzig as manager. Since there are quite a few from the Division Accounting Office, we are expecting a lively season. Root for us. Follow the games. "Rah! Rah! BEANO!"

"The Ramblers" won their first game by a score of 18 to 16. The only defeat they met was physical defeat as no one was able to get balls in the basket except Harker and Stoecklin who, owing to their enormous size, blocked traffic and nobody else had a show. Nevertheless, they carried off the honors.

"Eddie" Hartman has just returned from a pleasant vacation at his home at Aberdeen, Ohio, where he says the rabbits just sit and wait for you to shoot them. We are now "R-eddie" to go to work again.

Some folks say a "boil" is a scream, Others think it only a dream, But if experience teaches a man, We are absolutely sure McKenna can Describe it truthfully.

Griddle Cakes

Says Harker to his wife one day, "You ought to make griddle cakes *this* way." Says she to him, with lots of vim, "See here, good man, your vision's dim."

SUPPLY TRAIN, TOLEDO DIVISION

This train is operated from the Lima Storehouse; it makes a monthly visit to all points on the division, covering 320 miles in 5 days. In this time it serves 94 sections, 80 agents and operators, besides towermen, inspectors and others. The approximate monthly disbursements are \$10,000. From 4 to 6 cars of scrap are picked up under normal conditions, besides old tools and other items in need of repairs.

I've baked fine griddle cakes all my life, And besides all that I'm a good housewife, No more shall you darken this kitchen door, Or bake griddle cakes—or mop up the floor."

Now Harker goes home and lives at his ease, Determined at last his good wife to please. No more do they argue 'bout griddle cakes Although of defeat he never relates.

BORN: to Mr. and Mrs. Edmund Velten a baby boy. Congratulations!

Lima, Ohio

Assistant Correspondent, RAY GARRIGUS

Let's greet the new year with a smile, And forget the fading past.

Let's make the bright new year worth while, And make that last mistake—the last.

New Year Resolutions—Lima Shops

1—My freight and engine yards are clean and in first class condition. They are going to stay that way.

2—My storeroom is the best kept on the System. It is going to continue so.

3—My car repair and inspection forces are loyal to the Best and Only. They will always be.

4—My locomotive repair and inspection forces are keeping my power in the best of condition. And we're going to keep on doing it.

5—My output record is going to cause envy over the entire System. And why not?

6—My name is going to be at the top of the Safety Honor Roll the first month. And it's going to stay there.

Resolutions of Respect

LIMA, OHIO, December 1, 1921.

Whereas: On November 1, 1921, the Almighty Ruler of the Universe saw fit to call Brother Marco McCaulley from his home here on earth and from Lodge No. 365 Brotherhood of Railway Carmen of America, to the everlasting Home above; therefore be it resolved,

First: That Lima Lodge No. 365 fully realizes the loss it has sustained by the death of our devoted brother.

Second: That the Charter of this Lodge be draped in mourning for a period of thirty days.

Third: That we extend to the family of our beloved brother our heartfelt sympathy for the loss of their father and husband.

Fourth: That a copy of these proceedings be offered for publication in the Baltimore and Ohio MAGAZINE and a copy sent to the family, also a copy be spread on the minutes of this Lodge.

Signed: Wm. Van Horn, Christian Voltz, Patrick Finn, Committee on Resolutions.

T. Newland, switchman, is riding around town in a Ford sedan.

For Sale: Hunters equipment. Gun, tent, knives, etc. Apply R. T. Ireland, car Department. Such is life.

Brakeman Harry Turner was married on November 30. Mr. and Mrs. Turner are spending their honeymoon in Washington, D. C.

A North Lima clerk named Cusick,

Bought a car but doesn't use it. The upkeep they say, takes all of his pay, So he's saving now for his wedding day.

Patrick Finn, car inspector, was standing on a corner when he picked up a dime and placed it in his pocket. Looking down, he saw another dime and pocketed that. "Pat" was picking up the fifth coin when he found that he had a hole in his pocket and had been feeding the same dime through it.

Miss Esther Roberts, local trainmaster's office, visited relatives in Bloomington, Illinois, during Thanksgiving week.

Andy Stratton, yard conductor, can go fishing now. Mr. Stratton is spending his change buying repair parts for a Ford.

Rumor has it that Miss Jane Tabler of the storekeeper's office forces is to be married to Dr. J. Smith, a prominent physician of Philadelphia, Pa. A secret seems to be the only thing that won't keep around the storeroom.

The following is extract from report of a fire in the coach shop, made by Passenger Car Foreman Chew to General Foreman O'Brien. The fire was caused by an acetylene tank catching afire after the rubber hose had burned up to the tank.

"There was no damage, due to the prompt and very efficient work of the fire brigade. The risk taken to extinguish this blaze was considerable and the brigade should be especially commended."

Switchman and Mrs. J. Woods announce the arrival of an eight pound baby boy. Congratulations!

Otto Koch, car builder, was left at home to wash the dishes while his wife went to the movies. "I didn't have much luck," he reports. "I think it was because I put buckwheat flour in the water by mistake for washing powder."

Sidney, Ohio

The accompanying picture is of some of the wide-awake employees of the Toledo Division. Left to right, Henry Blue, crossing watchman, North Street Crossing, Sidney, Ohio; Edward Ledger, supervisor, Dayton, Ohio; Herman West, foreman, Section No. 8, Sidney, Ohio; H. M. Dryden, supervisor of signals, Toledo Division, Dayton, Ohio; John Eiler, section foreman, Section No. 7, Sidney, Ohio. These employees have the Company's interests at heart, as well as the duty of safe-guarding the lives of the traveling public, Mr. Blue having been employed by the old C. H. & D. and Baltimore and Ohio for 35 years. He has charge of our North Street Crossing, one of the busiest streets in Sidney and has never had an accident on this crossing because of always being on the job. Mr. Ledger, our supervisor, who has been employed on the Toledo Division for 37 years, is known to be on the job all the time, and one only has to ride over his territory once to be convinced that the Company has none better and few as good. Mr. West has the distinction of being one of the youngest section foremen on the Railroad, being only 26. But his age does not keep him from keeping his section in the very best of condition. Mr. Dryden, supervisor of signals, Toledo Division, having been on this division for the last 5 years, has built up an organization of signal maintainers who are not to be excelled on any division. Mr. Eiler, known as "Old Honesty" and never known to lay off, has been on this division for the past 35 years. One trip over his section will convince you that his untiring efforts maintain one of the finest sections to be found on the division.

Mr. Ledger and Mr. Dryden are to be commended on building up such an organization of efficient and loyal employees.

Men who are on the job on the Toledo Division

K. & I. T. R. R.

Correspondent, J. L. SIGMON,

Industrial Agent, Louisville, Ky.

On the evening of November 17, the Safety Department showed us "Bulletin 70." It was both interesting and instructive.

The K. & I. T. R. R. Co. orchestra played several selections while the audience gathered. Arthur D. Dans, motion picture operator, then entertained for about twenty minutes with clever sleight-of-hand tricks, which were greatly enjoyed. While Mr. Gans was arranging his picture machine, W. S. Campbell, manager and chief engineer, made a short talk, introducing W. L. Allison, Safety agent, Chillicothe, Ohio, who explained the origin and purpose of the picture, "Bulletin 70."

Mr. Gans then showed the picture, which was the best of its kind ever shown in Louisville. Afterwards, dancing was enjoyed until midnight.

There were about 500 persons present, including employees of the Baltimore and Ohio, the Southern R'y, Pennsylvania System, K. & I. T. R. R. and other roads of Louisville, together with their families and friends.

The attendance was somewhat below what was expected, because of the inclement weather, it having rained for two days continuously, and there were other attractions in the city which we did not know about when the date was set for showing this picture.

We hope to be able to have Mr. Gans return at some future date, when we will secure a larger hall and have it advertised more extensively in order to have a much larger attendance.

Epigrams of W. C. Bowhay

Special Agent, Freight Claim Department

The chicken age lasts so long nowadays that the wandering boy is often in better company than his ma.

Most men tell the same lie to so many different girls that when they actually love one they have to tell her the same old stuff.

How about it pal? Do you work for the Baltimore and Ohio, or are you just on its payroll?

It doesn't require the services of a chemist to discover wood alcohol in booze. All you need to do is drink it and if you go blind it's wood alcohol.

When his sweetheart acts nutty he thinks it cute, but if his sister pulls it he bawls her out.

A buzzard will eat some pretty dirty stuff, but you never caught him chewing tobacco.

According to some reformers, if the Lord intended that a man should smoke we would have been born with chimneys on our heads.

If we did not have a wedding and a funeral now and then some men would not know how the inside of a church looked.

When he calls his sweetheart "Dear" he forgets some of the meanings of the word, such as "costly," "expensive," and "high-priced."

Agents! Here Are Some Practical Suggestions Which Will Help Your Work with Shippers

THROUGH the courtesy of Freight Agent John Draper in Chicago, Superintendent Hooper of the Chicago Division sent us a copy of "Suggestions to the Shipping Public," prepared by the Local Freight Agents' Association of Chicago. These have been used successfully by the Chicago agents and will be helpful wherever put into effect. They follow:

Transportation companies throughout the country are experiencing a great deal of difficulty in handling L. C. L. freight, due to illegible and incomplete shipping orders, and disregard of rules governing marking of packages. The Local Freight Agents' Association of Chicago has given this matter considerable study and presents a few suggestions, that, if followed, will lessen, if not eliminate, the difficulties experienced.

(1) Make the shipping order first or original writing. The carbon copies are frequently illegible. Many shippers use shipping orders with practically all articles shipped printed thereon. Only a few articles printed are actually shipped to a single consignee. The parts of bills of lading are not perfectly matched, and carbon copies are therefore incorrect both as to the number and character of articles shipped. We, therefore, recommend that this form of preparing bills of lading be abolished. Rate Clerks and billing clerks do not see the freight and the shipping order should be very plain both as to commodities and number of packages shipped, and consignee and destination; otherwise errors in rating and billing are made, causing overcharges and undercharges and improper description of freight, making identification of shipments at destination difficult and frequently impossible.

(2) Use classification terms in describing shipments. This will insure correct rating and checking of freight. Every shipping department should be in possession of classification covering the territory served.

(3) Do not use trade names in describing shipments. This is an improper practice and is confusing to rate and billing clerks.

(4) Use typewriter, if possible, in preparing shipping instructions. If this is impracticable, write plainly and use good carbon paper.

(5) Be sure that the number of articles is plainly stated. Careless or illegible handwriting on shipping orders makes it possible for many errors, causing delays and dissatisfaction. A little time expended here will save much time later on.

(6) Show street address of consignee if in your possession. This will insure prompt notice being sent at destination, and correct delivery.

(7) Where there are two places of the same name in a state, the county should be shown on shipping bill and on package.

(8) When consignee is located at an inland town, always show on both bill of lading

and packages, the railroad station at which delivery is to be effected.

(9) Do not abbreviate commodities. B. Powder may be baking powder or black powder. E. Ware may be enamelware or earthenware, etc.

(10) See that your shipping orders are properly signed. Signatures on typewriter and initials of firm's representative are not sufficient.

(11) When consigned "TO ORDER," shipment must be so marked, and further marked with an identifying symbol or number, which must be shown on shipping order and bill of lading. This is a classification requirement.

(12) In marking packages it is desirable that the shipper's name be shown with the word "From" in front of it.

Trainrider Goshorn Another Brave Member of our Police Department

ON October 27, Trainrider R. H. Goshorn was assigned to ride train 87-engines 2370 and 2275, in charge of Conductor Hickey to apprehend car thieves who had been riding our merchandise trains. He was about the fourth car from engine on the train, when, near Claysville, Pa., he noticed two lights on top of cars toward rear end and started to work his way toward them. When he came to a gondola car loaded with ties, he saw a party in the car and asked "Is that you, Pugh?" When the party remarked, "It's all right, come on down," he got down into the car and flashed a light in the man's face. Then he discovered it was not Pugh, who is one of our patrolmen assigned to ride this train. The man uttered an oath and shot Goshorn in the body and again in the leg. Goshorn grappled with him, grabbed his gun and held his hand over the other man's finger, which was on the trigger, at which time two or three shots were fired. Goshorn got the gun from the man and in the scuffle threw him over the side of the car. He then started to work his way back over the train, when he was met by our officer who heard the shots. This occurred about 12.30 a. m., October 28.

As soon as Conductor Hickey learned what had occurred he had train stopped, and Goshorn was moved to the caboose, where he remained until arrival at Wheeling, at 1.09 a. m.

The revolver which Goshorn took from

the man who shot him was a 32 calibre Colt automatic, No. 390776, which, we developed, had been stolen from Claysville Station on night of September 30, when one revolver, one 22 Winchester repeating rifle, about 20 caps and hats and other articles had been stolen. On October 31 our officer recovered the 22 Winchester repeating rifle from a party residing at Vienna, Pa. From him he also learned that the gun had been secured from Luther W. Douglas, white, age 20, residence Mordick St., Cannosburg, Pa., and Thos. E. Otey, white, age 20, residence, Montgomery, W. Va., who had been boarding with a family in Vienna for two or three months and up until two days after the shooting. Douglas and Otey were both arrested and a large quantity of the stolen merchandise recovered.

After these two men were arrested they were taken to the Ohio Valley Hospital at Wheeling where Goshorn identified Douglas as the man who had shot him. Douglas admitted that he had done the shooting and that the gun with which he had done it was stolen by him from the Claysville Station. He stated that at the time he shot Goshorn he was alone.

Ten Strong Planks in a Safety Platform

By H. Allison
Cumberland, Md.

Health enough to make work a pleasure.
Wealth enough to support our needs.

Strength enough to battle with difficulties and overcome them.

Grace enough to confess our sins and forsake them.

Patience enough to toil until some good is accomplished.

Power and courage enough to win the Victory of Safety First as easily as we won the Victory of War.

Never so much in a hurry as to reach the pace that kills.

Concentration on what we are doing now.

Composure, mental and physical, to carry us without worry to each bridge that we must cross.

Complete control of our faculties, the reserve necessary for our own safety and carrying with it the best example of Safety First.

Engineer Shewbridge and Fireman Watkins Commended for Care Given Their Engine

The picture shows engine 4415, in service on the Cumberland Division and regularly assigned to Engineer J. A. Shewbridge and Fireman E. A. Watkins, who have been in the service 18 and 9 years respectively. This engine has made 25,000 miles to date and is kept so clean and is groomed so carefully by the crew that it is still in exceptionally good condition.

"Safety-Valve Steve" Says:

Tim, my fireman, can't wear his jumper when he's firing—but when the run's over he slips on a slick jumper—and gives the crowds the once over.

Yes—Tim is careful that all Overalls and Jumpers he buys are made out of Stifel's Indigo Cloth. I switched him in right—twelve years ago when I says—"Tim—always look for this boot-shaped trade mark in your Work Clothes."

All the big Overall and Work Clothes manufacturers use Stifel's Indigo Cloth because it wears best. Well—we're pulling out now. See you later.

*Garments sold by Dealers Everywhere

1 Brings this 110-Piece Gold Decorated Martha Washington Dinner Set

Send only \$1 and we ship the full set—110 pieces in all. Use it 30 days. Then if you are not so delighted that you would not part with these superb, gold decorated dishes, return them and we will refund your \$1 and pay transportation charges both ways. If you keep them, take nearly a year to pay on easy terms.

Your Initial in 2 Places on Every Piece—5-Color Floral Decorations and Gold

Wonderful artistic effect is given not only by the new and attractive shape of every dish, but by the wreath and the rich design surrounding the initial. Your initial with these superb decorations of scrolls, leaves and roses in natural colors, put on by special fired process, appears in 2 places on every piece. As handsome as enameling you see on fine jewelry.

All Handles Covered with Gold

Every handle is covered with polished gold. The ware itself is beautiful, lustrous, snowy white. No other pattern to equal the famous "Martha Washington." Elegant, refined, artistic, and yours now at a bargain price. Shipped on 30 days' free trial direct from our Chicago warehouse. Shipping weight about 90 lbs. You must not miss this opportunity. Mail the coupon today.

Important!

Hartman guarantees that every piece in this set is absolutely first quality—no seconds. This is a standard "open" pattern. Replacement pieces may be had of us for 8 years. Each piece wrapped in tissue paper. Excellent packing to prevent breakage. Shipped at once. No delay.

Order No. 324DMA13. Bargain price, \$32.85. Pay \$1 now. Balance \$3 monthly.

Relativity

The talk had turned on the subject of the arrival in England of Prof. Einstein.

"What's all this 'ere talk he's started about relativity?" said an old man.

"It's a new complaint of some kind. I'm thinkin'," answered his companion.

"Not so very new, neither," said a listener. "I've suffered from it, I reckon, ever since me mother-in-law has been me mother-in-law."—Canadian Churchman.

Ambition

An ambitious young man went to a university professor and said: "Sir, I desire a course of training which will fit me to become the superintendent of a great railway system. How much will such a course cost, and how long will it take?"

"Young man," replied the professor, "such a course would cost you \$20,000 and require twenty years of your time. But on the other hand by spending \$300 of your money and three months of your time you may be elected to Congress. Once there you will feel yourself competent to direct not one, but all the great railroad systems of our country."—New York Evening Post.

"What was the last card Oi dealt ye, Moike?"

"A spade."

"Oi knew it! Oi saw ye spit on yer hands before ye picked it up."—Exchange.

NEW YORK CITY

A Baltimore & Ohio Breakfast

Just before Christmas, 1921, "Ernie" Baugh, superintendent of Dining Cars, received the following letter from the author of "Off Again, On Again, Gone Again—Finnegan"—

Dear Ernie:

—Tother day I took a trip.
Upon a car they pay you to equip--
Excuse me if I seem a little flip!

I had an appetite that made me fear
My roll might vaporate--train meals are dear.
A hearty feed might set me back a year.

Then came your all-surprising demi-tasse,
A feature they must go some to surpass--
Believe ME, Ernie boy, that stunt is class.

That little kindly gift obtains the goat
Of every a la Carte or table d' hote
Consumer that comes in-- a friendly note!

Upon your card I read of powdered pig
Sausage, you call it? I don't care a fig.
"Of course," I said, "the service won't be big."

Likewise of buckwheat cakes I saw a sign,
And muttered to myself: "That lists fine--
Some sausage and some buckwheat cakes for mine."

Ernie, mere language fails me, at this point.
With oil of joy your bean would I anoint--
Gosh, but I'm glad I hit your fodder joint!

The sausage--I discerned and was surprised--
Was made from pork, not bovines pulverized;
Also the service was not undersized.

But when I tried those cakes--say, boy, come here!
A French salute in front of either ear
Would not for their intrinsic worth be dear.

The kind that, in our dreams, our Mother makes;
The kind that you'd do murder for their sakes--
I could write HYMNS about those buckwheat cakes.

(signed)

Strickland Gillilan

Merry Christmas.

What May the Public Expect as to Railroad Rates?

A Statement by President Willard before the Interstate Commerce Commission

In a statement made on January 11 and 12 before the Interstate Commerce Commission, Daniel Willard, president of the Baltimore & Ohio R. R. Co., summarized the position of the carriers with respect to existing and future rates, and said in part:

WHAT may the public expect? Must it continue to pay existing rates and fares? Is no relief to be expected? To assume that such is the case would be an error. In the past the American railroads have afforded the cheapest transportation service in the world. They will do so again. They are in fact doing so at this very minute, when considered as a whole and when measured in terms of relative and not absolute value. The rate per ton mile declined steadily for 27 years, reaching the lowest point in 1917, or nearly two years after the general upward trend in prices had started as a result of the world war. The railroads, however, felt the burden of the increased cost of living in common with all others, even though their charges were not increased as rapidly or as greatly as were commodity prices generally.

Rates Not Relatively High

High as railroad charges are, they are not higher relatively than other prices are or were, and it is important to remember that railroad charges or prices were the very last to go up, and in the nature of things cannot be the first to come down. They can and will participate in the downward movement of all other prices.

I suppose the real question now is this—are railroad rates declining as rapidly as the public has fairly a right to expect? Are the railroad managers doing all that can be fairly expected of them to reduce the cost of transportation?

To the first half of my question—"Are railroad rates declining as rapidly as the public has a right to expect?"—my answer is Yes. In my opinion to accelerate the downward movement artificially at this time would injure the roads and would not benefit the public. Railroad rates are now and always have been subject to certain fundamental economic laws against which they cannot prevail and the mere operation of such laws and influences will tend constantly to bring about lower rates just as has been the case not only during the last year but during all the years of railroad operation.

Are Managements Doing All the Public Could Expect?

Whether railroad managers are doing all that the public as well as their stockholders have a right to expect, is of course open to discussion, and honest, fair-minded men may conceivably hold different views concerning this very important question. Personally I believe that the railroad managers as a whole are doing all that a fair-minded public has a right to expect, and this is not to say that they can not and will not do still more.

We frequently hear the railroads criticised because of their alleged wasteful practices. While I have no desire to minimize the importance of the particular things to which my attention is sometimes called, I do say that the reduction of rates which the public expects and which I believe it will in due time receive, will not be accomplished by the mere cutting down of the number of lead pencils used, by a reduction in the number of supervisors, by a more careful handling of ice about stations, etc., etc.

The real big economies which must be availed of to bring about lower rates, are of such character as to require large expenditures of new capital and of course such economies

cannot be looked for under existing conditions by the railroads as a whole.

What Should Be the Rate of Return?

In question 13, the Commission asks "What should be the rate of return after March 1st, 1922?"

The Congress after a most searching inquiry decided that 5½ per cent. should be the minimum return as conditions were at the time of passage of the Transportation Act, with an additional one-half per cent. in the discretion of the Commission. Many believed that the rate fixed by the Congress was too low. I thought so then and I think so now.

While there has been some slight change in the financial situation since the Transportation Act was passed, nothing has happened which in my opinion would justify reducing the rate of return, providing of course, it is still desired that the carriers shall endeavor to keep facilities sufficient to furnish the public with adequate transportation at reasonable rates. It is my judgment, therefore, that not less than six per cent. would, under conditions now existing, constitute a fair return, to be effective from and after March 1, 1922.

Mr. Willard's Conclusions

1. During Federal control brought about by the war, railroad operating costs, in common with all other costs, mounted rapidly but without corresponding advances in rates, and during the same period the fixed charges of the carriers were also increased by additions and betterments made at high costs, and largely (particularly in the Eastern District) to meet war emergencies. Because of war and other conditions the properties were not fully maintained, and were returned to their owners in less effective condition than when taken over.

2. Congress responsive to the expressed desire of the people, provided for the termination of Federal control and for the future operation of the railroads under the terms of the Transportation Act.

3. This Commission, responsive to the terms of the Act, proceeded immediately to authorize and order such increases in rates, fares and charges as it believed would carry out the purpose of the Act.

4. Even before the inauguration of the higher rates and charges, the industrial and economic readjustments which were world-wide and which were a natural and inevitable sequence of the war, had begun, and some months later were reflected in this country in a sharp and sustained decline in business.

5. The carriers, subject as they are to regulation by the Governmental agencies of the States and Nation, were not able to promptly reduce their expenditures in keeping with their declining revenues, and

6. This in turn served to shrink the net earnings of the carriers so seri-

ously that they were compelled, in order to maintain their financial integrity, to resort to forced economies in all directions, which in turn meant fewer men employed and less material used and purchased.

7. This enforced policy on the part of the railroads contributed in measurable degree towards accentuating the business depression.

8. The carriers, unable to provide from earnings in the past, reserves such as contemplated in the Transportation Act, are not now in position to make a general rate reduction in anticipation of possible lower operating costs to follow.

9. For the reasons enumerated, I do not think the best interest of the public would be promoted at this time by action of any kind which would tend to immediately reduce the revenue of the carriers.

10. Rates will eventually come down, but to unduly hasten the movement would in my opinion be unwise and would not tend to promote the larger public interest.

our engine supply houses in which we keep utensils—torches, shovels, fire hooks, wrenches, etc., for our engines and cars.

Several months ago General Manager Scheer and several of his staff officers were visiting points on the Railroad. They came to a certain place (no, we aren't mentioning names) and the front yard looked fine and so did the guest parlors. But, when they came to the kitchen—the engine supply house—conditions were such that a hurried and important council was immediately called, the result of which was an order directing the authorities at that place to put a sign up over the door reading: "This is the Dirtiest Supply House on the Eastern Lines." And, lo! the names of the master mechanic and assistant master mechanic were printed underneath the words and lent due authority to them.

Hardly a day went by before Baltimore began to be bombarded with letters and telegrams, saying that the conditions had been greatly improved and urging that permission be given to take down the sign. And permission was, of course, given to this end, as soon as conditions warranted.

While on the same trip, the general manager was pleasantly surprised to find at Connellsville a supply house which merits the sign now nailed over its door and which can be seen in the accompanying photograph. So model a Railroad kitchen is this place that a little pamphlet of blue print sheets and photographs has been gotten out about it. A few paragraphs quoted from the book, read as follows:

Is Your Divisional Kitchen as Clean as Your Guest Parlor?

IF the employes of the Baltimore and Ohio do not by this time know that one of the things uppermost in the minds of our officers, is a clean Railroad, it is not because the battle cry against dirt has not been sounded out along the line from Baltimore, nor echoed in the pages of our MAGAZINE.

Last year we had a great clean-up campaign all over the Railroad. The net result was not only a Railroad cleaner than it has ever been within the memory of the oldest Veteran, but also the picking up of material on the property, its sorting, reclamation or sale, and a consequent sum running into six figures and placed on the credit side of our ledger.

Continuing the simile used in the caption of this article, we may say that the front yard of the Railroad, its right-of-way and approaches, was then clean; and since this was to be a continuing campaign for cleanliness, that it is still clean. From the number and tenor of the letters which we get concerning the condition of our day coaches and our equipment in general, we also know that our guest rooms, that is the cars on which we try to make comfortable the patrons of the Railroad, are also clean.

But who of us ever thinks of a

house being in complete order unless we have a vision of the kitchen, with stove polished, floor scrubbed, pans scoured, windows cleaned, etc! Well, some of us *did* forget about our kitchens, if not those in our homes, at least about the ones on the Railroad, and in this particular case we are referring to the Railroad kitchens—

Cost for Signal Flags, Baltimore and Ohio System, 1920

Color	No. Dozen Issued	Average Cost per Dozen	Average Cost per Flag	Total Cos
Green.. .. .	2790	\$.997	8.3 cts.	\$ 2781.63
White	4516	1.01	8.5 cts.	4561.16
Red.. .. .	2693	1.575	13.1 cts.	4241.48

Total..... \$11584.27

During a period of four months, Supply Room Attendant Joseph H. Fleckenstein, Connellsville, Pa., washed and reclaimed 668 red, 1019 white and 944 green flags, a total of 2631, including 200 red flags which it was necessary to dye. This meant a saving of \$251.47 to the Baltimore and Ohio, the flags having been reissued to train and enginemen and having served the same purpose as new flags.

Locomotive supplies and their care is an item of expense that is not always given the thought and attention that its importance justifies. In designing and installing the Connellsville Plant, the aim was to set aside a space where locomotive supplies could be collected, repaired and made ready for service. The washing vats, tables and oil reservoirs were arranged in a manner to avert unnecessary steps. The tables, etc., were covered with galvanized iron to prevent oil soaking into wood, etc.

A study was made as to the requirements of a good lantern, and as a result vats were in-

stalled. One contains a strong lye solution, one hot, soapy water and the other rinse water. Lanterns are dissembled and the frames are passed through a strong solution of lye and rinsed off, then examined closely for defects. The globes are washed in hot, soapy water, rinsed in clear water and placed on the drying rack. Burners are boiled out and the necessary adjustment made in the wicks. The oil is removed from the lantern, and after cleaning the oil container it is again filled with oil, the parts assembled and the lantern placed on a special table ready for service.

Where heat is necessary, it is obtained by the use of steam, all piping being conveniently arranged for the attendant. Overflows, etc., are piped to the sewers.

At one end of the room a bench was provided and on it was placed a soldering pot and a vise. All cans are repaired at this bench, coal picks and hammers re-handled, etc. Smoke and gas from this soldering pot, and the steam vapor from the boiling vat and the wash machine are carried out of the building by a hood and a stack arrangement.

Certain unlooked for things develop at leaving time, and to meet this, the grease cup men,

Pictures 1 and 2 show respectively the left and right sides of the Engine Supply House at Connellsville. No. 3 suggests, in the cleanliness of the front yard of the house, why Connellsville and Supply Room Attendant Joseph H. Fleckenstein (seen at the front door and also in the insert, No. 4) have been honored with the sign over the door.

lubricator filler, hub grease men, and glass boy work from this point and have all the necessary conveniences located here. It is conveniently located and the crews can get their wants supplied quickly and avoid delay.

The flag washing outfit consists of a small washing machine and necessary vats for dye. Three thousand flags and one hundred and fifty towels have been reclaimed to date.

The photographs are plain and further explanation would seem unnecessary.

Of course, every clean kitchen has to have a clean house wife in charge, and we are sure that Joseph H. Fleckenstein won't mind being dubbed with that name as long as it stands for so much on this great System of ours.

Mr. Fleckenstein entered the service at Connellsville as a boilermaker helper in 1882 and became boilermaker in 1886. He was out of the service from 1896 until 1901 when he again came into the Baltimore and Ohio family as a car inspector. He has filled creditably several different positions on the Connellsville Division in the Motive Power Department and in 1919 was made supply room attendant. It is in this position particularly that he has made a splendid record.

Those who would like to see plans of Mr. Fleckenstein's model locomotive supply house, may get a copy by writing C. A. Gill, superintendent, Motive Power, Eastern Lines, Baltimore, Md. Layout and descriptive matter are contained in the little book.

One of the most interesting things about Mr. Fleckenstein's job is the success which he has had in reclaiming signal flags. In the big scheme of things, this is, to be sure, a small item, but the Management of the Baltimore and Ohio is trying so hard to economize in every reasonable way that even the saving which comes about from the reclaiming and re-dyeing of signal flags is deemed worthy of special note, and a blue print description of the method of doing this is also clearly set forth in the little book.

TASTE TELLS!

I now use the Baltimore and Ohio to and from the west instead of another road because of the Baltimore and Ohio's superior dining service.

Preventing Damage to Equipment in Yards

Painesville Terminal Proves that "It Can Be Done"

By D. F. Stevens,

Superintendent, New Castle Division

IN THE early part of July, 1921, we put on a campaign on this division to reduce the damage to equipment in yards and I particularly solicited our terminal people to use their ingenuity to this end. My attention was directed in November to a report which had been made at Painesville Terminal, which was distinctly unusual, and I felt it was such a good one that it was well worth bringing to the attention of the readers of the MAGAZINE.

The last damage to a car in Painesville yard occurred on July 13, 1921, and from that date to the present time there has not been a car damaged in that yard. Previous to this there had been quite a number of draw bars knocked down, pockets opened up and contents of ore dumped on the dock below the hump scale.

Credit for this showing rests entirely with General Yardmaster Huston and his assistants and employees. Briefly, his procedure is as follows:

An engine takes cars from end of ore dumping plant, pulls up, and shoves over the hump scales, where

cars are dropped to classified tracks east of the scales. In some instances five cars would go in a cut, and in the next cut would be one car. General Yardmaster Huston changed this method and dropped the cars off one at a time. This did not occasion delay, as the engine was able to keep the cars away from the machines. Nor did it increase the number of hump riders, but simply cut down the time that they were sitting down waiting for their cuts at the hump.

During the busy ore season the cars handled range from 1,700 to 2,600 a day, and during the winter months from 800 to 1,000, so it can be seen that there is a considerable volume of business, and what it means in the way of saving in damage to equipment and consequent delay and complaints.

In addition to this, each morning Mr. Huston, in connection with his other duties, talks with each crew as he comes to them, and gives them the last date that there was a car damaged. This has resulted in all the men in the terminal becoming enthusiastic over the campaign.

Car Weight Checked by John Staszewski, He Increases Revenue \$233.22

By S. U. Hooper,

Superintendent, Chicago Division

THERE have been several references in the MAGAZINE of late to the opportunity open to employes to save revenue for the Company by using extreme care in the weighing and reweighing of cars. Now comes the following case, a telling illustration of how much it means when an employe exercises his judgment and initiative on an occasion when he believes that the weight given for a carload of freight is not correct.

A car of machinery originated off our line, our connection being Hamler, Ohio, and was consigned to a large industrial concern in Chicago. It had indorsement on billing to weigh at Delray but the billing also contained stamp indicating that it was under shipper's weight agreement.

The car reached Chicago Yard on November 24, showing a billed weight of 24,000 pounds, but as it had been weighed at Delray and also carried

the agreement to weigh stamp, one of our employes, Chief Clerk John Staszewski, doubted the correctness of the weight. So he personally inspected the car and had it reweighed with the following results: Gross, 129600; Tare, 30400; Net, 99200. This increased the freight from \$74.40, as billed, to \$307.62, an increase of \$233.22.

Mr. Staszewski has been commended for his alertness and the connecting line had handled with the employe who made the error. A commendatory entry has also been placed on Mr. Staszewski's service record.

The Journey of President-Elect Lincoln from Springfield to Washington for His First Inauguration in 1861

Note: We are indebted to Passenger Representative S. B. Hege, Washington, D. C., for gathering up from various sources much of the information contained in the following story; to the late John E. Spurrier for the story of Mr. Lincoln's passage through Baltimore, and to Miss M. Hazzard, Washington, D. C., for extracts from the letters of her father, Captain George Whitfield Hazzard, personal military aide to Mr. Lincoln.

It should be recalled that at the time of Lincoln's first inauguration the country was in a turmoil and political passions were at fever heat. The battle between the abolitionists and the secessionists was about to break, and Lincoln, as the great champion of National Unity, was vilified and hated not alone in the South but also among the "copperheads" of the North.—Ed.

AS the time for the inauguration approached, Mr. Lincoln received invitations from the governors of various states to visit their capitals on his way to Washington. Lincoln was not fond of display, but his long experience had taught him the value of friendship, personal confidence and live sympathy. Therefore, the reply to these invitations was that he would visit a number of small cities, naming in particular Indianapolis, Steubenville, Columbus, Cincinnati, Cleveland, Pittsburgh, Buffalo, Albany, New York, Trenton, Philadelphia and Harrisburg.

The day set for the departure was Monday, February 11. A programme of special trains had been arranged, extending to Saturday, February 23, the day set for Mr. Lincoln's arrival in Washington.

Early on Monday morning the Lincoln family, including Mr. Lincoln, Mrs. Lincoln, and their three boys, Robert T., William and Thomas (called "Tad"), together with Mr. Lincoln's suite, made ready to depart. This party consisted of Dr. W. S. Wallace, John G. Nicolay, John Hay, Hon. N. B. Judd, Hon. David Davis, Col. E. V. Sumner, Major David Hunter, Captain George W. Hazzard, Captain John Pope, Col. Ward H. Lamon, Col. E. E. Elsworth, J. M. Burgess, George C. Latham, W. S. Wood, B. Forbes and other personal friends and dignitaries.

About a thousand of his friends and neighbors were gathered around the dingy little station at Springfield. It was a stormy morning, and the leave-taking was very solemn. Mr. Lincoln stood while the people filed past him to shake hands and to wish him good luck. The bells and whistles of the train interrupted the leave-taking and

Lincoln stepped aboard the train that was to take him to the Nation's Capitol. The conductor paused a moment with his hand on the bell rope. Mr. Lincoln appeared on the platform of the car and raised his hand to attract attention. Bystanders bared their heads to the falling snow-flakes and there Lincoln delivered his farewell address:

"My friends: No one, not in my situation, can appreciate my feeling of sadness at this parting. To this peace and kindness of these people, I owe everything. Here I have lived a quarter of a century and have passed from a young to an old man. Here my children have been born, and one is buried. I now leave, not knowing when or whether ever I may return, with a task before me greater than that which rested upon Washington. Without the assistance of the Divine Being who ever attended him, I cannot succeed. With that assistance, I cannot fail. Trusting in Him, who can go with me, and remain with you, and be everywhere for good, let us confidently hope that all will yet be well. To his care commending you, as I hope in your prayers you will commend me, I bid you an affectionate farewell."

Reminiscences of the Journey

The train was off, and from this time forward there were days of receptions, speeches, handshaking, cheers, salutes, bonfires, etc.

Of the journey itself we have several records, but there is, perhaps, no more interesting record than that contained in the letters of Captain Hazzard to his wife, written at intervals on the journey from Springfield

to Philadelphia. Captain George Whitfield Hazzard was of the Fourth Artillery, U. S. A., of the class of 1847, West Point. He had served in the Mexican War and was an adjutant at Fort McHenry. He was selected to be the military aide to Mr. Lincoln on his inaugural trip. His pass over the railroads for this purpose is still retained by his daughter, who resides in Washington. The inscription on it reads as follows:

SPECIAL TRAIN

Capt. Geo. W. Hazzard, U. S. A.

Sir: You are respectfully invited to participate in the courtesies extended to Hon. Abraham Lincoln, president-elect, by the several railroad companies, from Springfield to Washington on the 11th of February, 1861.

(Signed) W. J. WOOD.

On the reverse side was the following:

Pass Captain Hazzard, U. S. A., on excursion train.

(Signed) T. A. MORRIS.

Pass Captain Hazzard, Columbus to Pittsburgh.

(Signed) T. L. JEWETT,

by L. DEVENNY.

Mrs. Hazzard was in Washington. The first letter she received was when her husband was in Columbus, viz.:

"Col. Skinner, Major Hunter and myself will travel with him (Mr. Lincoln) from here to Washington. This is confidential."

Concerning Mr. Lincoln's personal appearance, he writes: "Mr. Lincoln is by no means ugly; he is one of the most excessively pleasant men I ever saw."

Later he says: "Don't get disheartened about secessioners; Mr. Lincoln is just the man for the emergency * * * * * I believe

that we shall get to Washington without any trouble, but all preparation to avoid difficulty will be made."

From Buffalo, on February 17, came this letter:

"Horace Greeley came with us yesterday from Conneaut to Erie. He talks very much like a Quaker * * * * * We came into Cleveland through Euclid Street, and the scene was gorgeous * * * * * Do you recollect the finest house on that street, in fact, the finest in Ohio? A brownstone Gothic with observatory and spires on the roof? It is on the side of the street near the lake, and is the residence of Mr. Stone, president of the Lake Shore Railroad. Colonel Sumner, Judge Davis, Mr. Lamon and myself dined there on Friday evening * * * * * There was a terrible jam at the depot yesterday. Mr. Hunter came very

near having his arm broken.

"As to your joining us in New York, I fear that it would be impractical, as Mr. and Mrs. Lincoln are worried almost out of their lives by visitors of both sexes. Every village sends a reception committee of 20 or 30, and some of them bring their wives, so that not only are all of the seats in the car taken, but the pass-way is filled with people standing. Neither the president nor his wife has one moment's respite, and they are evidently tired of it. However, I will feel Mrs. Lincoln's pulse a little, and if favorable, will telegraph you from New York."

"New York, Wednesday,
20th February.

"I suppose you have seen all about our movements. It is probable we shall be in Baltimore on Saturday, 22nd."

determine, but one for his friends to determine for him, that he finally agreed to submit to whatever was decided by those around him.

"It was most fortunate that General Scott was one of the guests at that dinner. He was wise and keen in perception and bold and swift in execution. The time was short, and if a change was to be made in Lincoln's route it was necessary for him to reach Philadelphia by eleven o'clock that night or very soon thereafter. Scott at once became master of ceremonies, and everything that was done was in obedience to his directions. There was a crowd of thousands around the hotel, anxious to see the new President and ready to cheer him to the uttermost. It was believed to be best that only one man should accompany Lincoln in his journey to Philadelphia and Washington, and Lincoln decided that Lamon should be his companion. That preliminary question settled, Scott directed that Curtin, Lincoln, and Lamon should at once proceed to the front steps of the hotel, where there was a vast throng waiting to receive them, and that Curtin should call distinctly, so that the crowd could hear, for a carriage, and direct the coachman to drive the party to the Executive Mansion. That was the natural thing for Curtin to

Harrisburg, and the Plans for the Secret Movement to Washington

From "Lincoln and Men of War Times," by Col. A. K. McClure

THE two speeches made by Lincoln on the 22d of February do not exhibit a single trace of mental disturbance from the appalling news he had received. He hoisted the stars and stripes to the pinnacle of Independence Hall early in the morning and delivered a brief address that was eminently characteristic of the man. He arrived at Harrisburg about noon, was received in the House of Representatives by the Governor and both branches of the Legislature, and there spoke with the same calm deliberation and incisiveness which marked all his speeches during the journey from Springfield to Washington.

"It was while at dinner that it was finally determined that Lincoln should return to Philadelphia and go thence to Washington that night, as had been arranged in Philadelphia the night previous in the event of a decision to change the programme previously announced. No one who heard the discussion of the question could efface it from his memory. The admonitions received from General Scott and Senator Seward were made known to Governor Curtin at the table, and the question of a change of route was discussed for some time by every one with the single exception of Lincoln. He was the one silent man of the party, and when he was finally compelled to speak he unhesitatingly expressed his disapproval of the movement. With impressive earnestness he thus answered the appeal of his friends:

"What would the nation think of its President stealing into the Capital like a thief in the night?" It was only when the other guests were unanimous in the expression that it was not a question for Lincoln to

The Cover Picture of This Issue

The picture on the cover of this issue is a reproduction of an oil painting by Herbert D. Stitt, staff artist of our MAGAZINE. It portrays the arrival of Abraham Lincoln in the old Baltimore and Ohio station in Washington on the morning of February 23, 1861, just preceding his first inauguration.

The outline of the old Baltimore and Ohio station in Washington is faithful to the subject, as will be attested by many of our employes who saw it before it was torn down. Engine 236, which was used to bring Mr. Lincoln from Baltimore to Washington, is also faithfully portrayed.

The artist's conception of the great Civil War president is an unusually fine one, the dignity and strength of his character being well represented. His physical aspect shows his great height and awkwardness—yet his underlying bodily strength and poise, and the critical work before him is reflected in the stern and careworn appearance of his face.

Of the other figures in the picture, that immediately behind Lincoln is Ward H. Lamon, whom Lincoln chose from among his intimate friends in Springfield, Illinois, to accompany him on the trip to Washington, through cities whose loyalty to the Federal cause and hence to the president-elect, was not beyond question. Lamon was noted as a "minute" man, powerful of physique and expert in the handling of weapons, a likely bodyguard for his friend and president. Allan Pinkerton, the first of the well known Pinkerton family of detective fame, is in the extreme background. Elihu B. Washburn, who met Lincoln in the station, is at his left. Washburn was later secretary of state in the cabinet of President Ulysses S. Grant, and was also ambassador to France in 1869.

These three figures would be easily recognizable by people who knew the men, for they are painted from photographs taken at the time.

The other figures in the picture, the old darky on the left with the carpet bag, presumably Washburn's servant and coachman, and the engineer and fireman of the train, are conceptions of the artist, but none the less realistic.

do—to take the President to the Governor's mansion as his guest, and it excited no suspicion whatever.

"Before leaving the dining-room Governor Curtin halted Lincoln and Lamon at the door and inquired of Lamon whether he was well armed. Lamon had been chosen by Lincoln as his companion because of his exceptional physical power and prowess, but Curtin wanted assurance that he was properly equipped for defence. Lamon at once uncovered a small arsenal of deadly weapons, showing that he was literally armed to the teeth. In addition to a pair of heavy revolvers, he had a slingshot and brass knuckles, and a huge knife nestled under his vest. The three entered the carriage, and, as instructed by Scott, drove toward the Executive Mansion, but when near there the driver was ordered to take a circuitous route and to reach the railroad depot within half an hour. When Curtin and his party had gotten fairly away from the hotel, I accompanied Scott to the railway depot, where he at once cleared one of his lines from Harrisburg to Philadelphia, so that there could be no obstruction upon it, as had been agreed upon at Philadelphia the evening before in case the change should be made. In the meantime Scott had ordered a locomotive and a single car to be brought to the eastern entrance of the depot, and at the appointed time the carriage arrived. Lincoln and Lamon emerged from the carriage and entered the car unnoticed by any except those interested in the matter, and after a quiet but fervent "Good-by and God protect you!" the engineer quietly moved his train away on its momentous mission.

"As soon as the train left I accompanied Scott in the work of severing all the telegraph lines which entered Harrisburg. He was not content with directing that it should be done, but he personally saw that every wire was cut. This was about seven o'clock in the evening. It had been arranged that the eleven o'clock train from Philadelphia to Washington should be held until Lincoln arrived, on the pretext of delivering an important package to the conductor. The train on which he was to leave Philadelphia was due in Washington at six in the morning, and Scott kept faithful vigil during the entire night, not only to see that there should be no restoration of the wires, but waiting with anxious solicitude for the time when he might hope to hear the good news that Lincoln had arrived in safety. To guard against every possible chance of imposition, a special cipher was agreed upon that

could not possibly be understood by any but the parties to it. It was a long, weary night of fretful anxiety to the dozen or more in Harrisburg who had knowledge of the sudden departure of Lincoln. No one attempted to sleep. All felt that the fate of the nation hung on the safe progress of Lincoln to Washington without detection on his journey. Scott, who was of heroic mould, several times tried to temper the severe strain of his anxiety by looking up railway matters, but he would soon abandon the listless effort, and thrice we strolled from the depot to the Jones House and back again, in aimless struggle to hasten the slowly-

Mr. Lincoln Passes through but Does Not Stop in Baltimore

RAILROAD officials, particularly Mr. Felton, president of the Philadelphia, Wilmington and Baltimore Railroad, over which Mr. Lincoln was traveling, wished him to make a safe journey. All precautions had been taken. Rumors came that bridges on the railroad would be burned. For this reason, Mr. Felton gathered together some of the best detectives in the country and set them to whitewashing the bridges between the Susquehanna and Baltimore. This was an action which startled the people, who did not know that this whitewash consisted of salt and alum, which would tend to make the bridges fireproof.

Strange to say, there had been no invitation from Maryland's governor nor from her legislature to the new president to visit Maryland's capital; neither was there any invitation from the mayor of the city of Baltimore. Mr. Lincoln's party had met with several minor accidents in friendly towns, and he did not know what to expect in a city where there were no indications that the city authorities would endeavor properly to protect the party. The only invitations that were extended Mr. Lincoln from the city of Baltimore were from the proprietor of the Eutaw House, and from Mr. Gittings, president of the Northern Central Railroad.

The following account of the journey of Mr. Lincoln through the city of Baltimore was sent to the MAGAZINE by the late John Ed. Spurrier, shortly before Mr. Spurrier's death.

"President A. Lincoln passed through Baltimore on the night of February 22, 1861. My understanding of President Lincoln's trip from the West to take his seat at Washington is from conversations which I overheard between Alex. Diffey,

passing hours, only to find equally anxious watchers there and a wife whose sobbing heart could not be consoled. At last the eastern horizon was purpled with the promise of day. Scott reunited the broken lines for the lightning messenger, and he was soon gladdened by an unsigned dispatch from Washington, saying, "Plums delivered nuts safely." He whirled his hat high in the little telegraph office as he shouted, "Lincoln's in Washington." and we rushed to the Jones House and hurried a messenger to the Executive Mansion to spread the glad tidings that Lincoln had safely made his midnight journey to the Capital."

general superintendent of trains, and my grandfather, Thomas Spurrier.

"Mr. Lincoln was to arrive at Calvert or Bolton Station (N. C. R'y), Baltimore, via Harrisburg, Pa., but because of threats, the route was changed so that he would arrive via the Philadelphia, Wilmington, and Baltimore Railroad (President Street Depot). Here the Baltimore and Ohio Railroad teams would haul each car of the train via Pratt Street to Howard, and Howard Street into the Camden Station Yard.

"The entrance to the passenger yard from Howard Street crossed Camden Street, curved around the east end of the station building, the track running alongside the platform under the shed, where the passengers boarded and left the cars.

"The threatening crowd crowded the station platform from which the train was scheduled, on Mr. Lincoln's arrival, to depart.

"But "Daddy" Smith, or "Tim" Murphy, in charge of the team hauling Mr. Lincoln's car, was instructed, on Pratt Street, to lead his team quietly through the back track, instead of to the platform. Engine 236 was on the back track, in readiness to take Mr. Lincoln's car to Washington. This worked fine, and while the threatening crowd awaited the arrival of Mr. Lincoln's car on the regular track, Mr. Lincoln was out of sight and on his way toward Washington. Another engine took the regular train. "Daddy" Smith, "Tim" Murphy and the others connected with this trip have passed away. My uncle, Alex. Diffey, and W. P. Smith had arranged the switch-off, as they arranged many others during the Civil War. Engine 236 was one of the finest engines of the day."

Mr. Lincoln's Arrival at Washington

From "Reminiscences of Abraham Lincoln," by Elihu B. Washburne

I WAS on hand in season but, to my great disappointment, Governor Seward did not appear. I planted myself behind one of the great pillars in the old Washington and Baltimore depot, where I could see and not be observed. Presently the train came rambling in on time. It was a moment of great anxiety to me * * * * * When the train came to a stop I watched with fear and trembling to see the passengers descend. I saw every car emptied and there was no Mr. Lincoln. I was well nigh in despair and about to leave when I saw slowly emerge from the last sleeping car three persons. I could not mistake the long, lank form of Mr. Lincoln, and my heart bounded with joy and gratitude. Any one who knew him at that time could not fail to recognize him at once. The only persons that accompanied Mr. Lincoln at that time were Pinkerton, the well-known detective, and Ward H. Lamont. When they were fairly on the platform a short distance from the car, I stepped forward and accosted the president.

"How are you, Lincoln?"

At this unexpected and somewhat familiar salutation the gentlemen were apparently somewhat startled, but Mr. Lincoln, who recognized me, relieved them at once by remarking in his peculiar voice:

"This is only Washburne."

Then we all exchanged congratulations and walked out to the front of the depot, where I had a carriage in waiting. Entering the carriage, we drove rapidly to Willard's Hotel, entering on 14th Street before it was fairly daylight.

We had not been in the hotel more than two minutes before Governor Seward hurriedly entered, much out of breath, and somewhat chagrined to think that he had not been up in season to be at the depot on the arrival of the train.

Mrs. Lincoln Passes through Baltimore

Col. McClure says further that Mrs. Lincoln and her suite passed through Baltimore on the 23d without any sign of turbulence. The fact that there was not even a curious crowd brought together when she passed through the city—which then required considerable time, as the cars were taken across Baltimore by horses—confirmed Lincoln in his

belief. It is needless now to discuss the question of real or imaginary danger in Lincoln passing through Baltimore at noonday according to the original programme. It is enough to know that there were reasonable grounds for apprehension that an attempt might be made upon his life, even if there was not the organized band of assassins that the detectives believed to exist.

Herth Now Ohio Division Engineer

ON January 1, C. E. Herth was appointed division engineer of the Ohio Division, with headquarters at Chillicothe, vice J. L. Maher, transferred.

A "Thank You" New Year Card Suggests Why Agent Mulvey Gets and Holds Business

THE success of the Railroad in getting and holding business in any community, and particularly in the small city and town, may be gauged by the all-around ability of the agent representing the Railroad there. Where the agent takes a personal interest in seeing that the customers of the Railroad get good service, he attracts to the Railroad much more business than it would get through a less interested type of man.

As an illustration of how an agent can help establish a pleasant feeling of friendship between the Railroad and its patrons, we quote a message sent out on an attractive little New Year card by Agent T. O. Mulvey at West Newton, Pennsylvania, to the patrons of the Baltimore and Ohio in that community, as follows:

The Baltimore and Ohio Railroad, its agent and operating officials, express their thanks and appreciation for the very liberal patronage received from your firm during the year 1921, and wish you a prosperous year during 1922. We assure you it will be our pleasure to serve you in every way possible.

THE BALTIMORE AND OHIO
R. R. CO.,
T. O. MULVEY, Agent.

This card was not sent to the MAGAZINE by Agent Mulvey, but by

A New Operating Man

By GEORGE K. SEIBERT,
Dispatcher, Camden Station

THERE have been many railway accidents in France since the Armistice; so many in fact, that almost every edition told of a catastrophe.

In the Jardin du Luxembourg at Paris I saw a dozen or more youngsters playing train, so I made some inquiries as to the personnel of the game.

"What are you?" I asked the first kid.

"I'm the Chef de Gare," (the station master), he proudly replied.

There were engineers, brakemen, firemen, etc. Finally I came to the last kid.

"And what do you do?"

"I telescope the trains."

"Telescope the trains?"

"Oh yes, the trains are always telescoped."

one of the officers of the Pittsburgh Division who recognizes in Agent Mulvey a valuable representative of the Company, and who has this, in substance, to say about him:

"Agent Mulvey has been in the employ of the Company on this division for a good many years. We now enjoy the larger part of the patronage of the 84 firms and business houses in West Newton, and I feel that this is entirely due to the efforts of 'Tom' Mulvey. Although business all over the System was very bad in November, 1921, 'Tom' was able to show an increase for his station over the same month of 1920.

"The New Year greeting which he sent our patrons is the most recent indication of the spirit of appreciation and service which he constantly shows them in his territory. He is up against competition but seems to thrive on it and is making a fine record for himself and the Baltimore and Ohio.

"I only wish that all the agents on the Railroad were of his same appreciative type, interested in seeing that patrons get good service and that they are sure of our appreciation of their patronage. We have others like 'Tom' Mulvey, but he is in my mind an outstanding example of the capable, painstaking, interested and loyal employee."

"Billy" Sunday Says that Capital, Labor and the Public Are Like a Three Legged Stool

The great evangelist sends a message on Americanism to the employes of the Baltimore and Ohio

By Rev. William A. Sunday

FOR eight years I played baseball with the Chicago, Pittsburgh and Philadelphia National League clubs. There are two things that cause a manager to lose sleep and will wreck the chance of any club to win the pennant. 1st. Factions and divisions in a team. 2nd. Men playing for individual records.

Allow these same principles to work in any industry and they will wreck it. Factions between Capital and Labor will stop the wheels of any railroad or put out the lights in any factory. There must be no conflict between Labor and Capital. Their interests are inseparable; if you destroy one you destroy both; neither can exist without the other. There will be differences of opinion and these can be harmonized by arbitration but not by catch-as-catch-can methods.

You pull the gloves off the hands of most railroad presidents, general managers and superintendents and you will find them calloused by toil, for they started at the bottom.

Next to the religious life of a nation nothing is so vital to its prosperity and to the welfare and happiness of the people as its transportation system. Railroads bear the same relation to the life of a nation that the circulation of the blood does to the human body. When the railroads stop we are headed for the scrap pile. When your heart stops you are on the side track, switch locked, lights out.

Capital, Labor and the Public are like a three-legged stool. Neither is first, second, or third. Neither can stand without the other. What injures one injures all.

At the bottom lies the fact you can't divide more than you have. You can't take a bushel and a half from a bushel.

When Capital says: *I want a bushel and a half—you can't have it—haven't got it.*

When Labor says: *I want a bushel and a half—you can't have it—haven't got it.*

When Capital says: *I want a bushel—can't have it—that's all there is.*

When Labor says: *I want a bushel—can't have it—that's all there is.*

The railroad will stop if the cap-

italist gets nothing for his investment.

The railroad will stop if the laborer gets nothing for his work.

Capital can't hog it all. Labor can't hog it all. The Public can't hog it all. Each must consider the interests of the others.

Neither business nor the nation can be run by any one class.

The people as a whole would resent a government by the capitalistic class. They would resent a government by the labor unions. Above all they would resent a government by the radical, socialistic, I. W. W. bunch of either capital or labor.

The conservative men in the ranks of labor find it hard to restrain the radical leaders who seem to be out to grab all they can regardless of the rights of Business or the Public. It's the "whooper up boys," the "hell with the law or the public" type of leaders, who seem to get a following. Such birds are to Labor what blowflies are to meat—they turn it into maggots. We have reached the point where if civilization endures the nations of the Earth must pledge to study war no more and Capital and Labor must follow suit.

We have made American citizenship too cheap. We have allowed too many of these infamous, God-forsaken, white-livered, splenetic-hearted spawn of the anarchistic-bolshevistic class to sneak in under the cover of immigration. They don't come to build homes but to undermine honest labor and flaunt the red rag of rebellion. There can be no red in our flag without the white and the blue. The theory that men should loaf on the job, thereby causing underproduction and so make work for more men, is a damnable heresy from Europe.

The time has come to call in the wrecking crew and send out the construction gang.

I favor a law which will send a man back across the seas, if, at the end of five years he has not taken out his first naturalization papers and shown a determination to become an American.

There can be no neutrality in Americanism.

The issue of who is who in America must be fought to a finish. It's a dead open and shut proposition. You can't get away from it. It is

like the negro soldier over seas. He went up to one of the big seige guns and asked: "Cap'n, how far will dat gun shoot?" "Twenty-five miles, Mose."

"Good Lord a massy, man, nigger run all day, then get shot at night."

I am not in favor of government ownership of railroads. I believe private ownership affords the most efficient service and management.

I have always contended that the highest type of citizenship makes up the personnel of the railroad fraternity, employers and employes. Whatever produces a greater unity of spirit between the two will benefit the whole nation.

A husband and wife had quarreled, long and bitter had been their strife. They decided to walk down life's pathway apart. One day they chanced to meet at the grave of their first born, the child of their youthful strength. They looked at each other, cold, hard, defiant. They looked down upon the mound of earth that covered the sacred dust of the child that once formed the golden link that bound their hearts in love. They knelt one on either side of the grave and buried their faces in the withering flowers. Then they stretched out their hands to each other and an angel washed all the bitterness out of their hearts with a flood of tears. They arose and locked arms to walk down life's pathway side by side.

So let Capital and Labor bury their differences, neither try to destroy the other, knowing their interests are one, and we will sing with a new meaning:

My Country 'tis of Thee,
Sweet land of Liberty,
Of Thee I sing.

Knew the Other "Missus"

SEVERAL years ago Martie and Jimmy, two children of one of our officers, were bantering each other about spelling. The little girl was trying to recite quietly to her mother. Her brother said "You don't know how to spell. You don't even know Mississippi." "No," said the little girl, "I don't know Mississippi, but I do know Mrs. Hendley," who was the next-door neighbor.

Double-Barrelled Service

A Problem—a Puzzled Passenger—and the Pleasing and Profitable Product

The Philadelphia Ticket Office was buzzing with an unusual rush of business. The Passenger Representative was beaming his approbation upon the crowd and upon the way that the business was being handled. A man made his way toward a ticket window but saw that he would have to wait a few minutes before his turn came. Our Passenger Representative took in the situation and stepped up to him.

"I am passenger representative of the Baltimore and Ohio here; is there something that I can do for you, Sir?" he asked politely.

"Perhaps you can," said the man, turning toward him. "I am stopping at the Ritz-Carleton with a party of five and we want to drive to Atlantic City, provided we can secure a safe automobile and a competent driver who will get us there and back in time to take an evening train for the West."

"Just a minute, please," replied our representative. He picked up a telephone, called a reliable taxicab company of Philadelphia and found that a seven-passenger car with a careful driver could be sent to the hotel as soon as the gentleman wished; that he could make the trip to Atlantic City, spend several hours there, and return in time to catch an evening train for the west.

The information received, the gentleman expressed his thanks and asked that the automobile be sent to the hotel in twenty minutes. Then, turning to our man, he said:

"This explains something which has been puzzling me for the last few days. When in Washington recently I was referred to the Baltimore and Ohio ticket office for information. There I met one of your representatives and told him that I was a stranger in Washington, that I desired to remain for a few days, and that I would like to secure accommodations in a good hotel. He named several and I selected one. This he immediately telephoned, and in a few minutes I had two rooms booked for myself and party. I thanked him for his kindness but at the time wondered why he should have inconvenienced himself to assist a traveler in a matter in which he could have had no direct revenue interest. Now that you have helped me in arranging this trip to Atlantic City, I understand just what I heard about Baltimore and Ohio people—that they are trying in every way to accommodate the traveling public. And just to show you that I appreciate the courtesy, you may book my entire party from Philadelphia to Salt Lake City over your own line and any connection beyond that you may select."

Unquestionably the two experiences have made more than one firm friend for us, for the gentleman will tell the story and its influence will grow and grow and grow! Have you ever estimated the satisfaction which you, personally, can get out of an act which starts a chain of appreciative friendship such as this—without even considering the dollar value it means to your Railroad and to you?

President Willard to the Veterans

He Discusses Questions of Absorbing Interest to All Baltimore and Ohio Employees

AFTER the organization of the Annual Convention of the Grand Lodge of the Baltimore and Ohio Veterans had been completed on the morning of January 5 in the Assembly Room of the Baltimore and Ohio Building, the delegates arose and heartily applauded President Willard as he entered the room to greet them and talk over with them certain aspects of the railroad situation. Mr. Willard was manifestly greatly pleased with the cordiality of his reception and after a brief presentation by George W. Sturmer, grand president of the Veterans, smilingly acknowledged his pleasure in being with them. While the guest badge of the convention was being pinned on him, he pointed to the Veteran's emblem button in the lapel of his coat, and told them how proud he was to wear it. He also reminded them that 23 years had elapsed since he first entered the service of the Baltimore and Ohio as assistant general manager in 1899, and that despite the break in his service with the Company from 1901 to 1910, he has now been president since 1910 and it will not be long before he will be able to wear the Veteran emblem, not alone by virtue of the honorary membership to which he has been elected, but also because he will have completed the 20 years of service required for active membership.

The Pension

Recognizing that the pension is a subject to which the Veterans have been giving a great deal of attention, President Willard addressed himself first to it, and said:

"Mr. Sturmer just said that there were a number of things that he would like to have me speak about, but he referred particularly to the matter of pensions for retired Baltimore and Ohio employees. I fear there is not much that I can say in that connection at this time that will be very encouraging. I know that the pensions which are now being paid to Baltimore and Ohio employees are inadequate when considered in connection with the present cost of living, but the pension payments, as you know, are made wholly by the Company itself. The employees under existing arrangements make no contribution to that end.

"While the Company has had this subject under consideration at different times for a number of years, there has also been confronting us a condition which has simply made it impossible to obtain the approval of the Board to an increase in that direction. I do not mean to say that the Board has been unwilling to approve of an increase in pension payments, because I have never so far recommended to the Board definite action in that connection, and my reason for not doing so was because I did not feel that the Baltimore and Ohio Company, certainly within the last five or six years, was in position to assume increased expenses of that character.

"As you undoubtedly know, the Baltimore and Ohio Company at the present time is paying no dividends upon approximately \$150,000,000 of common stock outstanding. The stock of the Company is owned by about 36,000 different people, and the average number of shares held by each stockholder is 60. We have about 13,000 women shareholders who hold an average of 31 shares each, and there are upwards of 20,000 of our shareholders who own less than 20 shares each. This statement, I am sure, will make clear to you that the Baltimore and Ohio Company is not owned by a very few wealthy persons, but is owned by a very large number of persons chiefly in moderate circumstances, and many of them have felt keenly the loss of dividend payments upon their common stock during the last two years, and until we are in position to resume reasonable payments to our common shareholders, I would not feel justified in recommending to the Board that the Company increase the present basis of pension payments. I hope that in the reasonably near future, as conditions become generally more normal, that the Baltimore and Ohio Company will be in position to resume payments upon its common stock, and, when that time arrives, I shall be very glad to give serious consideration to a readjustment of our present pension payments. I think under existing circumstances they ought to be higher.

"It has been suggested to me that the employees of the Baltimore and Ohio Company would be glad to co-

operate with the Company with reference to this matter, setting aside each month a certain portion of the wages earned in order to build up in that way a fund from which larger pension payments could be made. I think there is much to be said in favor of such a plan, and I repeat that I will be very glad to give consideration to any suggestions or recommendations which the Baltimore and Ohio employees may desire to make in this connection, as soon as the condition of the Company is such in my opinion to justify me in so doing.

Action of Veterans in Threatened Strike

"There is one other matter that I would like to say just a little about at this time. I have been told that some feeling was engendered among the members of the Baltimore and Ohio Veterans' Association last fall because of action which was taken by a number of the divisions with reference to the threatened strike in Chicago. I am glad of this opportunity to explain my position in that connection.

"The Baltimore and Ohio Company at the time of the threatened strike, had no unadjusted matters in dispute with the men in its employ--at least there were no questions of any importance unsettled at that time--and there were then in effect schedules signed by the representatives of the Company and by the representatives of the train and enginemen. The Baltimore and Ohio Company was carrying out the orders of the Labor Board, an agency created by the Congress itself. The strike which was threatened was said to be in opposition to the order of the Labor Board reducing the wages of train and engine men. I had occasion at different times to talk with a number of members of the Baltimore and Ohio Veterans' Association about this matter, and I explained the position of the Company. Later on when the strike seemed imminent, I said to some of the Veterans with whom I was acquainted, that I thought the Veterans might with propriety send messages or letters to their labor leaders and to the members of the Labor Board itself urging that the threatened strike be called off.

"Whatever feelings I may have had concerning the merits of the strike,

please understand that at the time referred to I made no mention whatever concerning what position the men in the Baltimore and Ohio service should take in case the strike actually should be ordered. I felt that in a way that was a matter for each man to decide for himself. If the strike had actually been called, I might and very likely would have sent a general message to Baltimore and Ohio employees before it really took place, telling them of my views on the subject. The point I wish to make is that the only suggestion I made to any member of the Veterans' Association was that efforts should be made to get the strike postponed or absolutely declared off. It seemed to me at that time, and it seems to me now, that action of this character was perfectly proper for the Veterans' Association and could not properly be criticised by anyone, whether he was or was not a member of any labor union. Certainly every individual, regardless of what society or organization he may belong to, has the right to express his opinion concerning any impending action. I urged Baltimore and Ohio Veterans to so express their views, and some divisions did so. I am told that others would probably have taken the same action if they had had time to do so before the strike was declared off.

"In short, I think the action was perfectly proper on the part of Baltimore and Ohio employees, and I have no doubt that the messages which were sent out had some influence with those to whom they were addressed. The fact that the strike was actually declared off is the best proof possible that the Veterans were right in asking that such action should be taken, and I want to say now to the delegates from the different divisions that I appreciate very much indeed the course pursued by the Veterans at the time in mind, and I repeat that in my opinion such procedure was perfectly proper and had no bearing whatever upon the relations existing between any man and the union to which he belonged. It was simply an effort to prevent action which, if taken, would have been unwise, and, I believe, much regretted by all concerned.

Our Record for 1921

"Mr. Sturmer suggested that I might say a word about conditions on the Road today. The Baltimore and Ohio Company has in its employ at the present time about 56,000 employees. On the same day a year ago there were over 81,000 persons in the employ of the Company. The business which the Company has handled this past year is about 30 per cent.,

nearly one-third less than the business handled the year before, and the cost of operating the property has been very high, due not only to the high wages which the men themselves are receiving, but also to the high prices which the Company is obliged to pay for all the materials which it uses.

"When I speak of the high wages which employees are receiving, I wish you to understand that I am not at this time speaking of such wages in criticism. I am sure we will all agree that they are high; are, in fact, very high when compared with wages that were paid before the war, but whether they are any higher than they ought to be under the circumstances is a matter concerning which I prefer to express no opinion at this time. But however that may be, the cost of operating the railroads, because of the higher wages and the higher prices which we are obliged to pay for iron, steel, ties and coal, and also because of the many changes in methods which have come about within the last five or six years, is much higher. It costs the Railroad very much more to run a train, to carry a ton of freight, or carry a passenger than was the case formerly, and we have been obliged, on account of the great decline in business, to make every effort possible to reduce our expenses.

"This has made it necessary to lay off a very large number of men. Personally I have been very sorry that such action was necessary. While as a rule no one likes to change his employment under any circumstances, it is not always a hardship if one is able to obtain employment promptly elsewhere, but it is of course a very great hardship upon any man to lose his position and then be unable to find satisfactory work, or even work of any kind, elsewhere. I speak of this matter with first hand knowledge, because I know what it is to be out of work and unable to find employment for many weeks at a time. I am sorry that we have been obliged to lay off so many men, but it cannot be helped. It seems reasonable to expect, however, that business will gradually get better after a while, and as it does get better, I hope we will be able to restore to work many of the men who are now on furlough.

Leasing Railroad Shops to Outside Interests

"Mr. Sturmer asked me the other day what the policy of the Baltimore and Ohio Company was or would be concerning the leasing of its shops to outside companies. I told him that at the present time the Baltimore and Ohio Company had no intention of making any such arrangement. I said that of course I could not say

definitely that we would never do so, but I could say definitely that we had no intention of doing so at the present time, and our action in the future would depend on conditions at that time. I said to him that as long as we could do our own work at home and in our own shops cheaper or just as cheap as we could get it done elsewhere, it would be our policy to do all of our work ourselves with our own organization, but if it became apparent that we could arrange to have our cars and locomotives repaired at outside shops for much less than it would cost us to make the repairs at home, I felt it would be my duty to make arrangements of that kind in the interest of economy.

"So far—during the last year at least—we have not arranged for any work at outside shops. We are investigating the matter at the present time, but I repeat that we have no definite plans in that connection just now. However, even if we should arrange to send some of our cars and engines away for repairs, I should be very reluctant to turn the management of our own shops over to anyone else, unless it could be very clearly shown that someone else could run them much better than they can be run by our own officers; but in such event and before I would be willing to make such a change, I should want to talk with our men about the matter and explain the situation thoroughly to them and give them the first opportunity to do the work in case they wanted to do so.

Appreciation of Resultful Teamwork

"It is fitting for me to say just a word also in appreciation of what the Baltimore and Ohio Veterans, and in fact all Baltimore and Ohio employees, have done during the past year to increase the business of the Company and to improve its reputation. A year ago, foreseeing the slump in business which was even then beginning to be manifest, I said at the meeting of Veterans which took place in this city, that I hoped they would do what they could when they went home, to procure additional business for the Baltimore and Ohio Company, and I pointed out to them that additional business would mean more work for Baltimore and Ohio employees. I also said that out of every dollar which the Company collected from the public for carrying freight and passengers, approximately 60 cents was paid directly to Baltimore and Ohio employees; that the employees, in fact, received their wages, which took considerably more than one half of every dollar earned, before anybody else was paid for anything else.

"The response which was made to this request was very gratifying, and I am told that we have definite record of more than 2,100 carloads of freight which were shipped over the Baltimore and Ohio in the last 12 months as a result of solicitation by Baltimore and Ohio employees whose duties did not require them to do work of that character. The Baltimore and Ohio Company probably received more than \$130,000 because of this additional business, and it is safe to say that at least \$65,000 of the money so received was paid out directly in wages to the men and women employed by the Company.

"Your response was so gratifying last year, that I am going to repeat my request this year, to secure such additional business for the Company as is possible for you to secure. Once more also I want to ask you to keep in mind that you are a part of the Baltimore and Ohio organization; that you cannot in fact meet with the fullest measure of success unless the Company with which you are identified is successful. The more prosperous the Company is, the more prosperous you will be; the more money the Company earns, the more money it will be able to pay out directly for wages, and not only that, the more money it will have with which to repair and maintain its tracks, cars and engines—and I do not need to tell you that good track, good cars and good engines mean good railroading, mean safe railroading and mean more comfort for every one of us who has anything to do with the affairs of the Company.

Paramount Influence of Courtesy

"There is much that you can do to be helpful in other ways than simply by asking people to travel on the Baltimore and Ohio line, or to ship their freight over its rails. People as a rule like to do business with companies or concerns who treat them courteously and considerately. You would probably not long continue to trade with a grocer or merchant who seemed indifferent to your patronage, or with one who apparently did not care whether his goods suited you or not. We are all human and I am certain that we all feel exactly the same concerning such matters; and the same truth applies to the railroad.

"I suppose that more than half, perhaps as much as three-fourths, of all the business moved by the railroads has a choice of one or more railroads over which to move. As an illustration, there are five main trunk lines running from Chicago to New York. One can ship his freight over any one of these lines at exactly the

same charges, and there are many other combinations of lines over which the charges are the same between the same points, and naturally the man who has goods to ship will send them over the line from which he believes he will get the best and most satisfactory service. The word "service" embraces a good deal. It takes into account the manner in which the shipper is answered when he makes inquiries concerning rates, the time of departure of trains, etc. It takes into account also the condition of the car in which the freight was loaded, the careful manner of loading it, the time consumed in moving it from one place to another, its condition when delivered at its final destination, and all of the things that have to do with the transaction.

The Ideal Railroad

"I hope Baltimore and Ohio employees in every grade of the service will feel a sympathetic interest in the affairs of the Company and will do what they can to build up for the Company a good reputation, because that will mean more business and more business means more prosperity for us all. I hope you will all use your influence in having the Baltimore and Ohio Company looked upon as a good neighbor wherever it goes and in all the places where its shops are located and its employees live in large numbers. I hope you will all tell those with whom you talk, that the Baltimore and Ohio Company is anxious to do all the things that a well-managed, well-equipped public utility ought to do.

"We want to serve our patrons in such a way as to meet their reasonable requirements; we want to serve

them in such a way as to make them our friends, because we know that if we can accomplish that, we will be sure to retain their business in times when there is not business enough to go around, such as is the case just at the present moment. I am certain that if every member of the Veterans' Association will use his influence at all times to make friends for the Baltimore and Ohio Company, that such action on his part will do more to bring to us additional business than anything else that can possibly be done, remembering always that additional business means more work for more men.

Together We Can Make the Baltimore and Ohio the Best Railroad

"No matter how hard we try, we cannot make the Baltimore and Ohio Railroad the greatest railroad in the world, or the straightest or the richest railroad, but we can, if we will only try hard enough, create for it the reputation of being the best railroad in the world in point of service. We can do that. I cannot do it alone. You cannot do it alone. But all of us working together can do it, and I earnestly desire your cooperation in this way."

F. J. Angier, President American Wood Preservers' Association

OUR superintendent Timber Preservation, F. J. Angier, was elected president of the American Wood Preservers' Association at their Eighteenth Annual Meeting, Chicago, January 24, 25 and 26. A charter member of this Association, during the eleven years Mr. Angier has served as Secretary-Treasurer, it has grown from a membership of 20 to nearly 500.

Are You Interested in Your Work?

A good bulletin by Supervisor Shafferman, posted on all bulletin boards on the Monongah Division

Did you ever stop to think how much time would be saved in this world if none had to be told any certain thing more than once?

Can you figure in your imagination what the effect would be all around if everybody was so alert and in earnest that they could and did take everything which was told or demonstrated to them in their minds in such a way that the same thing need never be said to them again?

What a relief to the patient, painstaking teacher to have such a pupil!

What a relief to the child who is constantly nagged by parent or teacher to get results and get them quicker!

How much faster a workman could get to the top of his line if he gained the reputation of taking and assimilating the ideas of the boss so that the one interview would be enough on any one issue.

"An impossible ideal!" you say, but it is quite within the realm of possibilities to make this condition obtain much more generally.

Are you interested enough to pay attention to the next order or suggestion which is given to you, so that you will make the thought your own as soon as you hear it? Try it out today!

"—What the B. & O. Does with Seven Feet of Carpet, a Souvenir Postal, a Rubber Stamp and Six After-Dinner Mints."

The Little Schoolmaster's Classroom

THE first lesson this week is on "Creating Corporate Personality, or What the B & O Does with Seven Feet of Carpet, a Souvenir Postal, a Rubber Stamp, and Six After-Dinner Mints."

The Schoolmaster had to go to Washington. Recalling the advertisements in the New York newspapers announcing that the Baltimore & Ohio Railroad trains leave from Pennsylvania Station on Seventh Avenue, New York, and never having traveled on the B & O but being willing to try almost anything once, your mentor reserved a seat on the B & O train leaving New York at 2:25 P. M.

A vague impression prevailed in the Schoolmaster's mind that for some reason or other the B & O was rather well thought of down South though for the life of him all he could remember about the road was that Daniel Willard is or was its president, and a snatch of a refrain from one of the old cylindrical phonograph records ending, "On the crooked B & O—Put me off at B-u-f-f-a-l-o."

The trip to Philadelphia did not develop any noteworthy incident. In fact, it was not until the Schoolmaster started for the dining car after leaving Wilmington that he became really conscious of the B & O as a corporate personality. As he stepped from the last Pullman platform into the vestibule of the diner he noticed that a strip of carpet some seven feet long was spread from the Pullman door to the diner door, covering the wobbly bumper-heads that usually make such precarious footing.

"Rather thoughtful," noted the Schoolmaster.

Entering the car he was assigned a table by the "captain," and a menu and order slip were placed before him. Rubber stamped on the order slip was the information "The steward in charge of

this dining car is Mr. H. R. Mass." There was nothing new about this featuring the name; they do it at the ticket offices at Grand Central. Nevertheless it did take off the edge of the impersonality of the car, for here was a man the Schoolmaster could call by name if he wished to. And he did.

Turning to the menu, he found that the top section was illustrated with a view of Harper's Ferry, West Virginia, "on the Main Line of the B & O Railroad," in full color. Closer scrutiny developed that this section was perforated and formed a post card, "Compliments of Dining Car Department, Baltimore & Ohio Railroad." This was just what the Schoolmaster wanted, to drop in the box addressed to his boy at home the minute he reached Washington. Very thoughtful.

"What's this Baltimore & Ohio Special Dinner, \$1.25?" inquired your pedagogue, addressing Mr. Mass.

Mr. Mass described the meal "Sounds good."

"Oh; it is sir—very good. Whatever you see marked 'B & O Special' you can know is good." He said it, not boastfully but with conviction tinged with pride. That settled it. And there was a friendliness and hominess about the feeling that one could safely take "pot luck" on the B & O!

When the last bite of the delicious "B & O Special Dinner" was safely tucked away under the Schoolmaster's belt he had just one fault to find with the road. He liked its seven feet of carpet connecting the vestibules, and he appreciated the souvenir postal, and he was pleased to be able to know somebody in the car to call by name. But why did they tempt a traveler into eating more than was comfortable?

Whereupon he looked down at a silver tray which the waiter had

Reproduced from an unsolicited editorial in "Printers' Ink" Jan. 12, 1922.

INK

Jan. 12, 1922

just placed in front of him, and lo!—a little roll of six after-dinner mints, "Compliments Baltimore & Ohio Railroad."

It seemed to the Schoolmaster almost as though he was a guest of Mr. Willard!

And so, as he sits here in the Pullman, still an hour out of Washington, promising himself to go back on the B & O, your preceptor writes this little lesson while it is fresh in his mind. For if a great, soulless railroad corporation can get its personality across so effectively—and so profitably—with a seven-foot strip of carpet, a souvenir postal, a rubber stamp and six after-dinner mints, all of which the traveling public really pays for anyway, does it not offer a big lesson to other businesses which would profit greatly did those whose mission it is to express them, study a bit harder to create a more definite, a more pleasing corporate personality?

There is nothing new in this lesson. It is merely the old, old principle of taking thought of the little things that count for so much in life and making them do a big job of friend-making for a corporation that is otherwise inarticulate.

Baltimore & Ohio Railroad
— the road of personal service

Here's a Crew that Makes Every Pound of Coal Count

By R. A. Vernon, Road Foreman of Engines, Newark Division

THE accompanying photograph is of engine 889 operating on trains 57 and 58 between Zanesville and Parkersburg. It stands at the head of our individual fuel performance for November, 1921, a result brought about by the close cooperation of the engine and train crew who appear alongside of the engine. The men in this line are in order: First, Engineer A. B. Preston; Conductor E. T. Raymond; Baggage-man C. E. Cook; Fireman Sulvanus Stone and Brakeman D. V. Brithgan.

Mr. Reynolds is one of our passenger conductors who is making a special effort to save fuel and, with the cooperation of his crew, has assisted this engine crew materially in going to first place on our individual fuel performance for November. He is much elated over the result, as these men have been operating this run for some time and are working together and feel they can accomplish as much as any crew in regard to economical operation.

The performance of this crew has been close to the top each month, but on account of having a number of energetic competitors it has required close attention on the part of the entire crew to reach a percentage that would put them at the top. However, they continued their efforts until they reached the best performance on the Newark Division, and

have been helpful in stimulating interest in coal saving on the part of other crews.

There's Something Coming to Jo!

Chapter I

WASHINGTON, D. C., January 11, 1922

When Joseph Boland, age 15, woke up on the train enroute from Bloomfield, Pa., to Washington yesterday, he found that his dad, who had accompanied him, was missing. Joseph

Just Jo

arrived in Washington, bewildered and miserable, not understanding why his father should do such a thing. Joe is Irish and has a rich brogue and nice manners. The Travelers' Aid Society is searching for Joseph Boland, Sr., who left the train close to Pittsburgh. Photo shows the lad looking at the time table for the place where he says his father left him.

Chapter II (later)

Joseph Boland, Jr., is not Joseph Boland but Joseph Burns, who told the story of his father having left him on the train, when in reality he had run away from his home in Pittsburgh. He said he was just over from Ireland and wanted to see America. This morning Joseph's father made a trip to Washington and you can guess what will happen to the prodigal son when his dad gets him back home in Pittsburgh.

Conductor "Eddie" Hough a Good Doctor

By E. V. Baugh,
Superintendent Dining Cars

TRAIN 5 was leaving Pittsburgh, December 14, 1921, and Conductor "Eddie" Hough was taking up the tickets in the ladies' coach when he found a lady traveling with a small baby that had a very bad case of colic. He had a package of Baltimore and Ohio mints in his pocket. He went back into the baggage car, heated some water over his lantern, dissolved two of the mints and then gave the result to the baby. The answer was—exit colic!

The names of these sterling coal savers on the Newark Division will be found in the above article

Passenger

Advertising Washington

"WASHINGTON is the historic centre of the United States. Nothing so increases patriotism as a visit to the Nation's Capital where America has written her history in sacred relics, memorials and magnificent architecture. Here are assembled the political, military and diplomatic forces that are making these United States a world power. It is the duty of every citizen to see Washington and realize more fully the greatness of his Nation."

More than fifty years ago the Baltimore and Ohio Railroad was known as the "Nation's Highway" because it opened up a great avenue of rails between Washington, the Nation's Capital, and the great West and Northwest. Washington, the brains and heart of the Nation, is "first in the hearts" of our countrymen in everlasting perpetuation of her glorious namesake. It was not always "first in war" in the sense of beginning a war; rather the contrary, but it was and is "first in peace."

There is a lurking desire in every soul and body in America to see the Capital City at least once in a lifetime. But simply seeing is not knowing, and in the busy turmoil of life, procrastination too often has interfered with the up-building of a real national citizenship that can only be inspired by a knowing visit to Washington.

An acquaintance with Washington cannot be obtained alone through text books, as such acquaintance would only be perfunctory or academic. But to see Washington, and feel Washington by personal experience is an inspiration for a new and real patriotism, which this great commercial country of ours needs.

To this end the Baltimore and Ohio Railroad, the pioneer of American Railroads, has already begun a comprehensive campaign of publicity, to stir Americans to procrastinate no longer, but to go to Washington and sense the feeling that they are integral units in the affairs of the Nation.

Most careful thought has been given to this subject, and the best possible means of accomplishing the purpose have been decided upon. It is determined to awaken the Public first to the human interest affairs of Washington through the means of the most recognized organs of publicity.

There is now appearing in three of

the great standard publications' illustrated advertising copy calculated to touch the responsive cords of patriotism in all true Americans. Reproductions of this copy on a larger scale will be posted conspicuously at all stations on the Baltimore and Ohio Railroad; all literature issued by the Baltimore and Ohio Railroad will take up the thread and tell in different ways of the importance of Washington.

A descriptive book on Washington is published, to be given to anyone who seriously contemplates a visit to the great American Mecca.

A great awakening of the necessity of true patriotism was brought about at the burial of the Unknown Soldier. It is too bad that all Americans could not have been at Washington on that day, but the story will be

given in a pamphlet that can be kept and read.

Passenger representatives of our Railroad have been to Washington and have been systematically educated by going from place to place and seeing the things that the city contains, so that they can tell others of the wonders of the national capitol.

The school teachers of the country will be provided with all of this literature.

Washington is above every other place in America; it is a great thing to see the great wonders of the world and especially those of America, but it is greater still to know and feel Washington and have a lasting memory of its patriotic shrines.

Every employe of the Baltimore and Ohio Railroad will read this literature; will feel its importance; will convey its importance to others, and in so doing will help to build up a citizenship more necessary at this time than at any other stage of the country's history.

The Tomb of William Henry Harrison

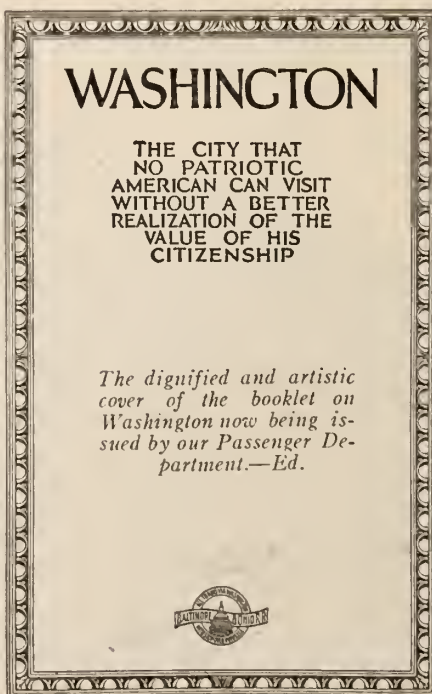

NORTH BEND, Ohio, located just 15 miles west of Cincinnati on the St. Louis Division, is destined to become quite an attraction and of deep interest, especially to history loving people. Strange as it may seem, little thought has been given to the fact that at North Bend is located the tomb of General William Henry Harrison, ninth president of the United States and the first president to be elected from the state of Ohio.

The Harrison tomb overlooks the beautiful Ohio River and is situated on a knoll to the north of the Baltimore and Ohio tracks, a very short distance west of North Bend Station. It can be viewed from Baltimore and Ohio passing trains.

The site of the tomb, which has long been neglected, has been taken over by the state of Ohio, and several acres of adjoining property added thereto, the intention being to create a State park.

The park is to be known as the William Henry Harrison Memorial Park and a large sum of money has been appropriated by the state for such improvements of the property as will tend to make this park a very attractive one.

Recently elaborate ceremonies were held under the auspices of the William Henry Harrison Memorial Association, which were participated in by school children from Cincinnati, Harrison, Cleves North Bend and surrounding territory as well as by prominent citizens of Ohio.

The occasion was the first step toward the rehabilitation of the historic tomb and the erection of a

memorial gateway, and was initiatory to the formal dedication to take place when the work is completed.

Freight

"Treat 'em Rough" Dinners

OUT Chicago way, the force in District Freight Agent Melone's office have organized a monthly dinner club for "Get together—Stand together—Treat 'em rough" purposes, both personal and official.

Every attache joined and Mr. Melone was chosen permanent chairman. The big idea is a monthly dinner and friendly talk for social and business purposes, to improve the personal relations of the boys and strengthen their efficiency as freight collectors.

Each month an official of the Baltimore and Ohio is invited to give a talk of an educational character. The first dinner was given in November. Stuart A. Allen, freight traffic manager, was the guest of honor. He liked the proposition, made a good talk, and at his own request the rules were suspended and he was unanimously elected a permanent member.

The second dinner was a bigger hit when, with Mr. Allen came George M. Kridler, general freight agent, who by interlocutory methods developed a most instructive general talk, and like Mr. Allen, Mr. Kridler fell for the Club and the Club took him in also as a permanent member.

The next dinner was held early in January when we had Terminal night. Officials of the C. T. were called on to tell about the Terminal and how Baltimore and Ohio men can best help it.

All the members are enthusiastic about the club and the good these get together dinners do, both socially and in a business way. Absolute informality prevails and in the informal talks, each member says what is on his mind. It is planned in the near future to have operating dinners, when West End operating officials will be invited to give talks; also Agents' Nights when our agents will be invited to be guests and give information and advice.

It will be observed from the foregoing that "Melone's Colts," as the Chicago solicitation force has been nicknamed, have a thorough appreciation of team work and are determined to leave no straw unturned to show what is in them and to make the Chicago solicitation staff one of the big assets of the Baltimore and Ohio. In fact, today the Chicago

staff refuses to take its hat off to any eastern competitor or western connection and is determined to hold that position.

New Castle Teamwork

ON the New Castle Division a drive for increased business was agreed upon for August, 1921, a certain figure having been set, and with all shoulders to the wheel, assisted by Transportation Department employees, we went "Over the Top" at practically every station.

Other divisions, encouraged by this good showing, took similar action, with the result that our revenue and tonnage increased perceptibly, evidencing fine loyalty among our employees.

West Fairport Record Grain Handling

A SPLENDID record of handling grain through elevators at West Fairport, Ohio, was made on November 29. Steamer "MARTIN MULLEN" with cargo 251,000 bushels corn, arrived at the elevators 10.45 P. M.

Started unloading..... 7.00 A. M. November 30,
Stopped unloading..... 11.45 P. M. November 30,
110 cars loaded.

Started unloading again . 7.00 A. M. December 1.
Finished unloading..... 4.45 P. M. December 1.
67 cars loaded.

Vessel cleared 5 P. M.—actual unloading time 23½ hrs. vessel to cars.

Elevators handled almost 11,000 bushels per hour, which is great service for a house thirty years old.

Good Service Brings Home Bacon

A SOLID train of 50 empty flat cars, privately owned, was secured from an automobile concern in Charlotte, N. C., to move to Flint, Mich. Quick movement was made via Baltimore and Ohio and other lines. Immediately there was a return movement of 56 carloads of automobiles.

Time made on return movement was so satisfactory that we were rewarded by a 50 car empty movement back to Flint to be again loaded with automobiles via same route. The result was a splendid increase in revenue for the Baltimore and Ohio.

Statue of Jeanne D'Arc

STEAMER "Paris," arriving in New York several months ago, carried, in addition to the distinguished guest of the American Legion, Marshal Foch of France, a reproduction of the most cherished statue of that country's girl saint—Jeanne d'Arc.

Like historic traditions, in our care was entrusted the prompt and safe movement of the monument to our Capitol, where, after erection, it was unveiled on January 6, the birthday of the Maid of Orleans.

Safety Section

The Success of Safety First

By R. N. Begien,
General Manager, Western Lines

WHEN Safety work was started, opposition was met because men were requested to refrain from doing things that they had been accustomed to do in a certain way. For example, an effort was made to break up the practice of going between moving cars to adjust couplers. This custom had come down from the link-and-pin days. It was also difficult to get shopmen to wear goggles to protect their eyes.

Notwithstanding that these and other dangerous practices were daily taking a ghastly toll, men were accustomed to working along certain lines, and the call to change naturally caused them to question "Why?"

Had the management made the mistake of ignoring the question and issued arbitrary orders without taking pains to explain, the movement would never have progressed as it has. But they realized that the essential thing was to make the reason plain so that men would voluntarily adopt the principle of Safety, and the work has been conducted along educational lines for that reason.

Proceeding at the outset on the lines of breaking up practices that subjected men to unnecessary risk, the work was extended to precautionary measures to make safe working conditions. Improved measures for the preservation of health followed as a natural sequence.

The work has succeeded because it is fundamentally sound, and because the men now realize this and are co-operating to protect themselves and their fellow-workers from needless risk of injury.

Railroad men are to be congratulated for the manner in which they supported the movement. The demonstration of its practicability resulted in the work being taken up by manufacturing and other operations, and it can be said without fear of contradiction that working conditions are generally better than they were a few years back, due to the fact that when the movement was in the test period our men had the intelligence and good sense to see that it was a good thing, assisted in getting the work started and ever since have shown a spirit of cooperation in

keeping interest alive. This is important, as "eternal vigilance is the price of Safety."

Safety is a success because the men have made it so. It is a work in which every man has his part to do. In the doing of it he protects himself and family by avoiding unnecessary risk and also avoids careless acts that might imperil the life or health of his fellow workmen.

This Safety man thus has become an asset to the community in which he lives.

The Engineer and the Grade Crossing

By Engineer J. C. Barrett,
Baltimore Division

AMONG the many difficult problems of the Safety movement is the prevention of accidents at grade crossings. Here the locomotive engineer plays an important role. But does he realize this? Of course, he is acquainted with the rule which requires him to sound the whistle on approaching grade crossings and to have the bell ringing. Very likely he prides himself on being a one hundred per center in obeying this rule. But should he be satisfied with that? Why not try to live up to the spirit of the rule as well as the letter! Does he realize that the intent of the rule is to save human lives? Does it occur to him to interpret the rule to suit local conditions? Would it not be a good idea to sound the whistle twice or three times on approaching a particularly dangerous crossing, and at certain times, when highway traffic is likely to be heavy, more especially if the view is obstructed, so as to avoid any possibility of not being heard.

We should not be satisfied with the minimum effort prescribed by the rule. Surely, the saving of one human life will recompense a thousand times for constant maximum effort.

It should not be forgotten that people look for a train at grade crossings, as well as listen for one, which ought to make us doubly careful about our headlights.

An engineer ought not to be satisfied with his own efforts to avoid accidents at grade crossings but should consider it his duty to see that crossing watchmen are on the job and observe and report failure of the mechanical warning devices where they are used. If an engineer is fortunate enough to own an automobile, he can do quite a little bit of propaganda work in the interest of safety when about the garage where he stables his car and among his acquaintances who own automobiles. No sensible man wants to be run down by a train and the majority will welcome safety hints coming from a reliable source. Of course, grade crossings will never be absolutely safe, but until they are abolished, it is our duty to try and make them as safe as possible.

The Dollar Side of Safety

NOT so many years ago accidents were "all in the day's work." Employers, executives, foremen and workmen alike took this attitude. Men took pride in their scars and boasted of narrow escapes. In shop, mill, factory and shipyard, the man who was not willing to take a chance was looked upon as a coward.

But there came a day when the "all in the day's work" attitude toward accidents came under the cold, calculating scrutiny of a few men—business executives and engineers—who saw a big opportunity not only to save human life but at the same time to wipe out an enormous economic loss. They analyzed the situation and found that when accidents were considered an unavoidable part of the day's work, a full day's work was never done. They found also that 75 per cent. of the accidents could be prevented, and that often as an incidental result efficiency was increased from 10 to 100 per cent. And so for both economic and humanitarian reasons the old attitude toward accidents was discarded and a new era of safety and efficiency dawned in thousands of progressive industrial organizations, large and small. Today the prevention of accidents has become a most important and inherent part of the day's work in the modern industrial plant. The day's work now means a day's work.

Take It from Me—Don't Ride Leading Footboards of Locomotives

By W. B. Patton,
Charleston Division.

ACCIDENTS due to men riding on leading footboards of locomotives are so frequent that it seems to me that if employes will not of their own free will take care of their lives and limbs, we should take action to compel them to do so, for the sake of their families and comrades.

Nothing is more foolish than for a man to deliberately put his hand in the fire. Then why does it not follow that a man who deliberately puts his arm or his leg in danger is equally foolish? True, many old time railroad men will tell you that they have been doing it "that way" for years, and nothing has ever happened, but sooner or later the day will come when the foot will slip, and no one can foresee the result.

It seems to me that the enforcement and compliance with the Railroad Company's rules on this subject are so much a matter of ordinary common sense that it should not be necessary to do more than explain to the new comer what is expected of him, and what the rules of the Company are. Then if, after warning, he will not comply with them he should be disciplined. If a man violates the operating rules of the Company, he is disciplined. Why is it not equally an offense against discipline if he fails to comply with *safety* rules?

A man who will not take care of his own life, will not take care of the lives of his fellow employes, and will not, as is his sworn duty, take care of the lives of passengers entrusted to his care. Therefore, he is NOT a safe man to be employed on a Railroad and should be sent to the farm where he belongs.

The Lesson I Learned from "Bulletin 70"

By J. A. Subject
Locomotive Foreman, Lorain Shop

I LEARNED many lessons from "Bulletin 70," lessons new and lessons old, yet withal so interestingly portrayed on the screen that they bore every appearance of novelty. And taking them in their entirety I feel safe in declaring that the greatest lesson that I derived was: "The Exercise of Caution, Why—Where—and How."

CAUTION—What is the meaning of the word? Simply this, the act of playing safe. It does not mean a hesitating or undecided manner of

doing things; in fact, it is the antithesis. There are two ways of performing an act, either correctly and intelligently, or incorrectly and thoughtlessly. The former is the cautious way and the safe way, for intelligence begets caution.

Why be cautious? For your loved ones, your fellow workmen, and yourself! There is no one of us so completely alone in this world that his injury or death would not cause some hardship and suffering. The man who is head of a family becomes a criminal, in effect, when he takes needless chances. He is no longer a free agent when he assumes the responsibility of dependents, and he must always consider them first.

There is a gambling trait in human nature, a readiness to take chances that often are a short cut to death. "Bulletin 70" gave a vivid portrayal of the evil results that follow from a workman employing unsafe practices, that ended disastrously both to himself and his fellow worker. And I was convinced that any man who wilfully and habitually disregards

the Safety rules, should be disciplined, as he is a menace to all with whom he comes in contact.

Where be cautious? In a broad sense, everywhere, but especially when employed in a hazardous undertaking, when others' lives or limbs are endangered by your actions. But since the simplest job can be made extremely dangerous through thoughtlessness, caution should be exercised always.

How to be cautious? Through knowledge and practice! Learn the fundamental rules of Safety and use them in your daily work. Use your head for the primary purpose God gave it to you. Keep out of the paths of danger when it is not required and when it does become necessary, **STOP, LOOK and LISTEN.**

Songs of Safety First
Lies slumbering here
One William Lake;
He heard the bell,
But had no brake.

—Detroit News.

CARELESSNESS

BE CAREFUL

This well-drawn and forceful cartoon is the work of Walter Wentworth, pipe fitter helper at the East Dayton roundhouse. Edward M. Mannix, correspondent for the Toledo Division, sent it to the Magazine and advises that Mr. Wentworth is going to let us publish more of his cartoons from time to time. Pictures tell a story better than do words and we are glad to have Mr. Wentworth's help.

Heredity

You have a strong, healthy body! Are your children as fortunate?

By Dr. J. E. Hurley,

Medical Examiner, Pittsburgh, Pa.

HEREDITY may be defined as the transmission of physical and mental likeness from parent to offspring. It is a matter of every day observation that the parent is like the offspring, which raises the question, "Why is the likeness transmitted and how does the offspring inherit the peculiarities of parents?" These questions are very difficult and have not been fully answered.

The old doctrine of the naturalist was that all life is derived from an egg. The doctrine of the modern naturalist is that all life proceeds from a cell, for an egg is nothing but a complex or a differentiated cell. It is the germinal vesicle of the specialized cell of the egg that fundamentally contains life. All else of the egg is merely concentrated proteid food for the nourishment of its growing inmate, or shell for its protection during the period of incubation.

The most ordinary observer recognizes everywhere the difference between life, both animal and vegetable, and mere sticks and stones. He sees that the crucial test of life is ability or inability to produce after the manner of the kind—animals, animals; vegetables, vegetables.

Confining ourselves to these few paragraphs dealing with the scientific aspect of the subject, for ob-

viously we cannot delve into the Darwinian theory, nor, for the same reasons, can we discuss the theories and explanations of Weismann, which are said to have an advantage over Darwin's in that they are simpler, let us briefly consider what Heredity means to each of us.

Heredity in Plant Life

Those who were raised in the country or on a farm may remember with what care the farmer selected his "seed" for the next season's crop. He felt that too much care or attention could not be given to this task, knowing full well that the better the "seed" that went into the ground the more fruitful the crop and, as naturally follows, the greater his profits. Just go back a few years, those of you who had to do with this subject, and think how very particular you were about your "seed" corn, how you carefully set aside your "seed" potatoes, and ask yourself why you did this. Was it simply because of tradition, simply because your fathers did likewise, or did not your instinct and training tell you that it was the proper and better way?

Heredity in the Lower Animals

Turning from the field to the barnyard, note the great strides being made on all sides in the improvement of the stock. No longer will any old scrub do. The farm journals and agricultural schools have been teaching and talking and writing in season and out of season, to farmers on how they may improve their stock and why they should do it.

Do not these illustrations relating to vegetable and animal life explain, in a sense, what might come under the general subject Heredity?

Heredity in Humans

If it is of value to insist upon selective methods to improve the vegetable and animal kingdoms, is it not of more moment that we should strive for as near perfection as it is possible for us to attain in the human family? This statement may seem to some to savor of Eugenics*, which subject was quite to the fore a few years ago. However, it is far from my purpose or thought to treat of this movement, the morality and ethics of which have been an issue for considerable heated discussion pro and con. What I have in mind is very much less disturbing.

We are all familiar with such homely old sayings as "like sons," "a chip off the old block," etc., but do we apply them in thinking of ourselves in a physical way? Are we careful enough with our bodies to see that no disease is transmitted by us, in so far as we personally are able to govern this very important matter, to our offspring? Rather should we not so live, in the observance of all laws of nature as understood by modern scientists, that we may transmit to our offspring a sound mind and a sound body?

Is Tuberculosis Inherited?

For example let us use Tuberculosis. Though there is now a school of thought which finds fault with those who stress the idea that Consumption, as it is popularly called, "runs in families," still there remains a goodly number of old fashioned folk who believe that hereditary influences do have something to do with it, that they do play a part.

No doubt both camps have written to extremes in defending their pet theories, but be that as it may, we all now are agreed that by proper observance of the most elementary laws of sanitation, such as plenty of fresh air, sunshine, wholesome food, rest, cleanliness, and so on, we may keep our bodies in such a physically fit condition that we are able to throw off the Tubercle Bacillus even though it does attack us. In doing this we never lose sight of the fact that by keeping ourselves in good physical condition, we are merely laying a healthy foundation to pass along to those who are to be our descendants and their descendants.

Resistance and the Parable of the Sower

No more graphic picture to vividly fix its impression upon the mind in demonstrating the relative values of a healthy body and one in a depleted state in its resistance to the Tubercle Bacilli, could be drawn than the one sometimes used of the Parable of the

* The New Standard Dictionary defines Eugenics as "the science and art of improving the human race by applying the ascertained laws of inheritance of characteristics to the selection of marriage mates, with the aim of securing to the offspring a desirable combination of traits, including resistance to untoward conditions;" term first used by Sir Francis Galton in 1884.

It defines Negative Eugenics as "the science and art of preventing the procreation of weak and defective persons, including the practice of segregating the sexes during the reproductive period and rendering sterile the highly unfit."

sower who went out to sow his seed. The late Dr. Osler, in explaining that the ultimate result in a given case depends upon the capabilities of the body to restrict and limit the growth of the bacilli, puts it this way: "There are tissue-soils in which the bacilli are, in all probability, killed at once—the seed has fallen by the wayside. There are others in which a lodgment is gained and more or less damage done, but finally the day is with the conservative, protecting forces—the seed has fallen upon stony ground. Thirdly, there are tissue-soils in which the bacilli grow luxuriantly, and the day is with the invaders—the seed has fallen upon good ground."

Heredity and Syphilis

What is said about Tuberculosis applies with equal force—surely with less possibility of any academic difference of opinion as to its positive transmission—to one of our communicable diseases, Syphilis, which is very prevalent in spite of all that has been done by the medical fraternity in general and the United States Public Health Service in particular, in disseminating literature, public addresses, etc. Certainly the statistics forthcoming from these agencies are appalling. If

we would but digest the facts given to us by such indisputably authentic sources, with special thought as to their bearing upon unborn generations, we could not help but realize in its full significance just what an all-important thing this Heredity is.

During the mobilization of our forces during the World War a number of cantonments had so many men suffering from Syphilis that they had to be segregated in whole companies and battalions. The prevalence of this plague is appalling. A warning against its dire results upon the children of affected parents, can hardly be made too strong.

With these brief paragraphs offering some concrete examples of what we are endeavoring to make clear, let us conclude by citing what we have all noticed: that when a person has achieved sufficient greatness to give him prominence among his fellows, the usual thing is to write a history of him. In these stories one invariably notices that the author studies the man and his ancestors, judging rightly that, the virtues and traditions of ones progenitors cannot but influence his principles and activities. Still, for those who do not attribute much importance to this question of

Heredity there surely is a meed of comfort and consolation in Bobby Burns' "A man's a man for a' that."

Soldier Memorial Erected by Tyrone Division of the Pennsylvania Railroad

THE accompanying picture is of the beautiful memorial erected by the officers and employes of the Tyrone Division of the Pennsylvania Railroad Company to the 231 officers and employes of the same division who left their employment to serve with the armed forces of the United States in the World War. Eleven of these service men died or were killed in action.

This is probably the only memorial of its kind in this country, and is striking in its simplicity and ruggedness. The bronze doughboy and statue represent a work of art such as is seldom seen; indeed, the bronze doughboy seems a work not carved by human hands.

The huge native boulder on which the doughboy stands was taken from the Allegheny Mountains, near Tyrone, and weighs over forty tons. The memorial stands in view of all passing trains. (Note the perfect bear face on the stone to the left.)

Monument to soldiers of Tyrone Division, Pennsylvania Railroad, Tyrone, Pa.

Philadelphia, Pa., to Camden, N. J., Bridge

When completed, this bridge will be the longest suspension bridge in the world

THE earliest record of a definite project to construct a bridge across the Delaware River between Philadelphia and Camden was in 1818, when the application was made to the Legislature of New Jersey and later to the Legislature of Pennsylvania to build a bridge from the Camden shore to Windmill (Smith's) Island, a distance of 2200 feet, leaving the remaining distance to the Pennsylvania shore to be covered by a ferry.

There does not appear to have been any organized effort to secure a bridge over the Delaware River until the Legislature of New Jersey by Act approved the 17th day of April, 1914, provided for the appointment of a Commission with "power to construct one or more bridges or tunnels under or over a navigable stream or river which is a boundary of the state." This Commission was not fully organized until 1916. It retained the services of consulting engineers to make a study and report on the Delaware River crossing, and in 1918, the Commission presented

its report, suggesting a bridge at the Arch-Cooper Street location, advising against the use of a tunnel.

Further preparatory measures were considered by New Jersey and Pennsylvania, and by the city of Philadelphia, until, in 1919 the Legislatures of Pennsylvania and New Jersey passed uniform laws, creating the present Delaware River Bridge Joint Commission, with full power and authority to proceed with the construction of the bridge. This Commission on September 24, 1920, engaged a Board of Engineers for the preparation of a report on this project.

On June 9, 1921, this Board, after having carefully studied the character of foundations, conditions of traffic, land values and costs at the most favorable sites for a bridge over the Delaware River connecting Philadelphia, Pa., and Camden, N. J., recommended that, "by reason of the most favorable traffic conditions compatible with reasonable cost, the bridge be located starting in Philadelphia from a point on Sixth Street midway between Race and Vine Streets opposite Franklin Square and crossing the river in a straight line to Pearl and Second Streets in Camden, then curving southward to a point on Penn Street midway between Sixth and Seventh Streets.

"That the structure cross the river with a single span 1750 feet long center to center of main piers providing an unobstructed opening for navigation between pier-head lines;

"That the overhead clearance above mean high water be 135 feet over a width of 800 feet in the center of the span;

"That by reason of greater economy and greater ease and safety of erection and shorter time required for construction as compared with the cantilever type of bridge, the main structure be of a two cable suspension type;

"That the Bridge and approaches be built to provide a single deck carrying an unobstructed roadway for six lines of vehicles, also two lines for surface cars and two lines for rapid transit, and that two ten-foot sidewalks be provided above the roadway;

"That the foundation caissons of the main piers be sunk to bed rock, which is within practicable depth at the recommended location."

The estimated total cost of the bridge and approaches, including land damages, will be \$28,871,000, apportioned as follows:

State of Pennsylvania . . .	\$ 8,221,000
State of New Jersey . . .	\$12,429,000
City of Philadelphia	8,221,000

Total \$28,871,000

The recommendations, as submitted by the Board of Engineers, were accepted in their entirety, by the Delaware River Bridge Joint Commission, and the work of underground exploration of sites for piers and anchorages in order to determine their elevation commenced September 2, 1921. Contracts for the piers were to be let in December, 1921, followed by supplemental contracts for anchorages, steel towers on piers, cables, paving, etc., as the work progresses. It is anticipated that the construction of this bridge will be sufficiently advanced as to admit of passenger and vehicular traffic during Sesqui-Centennial Year (1926), although full ornamentation and other similar work will not take place until after the bridge has been opened to the public.

For the two states that, by joint legislation, have prepared the way for the construction of this bridge (which was under contemplation over a century ago), it is a logical and proper extension of their state highway systems. It is to be also a direct link between the inter-related communities on the opposite banks of the river, one of which, the City of Philadelphia, will directly share in the cost of its construction. Its location was chosen with a careful balancing of the ends that it is hoped to attain and the interests of the communities concerned. It is expected to accommodate all the classes of vehicular and passenger traffic now crossing the river, and its location was based on a reasonable compromise of their different demands and desired routes of travel, and to provide for the increase in this traffic during the years to come.

Note—The Magazine desires to thank Messrs. Jos. K. Costello, Secretary, Delaware River Bridge Joint Commission, and A. W. Munsell, Assistant Engineer in charge of Boring, through whose courtesy in giving our representative the necessary information, this article was made possible for publication.

Washington and the Ballot

THE constitution of the Communist party specifically provides that no one whose income principally comes from rent, interest or profit may be a member. The same idea—namely, that possession of capitalistic power makes a man an enemy of society—was argued by Morris Hillquit, "the brains of the Socialist party," at the Albany hearing. Lenine, except against the peasants, has applied the rule. A Russian who dares save to provide for his old age is an infamous bourgeois and to be excluded from any part of the Government.

So George Washington should not have been allowed to vote or to command an army or to preside over the constitutional convention or to be President. He refused all remuneration for his public services and barely lived on income from property.

Washington's personal expenses when engaged in public pursuits aggregated \$64,355.30, but when his bill was finally paid he received paper worth but five cents to the dollar. He bought public securities to about one-tenth of his estate, and seven-eighths were never paid. But he lived on accumulated wealth. The hideous fact cannot be denied. He died seized of an estate which inventoried \$530,000. He was the richest man in the United States, and plainly merited absolute exclusion from citizenship and the most condign punishment.

Hamilton, Jefferson, Jackson, Lincoln, Roosevelt and many other once well-considered Americans lived on property income, even as Mr. Hillquit is said to do now. But such things must not happen again. The atrocious thrift habit must be rooted out. Men, like pigs, must immediately consume everything they can lay hold of; the man who has one shirt must concede all power to the shirtless.

—N. Y. Tribune

Recommends Savings Feature

GLENWOOD, PA.,

December 26, 1921.

MR. W. J. DUDLEY,
Superintendent, Relief Department,
Baltimore, Md.

Dear Sir—I assure you and the Relief Department that I highly appreciate what they have done for me toward getting a home. I have also recommended the plan to my friends and associates and expect to do so in the future.

It is surely a great opportunity for the employees of The Baltimore and Ohio Railroad Company to become owners of property.

I have been an employe in the Baltimore and Ohio since 1880. I started at Connellsville in the Machine Department just after leaving school. I have never been discharged and have never quit my job. I am now engineer of trains 5 and 6 between Cumberland and Pittsburgh. I surely wish the Baltimore and Ohio Relief Department the greatest success, and hope that the good work and prosperity will continue.

Very sincerely yours,

(Signed) DANIEL QUINN, *Engineer*,

Why Are Not More Crews Riding Coal Trains East over the Mountain?

The facts set forth in the following paragraphs, reprinted word for word from a bulletin issued on January 24 by the Department of Commerce in Washington, go far in answering the above question. We publish them in the hope that they may suggest to some of our employes the fact that the high operating costs of a great industry like coal production have a most unfavorable effect on their prosperity as transportation workers, as well as on the prosperity of the miners and the workers in other related industries. We quote:

Largely because of the non-profit prices of the British, their coal exports for the months of August, October and November increased 32 per cent over corresponding months of 1920; whereas, United States exports decreased 44 per cent in the same period. Shipments of British coal have actually been made to the West Indies, a market held exclusively by the United States for twenty years. Dur-

Looks Like A Bad Time To Insist On Standing Out On Top

Copyright 1922, New York Tribune, Inc., reproduced by permission

ing the period November 3 to December 30, eight cargoes, including two to Colon, were cleared from South Wales ports for the United States Pacific Coast and for Honolulu.

The *c. i. f. costs of British coal at West Italian ports are from \$0.65 to \$2.35 lower than the c. i. f. costs of United States coal, the difference depending on grade and kind; at Rio the British *c. i. f. costs are from \$0.21 higher to \$0.52 lower than for United States coal.

British mine wages are now at rock-bottom, since they are now at the minimum fixed by the agreement of 1921. In the three chief coal fields, those of South Wales, Northumberland and Durham, the average wage per week for coal hewers is reported to be 57s. 4d. or about \$12.04 (conversion into United States currency being made on the basis of 1 pound—\$4.20). British wages in these fields have since March, 1921, been reduced on an average of about 46 per cent. American wages are still at wartime levels.

* c. i. f. means cost, insurance and freight.

Leave Your Name!

We use the telephone because it is convenient and because we want to get quick action. Often, however, we don't let it be as efficient as it can be. Take the case of the person who wishes to talk with a certain individual, but who refuses to leave his name—it comes up frequently in telephone messages to the MAGAZINE office.

The result is that often the person calls three or four times in a forenoon or an afternoon. But if such person would only leave his name, the person to whom he wishes to talk could probably be put in touch with him over another 'phone. Failing to leave his name he unnecessarily multiplies the work of the central operators, he unnecessarily troubles the persons in the office being called, he fails to accomplish his mission and, not unnaturally, he sometimes gets peeved.

When leaving an office the business man usually leaves word with his force where he expects to be and at what time. Or if he is gone a couple of hours or more, he keeps in reasonably frequent touch with his office so as to learn of any important developments. On such occasions he can learn of persons who wish to reach him by telephone and get in touch with them immediately from the place in which he happens to be.

A time saver, a trouble saver, a temper saver—why not leave your name when you telephone?

Chivalry Still Lives!

Baltimore, Md.,

January 10, 1922

The Editor:

Either by assignment or custom the rear coach on the 5.13 daily commuter train is used as a smoker. Upon entering this coach last Saturday evening about two minutes before train time I found the usual clouds of smoke. Several "Fair Ones" entered the would-be smoker as the train was departing, presumably to find vacant seats, which were available, and immediately and voluntarily, cigarettes were pinched, cigars were "choked" and pipes smothered, and ere the train had been in motion many seconds smoke clouds had cleared up and the odor of burning tobacco gave way to the delicate scent of sachet. Not a murmur was heard. Chivalry still lives!

(Signed) A. S. Baker.

What Is a Good Solicitor?

At a recent meeting of the Traffic Study Class in the General Office Building in Baltimore, George S. Harlan, assistant general freight agent, said that in his opinion the two principal requisites of a good traffic man are personality and knowledge of traffic conditions, including routes and rates. Mr. Harlan's experience in the traffic end of railroading and traffic solicitation lends great weight to his opinion. But it is certain that if an inspirational writer of the type of Doctor Frank Crane or Orison Swett Marden had been asked to comment on what Mr. Harlan said, he would have stated that Mr. Harlan had left out the most important requisite, namely the willingness to "pound pavements."

Mr. Harlan made another interesting comment, this anent the question of how to distinguish a good traffic solicitor from the others. He said that when a shipper called up a traffic office on the Railroad and demanded to speak with a certain traffic solicitor and with none other than him, because he felt that no other could handle his business as satisfactorily, it was certain that that particular solicitor had graduated from the ranks of the ordinary to the ranks of the extraordinary. And he further stated that if a traffic solicitor has ten good customers who control a sizeable amount of traffic and who insist on doing business with him and with him alone, he is usually a success in the traffic field.

All of which brings the subject back to the old tried and true formula "if a man gives service he can count on getting business." A man satisfactorily handling the business of ten big shippers does not have to advertise his ability or the service of his Railroad. The shippers will take care of that for him and in the train of their business will come other business in such volume as to swamp him. Then he is promoted and picks assistants to help him render the same kind of service to the bigger clientele.

The Good Samaritan

It is not an unfortunate human being, maltreated and left along the wayside that we speak of here, but of a form 387-H, one of the expensive multi-address envelopes issued by the Railroad.

When it came from the stationer it had 16 spaces for addresses on it. The first, second, third and fourth were properly used by the employes handling. But the fifth man took the entire remaining 12 spaces to write in bold letters the name of the addressee whom he wished to reach. He probably did not give his act much thought or he would not have been so wasteful.

The envelope was down but it was not out, for a Good Samaritan came along and, clipping a piece of paper from an old envelope, pasted it in space No. 5 with the name of his addressee, and sent the envelope on rejoicing. I have followed his good example to see if we cannot get a whole crowd of similar Good Samaritans interested on the Railroad in economy on these envelopes and our other stationery.

The True Government of a Free People

A majority held in restraint by constitutional checks and limitations, and always changing easily with deliberate changes of popular opinions and sentiments, is the only true sovereign of a free people. Whoever rejects it does of necessity fly to anarchy or despotism. Unanimity is impossible. The rule of a minority, as a permanent arrangement, is wholly inadmissible; so that, rejecting the majority principle, anarchy or despotism in some form is all that is left—*Abraham Lincoln*.

Angels Unawares

One night recently, an hour before the commuting train which I expected to take home was scheduled to leave Camden Station, the conductor of the train spied me in the outer concourse, beckoned for me to join him and together we walked out on the platform, where he looked over his train.

Then an errand took him back into the station, and instead of leaving me on the cold platform, he offered me the hospitality of one of the warm coaches, not yet lighted for its regular passengers. I jumped at the chance, got aboard and slumped wearily into the comfortable plush covered seat in the rear.

Shortly afterward the front door opened and I could see in the dim glow from the lights on the platform the figures of three or four of our uniformed women car cleaners. Their work for the night was about over and they, too, were seeking the hospice of the comfortable car.

Just a faint murmur of conversation reached me at the far end of the car and it was, perhaps, only my imagination which seemed to make audible such words as "lining," "braid," and "dress," so dear to the hearts of all women. Then, after a pause, there flowed through the car from a sweet soprano voice, the haunting melody of

"Oh, come, angel band,

Come and around me stand,

And bear me away on your snowy wings

To my immortal home."

It was just as my own mother so often has sung it to me as a boy in the quiet and dark of an evening hour at home. A harmonizing contralto joined in the repetition, sung with such deep feeling and reverence that it thrilled me through and through. The picture was a beautiful one—these women of humble position, after the wearying toil of the night, lifting up their voices in spontaneous—perhaps only half-conscious—supplication to the Father above.

It is, unfortunately, but human nature for some of us sometimes to forget the respect due everybody with whom we are associated in our daily work. I happen to know the history of one of those women, although she does not even now know that I was on that car that night. She is a woman who is carrying a great load, the soul of fidelity in all her relations in life and quite an unusual woman in many respects. There is every reason to believe that her companions were women of the same high type. Yet how often we forget this; how often in the drive of business life—its hurry, its worry—we are thoughtless of that fine spirit of courtesy and friendliness which we owe to such as them, and to all our associates!

The little experience in the hospitable coach that cold night was a benediction to me. Position and power faded from the scene and in place of it was the beautiful picture of three of our humblest workers who, in reverential and holy song, were exalting themselves above position and power up to the very Throne above.

Baltimore and Ohio Scholarships

Given to the Two Winners in Boys' and Girls' Club Work in West Virginia

By O. K. Quivey,
General Agricultural Agent

THE boys and girls of the rural districts of West Virginia are organized in clubs doing work along agricultural lines and under the close supervision of the West Virginia State Agricultural College. These clubs are known by the kind of work in which their members are engaged, such as Poultry Clubs, Calf Clubs, Corn Clubs, Pig Clubs, Canning Clubs, Sewing Clubs, etc. A very careful check is made on the work of each individual Club member, including the cost of doing the work and the cash return.

The work of the Club members is assembled annually at Charleston, W. Va., where it is placed on exhibition, this exposition being known as the Boys and Girls Club Annual Round-Up. Judges then pass on the work, and ribbons and other awards are given in recognition of outstanding work done by Club members.

To stimulate West Virginia Boys and Girls Agricultural Club work, the Baltimore and Ohio offered two \$100 scholarships, one to the boy and one to the girl whose work led the state. These scholarships are good for the Winter Short Course at the West Virginia State Agricultural College at Morgantown, or can be applied by the winners on a regular four-year course in agriculture, if they so desire.

Jackson Randolph, 15 years old, of Lost Creek, W. Va., won the Boys' scholarship for his work during his second year as a Boys Club member. This lad was fortunate in drawing a calf, Belle Donald, a purebred Hereford, in a contest, and it is his work in growing out this heifer calf, and in breeding and raising some purebred pigs, on which he made his report, and on which he won the

worth-while Baltimore and Ohio scholarship.

At the time this story is written, Belle Donald has not been in the show ring, so it is impossible to state the final results.

The cash return from the two litters of pigs raised and sold by him amounts to \$116.00, in addition to the litters having paid for the original sows that produced them.

These paragraphs are of particular interest, and are quoted from Jackson Randolph's report:

"When I sit and look back over the year past I feel that it has been a short one for me, and a pleasant one also. Belle Donald came to me in the drawing contest at the Fair nearly a year ago, and she and I have been the closest friends since that time. She has filled quite an interesting place in my life and I know when she passes from my possession that I will have many regrets.

"I can never get away from the habit of contrasting pure bred stock with the ordinary kind that I see on our farm and on our neighbors' farms. How every one, I suppose, loves the feel of these better bred cattle. How I like to run my hands over Belle Donald's broad back and soft sides, and how well she responds to good feed and care. We have a neighbor who tried to rival us with his two half Jersey calves, but about a month ago he sold them for \$35.00 each. It is that kind of breeding that I am trying to get away from.

"As the show day comes on, I feel the friendly rivalry rising in me. I am anxious to win, but to win only on merit. I know that I will be more or less nervous. But then the joy of being in the contest with the boys and girls who have tried as hard as I have to win, and to see what they have done with their calves, and then to watch the contest to see the anxious faces of the others and see the judging and wondering where I will get it this time, yes, this contest is what I like and it is of great educational interest to me.

"Now the question comes up, 'what have I learned during the year?' I have learned that it is the little things that count so much in preparing a calf for the show ring. Regularity in feeding and care taking is our great principle. Not so much the amount we feed as that we feed a balanced ration. While I have learned many things that may seem trivial to the experienced feeder, because he has known them so long and so well, yet these things would all seem new to the beginner and he could not hope for success without the guidance of someone else. I feel that we are just starting in the better ways of feeding and developing

Miss Adele Bigelow, Washington, W. Va.

stock and I know that my knowledge is very limited, but I see enough to know that the great fields of knowledge are beyond us and in their directions I am an explorer and seeker.

"As I write, and often before this, I have thought what an advantage we young people have over our parents, and I am led to wonder if we are improving it as we should. I wonder how the boys and girls associated with me feel about these things. I feel sorry for the boy or girl who cannot keep in the work of the different club activities, but have not much patience with those who get away from the work because they are not willing to make the effort.

"The result in the show ring and at the sale may not be what I have hoped nor longed for, but whichever way the decisions go and the better sales, I cannot be a loser, save only in dollars, as my experience counts for more with me than mere money. I am looking to the future; I am building on the foundation of pure-blood lines in all kinds of live stock. That will be my chief aim and I know that if I do this the money will be there at the finish.

"I wish to express my appreciation to all the agents of the state and county that have made it possible for me to be a club member, and to the Law and Roberts people, who have given me the opportunity to participate with Belle Donald in the show ring.

"In regard to my other work in the clubs: I have been as active as I could under the circumstances in the second year work of the pig club. Following is an account of the stock sold and prices obtained: Last fall I sold three pigs and returned two to pay for the sow. For one registered sow pig I received \$17.50 when she was eight weeks old. Two I sold for killing purposes at \$10.00 each. I kept one sow pig for a brood sow, valued at \$15.00. A total of \$52.50.

"This Spring I sold from another litter two pigs for \$13.00 each and have four yet on hand, two of which I am keeping for

Jackson Randolph, Jane Lew, W. Va.

porkers, worth \$15.00 each. Two other boar pigs not sold yet are valued at \$30.00 each. A total of \$116.00.

"In regard to my corn club work, I am disappointed in it. The seed was supposed to be all yellow, but I now see that it is badly mixed with a red corn which would exclude it, I fear, from any contest."

Adele Bigelow, 17 years old, of Washington, W. Va., won the Girls' scholarship for her work in Poultry. Her report covers her fourth year in Poultry Club work, and extends from October 1, 1920 to October 1, 1921.

Miss Bigelow has done such outstanding work, in fact, that she was chosen by the Extension Department, University of W. Va., to act as assistant demonstrator in Club work all over the State, in which work she has been eminently successful. She has a well-defined conception of the value of service to those with whom she is associated, and after reading her report, it is obvious that the Baltimore and Ohio scholarship was justly awarded to this young lady.

Her work as an assistant demonstrator has not interfered with her own project in Poultry Club work, and the cost record and income record of her year's work are as follows:

Cost Record

October 1, 1920. 70 Hens at \$1.00 per hen.	\$ 70.00
October 1, 1920. On hand, 45 pullets at \$2.00	90.00
October 1, 1920. On hand, 6 cockerels at \$1.50	9.00
10-1-20-10-1-21 143 bushels corn at \$1.12	160.88
10-1-20-10-1-21 99 hours labor at 10c hour.	9.90
4-5-21-6-15-21 3 bushels wheat at \$1.50	4.50
10-1-20-10-1-21 144 lb. shells at 1-4c lb.	1.82
Jan.-March..... Bran.....	2.00

Total.....\$348.10

Income Record

10-1-20-10-1-21 Sold 853 3/4 dozen eggs.....	\$337.93
December 4, 1920 Sold 8 chickens (live).....	7.87
10-16-20-10-1-21 Sold 74 chickens (dressed).....	149.97
October 1, 1921. On hand 50 hens at \$1.50.....	75.00
October 1, 1921. On hand 5 cockerels at \$5.00.....	25.00
October 1, 1921. On hand 72 pullets at \$2.00.....	144.00
October 1, 1921. On hand 3 cockerels at \$1.50.....	4.50

Total.....\$744.27

Total net profit.....\$396.17

Conductor Daniel Hunt

This report does not include the fact that during the Fall of 1920 the flock had a bad epidemic of roup, and Miss Bigelow suffered the loss of 30 mature hens. In spite of this she is able to show the handsome profit noted on her work in Poultry.

Baltimore and Ohio boys and girls who would be interested in work similar to that described in this article, and who have a real enthusiasm for the raising of pure bred stock or prize-winning grain, etc., may find it to their advantage to communicate with the writer; address Baltimore and Ohio Building, Baltimore, Md.

Daniel Hunt

Passenger Conductor—Fifty-five Years of Service and Still Going

DANIEL HUNT, passenger conductor, Uniontown, Pa., has a service record of 55 years with the Baltimore and Ohio. This record is free of discipline and is one of which any Veteran would be proud.

In a recent letter to Mr. Hunt, the superintendent of the Connellsville Division extended to him his personal appreciation and the thanks of the Safety Department for his interest in Safety work. The letter reads, in part:

"I trust that you will continue your efforts to promote Safety among our fellow workers. You retain your membership as an honorary member of this committee, and as such you are privileged to make reports or suggestions, which, I assure you, will receive attention."

Mr. Hunt wears two stars and a bar, is still on duty and is as hale and hearty as ever. He began work on April 11, 1866, on the Connellsville Division; in 1888 he came to the Pittsburgh Division, in 1913 to Connellsville, and back again in 1919 to Pittsburgh.

We congratulate Mr. Hunt and wish him more years of active service.

Jacob Thompson

THERE is hardly a person who has worked in the old General Office Building at Baltimore or in the present building at Baltimore and Charles Streets, who cannot recall having seen a certain little, gray-haired porter, who, with his long-handled broom and a large bag, went from vault to vault throughout the building. Here he swept the floors and gathered into his bag the waste-paper from the boxes and baskets. Again he would be found in the cellar of the building, where the many precious files and important documents are kept, tidying up the storage vaults, gathering up scattered waste-paper, picking up bits of twine, and always busy. Sometimes he was a bit slow; sometimes he would grumble a bit when some person had carelessly left open a package of files for him to tie up, or if his load was unusually large, but for all that, he never shirked his job or left work undone.

The late Jacob Thompson, cleaner

This was "Jake." His real name was Jacob Thompson, but everybody knew him as Jake, and Jake was always on the job. For nearly 50 years he served the Railroad in the capacity of brass cleaner and porter. Now he has gone to his deserved rest.

Jake was born on March 19, 1849. He entered the service of the Baltimore and Ohio on September 18, 1872, in the old building. He was one of the messengers in the office of President John W. Garrett in Camden Station away back in the eighties. His service was continuous until the time of his death, on January 2, this year.

There are perhaps thousands of employees who will miss the familiar little old figure from the vaults, the elevators and from the corridors, and there is many a file clerk who will not forget that cleanly vaults and orderly shelves were made possible through the help of Jake.

Epigrams of W. H. Bowhay

Special Agent, Freight Claim Department

A man becomes superannuated, but he never gets too old to tell lies.

A man never realizes he is getting old until the girls begin to flock around his desk at lunch time.

You are not very good company if pay-day is your only smile day.

If our Congress will pass a law prohibiting the use of the telephone, a lot of us will forget how to swear.

A June bride does not wish for her old job back until she has chased a few soiled socks and handkerchiefs up and down the washboard.

Thomas H. Seal Honored by Friends on Completion of Fifty Years' Service with the Company

ON January 27, 1872, Thomas H. Seal, then not yet twelve years old, was brought by his older sister to the grain elevator department of the Baltimore and Ohio Railroad, then located at Baltimore and Calvert Streets, to become the first messenger in the department. For fifty years he gave the best that was in him in intelligence, industry and integrity, to the handling of the various positions he held in that department, and as superintendent of elevators, Baltimore and Ohio Railroad, passed the half century anniversary of his entrance into the service, a loyal employee and greatly beloved by his business friends and associates.

His father was foreman of carpenters for the Railroad before him, and helped build Piers 6, 7, 8 and 9 and Elevators A, B and C. All his brothers were at one time in the employ of the Elevator Department of the Railroad, and his grandfather was an engineer on the old Valley Branch of our System. Here, of a truth, is a real Baltimore and Ohio man!

It was not, however, primarily on this account, but because of the real spirit of service which has always characterized Mr. Seal's business and social relationships, that many of his business friends, comprising not alone Baltimore and Ohio associates, but members of the Chamber of Commerce

in Baltimore (the local grain exchange), and of the Pennsylvania Railroad and Western Maryland Railway, held a subscription dinner in his honor at the Merchant's Club on the night of January 28. About 150 men subscribed to the dinner with the full intentions of being present, but the worst snow storm of the last twenty years in Baltimore made it impossible for many of them to be there, and the accompanying picture shows the assemblage present to do Mr. Seal honor.

After a delicious dinner, the toastmaster, George S. Jackson, the president of the Chamber of Commerce, called upon President Willard for the first address.

Mr. Willard said that Mr. Seal needed no praise from any man; that his remarkable record of fifty years' service in the same department of the Company, and the honor paid him by so many of his business associates, not alone from the Railroad family and outside business interests, but even from the ranks of his competitors, are the best proof of his sterling worth.

He added, however, that the Baltimore and Ohio was extremely proud to have such a record made in its family, and was honored to be represented on such an occasion to pay its tribute to the principal guest of the evening.

Then, in behalf of the Baltimore and Ohio,

Mr. Willard presented Mr. Seal with a handsome sterling silver water pitcher and tray.

The Reverend William H. Morgan, minister of Mr. Seal's church, the First Methodist in Baltimore, extolled Mr. Seal as an unusual example of a man who can be for so long in the marts of trade, yet maintain a standard of integrity and fair dealing so splendid as to bring about the beautiful tribute of friendship evidenced at the dinner.

The next speaker, Maxwell C. Byers, president of the Western Maryland Railway, said that in his former association with the Baltimore and Ohio he had grown to know and admire Mr. Seal and that as the representative of a competing company he could express on behalf of himself and associates, admiration of Mr. Seal's record. He said that any company has a great asset in an employee of the type of Mr. Seal and added, humorously, that he wouldn't be accused of being uncharitable if he admitted that he was a bit envious of the Baltimore and Ohio for having Mr. Seal in its employ.

Our senior vice president, George M. Shriver, and George H. Campbell, assistant to President Willard, followed with brief but interesting and felicitous addresses; then Mr. W. E. Harris, of the grain firm of William E. Harris & Son, representing the members of the Chamber of Commerce, said a few words in their behalf in tribute to Mr. Seal.

Mr. W. W. Gessford, chief clerk, Grain Department, Pennsylvania Railroad, was then called upon and in a beautiful address, presented Mr. Seal with a handsome watch.

One hundred and fifty of the friends of Thomas H. Seal, principally those in the grain and railroad business, subscribed to the dinner given in his honor on the night of January 27. The raging blizzard which gripped Baltimore, made it impossible for more than those shown in the picture to attend. In the insert is Mr. Seal, and at the table in the background, from right to left, are: George H. Campbell, Assistant to President, Baltimore and Ohio Railroad; M. C. Byers, President, Western Maryland Railway; Daniel Willard, President, Baltimore and Ohio Railroad; George S. Jackson, President, Chamber of Commerce, and Toastmaster; Rev. William H. Morgan, Minister of First M. E. Church; George M. Shriver, Senior Vice-President, Baltimore and Ohio Railroad.

chain, charm and gold penknife as a permanent memento from his friends of the happy occasion.

After being the subject of so much sincere eulogy, Mr. Seal plainly showed that he was almost too full of feeling for words. However, the sincerity of his response was felt by all of his friends present, and his reference to the status of the grain business when he first became connected with the Baltimore and Ohio, was greatly enjoyed.

Another member of the Chamber of Commerce, Mr. B. H. Beer, then added an appropriate touch of fun to the evening, making an informal talk to the effect that careful investigation had showed that in the long ago Mr. Seal's forebears had been lineal descendants of Abraham and had lived in Russia. In this he was alluding jocularly to Mr. Seal's reputation in safeguarding so closely the interests of the Baltimore and Ohio in his business deals. In token of the discovery, in walked a good actor, garbed as a Jewish Rabbi, who, with faltering steps, advanced to Mr. Seal's place at the guest table and presented him with a high silk hat.

The only disappointment of the evening was that which was felt for the subscribers who were unable to be present. The fewer numbers there, however, made for greater congeniality and a closer spirit of friendship. Good musical selections were taken up by the diners in chorus and the rollicking tune and words of "He's a Jolly Good Fellow," fitly expressed the spirit of the occasion.

The food which was unserved was not wasted. It was sent to the Unemployment Bureau of the American Legion and to the Buddy Club of Baltimore for the use of the unemployed ex-Service man. This was arranged by Mr. Gessford, chairman of the Dinner Committee, and his associates, Mr. J. A. Peterson, elevator agent, Western Maryland Railway, and James N. Wells, chief clerk to superintendent of elevators, Baltimore and Ohio.

And to cap the climax, on the day following the dinner, Mr. Seal was further blessed by the arrival in the home of his daughter of a baby girl, the first child born who will have the honor of calling Mr. Seal "Granddaddy."

"The Public Be D-----d"

Melville E. Stone Reveals the Origin of This Famous Phrase

ALL have heard repeated many times the familiar phrase, "The public be d-----d," but few of us know the truth about its origin.

Mr. Melville E. Stone, for many years editor and proprietor of the Chicago "Daily News," tells us, in an article recently written for "Collier's Weekly" and copyrighted in 1921 by P. F. Collier & Sons Co. that:

"Back in 1882, Clarence Dresser was a free-lance reporter in Chicago. He was of the offensively aggressive type—always importunate and usually impudent. Such reporters are not the best, and Dresser had,

because of his tireless audacity, proved a failure as a news gatherer and been employed and speedily dismissed by all the papers. Then he became a free-lance. He prowled among the railroads, gathered what he could, betrayed confidences generously and sold his output at "something" an article.

"One evening Mr. William H. Vanderbilt arrived with some friends. He was on his private car which was sidetracked in an out-of-the-way corner of the Michigan Central yards. Dresser learned of his whereabouts and posted off for an interview. Mr. Vanderbilt was at his dinner, but it was useless. Dresser forced his way in and cheerily accosted the magnate. Intrusion of this sort was not uncommon with him. He was not abashed when Mr. Vanderbilt said sharply: 'Don't you see, sir, that I am engaged?' 'I want an interview,' replied Dresser. 'Well, sit down at the other end of the car until I have finished dinner and I will talk with you,' replied Mr. Vanderbilt. 'But it is late and I will not reach the office in time. The public.....' This was too much for the infuriated Mr. Vanderbilt, who interrupted his tormentor with the ejaculation: 'The public be d-----d; you get out of here.' Dresser scurried off to the 'Daily News' office, told the story in great glee and wanted to sell an article based on Mr. Vanderbilt's phrase which he had extorted: 'The public be d-----d.' But the night editor of the 'Daily News' would have nothing to do with it. Instead, he roundly denounced Dresser for the whole business.

Then Dresser went off to the Chicago 'Tribune' and, cautioned by his experience at the 'Daily News' office, avoided any suggestion that he had aroused Mr. Vanderbilt's anger, and made a sale.

The result was the publication which did the railroad business incalculable damage, and as much as anything led to the agitation

which followed against transportation companies."

So here we have the unromantic truth about the famous phrase. What would you have said had you been Mr. Vanderbilt, and how would you feel if some careless phrase from your conversation today was flung to the world tomorrow in a newspaper headline?—*Southern Pacific Bulletin*

Personal Note

Fri. Jan. 13

Mr. & Mrs. O. U. Watt reside at Heintz-town 57 miles from Pickleville on The Cucumber Vallee Railrud. Can you relish that?

Watt has bin train man on this road for years; in fact he met his wife ridin between stashes in the same seat, so the conducter sez. He or'ta no.

Peepull who frequents the pickle countri says Mister and Misus has 13 of the lovlitest watts (children) they ever seed, and you can't tell one watt from the other watt, so watts the use sayin more?

PRESIDENT'S OFFICE:

Personal and Confidential.

October 6, 1921.

Mr. Daniel Willard,
Care Baltimore and Ohio Railroad Company,
Baltimore, Maryland.

My dear Mr. Willard:

In coming from Washington to Chicago, leaving Washington at 6.40 (the number of the train I have forgotten), I was very greatly pleased by the diner service at breakfast and luncheon on Sunday. I did not eat dinner on the dining car, as it was cut off, but on Sunday morning and at noon it was as good dining car service as I have ever experienced. The steward in charge of the car was J. S. Warde.

Mr. Edward Chambers, of the Santa Fe, was on the train and commented most favorably. I told him I was going to write to you.

Very truly yours,
(Signed) HENRY M. ROBINSON.

Aunt Mary Says:

"Wheelin' Division Folks Dance to the Tune of Snow Men at Their Fifth Annual Ball"

MARY," sez Ezra to me on the day after Christmas, "did ye ever hear that old yarn about the greatest engineerin' feat what wuz ever performed?"

"No," sez I, real curious like.

"Har, har!" he laughs, "it's Wheelin' West Virginny up the Ohio River."

"You don't say so!" sez I, "an' how did they ever wheel it? It must a-took a monstrous big wheel barrow."

"They ain't done it yet," sez he, "but Mr. Garvey sez they're goin' to do it on the 29th. Ye'd better take your carpet bag an' run 'long to see what 's goin' on."

"Huh!" sez I, "ye're anxious to get rid o' me, ain't ye? Must be that you're thinkin' o' cuttin' your eye at that Widder Slocum while I'm gone. Let me tell ye, Ezra Hezekiah, ye can't get rid o' me that easy. Anyhow, I ain't carin', 'cause it ain't no use you makin' believe you're young; you always pay up for it in the end, an' if you know what's good fer you you'll get to bed by ten o'clock every night."

"Gee whiz!" sez he, "you talk as if I wuz ten years old."

"Don't act like you be much more'n that sometimes," sez I, an' then I knowed I'd done said enough.

So, when the 28th comes along, I packs my carpet bag an' takes my new silk umbrel what I got fer Xmas, an' beats it fer Wheelin'.

I had what you might call a uneventful trip. Didn't nothin' particular happen that night; I didn't fall outen the upper berth; I didn't try to sleep in the little hammock. Only one thing I didn't like much an' that was that 'ere little basin in the wash room. A lady wuz washin' her face in the big one, an' I tried to wash my face in the little one, but couldn't find no stopper. Reckin somebody must a-lost it.

Howsomever, next mornin' after I had finished breakfas', I went into the sleeper an' set down. I happened jest then to glance down the aisle an' caught sight of the top of a head o' white hair. I knowed that head; I never coulda mistook it fer anybody else than our own Mister Wood, of the Welfare Department. My, but I wuz jest as glad to see him as if I'd

a-been a billy goat who'd suddintly spied a tin can. In a little while somebody else appeared on the scene, as it were, an' a pretty good-sized background he made, too, fer it was Brother Sturmer. Well, we got to talkin' 'bout the times when we wuz all young together, when up comes District Freight Agent Marsh, with his foot all tied up in a sling. Reckon he musta been walkin' on strange ground somewheres, but his story wuz somethin' about tryin' to kick a bucket.

We had a jolly old time, each one of 'em tellin' yarns to see which could tell the biggest. Mr. Sturmer declared that he used to ketch trout in a certain stream. Mr. Marsh sez it warn't so; 'twuz bass; then 'long come the conductor, who declared 'twuz German carp. Well, time went on, an' in no time we arrove at Wheelin', where Brother Garvey, as fat an' sassy as ever, was waitin' to meet us.

"Be you all ready fer the big ball, Brother Garvey?" asked somebody.

"You bet," sez he. "All I got to do is go home an' get the missus."

Well, all you could see in Wheelin' wuz folks runnin' to an' fro an' to, an' gettin' ready fer the big party, what the Welfare Association wuz givin'. By eight o'clock they wuz all set. The one hall wuzn't big enough, so they got two. One wuz fer the young folks to dance in an' one fer sech dancs as quadrilles, Virginny reels, etc. The decorations wuz beautiful. In the big hall there wuz snow a hangin' down from the high ceilin, an' icicles fallin' down jest as natural. I had to get up in the gallery to see that them snowflakes had strings tied to 'em. I reckon that's what one brother meant by remarkin' to another that he bet there wuz strings to this here affair somewheres. Settin' at the ends of the platform near the bandsmen there wuz two great, big snow men. One of 'em wuz s'posed to represent Mister Garvey when he's hungry—that's the one with the smallest front—an' the other one wuz s'posed to show how he looks after finishin' a chicken dinner.

It all looked so nachural that I sorter expected to see some of them Wheelin' Veterans come slidin' down from the ceilin' on

a bob-sled. But nothin' like that happened. The folks kept a comin' an' comin' 'till I reckoned all of Wheelin' must 'a' been there. Just when I reckoned the halls had all in 'em that they could hold, along comes Captain Fletcher with a crowd from Fairmont. There wuz also folks from Holloway, Benwood, Parkersburg, an' from most everywhere all over the world. Fourteen of 'em, under command of Captain John Doyle, came from Newark. They had such a big time that them big Wheelin' newspapers had reporters squeezin' all through the crowds an' huntin' up news.

"Aunt Mary," sez one of 'em to me, real respectable like, "who is that tall, good lookin' man standin' over by the stove?"

"That," sez I, "is our General Superintendent Scott. He sez he's havin' a fine time, but it takes every minute of his time lookin' after his little son Jimmy, who threatens to fall into the tub of orangeade. The 'boys' is mighty glad to have him with 'em tonight. That tall, dark-haired man talkin' to Mr. Scott is Mr. Redding, superintendent of the Wheeling Division of the Pennsylvania Railroad. Mrs. Redding is with him. Ain't neither one of the three dancin', but if I ain't inistaken, I see at least three feet keepin' time to the music. There is two orchestrys; one is Stupp's, the other Jones' Novelty Entertainers."

"Who is that gentleman just walkin' in, the one that's bowin' an' smilin' so pleasantly to everybody?"

"That," sez I, "is Mayor Thoner, of Wheelin', who will make the address of welcome. There's Mister Superintendent Gorsuch, too. I hope he's got on the gum boots he sez he wuz goin' to wear."

"Then," sez that fellow, who wuz the curiousest person I ever seen, "who might that big fat man be?"

"That's Mister Sturmer, grand president of the Veterans; he's from Baltimore. There's also Mister Wood, chief of Welfare, an' District Freight Agent Marsh, all dressed up, an' a whole lot of other folks. Now run along, young man, or you'll be wantin' to dance with me next thing I know, an' Ezra sez I can't dance with nobody but Veterans."

So he run along, an' I got a chance to set down for a minute an' look over the program, which wuz one o' the best I ever laid my eyes on. Do you know Lew Foster, manager of the Wheeling Telegraph office? Well, he's the fellow who's responsible fer that program. It wuz in the form of a Baltimore an' Ohio mileage book, each coupon bein' good fer a dance. On the last sheet wuz the program of the entertainment, which, on account of the large crowd bein' a sort of movin' audience, had to be cut short. There wuz lots of compliments about the program, even from President Willard, who wuzn't able to be present.

Mr. Garvey gave the openin' address, which wuz followed by an' inspirin' talk by Mayor Thoner. Then come songs by Miss Marie Haveron, Miss Lois Wilson and Miss

Marie Slatterick. One of the selections given by Miss Slatterick wuz the song "Shenandoah," which wuz writ by Mister Billy Shelton, operator at Cleveland, an' a gal named Peggy.

The musicians wuz all dressed up in funny caps an' jazzed to their hearts' content. The young folks danced in the big hall, while in the little hall the Veterans held sway. They say that Captain Fletcher swallowed a pint of Scott's Emulsion to limber up his knees.

"Jimminy!" sez Mr. Sturmer as he wiped the perspiration from his neck, "Who sez dancin' ain't hard work?" He didn't know I heard him say it, but I wuz listenin' with both ears. After awhile I heard him tell the brethren that it warn't right to grab any lady, but that each one must grab his own partner. That's where the hard work come in—getting back his partner.

Standin' over on one side an' shakin' his left foot up and down wuz Engineer John Cummins, who has 52 years on his service record as engineer between Wheeling and Grafton, an' he's still goin'.

Somebody please tell me who wuz the lady settin' up in the gallery alongside a certain white-haired gentleman? I'd like to know, fer I want to interdooce her to Ezra some day. She might come in handy when I've left him to cook his own breakfasts an' sew on his own buttons. Standin' sorter between the doors wuz our old friend, Jimmy Craycrafft. Jimmy, as you all know wuz once a file clerk in the Motive Power Department at Baltimore. He is now with a manufacturin' concern in Wheelin'. He

brought Mrs. Jimmy along with him, an' you kin reckon we wuz all glad to see her. I wuz also real surprised to see among the young heads that wuz waltzin' around the big hall, the smilin' face of our old friend F. C. Ackerman, who useter be in the Car Service Department when I wuz there. It shorely does a person good to see familiar faces among a crowd o' strangers. But Wheelin' folks ain't no strangers to me now; they're all my own kinfolks, fer I'm their Aunt Mary, an' next time I meet 'em on the street or anywhere, I hope they will be kind enough to grab hold o' my right hand (I keep carfares in my left) an' say, "I'm your niece, Susie Jones," or, "Don't you know your nephew Sam Skinner, no more?" Then I'll feel real glad like.

An' I mustn't forget to tell you about Angela June Applegate. Angela June is that pretty little light-haired gal who writes things about the Wheelin' Division fer the MAGAZINE. An' that nice little feller whose picture you see standin' all by hisself is L. W. Wetzel, who also sends news from up there. If you don't believe they make a pretty good pair o' MAGAZINE correspondents, just turn to the Among Ourselves Department an' read their notes.

After a little while, it didn't seem like no more'n a half-hour to me, Brother Garvey sent out a search warrant ter me, an' said 'twuz time ter old folks like me to be in bed. I looked at the Ingersoll town clock what I carry around on my left wrist an' found to my surprise that it was half a hour past midnight. So I scooted around an' found Mister Henry Grosscurth, who had put my

hat an' shawl away fer me—an' a nice, kind obligin' man he is, too—an' started out with Brother an' Sister Garvey.

When I gets home to Baltimore, Ezra he sez to me, "Mary," sez he, "did you see 'em Wheelin' West Virginny up the Ohio River?" Then he laughed fit to kill himself.

"No," sez I, "but if it's got to be done, them folks up there kin do it."

After the ball the Committee passed the following resolution:

BE IT RESOLVED, that we, Committees and Employes use this means of extending to Mr. J. M. Scott and Mr. C. B. Gorsuch, our most heartfelt thanks and deepest appreciation for the loyalty and co-operation shown in furnishing special trains for the conveyance of employes from various points on the Divisions, thereby contributing in a large measure toward making the Fifth Annual Ball the banner event of all.

A Pointed Question

She had the money and he a small job. He wished to get married very badly, but she was rather undecided. One night as they sat talking about the future, he having coaxed her into a halfway engagement, he said:

"And we'll be very careful and not run into debt and have trouble as the Sissons did. We'll always pay cash—won't we, dear?"

A suspicious look came into her face. Quickly she put forth the question. "Whose cash?"—*Indianapolis News*.

Some of those who enjoyed the Wheeling dance on December 29, and a few who did not. Left: Miss Marie Slatterick and a friend at General McCulloch's Monument. Right: L. W. Wetzel, Magazine correspondent and clerk, Superintendent's Office. Upper: Harold Sigler, Telegraph Office, Lew E. Foster, manager Telegraph Office, A. J. Sonnefeld, chief clerk to division engineer. Center: Some of the folks of the Benwood Offices—Front row: "Bill" Haythorne, "Socks" Stocking, John Cusack, "Joe" Marchani. Back row: "Bill" Keffer, Cecelia Gillingham, H. L. Chapman, J. O. McBride, H. G. Schafer, A. J. Heinmuller, Victor Haythorne and Angela June Applegate, Magazine correspondent. Lower picture—Front row: R. R. Nolan, machine shop foreman; J. P. Duffy, general foreman; A. J. Kettlewell, assistant car foreman; W. W. Copenhaver, gang foreman; L. W. Keffer, chief clerk. Back row: "Jake" Settle, laborer; J. W. Whalen, boiler foreman; F. A. Baldinger, master mechanic; H. D. Campbell, car foreman; F. A. Fawcett, gang foreman; D. K. Hull, assistant general foreman.

Vice President Fries Addresses January Meeting of Baltimore and Ohio Post 81, American Legion

THE regular meeting of Baltimore and Ohio Railroad Post 81, American Legion, was held on the night of January 17, in the Assembly Room, Baltimore and Ohio Building, Baltimore.

The members were entertained for half an hour by an interesting exhibition of magic given by Arthur D. Gans, motion picture operator of the Safety Department, who had tied up his tricks with Safety propaganda in such a way as to splendidly combine education and entertainment.

Mr. Fries first discussed the traffic conditions of the Baltimore and Ohio, explaining how seriously our merchandise loading was reduced during Federal control. He said that gratifying headway had been made during the last few years to restore this high class business to the Railroad and that constant efforts are being made also in trying to secure a larger return haul for the Baltimore and Ohio in its westward movement.

He spoke of the high percentage of coal traffic in our total business and of the enormous coal resources which are tapped by Baltimore and Ohio lines, and what an apparently unending source of profitable business this should be for the Railroad.

He outlined briefly the advertising campaign now being conducted by the Baltimore and Ohio in the national magazines, and emphasized the importance of the Capital city as the patriotic shrine of all Americans, in helping employes direct travel over our lines between large cities of the east and west. He spoke in a most appreciative way of the large amount of business brought to the Railroad during 1921 by the individual solicitation of employes outside of the Traffic Department. He said that the Baltimore and Ohio was becoming known, beyond all other railroads, as the "Road of Courtesy," and that too great emphasis cannot be placed on the value of courtesy in increasing the volume of our business. He gave some most interesting illustrations of how courtesy among our employes, over and above that regularly expected, had resulted in large and profitable passenger business which would otherwise not have come to us.

Following Mr. Fries' address a further discussion of the possibility of employes getting business was held, and Jenks B. Jenkins, valuation engineer, said that a case had recently come to his attention in which an employe, having seen a chance traveler purchase a ticket on a competing line between points also reached by the Baltimore and Ohio, had actually succeeded, and without great trouble, in persuading the man to return his ticket and purchase one over "the Best and Only."

The Carnival at the Fifth Regiment Armory on February 22 was thoroughly discussed and the members present pledged themselves to work for its success.

The following resolution was then passed after a long and earnest discussion:

"Whereas efforts have been made to place before Congress a measure providing for adjusted compensation, the revenue for which is to be derived from a tax on the sale of light wines and beers.

"Therefore be it resolved: that Baltimore and Ohio Railroad Post 81, Department of Maryland, American Legion, expresses its unqualified disapproval of any measure which attaches the admittedly just proposal of adjusted compensation to any political measure whatsoever.

"Moved and seconded that this resolution be transmitted to all posts in the Department of Maryland, to the headquarters of all State Departments, to the two United

Beaten Paths

I had an appointment
With a woman
In Washington.
I'd never seen her,
But when she opened
Her door,
I was glad
That I had come.
She looked like a woman
With a head on her shoulders
And a heart
On her left side—
Or the right—which is it?
She was a woman,
Broadminded,
And with an education
That could have come
Only through travel.
Before I told her
My mission,
I had begun to wonder
If she might be
One of the patrons
Of the Baltimore and Ohio.
We talked, and talked,
And talked,
As women will.
Presently she suggested
A cup of tea.
Now if there's anything
That puts me
In good spirits,
It's the suggestion
Of a cup of tea.
I refused it,
But only because
I didn't want
To give her the trouble
Of brewing it.
But my heart was grateful
Just the same
As I said,
"I thank you,
"But I expect to leave
"In a few minutes
"For Baltimore,
"And I shall get a bite
"On one of our diners.
"By the way,
"Have you ever eaten
"On our diners?"
My hostess smiled.
"No," said she,
"I'm sorry to say

"I've never travelled
"On your Road."
"Then," I said,
"You have a treat
"In store for you.
"Would you mind
"Telling me why?"
She replied,
"Not at all.
"I go to New York
"Quite frequently,
"But always on
"The Blank Railroad.
"Our family
"Has always used it.
"But there's no reason
"Why I should not
"Use your Railroad;
"It's foolish, isn't it,
"This following
"Of beaten paths,
"When one might do well
"In trying out another?"
You may be sure
That I agreed.
"Then," said I,
"Will you try
"The Best and Only
"On your very next trip?"
She promised,
And I went home
Very happy.

* * * * *

Easy, wasn't it?
And yet, you know
There are lots of folks
Who simply follow
Beaten paths.
They're just waiting
For someone
Like you
To help them out
Of the rut,
And set them on
The right track—
And that right track
Is the one
On which runs
The Best and Only.
If you don't believe
It's easy work,
Just try it on
Mrs. Brown,
Who lives next door.

States Senators from Maryland, to the Representatives from Maryland, and to the Baltimore newspapers, with the statement that the resolution was passed unanimously by the Post. Carried."

The question of participation of our post in Legion athletics in Baltimore was taken up and the following committees were appointed on athletics and on other activities discussed: Athletic Committee: J. P. Gallagher, chairman, with four additional men of his own choosing. Committee to investigate and report on possibility of bringing former members of Brunswick post of Legion into our membership: L. B. Beck, chairman. Committee on Entertainment for Soldiers at Fort McHenry: R. L. Hause, chairman; to select own committee. Committee on Promotion of Associated Posts'

Dance: M. L. Schwarz, L. B. Beck. Committee on Post Entertainment: R. J. Wilde, chairman, E. F. Callahan, G. R. Dobbin, G. Hanecke, S. B. Miller and J. J. Whelan.

Meetings of this post are held regularly on the first and third Tuesdays of each month in the Assembly Room of the Baltimore and Ohio Building, Baltimore, at 8.15 and all men eligible for membership in the American Legion, Baltimore and Ohio employes and others, who feel that the program of addresses by the officers of the Baltimore and Ohio on current and important Railroad subjects, would be of interest to them, and who have the interests of the ex-service man at heart, are urged to join. Application cards may be obtained from the adjutant, Henry C. Weber, Mount Royal Station, Baltimore, Md.

Halbert H. Summers

Second Annual Banquet of the Kentucky & Indiana Terminal Railroad Company Employes' Welfare and Athletic Association

By J. L. Sigmon, Industrial Agent

ON THE evening of December 7, 1921, our officials, employes and friends, with their wives, sweeties, etc., gathered at the Tyler Hotel to put in a little overtime for which they had to pay. The chief server, with his assistants, placed before some 250 appetites one of the best feeds ever laid on the festal board.

As a suitable starter of the evening's proceedings, all present stood and sang "The Star Spangled Banner," and then the Rev. H. G. Connelly, pastor of the Central Christian Church, of New Albany, Indiana, offered prayer.

Then the devastation began! The whole bunch made music with Neapolitan broth and munched green olives and radishes. Grilled filet mignon chasseur, duchesse potatoes and early June peas next met their fate. Head lettuce and tomato salad, with French dressing, followed closely the disguised beefsteak. The grown-up children's hearts were then made glad with ice cream and cake, and the feast was ended with coffee and mints.

W. S. Campbell, our smiling and congenial manager and chief engineer, then made a few remarks on the achievements of the bunch on the Kentucky and Indiana, and casually remarked that, due to the excellent service rendered during the war period, at which time we went through three whole years of abnormal business without issuing an embargo, business has naturally passed through this gateway since the war to such an extent that on several days in November we handled more cars than either belt line at Chicago, and on two or three days we handled more cars than both belt lines at Chicago combined. Some record!

We had as one of our distinguished guests, Mr. Joseph Burge, President of the Louisville Board of Trade, who was introduced by Mr. Campbell and made an interesting talk.

Mr. Campbell then introduced the Rev. Connelly as toastmaster of the evening, who after the telling of a couple of jokes in the way of all good toastmasters, called on the main speaker of the evening, the Right Reverend Charles E. Woodcock, Episcopal Bishop of Kentucky.

Upon arising, Bishop Woodcock was applauded heartily, and remarked: "Now I know how a pancake feels when it is smeared over with molasses." He gave a splendid talk, of interest and profit to everyone present.

By the time Bishop Woodcock finished his talk, there seemed to be no signs of indigestion, so all joined in on the chorus of "Peggy O'Neil." Then two young men, members of the K. & I. forces, displayed excellent talent in an entertaining skit. John Bayers sang several songs, and Lawrence Caldwell imitated very cleverly a person overloaded with moonshine.

In connection with talent on the K. & I.

Walter S. Hopkins

T. R. R., we must give due credit to the orchestra, which furnished music for the evening, all members of which are employes of this company.

After the singing of "America," the floor was cleared and dancing was enjoyed until the wee small hours.

We had as guests a number of officials and employes of the Baltimore and Ohio, C. I. & L. Ry. and Southern Ry., proprietary lines of the K. & I. T. R. R. Co., as well as officials of other roads, some of whom came from other cities. We also had several prominent business men of the city as our guests.

Promotions of Division Accountants

Halbert H. Summers

HALBERT H. SUMMERS was recently promoted to the position of division accountant, St. Louis Division, headquarters, Washington, Ind.

Mr. Summers entered the Baltimore and Ohio service June 10, 1898, and was advanced successively to the positions of clerk, timekeeper, shop account clerk, assistant shop clerk, shop clerk and division accountant. Headquarters at Washington will not be new to him for, singularly, after a stay there of twelve years, his real advancement started and, after an absence of five years, he returns to be placed at the head of a division accounting office which will rank in size and importance with those of the first grade.

Walter S. Hopkins

WALTER S. HOPKINS was recently promoted to the position of division accountant, headquarters at Garrett, Indiana.

Mr. Hopkins entered the Baltimore and Ohio service on October 23, 1905, in the capacity of messenger, and was advanced successively to the positions of clerk, stenographer, timekeeper, chief clerk and division accountant.

Annual Convention of Grand Lodge of Veterans

THE annual convention of the Grand Division of the Baltimore and Ohio Veteran Employees' Association was held in the Assembly Room, Baltimore and Ohio Building, Baltimore, Maryland, on Thursday and Friday, January 5 and 6, 1922.

Grand President George W. Sturmer presided, with Grand Vice-President J. M. Garvey, Grand Secretary-Treasurer James Wardley and Grand-Sergeant-at-Arms John Doyle, attending.

Grand President Sturmer called to order the convention, which was opened by Brother Fauver's leading in prayer.

The roll call of officers developed that all were present. Credentials of the following delegates were presented, examined and found in order:

Delegates	Division	Representing
Brant, Frank H....	New York, N. Y.	130 members.
Pennell, Chas.....	Baltimore, Md.	1550 members.
Ault, R. T.....	Brunswick, Md.	260 members.
Russler, Raymond.	Martinsburg, W. Va.	201 members.
Lucas, V. J.....	Cumberland, Md.	391 members.
Kimmel, J. B.....	Grafton, W. Va.	240 members.
McGraw, J. E....	Parkersburg, W. Va.	200 members.
Conner, M. M.....	McMechen, W. Va.
Shafferman, John T.	Fairmont, W. Va.	243 members.
Brannon, Thos. J..	Connellsville, Pa.	416 members.
Orbin, Geo. N.....	Pittsburgh, Pa.	400 members.
Aiken, James.....	Youngstown, Ohio.	148 members.
Niederheiser, J. R..	Cleveland, O.	262 members.
Egan, W. T.....	Garrett, Ind.	478 members.
Wallburg, O. L....	Lima, Ohio.	262 members.
Doyle, John.....	Newark, Ohio.
Sheets, Daniel R..	Chillicothe, Ohio.	180 members.
Howden, Harry S..	Cincinnati, Ohio.	247 members.
Gilbert, F. S.....	Seymour, Ind.	172 members.
Hoddinott, John...	Washington, Ind.	255 members.
Bell, G. K.....	Willard, Ohio.

The Board of Directors, consisting of the following members, was present:

Bowers, G. A..... Baltimore, Md.
 Fletcher, H. G.... Fairmont, W. Va.
 Fauver, W. H.... Martinsburg, W. Va.
 Cox, W. C..... Pittsburgh, Pa.
 Pennell, C. H.... Baltimore, Md.

Grand President Sturmer made an urgent plea for cooperation on the part of all the Veterans, saying that in the present unsatisfactory condition of business it is particularly desirable that every member put his shoulder to the wheel and help.

The secretary-treasurer reported that he had no communications to report except those embodied in the finance report. He read the minutes of the last Grand Lodge convention at Hazelwood, Pa., on April 11, 1921, which were approved. The financial report was also approved, the balance in bank being reported as \$512.00. The remainder of the morning session was occupied by President Willard in his intensely interesting address to the Veterans, as given in another section of this issue of the MAGAZINE.

All delegates were reported present at the opening of the afternoon session. Mr. Sturmer announced that President Willard had graciously consented to address the First Convention of the Grand Lodge of the Ladies Auxiliary of the Veterans.

Under new business, a form of transfer card from one chapter of the Veterans to another, was approved and the grand secretary-treasurer authorized to supply such cards on request. The supplying of seals to each chapter was also approved and put in the hands of the grand secretary-treasurer. This officer also announced that he could supply each chapter with annual membership cards, with the proper chapter imprint shown, within four days of receipt of order, so that the membership cards on the system can be uniform.

Grand President Sturmer then appointed the following committee to go over and report on Constitution and By-laws:

Fletcher, H. G..... Fairmont, W. Va.
 (Chairman).
 Brannon, Thos. J..... Connellsville, Pa.
 Aiken, James..... Youngstown, O.
 Wallburg, O. L..... Lima, O.

(Secretary).
 Egan, W. T..... Garrett, Ind.

Mr. Sturmer referred to the statement of

President Willard in his address at the morning session on the Pension, and said that he thought that a great many employees of the Company would welcome the opportunity to make small monthly contributions to the Pension Fund with the idea of securing a larger Pension in their advanced years. After a long and helpful discussion of the subject it was agreed that the grand officers and directors of the Veterans should wait on the Railroad officers in charge of the pension, including the superintendent of the Relief Department, to discuss the matter further.

During the absence of this committee the report of the Committee on constitution and By-Laws was received and approved.

Mr. Sturmer then announced that Vice-President Galloway had given thirty tickets to the delegates to the convention of the Ladies Auxiliary for the day's matinee at a local theatre, and had also offered to assume the expenses for the entertainment scheduled for the evening at Moose Hall for the delegates. A rising vote of thanks was given Mr. Galloway.

At the beginning of the afternoon session Grand President Sturmer and Grand Vice President Garvey were asked to retire. Mr. Bowers moved that the Grand Lodge appropriate the necessary funds to present Mr. Sturmer the gold badge of Past Grand President of the Association, and to Mr. Garvey a ten dollar gold piece, in recognition of their services. The motion was received with hearty approval and passed.

Mr. Sturmer then referred to several occasions on which he had been called on to help Veterans who felt that they had been unfairly treated in respect to working conditions, etc., and that he had been only too glad to do this and had succeeded in helping adjust several such situations to the advantage of the Veterans. He was authorized to handle all such cases which might come to his attention.

Reporting on the Pension, the chairman of the committee, Mr. Fletcher, said that the committee had waited on the superintendent of the Relief Department, who had promised them all the help that he could give them; that they had then endeavored to see Senior Vice President Shriver, General Counsel Bond and Comptroller Ekin, the Committee on Savings and Pension, but that on account of their absence from the city, it was impossible to have the interview. The matter was then left in the hands of the grand president, with instructions that he report progress to the various chapters.

The following grand officers were then elected by acclamation for the ensuing year:

Geo. W. Sturmer, Grand-President... Baltimore, Md.
 John M. Garvey, Grand Vice-Pres. Elm Grove, W. Va.
 James Wardley, Grand Sec.-Treas. Connellsville, Pa.
 John Doyle, Grand Serg't-at-Arms... Newark, O.

The following were elected to the Board of Directors for the Grand Division:

W. T. Egan..... Garrett, Ind.

G. A. Bowers.....Baltimore, Md.
 W. S. Cox.....Pittsburgh, Pa.
 W. Fauver.....Martinsburg, W. Va.
 H. G. Fletcher.....Fairmont, W. Va.

The following resolution, presented by Messrs Aiken, Brennan and Orbin, was then passed unanimously:

"Resolved that a vote of thanks be extended to our Management for the courtesies extended the delegates to the annual convention of the Veteran Employes' Association, which courtesies are highly appreciated by this body."

Messrs. Aiken, Brennan and Cox presented the following resolution, which was duly approved:

"Resolved that a vote of good will and success be extended our Ladies' Auxiliary, and that they be advised of our co-operation to the end that they may be successful in every line of endeavor that they may undertake."

H. W. Fauver of Martinsburg, West Virginia, was appointed grand-chaplain by the grand president, and the convention adjourned to meet next year at Newark, Ohio.

An entertainment was given on Friday night, January 6, at Moose Hall, to which all the delegates were invited. The program rendered was good and was enjoyed by all present—about 650 persons. C. W. Galloway, vice president of Operation and Maintenance, was the speaker of the evening. His address will be reported in the *MAGAZINE*. Dancing was enjoyed until a late hour.

Messrs. Sturmer and Garvey were presented by Mr. Bowers with the tokens given them by the Grand Division Convention and both expressed their appreciation of the thought that prompted this act of courtesy on the part of the delegates.

"Ladies, Sisters and Friends of the Baltimore and Ohio Veterans' Association: It is with great pleasure that I meet you here this morning. We have been associated for a number of years, and now you have come to the conclusion to gather together in a grand body.

"This body is represented by delegates from all divisions. No organization is successful without the help of the ladies. The ladies have always taken part in all of the outings of the Veterans. It is through you particularly that social and moral betterments are possible. (And right here let me say that I do not believe that I would have ever gained what grace I now possess, had it not been through the love of the wife that I have.)

"I am satisfied that when you get down to business your influence will be that of harmony and peace. We are looking toward a great future. Our officials have proved themselves to be our friends, and our associations have proved that they are with us.

"I wish now to place in position your temporary officers. Your by-laws and constitution are practically the same as those of the men; what rules and regulations are made will not conflict with those of the general organization. We have recently had at least a half-dozen requests from other railroads for data concerning the organization of our Veterans' Association. This is only a proof that we have given good results. The Pennsylvania Railroad Veterans are using our by-laws in organizing their chapters. We are the fathers of the Veterans' Association. Baltimore and Ohio, first, last, and always!"

Ladies' Auxiliary Forms Grand Lodge

ON January 5 and 6, when representatives of the various chapters of the Baltimore and Ohio Veteran Employes' Association assembled in Baltimore at the annual meeting of the Grand Lodge, the Ladies' Auxiliary also gathered together its delegates and alternates for the purpose of forming a grand body. The meeting was held in the Hotel Condon, Baltimore, at the same time that the Veterans' meeting was being conducted in the Assembly Room of the Baltimore and Ohio Building.

Some of those who came from distant

points arrived in Baltimore the day before, in order to get well rested up for the big job that was ahead of them; others who had never seen Baltimore came in time to get a peep at the headquarters of the Baltimore and Ohio; still others arrived on Number 4, which brought them into town just in time to get breakfast and get to the meeting, which took place at 9.30 a. m., on Thursday morning.

The meeting was opened by Brother G. W. Sturmer, grand president of the Veterans, who addressed the ladies as follows:

SOME OF THOSE ATTENDING THE GRAND LODGE CONVENTION OF THE VETERANS

Left to right, front row, are James Wardley, grand secretary and treasurer, Connellsville; George W. Sturmer, grand president, Baltimore; John M. Garvey, grand vice president, Elm Grove, W. Va. Middle row: F. H. Brant, delegate, New York; J. T. Shafferman, delegate, Fairmont; J. Riley, visitor, Baltimore; G. A. Bowers, member of board, Baltimore; H. S. Howden, delegate, Cincinnati; T. J. Brennan, delegate, Connellsville; O. L. Wallburg, delegate, Lima; J. Doyle, delegate, Newark; W. T. Eagan, delegate, Garrett; G. K. Bell, delegate, Willard; M. Horan, visitor, Fairmont; R. Russler, delegate, Martinsburg; D. R. Sheets, delegate, Chillicothe; J. Hoddinott, delegate, Washington; James Aiken, delegate, Youngstown; H. G. Fletcher, member of board, Fairmont; F. M. Keane, visitor, Grafton; J. E. McGraw, delegate, Parkersburg. Front row: W. S. Gandy, visitor, McMechen; J. M. Quinn, visitor, Parkersburg; E. F. Augustine, visitor, Parkersburg; J. R. Neiderheiser, delegate, Cleveland; G. N. Orbin, delegate, Pittsburgh; C. H. Pennell, delegate, Baltimore; W. C. Cox, member of board, Pittsburgh; J. B. Kimmel, delegate, Grafton; V. J. Lucas, delegate, Cumberland; J. F. Martin, visitor, Brunswick; C. A. Richardson, visitor, Baltimore; M. M. Conner, delegate, McMechen.

Mr. Sturmer then appointed Mrs. Frank Howard as temporary president; Mrs. Howard thanked Mr. Sturmer; then Mrs. Joseph Wallburg was appointed as temporary secretary. In leaving, Mr. Sturmer said:

"I wish you God-speed. Let harmony and friendship prevail in all your undertakings. I thank you."

Mrs. Howard then explained that the gavel to be used in this meeting was made by a Baltimore and Ohio man at Mt. Clare Shops; it was one used by the I. O. O. F., and had been loaned to the Ladies' Auxiliary. Mrs. Howard proceeded as follows:

"Ladies, you understand that we are assembled here to organize a Grand Body of the Auxiliary to the Baltimore and Ohio Veterans' Association. The West has come to meet the East. We have come representing the auxiliaries from the various divisions from different states, with a oneness of purpose, to lend our presence to the uplifting of our people, to the upbuilding of our organization. So, in our happiness of today let us not forget the responsibilities of the work before us. The deeds of today make the history of tomorrow.

"Yes, the West has come to meet the East. Next year we hope to have the East come to the West. There we shall greet them, not only with a smile, but with a warm and hearty welcome. We hope that our aim may be one of peace and harmony in all of our undertakings.

"I consider it a pretty compliment that Grand President Sturmer has bestowed upon me, and a great honor that he has conferred upon me by placing me in this chair to open the meeting and to 'start the ball rolling.' And you, my sisters, will you help me? Will you help me to help the brothers in their efforts to build up the organization of which they are so proud? May I ask this of all of you?

"Perhaps you do not realize just what this means to all of us and our families. But let us stop and think. We, as a class of railroad people, have the ability to do things, and great things, just the same as any other group of people. We are a proud people, and stand firm to believe that we *can* do, we *should* do, and we *will* do; that we will go on and on and show to the world that where there is a will there can be made a way to do all these things that we would like to do.

"Now, for instance, by request of our men we are forming a grand auxiliary. Just see the results. Look over the field that we, as women, have travelled, the things that we have done to bring our railroad men and their families together. Why should we not do all that we can to make the evenings of the lives of our Veterans happy? My husband and your husband—they have done and are doing much for us. They are faithful helpers of their employers, they have given generously of their strength and efforts to please them, they have not shirked their duties or the responsibilities

of the demands made of them. They are still trying to please, and well may their employers say that they are their tried and faithful coworkers.

"And so, my sisters, we have given the forming of this grand body our earnest consideration, and upon all of us, our voices and influence, our willingness to work, our efforts to do good—upon all these will depend the work of this body of women. Again, we ask your help."

Since no delegate had been elected for the Baltimore Chapter, Mrs. G. A. Bowers was appointed to fill that position. Mrs. Bowers chose Mrs. Wall as alternate. Mrs. Howard then requested that the delegates, alternates and visitors come forward and receive their badges. The delegates were then seated to the left of the president's chair, the alternates at the right, and the visitors in the rear of the room. The question came up as to whether or not the divisions whose chapters had sent no delegates should be represented by a vote. It was decided to give no vote to divisions not represented.

Mrs. Howard requested a visitor to open the Bible. The meeting was then officially opened by the singing of "America," and by the Lord's Prayer. The election of officers followed.

Mrs. Frank Howard of Newark, Ohio, was unanimously elected grand president and Mrs. J. M. Garvey of Wheeling unanimously elected grand vice-president. In a speech of acceptance, Mrs. Garvey said: "When we stop to think of our men and of their years of service, we can well be proud of those who railroaded even before the days of the caboose. Our men are noble, but our women have made them so. We can make our Association what we wish it."

Mrs. Otto Wallburg of Lima, Ohio, was unanimously elected grand secretary, and Mrs. G. A. Bowers of Baltimore, unanimously elected grand treasurer.

Other elections were as follows:

Chaplain, Mrs. W. E. Hodel, Grafton, W. Va.; inside marshall, Mrs. H. C. Allgire, of Brunswick; outside marshall, Mrs. Hopper, of Garrett, Indiana. Mrs. F. M. Keane, Grafton, W. Va., was appointed grand marshall for the installation of these officers.

The marshall then stood with her right hand on the Bible, while the others who had been elected stood, each with a hand on the shoulder of the one before her and repeated the oath of office. The marshall then placed the officers in their respective positions in order that they might hear the duties which were required of them. Then all members and officers arose to receive a word of greeting from the president, after which the Mizpah benediction was repeated and the meeting adjourned until the afternoon.

At 1.30 p. m., the meeting convened. Committees were appointed as follows: Press committee—Mrs. Bowers, Mrs. Hopper, Mrs. Sheets; Courtesy Committee,

delegated to Pittsburgh, Grafton and Cumberland; Credential Committee, delegated to Lima and Willard; Arrangements Committee, Newark, Youngstown and Connellsville; Memorial Committee, Washington, Garrett and Martinsburg; By-laws Committee, Mrs. Garvey, Mrs. Gandy, Mrs. Wallburg, Mrs. Smith, Mrs. McGraw. Following this there was a discussion of by-laws. A motion was made to adopt a new pin for the members of the Auxiliary. This will bear the name "Baltimore and Ohio," instead of the "B. & O.," on white enamel. The old pin, however, holds good, as long as its usefulness as a pin is assured, but no more of the old variety will be made.

The president then asked for volunteers to go to help with the organization of chapters on railroads other than the Baltimore and Ohio, who had asked for such service. A number of those present signified their desire to help in this work whenever requested by their president to do so.

It was then made known that wives of the Veterans at Cleveland and Cincinnati are anxious that Ladies' Auxiliaries be organized on their divisions.

Many interesting reports were given when the president requested that each delegate tell something of the work on her division. Mrs. Charles Shipley extended to the Grand Lodge a welcome to the city of Baltimore. She told of the growth of the Baltimore Chapter to its present membership of 485, and that the underlying principle of her membership campaign was "Feed 'em." She wished success to all and pledged her support and that of the Baltimore Chapter to the Grand Body. Mrs. Shipley then extended a cordial invitation to the members to meet with the Baltimore organization on the afternoon of the next day.

One of the interesting reports was given by Mrs. Hopper, representative from Garrett, Indiana. Mrs. Hopper said that the Garrett Chapter was organized one year ago. Practically all of the town is composed of Baltimore and Ohio folks, so it was suggested that the Ladies' Auxiliary do something toward improving the grounds around the town library, which is supported by the people individually. A rummage sale was held and over \$300 was realized. They expect to put in a hedge and to buy some new books for the library. Neither the Ladies' nor the Veterans have had a good meeting place; oftentimes the men have not met at all. So, as a last resort, the Ladies' offered to pay rent for a meeting place for them all. They then set about to get the organization together. The Ladies provided an entertainment for the Veterans; about 60 were present, and they had a fine time. Mrs. Hopper is expecting greater results from the meetings during the coming year.

Mrs. Harrod, Washington, Indiana, said that the Veterans' Association at that point began with a chapter membership of 5 men and 4 women. They now number 250 and 41, respectively.

Mrs. J. M. Garvey, representative from Fairmont, told of their Hallowe'en balls, Thanksgiving parties, and other social activities. Said Mrs. Garvey, "Our Auxiliary was the fourth on the System to be organized. We do not confine our social events to meeting nights; we have such a good time at our parties that we have one for nearly every holiday. I travel 80 miles to my meeting on every third Saturday of the month."

Mrs. Howard told of the penny march for flowers, of the social affairs, musical programs, and membership teams—all of which make up a part of the meetings of the Newark Division Auxiliary. The charter membership of this chapter was 58; there are now 328 members, the Veterans of that chapter numbering over 600.

The meeting of the first day closed with a tour of the Baltimore and Ohio Building. On their visit to the third floor, where the offices of the president are located, they were met by James S. Murray, assistant to the president, who escorted them on a tour of these offices. For this courtesy the ladies express their sincere appreciation.

The important feature of the meeting of the second day was an interesting address to the Grand Lodge by President Willard. He told them of the many things they could do toward making their own homes pleasant and agreeable for the railroad man. He reminded them of the necessity of harmonious environments for the men in order that they might properly and faithfully attend their daily duties. He cited as an example the purpose of the Dinner Pail Contest which was carried on through the Magazine last year, and explained how each woman could do her share in working for the welfare of the Baltimore and Ohio Family.

The Ladies then voted that Mrs. Willard be made honorary member of the Auxiliary. Mr. Willard accepted in her name.

Mr. Bowers, ex-president of the Baltimore Chapter of Veterans, then gave an interesting talk on the work of the pensioners. Following this came the reports of various committees. It was then announced that Newark, Ohio would be the meeting place for next year's annual convention, and that the annual picnic would take place at Buckeye Lake, in June, 1922.

Mrs. Howard was then presented with a handsome umbrella, the gift of the representatives of the various divisions. The meeting adjourned with the singing of "God Be With You 'Till We Meet Again."

Ladies' Auxiliary of Martinsburg Serves Banquet for Veterans and Their Families— A Sermon without a Moral

Text: Brethren, beware of Martinsburg, lest the ladies of that city press food upon you so that ye become too full for utterance.

—From Brother Bowers' Book of Experience.

Brethren and Sisters:

When I look back with a retrospective eye and an overloaded stomach, I am constrained to make a few remarks concerning the dangers that may beset mortals who heed not the warnings of their physical makeup and insist upon attending the banquets at Martinsburg. However, the principal reason for my presenting the subject in this manner was inspired by a passage of well-chosen words, let fall by a Pullman porter on train No. 1. They were as follows:

"I hear dat dem Martinsburg **Reverends** is gwine to hab a banquet tonight."

How the word **Veteran** became so changed as to signify **Reverend** is beyond my power

to explain, but, speaking from a spiritual standpoint, there were, to my knowledge, three perfectly good reverends present at the banquet, which perhaps accounts for the statement. I shall now proceed to speak of some of the happenings at this banquet, if you will bear with me for a few moments. Thus may the warning be more strongly impressed upon your minds so that ye may be more inclined to heed the words of good advice.

On the evening of January 26, the Veterans, their wives and families gathered together for their annual banquet. Verily, when the hour of eight proclaimed the time for the beginning of the festivities, lo, the banquet hall was already overflowing with the spirit of good will and a goodly array of eatables, and persons numbering two hundred.

And verily, 'Brother W. L. Stephens stood at the door to see that nobody entered to enjoy the festivities without first presenting credentials.

Immediately, therefore, the election of officers began. The nominations had already been made, and the election was but a matter of a few moments, and verily, this pleased the hungry throng, for the odors of chicken, and ham, and potatoes and gravy, and coffee, and slaw, and salads, and baked beans, and celery, and rolls, and jellies, and ice cream had begun to prey upon their nostrils; and the tables had also become pleasing unto the eye. With their decorations of candies and baskets of flowers, the hall had become transformed into a veritable paradise, from whence no traveller would wish to return. For the ladies of the Auxiliary did credit unto their lodge and unto their husbands.

And I say unto you that the slaughter of chickens was great, and with gusto were

They took a trip to Niagara Falls, did these members of the Baltimore Chapter, Ladies' Auxiliary. They are standing, left to right: Mrs. Anna Riley, Mrs. Elizabeth Dill, Mrs. G. A. Bowers, Mrs. Julia M. Kinsey; seated, Mrs. Catherine Cox

they devoured. Thirty of them, said Sister Auld, had had their necks chopped off in her back yard. (I trust that the good sister realized the value of chicken-head soup.) And behold there was Sister Keedy, garbed in an apron of muslin fabric bedecked with bouquets of gingham. And she and the other good sisters not only served well, but also entertained the guests. And the smile of Sister Copenhaver was fair to see, and the ears of Sister Taylor were open wide for news for the MAGAZINE; and Sister Burkhart gathered in members for the Ladies' Auxiliary between the plates of ham and potatoes; and the noise that was made among the dishes which were passed to and fro was pleasing to the ears, for verily, it was as of the buzzing and humming of a swarm of honey bees. save that the ladies here represented needed no honey to render them sweet.

Soon there came the Cumberland Shop Band with all of the necessary accoutrements, including Signor De Luca and Ed. Warner. And verily, I say unto you, that these brethren did play. And the music thereof was sweet and altogether magnificent, so that one sister expressed the wish that this band might play at her funeral. And lo, when the band began an old-fashioned medley, the "Mocking Bird" indeed set many feet a patting; and "Oh, Suzanna!" became too much for the feet of Engineer Tom Foreman, who cut a pigeon wing at one end of the platform; and at the sound of "Turkey in the Straw," the ladies jigged back and forth from the kitchen as they brought in dainty morsels to feed the extra hundred people who had arrived. But the climax of the evening's foot shaking came when Brother and Sister Burkhart and Brother and Sister Copenhaver executed a square dance at the end of the room.

And behold, Brother Fauver, in a strong and appealing voice, brought unto the assembly a stirring message, for Brother Fauver is a man who dares to speak his own

thoughts, and the esteem in which he is held by his fellow men was expressed when they re-elected him as president for the ensuing year. Brother Fauver's remarks were beautifully illustrated by the singing of a hymn by the male quartette of the United Brethren Church, of Martinsburg. These brethren also added much to the enjoyment of the evening by rendering a series of gay songs. Dear to the Veterans also was the good old song, "When You and I Were Young," sung by Mrs. Annie Kilmer, accompanied by Miss Grace Fauver at the piano, and Mr. Lee Wolford, violinist.

The man who was scheduled as speaker of the evening, Ex-Governor Cornwall, was ill, and therefore was unable to be present; his place, however, was nobly filled by Ex-Senator C. J. Faulkner, honorary member of the Veterans' Association and Company's counsel. He brought to those assembled the regrets of Mr. Cornwall; he paid a noble tribute to the women, and told the men of what importance each one can make himself in the progress of the Country, for, as he said, there is no greater business in the world than that of transportation. "Brethren," said he, in conclusion, "my Veteran's card dates back to 1868; there is only one man ahead of me; this man is 81 years old, and at the expiration of 40 years, he retired. I am still going."

And behold, when the applause which had followed this speech had ended, Brother Wood, chief of Welfare, was called upon to speak. And he spoke. And the words of his mouth sank deeply into the hearts of his hearers. He spoke of the illness of Brother Sturmer and of his regret at having to be absent; and he voiced the sentiment of the assembly, for truly Brother Sturmer's familiar face was missed from its accustomed place. And Brother Wood spoke of the importance of transportation to the race, of the progress of the telegraph, the telephone, the airplane, and of the effects of these inventions on posterity.

Then Brother Bentley, of the Maintenance of Way Department, Baltimore, took up the thread, speaking of the unsettled condition of the railroads, and of the manner in which the Veterans could help to remedy this condition, and of the opportunities of railroad men.

Now, Brethren, comes the sad part of the story. Brother Bowers was introduced, but, like the virgins in the parable, he was not ready. But, strange to relate, his lamp was filled to the brim, so filled, indeed, with the good things which the women had prepared for him, that he was scarcely able to rise. And he had never ceased eating from the time he had seated himself at 8.00 o'clock until the minute when his name was called to speak. And the very chair creaked as he arose. And it became a great labor for him to speak. However, despite these obstacles, he paid a tribute to the officers and to the men of the Railroad and expressed himself as being satisfied with the amount of nourishment provided for him. But verily, had he known what was happening while he was in the midst of his address, the words had frozen on his lips; for lo, the sisters removed the food from the table, so that when he seated himself again, there was no more to be had without the consent of Sister Bowers, who, be it known, was not anxious that he should suffer with another attack of the gout. And Brother Bowers was exceedingly sorrowful, but we have learned since that the good sisters acted wisely.

Now, Brethren and Sisters, I would not neglect to mention the presence of Rev. W. A. McKeefrey, who offered the grace before meat; nor that of Reverend Wagner, of the

Our Locomotive Engineers Will Be Glad to Read This Letter

Mr. Kenneth P. Allen, Consulting Electrical Engineer, Uniontown, Pa., wrote us on October 3. The last portion of his letter reads as follows:

"It might interest you to know what one of the leading coal operators told me last week. We were on our way to Pittsburgh and I asked him if he traveled the Baltimore and Ohio very much. He replied that he hasn't traveled any other line, except when in Europe, for fifteen years. As for myself, I always prefer it to any other even if I have to walk a mile or two to get to the station.

"Let me ask you, how do you get your trains to ride so easy? There are very seldom any jerks and bumps. Do you have the method patented or why isn't it used on other roads?

"I will not take up more of your time but want you and your employes to know that their efforts are appreciated.

"Believe me to be,

A satisfied rider,

(Signed) Kenneth P. Allen."

Lutheran Church, and his good wife, who made merry at the tables; nor the presence of good Brother Seachrist, of the First U. B. Church, who dismissed the company with his blessing.

And as the festivities were being brought to a close, we saw Uncle John Ketzner, displaying his fifty-year button to the young ladies who gathered about him, for, as Uncle John says, "I'm mighty young yet, and I like to talk to the ladies." And Brother Allison, of Cumberland, sat on the front row and took in everything; and Brother Auld was the busiest man in the place, for whenever anybody wanted to know anything, "Charlie" was on the job. And behold, there was Brother E. B. Huffman, general car foreman, who was too modest to make a speech; and Brother James Hartley, 82 years old, with a service record of 45 years as conductor. And

standing together, as though to sing as a quartette, were Trainmaster Grove, Assistant Trainmaster Tomry, Road Foreman of Engines L. Crambidth, and his assistant, C. H. Norris. And Mrs. Charles Lewis, from Baltimore, held forth with the women voters. And great was the assembly which gathered together. And Brother Burkhardt regaled a certain lady about the time when he was young and when he took the girls sleigh riding. And Brother Tanner looked with an approving eye upon all of the doings of his "boys" and "girls." And verily, he enjoyed them greatly.

And now, Brethren and Sisters, my sermon is ended, for the banquet was a great success. There was not one among those assembled who enjoyed not himself, and all went home happy. Now, will you all kindly remain standing while Brother Tom Foreman cuts the pigeon wing?

Three Fifty-Year Service Buttons Presented to Connellsville Veterans at Get-Together Party

By S. M. DeHuff

WE KNOW not what manner of rallies are held by the Veterans' Associations of "foreign" divisions; we are, however, in a position to say, with much certainty, that when the Connellsville sector of the clan conducts a get-together party they make 'em snappy—worth while reporting in the dispatches of the day.

On the evening of December 22, the live-wire committee on our home division, made up of Edward Lowden, Walter Haines, Anthony King, "Billy" Turner, "Jim" Wardley, "Tom" Brennen and Mrs. M. M. ("Mac") Patterson, were instrumental in making the populace of this staid village sit erect and observe one of the most interesting and enjoyable affairs ever sponsored by our association.

Through the traditional hospitality of the B. P. O. E. Lodge, all locks were removed from the doors of its local home and some 400 folks manned the card rooms, bowling alleys and ballroom in a happy, care-free spirit that must have gladdened the heart of the Right Honorable George W. Sturmer, grand president of the Association, who generously shared the limelight with other distinguished guests.

Following a short era of handshaking and acquaintance-renewing, Samuel Ervin, with a display of oratory that was pleasing to his many friends, hushed the noisy throng and very ably introduced Division Superintendent R. W. Brown, who in turn held the attention of all with an interesting address. After speaking with pleasing brevity and pointedness on the aims and purposes of the association, the genial superintendent turned his attention to the three principal honor guests of the evening. Resting his hand on the shoulders of each, he introduced in turn, Daniel ("Tucker") Hunt, Thomas Woods and Sheppard Edmonds, representing a grand total of 150 years of unblemished

service record, and, with congratulatory expressions befitting these Veterans, presented each with the association's badge of honor—the 50-year gold button and beautiful bouquets for their wifely helpmates.

Then followed dancing of every known variety: square, round, jig and that well known brand—the "hoe-down," participated in by all ages, from seven year old curly-heads to patriarchs of seventy or more. And how everyone did eat! Cake, sandwiches, ice cream and coffee formed the *pieces de resistance* and between mouthfuls, folks either danced or listened to excellently rendered vocal solos.

Gazing in retrospect at the affair and mentally reviewing it from every known angle, the consensus of opinion is that the Veterans' Association gave its members and their many friends an evening of unalloyed, 18 karat joy.

Ladies' Auxiliary at Pittsburgh Elects Officers

THE Ladies Auxiliary of the Veteran Employees' Association, Pittsburgh Division, held its regular meeting on December 6, in I. O. O. F. Hall, Hazelwood, Pa. After the members had partaken of a splendid luncheon, the annual election of officers took place. The following were elected to serve for the ensuing year: President, Mrs. Frank Applebee; vice-president, Mrs. James Martin; recording secretary, Mrs. Joseph Meehan; financial secretary, Mrs. Phillip Ellery; treasurer, Mrs. Robert Hill; chaplain, Mrs. George Peters; marshall, Mrs. John McMunn; pianist, Mrs. Peter Klaus.

On January 3, the new officers were installed, Mrs. Heberling being the installing officer and Mrs. H. K. Daugherty serving as marshall for the installation. The president appointed Mrs. Ira Nicholson as chairman of the Entertainment Committee and Mrs. Bolton as chairman of the Finance Committee for the year 1922.

The business finished, Mrs. Robert Hill recited the little poem, beginning:

"It was midnight on the ocean,
Not a street car was in sight;
The sun was shining brightly,
And it rained all day that night."

Since our last meeting, Conductor M. J. Ford has passed away. We extend to Sister Ford our deepest sympathies in her hour of bereavement.

Our meetings are interesting and we hope to have many new members this year. We shall be glad to have our Auxiliary sisters from the other divisions visit us. Our meetings are held the first Tuesday afternoon every month in I. O. O. F. Hall, Hazelwood, Pa.

We wish to all auxiliaries, as well as to our own, many more new members this year and a Happy and Prosperous New Year to all.

The President of the United States on Industrial Relations

I decline to recognize any conflict of interest among the participants in industry. The destruction of one is the ruin of the other, the suspicion of rebellion of one unavoidably involves the other. In conflict is disaster, in understanding there is triumph. There is no issue relating to the foundation upon which industry is builded, because industry is bigger than any element in its modern making. But the insistent call is for labor, management and capital to reach understanding.

The human element comes first, and I want the employers in industry to understand the aspirations, the convictions, the yearnings of the millions of American wage-earners, and I want the wage-earners to understand the problems, the anxieties, the obligations of management and capital, and all of them must understand their relationship to the people and their obligation to the Republic. Out of this understanding will come the unanimous committal to economic justice, and in economic justice lies that social justice which is the highest essential to human happiness.—Warren G. Harding.

"They greet you with a smile—" "They always try to please—" "They make you feel that the Baltimore and Ohio is the Only Road—"

"That's the reason we are giving you all our freight —"

The following letter, commenting on our service, was addressed to President Willard by the president of an important industrial concern located on our lines. The friendly actions of our employes, as mentioned, not only redound to the reputation of the Company but also result in increasing the amount of business given us. And this, in turn, results in the employment of more men and contributes to the mutual benefit of the Company and its employes alike.

Lumber Company

_____, Pa.,

December 14, 1921.

Mr. Daniel Willard, President,
Baltimore and Ohio Railroad Company,
Baltimore, Md.

My Dear Sir:

On November the 26th, I left this city on train No. 5 for Chicago, and from there I went on to the states of Washington, Oregon and California, and when I got back to Chicago I took your train No. 6 back to our city here. In the last few years I have had to make several trips out that way on account of my business, and a great many people have said to me, "how does it come you always travel Baltimore and Ohio." I have answered by saying, "because when I am on their trains those gentlemen always make me feel just the same as if I was at home with my family." From your conductors down to porters on the train, when you go into your dining cars your men always greet you with a smile, and when you are in there they are trying their best to please you and make you feel, as well, that the Baltimore and Ohio is the only road, and I wish to state, Mr. Willard, right here that this is why the ————Lumber Company is and has been sending all their freight Baltimore and Ohio. In this city alone this year there have been about 100 cars of lumber come here for us. I feel certain that at least 85 to 90 of these cars came Baltimore and Ohio, balance ————. On my last trip back from the coast the day I was coming into Chicago on the ———— R. R., three parties said to me, "what is the best road to Washington, D. C.?" I said, "take the Baltimore and Ohio, by all means, as you can't beat that road, especially for service."

The third party wanted to come as far as Akron, Ohio. I got him to come Baltimore and Ohio and these first two parties also bought tickets Baltimore and Ohio to Washington, D. C., for they got on the same train with me, which was your No. 6, which left Chicago, Ill., at 6.25 p. m., Saturday night.

Now, Mr. Willard, your men all treating me so kindly as well as everybody else who comes in contact with them, is why I am such a booster for your road, and is why you are getting all of our business, as when business is good we handle all kinds of car loads that don't come to this city, but go to Cleveland, Pittsburgh and Philadelphia District from Aberdeen, Washington, and I route them Baltimore and Ohio or wherever your lines reach. I have said at different times to myself when I would make a trip over your road, that I was just going to write you what I thought of the Baltimore and Ohio, as I always enjoy hearing good reports from my men. I have always made it a rule that every man who works for our Company was going to get a square deal, and when I was away from them, why they would naturally work for my interest. I must say that your men do this, especially those west of Pittsburgh, Pa., as these men I come in contact with quite often.

Yours truly

President

Death Claims John H. Doyle, Veteran Passenger Conductor, Newark Division

But Finds Him with a Service Record of Fifty-two Years and a Clean Slate

RECORD O. K.!" How many of us, after half a hundred years of service can find this phrase written after our names? John H. Doyle, veteran employe, 65 years old, died suddenly at his home in Newark, Ohio, on Sunday, January 8. Had he taken the trouble to examine his service record with the Baltimore and Ohio, dating from the time that he was 13 years old, he might have seen this notation. But he did not need to look up his record, for having faithfully performed his duties from this time on, he had no reason to doubt that his record was a clean one.

"Captain" Doyle, as he was familiarly known, was born in Newark, Ohio, on November 15, 1856. In 1869 he came to the Baltimore and Ohio as watchman. On March 4, 1873 he was promoted to section-man; on June 18, 1874, he became machinist apprentice, and on January 12, 1876, train caller. His first experience "on the Road" began on July 9, 1879, as freight brakeman. The next year he was made freight conductor. Five years later he was promoted to passenger conductor, and this position he held until his death.

He was one of the best known and most popular railroad men on the System. His splendid work among the Veterans had marked him as a leader, and he was one of the chief promoters of this organization. He attended the meeting of the Grand Lodge of the Baltimore and Ohio Veteran Employees' Association, which met in Baltimore, Maryland, on January 5 and 6. He was re-elected to his office as grand sergeant-at-arms, and was instrumental in securing the agreement of the officers and members of the Grand Body to hold the annual meeting for next year at Newark, Ohio. He had returned from the convention to his home at noon on Sunday, when he was taken ill suddenly. His death oc-

curred at about 10 o'clock in the evening of the same day. He is survived by two daughters, Miss Cora Doyle, and Mrs. Leo T. Davis, both of Newark, and two sisters, Misses Sarah and Rose Doyle.

Although Mr. Doyle never aspired to office, he took quite an active interest in politics.

So great was Mr. Doyle's interest in the Veterans' Association that when a Ladies' Auxiliary was organized in his town, it was named the John Doyle Auxiliary. He sometimes referred to this in a jocular way, but it must have been quite a source of pride to him, for nothing pleased him quite as much as to mingle with his fellow employes at some social function.

Kind, courteous, obliging, charitable, willing to serve—these are some of the characteristics that mark the life of him whose service record is marked "O. K." There is hardly a Veteran of the Road who does not remember the tall, kindly faced brother, and his absence from the ranks will be noticed particularly by them. And although his place cannot be filled as he would fill it, yet it behooves the younger railroaders to look upon this man's life as a criterion by which they would judge their own service.

The funeral services were held from his late home in Newark on Wednesday, January 11, at 2.00 p. m. Interment took place in that city.

The love and esteem with which Mr. Doyle was held among his fellows of the Veterans' Association were ably embodied in a set of resolutions, drawn up by Brothers H. G. Fletcher, G. K. Bell, and H. W. Fauver. No selection from the field of verse, perhaps, could be more appropriate to the life of John Doyle than that which is used in these resolutions:

"Lives of great men all remind us
We can make our lives sublime;
And departing leave behind us
Footprints on the sands of time."

—Longfellow.

Following is a copy of the first resolution:

Resolved: by this Grand Lodge that there has never been a member of our Order who more loyally loved it, nor one who more steadfastly served it—or the Baltimore and Ohio Railroad, of which he was a faithful and valued employe for more than forty-five years—than Brother Doyle. Uniting in his heart, as he did, an enthusiastic love and admiration for the Order, he brought to our membership many helpful associates. And his wisdom and judgment, born of an unusual native ability and ripened by wide experience, made him a wise counsellor upon whom this Grand Lodge could always rely with confident assurance.

The late John H. Doyle

Thriving Ladies' Auxiliary at Martinsburg

THE members of the Ladies' Auxiliary at Martinsburg wish to express their appreciation to the officers of the Baltimore and Ohio for the donation of a meeting place for the Martinsburg Veterans and their wives. This meeting place is a room over the Baltimore and Ohio Passenger Station. The ladies of the Auxiliary have furnished the room nicely, and they spend some very pleasant evenings there.

Typical of the Martinsburg folks, a meeting would not be complete without refreshments. Therefore, as a treat to the Veterans, the Ladies plan to hold a social whenever practical. The Veterans and their wives now hold their entertainments at the same time, and refreshments have no little part in the evening's program.

The auxiliary reports at this writing that in addition to the money expended for food and entertainment, it now has a balance of \$181.66 in the treasury. Flowers and fruits are provided for the sick. The meetings are held on every second Thursday afternoon at 2.30.

All members of other chapters of the Veterans and of the Auxiliary are cordially invited to visit the folks at Martinsburg, who assure their visitors of a good time.

The Government Wants Men for These Jobs

1—Income Tax Auditors:

The collection of United States internal revenue taxes is a big job. The Government employs a force of 20,000 persons for this work, but notwithstanding this large force, several hundred more auditors and inspectors for the Income Tax Unit are needed. Competitive examinations for these positions will be held throughout the country on March 8.

2—Inspector of Safety Appliances, and Inspector of Hours of Service:

Examinations for these positions will be held on March 22 and 23. Vacancies in these positions in the Interstate Commerce Commission at salaries of \$3,000 a year, with necessary allowance for expense incurred while absent from headquarters in the discharge of official duties, and in positions requiring similar qualifications, at this or higher or lower salaries, will be filled from these examinations, unless it is found in the interest of the service to fill any vacancy by reinstatement, transfer, or promotion.

3—Inspector of Locomotives:

Examinations for this position will be held on March 8.

All information concerning the positions named above and the examinations for these positions may be obtained by writing to the United States Civil Service Commission, Washington, D. C.

Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—
Retreat from care that ever must be thine;
How blest is he who crowns, in shades like these,
A youth of labor with an age of ease.*

GOLDSMITH—"The Deserted Village",

B. F. Norris

Benjamin F. Norris, pensioned conductor, tells his own story:

"I was born at Sandy Hook on October 23, 1849. At the age of fifteen I entered the service of the Baltimore and Ohio as water boy. I worked in this position until February 16, 1866, when I was transferred to helper, blacksmith shop. Here I worked and did all of the extra braking out of Sandy Hook until November 4, 1869, when I was given a regular job as brakeman on the Hagerstown Road at \$45.00 per month. This was about the first part of 1872. I was transferred to the First Division there. In 1878 I received my promotion as freight conductor. Shortly after being promoted I asked to be transferred to Sandy Hook because of my wife's health. I worked there until early in 1884 when I was transferred to the Hagerstown Road as brakeman. In 1884 I was again promoted to conductor. In this capacity I have worked until the time of my retirement October 10, 1921.

"While on the Baltimore Division I worked in every yard in Baltimore, down Pratt Street, hauling out snow at night. I worked on the Sheppard Branch, Washington Branch and Metropolitan Branch. In those days we used to take camel ten-wheelers over to Alexandria on the barge to Sheppard and go to Gordonsville and Manassah, get trainloads of stock, and take them to Baltimore.

"I have been in several accidents but always came out without a scratch. Consider the difference in railroading then and in railroading now. We had no air, no automatic couplers. We had links and pins,

goose necks and three links, and we had to stretch a bell cord over the train leaving the terminals. On the engine tank there was a reel on which to wind it. Arriving at terminal we had high couplers and low couplers. Before we got the goosenecks I, many a time, put a fence rail or a piece of timber of some kind under the wheels of the low in order to make the coupling. Sometimes we had no caboose and when we did get one, it was an old box car. We often amused ourselves at water stations cleaning ash pans and beating out smoke stacks. The trains were not run as they are now. They were run in what we called convoys, and were classed as No. 1 Coal, No. 2 and 3 Coal, Live Stock Express, Fast Freight and Tonnage, and were scheduled from Camden Cut Off, now West Baltimore. They would get their trains at different yards and pull out to Camden Cut-Off. When it was time to leave they would follow one another right along. I have seen many changes and ups and downs in my railroad experience and have known all the officers from President John W. Garrett up to the present time. Among those with whom I was personally acquainted, were: John L. Wilson, master of transportation; Frank Manse, general supervisor of transportation; W. M. Clements, general manager; Thomas Fitzgerald, general manager; and our present vice president, C. W. Galloway.

"I ran on the oyster train regularly, Baltimore to Grafton, and flagged on the Centennial train in 1876, Baltimore to Grafton."

Enoch D. Miller

Enoch D. Miller was born near Dillsboro Station on April 12, 1856. He attended

public school, and later Moore's Hill College. After leaving school, he went to work in a grist and saw mill. He began his career with the Baltimore and Ohio on May 5, 1890, on a fence gang, of which "Jim" Richardson was foreman. When this gang was laid off, Mr. Miller took up work with a section gang on Section No. 7.

On the night of the McKinley Flood he was called out to patrol the track. Here is the story as Mr. Miller tells it:

"I flagged a short freight train at the Big Canal. I told the engineer to pull off the fill at the east end of the canal, for the fill water was then within two feet of the track, and to stop as soon as he got the train over the road crossing. The track was washed out at Mile 44, and the train had just got over when the fill went out, and the fill at the west end of the canal washed out and left me on an island.

"On August 10, 1902, I began work with a stone mason's gang, and continued in this work until I was transferred to the position of water station foreman, Indiana Division. On December 26, 1920, I was taken ill and was obliged to quit. I was on the sick list until September 15, 1921, when I was retired. I had gone into the Relief Department on July 20, 1909."

Louis Luhrsen

Louis Luhrsen, pensioned moulder, Motive Power Department, Ohio Division, was born in Hanover, Germany, on October 16, 1855.

At the age of 17 he came to the United States and went to work at Zaleski, Ohio, as moulder, for the old Marietta and Cincinnati Railroad. In 1880 he was promoted to foundry foreman, and held this position until it was abolished in 1914, when he took up brass moulding. When the shops were moved to Chillicothe, he moved his family there and held the position of moulder until he was pensioned on December 1, 1921.

Mr. Luhrsen and his wife are now living in a pretty little home, on Bridge Street, which they own. He has two children, a married daughter, who lives at Gambia, Ohio, and a son, George, who is a machinist, Chillicothe Shops.

(Continued on page 80.)

"BY THEIR FRUITS YE SHALL KNOW THEM"

Men whose years of railroad service have added their names to our Pensioners' list. Left to right: Enoch D. Miller, R. T. Ault, Louis Luhrsen, George A. Phillips, B. F. Norris

When Betty Beats the Batter

Griff Crawford, in the Kansas City Star

Oh, the buckwheat's in the offing,
And the time is drawing near,
When the cakes will grace the table
And the sausage will appear.
When mortal man will caper
In the joy of getting up
To the rat-a-tat ta-ratter—
Betty mixing up the batter—
Scrape and scrape, ta-rat ta-ratter,
In the big tin cup.

And the sausage will be frying
In the skillet sure, but slow;
And the coffee will be singing
In a language that I know.
And a man with any gumption
Will be gaily getting up,
To the rat-a-tat ta-ratter—
Betty beating up the batter—
Scrape and scrape, ta-rat ta-ratter,
In the big tin cup.

Oh, the buckwheat cakes are smoking
And the sausages are done,
And at last you're at the table,
And the carnage has begun.
Let the poets sing of summer,
Or the spring; I'm lining up
For the rat-a-tat ta-ratter—
Betty beating up the batter—
Scrape and scrape, ta-rat ta-ratter,
In the big tin cup.

Miss Mary Tansill, Telegraph Department, Baltimore, Wins Prize in Newspaper Contest

SOMETIMES Genius discovers a newspaper, and sometimes a newspaper discovers Genius. However it be, "it's an ill wind that blows nobody good," and the wind that blew in a contest held by the *American*, a Baltimore newspaper, once more blew into one of our offices at Camden Station, with the result that it pushed into the limelight another of our girls.

Our readers will recall the picture of Miss Grammes, the little lady in the freight agent's office, Camden Station, who won first prize in a beauty contest. Today we introduce to you Miss Mary Tansill, who only discovered that she could write when, urged by her mother, she entered the "Women In History" Contest. Although she did not win first prize, Miss Tansill is among the youngest of the prize winners, and we feel sure that her success will serve as an inspiration for a continuation of her literary work. Miss Tansill has promised to contribute to the *MAGAZINE* and we look forward with pleasure to hearing from her.

Miss Tansill's employer tells us that she is one of the best girls on the Railroad, adding, as an afterthought, "She's a sample

of the kind of girls we have in our Telegraph Department." A fine sample, Mr. Plumly; it tastes like more. Bring em 'on! Following is Miss Tansill's contribution to the contest:

She hath done what she could. Verily, I say unto you, wheresoever this Gospel shall be preached throughout the whole world, this also that she hath done shall be spoken of for a memorial of all the women in history.

Thus spoke Jesus of Mary, the sister of Martha and Lazarus.

Mary possessed a small box of costly perfume, which she prized above all of her other possessions. Trying to find a way to show her great love for the Master, she remembered this perfume, and without a thought of self, she gave her gift—her all—to Jesus, who so appreciated her humble sacrifice that he spoke the words which have made her name immortal.

She is the one I would like to have been.

I would particularly like to have been Mary because in doing this little deed she expressed the three things which I think are essential to greatness—unselfishness, humility and service. Her deed was one so commonplace and easy that a child, so desiring, could have done; and yet it was so glorified by these things that her name will live forever.

It is because I so earnestly desire to possess these three things that I would like to

have been Mary; glorifying the little things and through unselfishness, humility and service, do something that wherever it was told, people would recall my little act and remember "He who would be great, let him serve."

The Lazy Boy

The parents of a small boy were greatly disturbed by a teacher's report to the effect that their son was the laziest boy in school.

"He is so lazy," the teacher declared, "that whenever I ask him to read he becomes sleepy in a few minutes."

Scolding and whippings proving of no avail, the boy was taken to the family physician. The latter, to the parent's surprise, passed him on to a specialist, who found him much in need of glasses. As soon as he began to wear these he kept up easily with his class and no more complaints were heard of his laziness.

* * * * *

How many misfit men are in this world today who in their boyhood days were called "lazy," whose parents have committed a crime against them and against society. Don't call your boy or girl lazy until you KNOW that their eyesight is as well taken care of as the rest of their little bodies.

Hot Cakes

*As baked by Second Chef Grant Jordan,
Six Years' Service on Car 1005,
Steward F. C. Panghorn*

The following recipe makes a good many cakes. The recipe cut down to half quantities will make enough for a good sized family.

½ gallon flour
1 heaping tablespoon baking powder
1 quart milk
3 eggs
1 tablespoon sugar
½ teaspoon salt

Mix well. Have griddle well heated. Rub the griddle over with the inside of a bacon rind. It it smokes, it is hot enough. Then wipe off the grease with a clean rag. Now the griddle is ready for the cakes.

Stir the batter well each time before pouring it on the griddle, first making sure that the batter is full of bubbles. If it is not, this means that the baking powder has lost its strength and has become "flat." It

Ladies,
Right dis way fo' de hot
cakes!

such is the case, the cakes will not be light, unless more baking powder of a better quality be added.

Shift the griddle around at intervals in order to keep the temperature even. When the cakes get full of little holes and their

edges are crinkly, they are ready to be turned. If there are large white spots on the cakes, this means that the griddle is too hot.

If these cakes aren't the best you have ever tasted, Chef Jordan will eat them for you.

Sidelights on the Convention of Ladies' Auxiliary

OFTIMES the Veterans tell us of the strange yarns which are told by their own old timers. Now that the Ladies' Auxiliaries have come to the fore with a Grand Lodge all of their own, it seems only fitting that we should exploit some of their deeds, and relate some of the yarns which they have told from time to time. First of all, we have discovered that the newly-appointed president of the Grand Lodge is a poetess. In her address to the officers of the Auxiliary, she said:

"Now let us keep these vows
That together we have taken,
Then let us seek for what is best
Each morn when we awaken."

Pretty, isn't it? Now let's listen to a conversation which took place between the delegates from Baltimore and Martinsburg:

Mrs. Shipley: You can always depend on Mother Shipley and her girls from Baltimore.

Mrs. Bowers: I second that, all right. If you don't believe that we accomplish things, ask our friends from Martinsburg.

Mrs. Burkhart (from Martinsburg): Yes, indeed, Sisters, they come up to Martinsburg and eat up everything we have.

* * * *

In the midst of the convention, a peculiar scuffling noise was heard outside the door. It developed that Mrs. Keane, delegate from Grafton, was asking Mrs. Hopper, of Garrett, the newly-appointed outside marshal, to show her muscle. The biceps were duly displayed. "Oh!" shouted the Lady from Brunswick, "Bring me a glass of water!" and somebody went over in a heap. But the Lady from Grafton was convinced that the Lady from Garrett was well equipped to handle the most obstreperous intruder.

* * * *

Mrs. Garvey, the newly-elected vice-president, now took the stand.

"Girls," she said, "I know that some of you are wondering how my husband and I get along." (Chorus of giggles, titters, etc.) "Well, it's just this way. Did you ever hear of the story of the man, his wife, and the yoke of oxen? A man and his wife were continually in hot water. One day they almost came to blows, but decided that a breath of fresh air would do them both good. They went out and took a walk down the country road. Soon they passed a team of oxen, who were pulling together

so beautifully that John could not help saying, "Mary, why is it that we can't get along like them two oxen?" And Mary duly replied, "Ah, John, I reckon it's because they've only got one tongue between 'em." The applause that followed this story was finally broken by a voice from the West. "And whose tongue did you say that is, Sister?"

* * * *

Voice from Lima: May I ask for a word from Sister Bowers, our new treasurer?

Sister Bowers: I shall have very little to say. My husband is long-winded enough for the two of us.

A Railroad Valentine

By Ethel Mead, in the "News Item."

Miss Mead is foreign per diem clerk, N. C. & St. L. R'y., Nashville, Tenn.

SAL went UP to Baltimore,
And there she found a BO.
They soon decided they would wed,
They liked each other SO.
Alas! I wish that I could say
They lived quite happily.
Their UNION was a sad mistake,
As you will plainly see.
For SAL was raised upon the farm,
The COW she milked each day,
While he had learned to spend his dough,
Upon the great white WA.
He had a GRAND TRUNK full of clothes,
In which he dressed quite GA,
And many MANUFACTURER'S things
For which he did not PA.
He flirted with a chorus girl,
ANN ARBOR was her name;
The way he made the money fly,
It really was a shame.
At first all things went well until
Their credit, it grew shorter,
And soon to SAL'S dismay she found
They'd got into DEEPWATER.
One night he went out to the club
And drank some rock and RI;
He reached his home at 2 AM,
And SAL began to CRI.
"IC you are a reckless man,"
The prudent LAS said she;
"We'll soon be broke if you don't save,
Now you just wait NC."
I want a nice new COPPER RANGE
Beside the kitchen door,
Or maybe one of NICKLE PLATE,
Like one I had B4.
Of credit we will soon have NONE.

Oh, listen to my PLE!
Nor coin to buy the COAL AND COKE,
In KENTUCKY AND TENNESSEE."
But he replied: "Just what I'll do
"Tis not for you to SA.
I'm going after ELLEN N,
And sail upon the BA."
He leaned upon the window CIL
To cool his fevered brow.
"If I were home with little CIS
She would not raise a row."
But trouble he could not escape—
His bills they all were DU.
His creditors got very sore,
And then began to SOO.
"An awful RUT I'm in," he said;
"Of cash I have no MO.
We'll take the train at 8 PM,
And to your folks we'll go.
I cannot now a wife support,
But if I can't, they can.
'Twill make them proud to see their SAL
TACOMA EASTERN man."
But SAL had gotten wise to him—
She was not blind nor deaf;
She said: "This is my Q, pro TEM;
My motto is SF (Safety First).
You shall not TAG along with me—
An Eastern man B DAM (Beaver Dam).
I wish I'd married my old beau,
Who lived in Birmingham.
I'll make a CRIP of you for life—
Take this, and this, you SAAP."
She seized a long PANHANDLE,
And gave his head a rap,
And now IT was a sight TC.
She floored him with a MOP:
She would not listen to his SI,
But straightway called a COP.
She took a SHORT LINE home route, KUT
Toward the COTTON BELT.
And if you've read this sorry tale,
You NO just how she felt.

Doris Virginia, 6-year old granddaughter of G. D. Crone, retired train caller, Camden Station

Long Waists and Slim Skirts in Season's Recipe for Smartness

By Maude Hall

FASHION'S recipe for the coming season includes the long waist, slim skirt, bell sleeves, irregular hemline and colorful trimmings in gracious abundance.

Bell sleeves imply that Fashion wishes to be practical. They are easily achieved by reshaping the mandarin sleeve, and like the chemise frock, can be developed in as many ways as there are clever dressmakers to make them. Trimmings are colorful; so are materials. There is an increasing vogue of the soft, dull reds known as brick, Venetian and American Beauty. In broadcloth these tones are unusually rich, and even conservative women attempt them with trimmings of black, midnight blue and gold.

Broadcloth has returned to the mode with a glamor that puts its glory of former years in the obscurity of a smoke screen. It is soft, supple and lustrous, exceeding far in its practical qualities the silk-finished pile fabrics of mountainous price. It is used for models created for both dressy and practical wear. Black broadcloth trimmed with henna or American beauty braid is conservative in tone, yet typical of the latest Paris ideas. Delightfully styled is a model with bateau neck and bell sleeves. American beauty soutache braid is stitched about the neck in artistic design, appearing again on the lower edges of the sleeves. A belt of American beauty Georgette faced with black crepe de Chine holds in the fulness at the waist and is tied in a large, soft bow at one side. If preferred, the front of the dress may be slashed and rolled back to form revers, giv-

ing an opportunity to use one of the little vestees of lace or linen so much in vogue.

For informal afternoon affairs there comes a charming frock of arbutus-pink satin crepe, with an applied front and back made on the reverse side of the material. This idea is frequently employed when double-faced fabrics are used to fashion a dress. Rows of black satin buttons with little gold bead centers stand like sentinels on either side of the front, and the black-and-gold color scheme is repeated in the embroidery on the long, large sleeves. The neck is Florentine, of course, and collarless.

A simple thing, harmonious yet bold, is a straight-line dress in navy-blue broadcloth stitched with Venetian red chenille cord. The cord is partly veiled in its course around the lower edge of the skirt by straight panels, which exceed the hemline by several inches. These panels are cut in one with the upper part of the dress, and there is a vest of red satin. Reversible satin ribbon is used for the belt, so that one may have a choice of red or dark blue. The trimming on the sleeves, however, is a replica of that on the skirt.

The slim, straight Chinese line has reached perfection in a daytime frock of navy broadcloth, with round collar of self-material, and long flowing sleeves. Bias folds of broadcloth trim the sleeves, but the neck is outlined with a narrow fancy braid. This braid is repeated on the inserted pockets, while Chinese rings and buttons are strung on a silken cord to form the girdle.

For the Stylish Stout

THE effective straight-line frock pictured in the first model is smartly plain and especially becoming to stout figures. It is in black, with a trimming of black silk braid. A bit of color is introduced in the vest of brick red with narrow black Val. frills. Medium size requires $3\frac{1}{4}$ yards 54-inch Poiret twill.

Canton crepe is effective for the next frock, dark blue with fuchsia soutache braid being a modish combination. The fronts of the waist are slashed below the waistline, and the upper edges gathered. Buttons and bias folds of self-material trim the skirt. Medium size requires $4\frac{3}{4}$ yards 40-inch material.

First Model: *Pictorial Review* DRESS No. 9603. Sizes, 34 to 46 inches bust. Price, 35 cents.

Second Model: DRESS No. 9578. Sizes, 34 to 44 inches bust. Price, 35 cents. Embroidery No. 12615. Transfer, blue or yellow, 40 cents.

LADIES' ONE-PIECE SLEEVELESS DRESS. No. 9723. Seven sizes, 34 to 46 inches

COSTUME NO. 9862. Sizes, 16 to 20 years and 34 to 46 inches bust.

OVERBLOUSE NO. 9821. Sizes, 34 to 46 inches bust.

DRESS NO. 9857. Sizes, 34 to 48 inches bust.

Sugar Cookies

Contributed by Mrs. W. D. Roebuck,
Lima, Ohio

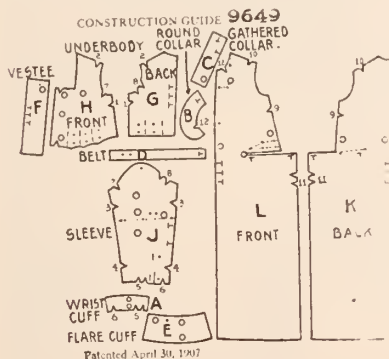

- 1 heaping cup lard or butter
- 2 cups sugar
- 2 eggs
- 1 cup sour milk
- 1 level teaspoon soda, well dissolved in the milk
- 1 teaspoon baking powder, sifted with the flour
- Pinch of salt
- Enough flour to make into a soft dough
- 1 nutmeg.

SERGE is used for this slip-on dress with square neck and large armholes. It is slashed at the center-front, the edges being bound with black satin. The vestee is also of satin, but if something more enlivening is desired, fancy ribbon could be substituted. The dress is slashed below the waistline, the lower slashed edges being gathered and joined to the upper edges. The sleeves and vestee are adjusted to the underbody. Medium size requires $3\frac{3}{4}$ yards 44-inch material, with $\frac{7}{8}$ -yard lining and $\frac{1}{4}$ -yard satin for the vestee.

The front and back of the dress are cut on a lengthwise fold of the serge, to avoid seams. The collar is laid on the material to the left of the sleeve and right of the front gore. Sleeves and cuff must have the large "O" perforations resting on a lengthwise thread of material for correct cutting. For the underbody, fold the lining in half and arrange the back along the lengthwise fold as shown in the guide, the front having the large "O" perforations laid along the selvages.

Before moving the tissue from the material, make all notches and indicate the perforations and other marks supplied for proper construction. Then, face around the armhole edges of front and back to about three inches deep. Use serge for the facing. Close underarm and shoulder seams, then hem the front. Plait the lower edge, bringing folded edges to corresponding small "o" perforations, and stitch. Hem the vestee and adjust on underbody with center-fronts and single large "O" perforations even. Tack to position on right side, and finish left for closing.

Now, close the sleeve seam as notched. Sew cuff "E" to sleeve, matching single large "O" perforations, and bring small "o" perforation in cuff to seam of sleeve. Bring the ends of the cuff to small "o" perforations in sleeve. Sew sleeve in armhole as described for long sleeve.

Slash front of blouse through the fold at center-front and finish the edges, turning away $\frac{3}{4}$ -inch at upper edges of slash. Graduate front section at the large "O" perforation. Take up a dart above the slash, bringing together and stitching along corresponding small "o" perforations. Terminate the stitching at the single small "o" perforation. Slash back of dress (at extension) between small "o" perforations. Gather lower slashed edges in front and back of dress between "T" perforations and sew to upper slashed edges with underarm edges even, making seams $\frac{3}{8}$ -inch wide at the underarm edges. Graduate seams into nothing at the inner edges of slashes. Stitch tape underneath the slashes for stays. Close underarm and shoulder seams as notched. Sew collar to neck edge of dress, with notches and center-backs even. Outline the collar with narrow braid, if desired, and repeat the trimming down the front of the waist.

DRESS NO. 9649. Sizes, 34 to 46 inches bust. Price, 35 cents. (Lesson in Dress-making.)

The Castle of Discord

By Mary E. Clarke,

13 year old daughter of J. D. Clarke, Superintendent of Transportation, Eastern Lines

ELIZABETH was getting sleepy. She could hardly hold up her head. It was nine o'clock, long past her bedtime. She had been thinking a great deal about Fairyland, for her mother had just read to her a story about the little girl who had been on her way to see her sick grandmother when a wolf had come up and spoken to her. You all remember the story, I am sure. Elizabeth liked the story best of all. So, as she sat before the fire, she saw herself in her dreams as this very little girl.

Presently she heard a noise. She started up and saw before her a beautiful fairy, all clothed in white and holding a small box in her hand. But while Elizabeth stood looking at the fairy, I must tell you something about her.

Elizabeth was a pretty little girl, but she was very naughty and inconsiderate. She would not tidy up her room nor make up her bed. When mother called her to come and tidy up her room or to make up her bed, Elizabeth always pouted and only replied, "Wait-a-min-ute!"

Now we shall go on with the story.

At last the fairy spoke.

"My child," she said, "you wish to go to Fairyland, do you not?"

"Indeed," replied Elizabeth quickly, "I should love to go. There is nothing in the world that I should like better."

"Then," directed the fairy, "put on this ring and you will have your wish fulfilled. You will need only to turn it and you will find yourself in an entirely different world." So saying, she gave Elizabeth the most beautiful ring she had ever seen. Elizabeth put it on her finger. It fitted her perfectly. Then, as the fairy had directed, she turned the stone.

Presto!

Elizabeth found herself in a wonderful garden, full of beautiful flowers. But the most beautiful thing of all was a wonderful castle, set just in the middle of the garden. It was toward this castle that Elizabeth directed her steps. The gates were open. She walked in.

At the threshold she stopped and gave a little cry; then she hurried forward.

All about her on the walls were beautiful

pictures, scenes from far away countries, and many of them so realistic that Elizabeth could scarcely believe that they were pictures. The walls were hung with rich tapestries. The floors were spotless and highly polished. From the basement to the tower she went, and wherever she made her way, each place seemed more beautiful than the other. Each room was furnished differently. At last she came to a standstill in the big reception hall which she had first entered. She was examining the beautiful tapestries once more when she heard a voice:

"Turn the diamond, Elizabeth, turn the stone."

Elizabeth did as she was told. Immediately she regretted her action, for the beautiful castle was gone. In its place was a castle, yes, but in such a condition! Gone were the beautiful floors, the lovely tapestries, the pretty pictures—all, everything beautiful, was gone. The floors were covered with dust and dirt; the pictures were so full of soot that they were hardly recognizable; the walls were hung with cobwebs instead of tapestries. Elizabeth could not see out of the windows, they were so dark and dingy from the dust that had settled on them. Even the corners of the rooms were filled with dirt.

As she stood looking sadly at these things, a fairy appeared before Elizabeth. "Elizabeth," said the fairy, "you know that you have been very careless and untidy. Because of this you shall take the consequences." Then the fairy disappeared. As she vanished there began to follow her a noisy collection of untidy looking dogs, cats, squeaking rats and mice, and all kinds of other slovenly, uncared for animals. As she came to the flight of stairs she fell. Down, down, down! she went. Then all was dark.

"For goodness' sake, Elizabeth," cried her mother, "get up from the floor!"

"Why, er-er-er-where am I?" cried Elizabeth in great surprise.

"At home, in your room, of course." Elizabeth looked around. Sure enough, she was right at home in her pretty bedroom.

"Well!" she declared, "I must have had a dream."

"I should think so," said her mother, "I heard you screaming and I had to come to see what was the matter."

Elizabeth smiled, and although she did not tell her mother about her strange dream, her mother never had to tell her to tidy up her room or to make up her bed again, or even to pick up her things, for Elizabeth always remembered her dream and profited by it.

Dear Girls and Boys:

Those of you who have not yet sent in your contributions for the "Our Town Contest" will still have time if you will hurry up a little. The contest closes on February 28; that is, your entries are due at this office on or before March 1. If you have not already read all about it, get a copy of the January Magazine quickly, read about it, then let me hear from you before March 1.

One little girl sent in her contribution even before the January number was out, just because I had said in the December number that we were going to have such a contest. The January number also tells about the prizes. The winners may choose the books they would rather have, or, if you prefer, I shall choose them for you. Perhaps some would rather have story books, while others may possibly need dictionaries for their school work. Don't forget to send me your pictures, if you possibly can. We are going to have a "Picture Page" after the contest anyway, so I'd like to have all of your pictures. On the back of each picture or on a separate piece of paper, please write your name and address plainly. Enclose your picture with heavy cardboards so that it will not break in the mail.

If you have already sent in your entry for the contest and you want to add something to what you have already told me about your town, just send it in before March 1, and I shall be glad to put it with the papers you have already sent me before they are judged for the prizes. All contestants will

Mary Clarke, author of the story,
"The Castle of Discord"

be notified as to the names of the winners by March 30, and the names and pictures of the winners, together with their contributions will be published in the MAGAZINE. The six best compositions will be the winners, so be sure to get yours in.

I want to thank our little folks for the nice letters and stories which you find on these pages. With lots of love and hoping that I shall hear from you all, I am

Yours lovingly,

Aunt Mary

Little Letters from Little People

HERE are three little people to begin the month with: Mary Clarke and Helen May Leslie, both of whom have written a story for us, and Minnie Loury, who lives 'way out in Kent, Ohio.

Baltimore, Maryland
New Year's Day

Dear Aunt Mary:

I am sending you an original story which was suggested by our class in Home Economics. I thought perhaps you might like it for the MAGAZINE.

Wishing you a Happy New Year,
Your loving niece,

Mary Clarke.

Hazelwood, Pa.,
December 26, 1921.

Dear Aunt Mary:

I have decided to join the Children's Page in the BALTIMORE AND OHIO MAGAZINE. My father is a Baltimore and Ohio fireman on a passenger train from Pittsburgh to Wheeling. My age is ten. I am in the sixth grade at school. In February I go to the seventh. I can sing, dance and play the piano. I take elocution lessons and I love to write compositions. I will send you one which I have written about the "Coal Fire." I suggest that we write about Spring in the March number. I would like very much to take part in the prize contest—the descriptions of our home towns.

Sincerely yours,

Helen May Leslie.

144 W. Summit St.,
Kent, Ohio.
December 27, 1921.

Dear Aunt Mary:

I have read so much about you in the BALTIMORE AND OHIO MAGAZINE. I always read the letters that you write to girls and boys. I am willing to start in your little club, too.

My father is section foreman on the New Castle Division, Section No. 20, Kent, Ohio. Please write to me and let me know if I can start in your little club.

I am,

Yours truly,

Minnie Loury.

Indeed, Mary, Helen and Minnie, we welcome you to our big circle. I shall be glad to have all three of you girls, as well as *all* of our little girls and boys who read the Children's Page, enter the "Our Town" Contest. Hurry up and send in your stories of your town.

Louise E. Barker, daughter of Storekeeper T. H. Barker, Ivorydale, Ohio, sent us a fairy tale, "The Pot of Gold." If we find room for it we'll use it this month; if not we'll wait until the March number. Thank you, Louise.

The Coal Fire

By Helen May Leslie,

Daughter of Fireman, Pittsburgh Division

IT was a stormy winter in Scotland, but there was one little village which was the coldest of all. The background of the village was a great highland. Some of the peasants were in poor circumstances, but many of them were quite comfortable.

In one of the houses of the peasantry were five little rooms, all clean and tidy, but the people who lived there were poor, so that they had not much furniture for the house. In one bedroom there was a bed, a chair, and a rough box that served as a dresser. In another room there were two beds, two chairs, and two such dressers. In the kitchen downstairs there was a sink, a cupboard, a large table, several chairs and stools, and a stove. In the sitting room there was a little stove that did not give out much heat. Here was also a couch, a little organ, and some other small pieces of fur-

niture. But the best room of all was the library. Here were four bookcases, a table, an oil lamp, a large, old arm-chair, a couch, and a coal fire.

In this little house there lived a small family, a father, mother, and two children. They were quite poor. They had been wealthy when their grandfather had lived, but they had since lost their fortune. The father had been compelled to seek an humble position, and as business was very poor, he took a job as wood-chopper.

At night, when the father came home, he would always go to the library and sit in the big chair before the coal fire and dream until he would fall asleep. As the children grew older, they would climb upon his arm-chair and say, "You won't have to work very long, Father, for soon we shall be old enough to help you. Then we shall all be very rich."

Above: Ruth Eleanor and Richard, twin babies of Roundhouse Machinist "Dick" Thran, East Side, Phila. Below: Eileen, Frances and Catherine, children of Conductor A. E. Clark, Mt. Clare Yard (Photo by Piper)

The father would laugh and tell the children, who were then eight and ten years old, that they helped him already. Then the children would beg him to tell them the wonderful fairy tales that he always had ready.

One night, when they had climbed into their father's lap for a story, he began a wonderful fairy tale. It was about a little girl whose parents were so poor that they had nothing to eat. How that one day the mother gave the little girl a basket with a little food in it and sent her to seek her fortune. The little girl had fallen asleep on a curbstone, and in the morning when she awoke she found herself in an inn, where somebody had taken her. The innkeeper kept the little girl to wait upon the table. One day a traveler came in. He gave the innkeeper's wife a hundred pounds—which was a good bit of money—to let him have the little girl. He was a wealthy man and he took the little girl to London. After a time he took the little girl and set sail for America, where they found her parents. The rich man gave her father a good position, and they all lived happily ever after.

"My!" exclaimed the little boy, after the father had told this wonderful story, "where do you get all of these good stories?"

"Well," said the father, "I read them in the coal fire."

"Oh," said the little girl, "how I wish that I were as great as you."

Then the children kissed their father and went skipping off to bed.

The next morning, after the father had gone, the little girl said, "Let us go into the library and watch the coal fire." The little boy agreed. They sat there all day. At last the father came home. They all ate dinner, then, as usual, they went into the library.

"Now, Father," said the children, "we have a story to tell you."

"Let's hear it," said the father, laughingly.

The children began. I shall not take the time to tell you what it was, for it is growing late. When they finished their story, the father was surprised.

"Where did you get such a fine story?" he asked.

"The same place that you got yours—in the coal fire," answered the children.

"That was certainly a fine one," declared the father. Then he went to the book case. "Read some of these books," he said, taking several from the case and handing them to the children. "These will help you to express yourselves better."

On the next day the children studied the books very hard. When the father came home they said to him, "Father, what do you think we have done? Guess."

"I can't guess," said the father, "you tell me."

"We have written a story which we are going to keep," they said.

"My!" exclaimed their proud father after he had read the story, "we must keep this; it may make us a whole lot of money

some day." And the happy children were so delighted that they kept writing and writing more and more stories. Their stories were mostly of fire and fairies.

One day they sent all their stories to an editor. He used them in books and magazines and sent the children money for them. At last the children told their father and mother that they were going to buy new furniture for the little house and get rid of all the old things. So they cleared the house of all the old things except the old chair and the wonderful coal fire from which they got all their stories. The father soon quit his job as wood-cutter and became an editor. And, as all stories end, they lived happily ever after, and it was all because of the coal fire.

Why We Keep Valentine's Day

By Cathrine Hadden, Dover, Ohio

ONCE upon a time there was an old man whose name was St. Valentine. When anybody was ill he would go to visit them and he would send them nice letters. He loved everybody and everybody loved him. He was just about the nicest old man around. After his death, people kept the 14th of February in honor of him who was so kind to them. They sent pretty letters and cards in memory of him. These were called Valentines. And to this day the people keep this anniversary in the same way; and the day is called St. Valentine's.

The Little Business Getter

Once upon a time
There lived
A little boy
Named Sammy.
His daddy was
A conductor
On a passenger train.
And every time
Daddy came home
Sammy would climb
Upon his knee
And ask for stories
About the engine,
The long train,
And about the people
Who rode it.
One night
Daddy said:
"Sammy, my boy,
"Do you know
"Of anyone
"Who is going
"To take a trip?"
Quick as a wink
Sam replied:
"Yes, Daddy,
"My teacher said
"She's going to
"A convention
"In Chicago,
"Next week.
"And we're to have
"A substitute."
Daddy smiled.
"Then, Sammy boy,
"Suppose you ask her
"To take her trip
"On the Baltimore and Ohio."
Sammy laughed
With all his might.
"Oh, Dad," he said
As he bounced
Up and down
On Daddy's knee,
"I've beat you to it,

"I've already asked her,
"I told her she
"Could ride
"All the way
"On my daddy's train.
"She said that she
"Had not intended
"To go that way,
"But to please me
"She'd try it."
"Good!" shouted Daddy
Tossing the boy
Over his shoulder.
"Now run along
"And get your pen
"And write a letter
"To Aunt Mary.
"Tell her all
"About it."
So Sammy ran
And did exactly
As Daddy had said.

Now, boys and girls,
If you'll do just
What Sammy did,
And get someone
To ride our trains—
Someone
Who didn't intend
To go that way—
Just write a letter
To Aunt Mary,
And she will say
What she told Sammy.
Then you'll be glad,
And she'll be glad,
And everybody
Will be so glad
That even the engines
Will sing a song
Because you helped
To fill the trains
For them to pull.

Safety Roll of Honor

Baltimore Terminal

Conductor W. F. Schrodetzki discovered a broken rail in the west leg of the "Y" track at West Baltimore on the morning of January 6.

Such an observation proves that some of our employees are doing their utmost to co-operate with the "Safety-First" campaign and have the interest of the Company and their fellow workers at heart.

Operator C. H. Berry reports the following:

On December 31, 1921, while Bay View drag engine 1802 was working in Mt. Winans yard, Conductor J. H. Hoffman, in charge, with the assistance of Brakemen H. Williams and W. Duvall, rescued John Thurman, 13 years of age, from drowning in Waxter's ice pond at Mt. Winans. The ice was not sufficiently strong to bear the weight of the boy, who ventured on it with a little sleigh, breaking through into 16 feet of water. Conductor Hoffman and his brakeman realized that it was necessary to act quickly. Hoffman immediately ran to his caboose, secured a rope, tied a piece of wood to it, threw in to the fast drowning boy and with the aid of Brakemen Duvall and Williams dragged him to land and safety. Whether dragging coal or saving lives, John, Bill and Harry are always on the job.

Baltimore Division

On June 8, 1921, Operator A. H. Bernadou, on duty at Silverside, Delaware, observed fire flying under one of the Pullman cars in No. 503. He immediately got in touch with Wilmington, where the crew of No. 503 was notified and it was found there was a broken journal under Pullman Car "Cod-dury." Mr. Bernadou's close observation of passing equipment and prompt action in this case possibly averted an accident on the road.

At 4.20 p. m. on October 29, Signal Maintainer H. H. Mitchell observed a bent axle on Baltimore and Ohio 170223 in extra east, engine 4850. He flagged the train and the crew set the car off at Concord. By his observation of passing equipment, Mr. Mitchell averted a possible derailment.

About 8.10 a. m. on November 14, while Signalman C. W. Proctor was going home from Clayton Tower, he observed a broken rail in No. 2 track at Jones Crossing. Mr. Proctor was going west at the time and met and flagged extra east, engine 4840, which passed slowly over the broken rail. Signalman Proctor has been active in the prevention of accidents by discovering broken rail. Commendatory entry covering has been placed on his record.

Trouble was experienced with engine 5080, hauling No. 1 at Washington, D. C. on December 7. The train was delayed by reason of the right front pin heating and fire flying, which caused the engineer to bring the train to a stop. It was found that the washer was too tight on the pin. Engineer H. C. Butler, who was at Washington Yard when No. 1 stopped, voluntarily got under

the engine and loosened the washer on the pin, which released the cause for the friction and enabled the engine to proceed without further trouble to Cumberland. Mr. Butler's action and interest in seeing that passenger trains are moved is highly gratifying.

On December 12, train No. 67, engine 1453, was delayed on the east end of the Division because the air pipe on the engine leading from the back end of the left reservoir to the reservoir on the right side, broke through the nipple at the back end. Boilermaker John O'Connor, who works at Wilsmere and was riding this train to his home at Eder, when this trouble occurred and while the Engineer was removing the broken pieces of nipple from the reservoir, went to his home and secured a pipe nipple, returned, and placed it in the reservoir and connected the pipe so the engine could proceed with the train.

On December 13, 1921, Signal Maintainer H. H. Mitchell, Silverside, noticed broken truck under Baltimore and Ohio 94312, in train of extra east, engine 4443, at 2.16 p. m. He flagged the train and notified

the crew. The action of Mr. Mitchell, in line with our "Think and Act Campaign," is very creditable and shows that he is alert. It is noted from the record of Mr. Mitchell that he is actively engaged in the prevention of accidents.

On December 15, extra engines 4834 and 4598 went in the siding at Aberdeen to clear for No. 501. While the train was in the siding, Brakeman C. S. Cage made inspection of train and discovered a broken arch bar on D. L. & W. 35310, ten cars from the engines. Car was set out of train. Brakeman Cage has demonstrated that he is interested in the safe movement of trains. He has been commended.

Trackman L. A. Feago near Lime Kiln, Md., on December 17, discovered broken arch bar under C. R. I. & P. 40938 in the train of Frederick Pick-up. Mr. Feago signalled the train crew to stop, thus averting a possible derailment.

On December 25, Conductor W. E. Clarke and Flagman George Montgomery, in charge of No. 91, engine 4524, noticed 18 inches of cap broken out of rail just west of the P. R. R. Bridge between Alexandria Junction and Chesapeake Junction. Train was stopped and Flagman Montgomery remained at broken rail to warn following trains, as it was known that engine 4566 was following with another section of No. 91.

Cumberland Division

On December 27, while extra 7032, east, was passing a point just west of Seymours Cut, between Rodemer and Terra Alta, Engineer A. E. Elison, on helper 7049, shoving the extra, observed broken rail on

CUMBERLAND DIVISION.

The following defects and irregularities were observed from December 9 to December 31, inclusive, by operators and promptly corrected:

Date	Train	Engine	Operator	Location	Brakes Sticking	Hot Car Boxes	Wheels Sliding	Broken Rails	Drop Bottoms Down	Projections Cars	Flat Wheels	Brake Rigging Down	Totals

No. 1 track. Fireman R. A. Nine got off helper and flagged No. 11, then due, and informed them of the trouble.

The following observances were made by operators on the Cumberland Division during the year 1921:

The irregularities noted were acted upon promptly to prevent damage to equipment and property.

Nature of Observance.	Cases.
Brake riggings down.....	25
Wheels sliding.....	19
Broken rails.....	18
Brakes sticking (Passenger).....	15
Brakes sticking (Freight).....	12
Hot car boxes.....	11
Shifted loads.....	8
Hopper bottoms dragging.....	8
Unsafe conditions.....	8
Car doors dangling.....	7
Flat wheels.....	5
Bulged cars.....	3
Projections from cars.....	3
Dangerous practices.....	2
Obstructions in walkways.....	2
Miscellaneous observances.....	13

Total.....159

Sixteen cars were set off on line of road due to above reports.

After extra 4400, east, passed Orleans Road on January 4, Trackman V. Twigg, on his way home, found 5 inches of broken flange at switch point leading from No. 4 to No. 2 track.

He informed operator at Orleans Road, who, in turn, advised the train dispatcher, who had the train looked after at Sir John's Run.

Examination developed that 15 inches of flange was missing from wheel under car 223739 in train of 4400. Car was set off.

At about 7 o'clock on December 24, Engineman R. S. Fromhart and Fireman T. F. Hall, while working up No. 4 track at a point about five yards west of the road crossing at Independence, W. Va., discovered a badly broken rail. Engine 7020, which was using No. 4 track from West End to Hardman, was flagged by these men. The engine was taken back to Newburg, crossed over and used on No. 1 track to Hardman. Track forces was notified of this condition and a new rail applied without any delay to traffic whatever.

On January 17, Car Repairman W. C. Lewis, on his way to work, noticed in train of extra west, engine 4220, Baltimore and Ohio 44182 off center. He immediately notified conductor in charge of train, who had the car set off at Terra Alta. The watchfulness of Mr. Lewis probably averted a serious accident, as the center plate casting was completely torn loose from the body bolster of car. Mr. Lewis deserves credit for being on the lookout for defects that would cause damage to the equipment and possible injury to the employees in charge of the train.

On December 13, 1921, Conductor E. Lewis, while walking from Independence to Newburg, and not on duty, found a broken rail on No. 1 track, the rail being in three pieces. No. 11 was due in about 20 minutes. Conductor Lewis, in addition to flagging all westbound trains until relieved by track foreman, also called up train dispatcher and notified him of the situation. No. 11 was handled without delay.

Connellsville Division

CONNELLSVILLE, PA., January, 6, 1922.

MR. H. W. HAYMAN,
Track Foreman,
Rockwood, Penna.

Dear Sir—We have information that on

or about December 17, you discovered a loose wheel on Baltimore and Ohio car 135104, which had been set off at Rockwood on account of another wheel on the ear having a broken flange. The indications are that a new pair of wheels would have been applied to the car and same moved forward, and perhaps the fact that the car had a loose wheel would not have been discovered.

Had the car moved forward in this condition, in all probability an accident would have resulted, and we want to thank you very kindly for bringing this matter to the attention of the Car Department people, who, we understand, made necessary repairs before the car was moved forward.

Yours very truly,
(Signed) R. W. BROWN,
Superintendent

Pittsburgh Division

On December 9, extra 1294 had U. & D. 828, car of coal, derailed near Lafayette on the Northern District, breaking truck down on the west end of car. The crew consisted of W. T. Bogart, conductor; H. S. Jones, brakeman; C. J. Anderson, brakeman, A. L. Butler, engineer, and R. E. Anchors, fireman. After taking train to Mt. Jewett they returned to point of accident with empty car which they placed on siding, jacked up car and took truck out, took it down main track to accident, jacked up the car of coal and exchanged trucks and were ready to pull cars into clear before assistance arrived.

This is a splendid illustration of employees who believe in helping the Company to the limit of their ability and putting their belief into helpful practice.

Charleston Division

The following engineers have been commended for making 100 per cent. or over in fuel efficiency, December, 1921:

W. T. Spencer, W. E. Paisley, W. T. Powell, Hefner, R. E. Murphy, H. Robinson, J. W. Paisley, J. A. Daugherty, Hoover, Brannon, B. M. Shears, Whitecotton, L. R. Shomo, Henderson, Paxton and J. C. Jordan.

Agent O. M. Gross, Villa Nova, noted brake rigging down on car passing his station and had train stopped and repairs made.

Engineer J. A. Dougherty has been commended for picking up good material on line of road, turning it in to shops, thereby assisting in the campaign of economy along this line. Engineers A. F. Vorholt, R. N. Jeffries and W. P. Paxton, and Fireman J. Buckner have been very active along this line also, and they have been thanked for their efforts both personally and by letter.

Miss D. Freeman, Kemper, W. Va., while walking along the track, noticed a broken rail near Bennetts siding. She walked to Orlando and notified the agent, who had arrangements made to effect repairs. The superintendent has written her a personal letter of appreciation.

Conductor J. D. Fury, Engineers M. T. Hall and Rodebaugh, Firemen Radcliff and Morrison and Brakeman Hoover found a broken rail at Mile Post 66. They went to work and cribbed it up so that their train could pass over, avoiding serious delay, for which they have been commended.

Mr. Madison Kelley of Hyer found a broken rail near Flatwoods. He walked to Gillespie and notified our agent, who arranged for repairs. Mr. Kelley has been appropriately thanked.

Miss Edith Crutchfield and Miss Opal McPherson of Burnsville found a broken

rail on December 26, near Orlando, and flagged passenger train 61, notifying train crew of the obstruction. They have been appropriately thanked by the superintendent.

Engineer S. L. Rodebaugh and Fireman G. L. Nicholas have been commended for using good judgement when their engine broke down on December 28.

W. H. Gross of Porters has been commended for close interest displayed in handling his station.

Brakeman C. W. Johnson has been commended for special interest displayed in the safety of passengers during the holidays.

Conductor H. W. Robinson, Engineer J. F. Tierney and Brakeman E. M. Reed have been commended for good judgement in avoiding delay to their train on December 18, when wire communication was interrupted by storms.

Conductor P. J. Condry and Brakeman W. M. Smith have been commended for interest shown in getting their train over the road on January 4, when their engine broke down.

Machinist C. F. Beatty of Gassaway and Machinist Caruthers have been commended for close observation in connection with close inspection of locomotives.

Relief Agent Marshall has been commended for interest in securing information regarding possible prospective business for the Baltimore and Ohio. Agent Kennedy of Clendennin has been commended for similar action.

Conductor H. H. Huff has been commended for valuable assistance rendered at Orlando in averting delay to passenger trains.

Conductor M. N. Hendrick found a broken rail at Adrian, during the night of November 29. He personally made repairs, averting delays to three trains, for which he has been commended.

Mr. Dennis Rowan found a broken rail near Adrian. He notified a train crew immediately, for which action he has been thanked in a personal letter from the superintendent.

Conductor R. Shelton, Brakeman P. Bazzle and Brakeman C. C. McCue have been commended for close observation and prompt action in connection with the finding of a broken rail on the Coalton Branch on November 10.

Cleveland Division

At 5.30 p. m., December 14, while switching in Lorain Yard, Yard Conductor L. Stewart discovered a truck belonging to the Express Company, on the running track which crosses the Nickel Plate. This truck contained express to be loaded on the Nickel Plate train. It was quite dark when the discovery was made, and if Conductor Stewart had not been on the watch so that the engine was stopped in time, the truck would have been damaged and probably some of the express also.

"This man sees everything," is the motto which Superintendent H. B. Green has connected with the name of Operator W. W. Webber, Stillwater, Ohio. On December 29, Mr. Webber discovered brake beam down on engine 4318, east, and immediately stopped train before it had passed any switches. This is only one of a number of cases in which Operator Webber has been commended for his watchfulness.

(Continued on page 79)

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department

Correspondent, GEORGE W. HAULENBEEK

In preparing papers for legal action, requiring acknowledgment before a Notary Public, please remember that Baltimore is not in Baltimore County, nor indeed in any county, so that the jurat should read—State of Maryland, Baltimore City to wit:—

This is not always observed by Company's counsel in sending papers of this character, but I pause to remark that papers forwarded by counsel at Romney, West Virginia, do not call for the elimination of the word "County" and the insertion of the word "City," as in most cases. Romney is in Hampshire County, and the papers from our counsel located there are well prepared.

And then another thing, and this is for stenographers who prepare these papers: Girls, please give the poor Notary a little bit more space for names and dates. It is proper to write out the month in full, but this cannot be done if only an eight of an inch of space is given for insertion. Take for example, the words January or February, or even March, with only five letters for insertion into a little bit of space, with oceans of paper on every hand.

And then in the case of a deed or mortgage, please omit at the beginning of the document, not only the month, but the year as well, for I have seen many and many a paper prepared for the latter part of the year, that did not receive final action, until along in January or even much later.

When I had a brief spell of sickness, not so long ago, I received a card from a young lady in the building with the following inscription:

"Heard you were ill, hope you are better, Couldn't say more in a dozen-page letter."
And then when the Christmas festivities were in preparation, I received this—
"Old fellow, if I could grasp your hand, For about a minute, you'd understand Without any fixed-up card from me, What a bully good Christmas I want yours to be."

Don'ts for 1922

"Don't use a tooth pick at the table" is a 1922 resolution, but a better one would be, "Don't light a cigarette in a crowded elevator." Now will you be good?

One of the offices I like to visit is the Treasury Department, presided over by E.

M. Devereux. It is a very busy place and an important department of our service.

I observe that the members of clerical force in the office of the Pass Bureau have all that they can do, and their very busy period appears to be at the end of the year. Little wonder that the door bears the notice—"Closed at noon." I think Mr. Kohlerman and his clerks are entitled to a full share of commendation.

I have just space enough to remark that I would prefer not to receive articles for insertion in the MAGAZINE. They should all be addressed to The Editor, Mt. Royal Station, Baltimore, Md.

Car Service Department

Correspondents,

J. T. LEAN and H. V. OBERENDER

It's an indication of a return to normalcy when the business of Cupid & Co. goes booming. In our office it seems to have boomed its boomingest, and the climax was reached when our old friend and faithful worker, Ada Gallery, left us to join the happy band of those who prefer to swing the tea towel rather than to wield the long-pointed yellow pencil. No, we don't blame her, but we'd have liked it better if she'd had the ceremony at a time when we all could have seen it.

On the morning of January 11, Miss Gallery and Mr. Robert McConnell, of the

Tin Decorating Company, were united in matrimony at the church of St. Mary's Star of the Sea, Rev. John Bownes officiating. Miss Florence Gallery, sister of the bride, was bridesmaid, and Mr. Lee Brown, traveling auditor, U. S. Shipping Board, and formerly an employee of the Transportation Department of our Railroad, acted as best man. "Ave Maria" and "At the Communion" were ably rendered by Mrs. Elna Sellman Proffen, formerly of the Car Service Department, and a close friend of bride and bridegroom.

The bride was attired in a brown traveling suit of velour and seal, and carried a bouquet of orchids and sweetheart roses. The bridesmaid wore dark blue and carried American Beauty roses. A wedding breakfast was served at the Belvedere, and the happy couple left from Mt. Royal Station for a honeymoon in the sunny South. Our congratulations follow the happy couple.

New Year's Resolutions—1922

C. G. S.—To shave off and keep shaved off that cute little misplaced eyebrow.

J. M. K.—To stop doing "field work."

J. R. D.—To try to get married.

J. F. C.—To send in notes to the MAGAZINE.

M. G. F.—To be on time every morning.

R. H. B.—To stop being a floor-walker.

O. K. E.—To be more regular in contributing to the MAGAZINE.

T. E. H.—To keep his hair cut.

E. H. B.—To stop chewing.

"What is the time, Miss Bernat?"

Watch the smile upon her answering. Was Santa responsible or—but just now we will see what we will see.

Our bowling leagues are coming along fairly well, although not as well as could be expected. But we have a crowd of versatile players. One week they are par-excellent, the next they are not so good. At this writing, January 7, the Chief Engineer's Team dropped back one place, now being fourth, with an average of 462. The Engineer of Buildings' team is still sixth, with an average of 447. Mention might be made, however, of the stellar bowling that Warren, of Chief Engineer's Team, has been doing. Having bowled in every league game, a total number of 48, he has an average of 99.2, just one-tenth of a point behind Boring, of the Auditor of Disbursements' Team, who has not bowled as many games. Good work, Warren, keep it up!

A group from the Railroad and United States Railroad Administration now located at Mt. Royal Station. Their work is to check up claims, materials and supplies on hand at the beginning and at the end of Federal control. They are, left to right, standing: back row—T. R. Rees and L. S. McClelland (Baltimore and Ohio); B. J. McGilvey, (U. S. R. A.); O. Grinewitsky, W. O. Hinkey and H. R. Westinghouse (Baltimore and Ohio). Front row—C. F. Moehle, Francis Swiller (Baltimore and Ohio); E. Roberts (U. S. R. A.); D. S. Guild, James Roodhouse and C. H. Marshall. Sitting: "Bue" Ottis C. P. Soper. (Photograph by Titus)

We have quite an artist in the person of Howard F. Buffington, junior draftsman in the bridge department. Among other things, he attends night school at the Maryland Institute three nights a week, and is getting along splendidly. During the month of December a poster competition was held in which he entered. Howard was adjudged second in the first poster contest and first in the second poster contest. As he was not allowed to take both prizes, he very wisely decided to take the first prize in the second poster contest, and was mailed a check for \$20.00. Besides attending the Maryland Institute, Howard also belongs to the Federal School of Art, which is a correspondence school. "Bob" Klebe, formerly one of us, but now with the cost engineer, is also a member of the latter. Keep up the good work, both of you! There is always room at the top!

(Why not help your correspondent with a drawing or cartoon, now and then, fellows?—Ed.).

Harry Thorne and Freddie Gemppe are artists in their respective musical lines. Harry plays a violin; Freddie a saxophone. I happened to attend a dance where they, with four others, furnished the music, and believe me, there wasn't anything slow in the way they played the more popular pieces.

Speaking about music and musicians, with the material we have we should be able to inaugurate an orchestra. How 'bout it, fellows?

Harold Lloyd has nothing on "Gus" Hauser in the way of "goggles." Now that Gus's have developed shell rims, he looks like a regular rah-rah boy.

Hey, there! Who said that Friday, the 13th, was "hoodoo" day? We believe it's good luck for Draftsman Ziegfeld and the Missus, for on that day the stork came around and brought them a baby girl. Then, having done his duty, he flapped away, leaving two happy parents. Congratulations!

Office of District Engineer, Pittsburgh, Pa.

Correspondent, Miss M. M. WARD

Local engineering and right of way department offices have been moved from the seventh floor, Conestoga Building, to the seventh floor of the new Maloney Building, 339 Second Avenue, Pittsburgh.

Audrey, little daughter of Rate Clerk H. J. Holz, General Freight Office

The new quarters are very satisfactory and pleasing to all. The boys of District Engineer's force are to be complimented on the efficient manner in which they assisted in getting settled in their new home.

**Office of District Engineer,
Cincinnati, Ohio.**

Correspondent, G. F. DAUBENMERKL

H. L. Scribner and wife spent the holidays at the latter's home in Cumberland, Md. Immediately upon their arrival, Mr. Scribner was handed his mail—"Scribner's Magazine." Scrib says he was entertained very nicely by father-in-law.

G. W. M.—Never sneeze unless you remove your glasses. It is too expensive, isn't it, George?

Assistant Engineer P. A. Callahan has become a member of the North Cincinnati Gymnasium. We are all wondering what he is training for.

Stanley Thompson, draftsman, is now a suburbanite, having moved to Oakley, Ohio. There is still some attraction at his former residence, however, as he has been around State Avenue quite often lately.

The stork got busy our way during December. James P. Ray, assistant engineer, announced the arrival of a baby boy on the last day of the year. We all congratulate him and wish to thank him for the cigars. Fine New Year's Eve for "Jim," what?

Freight Claim Agent

Correspondent, GEORGE DOBBIN

The excitement of the holiday season with its exchange of greetings and presents, and the making and breaking of resolutions, is over, and we have taken another step along the pathway of Time. One pace after another we travel toward the end of the trail, and year after year some of us grow less hopeful of our prospects for the future, based on our own past performance. Therefore, let us remember that the fault may be our own. Perhaps we have left out the main ingredients from the formula of success, probably discarded Loyalty, Knowledge and Faith, the prime essentials, as being worthless. Loyalty to our employers, friends and to ourselves; knowledge of our particular job and its co-relation to the work of the other fellow, and above all, faith in ourselves and our organization! To lose belief in the things that are part of our lives is to place ourselves in that helpless and dangerous class of the indifferent. Helpless, because as a class the indifferent person is without the decisive will power necessary for the completion of even minor detail, and dangerous by reason of a growing disposition toward the easiest way of arriving at any given point.

Just to help the Mail Division keep its place in the Marriage Lottery, our Miss Bredehoeft has blossomed out with a sparkler on the proper finger, assuring us that it has the correct meaning. Our sincere congratulations!

We have long ago admitted that the Harford Road section is wonderful, but it took Brother Aro to convince us that beautiful paper roses grew out there. Even the florist of the O. S. & D. Division needs must look to his laurels.

Some time ago the Independent Gossip and Sewing Circle No. 1 held its meeting at the home of Miss Sara Morris. Among those present were Agie, Becky, Lena and a disappointed feeling at not having Mr. West for a chaperon. He got cold feet and backed down. "Beany" was the only

charter member absent, because of the illness of her sister. Music, refreshments and a dance known years ago as the "shimmy," rendered by Lena, completed the enjoyable program.

Our own J. I. Waters has been looking things over at the new Masonic Temple of Cambridge, Md. Nothing like being popular, old man.

A daily rendition of Romeo and Juliet by John and Helen keeps the spirit of Shakespeare in our midst. Doggone it, John! That will mean another quarter toward a wedding present. But we don't mind: misery loves company and the wedding chimes sometimes bring more happiness than can be gotten in any other way. Here's luck to you both, and make it snappy!

The epidemic of engagement rings seems to be more severe in its after effects in the southwest corner of our office. For instance, just having recovered from the first (pleasant?) shock, Miss Iona Newcomb came about halfway to work hatless on the morning of January 4. Thanks to a reminder by a friendly soul in the street car, the error was corrected. Our congratulations are mixed with sincere hopes for an early return to normalcy.

Among the Famous Sayings of Famous Women we easily include, "Aro, am I late?" by Sadie.

There seems to be no end to the folks who are bound to listen to the sweet tune of the wedding bells. We extend our cordial congratulations to Mr. and Mrs. Sener. "It is an ill wind that does not blow somebody good," or words to that effect may be appropriate in describing the loss to Mr. King of a capable assistant and the gain by Mr. Sener of the lifetime partner who will aid him in achieving success, and share his burdens. It surely was a splendid way to begin the New Year.

Miss Foster also appears with a ring. Is there going to be no end to this? Murphy, old boy, tell us, was it an Irish Kris Kringle that told you where to get the jewel that the wooing of the Blarney (Stone) did win?

Among those who have joined the Back to the Farm Movement is Miss Ethel Eisberg. We are not quite sure whether Cupid alone must bear the blame for her dip into matrimonial seas. The date being considered, we have our suspicions of Santa Claus being in on the deal. All we have to say, no matter who is responsible, Mrs. Charles W. Wagner (I'll bet that sounds strange), we are sure that the joy and happiness due you, will be with you all through life, and we are "with you and for you" in that wish.

The numerous diamond rings with special meaning that are being worn in our office, lead us to think that good times and prosperity are on the horizon, and we who are not vitally interested in these ornaments can do no more than wish health and true love to all wearers. These are the essentials for real happiness in life partnerships. We take for granted that religion is the foundation of the ideals which inspire the parties to all these agreements. It may be well to remember that the Golden Rule may be sincerely observed with excellent results.

Freight Tariff Bureau

Correspondents,
F. W. RUPPERT, C. A. WAGNER
The Man Who Quits

He starts with a rush and a solemn vow,
As good as the next; but he lacks the sand
That would make him stick with a courage
stout,
To whatever he tackles and fight it out.

He starts with a rush and a solemn vow
That he'll soon be showing the others how;
Then something new strikes his roving eye,
And his task is left for the bye-and-bye.

It's up to each man what becomes of him;
He must find in himself the grit and vim
That brings success; he can get the skill
If he brings to the task a steadfast will.

No man is beaten 'till he gives in;
Hard luck can't stand 'gainst a cheerful grin;
The man who fails needs a better excuse
Than the quitter's whining, "what's the use?"

For the man who quits lets his chances slip
Because he's too lazy to keep his grip.
The man who sticks goes ahead with a shout,
While the man who quits is a "down and out."

Freight Traffic Department

Correspondent, DOROTHY RUBENSTEIN

"Politeness is to do or say
The kindest thing in the kindest way."

Have you ever noticed the inconsistencies of some people in the matter of everyday etiquette and courtesy? Take, for instance, the man who whips off his hat immediately when a lady enters an elevator, and yet keeps his head covered while making a business call in an office where many men and women are employed. Then, too, there is the woman who is politeness itself when engaged in a personal conversation, but who will invariably fly off into a tantrum at the slightest provocation when using a telephone.

No doubt you can recall the courteous and charming friend or acquaintance, who upon entering a crowded car or train, immediately becomes metamorphosed into a pushing, shoving savage, bent upon securing a vacant seat, and utterly oblivious of the discomfort and annoyance he is causing those around him.

The examples which I have cited are but a few of the many inconsistencies which are inexcusable on the part of the average man or woman, and which can easily be avoided by a little thought and care. Being ever on the alert to extend a courtesy wherever and whenever possible, will naturally tend to develop a charming personality, which cannot help but have a beneficial effect upon those coming in contact with it. With this idea in mind, let each individual launch a Personal Courtesy Campaign, and now is the time to start your particular ball a-rolling!

We regret to report the fact that Miss Dorothy Zellinger sustained a fractured knee when she slipped and fell on December 13. We hope that by the time this issue is published, we may have her sunny personality with us once again, entirely recovered from the mishap.

The tinkle of far-off wedding bells is beginning to be heard in the office. Please give us sufficient time to save up our pennies, Jerome Idaho!

They all fall sooner or later, and at last the bobbed-hair bug has penetrated the General Freight Office. Three victims are now suffering from the disease and several more are in the first stages of infection. J. J. F. extends his sympathy to the smitten.

A hearty welcome is extended Paul M. Heisey, the latest addition to our force, with best wishes for a successful career. The same applies to Stanley G. Hatton, another newcomer.

Are we, as members of the most interested department, setting the pace in "employee solicitation?"

Printing Department

Correspondents, H. R. FOGLE, *Compositor*

O. R. PYLANT,
Stone Hand

We regret to report that at this writing, Clinton Smith is ill at his home of an attack of typhoid. We hope for his speedy recovery.

A. Handley is recovering from a sprained toe, although he is not yet able to kick the football.

You should have seen how surprised was our Mr. Frey, when, on the noon of Friday before Christmas, he was presented with a handsome fountain pen, a gift from the employees of the composing room. O. R. Pylant made the presentation address as follows:

"Mr. Frey:

"I am going to present you with a little token which the ladies and gentlemen of this department have all contributed toward buying, and which we sincerely wish you to accept and to make good use of during the coming year, 1922.

"We also extend to you our heartiest congratulations in wishing you and the office force a Merry Christmas and a Happy New Year."

Now that the holidays are over, let us all settle down to business again and see if we cannot get out more work in the year 1922 than has ever been gotten out in one year at the Baltimore and Ohio Printing Department. I am sure that it can be done if we put ourselves to the task. All we need is steady work, a little pep, and a few good alarm clocks, and we can produce the goods. Now let's go for the big drive!

How about sending your correspondent a little news? Pictures, poetry, service records with the Railroad, etc., are all welcome. Hasn't somebody had a birthday party? Hasn't somebody a piece of work that he has done and which he'd like us to know all about? Haven't you girls something to gossip about? Hasn't somebody solicited some business for the Baltimore and Ohio? Hasn't something new and exciting happened to you or to the fellow who works alongside of you? Can you draw a cartoon? Hasn't someone led a blushing bride to the altar? Hasn't somebody bought a house through the Relief Department? Hasn't somebody celebrated a golden wedding anniversary? Hasn't somebody established some kind of a record, either in work or in play? Hasn't somebody told somebody else that the Baltimore and Ohio is the best road in the world to travel on and the best on which to send your freight? Hasn't somebody done something? Please tell the correspondent what you hear, and tell him quickly. He needs help from everybody.

Every department should be represented in the "Among Ourselves" Department each month. It is not necessary to be a Richard Harding Davis, a Rudyard Kipling, or an Ella Wheeler Wilcox; it is not even necessary to make the notes funny. What we want is good, constructive material that will really "mean something." The only requirement is that it be truthful and fair.

We regret that Miss Sophia Brown is on our sick list, too, as is Mr. Hopkins. We hope for their speedy recovery. George

C. A. Plumly, superintendent Telegraph, his son and grandson

Schuckman is also back on the job after being absent for several weeks because of a broken arm. We have several others who are also on the sick list and to whom we wish a speedy recovery.

Now don't forget about sending in your news items!

Telegraph Department

Correspondent, DELLA M. HAIN

Three generations in the family of our superintendent telegraph, beginning with him, then showing his grandson H. D. Jr., and the baby's daddy, appear in above picture.

Our Mr. Plumly needs no introduction. His son, Howard, received a grammar school education in western cities where his father formerly lived; later he was graduated at the City College in Baltimore, afterwards entering and graduating from St. Johns College, Annapolis, Md. Howard's home is now in East Norwood, Ohio. The grandson is a bouncer, full of life and vigor, justly received from his father and grandfather, and we predict for him a future that will be a pleasure to his grandfather and parents, and an honor to himself.

Transportation Department

Correspondent, L. K. BURNS

Dance! Dance!! Dance!!!

The Transportation Department baseball team will hold its first annual dance at West End Hall on Monday evening, February 20. The proceeds of this dance will be used in financing the baseball team during the coming season.

Manager Mansfield had a strong team in the field last season and it is his desire to get right at the front of the procession at the beginning of the coming season and to be there when the Baltimore and Ohio League closes.

Let us all lend our aid by attending the dance and bringing our friends.

Daddy: "No, your mother never dressed the way you girls do today, to catch a husband."

Daughter: "Yes, but look what she got."
—Exchange.

The Washington Terminal bowling team visited Baltimore and met the Transportation Team in a return game at the Y. M. C. A. on Saturday evening, January 7. When our team went to Washington about a month ago we were victorious—taking two games out of three. This time the Terminal boys reversed the tables, winning the second and third games. However, the total pins for the three games showed them as topping us by only seven, their total pins being 1469 as against our 1462.

Winifred and Louise, daughters of Travelling Car Agent C. C. Wilson, and their playmate, Teddy

Our bowling team of the Baltimore and Ohio League, Section B, is still in second place and Collins' mark of 146 for total pins in a single game is still the League record.

Valuation Department

Correspondent, G. B. SAUMENIG,
Accountant

A generous vote of thanks is extended to our former correspondent, E. B. Pierce, for his humorous and interesting cartoons which have appeared in the MAGAZINE during the past year. Mr. Pierce has severed his connection with the department and our best wishes go with him.

The Valuation family is gradually being brought together under one roof. At the present time all of the prodigal sons are in the fold with the exception of those in the Smoky City. Each day as the family is about the fireside, one can hear the loud praises of Cleveland, Wheeling, Chicago and Cincinnati, being sung in no uncertain tones, but there is a discordant note at times regarding Baltimore. It is a pretty good place in which to live and a mighty good place in which to work. After all it is not the town, it is you.

Some of the fair sex have the correct idea of what valuation means. Three of them have become very practical and have shown by their "sparklers" that they can show on their progress report "100 per cent. com-

plete," as to their work of placing a valuation on the object of their affection.

This disease is contagious and several of our Beau Brummels are acting queerly. Watch Rau and Gover for symptoms. Gebert from Pittsburgh set the pace during the latter part of December.

Regardless of the state of the weather, Lillie and Margaret have no fear because they know they always have the satisfaction of looking forward to their RAY of sunshine.

Charles Meesc, our faithful abstractor of mail, is the proud possessor of a cheerful countenance and winning ways. He can even present you with a bill in such a way as to make you feel as though he is handing you a \$100.00 bill. Here is another product of Relay.

On December 21, our office hours were changed and all were instructed to be at their desks at 8.20 a. m. Each morning since, thrilling movies are staged. It seems strange that a lot of us have our desks at home, on the street, in the cars or in the elevators.

MISS RUTH TUCKER
PUNCHING FILES

Some like it cold and some like it hot,
But ventilation we must have, weather
or not.

The celebrated order of Knights of the
Pulse Warmer and Red Flannel Under-

shirt is holding its annual convention in Room 1105. Each member carries a window stick. You can always tell them. They are the ones that hide behind the file cases, desks, etc., during ventilation periods. One of their practices is to drink ice water and then sit on a hot radiator. "Consistency, thou art a jewel!"

The New York State and the Chicago Commissions on Ventilation have established, with scientific accuracy, that 68 degrees Fahrenheit is the temperature at which the best office work is done. We owe it to ourselves as well as to those around us to have proper ventilation. We can, if you will.

Our arctic explorer, Hans Frederick Augustus Christopher Vorwerck, wears the fur cap which was left him by Commodore Peary after his last expedition. This is generally worn on clear, warm days. When it snows or rains, the cap is left home as a substitute for the family cat.

Some Why's for the Wise

Why does the Cost Department smoke Buckingham tobacco?

Why are price books made so large and price clerks made so small?

Why do most of the married men arrive at the office very early in the morning and leave late in the evening?

Why does the sailor boy of the Building Branch forget what ship it was?

Why not have a Spelling Department in the office?

Why does Wheatley attend theatre? Is it to get exercise or to be near the ceiling?

We are sorry to announce the illness of Miss Schaefer and Mr. Wilkinson. We know the former has heart trouble and it is possible that the latter may have the same malady.

The men in the accompanying picture checked the mechanical equipment on the Baltimore and Ohio System during the year 1921 for valuation purposes. Reading from left to right: E. B. Pierce, pilot; J. P. Shamberger, I. C. C. engineer; F. H. Becherer, I. C. C. engineer; J. G. Russell, pilot; A. W. Norton, pilot engineer in charge of work; H. E. Hendricks, pilot; J. W. Hendrickson, I. C. C. engineer; J. C. Cook, I. C. C. engineer; and J. W. Barnes, pilot.

One of the latest construction projects was in charge of Messrs. Wheatley and Wiles, engineering experts, who have had extensive experience in such large cities as Alexandria, Va., and Ellicott City, Md. They are equally proud of their structure, which consists of catalogues, price books, an antiquated file case, etc., and presents

They checked the mechanical equipment on the System in 1921 for valuation purposes

the appearance of the latest design of a fort. We can safely say it is practicable and will serve its purpose, until the boss invents some sort of an engineering instrument that will make it possible to look around corners.

Reid, one of the proprietors of our vault, recently received a visit from a burglar. His entire possessions consisted of a watch and 75 cents. The second story man left the watch but took the money. You can never tell a watch by the case.

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

Standing of the teams in the Office Bowling League, including games of January 10, was as follows:

Royal Blues.....	20	Won	10	Lost	667
Pull Men.....	18	"	12	"	600
Head Lights.....	18	"	12	"	600
Bumpers.....	15	"	15	"	500
Wrecking Crew.....	12	"	18	"	400
Tail Lights.....	7	"	23	"	234

Duke Spurrier set up a new high single game total on the night of January 10, when he went through the sticks for a total of 121.

Atwell had a pretty good night with a total of 327, just two short of the season's record.

As nifty a piece of bowling as has been our pleasure to watch was pulled off by "Al" Lehman after the regular games on the night of January 10, when in a special game of "nines," the object of which is to get nine pins in each frame by using one, two or three balls. Brother "Al" gets nine straight, several of which were wonderful shots.

Auditor Disbursements

Correspondent, JOHN C. SVEC

Our force has been very busy for the past three or four months in adjusting settlement with the United States Railroad Administration, which has about forty accountants on the job. Chief Clerk Donovan is representing our Company in this work in so far as it relates to disbursement matters. The work is progressing satisfactorily and is expected to be completed about the middle of February.

Our Colonel H. Cockran, traveling disbursement auditor, has purchased and is occupying a new and beautiful bungalow in the Ashburton Development. Even tho' he went into his new home after winter had set in, Mr. Cockran is already enthusiastic about suburban life.

L. Martin, chief M. C. B. Billing Bureau, has just returned from an annual meeting of the Chief Interchange and Car Inspectors, held in Chicago. At these annual meetings new rules concerning car repairs are gone over item by item and a uniform interpretation arrived at. Mr. Martin had his traveling M. C. B. accountants at the meeting also, and reports that the information gained will prove valuable in their work during the coming year.

On December 10, Miss Helen H. Patterson, assistant head clerk, Voucher Examining Bureau, announced that she had been married on May 14 to John T. McHale, clerk, Transportation Accounting Bureau, Auditor Disbursements Office. While it was an open secret that Mr. McHale was paying attentions to Miss Patterson, the announcement of the wedding came as a surprise, but both parties were showered with congratulations and they have the best wishes of the entire office for their future happiness.

A recent wedding of interest was that of Miss Katherine M. Miller, of this office, to C. Vernon Thomas, employed in the Senior Vice-President's Office, and son of E. Frank

Thomas, head clerk, Payroll Bureau, Auditor Disbursements Office. The wedding took place on Friday evening January 27, 1922, at the home of the bride. After an extensive trip South they took up their residence at the home of the groom, 13 Belmar Avenue, Overlea. The office force extends its congratulations.

Another wedding of interest was that of Miss Helen DeC. Kemp, an employee of this office, to Mr. Joseph Linnott Devereaux, of Chevy Chase, Md., on Saturday evening, January 21, 1922, at St. Ignatius Church. Miss Elizabeth Bevan, an associate clerk of Miss Kemp, was one of the bridesmaids. Mr. and Mrs. Devereaux will reside in Washington, D. C.

Auditor Freight Claims

Correspondent, H. J. BARKER

Not so long ago there was an article in one of the daily papers, quoting the number of marriages for the year 1921, and comparing it with the number in the previous year. This showed a great decrease. Generally, statistical quotations in daily papers are accepted as correct, but after looking over our office, of only 107 employees, we find that nearly 10 per cent. have been married within the past four months. Therefore, we feel as though there has been a big mistake made in compiling the statistics referred to.

The first victim was Boyd W. Goslee, who was married to Miss Hellen F. Miles, a little girl from down home, on June 4, 1921. They spent their honeymoon in New York City, and you may be sure that our new country couple had a very enjoyable time, for this was their first trip away from home.

Next was Richard Rebbert, Accounting Division, to Miss Anna Kaltenback of the M. I. T. Division, on October 12.

Then Paul L. Grafton, Foreign Division, to Miss Geraldine McQuade on October 12. The wedding was followed by a reception and dance at Tuttle's Hall, when 90 to 100 couples were present. While everything was in full swing, and, unknown to those at the party, the bride and groom tried to make their getaway to the train, but in spite of all their swiftness they were greeted with a big send-off.

Shortly afterwards, we lost our little speed king, Miss Hellen Miller, who was our statistician and comptometer operator. She was married on October 18, to Mr. George Vink.

The most daring of all happened on the same day when Miss Julia Norton, chief clerk's secretary, asked for a one-day vacation. She stretched it into ten days, and went to Boston and Niagara Falls on her honeymoon with James S. Smith, Loss and Damage Department.

Next in line was the marriage of H. E. Muellenix to Miss Elsie Wingate on November 18.

Now we'll have to take off our hats to George Appel, who, on November 28, was married to Miss Mildred Weaver. There have been many rumors going around the office in regard to this marriage, but there hasn't been even a word or a thought of our little George.

On November 24, Miss Margaret Coneby, Agent's Relief Desk, was married to Mr. Marshall Stewart. Immediately after the ceremony they went South. They expect to tour through all the southern states and return in the spring.

The office extends its best wishes to each for a long life of happiness.

Baltimore Terminal Division

Riverside

Correspondent, MARTHA V. FOX, *Car Record Clerk*

The stork left two fine youngsters at the homes of two of our Riverside Shop people, on a bright November morning, a fine boy at the home of General Foreman Ralph Cline; at the home of Norman Deitz, boiler clerk, a baby girl.

On December 28 Mrs. A. H. Blackburn, wife of Assistant Trainmaster Blackburn, died at her home in Baltimore. Although Mrs. Blackburn had been sick for some time, her death was unexpected. We extend to Assistant Trainmaster Blackburn our deepest sympathy in his hour of loss.

A number of changes have been made in our office force of late and we are sorry to say that E. W. Search, chief clerk to division engineer, has returned to his home in Philadelphia. We miss Wallace.

George T. Clarke, assistant trainmaster at Locust Point, met with a serious accident on the afternoon of December 15 in Locust Point Yard, when he slipped on a piece of iron covered with snow, while descending steps leading to the cab of engine 4291. The fall resulted in his left shoulder being contused and breaking his lower left limb. Mr. Clarke was taken to the University Hospital after the injury. We sincerely hope for his speedy recovery.

Mt. Royal Station

C. A. Bloom, assistant ticket agent, Mt. Royal Station, decided to start the New Year in double harness. On the afternoon of December 31, he and Miss Louise Ditto, a trained nurse of Franklin Square Hospital, were married at Trinity Episcopal Church, Lafayette Avenue and Bentalou Street. The ceremony took place at 2:30 p. m., and the happy couple left for a short trip to the North. Mr. and Mrs. Bloom are at home to their friends at 1207 Longwood Street, Baltimore. They have our best wishes for all happiness imaginable, and we hope that next time they will notify us a few days beforehand in order that we may have time to hunt up a few old shoes and a pound or so of rice.

Mt. Clare Shops

Correspondent, MISS MOLLIE ALBRECHT
Secretary to Superintendent

Superintendent of Shops Office

Poole, the blossoming young lawyer of this office, is with us again, and if ambition and arguments will get him anywhere, believe me, he will be district or state's attorney within a year! Here's wishing you just lots of good luck during 1922, John Henry!

We would like very much to have an account of Marion's doings during Christmas week. He keeps very quiet about it and our curiosity is aroused. When will the mystery of the wild nights be disclosed, old dear? We are anxiously waiting for an account of them.

We just want to announce that Davis is still chewing. Isn't it awful?

Baltimore and Ohio Folks, meet Miss Mary Jane Bell, 3 years old, of Cumberland, Md. Jane is the little granddaughter of T. R. Stewart, superintendent of Shops, Mt. Clare. Her daddy is Charles Bell, Dispatcher's Office, Cumberland. Make yourself at home, Jane; we'll be glad to add you to our Railroad Family when you get a little

Mary Jane Bell

older. Meanwhile, stick close to Grand-daddy.

Assistant Superintendent of Shops Office

The "mis-placed eye-brow" on Mr. Conen's upper lip, has developed into a full-grown mustache, and we are contemplating using him as Relentless Rudolph in some Hair-Breadth Harry series. However, Mr. Conen is such a good-natured fellow, that we can't imagine him twirling his mustache and saying: "Ah Ha! Me proud beauty! I have you in me power!"

The secretary of this office, Marshall S. Gosnell, is still with us in all his glory, and still wears the soldier trousers which have caused so much comment during the last six months. We believe he must be getting used to wearing them, as no one knows how soon he may be engaged in some war (domestic or foreign, we cannot say), and then he will be able to feel at home in them.

We neglected to announce in last month's MAGAZINE that L. J. Hook had to buy a new hat. This is due to the arrival of a sweet little "somebody" in his household who calls Roy "Daddy." We extend our best wishes to both Mildred and Roy.

Chemical Laboratory

This "gang" is still with us, and although there have been several departures, most of them are still hanging around, looking pleasant. That's one thing we must give this department. When you go in their office, at least two or three of them have grins on their faces, in spite of all trouble, so Mount Clare-ites won't get blue as long as they stay with us. However, we miss Willie Hokemeyer, with his dreams of Mabel, and Elsie, and so on. Although we don't have the benefit of hearing of his dreams, we hope he is still having them, and that some of them come true.

Drawing Room

There are so many nice people in this office that we can't write about one and slight all the rest, so we'll just say a little about each every month or so. This month it'll be about Charles. Everybody will know whom I mean, so I won't introduce him. Charles, do you mind if we call you "Happy Hooligan?" That tells the story in two words.

Locust Point

Correspondent, J. ROSS GOULD

We are well started on the New Year, with hopes that it will be the banner year of the Baltimore and Ohio.

Locust Point, the great terminal of the Railroad, is well prepared to meet the rush; we have the yards, the piers, and well

trained men (victors in many a well fought freight battle), who are looking forward and anxious to get into the fray.

In this period of business depression, it is especially our duty as loyal employees to do our utmost and to give our best energy to further its interests, thereby benefitting ourselves as well.

May the statements now being made by our officials to the Interstate Commerce Commission at Washington, D. C., as to the needs of the railroads, so influence their decision, as to grant what is needed, to place the roads on a sound basis and thereby bring business in general back to a state of normalcy.

Then, boys, we will, with a long pull, a strong pull and a pull altogether, keep our Grand Old Road in the front of the procession.

Permit me to introduce to our readers two of the Old Guard at Locust Point, Messrs. Boyd and Walstrum.

J. W. Boyd entered the service of the Company at Locust Point in June, 1879, as a clerk in the East Bound Freight Office. After a month's work there, he was transferred to Pier 6 as tallyman. For several years he had charge of the loading of East Bound perishable freight, and in 1890 was transferred to Pier 9, as export delivery clerk, which position he is now holding.

He has filled each assignment, with great credit, and has made an enviable record in the rather complicated job he is now filling. He is a faithful employee, a courteous gentleman, a true friend and a Baltimore and Ohio Veteran.

P. J. Walstrum is export delivery clerk, Pier 8. Mr. Walstrum entered the employ at Locust Point in May, 1888, as truckman. In six months' time he was put in charge of extra gangs in the lower yard; after filling the position creditably for three years, he was transferred to Pier 32 as night delivery clerk. Later he was transferred to daylight work, and when Pier 8 was rebuilt after its collapse, Mr. Walstrum was put in charge there as export delivery clerk.

During the World War, Mr. Walstrum handled thousands of tons of flour and

provisions for our Boys "Over There," in a very capable and efficient manner.

He, like Mr. Boyd, is courteous and affable, loyal to the Company and true to his friends. He is a member of the Baltimore and Ohio Veterans and also one of our shock troops. Like Mr. Boyd, he can be relied on in an emergency.

The employes at Locust Point Freight Office extend to F. S. Berghoff, secretary to the agent, their heartfelt sympathy in the irreparable loss which he has suffered in the death of his mother.

Baltimore Division

Correspondent, W. H. TARR, Superintendent's Office, Camden Station

The picture on page 64 is of Harry Eckman, of the Baltimore Division. He entered the service as a freight brakeman on September 24, 1887 on this division, was promoted to freight conductor in 1904 and to extra passenger conductor in 1909. Conductor Eckman named his youngest child, a boy, after the president of the Baltimore and Ohio, Daniel Willard Eckman. The story of how this happened was told in the January issue of the Magazine, Children's Department.

On December 22 the office force presented Chief Clerk Wm. D. Devlin with a gold ring as a Christmas gift.

Brunswick, Md.

Correspondent, CONDUCTOR R. L. MUCH

A new economy test is about to be inaugurated on the Cumberland Division. Engine 2558, just out of Mt. Clare Shops, arrived here to be fitted with equipment necessary to determine certain tests in train movement. Among railroaders there is great rejoicing. If this type of engine is adopted, it means better times. Engineer Merckle, of Brunswick, has been chosen to run this engine. Brunswick will be the starting point for the tests.

Veterans of the Service at Locust Point, J. W. Boyd and P. J. Walstrum

Hamilton Watch

"The Railroad Timekeeper of America"

*Is there a better judge of a Watch
than a Railroad Man?*

LONG years of experience on a job where accurate time is vital, makes the Railroad man an authority on watches.

And when he has timed trains accurately with his Hamilton through years of service, its dependability is conclusively proved.

Charles Hamilton, the efficient engineer shown here, runs the Bangor Flyer—one of the longest hauls on the B. & M. He has been with the Boston & Maine 49 years. He runs the Bangor Flyer by a Hamilton Watch.

The Hamilton is built to stand the hard jolts of a Railroad job. When you buy a Hamilton you buy satisfaction. The Railroad man who bought a Hamilton so long ago that he isn't sure whether it was fifteen or twenty years ago, is satisfied. The man who bought a Hamilton recently—a few months or a few years ago, is satisfied; and when you decide to buy a Hamilton, you can bank on the same satisfaction.

Your jeweler sells Hamiltons, and will be glad to show you a No. 992—the 16-size Railroad Timekeeper of America—or any other grade made. And he'll look after it for you, and be a service station for its continuous, accurate performance.

Hamilton Watches range in price from \$40 to \$200; movements alone \$22 (in Canada \$25) and up. Send for "The Timekeeper", an interesting booklet about the manufacture and care of fine watches. The different Hamiltons are illustrated and prices given.

HAMILTON WATCH COMPANY

Lancaster, Penna., U. S. A.

Please mention our magazine when writing advertisers

Conductor Harry Eckman, Baltimore Division

J. F. Mackin, former general yardmaster, Cumberland, has been appointed acting terminal trainmaster here, with full charge, vice W. O. Shields, who is on an indefinite furlough.

Brunswick yards are the center of energy of the whole Baltimore and Ohio System, being in touch with all the principal as well as the minor business and manufacturing cities of the United States. Thousands of cars are handled daily, involving great care in their distribution.

Mr. Mackin, being an experienced official, has grasped the situation in a thoroughly business-like manner.

The funeral of Conductor Charles Woodcock was held on January 3. He entered the service of the Baltimore and Ohio 32 years ago. For the past six years he had been incapacitated because of illness. The Brotherhood of Railway Trainmen had full charge of the funeral, under the direction of E. W. Burch. The pall-bearers were: O. B. Howe, J. P. Alston, R. L. Much, E. Kaufman, W. W. Kelly and D. C. Wood.

Engineer A. B. Haller and wife were snapped by your Correspondent as they were gazing at a sight-seeing airplane. Engineer Haller is one of the fuel savers of the Baltimore and Ohio. Every run is an efficiency run with him, and he has been officially commended on his good work.

Sitting on the stone wall is "Jackie" Dean, 6 years old, son of "Mack" Dean, switch operator, eastbound hump. He is a bright boy and, like his dad, will be a good railroad man.

Here we see Warren Harding Axline, 9 months old, son of Lieutenant W. Axline,

Engineer and Mrs. Haller, watching an airplane
Brunswick, Md.

Baltimore and Ohio Police. He has all the appearance of becoming a shrewd and faithful officer like his Dad.

Four Classes of Railroad Men

Having traveled extensively in the United States and foreign countries, I have been greatly impressed by the customs of the different classes of people with whom I have come in contact. There is something about the railroad workman that appeals to me. Among trainmen, we find what is known as the "boomer," a fellow who never settles down, and who only waits until he makes a couple of "pays"—then is gone to some other clime. Like a proverbial rolling stone, he never gathers any moss, and finally ends up as a hash slinger in some railroad beanery.

Then we find the college and office-bred man, who goes railroading in search of health and excitement, and who, after a few months' experience, can give conductors cards and spades about railroading from A to Z, and has the Book of Rules skinned a thousand miles. Some of the class "stick," really becoming successful railroad men, settling down, happily engaged in their work, becoming a credit to the Company. Others stay a while, quit, then enter other means of livelihood, more becoming to their natures.

Again, we have what is known as the "pay day" class. Soon as the pay checks are handed around, a rush is made for the nearest poker-joint, where they play all day and night while their families are anxiously awaiting their return home that they may settle up with their grocer and rent man. Some are able to get by on a small amount, others are badly in need. This is the class that keeps the officials busy, and has the call boy running like a hound-dog after a rabbit.

There is another class, the steady workers. They never lose any time, except when sickness, death or other family troubles come to them, who find it unwise to lay off a trip; hard workers, steady and industrious, they do all they can to make life worth living and have peace and contentment in their homes and in their relationship with the Baltimore and Ohio.

Washington, D. C. Freight Station

Correspondent, W. L. WHITING, *Chief Clerk*

There has been so much said regarding "Service" lately in connection with Railroad matters that when a special effort is made, and good results come from such effort, it is well that the readers of our MAGAZINE should share in the appreciation that is shown by parties interested. The following letter from Division Freight Agent G. S. Harlan is worth perusing. It shows what can be accomplished by cooperation and teamwork. The firm of S. Kann's Sons Company, from whom the appreciation comes, is one of the largest Department houses in this city:

BALTIMORE, MD., December 13, 1921.

MR. M. W. PRYOR, Baltimore:

Referring to our letters 26 and 28 ult., attaching communications from S. Kann Sons Co., Washington, D. C., in which they requested prompt movement of shipment consisting of seven cases dolls from Hamburg, Germany, consigned Washington, D. C.:

For your information beg to quote below copy of reply just received from Mr. William F. Friel:

"This shipment was received by us today and I cannot let this occasion pass without

Warren Harding Axline, Brunswick, Md.

expressing to you both my firm's and my own personal appreciation for the courtesies and the cooperation of the various Baltimore and Ohio officials to whom I appealed for assistance in order to expedite this movement after the steamer docked and unloaded.

"Your Foreign Freight Department, Mr. Marshall's office, in this city, and Mr. Fisher's office, deserve thanks for their efficient handling of this shipment, and in view of the short time for the sale of this merchandise before Christmas their efforts are more than appreciated.

"Assuring you again of our appreciations, I remain, with best regards."

It is mighty pleasing to get a letter of this kind and in addition to what has been said by Mr. Friel we want to extend our sincere thanks for your prompt cooperation in the handling of these goods.

MR. F. L. MARSHALL, JR., Washington, D. C.
MR. D. M. FISHER, Agent, Washington, D. C.

Your prompt and careful attention to the handling of these goods is very much appreciated.

"PERFECT PACKAGE MONTH" is another of those matters connected with railroads that the general public is also very much interested in, and we have heard a

Little Jackie Dean, Brunswick, Md.

great deal of it lately. Of course, all concerned have "put their shoulders to the wheel" to bring about good results.

With what success the plan was carried out in this city the following letter from the Merchants' and Manufacturers' Association of Washington, D. C., is the best possible evidence:

MERCHANTS' AND MANUFACTURERS' ASSOCIATION, INC.

MR. D. M. FISHER, Freight Agent, Baltimore and Ohio Railroad Company, 1st and Florida Avenues, N. E. Washington, D. C.

My dear Mr. Fisher—Permit me to congratulate your Company and the other carriers upon the successful fruition of the "Perfect Package Month."

I am confident it did a great deal of good and assure you that the Merchants' and Manufacturers' Association is very proud to have been associated with the movement even in the measure that we contributed.

It is a fine thing from time to time to bring forth the measuring rod that we may find out our weaknesses in order to speed up perfection in service.

The carriers are indeed to be congratulated on putting forward the idea and exercising so much energy in promoting it.

Yours very truly,

Secretary

Those of our readers who have read the splendid letter to The Baltimore and Ohio Family from the pen of our President Willard, will concede that the letters above referred to are the results of work along the lines suggested by Mr. Willard in his greeting:

"I have been much pleased by the manner in which Baltimore and Ohio officers and employes of every rank have responded to my request a year ago, for their helpful sup-

port and cooperation. This cooperation has been manifested in many different ways, such as efforts to obtain additional business for the Company, efforts to improve the service, to reduce and prevent accidents, to reduce loss and damage, and by a more general desire, or rather a more general effort, to cultivate courteous and sympathetic relations with the public."

It is now for the employees of the Baltimore and Ohio to use every endeavor to carry out the wish expressed in the last paragraph of Mr. Willard's letter, and to continue in the efforts to please the public, and give the service that it is the duty of all to give.

There is no time when the old home fire-side appears brighter and more cheerful than at Christmas-tide; and one or two of our force could not resist the magnetic influence of home, and spent the festive season with their loved ones.

Foreman's Clerk C. M. Webb went to his home "Way down in Tennessee," and Index Clerk R. V. Montgomery journeyed into the Hoosier State to visit the old folks.

The following was received by wireless from the wilds of Cumberland, Md., the domain of Agent C. R. Grimm, who was for two years assistant agent at this station and who took with him Ross W. Price to be his chief clerk at Cumberland:

"Ross Jr., weight seven and three-quarter pounds, arrived on January 2. A noted increase is visible in the new "Daddy's chest."

It is always a pleasure to hear of the success of those who have been with us, especially if they are still connected with the Baltimore and Ohio family. May the good work go on and the "Prices" (in this case) never grow less. Good luck, Ross! Many happy returns of the day; but don't let the chest expansion get too large, or the head may follow suit, and, as you know, "Nobody loves a fat man."

Cumberland Division

Correspondents
E. C. DRAWBAUGH, Division Operator
JOHN SELL, L. P. Clerk, Superintendent's Office

Much credit is due employees on the Cumberland Division for the manner in which the Christmas Business was handled. For several days before Christmas there were extra sections on almost all through passenger trains. These were handled in good shape as was also the heavy passenger travel, express, mail and freight shipments. If Old St. Nick failed to reach anyone, it was no fault of the Cumberland Division employees.

One of our former employees, Charles J. Crogan, now a student at Georgetown University, was home for the Christmas holidays. "Charlie" was instrumental in having a large number of students use our line to their homes in various parts of the country and has made many friends for the Baltimore and Ohio among his classmates. "Charlie" expects his diploma this spring and while the

VIGILANT REEL AND HOSE COMPANY, KEYSER

H. R. Stewart, Pres. W. W. Long, Chief C. E. Hixenbaugh, Engineer C. E. Leary, Sec. F. E. Kagey, Captain
In April, 1905, The Vigilant Reel and Hose Company No. 1 was chartered under that name by the State for the purpose of saving life and property from loss by fires and to promote social intercourse among its members. The present organization is equipped with an up-to-date American-LaFrance auto truck; also has a big hook and ladder truck and three hand reels. One of the big fires that made the Vigilant Reel and Hose Company No. 1, of Keyser, W. Va., famous, was that of the big Barton holocaust of Feb. 3, 1919. Another big job of the boys was that of Feb. 18, 1919, when the First National Bank and the Opera House caught fire. The bank was badly damaged and the Opera House was a total loss. The boys again prevented what might have been the worst fire in Keyser; their work in keeping the flames from adjoining buildings was heroic. The majority of the members of this company are Baltimore and Ohio employees

Please mention our magazine when writing advertisers

Company has lost a loyal employee, the country has gained a good lawyer. Much luck to you, "Charlie!"

It is with great pride that we scan the "blue prints" each month, and find the Cumberland Division still at top-notch in efficiency. This encourages the boys to exert every effort to keep it there.

Our chief dispatcher on the night trick, has a fine dog. "Jake" says he is a collie, so we will have to take his word for that, but we can have our own opinion.

C. A. Wigal, water station foreman and expert motor car operator, took his usual fall hunt not long ago. We are still waiting for that venison and bear steak. "Charlie" must have confined his efforts to small game. No doubt there will be a scarcity of rabbits.

Our old friend, P. M. Pennington, crossing watchman, Polk Street, Cumberland, besides the great care given the safety of pedestrians passing over his crossing, has become quite a dog fancier. Tell us the joke, P. M.!

One of the most interested readers of the MAGAZINE is our old friend, "Gus" Weibel, retired. "Uncle Gus" reads the MAGAZINE regularly and has many interesting stories to tell of his long experience with the Baltimore and Ohio. We hope to get an interview with him, which I know will make interesting reading.

Cumberland was visited by a serious fire on the night of January 7, when the large wholesale grocery building of the Bayer Grocery Company, adjacent to our tracks and near the Queen City Station, was totally destroyed, with all its contents, estimated loss amounting to about \$200,000.

The Cumberland Veterans began the new year right with a big time at Cumberland, the kind of time the boys enjoy. There was plenty to eat, music, dancing and good talking. President Allison was right on the job, and from reports, some of the older boys are still there when it comes to the terpsichorean art.

One of our local correspondents is wearing a broad smile these days. Yes, it's a boy. John is receiving the congratulations of his fellow employees. This being his fourth boy, John has reasons to feel proud.

The Cumberland Division has a basketball team, which is second to none, and is

willing to meet all comers. They have issued a challenge to any other division on the System. We are with the home team to a man.

Bowling is also going strong at the present time, and while we have no league on the division this year, our employees are largely represented in the City League and are giving a good account of themselves.

While it is a little early in the year to talk baseball, "Hotty" Spearman assures us they will be ready to put a team in the field this year that will be a winner.

B. A. Noone claims the checker championship this year. This title was held last year by R. L. Ketzner, assistant chief clerk to the superintendent.

Recent changes around the Queen City Station building are as follows: L. M. Rausch, appointed day station master, W. A. Johnson succeeding as night station master, and our own James McCarty promoted to baggage master, third trick. Congratulations, boys! We are all glad to see you going up and wish you the best of luck.

We have a report that our popular agent at Great Cacapon claims to have raised the largest pumpkin in Morgan County. Knowing "Brownie," we feel sure it must be some pumpkin.

J. B. Higgins is chief transportation time clerk and one of our most popular clerks on the division. Just recently he became a benedict and now all signals are set for home.

J. B. Mackin, former night general yardmaster, Cumberland, has been promoted to acting terminal trainmaster, Brunswick. "Paddy" has all of the Cumberland boys' best wishes. C. F. Van Osedale succeeds him at Cumberland.

Many other departments have been claiming credit for long years of service for different employees. Uncle M. J. ("Mike") Fleming, clerk at the Freight House in Cumberland, is the oldest clerk in point of service in the Transportation Department. "Uncle Mike" is still in active service and we wish him every success for many more years.

"Grandma" Messman sure does amuse the boys at times. We often hear good stories on G. Frank, but the best one to date is hard to understand. "Grandma," all the

boys want to know why it is necessary to check the carbons against the originals. How about it, Frank? You tell them accuracy must be maintained.

We are glad to mention that our veteran painter foreman, E. D. Colgate, recently pensioned, has recovered from his recent illness and is able to be about.

We have it on good authority that our old friend "Bill" Shaw, will be a candidate for the election as delegate to the Relief Department Convention.

Timber Preserving Plant,

Correspondent, E. E. ALEXANDER

Our Railroads are not only vital to the Nation's welfare, but also to the home.

Furloughed or short time men are not home builders. Their families are not happy or prosperous. Good business means good times. Good times mean good news. When business is dull and work is slack, bright interesting news, enjoyed by all, is scarce around railroad employment centers. The depression on the railroads is being keenly felt by everyone.

The necessity for strictest economy affects all, reaching into the homes from which only good news and pleasant thoughts should emanate. We hope that the better times, for which all are anxiously hoping for our railroads, are close at hand.

Safety First!

Not one employe injured during the month of December, 1921, and only one in November. Though partly due to reduced force and man hours worked, this is largely due to carefulness, the result of consistent and united effort.

Weddings!

Ticket Agent H. M. Whitford and Miss Georgia Gurtler, daughter of Fireman and Mrs. C. M. Gurtler, were recently married at Martinsburg, W. Va. They have our best wishes.

Plant Clerk F. A. Sebold, Cumberland, Md., and Miss Minnie Catlette, daughter of Mr. and Mrs. A. B. Catlette, of Green Spring, W. Va., were quietly married in Cumberland on December 31. Miss Catlette is a popular and well known clerk of Flora & Co., while Francis needs no introduction to Cumberland Division employes. They have our congratulations and we predict a happy future for them.

The accompanying picture is of Operator J. D. Rockwell's attractive new house; the people from left to right are Mrs. J. D. Rockwell, daughters Margaret and Mildred and Operator J. D. Rockwell.

E. S. Parks, vice-president of the Century Wood Preserving Co., Pittsburgh, Pa., was a recent business visitor at the Plant.

Tieman and Mrs. W. E. Landes, newlyweds, were recently presented with a beautiful cane rocker, another remembrance from fellow employees.

Treating Inspector C. L. Kittle, Central Creosoting Co. Plant, Finney, Ohio, has moved his family from North Bend, Ohio, to Lawrenceburg, Ind., since the opening of the new bridge.

Only a week after the return of his wife from the Western Maryland Hospital at Cumberland, where she underwent an operation, it was necessary for C. R. Pasapac, our commissary manager, to enter the same institution to undergo a major operation. We are glad to report

House of Operator J. D. Rockwell, Green Spring, W. Va. Mr. Rockwell is standing on the porch with Mrs. Rockwell (left) and their daughters, Margaret and Mildred

them both able to attend to their accustomed duties again.

Mrs. J. D. Rockwell, wife of operator, is convalescing from an operation at the Western Maryland Hospital, Cumberland.

Mrs. B. F. Twigg, wife of retortman, is also regaining her health at her home after an operation at the same institution.

Tieman Thomas Long has moved his family into his elegant new home recently completed at North Branch, Md. (another new home).

B. F. Reed is another tieman who is building a new home at Green Spring. Several others are contemplating building when conditions warrant.

Soapy Stuff

May I hold your Palm Olive?
Not on your Life Buoy.

Martinsburg Shops

Correspondent, W. L. STEPHENS

Motive Power Foreman F. G. Maxfield received a delightful surprise on Christmas Eve, when "the boys" presented him with a handsome ring, bearing the Masonic emblem, and a fine umbrella. These useful and decorative gifts are a fine tribute to the popularity of Mr. Maxfield. May he get real joy in wearing his ring, and may he leave his handsome umbrella in our office some day and forget it. (We have none of our own.)

The Baltimore and Ohio fraternity were terribly shocked to learn of the untimely death of Section Foreman Noah Alinger. A useful and active career ended at the age of 40 years! He was working along the main line near the junction of the low grade just west of Cumbo. A moving train on the low grade drowned the sound of the approach of a fast train on the main line. The foreman was struck by the fast train and instantly killed. Our sympathy is extended to the widow and three sons who survive.

Brakeman Elmer Kies, 317 E. Race Street, was instantly killed in a motorcycle accident on Tuscarora Pike, just west of this city. The motorcycle on which he was riding got beyond his control and Mr. Kies was thrown against a culvert. His neck was broken. Mr. Kies would have been 30 years old on January 20, this year. A widow and four small children who survive, have our heartfelt sympathy.

Keyser, W. Va.

Correspondent, HARRY B. NIGHT

E. J. McGuiness, who has been chief clerk to Master Mechanic Hodges, Keyser, for the past year, has been transferred to Riverside, Baltimore. That "Mac" has made many friends while here was evidenced by the handsome traveling bag which was presented to him by the supervising and office force on the eve of his departure. We are sorry to lose "Mac" and wish him success in his new position.

Mr. H. A. Deetz of Philadelphia has been appointed chief clerk, vice Mr. McGuiness. We welcome Mr. Deetz.

Fireman George Cornell is able to be out and around after having suffered the loss of a foot.

The weekly Meetings held by Master Mechanic Hodges at his office on each Friday are producing satisfactory results. These meetings are attended by all foremen, from both Locomotive and Car Departments, various subjects pertaining to the betterment of the service being discussed.

Gold Engraving FREE

Your name on the outside of the case in 23 Kt. gold letters, absolutely free. Extra lines, Street No., City, etc., 30 cents each. Emblems, 40 cents each. This attractive engraving gives the case an exceptionally rich and handsome appearance. Alone it is worth \$1.50 of any man's money.

Lapel Button FREE!

Mason

K. C.

As a special introductory offer, we will include with every case, one of these attractive lapel buttons of hard baked enamel on heavy gold plate. These buttons usually sell for \$1.00 each. This is a wonderful offer that you will not find duplicated anywhere.

Send this Coupon Today!

Send No Money

Just send the coupon, telling us what button you want and what you wish engraved on case. Pay the postman when you actually receive the goods. We guarantee absolute satisfaction. Otherwise your money will be returned immediately and without red tape. We have been in this business for fifteen years. You take no risk! Don't miss this wonderful offer.

U.S. Leather Goods Co., 106-110 W. Lake St., Dept. 4012, Chicago

Send me your _____ window pass case, with my name in gold engraved absolutely free. Also the _____ lapel button free. When it arrives I will pay the postman your special price and the few cents postage, plus extra I have checked below. If I am not more than satisfied, I will return the case and button and you will return my money, including postage.

Name _____ Engraved FREE)
St. No. _____ ☐ 30c Extra
City _____ State _____ ☐ 30c Extra
Emblem _____ ☐ 40c Extra
(Be sure to check engraving you wish in addition to your name)

At the last meeting held, 25 foremen were present and 28 subjects were discussed. These included: expenses, delays, shortage of material, new rules in effect, condition of equipment, condition of shops and premises, etc., as well as preventatives to such delays and conditions which we may expect during the winter months.

Any irregularities that have been noticed since the previous meeting, as well as action to overcome omissions in the past and preventatives for the future, are given close attention. In fact, these meetings have not only shown a tendency to promote interest in the work at hand, but have increased the efficiency of our supervising forces so that the most desirable results have been obtained.

Walter Sobraske, one of our popular machinists at shop, has gone on an extended visit to his parents, Mr. and Mrs. J. Sobraske, in California. Walter stated, however, that he will be back to keep a pressing engagement in June.

"Do Do," our Car Department stenographer, states that the cartoon in the December MAGAZINE showing "B. J." as walking slowly after his visit to Orchard Street is in error. He should have been shown running, "cause he stays so long."

We are informed at this writing that Miss Allamong, Roundhouse Office, now writes her name "Mrs. Alta Porter."

Congratulations to our Power Clerk and Mrs. J. M. Salyards—it's a girl!

Dusty says "The car report is like the weather report—it all depends on the temperature of the car foreman."

Aaron C. Welton, for years an employee at the local shops, died at his home on S. Mineral Street on January 11, after an illness of several weeks. Mr. Welton was born May 11, 1849, at Petersburg, W. Va., but spent the greater part of his life in Keyser, where he was employed. The remains were taken to Petersburg for interment. We extend to the bereaved family our deepest sympathy.

Guaranteed Genuine Cordovan Leather

A more remarkable offer of a combination Passcase, Cardcase and Billfold has never been made. Just look at these smashing prices:

1 Window Case, \$1.18 4 Window Case, \$1.48
2 Window Case, \$1.28 5 Window Case, \$1.58
7 Window Case, \$2.28

Carefully made of Genuine Black Cordovan Leather, tough and durable. Strongly stitched, will not rip. Generous size, with plenty of spaces for your money, cards, memo, etc. Size folded 3x4 3/4 in. You have never seen such wonderful value.

Clarence J. Snyder, one of the most popular conductors on the west end of the Cumberland Division, died at his home on Spring Street, this city, on January 13, following a short illness of pneumonia. Mr. Snyder is survived by his wife and two children. Conductor Sherman L. Snyder is a brother. The family has our most sincere sympathy.

It is with deep regret that we chronicle the death of Engineman George P. Warner. Mr. Warner had been ill for some time and on December 13 he passed peacefully away.

Mr. Warner began railroading in July, 1876, as a yard fireman. On February 28, 1885, he was promoted to engineman, which position he held until his death.

He was a man of quiet and unassuming disposition and his beautiful character won him many friends in all walks of life. He was an active worker in the Order of Knights of Pythias, having helped to organize Olive Branch Lodge No. 25, 45 years ago. He was the 25th Grand Chancellor of the Domain of West Virginia.

His funeral was held on Sunday and was one of the largest ever held in Keyser. It was in charge of the Knights of Pythias and Brotherhood of Locomotive Enginemen and Firemen. A memorial service was held for Mr. Warner in the High School Auditorium, in recognition of his wonderful service as a member of the School Board.

We extend to the bereaved family our heartfelt sympathy.

It may be of interest to many Keyser employees and the public as well, to know that the first depot the Company ever had in Keyser is still standing. It was moved, years ago, to another location, and "Uncle" Harrison Ross moved into it. Uncle Harrison was one of those old time darkies, of the old school, and in this house he spent fifty years of his life. The building is located on East Water Street and is now occupied by Uncle Harrison's son-in-law, "Bob" Gray, the genial porter at the passenger station.

We hope to be able to get a picture of

"Uncle Jack" Ravenscroft, as we best knew him

Keyser's first depot, soon, and to see it in the MAGAZINE.

Agent Stover and his forces at the freight and passenger stations took up a collection among themselves at Christmas time, and purchased food which was distributed among the poor of the community.

Such acts of charity and thoughtfulness for their fellow men who are less fortunate, are to be commended.

Every railroad man on the west end of the Cumberland Division, knows of the dandy caboose, in charge of Conductor "Slick" McLakin, and which has been mentioned in the MAGAZINE. The correspondent rode in that cab some time ago and wrote about it in the November issue. It is fine and the captain and crew deserve all the nice things that have been said about them.

Now comes another one, and maybe if we would look around we will find some more good housekeepers on this division. Conductor Harry Fonner has charge of Cab C993. His crew is composed of O. C. Murray, C. C. Householder and J. Sutton, and they have their cab fixed up mighty fine. They call themselves the "Safety First Crew" and their cab is arranged for Safety First. Well built cupboards, hot and cold running water, nice pictures, in fact "a place for everything and everything always in its place." The caboose has been nicely painted and you are invited at any time to come and inspect it.

Some reader, send 'em a nice calender for their cab.

We are sorry to report Engineman "Charley" Blackburn as being confined to his home on account of illness.

We regret to report the death of Mrs. Mary Hollen Stallings, mother of Yard Clerk E. M. Stallings. Mrs. Stallings died at her home on Piedmont Street on January 6. The body was taken to Williamsport, her former home, where it was laid to rest. The clerical forces here contributed a beautiful basket of roses. We extend to the bereaved family our heartfelt sympathy.

Is each of the employes receiving a copy of the MAGAZINE, each month? If not, call at the Ticket Office, and get one. We want every one to get a copy.

One more of our veteran employes passed away to the Great Beyond, when Inspector Foreman J. W. Ravenscroft, died at his

home, 107 W. Piedmont Street, Keyser, after three months illness due to paralysis. The deceased was 68 years of age and had a 53 year service record.

"Uncle Jack," as he was known to thousands of employes on the Cumberland and other divisions, was born at 21st Bridge, below Keyser, on July 1, 1853. He entered the service of the Baltimore and Ohio, June 1, 1868. He was continuously in the service from that date, having never failed to receive his pay check from the time of his employment until a few months before his death.

In our December issue of the MAGAZINE, there appeared a lengthy item on the occasion of Mr. Ravenscroft being presented with a 50 year service medal by the Veterans' Association of the Cumberland Division.

We are submitting for this issue of the MAGAZINE, a portrait of "Uncle Jack" as we best knew him.

Paw Paw, W. Va.

Correspondent, M. L. SHARON
Pensioned Engineer

Uncle John Shipley, whose picture is shown here, is the efficient track foreman on Section 22, High Line, at Paw Paw. John is a Veteran of the Martinsburg clan, and has had about 43 years of experience at his job.

Uncle (we call 'em all "uncle") "Bill" Kaylor, our high speed track foreman, was elected to the Town Council on January 5,

by a good majority. Hoof 'em up, "Bill," for a cleaner and better town!

We notice that our Agent Fleming and assistant, "Bill" McBee, have a new mail cart. Beats a wheel-barrow, doesn't it, boys.

Your correspondent was rustivating in Martinsburg last week, seeing the boys and getting a few fish stories. "Bill" Airhart, of course, always has some in stock for us.

Our track walker, Philip Fretzman, had a wedding at his home. His son, Raymond, was married to Miss Lealie Sargent, his father's housekeeper. Good luck to 'em!

Mrs. Northcraft, one of our respected citizens, was laid to rest on December 26, aged 88 years. Some of the younger generations are employed with the Company.

D. G. Beavans, one of the old time telegraph operators for the Company, is one of our genial merchants and right on his job when it comes to sales.

We would like to hear from our old! Martinsburg friends, especially "Joe" Linthicum. "Joe" and I have spent many a—I was going to say happy—day together fishing, but you know we would always fall out about the biggest fish, which "Joe" always claimed.

Sabraton, W. Va.

Correspondent, L. M. GUMP

Robert Kennedy, clerk to Supervisor R. L. Cattlett, and ardent foot-ball fan, who has been seriously ill for some time, is greatly improved.

Winter "Sports" at Keyser, according to Alvaro

J. B. Shipley, track foreman

Stanley "Slim" Lantz, clerk to local agent Hansel, has been bumped by Wayne Ringer of Masontown account of furlough at that point. "Slim" said; "Mr. Lantz thinks I should continue my education at West Virginia University, and as I'm still boarding with him, I'll get only three weeks rest." So the first of February "Slim" will begin the four year job of convincing W. V. U. faculty that the railroad has some brilliant sons. The race has been postponed indefinitely.

Storekeeper "Red" Farrell and Boilermaker W. C. Johns, Sabraton's two incurable hunters, upon returning from a hunting trip into the Scott's run district, report rabbits of such size that they make as much noise as a sheep while running through the underbrush, and when dressed, weight nine pounds each. Right in line with this Mr. Johns gives another experience: It seems that when going out in the yard one evening not long ago, he saw a regular parade coming from under the henhouse. It consisted of a large rat lying upon its back and holding four eggs, being pulled along the ground by its tail by four other rats equally as large. Quickly getting his gun from the house he broke up the parade, and offers as evidence four dead rats and the shells of three eggs. We have no comments to make.

Engineer Henderson, who was suffering from an attack of pneumonia, is back on the job, apparently quite recovered, but Fireman C. W. May, who has also been on the sick list for some time, has not yet reported.

We note with regret the passing of "Uncle Jack" Ravenscroft, of Keyser. Mr. Ravenscroft was one of the old school of railroaders, and had a number of friends and acquaintances among the local men.

Passenger Brakeman Eminger is of a musical turn of mind, and at different times gives concerts for the amusement of a number of his friends.

The accompanying photograph is of a number of the Car Department employees at this station. At the extreme left is seen our former car foreman, C. B. Gosnell (standing). Mr. Gosnell has been in the service for thirty-two years, over twenty two of which have been spent in a supervising capacity. His service record carries three citations for meritorious service, and also shows that at no time has he been suspended or held out of service.

On January 7, while the Westbound local was exchanging freight at Sturgeson, Engineer Morgan, who was busily engaged oiling around, was accosted by three charming young ladies, attractively dressed

in hiking costumes of khaki, who wished to know if they might ride his train to Morgantown; if so, they would prefer to ride on the engine. Our handsome friend, always eager and willing to please the ladies, assured them that they might go, but suggested that the caboose would be more comfortable than the engine. No sooner said than the ladies started for the caboose, but Conductor Lewis Hess, horrified at the thought of any one but a man occupying his house on wheels, met them on the steps. The ladies contended vigorously that the engineer had told them they could go, they guessed he was boss, and no mere man was going to stop them, and furthermore, if they couldn't ride in the old caboose, they would get on the engine with the good looking engineer. At any rate they were going, that was flat. Mr. Hess held them off with one hand, while with the other he frantically gave his engineer a "high-ball," and as the train pulled out leaving the young ladies alone in their anger, was heard to heave a great sigh of relief and vow vengeance upon Morgan in no mean terms. This will never do, Lewis; faint heart ne'er won fair lady.

Office of Trainmaster

The accompanying photograph is of Main Line Train Dispatcher H. B. Pigman, who first entered the service of the Baltimore and Ohio May 1, 1880 as night operator at the east end of Sand Patch tunnel. In September, 1880, he was transferred to same position at Mt. Savage Junction; in 1881, transferred to same position at Pinkerton. He was day operator at Port Perry from 1881 to 1883; same position at Glenwood from 1884 to 1887. Was employed in the Pittsburgh Dispatcher's office at Pittsburgh, Pa., as copy operator from 1887 until April 1888, when he was made train dispatcher at Pittsburgh. This position he held until August, 1896, when the Connellsville Division was created. He transferred to Connellsville, working as first trick dispatcher until 1898 when he was made chief dispatcher, which position he held until 1906 when the position of division operator was created. He held that position until 1914, when there was a general depression in business and the position of division operator was abolished. He then accepted a position as dispatcher at Connellsville, until January, 1916, when position of Division Operator was restored, and he held that position until December, 1918. Then because of his physical condition, he was transferred to position of first trick dispatcher at Connellsville. This position he is still holding.

Car Department employees, Sabraton Station

Please mention our magazine when writing advertisers

H. B. Pigman

Mr. Pigman has a clear record and it is not necessary for us to comment on the good service which he has rendered; we all know that he is a very able train dispatcher and all the boys like to get out on the line when he is on the job, for they know that he is right up to the minute.

Passenger Conductor Charles Boyd recently returned to his Trader Avenue home, Connellsville, Pa., after spending six weeks at the Park View Sanitarium, Kansas City, Mo., where he took treatment for his health.

Brakeman B. Baer has returned from a hunt for big game in Sandy Ridge. Baer returned but we didn't see any deer. How about it, Bruce?

Cupid is still in the game among the Connellsville Division employes as indicated by the following:

Miss Catherine Morgan, daughter of Mr. and Mrs. Louis Morgan, Smithfield, Pa., and W. H. Burkett, Connellsville, Pa., were married on Saturday evening, January 7, at 8 o'clock, in the parsonage of the First Baptist Church of Smithfield, Pa. Rev. R. H. Austin, the pastor, officiated. The bride was an operator in the office of the Tri-State Telephone Company previous to her marriage and is widely known in that community. Mr. Burkett, as we all know, is a congenial roundhouse foreman at Connellsville. "Bill," to you and yours we extend our heartiest congratulations!

We are sorry to report that E. O. Lint, employed as wreck man, Connellsville tool cars, met with a painful accident during the first part of December. He is getting along nicely now and we hope to see him on the job soon.

Miss Beatrice Fornwalt, efficient stenographer, Superintendent's Office, departed on train No. 16, on January 13 for a week's visit with friends in Washington. "Nat" will be lonesome until her return. "Jenny" might keep him company.

Pittsburgh Division

Correspondents,

E. N. FAIRGRIEVE, *Car Distributor* Office of General Superintendent
ELMER H. STOLTZ, Pittsburgh Freight Station

Northern District

Correspondent, J. F. MILLER. *Assistant Trainmaster*

The firemen of Foxburg know how to do

other things well besides firing locomotives and rereiling cars. On January 2, at 8.30 p. m., after the regular business of the lodge had been transacted, an informal card party and banquet were given. It was a "stag" affair, and in addition to the regular members, the following visitors were present upon invitation: J. E. McAvoy, engineer; J. S. McCoy, engineer; A. C. Iman, engineer; Otto Arendt, operator; Peter Toy, all-around-man; Frank Goddard, brakeman; Peter Gerber, engineer; J. F. Miller, assistant trainmaster.

The feast was prepared without assistance, by J. A. Galena, chef; L. R. Boyd, first cook; J. F. Gerber, second cook; C. C. Edinger, third cook. It consisted, among many other good things, of fried oysters, french fried potatoes, sandwiches of all kinds, celery, pickles, etc., and home-made apple and peach pie with ice cream.

Mr. Galena, whose remote past we do not know, must have been there before and often. He is an inventor of no mean ability. For instance, he had it arranged to blow his cracker dust through a tin spout, with a bell end like a phonograph horn, by means of an electric fan. A baffle plate (being an engineer he would think of a baffle plate) was properly arranged for the cracker dust to fly against so that none would be wasted.

The oysters were the size of a small lady's hand. Mr. Galena would take one of these lady-hands on an instrument which looked like the second cousin to a pan-cake turner, give it a toss upward through the flying cracker dust (and mind you, think of the dexterity required); when it passed by the top of the tin spout conveyor, it would turn over neatly and pass down through with the "other" side next to the shower bath of cracker dust when it would be completely covered on both sides. Then Mr. Galena, all ready, would give it a bat with his instrument and it would land in a big iron skillet, on a super-heater stove, fifteen feet away. Another would follow, each one snugging up, spoon-fashion, against its predecessor in a circle until the circle would be complete. Then circle two would begin and so on until there was just one vacant spot in the center and it was a joy to see the last one find its place. Then this skillet would move off to a vacant burner on the stove and an empty take its place without any shut down or slowing up of any of the machinery. Of course, cooks Nos. 1, 2 and 3 were busy, and the whole thing was carried on so regularly it reminded one of weighing cars on a hump, the skillet-handlers resembling hump-riders.

Babe Ruth can "hit 'em" far, but it takes finer work, better nerve and more technique to bat oysters, a la Galena. Several brands of perfectos, cigarettes and chewing gum were served from the establishment of Herbert Hall, who is a member, and who worked hard for the success of the occasion.

If anyone thinks that "sticking on" a tank or car on the "Northern District" does not educate a man in jugglery, Sir or Madam should see Boyd and Edinger "waiting." With immense metal waiters loaded with good things, including the acrated oysters hot off Galena's bat, poised on two fingers and a big thumb, they exceeding the speed limit every inch of the way. One has to hold his breath, but there was no "wreck."

John McDonnell was master of ceremonies and conducted the progressive euchre game. Handsome prizes were given and were won by Engineers J. S. McCoy and Harvey Bushey. Assistant Trainmaster J. F. Miller was toastmaster and proposed a complimentary toast, complimentary to the men and the Railroad we work for. The drink of the occasion was an oyster cocktail, another of the Galena 57 varieties.

After the "Main Bout," Mr. Miller and Mr. A. C. McCoy gave an exhibition of 17 different ways to play 500 (without winning a game).

On Friday preceding New Year's Day, members of the American Legion, led by J. F. Boyd, gave a dance at Foxburg. The orchestra of four members at Kane was engaged. Upon inquiry as to how they had determined to come to Foxburg, Mr. Boyd was given the name of a competitive line. Mr. Boyd, being a loyal employe of the Baltimore and Ohio, told them that it was a Baltimore and Ohio dance and if they could not travel on this Railroad he would get a band that would. Four round-trip tickets, Kane to Foxburg, to help out the cause!

Brakeman C. P. McCullough found a car in Kane yard, that had just been set in by P. R. R. with a badly broken flange. Keeping his eyes open undoubtedly saved trouble in this case.

Glenwood Round House

Correspondent,

MARY A. BREEN, *Stenographer to Master Mechanic*

F. J. Yost, W. J. Ward and J. L. Porter have been appointed to positions of assistant roundhouse foremen, Glenwood. We wish all of them success in their new positions.

Introducing Count A. E. Westoniski. At any rate, that's what he looks like since starting to raise that lip tickler. Come out from behind the bushes, A. E., we know you.

Two young ladies are seriously considering the fatal question—no, not that one—the one I mean is the question of bobbing their hair, but before proceeding with the action, they would like to have the opinions of the boys.

Margaret Cunningham, Glenwood yard office, was recently presented with a beautiful wrist watch. I suppose she must have been thinking of "Bill", for she kept winding away until "bang" went the spring. A new one, originally intended for a Mikado engine, was supplied, inserted and time is rolling merrily along.

General Foreman Meinert, Allegheny shops, has been in the Passavant Hospital suffering from pneumonia, but we are glad to say that at this writing he is improving splendidly. We miss Henry and hope that he will be with us soon again.

The little town of Foxburg recently held its centennial and among the honor guests were David Flynn and M. H. Whalen. We are glad to hear of the unusual honor that was bestowed on Whalen, that of carrying the banner. (See Flynn for details.)

With the abolishing of Tenth Street as an engine terminal, it will be up to the Glenwood men to show some highball work, but as everyone fully understands the necessity for making every possible saving, we believe that they are very much alive to the situation and will keep things moving "ON TIME."

Monongah Division

Correspondents,

C. B. BAKER, Grafton, W. Va.

VERNON A. LYON, *Assistant Ticket Agent* Clarksburg, W. Va.

Although the final figures for the year 1921 have not yet been received, we have

HANSOME MILLER
DISTRICT STOREKEEPER
CLEAN FROM GRAFTON, W.VA.

every reason to believe that the Monongah Division will stand well at the head of the Safety Roll. For the first ten months of the year we ranked first, having made a reduction of 54 per cent. in employees killed or injured as compared with the same period of 1920.

On behalf of the entire Division we wish to express our sympathy to the bereaved family of Section Foreman Carter, whose death occurred on January 8. Thomas L. Carter was born on February 16, 1870, and entered the service of the Baltimore and Ohio as trackman in June, 1900. He was promoted to the position of foreman on May 1, 1901, and retained that position until his death. Foreman Carter was not only known among employees of all departments for his unfailing geniality and good humor, but held, in the Maintenance of Way Department, the reputation of being one of the best foremen on the entire Division.

For the year 1921 the Monongah Division held third place in Fuel Conservation in freight and passenger service. We expect to head the list in 1922. Spread it thin, you Hogs!

Charleston Division

Correspondent, M. W. JONES,
Secretary to Superintendent

LOYALTY

If you work for a man, in Heaven's name work for him. If he pays you wages that supply your bread and butter, speak well of him and stand by the Institution he represents. If put to a pinch, an ounce of Loyalty is worth a pound of cleverness. If you MUST vilify, condemn and eternally disparage, why—resign your position, and when you are outside, damn to your heart's content. BUT as long as you are a part of the institution do not condemn it. If you do, you are loosening the tendrils that hold you to the institution, and with the first high wind that comes along, you will be uprooted and blown away, and probably you will never know why.

Elbert Hubbard.

Passenger Conductor J. R. Cox is spending a vacation in Morton, Washington. From letters received, we understand he is hunting big game, and that he is having a good trip. Cox tells us that game is more plentiful in Washington than it is on the Pickens Line.

Engineer M. E. Morrison recently lost his wife. We extend our sincere sympathy to him in his bereavement.

Master Mechanic Burkley was called to Wheeling on account of the death of his grandmother. We extend our sympathy to him.

Mrs. W. E. Severns recently entertained a few friends in honor, so the Weston paper says, of her husband's 37th birthday. We would like to ask "Bill" how much he slipped the reporter to cut off the extra ten years.

Mr. and Mrs. W. H. Schide, of "Lilly Brooke Hall" fame, spent New Year's Day in Baltimore. W. H. S. has been very busy every day since, telling us of the wonderful sights he saw in the Big City. We would like to ask him to tell you the story of the ushers, but we don't believe he will.

A few New Year's resolutions were made on the Charleston Division. We quote some which are of particular interest:

Mr. Staples—To quit smoking. (He kept this from 1 a. m. when he went to bed until 8 a. m. when he got up, on January 1, 1922.)

A young Lady—Never to make dates with a Tennessee soldier again.

Mr. Schide—To walk home daily (when the cars are not running).

Mr. Pickens—Not to chew more than 18 stogies a day.

Mr. Dixon—To live up to the old motto, "Tis the voice with the smile that wins."

Miss Hayden—Not to get mad in 1922.

Miss Justice—To keep out of the "Hall."

Miss Juanita—To become an efficient train dispatcher.

Mr. Severns—Not to have a grouch for the entire year.

Mr. McOsker—To become acclimated to Weston, forgetting Seymour.

A certain friend of ours—To answer letters on the same day he gets them(?).

Mr. Kelly—To be 100 per cent. ALL THE TIME.

Mr. Nichols—To stay away from Clarksburg. If not possible to do so, to MOVE Clarksburg to Weston.

Mr. Kearfott—Resolved, Weston is better than Baltimore, why go further afield than Weston Shop?

Miss Hickman—To always find out the RATE PER DAY before engaging a room for a week at Atlantic City.

Brakeman S. N. Fury—To play SAFETY FIRST ALWAYS, in other words to keep away from the hospital, "so that regardless of the influence I know I have there—they may not have an opportunity to keep me inside."

"Peg"—That I am tired of keeping house for myself and Irene. Before January 1, 1923, I will be keeping it for "someone" else.

"Trix"—That I won't go to the farm on a rainy day this year.

Mr. Millbourne—That I will be true to Huntington.

Fleda—That I won't blame Mr. — when I can't find a file in future. I'll admit that I don't know where it is.

And about 100 more, but we can't quote them for lack of space, but we will add one more for the entire Division:

"That we will be loyal, efficient, courteous and SAFE Always."

News reports from Charleston office indicate that Robert Wintz has returned from a vacation in Columbus; that Okay B. Jacks is seriously contemplating matrimony, altho' the name of his "partner in crime" is not mentioned. Furthermore, additional space is about to be asked for because,

Lo, we cast our eyes about, Behold what do they meet?

Send No Money
We will send you—upon your simple request—your choice of diamond bargains—the greatest in America! Do not send a penny in advance. When the ring comes examine it. You are the judge. If it is not, without exception, the greatest value you have ever seen, send it back—at our expense. If you decide to keep it, it is yours—for a few cents a day. You may order direct from this advertisement if you wish. Don't send a cent. You do not risk a penny.

Charge-Account Plan
By our new charge-account plan, you may pay for your choice of hundreds of pieces of exquisite jewelry in sums so small that you would never think of saving them. You are also guaranteed 8 percent yearly dividend—and a 5 percent bonus may be earned.

Send for Bargain Book
Send your name and address today for our new 128 page book, showing hundreds of unmatchable diamond bargains. Sent absolutely free. It explains the dividend offer and bonus plan. Write today to Dept. 8012

J. M. LYON & CO.
1 Maiden Lane, New York N.Y.

Every nook is crowded out, by Herbert Hicks' feet.
(Note: Why not put 'em in the MAGAZINE? We can find space for 'most any body.)

Miss Evelyn Kohlbeker entertained the members of the force at a dance in her home at Kanawha City (but she didn't ask us). Mrs. Ola Farley and Mrs. H. P. Hicks also entertained the office force, but they also failed to remember that Weston was on the Charleston Division.

The congratulations of every one are extended to Miss Pearl Rawson, who was recently married to Mr. Harry Stom of McKeesport, Pa.

"It is our desire that people living along the lines, should feel that the Baltimore and Ohio is a GOOD NEIGHBOR and that if they are visited by fire, flood or epidemic they should instinctively call upon us for assistance because of our potential strength and WILLINGNESS to help them." President Willard.

Business conditions have not improved during the past month, although there seems to be a slight increase in the coal movement since January 1. The feeling all over, however, is one of optimism, and it behooves every one of us to assist in getting all the business we can, in moving it efficiently, and in helping in every way in our power to eliminate waste. Every dollar saved in the efficient use of labor and material means that much more for constructive work, or to keep some fellow who needs it badly in a job. THINK ABOUT IT, and remember there is one way we can all help, and that's by GOOD HOUSEKEEPING. Pick up good material, it can be used. Don't overload tanks with coal. That's waste. We can use slag and cinders for ballast, we don't need coal for that purpose.

A copy of President Willard's annual message was received here late on December 31, 1921, and distributed all over the Division the same evening. The key note of his message, as we read it, is—

"I gladly make acknowledgement of my appreciation of your effective and helpful response to my request, and I venture once more to invite your support and co-operation during the coming year."

We recommend your consideration of this paragraph, and answering for the Charleston Division, we know his request will be fulfilled. Appreciation means a whole lot, doesn't it?

We take pleasure in introducing to you the three little daughters of Second Trick Operator B. C. Taylor, Buckhannon. They are: Leatha, Dana and Hazel. Mr. Taylor entered the service of the Baltimore and Ohio in 1904 as a laborer, and in 1906 became an operator working through various positions to the responsible place he now holds at one of the heaviest ticket agencies of the Charleston Division.

Engineer W. P. Paxton, whose photo we show on this page, entered the service in 1905 as fireman, and was promoted to engineer in 1907. More than once "Bill's" name has appeared with a "red" entry opposite it, and it is fair to say that he is today one of our most popular engineers on the Elk Line.

We also take pleasure in introducing to your notice Carl Griggs, Division Accountant's Office, and his sister, Miss Hazel Griggs, who is stenographer to Freight Agent Fisher at Weston.

One of the heaviest stations, from a freight shipping standpoint, on the Charleston Division, is Richwood, W. Va. Here are located the Cherry River Boom and Lumber Company, the Cherry River Paper

Company, the Mosser Tannery and many other industries. It is the end of the Gauley Line, and is in the heart of the lumber country. Our shipments at present from this station average 15 to 20 cars per day outbound. We are ready now to handle the old record of 32 carloads per day, "Baltimore and Ohio Long haul" on every car. N. Rexroad is agent in charge of the Baltimore and Ohio interests, assisted by an able staff which we mentioned in our notes a short time ago. We hope with returning "Normalcy" that Mr. H. Moore, of the Lumber Company, will return to the Charleston Division "on the tide of prosperity."

We are pleased to quote a short letter which has just come to our notice, addressed to our agent at Charleston, from a large firm located in that town, and which refers to our able chief demurrage clerk.

"Yesterday it was necessary for me to use a great deal of the valuable time of your Mr. S. M. Bailey, in connection with some twelve cars of pipe which this company has had for some time in the Railroad yards; and I here wish to express my appreciation of the courteous treatment I received at his hands. Although he was interrupted any number of times, he always cheerfully gave the information wanted, and quickly, efficiently and courteously waited upon me. As a stranger imposing upon his time, I could not but remark how efficiently he met the exactions of his position. Yours appreciatively, etc."

We are very glad to print this tribute to Mr. Bailey, and we hope our friends on the Division will draw our attention to any such which come to their notice. No doubt there are many of them.

We received a letter the other day, anonymous, enclosing some money, to cover rides taken on the Baltimore and Ohio at some place and at some time not mentioned. Evidently someone's conscience bothered him and if Diogenes is still on his hunt, and will communicate with us, we will direct him where to find his honest man, or at least to the part of the state, because we don't know the donor's name or address exactly.

No Better Way to Avoid Waste than by Saving Claims

In a recent letter the general claim agent says that there is no decrease in the number of shipments damaged by being loaded in defective equipment, with leaky doors, sides and roofs, holes or nails in floor, sides, etc. This is something we can all help to avoid, and we ask the co-operation of every one to assist in eliminating claims from this cause.

A Safe Man Is an Efficient Man

Safety work continues uninterrupted on the Charleston Division. A meeting will be held this month, and we hope all who can do so will be present. Don't forget the blue flag when you go under the cars, or between them to make repairs. If you see a man failing properly to protect himself, do it for him, and then call him down hard. If he won't take care of his own life and limb, he won't take care of yours.

Particular attention of our readers is called this month to the Charleston Division honor roll. It is well worth reading more than once, and shows the real Baltimore and Ohio spirit. Frankly it gives your correspondent more satisfaction to write up a big honor roll each month than it does to write all kinds of other notes, because there we find developed the real spirit of loyalty, efficiency and human kindness.

And finally—don't put your feet on the desk until the work is done. Be minutes early on the job, rather than seconds late. Don't watch the clock, the boss is watching you.

Wheeling Division

Benwood Shop

Correspondent, ANGELA JUNE APPLGATE

The accompanying picture is of George Harry, four months old son of Machinist and Mrs. H. D. Hirsch. Baby George's winsome ways have won him many friends.

Mr. and Mrs. Walter Martin are the proud parents of a baby boy, born on December 31. The young man has been named Oliver Alexander.

We are glad to have J. W. "Socks" Stocking back at his desk again after a brief leave of absence because of his health.

1—Leatha, Dana and Hazel Taylor. 2—Engineer W. P. Paxton. 3—Carl Griggs, Division Accountant's Office and his sister Hazel, stenographer to Freight Agent. 4—Brakeman "Si" Perkins

FRUIT & CANDY PEDDLE
WHEELING DIVISION

John Cusack, road foreman's clerk, who recently underwent an operation for appendicitis at the Glendale Hospital, is back on the job. When some of John's many friends visited him, they found him sitting up in bed singing, "I don't want to get well." This was fully explained when his nurse came in to take his temperature.

Brakeman J. L. Hughes and Miss Sybil McDermott were quietly married on December 28. Congratulations!

Western Lines Cincinnati Terminals

Correspondent, JOSEPH BEEL, Chief Clerk to Superintendent of Terminals

Christmas of 1921 left pleasant memories in the hearts of the Superintendent's staff and employees of the Cincinnati Terminals.

Consistent with the time of good cheer, the staff, including R. B. Fitzpatrick, C. J. Cleary, W. T. Darling, and W. P. Abbott; and office force, Joseph Beel, Frank Nock, Robert Jennings, E. J. Schmalz, C. W. Bliss, W. J. Maloney, Misses Kathryn Weber, Helene Herron, Bertha Goetz, Sue Elmore and Clara Schulte, with Chief Clerk C. E. Pierret, as the honored guest, enjoyed a sumptuous dinner given by Superintendent J. H. Myers in the Welfare Room, Fifth and Baymiller Streets. The young ladies assisted.

As an appropriate conclusion to the dinner, Edward J. Schmalz flashed into the limelight as an after-dinner speaker, closing the festivities with the presentation of a box of cigars to Division Engineer Abbott.

Our esteemed electrical department foreman, A. R. Buchner, recently took an inspection trip to Jenkins, Ky., on the Sandy Valley, with G. E. Hauss, district electrical supervisor. One day he saw something from the car window and exclaimed, "My what a big rabbit!" but he felt satisfied when told that the "big rabbit" was only a mountain donkey.

Newark Division

Correspondent,

B. A. OATMAN, Office of Master Mechanic, Newark, Ohio

Another deplorable accident occurred on the afternoon of January 12, causing the death of Acting Yard Master E. E. Guitner, Columbus, Ohio Yard. Mr. Guitner was fifty-six years of age at the time of his death and had been in the employ of the Baltimore and Ohio for the past twenty years. During that time he had won the friendship of a large circle of railroad employees in Columbus terminal, and was well known and respected by a large number of our employees on other parts of the system. He was run down while walking between rails, with his back to the approaching engine,

Bobbie and Grandfather Wolford

which he did not observe until too late to leap to safety, although some of his fellow employees endeavored to warn him of his danger.

The news of his death was a great shock to his many friends, who grieve with his family in their loss, and to whom we extend sincere sympathy. Mr. Guitner is survived by his wife and ten children.

On December 21, Engineer "Jim" Dennison, popular employee of 38 years service on the Baltimore and Ohio, resigned his position.

Mr. Dennison was born near Connellsville, Pa., on May 2, 1852. During his long service, from sectionman to engineer, he has seen many changes and improvements. He has run engines of every conceivable make and design, from those hauled over the Winchester pike during the war to the latest monsters of modern times.

He has been a member of the Brotherhood of Locomotive Engineers since June, 1876, and has been honored with many positions of trust and responsibility by them. As a partial recognition for his services he was recently presented with a gold watch, chain and charm and a wallet of money and sent to the Grand Convention at Atlanta, Georgia.

Mr. Dennison's long life on the rail has been remarkably devoid of accidents; his most serious injury was received in 1875 when his engine was derailed at Indian Creek and his right leg broken.

In the annual charity Newsie's list we find the name of our genial General Yard Master C. C. Grimm, who is noted for his ability for hustling. Your correspondent has learned that Mr. Grimm sold, during the campaign closing Saturday, December 17, 1921, over 300 buttons on which was inscribed, "Newark Charity Newsies—100 per cent. Charity." The buttons were sold at one dollar each, the proceeds to go to a charity fund created by the sale of newspapers by influential business men of the city. If the other newsies can produce as Mr. Grimm has, alright, but we know that they will have to use speed oil to come anyway near keeping up with Pacemaker Grimm. "Newsie" Grimm was assigned the Baltimore and Ohio territory, the shops, yards and offices. His earnest solicitation plus the generosity on the part of the Baltimore and Ohio employees has resulted in a tidy sum being raised for charitable purposes in Newark.

Mr. and Mrs. J. H. Fuller are spending the winter at Port Richey, Florida. Mr. Fuller was assistant foundry foreman until forces were furloughed, and having been in the service continuously for many years without any break, thought this would be a good chance to go South for the winter.

P. H. Graff, foundry foreman, Newark, Ohio, shops, has just returned from a trip East. During his stay he consulted with the Motive Power Department officials at Baltimore in regard to local conditions.

Effective December 8, General Car Foreman J. P. Quinn, Newark Division, was made superintendent of shops at Zanesville, Ohio, vice J. L. McCann, who has been transferred to Eastern Lines and stationed at Pittsburgh.

Mr. Quinn has been in charge of the Car Department, Newark Division, since May 1, 1913, coming to Newark after the flood of March and April, 1913, at Zanesville, and has made a host of friends on the Newark Division as well as on the Western Lines. We regret very much to have such a good fellow taken away from us, but every one on the Newark Division extends to "Jack" his best wishes for continued success in his new position.

Effective December 8, Frank Richardson was made general car foreman, vice J. P. Quinn. Mr. Richardson was at one time car foreman, Newark, but was selected by Mr. Tatum to do special work in Car Department for the System. He has filled this position until the furlough of employees in all departments was necessary, when Mr. Richardson was made assistant car foreman at Newark. We wish Frank success and feel that he will find all of his old Newark friends ready to give him the same support that they gave to Mr. Quinn.

The accompanying picture is of Passenger Brakeman John C. Wolford and his little grandson, Robert. Mr. Wolford, who is better known as "Cracker" to his railroad friends, is one of the best and hardest working brakemen on the Newark Division. It was only last year that he had over 100 applications for new members in the Baltimore and Ohio Veterans' Association. During his spare time at home he drives around in his big Saxon Six, enjoying life. He says he feels as young as his grandson, "Bobbie."

The fifth annual banquet given by the Railway Clerks at Newark, Ohio, was held at the Warden Hotel on Thursday evening January 5. Both Baltimore and Ohio and Pennsylvania clerical forces participated.

E. L. Hannon, car foreman, Sandusky, Ohio, took advantage of the shut down of the car shop and took his annual vacation, spending his time among friends in his old home town, Zanesville, Ohio.

W. T. Davis, assistant car foreman, Newark, Ohio, is back in the job after spending two weeks, his annual vacation, among friends in the East.

In line with Safety First, an electric light with good reflector, has been installed at the east end of the general yardmaster's office, Newark, Ohio. The light is located at the comb of the roof and throws a bright light down toward the ready tracks just west of the Roundhouse. The light is greatly appreciated by all who have to work in this section of the yards at night.

Assistant Foundry Foreman J. H. Fuller, Newark, Ohio, who with his wife has been spending the winter at a Florida resort, writes that he has fallen in love with the southern winter, but if he receives word that the Newark Foundry is to open again he will take the first train back and spend the balance of the winter at Newark. Mr. Fuller remembers many of his old friends at Christmas time by mailing them a nice box of oranges.

Car Department

Newark Division Car Department employees had a little surprise party for their former general car foreman, John P. Quinn, before he left for Zanesville.

On December 23 it was arranged to have Mr. Quinn meet Master Mechanic F. E. Cooper in his office at eight o'clock on important business. The important business, of course, was a ruse to cover up the real object.

Master Mechanic Cooper had some job to hold the attention of Mr. Quinn for about one hour, at which time there appeared at the doorway of the office, Master Car Builder C. M. Hitch. With very appropriate words, Mr. Hitch presented Mr. Quinn with a beautiful, engraved Howard Watch, with chain and knife in gold. After this was presented Mr. Hitch handed Mr. Quinn a beautiful walrus hand bag equipped with a complete traveler's kit. These gifts represented the esteem in which Mr. Quinn had been held by his forces while filling the position of general car foreman, Newark Division. Mr. Quinn, with very fitting remarks, accepted the gifts, and stated that he would always have a friendly feeling for the Newark Division employees who have stood by him in the past eight years.

Columbus, Ohio, Freight Station

The freight house men presented to Miss Kathryn Funke, transfer clerk, a box of candy with the following note attached:

Dear Katie—As a token of the friendship, admiration, respect and good will in which you are held by the platform men, we beg leave to present this offering as coming from our hearts. You are now, as heretofore, the only girl for us.

(Signed) "The Platform Bunch."

Mrs. Jessie Fralinger, car record clerk at Columbus, Ohio, Terminal, was, three years ago, happily married and had a kind husband and two little children. In the flu epidemic, the husband died, leaving her to her own resources. Over two years ago she became connected with the Baltimore and

Ohio family at Columbus, as car record clerk, which position she held until she was relieved through a reduction in force last fall. Lately she has been doing extra work and was stricken with a severe attack of gall stones while on duty on December 8. She was taken to the Mt. Carmel Hospital at once and was operated on, her case being one of the worst of its kind ever operated on at that hospital. With the approach of Christmas, some one suggested that the Baltimore and Ohio Family make her Christmas a happy one. As a result she was presented with a check for one hundred and fifty dollars on Christmas Eve, as a gift of her fellow employees in every department of the Baltimore and Ohio at Columbus. These included the Freight Office, Freight House, Mechanical Department, Yard forces, Sectionmen, Trainmaster's Office, Dispatcher's, Operator's and District Traffic Offices.

This gift will relieve her of the worry about how her expenses are going to be met, and, we trust, will make her recovery more speedy and more cheerful. What had the appearance of being Jessie's gloomiest Christmas, has turned out to be one of her happiest, her only regret being that she cannot, at the present time, personally thank each and every one.

We are glad to report at this writing she is out of the hospital and greatly improved.

The Baltimore and Ohio Bowling Team now stands in third place. We will all have to get out and cheer the boys along.

The girls of the Freight House held their annual Christmas luncheon on December 22 in the office and exchanged presents.

We extend our sympathy to Special Agent C. L. Johnson at Columbus, Ohio, in the loss of his mother at Quaker City, Ohio.

Cleveland Division

Correspondents

A. F. BECKER, *Secretary to Superintendent*, Cleveland, Ohio
E. L. MILLER, *Chief Clerk to Division Freight Agent*, Akron, Ohio
H. B. SMITH, *Supervising Agent*, Cleveland, Ohio
W. E. BRUGH, *Clerk to Trainmaster*, Massillon, Ohio

The proudest man in the Division Accountant's Office these days is Timekeeper C. W. Lindrose, who became "Daddy" of a 9 pound boy on December 19. However, his duties as timekeeper, with the Baltimore and Ohio do not compare with keeping time for his son. Congratulations, "Lindy!"

Cupid has been making his rounds on the Cleveland Division. The latest victim is Agent C. A. Hoover, Erhart, Ohio. Of course, if it were not for the large population of Erhart, our agent would have probably been caught in his net before this.

There are other promising arrangements Cupid is making, as we notice Miss T. B. Heller, pass clerk, Superintendent's Office, Cleveland, has now displayed a beautiful diamond ring. Won't you tell us, "Tess" when it's coming off?

There is always a chance to speak a good word for the Baltimore and Ohio Railroad. This has been demonstrated by Chief Dispatcher G. W. Jackson who was shopping at one of the big department stores when he overheard a remark about the poor service rendered by a certain railroad on shipments made from Chicago to Cleveland. Mr. Jackson immediately spoke up and asked the party if he had ever tried the Baltimore

and Ohio service from that point. He replied to this, "What can you do from Chicago?" Mr. Jackson, being familiar with the movement of cars, told him of our service. He also gave this tip to our division agent, and we now learn that, through this little conversation, we are now receiving some of this business. This is not the only ease where business has been secured through Mr. Jackson, for on another occasion he discovered several cars of pig iron being delivered to our line at Sterling and by careful investigation on his part, found that shipments were being made from Youngstown, a point on our line, routed via another railroad to Sterling and the Baltimore and Ohio to Dover. This information was also given to our Traffic Department and has been the means of having the shipments routed all the way from Youngstown via the Baltimore and Ohio Railroad.

The Cleveland Terminals Baltimore and Ohio Basketball Team opened its season on Thursday night, January 12, by easily defeating the Cleveland—Pennsylvania Railroad team, 30 to 15, on the Addison High School floor.

The Baltimore and Ohio team displayed speed and good team work and held the Pennsylvania team to one field goal and two fouls in the last half.

Kimes, captain and left forward, led in the scoring.

Below is box score of the game:

Baltimore and Ohio—30		Pennsylvania R. R.—15	
	G. F. T.		G. F. T.
Kimes, l. f. . . .	8 1 17	Elliott, r. f. . . .	3 1 7
McDonald, r. f. . .	0 1 1	Mickey, l. f. . . .	0 1 1

The Baltimore and Ohio Welfare Association of Cleveland gave a New Years' dance in the Chamber of Commerce rooms, Cleveland, Ohio, on December 31.

Dancing was engaged in from eight o'clock until one. Refreshments of ice cream and cake were served at intervals.

Because of the numerous events, parties, dances, etc., staged in Cleveland on this night, the crowd was not as large as usual. However, those present enjoyed a pleasant evening.

THOMAS H. WILLIAMS, F. S. DE VENY

Miss Carrie Latshaw has returned from an extended visit to California.

Did you ever take a young lady to buy a bracelet, and after going into three or four jewelry stores, find she was still wearing the one she tried on in the first store, and you had not paid for it? Embarrassing moments!! A young lady stopping to look at parasols during Christmas shopping, found just before she left the store that she had been carrying around one of the parasols at which she had been looking. Of course, she returned it. These things have happened to some of our Lincoln St. belles. Wonder what was on their minds. In one case inquiry discloses that a certain young man departed for the Southland on business that will detain him for quite an extended period.

Foreman Jacob Chuey, Pullman Co., who has been assigned on Pullman work on the C. T. for several years, was retired on pension on January 1. He has been succeeded by Joseph Kimmell, formerly Pullman agent for our service out of Chicago.

On December 16, William C. Hesslau, claim agent, came into the Grand Central Station with a broad smile, and his vest pockets bulging out with good cigars—15 centers at that. Upon being questioned what the big idea was, "Bill" said "Wm. C. Hesslau, Jr., weight 8 pounds, arrived in town last night."

When it comes to star bowlers, "Handsome Charlie," Auditor's Office, is the top notcher of the "Oil Rollers." Although he finds it a little difficult in handling the ball, he sure gets the pins.

Standing of our Bowling League, Week Ending December 29.

"Eobbie" Joe Frank enfield, 28 months old son of Carl Frankenfield, billing clerk, Fostoria, O.

A short time ago the American Railway Association sent out a circular letter soliciting suggestions for a brief and concise slogan which will be appropriate from one end of the country to the other in connection with the campaign on "Prevention of Grade Crossing Accidents." Trainmaster R. A. Barlow has submitted the following:

"This far better to stop and look for trains,

Than have your friends come to view your remains."

There is no question so tangible or vital that it cannot be successfully solved by the application of common sense. The use of common sense is the beginning of wisdom and when common sense is overridden by undue agitation it leads to quick conclusions that close the mind to reason. Without reason we cannot be reasonable and if we cannot be reasonable we cannot be fair to ourselves or to others.

Peace and plenty rest upon the great pillar of COMMON SENSE and this pillar is set with the solid cement foundation of harmony and unified effort—not in the quicksand of dissension and unrest.

South Chicago

Correspondent, ESTHER J. SPREENBERG

Recently Mr. Altheer received a fine letter from our S. A. Allen at Chicago, relative to courtesy and intelligent attention extended by our South Chicago utility clerk, Leslie Dwyer, to General Traffic Manager Blair of Wilson & Co. Mr. Blair personally called Mr. Allen to express his thanks and appreciation of Mr. Dwyer's attention, and also wrote Mr. Allen in detail.

Mr. Allen's letter is too long to quote, but this will give you an idea of what it means to our shippers to receive prompt and courteous attention.

Under the "Think and Act Drive," our chief reconsigning clerk, William Rosenthal, deserves special mention. In the handling of three cars he saved the Baltimore and Ohio a matter of \$70.61 by prevailing upon the consignees to take certain deliveries, which, had they not done so, would have resulted in an expense, as above mentioned.

The grain movement at South Chicago is very heavy at present and with the hearty co-operation of all concerned, we have been successful in protecting these heavy grain orders and securing a large

bulk of the business. In order to secure this business, we must have grain cars. It is, therefore, hoped that we will continue to have this co-operation and good grain cars sent to South Chicago for the protection of these orders.

Do you ever think of saying "Please" or "Thank You?" Try it some time; it helps!

St. Louis Division

Correspondents

H. S. ADAMS, *Formerly Chief Clerk to Superintendent, Indiana Division*
O. P. STANFORD, *Secretary to Division Freight Agent, Flora, Ill.*
FRANCES PIGLOSKI, *General Freight Office, St. Louis, Mo.*

Flora, Ill.

With a view to effecting more economy in the operation of the Southwestern lines of the Baltimore and Ohio Railroad, the Company on January 1 consolidated the Indiana and Illinois Divisions into the "St. Louis Division," with headquarters at Washington, Ind., (Shops).

The consolidated division is approximately 640 miles, covering the main line and branches between the cities of Cincinnati and St. Louis, composed of 400 miles of the original Illinois Division, with the Springfield and Shawneetown, Ill., branches, and 240 miles of the Indiana Division, including the Louisville, Ky., branch.

The members of the B. R. T. Lodge No. 320 at Flora are to be commended on the charity drive which they successfully handled during December. Fifty-one families were helped, food, clothing and coal being distributed among the needy ones. The response for help was cheerfully answered by the citizens of Flora. It took several wagons to haul the articles given and the cash donations were surprisingly large.

After meeting with such success and seeing the good done, the boys decided to make it a permanent organization and keep the good work up.

Extra Engineer Paul Naney is the happiest extra "pig head" on the division. The stork made its appearance and left a fine, new fireman. This makes two boys for Paul. Now the president's overcoat would not make him a thumb stall.

Lawrence Steen, our jolly storekeeper, had the misfortune to mash his foot recently by allowing a car spring to fall on it. Lawrence says the spring was much harder than his foot, in consequence of which he was laid up for a few days. "Bob" Herrin acted as storekeeper in his place.

Division Freight Agent H. G. Settle continues to have jurisdiction over the old Indiana Division territory, with headquarters at Shops, Ind.; Division Freight Agent Lindsay continues to have jurisdiction over the old Illinois Division territory, with headquarters at Flora, Ill.

Office of General Freight Agent, St. Louis

On January 9, L. E. Cornelius, former clerk, General Freight Agent's office, was instrumental in saving the life of a caddy who went out on thin ice in search of a golf ball.

The ball was lodged on the ice 50 feet from the bank of a lagoon near the eighth hole. Golfers warned the boy not to go after it, but after work, at 5.00 p.m., young Foley decided to try for the ball. He had just reached it when the ice gave way. His cries attracted L. E. Cornelius, who is now president of the Cornelius Lumber Company, Arcade Building; G. Howard Willett, 5696 Kingsbury Boulevard, and Clarence H. Tevis, 4946 Buckingham Court. Tevis ran for a rope.

Cornelius, as the only swimmer of the three, with the rope around his waist, cautiously made his way toward the boy, but he, too, broke through a short distance out.

He smashed the ice with his fists, breaking a path to the sinking youth, but the boy was beneath the surface when Cornelius reached the spot, half treading water and half clinging to the jagged edges of the ice.

Cornelius dived, but without success. He plunged below again. This time he seized the boy's jacket. Rescuer and rescued were hauled to the shore. The caddy was revived 15 minutes later.

Ohio Division

Correspondent, A. E. ERICH

The late Edward Boas

Mr. Boas, besides being the father-in-law of O. E. Sorgius, chief clerk to division accountant at Chillicothe, was well known on the Baltimore and Ohio. He entered the service as laborer on April 10, 1887, at Vincennes; was later promoted to inspector, helper, machinist, gang foreman, general foreman and master mechanic, respectively on different divisions of the Baltimore and Ohio and C. H. & D. He had been superintendent of motive power of the C. I. & W. until some time before his death, having been with the latter road when the C. H. & D. became part of the Baltimore and Ohio System. His host of friends extend their sympathy to his widow and two daughters.

The orderly conditions shown in the photographs of the Stores Department, Chillicothe, prove that Storekeeper Reynolds and Assistant Storekeeper Baum are on the job. Credit is also given to H. H. Brown, who is foreman of this department. The three pictures in the group

See what the notes say about the orderliness of the Stores Department at Chillicothe

show the orderly way in which lumber is piled, the cleanness and methodical appearance of the casting platform, and the well kept and attractive exterior of the M. of W. storeroom, with Assistant Storekeeper Baum.

Miss Clara "Ted" Moore, Storekeepers' Office, is proudly sporting a beautiful solitaire on a well known finger. Questions as to why, when, etc., are not in order at this time. One solitaire a year seems to be the record of the Storekeepers' Office. Keep it up.

Miss Bernice Bowdle, Division Accountants' Office, has become left handed since Christmas. It seems unusual to see one who has always used her right hand, suddenly switch over to the use of the opposite member; however, this is the case. It has been noticed that she powders her nose, and does all the other things peculiar to femininity with this hand. The only bad feature is the glare, which affects the eyes of the balance of the office force. We are informed that the fortunate young man is Herbert Gardner, a recent graduate of Ohio State University, and at present manager of a large farm near Chillicothe.

Believing that it is better to give than to receive, Charles Conner and Phil Hixson, both of the division accountants' office, presented two fair young ladies with tell-tale solitaires, on December 25.

The holiday decorations by the Division Accountants' Office force in that office brought forth many pleasing comments.

Brakeman F. A. Duffy joined the ranks of the benedictines recently. Best wishes to him for a happy married life!

Elwood G. Pyle, sheet metal worker, is another victim of Cupid's rampage. Congratulations and best wishes!

The following officers were elected to serve the Ohio Division Lodge of the Veteran Employees' Association for the year, ending December 31, 1922: G. W. Plumley, president; G. E. Wharff, vice president; G. J. Miller, recording secretary; R. Mallen, financial secretary; H. Figlestahler, treasurer; J. N. Ortman, sergeant at arms; T. A. Brown, C. D. Pairan, A. A. Creager, W. W. Woodward, and T. E. Banks, directors.

D. R. Sheets was appointed as delegate to the convention of the Grand Lodge in Baltimore on January 5 and 6.

An item of interest, especially to the office force, recently appeared in the Columbus (Ohio) Dispatch, viz.: the announcement of the marriage of Miss Sue Masters and Mr. Demas J. Snyder. Mrs. Snyder was formerly employed as comptometer operator at Chillicothe. Her friends wish her much happiness.

To Engineer Joseph Sulzer, in the loss of his wife, our most sincere sympathy is extended.

The Safety Agent says:

The neglect of LITTLE THINGS—JUST LITTLE THINGS—is what produces the bulk of preventable accidents.

Every accident is a NOTICE that something may be wrong with the Methods, Material or Man and should be investigated AT ONCE by the man in charge to ascertain cause and apply remedy. Whether the injury received is slight or serious, is not material.

Don't gamble with your SAFETY. You can't afford to lose once.

Due to the consolidation of the Illinois and Indiana Divisions, C. E. Herth, division engineer, and H. S. Adams, chief clerk to superintendent of the latter division, have been transferred to similar positions on the Ohio Division. We welcome both these gentlemen and wish them success in this, their new territory.

Other changes on this division, are as follows: J. L. Maher, former division engineer, transferred to Dayton, Ohio, as assistant division engineer; R. H. West, former chief clerk, transferred to clerk in dispatcher's office, vice T. K. Wilson, who in turn took position as clerk in car distributor's office; C. E. Rutherford is transferred to tonnage clerk; Miss Osma Foster, to fuel clerk and Ray Ortman to clerk in freight office.

William Pross, machinist, has returned to his duties at Chillicothe, after having been instructor at Camp Sherman Vocational Training Schools.

Arthur James, machinist, has accepted position as State building inspector. We wish him success in his new position.

J. B. Haward has been promoted from night roundhouse foreman, Chillicothe, to day round house foreman, Garrett, Ind. H. H. Howard has taken Mr. Hawards' place and James J. Rose, Washington, Ind., succeeds Mr. Howard. We are glad to hear of these promotions and wish these men success.

Gilbert Jenkins, laborer, Stores Department, joined the ranks of benedicts shortly before Christmas. Our informant "Brownie" states that although cigars were passed, he personally only received a SMALL number.

Another treat! Dan O'Leary, yard conductor, has taken unto himself a wife. The honeymoon was spent seeing the sights of New York. Congratulations! Whad'd you say now, "Dan?"

Don't forget **BOOSTING BUSINESS** is still in order, at well as **PREVENTING CLAIMS** and **SAVING FUEL**.

Toledo Division

Correspondent, EDWARD M. MANNIX
East Dayton

Soon we'll bid adieu to Winter and extend an abiding welcome to Spring. Let us hope that it will bring with it a return of business, in order that we may see the wheels of industry humming.

Soon we will hear the glad refrain, "Play Ball," "Who saw the first Robin?" etc. By that time we hope to see all of the furloughed men at the old stand, and then we will sing in unison—"Hail, Hail, the gang's all here."

There is a big meaning in President Daniel Willard's New Year's greeting to the Baltimore and Ohio Family. If you read between the lines it shows the true characteristics of a big heart. Regretting as he does the general business depression, he gives hopes and assurances that this will be of short duration, and the family that he seeks to foster will be united again, as of old. A few more Willards won't hurt this old world.

Our old friend, John Glynn, yard engineer and veteran in the service, is spending a short vacation in Florida and Cuba. We will hear many weird tales when he returns. Good luck, old scout, and a safe return.

The late Edward Boas, Ohio Division

About one of the most energetic and up-to-date acquisitions to East Dayton is Yard Master Kenneth Lett, of the second division. Mr. Lett came to us a few months ago from the Indiana Division and has proved himself adept from a business and social standpoint.

We know that things could scarce be duller, And have been so, since way last summer, But, keep on plugging, never stop, And we'll come out all right, old top.

Harvey Voris, general yardmaster, was recently highly complimented by the officers of the Mercantile Company of our city for the manner in which he handled their business during the last year. It is also pleasing to note that not one complaint reached him from the numerous business houses in our city.

His letter from the Mercantile Corporation concludes with this snappy poetical declaration by Secretary E. H. Houck.

Oh, the switchman's life
Is a merry life;
For the bumps, now what cares he?
He merrily shunts
His cars around,
And chuckles in fiendish glee.
But the B. & O. crew,
Is a goodly crew;
Proficient in all that they do,
They place the cars right
And set the brakes tight,
What more can a good switchman do?

The accompanying poem was passed to us by one of the Division Accounting members. Read this and then read the parody which follows.

Dead Men's Shoes
By S. E. Kiser

For seven years Dick Wattles thought
That he would be chief clerk some day;
The chief's desk was the goal he sought,
And Fitch alone was in the way,
"He's getting old; he can't hang on,
Much longer now," Dick often said,
A new man came when Fitch was gone,
And stepped in over Dickie's head.

Ten years ago Maud Eldredge cast
Her last misgivings to the breeze,
And married old man Arbogast,
Who promised her a life of ease.
Fred Willis took it hard at first,
But Maud assured him on the sly:
"Ten years I give him at the worst;
Then we'll be happy, you and I."

The old man passed away last spring,
And Maud, still fair, was free once more;
He left her nearly everything
Except the store teeth that he wore.
Fred Willis, who had waited through
The weary years, is sore and sad;
Last Thursday Maud was married to
A prospect no one knew she had.

A dozen men who occupied
Positions that I've wished to fill,
Within as many years have died,
But I'm unknown and plugging still!
It may be luck; it may be Fate;
In any case they seem to lose
Who merely stand around and wait
To put their feet in dead men's shoes.

Our Own Parody

I cannot say that I do know
An humble clerk of the B. and O.,
Who, if he had his way to choose,
Would be found seeking dead men's shoes.
As for Dick Wattles and Mr. Fitch,
Such stuff as this they'd surely ditch,
And welcome a new man with good news
Because he wears a live wire's shoes.

Going forward once, then stepping back
Is using your head for an old hat rack,
For what's now needed with railroad trains
Is an humble clerk with horse sense brains.
There isn't such a thing as Luck,
It's simply Push, and Work, and Pluck.
If you follow these you'll never lose,
And you'll never look for dead men's shoes.

Division Accountant's Office
Dayton, Ohio

Correspondent, MISS G. M. McBRIDE

The Baltimore and Ohio Quintet defeated the Pan Handles of Dayton, 20 to 12, on the St. Andrews floor, on January 13.

The line-up was as follows:

Baltimore and Ohio 20	Pan Handles 12
Hartman	L. F. Hagan
Harker	R. F. Hecker
Morrissey	C. Schoenhals
Thies	L. G. Barr
Kinzig	R. G. Miller

Sub—Myers for Morrissey.

Baltimore and Ohio: Harker, 6; Hartman, 2; Myers, 1. Pan Handle: Hagan, 2; Schoenhals, 1; Miller, 1. Fouls, Hecker 4 out of 5; Myers 2 out of 2.

Our Dayton team would like to book a few games with some of the other Baltimore and Ohio teams. It was up to the Baltimore and Ohio to hold up our colors. For games communicate with L. D. Kinzig, Division Accountant's Office, Dayton, Ohio.

Margery May, little daughter of Rae Garrigus, correspondent

It is well to note the feeling of good will among the workers in the Division Accounting Office at Dayton, as displayed at Christmas time. We hope that the same interest in the work of the Division and good will toward all may continue to be the factor which will stir us to higher aims and an unprecedented endeavor to make the Toledo Division the best, so far as we are able, of any division on the System.

Division Accountant G. B. Spencer, Dayton, Ohio, spent Christmas with home folks at Garrett, Indiana. We understand Mr. Spencer had quite a tussle with Santa Claus and he, being the larger man, was successful in taking from his pack a nice smoking stand, for which he desires to thank Santa through this column.

NOTICE—To all who find themselves up against it for socks: Styles do change you know and if, during these hard times, your wife should match a blue one and a black one, it is perfectly good taste just so there aren't any holes in them. However, they must be a dark blue and black in order to match up well. Ask Harker.

What would become of man if there were no women in the world? 'Tis well for a woman to stay in her domain, but, all the same, a woman "in her domain" is appreciated at all times, anywhere. Anyone desiring sewing done, might do well to try the Division Accounting Department outside of office hours. What we started out to say was this—the boys can testify that Clyde has an A-1 seamstress. How about it, Theis?

Good English

Gertrude Hutzel—How soon will you be through with that machine?

Nann—Are you in a hurry for it?

Gertrude—I have a report to get out this afternoon which should 'ave been gone last week.

Nann—Why didn't you say 'ave been must?

Ker bang!!! Something broke the stillness. Everybody looked around. Nothing extraordinary was in sight. Several seconds passed. Finally we saw "Ham's" happy smile as he emerged from the seclusion of his desk. "Ham's" not a heavy weight but his chair gave way and deposited him somewhere behind his desk.

We are glad to welcome among our co-workers S. H. Pulliam, supervisor at Toledo.

J. L. Maher, formerly division engineer, Ohio Division, has been made assistant division engineer, Toledo Division.

J. M. Montz has been transferred from the Toledo Division to the St. Louis Division, with headquarters at Washington, Indiana. Our best wishes for his success follow him.

An Ode to the Departed

I'm not a poet
And I sure know it,
But nevertheless
Maybe you can guess
When I want to say sumpin,
I blowit.

So here is an ode
To those who once abode
With us in our batchelor bliss,
'Tho' they are gone,
May their memory ever be with us,
And may they never ketch us
If their wives should want to kizzus.
(Dedicated to John Hogan, Don Harker,
Walter Boorum, Lou Kinzig and Eddie Velten.)

Lima

Assistant Correspondent, RAY GARRIGUS

General Foreman O'Brien has returned from a division safety meeting at Dayton, Ohio, where he was warmly commended by Superintendent Mann for the fine safety record which Lima shops have maintained for the past three months.

The accompanying photograph is that of little Margery Mae, daughter of Correspondent and Mrs. R. A. Garrigus.

General Car Foreman C. T. Robinson, Garrett, Indiana, and Car Foreman C. H. Garing, Willard, Ohio, were recent visitors.

The Car Department Bowling Team has defeated several local competitors and is anxious to hear from other teams on the division.

Car Inspector Gabe Nelson, Wapakoneta, has returned to duty after several months' absence. Glad to see you baek, Gabe.

Car Inspector Andy Shuler, Piqua, has been off duty for several months account of sickness. Mr. Shuler was a visitor at the Car Foreman's office a few days ago and promises to be baek on the job before long.

Within the past two weeks the Lima Chamber of Commerce has had three calls, each for 10,000 square feet of warehouse floor space along railroad sidings in Lima,

preferably on the Baltimore and Ohio. The concerns making application for this space are all big manufacturing jobbers who wish to establish branch warehouses here to handle Lima and Northwestern Ohio business.

These appeals coming almost simultaneously to the Chamber of Commerce, are evidence of the attention which Lima is attracting in the industrial world.

It is with just pride that we point to the fact that these firms requested space along the Baltimore and Ohio, over three other competing lines in this territory.

Otto Wallburg, chief clerk to Freight Agent L. B. Colbert, attended the Veterans' Association Convention in Baltimore. Mrs. Wallburg went along too and came back with a big job on her hands. She was elected secretary to the Grand Lodge of the Ladies' Auxiliary. Congratulations!

Dayton, Ohio

Enter Mary Blanford (ten minutes late) all smiles and curls. Our curiosity was soon satisfied, for close behind her—just far enough to avoid suspicion—was a fine looking insurance agent. Rumor has it Mary got her diamond through insurance—perhaps assurance.

WANTED TO KNOW—Who was the distinguished looking gentleman who caused such a commotion in the lobby of the "Dayton" theater Saturday night when he lit a corn cob pipe?

Kentucky and Indiana Terminal

Correspondent, J. L. SIGMON,
Industrial Agent

The accompanying photos are of Car Service Clerk and Mrs. Wm. Thompson, who were married on the morning of December 26.

Mr. Thompson, who is a Kentuckian and prominent baseball pitcher, was second lieutenant, Company K, Fourth Battalion, 22nd Engineers. After returning from France and being honorably discharged, he was employed by the Kentucky and Indiana Terminal R. R. Co. For the past three years he has been the main pitcher on the baseball team, which has won the city championship of Louisville.

Car Service Clerk William Thompson and his bride

Safety Roll of Honor

(Continued from page 56)

Ohio Division

On December 20, as No. 92 was leaving Blanchester, Virgil Smith, trackman, observed brake beam down on a car very near the engine and through his efforts engineer was signalled and train stopped. Mr. Smith then assisted in taking down the defective beam. A letter of thanks was sent this employe for the interest he displayed.

On December 31, while extra 2922, west, was passing station at West Junction, Operator F. M. Clark who had been relieved from duty and was walking west from the station going to his home, observed brake beam dragging on Baltimore and Ohio 185794. He immediately flagged train and, after stopping train crew, removed the defective brake beam, probably averting an accident.

Indiana Division

On December 28, Track Foreman I. Slayback, Aurora, noticed car with loose wheel in 94's train. He notified Conductor Moore and car was set out at Dearborn. Car Inspector stated that car was in such shape that it was not in safe condition to run.

All in a Week's Work

By H. T. Lodge, Signal Helper,
Chester, Pa.

Most all people have their calling
As to their daily work they go,
I'm just a happy signal-helper
On the Baltimore-Heigho.

On Monday I light the signal lights
And clean them nice and bright;
By doing so the engineer
Can see them through the night.

On Tuesday I light some switch lamps,
And oil some switches, too,
And yet they say we signal men
Have nothing much to do.

On Wednesday we fix up our Lizzie—
She's our old motor car—
For we must treat her kindly
If we would travel far.

On Thursday I walk three miles or so
'Way down the railroad track,
The maintainer shouting trouble,
I carrying tools on my back.

On Friday I light up the lights,
The same thing to repeat,
You bet I take good care of them
And try to keep them neat.

On Saturday I clean signal blades,
And paint the derails red.
Pretty soon it's quitting time,
And home I go to bed.

Of course I have a buddy,
A good old pal is Bill;
Of slinging oil and lighting lamps
We surely get our fill.

So here's sending you all our good wishes,
And when shining signals you see,

You'll know they've been polished and
lighted
By my happy old buddy and me.

Shoeless, he climbed up stairs, opened the door of the room, entered and closed it after him without being detected. Just as he was about to get into bed his wife, half-aroused from slumber, turned and sleepily said:

"Is that you, Fido?"

The husband telling the rest of the story, said:

"For once in my life I had real presence of mind. I licked her hand—*Tit-Bits*."

"Keep These Men"

"Brown, I've been putting the axe to the pay-roll. I have cut out a lot of dead wood—unskilled men we can replace tomorrow if necessary.

"But—keep these men whose names I have checked. They draw big pay but they know their work. They are the men who looked ahead and trained themselves to do some one thing better than any one else. We can't afford to lose one of them."

foremost Advertising and Sales Managers have won success through I. C. S. training.

Accounting? Commercial Law? All over America bookkeepers, accountants, office managers, private secretaries, are reaping the rewards of time invested in I. C. S. training in these subjects.

Don't let another priceless hour go to waste. Let us prove that we can help you to turn your spare time into money.

Without cost, without obligation, tear out and mail this coupon. It's a little thing that will take only a moment of your time. But it's the most important thing you can do today. Do it right now!

ARE you one of these skilled men who will be kept? Or is the Axe of Unemployment hanging over your head this very minute?

Thousands of men are idle right now for just one reason—they are *unskilled*! They work at any kind of job they can get, and when a slow-up comes, they are the first to be dropped.

You can climb out of the ranks of the unskilled if you really want to do so. You can get the position you want by spare time study in the evening hours you now waste. *Yes, you can!*

For thirty years The International Correspondence Schools have been helping men and women to win promotion to earn more money—to get ahead in business and in life. More than 2,000,000 have taken the Up-road To Success with I. C. S. help. More than 130,000 are training themselves for bigger jobs right now.

Would you like to be a first-class Mechanical, Electrical or Civil Engineer? A Chemist? An Architect? A Building Contractor? Hundreds of thousands of men have climbed into big jobs in the technical professions through I. C. S. help.

Do you want to advance in Business? In Advertising? In Salesmanship? Many of the country's

INTERNATIONAL CORRESPONDENCE SCHOOLS BOX 8506-B SCRANTON, PA.

Explain, without obligating me, how I can qualify for the position, or in the subject, before which I mark X.

Pensioners' Roll of Honor

(Continued from page 47)

George A. Phillips

George A. Phillips, retired tool room attendant, Cleveland Division, was born in Cleveland on September 5, 1853. He began work with the Baltimore and Ohio on April 18, 1898, as laborer. Later he was made helper on wheel lathc. On April 1, 1913 he was made tool room attendant. This position he held until the time of his retirement.

Rudolph T. Ault

Rudolph T. Ault, pensioned tinner, was born in Washington County, Maryland, two miles from Harper's Ferry, W. Va., on June 11, 1856.

He entered the service of the Baltimore and Ohio on October 5, 1879, as a car inspector, Sandy Hook, Maryland, under the supervision of John R. Smith, master mechanic. He was transferred to Brunswick, Md., on May 10, 1891, when that place was opened for service. Mr. Ault worked as a carpenter for three months. He was then promoted to foreman of car repairs; after four years was employed as pipe fitter and air brake inspector and repairman. He held this position until three years ago when he was transferred to the round house, working as shop tinner.

Having a severe attack of rheumatism and feeling unable to do his work any longer, he applied for retirement. His wife and eight children are all living. There are 5 daughters and 3 sons, the latter working for the Baltimore and Ohio at Brunswick.

N. E. Alexander

N. E. Alexander, retired foreman, was born in Charlestown, Cecil County, Maryland, on March 18, 1845. His father died, leaving his mother with 6 small children, when the boy was 8 years old. Mr. Alexander was placed on a farm at Airy Hills, near Old Powhatan Cotton Mills, for 9 years. At the age of 17 he enlisted in the Fourth Maryland Infantry, U. S. A., serving as private, first sergeant and first lieutenant. At the close of the Civil War he returned to his old home, taking a position in a merchandise store. From that he went to the trade of carpentry, which he soon gave up and entered the firm of George Helfrich & Son, where he remained for one year. On August 1, 1868, he entered the service of the Baltimore and Ohio as lumber inspector, Mt. Clare Lumber Yard, under Samuel T. Henry, foreman, and J. C. Davis, master of machinery.

There were at this time very few shops. There were the blacksmith shop and Primrose Shops at the Arlington Avenue gate, the round hop, where box cars were built, a passenger car shop (frame) about twelve

feet high, a small saw mill and lumber shed. In those days the lumber foreman would take a gang of men with a train of gondola cars drawn by old camel engine No. 55 and go up to the West Virginia mountains, load up the lumber and haul it down to Mt. Clare, where it would be made into car stock.

After the death of Mr. Henry, who was injured by accident and died in the spring of 1870, Mr. Alexander was placed in charge of the receiving yard at Locust Point. There were no elevators at the Point and no houses east of where the Baltimore and Ohio tracks cross Fort Avenue. Coats' old rolling mills and a large house known as "the Vineyard," which has been torn down, were the only houses near the Fort. The Locust Point Yard contained at one time 12,000,000 feet of lumber and it required 75 to 100 men to handle the large amount of stock the Company was receiving at that time. At times there were 5 vessels at the wharf at one time, discharging on an average of 300,000 feet to each vessel. Mr. Alexander had charge of this large amount of lumber, which was loaded at the wharf and taken into the yards and piled.

When the World War broke out and the Locust Point Lumber Yard was discontinued, a new yard was started at Wicomico Street. Mr. Alexander was called to Mt. Clare and had at that time rounded out 50 years of service. He was presented with a fine testimonial from Vice President A. W. Thompson. When leaving Mt. Clare and giving up his position as foreman of the Mt. Clare Lumber Yards he was presented with a fine easy chair and many other gifts by his many friends in the Stores Department. Mr. Alexander was retired on a pension on November 10, 1921, having been with the Baltimore and Ohio for over 53 years.

Giving up his position with the Company and leaving behind so many of his old friends in the Stores Department was one of the most trying experiences in his life, but because of failing eyesight he thought it best to discontinue active service.

To Our Engineers!

No jar or jolt—you can count on two more tickets

WASHINGTON, D. C., December 7, 1921.
MR. W. V. SHIPLEY,
District Passenger Agent,
Baltimore and Ohio Railroad,
Washington, D. C.

Dear Sir—You will recall having taken care of tickets for myself and family to Chicago recently and I have intended several times since my return to write you and tell you what a nice trip we had over your line.

We tried the evening meal leaving Washington and it was even more than you represent it to be.

Of course, going, we missed the mountain scenery, but we enjoyed this on our return as we came back on the train which arrives at Washington in the afternoon.

My wife stated that she never had such a comfortable night's rest on a train before and I agreed with her. I did not feel a jar or a jolt during the entire trip; your engineers certainly know how to handle their trains.

We expect to go West again next summer and you can count on two more round trip tickets for the Baltimore and Ohio.

Yours very truly,
A Patron.

Let's get together and cut "Old Man Railroad" loose

Results of the "Perfect Package Campaign" Held During November, 1921

Small Communities Make Better Record than Large Ones in Percentage of Exceptions Filed

Shippers of the country made a score of 99.10 per cent. in the "Perfect Package Campaign," according to a recapitulation of the results of the movement just announced by the Joint Campaign Committee of the American Railway Association and the American Railway Express Company, which conducted the campaign throughout the country in November.

Reports of the business handled and the number of exceptions taken on packages, because of some error or defect in packing, marking or registration, were tabulated in Chicago by a corps of accountants, and took a week to complete.

During the Perfect Package Month, as November was designated, the railroads were credited with handling 9,339,745 freight shipments, to which 101,760 exceptions were filed by the carriers. During the same period the express company handled 10,899,352 shipments, to which 81,070 exceptions were taken. In other words, all of the carriers handled 20,239,097 shipments, freight and express, on which 182,830 exceptions were entered by carriers, giving a national percentage of 99.10 per cent.

These figures were tabulated from reports received up to December 22, 1921, from 1294 cities in the United States, divided into five classes, according to population. The 56 leading cities, each with a population of 100,000 or more, shipped out more than half the business handled by the carriers, representing 5,724,764 shipments by freight and 7,871,455 by express, for a percentage of 95.15 per cent.

The 156 cities, having a population from 25,000 to 100,000 each, forwarded 3,455,254 shipments by freight and express, with total exceptions filed of 37,891, for a score of 98.91 per cent. Two hundred and fifty-four cities, with a population between 10,000 and 25,000 each, shipped 1,946,683 shipments, with 21,883 exceptions, for a score of 98.88 per cent. Two hundred and twenty-seven cities, with a population from 5,000 to 10,000 each, made 688,678 shipments, with 4,898 exceptions, for a score of 99.29 per cent. Six hundred and one cities, with a population of 5,000 and under, each, obtained a score of 99.40 per cent., with 552,263 freight and express shipments on which 3,338 exceptions were filed.

The exception reports covered errors made by shippers in the packing and marking of shipments, and in making out bills of lading or express receipts. A number of the smaller communities failed to forward their reports in time and were not included in the recapitulation.

The Joint Perfect Package Campaign Committee has issued a statement, expressing the thanks of the carriers and their representatives, to all traffic clubs, chambers of commerce and other shippers' organizations, which gave active support to the movement and contributed to its success.

This Superb 110-piece Set, with initial in 2 places in wreath with 5-color decorations on every piece and gold covered handles, consists of:
 12 Dinner Plates, 9 inches
 12 Breakfast Plates, 7 inches

12 Soup Plates, 7½ inches

No Money Down

Guaranteed
for
Life

Pudding Pan. Used like this for puddings, cakes, bread. Also milk dish. 2½ quarts.

Used as Colander. Handy to rinse berries. Also used as Strainer.

When used as Casserole ideal for baking apples, beans, escaloped potatoes, macaroni, etc.

Convex Kettle. This combination used for cooking and stewing vegetables. Bulged sides, easy to pour liquids off. Used as Windsor kettle.

Used as a Double Boiler cooks cereals, no scorching. Steam vegetables in top. Kettle Cover made of thick aluminum.

When used as Preserving Kettle distributes heat evenly. Not necessary to stir the contents.

Corn Popper. This combination is what you want for special things—corn popping, crisping corn flakes, roasting coffee, etc.

Combination Cooker. Used this way for general purposes not so well filled by any other utensil. Ears of kettle hold ball upright or lowered position.

Used this way is a Steamer Set. For steaming potatoes or corn on cob. Perforated bottom makes uniform cooking.

Used this way for Tubed Cake Pan. Removable tubes. Cakes taken out easily without breaking.

Self-Basting Roaster. When used this way makes juicy, well browned roasts. A perfect self-baster. Steam condenses on cover and drips back.

A complete cooking set in this wonderful combination. Send only the coupon and we ship the set, all charges prepaid. Try it 30 days on free trial, and then if not just what you want, pay nothing and send it back and we'll pay the return postage charges. If you keep it, pay bargain price at the end of 30 days' free trial and it is yours. Mail coupon today.

Weigh Yourself

AUTOMATIC weighing machines invite you to deposit one cent, and this question is printed on them: "Have you weighed yourself today?"

A fortune would be made and deserved by any man who could invent a machine for weighing the mind, the mental activity and capacity of the human being. Then, indeed, the question would be worth while: "Have you weighed your mind today?"

Ask and answer these questions and you will get an idea if your mental weight has increased or diminished:

What do I know that I did not know one year ago?

What really good book have I read in the three hundred and sixty odd days gone by this year?

What questions have I studied seriously and to the bottom?

Do I think more readily, accurately and closely than I did?

Am I more interested than I used to be in serious questions and less interested in frivolity—or just the reverse?

Can I feel my mind grow, not merely in actual weight, but in alertness, elasticity, concentration?

Have You Heard the New Song "Shenandoah?"

A song of our own Shenandoah Valley, written by Baltimore and Ohio employees for Baltimore and Ohio folks. Music by Leo Friedman, author of "Meet Me Tonight in Dreamland," "Let Me Call You Sweetheart," and others. Send in your order now for sheet music, rolls and records. Sheet music (with words) 25 cents per copy, postpaid.

AGENTS! Write for exclusive territory and Special Offer at once.

SEASONS—many in spare time. **OLIVER OIL-GAS BURNER & MACHINE COMPANY**, 2099-0 Pine St., St. Louis, Mo.

Bentley of Philadelphia made that. Hundreds making fortunes, too, with **Oliver Oil-Gas Burner**. Instant heat at turn of valve. Makes big hit with every woman. No coal or wood. Burns 85% air, 5% kerosene. 1 minute to demonstrate. Sells itself. No wonder agents clean up in all

Knew The Place

A business firm recently adopted Edison's plan for testing the intelligence of men applying for positions. A man applying for a position as superintendent would be expected to answer all the questions on the list submitted. One wishing to become a clerk faced only half the list; as the job applied for dwindled in importance, the amount of knowledge necessary to secure it grew smaller.

A colored man who had applied for a job as porter received a card bearing the single question, "Who invented the cotton gin?" "Well," said the clerk, to whom he returned the card, "what's the answer?" "Say, boss," answered the darkey, "Ah dunno who 'twus just made dat stuff, but Ah knows whar you kin git some."

Music as Medicine

EUROPEAN scientists are investigating the curative possibilities of music, according to Fritz Kreisler, the violinist, in an article in a recent issue of Mentor Magazine.

"My father was a physician," Mr. Kreisler writes, "and I studied medicine for about two years—so I know a little about medical science. I do not think it is unscientific to say that, in certain instances, music can effectively be used as a healing agency."

"Recently a case was brought to my notice. A young lady was sick with a high fever in her home in one of the Western States. The doctor's home was far away, and he could not be summoned readily. A friend asked the mother to give her daughter a 'music cure.' A certain record was played on the phonograph a few times. The young lady's temperature came down."

Help Wanted

We require the services of an ambitious person to do some special advertising work right in your own locality. The work is pleasant and dignified. Pay is exceptionally large. No previous experience is required, as all that is necessary is a willingness on your part to carry out our instructions.

If you are at present employed, we can use your spare time in a way that will not interfere with your present employment—yet pay you well for your time.

If you are making less than \$150 a month, the offer I am going to make will appeal to you. Your spare time will pay you well—your full time will bring you in a handsome income.

It costs nothing to investigate. Write me to-day and I will send you full particulars by return mail and place before you the facts so that you can decide for yourself.

ALBERT MILLS, Gen. Mgr. Employment Dept.
6637 American Building, CINCINNATI, OHIO

"A young woman suffering from sleeping sickness was awakened by a violinist when other means failed."

Music as medicine was known to the ancient Egyptians, Hindus, and Christians, Kreisler says, and calls attention to its use in soothing the insane.

Following are some interesting things about music from Kreisler's article:

His musically trained ear enabled him to tell with astonishing accuracy the range of the gun from the sound of a passing shell during the war.

Music has a curious effect upon animals. Horses are fond of the flute, while drums and trumpets cause them to rear and plunge.

The dread cobra of India loses its menace at the sound of the snake charmer's peculiar pipe. Animals at the New York Zoological Park did not like jazz music; the monkeys in particular went wild with anguish at the bla-a-h of the saxophone.

The power of music has been the theme of legend and story since the beginning of time, Kreisler says. The Greeks told how Orpheus charmed the animals with his playing and drew the soul of his beloved Eurydice from Hades, and of the Sirens that lured sailors to their doom with song. The lorelei maiden on a rock above the Rhine is a German version of the Siren story.

Kreisler does not believe that there is such a thing as "bad" music. "When music can be called bad," he writes, "it ceases to be music."

This Aluminum Set is only one of my Sensational Sliced-Price Bargains. I have Thousands. All my prices are Down—Away Down! My Big Free Catalog is jammed with these Big Bargains. Write for It Today without fail.

THE MANUFACTURER HAS AGAIN CUT HIS PRICE—I PASS THE BENEFIT ON TO YOU!

Use as Your Own 30 Days Free!

Reduced from \$22.50 to \$10.95
 Easy Monthly Payments

Every Piece Guaranteed
 To Wear 20 Years

45 Useful Pieces
 High Grade Aluminum

Here is one of the finest offers I have ever been able to make. Here is your chance to try for a whole month, right in your own kitchen, a Handsome, Useful and High-Grade Aluminum Set at my invitation and at my risk. Send the coupon and first payment today. The complete set will be sent you immediately. Begin at once to use it as your own. Learn the big difference between percolator coffee and coffee-pot coffee; enjoy the richer aroma, the finer flavor and the clearer color. Know the many uses of the Big Combination Roaster (see picture above). See for yourself how it saves fuel, time and labor. Experience, by daily use, the pleasure in handling and the profit in using all the pieces. Enjoy the bright, clean, spic-and-span appearance the 45 pieces give your kitchen.

This Beautiful Aluminum Set must be its own salesman, as You Don't Buy From Pictures When You Deal With Spear. You must be entirely satisfied with its High Quality, its Low Price, and its Easy Terms. You must be delighted with its Shining Beauty and its High Efficiency. If your satisfaction is not thorough from every viewpoint, no matter how much you have used the set during the 30 days, you can return it. Your first payment and all transportation costs will be refunded.

The trial will not cost you a penny. All the articles are of a large serviceable size. Every article is of the kind you will need and use often. This set must not be confused with ordinary sets that include many useless thin pieces. You must judge this set by its big value, rather than its little price. And this you can do during your 30 Days' Free Trial. Former price \$22.50, which we have slashed to rock bottom. Order No. MA2500. Terms \$1 with order, \$1 monthly. Total price \$10.95. Will be shipped by express unless otherwise requested.

Nathaniel Spear
 President

➔ **SPEAR & CO.** ➔ Dept. B-1

 Home Furnishers for the People of America

The former price of this Strictly High Grade Aluminum Set was \$22.50. Lower manufacturing costs permitted me to cut the price to \$13.95. Thousands of people took advantage of this Remarkable Bargain. These thousands are perfectly satisfied. Another reduction in factory costs, effective January 1st, enables me to again slash the price to \$10.95. My offer now challenges all competition.

IMPORTANT! Every piece in this set is genuine high-grade, pure aluminum, mirror-like in finish, with a polish that cannot wear away, seamless, sanitary, and easy to clean. Will not flake, crack, chip, peel or corrode. **EACH AND EVERY PIECE IS GUARANTEED TO WEAR FOR 20 YEARS.** Heats rapidly and evenly, and so saves fuel. **Heavier and better than ordinary grades.** These pieces are made of extra-heavy, extra hard high-grade aluminum, and will give years of Hard, Honest, Faithful Service.

THE 45 PIECES

- | | |
|---|--|
| 9-Piece roaster of large capacity—diameter 10½ inches—6 inches high. Inside milk pan 2½ inches high, 8½ inches in diameter | 1 One qt. Lipped sauce pan |
| 1 Six qt. tea kettle with double boiler inset (two qts.) and cover; 3 pieces | 1 1½ qt. Lipped sauce pan |
| 1 Six qt. combination cooker, 11 uses. Pudding pan strainer or colander, 1 | 1 Two qt. Lipped sauce pan |
| flame, preserving kettle, self basting roaster, combination cooker, corn popper or corn flake toaster, cereal cooker or double boiler, steamer set (4 pieces) | 2 Jelly or layer cake pans with loose bottoms (4 pieces) diam. 10 inches |
| | 1 Percolator with inset, capacity 7 cups (2 pieces) |
| | 2 Bread pans, 9½ x 5½ in. |
| | 1 Ladle |
| | 1 Pancake turner |
| | 1 Coffee or Tea strainer |
| | 1 Combination biscuit and doughnut cutter (2 pieces) |
| | 1 Measuring Cup |
| | 1 Combination funnel (6 pieces) |
| | 6 Separate Uses |

Promoted

By James Edward Hungerford

Illustrated by Robert L. Heiser

Since old Hawley's been promoted, somehow things don't seem the same;
Office 'pears so kin' o' empty, somethin' gone that's hârd to name;
There's his desk jest like he left it, everything so spick an' span;
Everything so right an' proper—he was jest that kind o' man.
There's his old cob pipe up yonder in that left hand pigeonhole;
There's his match box where he laid it, an' his clay tobacco bowl;
There's his sleevelets, an' the vizer, that he used to always wear,
An' the office coat he'd fetched with him from 'way out West somewhere.
Yep, he's gone, but still there lingers 'bout that battered desk o' his,
Somethin' so jest like old Hawley—can't explain jest what it is.

Since old Hawley's been promoted, boys don't have so much to say;
Kind o' seems as though words left us, when old Hawley went away;
He was one of them there fellers who don't say much from the start,
But jest kind o' worms his way into most everybody's heart;
Now an' then he'd tell a story in a voice so droll an' dry,
That we'd hold our sides an' holler, 'til the tears 'ud blind our eye;
'Twant so much though, at the stories, or the things they was about,
As the droll amusin' way that cuss 'd sorter let 'em out;
Had that fetchin' way about him—kind o' hard to make it plain;
But we'd all be mighty tickled to have Hawley back again.

Since old Hawley's gone an' left us, there's a sight more work to do;
For he'd somehow hold his own job, an' he'd help us hold our'n, too;
Never cared how tough the claims were, or how lofty towered the pile;
Never stopped to kick an' grumble—jest went at 'em, with a smile.
Used to say, "Don't fret none, fellers, everything'll come out right,"
An' those cheerin' words o' hisn, used to spur us on a sight;
Golly, how we fellers mourn him—how we miss his homely face;
Road'll surely have to go some, when they fill that old scout's place;
Don't know jest what job he landed—can't say what he gained in pay—
Guess old Hawley 'll have to tell us, when we meet on Judgment Day.

A Constructive Program Needed for the Railroads

Tremendous Losses Suffered Because of Lack of Foresight and Antagonism to Railroads

By Herbert Hoover, Secretary of Commerce

The wide experience, analytical mind, impartiality and position of the Honorable Secretary of Commerce lend great weight to the following statement on the railroad situation which he made on February 3 before the Interstate Commerce Commission. It is of particular interest because it presents the views of the cabinet officer who, more than anyone else in the country, exercises a guiding hand over America's Business, including not alone transportation, but agriculture, industry and commerce.—Ed.

IN responding to the invitation to discuss some of the problems present in your general railroad investigation, I shall devote myself to three of the railway topics which especially arise from the present economic situation.

I do not need to review at length that we are recovering from the destruction and inflation of the greatest war in history; that we are suffering from the waste, the extravagance and over-expansion of the post-war boom, and that the war has brought about great shifts in the movement and price levels of commodities between nations.

I would, however, suggest that it might be profitable for our people to get a somewhat clearer perspective of our own, and the world's, troubles and problems. Even a superficial survey must bring us out of an atmosphere of gloomy introspection into an assuring realization that, great as our dislocations may seem to be, we relatively are in an enviable position. Our nation is unshaken and as a people we are getting our bearings in a world of perplexing economic adjustments. While there is unemployment and lack of profit taking, we are free of panic. We are comparatively more restless than injured. For instance, as heavy as our tax burden is it is still less than one-half as great in proportion to our national productivity as the other states in the war.

The violence of our readjustment, however, is without parallel, and we sometimes tend to color our measures for the future by the depression we are in. The fact is that we must pred-

icate all plans for the future on the ultimate return of the American people to a normal economic activity, with our annual progress in the expansion of our production, of our plant and equipment, of our skill and our efficiency. There can be no question that this return will take place, and no responsible body will approach our problems on any other basis. Not one of us would submit to the charge that we were not prepared to bet against any odds upon the future of the United States. Our problem is to expedite this recovery—to speed up employment of our workers, and thereby find market for our farmers.

If we look at the national economic situation as a whole, the greatest impulse that can be given to recovery from any source whatever is a reduction of rates on primary commodities combined with the immediate resumption of railway construction and equipment. The first depends upon reduction of operating costs, the second upon restoration of credit for our railways.

One thing is absolute. Our transportation facilities are below the needs of our country, and unless we have a quick resumption of construction, the whole community—agricultural, commercial, and industrial—will be gasping from a strangulation caused by insufficient transportation the moment that our business activities resume. For the past five years we have had no consequential expansion to our railway transportation machine. With but one interval of nine months in 1918 and 1919 we had a car shortage throughout the whole of the years 1916-17-18-19 and

'20. This shortage rose to as high as 160,000 cars with a corresponding shortage of motive power. We paid tremendous sums in commercial losses and unemployment in consequence. We laid it onto the war. We should lay it onto our lack of foresight and antagonism to railroads.

Railways Need 4,000 Locomotives and 200,000 Cars

Few people seem to realize the amount of expansion in our transportation machine necessary to keep pace with the growth of the country. And an equal few seem to have any notion of the price we pay for not having it. Our country is more dependent upon railway transport than any other. All others have comparatively greater coast lines and internal waterways. The experience of the 20 years before the war has shown that we must build an extension of lines, including terminal facilities, additional sidings etc., every year equal to the construction of a new railway from New York to San Francisco. We must add at least 120,000 cars and 2,500 locomotives annually to our equipment. Since we entered the war in 1917 we have constructed at least 10,000 miles of railways less than our increasing population and economic development called for and we are behind in rolling stock by about 4,000 locomotives and 200,000 cars.

I wish to emphasize that unless we can have an immediate resumption of construction and equipment, our commercial community will pay treble the cost of the whole of them in their losses of a single season. The very moment that we reach anything

like normal business we shall see a repetition of car shortages, followed by an increase in the cost of coal to the consumer from one to three dollars a ton; we shall again see premiums of 20 cents a bushel for the use of cars for moving grain; we shall in fact see a shortage of commodities to the consumer; and we shall see gluts upon the hands of the producers. We shall see factories filled with orders again closed for lack of cars; we shall see large intermittency in employment; and we shall see the usual profiteering in commodities due to a stricture between the producer and consumer.

There would be no difficulty whatever, by basing such losses on the experiences we have already had, to calculate a loss to the American people of a billion dollars for each one of these periodic transportation shortages.

Furthermore, there is nothing that is so irrecoverable a loss to the nation as idle shops and idle men. To-day we have both. There is nothing that will so quickly start the springs of business and employment as an immediate resumption of construction and equipment of the railways. When business does resume, we shall need all of our capacity for the production of consumable goods. We shall not only find it strangled for lack of transportation, but we shall find ourselves plunging into the manufacture of this very railway equipment and construction in competition with consumable goods for materials and labor. Herein lies the basic cause of destructive price inflation and booms, with all their waste and over-expansion. In times of depression, we should prepare for the future and by doing so we can cure the depression itself.

If we examine the fundamental reasons for failure to resume equipment, we will find them in the loss of confidence in railways as an investment and the competition of tax free securities. We have passed the period of credit strain in this depression. Surplus capital is pouring by hundreds of millions monthly into tax free securities and foreign loans, and yet our railways are unable to finance the most moderate of construction programs. The confidence of the public in railway investments was at so low an ebb before the war that finance by the issue of common and preferred stocks had become impossible and railway expansion was living on bond issues. The confidence of an assurance and continuity in earning power to cover this burden of bonds has been even lowered since the war began, because of the uncertainties

of both rising and falling prices, of rising and falling wages, of rising and falling rates preventing all regularity of earnings upon which an investor could be convinced, even if no other difficult factors entered into the problem. I see no occasion to go into the labyrinth of past railway finance, its propriety, or lack of propriety, its foolishness or its skill. This commission approaches the financial problems of the railways upon the actual value, not upon their issues of securities and I take it we are living for the future, not the past. We want transportation, and we want it with the values of private initiative and clean public service.

If we look to the immediate future with its complete necessity of paring the railway earnings down to little more than bond interest, until we give relief to the shipper (and thus the primary foundation to business recovery) I can see little likelihood of convincing the investor as to his margins of safety. There is an atmosphere that our railways will never again earn profits, and that they are

One thing is absolute. Our transportation facilities are below the needs of our country, and unless we have a quick resumption of construction, the whole community—agricultural, commercial and industrial,—will be gasping from a strangulation caused by insufficient transportation the moment that our business activities resume.

not as an industry worthy of investment, and that because private investors will not come to their assistance nobody can do anything.

Driving Headlong for a Setback

Far from it being impossible for our railways again to return to a profitable footing, I believe it is possible to demonstrate that on an average they will become very profitable. If we assume that the reduction of prices and wage levels will settle at a plane no lower than 50 per cent. over pre-war, and if we assume that the present rates are to maintain, and if we assume restored traffic, then the earnings of our railways would exceed 15 per cent. on the whole of the commission's tentative valuation. Surely there is room here for safety to investment, as well as relief to the shipper.

But the circumstances being as they are, confidence being at a low ebb, we do not have the equipment necessary for our business. We are driving headlong for a setback to our whole commerce the very moment

that we begin to get on our feet.

In these circumstances it seems to me vital that the railways as our greatest industry should propose a courageous program of broad visioned betterments and if necessary the government should consider giving the use of its superior credit. It would not cost the taxpayer a cent to give the government guarantee to equipment trusts upon the primary responsibility of the railways, the proceeds devoted entirely to improvement and equipment. This is no proposal to take money from the taxpayer. It is a proposal to save him from paying treble the amount of his guarantee in profiteering and losses. It will render a reduction of rates earlier, for unless something is done the improvement will have to be paid over years out of increased rates. Nor would we lose a cent upon the guarantee, for if American railways can not earn interest upon their borrowings let us throw up our hands and prepare for a second Russia.

A real program of construction would in its various ramifications give relief to five or six hundred thousand of our unemployed. It would enable even added numbers to increase their standard of living, and thus give increased market to the produce of our farmers. Our farmers who look to foreign markets for their surplus should stop to consider that our home consumption of meat decreased nearly seven pounds per capita in 1921, mostly owing to unemployment and that if this decrease could be overcome it would be worth more than a 35 per cent. increase in exports.

We talk glibly of giving billions of credits to foreign countries, to increase our farm exports. I wish to say with all responsibility for the statement that a billion dollars spent upon American railways will give more employment to our people, more advance to our industry, more assistance to our farmers, than twice that sum expended outside the frontiers of the United States—and there will be greater security for the investor.

Time to Call Off the Witches

Finally, I want to refer to the veritable witches cauldron being fed constantly with hates distilled from the misdeeds of railway promoters in the past, from the conflicts between the railways and the farmers, between the railways and their workmen. From all the confusion that arises from it we destroy our railways and destroy ourselves. With this commission on one hand assuring

honesty in finance, justice to the shipper and the railway investor, with the Railway Labor Board assuring justice to workers and, above all, with a great spirit of public service in our generation of railway managers, it is time to call off the witches and take some vision of our national situation if we are to pull ourselves out of this depression.

Railway Rates

Before entering upon the question of readjustment of rates, I wish to set out some factors in the present economic situation that bear upon the entire question.

The following table shows a few commodities and service groups, compared to 1913 as 100:

Farm crops, at the farm.....	98
All animals, at the farm.....	92
Retail foodstuffs.....	150
Cotton, at the farm.....	136
Wool, at the farm.....	101
Retail clothing.....	213
Steel billets, Pittsburgh.....	113
Copper.....	86
Zinc.....	90
Pig iron, Pittsburgh.....	123
Bituminous coal, at the mine (estimated 4 districts).....	160
Bituminous coal (retail various localities).....	198-220
Yellow pine lumber (at the mill)....	189
Douglas fir lumber (at the mill)....	125
Lumber (retail) partly estimated....	200
Cost of living variously estimated from wage scales (approximate)....	162-180
Farm labor.....	135
Textile industries.....	210
Steel industries.....	150
Railways.....	200
Metal trades.....	218
Building trades.....	190
Coal mining scales.....	173

This table at once demonstrates:

(1) The inequality in prices and wages between different groups of commodities.

(2) The great increase in spread between "producer's" and "consumer's" goods.

(3) The lag in wage scales.

As the population engaged in the "deflated" producer's goods—agriculture, and metals, wood, etc.,—comprises one-half the total in number of the nation, their power to buy the same ratio of consumer's goods has been reduced to less than 70 per cent. of pre-war, and is the consequent cause of a large part of the industrial and commercial unemployment and stagnation in our cities and our transportation.

Spread in Prices

I wish to especially call your attention to the indicated enormous increase in spread between primary producer's and ultimate consumer's goods. In considering it, we must bear in mind that when we use 100 for both consumer's and producer's goods of 1913, we have already included the spread between producer

and consumer at that period. I therefore believe that the index numbers indicate an increase of 100 per cent. in the actual spread. It is right here where the most of our economic difficulties lie today. Our increased cost of manufacture and distribution bears two relations to the rate question—first, that the increase of rates of from 30 per cent. to 100 per cent. in different commodities are part of it, and are in turn part caused by it; and second, the increased rates bear very unequally on different groups in the community.

If we search for the cause of this increase of spread we shall find therein a vast complex of increased taxation, increased wages, rents, and a dozen items, all reacting upon each other, and also expressing themselves in increased cost of operating the railways. For instance, the total increase in national, state and municipal taxes since 1913 is approximately \$5,640,000,000. At the present purchasing power of the dollar, our total national productivity is probably

A great deal has been said about the inefficiency of our railway system. I do not sympathize with these statements. Comparison with foreign railways of the fundamental criteria of per ton-mile costs, train loading, and so forth, in the light of our cost of living, will demonstrate that our railways are of higher standards, better in methods than others and are growing in efficiency.

somewhere around 50 billions of dollars, of which over ten per cent. must now be devoted to increased taxes. This sum of money must be obtained either from the producer or the consumer and in any event a considerable part of the taxes contributes to widen the spread. Because the increase in spread due to taxes necessitates a spiral of increased wages, rents, etc., and before its force expends itself my own opinion is that possibly 20 points in the distorted index number flows from increased taxes.

The increase of railway rates since 1913 in Class I railways to 1921, is about \$2,600,000,000, of which about \$1,400,000,000 are due to wage increases and about \$160,000,000 to tax increases. If our traffics were normal the total increase of rates would be more like \$3,500,000,000. These sums enter into this increase in the spread and carry with them a further trail of increased living costs and again a spiral of higher wages, rents, etc., in all other branches of manufacture and distribution.

There are other causes of the increased spread, some of which will be mitigated with time.

No one can say to what particular table-land of prices and wages we may settle upon, but it is a certainty that the exchange value of producer's goods will not again line up with consumer's goods unless we can decrease the costs and eliminate the wastes of our whole manufacturing and distribution trades. And unless we can secure their nearer proximity we will retard a return of employment and prosperity.

I wish to digress for just a moment from railway to agricultural subjects, to point out that the recent project for fixing farm prices by law are apparently founded on the notion that by raising agricultural prices up to the levels of consumer's goods we can remedy the extreme hardship of our farmers. Even if it be possible to raise the prices, much less advantage would accrue to the farmer than anticipated. Unless the "spread" is decreased by actual savings, the costs of manufacture and distribution would be at least partially increased by higher prices of producer's goods. The spread is fundamentally due to increased cost of manufacture and distribution, not to the fall in producer's goods. The real remedy is an attack upon the causes of the spread and thereby to bring consumer's goods down to the producer's buying power.

It is a certainty that in order to decrease the spread, railway rates must come down and for rates to come down costs of railway operation in wages and prices of supplies must be reduced. Until this adjustment is secured the economic machine will continue to move slowly. We cannot and should not expect wages to come back to pre-war levels. Many of our wage scales were too low in pre-war times. They can follow down step by step with the cost of living, but there are permanent charges in this spread, such as taxes, which will hold the cost of living above pre-war levels. We must gain our other reductions in the spread by increased national efficiency.

The Method of Readjusting Rates

The involved complex of transportation rates was obviously originally based on some relationship to the value of commodities, mitigated by competition. In other words, the old slogan of "what the traffic will bear" had some economic background. But this entire conception of ratemaking was destroyed by horizontal raises. We have rates

clearly beyond what the traffic can bear.

The increases in railway rates during the past five years have fallen with extraordinary inequality on different commodities and different groups of people in the community. The country grew up, its industries were distributed under ratios of costs between different commodities, ratios between raw materials and finished goods, ratios between the farm and city. These have all been distorted by the horizontal raises. The increases in rates since 1914, for instance, have added probably less than one per cent. to the price of cotton goods on the average haul but it has added probably 60 per cent. to the price of coal. The increased rates since 1914 have added nearly 100 per cent. to the cost of assembling the materials for pig iron.

All this is artificially forcing our industry to move toward their raw materials. This does not alone represent the starting of a new factory; it is a movement of the whole mechanism of the community, labor, homes, schools, railways and whatnot—an enormous duplication of plant and loss of capital. We will ultimately have the rates readjusted and then we will destroy the new industries created under it.

Of equal importance there is a new economic light on this distortion of rates evident under the stress of the last few years. That is, the better realization that some increases of rates come mostly off the producer while others are paid by the consumer. Increases in spread between producer and consumer do not fall equally upon each of them. In primary commodities where the price is fixed by international competition, the increase or decrease in rates is a deduction from the producer. Take wheat, for instance, the point of competition with foreign produce lies at Liverpool. The net to the producer is Liverpool less transportation and other handling charges. Therefore increases of rates are a deduction from the farmers' price. The same thing applies to the producer in certain cases of domestic competition. Also where there is rapid turnover, as in manufacture, and consequent ability to reduce supply, the consumer pays the freight, as processes of productivity will not continue below profit point. In most manufactured commodities the consumer pays the freight, for production quickly shrinks when prices at the factory become unprofitable and the price to the buyer is the factory price plus the freight. For instance, in hides,

the farmer gets the international price less freight. On boots he pays the manufacturer's cost, profit and freight.

It appears to me that with the paralysis induced by the increased spread, we have to take a broader vision of what part of the community is suffering most and direct such concessions through the railway rates as can be given to that group—if we would better equalize the whole economic load.

During the past eight months the railways have made many thousand readjustments of local rates in endeavoring to heal local distortions, but I am convinced that the whole railway rate structure needs a most systematic overhaul in the light of these new economic forces that have been brought into play.

We obviously must maintain the average rate that will support our transportation systems adequately and such an overhauling of rates

The consolidation of our railways into larger systems has been contemplated in our legislatures for some years past as a gain in efficiency. Its value can be overestimated—it is not a panacea for all trouble. It does give hope, however, of economies in further efficiency from more complete utilization of rolling stocks and terminals, some small degree of saving in overhead, saving in current inventories; but its probable great saving would be decreased cost of proper finance, increased financial stability and fuller independence from the supply companies.

might quite well mean the advancement of rates in certain commodities in order that compensation can be given to others where there is undue duress.

If I were to discuss the rates charged today I should say at once that a decrease in passenger rates is not nearly so vital to the community as freight rates, for passenger rates do not enter into the "spread" in proportion to the relative volume of earnings. If I were examining the freight rates I should at once say that coal, metals, wood, and agricultural and other producers' goods should be reduced to the bottom before l. c. l. and class rates are touched.

I would be willing to go even farther and say that I am convinced that even if the commission cannot at the present moment justifiably reduce railway incomes a single dollar, it is warranted in investigating the possibility of some relief to the more distressed commodities by a revision of

some rates upward. There is perhaps no great field for changes in this direction but it is worth inquiry. As mentioned above, an economic analysis of our industry will show that l. c. l. and class rates are far too low compared to the rates on primary commodities.

With the gradual return of the traffic to normal, with decreased operating costs, relief in rates will be available, and it would be an economic crime to apply such relief by horizontal reductions to all rates thus giving relief to higher priced goods and travel, when the vital mainspring of our economic life, our agriculture and fuel and metals are choked.

The Present Rate Situation

Determination of anything in the nature of permanent rate basis is in my own view impossible at the present time because:

The last five years of changing administration, irregular traffic and wildly fluctuating wages and prices of materials give us but little reliable historical criteria upon which to base the future. We are in the midst of violent economic readjustments, of a profound industrial depression. No one can determine to what plane the reduction in operating costs will settle. No one can estimate the volume of traffics that are probable for any particular period ahead. It appears to me, therefore, that the commission will need to temporize with the situation for some time, and that its conclusions may well fall into three periods:

First—The immediate present.

Second—During the early period of decreasing costs and increasing efficiency and slowly recovering traffics.

Third—Normal operations.

THE IMMEDIATE PRESENT

If we survey the results of the past year in the application of present costs and rates, we find many railways failing to earn interest upon their borrowed capital; we find some others more fortunately situated who have earned dividends on their share capital.

One or two exceptions of low bonded indebtedness have done extraordinarily well on their share capital. If we survey the situation by districts, in order that single instances do not mislead us, we will find that the whole of the Class I southern roads barely covered bond interest, while the most fortunate group, the western roads, show

an earning of only four per cent. in 1921 upon their tentative valuation. Moreover, it is obvious that maintenance has been held to a low level and new equipment and extensions practically nil.

The present earnings in their perilous closeness to bond obligations seem to me to dispose of the question of immediate important rate relief, if we do not wish widespread receivership and shocks to our whole commercial fabric.

I believe there are cases where earnings could be increased by lower rates. I know that it is contended that such opportunities do not exist, but no one can review the testimony given here during the past few weeks without concluding that the rates in special instances are stifling business. These directions are perhaps not important in the whole problem of rates, but I am convinced that lower rates would recover lost traffic, such as export coal, substitutions in building materials, gains in water competition, etc.

THE SECOND PERIOD—DURING 1922

We must assume that those railway wages and supplies which are out of line will at least in part follow down to the levels of decreased cost of living; we must assume that the efficiency that is slowly emerging after the government management will still further increase; we must assume that the volume of traffic will increase toward normal.

I have the feeling that the railways, being our greatest business, will agree that all these savings should be instantly devoted to relief in the rates on primary commodities in order that we should expedite the recovery that can only come through decreased spread between producer's and consumer's goods.

I recognize that the uncertainty and slow reduction of rates in this fashion will itself delay business recovery because of the uncertainty of business as to its future costs. If our railways were in position to stand the temporary shock it would be infinitely better to drop the rates on primary commodities tomorrow—our business recovery would come faster. But we cannot ask the impossible.

THIRD

If we look further to normal times, we could make a rough calculation that present wages and costs at say 50 per cent. above pre-war would show that the railways can earn somewhere around \$1,500,000,000 in excess of the six per cent. minimum upon tentative valuation. As I have stated, relief is first more critically needed in the rates on primary commodities.

Some estimates given to me indicate that approximately 35 or 40 per cent. of revenues are involved in the groups more urgently needing relief. I think it will also bear calculation that in the income assumed above primary commodities can eventually be reduced to pre-war rates, and still place earnings upon a basis that will inspire such confidence in investors as will secure the free flow of investment capital into construc-

It is probably unnecessary to refer to the question of government ownership. No one with a week's observation of government railways abroad or with government operation of industry in the United States, will contend that our railways could ever be operated as intelligently or as efficiently by the government as through the initiative of private individuals. Moreover, the welfare of its multitude of workers will be far worse under government operation.

tion. It is not to be expected that capital for these purposes will be available at the rate that does not exceed the tax free securities at least two per cent. to three per cent.

Efficiency of Railways

A great deal has been said about the inefficiency of our railway system. I do not sympathize with these statements. Comparison with foreign railways of the fundamental criteria of per ton-mile costs, train loading, and so forth, in the light of our cost of living, will demonstrate that our railways are of higher standards, better in methods than others and are growing in efficiency.

The consolidation of our railways into larger systems has been contemplated in our legislatures for some years past as a gain in efficiency. Its value can be overestimated—it is not a panacea for all trouble. It does give hope, however, of economies

in further efficiency from more complete utilization of rolling stocks and terminals, some small degree of saving in overhead, saving in current inventories; but its probable great saving would be decreased cost of proper finance, increased financial stability and fuller independence from the supply companies.

It is probably unnecessary to refer to the question of government ownership. No one with a week's observation of government railways abroad or with government operation of industry in the United States, will contend that our railways could ever be operated as intelligently or as efficiently by the government as through the initiative of private individuals. Moreover, the welfare of its multitude of workers will be far worse under government operation.

We are struggling with the great problem of maintaining public control of monopoly, at the same time maintaining the initiative of private enterprise. I believe that we are steadily progressing to solution.

Great social and economic problems find their solution slowly and by a process of trial and error. We have tried unregulated monopoly, and have tried government operation, and found the error in them. We still have much to solve if we are to maintain our transportation. Much of this solution depends upon the successful initiative of the railways themselves and much of the shaping of these matters lies fortunately in your able hands.

Easter Flowers and Budding Hearts

The Little Mother and her brood all went to the Flower Market the Saturday before Easter. Amid exclamations of delight selections were made for relatives and friends. When the enterprise was apparently finished and Little Mother was preparing for the adventure of guiding her chicks to her car, Wee Boy spoke up: "Muddie dear, I want to give a plant to my Nora." Little Mother was pleased that he should think of his nurse and the purchase was made. Arrived at home, Wee Boy's excitement was almost too much for him. He followed "his Nora" about, dropping hints and delighting in her well assumed mystification. Finally, he burst out with: "I really have got something lovely for you, Nora, but you can't have it until tomorrow. It's a great big secret, but it's green and growing in a pot."—*Exchange*

Puzzling's a Pleasant and Profitable Pastime

There's Hardly a More Enjoyable Way of Adding to Your Vocabulary and Store of Information

Note—One of the most appealing suggestions for making the Magazine of greater interest, was made recently by the author of this article to the writer. Himself a lifelong devotee of the art of Puzzling, Mr. Pryor wishes to make its mysteries, its fascination and its rewards available to as many as he can, and he quite naturally thought of the thousands of readers of our Magazine as prospective members of the growing circle of Puzzledom. By the same token the Magazine is most fortunate in having Mr. Pryor volunteer to conduct this new department, which should be of great interest to many Baltimore and Ohio folks, and especially those who are in outlying stations on the Railroad and who have the time to give to the art.

Unlike ordinary picture and diagrammatic puzzles, which consist so largely of guessing, the art of Puzzling as Mr. Pryor knows it and will explain it, has in it only so much of guesswork as to lend to it that elusive yet fascinating element of chance. The groundwork is based on constructive thinking and research, which lead one on into more and more perplexing mysteries, and which, in their solving, contribute a substantial addition to one's store of words and knowledge in general, and sharpen mental acumen.

But read Mr. Pryor's own story. It will carry you along in so interesting a way that you will be sorry when it is ended, and anxious to get out paper and pencil not only to solve the simple puzzles that he gives but also to write and tell him that you want to join the Baltimore and Ohio Puzzlers' Club.—Ed.

Dear Readers:

How many of you have ever made or solved a "word" puzzle? Huh! What's that? You ask what is a word puzzle? Well! Well! I have been getting so much pleasure, yes, real fun, and so much profit in the shape of an enlarged fund of knowledge, out of playing with word puzzles for many, many years, that I clean forgot for the moment that everybody else in the world was not familiar with the game. So I will try to tell you something about the art of puzzling—for it is a real art, even in the beginning, and the further you advance the more artistic it becomes and the greater the knowledge of English words, including literature, geography, biography, the arts and sciences you acquire.

Records indicate that word puzzling has been a source of pleasure and profit to the human race since well before the time of Solomon. It came down through the ages in rather a

disconnected, disjointed condition and it remained for America to finally put the art on a systematic basis. Puzzling was a flourishing art in the United States 50 years or more ago and various organizations were formed to foster and advance it, but, because of the scattered locations of the really good puzzlers, these organizations sooner or later went out of existence. However, about 30 years ago there came into existence an organization, now known as the National Puzzlers' League, which has done wonders in bringing this grand old game to a very high plane. The National Puzzlers' League contains on its roster the names of many prominent men and women of America; for instance, James M. Beck, solicitor general of the United States at the present time, is a puzzler of long standing and very proud of the fact. In addition there are lawyers, bankers, ministers, newspaper men, merchants and just ordinary working people, like you and

me, who are members of the league and who derive unlimited pleasure and benefit from the connection.

The league supports a monthly publication called the *Enigma*, which is devoted exclusively to puzzling, and in this periodical are published the highest examples of the art.

Building up Your Vocabulary

However, I take it that many of you have had little experience with this subject so I am going to begin at the beginning and see how many of you will develop the patience necessary to ultimately become real top notch, high grade puzzlers. From my own experience I can guarantee that a few hours devoted each month to either building or solving puzzles will develop your patience, as well as your mental acumen, to a remarkable degree, and will help you vastly in solving the problems of every day life. In addition to this, it will make you a better thinker and a better talker, and I really believe if this art were added to the curriculum of our schools it would help students vastly in all their other studies. So with these preliminaries let us get down to the meat in the cocoanut.

Two Kinds of Puzzles

There are two kinds of puzzles recognized by the experts, the first called "forms" and the second called "flats." Let's talk about "form" puzzles first. A "form" puzzle is a combination of words arranged in some geometrical form, such as square, diamond, star, rhomboid, pyramid, etc. with the letters of the words forming the same or other words reading in another direction. Now that may sound a bit complicated but, as a matter of fact, it is really very simple, as a couple of illustrations will show. For instance, here is a five letter square, so called because the words composing it are made up of five letters each:

R	A	I	L	S
A	N	N	A	L
I	N	A	N	E
L	A	N	D	E
S	L	E	E	K

Do you notice how the first word at the top is duplicated in the first column reading from top to bottom? And you find the same thing with the second word across and the second column down and so with the third, fourth and fifth words. Squares may be made of words of any length up to the limit of your ability. The experts are now making nine-letter squares with regularity and only recently the very first ten letter square was published in the *Enigma*. But it is best to begin with a square of about five letters which may be readily composed out of the New Standard or the New International dictionaries, and without the necessity of searching through any other books, and this advice is good for any of the other puzzles which I may describe.

Now the game is this: one puzzler builds, let us say, a square, and he defines each word in that square, and sends it to the editor, who publishes the definitions only. From these definitions other puzzlers endeavor to reconstruct the square just as it was built by the maker and if they succeed they have solved the problem. In defining the puzzle never make up the definition "out of your head." Always look in your dictionary and copy the definition given there, because, if you use your own definition you will find it often at variance with the dictionary definition which should always be the standard. If I were going to send the above square to the editor for publication I would define it as follows: 1—Tracks on which railroad cars run; 2—The record of a single year; 3—An empty space; 4—A level sandy region, unfit for cultivation; 5—Smooth and glossy. These definitions would be what the editor would publish and from them you would endeavor to find the words to reconstruct the square. In doing this you would run across the fourth word "Lande." Now right here in this little square many of you would have acquired a new word because "lande" is a word that is not used in every day business but still it is a perfectly good dictionary word and you would some time, some place, undoubtedly find use for it in your daily work.

Here is a seven-letter diamond, so called because the center word is constructed of seven letters:

H
S A D
S I N E W
H A N D C A R
D E C O Y
W A Y
R

You will notice, reading from left to right, the word "sad" is in second

position and, reading from top to bottom, the same word occupies the same position, and so with the 3rd, 4th, 5th and 6th words. This puzzle would be defined as follows: 1—A letter; 2—Sorrowful; 3—A tendon or fibrous cord; 4—A car that is worked by hand; 5—To entice; 6—A road; 7—A letter. The experts have constructed diamonds with fifteen letter center words while this form with thirteen letter center words is very common. But these same experts will tell you that they had to begin by building five and seven letter diamonds before they succeeded in reaching their present eminence.

Here is a rhomboid:

W A T E R
S I R E N
E O L I C
S I N U S
C E R I N

Unlike the square and the diamond, the rhomboid doesn't read the same from left to right and up and down because the very form of the puzzle itself doesn't allow this. While the "left to right" words are all of five letters, the "up and down" definitions vary from a single letter to a five letter word; therefore, this puzzle has to be defined two ways as follows: First, reading from left to right: 1—a colorless, limpid, liquid compound; 2—a mistress of song; 3—the language of the Eolians; 4—an opening or cavity; 5—a crystalline compound, contained in cork. Second, reading from top to bottom: 1—a letter; 2—a bronze coin of Rome; 3—to bind; 4—the god of love; 5—that which has been preserved from decay; 6—the players forming one side in a baseball game; 7—a mongrel dog; 8—in music, the seventh note of the diatonic scale; 9—a letter. Now this rhomboid is not a hard puzzle to either construct or solve, yet I will guarantee it contains two or three words that are actually new to most of you. For instance, how many of you know that "as" is the name of an old Roman coin; and how many can recall that "Eros" is the old mythological god of love. Then again how many would describe "water" as "a colorless, limpid liquid compound," but that is just actually what the dictionary says it is and the dictionary definitions are based on scientific knowledge.

In defining puzzles you will often find in the dictionary two or maybe twenty-five different definitions for the same word. It is necessary to give only one of these definitions and you may select any one that strikes your fancy.

In solving form puzzles a good way is for the beginner to set the form

down on a piece of paper, using a dot to represent each letter. It is not necessary to find the word representing the first definition first. Go over the definitions and try to find as many of the words as you can and set them down in their proper positions in the form you have dotted out on your paper. Then by looking at the combinations made by the letters of the words you will find you will often get the clue to the other words.

If you don't own, or cannot buy, a dictionary of your own, undoubtedly some friend possesses such a treasure; and, if not, your public library is sure to supply the deficiency. I know of no amusement so alluring on the long winter evenings as building and solving puzzles, altho the real genuine dyed-in-the-wool puzzler doesn't cease activities during any season of the year but finds his enjoyment during all the twelve months. The editor of the Baltimore and Ohio MAGAZINE thinks that many of its readers might become interested in this game and that is why I am putting the subject before you. To see just what interest there may be I am going to set down the definitions of three puzzles, the answers to which will be published in this magazine for the month of May. Try your hand at solving these and also try to build some like them. Send your answers on a separate sheet of paper, writing on one side only, to George H. Pryor, Auditor Disbursements, Baltimore and Ohio Building, Baltimore Md., and send in puzzles you may build to the same address. In sending in new puzzles put only one puzzle on a sheet, putting your definitions at the top and the answer at the bottom. Sign your name and address to all communications as the Editor will want to give credit to all those who solve as well as to those who build.

Next month we will explain about the "flat" puzzles, which consists of charades, anagrams, beheadments, curtailments, cross-word enigmas and puzzles of that character which do not require a dictionary in either their construction or solution. In the meanwhile see which of you can solve the following:

A Square

- 1—The smoked flesh of the hog, especially the back and sides;
- 2—A home;
- 3—The palm tree that produces cocoanuts;
- 4—Odor, as spelled in England;
- 5—Approaches.

A Diamond

- 1—A letter;
- 2—A little child;

(Continued on page 17)

Laying New 130 Pound Rail with Locomotive Crane

By E. G. Lane

Engineer Maintenance of Way, Eastern Lines

OWING to the limited life of the steel rails heretofore used on Main Line Divisions of the Baltimore and Ohio, and known as the 100 pound A. R. A. B. Section, it was decided by the Management to purchase a heavier section of rail, weighing 130 pounds per yard, for use on the Philadelphia Division, which carries a dense freight, as well as the fastest passenger traffic.

As a further test on a district having dense freight traffic, the heaviest curvature and grades, the 130 pound per yard section of rail was laid on parts of the Cumberland and Baltimore Divisions.

With few exceptions rail renewals on main tracks have been done by trackmen without the use of mechanical aids. Because, however, of the increased weight of rail to be handled, and in order that the new rail might

be laid with the least possible interference with train operation incident to renewals (with the consequent expense due to delays in traffic) it was decided that the labor gangs on the Philadelphia Division should be supplemented by the use of a locomotive crane to handle the rail, and to single line traffic during the working hours while laying rail. It was recognized that by so doing, the delay to traffic could be minimized by proper dispatching of trains and delay to the rail gang averted, as it would not be necessary to make temporary track connections for the passage of trains during working hours. Further development and utilization of mechanical devices and equipment were employed in the distribution and laying of the new rail and in picking up the old rail released.

Rail Data

The new rail, as approved by the American Railway Association, measures 6 inches across the base, $6\frac{3}{4}$ inches high, and each rail is 33 feet in length.

It is interesting to know that in 1834 the rail used on the Washington Branch was of the general shape of the present day rail but weighed 40 pounds per yard. (See accompanying sketch.)

It was decided to follow European methods and cant the rail toward the center of the track, 1 in 20, so that the top surface of the head of the rail will afford uniform bearing for the tread of all motive power or car equipment wheels. The canting is accomplished by the use of tapered tie plates, two to each tie, one being under each rail.

The new rails weigh 1,430 pounds

Upper left shows old rail thrown out and rail clamp just released from new rail set in place and being set to gauge at each end by the gauge man and spikers, with crane ready to move ahead over new rail just set in place. It will be noted that with the 60 foot boom used on the locomotive crane there is ample room for men to work ahead of the crane.

Upper right shows Susquehanna Bridge, all material, usable and scrap, having been picked up by gang No. 5.

Lower shows the preliminary setting of tie plates at quarters and center ahead of the crane, by starting the spike after new plates are placed. This acts as a guide for locomotive crane crew in setting new rail in position laterally so that it does not require further moving, except to a very slight extent in spiking to exact gauge of 4 feet 8 $\frac{1}{2}$ inches.

Comparative Rail Sections, (exact size) showing the development of rail on the Baltimore and Ohio. 64 lb.—67 lb.—100 lb.—130 lb.—75 lb.—40 lb. U Rail.—85 lb. Note: 40 lb.—U Rail, first rail rolled in United States. Rolled by Baltimore and Ohio Railroad Company

each. The crane is used in lifting them into place from a position beside the existing track, after the old rail has been lined out to one side. This relieves the men of the heavy lifting, insuring better working conditions and lessening personal injuries.

Maintenance Program

In conformity with usual practice a program for rail renewal was submitted and approved, giving the location by miles and hundredths, with designation of east or west bound track, within which limits the rail was to be laid.

Working Program

Studies were then prepared by the

division and approved with respect to preliminary distribution of material, which approximated 250 tons per mile of track, the number of men to be assigned to various labor gangs, the additional small tools required, the work to be done in detail by each signal and track gang when once under way, the source of supply of foremen and labor required, their transportation to and from work, their housing in part, the number of locomotive cranes, cars and work engines required for laying rail, the picking up of unused and released material, and proper time distribution of all labor so employed.

Single Line Operation

A feature of the study as prepared and approved, included the installation of temporary crossovers as required, by means of which all trains, during working hours, as specified by a general order, were operated over one of the two main tracks not occupied by rail gangs. The operation of single line was under immediate charge of a transportation representative on the ground, detailed for that special purpose. The single line operation generally covered the period between 7.00 a. m. and 6.00 p. m. The length of single line sections between crossovers varied

from one to less than six miles. Few delays resulted and none of moment.

Preparatory Work

Certain preparatory work was done. All new rail, spikes, angle bars, plates, nut locks and anti-creepers were unloaded at approximate point of usage one or more days previous to that upon which rail was laid. The rail was placed alongside the existing track and so spaced as not to require shifting endways; the other track material was distributed so as to require the minimum carry to point used.

Procedure in General

The daily operation of laying 130 pound rail is described in general as throwing the old rail out with bars and setting new rail in place with the locomotive crane, the handling being substantially limited to a lift of 15 to 18 inches and swinging sideways into position and laying between two points. This represented the work accomplished during the first half of each day worked. The crane and rail laying gang then remove to the starting point, and during the latter half of the day, lay the opposite rail to the point where work was discontinued at dinner hour, thus avoiding the necessity of carrying more than one rail length of the 100 pound and 130 pound rail opposite, during the night following, as they are of different height.

In closing for the night, proper compromise bars, or special steel shim plates, fully spiked and bolted, and run-off as required by Book of Rules, are provided for resumption of traffic at normal speed during the night or until work of relaying is resumed at that point.

Field Organization

The organization was divided into five gangs. Each gang was subdivided into units and each unit did certain specified work.

The organization used in general is given in the following:

	Foremen	Men
1. a Pulling spikes	1	15
b Lining out old rail	1	6
c Attaching two angle bars to forward end of rail	1	
d Removing old tie plates by hand or coal pick and starting tie plugs in	1	
e Driving tie plugs and adzing down ties which showed mechanical wear, sweeping of bearing for seating new tie plate	1	18
f Distributing and placing new tie plates in approximate position and gauging quarter plates to place and starting two spikes as a guide for placing rail		6
Total	3	47

	Foremen	Men
2 a Locomotive crane	1	1
b Crew for crane handling rail clamp, setting rail in place, spiking quarters to gauge and placing expansion shim as each rail is set in	1	11
c Night watchman	1	
Total	2	13
3 a Distributing angle bars and bolts to point of usage	1	3
b Placing angle bars with one bolt partly drawn up		2
c Completing bolting		20
d Distributing spikes, two to each tie at point of usage		2
e Spiking quarters and centers to gauge	1	9
f Full spiking to gauge		18
g Distributing and placing anti-creepers, four to each rail	1	5
h General foreman	1	
Total	4	59
4 a Distributing bond material	1	
b Drilling rail for bond wires, eight drilling machines (hand)		8
c Applying Bond Wires	1	2
Total	1	11
Grand total, covering the process of disconnecting, taking up and throwing old material aside, and applying new material complete ready for operation of trains at normal speed	10	130

Cleaning Up

In order to complete the process of laying new rail and accessories as described in the preceding, the picking up of all usable and scrap material so removed is necessary, because of its value to the Company as an asset for reuse elsewhere or for disposal by sale, the authority for which is issued, when deemed desirable, by the Purchasing Department, upon advice as to tonnage available, and also in order that the right of way may at all times present a clean and orderly appearance.

Completing the Job

The picking up of old material is accomplished by assignment of a work engine and crew, an air rail loader and the number and kind of cars specified in request to the superintendent, made the previous day.

The schedule, which provides for the picking up of the old material, immediately following gang No. 4, as given in the preceding, is as follows:

	Foremen	Men
5 a Uncoupling old rail, salvaging insofar as possible all bolts for future use	1	24
b Work train with aid of air rail loader or a second locomotive crane picking up rail removed from track, separating by loading into separate cars; rail not requiring cropping or sawing off ends; rail requiring sawing off		

ends which is done at Martinsburg, W. Va., Maintenance of Way Shop, and reconsigned for use relaying main track rail on less important lines of other divisions as predetermined by approved budget authority for the year

Rail to be used in relaying side tracks only	1	3
Rail to be scrapped as unfit for further use as such, to be disposed of by sale on authority of the Purchasing Department		
c Picking up and loading into separate cars all usable and scrap tie plates, bolts, spikes, angle bars, nut locks, etc.	1	10
Total	3	42

Unit Costs

The unit cost per ton of rail or per mile laid, has been variable, due to local physical conditions of track worked over. This has been evidenced by necessity for heavy adzing where percentage of pine ties was greatest, by character of labor, part of which was untrained to track work when first employed, and by changes in organization found necessary as work progressed.

Approximate cost of laying 130 pound rail per eight hour day by method described, using 10 foremen and 130 laborers, exclusive of distributing and picking up material, was \$490.00; per ton of new rail laid \$2.40.

Laying rail with locomotive crane is rapid as compared with hand method, personal injuries were reduced to a minimum, the interference with trains as a result of single track operation was negligible and the progress averaged somewhat in excess of one mile of track laid complete each working day.

Source of Large Labor Gangs

The labor supply was secured from:

1. Sections adjacent to the work and largely trained native workmen.
2. Extra gangs in camps at:
 - a Aikin, Md.—Camp building.
 - b Aikin, Md.—Camp cars.
 - c Joppa, Md.—Camp building.
 - d Leslie, Md.—Camp building.
 - e Newark, Del.—Camp building.
 - f Daily shipments by train from Baltimore.

g Daily allotments by train from Newark and Wilmington, approximately 50 per cent. of whom had no previous training as track men when employed.

Boarding of men in camps was looked after by the men individually, with fair results as to equipment, sanitation and adequacy and quality of food.

Other Possible Mechanical Adjuncts

A further use of mechanical tools to expedite and economize in rail renewals for 1922, is contemplated by the use of pneumatic power wrench for loosening bolts on rail removed and tightening bolts on new rail, as laid. Also the use of power drills in bonding new rails laid in automatic electric signal territory. It is deemed possible to accomplish this by utiliz-

ing a portable air compressor mounted on trucks and self-propelling, of the type usually assigned to section gangs for mechanical tamping of ties. The substitution of this device would release approximately 20 men for other work.

It is expected that this plan will be followed on more than one division of the Eastern Lines in this present year.

Help Find Morris C. Sparks, Former Employee, Who Has Been Missing Since December 9

MORRIS C. SPARKS, age thirty-five, six feet in height, weight one hundred and sixty-five pounds, dark hair and eyes, was last seen about six o'clock on the morning of December 9, 1921, in Pittsburgh, Pa., where he was employed as superintendent of the Vang Construction Co. in the construction of the 16th Street Bridge.

Mr. Sparks was clad in working clothes, consisting of a dark grey suit, knee high arctics, slouch hat, long heavy brown overcoat. No money was in these clothes, as money was found in pocketbook in his good clothes. He had been up several times during the night looking after the completion of an important piece of work which he proposed to have done in time for the morning shift. At about 6.00 o'clock that morning the work was finished and he said goodnight to the night superintendent and returned to his house boat about one hundred feet away where he changed his clothes and put on his working clothes, and it is supposed that he was preparing himself for meeting the day shift and giving them instructions as to how to proceed with the day's work.

He was First Sergeant, Headquarters Company, 313th Infantry, and was gassed in a battle in France. Upon his return to this country, he suffered from nervousness and depression, resulting from being gassed, and it is possible that he suffered from temporary loss of memory, and in this condition wandered off. He can be identified by tatoo marks—an Elk head on the right arm and a truss span bridge on the left arm.

Prior to going to Pittsburgh to take charge of the construction of the 16th Street Bridge, Mr. Sparks was in charge of the work on our Bridge 19-95 over the Big Miami River at Lawrenceburg for the Vang Construction Company. This bridge was

completed and the plant and organization moved to Pittsburgh for use on the 16th Street Bridge. Prior to going in the army for service in the World War, he spent 10 years in the service of the Baltimore and Ohio Railroad Company—Engineering and Maintenance Departments—on construction and maintenance work.

Search is being made for him through the Veterans' Bureau of the Government, by the Elks and through other agencies.

The Vang Construction Company has offered a reward of \$500.00 for any information which will lead to locating him.

Any information concerning his whereabouts will be thankfully received by his brother, E. R. Sparks, care Chief Engineer, Baltimore and Ohio Railroad Company, 1302 Baltimore and Ohio Building, Baltimore, Md.; Mr. William P. Sullivan, Secretary, B. P. O. Elks No. 470, Frostburg, Md.; or The Vang Construction Co., Cumberland, Md.

The missing former employee,
Morris C. Sparks

The Money to Buy a Home Is Not Missed

WHEELING, W. VA.

November 21, 1921.

MR. W. J. DUDLEY, Superintendent, Relief Department, Baltimore, Md.

Dear Sir—This will acknowledge receipt of your letter of November 19; also release of deed of trust given by myself and wife to secure a loan from your department.

In the past eight years I have purchased two homes with money borrowed from the Relief Department; both have now been repaid in full and I have a clear title for the property. Will say that I think the Baltimore and Ohio Relief Department's plan for assisting employes in purchasing homes is the best plan, as the loan is paid in monthly installments by deduction from wages, the same as paying rent, and is hardly missed.

I desire to take this means of thanking the Relief Department for so materially assisting me in purchasing and paying for a home.

Thanking you for past favors, I remain,

Yours very truly,

(Signed) CURTIS HIGINBOTHAM,
Conductor, Fairmont, W. Va.

Transportation Catering

from a Baltimore and Ohio Point of View

by E. V. Baugh
Supt. Dining Car Dept.

The upper and lower pictures on the left show Dining Car Steward J. M. Templeman ready for action and in action.

The center picture, well—doesn't it just look good enough to eat!

Why Is a Dining Car?

OUR Dining Car Department is not operated as an advertising feature. If this were its purpose its cost could be better used through other channels, reaching more people and covering a larger field. Nor is it operated from necessity, for we could provide eating accommodations at convenient points which would, perhaps, at least pay expenses. This statement suggests that it is not operated primarily to make money. The fact is that it does not make money but is run at a loss.

The one big reason that we have a Dining Car Department is because we want to be hospitable to our patrons in all respects—to make them feel the comfort, convenience and homelike atmosphere of our accommodations as soon as they step on our trains. Hence we provide inviting dining cars and first class equipment for them; silverware that is pleasing to handle, linens that always suggest immaculate cleanliness, and an attractive grade of china that is suitable to the needs of the service.

Works Efficiency

And back of this show window which attracts the patrons of our cars, are the real works, the kitchens with their broilers, steam tables, ranges, pantry and storage facilities. These, in their compactness and convenience, are a veritable symphony of efficiency. Of prime consideration is the question of sanitation, every effort being made to keep all supplies in the freshest and most wholesome condition possible. Here the refrigerators play the big part—machines that are the ultimate in the development of cold conservers of fresh foods.

Note—Whether greeted by a smiling steward on entering a dining car after the dinner call, or enjoying the aroma of the pre-breakfast and hospitable acemittasse, the ordinary traveler is often beset with one or more angles of the query "Why is a dining Car?"

He is hungry, but notwithstanding the fact that dining car prices in general compare very favorably with those in first class restaurants and hotels, he often thinks, just because he is on a train, that the price of the satisfaction of the inner man will be prohibitive—that is, unless he has had experience on the Baltimore and Ohio.

In a recent issue of the Magazine we reprinted a newspaper article to the effect that it cost about half a dollar for every person served in a first class railroad dining car, before one penny was included for the actual cost of food. In another article we mentioned the fact that the cost of a first class dining car is about \$60,000. To those familiar with such facts as these, all of which have a direct bearing on the general operating costs of a dining car department, the question "Does the Dining Car Department pay its way?" is a very pertinent one. And it is to such questions as this one that Mr. Baugh asks the attention of our readers in this article.—Ed.

Food Sources

The Baltimore and Ohio and its Dining Car Department are fortunate in the food supply sections tapped by our lines. The productivity of the Chesapeake Bay region for the most succulent and delicious sea food, is of national repute. Fortunate indeed is the oyster lover or the epicurean with a fancy for fish, when he picks up a Baltimore and Ohio menu, especially when in the vicinity of the Chesapeake. The bivalves are served in more than a dozen different ways, and a special effort is made to select the finest grades and to anticipate the season with other delicacies—soft shell crabs, shad roe and the like. Maryland is also famous for her truck gardens with their fresh vegetables, and for her strawberries and raspberries, whose unusually fine flavor makes dishes fit for a king.

But there is no section too far away to make it unavailable for our commissaries. Experienced buyers comb the markets to get the best everywhere and quality is their constant watchword.

Handling Supplies

Three storerooms are conveniently located on the System, to keep our cars supplied with the freshest products possible, and to avert the possibility of any staleness in the foods served. The men who operate these storerooms, and who handle the cars—the commissary men, cooks, pantrymen, waiters and stewards, are carefully selected men of experience who are required to be neat, clean and physically fit at all times. We also have three assistant superintendents, three inspectors of service and one travelling chef. These are constantly riding the cars, improving the service where that can be done and constantly inspecting the food, menus, etc.

The Service

The standard menus, such as the a la carte and the regular table d'hôte bills, are prepared in the home office. The special "today slips" are prepared by the stewards in consideration of such factors as the weather, the season and the source of supplies—men of experience who have become noted for their courtesy and constant desire to please. All menus are prepared with the primary thought of giving substantial portions at moderate prices, prices which now bear favorable comparison with pre-war prices and which will be reduced as costs permit.

Passengers who have had experience with the Baltimore and Ohio special dollar and a quarter meal often remark that the same variety and

quality of food would cost twice or more the money in a first class restaurant. It probably would. Folks who go into fashionable eating places apparently don't mind the price. When they are on trains, eating, important as it is, is but an incident of the trip, and they are not in the same generous mood as to expenditure as they are in the restaurant. Funny, but true, and it is a part of the job of operating the Dining Car Department to discount just such peculiarities as these and to keep everybody happy.

Then that Commercial Traveler's Meal at 75 cents! I venture to say that no type of meal on any dining car in the country has met with the enthusiastic approval of the public to the same extent as has it. A compact

yet tasty-looking platter service (a big platter in convenient sized compartments for the various dishes), consists of a meat or fish order, two vegetables, a salad, dessert, bread and butter, and any one of tea, coffee or milk. This has made a trip on the Baltimore and Ohio of many a person with a limited income a satisfying gastronomic experience, where it might have been a strain, either physical or financial. A good many employes of the Railroad, who travel a good deal and whose expenses are necessarily limited, have told me that this meal has been a great boon to them, its quality being first class and its quantity being ample. After having had experience in small town restaurants, I think I know what they mean.

Waiter Edward Torrance in the upper picture won't have to wait long for a customer. Backed up by an appetizing array of goodies the Storeroom force in the middle picture is from right to left, Chief of Commissary John J. Paulus, Commissary Porters Arthur Jackson and William J. Smith, Commissary Clerk Allen J. O'Mara, Porter David A. Fairfax, Commissary Clerk Albert J. Becker, Assistant Commissary Chief C. A. Lochboehler and Porter William H. Davis. In the lower picture Inspector Joseph J. Reiser (how would you like to be a dining-car model IN ACTION?) is too busy eating to even notice our attentive waiter, John Dowell, at his side

Baggage Service

A traveling salesman might just as well stay home as arrive in the city of his customers and be without his samples. His baggage must be there!

By C. H. Frederick, Chief Clerk, General Baggage and Milk Department

HAVE you ever checked your grip to a distant city to which you have been going and, on arrival, found that grip and its contents, including the change of clothes that you expected to wear to the party of the evening, had not arrived. Embarrassing moment, to be sure, not alone as the unfortunate passenger, but as we baggage folks who have to straighten out such tangles, can attest. Which suggests the fact that no matter how beautiful the scenery en route, the courtesy of the trainmen, the comfort of the ride and the satisfaction of the meal in the dining car, the trip will be spoiled if the baggage department people fall down on their job.

The Development of Baggage Service

Just as the first train was the development of transportation a step further on (though a big step) from the stage coach, sail and canal boat, so the first train baggage service was but a step up from the kind of baggage service that had been given on these now antiquated carriers. Space was at a premium on the old stage coach and the traveller was forced to limit his wardrobe to a very few of the most necessary articles of personal comfort and adornment.

Originally baggage was handled only "locally" on the railroads and consisted principally of the old time carpet bag or the small solid leather trunk of a century ago. Railroad space for baggage was also at a premium, and the big suit case, kit bag and wardrobe trunk have come into use only with the development of the modern train with its spacious cars, coaches, Pullmans and baggage.

The Chalk Mark

There are perhaps still a few of the old time employes of the Baltimore and Ohio who remember when a mere chalk mark, placed on the article of baggage by the receiving agent, was the only identification record, and that upon it depended the carriage of the baggage from origin to destination and its proper delivery to the owner. There was no systematic record whatsoever made. And yet, so comparatively few were the travelers, so small their luggage, and so short the normal distances they had to travel, that we are forced to the

conclusion that the "system" was probably more or less satisfactory.

The Brass Check

Hand in hand, then, went the unparalleled development of the country and of its railroads, sometimes the one and sometimes the other, being a step in the lead. And with the consequent increased travel, and a new phenomenon in the person of the traveling salesman with his big sample trunks, came the need of a more reliable baggage service. This was met by the adoption of the heavy brass baggage check which was fastened to the trunk or bag by the heavy leather strap, and the duplicate of which was carried by the passenger. This was thought to be perfection and was the standard method used up into years so recent that many of our present baggage men can recall it.

Frequent mismatches of the checks resulted from this system, however, and the General Baggage Agents' Association conducted numerous experiments which finally resulted in the adoption of the paper check. It was at first thought that the paper check would be much more expensive than the brass, but it was found that it resulted in an actual economy both in cost and labor. The cost of the brass had risen considerably and the stripping and matching of the old check required a good deal of time. Besides this the paper check was more convenient and sanitary and there were other advantages in addition to the fact that people liked better to handle the new check.

The Paper Check

Let us recall here that most of the present day methods are the result of the thought and study of the pioneering baggage agents, now gone. Although in their time each of the railroads had its own method of handling baggage, there was some effort towards uniformity, but it hardly reached a reasonable consistency and had competitive disadvantages detrimental to the roads. Realizing this the General Baggage Agents' Association started a movement towards uniformity, which led to the formation of the National Association of Baggage Agents in 1882. And it is this association which has studied the problem of handling baggage and to

which credit is due for the efficient methods now in effect and which are so satisfactory to the traveling public.

What the Public Expects

The public does not, however, appreciate fully the great convenience and efficiency of baggage service. Its very smoothness of operation is a cloak which masks the carefully worked-out and, at times, elaborate system. The New York society woman who sends a half dozen big wardrobe trunks and some smaller baggage from the metropolis to, say, San Diego, California, probably never gives a thought to the utter convenience and safety of the service. Nor does she recall that, except for the small charge for extra weight, the service is gratuitous. It is only when a mistake occurs that people even think seriously of the baggage part of travel—and then, unfortunately, it is their proper prerogative to criticize rather than to compliment.

Which brings us to the point that despite constant watchfulness and careful supervision (and especially on the part of the baggage department employes of the Baltimore and Ohio, a real desire to give the best service), mistakes do happen. "Crossing checks," for instance, causes a great deal of trouble in straightening out, and often results in some distressing predicaments. Imagine the well-to-do and newly married couple arriving on a glorious tropical winter's day at Palm Beach, and finding trunks which look like theirs but which contain, instead of the wardrobes for these vacation beaches and hotels, the unpleasantly practical samples of kitchen ware in a drummer's trunk. It brings post-humorous realities too quickly to the attention of the bride. The drummer on the other end may present a more interesting picture as he gazes with mixed emotions on the fetching trousseau, but it doesn't help his commissions for the month along to any great extent. And in either event the result is the same to the carrier—trouble and trouble a plenty, with lost patronage and mighty poor advertising. Neither a bride just returned from her honeymoon nor a traveling salesman has the reputation for being exactly reticent.

Other mistakes that have been made in carrying baggage have brought much more serious results in their train. Important documents that have been delayed carelessly in rail transit have caused the postponement of important trans-oceanic missions, while other disappointments of comparable seriousness will suggest themselves to the reader.

Cheerful Courtesy of Prime Importance

To err, however, is only human. And we all live in glass houses when we throw the stone of criticism because of the other fellow's mistake. A man does not get to handle the important job of baggage agent—certainly does not hold it—unless he gives unmistakable evidence of his interest in his work, his carefulness and ability to handle his task. One

thing that is insisted on in this department above everything else is courtesy to the public. The Baltimore and Ohio has adopted the meaningful slogan in its passenger business "Our passengers are our guests," and it is the invariable rule of our baggage service that this shall be lived up to in its finest spirit on the Baltimore and Ohio.

Careful handling to prevent break-

age and damage, intelligent and prompt dispatch of all transactions, and a constant spirit of cheerful courtesy in answering inquiries or complying with requests of the passenger,—these are the maxims of the employees of this department. And to them goes a full measure of appreciation for what they have done and are doing to live up to this high standard.

Upper-left: A busy day at the baggage desk at Camden Station, Baltimore, where courtesy counts so much in making pleased passengers. Right: "Twenty-four hours of safe-keeping for a dime"—a convenience greatly appreciated by travelers. Lower-left: The old time carpet bag and trunk, with the old time brass check and strap. Centre: Train Porter Chase, one of the oldest and best, easing a heavy load for the young lady. Right: The modern wardrobe trunk and sanitary paper check

Passenger Department

Will You Help Put Passengers on Our Trains by Putting the Suggestion in a Show Window?

READERS of the MAGAZINE will recognize in the center of the accompanying window advertising our passenger business, the picture which was originally used as the cover of our February issue, President-elect Lincoln arriving in Washington on the morning of February 23, 1861, preceding his inauguration. This was used during the week of February 12 in one of the beautiful windows of the dry goods house of O'Neill and Company in Baltimore, a window which is probably passed by as many, if not more people than any other window in the city. Flanking it are framed photographs of scenery along the Baltimore and Ohio, time tables and advertising literature and the luggage accessories of travel.

Although displays as elaborate as this one can probably not be obtained by the Railroad in many large cities on the Baltimore and Ohio, the same idea can be carried out in practically every town which boasts a good dis-

play window in any store. We recall here the picture of the drug store window in Keyser, W. Va., similarly dressed, and arranged through the initiative of H. B. Kight, ticket clerk at Keyser, and correspondent for the MAGAZINE there.

The Railroad is now making a drive to interest the traveling public in the charm and importance of Washington as the first shrine of patriotism in the United States. The subject is being covered in national advertising, supplemented by drives among the school teachers and pupils in those sections of the country most likely to produce tourist business to Washington.

It requires only some ingenuity and interest on the part of agents and representatives of our Passenger Department in other cities along the line to arrange for window displays similar to this. Can't we have more of them? The MAGAZINE will be very glad to publish pictures of this kind which are submitted.

Jacksonville All Expense Tours

PERSONALLY conducted all expense tours to Jacksonville, Fla., have been operated from points west of the Ohio River via Washington, Baltimore and Merchants and Miners Transportation Company Steamers.

The first tour, scheduled to leave western lines territory January 1 and 2, arriving at Jacksonville January 7, was in the nature of an experiment and was also intended to give patrons an opportunity of seeing Washington enroute to Florida.

A small display advertisement was inserted in the newspapers and a moderate itinerary issued. After one or two insertions of the advertisement the responses were so numerous and requests for space so extensive that all available accommodations were quickly disposed of, making it necessary to withdraw all advertising and arrange overflow tours to take care of the many reservations received.

Consequently, instead of one tour, several more were arranged for during January, with the result that all available space on steamer for the second and third tours scheduled for January 9 and 12, was readily disposed of without additional advertising, indicating that the route through Washington, Baltimore and

The Lincoln cover picture of our February issue was the center of this attractive travel window arranged for the Baltimore and Ohio through the courtesy of O'Neill and Company of Baltimore

via steamer is a popular and attractive one.

Additional tours were also scheduled for each Tuesday and Friday during the balance of the month of January with similar success.

The all expense plan included round trip transportation going through Washington and Baltimore,

has taken such great pains and has been so very accommodating and has gone very far beyond that which is expected of men in his position, and through his advice I have secured exactly what I desire.

"I must say

Jacksonville all—expense parties of January 13, 17, 20 and 24, taken in the shadow of the Nation's Capitol

thence steamer to Jacksonville, returning via all rail direct, berth in sleeping car to Washington, sight seeing trip at Washington, parlor car seat Washington to Baltimore, all meals enroute to Jacksonville, stateroom accommodations on steamer and a one day stopover at Savannah, enroute from Baltimore to Jacksonville. The return portion of ticket was limited to May 31, 1922, thus giving those taking advantage of this tour an opportunity of spending the winter months in the South, returning from Jacksonville at any time to suit their own convenience within the final limit of ticket.

The success of these tours insures a repetition for future winter seasons.

Smiles from Passengers

HERE are a few culled from hundreds of letters recently received from passengers unusually pleased with our service:

"I had considerable trouble in obtaining what I desired in the way of transportation for myself and family from here to San Francisco, sailing for the Philippines, I desired to go by a certain route and secure certain stop-offs, which, I was informed by all other railroads, could not be granted. None of them took the trouble to ascertain whether or not they could be granted, except your representative, who

that a man of his satisfactory manner of dealing with the public is seldom met. On account of his courtesies and his painstaking work in securing for me what I wanted, I think it is only my duty to call this matter to your attention."

* * * *

"Having just returned from a trip to Chicago over the Baltimore and Ohio, I feel constrained to put in writing my appreciation of the service rendered your patrons in your dining cars.

"I feel that the Steward on Train No. 6, is entitled to particular commendation for the efficiency of service in his car."

Safety Section

"Evrybodie Is Sure Goin Fast," Writes Engineer Harry Franks to His "Brother Bill"

By Harry Franks,
Engineer, Dayton, Ohio

DAYTON OHIO,
February 8, 1922.

Dere Bro Bill—

Thout wud rite you fue lins fer I kno you are speektin anser as 2 how I am getin along in this big citie. Wel bisnes wuz a bit bad fer a spel but it is goin good now, and looks fare to stay. The stranger in Dayton is impresed by the grate no. of rale rode tranes and autos, speccally if you are nere a railrode krossin.

They hav 2 big hospittals here, and they say they are chuk ful most the time with pepel wot get run into and run over, but it dont make any the les pepel or masheens from the pearance of things, evrybodie here is sure goin fast, the things they do fastest the most is sleepin, eatin, workin, laffin, motring and dying. Wen you kome up here nex sumer Ill pruve wot I am ritten fer ever thing is the same here winter or sumer they never slow down, and everbody semes 2 hav spead fer brekfast, diner, and super, and they dont pere 2 kare how long it lasts.

There is 2 klases of mekaniks here wot never komplane, no matter how hard worked, and fer fere you wudnt gess rite Ill naim them, dockturs and undertakers.

Everbodie is playin the game here, that is, seing how klose you kan kme 2 bein kild and not dying. Ive ben a winer so fer but you kant go 2 slepe or you luse.

You hardly ever here of any 1 here komiting sooiside, stead o turnin on the gass they walk down town and go krost a strete or 2.

I wuz standin nere a krossin wot the rale rode runs over a day or 2 ago a watchin the auto fellers racin with the tranes. It sure wuz some game and I stood tryin 2 figger out how they spected 2 win over sech odds, but wile I wuz standin there they all won cept a feller with a big masheen, and he kinda got xecited and stead goin like the devel he stoped plum on the trak. A women and him jumped out rite quick and the nex minit the engin hit the masheen rite in the

middil, there wuzent much left 2 see cept some glas and a whele or 2 lain round. I sez to a feller standin klost 2 me, say that auto feller lost his race, he noded his hed and said all fules did wot used a krossin over a rale rode fer a race trak.

The trane stoped soon as posible, and some men clered way the reck and tuk some names and mine 2; then they gave some kinda sines and the trane went on. As soon as it wuz outa site and the kroud went away, darnd if the autos didnt komence racin again. It sure wuz xecitin and they looked like a lot of bese swarmin round a hive. There wuz a feller the rale road kompany hires 2 hold up a sine, wich sez STOP on it. I wached him a wile and konkluded I wudnt hav his plase if it pade \$100.00 a day. Wen a trane kame in site he blowd a wistel and run out to the middil of the strete holdin up that sine, and say, wot fun them auto fellers had tween there selvs tryin to run over him, and at the same time beat the trane. Wile I wuz wachin the sine man—a purty good sised feller kame klost wer I wuz standin, and tuk in the racin 2, but I kno he didnt like it by the way he

found, wen 1 auto feller didnt beat the trane far as he shud. He tuk some kards he had and rote on 1 and put it in his pocket, so I walked up 2 him and asked if he wuz makin a book on the races. He kinda laffed and sed good naterly, no I am here in the interst of the rale rode kompany 2 see if we kan edicate the auto pepel in 2 havin respekt fer ther selvs if they dont fer any 1 else. (By that I spos3 he ment if they didnt hev the luk runin over some bodie else, that he hoped they wud eskape bein injered, or kild by a trane or somthin.) He sed he mailed the kards he wuz ritten on 2 the fellers wot won there rases, but the 1 that lost his race he didnt nede any.

He rote bout 2 dozen kards wile standin side me, then akted like he wuz goin 2 leve, but kame back and sed, yung feller if ever you are fortunate enuf 2 become the oncr of a masheen I hope you will use kaution, and koncider others as you wud wish 2 be koncidered, respektin at all times rale rode krossins, fer they are xtremly dangeres and dont go krost les you kno it is safe 2 do so.

I told him I never thout much about the autos ceptin wen I sene a feller in 1. I figerd he wuz in there 2 get some plase soon as posibel, and 2 speke plane he wanted 2 get 2 ware he wuz goin as soon as he left the plase ware he wuz. He sed I figerd it bout rite, but it wudnt work kaus we are duty bound 2 respekt the law, and speccally the safety laws, and if they are akted on in a tellegent way everbodie wud konsider life worth living and aksidents wud be rair.

Then the rale rode man sed well yung feller good by and try 2 keep in mind wot I told you bout bein

A SHORT DISTANCE FROM ETERNITY—
The fool who tries to beat the train at the crossing

Cartoon by W. Wentworth, Toledo Division

kareful and konsider others as well as yourself no mater wot you are doin. I told him I liked 2 here a man talk strait out like he did and wuz much bliged fer his advise.

He left me and I went strait home so I kud rite you wile the xcitment wuz still strong in my mind.

I hope you wont hev trubel makin out the ritten and xpresions, even tho they are nue 2 you, but we want

to take in all we kan in the way of edication and not let the auto fellers get it all, bad as they nede it.

Well good by fer this time will rite later of korse that pends on me still bein a winer, and not mixin with that kroud of mekaniks I spoke of.

Hopin you are well as usal will klose from your Bro.

John.

What the No-Accident Campaign Meant to Me

By John McCracken,

Pipefitter, Wheeling Division

IT taught me the value of efficiency, and caused me to bring to the front my best mechanical ability to avoid any present or future accident; to work for the man who follows me; to have full confidence in myself that when I put my O. K. on my work slip I have nothing to regret, for my work was perfect and was done in a faithful and conscientious manner.

It caused me to watch my fellow workman to help him avoid mistakes, and at the end of each working day I felt I had performed my duty as I saw it in a friendly and helpful way.

It caused the employes to perform efficient work in every department and for each department to cooperate with one another, and for the individual mechanics to work together.

The employes in general followed the rules laid down by the Safety

Department. These can be followed first, last and at all times with forethought for our fellow workmen and the great public, as well as they can be followed for any stated period.

It has shown that the day of the "highballer" and "slacker" should be forever past on the Baltimore and Ohio Railroad; he is a pitfall and a stumbling block to his fellow workmen and his Company and the whole world in general. It has also shown that the words of one of our old American pioneers is true, "Be sure you are right and then go ahead."

It has proved what conscientious American workmen can do when put to the test of taking no chances at any time; of being sure they have done their duty before they leave the job; of taking nothing for granted and showing the American people that what was done for a stated period can be continued for an indefinite time.

Some Instances Where Safety Sense Would Have Saved Dollars and Suffering

Here are some accidents on the Baltimore and Ohio which might not have been recorded if those involved had used their Safety Sense:

Cleveland Division—The crew of a helper engine were riding in a caboose when their engine helped the train over a grade. Reaching the summit, the conductor called his two brakemen. The conductor and one brakeman stepped from the platform of the caboose to the engine pilot and as the other brakeman attempted to do the same the coupling was cut and the caboose drew away from the helper engine. He held on to the caboose railing and was thrown to the ground and severely injured.

A car repairman was walking along the side of a cut of cars while another workman was driving a knuckle pin into the coupler of a car which the two men had repaired. Just as the first repairman was passing the opening between two cars, a piece of steel was broken from the pin and struck him in the eye. It was necessary for a surgeon to remove the eyeball. Goggles might have saved his sight.

Attempting to cross a flat car which was moving in a train, a laborer was injured when a ditcher on the flat car crushed him against the end of a gondola. The engine was pushing a train and gave a lurch just as the laborer passed between the ditcher and the end of the gondola, the next car in the train. This caused the ditcher to move forward and catch the man.

Newark Division—In an effort to see whether the conductor of the freight train got aboard, the fireman leaned far out of his cab and looked back to the rear end. He kept gazing in that direction until he was struck in the back by a penstock which the engine was passing. The Safety Rule says enginemen must look forward when leaning from engine cab.

*Drawn by Operator J. E. Kubes,
Patterson's Creek, W. Va.*

Be sure you are right and then go ahead full speed, but Safety First, Last, and All the Time.

Tragic—but True

ABALTIMORE AND OHIO yardmaster, over fifty years old, employed for over twenty years, respected and liked by all his fellow employes, a devoted husband and father of ten children—yet, he forgot just once during January and met a tragic death.

He had been directing the moving of a yard engine, turned his back to it for a minute and proceeded to walk away from it between the rails. The day was cold and he had his cap pulled down over his ears and the engine crept upon him and killed him, notwithstanding the frantic efforts of onlookers to attract his attention in time to save his life.

All the circumstances concerning this accident make it particularly tragic. The character of the man, his usefulness, his large family responsibilities—all these things snuffed out and a train of sorrow, misery and suffering left—just because of a moment's forgetfulness.

Isn't every effort being made for Safety on the Baltimore and Ohio worth while if we could only prevent one such appalling catastrophe? Won't you do your part every moment of the day to make repetitions of this practically impossible on our Railroad?

Song of Safety

This is in memory
Of Benjamin Pratt,
He let go of the wheel
To grab for his hat.

—Shepherdstown Register.

The Vitamin Question

Are you missing something important in your daily ration?

Note: Having concluded the publication of the articles on practical health subjects by the physicians connected with our Relief Department, from now on the Magazine will contain in each issue similar articles prepared by the Life Extension Institute. This is the largest organization of its kind in the world, having over 200,000 subscribers receiving the benefit of its medical examinations and advice. Readers of the Magazine are urged to enjoy the help which these short and authoritative monthly messages will offer. —Ed.

THE vitamin theory has been fully substantiated by laboratory experiments on animals and clinical observation of babies and adults; that is, we may confidently say that there are certain substances of unknown composition which are present in some foods and absent in others and are necessary to some extent in our diet in order to attain proper growth and maintain our tissues in a state of health. A diet that is complete in every other particular, but has been so treated that these substances have been removed, will be insufficient to maintain health. For example, we know that a diet consisting very largely of polished rice will produce the disease known as beri-beri, which formerly prevailed very widely among the Japanese and Malays. We also know that scurvy is caused in infants by insufficient quantity of milk or milk that has been artificially treated in such a way as to diminish the vitamin content.

Under what conditions is it necessary to be particularly concerned with regard to the vitamin content of our food? Under ordinary living conditions the average individual who is able and willing to eat a square meal and is within reach of ordinary markets need have no anxiety on this score. Under unusual living conditions, as in warfare, exploring expeditions, in camps, or in other places where the common range of ordinary foods is not obtainable, the matter is one of vital importance. The British Research Committee commented on the fact that in the Mesopotamian campaign British troops suffered severely because of a narrow diet consisting mostly of white bread and canned food, while the native troops

maintained good health on a diet of coarse whole wheat bread and atta or pulse.

It was formerly thought that only under very extreme conditions could vitamin deficiency exist, and in the early days of vitamin discussion, the public was continually reassured by conservative scientific authorities with regard to any possible vitamin deficiency in this country. Broader and more exact knowledge requires a change in this attitude. It is true that there is little danger of beri-beri or scurvy manifesting itself in our adult population. It is pretty well agreed, however, that infantile scurvy in varying degrees is very common and that malnutrition and retarded growth through other forms of vitamin deficiency are conditions to be reckoned with. We have previously called attention to the fact that orange juice and tomato juice not only protect against scurvy, but increase the rate of growth of human infants and other animals.

Fresh raw cabbage or "cold slaw" is rich in all known forms of vitamins. It is also valuable on account of its bulk and its minerals. A person who can eat raw cabbage and tomatoes with a relish would be very foolish to take a vitamin tablet instead.

How about the people who cannot, or think they cannot, eat raw cabbage, or spinach, or carrots; who will not drink much milk or eat fruits and green vegetables in any quantity? There are many such people, and curiously enough and unfortunately enough, it is quite common for a poorly nourished and half-starved individual to have little appetite. Dr. Clemens Pirquet, head of

the American Relief work in Austria, in his recent address in this country, has commented on the fact that it was necessary to force many of the children to eat the full ration provided. They were required to eat every scrap of the food furnished before leaving the food station, and one little Miss took a whole morning to consume her modest portion. Dr. Pirquet wisely denounced the prevalent notion that food unwillingly eaten would not be digested or afford full nourishment. These undernourished people should therefore make an honest effort to eat freely of vitamin-bearing food, such as cabbage, spinach, turnips, carrots, oranges, lemons, tomatoes, milk, eggs, whole wheat and a number of other foods.

The following is a list of inexpensive every-day foods that contain all known forms of vitamins in protective quantities:

- Tomatoes (canned and fresh)
- Cabbage
- Carrots
- Cauliflower
- Peas
- Spinach
- Turnips
- Lettuce
- Milk

A New World to Him

HE was a scared little fellow and did not know whether to cry or be brave. He was being dragged along by a great big, husky father whose impatience was only too self-evident both in the way the little chap was rushed into the office and in the tone in which he was ordered about.

The father said the boy was backward; he was way behind in school and the teacher couldn't seem to beat anything into his head. He wasn't proud to admit this, as he hadn't any fools in the family that he knew of, but as a last resort a friend had advised having the boy's eyes examined.

He was so thoroughly scared and browbeaten that it was necessary for the specialist to work very slowly and try gradually to gain his confidence. The child proved to have an unusual amount of astigmatism. He was being tried on the test types and was hesitatingly reading off letter after letter when the father, who had been fidgeting around, could contain his impatience no longer, and he broke out with, "For Heaven's sake, can't you read your letters yet? Speak up! What's the matter with you, anyway?"

"Wait a moment," the specialist said, "the boy is all right. Just let me show you how he sees those letters," and he placed before the father's eyes a pair of lenses that plainly showed how things looked to the boy with his defective vision. "Now watch, I am going to put the proper correction on your son and I want you to note the difference."

The boy was fitted with the right lenses and told again to read the letters. Without a particle of hesitancy and as naturally as any other boy would, he went over the letters from top to bottom.

"Well, I'm blowed!" was the only adequate expression his father could command, but it was easily noticed that a more tender feeling had replaced the former impatience, and we imagine there will be many future moments when thoughts of past harshness will give this man an uncomfortable remembrance. This man could appreciate the handicap put upon his boy because he had seen for himself the distortion caused by the child's astigmatism.

Parents: Do not be too quick to pass judgment on your child! You are responsible for your child's life. It is your duty to see to it that no physical defects retard his rightful heritage—health, happiness and prosperity—*Eye Conservation Council, New York.*

Railway and Locomotive Historical Society.

How many readers remember the little old locomotive and cars we used to see rolling along on the railroad? What a contrast they were to the monster engines and steel cars of today!

Some of the lovers of the old time rolling stock have formed a society to preserve old amrotypes, daguerotypes, photographs, lithographs, time tables and anything that pertains to transportation in the old days. Have any of the readers of this article any photographs of old locomotives or cars laid away up in the attic? The Railway and Locomotive Historical Society wants to preserve these photographs and this material, and will gladly welcome any contributions. Due credit will be given the donor

and the Society will gladly pay any postage or express charges.

The Society will gladly welcome to its membership anyone who is interested in the subject of early transportation in any of its phases. The bulletins frequently issued by the Society contain much material of great interest and value and it is possible to obtain them without joining, but railroad men, whether young, middle-age or retired, are welcome as well as those not in railroad service but who are interested in the early railroad transportation of this country.

Futher information can be obtained from Charles E. Fisher, 152 Harvard Street, Suite No. 8, Brookline, Mass., or from John W. Merrill, Director, 40 Kilby Street, Boston, Mass.

Railroads and Governments

THEIR RELATION IN THE UNITED STATES, 1910-1920

By Frank Haigh Dixon

Professor of Economics, Princeton University—\$2.25

THIS account and discussion of railroad operation and railroad problems in the last ten years, by one of the foremost authorities, is based upon a realization that "we have been passing through an extraordinary decade in the relations of railroads and government. More experience and experiment have been crowded into these ten years than into all the remainder of our railroad history of nearly a century."

The writer's manner in dealing with the underlying questions and in recounting the methods by which they have been answered is, considering its thoroughness, remarkably untechnical, so that the volume is easily read by the general public as well as by the student. The book traces the processes of federal regulation of railroads from 1910, the date

at which most of the treatises on transportation have dropped it, and brings the history down to the present year.

Dry Year Healthiest in American History

THE New York Times reports the conclusion of 37 leading American insurance companies that the year 1921 was the healthiest year in the history of both the United States and Canada.

The figures for the first ten months indicate a lowering of the death rate among policy holders from 9.8 in 1920 to 8.24 in 1921.

Despite the absence of Rock and Rye, pneumonia decreased 50 per cent. from 1920.

More prosperous, non-drinking Americans, however, were able to afford automobiles, with the result of 15 per cent. increase in deaths from automobile accidents.

The 37 companies supplying these figures transact about 80 per cent. of the life insurance business of the country.

There was a large decrease in deaths from tuberculosis.

Prompt Handling of Death Claim

Copy of letter received by Dr. J. E. Hurley, Medical Examiner of the Relief Department at Pittsburgh, Pa., from Mrs. Sadie Darby, widow of Daniel W. Darby, conductor, Pittsburgh Division, who died on November 21, 1921.

Pittsburgh, Pa.

December 29, 1921.

DR. J. E. HURLEY,

Dear Sir—Received check No. 97787 for \$32.50, and check No. 97788 for \$1250.00 in payment of sick benefits and death claim. I want to thank the Relief Department for prompt payment of claim.

Respectfully,
(Signed) Mrs. SADIE DARBY.

"I. Q."

The head of an Accounting Department on the Railroad is talking over the telephone with the chief of the Employment Bureau:

"What is the applicant's 'I. Q.'?"

"Seventy-eight," is the reply.

"Send him up right away."

And within five minutes' time the applicant for the vacant position in the Accounting Department is face to face with his new "boss," the latter understanding from the "seventy-eight" which he got from the head of the Employment Bureau, that his new man is a "find!"

They did not have the "I. Q." when you and I were in school, but they are introducing it in Baltimore schools this year and they have had it for sometime in other large cities throughout the country.

"I. Q." means "Intelligence Quotient" and, expressed arithmetically, it means the quotient obtained by dividing a man's intelligence, as evidenced by the result of his mental examination, by his age.

The examination referred to is a test worked out by experts and varies according to the education and age of the man being examined. It is like the famous Edison questionnaire, in that it embraces a wide diversity of subjects, simple mathematics, history, geography, current events and purely artificial questions designed to test a man's mental acuteness, no matter what his environment and training. Of course, it lacks the features which made Mr. Edison's questionnaire so much ridiculed.

The "I. Q." test has made good in the schools. It has already been adopted by many industrial concerns. It was used widely in the Army to grade men according to their mental equipment. It is past the experimental stage and, in the belief of the writer, it will be adopted more and more widely in the years to come, because of its absolute fairness in determining a man's mental caliber. It has the great advantage of eliminating from the examination of a man all those circumstances of environment, education and training, which might work in his favor or in his disfavor, as compared with the way they would operate in the case of another man.

If a man happens to be a wizard at figures, the test shows that, and due consideration of the fact can be made in choosing his work. He ought to do exceptionally well in the accounting department.

If his test indicates that he has an unusual knowledge of geography, and his personality does not dis-

qualify him, he has one fundamental of a good traffic solicitor.

The test may show that he has a wide range of general information, that he has an acquisitive mind. That too, should fit him to an extent for a position in which he can meet and talk intelligently with the patrons of the railroad.

His answers may show him to be a man of thorough education, one with a "trained mind," a man who has learned the greatest lesson of thinking for himself. Men who assay 100 per cent. in this respect, are rare and almost any business organization can make profitable use of them.

On the other hand his examination may show him to be woefully lacking in education yet at the same time one with an exceptionally alert and quick mind, with great keenness of perception, a good judge of character, perhaps. An opening will not be lacking to one of this type either.

If you wish to arrive at a quick, fair and comprehensive appraisal of the mental qualifications of the employees who work for or with you, look into the merit of the "I. Q." test.

A Man's Job

A man's job is his best friend. It clothes and feeds his wife and children, pays the rent, and supplies them with the wherewithal to develop and become cultivated. The least a man can do in return is to love his job. A man's job is grateful. It is like a little garden that thrives on love. It will one day flower into fruit worth while, for him and his to enjoy. If you ask any successful man the reason for his making good, he will tell you that first and foremost it is because he likes his work; indeed, he loves it. His whole heart and soul are wrapped up in it. His whole physical and mental energies are focused on it. He walks his work, he talks his work; he is entirely inseparable from his work, and that is the way every man worth his salt ought to be if he wants to make of his work what it should be, and make of himself what he wants to be.—Arthur Capper in *Trained Men*.

Two Letters

Two letters recently came to my attention and reminded me that there is a right way and a wrong way of stating an unpleasant fact. The first was issued by a man whom we will call a "bureau chief" in a big department. It was to one of his assistants, a self-respecting, cultivated, red-blooded fellow, occupying a good position and read as follows:

Date.....

Mr.....:

On account of reduction in force it will be necessary to furlough you on.....from this department of the Baltimore and Ohio Railroad.

It was signed on the typewriter with the name of the bureau chief.

The notice was received three weeks previous to the date on which the furlough was to take effect, which was reasonable time for such notice. But no personal comment or suggestion of any sort accompanied it.

The second letter was from the head of the department having under his supervision the bureau chief above mentioned, besides four or five others of equal rank. It was to a junior clerk whose work was of much less importance than the work of the man furloughed by the preceding notice, and it read as follows:

Date.....

Mr.....

Dear Sir:

I regret that on account of a reduction in force it is necessary that your position be abolished on.....

Since you have been connected with this department your work has been satisfactory and you may use this department as a reference or call on me for any help that I can give you in your efforts to secure a position elsewhere.

Will you please advise promptly if you wish to take advantage of your seniority rights so that proper steps in this respect can be taken.

Yours truly, etc.

It was signed personally by the department head.

Looked at from a very selfish Baltimore and Ohio viewpoint it does not require much gumption to determine which of these two furloughed men, on leaving the service, had the more pleasant recollection of his furlough notification. The first letter stated the unpleasant fact in about as unpleasant and cold a way as it could have been stated, and the recipient felt as if he had been flung out of the back door of the service. The second showed unmistakably the real interest which the department head took in the clerk whom he was furloughing and, chances are that the pleasant letter which he wrote modified considerably the sting of the disappointment necessarily conveyed in the letter.

There is a pleasant and an unpleasant way of doing everything we are called upon to do in our everyday work. Why not choose the pleasant way?

Please Watch Magazine Distribution

Several of our superintendents follow up the distribution of the MAGAZINE so closely that they send copies of their letters to their staff officers directing the important changes in allotment, etc., to the office of the MAGAZINE, even when these changes do not affect the main supply as it comes to them from Baltimore. We appreciate this interest and wish we could have evidence of a similar interest from every division.

It is not, of course, because the interest is not present, but simply because the machinery breaks down once in a while, when an officer from Baltimore will find in some station a package of MAGAZINES undistributed. But it is not particularly conducive to the peace of mind of the editorial staff.

We will thank every superintendent to help us make the MAGAZINE as useful as possible by seeing that it is promptly and carefully distributed under his supervision.

Orison Swett Marden, in one of his inspirational books, tells the story of a little boy who, standing on scales and being very anxious to outweigh his playmate, puffed out his cheeks and swelled up like a little frog. "Oho," cried the playmate in scorn, "that doesn't do any good; you can only weigh what you are!"

True. We can only weigh, in the world of accomplishment, what we are. Getting all puffed up over some temporary or accidental victory over fate isn't going to get us anywhere. What a man is, is stamped all over him. When he fills up his cheeks and imagines he's fooling the scales, he is fooling only himself.

Self-inflation doesn't pay.

—Jerome P. Fleishman in "Uncle Jerry Says."

Concerts from over the Mountains

My home is in Relay, that little Baltimore and Ohio village which has been so intimately connected with the history of our Railroad. I mention this not alone because Relay is a pleasant place to live in but also because the episode I am about to relate has not a little to do with location, to wit:

Seated in my living room one night recently and scanning the last bit of news in the evening paper, I had just begun to run down the article describing the programs to be given that very night by the powerful radiophone sending stations in several of the large cities of the East. Then coincidentally, the telephone rang. A neighbor in his home about half a mile from my own had called me, and said,

"We are listening to the Pittsburgh radiophone program over here. Keep the receiver at your ear and see what you get."

Already the staccato "ping" of a piano which was being played, reached me, sometimes as clearly and distinctly as if it had been in the next room. The solo was being wirelessly from the Westinghouse plant in Pittsburgh to the home of my neighbor. His telephone, in turn, was thirty feet from his receiving instrument and from there the tone was being carried fully two miles by wire from his house to the central station and thence to my own ear.

Listening on I heard the announcement of the next number on the program, a five minute address about the great Government wireless plant at Arlington, Va. Some sentences I heard without any trouble whatsoever; others were not quite so distinct.

But my friend tells me that his wireless receiving instrument is so entirely satisfactory that he never thinks any more of playing his talking machine—the concerts which he gets from over the mountains and through the air from Pittsburgh, and from other cities, are so much more novel and interesting.

We have all followed with more or less interest the development of wireless telegraphy and telephony. We recall the dramatic and epoch-making "C.Q.D." which Jack Binns sent out a number of years ago and which saved so many lives on the steamer on which he was the wireless operator. But I doubt if many of us have followed the progress of the wireless idea to the extent of knowing that it has been so wonderfully developed as illustrated by this episode.

Would you hear a great sermon on Sunday in the comfort of your own home? Would you listen to a master singer interpreting a classic from the opera? Would you be thrilled by the martial note sounded forth by a great band? Would you enjoy a lecture on the most recent progress in the field of science? These and hundreds of other educational and enjoyable privileges are the possession of those who have the radiophone.

Words fail one in trying to describe so wonderful an instrument as this and in giving due praise to the modern scientists who have made the marvel possible.

Baltimore and Ohio Girls Feature the Second Annual American Legion Carnival in Baltimore

IT has become a'most "standard practice" among a number of the social organizations on our Railroad, when they want to put an entertainment over with a bang, to turn for help to our young lady employes. So, when, in preparing the Second Annual Carnival of the American Legion in Baltimore, the representatives of Baltimore and Ohio Post 81 were asked for suggestions as to how to make the thing a big success, they recalled the pleasant experience of the Carnival in 1921 and the substantial help that the young lady employes of the Baltimore and Ohio were in that affair, and answered: "Get the girls again." Hence it happened that, at this event, staged in the enormous arched drill arena of the Fifth Regiment Armory in Baltimore, with about a dozen posts of the American Legion participating, the whole

color and atmosphere were dominated by the Baltimore and Ohio because of the presence of more than one hundred attractive girls and young ladies, in charming dresses of cretonne and with badges in the Legion colors and carrying the imprint in gold of the Baltimore and Ohio Post 81, who acted as candy sellers, cloak room attendants, in charge of refreshment booths, and as waitresses. The Legion furnished the necessary cretonne for the dresses and the girls had them made and trimmed at their own expense. Some of the most valuable publicity the affair got consisted of pictures of several of the girls as run in the *Baltimore Evening Sun*.

And how these attractive and interesting helpers did work! One little girl approached the chairman of her committee and said: "I sold seven dollars' worth of candy."

The other, surprised, answered:

"That is fine. I have already sold three dollars' worth myself but it took some tall hustling at ten cents a package. How did you do it?"

"Oh, that was easy. I simply went up to all the good looking men I saw and first tried to sell them on the merits of the candy. If they had already bought, I offered them an additional inducement in consenting to be their dancing partner for the next dance. And that worked like a charm."

Three guesses to the readers of the MAGAZINE as to which one of the young ladies pictured with this article, on page 37, was this expert purveyor of sweets!

Several of the officers in charge of the carnival remarked during the evening that the Baltimore and Ohio Post had played a leading part in the success of the carnival and this is due in major part to the activities of the girls under the able leadership of Miss Edna Blase, of the Transportation Department.

The event was a decidedly interesting one it only for the opportunity it gave those attending to see the many beautiful costumes displayed by the dancers. The prize waltz was the feature of the evening's entertainment, some of the best known dancers in Baltimore taking part and giving a delightful exhibition of this art.

The friends of the Baltimore and Ohio were "at home" in two little enclosures which had been set aside for their use. These were tastefully decorated with pictures of characteristic scenes along the Railroad and the booth also contained quite a good deal of literature issued by our Passenger Department and some copies of the

Group of Baltimore and Ohio girls from about twelve different departments, who helped Miss Edna Blase of the Transportation Department, and her lieuten-

MAGAZINE. The arrangement of this rendezvous was in charge of J. E. Teal, Operating Department. M. L. Schwartz, Valuation Department, and Louis B. Beck, of the office of Superintendent of Fuel and Loco-

motive Operation, comprised the committee representing the Baltimore and Ohio Post.

Splendid dance music was furnished by Farson's Orchestra of 30 pieces.

General Manager Scheer Addresses Baltimore and Ohio Post 81, American Legion

ON THE night of February 21 the Baltimore and Ohio Post of the American Legion had the pleasure of having as its guest E. W. Scheer, general manager, Eastern Lines, as the fourth of a number of Baltimore and Ohio officers who have addressed the Post on railroad subjects of current interest.

Mr. Scheer gave an intensely interesting description of the present method of handling freight trains on the west end of the Cumberland Division, a method whereby during the last six months statistics indicate that over \$200,000 has been saved in wages and fuel alone, as compared with the previous method of operation over a similar period. During the same period, by reason of a decrease in the number of accidents, there was a further saving of \$81,630 in damage to locomotives, cars, tracks and structures. A complete account of this new operation will be given in an early issue of the MAGAZINE.

Mr. Scheer then spoke on other subjects of current interest and told some stories of his experiences on the Railroad. He said that he would be glad to answer any questions, and the resulting discussion was extremely interesting and enlightening. The members of the Post were particularly pleased to have Mr. Scheer stay and enjoy with them the social hour which concluded the meeting.

At the business meeting the following Resolutions Committee was appointed: C. J. Kearney, office of Superintendent Fuel and Locomotive Operation, chairman; H. T. Southerington, Valuation Department; L. A. Carl, office of Comptroller; E. M. Keene, general car foreman; and A. W. Ziegler, office of Auditor Disbursements.

A motion to the effect that a ladies' auxiliary of the Baltimore and Ohio Post 81 be organized, was unanimously carried and work was immediately started toward this end.

First Annual Dance of Transportation Department

By L. K. Burns

THE First Annual Dance of the Transportation Department Baseball Team in Baltimore on February 20, was a splendid affair and a huge success. The dance was arranged by a committee of three Transportationists: Luke Burns, chairman, "Jimmy" Smallwood and "Will" Marley, and it was due to their untiring efforts to make the affair a success that a very creditable showing was made from a financial as well as a social standpoint. The cooperation of the other departments in the Baltimore and Ohio Building greatly aided in bringing about this result.

West End Hall was selected for the event. We do not think a wiser choice could have been made to hold comfortably the 250 or more dancers present. The orchestra, which consisted of "The Melody Five," produced—as one young lady remarked—"delicious music," which sounded even more "delicious" when it played "Ten Little Fingers and Ten Little Toes" and when "Jimmy" Smallwood, who has an unusually good voice, joined in. "Tom" McCann acted as doorkeeper.

"Uncle John" Neessner, who came up with Mr. McCracken, Car Service Department, could easily be singled out after each

(Continued on page 37)

ants in "putting across" the Second Annual Carnival and Dance of the American Legion in the Fifth Regiment Armory, Baltimore, on the night of February 23

Interesting Meeting at Grafton

By W. F. Braden, Safety Representative

ONE of the most interesting meetings ever held under the auspices of the Grafton Division of the Veteran Employees' Association, took place on February 6, at Pythian Hall, Grafton. The entertainment features were under the direction of the Ladies' Auxiliary, and they were capable and energetic hostesses.

J. M. Scott, general superintendent, and B. Z. Holverstott, superintendent of the Monongah Division, were the guests of honor. There were a number of other specially invited guests who were charmed by the musical numbers rendered by members of the organization and delighted with the plentiful repast that the ladies served.

Frank M. Keane, president of the division association, opened the meeting by welcoming the guests and the members. He then announced that the meeting would be conducted according to the by-laws so that the visitors could see what the Veterans are doing for the benefit of the Baltimore and Ohio Railroad. After Chaplain W. H. Shafferman had offered prayer, the business session proceeded. When the Veterans had concluded their business meeting, Mrs. W. E. Hodel, president of the Ladies' Auxiliary, was given the gavel and the ladies then did themselves proud by the dispatch and sincerity with which they conducted their business.

At the conclusion of the business meetings, Mr. Keane announced that the ensuing program was for entertainment purposes only and a choir of a dozen voices began to sing "Silver Threads Among the Gold." This choir, under the direction of John J. Cassell, made a deep impression. At the conclusion of each chorus, a group of singers in a distant room would repeat it, giving the effect of a delicate and pleasing echo. Mrs. Mary Cannon gave a humorous reading, depicting the joys that come to a hen-pecked husband when he reaches the entrance gate to heaven. Miss Leila Ware then sang a solo.

Mrs. J. M. Garvey, vice-president of the Grand Lodge, Ladies' auxiliary, then spoke

of the benefits of membership in the organization and pictured the meaning of service and self-sacrifice, which are the predominating aims of the organization. Mrs. Otto Kinsler followed with a series of old German folk songs that were applauded to the echo.

W. F. Braden, safety representative, who had come from Baltimore to represent John T. Broderick, superintendent, Safety Department, made a short talk on the results that had been accomplished on the Monongah Division through the co-operation of the wives of the employees in safety work. He pointed out that just a year ago a safety rally had been held at Grafton, when the women pledged their aid, and, as a result, personal injuries had been reduced 41 per cent. on the division. He gave the summary for the year 1921, which showed that only one fatal accident had occurred on the division.

Mrs. Louis Raucher followed with a piano solo, playing some of the favorites of 30 years ago. The choir followed with "Old Black Joe," which was one of the musical treats of the evening. J. M. Garvey, vice-president of the Grand Lodge, then made an appeal for increased membership and diligence of service and urged the Veterans to continue to seek business for the railroad and to endeavor to render the best of service to their employers.

Mr. Holverstott made one of the best speeches of his career. He enthused the Veterans by declaring that in his 20 years around the Monongah Division he had tried to deal fairly, justly and honestly with the men he came in contact with and that he had no desire to leave this division. He said that the reputation the Baltimore and Ohio had earned was due in no small measure to the help the Veterans had given and that their greatest work lay before them in preparing the younger generation to live up to the ideals established. He declared that while a fine record in safety work had been made in 1921, one of which he personally was mighty proud, he wanted a one-hundred per cent. betterment in 1922

and that it could be accomplished if everybody helped.

The audience was laughing heartily at the witty shafts hurled by Mr. Scott. Until the time of his ascending the rostrum he had been sitting in close proximity to a roaring gas stove and he declared that it seemed that he was designedly being punished. He declared that Grafton was the city of his adoption and that it always would have a high place in his esteem. He congratulated the veterans on their accomplishment in the year and urged continued support.

While the orchestra, under the direction of Mr. Fred Clark, played some lively numbers, the Ladies' Auxiliary served tasty refreshments. Then there was an hour or so of intimate conversation, with the Veterans and their auxiliary intermingling and exchanging pleasantries and recollections.

The committee in charge of the entertainment was composed of the following: Mrs. French Helms, Mrs. Mary E. Kuhn, Mrs. Louis Raucher, Mrs. George Motter, Mrs. Charles Lewis, Mrs. Otto Kinsler, Mrs. C. O. Thayer, John J. Cassell, W. H. Shafferman, Thomas Beall, Emil Kinsler, A. Blue, William Graham, W. E. Hodel and William Clayton.

Lima Auxiliary Holds Meeting

THE Ladies' Auxiliary to the Veterans' Association of the Toledo Division entertained the Veterans and their families in Odd Fellows Hall, Lima, Ohio, on Wednesday, February 15. An enjoyable evening was spent by all.

While it was a cold night this did not interfere with the plans of those who came to this meeting. There were about 100 present and all enjoyed the program, which consisted of cards, dancing and refreshments. Schultz' Band furnished the delightful musical program. The Misses Alice and Ruth Pratt gave a piano and violin duet, which was very enthusiastically received. Miss Kathryn Cremean gave two fine piano solos; Miss Maxine Wallburg and Miss Mable Seibold gave a clever interpretation of a Persian dance. Miss Marian Wallburg sang several selections in her usual charming way. Dr. F. H. Hutchison gave a remarkable exhibition as auctioneer in disposing of a delicious cake, which had been donated by Mrs. E. J. Shenk, and also a pair of pillow cases donated by "Ed" Brennan, after he had won them in the raffle. After much spirited bidding the cake was bought by William A. Light as the highest bidder, and the pillow cases by Mrs. Richard M. Lane.

Social gatherings of this nature are planned to be held monthly, with the exception of March, when we expect to hold our annual banquet at Dayton, Ohio. To this all Veteran employees and their families in the territory adjacent to the Toledo Division have been cordially invited.

Ohio Division Veterans Hold Banquet and Organize Ladies' Auxiliary

ON Saturday January 14, over one hundred members, wives and friends of the Veterans' Association of the Ohio Division enjoyed a banquet at the Warner Hotel, Chillicothe, Ohio.

W. R. Moore, retiring president of the Association, acted as toastmaster in a manner that could not be excelled. After welcoming those present, he introduced Mayor Addison Minshall. Mr. Minshall spoke on behalf of the city, stating that no greater honor could be given to any man than to represent the city at a meeting of Veterans of the Baltimore and Ohio. He spoke of the things that the Road and its employees have done for the city. Trainmaster Banks was next called on, and, as a representative of Superintendent Iams who was unable to attend, welcomed visitors from other points. A. M. Davidson, assistant division engineer, and several others were called upon for remarks and responded in a pleasing manner.

Mrs. Howard, of Newark, who was present for the purpose of organizing a ladies' auxiliary of the Association, spoke on the

advantages of such an auxiliary, both to the Veterans and the ladies. Her remarks were greeted with hearty approval, and quite a number of the ladies present signed the cards, showing their willingness toward assisting in forming such an organization.

Mr. Moore then introduced G. W. Plumly, division operator, the newly elected president for the ensuing year. Mr. Plumly spoke of the organization, its ideals and aims, and of the wish of the members to make it one hundred per cent. on the Ohio Division. This can and will be done by all members taking an active interest.

Later Mrs. D. D. Sheets, wife of engineer "Dan" Sheets, was elected as president pro tem of the newly organized Ladies' Auxiliary. About seventy-five ladies have joined the Auxiliary. They are now waiting to secure a room in which to hold their meetings, after which election of officers will be held.

With the assistance of the ladies we may now watch "things hum" toward the 100 per cent. mark, in both organizations.

posed of, the rest of the evening was devoted to social features, the Ladies' Auxiliary attending in a body.

There were recitations, solos, both vocal and instrumental, contributed by the Misses Mildred Reese, Helen Young, Esther Biggs, Ethel Fullmer, Lois Durant, and Messrs. E. T. Tovey and W. J. ("Paddy") Griffin. The songbirds were accompanied by Miss Bolton and Miss Layton, while Mrs. Murray accompanied the Whalen Brothers in a saxophone duet.

The Ladies' Auxiliary served a splendid lunch which was enjoyed by all, and the evening was one of pleasure to all who were fortunate enough to be present.

Veterans' Meeting at Garrett

THE Veterans' Association, Chicago Division, held its annual meeting on December 21, at Garrett, Indiana, for the election of officers for 1922. The following officers were elected:

L. B. Hart, engineer, president; Roy McKinley, conductor, vice-president; E. E. Smith, chief clerk to division engineer, financial secretary; W. A. Clifford, agent, treasurer; Floyd Jones, passenger brakeman, delegate to Grand Association Convention; Frank Fouch, foreman machinist, alternate.

The treasurer reported the finances in a healthy condition.

President Hart called a business meeting on January 21, at which more than 100 members were present. There were representatives from Chicago, South Chicago, East Chicago, Blue Island and Hammond, as well as from points between South Chicago and Tiffin. Grand Vice-President J. M. Garvey, Grand Secretary and Treasurer James Wardley, and President E. J. Harrigan, Connellsville Division, were present

(Continued on page 45)

Gratitude from the May Family to Others in the Baltimore and Ohio Family

WE have had any number of letters from outsiders about the courtesy and kindness of our employees, but it may not be amiss to quote from the letter of a Baltimore and Ohio family, which feels grateful to its fellows for the care of a sick brother. The letter reads as follows:

Connellsville, Pa.
January 20, 1922.

Editor,
Baltimore and Ohio Magazine.

Dear Sir:—We are taking this opportunity to thank those who were so considerate of our family on a recent trip.

On January 19, my mother and I were bringing my brother home from the Hamburg Sanitarium. His condition was critical and we feared that he would not survive the journey. We telephoned Station Baggage-master R. J. Peaster beforehand, and when we arrived at the station, Mr. Peaster, with his assistant, W. C. Kuthley, had arranged everything for our comfort for the entire trip, including comfortable chairs which enabled us to keep watch over my brother at all times.

We also extend our thanks to the porters, particularly Nathan Turpin and Robert King, who were so attentive and careful in moving Edward from the ambulance to the truck and from the truck into the car. In the baggage car we were given special attention by H. S. Handy and O. E. Reynolds. Mr. R. Hill, who rode with us from Baltimore to Cumberland, showed us the

same considerate Baltimore and Ohio attention, and all of the baggagemen willingly endured the cold air in order that my brother might be kept in low temperature.

Our trip was made all the more comfortable because of the carefulness of the engineers in handling this train; this crew included Engineer W. W. Jeffries and Fireman W. W. Harward. I do not know the names of the others.

We all join in thanking these many employees who gave such kind attention to my sick brother.

(Signed) Joseph G. May, fireman,
Pittsburgh Division
Mrs. F. M. May,
L. S. May, fireman,
Connellsville Division
C. H. May,
R. C. May,
M. L. May, machinist helper.

Doings of the Pittsburgh Veterans

By E. N. Fairgrieve,
MAGAZINE Correspondent.

THE Pittsburgh Chapter, Baltimore and Ohio Veterans' Association, held its regular quarterly meeting in Odd Fellows Hall, Hazelwood, on Monday evening, January 9, with more than 300 in attendance.

After the regular business had been dis-

Marian, daughter of Mr. and Mrs. O. L. Wallburg, who sings and dances frequently at the affairs of the Veterans in Lima, O.

Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—
Retreat from care that ever must be thine;
How blest is he who crowns, in shades like these,
A youth of labor with an age of ease.*

GOLDSMITH—"The Deserted Village"

J. W. Norris

J. W. Norris, pensioned brakeman, was born at Sandy Hook, Maryland, on June 11, 1853. About six years later his family moved to Martinsburg, where Mr. Norris attended school. Later the family removed to Bradysville, Md., where for six years Mr. Norris attended school.

At the age of sixteen, Mr. Norris began working with the Cumberland and Pennsylvania Railroad at Mt. Savage, Md. Five years later he went to Piedmont, W. Va., where he entered the service of the Baltimore and Ohio as fireman. A year later he returned to the Cumberland and Pennsyl-

vania, coming back to the Baltimore and Ohio as brakeman in 1880. He served in this capacity in the yards at Cumberland until the time of his retirement, December 16, 1921.

Michael A. Sheely

Michael A. Sheely, pensioned carpenter foreman, Pittsburgh, Pa., was born at Clearfield, Pa., on August 15, 1856. He entered the service of the Emlenton, Shippensville and Clarion Railroad in 1877, as carpenter helper, under William Pantan; on August 27, 1900, he was made carpenter foreman, and for fifteen years served as

foreman of bridges. In the capacity of carpenter he served the Baltimore and Ohio and its various branches for 44 years. During this time Mr. Sheely has seen many interesting changes in railroad work. He was an eye-witness to the famous Paint Creek Trestle wreck, and it was he who carried the news to the Shippensville telegraph office.

Mr. Sheely married Miss Mary Hesterman, of Shippensville. They have five children.

Henry H. Green

Henry H. Green, pensioned laborer foreman, has had an interesting career. He was born in Vermillion, Ohio, on January 4, 1851. At the age of sixteen he went sailing on the Great Lakes, before the day of the lake steamer. His first trip to Lorain was for a cargo of coal. They brought the coal to the docks in cars which held from twelve to fourteen tons. The schooner was loaded from the docks by means of wheelbarrows, an operation which took about six days. The ship on which Mr. Green sailed carried from 1000 to 1200 tons.

BALTIMORE AND OHIO STALWARTS NOW ON PENSION ROLL

Left to right, top row: Bennel Brill, J. W. Cassen, Michael A. Sheely, J. E. Bragg, Henry H. Green; Bottom row: Michael Allen, Thomas C. Walsh, George W. Wolf, S. B. Edmonds

In the Autumn of 1890 Mr. Green began work with the C. L. & W. Railroad, Lorain, Ohio, as laborer. In 1892 he was made car repairer; in 1903 he became car builder. In 1909 he was made labor foreman. This position he held until the close of the War, when he was made watchman. In 1918, he was again made labor foreman, and held this position until the time of his retirement, January 20, 1922.

Mr. Green was popularly known as "Cap" among his fellows.

George L. Downey

George L. Downey, pensioned fireman, Baltimore Division, was born in 1856. He had his first experience with the Baltimore and Ohio as a water boy for the Bridge Department, at Alberton, on July 1, 1869. He came into the regular railroad service as bridge worker in 1874. In 1877 he took a position as fireman. In 1907 he became yard engineer, and two months later he went back to firing, passenger train service. He remained in the service, firing and engineering alternately, until his health failed in 1917. He was pensioned on January 10, this year.

Samuel O. White

Samuel O. White, pensioned train baggage man, was born in Baltimore, Md., on January 27, 1856. At the age of sixteen he entered the service of the Baltimore and Ohio as messenger, Telegraph Department, under Superintendent A. G. Davis. Later, when the first dispatchers' office was opened at Lee Street, he served under Messrs. J. L. Morrow and Thomas Fitzgerald.

He entered the Transportation Department as passenger brakeman, under William E. Clements, on March 1, 1873; was promoted to passenger conductor by Trainmaster James Norris, but gave up his turn to accept the position of train baggage-master, Baltimore Division, in 1886. Ten years later he was transferred to the Philadelphia Division in the same capacity. In 1918 he was injured in a trolley car accident in Washington.

Shepherd B. Edmonds

Shepherd B. Edmonds, pensioned carpenter, was born on May 7, 1855, at Midletown, Maryland.

At the age of 14 he left school and entered the service of the Baltimore and Ohio at Piedmont, as sweeper in the shops.

In 1873 he was given charge of the iron supply for the cars. In 1876 he became apprentice in the carpenter shops, and at the end of three years he entered the Maintenance of Way Department, where he remained for two years. In 1882 he was rated as carpenter, Connellsville. In 1897 he was transferred to the shops at Glenwood, where he worked for six months, returning then to Connellsville. In 1918 he worked in the capacity of tinner, and in 1919 as carpenter. He held this position

Pensioned Employees: Joseph V. Leibig, Samuel O. White, George L. Downey

until he was retired on a pension on November 1, 1921.

Mr. Edmonds was married to Miss Martha Parker, Piedmont, W. Va., on September 28, 1880. He has one son and a daughter.

George W. Wolf

George W. Wolf, Jr., pensioned truckman, Camden Station, Baltimore, Md., was born on January 18, 1849. In 1876 he entered the service of the Baltimore and Ohio as trucker at Camden Station. Although now 75 years old, he is still active. He never liked to be absent from work. He has a son and four daughters.

Thomas C. Walsh

Thomas C. Walsh was born on October 3, 1850, in Castle Island, County Kerry, Ireland. He attended the National School of Ireland until he was 17 years old. In September, 1868, he came to America, landing in New York. Here he obtained a position with the Stewart Express Company. In 1869 he went to Vincennes, Indiana, where he began work as a machinist apprentice with the O. & M. Railroad. Later he was promoted to machinist, and in 1885 to gang foreman. In 1884 he was made roundhouse foreman.

During the latter part of 1893, Mr. Walsh left the service to take a position as gang foreman at Pine Bluff, Arkansas. Two years later he returned to Washington, Ind., where he obtained a position with the Baltimore and Ohio. Three years later he was made gang foreman again. In 1903 he again took up the machinist trade and worked at it until the time of his retirement.

In 1871 Mr. Walsh was married to Miss Catherine O'Donahue. Seven children were born to them, two of whom have died. One son, Charles D., is now a machinist at Washington, Indiana.

Jarriet W. Casson

Jarriet W. Casson was born at Cumberland, Maryland, on January 2, 1856. He attended the schools of that place until he was 14 years old, when he entered the service of the Baltimore and Ohio as grease wiper in the old roundhouse. Several years later he was transferred to blacksmith helper. He continued in this work until 1890, when he was transferred to the Connellsville Division as fireman. In this capacity he served until ill health compelled him to give up this work and take a position as crossing watchman, in which capacity he continued until he was retired, on February 1, 1922.

Joseph E. Bragg

Joseph E. Bragg, pensioned blacksmith, was born on May 2, 1854. He was educated in the public schools. He was employed in a stone quarry, east of Grafton, W. Va., where he worked for six years. He entered the service of the Baltimore and Ohio as laborer in 1873. Shortly thereafter he entered the blacksmith department, Grafton, gaining his promotion to blacksmith in a little over four years. The greater portion of his service with the Railroad was given here, but Mr. Bragg also worked in the shops at Glenwood, Pittsburgh, Cumberland and Cincinnati.

Mr. Bragg was married to Miss Sarah Wolfe in 1878. Their four sons and Mrs. Bragg are all living.

Mr. Bragg was retired from service on January 1. He and his wife now live on a farm within a half-mile from where he was born.

Michael Aller

Michael Aller, pensioned cab and coach builder, was born on December 1, 1856. He entered the service as carpenter at Pittsburgh on November 11, 1894. In this position he served until 1913, when he was furloughed. Returning shortly afterward, he took the position of car repairer. In 1916 he became car builder, and in 1918, carpenter.

Mr. Aller spent 23 years in the North Side Shop, and two years in the shops at Pittsburgh. While working at his job, Mr. Aller got a splinter into one of his fingers, which eventually resulted in his having to have the finger amputated.

He is a long resident of North Side. Here reside many of his friends in the service of the Railroad to whom he wishes to say goodbye. He wants them to know that he still thinks of the days when he was young and able to help those who are now helping him.

Joseph V. Leibig

Joseph V. Leibig, pensioned crossing watchman, Newark Division, was born in Somerset, Ohio, on September 23, 1855. He came to the Baltimore and Ohio as trackman in 1888. On June 4, 1908, he was transferred to the position of crossing

watchman. This position he held until retired, in December last.

Bennel Brill

Bennel Brill, pensioned section foreman, Newark Division, was born on April 2, 1851, at Salesville, Ohio. He received his early education in the public schools of that community, and entered the service of the Central Ohio Railroad Company on October 10, 1872, as trackman. On October 25, 1887, he was promoted to section foreman. In this position he remained until September 1, 1920, when he was forced to give up his duties because of illness. In 1895 he received a certificate of distinction and a prize of \$25.00, which was offered by Division Engineer Lee to the section foreman having the best section west of the Ohio River.

Mr. Brill was married in January, 1872 to Miss Lazelle Osler, Batesville, Ohio. Ten children were born to them, eight of whom are now living.

In politics, Mr. Brill has always been a staunch Republican, and many of the Newark Division trainmen can testify that they have furnished Mr. Brill with several new hats as the result of the elections.

Transportation Department Dance

(Continued from Page 31)

dance by the group that gathered round him, mostly made up of mine rating clerks. Indeed, he was the central attraction.

George Loeblein, who had never been on a public dance floor before (?), displayed much bravery when he falteringly asked for a dance, although I do believe he half prayed that it would be refused. But no such luck, for his fair partner was Genevieve McCann, or rather Mrs. Kabernagle; however, we were doomed to disappointment for they got on surprisingly well. And Miss Hett-rich, who is rather diminutive, was game enough to dance with Mr. Collins, who is exactly twice her size.

All went well to the very end, even though several hats were exchanged in the men's cloakroom. However, everything was straightened out and everybody went home happy, early—in the morning.

Washington Auxiliary Enjoys Pleasant Evening

WASHINGTON Auxiliary No. 13, assisted by the Veterans, enjoyed a pleasant evening on January 27, with a good attendance.

An interesting talk was given by M. M. Hurlihy of the St. Louis Division, who is a Veteran, and who told of the advance of many of our officials from the ranks, men who are now Veterans. Mr. Kehoe told of the benefits of the ladies' organization, and Frank Evans, retired engineer, and past president of the Veterans, gave an outline of the Ladies' Auxiliary and impressed upon

those present that the membership should include all of the wives of the Veterans.

A fine musical programme was rendered by the Harrod sisters, Miss Lucile Harrod recited, refreshments of ice cream and cake were served, and card playing and dancing were indulged in until a late hour.

The evening was enjoyed by all present, particularly by our (young?) brother "Con" Haffey who, when the music stopped, kept things moving by executing a pigeon wing, to everybody's amusement.

Michael and Dennis Hallihan, Brothers, Together in Ser- vice for Thirty-seven Years

MICHAEL J. HALLIHAN, passenger train conductor, Chicago Division, was born in Trenton, New Jersey, on August 19, 1855. He began working for the Baltimore and Ohio in 1873, with his father, who was a contractor, driving a team and holding a scraper when the Chicago Division, between Attica and Willard, was under construction.

Michael entered the service as brakeman

as soon as the road was completed. In 1879 he was promoted to freight conductor, and in 1883 to passenger conductor. This position he still holds on trains Nos. 5 and 10.

From June, 1883, until May, 1887, he ran from Chicago to Detroit, Mich., over the Baltimore and Ohio and the Wabash Railroads. When these runs were discontinued, he ran from Chicago to Wheeling, a distance of 470 miles. In 1890 another change was made, from Chicago to Willard, Ohio. This schedule is still in effect.

Dennis Hallihan, brother of Michael, who is a passenger brakeman, running with his brother, entered the service in 1885.

Three of the girls who made merry at the American Legion Carnival (see page 30). Lower, left, Margaret Davis; right, Edith Gerber; both of the Freight Traffic Department. Upper, Magdalene Lauer, office of Superintendent Motive Power, Eastern Lines

Women's Department

Edited by MARGARET TALBOTT STEVENS

The Code of a Good Sport

By Sarah Pennington

Daughter of Crossing Watchman P. M. Pennington, Polk Street, Cumberland, Md.

A LEAFLET was placed in my hands by a friend who knew that I was trying

it is necessary for him to learn the fourth commandment:

Thou shalt not be a rotten loser

He is the person who always has some feeble excuse for not winning.

The fifth commandment is usually broken because of jealousy. I remember reading of two boys, each a captain of a football team. One so despised the other that he did underhand work in order to win the game. He went so far as to sprain the other's ankle. But when he had seen the mischief he had done he became ashamed, apologized to the other, and they became fast friends.

Thou shalt not take unfair advantage

One day I was speaking to a friend on the subject of "daring." I boasted that whatever anybody dared me to do, I would do it. Then the question was put to me, "Do you think a person will make any headway by doing something silly, simply because somebody else dared him to do it?"

Thou shalt not quit

The second of these commandments has been haunting me ever since I have come to the realization that it, too, is one of my faults:

Thou shalt not alibi

Why do I not speak straightforwardly instead of trying to shield my own shortcomings by not speaking out the truth? I recall the wisdom of the little verse which says:

"Speak the truth and speak it ever,
Cost it what it will,
He who hides the wrong he does
Does the wrong thing still."

As I think over this commandment I realize that each day I have some excuse for not performing my daily tasks.

I have little to say about the third commandment:

Thou shalt not gloat over winning

A true sportsman is judged by the way he receives his reward. If he takes too much glory to himself, he might rightly be called a "vain peacock."

A bad loser is he who does not realize that

The answer I find in the sixth commandment:

Thou shalt not ask odds that thou art unwilling to give

The seventh commandment is beautifully illustrated in the story of "Hans Brinker," or, "The Silver Skates." The Dutch children were going to hold a skating race. The prize was a pair of silver skates. Rachel won them, but there would have been a tie, for her brother skated equally as well. Peter, Hans' friend, had broken his skate strap, and Hans let Peter have his skates so that he might win the race for the boys. Hans must have been thinking of the seventh commandment:

Thou shalt always be ready to give thine opponent the shade

Many of us have proved ourselves guilty of violating the eighth commandment. Sometimes the loser's vain excuse is that his opponent has taken unfair advantage. A true sportsman will shake hands with his opponent and say to him in a friendly way that he will win out in the next game. A true winner will be thankful for victory, but will never brag about it. The eighth commandment is:

Thou shalt not underestimate thine opponent nor overestimate yourself

My father told me a story that illustrates the ninth commandment. A man went through all kinds of sins for the sake of money, and he kept his eyes downward all of the time. He never looked up. If he had he would have seen the guardian angel standing with a crown of gold, worth more than any money he had ever seen. I won-

Dear Women Readers:

Some morning in the early Spring, when all the birds begin to sing, and Hubby has an appetite that threatens everything in sight; then get your biggest frying pan and try this omelet on your man.

First, chop some strips of bacon fine—I like a lot of it in mine—some onions, olives, garlic, too; then add some peppers—just a few. Cook these in butter 'til well done, then set aside. Now comes the fun:

Break your eggs and beat them well—two will do at the price they sell. With salt and pepper you may cook an omelet that is bound to look as puffed and yellow, fine as gold. Now, put in all the sauce 'twill hold. Slide it from your frying pan and place before your starving man. Then get two more eggs from the shelf and make one e'er you starve yourself.

Where did I get this recipe? Well, when you travel you may see, on the dining-car of Stewart Heller, a chef named Brookins, a dark-skinned "feller." For omelets good he can't be beat. Remember him now, when you eat.

And if you have a recipe that you most like, send it to me—I'll make a rhyme that's quite as silly, but what a meal for Tom or Billy!

Yours Sincerely,

Margaret Talbott Stevens

der if this man in his dying hour thought of the words of the ninth commandment:

Remember that the game is the thing and that he who thinks otherwise is a mucker and no true sportsman

The tenth commandment made the

strongest impression on my mind of all of the ten. It speaks for itself:

*Know the game that thou playest;
for he who playeth the game
straight and hard wins
even when he loses*

It just reminds me of a saying that I have heard: "Not failure but low aim is crime."

The Girls' Club at Columbus Freight Station Lives Up to Its Name

"Get Together" Means All That the Word Implies

By Edith Roach

THE accompanying picture is of the charter members of our "Get Together" Club at Columbus. The Club was organized by the girls of the office during the war. It was their idea that we should be more friendly and sociable, not only during the work period, but during leisure hours as well; that we would benefit by knowing each other's trials and troubles, also that we might be able to rejoice in each other's hours of joy and happiness.

Toward that end, an effort was made by the girls to get all employees and their families together as often as possible, for pleasure and for mutual benefit. That we have been successful, is very evident by the increased interest that is taken in the club.

The name was just an accident, and was furnished by Mr. "Tim" Payne, who is always ready to help the girls "Get Together." Mr. Payne says a better name could not be found, for it means all employees at this station, and all are proud and happy to belong to the club.

For pleasure we plan on entertaining for all weddings, birthdays, holidays, etc.; in trouble we are also on duty. As an illustration, one of our little girls lost her position on account of reduction in force, her health failed and she was rushed to the hospital for a serious operation. She was presented with one hundred and fifty dollars as a Christmas gift.

We never have any one shirk; something is planned and everybody is notified and usually everybody attends. If cats are to be furnished, the men's wives gladly do anything to help the girls out. The men furnish the money and the girls do the planning and arrange the event. It has been a great pleasure to get acquainted with those working with us and we would like to get acquainted with those working out on the division. We give them an invitation to some of our gatherings, or better still, we would have something special for them if they would let us know.

We have a club all our own, which we have named "The Sewing Club." We meet every two weeks at the home of one of the girls. The men claim that we are making things for a hope chest, but they

have guessed wrong, as we have invited a few of the men's wives to belong and their hopes are lost. The sewing club has proved very successful as we help each other with suggestions. Generally after we have finished sewing, we have a social hour and are served with refreshments.

The girls in the picture are, left to right: back row; Misses Kathryn Funke, Hazel Cashner, Anna Brown. Second row; Misses Mary Connell, Edith Roach, Lillie Sites, Marie Brink and Bess Sites. In front; Marie Welch.

Recipes

White Cake

Contributed by Mrs. W. D. Roebuck, Lima, O.

Two scant cups granulated sugar mixed with the well beaten whites of 3 eggs; $\frac{1}{2}$ cup butter or lard, a pinch of salt. Beat all together with a fork until it looks like whipped cream. Add 1 cup cold water, 1 teaspoon vanilla; 3 level teaspoons baking powder sifted well with 3 scant cups flour.

Icing—Boil 1 cup sugar in enough water to cover. When the mixture hardens when dropped into water, remove from fire and pour into beaten white of one egg. Beat until stiff and flavor with a few drops of vanilla.

The Story of Ispahan

*An Antique Persian Rug
Seventeenth Century, Reign of Shah Abbas*

I WAS born in a Persian village, where the birds sang among the roses. Dark-haired maidens with sparkling eyes and nimble fingers tied my knots so tightly and closely that I surpass all other rugs.

There are many sizes in my family. My knots are 400 per square inch. My dyes and colors have given me a richness of such rare beauty that only one blind to the artistic could fail to utter words of praise and admiration for me. Our family usually have a few borders, one wide, one with a beautiful floral design and one narrow border on each side.

My design is the Tree of Life, and my religious belief that the branches of the tree extend over a space greater than that between the sun and earth.

About are angels more numerous than the sands of the seashore or the beds of the stream. Immortal birds fly among the branches, repeating the sublime verses of the Koran. The fruit is milder than milk and sweeter than honey, and all creatures of God's earth, if assembled there, would find sufficient sustenance.

After many months of traveling on camel back to the sea, swept by desert sand storms, scorched by the orient heat, after changing hands in fair barter in the market place, I have reached a strange country, where the people have given me splendid care. Here I am waiting until I can find a permanent home where I will be appreciated as a member of the family.

In return I would promise to give my owner joy and service for all the days to come—From "Tips and Taps" (Hutzler Brothers Co., Baltimore, Md.).

Simple and Wearable Frocks to Brighten the Season's Wardrobe

By Maude Hall

THERE are many fabrics which to trim would be equal to gilding the lily or painting the rose, but there are others designed for the rich embroideries which can be achieved with such little effort by home needleworkers, and the trimmings for these materials are deeply indebted to black for their infinite variety. The checks and plaids, not omitting the stripes and broken patterns, are ravishing with their subtle tones and textures that befit the moods of every sunny day and hour.

An unusual thing about checks and plaids is that one finds them as beautiful in tub fabrics as in the silks and woolens. One of the most charming of the new models is developed in check voile, with collar and girdle of plain satin. A rosette of self-material finishes the girdle and through this is drawn one end of the girdle. The dress is in slip-on style, being slashed toward the front from the underarm seams, with the lower edges gathered and joined to the upper edges. The sleeves are gathered into straight cuffs.

A slip-on dress of quaint loveliness is fashioned in black voile with white embroidered polka dots. Hemstitched to the lower edge of the skirt is a deep fold of white voile, the hemstitching being done with Capri-blue silk. The sleeves are lengthened with deep cuffs of the white voile, similarly treated as the hem on the skirt. The contrast is the outstanding feature of the model, yet despite this, the note of simplicity is not lessened and the dress is one which

makes a strong appeal to all who see it. For the home dressmaker, it has no difficulties which should cause hesitation.

Particularly suggested for combinations is chintz print, which frequently shares fashionable favor with the very fine sateens. The chintz prints, however, are distinguished by small figures worked out in Oriental tones of russet, coppers, dusky purples and pansy shades. An attractive frock carried out in this fabric has a panel front of dark color, corresponding with one of the tones in the figures of the chintz. The two-piece skirt is attached to a front-closing underbody and the front of the overdress is cut away to show the panel of contrasting tone. Cutting away a part of the gore leaves the front in panel effect, and the lower edges may be extended below the hem or cut even with it.

Featuring all the novelty of nineteen-twenty-twoness is a coat of light-weight wool, which finds repetition in cheviot, the knit silks, and other sports materials. It closes high to the neck, unless one prefers the other arrangement, which lays the collar flat over the shoulders and opens the fronts to form revers. The plain one-piece raglan sleeves are finished with turn-back cuffs, while the patch pockets are caught in one with the underarm seams. The narrow belt is arranged under the coat in back, slipped through openings at the underarm seams and closed in front.

The sports type is the favorite coat for general wear because of its smart simplicity.

For Twelve Years and Under

In fashion's last word for youngsters, one graduates from bloomers after six and has for a substitute pantalets similar to those featured in the sports costumes of mother and big sister. The model to the left is suitable to development in wash fabrics or light weight woolens. The lower edge of the dress and sleeves are scalloped, while the round collar has a picot edge. Medium size requires 3 yards 36-inch material.

One need not be young to show a preference for dresses which feature a manipulation of the checks or plaids, as in the second model. Cut on the bias the material forms an effective trimming for the yoke and lower edge of the skirt. The round neck finishes its argument with a smart little ribbon bow. Medium size requires 2½ yards 36-inch material.

FIRST MODEL: Pictorial 'Review CHILD'S DRESS No. 9552. Sizes, 6 to 12 years. Price, 30 cents.

SECOND MODEL: GIRL'S DRESS No. 9482. Sizes, 4 to 10 years. Price, 30 cents.

WOMEN READERS!

You can get any pattern here shown by filling out the following coupon, clipping and enclosing with price shown (stamps, check or money order) in envelope addressed "Baltimore and Ohio Magazine, Mount Royal Station, Baltimore, Md."

Smart in Style and Fabric

These frocks are almost girlish in their smart simplicity. The first is fashioned in satin serge, with only a choker collar of chinchilla to sound a note of contrast. The flowing sleeves are the distinctive feature of the design, the armholes being cut down to the waist line. Medium size requires 4 yards 40-inch satin crepe.

For the second design crepe meteor is used, in a lovely shade of henna. The waist closes on the left side, and the gathered skirt is trimmed with a series of bias folds to imitate tucks. Medium size requires 4¾ yards 40-inch material.

FIRST MODEL: Pictorial Review Dress No. 9703. Sizes, 34 to 44 inches bust. Price, 35 cents.

SECOND MODEL: Dress No. 9591. Sizes, 34 to 42 inches bust and 18 to 20 years. Price, 35 cents.

Sizes of Patterns

TUNIC BLOUSE 9871. Sizes 34 to 46 inches bust and 16 to 20 years.

JUPON SKIRT 9873. Sizes 34 to 48 inches bust and 16 to 20 years.

DRESS 9840. Sizes 34 to 44 inches bust and 16 to 20 years.

DRESS 9836.—Sizes 34 to 50 inches bust.

DRESS 9926.—Sizes 34 to 48 inches bust.

DRESS 9940.—Sizes 34 to 46 inches bust.

JACKET 9917.—Sizes 34 to 42 inches bust.

DRESS 9842.—Sizes 14 to 20 years.

A Wise Mother

A WOMAN to whom four healthy boy babies were born, only to die of stomach trouble in their second year, brought with infinite care a fifth boy past the danger point and into his eighth year. Then he began to go to school, but became at once subject to attacks that no tonic or diet could help.

Finally, the mother, who had weak eyes herself, conceived the idea that her boy might be similarly affected. Her friends ridiculed the idea, but the mother, knowing

something of the subtle relation of the eyes to the rest of the body, took her son to a specialist in the nearest city.

The first day he wore glasses he said, wonderingly: "Why, Mother! Print is black, isn't it?"

"Yes, dear, what did you think it was?"

"Why, grey, and sort of mixed like, and besides, the letters look straight up and down now."

The child had a complicated defect which made it difficult for him to see things near at hand, although the eyes themselves did not seem to feel the strain. The stomach trouble vanished as if by magic.

* * *

The moral of this story is obvious. Never leave a "stone unturned" until you have discovered the cure for your child's backwardness. Very often it is defective vision.

Lesson in Home Dressmaking

Satin Crepe Makes This Frock for Informal Dinner or Theatre Wear

THE straight line is reiterated in frocks which give hints of styles for Spring.

This model for informal theater or dinner wear is developed in moonlight satin crepe, being in slipover effect with extended shoulders. One-piece sleeves gathered into bracelet cuffs may be added, if desired. The neck is in Florentine neckline. At the sides of the skirt are narrow panels which are inserted in the side seams and fall in cascade effect. If desired, the panels may be of lace or of contrasting material.

As pictured, the dress in medium size requires 3¾ yards of 36 inch crepe. Nothing could be simpler for the home dressmaker than this model, for the front and back are both seamless. Sections "K" and "L," indicating the front and back, respectively, are laid along the lengthwise fold of material, the triple "TTT" perforations resting directly on the folds. The belt, being a straight strip of material, may be cut from the crepe left after cutting the front. The panel is placed to the upper right of the back.

In cutting the neckline, follow the perforations indicating the style preferred. Then slash the front and back in from underarm edges between the small "o" perforations. Gather lower slashed edges between "T" perforations and sew to upper slashed edges with underarm edges even. Take up ¾-inch seams at underarm edges and graduate into nothing at the inner

edges of slashes. Close underarm seams as notched, leaving edges free from the large "O" perforation in back section to neck edge, and finish for closing. Turn under 6¾ inches at lower edge of dress for a hem, or finish the lower edge with scallops. If scallops are used, of course, the skirt would be cut shorter.

Next, insert panel in the underarm seam of skirt, below the slashes, matching the double notches. Form forward-turning plaits in panel, bringing the slot perforations together over the small "o" perforations and tack. Have the armholes and edges of the panels picoté for an effective finish. The belt may be one of the novelty affairs so much in vogue this season.

DRESS No. 9802. Sizes, 34 to 42 inches bust. Price, 35 cents. (Lesson in Dressmaking.)

My Dollies' Washday

*When my dollies' washday comes, I get my tubs and line,
My clothespins and my laundry bag, and all their linens fine.
My dollies have so many clothes that when they get them soiled
They have to be rubbed full of soap and boiled, and boiled and boiled.*

*And then I take each piece with care and lay it in my tub,
And where the spots have not boiled out, I rub and rub and rub.
Then at last the bluing comes, and sometimes lots of starch,
For dollies' clothes must be made stiff to stand the winds of March.*

*My clothes line is a piece of string, stretched tight between two trees,
Just where the sunbeams come to play and where the hard winds tease.
My dollies? Oh, they're safe in bed when washday comes, you see,
But they will have their clothes all back in time to dress for tea.*

Ellen's Wild Flower Garden

ELLEN was a little girl who lived far out in the country, where there were so very few neighbors that she had more companions among the flowers and woodfolk than among any other people.

One day in autumn, Ellen saw her father transplanting some wild strawberry plants from the field to the garden.

"Oh, Father," she cried, "what are you going to do with all of those wild strawberries?" Father laughed.

"When I take good care of them, plant them in rich soil, and work around them, they will grow very large. And when the berries come, they will be quite as fine as the other cultivated berries."

"Oh, oh!" exclaimed little Ellen, her eyes opening wide in astonishment, "then I wonder if you can't grow wild flowers like that?"

"I shouldn't wonder," replied her father, "Why? Do you want to try it?"

"I'd like to; but wild flowers have to grow in shady places, don't they?"

"Then why not try transplanting some next Spring? Get them from the woods and plant them under the shade of the big chestnut tree that stands above the pump and hangs over the corner of the garden. There's a fine, shady, damp place for you."

So little Ellen was overjoyed at the thought. She could hardly wait for Spring to come.

By and by the days grew very cold. Old King Winter spread his cloak of white snow over the earth. Then little Ellen knew that he was keeping the little flowers warm under the earth, and that as soon as the snow melted the flowers would begin to stir their roots.

"Father," said Ellen one day, "isn't it almost Spring?"

"Almost," replied her father. "As soon as the snow melts I shall begin to make hotbeds for my radishes and lettuce."

By and by the snow melted. Then came a bright Saturday when Father picked up his trowel and a large basket.

"Come along, Ellen," he called, "we'll see what we can find."

"Find? Oh, what do you mean? Not wild flowers?" And Ellen was so excited she could hardly find her hat and coat. Soon they were on their way.

"Yes," said her father, "I saw something this morning that you would like. Guess what?"

"Not a——violet!"

"Yes, a violet!"

"Oh, goody, goody! Where was it?"

"Stop right where you are and look down at your feet."

Ellen stopped short and looked. There, right before her very eyes was the prettiest, bluest violet she had ever seen. How beautiful it was—so beautiful that Ellen stooped right down and kissed it!

Then Father took his trowel and lifted the violet with the whole clump of buds and leaves, roots and all, and put it into the basket. Then they walked on and on through the woods. Soon they came to a whole patch of violets which were so blue that they made the whole world seem as though it might be covered with a blue carpet. They gathered lots and lots of them and picked out the prettiest clumps to bring home. Ellen made a little bouquet to take to mother. Then they started up the hill. Soon Ellen stopped quickly and

with a little cry called, "Oh, Father, I've found some bloodroots!" And sure enough, when Father came with his trowel, he found seven lovely white blossoms on their pink stalks. They gathered these into the box, being careful not to break the long roots and to leave a plenty of the woody earth around them.

"Well," declared he, "if the bloodroots are in bloom, it's time for hepaticas, too."

"Yes, and anemones—why, here are some anemones right here!"

And in a little while they had found not only anemones and hepaticas, but the lovely pink and white lady's slippers, showy orchis, Jack-in-the-pulpits, and wild geraniums. What a lovely time they had gathering them! Then they brought them home, and Ellen found that Father had dug up the ground in the corner of the garden, under the big chestnut tree, and that everything was ready for the transplanting.

They planted the violets in a little round bed, the hepaticas in a mound, the anemones and bloodroots in little circles as they grow in the woods, and the stately lady's slipper and showy orchis stood like little sentinels to guard the whole little garden. A big Jack-in-the-pulpit stood at each end and preached their sermons to the other flowers.

On the next morning when Ellen ran into the garden the flowers all seemed to be quite withered, but she watered them as her father had told her. Two days later all of the little heads save those of the blood-roots were standing straight up.

In another week they were all in full bloom again, and Ellen gathered a bouquet for the table. She tended them carefully, dug around the plants to keep the soil loosened, and when Father made the big garden he put a bit of fertilizer around Ellen's plants. She did not need to water them very often, for the ground was already damp. About once a week during the summer, long after the wild flowers had stopped blossoming, she took out her little hoe and rake and looked after her plants.

At last King Winter came again and spread his cloak of snow, and once more Ellen wished for spring to come, for she would have wild flowers right in her very own garden.

One day when the first winds of March began to blow, Ellen found not only her old plants coming up, but ever and ever so many new ones. How happy she was!

Then came the buds, and one morning in the latter part of March, Ellen found six violets, two anemones, and a whole handful of bloodroots. But what surprised her most was that the flowers were even so much larger and beautifully colored than they had been when they grew in the woods. And for weeks Ellen had beautiful flowers for the table and some for her teacher. Her little friends at school could hardly believe that wild flowers could grow so large until she told them how it happened. "Just like Father's strawberries," she said.

Ellen kept her flower garden for many

years, until she grew to be a young lady. And whenever people came to see her garden she would tell them that flowers are like little children, for they are always happier when they have someone to love them.

A Funny Story from Our School

By Grace Elizabeth Shawen,

Daughter of W. M. Shawen, telegrapher,
Baltimore, Md.

DURING the last hunting season a boy in my class was given two rabbit tails by his father. Tying them on the ends of a string, the boy put one rabbit tail up over each of his ears, making him look like Uncle Remus with his two little patches of white hair on either side of his head. When the teacher looked up from her work, the boy who sat behind would pull the string and the rabbit tails would flop out of sight so that the teacher could not see them. This silly trick kept the class laughing—when the teacher was not looking—for some time. Now whenever I see a rabbit it makes me think of this boy who sat in school with the rabbit tails over his ears.

My Pet Cow, Nellie

By Elsie Elizabeth Glanzer

Daughter of Machinist Herbert F. Glanzer,
Jessup, Md.

Nellie has a little calf
We have named her Daisy,
Every time she jumps and plays
We know she is not lazy.

Nellie has a little calf,
She's such a little one,
When we go to the stable
We're sure to have some fun.

Nellie has a little calf,
She has a little head,
Every time her mother moo-oo-ooos
She thinks it's time for bed.

Nellie has a little calf,
She's speckled brown and white,
Everything her mother does
She's sure to do it right.

Nellie has a little calf,
She is very small,
One day we took Nell away,
And she didn't like it at all.

Easter Goodies

EASTER, like Christmas, must have its sweets for the children, and home-made candies are particularly wholesome. Once upon a time, candy-making was considered an art that could be acquired by only a few, but since we have learned that most delicious candy can be made without

cooking, we are all tempted to "try our hand." The following recipe, contributed by the wife of one of our Railroad men, will be found valuable to those who make their own Easter goodies.

Easter Eggs

One pound granulated sugar, $\frac{2}{3}$ cup water.

Stir together in a saucepan and boil without stirring until when dropped from a spoon into water a very soft ball is formed. Remove from fire immediately and beat briskly until a stiff, white creamy mass is formed. This may be kept soft for several days and used as needed if put into a bowl and covered with a cloth that is kept damp.

More about Indians

How They Locked the Door

By "Bobby" Pennington

THE Indians once owned this land on which we now live. They were here when the first white people came. When Christopher Columbus landed on the Bahama Islands, the Indians were very badly frightened. They thought that Columbus and his men were gods descended from the heavens, and that his ships were birds. Columbus named the place on which he landed "San Salvador," meaning Holy Redeemer.

The Indians were separated into various tribes which inhabited different parts of the country. The higher classes of Indians lived in villages called pueblos. These were made of a number of houses clustered together under the same roof. In order to get into a pueblo it was necessary to climb a ladder, then pull the ladder up after them. But today, we lock the door. Other tribes of Indians lived in wigwams. Many and bloody were the battles that they waged against each other.

When the Pilgrims came over, they made friends of the Indians. The Indians taught them how to plant corn, to girdle trees, and to do many other things. When the har-

vests came, the Pilgrims were grateful to the Indians, and when they held their first Thanksgiving Day celebration, they invited the Indians to share it with them.

Still Have Savage Customs

By Kathryn Hadden, Dover, Ohio

INDIANS belong to a copper-colored race of men. They have high cheek bones, coarse, straight, black hair, and small, dark eyes. They are slim and tall.

In the early days most of the Indians lived in wigwams, but some lived in houses made of elm bark. There were openings in the roofs to allow the smoke to escape.

Their weapons were bows and arrows, stone axes and tomahawks, but they obtained guns from the white men. Their clothes were of skins, particularly those of the buffalo and the deer. They painted their bodies and faces in brilliant colors and adorned their heads with feathers.

The few Indians that are now remaining in the United States have made good use of what the white men have taught them. They now go to our schools and colleges, although there are many of them to be found in the Indian territories and reservations. These live in wigwams and still have the savage customs.

ROSEBUDS THREE

Margaret Jane, little daughter of Vernon A. Lyon, ticket office, Clarksburg, W. Va.; Margaret Arbeit, Pittsburgh, Pa., Children's Page contributor; Little Danny, son of Engineer E. W. Weaver, Baltimore Division

News from Our Little Folks

HOW do you like Louise Barker's story, "The Pot of Gold?" Wouldn't it be fine to find one like it? When Louise wrote the story she said that the little girl found the pot of gold under the carpet. Well, it was a mighty big carpet or a mighty little pot of gold that she didn't notice it before she swept; so, Aunt Mary went and dug a hole in the floor under the carpet to set the pot in.

Gertrude Cassell, Morgantown, W. Va., has been so busy playing with her Christmas toys that she hasn't had time to contribute to our page, but she'll be along soon again.

Sarah Pennington, Cumberland, Md., went to sleep one night and woke up frightened almost out of her wits because a big lot of plastering had fallen on her. She thought that the roof had fallen in. Sarah has had some fine reports in her school work, although she persists in spelling "ache" a-c-k-e.

We have lots of new little folks who have entered the contest, as well as some new ones who have sent in other contributions for Our Page. All of these we shall hear from later.

Viola Anna Saltz, who lives at 830 Jefferson Avenue, Chillicothe, is saving up bread labels to get a pony. Viola Anna is only seven years old, but she writes a nice letter. If any of you little folks know what kind of bread labels these are, you might help her out, that is, if you are not saving them for yourselves.

Grace Louise Shawen, Baltimore, has written us a little story, and Elsie Elizabeth Glanzer, Jessup, Md., has written us a poem about her cow, Nellie. I am sure that you will want to read these.

"Jim" Sampsel, Jr., Washington, D. C., gave away all of his bunnies to the milkman. We s'pose "Jim's" getting too big to play with rabbits any more. First thing we know he'll be wearing long trousers and shaving off his mustache.

The Pot of Gold

By Louise E. Barker, Daughter of T. H. Barker, Storekeeper, Ivorydale, Ohio

MANY years ago there lived in a forest of England a poor woman and her only child, whose name was Elizabeth.

Elizabeth was very pretty and very kind. Her mother was a poor woman, so Elizabeth had to go out to work. One day she did not have any work to do, so she went out into the woods.

After wandering around for a long time, she spied a little hut. She knocked on the door.

"What do you want?" asked a little man, who came to the door.

"I would like to work for you," said Elizabeth.

"Well, you may work for me," he replied

So Elizabeth went in and washed the dishes and swept the floor. Then she went upstairs to the little bedroom and made the bed. After that she went downstairs and prepared the supper. When the old man came home he was well pleased.

She did this every day for a long time.

One day, after she had worked for him for about a year, she was sweeping the floor, when she noticed a great hump in the middle of the rug. What do you think it was?

She lifted the rug, and there lay a pot of gold. How happy she was when the man told her that it was her own. She thanked him and ran home to tell it to her mother. They lived happily ever after.

Dear Girls and Boys:

By the time that this issue of the MAGAZINE reaches you the "Our Town" contest will be over. At this writing it seems that we are going to have lots of little people enter it. Next month we shall give the names and pictures of the prize winners, and I shall be able to tell you all about it.

Now, let's go ahead and have lots of other nice things for our page. Let's have more poems and stories, pictures and your own photographs. Have any of you little folks ever made either flower or vegetable gardens? If you have, write and tell me all about them. What do you like to raise? What flowers do you like and why? Who knows the names of ten different wild flowers that grow in the woods nearest your home? Who can draw pictures of flowers and birds for our page? Who knows the best way for little folks to save their money? What are you going to do when you grow up to be men and women? What studies do you like best and why?

These are some of the things that some of the new little folks might like to tell me when they write. The others know all about what kinds of things we like on our pages. So, come on, everybody. There's room for all. We have about sixty or more little folks on our list who have already written stories and poems and sent in drawings for the Children's Page. Let's make it reach one hundred by the first of April.

I send you all my love.

Aunt Mary

the Riddle" on page 12
of this issue of the Magazine

A Little Indian Girl

By Louise Perry,
Dorsey, Md.

ONCE in the mountains there lived a little Indian girl with her father and mother. Another tribe of Indians was making war on their tribe, and the warriors were approaching the territory in which this girl and her parents lived. But the father was getting old and was no longer able to fight. He said "We shall have to find a means of escape, or we shall be shot to death."

At night they set out. They travelled at night and hid themselves during the day. At last they came to a river where lived a tribe of Indians who were peaceful with the tribe from whence they had come. They invited the old man and his family to remain with them. The old man said, "It pleases me much to stay with you." So they remained with these kind Indians for the rest of their lives.

The Three Bunnies

MANY of our little folks will want to make some of these nice little bunnies, of flannel or other material, as a gift for little brother or sister at Easter time. Their names are Pete, Ned, and Biff. Sometime Aunt Mary is going to write you a story about them. These bunnies may be made from *Pictorial Review* Transfer Pattern No. 12347, in blue or yellow, which may be had by sending your name and address and twenty cents in stamps to Aunt Mary, Baltimore and Ohio Magazine, Baltimore, Md.

The pattern contains three styles, that is, three different kinds of bunnies may be made from the one pattern, and two of each kind; six in all. These bunnies are from nine to eleven inches high and may be made from flannel, gingham, chambray, or any other material of a plain color. After they are stamped and sewed, the bunnies are stuffed as fat as you like them. A few embroidery stitches will make the eyes, noses and whiskers look like those of real bunnies. Tell mamma that these patterns may be used in applique effect on bibs, towels, little folk's aprons, and many other things that little people use. If you will hang a bell on a ribbon around Bunny's neck he will make a nice little toy for baby.

Pete, Ned and Biff

Veterans Meeting at Garrett

(Continued from page 33)

and each gave an interesting talk. W. T. Egan, delegate to Grand Convention in Baltimore, on January 5 and 6, made a favorable report. It was stated that the Grand Association had made some progress during the past year towards one of the principal objects of the Association, the Pension Feature. It was the consensus of opinion of all members present that a pension plan should be adopted with as little delay as possible, that would permit the employes to pay monthly from their wages any amount agreed upon that would allow a pensioner to live his declining years in comfort. After the meeting a banquet was served in the basement of the Christian Church under the auspices of the ladies of that church; 160 covers were laid. The menu and service were enthusiastically commended. It is needless to say that these comments only uphold the reputation that the ladies of this church have previously enjoyed.

After the banquet the Veterans retired to the auditorium of the church and enjoyed a program consisting of songs and music rendered by Brothers Floyd Jones, V. P. Snyder, Coney Schomberger and Charles Lembach; Mrs. Floyd Jones was the accompanist. Several short, interesting talks were given by various ministers of the city as well as by some of the brothers of the association. After enjoying this program the meeting adjourned at about eleven o'clock, each one expressing a desire that the "Old Vets" duplicate the occasion again early next year.

Martinsburg Veterans and Ladies' Auxiliary

Mrs. Virginia C. Taylor, Correspondent

THE merry time that we "girls and boys" had while attending the sessions of the Grand Lodge at Baltimore in January will not be forgotten soon by the folks at Martinsburg.

What fine folks our Western Veterans and their wives are! We had such a jolly time meeting them that some of us were of the opinion that we were again in our second childhood. And how our ladies from Martinsburg did enjoy it, and how they did vie with each other in boosting our splendid organization!

We, as delegates and visitors, hereby extend a vote of thanks to President Willard for his inspiring address; to Vice-President Galloway for entertaining us at the theatre party at the Academy; and to Messrs. Bowers and Sturmer for their helpful talks. We drank in every word!

Our banquet on January 26 was quite a success. With visitors from Baltimore and Cumberland, including the Cumberland Shop Band, we made merry and ate to our hearts' content.

The next thing we now have in mind is our membership campaign. There are now

about 140 members in our Auxiliary, and our goal for 1922 is 240 members. We'll get them or "bust" trying. We have the material here from which to draw; all that is necessary is for us to go after 'em. Co-operation will do the work.

To Sister Scanlon goes the heartfelt sympathy of the Ladies' Auxiliary in the death of her helpmeet. May God comfort her in her great loss and give her strength to wait—

"Wait 'til the shadows lengthen as sinks
Life's setting sun,

Until dawns that better morning when the
parted shall be one."

William H. Harrigan

VETERANS of the Baltimore Chapter will recognize this photograph of William H. Harrigan, financial secretary of that lodge.

Mr. Harrigan first entered the service of the Baltimore and Ohio at Riverside in 1887. He is still employed at that point. He is one of the charter members of the Veterans' Association at Baltimore and was the forty-third man to sign the charter. The esteem in which he is held by his brother Veterans is evidenced by his recent re-election as financial secretary for the fourth term, without opposition. Hats off to Brother Harrigan!

John Englehart

THE accompanying picture is of John Englehart, a Veteran and pensioner. Mr. Englehart is one of the oldest residents of Dorsey, Maryland.

"Uncle John," as he is known to many of his friends, was born on February 17, 1851. He entered the service of the Baltimore and Ohio on May 3, 1882. He was pensioned at the age of 65 years. He has a pleasant home at Dorsey, where he spends his time working in his garden and in raising chickens. He is highly respected throughout the community and always has a good word for the Baltimore and Ohio. We gladly doff our hats to "Uncle John."

W. H. Harrigan, financial secretary, Baltimore Chapter, and John Englehart of Dorsey, Md.

Mr. Curren Addresses Baltimore Veterans

By J. Ross Gould,
MAGAZINE Correspondent

BALTIMORE Chapter of the Baltimore and Ohio Veterans was favored by an address from W. G. Curren, general superintendent of Transportation, at its meeting on February 6.

Mr. Curren stated that freight business on our Road showed some improvement but that passenger traffic showed a decided decrease.

Now as the writer is a Baltimore and Ohio Veteran who took some interest in the Veterans' drive for freight for our road, which added considerably to the Railroad's tonnage, I would suggest that we all start a drive, not confining it to Veterans, but that every employe of the Baltimore and Ohio use whatever influence he has with the travelling public to help boost the advantages of travelling by the Baltimore and Ohio.

Let us pull off our coats,
And work with a will:
So the Baltimore and Ohio
Will hold her place still.

Cincinnati Veterans Elect Officers

By Joseph Beel, MAGAZINE Correspondent

THE Annual meeting of the Veterans' Association, Cincinnati Terminals, was held on January 19. The following officers were elected for the new year.

J. M. Hughes, president; J. J. O'Donnell, vice-president; W. C. Owen, secretary; H. S. Howdon, financial secretary; E. A. McAvoy, treasurer; H. W. Oldenberg, sergeant at arms. Directors: C. E. Fish, L. A. Cordie, S. O. Mygatt, J. M. Burke, Thomas A. Gibbons. Delegate to next Annual Convention: H. S. Howdon.

The report of Treasurer E. A. McAvoy showed a nice balance on hand with which to commence the new year.

The Auditing Committee, consisting of Messrs. Cordie, O'Donnell and Howdon, examined the records and report our financial condition first-class.

There are a great many men who have been in the service of the Baltimore and Ohio for 20 years or more, who are not members of the Veterans' Association. We cordially invite all who are employed in the Cincinnati Terminals or who have their headquarters here, to join our chapter.

Newark Veterans Please Note

THE attention of Newark Division Veterans is called to the fact that Elmer E. Moore, air brake inspector, Newark shops, has assumed the duties of secretary during the illness of Brother John Price. Your yearly cards can be secured by writing to Mr. Moore, care Roundhouse, Newark Ohio.

Safety Roll of Honor

New York Terminals

On January 11, during a terrific northeast gale and rough seas, the following boats, tied up in slip between Piers 4 and 5, St. George, were more or less damaged: 201, 203, 317 and 335. Lines crossing them caused these boats to be thrown against a pile driver and raft loaded with piling. Had it not been for the courage displayed by Dock Foreman Robert W. Kelsey, Dock Sweeper Edward Gilbert and Lighter Captain John McWilliams, in protecting the Company's property when their own lives were in danger, the damage to the boats would have been very serious.

In recognition of the valuable service rendered in this particular case by Messrs. Kelsey, Gilbert and McWilliams, the management desires to commend them for protecting the Company's property under such dangerous conditions.

On January 24, Edwin Terwilliger, captain of tug George L. Potter, discovered lighters adrift in slip north side Pier 6, St. George. He picked up the lighters, pushed them back in the slip and made them fast. He is hereby given meritorious mention for the interest displayed in watching and protecting property.

Baltimore Division

On January 29, the day after the great snow storm which piled the drifts mountain high, O. I. Daley, car inspector, during his inspection of a westbound train, found a badly broken wheel on C. N. & W. 81158, which was almost broken in half in both sides of the wheel plate and through the flange. Inspector Daley caught this defect shortly before train was due to depart and car was cut out and shopped. The action of Inspector Daley was probably instrumental in averting a wreck on the line of road. This man was certainly "on the job" at a time and under conditions when the average man might be tempted to relax.

BALTIMORE, Md.,
January 25, 1922.

MASTER WILLIAM SCOTT,
MASTER FRANKIE MARYIANES,
Care of Operator E. J. SCOTT,
Landenberg Junction, Del.

It has been brought to my attention that while on your way home from school at about 4.00 p. m. on January 11, you found telegraph pole with wires attached, across our Landenberg Branch track, which with considerable trouble, and while storm was raging, you were able to remove, clearing the track just ahead of No. 43.

I wish to commend you for your prompt and thoughtful action in connection with this matter and to express my appreciation for your having performed an act which probably averted an accident.

Very truly yours,
(Signed) F. G. HOSKINS,
Superintendent.

BALTIMORE, MD.,
January 31, 1922.

MR. RANDOLPH CRAMPTON,
Buckeystown, Md.

Dear Sir—It is learned that you discovered a broken rail in the westbound

track west of Mile Post No. 61, at 4.00 p. m. on December 23, 1921, while driving across the track at Farm Crossing east of Buckeystown Station. You drove to Buckeystown Village and called Foreman Fisher on the telephone and advised him of the condition.

This letter is written in appreciation of the action taken by you.

Yours truly,
(Signed) F. G. HOSKINS,
Superintendent.

On January 13, while wreck train was returning to East Side after clearing the tracks of a freight wreck at Covington, Engineer Heeps, in charge of wreck crane X67, discovered broken arch bar on car upon which crane X67 was placed. Through this discovery and the careful handling of the train by Engineer Heeps and Wreckmaster Pope, the train was brought safely back to East Side.

Cumberland Division

On the evening of December 21 Foreman Rankin, Telegraph Department, while working between Hutton and Oakland, found it necessary to truck out cable, and in order to protect the movement, sent Raymond M. Nesmith, groundman, back to flag, with instructions to hold all traffic after No. 56 had passed. In going back to perform this duty Mr. Nesmith discovered a badly broken rail, which might have caused serious trouble. It was time for No. 56 to arrive, and he ran on back, flagging the train. The division engineer and supervisor happened to be on the train and the rail was repaired before train passed over.

CUMBERLAND, Md.,
February 17, 1922.

MR. I. A. THOMAS,
Postmaster,
Okonoko, W. Va.

Dear Sir—I am in receipt of advice that on the morning of February 11, while extra east 4401 was passing Okonoko station, you noted broken arch bar on C. & P. A. car No. 12692, 37th car from engine; that you took the matter up with our operator at Okonoko tower, who made arrangements to stop the train, and that car was set off at Little Cacapon.

Your interest and prompt action displayed in this instance, no doubt averted a serious accident and I wish to extend to you the appreciation of myself, as well as that of the management.

Yours truly,
(Signed) C. W. VAN HORN,
Superintendent.

On February 5, Flagman F. E. Hobday, on extra 4435, west, which passed extra 4403, east, in Ambrose's Curve, observed P. & R. 85565 in the latter train, with broken spring hanger. He threw off a note to the train dispatcher as his train passed Sir John's Run. Extra 4403 was stopped at Sleepy Creek, where examination showed that spring hanger had broken and car was set off.

On February 23, while No. 94, engine 4832, stopped at Hardman for a helper,

General Foreman W. P. Cannon discovered side bearing missing, south side, east truck of C. C. C. & St. L. 54402. He immediately had repairs made and car went forward in same train. Probably averting a derailment, Mr. Cannon is commended both for his careful observance and quick action.

Connellsville Division

CONNELLSVILLE, PA.,
January 31, 1922.

O. M. BOYER,
Section Foreman,

Dear Sir—I have been advised that on January 23 you stopped No. 71 at the west end of Leith, because of brake rigging down.

Your prompt action is appreciated as you probably averted an accident.

Yours very truly,
(Signed) H. R. GIBSON,
Division Engineer.

Pittsburgh Division

On Thursday, January 19, a serious accident was narrowly averted at Glenwood Station by Storeroom Laborer C. Fredericks, when a truck, having made a delivery at Glenwood Store Room, started over the main tracks directly in front of train No. 13, engine 5062, in charge of Engineer Gregory. Mr. Fredericks noticed No. 13 approaching, ran to the driver of the truck, warning him to stop and thus prevented what might have been a serious accident. His interest in this matter is greatly appreciated.

Charleston Division

Operator Gross has been commended for noting brake rigging down on a passing freight.

Mr. T. E. Crumby, of Dorfee, found a slide on the track near that point. He flagged passenger train, and notified the crew of obstruction. Mr. G. W. Young of Clendennin, discovered a fish plate broken and end of rail loose. He notified agent, who had repairs made. Mr. H. C. Helmick, of Silica, W. Va., found a rock on the track at Mile Post 70. He notified our dispatcher by telephone and arrangements were made to clear. Mr. S. B. Bean, of Marcus, W. Va., found a broken rail near Mile Post 91; he remained at the spot some three hours and flagged No. 61, advising the crew of obstruction. All these gentlemen have been written letters of thanks by the superintendent.

Conductor W. F. Schroedetski, who was commended for discovery of broken rail. See Baltimore Terminal Division Honor Notes, February Magazine, Page 55

Superintendent Weaver of the Express Company has been requested to express appreciation to Messenger Emigh for assistance rendered at a slide on the Elk Line.

Trackman W. M. Smith, Section 13, has been commended for noting brake rigging down on baggage car of train 37.

Water Station Foreman D. D. Nicholas, Repairmen Roach, Scrivens and McCune have been commended by the Superintendent and general superintendent for assistance in clearing a slide at Strader.

A commendatory letter has been sent to the following employees for valuable assistance rendered in clearing obstructions from the main track, without waiting for arrival of section men: Conductor W. M. Young, Brakemen J. R. Fox and J. P. Swartz, Engineer R. K. Ankrum, Fireman L. B. Jones, Conductor H. B. McLaughlin, Brakemen H. G. Northcraft and C. C. Coger, Engineer L. R. Shomo, Fireman J. Buckner, Conductor B. R. Bragg, Flagman Fury, Brakemen J. Bee and R. L. Boggs, Engineer R. J. Vassar, Fireman Edward Hall, Conductor R. Shelton, Flagman McCue, Brakeman P. Bazzle, Engineer H. Murphy and Fireman A. Groves.

Brakeman J. D. Fury has again been commended, this time for noting bent axle on Baltimore and Ohio No. 97643.

Machinist C. D. Caruthers has been commended for close inspection of engine 2944.

Conductor H. E. Bragg and Flagman A. M. Malcomb have been commended for finding and repairing broken rails near Hampton and Gassaway.

The following engineers have been commended for making 100 per cent. or over in fuel performance record in January, 1922:

R. E. Murphy, H. Robinson, W. T. Spencer, W. J. Johnson, Hefner, W. T. Powell, M. Morrison, A. C. Whitecotton, J. W. Paisley, A. B. Nicholas, Hoover, Cross and Poling.

New Castle Division

On February 3 Track Foreman A. Gaski discovered brake beam down on car in No. 68. He immediately notified train crew, who had brake beam repaired, thus preventing the possibility of an accident.

On February 4, while extra east, engine 4073, was passing Lowellville, Operator L. H. Dover noticed brakes sticking on one of the cars. He notified train crew, who had train stopped and brakes released.

On January 29, while in charge of No. 82, Conductor T. J. Morrison noticed an unusual condition in the curve west of Warren, Ohio. He reported to the dispatcher that a broken rail on this curve was probably responsible for this condition. Upon examination by section men it was found that 18 inches of the ball of rail were missing, and it was necessary to make repairs before the following train could proceed.

Brakeman John Whitman, while working as brakeman on eastbound local, January 6, noticed brakes sticking on Pullman car in train No. 13. He immediately notified operator, who had train stopped and brakes released.

While extra east, engine 4098, was passing Lodi on January 5, F. R. Gault, assistant signal maintainer, noticed wheels of front truck in car sliding, and getting very hot. He notified the train crew who had train stopped and wheels released.

Conductor T. O'Leary, while in charge of extra east, engine 4125, discovered broken

rail in main track about one mile east of Chardon, Ohio. Sectionmen were notified and made the necessary repairs. Conductor O'Leary's interest in the safe operation of traffic undoubtedly averted a possible accident.

On December 11, while Leading Car Inspector Roy Frazier was making his rounds through New Castle Junction Yards, he noticed broken rail on track No. 17. He immediately notified yardmaster in order that the necessary repairs could be made.

On December 13 Car Inspector "Sam" Colella, while coupling up air hose in train, discovered broken wheel on S. F. R. D. car No. 13129. Yardmaster was notified. He had car thrown out of train, thus removing a most dangerous condition, and averting a possible accident.

All of the above named employees have been written letters of appreciation by Superintendent Stevens, and commendatory entries have been placed upon their service records.

Newark Division

About seven o'clock on Sunday morning, January 8, Operator O. M. Varner, Bridgeville, Ohio, noticed an object lying in the middle of the main track, about 100 yards east of the tower. Upon investigating he found it was a brake beam and rigging which had become detached from passing train. He removed it and while removing it, found a broken rail opposite guard rail in main track. He called attention of the section foreman at Sundale, and repairs were made. Entry has been made on Mr. Varner's record, and the Superintendent has commended him for his alertness and personal interest.

Cleveland Division

CLEVELAND, OHIO,
February 25, 1922.

W. M. WEBBER,
Operator,
Stillwater, Ohio.

Dear Sir—I understand that on February 24, when train 2nd 81, engine 4199, passed Stillwater, you noticed something wrong with Baltimore and Ohio car 26547, head car in train, and made immediate report of same to dispatcher who had train stopped at Uhrichsville and developed that car had broken arch bar. It was set out. Your careful observance in all probability averted an accident.

I presume you understand that all commendatory entries are placed on the records of our employees in red. I had an occasion to review your record recently and assure you it had a very reddish appearance. It speaks volumes for your interest and loyalty.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO,
February 9, 1922.

P. M. CARPENTER,
Brakeman,
Cleveland, Ohio.

Dear Sir—I understand that on February 4 you were brakeman on passenger train No. 48 and were riding in coach 3357 and while passing Lake Junction, noticed that car was not riding as it did leaving Chippewa Lake. You immediately notified conductor who made examination of car while stopped at east end of siding and discovered broken tread in wheel on this coach. The car was carefully watched until it arrived at Massillon, where repairs were made.

I certainly appreciate your alertness in this case, which, if not discovered and carefully watched, might have caused a serious

accident. I want to commend you and trust that you will continue to give special attention to the condition of your train at all times.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO,
February 9, 1922.

D. F. AKERS,
Agent-Operator,
Tippecanoe, Ohio.

Dear Sir—I understand that on February 8 you discovered a broken rail just west of Tippecanoe Station and that you reported it immediately. This was about half an hour before you were supposed to report for duty. We learn also that you flagged extra 4007, east, in order to prevent an accident.

I desire to express my appreciation to you for your careful observance and prompt action in this case and I have arranged to prepare proper commendatory entry to be made on your record.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO,
January 20, 1922.

P. C. STOCKER,
Engineer,
Dover, Ohio.

Dear Sir—My attention has been called to the fact that on January 11, while you were waiting at Dover for train 59, train 83, engine 4214 passed. You noticed brake beam dragging on tank of the 4214 and immediately notified engine crew who stopped train and made necessary repairs.

Your watchfulness in this case in all probability averted an accident and I want to commend you for your interest.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO,
February 3, 1922.

C. E. WOOD,
Operator,
Beach City, Ohio.

Dear Sir—I understand that on January 31 while engine 4277 west was passing Beach City, you discovered the brake rigging down on car next to engine and immediately notified Conductor Runge, who had car set off.

We appreciate your watchfulness in this case and believe that a serious accident was averted. I want to commend you and hope that you will continue to observe passing trains.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO,
January 27, 1922.

S. STANCU,
Section Foreman,
New Philadelphia, Ohio.

Dear Sir—We understand that while you were working on westbound track, one-half mile east of Reeves Crossing, on January 24, you noticed brake beam down and dragging on Baltimore and Ohio car 224673 in train of engine 4277 west. You flagged conductor on the rear end and notified him accordingly. The train was stopped and car set off.

I appreciate that if car ran much further in this condition it would have probably caused an accident. I want to commend you for your careful observance of passing trains.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

CLEVELAND, OHIO,
February 16, 1922.

C. B. BLYTHE,
Agent,
Mineral City, Ohio.

Dear Sir—I have your report of February 12 in connection with the discovery of a broken rail by you on Factory No. 5 track at Mineral City and your prompt action in notifying the section men, who had repairs made.

I want to express my appreciation to you for the way in which you handled this case. Of course, the discovery of a broken rail is always considered an important matter and I desire to commend you on your discovery.

Very truly yours,
(Signed) H. B. GREEN,
Superintendent.

Chicago Division

GARRETT, IND.,
February 7, 1922.

E. J. SMITH,
Operator, "HJ" Tower,
St. Joe, Ind.

Dear Sir—Superintendent Sollitt, of the Wabash, has informed me that at 11.05 p. m., January 29, while their train No. 67 was passing over the crossing at St. Joe, you discovered fire flying from car in train and reported the condition, which resulted in stopping of train at Spencerville and finding of hot box.

Mr. Sollitt further informs me that this is the second time recently that you have detected and reported something wrong on one of the Wabash trains passing St. Joe, and desires that I convey to you his appreciation of your watchfulness and interest. With this request I am exceedingly glad to comply.

Yours very truly,
(Signed) S. U. HOOPER,
Superintendent.

On February 1, about 7.10 a. m., Harrison Culp, track foreman, Bloomdale, noticed

hot box on eastbound train, engine 4261. He notified trainmen and repairs were made at Godsend while engine was taking water.

Ohio Division

On January 7, Switchman C. S. Michael discovered St. L. & S. F. No. 30426, empty box car in extra 2797-2725, on fire, while train was pulling through Chillicothe yard. Investigation developed that someone had started a fire on the inside of this car, which had burned hole in floor. There is no doubt that the vigilance displayed by Mr. Michael averted serious damage to the car.

Second Trick Operator C. C. Potts, Bloom Junction, while on the way to his duties, discovered broken rail in track just east of the brick yard switch at South Webster. There were about seven inches of the ball of the rail missing. He immediately located the section men and notified them of the defect. His interest in Company property and prompt action taken no doubt averted an accident.

On January 26, Operator C. M. Scott, while checking yard at Sabina, observed car with brake beam down. He made immediate report of this and repairs were made before any damage resulted.

St. Louis Division

On January 23, Brakeman Immenthun noticed brake beam dragging on Big Four car 2664, train No. 90. He immediately notified operator. Train was stopped east of Furman and brake beam removed. The car was loaded with hogs for Baltimore.

Toledo Division

On January 28, Signal Maintainer J. F. Avery, Troy, discovered a broken arch bar on E. C. C. X. tank No. 3 in train 87 passing Troy. He had train stopped and car backed in on repair track.

DAYTON, OHIO,
January 30, 1922.

M. PICCOLA,
Section Foreman,
West Middletown, Ohio.

Dear Sir—It is gratifying to note the very observing attitude on your part in detecting the dragging brake beams in extra south and No. 86, which might have caused very serious and costly derailment had it not been for your interest in endeavoring to protect Company's property as well as preventing personal injury to your fellowmen. I again wish to commend you for your very evident faithful-service.

(Signed) R. E. CHAMBERLAIN,
Division Engineer.

While we of the Baltimore and Ohio lay claim to the Railroad Safety Championship, it gives us great pleasure to commend an employe of another road for his observation and thoughtful action, which prevented a serious accident to one of our trains. Mr. Patrick Geary, crossing watchman for the Lake Erie and Western Railroad at North Street, Lima, Ohio, observed a broken arch bar on G. T. 25027 in train No. 87 on January 23. He notified the conductor and the car was set out at once.

"You've got t' git rid o' that new hired man out'n th' field, Hennery."

"Huh? Ain't he workin' right, Mary?"

"Workin'! He ain't done nothin' all this livin' mornin' but stan' out there arguin' with that scarecrow 'bout politics!"

—Richmond Times-Dispatch.

First Villager: "Hello, Aaron. Hear you've got married. What kind of a match did you make?"

Second Villager: "Well, neighbor, I didn't do as well as I expected, but to tell you the truth, I don't think she did either."

—Partners.

A GRAIN LOADING RECORD

The Locust Point Grain Elevators of the Baltimore and Ohio recently established a new loading record for the port by placing 285,000 bushels aboard ships in 13 hours. During eight hours of the same day the elevators unloaded 190,388 bushels at the rate of 24,923 bushels per hour, or 134 cars. Above is shown a panorama of the piers taken from an aeroplane. This record beats the best records made by some of the new concrete elevators. From February 15 to February 22, our elevators unloaded 989 cars

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department

Correspondent, GEORGE W. HAULENBECK

Ninety Feet High

I take No. 509 every Sunday night returning from my week end trip from Bethlehem, Pa. As the train approaches the Susquehanna River, it reduces speed and passes over the great bridge that spans the stream. If there are strangers in the coach in which I am riding, I take pleasure in telling them some things about this feature of our line, as well as other interesting bits of information.

I generally remark that we are now crossing the Susquehanna River on a double track steel bridge erected by the Baltimore and Ohio at the time it extended its road to Philadelphia 27 years ago.

To erect a bridge over this stream, it being navigable, it was necessary to obtain permission from the U. S. Government, as well as from the State of Maryland. The bridge was constructed 90 feet high, to permit vessels to pass underneath by simply lowering the top mast. Consequently there is no draw in the structure, and delays on this account are never experienced. The bridge is considered one of the best in the country.

When the Spirit Moves

Sometimes when the spirit moves, I am going to devote the Law Department space in the MAGAZINE to the narration of some events connected with the extension of our line to the Quaker City away back in 1895. In the beginning of the enterprise, I accompanied the Hon. John Kissig Cowen, our general counsel, to Philadelphia very frequently.

Something to Remember

"Incessant conversation is not conducive to an improved vocabulary."

Effect and Affect

I am still running across stenographers who do not seem able to distinguish between the words "effect" and "affect." I wish to remark that the stenographers to whom I am alluding are not in this department. Good stenographers and file clerks are a rarity, but we have them.

Eight-Thirty on the Minute

Taking the affidavit of Assistant Comptroller F. A. Deverell the other morning, I remarked "I knew I would find you at your desk at nine," and he replied, "Eight-thirty, sir, is the hour; that is our time for beginning work in this office."

Our Annex

I find that employees located in the Annex who visit the Baltimore and Ohio Building for lunching purposes are obliged to use great haste to avoid a tardy notation against them; that there is no suitable lunching place in the vicinity of the Sutton Building, that many of the clerks there would patronize Mr. John Bopp's lunch room but for this restriction and that an additional five minutes to the lunch respite would be very acceptable and a great help.

Ties and Rails

How many ties are there in a mile of main track? 2,880. How many tons of rail are required in a mile of main track? If you calculate on 100-pound rails, 157 tons would be required.

This information was furnished me by one of our civil engineers in the building and right off the bat at that.

During Miss Henderson's illness, Miss Ethel M. Fallon occupied her desk very acceptably. She is a good stenographer, and a very polite young lady.

True Enough

"Nobody gets much farther in life than the man who so lives that everybody misses him when he goes away."

Engineering Department

Correspondent, OSWALD EDEN

By the time this issue of the MAGAZINE is in your hands the American Legion carnival and dance will be but a memory. Our office was well represented, several of the young ladies having offered their services as waitresses. And such pretty waitresses!

There was some excitement as to the damage caused by the fire which destroyed records in what is known as the "pipe space," just above us, on Saturday, February 4. On the following Monday, when we came back to work, we found that except where the water had seeped through the ceiling—and in one instance had put two electric lights out of commission—there was nothing to show that there had been a fire. (Efficiency, I call it!) Those of our department who were here at the time of the fire, according to reports, acquitted themselves very well.

I wonder what "Alf's" girl thinks of him now. For some months past he had been suffering with stys, until they became so painful that he decided to go to an optician, who accordingly prescribed glasses. So now "Alf" wears "goggles."

In our last issue mention was made of the artistic talent possessed by one of our young men, Howard F. Buffington. We also spoke of his having won a prize in a poster contest. Since then I have been able to procure a copy of this poster and also a picture of Howard, and print both for your inspection. Keep up the good work, Howard.

Our bowling league representatives are "bowling" along. While they have dropped back a bit, I am pleased to note that "Wittie Warren is once more topping the list of individual bowlers, with an average of 99. The weekly report ending February 4 shows our two teams, the chief engineer's and engineer of buildings', are fourth and fifth, respectively, with averages of 462 and 446.

Howard Buffington launches forth into the poster game—and wins a handsome prize

Meet little Jack, nephew of Miss Dorothy Zellinger, Freight Traffic Department, and Miss Mary Elizabeth, daughter of J. Irving Waters, claim prevention clerk, Freight Claim Department

Brace up, fellows! We want to go forward, not backward!

"Goggles" are becoming quite the rage in our department; no fewer than two men having decided to adorn their visages with them since they are obliged to wear "specs." If this keeps up we will all look like a "co-ed" institution.

During the latter part of February the "Count," or C. G. Schanze, as he is known, took a trip to Florida. We wonder if the object of his southern tour was matrimony.

Miss Bernat has taken up wireless and is experimenting in wave lengths. We hope that the permanent wave lengths will last longer than the recent snow.

Office of General Freight Claim Agent

Correspondent, GEORGE DOBBIN

There is always a time when the opportunity to offer congratulations is a distinct pleasure, as in this particular instance. This is a department where progress is very possible, as proven by the recent promotions of Messrs. Phillips, Jubb, MacDonald, Staubs, Bond, Shepard, Wootton and Benfer. May the future fulfill its promise of greater possibilities.

Mr. Rosensteel has left the Railroad service to enter the automotive industry on his own hook. We all wish you the best of good luck, "Rosy."

Miss Pettyjohn has decided that the automobile field is a more interesting branch of the transportation business. May success follow her.

Congratulations to Mr. and Mrs. Koehnlein! We are surely being handed a bunch of surprises these days. Helen can be numbered among the June Brides of 1921. This proves the ability of the fair sex to keep a secret. We thought the cooing of doves could almost be heard in our office now and then but we didn't suspect that the knot had already been tied. May the treasure-store of life ever keep an open house for you both.

Without official notice, the Annex must have celebrated Safety Day on the 24th of January. Every employe being equipped with a package of Life Savers.

Our friend Seidel has invented an addition to the Science of Accounting under the title of "Jewish Percentage."

If it takes four men to get Robert's flyver out of a ditch—why not stay on the highway?

Minnie (better known as Lola) celebrated Saturday, February 4, by wearing a "cake-cater" suit, "yaller" spats and derby. Attaboy, look us over!

The ex-service men of this department all expect to retire after the passage of the Federal and State "Bonus" bills. Just where they will retire has not been decided upon.

A rope ladder is recommended to our friend Lilly, so that his explorations of the subsoil on his home site will be more easily conducted.

To do a thing better than it has ever been done before should be our desire. To use the margin beyond the usual stopping point does not mean that our employer alone benefits. Proportionately, we derive the greater reward. For in this method lies the possibility of reaching the point where we set Perfection as the goal in every task. Consciously or not, we develop initiative. Other things being equal, there comes a time when we attract someone in position to appreciate and reward. Intelligent effort, beyond the point of duty, really pays.

Brother Baldwin is our expert when it comes to filling fountain pens with ink. The boys recently gave him plenty of practice. Don't let 'em kid you, "Lee."

Williamson is still undecided whether to take up ballet dancing or to go in for athletics. Did you ever see him imitate "going down the cellar stairs?"

Of course, there are days and days, but "Oh! you first and sixteenth—!"

We extend a hearty welcome to Miss Naomi Upperco and W. H. Saffel, the newest members of our department.

Freight Traffic Department

Correspondent, DOROTHY RUBENSTEIN

The dreary months of winter have almost passed, and once again nature is beginning to stir with the first approach of spring. Wonderful days are ahead—days of sunshine and air filled with the fragrance of budding flowers and trees. Just a walk in the open country fills one with the joy of living and gladness to be one of the earth's creatures.

Instead of spending an afternoon at the movies (and this is meant for those who labor in office or store) why not go by trolley or train to the city limits, then walk a few miles in the country. You will be surprised to note the good results after a few hikes of this kind, and if you are one of those mortals who dislike solitude make up a party. But whether with a crowd or alone, remember to avail yourself at the first opportunity of the sure cure for all ills, real or fancied—a walk in the sunshine of God's smile.

In line with the above, we have a suggestion to offer for the consideration of all Baltimore and Ohio employes, and that is, how about organizing a BANDO'HIKERS? This band should meet, say once a week, preferably on Saturday afternoons and take good, long hikes out into the country. Anyone wishing to join the party should notify some capable person, volunteering to take charge of the band for the spring season. In this way a closer spirit of camaraderie between the various employes could be established, thus more firmly welding together the Baltimore and Ohio family.

With the passing of the Christmas season, Cupid has awakened from his long nap and while we know of several engagements in this office, we are bound to strict secrecy. This does not prevent us from extending to the happy ones our sincerest congratulations, however.

Mail and Express Traffic Department

Correspondent, T. E. REESE

The accompanying picture is of the late Carl Borcharding, former day distributing clerk in our local mail room. Mr. Borcharding was born on September 19, 1903. He entered the Mail Room, March 11, 1920. His death occurred after a brief spell of illness at his home, Harwood, Md., on January 13, this year.

C. Hollenshade, Mail Room, phoned the office on February 6 that he had a swollen chest and would not be able to get in through the building door. Ascertaining cause thereof, it developed that his wife had presented him that morning with a little daughter. Congratulations, "Pop!"

Printing Department

Correspondent, H. R. FOGLE

Since our last issue, Correspondent O. R. Pylant has severed his connections with this department. We wish him luck in his new position.

Our old friend Hopkins has taken up his abode in a foreign country. He has moved to Woodberry.

Now comes along our handsome compositor, Joseph Josephs, with the announcement that he has joined the ranks of the benedicts. And he went an' done it while this country was in the grip of the blizzard. We wish him all the good luck in the world.

It has been rumored that A. Hardy, a foreigner from Richmond, has been looking around for a house of six rooms and bath. Guess he wants the bath to use as a fish pond, eh?

We are sorry to say that some of our comrades are still on the sick list. There have also been added some new men to our departments, one of the latest additions being our old friend, "Uncle Bill" Paper. "Babe Ruth," of soup strainer fame, has left us to take up a new field of endeavor. We wish him good luck.

What do you folks do with a fellow who goes sleighriding, hurts his leg, then forgets all about it until somebody reminds him of it? Far be it from us to poke fun at an injured person, but we wish Jack Rothman better luck next time.

Thanks to you folks who have helped us secure items for the MAGAZINE. Come on with more! There are lots of interesting happenings around the printshop.

We wonder why some of our stone hands don't use the elevator when they want to send a form down stairs, instead of throwing it down.

The late Carl Borcharding

Frankie Offutt Bond

Correspondents, F. W. RUPPERT and C. A. WAGNER

Robert Grace, our class rate agent, who has just returned from his vacation, spent a good part of it in St. Agnes' Hospital, where an eminent cutler removed his best tonsils. We are all glad of the fact that he is again with us, none the worse for the operation. We suggest as his next step that he have his monkey glands removed in order to make our mail room desks too high for his ambitious form to adorn.

"Unconscious" Orem and "Speed King" Dougherty broke their own records recently by going the ultra-slow motion pictures one better; "Petrified Motion!" We say!

Captain John Griffith had a pleasant trip to St. Louis on Company's business. From all appearances he must have dined on bird seed—from the way he puts jazz in high opera!

Paul M. Heisey, our former draftsman, is now in the Transportation Department, after serving his term with us. "Prince" Ruppert still has a grievance on account of the unfinished draft of some wheels which, by the way, were to speed up the fastest Neostyles in existence.

NOTE—Mr. Heisey has taken unto himself a wife.

Good luck, Paul.

Marley Leatherwood—our efficiency (?) clerk—has also married and is living—or, whatever you call it—in Halethorpe, at his wife's home. What we want to know is, where is that solitary house surrounded by an individual chicken farm with a "Lizzie" to transport him to and from his main source of existence?

"Ambitious Eddy" Lynch tried stoking the boilers of our office building on February 9, but decided that junking files would suit him better. Having cleaned up all accumulated debris from our file room, he took it to the boiler room for disposal; then to complete the disposition of said debris, he fired the boilers with it. A large amount of excess heat was noticed throughout the building because of "Eddy's" expert knowledge of the steam heating system.

Telegraph Department

Correspondent, DELLA M. HAIN

Miss Frankie Offutt entered the service of the Company as a member of the Car Service Department on April 16, 1917. She

became secretary to the assistant superintendent of Telegraph on August 1, 1918, and secretary to the superintendent Telegraph on January 1, 1919. On March 1 of this year she resigned to become the wife of J. E. Bond, chief detective of the Western Maryland Railway, the wedding taking place on that day.

The regard and esteem in which she was held by all her associates in the department was well expressed by Superintendent of Telegraph Plumly, when he said of her: "An employe of exceptional ability, she coupled with this an even temperament and pleasing personality that made for her a host of friends. Lucky is the man who wins her and, though we do not know her husband well, he looks good to us, and we are sure that our cordial good wishes for them both will be realized."

Transportation Department

Correspondent, L. K. BURNS

On Saturday afternoon, February 11, a long and lasting feud as to whether the married or single men of the Transportation Department were the best duckpin bowlers, was settled. For a few weeks prior to the game there was all kinds of practicing being done at lunch hour and in the evening, but it didn't seem to do the poor single fellows any good. They lost all of the three games. However, they only fell short by 43 pins in the grand total for the three games.

The scores were as follows:

	Married Men			Av.
	1st Game	2nd Game	3rd Game	
Dienhart.....	86	108	91	95.0
Volk.....	82	87	87	85.5
Faustman.....	89	85	78	84.0
Guerke.....	106	92	95	97.7
Collins.....	87	92	92	90.3
Evans.....	91	85	99	91.7
Total.....	541	549	542	91.7

	Single Men			Av.
	1st Game	2nd Game	3rd Game	
Poole.....	86	89	87	87.4
Woods.....	84	72	89	81.7
Ackler.....	91	87	96	91.3
Marley.....	98	90	91	93.0
Roycroft.....	91	103	74	89.3
Von Wachter.....	77	84	..	80.3
James.....	100	100.0

Total..... 527 525 537 88.3

Total pins—

Married men..... 1632

Single men..... 1589

43

Messrs. Wood and James, though married, both contributed their efforts towards helping the single men out. Yes, we are beginning to run short of single men around here.

Mr. Faustman thought he was getting a little weak in the first and second games and after starting the third, called up Mr. Hardwick to help him out; however, the results of their third game look as though there were too many hands in the soup and that they made a mess out of it.

Mr. James upset 100 pins in the last game.

Our supervisor of transportation, C. J. Fellows, has gone to Miami, the popular winter resort of the South. We wish him an enjoyable trip.

Relief Department

Correspondent, H. IRVING MARTIN

The boys of our department are trying to form a baseball team and with the success they expect, will have a team on the field

about the first of May under the leadership of John Brooks. Mr. Brooks is a capable leader and with the material from which he will choose, a fast team will be the result.

Any of the departments having teams in or around Baltimore and desiring games will please communicate with Mr. Brooks.

Valuation Department

Correspondent, G. B. SAUMENIG, Accountant

We welcome to the Valuation Department L. E. Lavine, W. A. Cavey and S. E. Taylor. G. F. Clark and C. E. Smyrk, formerly of this office, are now associated with the office of Assistant Comptroller Owens. H. A. Clark, J. P. Kusa and C. H. Ringler have recently resigned from the service to take up outside employment.

Has our friend Colton lost faith in the Dalton and Monroe? Why so much use for the comptometer? There must be a good reason.

Messrs. Bolin, Warne and Merryman are working temporarily in Washington, D. C. We miss them.

One of the busiest places in the office is the desk of our cost engineer. Conferences and action are always in order. It is worth a life to force one's way to the head of the waiting line, because of reservations being made weeks in advance. There is never any dust on the visitor's chair.

There must be thrills and pleasant happenings on the morning train from Phoenix, Md. No names are mentioned. Was he lucky? You said it!

News spreads about the Valuation Department quickly. Wireless, telegraph and telephone are inventions of the past, compared with our "Larichscope."

The "Storm" of our chief draftsman's force sneaked in the other day attired in the costume of a Boy Scout. He looked queer and was bashful. Further information can be secured from him.

Gregory recently paid us a visit from Chicago. He and Pryor had a wonderful time discussing current affairs of the day.

"Fireman" Harold, seven year old son of "Brose" Hardwick, Transportation Department

This cartoon, by E. B. Pierce, is a faithful reproduction of the world renowned song birds of the Valuation Department, giving their own version of the famous selection from the opera "Lucia Di Lammermoor."

Maybe this excitement was more or less responsible for Pryor's illness in January.

Smythe recently exhibited the most wonderful and elaborate work of art ever seen. It was similar to the wall paper designs worn by the hot dog salesman at Oriole Park in the summer. He called it a shirt. This boy is setting the pace in the Bowling League and is also a brilliant baseball player.

In last month's issue of the MAGAZINE, attention of our readers was called to the strange actions of one Gover. Our prophecy has come true, he has gone and done it. He could be seen counting and recounting his money, checking bills and receipts, looking up timetables and in fact doing a thousand and one things foreign to single blessedness. On February 1, he was married to Miss Marjorie S. Topham, daughter of Mr. George Topham, a leather dealer of Washington, D. C. The ceremony was performed in the Iowa Avenue M. E. Church of that city by Rev. Harry Evaul. Mr. and Mrs. Gover left immediately after the ceremony for New York and its bright lights. This happy pair will make their home in the Dresden Apartments. We wish them happiness.

The cold weather in January worked wonders. We found out that Pilot Engineer Taylor owned an overcoat. (This item was given the correspondent by one of his force.)

Here are three facts that should not escape the attention of every employee of the Baltimore and Ohio:—

Ten per cent. of the members of the Baltimore and Ohio Glee Club are from the Valuation Department. (Good.)

Fifteen per cent. of the members of the class in Railway Accounting, which is being conducted by Assistant Comptroller Deverell, are from the Valuation Department. (Better.)

Twenty-five per cent. of the members of the Baltimore and Ohio Post of the American Legion are from the Valuation Department. (Scrumptious!)

The above is a record of which to be proud and it should inspire employees of the various departments to have even a greater representation in such interesting organizations. It would be nice to know just what the other departments are doing towards making these three organizations the best of their kind.

Now we will take our readers from the sublime to the ridiculous and in a brief way quote some improbable happenings in Room 1105:

Vorwerck smoking decent tobacco
Hannum quiet for an entire day
Brewer generously distributing candy and fruit

Renehan without a smile, distributing pay checks at 8.20 on mornings of 1st and 16th of each month

Rau not eating, accompanied by the ladies from Darley Avenue and Wayne Junction

Wilbur and Slocum smiling together
Bonney getting a price on a perimeter
Gover asking himself a question and getting a correct answer from himself

The Dolly Sisters, Equipment Pilot's expert calculators, with bobbed hair

Everybody in the office entirely satisfied with the ventilation and keeping the temperature at 68

Be sure to get a copy of next month's issue and read Valuation Department News. We always give the best.

Did you see our cartoon this month? It is good.

Auditor Coal & Coke Receipts

Correspondent, JOHN LIMPET

McClintock has invented a new mouse trap. We understand that "Mac" first cuts hole in corner of vest pocket. Next he puts a little cheese into his pocket, hangs vest in locker. Mouse follows scent of cheese creeps into pocket, falls through hole into lining of vest, and presto! Goodbye mouse.

The old "Knife and Fork League" is beginning to stir itself and take on signs of

life. Several of the new members will be watched with interest to see if any new records of endurance and capacity can be hung up. Understand "Andy Ku Ku" Bickel has made arrangements to have his false teeth sharpened for the occasion.

As a crack shot with a revolver, our "Bill" Henry proved himself a good horn blower. Understand "Bill's" home was recently visited by several robbers, and while it is true "Bill's" aim was slightly interfered with by friend wife who went ahead of him, still the noise of several shots fired in the general direction of said robbers had the desired effect and the bold, bad men beat a hasty retreat.

Standing of teams in office bowling league including games of February 7, was as follows:

	Won	Lost	Total
Pull Men	26	16	619
Royal Blues	25	17	595
Head Lights	25	17	595
Bumpers	20	22	476
Wrecking Crew	17	25	405
Tail Lights	13	29	310

Thus far the interest has been pretty keen and from the above it can be seen that it is almost anybody's race. The teams are evenly balanced and close contests have been the rule.

One of the tough breaks of the game occurred on the night of January 31, when "Red Bandana" Bickel rolled a 94 and a 95 game and they didn't count. This was because his team had postponed its games and Andy was just rolling for practice. It's a tough old world.

We expect to have at least one expert bowler in our office league before the season is over. We understand "Bill" Brauer is taking lessons from "Ike," which means the team on which "Bill" plays will be heard from before long.

Eastern Lines

Pier 22, North River, N. Y.

Correspondents, FRANK H. A. MANTHEY.
JOHN NEWMAN

We have heard that "Jimmy" Lynch has become a professor of Saxophonology. He "professes" on a tubular instrument by blowing in one end of it, causing groans to issue from the other end, groans and squeals. "Jim" used to torture the violin but an ever increasing obesity has interfered with the continuance of that exercise; but the musical urge in his soul wanted

Miss Elsie Heiderich on her way to Niagara

expression, so he took to the wind-pipe. Except for this there is nothing windy about him.

"Johnny" Duffy is the boss fiddler now, since "Lou" Winter and the aforesaid "Jim" have left the field. If there is anything lacking in J. D's technique he makes up for it by enthusiasm. At present he studies the intricacies of the higher positions under the tutelage of Prof. Hobocus of Hoboken, N. J.—The maestro tells him: "You make da fine progreso—five dollars please." (Repeated at each lesson.)

Some of the "birds of a feather" that lunch together in the southwest corner of the office sometime ago attempted to start a Choral Club. They did some trying out between mouthfuls. It would have been a success except for the lack of voices to support the fine mezzo-tinto-alto-soprano of Miss H. M., whose birdlike warbling was startling, to say the least. Her imitation of a certain domestic bird is just marvelous. "Music hath charms to soothe the savage breast" and all that, but it may, too, incite to murder, pillage and rapine.

A squirrel in a cage is "busy" running in a ring. But it won't take him anywhere nor bring him anything. As champion runner in a rut he's Johnny on the spot, He does not change the spot, the which is why HE GETS THERE—N-O-T.

Public Health Commissioner Copeland advises us to isolate ourselves from the general public at the first symptoms of Influenza, now declared to be prevalent, as a means to protect the general health by preventing spread of infection. Being all solicitous of the general welfare of the community we take his tip. If we sneeze in the morning we stay home from work. Safety first to the general public!

However, it is not always cold in New York. Sometimes it is sloppy. And when it is, the famous crossings of the Rubicon, the Alps and the Delaware have nothing on the crossing of the "Farm" in front of Pier 22. When the traffic is lively and the slush is deep it furnishes many narrow escape. One may, by sidestepping and ducking, out-general the juggernauts and escape with life, but one cannot avoid becoming stuccoed. The Jehus are no respectors of

persons; even the "Boss" has been decorated (and grinned at).

P. S.—Whisper that with nonpareil so he won't notice it.

Speaking of zero-weather, it beats the drug-store in giving color to complexions. Note the bloom on the cheek of the maidens as they arrive in the morning. Ah! And the royal purple on the terminal time-keepers nose. Alas! It is the weather solely, alas— And speaking of the drugstore *paint*, And the drugstore perfume *smell*, On a flapper they will tell What she *is* and what she *ain't*.

James P. Rooney, recently appointed boilerman apprentice, Pier 22, has qualified "cum laude." He is the first of a series of boiler-attendants who has managed to keep the office warm in zero weather. And furthermore, so the G. F. says, he is saving coal. And still furthermore, he keeps the boiler-room clean. Pride in work does it. Self-approbation and self-respect is the compensation.

Miss Sara Rolmes, erstwhile correspondent for the MAGAZINE, has returned to her desk in the Lighterage Bureau after a prolonged illness, extending over months. Happy return and best wishes!

And little Miss P. K. has resumed her old duties in the Claim Department at Pier 22, vice Miss K. P. She feels peppy after a month's sojourn in fashionable Lakewood, N. J. Being in the swim, without necessarily going near the water, is recharging the vitality batteries, like Fleischmann's yeast.

Explanation:—K. P. above referred to stands for "Kewpie", a pet-name bestowed on Miss M. G. on account of her general resemblance to that familiar and popular idol. Miss M. G. moved from the Claim Department to position of personal stenographer to chief accountant. On her moving day she was honored by her fellows in the department with a present, handed her by the chief claim clerk with a few well chosen words, such as "gone but not forgotten," that brought the blush of pleasure to the smiling face of the recipient.

Staten Island Lines

Correspondent, G. J. GOOLIC

Crew Dispatcher Joseph Lynch, St. George Yard, is receiving congratulations on the arrival of a baby girl on February 4.

Dorothy and Charles

The accompanying picture is of Dorothy Smith, age 6, and Charles Smith, age 5, children of Mrs. J. Smith, telephone operator, Pier 6, St. George.

Joseph Cangro, trainman, died of tuberculosis at his home on December 23.

If you go down to South Beach and don't find any chickens, "take a duck."

Miss Dorothy Reynolds, stenographer, Division Engineer's Office, resigned in February to accept a position with the United Marine and Fuel Corporation. Miss B. I. Heal was employed in place of Miss Reynolds. Miss Heal was employed in the Maintenance of Way Department during the latter part of 1920, and because of reduction in force, had been furloughed.

The engagement of Miss Reynolds, stenographer, Division Engineer's Office, to Irving Owens, endman, A. K. Bridge, was announced on January 28.

Baltimore Terminal Division

Correspondent, MARTHA V. FOX, Car Record Clerk

Curtis Bay

Curtis Bay has been neglected as far as news items are concerned, but nevertheless it is still on the map. It came near not being here on the Saturday of the snow-storm and it was only a miracle that it was left uncovered.

Our ever obliging gang foreman, Walter H. McKnew, was confined to his home suffering with a severe cold recently. Through careful nursing he was out again in a few days.

Assistant Car Foreman S. N. Stickels has been suffering with a bad cold and was compelled to give home remedies a test. What-ever he took had the desired effect, for he was up and around on the following day.

Miss Eleanor Spieker, who writes M. C. B. bills, seldom misses a day.

Shop forces have been increased by the addition of 45 carmen who were furloughed in December.

Left to right, Work Checker A. L. Hirshauer; Peter Malaszewski, messenger; D. W. Dean, general clerk; Mrs. Tina Urbus, laborer; H. W. Wiese, car foreman; Miss H. Feezer, clerk; Miss Eleanor Spieker, M. C. B. clerk; S. N. Stickles, assistant car foreman

Gang Foreman Jacob Betz, formerly of Bay View, has been transferred to Curtis Bay Repair Tracks, vice F. Lewis, who has again taken up car repairing.

Locust Point

Correspondent, J. ROSS GOULD

I take great pleasure in introducing to our readers C. A. McBeth, clerk at freight office, and one of the live wires of the Railroad at Locust Point.

Mr. McBeth entered the service of the Company at Locust Point on November 16, 1914, being then 15 years of age. He was promoted to labor time clerk on August 1, 1916, then to expense distribution and tonnage clerk on November 16, 1916. On May 16, 1918, he was promoted to the position of tug dispatcher and assistant to chief floatmaster. On August 1, 1921, he was transferred to the Agent's Office in charge of car and lighterage demurrage. This position he is now filling.

His record since entering the service has been 100 per cent; he is a perfect fiend for work, and his pleasant and engaging manner has endeared him to his associates. This perhaps is responsible for his becoming a benedict on April 6, 1921.

He is a true friend of our MAGAZINE and is of great assistance in typing articles for your correspondent. May we express for him the good old Irish wish, that "his shadow may never grow less."

The great snow storm which visited our city on January 27 and 28 spread a blanket of snow to the depth of 26 inches, considerably retarding transportation; but as our beautiful city arose Phoenix-like from the ashes of our great fire of February, 1904, so we again tackled an opposite problem and soon restored transportation.

This action was especially noticed at Locust Point, where much valuable property would be in peril in case of fire.

The efforts of our genial and wide awake agent, J. M. White, assisted by all the labor he could procure, made short work of clearing all tracks and roadways into the piers and elevators, so that freight could be unloaded and delivered to steamships at the piers and broad ingress and egress provided for the city engines if needed.

This was not only a good application of the principle of "Safety First," but an admirable illustration of rapid thought and action for the Company's welfare.

Of such men as this, the Baltimore and Ohio officials are mainly composed; which enables our Road to maintain its position as a LEADER.

We were honored in having Agent A. L. Michaelson, St. George Lighterage, N. Y., as a visitor at Locust Point on February 10 and 11. His visit no doubt was to get dope

as to our unrivalled facilities for handling carload freight. As Baltimore has always been noted as a leader in industrial activi-

C. A. McBeth

ties may we hope that he has left us fully informed. In the meantime we are awaiting with pleasure another visit from this charming gentleman.

An Acrostic

Let others praise the hero,
On land or on the sea;
Your efforts in the work you know,
A-man prove you to be.
Loyal to the Grand Old Road,
That none is classed as better;
Your duty to the Baltimore and Ohio—
read the initial letter.

J. R. G.

On January 14, the S. S. Robin Gray, of the Isthmian S. S. Line, left Locust Point Piers with a cargo of 16,909,735 pounds, consisting mostly of tinplate, destined to Honolulu. This shows that the export business is on the mend. This same Company also had two other steamers during the same month which were bound for California and other points in that vicinity. Both of these carried heavy cargoes.

Travel

By JOSEPH GILBERT

The railroad track is miles away,
And the day is loud with voices speaking;
Yet there isn't a train goes by all day
But I hear its whistle shrieking.

All night there isn't a train goes by—
Though still it be for sleep and dreaming—
But I see the cinders paint the sky,
And hear the engines steaming.

My heart is warm with the friends I make,
Better friends I'll not be knowing;
Yet there isn't a train I wouldn't take,
No matter where it's going.

Mt. Clare Shops

Correspondent, MISS MOLLIE S. ALBRECHT,
Secretary to Superintendent

If you should happen to be passing Mt. Clare Shops between 12.00 o'clock and 1.00 o'clock some day, just drop in and you will see all the superintendent's office in the act of endeavoring to figure out a puzzle. That has become quite a fad in this office, although I don't believe anyone has ever puzzled out the puzzle. If they aren't engaged in figuring out puzzles, you will find several of them

Storekeeper's Department and Material Platform, Locust Point, under supervision of Car Foreman Cox and Storekeeper D. A. Barringer

Ruth, age 4 and Eleanor, age 2, granddaughters of W. E. Miles

in the midst of a heated argument on some topic of the day, so you won't want for entertainment. Stop in, and see for yourself!

No. 1 Machine Shop

The accompanying pictures are of the grandchildren of William E. Miles, material man. Ruth, age four years, is quite a jockey and recently won a prize riding this same pony. Little Eleanor is only two years old, and is just a beginner, but her grand-daddy says she will soon be able to ride as well as Ruth. We think both the kiddies, and the pony are prize-winners!

Shop Order Bureau

Everybody in this office is quite well known to Mt. Clare-ites. C. E. Bannon, chief clerk (formerly of the superintendent's office), reigns in full glory (but scant hair, which hasn't grown a bit since he left the superintendent's office). He is well supported by our old friends "Joe" Haneke and Miss Julia Pincus. "Ginger" Walters also works from this office, and as "Ginger" means "full of pep," you can see that this office is rather spicy.

Stores Department

Our old friend Stafford Bullen still is quite prominent at Mt. Clare, especially where the "fair sex" is concerned. Any evening of the week you can see this young man with at least two young ladies walking calmly along, helping the young ladies to cross streets, and in fact making himself quite useful in general. We don't know what we would do without Stafford (especially when there is ice on the ground).

Baltimore Division

We quote the following from G. W. Crump, extra operator, Baltimore Division: "My Brother, G. C. Crump, operator, Denver, Colorado, after spending the holidays with me, had arranged to use a railroad other than ours on his return trip. I persuaded him to use our road. After showing him what short time he could make the trip in, he decided as I planned. He left Washington on our No. 5, on January 5, and arrived Pittsburgh 9.30 p. m. on time, and Chicago 9.00 a. m. on January 6, on time. Note what his card from Chicago says: 'You are right. The Baltimore and Ohio has all of them beat a mile.' He has used all three roads between Chicago and Washington, and ought to know what he is talking about."

Mr. Crump sent his brother a post card from Pittsburgh showing the Baltimore and Ohio Depot and a card from Chicago showing the Masonic Temple, indicating time of arrival in each case. We know that when Mr. Crump pays a visit east again, he will use our line.

Washington, D. C., Freight Station

Correspondent, W. L. WHITING, Chief Clerk

That the patrons of the Baltimore and Ohio are appreciative is often exemplified by the splendid letters which are often received from them by our various officers. A recent

letter from the Stone Straw Company, Washington, makes us, who are employees at the freight station, feel that it pays to give good service.

The Stone Straw Company has always been one of the largest of a goodly number of shippers from this station. Its traffic manager, Mr. W. L. Santman, was formerly an employee of this office. This company keeps our waybill clerks busy, particularly at this season of the year, when its product is in such demand at various soda fountains throughout the country. Their fine co-operation and continued patronage show their appreciation of good service.

We had a snow storm in Washington lately that in a measure upset the usual run of affairs in the capital city. When, after a continuous performance for about 24 hours, it was found that from 24 to 30 inches of the "beautiful" had fallen, the question arose as to what was to be done with it now that we had it! As far as the Baltimore and Ohio was concerned, it was not long before an improvised plow was made and teams hitched up, and with the smallest possible delay, the team tracks at New York and

Florida Avenues were all in working condition, and things went along as smoothly as if the wintry visitation had passed us by.

One of the old time employees at this station passed to his final rest on January 31. Cyrus R. Heller entered the service of the Baltimore and Ohio in 1878, and continued in active service until the middle of 1918, a period of 40 years; during this time he filled many positions, having served as platform foreman, delivery clerk and in other positions of responsibility. In 1918 Mr. Heller, who had been ailing for some time, found that he must finally give up the fight, and he was placed on Relief. Later he was pensioned, his long and faithful service entitling him to that reward. Death claimed him at the good old age of 74 years. Mr. Heller left several children, to whom our sympathies are extended in their loss of a beloved parent.

Chief Delivery Clerk Thomas E. Frye, another of the veterans in the service, has been under the doctor's care for two or three weeks, suffering from rheumatism. He reports good progress, however, and we hope to see him at his accustomed duties soon.

Brunswick

Correspondent, R. L. MUCH, Conductor

W. O. Shields, terminal trainmaster, is back on the job after a two month's leave of absence.

J. F. Mackin, general yardmaster, has left Brunswick to resume duty in Cumberland.

A. J. Kelly, assistant to Mr. Horn, was on a tour of inspection through the Brunswick yards.

Our MAGAZINE has become very popular here and I trust a larger supply may arrive next month than heretofore.

In the accompanying picture E. W. Burch and G. M. Stitzell, conductors, when returning from a business trip to New York, are shown snapped at the base of Columbus Statue, Washington, D. C., enroute to Brunswick.

East Side, Philadelphia

Correspondent, CHARLES H. MINNICK

Our sympathies are extended to Mr. Muller, Car Foreman's Office, whose father recently passed away.

We are pleased to report that our master mechanic, J. P. Hines, is recovering from a broken and sprained ankle, sustained while alighting from a passenger engine near 24th and Chestnut Streets Station early in January.

The crew dispatcher's office has been moved from its former location to the yardmaster's office in the Transportation Department. Kindly use the side door and transact all business through the window.

Christian Rollman, officer at Poppleton Street gate (Mt. Clare), 39 years in service

EAST SIDE ROUNDHOUSE OFFICE FORCE

Roundhouse Clerk "Bill" MacMullen; Roundhouse Clerk "Jack" Ehrig; Labor Foreman "Big Frank" Menna; Roundhouse Foreman "Johnny" Dimond; General Foreman, S. C. B. Smith

The car foreman's office force has been consolidated with that of the master mechanic; the two chief clerks, Messrs. Merryman and Muller, and Miss Helen Sentman, stenographer to master mechanic, are housed in the office of the road foreman of engines, J. E. Sentman.

On Saturday, January 28, during all that blizzard, the Division Accountant's Office was removed to its new quarters in Baltimore.

Little "Herby" Held, Stores Department, has a three weeks old mustache. Maybe he does not look stern and dignified now! "Herby" is one of our veteran heroes, having been wounded several times. He is a man of few words and is well liked at East Side.

William Orrell, better known as "Rebel" because he fought in the Civil War, has been a grass widower for a month or so. His wife departed for a visit to her relatives in Florida some time ago, and "Reb" is now wondering if she intends to come back or not.

Night Yardmaster Henry Weible accepted the job of switch sweeper, vice a snow plow, on Saturday night of the blizzard. He has now recovered from his strenuous exertions.

G. W. Solly, car repairman, East Side Yard, who was injured while on duty recently, is getting along as well as can be expected. We all hope to see him out again on the "High Line."

Friends of Car Repairman Harry Peterson and Clerk A. G. Miller extend their sincere sympathy in the deaths of their loved ones. Mr. Peterson lost his wife and Mr. Miller's father died after a long illness.

On February 27, Harry Gilchrist, one of the well-known time-keepers of the Division Accountant's Office, Baltimore, passed away at his home in Norwood, Pa., after a com-

Cumberland Division

Correspondent, JOHN SELL

All ready for Spring Business? Lets go. The last few weeks have shown gradual improvement, and with continued effort we can make the wheels hum. Mr. Van Horn, our superintendent, and his staff are busy soliciting tonnage but we can redouble our efforts and really show them the ways in which it is done. For instance, when you talk with the business men, contractors, manufacturers, merchants, and, last but not least, the poor ultimate consumer, you'll find it very easy to ask them "Do you request shipment via Baltimore and Ohio." Don't be afraid to mention the service we are rendering and give them a little line on the strenuous efforts being made to give freight a "highball" movement. It isn't a question of more dollars in the main it's more jobs for more men and we should not be satisfied until we have all the furloughed members of our great Baltimore and Ohio family back in service. This is a year to advertise and go after business. If you only get a small haul it means a new customer so, all together, let's get all the business that's moving and get the boys back.

Mrs. Margaret Pendergast, aged 46, mother of Miss Mary Pendergast, Stores Department, died at the Allegheny Hospital on January 30, after a brief illness. She is survived also by her husband, Stephen Pendergast, our well known west end conductor.

Mrs. Pendergast was a woman of amiable disposition and was loved by all who knew her. She will long be remembered by her many friends for the charitable acts practiced times without number. Mr. Pendergast and Miss Mary have the sincere sympathy of all of their fellow workers.

Our bowling league is coming along in good shape. We have four teams in the race and it's a nip and tuck affair. The teams are managed as follows: Master Mechanic's Office, "Tom" Grindell and "Joe" Carney; Stores Department, "Bill" Shaw and "Vinc" Coyle; Superintendent's Office, G. A. McGinn and "Abe" Ketzner; Division Accountant's Office, F. L. Sheakley and F. L. Cook. While pins are flying high now there are still about four weeks to go, so save some of the pep, boys, for the home-stretch.

Another delightful dance was given recently by the Division Accountant's School. No doubt about it, these affairs are wonderful. Believe me, the chairman of the entertainment Committee, D. Y. Brown, knows how to conduct them. The office is always tastefully decorated, the leading orchestra of the city in attendance, and oh, boy! some bountiful repast served when the "wee sma' ous" roll around. Danny, you win, only don't let up. You know we're ready when you holler all aboard for another. That plan for this summer's swimming parties is just the thing. Don't let it drop.

Boy's I heard a good one on E. J. Soehner. The other day, you know, he was called home account of the death of an aunt. While at the house a visitor came in. Looking over our dapper E. J., she inquired, "And who is that distinguished looking Jewish Gentleman?" Nuf Sed.

It is too bad there are so many engines in white lead just now but it remained for our own "Benny" Noone to wire the number Cumberland Division has in plaster Paris.

General Supervisor I. S. Sponseller is a hard worker and is continually on the run, but we hear a story about him concerning "A GOOD HORSE." Tell us the joke, "Spon."

General Yardmaster "Johnnie" Read, is busy these days, lining up his force on proper yard movement, eliminating of delays, and the absolute necessity of maintaining schedule. A glance at our record will show that he is getting results.

More truth than poetry—Boys!

Why don't your departments line up all the news?

Why not send me all items 'cept stories of booze?

If you know a good tale on trainmen or clerk,

Tell me, cause digging it up is hard work.

There are features galore which we all like to read,

So take this to heart and please try to heed;
If your office or force is missed once in a while,
Remember that I am not paid by the mile.

When records are broken and no news gets in,
You wonder why our little column is thin.
Just think for a minute what guy is to blame
And tell me then do you think "Whitey"'s the name.

These twelve smiles belong to the family of Wilson Battersby, gang foreman, East Side Roundhouse. Insert, Miss Rachel Battersby

plication of Influenza and Pneumonia.

His loss is keenly felt by all who knew him. A delegation of his fellow-workers from both the Philadelphia and Baltimore offices, and the Philadelphia Piers, called at his home on March 1, to express their sympathy.

Crew of Green Spring-Petersburg Branch Train

Green Spring

Correspondent, E. E. ALEXANDER

Save a Little Every Day

To those employees who have the opportunity of service where hundreds of their fellows are out of employment we recommend this slogan.

It is your duty. You owe it to yourself, your employer and your fellow man. Make your job safe and by your saving you can provide for the employment of others. Each employe, regardless of rank or station, can save a little every day, and think what a united campaign of employes to save would mean. Re-employment of many and resumption of work held up, without any additional cost! Think it over, And whatever your task do always your best,

For it's service, that's all, that measures success.

Safety First!

Yard Foreman H. W. Gross leads our Safety Committee for 1921 in number of safety items observed and reported, with Pipefitter J. J. Foley and Tie Inspector A. E. Irving tied for second place.

In reporting new homes recently built or acquired by employes, in February MAGAZINE, we neglected to mention that of Allen Crites, laborer, recently erected. Our record in this respect is not so bad, considering the size of our town.

Several friends of Mrs. G. W. Robinson took it upon themselves to call upon her unexpectedly Thursday evening, February 2, it being the occasion of her fiftieth birthday. A pleasant evening, with a delightful luncheon, was enjoyed. We wish for her many happy birthdays.

The sympathy of the plant is extended Tieman H. S. Roach in the loss of his mother, Mrs. Margaret Orndorff Roach, whose death occurred recently at his home. Mrs. Roach was 80 years old, and though in failing health for some time, her death was quite unexpected. She was a consistent member of Springfield M. E. Church, South, from which her funeral was held by her pastor, Rev. J. L. Thomas.

We are pleased to learn that several employes were united with the church as a result of the recent revival in the U. B. Church held by Rev. R. B. Bridges, pastor. A clean, Christian workman is the best.

The remodeling of the M. E. Church, about completed at this writing, has added much to the appearance of that edifice, and to the town.

Hostler R. D. Nixon is the latest plant auto owner. He has ordered an Overland for spring delivery.

Relief Agent G. W. Stell has been ably discharging the duties of agent at Green Spring for some time.

Account reduction in station force, Clerk R. G. Smith has been transferred to Keyser. We will be glad to see Ralph back with us again.

After serving the Company faithfully for a number of years "Bird," one of the plant horses, died recently. Though a dumb animal, Bird leaves a record of service which might well be emulated.

On January 27, twenty-five years ago, Miss Annie E. Haines, of Frankfort, W. Va., and Harry S. Long were united in the holy bonds of matrimony. On the anniversary of that auspicious day, Mr. and Mrs. Long and a number of relatives and friends observed the occasion at their hospitable home on Berkley Place, Martinsburg. The entertainment lasted from six to nine and a feature was the elegant dinner served from six to eight. The affair was a delightful event for all. The host and hostess were the recipients of many beautiful and useful presents. Mr. Long has been in charge of Engine 1656 at the Plant since May, 1919.

Mrs. E. E. and Mrs. J. C. Alexander entertained with cards and crokinole at the former's home on Friday evening, February 10. Flash lights were taken, a most delightful lunch served, and games continued until the wee' sma' hours.

Never having seen any items or pictures in our MAGAZINE from the Green Spring Petersburg Branch, we take pleasure in showing a photograph of the Baltimore and Ohio train and crew which make the trip daily between these points. Employes shown are, left to right: Fireman Charles Speelman, Engineer R. E. Fazenbaker, Conductor J. R. Carter and Brakemen A. J. Belt and E. V. Miller.

This branch is 54 miles long. Leaving Green Spring it follows the South Branch of the Potomac and traverses one of the finest peach growing districts in the country. For a distance of 6.7 miles it passes through the "Trough" of the South Branch, noted for its picturesque camping facilities. The leading camps are Trough Club, Wickham, and Hampshire Club, which, during the season, provide entertainment and diversion for people from our leading cities. Crossing the South Branch near McNeil, a beautiful farming district, reminding one of the middle western states, with its beautiful homes, modern buildings, and black, rich, loamy soil, extends.

A trip over this branch is worth while to any one.

Keyser

Correspondent, H. B. KIGHT, Ticket Agent

The accompanying photograph is of Miss Violet Largent, daughter of Car Repairman R. B. Largent, who has been in the service of the Baltimore and Ohio for nearly 20 years.

"Say, have the 'Safety First Books' come yet?" I hear that a dozen times a day. "Well, save me one when they come." All right, fellows, they are printed for you and you can always get one at the ticket office. They are otherwise known as the "Baltimore and Ohio MAGAZINE," although each issue has lots of things about Safety in it. Come on, let us practice Safety in every thought and act; then we shall reduce personal injuries and property loss to a minimum.

On the night of January 26 the big wholesale house of the Seiver Hardware Company was destroyed by fire. The Baltimore and Ohio Fire Department rendered valuable assistance to the City Department in fighting the flames. The people of Keyser appreciate this cooperation.

Fireman Charles Ryan, who recently had his arm broken, is able to be around again.

Rumor has it that one of our local officers will throw his hat into the Congressional ring. Good luck, Mr. Stover!

Division Passenger Agent W. W. Picking visited us a few days ago and lectured on "Personally Conducted Tours to Washington," at Potomac College. We hope to have several parties from here visit the Capital City on a personally conducted tour during the coming summer. Let's boost our Nation's Capital, ask our friends and relatives to visit it and learn more about where the Nation's business is conducted.

Payne Gordon, yard brakeman, is all smiles. It's a boy. Mrs. Gordon is the daughter of Master Mechanic A. H. Hodges. "Grandpa" Hodges is wearing a smile, too.

West End Brakeman J. W. Shobe was taken suddenly ill, while on duty in Grafton yard a couple of weeks ago. He started to go to a drugstore, and upon reaching there, fell in a faint. A doctor was hastily summoned and rushed Shobe to the Grafton City Hospital, where he was found to be suffering with acute appendicitis. He was at once operated upon and has now so far recovered as to be able to come to his home here, where he is convalescing.

"Col." W. J. Lavelle, train rules examiner, spent a couple of weeks here, examining the "boys" on the book of rules. We are always glad to welcome the "Colonel."

In the February issue of the MAGAZINE there appeared a full page "advertisement" of the Prospect Sales Company. This Company has just recently begun operations here, and has already given us a good bit of passenger and freight business, besides the fine full page "ad" in the MAGAZINE. They are turning out a yarn of superior quality, and when you are in need of yarn, remember to patronize our advertisers.

The First National Bank and the Masteller Coal Company have both been carrying an "ad" in the Among Ourselves items for the past four months. Let's patronize them.

West End Conductor Sargent O'Brien had the misfortune to have his toes badly mashed while in the performance of his duties. He is resting comfortably at the Hoffman Hospital.

Miss Violet Largent

Um-h-mm! Miss Harrison and Mr. Avers, car clerks

The accompanying photograph is of our car clerks, Miss Harrison and Mr. Avers. Of course they claim they are not posing when the picture was taken; they just "looked natural."

Safety Agent Lenderking paid us a visit the other day. He is arranging to deliver an address on Safety to the High School students in the near future.

Boyce Houser, Post No. 41, American Legion, of which many of our employes are members, staged a minstrel show on January 30 and 31 in Music Hall. The cast was composed mostly of Baltimore and Ohio men and the show was a great success.

"Bob" Garrett, clerk to the road foreman of engines, is somewhat of a photographer. He has promised to make some pictures for the MAGAZINE.

The Keyser Collegian basketball team, composed entirely of Baltimore and Ohio employes, in the past three years of its existence has won 113 games out of 121 played. They challenge any railroad basketball team on ANY railroad or any city team ANYWHERE in the world. The boys say that they are taking in a lot of territory when they make such a challenge, but that they mean just what they say. Come on, some of the other divisions, and give 'em a game.

The many friends of Warren Kolkhorst, painter at the local shops, were surprised to learn of his marriage to Miss Virginia Knott, one of Keyser's most accomplished young ladies. The ceremony was performed in Oakland in April, 1920, and they kept it a secret until about a month ago. Congratulations, Warren!

Rawlings, Md., ticket office has been closed and Agent Boor has been appointed agent at Petersburg.

Quite a number of our furloughed ear-men have been called back to duty. Foreman Stanley now has his forces making the car shop hum.

A number of the employes at Keyser have lately joined the Veterans Association; also have their wives join the Ladies' Auxiliary.

The accompanying cartoon, drawn by Mrs. Sirbaugh, shows her "hubby" receiving a little encouragement in his Safety First effort.

The MASTELLER COAL Co.,

KEYSER, W. VA.

Miners and shippers of high grade coal

Special preparation for domestic use

DEPOSITS \$1,055,260.26

The First National Bank

Keyser, W. Va.

SPECIAL SAVINGS DEPARTMENT

Interest paid every six months
from date of deposit

A committee from the Ladies' Auxiliary at Cumberland will visit Keyser in the near future to enroll in the Auxiliary the wives of the Veterans.

"Dusty" says, "It is not the way you add up a column of figures, but it is the total that counts."

The A. R. A. Meetings held each month by Car Foreman Stanley are bringing beneficial results and are looked forward to with keen interest by car clerks, as well as foremen. Quite a competition is being waged by individuals in regard to having a 100 per cent. performance each month, relative to car numbers and initials and A. R. A. billing.

At the last meeting, of the 27 present, 13 had passed the previous month with clear records.

Hardman Helping Station

Heard at the Office:

J. C. L.—"Where is the 94? Where is the 7039? What's going on at Newburg? What track will he use? How soon will he return?" And by the time that J. C. L. has finished, "Salty," to whom he was talking, has gone.

Neil Tream, local storekeeper, is back on the job after nursing an injured hand.

Carson (on the 'phone) to Murphy: "Tell you again! This is the twentieth time, and I'm so hoarse from repeating it that I'll have to rest!"

A timely cartoon by Mrs. Sirbaugh

Please mention our magazine when writing advertisers

Wanted—One motor car. Apply to Assistant Trainmaster Liller. Must be able to regulate speed from one mile up.

J. C. L.—Say, is that fellow slowing up? W. P. C. (rushing to window)—Hey, you! Don't stop here, this place is dry, and from all indication this is not the only place. (Meaning our reservoir at Newburg.)

J. C. L. (later)—Say, Bill, the excuses those fellows give are something fierce.

W. C. P.—You are right, Mr. Liller, but I guess they have to say something.

J. C. L.—But why don't they tell the truth sometimes?

W. C. P.—(No answer).

Connellsville Division

Office of Train Master

Correspondent, C. E. REYNOLDS

Eddie Phillippi, the efficient and well liked messenger, Master Mechanic's Office, Connellsville, started on his apprenticeship to learn the trade of machinist, on January 27. We wish him the best of luck.

The Master Mechanic's and Storekeeper's Offices are both blessed with some talent. Ray McClintock and Miss Fern Patterson are scheduled to perform their best in the American Legion Follies.

In the accompanying picture we see the Connellsville Steam Derrick, which is being held up by "Grub" Reese, the efficient clerk in the General Foreman's office.

Let us introduce Miss Leona McClintock, stenographer to the general foreman, Somerset, Pa.

Posing gracefully in Bronx Park is Miss Margaret Wershing, stenographer, Master Mechanic's office, Connellsville. This picture was taken while she was on her vacation at Bronx Park, New York.

On Saturday afternoon January 22, the Misses Catherine Hart, Lenora Grace, Margaret Creedon, and Mr. M. L. Lohan, all employed in the general offices at Connellsville, went to Masontown and took dinner at the Leroy Hotel, and in the evening attended the American Legion Bazaar. The girls say that "Mike" spent his money very freely on "chance boards." Have any luck, "Mike?"

Cupid is still on the job, as indicated by the following: Announcement is made of the marriage of Miss Mary E. Barkley, daughter of David Barkley of Altoona, Pa.

and Charles G. Pyle, son of Mrs. Sarah Pyle of Rockwood, Pa. The ceremony took place Thursday, January 26 in the parsonage of St. Paul's Reformed Church, Somerset. Rev. Edgar F. Hoffmeier officiated. Mr. Pyle is a popular fireman, Somerset and Cambria Branch passenger train. To this happy couple we extend our heartiest congratulations.

The Immaculate Conception Church was the scene of an attractive wedding on Wednesday morning, February 1, at seven o'clock, when Miss Eleanor Hickey, daughter of Mrs. Anna Hickey of South Eighth Street, Greenwood, was united in marriage to Edward J. McCarthy, son of Mrs. Mary McCarthy, South Connellsville. Following the ceremony a beautifully appointed wedding breakfast was served in the bride's home where covers for twenty-five were laid. The bride is one of the best known young women of Connellsville. Mr. McCarthy, the efficient chief clerk to the road foreman of engines, is also well and favorably known. "Ed," if words will express it, we wish to use these columns to extend to you and yours our heartiest congratulations.

On January 12, Charles Chambers, chief caller, Connellsville, and his family moved into their new home at Poplar Grove. Say, Charles, you have a nice looking place there. We hope that you like it.

G. T. May, warehouseman, Meyersdale, Pa., has been going to Pittsburgh, Pa., quite often lately. George says his credit is good at Pickerings. "Nuf Ced."

Pittsburgh Division

Correspondent, E. N. FAIRGRIEVE

On or about January 25, a volume of smoke was seen pouring from the lower window of the lobby of Foxburg Station. An alarm was turned in and the Village Volunteer Fire Department arriving on the scene, rolled their fire fighting machine (which consists of a hoghead with a discharge pipe and nozzle in one end, and three auto tire pumps in the other) into position. The lobby door was flung open and all hands were ready for business. The lobby was found crowded with "the Boys," each one with a merry twinkle in his eye, and puffing away on a big black cigar of exactly the same size and brand.

Inquiry brought forth the information that the congenial agent, Denton H. Kirkwood, had "done gone and done it." The three cylinder fire-killer was rolled back to its garage—under the rain spout of the Village Hall, and every one made merry.

We wish them much happiness and hope soon to see them riding around in their Chevrolet. The BIG MODEL is recommended.

Conductor "Bill" Bogart, Kane, Pa., has gone on a sojourn to the sunny South, the land of sunshine and flowers, and mosquitos and other things that "sting," of which the landlord is not the least active or efficient. Before leaving "Bill" got reminiscent and related one about an old relative of his who is a passenger conductor on a little branch line. Passing through the smoker just after a stop in the woods the conductor came to a tough looking customer, visibly under the influence. Conductor held out hand and said "Tickets—"

Bum—No ticket, rayroad man.

Con—What have you got to show you are a railroad man?

Bum—(Produces old, worn out switch key).

Con—What else you got?

Bum—(Produces part of old, torn schedule).

Con—Anything else to show?

Bum—(Fishes around through pockets, pulls out large card showing words "SMALL-POX")

Con—Much perturbed and playing for time while turning over in his mind what to do, absent-mindedly says, "Anything else?"

Bum—What'd'ya want, yallah fever?

The many friends of George Edmonds, agent, Kane, Pa., who has been ill for some time, will be glad to learn that he is improving. We all hope soon to see his smiling face once more on the job.

Frank, and Bess, and Jake,
Are there at "Put and Take."

Speaking of file clerks, someone has horned in with the following inquiry:

In what respects are file clerks likened unto children?

And the answer comes back—Because they are always playing hide and seek. (That's a deep one but you ought to get it.)

Friends of Conductor J. Newman will be grieved to learn of his sudden demise on February 4.

It is said that "Mat" Powell's hair has been standing straight ever since his hunting episode portrayed in the January issue of

the MAGAZINE. Some of us can stand this—others can't. "Bill" Moeler and "Tom" Swift, take notice.

Ticket Clerk M. L. Sherbondy, employed in the ticket office in the Baltimore and Ohio station, Pittsburgh, died suddenly while on duty.

In Memoriam—Miss Elizabeth Pauline Harrison

On January 26, at Mercy Hospital, Miss Elizabeth Pauline Harrison, daughter of Cecelia O'Malley Harrison, and the late Nicholas Harrison, died in her fifty-second year.

Funeral was held from the residence of her brother, Nicholas Harrison, on January 30. Requiem High Mass was said at Saint Mary's of the Mount Church. Reverend Father Griffith, officiating, was assisted by Reverend Fathers Munster and O'Connor. Interment took place in Calvary Cemetery. She is survived by her mother, Mrs. Cecelia O'Malley Harrison, and three brothers, Nicholas Harrison, John Leo Harrison and Joseph Harrison, all of Pittsburgh, Pa.

The pall bearers were: Train Master W. J. Carroll, Station Master T. E. Drake, Traveling Freight Claim Agent Thomas Delahanty, Car Accountant A. H. Gribbin, Ticket Agent S. J. Hutchinson (honorary); Passenger Conductor Joseph Meehan and Assistant Station Master E. A. Payne.

A GROUP FROM CONNELLSVILLE

Upper: Steam Crane x 42. Lower left: Miss Wershing on her vacation, Bronx Park, New York. Right: Miss McClintock, clerk to G. F. Cage

Miss Harrison entered the service of the Baltimore and Ohio on January 1, 1882. She was appointed to the position of matron on January 10, 1886, in the old Baltimore and Ohio Passenger Station, Grant and Water Streets. When the present passenger station was completed in May, 1888, she was placed in charge of the ladies room. Here she served faithfully until January 3, 1922, when she was taken seriously ill.

Whereas: It has pleased God in his wise Providence to claim by death our beloved employe, Miss Elizabeth Pauline Harrison, who for nearly forty years has served the Baltimore and Ohio Railroad Company, we desire to bear testimony out of our experience, to the gentle spirit, the upright, consistent life, the good judgement, the wise counsel, the earnestness, the zeal of our sister, and her love for the Master's cause:

Therefore, Be it Resolved:

That we express our deep sense of personal loss in her removal from our midst and that the Baltimore and Ohio Railroad Company has lost one of its most valuable employes, and her friends a careful and wise counselor: And Be it further Resolved:

That we will cherish her memory and strive to follow her in the paths of righteousness, and that these resolutions be spread through the columns of the Baltimore and Ohio MAGAZINE.

"We cannot say and will not say
That she is dead, she is just away;
With a cheery smile and a wave of the hand,
She has wandered into an unknown land
And left us dreaming how very fair
It needs must be since she lingers there:
And you, oh you, who wildest yearn
For the old time step and the glad return.
Think of her, faring on, as dear
In the love of there as the love of here.
Think of her as the same, we say,
She is not dead, she is just away."

Glenwood Round House

Correspondent, MARY A. BREEN,
Stenographer to Master Mechanic

Pipefitter George Whittaker is accepting congratulations on the arrival of a daughter.

Strange expressions heard around Glenwood Roundhouse on the second and third trick: "Lend me a dollar." Possibly some of our ex-firemen and hostlers could, if they but would, clear up this mystery by explaining in detail just what is meant by these words.

"Joe" Barrett, the able assistant to Boilermaker Gibbs, isn't quite satisfied with our accommodation trains. He can't see any reason why they can't, for his convenience, be stopped at Greenfield Avenue. All right, Joe, we'll refer the matter to the vice president.

Machinist J. G. Brenner has recently returned from a trip to Martinsburg, W. Va., where he had been visiting some old friends. "Jim" says the town is still on the map. Yes, Jim, we know it is STILL there. Possibly there are some STILLS there, too, that you may have overlooked.

While we regret very much the death of Enrico Caruso, still we rejoice in having found in the person of Round House Clerk J. A. Shedlock a substitute. "Joe's" favorite operas are "Form 1002" and "Form 1124-C." Whenever one goes into the Round House office, it might be well for him to be ready to hear quite an anthem on just these two affairs.

John Koerhan, Back Shop, has accepted the position of boiler clerk in this office, vice J. J. Elmore, resigned. So far, we're getting acquainted nicely and think that John will get along fine with all of us.

Recently one of our Pittsburgh papers has been running a series of detective stories. Now every morning on train No. 147, a certain gentleman, (who is not so much for looks but oh, man, why at times he shows an intelligence that's almost human); anyway, from Braddock to Glenwood, he's so much buried in the depths of said stories that the conductor has one awful time getting a look at "Jim's" pass. In addition to this remarkable interest, he spends half the nights in attending to his correspondence school instructions on "How to Become a Detective." At lunch time—well, he's even quit eating—so enthralling is this new profession of his. Just at present he's working on a most vital case—hot boxes. His office hours are from 12 to 1.00 p. m., with one hour for lunch.

One of our most popular engineers was recently slightly injured when No. 17 derailed at Pinkerton. Cheer up, Harry, that's only half as bad as when Cupid takes that little bow and arrow of his and aims to injure your heart.

Machinist "Joe" Shutte

Monongah Division

Clarksburg

Correspondent, VERNON A. LYON,
Assistant Ticket Agent

The announcement of the marriage of Mrs. Della D. Burdick and Louis T. Kinney came as a complete surprise to their many friends. The wedding was quietly performed at the parsonage of the Clarksburg Baptist Church on Wednesday, February 8, by Rev. J. W. Graves. Immediately following the ceremony, Mr. and Mrs. Kinney left on train No. 3 for Cincinnati, where they spent their honeymoon. On their return they will take up their abode in the Gore Hotel.

Mr. Kinney is a well known railroader, holding the position of leverman, "MD" Tower. Our hearty congratulations are extended to the happy couple.

The accompanying photograph is of "Joe" Shutte, machinist, Clarksburg Roundhouse. Mr. Shutte has been in the service for a number of years and is a popular employe here.

We regret to report the death of Eli F. Cogar, father of our chief bill clerk, Miss Inez Cogar, Clarksburg Freight House. Mr. Cogar died on February 8. We extend to the family our heartfelt sympathy.

Allow us to introduce to our Clarksburg folks our new ticket clerk, Carl H. Enlow. Mr. Enlow came to us from the Accounting Department, Grafton.

Charleston Division

Correspondent, M. W. JONES,
Secretary to Superintendent

"EVERY CLOUD HAS ITS SILVER LINING," so they say, and we hope it is true. During the month of January we moved some 800 more loads on the Charleston Division, and we loaded on the division about 900 more cars than in December. This shows a slight improvement, which we hope will continue.

Safety Above Everything

One hand was all he used to steer
The other arm hugged Myrtle
They did a skid, and then, Oh dear,
The beastly car turned turtle.

The usual meeting of the Division Safety Committee was held in Weston on January 18. All members were present except two who were delayed by a derailment, and one who was ill. We had with us W. L. Allison, safety agent, Chillicothe, who gave a most instructive address. Trainmaster Deegan read a very interesting paper on the grade crossing accident proposition, and made some good suggestions for work along the lines of elimination.

Locomotive Inspector J. A. Malone has been off duty a few days on account of a sprained ankle. However, when "Joe" received his gas bill for January, he found that while he had lost the use of his foot for a while, he had not lost the use of his tongue.

Machinist Helper W. R. Mallonsee is with us again. "Bill" considers himself quite an acrobat, but he draws the line at dodging ten pound malls.

O. R. Skinner, ear repairman, has returned from the hospital at Clarksburg. We are glad to see him recovering so nicely.

Note by the way. Local papers advertise that if any one has a book of rules on the famous game of set back, they are requested to deliver to Messrs. Baker and Hefner, and receive suitable rewards.

"It is estimated that in a single year unscientific loading, accidental damage and the tremendous cost of packing in the United States add more than \$700,000,000 to the cost of food, clothing and other necessities of life. Unused space in freight cars costs \$209,000,000, and hauling half empty cars more than 6,000,000,000 miles, \$157,000,000. Damage and theft cost \$100,000,000, and lumber that is wasted after being used once in packing cases costs \$240,000,000. It is computed that from a tenth to a quarter of the costs of foodstuffs goes to pay for crates that are thrown away instead of being used a second time." "THINK ABOUT IT," and you have the reason for the existence of the Freight Claim Prevention Committee of the Charleston Division, which met on January 18, with an attendance of 32 officers, agents, conductors, etc. A small reduction in the amount of claims would pay the salaries of a good many men, and therefore Mr. Glessner's slogan, "Cut loss and damage claims in half."

From Gassaway, we learn that L. M. Gump, formerly of the Mechanical Department at that station, and now of Sabraton, W. Va., and C. K. Welch, now located at Keyser, were recently welcome visitors at that point. H. H. Boggess, who has been ill, is able to be out again. Mr. J. H. Bowen, secretary of the Y. M. C. A., attended the

Conductor Dan Mandaville has been in Erie Service 46 years. His run is between Jersey City and Binghamton—out on No. 5, back on No. 6. He has been carrying for 15 years that Hamilton he has in his hand.

TRUE TIME ALL THE TIME

is what you can expect from your Hamilton Watch.

For thirty years we have been building Railroad Watches—

—Watches which have more than met the exacting requirements of Railroad Watch Inspection.

—Watches that have been doing their full share in keeping "On Time" the fast Limited Trains on America's finest Railroads.

—Watches that have been serving Engineers, Firemen, Conductors, Trainmen, Dispatchers, Telegraphers, Yardmasters, Switchmen—in fact all classes of Railroad men whose jobs require an accurate and dependable watch.

The number of satisfied Hamilton owners on America's railroads is now legion. We don't manufacture all the Railroad watches; but all the Railroad watches which we manufacture are watches of dependable, enduring accuracy. There is a comforting assurance in belonging to the majority.

For time inspection service, the most popular watch on American railroads is the Hamilton No. 992 (16 size—21 jewels).

Write today for the Hamilton Watch Book—"The Timekeeper." It pictures and describes the various Hamilton models, with their prices, beginning at \$22 (\$25 in Canada) for a movement alone, up to \$200 for the Hamilton Masterpiece. Also other interesting watch information that makes it especially valuable to railroad men.

HAMILTON WATCH COMPANY
Lancaster, Penna., U. S. A.

Hamilton Watch
"The Railroad Timekeeper of America"

recent "Y" meeting at Fairmont, W. Va. On February 2, the Y. M. C. A. Board of Directors and Social Committee, and their wives, were entertained at a social given in the Gassaway "Y" auditorium. Trainmaster J. D. Nichols is suffering from a bad attack of "flu" which is very prevalent here.

Our column of honor this month shows you the photo of Captain Thomas Smith, veteran passenger conductor, who entered our service in 1879, and today, after 42 years' service, is running his turn with the best of us. His record is an enviable one, and he deservedly stands high with officers, patrons and his fellow employees alike.

Thomas Smith was born in Clarksburg, W. Va., in 1851. His parents came to that city from Virginia in 1840. When Mr. Smith was eight years old his father died, leaving a widow and five children. It was necessary for young "Tom" to go to work at the age of 12 to assist in keeping the home together. When he was 15 years old, the Smith Brothers secured a contract to carry mail between Clarksburg and Weston, and "Tom" drove a stage coach between these towns for 16 years. The stage coach handled all mail, passengers and express, never carried a gun, and never lost an article, and, remarkable to relate, there were no attempts made to rob this stage. The old stage running between Weston and Clarksburg was the double deck Concord, made in Concord, N. H., costing \$1,000 each, and was drawn by four horses. Its capacity was nine inside, and five on the top. There was also a place for mail and baggage. In comparison with today's full truckload of mail which comes off every train at Weston, it is interesting to note that the stage had only one through sack and one local sack, exchanging mail at Mt. Clare, Lost Creek and Jane Lew. Twelve horses were required to make the trip, the drivers changing at Jane Lew. During the winter, the stage required seven to nine hours to make the run between Weston and Clarksburg, while today the train makes it in less than one hour and a half. Mr. Smith remarks that while Weston people seem to have more patience than any others he ever saw, still if a train today is delayed 15 minutes, there is considerable criticism, while in the old days they would sit in a coach nine hours and were happy that they could make such a good trip.

On September 18, 1873, romance entered the life of "Captain Tom," when he married Miss Mary Hawks of Jane Lew. They have eight children, three boys and five girls, all living.

In 1879, the narrow gauge railroad—The Clarksburg, Weston and Glenville Railroad Company—commenced eating into the business of the Smith Brothers stage, and to kill competition the railroad appointed J. W. Smith conductor. Mail was then carried on the train until arrangements could be finally arrived at between the railroad and the government. "Captain Tom" was appointed conductor on November 13, 1879, and the stage line died. There being insufficient work as a conductor, he was worked between times as freight handler in the Clarksburg station. In 1883, a narrow gauge line was built from Weston to Buckhannon, and Mr. Smith took the run regularly. The narrow gauge was made standard in 1890, and then originated the old West Virginia and Pittsburgh Railway, now the Baltimore and Ohio.

When the railroad first started running out of Clarksburg, for Weston, the equipment consisted of six box cars, six stock cars, ten gondolas, two coaches and two combine cars. They had engines Nos. 1, 2 and 4, built in Pittsburgh. These engines hauled from Clarksburg to Buckhannon four loaded freight cars, one coach and one combine car.

Mr. Smith's first run was from Weston at 5.00 a. m. to Buckhannon, returning to Clarksburg, back to Buckhannon, and then returned to Weston where he laid up for the night. In 1904 Mr. Smith was elected sheriff at Weston, which position he held for four years. Still hale and hearty, we hope to have him with us for many years to come.

Have you all heard the old song, "You're just the type for a bungalow?" We understand that when our friend who shall be nameless, moved to Shady Brook, he sang with great pathos to the partner of his joys, "While you're learning to milk the cow, I'll be learning to hoe," and that she answered with tears in her eyes, "There's lot's of water running when it rains."

Yard Engineer Butler has returned from a vacation spent in Philadelphia. Mrs. W. C. Deegan and family have returned from a visit to Wheeling for the holidays. Engineer J. R. McCray, who was in Clarksburg, is again running out of Weston. William Hudnell, locomotive inspector, Weston shop, finds it necessary to make frequent trips to Grafton, while Yard Clerk Fisher wends his weary way quite often to Mannington.

Veteran Conductor Thomas Smith

Engineer G. B. Ramsburg, who has been in the service of the Company for 32 years, came in on the local on February 3, and went home, apparently in his usual good health. Shortly afterward he passed away. The sincere sympathy of the Charleston Division officers and employees is extended to the bereaved family. We extend our sincere sympathy to Conductor "Dick" Roush, who recently lost his wife, and to Fireman M. E. Turner, who also lost his wife.

General Superintendent Scott made a trip over the Charleston Division on February 8 and 9, accompanied by General Freight Agent Marsh, Division Freight Agent Jordan, Superintendent Trapnell and other division officers, in connection with the Traffic Department's campaign for more business, and to get into closer touch with our patrons and shippers on the Charleston Division.

Courtesy and Service Are Sure Business Getters

Do you know that for several months the Charleston Division stood No. 1 each month in fuel performance, and that recently we have dropped back both in freight and passenger service? A word to the wise is sufficient. Let's get back up top where we belong. We can do it.

We have often heard of the seven wonders of the world. Here are the seven wonders of the Charleston Division:

1. An old "bach" for 50 years, now a benedict.

2. Mr. Schide at the Masonic Club dance. DANCING!

3. "Al" roped, thrown and tied tight.

4. Bee on the Gray Mule.

5. A certain lady has not left her hubby in Weston over Sunday for three months.

6. The West Virginia winter weather.

7. The SAFETY, EFFICIENCY, LOYALTY and COURTESY of Charleston Division employees.

Foreign Cars Cost \$1.00 Per Day. Chase 'Em

Something remarkable happened the other day. Relief Dispatcher "Al" Mason asked for a few days off to visit his folks in Huntington. Having heard some rumors, your correspondent was suspicious. After doing a little detective work, he found that he had made a date with the minister of the Baptist Church in Weston for 12.30 p. m. on a certain day. Further investigation found "Al" taking the 1.35 p. m. train headed in the general direction of Grafton. This, of course, is no way to go to Huntington, and still further inquiry developed that he and Miss Nell Taylor of Weston had been married. We extend our sincere congratulations to the happy couple.

One after the other they are dropping off. Now on the dispatcher's list, we have only John Carpenter, who shows signs of taking the wisest step of his life, and Millbourne. We have our doubts in connection with "F. X." but suggest that correspondents in the vicinity of Huntington make inquiry and see what a little private detective work will bring forth. For the information of inquiring young ladies, we would state that we still have a very few eligible bachelors in Weston, though day by day the number gets less. Therefore, come early and avoid the rush.

The Weston basketball team, in which we are all interested, is doing good work, having finally landed on its knees our old rival, Buckhannon.

H. M. Baker, newly appointed travelling freight agent, is a frequent Weston visitor. We are glad to see him. He has asked for the cooperation of everyone, and feels sure, from what he has heard of us, while he still lived away out in the wilds of Grafton, that he will get it.

Advertisement! Information wanted regarding train sheets. Apply Messrs. Severns and Schide and receive suitable reward if the proper information is given.

"If you have faith, preach it; if you have doubts, bury them, if you have joy, share it; if you have sorrow, bear it. Find the bright side of things and help others to get sight of it also. This is the only and surest way to be cheerful and happy." In other words, be an OPTIMIST, and not a PESSIMIST.

The superintendent has commended Agent N. Rexroad at Richwood for close attention to baggage collections, resulting in increased revenue.

H. P. Bankhead, agent at Burnsville, has been commended for his close interest in the "Perfect Package Campaign."

Agent J. A. Woolford has been commended for his close observation in endeavoring to increase the Company's revenue.

Relief Agent A. H. Marshall has been commended for his interest in all matters pertaining to conservation of the Company's revenue and the avoidance of waste.

The superintendent has personally commended Conductors O. C. Fansler, Harmon and Cogger for interest in the prompt movement of their trains.

Check weighing of L. C. L. freight on the Charleston Division in January resulted in additional revenue of \$240.73. This is lawful revenue due the Company, and it is hoped all agents will continue the good work they are doing along this line.

The "Think and Act Drive" will be continued until June 30, 1922. We ask again for the same kind of cooperation in this work that we have received in the past. This helps to prevent claims, which on the Baltimore and Ohio amount to some \$1,000,000 per year, and which we are all interested in reducing.

Wheeling Division

Benwood Shop

Correspondent, ANGELA JUNE APPLEGATE

We have been noticing circulars from realty concerns in Florida, lying on Calvin Reisinger's desk. Is "Cal" figuring on purchasing an orange farm? If he is as good an orange grower as he is a stenographer the orange growers of Florida had better depart for other climes. Why not a chicken farm, "Cal?"

Our efficient and congenial road foreman of engines, C. Crawford, has moved his family from Willard to McMechen. We extend them a hearty welcome.

A certain machinist apprentice from the Benwood Shops was seen coming down Marshall Street, McMechen (Sinclair Lewis's "Main Street") without his cap at about 11.45 p. m. "Bill," will you kindly explain, or must we ask Ruth.

The stork has been very active in this vicinity and we congratulate the following: Mr. and Mrs. Walter Zipperick on a daughter, Mary Gertrude, born on January 12; Mr. and Mrs. Clarence Kuhens, on the birth of a son, "another wreck clearer," and Mr. and Mrs. Gregory Murphy, a daughter, christened Maris Eileen. Mrs. Murphy will be remembered as Miss Irene Kelly, former stenographer in the District Master Mechanic's Office, Wheeling.

C. B. Daily, J. E. Doyle, Jr. and George Fish recently returned from a hunting trip. They brought 200 brake beams back from Zanesville.

By a majority of 116 votes, C. C. Morris, Car Record Office, defeated George Bayles, engineer, for the candidacy of mayor in the well known town of McMechen. Mr. Morris is holding this office at the present time.

Holloway, Ohio

Correspondent, O. R. TELLE

Mr. Dixon, our genial assistant master mechanic, is to be commended for his alertness in observing any indication of danger which might threaten his employees. Noting the danger from falling icicles from the water tank at the shop, he immediately had signs painted and placed where each and everyone could plainly see them. If all of us were as mindful of the "Safety First" rules as Mr. Dixon, Holloway would soon be in the "No Casualty" column.

The citizens of Holloway were suddenly awakened on February 1, with the thought that surely there was an earthquake somewhere in the immediate vicinity. However, upon investigation, it was discovered that Miss Lillie Wilson thought it easier to descend the hill in Sear's Addition by sliding rather than by walking, and thereby she had placed herself in very close contact with the side walk.

The fellow employees of Bert Stewart and O. L. Carlton will be surprised to learn that they have taken unto themselves life partners. Don't forget, Boys, all of us smoke, and the girls like candy. Who will be the next victim?

E. D. Kirk says the sun never shines between Holloway and Piedmont. How could you expect it to, Kirk, at 3.00 or 4.00 o'clock in the morning?

Can you remember the day it was so icy? Neither can I, but ask Miss Perkins. It was well impressed upon her mind.

It is rumored that the ridge road from Holloway to Belmont Ridge is to be paved. This will help out in a good many instances. Perhaps Gladysce will not have to walk from the station home.

We are glad to see you back "D. A.," and extend to you a welcome hand.

Bellaire

Correspondent, JACK STAMM

Alen Finberg, cashier, Freight Office, has taken out life insurance policies with every Insurance Company known. This was thought to be rather strange, but as Alen would advance no reason, our local sleuth was assigned to the case. Little progress was made until it was learned that Alen had purchased a book entitled "How to Stop an Elevator When It Reaches the Top Floor."

Bridge One Hundred, connecting Bellaire, Ohio, and Benwood Junction, W. Va., is undergoing extensive repairs. The huge girders are being removed from beneath the bridge to make room for larger and stronger ones. It is a wonderful piece of work, inasmuch as the change is being made without the slightest delay to traffic. The Baltimore and Ohio forces are combined with the Seaboard Construction Company to do the work. H. B. Creig, inspector for the Engineering Department, is in charge for the Baltimore and Ohio, while Mr. H. S. Goodloe represents the Seaboard Company.

Congratulations are extended to Mr. and Mrs. Carl Mitchell, who were united in marriage a short time ago. Mr. Mitchell is night ticket clerk, Bellaire Passenger Station, and has been in the service for the past six years. Mrs. Mitchell was Miss Bessie Hahan.

Mrs. Saulsbury, formerly Miss Minnie Sievers, has resigned her position as stenographer at Bellaire Freight House and is now residing in Pittsburgh, Pa.

Martins Ferry

Mr. and Mrs. Bernard Helfer are the proud parents of a new baby boy. Mr. Helfer, while being interviewed, certainly took the part of the proud father. He told us that the child was born on Monday morning and on Tuesday when he returned from the office, Bernard, Jr., had crawled to the door to meet him and said "Da-Da." The new papa was enthused and almost offered me a cigar—but didn't. Mr. Helfer says "not because it is OURS but the child just seems to be exceptionally bright."

"Bill" Mouse, our night boiler foreman, has been promoted to day boiler foreman, Fairmont. We are sorry to see him go but we congratulate him and wish him much success.

Co. T. McKeever, electrician, Wheeling Coach Yards, recently underwent a serious operation at the Ohio Valley Hospital. We wish you a speedy recovery, "Jack."

J.M. LYON & Co. { Dept. 1 } Maiden Lane
4013 } New York City

One of the most quiet and surprising things that ever occurred was the wedding of R. Ruckman and Miss Maybelle Maupin, both of Moundsville. It was almost a month before the secret leaked out. Congratulations! We believe the main object of keeping the ceremony a secret was to escape the cost of the cigars, but of course we only surmise this.

George Garabas, who went to Europe about a year ago, has again returned to the good old U. S. A. This is his fourth trip across the sea.

F. R. Davis, our well known terminal trainmaster, is back on the job after being away several months on account of his health, which, we are glad to say, is much improved.

One of the roundhouse clerks recently purchased a diamond ring and also a wedding ring to match. When is the happy day, Howard?

Engineer A. Griffith, Bridgeport, is the proud daddy of a fine new boy. Congratulations, Griff! but where are the smokes?

Western Lines

Cincinnati Terminals

Correspondent, JOSEPH BEEL
Changes at Gest Street

Gest Street switching territory, comprising the west end manufacturing district of the Cincinnati Terminal, not many years ago was noted for the manufacture of all kinds of vehicles, being the largest center in the world. Shipments were made to all sections of the country, as well as to foreign lands. One can hardly comprehend the enormity of this business when it was at its best.

Some idea of this may be had when you consider the fact that one concern from the many located here then manufactured and shipped in one train, 40 cars of buggies,

Martha Dean, daughter of Operator C. E. Sheefs,
SG telegraph office

loaded in 40-foot equipment, the largest car to be had at that time. The equipment for this business in those days was scarce, but the railroads were soon alive to the situation and shortly the great roads of the west were building suitable equipment for handling the business, sending it here empty from St. Louis, Chicago and Peoria.

There was considerable competition among the different roads to secure this business, special solicitation by several different lines was given to look after the business and secure equipment, and as usual the roads giving the best service hauled the bulk of the business. Having enjoyed the largest vehicle business in the world, we now have the Monitor Stove Company, the largest manufacturer of pipeless furnaces in the world, shipping to all parts of the country.

We also have the largest Matzos Bakers in the world—The B. Manischewitz Company. Their product is shipped to all parts of this country and Canada, as well as to Europe, Asia, Africa, Australia and the Orient. By reason of this great business located here, Cincinnati is known to more Jewish people than any other city in America.

Their business, as well as all business located here, is highly competitive as well as profitable from a carrier's standpoint. About 50 per cent. of the cars loaded here require special or large equipment, which requires special attention in order to fill orders promptly and retain the business.

All the shippers at Gest Street are loyal to the Baltimore and Ohio Railroad, because of service received by them from every department. Shippers demand prompt and reasonable service and it is evident our service is appreciated as well as we appreciate their loyalty to give us in return over 90 per cent. of all the outbound business from this territory.

When you give a full measure of service to those whom you are employed to serve, you not only get good will from them, but your efforts are appreciated. There is no better way of securing business and retaining a high standing among our patrons than by following the words of Mr. Willard in his message to the officers and employees of the Baltimore and Ohio on the relinquishment of Federal control, as given in the Baltimore and Ohio MAGAZINE for March, 1920, viz.:

"The standing of the Baltimore and Ohio Railroad Company with its patrons, and in the communities which it serves, will depend very greatly upon the character of the service rendered by the industrial employees with whom the public comes directly in contact. The Baltimore and Ohio Railroad Company earnestly desires to perform its duties as a common carrier in such amount as to meet the fair and reasonable requirements of the public, and, more than that,

it wishes as a corporation to be looked upon as a good citizen and good neighbor in all the communities which it serves ***** I earnestly request the co-operation of all Baltimore and Ohio officers and employees in an effort to regain for the Baltimore and Ohio Railroad the business which was diverted from its line during the period of the war, and to re-establish its former relationship with its patrons."

With this message again before us, let us renew and extend our efforts in service and courtesy to our patrons and our Company.

Yard Conductor P. J. Mahoney, Gest Street crew, who had his fingers injured some time ago, is back on the job again. Glad to see you back, "Pat." We hope you will not meet with an accident again. John Crist, who handled the crew so efficiently in "Pat's" absence, is still with the crew as assistant.

G. B. Spaulding, inspector at Gest Street, was called to St. Louis recently on account of the death of his mother. We know how great his loss is, and we extend to him our heartfelt sympathy.

The outlook for continued increased business at Gest Street is bright.

A recent addition to the Superintendent's Office force is Francis Hughes, formerly from the Engineer's Office, who has taken position as chief clerk to the assistant division engineer.

General Offices, Cincinnati, Ohio

Correspondent, E. W. SPILLE, *Pass Clerk*

General Manager's Office

The Transportation Department

Amanda wears a wrist watch,
Bobby has a grin;
Alice lives on candy,
And Kitty's far from thin.
Efficiency is Ruth's craze
And Russell is quite clever
While T. J. M.'s startling phrase,
Is "Keep Busy." Well I never!
Phyllis is a typist,
She has lots of speed,
So Wilhelm never worries,
While Charlie likes to read.
Clarence thinks he's always right
I'm sure we all agree;
On Rosie, he calls every night,
Oh, Me! Oh, My! Oh, Me!
Our Jimmie is industrious
And Von is on the Spot,
Ferdie Hornbach sometimes works and
Sometimes he does not.
So here's to the office of GDB
In number they are few,
A toast to each and every one
'Tis the best that I can do.

Now that winter is about over we expect very soon to see "Joe" Barron discard his overcoat and bring out his little black parasol.

Ruth to Eddie: "Get off my 2632!"
What do you mean, Ruth?

If "Joe" and "Ben" don't stop losing their pocketbooks with their monthly pay and train tickets in them they will have to appoint someone to accompany them wherever they go. No, "Joe" lost his this time.

It is rumored that Miss Beitzer is going to leave us for the stage. Good work, Ruth. You have our best wishes.

Miss Wehage has just received a present of a pretty GREEN umbrella. Of course, we all know why it's green.

Newark Division

Correspondent, B. A. OATMAN

Konrad Klaus is back on the job after an illness of several months. Our passenger equipment will now be given an "A" inspection.

Engineer E. F. Ryan and son "Dan" recently made an extended tour of the western states.

Mrs. D. W. Foran, wife of Machinist D. W. Foran, died at her home on February 9, after an illness covering many months. The sympathy of the Newark shop employees is extended to Mr. Foran and family.

There seems to be a shortage of open end envelopes, which no doubt is due to the universal use of this mail conveyor. Originally the envelope was used between division offices but its use has now grown to such an extent that it can be classed as a system saver in the way of stationery. Do not use a sealed envelope for any purpose when the open end will answer just as well.

Ira A. Peterman was made boiler foreman, Cleveland, effective February 8. Mr. Peterman entered service at Newark as engine cleaner in August, 1900. He was made boilermaker in 1911, tank foreman in 1913, and assistant boiler foreman on July 1, 1921. Mr. Peterman also filled the position of fire chief, Newark shops.

He will be missed by the shop employees, all of whom wish him success in his new location.

George W. Ruick, employed at Lexington, Ohio, passed away on February 2. Typhoid fever caused his untimely death at the age of 22. Mr. Ruick was held in high esteem by all fellow employees and friends. This was emphasized by the numerous floral tributes which accompanied the casket. Mr. Ruick is survived by his wife and one daughter, his parents, a sister and a host of friends. His family has the heartfelt sympathy of all.

A Dog-Gone Shame

By A. S. Wahl, clerk, Yard Office,
Newark, Ohio

Kelly, Kelly, quite contrary,
How does your puppy grow?
When you bought him, so frisk and airy,
About him was nothing slow.
You took him home in your room to stay,
But your landlady chased him away,
And then—Oh! happy inspiration—
"I'll take him to Grandma's plantation."
He took him to the station
While he howled like all creation,
And whined and cried and pawed and
scratched,
"Til the passengers planned devastation.

He reached the farm 'bout half past four
And slyly knocked on Grandma's door;
The door was opened a little crack
A voice said, "take that thing right back!"

So Kelly turned with the dog again
And piled him back upon the train,
Back to Newark with the pup he came.
(Riddance of pups is an awful game.)

And now a sign that reads "For Sale"

A Little Pup as Big as a Whale,
(And getting bigger).
"My master's not able to find me a home
Over velvet carpets I long to roam,
So if you know of a lonesome guy

Send to my master Kelly,
To make a bargain he'll surely try."

The accompanying photograph is of Miss Juanita Pearl George, daughter of Wreckmaster T. A. George. "Tom" thinks the

Juanita Pearl George

world of this baby girl, who is with him constantly when he is at home.

May Maxine Hall arrived at the home of Mr. and Mrs. Earl Hall, Newark, Ohio, on January 15. Earl is now required to divide his time between his first trick clerkship at roundhouse and in teaching May Maxine to ride a motorcycle.

On January 26, John Price, C. & N. accountant, Division Accountant's Office, was taken ill suddenly. A physician pronounced it a paralytic stroke. Mr. Price was taken to the City Hospital where he is under the best of care. Last report is to the effect that he is doing as well as could be expected. Mr. Price has been accountant for the joint C. & N. Division tracks for many years. He is liked by all and we wish him a speedy recovery.

Eleven men were put to work in the foundry at Newark, Ohio, on January 26. The force will be further increased to accommodate the needs of the Company. At present steel back brake shoes and some driver brake shoes are being made. Kind of looks natural to see "Pete" Graff back on the job after a vacation of nearly one year.

On January 27, noon, there appeared a stranger taking in the sights around the passenger station at Newark. He was dressed in the uniform of a Frenchman, bright red trousers with white stripe and coat was of a bluish gray color; he wore the regulation French army cap and made quite a hit with the ladies who happened to see him. On inquiry it developed that he was unable to talk anything but French. Station Master Charles Long took quite an interest in the welfare of the traveler, and after quite a canvass of probable linguists he secured Mr. Arthur Devlin of the Post Office forces at Newark. Mr. Devlin had little trouble to get the desired information. Our visitor stated that he had started from Jerusalem and had purchased transportation from that point via Vera Cruz to New York city. Further inquiry resulted in finding that he had arrived at Newark (via a competing line). He did not know what had become of the ticket which would carry him to New York. He purchased a ticket to Parkersburg and left on train 34.

J. F. Kreager, for many years locomotive engineer running out of Newark, Ohio, and later working at round house as hostler, has left the service to return to the farm to

spend his remaining years. We wish him success in tilling the soil.

The Motive Power Department is making a good showing in the Think and Act Drive instituted in August 1921. Car Inspectors are taking an active part in correcting conditions on equipment, which, if let go, would later be the cause for claims against the Baltimore and Ohio. Newark station especially is following closely and weekly reports show that nearly every car inspector has located defects of some nature and has corrected or arranged for the correction of equipment when found to be defective. This drive is worthy of the best efforts of every car inspector. Let's make even a better showing in the future.

Walter Greely, premier bowler of the Baltimore and Ohio league team, has been scouting around of late for new talent. Guess he has secured a line up which will be a winner as we hear that he is contemplating a trip out of town. He has a reputation of always bringing back the bacon. Good luck, Walter.

Because of the reduction of supervising forces in Newark Yards, Assistant Yardmaster A. S. Wahl has resumed his duties as yard clerk, West End Yards, Newark. Glad to see you back at your desk again, Andy.

A. B. Wheeler, who has been employed for many years as switch tender in Newark yards, is seriously ill at his home on Kibler Avenue.

Mrs. May Murphy, stenographer to General Yard Master Grimm, has been confined to her home because of illness.

Clay Horn departed for the West on December 15, intending to stop off at Los Angeles, to call on some friends. We understand that he carried with him a diamond ring. Rumor has it that the ring will be returned to the East on the hand of a western young lady who has been very busy in the Lasky Studio. Mr. Horn is yard clerk, Newark.

It is the desire of your correspondent that every employe on the Newark Division take an active part in collecting information to be used in the MAGAZINE. Get busy and let us know what is going on at your station.

Charles M. Hinger

Charles M. Hinger was born on October 4, 1872; he died at Newark, Ohio, February 1, 1922. Mr. Hinger entered service with the Baltimore and Ohio as an engine cleaner, Newark, Ohio, shops. He entered his apprenticeship as blacksmith on March 14, 1890; was made blacksmith, March 14, 1894, and continued in the service at Newark, Ohio, until November 1, 1908, when he was made blacksmith shop foreman, Garrett, Ind. He returned to Newark

Vose

as blacksmith foreman on January 7, 1914, and remained in same capacity until December, 1920, when his health forced him to retire from active service.

In 1896 he was united in marriage to Miss Bertha Adkins, who, with a son, Charles A., Jr., one daughter, Mrs. Earl C. Forbes, and one grandchild, Jack Forbes, survives.

"Charlie" was kind and congenial and was well liked by his fellow employes, especially those of whom he had charge. We extend to the family the heartfelt sympathy of the employes on Newark Division. The accompanying picture shows Mr. Hinger, second figure from the left. Reading from left to right, those in the group are: Assistant Foundry Foreman Charles Haslop, Blacksmith Foreman Charles M. Hinger, deceased; Tank Foreman Ira A. Peterman, Assistant Machine Shop Foreman Clyde C. Hupp and Tool Room Foreman Robert J. Brooker.

District Master Mechanic W. D. Johnston arrived in Newark recently to make one of his periodical visits. On his arrival at Master Mechanic's Office he had in his possession a beautiful Knight's Templar charm attached to a very fine chain. Mr. Johnston claims that on his way from the

Group of Newark Division employes, including the late Charles M. Hinger

Please mention our magazine when writing advertisers

depot to the shops, he was met by General Yard Master Grimm, who handed him a case containing the charm and chain. Mr. Grimm seemed to know nothing in regard to the contents of the package he handed to Mr. Johnston, simply had orders to give the package to Mr. Johnston the next time he saw him. Now Mr. Johnston is the proud possessor of some nice jewelry and is unable to find out why he was given the charm or who it was that was of the opinion that he needed such decorations to improve his already tidy appearance.

Mt. Vernon, Ohio

The Mt. Vernon Bridge Company is now working on the structural steel which is to be used in the erection of the Ohio State University Stadium at Columbus, Ohio. This is to have a seating capacity of 60,000. The Baltimore and Ohio is moving this structural steel from Mt. Vernon to Columbus at the rate of from five to eight cars per day.

G. L. Strong, who for a number of years has been leverman at the tower, and recently tallyman at the freight house, has accepted the position of night clerk, passenger station. Success to you, George!

Church. Miss Mary McGowan attended as bridesmaid, and Joseph Diffley as best man. The happy couple departed on an eastern honeymoon trip. They will take up their residence in their new home on West Clayton Street. In the picture are, top row, left to right, Miss Mary McGowan, bridesmaid, Joseph Diffley, best man; bottom row, the bride, Mrs. I. H. McOwen, and the groom, I. H. McOwen.

The first meeting of the newly organized class of accounting, was held in the Division Accountant's Office on Monday, January 9, with an attendance of 23 members. Division Accountant P. H. Groscup, who originated the idea of organizing the class, opened the meeting and spoke at some length on the purpose of the meetings. The following officers were elected for the current year. President, P. H. Groscup; secretary, George B. Sprow, treasurer, J. W. Ballentine. The Social Committee will be composed of W. J. Thatcher, chairman; Fred Ellis, Whan Poole, Ruth Dufford and Gladys Keelan. Meetings will be held every Monday evening, with a short instruction on the various phases of accounting, after which a half hour is devoted to the question box. All clerks are at liberty to ask any question pertaining to modern accounting. These weekly meetings are

waxing warm in enthusiasm, and much good is being accomplished for both employer and employee. Arrangements are now under way for the first banquet and ball to be held in the near future. It is the intention to feature the meetings with social functions at which various members of the operating staff will be present. These will give short talks on the modern methods of successful railroading.

The New Castle Division is represented in the City Basket Ball League with one of the best teams which ever graced the floor in the great indoor game. Reynolds Suber is captain of the team and has associated with him Glenn, at center, Kocher and Eilbeck as guards. Buckingham is Suber's running mate at the forward position, and Burnett, VanFossen and Weisse are capable of filling either position, and have contributed much to the success of the team. At this writing the team is tied for first place.

Miss Gladys Keelan, stenographer to the division accountant, has returned from a three weeks' visit with her sister in Fort Pierce, Florida. She also visited Jacksonville, Miami and Key West.

Over five hundred employees and their families attended the second annual ball given under the auspices of the staff officers

WESTBOUND TRIMMER ENGINE AND CREW

On engine: Brakemen C. E. Fogley and G. C. Garbett; Below: Brakeman G. Weber, Conductor "Al" McCombs, Engineer W. J. Osborn, Yardmaster J. J. Kane. Upper right: Mary, 14-year old daughter of Engineer McGowan, New Castle Division; Center: wedding party of Freight Engineer I. H. McOwens (see accompanying note). Lower right: "Lonsome" Pine.

New Castle Division

Correspondent, J. A. JACKSON

H. F. Schwab, division storekeeper, New Castle Junction, has been transferred to the Chicago Division, where he will act in the same capacity, with headquarters at Garrett, Ind. During his stay in New Castle, Mr. Schwab made many friends among the employees on the Division, who, while they regret his leaving, are jubilant at his receiving a well deserved promotion. H. A. Lockart, South Chicago, succeeds Mr. Schwab at New Castle. He has already assumed his duties as storekeeper.

Miss Alice McGowan, sister of Engineer J. M. McGowan, and I. H. McOwens, freight engineer, were married on Wednesday, January 11, at St. Margaret's

of the New Castle Division, on Friday evening February 3, in the "Gardens" on Neshannock Avenue. Promptly at 8.30 the guests formed in a grand march around the beautifully decorated hall. From that hour until 1 a. m. the dancers were filled with the spirit of the occasion, stopping only long enough to enjoy the delicious refreshments provided for them by that past-master in the art of service, "Joe" Williams. Miss Pheobe Johnson, little daughter of Captain of Police T. H. Johnson, added to the pleasure of those present by an interesting program of serpentine and toe dancing. The center of attraction was graced with the presence of Mr. and Mrs. W. D. Reed, DeForest Junction, Ohio, who were the honor guests of the evening, and who celebrated their golden wedding anniversary in October. Guests were in attendance from almost every hamlet and city on the Division. All were loud in their praise of the annual parties which are being looked upon as permanent institutions of the Baltimore and Ohio Family. Master Mechanic J. A. Tschuor was chairman of the Committee on Arrangements, and by his untiring efforts the second annual ball will be long remembered as one of the most delightful and successful parties ever given on this Division.

Sincere sympathy is extended to General Yardmaster O. L. Murphy in the death of his infant son on February 13.

The accompanying picture is of west-bound trimmer engine and crew, New Castle Junction Yard. Left to right on engine: Brakeman C. E. Fegley, Brakeman C. G. Gorbet, Yardmaster J. J. Kane. On ground left to right, Conductor H. H. McCombs, Brakeman G. C. Weber, Engineer W. J. Osborn.

Extra Passenger Brakeman E. M. Pine, whose picture is shown, is known to his fellow employes as "Lonesome Pine." We have good authority that this is a misnomer, as the girls from miles around flock to the station at Painsville when No. 49 pulls in. "Lonesome's" classic features and appolo-like form easily class him as the "Beau Brummell" of the New Castle Division.

Cleveland Division

Correspondent, A. F. BECKER,

Supervising Agent

To Chief Clerk McGinley we extend our deepest sympathy in the loss of his mother.

Misses Elgie Cartwright and Myrtle Lowther leave with our sincere good wishes for their new field of endeavor. We trust that their husbands will suffer no ill effects from amateur made "sinks."

Among our frequent visitors is Miss Florence Stahlnecker—but why does she look so lonely? Congratulations do not appear to be in order.

Miss Josephine Maroney was not among the girls that started the new year in suspense—the ring is a beauty.

"Dave" Hicks still calls roll on his "Harem in the Cage."

We knew that Ethel would object to John D's home grown moustache. Why refer to the weaker sex?

Lunch a la Totten is quite an innovation, but who likes to think of petrified food served "Warrensville style?"

On January 19 rumors were about at Cleveland that Senator Willis was to arrive on one of our trains. As No. 59 pulled in the depot at Cleveland, Claim Agent G. J. Maish stepped off and one of the newspaper reporters was on the job calling him Senator and ready to take down some notes. Of course, one can never tell how soon he will advance to such a position.

We are sorry to see Trainmaster H. C. Batchelder leave us, but inasmuch as he has received a promotion by being transferred to trainmaster, Newark, Ohio, we can only wish him success and good luck. He has been an employe on the Cleveland Division for 25 years and his friends will certainly miss him. However, we can safely say that he will capably and successfully fill his new position. We wish you good luck, "Batch."

Raising the Price

Mother: Johnny, will you be quiet for a bit?

Johnny: I'll do it for two bits.

Miss E. Benedict, trainmaster's stenographer, Cleveland, Ohio, is displaying a beautiful diamond ring. Say, "fellers," its on the right finger but on the left hand.

Massillon

Correspondent, W. E. BRUGH

Passenger Conductor B. S. Wilmott, trains 64 and 65, running between Lorain and Warwick, and who also conducts a grocery store in Lorain, recently had to lay off from work for three days on account of a sale on safety pins and clothes pins. It has been reported that a large volume of business was transacted during that period.

Conductor W. T. Ryan played hero at Lorain some time ago, when he caught a runaway horse, and probably averted an accident and personal injury. A brave act, "Tommy."

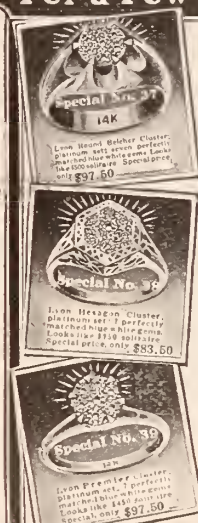

Floyd Weirich, baggagemaster, has returned to duty after a 21 day quarantine of smallpox. He said he felt as good the day he went into quarantine as the day he came out, but he could not convince the doctor.

George H. McCoy, ticket clerk and oper-

Send No Money
We will send you—upon your simple request—your choice of diamond bargains—the greatest in America! Do not send a penny in advance. When the ring comes, examine it. You are the judge. If it is not, without exception, the greatest value you have ever seen, send it back—at our expense! If you decide to keep it, it is yours—for a few cents a day. You may order direct from this advertisement. If you wish, don't send a cent. You do not risk a penny.

Charge-Account Plan
By our new charge-account plan, you may pay for your choice of hundreds of pieces of exquisite jewelry in sums so small that you would never think of saving them. You are also guaranteed 8 percent yearly dividend— and a 5 percent bonus may be earned.

Send for Bargain Book
Send your name and address today for our new 128 page book, showing hundreds of unmatched diamond bargains. Sent absolutely free. It explains the dividend offer and bonus plan. Write today to Dept. 8013

J. M. LYON & CO.

1 Maiden Lane, New York N.Y.

ator, recently had the looks of his home improved with a smallpox sign. Here's hoping for his quick recovery.

Kent Spangler, chief clerk and cashier, Freight House, has recently purchased a fine diamond ring. He said it was two carrots, three tomatoes and a head of cabbage.

On February 2, a staff meeting of section foremen of Sub Divisions Nos. 4 and 5, between Warwick and Holloway, was held at the Hotel Conrad, Massillon. A. R. Carver, division engineer, presided at the meeting. Trainmaster J. Fitzgerald and Supervisors E. Landis and C. C. Bierie gave short talks to the men. Lunch was served at 11.30 a. m.

Section Foreman "Bill" Furlong, while at luncheon at the section foremen's staff meeting, when in the act of taking his second dish of ice cream, made the remark that it was peculiar how so many old men were eating so much ice cream since prohibition. I guess you are right, "Bill."

Along the lines of saving and avoiding waste, Master Carpenter L. H. Douglas takes the prize. At the luncheon referred to, Mr. Douglas avoided the wasting of a dish of ice cream by coming to the assistance of one of his fellowmen, who did not want to make a bad showing by eating so much. Good work, "Doug."

Conductor J. W. Griffin has been off duty, sick for some few weeks, and it is hoped that he will soon return.

In the picture at top of next column we have Mrs. E. Poley and seven year old daughter, Nancy Jane, wife and daughter of RoundHouse Foreman, having a snow fight.

"Think big, talk little, love much, laugh easily, work hard, give freely, pay cash and be kind—it is enough. Do these and you may live without danger to your immortal soul."

"Count Hambrossia" de Reum

Snow pudding for breakfast?
Mrs. E. Polem and little Nancy Jane

Dover, Ohio.

It has been reported that Yard Conductor L. C. Murphy made application for position of policeman. Be careful, Murphy, or we will lose you yet.

Fireman F. T. Hill of Dover, is now \$400.00 farther away from paying any income tax, for in January a son was added to his family. Probably he will not have to be called now, as the youngster will be able to do that.

"Tom" B. Adams, former yard clerk, Dover, has been appointed night yardmaster, vice M. Reidy, assigned to other duties.

M. O. Howell, formerly night yard clerk, Dover, has taken day yard clerk job, made vacant by Mr. Adams. Merle can see almost as well by day as by night. Safety First, Merle!

Jessie B. Bittman, conductor, Chicago Division, and popular citizen of Garrett, Ind., died on January 28, at Sacred Heart Hospital.

He was born on October 17, 1875, and entered the service on August 1, 1901, as brakeman. In 1910 he was made extra freight conductor; in 1918 he took a position as carpenter in the Maintenance of Way Department, but again, in that same year, went back to his work as conductor. In this last named capacity he served until his death.

Mr. Bittman was a member of the O. R. C. at Garrett, Ind. He lived in Garrett for eighteen years. Surviving him is the widow, Edith Bittman.

South Chicago

Correspondent, ESTHER J. SPREENBERG

There are smiles and there are smiles, but our "Boss," Mr. Altherr, wears THE smile

that won't come off. Why? A louncing baby boy was presented by Mr. Stork, in the Altherr home on January 22, so why shouldn't he smile?

William Rosenthal, chief reconsigning clerk, is again entitled to considerable credit. Mr. Rosenthal, by prevailing upon consignees to accept delivery of four cars at another point, saved the Baltimore and Ohio the sum of \$88.24, which would have been lost to the Company had consignees insisted upon original routing. This should encourage others to do likewise. Watch your chance.

There does not seem to be any depression in business at South Chicago, but rather an increase—both in eastbound and westbound. We are surely putting forth our best efforts to protect this increase and keep it on our rails.

The late Conductor Jessie B. Bittman
Chicago Division

Ohio Division

Correspondent, A. E. ERICH,
Secretary to Superintendent, Chillicothe, O.

We are glad to announce that Brakeman E. W. Davis, who has been off duty since September 3, because of chronic indigestion, is getting along very nicely.

Brakeman A. L. Romine, who has been off duty, undergoing special treatment at Johnson City, Tenn., for weak lungs, caused by being gassed while in the army, is much better.

Passenger Brakeman A. J. Garber, in attempting to get off on opposite side of platform in Cincinnati Union Station in order to change markers, was struck by another incoming train, which knocked him down and injured his hip. We hope for his speedy recovery.

A son was recently born to the wife of Clarence Hagler, night oil room attendant. Mr. Hagler was so happy that it was necessary for him to lay off "sick" on the day of this important event.

Boiler Inspector Charles Michaels died at his home at Chillicothe on January 25, after a 12 days' illness. Death was due to encephalitis or sleeping sickness. "Charlie" was well known and liked by the employees on the Ohio Division, who extend their heartfelt sympathy to his family.

A surprise came to all of us when the news leaked out that Thomas K. Wilson, clerk in Car Distributor's office, was married to Miss Charlotte Rice, daughter of Engineer J. V. Rice, on August 31, 1921. The marriage was solemnized at Newport, Ky. From all reports this event was expected to take place during September, but as nothing was heard about it, his friends thought it was all a "mistake." He admits that the promised "calf wagon ride" is still somewhat of a worry to him, but owing to the long interval having elapsed, he thinks this part should be overlooked. His friends are of a different opinion. We extend our congratulations and best wishes.

A recent arrival on the brakeman's extra board is a young man who was left at the home of Brakeman and Mrs. Walter Schaffer. "Schaff" says he is a "chip off the old block." We wonder if he will also acquire a taste for limburger like his "dad." Eh, "Schaff?"

In Memoriam

The uncertainty of life was never more vividly portrayed than in the sudden death of Signal Supervisor Edwin J. Allee, who recently passed away at the Good Samaritan Hospital, Cincinnati. Mr. Allee had been ill for only a short time from intestinal trouble and died following an operation which he underwent at the hospital at Cincinnati.

He was born in Oakland, Md., May 21, 1856, entering the service of the Baltimore and Ohio as water boy at Marietta, May 1, 1872, later working as carpenter, then signal repairman. He was appointed signal supervisor on the Ohio Division on May 1, 1902, serving in this capacity until his death. He was a well known member of the Veterans' Association, of the B. P. O. E., and of the Walnut Street M. E. Church; he was also a member of the Division Safety Committee. In his passing the Company loses a good employee, who will be greatly mourned by a host of friends, who extend their heartfelt sympathy to his wife. Interment was made in Spring Grove Cemetery.

The following resolutions on the death of Mr. E. J. Allee were adopted by the Veterans' Association, of the Ohio Division:

WHEREAS, God, in His infinite wisdom and mercy has seen fit to take from our midst Brother Edwin J. Allee, who was a kindly and lovable man, good to his family and a true friend to all who had the pleasure of his acquaintance,

THEREFORE, BE IT RESOLVED, that the Baltimore and Ohio Veterans' Association of the Baltimore and Ohio Railroad, of

The late Edwin J. Allee, Signal Supervisor, Ohio Division

which Mr. Allee was an honored member, extends to Mrs. Allee and relatives deepest sympathy in their hour of grief, and asks that the good Lord sustain and comfort them.

BE IT FURTHER RESOLVED, that these resolutions be placed on the minutes, published in the daily papers and BALTIMORE AND OHIO MAGAZINE, and a copy sent to Mrs. Allee.

(Signed):

W. W. WOODWARD,
ABE BAKER,
HERMAN FIGELSTAHLER,
Committee.

In the future, we would suggest that the Storekeeper's force at Chillicothe see that a competent guide accompanies Storekeeper Reynolds, when he makes a trip to Baltimore, as seemingly when outside of the "sticks" he is easily bewildered and lost. Recently while in Baltimore, in endeavoring to make a trip to Mt. Clare Shops, he was picked up as lost by a patrolman at Patterson Park. It was necessary to 'phone the storekeeper at Mt. Clare for directions. Of course this may not occur again, but the above is simply a suggestion.

Pearl Speakman, aged 49 years, fell dead near his home at Chillicothe while returning from his duties as blacksmith-hammersmith. His death was due to heart disease. Mr. Speakman had been in the service of the Company for 21 years. The stricken wife and family have the sympathy of his fellow workmen.

Dame Rumor has it that our popular third trick operator, D. D. Weinrich, at Midland City, took a leave of absence and enjoyed a honeymoon. Congratulations, "Weinie."

Our sympathies are extended to J. S. Randall, assistant engineer, in the loss of his mother, who died on January 23.

We are sorry to know that Everett Ray, second trick operator, Midland City, is on the sick list, quarantined for diphtheria. We hope for his speedy convalescence and for that of his family. Operator Minch is holding down second trick, while Mr. Ray is off duty.

"Eddie" Lyons, second trick operator, Blanchester, enjoyed (?) the holidays at his home nursing a severe case of tonsilitis. We are glad to announce that he is now back on the job, feeling fine.

Conductor "Joe" Phillips has taken the Hillsboro local job, and each day finds him either at Blanchester, Hillsboro or Midland City. "Joe" says they are all good towns.

Conductor "Tom" Hickey is on his new run, recently bid in by him—Nos. 3 and 2. "Tom" likes it better than on the Loveland Accommodation, as he says he doesn't have to stop at every corner. Conductor Frank Donnell is assigned to "the run that does stop at every corner," and says it is all right.

H. E. Coffey, former agent, Wilmington, Ohio, is now holding down the position of traveling freight agent, Louisville, Ky. We wish him success.

Operator W. H. Littlejohn participated in the big fox drive on January 28, that centered near the village of Guinea, Ohio. He reports over 2,000 "Guineas" in the drive and a round-up of three big foxes. Ten foxes broke through the lines and escaped before they centered; three of these escaped through Littlejohn's section of the line. This he is trying to explain—but cannot. However, the foxes caught were auctioned off, netting a nice sum of money, which together with the proceeds of the dinner, was turned over to the church at Guinea.

Another addition to the yard office. Born to Yard Clerk and Mrs. George G. Wilson, Jr., a son. George, of course, as well as engineer "Grandpa" George, Sr., is all smiles. Mrs. Wilson was formerly Miss Bertha Hawkins, an employee of the yard office. The young man has been given the name of George G. "the fourth." Congratulations!

Don't be blindfolded by inattention. Make use of all of your senses all of the time. Learn the A. B. Cs of Safety. Always Be Careful!

Miss Bertha Graves, clerk, freight office, seems to have considerable "business" with the Frad Candy Company, or with one of the employees. Of course that is all right. Having friends in another business, especially when that company does considerable shipping, helps boost the business of the Baltimore and Ohio.

SAFETY AGENT SEZ—

Safety should be the first consideration of every employee.

To be careless, thoughtless or reckless means injury sooner or later to yourself or to others.

Just recently a trackman on one of the Western Line divisions, stopp'd work to clear a passing freight train. He attempted to "hop" the freight to take a short ride and fell underneath the wheels, receiving injuries from which he died later. Incidentally he broke a 45-month no fatal accident to employee record on that division. Let this be a lesson to YOU.

WESTINGHOUSE AIR-BRAKE HANDBOOK

214
illustrations
414
pages

Only
\$1

HERE'S the most remarkable, valuable, and helpful little book on the Westinghouse Air-Brake ever published. Within its attractive cloth covers are thousands of facts (and many pictures) about the principles, design, operation, care and maintenance of Westinghouse Air-Brakes. Just a few of the subjects treated are:

Locomotive, Freight-Train and Passenger-Train Brake Equipments, including reference numbers and descriptions of parts. Air Compressors. Operating in Series and in Series-Compound. Air Reservoirs. How to Calculate Reservoir Capacity. Brake Valves of all Types: History, Operation and Care. Brake Piping; Brake Tes; Brake Cylinders. Safety Valves. Dirt Collars and Air Strainers. Hose Couplings and Standard Fittings. Air Gauges and Cocks. Train Air-Signal System. Water Distributing System, etc.

This Handbook is compiled from the famous Instruction Papers of the International Correspondence Schools, written by expert and practical men. The same texts are successfully used in training employees on 250 railroads with which the I. C. S. have contracts for teaching Air-Brake Operation, Locomotive Running and Firing, etc., and on which you see I. C. S. Railroad Instruction Cars.

Just mark the coupon printed below and mail it with a dollar bill and this 414-page Westinghouse Air-Brake Handbook will come speeding to you by return mail.

You run no risk! Money back if wanted!

TEAR OUT HERE
INTERNATIONAL CORRESPONDENCE SCHOOLS
Box 8507-B, Scranton, Penna.

I enclose \$1 for which send me, postpaid, the Handbook marked X, at one dollar each. I may, if I wish, return any or all within ten days from receipt and get my money back.

Address _____

We are sorry to learn that it has been necessary for Robert Ogden, clerk, freight office, Chillicothe, to take leave of absence and go to Albuquerque, N. M., account of lung trouble, resulting from his being gassed while in the army. We hope for his speedy recovery and to see him back on the job again soon.

The accompanying photograph is of Rita Isabelle, age four, and Robert Daniel, age three, Cadden. These bright youngsters' parents are both strictly Baltimore and Ohio folks. Mrs. Cadden was formerly a clerk in the freight office, and "Dan, Sr." is a fireman. Also they are niece and nephew of Miss Bertha Streitenberger, stenographer to chief clerk, Superintendent's office.

Toledo Division

Correspondent, EDWARD M. MANNIX
East Dayton, Ohio

Be an Optimist. Good times are just around the corner and coming fast.

A pleasing personality is that of Miss Gertrude McBride, our fair correspondent at the Division Accountant's Office. She is chuck full of business at all times, and always willing to find time to keep the office well represented in the MAGAZINE. Thanks, Gertrude, your work is appreciated.

I cannot say too much for our correspondent at Lima, Ohio, Ray Garrigus. His interest is never on the wane, he is always a good booster in the interest of the Company and our MAGAZINE. Keep it up, Ray!

Owing to a change in conditions the writer is now thrown in contact with the road men, and I take this opportunity of expressing to them my most sincere thanks for the many courtesies shown me and the spirit of loyalty displayed by them on all occasions.

The continuous campaign for the prevention of accidents at railroad crossings on the Toledo Division is now on full blast. The recent editorials in our daily papers bring home to us the awful consequences of carelessness. The Division Safety Committee is acting directly under the personal supervision of our superintendent, R. B. Mann, and will continue vigorously in their effort to educate, eliminate or legislate. We extend our thanks to the editors of our daily papers for their helpful publicity in this worthy cause.

Remember, vacation time is soon coming. Your friends are going away. Don't forget to tell them the Baltimore and Ohio will take them most any place they want to go.

Dayton again heads the list in the Honor Roll of "No Accident." This speaks well for Master Mechanic McMillan and General Foreman Gilmore, and the ever watchful eyes of roundhouse foremen.

Heard and Seen around East Dayton

"Bill" Phares singing—"Let the rest of the world go dry."

Walter Jackson singing—"And the farmer haul'd another load away."

Herman Kuhnappel—"Dot's it, don't it was," and just think, he is working with "Bill" Flanagan.

E. D. Phillians—Taking lessons in elocution and trying to tell Yardmaster Lett he knows his stuff.

W. A. Schnee—Trying to figure out whether he is going or coming.

Eugene Lowry and Walter C. Stine—Investing in Matrimonial Bonds.

Frank Proctor asked "Bill" Todd, why it was that people always cried at weddings? "Bill" replied, "Because they didn't have nerve enough to laugh."

Our latest vaudeville stunt; George Bergman and Nicholas Wittmer twisting the English language out of shape.

I am not going to say anything about the girls in the Master Mechanic's Office as I understand they are going to give considerable attention to the "Women's Department."

"When ere you think you're slipping,
And you're looking for a hand,
Reach up and grab the throttle,
And apply a little sand."

On January 14 we learned of the sudden death of Mrs. Mary Ortel, mother of Engineer Charles Ortel, Dayton, Ohio, and wife of John Ortel, who for many years was bridge foreman, Wellston Division.

This was certainly a shock to her many friends at Dayton, and especially to those of her own home town of Wellston, where she was known as "Mother" Ortel to all in the village. She possessed all of the qualities of true womanhood; sweet and charitable was her disposition, and many indeed were the tear-stained eyes that gazed upon her for the last time.

She was buried from Sts. Peter and Paul Church with requiem high mass, and laid to rest in the family lot at Wellston.

The accompanying picture is that of Mrs. H. J. Ruddick, wife of Machinist H. J. Ruddick of East Dayton, Ohio, and their children. All are Baltimore and Ohio boosters.

"Owed to the BEANO"

'Tis strange how fancy wonders, when you've nothing else to do, to the things you really dream about—Why don't those dreams come true?

President Willard—just for instance—I'll bet he'd never tell of the things he's always dreamed about, 'till he feels like he could yell—The chances for the BEANO—how he'd plant in every heart, a love and inspiration that each might do his part.

There's Hill, another sample of the interest we should feel—how in his perseverance, true to duty—works so well. With his grip all packed and ready, a trip he'd make so he could rectify imagined wrongs and set vain fancies free.

Then too, there's Mr. Spencer, who with winning smile so bright, makes duty seem a pleasure and makes our burdens light. For he's working for the BEANO and he holds his workers, too—of course we cannot fail him—we couldn't now, could you?

For if we fell to wondering, "Joe" Fortman, tried and true, would saunter slowly down the aisle and place his hand on you. He'd tell you of your merits and of the place you'd fill, if you would only settle down to working with a will. And if he should neglect a thing, Inspector Mr. Maus would step right in—inspect the place—and put the thing across.

And Mr. White, a model man, he's right there when there's work, from morn 'til night he labors—and duty never shirks.

And Ronk, another pattern of rigid rules, you know—if you are not quite up with work, you then to him must show—the reason for such negligence, of how it's coming long—'till it almost makes it seem to you, an everlasting song.

Oh yes, there's Keinat, Bowman, Beck and right good men are they—no matter what is handed them, no temper they display. For they're working for the BEANO—'tis the height of their ambitions—and they're hoping always for results and not for vain omissions.

There's Mygatt, too, who has a brain—it's always sharp and witty; the reason is, he has a file, for filing up some ditty.

Another type of loyalty we find within this office—the girls—they say in haughty way "We don't need none to boss us." But Francis broke the precedent—she married at her leisure—and now with good true loyalty, she's wooing Clyde's own pleasure.

There's Shanty John—who ought to weight a hundred pounds or more—but keeps within the fly weight class by learning things galore. He's always asking questions—a dozen, seems to me, and chief among these questions you can hear is "Who is she?"

Of bands, hear Theis and Hartman (ye gods, how they will slam me) you can hear it most a mile away when Eddy's singing "Mammy." And then that Jazz that Theis puts on, it's really partly shocking when Eddy sings it sounds like—it is coming from his stocking. But Oh! when Harker starts to sing—I know you'll not believe it—that tune is gone just like the dawn and Harker can't retrieve it.

With poet lore you sure can soar with Vermillion at the fiddle—he can quote poet, first and last, from both ends to the middle.

While strolling slowly down the street—another pal we always meet, Boorum is hanging on his arm, a man possessed of wondrous charm.

And happy, smiling, genial Nann—in spite of fun he's a competent man. He's railroaded practically all his life; knows all the pathways, the toil and the strife of many a railroad but chief of all these it's the BEANO now that he's trying to please.

(To be continued next month)

Lima

Correspondent, RAY GARRIGUS

The New Word

Allan Upward once wrote a remarkable book entitled "The New Word." The word, as the reader learned somewhere near the back cover of the book was "idealism." Materialism as a living faith was doomed. Nobel had struck boldly for idealism in offering his prizes for conspicuous achievement, and the whole process of civilization was swinging toward the ideal.

A GROUP FROM LIMA

Upper picture: "Jack" and Junior Nock, and Mrs. J. O'Toole. Lower: Miss Esther Roberts

Then came another word, "efficiency," which seemed to hold the field for a time.

Now there is still another "new word" It is heard on every side. It is on almost every tongue. It might be called the motto of the present day, at least the destined motto of tomorrow. People are just beginning to realize it consciously.

It is "co-operation."

Only a few weeks past a terrible accident happened near Lima. A large motor truck carrying children to school was struck by a freight train and six children were killed and twenty-four injured. With the idea of preventing accidents of this nature on the Baltimore and Ohio Railroad, a safety campaign has been launched on the Toledo Division. It is aimed especially at grade crossing accidents.

Unlike previous safety campaigns, this one is chiefly of interest to the public. And the public is co-operating.

During the week of February 4, Lima newspapers carried several columns of safety matter contributed by the railroad. In this way 75,000 people in Lima and vicinity were acquainted with the purpose of the campaign. How is that for co-operation?

Our city's slogan is "Lima Leads" and again it is demonstrated that it is an appropriate one. The city commission at the last regular meeting took action to eliminate grade crossing accidents in Lima through passage of an amendment to the city's traffic ordinance. It is understood

that the action is a direct result of the safety drive inaugurated by the Baltimore and Ohio railroad. The ordinance, as revised, prohibits crossing or attempting to cross any steam railroad line at any street crossing where a watchman is stationed until given a signal to proceed by the watchman. Failure to comply with this regulation in the future will be a violation of the ordinance and the crossing watchmen are empowered to arrest all offenders. Here is co-operation in the broadest sense. And again we repeat our slogan, "Lima Leads."

The accompanying photograph is of Miss Ester Roberts, chief clerk to Trainmaster C. W. Havens. Miss Roberts has a record for efficiency, especially where the caboose report is concerned.

We often wonder why Foster Sanders carries those waybills around in his pockets. Wilbur Smith is almost persuaded that Foster is growing absent-minded. Don't take 'em home again, "Fos."

The picture herewith is of Jack and Junior, sons of Pipe Fitter Carl Koch, with their aunt, Mrs. J. J. O'Toole, formerly employed as stenographer, local Storekeeper's Office.

George Pond and Jack Welch, switchmen, have qualified to become conductors. Good luck, fellows.

Forty years switching in one yard! This is the record of Jack Harboldt, conductor

of the shop engine, who completed his fortieth year in the Lima yards on February 14. Jack says that the only difference after forty years of throwing switches is that he isn't quite as handy with his fists as he was. Still the tongue is mightier than the fist, and Jack is a living example of this old truth.

Earl Moreo, car repair apprentice, was married on January 16 to Miss Clara White of this city. The best of wishes kind and true from all of us to each of you!

John Suydan and his section gang are certainly making things shine along the railroad. Good work John! We understand that you are in the habit of meeting section foremen from other roads at the Locomotive Club on Saturday nights and teaching them the rudiments of section keeping. You tell 'em, John. You should know.

Transportation is one of the serious problems with which the Deisel-Wemmer Company, cigar manufacturers of Lima, has to cope. Mr. Glover, sales manager, cited instances to the correspondent where cars had been delayed for weeks on prominent lines competing with the Baltimore and Ohio. The Baltimore and Ohio is given preference in all cases where shipments can possibly be routed over its lines. The Deisel-Wemmer Company manufactures the San Felice and El Verso cigars, which can be bought on all Baltimore and Ohio dining cars.

The Female of the Species

A stranger to that part of the country was walking along a lonely stretch of road in the hilly part of Arkansas, when he saw a girl running toward him. She was barefooted, her hair was flying loose and there were two blood hounds rapidly overhauling her.

He didn't want to see the girl hurt, so he shot the hounds. The girl disappeared down the road.

A little later he met three mountaineers on horseback.

Said one, "Stranger, did yu see a gal, down that-a-way with two dawgs after her?"

"I did."

"Which way did she go?"

"She went on down the road. I didn't want to see her hurt, so I shot the dogs. What had she done?"

"Shot them dawgs? Done? She hadn't done nothing! And them dawgs wouldn't have hurt her! They're trained. That gal was goin' to be married to-morrow, and we was just goin' to catch her and put shoes on her!"—Everybody's

Where Did He Expect to Wake Up?

A surgeon was performing an operation on a patient when a fire started in a warehouse across the street, illuminating the whole operating room. Having finished, the doctor said to the nurse: "I think the patient is coming to; you had better pull down the shade. I don't want him to think that the operation hasn't been a success!"—Anon.

"We wish somethin' would be done about freight rates so we wouldn' hear so much about 'em ever' time we pay 50 cents fer a quarter's worth o' somethin'."

Would you recognize this as H. E. Cyphers, 3rd trick, AK Tower, Wapokoneta, Ohio—by himself?

Good Housekeepers at Philadelphia Passenger Station

IT was a gloomy morning in February. The gates at Philadelphia Passenger Station, 24th and Chestnut Streets, had opened and the passengers were hurrying out to take train No. 21.

Elbowing his way through the crowd to the gate in his haste to get to the train before anybody else was a heavily burdened son of Italy. In his arms was a cardboard box about eighteen inches square. Breathing heavily, the young man managed to reach the gate, then, puffing excitedly, and transferring his baggage so that it leaned against one side of the gate, he fished in his pockets for his ticket. At last he brought it out, had it properly examined by the gate-keeper, and was in the act of transferring it to his pocket again when someone behind him called out, "Hey, there! Get a move on you!" But it was not until he had his ticket safely stowed away in an inner pocket that our dark haired friend condescended to move—and this time it was not wholly of his own accord, for the crowd had begun to push.

Suddenly and with a mighty "Plump!" down went the Italian and with him his precious package. Then, with a grace that might have put Charlie Chaplin's custard

pies to shame, out rolled dozens and dozens of crispy doughnuts. Like little cart wheels they shot one after another from the box and went sailing 'round and 'round over the station platform. The spectators both laughed at and pitied Signor Doughnut Vendor, and several merry giggles burst forth from the lips of light-hearted school-girls.

A college boy began to whistle "Down Went McGinty to the Bottom of the Sea," while a "redcap" paused under his burden of suitcases to gaze at the Italian who by this time was busy picking up his little runaways.

"Say dere," called the porter, his countenance plainly registering an expression of disgust, "you-all aint goin to eat dem dirty doughnuts, is you?"

The man with the red bandanna about his neck looked up in evident surprise.

"Eat heem!" he cried, "Sure I eat heem! These floor ees so clean, lika da candy keechen. See!" And picking up the last runaway doughnut, he thrust his little finger through the hole, held it up for a second before the astonished audience, crammed it into his mouth, and ran for the train.

One on the Engineer

By Harry Franks

Locomotive Engineer, Dayton, Ohio

THERE is a story going the rounds in Dayton yards which is enjoyed now by only a few who are on the inside.

It is of a conversation on a North Main street car. The principals were two city police officers and a prominent yard engineer who sat in the seat just behind them.

"Say, don't you know I've been craving another mess of that wonderful Jerusalem cabbage—have you any left over?" said one officer to the other.

"Yes, I have one head left and will cut it in the morning. Send your boy over with his express wagon for the half."

The engineer was by this time quite interested and he broke in with, "Pardon me, but what kind of cabbage were you speaking of?"

The officer explained Jerusalem cabbage by saying he raised a number of heads last summer, and could hardly find storage space in the cellar for the crop. "You can imagine how large a head is when it will hardly fit in a wash tub and weighs 84 pounds" he added.

"Gee Whiz!" exclaimed the engineer. "How do they grow?"

The answer that they grew head down in the soil caused his eyes to bulge. "Have you any see I left I could have?" he said.

The officer bit his lip to keep his face straight and replied, "I have a few, but I don't fancy carrying more than one at a time for you know each seed weighs around 14 pounds."

This was about the last straw, but the engineer was game, and he came back with the remark he would like to try raising them.

The officers then left the car, wishing him a good night and assuring him that he would get the seed for they would see him again soon.

We can picture him in the "Jerusalem Cabbage Patch," and hidden in the lines of this story we can also find a moral, which is old, but new to some:

"Believe only half of what you see, and nothing that you hear."

100 Per Cent

Jimmy: "Father, yesterday at school I made 100 on my studies."

Father: "That was fine; what study did you make it in?"

Jimmy: "Fifty on spelling and fifty on arithmetic."

—Southwestern Telephone News.

"When a bit of sunshine hits ye

After passing of a cloud

When a fit of laughter gits ye,

And yer spine is feelin' proud—

Don't fergit to up and fling it

At the soul that's feelin' blue

Fer the minit that you sling it

It's a boomerang to you."

—Selected.

A New Way To End Your Roof Troubles

To every man who has a roof over his head and over his property this advertisement is of vital importance. It presents to him in Country Gentleman Asbestos Roof Cement the opportunity to transform his old, leaky, down-and-out roof into a new roof, a handsome roof—an almost eternal roof—at a very low cost. It shows him how to keep in his own pocket the big money he would ordinarily spend for costly roofing materials and high-priced skilled labor.

For many years Country Gentleman Asbestos Roof Cement has been a local proposition. On the homes, farms and estates in and around Albany it has been severely and thoroughly tried by fire, sun, storm and time. It has never been found wanting. We are now ready to nationalize our product; to give to the whole country the benefit of its superior service and its remarkably low cost.

Country Gentleman Asbestos Roof Cement

Reg. U. S. Pat. Off.

10 Year Money-Back Bond

Made entirely of ingredients created by Nature. Has an affinity for iron, steel, tin, wood, cement, gravel and all other roofing and building materials. Preserves indefinitely the life and wear of nearly everything it touches. It is Fire-Resistant, Water-Proof, Acid-Proof, Sun-Proof, Storm-Proof, Wear-Proof, Rot-Proof, Rust-Proof, Rodent-Proof, Elastic and Everlasting. "A Dab Saves a Dollar."

It comes in both Liquid and Plastic forms. The Liquid Form is a combination roof-paint

and roofing-material that penetrates into, and seals forever all holes, cracks, breaks and leaks. It is applied with a brush. "A Dab Saves a Dollar." The Plastic Form is used to seal big holes and breaks. "A Dab Saves a Dollar."

When used together the two forms make a combination that will end all your roof troubles. The cost is so low that it is out of all proportion to the perfect and permanent results it gives. "A Dab Saves a Dollar."

A Thousand Money-Saving Uses

Country Gentleman Asbestos Roof Cement preserves the life of boilers, bridges, pipes, tanks, poles, gutters, fire-escapes, ventilators, gratings, railings and fence-posts. Is a strong binder on all kinds of cement and concrete

work. Instantly seals holes in mesh wire, metals, etc. Has a thousand money-saving, time-saving, labor-saving uses on farm and estate. Used by roofers as a tough and elastic preparation for flashings.

Save Money-Make Money

FREE

We want to secure instantly a nation-wide interest in Country Gentleman Asbestos Roof Cement. We know that every trial order will make a permanent customer for our product. We know that every customer will just have to tell his satisfaction to his friends, and so make other customers for us. To secure quick action, we are making it profitable for you to be prompt. We are giving Free to those who order early from 19 to 25 pounds, Plastic Form, Country Gentleman Asbestos Roof Cement and also a Country Gentleman Special Roof-Paint Brush. Our circular gives full particulars of the gift offer.

Order by Mail Write Today for Particulars

Don't spend any money for new roofs or for repairs until you give us the chance to prove the merits of Country Gentleman Asbestos Roof Cement. Learn how it makes the ideal roof for residence, factory, church, barn, poultry-house, silo, etc. Learn how by simply spreading it over an old, badly-worn roof you can get a new and handsome roof at

a saving of hundreds of dollars. Learn how easily, cheaply and thoroughly you can repair the leakiest roof, even during a storm.

Read our Money-Back Bond. Learn how you are protected to the utmost; how you get your money back without quibble, question or formality if Country Gentleman Asbestos Roof Cement fails you in any way within 10 years.

For your protection—to assure you, and us, that you get the genuine product and that it reaches you pure and unadulterated—and also to save you the middleman's profit—Country Gentleman Asbestos Roof Cement can be obtained only through us, by mail. It is not sold in stores.

Write today for full particulars, prices and details of our "Free" offer. Use the Coupon.

Ambitions

Grandmother wanted to have the biggest and whitest washing on the line before the neighbors had theirs out; to make the best soap, jellies, bread and pies; to have the reputation of keeping the cleanest house in town; to be well married early in life; to have a large family of well behaved children, and to have her friends think a recipe must be good if she used it.

Mother wanted to be cultured and refined and to do the proper thing at all times; to be well married rather late in life; to have two or three well-dressed children; to be able to hire and keep a good maid; to be dressed in good taste, and to have her friends think a word was spelled or pronounced correctly in her way.

Daughter of to-day wants to live in the most exclusive apartment house in the city; to be able to drive her own car; to have a chow, a Pekinese or a Persian cat; to be married and divorced a time or two; to have her friends think her gown the latest fashion or she would not be wearing it; to have girls ask her what kind of powder and rouge she uses, and to make men turn around.

—Katherine Negley in *Judge*.

Canadian Justice

An Ontario farmer caught a young woman doing a "September Morn" on his property and had her hauled before the County Magistrate.

"What's the charge?" asked His Honor. "Takin' a bath in the spring, Your Worship," said the constable.

The aged dispenser of justice consulted a dog-eared copy of the statutes and buried himself in its pages for several minutes; then closing the legal tome and stroking his beard he said very solemnly: "The charge is dismissed and the miss is discharged. I find that she had just as much right to a bath in the spring as in the fall."

—*Boston Transcript*.

A Time for All Things

Pears like Polk Sawney, that runs the store at the crossroads, hain't overrid with enterprise," commented a citizen of Fiddle Creek, Ark. "Tuther day, frinstance, I went there in the middle of the afternoon to buy a little something, talk a few politics, and so forth. When I sa'ntered in nobody was in sight on the place. But after I tramped around for a spell a sleepy voice from under the counter sorter snarled:

"If you're a drummer that aims to sell me something, I don't want it; and if you're a customer that is figuring on buying something, why in fury can't you just as well come around sometime when I haint plumb—yaw-w-wn!—wore out?"

—*Kansas City Star*.

In the Chair

I felt his soft breath on my cheek
And the gentle touch of his hand
His very presence near me
Seemed a breeze on the desert sand.

He deftly sought my lips
My head he did unfold,
Then he broke the silence with,
"Shall the filling be silver or gold?"
—*Iowa Frivol*.

Modest Desires

Fond Mother: "Dorothy, if you are bad you won't go to heaven. Don't you know that?"

Little Dorothy: "Well, I've been to the circus and the Chautauqua already. I can't expect to go everywhere."

—*Orange Peel*.

His Right Idea

"What would you do if I turned you down?" she asked shyly, as they sat on the parlor sofa.

"The young man looked straight ahead, but said nothing. After a few moments of silence she nudged him with her elbow and said, "Didn't you hear my question?"

He looked around, apprehensively.
"I beg your pardon," he replied. "I thought you were addressing the gas."
—*St. Louis Republic*.

Bonehead

"G'wan, nigger, you-all ain't got no sense nohow."

"Ain't got no sense? Whut's dis yerc haid for?"

"Dat thing? Dat ain't no haid nigger; dat's jes er button on top yo body ter keep yer backbone from unravelin'."

—*The Lamb*.

A stout, baggage-laden, old English gentleman was trying to make a hurried exit from a railway carriage. At the door he stumbled on the foot of a brawny Scot. "Hoots, toots, mon!" growled the Highlander. "Canna ye look whaur y're going? Hoot, mon, hoot!"

The burdened traveler slammed the door behind him and shouted through the window:

"Hoot yourself! I am a traveler, not an automobile."—*Argonaut*.

40,000
Opportunities
in Hotels

YOU can have one of these well-paid, pleasant executive positions—40,000 of them in the big hotels of the United States—now America's Fourth Largest Industry. Statistics show that ONE IN EVERY TEN HOTELS WILL HAVE AN OPENING FOR A MANAGER THIS YEAR. Thousands of other positions are also open to those who qualify through training.

The Lewis School guarantees to give you the valuable knowledge that it has taken some of the most successful hotel men years to obtain—men who are now making \$5,000 to \$50,000 a year. All of your training will be under the personal direction of Clifford Lewis—a hotel expert of national reputation. A few spare-time hours a week given to the simple, clear lessons of the course will give you the opportunity of a good position, a fine living, and a handsome salary. The training will in no way interfere with your present work or recreation.

Send today for Free Book, "YOUR BIG OPPORTUNITY." Don't wait a minute—you may lose the opportunity of a life-time. Mail the coupon NOW. Your whole future may depend on it.

Mammy

(In Memory of Mother's Day, May 14)

By James Edward Hungerford

Illustrated by Herbert D. Stitt

There's a little ol' house at the end of a lane,
That has always seemed Heaven t' me;
Fer an' ol' lady lives there, jest simple an'
plain,
That's an angel, if ever there be;
Her eyes are jest well-springs o' sweetness
an' love,
An' the sun it jest shines in her smile,
An' I know the Lord sent her, from up there
above,
Jest t' brighten this world fer a while.

Her sweet face is crowned with a halo o' white,
An' her robe is a calico dress,
An' she goes about singin' from mornin'
'til night,
In a voice that is like a caress;
An' there ain't any queen in this world any-
where,
That can look any finer than she;
When Ma sits on her throne—jest an' ol'
rockin'-chair,
An' smiles down at her worshipper—me.

She has got an' ol' Bihie that's dog-eared
an' wore,
An' th' printin' is faded an' dim,
An' she reads it an' smiles, an' she sets a
heap store
On th' things that it says about Him;
There is folks that tink Heaven is some
far-off place,
An' they're hopin' they'll find it somewhere,
But I'm right here t' say, if they'd glimpse
Mammy's face—
They would 'low she was already there.

BALTIMORE AND OHIO MAGAZINE

VOLUME 9

BALTIMORE, APRIL, 1922

NUMBER 12

Carrying on the Business Getting Campaign

Business Secured by Operating Department Employees Nine Years Ago Still Coming to the Baltimore and Ohio and in Increasing Volume—
Get Your Customer Now and Help Build Good Will
and Business for the Future

IN the January, 1913 number of the Baltimore and Ohio MAGAZINE, the fourth number in its history, Alvah E. Day, now supervisor of Weighing, wrote an article on Retail Transportation. It is not alone because of the thoughtful observations that he made in it on "employee solicitation" but also because of the present day status of the business he got these nine years ago and over, that we reprint a bit of his article, viz:

The observations on which this article is based were made in connection with the work of arranging a schedule for the movement of cars containing package freight. The retail business does not fluctuate to as great a degree as the carload freight, even in periods of depression; frequently when there is a falling off in the volume of carload traffic, the package business will show an increase, largely from patrons who in better times would ship in carload lots. The present heavy movement of traffic will hardly continue, and the time is approaching when both traffic and transportation officials will look with increased favor upon the retail or package business. It is in this branch of the solicitation work that every employee can help.

Now if something can be done toward securing a material increase in the retail business of the Company, when traffic officials make a request for additional cars the transportation officials will not be able to reply that there is not enough tonnage to warrant giving the service. Here is an illustration of the possibili-

ties. An employee who was to have a new roof put on his house asked the tinner by what line he received his freight.

"I leave that to the shipper," was the answer.

"If it doesn't make any difference to you," the employee persisted, "I'd rather like to have it routed over the Baltimore and Ohio. That's my road, you know. And you can't get better service from anybody." It didn't make any difference to that tinner; nor to the paper-hanger, when the matter was put to him; nor to the tailor, nor to the hatter. But when they all sent those orders and many other orders over the same route, which they found a convenient one, it *did* make a difference to the road. Freight formerly routed via competitive lines, one a water line, is now moving via the Baltimore and Ohio. Indeed the thing seemed so easy and the result so sure that others from whom supplies were purchased were approached, with the result that numerous shipping orders were obtained.

If the army of Baltimore and Ohio employees will each do a little soliciting, the result will be a more satisfactory service to the patrons of the Company, made possible by an increased schedule of through cars without transfer of the freight enroute; by the employment of a greater number of men to handle the freight and the additional trains; by increased revenue to the Company from the increase in the volume of package freight business; and by a decrease in claims for loss and damage.

Now as to the present status of the

business that Mr. Day secured: The tailor and the hatter (both well known as leaders in their respective lines in Baltimore) are still giving their business to the Baltimore and Ohio. It is certainly fair to assume then that a large number of the thousands of the concerns that gave our "ex-officio" solicitors of 1921 their business, will be with us well after the time that the Baltimore and Ohio has celebrated its centennial year in 1928.

Little has been said in recent issues about the business getting campaign started by President Willard last year and carried on so successfully. But this is not because the campaign has died out, by any means. Constantly the writer has employees tell him of the business they have secured, to such an extent in fact, that with many of our people outside the Traffic Department, business soliciting for the Baltimore and Ohio has become second nature. A recent case is this:

A woman employee heard of a friend of hers who was moving from Baltimore to Cleveland. The father was going first and was solicited to use our line. He refused point blank, saying that he preferred another, if only because of his habit of using it. The mother and daughter followed, both on our line, and following them the next day went a carload of household goods, a revenue producer for us because our young woman employee wanted to do a good turn, and did, for her employer.

President Willard told the representatives of the chapters of our Veterans who were in Baltimore for their annual convention in January, how earnestly he appreciated the splendid work that they had done. Others of our officers have expressed themselves similarly, and the MAGAZINE has given credit to every single

employe whose name has been sent it by the Commercial Development Department as having reported on the post cards the business they secured, when such report has been confirmed. Now, and since March 20, H. O. Hartzell, manager Commercial Development Department, has been visiting the various Veterans' chapters, with Grand President of the Veterans George W. Sturmer, expressing to each chapter the gratitude of the Management for the interest they have taken in increasing our revenues. These meetings have been well attended and the speakers have been assured of the continuing interest of our men in the business-getting idea.

Of Special Merit

When a concern has been using the service of a railroad for years, presumably with satisfaction, it is hard to get it to try a competing road. Yet that is what was done by Conductor Benjamin Wilmot, trains Nos. 64 and 65 running between Lorain and Warwick, Ohio. The general manager of the shipping company sent a nice letter to Superintendent Green, advising of two carloads sent over the Baltimore and Ohio, the first they had ever sent, the business coming to us on account of the fine solicitation of Mr. Wilmot.

Another very interesting case is this one:

Engineer G. E. Whitacre, New Castle Division, overheard Mr. Elder Robinson, at Mahoningtown, Pa., speaking about a trip to Florida. Mr. Robinson was in conversation

with one of the merchants in town and remarked that it was his intention to go by way of a competing line.

Mr. Whitacre interested himself and advised Mr. Robinson that No. 16 left New Castle in the morning and made direct connections for Florida, and he agreed to take Mr. Robinson to the depot where arrangements could be made for the trip. Then he added: "I am not very busy and I will move your baggage from your home to the Baltimore and Ohio depot if you go by way of our lines."

The result was another passenger, and we are sure, a pleased one, introduced to our service.

Another little epic in getting business is contained in a report of Sergeant Leonberger, Police Department, Baltimore Division, to his captain, J. J. McCarron. It reads:

"Through my solicitation a ticket to Louisville, Ky., was sold at the City ticket office today to Walter Leonberger, revenue \$24.62."

Another employe in the Baltimore territory who has done yeoman work in getting business for the Baltimore and Ohio is F. M. Branum, agent at Harrisonburg, Va. Mr. Branum has secured not one but dozens of carloads of business for us and his work is greatly appreciated by our officers.

Superintendent J. D. Beltz, Pittsburgh Division, recently sent us this post card received by Engineer Gomer Thomas:

"Dear Uncle Gomer:

Enjoyed our trip over the Baltimore and Ohio just fine. Now about one hour from Chicago. Had a great night's sleep, etc."

It was signed by two of Mr. Thomas's nieces. On the face of it it may seem but natural that the relatives of Baltimore and Ohio folks should choose their line in preference to that of a competitor. But it is the writer's belief that if every employe of the Baltimore and Ohio could get even all of his or her close relatives to ride our line, it would mean a noticeable increase in our revenues.

The name of Agent P. Colligan, Allegheny, Pa., has appeared so often and favorably in the accounts of our business getting campaign that we are but approaching a natural climax in recording comparatively recent accomplishments by him and his associates in bringing carloads to our lines. During July and August of last year Mr. Colligan secured business amounting respectively to \$547.25 and \$1686.38, from one of the large shippers in his territory. Incidentally this is the first business from this shipper that the Baltimore and Ohio has received since 1919 and it is still coming our way. From another shipper Assistant Trainmaster Deane and Mr. Colligan got respectively \$1525.57 and \$1172.71 during the same months, all highly competitive business. Another big shipper turned over \$644.19 worth of business during August. And to show that the business getting idea is permeating the railroad family at Allegheny, note that one of Mr. Colligan's yard clerks, A. W. Kaelin, secured freight revenue amounting to \$294.53 during September, 1921.

Other similar stories of how employes are helping in the upbuilding of our business, and hence of the Railroad, will appear in our May issue. Lack of space alone prevents their printing in this number.

Secured Home Conveniently— Wants to Buy Plot

Wilmington, Delaware,
March 14th, 1922.

Mr. W. J. Dudley,
Superintendent Relief Department,
Baltimore, Md.

Dear Sir:—Enclosed find receipt for release of mortgage and other papers.

I assure you and the Relief Department that I highly appreciate what they have done for me toward getting a home. Am thinking seriously of buying ground under the house and will call and go into this matter with you in the near future.

Very sincerely yours,

(Signed) Thos. E. Gaynor,
Yardmaster

Speaker's stand, erected in Grafton Shops for the Business Getting Campaign, being tested out by some of the Grafton Veterans. Left to right: Treasurer J. J. Cassel, Vice President D. E. Robinson, President Frank M. Keane and Secretary C. W. Cassell

"Akron Division" the Consolidation of Cleveland and New Castle Divisions—Effective April 15

ON March 27 announcement was made by C. W. Galloway, vice-president in charge of Operations of the Baltimore and Ohio, that effective April 15, the Cleveland and New Castle Divisions, which comprise most of the Company's mileage in northern Ohio, would be consolidated into one division to be known as the Akron Division.

The consolidation was decided upon in the interest of economy and greater efficiency and to centralize the division headquarters in that territory, in line with a similar consolidation of the Illinois and Indiana Divisions on the Southwestern lines into the St. Louis Division, which

was put into effect January 1, 1922.

Headquarters of the new division are in the Hermes Building, Akron, Ohio, in the heart of the business district. D. F. Stevens, formerly superintendent at New Castle Junction, Pa., is the superintendent of the new division, which embraces 694.41 miles of main track and 449.02 miles of sidings, making a total of 1,143.43 miles of track.

It is felt that the change in operation will be more satisfactory to the shipping interests and the numerous industrial concerns in the territory involved, as it will enable them to keep in close touch with the operating officials of the road.

Death Comes to Hugh L. Bond, Jr., General Counsel, on April 11—Served Company Forty Years

AFTER an illness of less than 24 hours, Hugh Lennox Bond, Jr., general counsel and a director of the Baltimore and Ohio Railroad, died on April 11 at his home in Baltimore. He was 63 years old.

For 40 years Mr. Bond was connected directly with the Company. He spent practically his whole adult life with the Road, and his exceptional and minute knowledge of the Road was considered invaluable in its upbuilding.

Born in Baltimore on December 23, 1858, Mr. Bond graduated from the Phillips Exeter Academy in Massachusetts in 1876 and from Harvard University in 1880. After being admitted to the bar, he entered the service of the Baltimore and Ohio as counsel in office of the general attorney in 1882 and remained in the Legal Department continuously until his death.

For 13 years he gradually won promotion, until he was made general attorney in 1895, taking charge of the entire Legal Department. His value to the Road increased so much that in 1903 he was made second vice-president as well as general attorney and in 1907 his legal title was changed to general counsel. At his own request he was relieved of the duties of second vice-president in 1910 and was succeeded by George M. Shriver.

Still further recognition of his importance in the System was given in 1916, when he was elected to the board of directors to succeed Charles S. Harkness.

Counsel for Receivers

For a while when a young lawyer Mr. Bond was a member of the firm of Cowan, Cross & Bond. The senior member was John K. Cowan, who later became president of the road and was receiver with Oscar G. Murray from 1896 to 1899. Mr. Bond was the counsel for the receivers also. He had few other out-

side interests, although he was one of the counsel of the Seaboard Air Line Railway Company during its reorganization, and counsel for the Richmond and Danville Railroad Company during its receivership. He was a trustee of the Chesapeake and Ohio Canal Company.

Mr. Bond is survived by his widow, five daughters and four grand-children. He had two brothers, Dr. Summerfield B. Bond and Nicholas P. Bond, who died some years ago.

Expensive to Stop Train

PERHAPS the greatest waste of coal is by our railroads. At the present time the country's carriers use about 27 per cent. of all the bituminous coal produced in the United States each year. If this tonnage were placed in standard coal cars and coupled in a single train it would have a length of 26,260 miles. If moving at a constant speed of 20 miles an hour, this train would require 55 days to pass a given point. Such a volume of coal, writes Floyd W. Parsons in the *World's Work*, would be sufficient to pave a roadway from New York City to San Francisco one foot in thickness and one-half mile wide.

The railroads are badly in need of locomotives and cars. If our transportation lines were to effect a saving of two per cent. in their annual consumption of coal the amount thus laid aside would be sufficient to purchase several hundred modern locomotives and thousands of freight cars. For each one per cent. of fuel saved the railroads of the United States effect a direct gain of about \$5,000,000, while the indirect saving amounts to a sum that is equally as great. Of all the coal that is used in the firebox of a locomotive only six per cent. of the total value of the fuel is applied to the work of moving the freight or passenger cars.

When a pound of coal is burned in a freight locomotive at ordinary freight train speed, it will furnish sufficient energy to carry one ton 15 miles. An ordinary passenger locomotive consumes a pound of fuel for every 52 feet it travels. Each unnecessary stop made with a heavy freight or passenger train represents a fuel loss of from 500 to 750 pounds of coal, depending on the weight of the train, the length of the stop and the grade conditions. A brake line air leak on a train of 50 freight cars has been known to cause a loss of as much as 2,540 pounds of coal in a ten-hour period. The loss of coal

(Continued on page 12)

The late Hugh L. Bond, Jr.

Organization, Publicity and Teamwork Brought Remarkable Results During "Perfect Package Month"

By C. C. Glessner, General Freight Claim Agent

THE final totals of the "Perfect Package Month" show some wonderful results, the predominating feature being the fine work done by the various agents in organizing and supervising their forces. The station employees, too, deserve high praise—it was their fine support of the agents which made it possible to obtain such good results.

The month of November, "Perfect Package Month," brought some remarkable disclosures. There were literally thousands of corrections made in marking, packing, etc., which might have resulted in claims. Can you visualize what a vast loss it would have meant if we had received and paid only one claim for every five corrections made to shipments during the month of November? The loss would have been stupendous.

And now, having shown by organization, publicity and teamwork what can be accomplished in the reduction of claims during a test period, all those on the Baltimore and Ohio who have anything to do with the handling of freight, will, I am sure, be glad to apply the practical and helpful experience of this period to a consistent and steady effort all along the line to even better our relative showing in the future. The following paragraph certainly suggests that the experience of "Perfect Package Month" can be credited, at least in part, with the even better showing made during the months of December and January than was made during November, to wit:.

The usual time in which claims are filed for Loss and Damage is from 30 to 90 days after date of shipment, and on this basis I give below a comparative statement of Local Loss and Damage claims received for the months of November and December, 1920 and 1921, and of January, 1921 and 1922:

MONTH	1920	1921	Decrease	1922	Decrease
November	14593	7719	52.9		
December	14432	8554	58.5		
January		13208		7296	55.2

While it is true that the recent business depression may have contributed somewhat to this decrease in local claims, I do not believe that it was a predominating factor, but that in reality this statement expresses the results of the agents' activities in the prevention of claims during the "Perfect Package Month" of November.

If our agents will take as their slogan for the present year, "An Error Prevented is a Claim Saved," and if this is followed up, I have no doubt that we will continue to have

a steady decrease in local claims. The price of efficiency is constant alertness—to prevent errors not only by the shipper in marking, packing, bills of lading, etc.—but by our own station forces in loading, stowing, bracing, billing, etc. These are the errors which usually result in claims and cannot be watched too closely, and in order that permanent good may result from the recent campaign, I trust these items will receive your personal attention.

The Renewal of Spans 14 and 15, Ohio River Bridge at Bellaire, Ohio

By P. J. Lang, Jr., Engineer of Bridges

ON Wednesday, March 22, new Spans 14 and 15 of the Baltimore and Ohio Railroad bridge crossing the Ohio River between Benwood Junction, W. Va., and Bellaire, Ohio, were moved into place,

and two old spans were simultaneously withdrawn. The total weight of steel in the new spans is about 460,000 pounds. The entire weight moved on this occasion, including the old and new spans,

Safety Section

Engineer Harry Franks says:

"Horsepower Has Bin Sufishtently Developed in the Moater—Wot We Need Now is the Devellopment of a Little Horse Sence in the Driver."

Deer Bro. Bill

I reseved your leter an wuz glad 2 no you liked wot I rote bout wots goin on in this big citie. But "Bill", I am lernin all the time an with wot I here an sea, I wunder at times if it is posibel 2 keep it after you get it, but mabe that is wot they kall edication.

You get a litle of everthing an not 2 much of any won thing, so I gess the mane part is makin the people think you are klever an no it all.

Goin 2 work last Sat I wuz sittin rite behind 2 laydies they wuz talkin an wun sed, well I hev maid up my mind 2 spend wun our everday konsentrating. I hev been doin this fer some time an the reasults are wunderfull.

So there talk got me 2 thinkin, so I ast the boss I work fer wot it ment.

He sed it wuz fixin your mind on a subject no mater how fer away, an makin a wish with your eys klosed, an wen the time had xpirid fer konsentrating, you draw a long breth, kinda relax, open your eys an you wud find your wish had kome tru.

Well, Bill, I maid up my mind I wud tri it wen I got thru from work, so I went 2 my room an sit down in the dark, klosed my eys, maid my wish, an put a limmit of wun our wich I thout wuld be long nuff.

Following the direcksions I fokused my mind on the paymaster lokated in the distant citie of Baltimore, an wished that wile makin out the pay checks he wud ad \$50. dolars to mine.

So wen the our wuz up I opened my eys, dru a long breth, relaxed an wayted fer pay day.

Well it kame but the results wer not faverbel fer I dru the same pay an wuz a day short on top of it.

There wuz an aksident at a krossin here a fue nites ago, and the auto driver 2 all apearences must hev been konsentrating, that is he fixed his mind on a subject wich in other words wuz his destination, an wile I dont bleve he klosed his eys, he set the limmit on the time 2 get there.

It wuz very foggy and hard 2 sea krost the streat, an wile his thots wer in the distance he faled 2 sea a ralerode engin, runing in 2 it kausing his deth.

The peepel I bord with kall there selvs spiritalists, I gess it is somthin nue an they klaim it takes grate study 2 bekum wun.

You no Bill they bleve in spooks, an they talk 2 any wun thats ded they want 2, but it must be done thru a persun they kall a meadeum, who it is xplained has the power 2 sea an here a spirit talk.

They say evry spiritalist has an indian spirit gide, advizing an pro-tekting them at all times from harm. If I rekall it rite bout a month ago a feller wuz kild by a ralerode engin on a krossin here, the gates wer down but he walked round them and wuz run over. I herd later he wuz beried from the spiritalist church, and I kouldnt help thinkin his indian gide must hev gone 2 a pow wow or tribe dance thereby negleckting his duty.

But in all fareness Ill hev 2 admitt most of us plaise 2 much dependence in others regarding our safety, who like the gide mite be on a vakation.

Sense I hev ben workin fer the ralerode all I here is safety furst, an its a fine thing 2, it aut 2 be in ever persuns mind at all times, no mater wot kind of a job they are on, an I must say I pracktise wot I prech ever day 2 the best of my abil-ity.

I scene a pease in our paper that apealed 2 me an if I remembur rite it sed, horsepower has ben sufishtently devellopmed in the moater, wot we nead now is the devellopment of a litle horse sence in the driver.

That is sain a hole lot in a fue words "Bill", but the pitcher on the edditoreal Paige showd old war man Mars talkin to an auto driver sittin in a big masheen, an pointing 2 a sine wich sed 48 thousan U S soldyers kild in the world war, an 91 thousan persuns kild by autos in the U S in the last yere an a half.

"Bill" we neadent be surprized if the figgers wer dubbeld fer the next yere.

I purty nere fergot 2 tell you, but in all the big cities like Nue York, Chicago and this citie the mane konversaytion beetween Auto oners, drivers, and some of the publik is eliminaytion.

Now "Bill" this is a big word an its meenin is not relized 2 the fulest xtent specialy wen we kome 2 konsider the enormus kost.

It tuk some time fer me 2 find out wot this wurd ment an wot the auto fellers want.

They dont want any restricksions in there racin up an down the streats an over krossins, so they insist on the ralerode kumpnys bildin tunells under each streat krossin the rode runs over an payin fer the job beasides.

I hev allways thot its a poor rule that wont wurk 2 ways, an wile the peepel are in the eliminaytion umer, I am goin 2 propose 2 our kumpny offisirs that they stop all tranes at the citie limmits, then kall up the Mayer on the telephone, an advize him pasenger trane No 1 frum Dtroyt 2 Sinsinati, is waytin fer the polease 2 stop the auto racin over the krossins long nuff so it will be safe 2 bring the trane in 2 the union depo.

I bleve it the ralerode kumpny aks on my sugestion the auto peepel will be forsed 2 admitt that others have rites, an the eliminaytion prossess will then start on there side of the fence with them payin the bill.

I gess you think I am krazy 2 rite bout such things but if you stay round here you will hev 2 no or pay so I am goin 2 be on the safe side.

Well "Bill" Ill hev 2 klose fer this time hopin you kan figger out wot I wuz riten bout, an reamember all of us kan profit by the other fellers sucksess or faleure, an it dosnt kost much, only time readin how it wuz done.

Now take your time readin this an anser sooner, fer I get kinda loansom fer nues from home.

So Good By,
JOHN.

Eastern Railroad Finds Something to Advertise

Baltimore & Ohio Railroad Exhibits the Refreshing Aggressiveness of Western Roads of Pre-war Days

By J. G. Condon

THE Grand Canyon has been thoroughly sold to the people of the United States. It is something the Western tourist *must* see, and so large and important has that "*must*" become that other lines without a little old Grand Canyon nestling near their right-of-way have been hard put to find something just as good for the purchaser of Pacific Coast transportation. True, many of them have developed excellent attractions of their own, notably national parks of one sort and another, but no railroad traffic official will deny that one of the hardest things he has to buck in persuading a prospective passenger away from the Santa Fé and on to his own road is the popularity of the Canyon.

And now the East, if certain aggressive transportation men are to be believed, is going to have a Grand Canyon, too. Not exactly the natural wonder out in Arizona or anything approaching it, of course, but it is going to have something that the traveler coming East *must* see. It is going to be brought about, of course, by advertising.

The projector of this ambitious enterprise is the Baltimore & Ohio Railroad. Always a steady and constructive advertiser, the B. & O. recently has embarked on a campaign that has made other railroads take notice. The B. & O. always has favored the National Capital in its advertising. Even its trade-mark carries the familiar dome of the capitol building and it has used to good effect the Washington stopover privileges permitted in connection with a trip over its line. But the advertising heretofore has been confined almost exclusively to newspapers and generally then in small space.

There was genuine surprise the other day when the B. & O. suddenly blossomed out with large and handsome advertisements in several weeklies and monthlies of national circulation. It was something different for a railroad, particularly for an Eastern railroad. The advertising, simply headed with the one word "Washington," and showing an airplane view of the capitol, also was different. It did not even mention the B. & O. until the next to the last paragraph, and there is no description of train schedules, service, or any of the old familiar words of railroad advertising. The copy is inspirational. The principal thought is to be found emphasized in a little box in the centre of the advertisement, addressed "To the American People."

"Washington is the historic centre of the United States," it says. "Nothing so increases patriotism as a visit to the Nation's Capital, where America has written her history in sacred relics, memorials and magnificent architecture. Here are assembled the political, military and diplomatic forces that are making these United States a world power. It is the duty of every citizen to see Washington and realize more fully the greatness of his Nation."

A PROPER USE OF ADVERTISING

And the B. & O. is properly coupled up with this appeal by the chaste announcement that its trains between New York, Chicago and St. Louis pass through Washington and with the stopover privileges allowed offer a convenient way of seeing the capital.

But there is another unique feature in the advertisement—a coupon at the bottom to be filled out by those who would welcome

Inexpensive Excursions to Atlantic City

THE Baltimore and Ohio Railroad has arranged for the operation of seven 16-day excursions from points east of the Ohio River to Atlantic City for the coming summer season, on June 29, July 13 and 27, August 10 and 24, and September 7.

The fares from Pittsburgh, Parkersburg, Wheeling and New Castle will be \$15.60 for the round trip with proportionate fares from intermediate points east thereof.

Tickets will be limited to 16 days, including date of sale, and will permit of stop-overs at Philadelphia, Baltimore and Washington on the return trip for period not exceeding ten days within the final return limit upon notice to conductor and deposit of ticket with the depot ticket agent immediately upon arrival.

These excursions will cover the thickly settled territory in many large cities in western Pennsylvania, West Virginia and Western Maryland, including such cities as Pittsburgh, Washington, Pa., Wheeling, Connellsville, Uniontown, Morgantown, Fairmount, Clarksburg, Parkersburg, Grafton and all the territory contiguous thereto.

50

PRINTERS' INK

Mar. 23, 1922

an opportunity to examine the B. & O.'s 32-page "Guide to Washington." It carries the usual "without obligation" clause and is addressed to the passenger traffic manager. The results obtained in the form of returned coupons is said to have surprised everyone connected with the enterprise.

This new B. & O. advertising harmonizes exactly with the business-getting spirit and good-will building attitude apparently extending throughout the organization at this time. A recent large-space advertisement telling New York people that the B. & O. is now signed up as a long-term tenant of the Pennsylvania's in the latter's great station at Seventh avenue and Thirty-second street served to direct attention toward this line. A writer in *PRINTERS' INK* a few weeks ago told of the joys of the B. & O. dining-car service, and in that connection the writer has an experience to add. Following an attractive dinner for \$1.25, the remark to the steward, "You can't make much money on that dinner at \$1.25," brought that worthy back with this query:

"Maybe not, but don't you think it makes good friends for the B. & O.?"

Another dining-car departure of the B. & O. is worth telling here. Away from the Eastern seaboard there is a tendency to think of oysters when one mentions Baltimore. The B. & O. has recently started to capitalize this idea. It has provided an all-oyster menu, which, to carry the idea still farther, has been printed on a card of the shape, size and color of an oyster shell. Inside, it is told that oyster cocktail, oyster stew, cream oyster stew, cream of oyster soup, pan-fried oysters on toast, roast shell oysters, broiled oysters Maryland style, ham and pan-fried oysters on toast, oysters au gratin, oyster fritters with chili sauce, individual oyster pie and finally oyster omelet, are all to be had on the car. It would be a resourceful and hard-to-please oyster fan who would complain he couldn't get oysters the way

he wanted them on a B. & O. diner.

One side of the oyster shell is free of printed matter, but the other has in small type:

"The Baltimore & Ohio Railroad is giving special attention to the development of its passenger traffic and our purpose is to provide a service that incorporates safety, convenience, comfort, dependability and courtesy, supported by a dining-car service that meets every reasonable requirement."

ADVERTISING FOR FREIGHT, ALSO

But the whole drive of the B. & O. is not directed toward more passengers and increased good-will. These are dominant elements and, of course, have a special bearing on some of its other advertising. Take, for instance, the scheme it has adopted for increasing its freight movement—a plan that is a solicitation not for a ton, a carload or a trainload of freight, but for *all* the inbound raw materials and the outbound manufactured products of factories, or for the creation of basic industries.

This has been done through a series of attractive booklets issued by the railroad's industrial department. They are miniature guides to the opportunities along the line of the B. & O. awaiting development. The one entitled "Salt and Its By-Products" is typical. It points out that this vastly important industry centres in only a few districts in the United States and enumerates the sections along the B. & O. where it is to be found. In this connection it says that "while the chemical phase of the salt industry is developed at a number of places, there are available sites where economic conditions are very favorable for profitable new plants and for the manufacture of a greater variety of chemical products."

"In the Ohio Valley of West Virginia and in Ohio," it continues, "are latent possibilities for a large chemical industry, where the finer grades of chemicals in variety can be made under

Keeping up with the Passenger Department

The news on this and the opposite page might be called a "kaleidoscopic perspective" of current events in the Passenger Department. The article reprinted in fac-simile from "*Printers Ink*," the leading publication of the advertising world, is rather a remarkable tribute to our advertising. Another paragraph tells of the inexpensive excursion rates that may be had over the Baltimore and Ohio this summer from inland points to Atlantic City. (Please tell your friends.) That the Baltimore and Ohio is maintaining its reputation for "firsts" is evident from the note about lap robes for passengers. "Pat" Moran liked our line so well that he trusted his ex-world champions to us to take to their spring training camp. The other picture but suggests one of the monumental beauties that may be seen in the Capitol City, the \$250,000 Grant memorial unveiled on April 27.

52

PRINTERS' INK

Mar 23 1922

unusually favorable conditions. There is present a golden opportunity that no longer should be allowed to lie dormant.

"There is an unsupplied demand for these chemicals, and here is the supply of raw material now being largely neglected or wasted. One of the beneficial results of the war has been the marked growth of the American chemical industry and the severance of dependence on German chemicals which formerly controlled the world markets."

Then the B & O couples up its own selling talk with a description of its Commercial Development Department, in which it says "practical briefs on economic plant locations with freight rates, municipal factors, industrial data, sites, etc., are prepared without charge by a corps of trained men."

Along entirely different lines is the advertising drive made by the B & O. in an effort to reduce accidents at railway grade crossings, a work in which this railroad has been a pioneer, notably with a two-color leaflet picturing a near-collision between one of its trains and a large automobile at a highway grade crossing, a tattered and hatless boy apparently having barely averted the accident. On a poster in the pictures appears this bit of information:

More than 1,500 human beings killed, twice that many seriously injured on railroad crossings each year!
Do not be the next victim.
STOP—LOOK—LISTEN.

The strongly contrasted black and red of the leaflet, with a powerful locomotive in the middle foreground, combine to make the picture a compelling one.

In even more detail, the figures regarding accidents at grade crossings have been combined in another leaflet that is left on dining-car tables with the menu. It is intended particularly for the passenger who has ordered, re-examined the menu card on both sides, tasted the iced water and is looking for a way to kill the balance of the time while his meal is "coming."

The B & O is out in the open, setting a swift pace for other railroads. Its methods are a matter of genuine interest to advertising men and certainly are bound to prove a benefit to travelers on its trains.

Lap Robes Free for Observation Car Passengers

W. B. CALLOWAY, passenger traffic manager, announced on April 3, 1922 that the Baltimore and Ohio had established the practice of supplying lap robes gratis to such passengers on the New York-Chicago express trains, 5, 6, 7 and 8, as desire to make use of the observation end of the train to enjoy both the scenery and open air with more comfort.

"The aim of the passenger official," says Mr. Calloway, "is to surround the traveler with every comfort possible. We have found that many passengers like to watch a sunrise, sunset or other scenic effect, while enjoying the fresh air, but at this time of the year, early in the morning or late in the afternoon, the air may be too chilly on the observation end of a train without protection, so we started the practice of supplying

"Pat" Moran, manager of the Cincinnati team and third from the right in picture, took the following men with him to spring training quarters over the Baltimore and Ohio:

Pitchers Rixey, Luque, Scott, Donohue, Markle, Couch, Clarke, Gillespie, Schnell, Johnson. Catchers Wingo, Hargrave, Lutz. Infielders Daubert, Bohne, Caveney, Pinelli, Fonseca, Kimmick, Fowler. Outfielders Roush, Burns, Duncan, Bressler, Neale, Harper, Hock, Hogan.

lap robes. There is no charge for the use of these robes; they may be obtained from the Pullman conductor or porter upon request. The innovation has proved popular so far, much to our pleasure.

"Reds" Ride Our Line Enroute to Spring Training Camp.

THE Cincinnati "Reds" Baseball Club left Cincinnati, Sunday, March 5 on train No. 1 via St. Louis for their spring training camp at Mineral Wells, Texas.

The "Reds" are famous for having won the National League pennant and the World's series a few years ago.

The accompanying photograph shows only a portion of the party of players, there being twenty-two in the party leaving Cincinnati. "Pat" Moran, the popular and well-known manager, is the third person in the front row, from the right.

THE GRANT MEMORIAL IN WASHINGTON

Felow is a composite view of the Grant memorial unveiled in Washington on April 27. The sculptor, H. M. Shrady, whose design was chosen as best from a field of 52 competitors in 1901, died on April 14 last, just 13 days too soon to see the complete fruition of his dreams, his genius and industry. He had worked on the memorial for 20 years.

News from the Freight Department

Pacific Coast Apples via Virginia Storage and Baltimore and Ohio—Fine Prospects for 1922

By J. L. Hayes,
Division Freight Agent,
Baltimore, Md.

THE Valley of Virginia, traversed by the Shenandoah sub-division of the Baltimore and Ohio, has long been noted for its production of apples, the normal movement amounting to several thousand carloads. In addition to the direct movement from the orchards, it has been the practice to hold large quantities of these apples in the cold storage warehouses at Charles Town and Winchester, which have a combined capacity of approximately 500,000 barrels, awaiting winter and spring movement to the large consuming centers.

During 1921, however, on account of the extreme cold weather in April, the Valley apple crop was almost entirely destroyed and the cold storage warehouses appeared to be of little use. With this condition facing them, the enterprising owners of these warehouses arranged with the apple growers on the Pacific Coast, principally in Oregon and Washington, where there was an unusually good crop, for the storage in transit of boxed apples destined to Eastern markets, with the result that several hundred carloads have already come forward for storage in the Valley and later movement to the Atlantic Seaboard.

This is the first time in history that apples have been shipped into the Valley apple belt for storage, and the enterprise of these cold storage people has given the Baltimore and Ohio a large revenue it probably would not otherwise have received.

Readers of the MAGAZINE will be glad to know that, barring an unexpected spell of bad weather, at this date (April 3) the prospects are

for a bumper crop of apples in the Valley of Virginia. Whether this materializes or not, however, we understand that the growers in the Valley have done so well with the storage of the Western apples that they expect this year to about double the quantity handled during the past season.

"Keep a Scratchin'"

WHEN you stop to think of it, business is just like a barnyard, and we run around like a lot of roosters searching for sustenance. We know no more than does the feathered "Biped" where the worms are until we scratch; but, unlike Chanticleer, if we fail to find what we want in the first bit of ground, we droop our wings and sulk and go on a hunger strike. How much wiser is the hen's husband. If the first ground he tackles proves barren, he just keeps on a scratchin', and pretty soon you hear his triumphant 'Cock a doodle do.' Of course he found it because—why, just because he scratched."

This is homely but sound philosophy, and it is fortunate for the world that there are so many men in it who, in the face of terrible defeats and discouragements, "Keep-a-scratchin'."

To attain unusual success calls for unusual effort. Very few successful men have been able in their early careers to observe an eight-hour day. Whenever representatives of various enterprises and others, who must get their business through going out and digging for it, contract a habit of spending a goodly part of

the best hours of the day at their own desks, they need prodding, they need to be reminded that the way to get business is to go after it when it is possible to land it: namely, when "prospects" are reachable. The hours when "prospects" can be reached are few enough and short enough at the best.

The period calls for unusual effort, which may mean adding an hour or two quite often to our work; but in times like this particularly, the securing of a satisfactory amount of business through the expenditure of an hour or two extra a day is not bought at an unreasonable price.

Produce Exchange "Pep"

Freight Headquarters at the Produce Exchange, N. Y., have been entirely renovated. This has had the effect of injecting "pep" into all its occupants. Come in to see us when you are in New York.

Passenger Paragraphs

A passenger secured and satisfied means another good solicitor for the Railroad. Therefore try to please him.

Attention to the smallest details in routing passengers often furnishes the best evidence that the Company takes an interest in their comfort.

Expensive to Stop Train

(Continued from page 7)

each time a modern locomotive pops off for five minutes is about 75 pounds. If locomotive firemen were to save a little more than one shovel of coal out of each ton used, the total saving would be equal to nearly one per cent. of all the coal handled.

The ultimate in fuel economy on our railroads is a long way off. Railroad practice in many parts of our country is far from being modern. For example, the brick arch, if applied to an American locomotive and properly operated and maintained, will save approximately 15 per cent. of the locomotive's fuel; yet some of the largest roads in the country are only now commencing to equip locomotives with this well-known fuel saving device.

It took four flat cars to handle this creosoting tank from Indiana Harbor to Demmler—an all daylight movement

On the Importance of Being Wet

One of a Series by Life Extension Institute Containing the Latest and the Most Scientific Information on Healthful Living and the Prevention of Disease

THAT the earth and everything that lives on it is very wet, we learn from a recent article by Dr. Leonard G. Rowntree in *Physiological Reviews*.

We do not take all this water seriously enough, although water-drinkers are supposed to be very serious-minded people. The information that one can become intoxicated on water will come to them as a shock, and to anti-prohibitionists as a gleam of hope in a very dark situation. When one considers the apparent simplicity of water, its innocence and reputed harmlessness, it is amazing upon examination to find out how complex these water problems are.

A great deal of water that surrounds us and is part of us is concealed under the guise of solids. Seventy-five to eighty per cent. of the body is made up of water—brain not excepted. That brains are mostly water we can readily believe when we consider other people; but not so readily as applied to ourselves. It is a curious fact that old people are wetter than young people. So among other traditions for the discard we must include that of the dried-up old man!

That we ought to take water seriously—that is, the problem of water and not the drinking of it, which should be a joyous matter—is evident from the fact that the loss of ten per cent. of the water content from the body results in serious disorders, and twenty to twenty-two per cent., in death. This shows us within what narrow margins we live, after all. One can go longer without food than without water. It is related that Viterbi, an Italian political prisoner, who died as a result of abstinence from food and water after 18 days, suffered chiefly from thirst. In the desert, where evaporation is

extreme, death would occur as a rule in from 36 to 72 hours after deprivation of water.

When we consider the terrible effects of complete withdrawal of water, we must be prepared to admit the possible ill effects of partial withdrawal, or what is known as the "dry habit." Many reckless statements have been made as to the amount of water required to keep one in perfect condition. The complex functions of water in the body are not always borne in mind and it is too generally regarded as merely a means of satisfying thirst and flushing out the body poisons.

Rowntree cites experiments to show that water intoxication is possible. Animals have developed symptoms of poisoning following forced injection of large quantities of water. Similar results have been produced in man, with patients suffering from chronic kidney trouble and high blood pressure. The argument that almost anything used to excess will prove poisonous, has often been used in favor of alcohol. There is, of course, not a scintilla of logic in such contention. Alcohol in any amount usually taken by people who use it as a beverage, has been shown to be a poison. Water is not only innocuous, except when used to huge excess, but is absolutely necessary to rid the body of poisons. Alcohol performs no such function.

Roughly speaking, the body loses about 2,000 cubic centimeters of water daily through the lungs, the skin, the bowels, and the kidneys. About half of this can be made good through drinking water and other beverages, and the other half by water directly supplied by so-called solid foods, and the water derived from the oxidation of fats, sugars, starches, and proteins. In order to

keep this balance, the usual counsel to drink about six glasses of water daily seems valid. Much will depend, however, on the intake of other fluids, such as milk, tea, coffee, and other beverages. People who have no tendency to high blood pressure or kidney or heart impairment should err on the safe side and drink plenty of water. People with heart trouble, kidney trouble and high blood pressure should be cautious as to the free use of water and take counsel with their physicians in this matter.

The amount of water in so-called solid foods may be judged by the fact that cucumber, lettuce, beans, celery, and similar foods contain about 95 per cent. of water. Boiled smoked ham contains 51 per cent.; roast leg of mutton about the same.

Theoretically, thirst should inform us of our water needs, but normal thirst becomes blunted by habit or impaired bodily conditions, and in the average person is not an infallible guide. It is well, therefore, to have regular habits of water-drinking.

The Renewal of Spans 14 and 15, Ohio River Bridge at Bellaire, Ohio

(Continued from page 8.)

together with their docks, was 1,000 000 pounds.

With this change, the Benwood-Bellaire Bridge, so far as its capacity is concerned, has all spans of the same strength, and is capable of carrying any motive power in existence.

The rolling operation of March 22 occasioned no interference with scheduled traffic. The total interval required, from the time of cutting track to the connecting up of track, was 1 hour 55 minutes, of which but 1 minute 30 seconds was consumed in the actual rolling operation.

Additional Compensation?

By John Newman,
Terminal Timekeeper, Pier 22, N. R.,
New York

What is "Additional Compensation?" Since 1917 it has become familiar to all railroad employes—one phase of it has. But did you ever feel pleased with yourself, have a sense of satisfaction permeate you with a feeling of "goodwill toward all and malice toward none," just because by an extra effort you had completed something that required extra effort, and you had done it well? That is another phase of "additional compensation," and it lasts longer than "easy money." If the boss does not pat you on the back, do it yourself.

BALTIMORE AND OHIO MAGAZINE

Tell What We Can Do—Not What We Can't!

Standing within earshot of a ticket office on the Baltimore and Ohio one morning recently I heard a passenger ask the time of the next train to a certain place a hundred miles away. The ticket clerk was well posted for he came back quickly with—"You *can't* get a train there until three o'clock this afternoon." The passenger looked disappointed and walked away without making a purchase.

Now it just happens that the Baltimore and Ohio is the only convenient railroad that can be used between the places in question, so the business probably came to us anyway. But the point is that the negative reply of the ticket seller made a bad impression on the passenger, which might easily have been avoided had our man realized the advantage of stating the fact in a positive rather than in the negative way. If he had said, "Yes, Sir, we have a train for there at three o'clock this afternoon," he would probably have made his sale then and there.

If he had been a super salesman he might have suggested how the man could put in the intervening hours in an interesting way. A good restaurant for lunch could have been recommended and some of the nearby historic points in the city suggested for a visit. Not every passenger would thank you for such suggestions but this particular one seemed to be the type that would, for as he turned away it was apparent that the prospective long wait appalled him.

If a prospective employer were asking you your qualifications for a job that you wanted, you would do yourself a gross injustice by adopting the negative rather than the positive way of answering. Why belittle yourself by saying, "I *only* got through the second year in high school," instead of the positive, "Yes, Sir, I finished two years in high school and then had to go to work." Or of replying, "No, I haven't had any training in your business," instead of, "Yes, Sir, I have had five years general clerical experience which I think would be helpful to me in your line of work."

It is well established that much better results are obtained in the training of children by adopting the positive rather than the negative method. The child who is constantly being told, "Don't do this or that," quickly gets discouraged. But the one whose actions are influenced to the same result with the positive, "Do this or that," responds much more quickly and has his or her thoughts and actions directed along constructive lines.

The same principle of psychology obtains in our

every day life on the Railroad. When prospective passengers or shippers ask us as representatives of the Baltimore and Ohio what we can do, let's tell them what we *can* do and not what we *can't*. The positive answer brings better results than the negative.

The Capitalization of the Railroads

Every now and then one hears the remark "Oh the railroads are overcapitalized."

To utterly confound one who makes such a remark ask him how much the roads are capitalized for and how much they should be capitalized for. The chances are ten to one he will not be able to answer either question.

The railroads of the United States are capitalized for \$66,700 per mile.

The government owned trans-continental railroads of Canada cost nearly \$80,000 per mile to construct and that before a single piece of rolling stock was placed on the rails.

The government owned railroad of New South Wales cost \$77,000 per mile for construction.

The Canadian National railways cost more than \$75,000 per mile for construction work alone.

Does that indicate that the railroads of the United States are overcapitalized?

Far from it.

The Observation.

Learning By Contrasts

When the boy took to his school teacher his father's answer to the question, "How much is a million dollars?" and said, "It's a hell of a lot of money," he came about as close to a satisfying reply as any of us is likely to. Millions are mighty hard to define unless we make a picture out of them, say in the shape of engines or cars or automobiles or what not.

Another good way is by contrasts, and it is handy in getting an idea of the size of this business of railroading that we are engaged in. Just a single item: On the Baltimore and Ohio in 1921 the cost of the coal used was eighteen million dollars, one of many large expenditures, albeit the largest except that for labor. Yet we don't get any conception whatsoever of what it means until we can relate it to something else. In this case consider the budget for running the State of Maryland for the next fiscal year, a budget of fifteen million dollars. It is rather hard to conceive that our coal consumption on the Railroad costs more than it does to run the whole State of Maryland, yet such is the case—about three millions a year more—in round figures.

It would also be interesting to know, admitting the great waste involved in getting the "b. t. us." of the coal into actual tractive power, which expenditure, dollar for dollar, is more efficient.

The Kernel of the Railway Question

Congress decreed that six per cent. was a fair return on railway capital. Very well. Isn't it plain as A B C that the railroads cannot, therefore, afford to pay more than six per cent. for their capital? To pay seven per cent. for capital and be able to earn only six per cent. would, obviously, be a losing proposition. And who would invest in railway securities under such conditions? The net of it all is this:

Railway credit must be made strong enough to enable the railroads to raise funds at six per cent. or less. If not,

only fools would invest in railway securities. No enterprise can go on paying more for capital than it can earn on its capital. That's what most of our railway systems have been doing. It can't last. The business world, the public, labor must see to it that the railroads are not subjected to conditions which would mean their breakdown, for if transportation breaks down, so, naturally, must the whole business structure.

Business cannot move unless it is moved.—*Forbes Magazine* (N. Y.).

The Bulletin

Don't Underestimate Its Value

Several months ago there appeared on this page a little note suggesting the value of the bulletin to superintendents and department heads. Space is too valuable in the MAGAZINE to use for repetition unless that repetition appears to be on an important topic.

Division, department, shop and other supervising officers cannot expect the men working for them to work in a thoroughly intelligent way unless these men are kept apprised by timely information of what their supervisor is trying to accomplish.

The bulletin will do just this. One can be written, manifolded and distributed to important points on a division within twenty-four hours of the time the need of it becomes apparent to the superintendent. Where department and shop forces are in restricted areas the news can be gotten out much more quickly.

We have a bulletin before us. It is No. 95, issued by the Charleston Division. It treats in short, pointed paragraphs these subjects: Box Cars; Unconsign'd Coal; Mill Gondolas; Company Material; Accidents; Getting Business; Through Service; L. C. L. Service; Bulletin Boards.

Note particularly what the last paragraph was:

Bulletin Boards. Keep your bulletin boards up to date. They look better and serve their purpose better if obsolete advertising matter is removed, old tacks pulled out, and signs which are displayed kept clean and neatly arranged.

To be effective the bulletin must be handled properly.

Note the number of subjects mentioned, the classes of employes they affect and then figure the value of the bulletin for yourself. If it saves the loading of one foreign box car away from the home road during the period of the car surplus, it will have saved the cost of the bulletin and then some. We believe that such bulletins actually accomplish much more than this. It won't hurt to give the scheme a trial and judge for yourself.

Remember the story, don't you, about the architect, who, overseeing the construction of a dwelling house, came at the noon hour one day upon a nail which had not been driven clear in. "There's a nail some carpenter has forgotten to drive in," he said to the contractor.

"No, he didn't forget it," the contractor replied. "The twelve o'clock whistle blew while he was driving that nail."

Turner, the great English artist, spent an entire day once sitting upon a rock throwing pebbles in a lake. His companions laughed at him for being so wasteful of hours during which they were having a good time. But no other artist could paint such ripples as Turner painted.

Are you a whistle worker or do you study your job?

Jerome P. Fleischman in "Uncle Jerry Says."

Our Growing Magazine Family

Much as we want every member of the Baltimore and Ohio family to be a member of our MAGAZINE family, readers will not wonder when we claim a closer kinship with some employes than with others. For instance, we call our correspondents, who monthly take the trouble and time to collect and prepare the MAGAZINE notes of interest to their respective localities, our first cousins. Most of them are *young* men and *young* women (in spirit, at least, they *all* are) and we like to feel that we are of their generation, that we have their same youthful enthusiasm and industry, and that although we revere the past and respect and admire everything that the word "Veteran" means on our Railroad, we nevertheless have our eyes fixed unswervingly on the star of the future and all that we believe it means for our great organization.

There is one branch of our family which in its growth is putting all others to shame. We refer to those other relatives, the nieces and nephews of our kindly and entertaining "Aunt Mary," who has won them into the fellowship of MAGAZINE readers and contributors through her attractive pages devoted to the interests of our Railroad children. Each month "Aunt Mary" says to the writer:

"Can't I have an extra page for the children in this issue?"

Then comes the business of explaining the importance of other departments in the MAGAZINE and, generally, a compromise which is satisfactory to neither of us, yet over which no blood has yet been spilled. The accompanying cut suggests, however, the appalling perplexity of the editor if Aunt Mary continues to trundle in in increasing numbers the child prodigies which claim relationship with her from issue to issue.

The growth of the Children's Page in the MAGAZINE means more than the success of that department alone. It means also that the MAGAZINE is being taken more and more into the home, whose stabilizing and helpful influence cannot help but result in a better understanding of our common Railroad problems.

And so, with Rooseveltian belief in large families, and especially a large Baltimore and Ohio Magazine family, when "Aunt Mary" asks for more pages for her nieces and nephews and other relatives, we are disposed to forget the limitations of space, take off our editorial hat and shout.

"Here's to Aunt Mary, long may she wave!"

That she has accomplished something real may be seen in this issue of the Magazine in the report of the Prize Contest on the Children's Page.

Who Will Be the First to Solve these New Puzzles?

Dear Readers:

Last month I promised to tell you this time about the "flat" puzzles but, before launching into that subject, I want to tell you a little story that I think will interest you.

The National Puzzlers' League held its semi-annual convention at Newark, N. J., on January 2 and among the many puzzlers present was Mrs. C. C. Wonters of Hawley, Minn. Mrs. Wonters conducts the puzzle department of the American Boy Magazine, under the pen name of "Kappa Kappa." As Kappa Kappa she is known and loved by thousands of American boys and girls and through her department in the magazine has furnished them with pleasures beyond estimate.

As I looked at her smiling countenance and noted her youthful complexion, in contrast with her beautiful, wavy, grey hair, I had the temerity to ask her how she kept so young, not only in looks but in spirit, and her reply was:

"Puzzles! They keep the mind active and vigorous and while you can keep your mind in that condition you will never grow old."

And I believe her philosophy to be absolutely correct. Don't let your mind get into a rut and bog down in the mire of sameness, and I am sure you will always feel and look younger than your years, no matter how many those may be.

What is Your Puzzler's Name?

Another thing about puzzlers, I might just as well mention here and now as later, is that each one works under a *nom de plume* selected to suit his or her fancy. You never see a puzzler's work signed with his proper name. Instead we have such names as Mentor, C. Saw, Primrose, Arty Ess, Dan D. Lyon, and a myriad of others. So, if you care to adopt a pen name, you will be right in line with all other puzzlers, big and little.

Flat Puzzles

And now we will talk about "flat" puzzles. A flat has been described as a name given to verse puzzles, anagrams and cryptograms, to distinguish them from puzzles based on geometrical figures and known

as "forms," such as the square, diamond, etc.

There are many kinds of flat puzzles such as the acrostic, alphagram, beheadment, transdeletion, charade, curtailment, deletion, enigma, mutation, anagram and others which we will come in contact with as we go along.

The Charade

One of the most popular of flat puzzles is the charade. This may be described as an enigma based upon a divisible word, veiled beneath, *complete*, *whole*, or *total*, the parts of which, distinguished as *first*, *next*, *last*, etc., taken separately, are significant, their meaning and that of the whole word to be discovered from description or representation, usually in verse. The following is a fine example of the charade written by "Will o' The Wisp."

A simple air, you say she played,
While countryward your thoughts
conveyed.

Ah, mystic friend, were you aware
She laid for you an artful snare?
She played to ONE, the saucy jade.

Elsewise, had not this TOTAL maid
TWO piece more difficult essayed?

But, no! she played with skillful care
A simple air.

She saw you loved the forest's shade;
Has heard the compliments you paid
To country life; and wished to share
The comforts of a dwelling there.
And so she summoned to her aid
A simple air.

The answer to this charade is "Win-some." If you insert the word *win* in place of the word ONE written in capital letters in the last line of the first verse, insert the word *winsome* in place of the word TOTAL printed in capitals in the first line of the second verse, and the word *some* in place of the word TWO printed in capitals in the second line of the second verse, you will see at a glance on what charades are based and how they are built.

Here is another good example of a charade by Waldemar:

Two beautiful roses were given to me,
One came from the distant hills;

Sweet is the FIRST from its petals soft—
The room with its incense fills.

The other one bloomed in hothouse air,
And though perfect its petals seem,
'Tis LAST than a rose to me for I feel
'Tis only a beautiful dream;
An empty casket, COMPLETE and fair—
The soul of the flower was never there!

The answer to this charade is "Scentless." By substituting the word *scent* in place of the word FIRST in the third line of the first verse, and the word *less* in place of the word LAST in the third line of the second verse and the word *scentless* in place of the word COMPLETE in the fifth line of the second verse, you will have no difficulty in working out, in your own mind, just what a charade is and how it is built and how it is solved.

The Beheadment

A beheadment, which is sometimes called a decapitation, is a puzzle in which you take a word, which you describe in verse, usually, then drop the first letter, the remaining letters forming another word, which is described in verse. Here is a neat example of the beheadment, written by Octavo:

A little dear you'll surely say
My sweetheart is: she's bright and gay;
She's fair—so everyone agrees,
She's got a dainty ALL to squeeze:—
She has a most attractive way.

But when I come her bills to pay—
As in the coming years I may,—
I'll find without a doubt that she's
A little dear!

At certain times she's wont to play
With my affections: when I pray
Her ladyship to tell me, please,
If she does love me, she will tease,
LAST with a laugh, will only say,
"A little, dear!"

The answer to this is "H-and." Insert the word *hand* in place of the word ALL printed in capital letters in the fourth line of the first verse, insert the word *and* in place of the word LAST printed in capital letters in the fifth line of the third verse and you will get a good idea of the beheadment.

Here is another example of the beheadment written by Kosciusko McGinty:

Never a day but some breast is aching;
Love is a captive illy confined;
Studied composure LASTS peace of
mind,

And cannot hide that a heart is breaking
 Dan Cupid's face there is no mistaking;
 He shows himself whoever enshrined;
 Never a day but some breast is aching;
 Love is a captive illy confined!
 You can't put him in a young wife's
 baking,
 When house-wifely **WHOLE** is left
 behind.
 Although the little fellow is blind
 He sees the hayoc dyspepsia's making;
 Never a day but some breast is aching;
 Love is a captive illy confined.

The answer to this puzzle is "S-kill."
 Kill, in the present tense, or *kills*, fitting in
 the third line in place of the word **LASTS**
 written in capital letters and the entire
 word *skill* written in place of the word
WHOLE printed in capital letters in the
 tenth line.

The Curtailment

A curtailment is very much like a be-
 headment except that you take a word and
 drop the last letter, the remaining letters
 making another word. Here is a very neat
 curtailment written by Troubadour:

While Mabel plays my dreamy gaze
 It centered on the ember's blaze,
 And in the glow
 Her music low
 Takes me far back to happy days.
 By pleasant ways my fancy strays
 Far in the past, thro' memory's maze;
 I **ONE** for days I used to know
 While Mabel plays.

The curtain o'er the past I raise—
 And what sweet thoughts the **WHOLE**
 conveys!
 To long ago
 My fancies flow;—
 But, ah! the fair dream only stays
 While Mabel plays.

The answer to this puzzle is "Sigh-t."
 The word **ONE** printed in capital letters
 in the third line of the second verse stands
 for *sigh*, while the word **WHOLE** in the
 second line of the third verse stands for
 the whole, or in other words, *sight*. Insert
 those two words in the places designated
 and you will see that they make sense.

It might not be amiss to explain here
 something more about these words "first,"
 "last," "whole," etc. In the case of a
 charade "whole" means the entire word,
 and it may be of two or more syllables.
 "First" or "primal" would mean the first
 syllable, "second" would mean the second
 syllable, or if it is a two syllable word
 "last" would mean the second syllable.
 In the case of a beheadment, "all" or
 "total" or "complete" would mean the
 whole word while "one," "first," "primal"
 or "last" would mean the second word
 made by dropping the first letter. In the
 case of curtailment, "whole," "total" or
 "complete" would mean the whole word
 while "one," "last," "first" or "primal"
 would mean the second word made by cut-
 ting off the last letter of the first or entire
 word.

How to Compose

In composing these puzzles you have in
 mind the answer or answers fitting in the
 proper places but instead of putting these
 answering words in their proper places

when the puzzle is published, you substi-
 tute "one," "last," "whole," etc., as the
 case may be. The puzzle is to figure out
 from the verse description the proper word,
 or words, to fit in the spaces occupied by
 "first," "last," "complete," etc.

Writing these puzzles has developed many
 good verse writers and, in fact, many fine
 poems have come from the pens of puz-
 zlers in the shape of puzzles. None of
 us knows just how well we may be able
 to write verse until we try and only those
 who have written good, clever verse realize
 the satisfaction, pleasure and happiness
 the accomplishment brings.

The examples of charades, beheadments
 and curtailments given here are taken
 bodily from a book called the "Key to
 Puzzledom." This book is the standard
 authority for all puzzlers on forms and
 flats and is generally known as the "Puz-
 zler's Bible." It contains 145 pages of
 printed matter, describing and illustrat-
 ing all kinds of puzzles, verse and prose,
 forms and flats, with many good hints
 on how to build and solve puzzles.

It also contains a history of puzzling and
 a glossary or dictionary of words and ex-
 pressions used by puzzlers. To anyone
 seriously interested in word puzzles, the
 book is invaluable. It was published by

the National Puzzler's League, to be sold
 without profit and for the sole benefit of
 puzzlers, new and old. If you are really
 interested in this wonderful art, \$1.00
 mailed to W. W. Delaney, 395 Stratford
 Road, Brooklyn, N. Y., will bring you the
 book and put you in possession of more
 valuable information than I could convey to
 you through many issues of our **MAGAZINE**.

Before giving you some charades, be-
 headments and curtailments to solve, I
 want again to call your attention to the
 fact that this department of the **MAGAZINE**
 is conducted with the sole thought that it
 may interest and benefit many members of
 the great Baltimore and Ohio family. In
 order to get the full measure of benefits
 you must try to solve the sample puzzles
 we will furnish and, at the same time, try
 your hand at building others like them,
 then show your interest by sending your
 answers and your new puzzles to me, fol-
 lowing the instructions given you in the
 March number. We propose to publish
 a list of the names of the successful solvers
 and, of course, will attach the name of the
 builder to every puzzle we publish.

Unless you send in a list of answers or
 some new puzzles, or both (the latter pre-
 ferred, or course), we shall be forced to the

F. J. Angier, Superintendent Timber Preservation

Born December 22, 1866—Died March 24, 1922

THE death of F. J. Angier, for the last ten years Superintendent of Timber Preservation on the Baltimore and Ohio, on March 24 last, came as a great shock to his many friends on the Railroad. During the forepart of the week preceding, he had been in Chicago attending an executive committee meeting of the American Wood Preserving Association, of which he was president, and also the annual meeting of the American Railway Engineering Association, being a member of the Tie Committee. While there he was taken ill and started east immediately, the attack developing into acute appendicitis on March 17 on the train. Arriving in Baltimore that night, he was given immediate medical attention, was operated on the following morning and his recovery was fully expected. At midnight of March 23, however, he took a sudden turn for the worse, when general peritonitis set in, and even as the physicians were working over him, the poison reached his heart and he died at seven o'clock on the morning of March 24.

Mr. Angier was born at La Moille, Ill., on December 22, 1866, next to the oldest of nine children. His father was employed by the C. B. & Q. Railroad for thirty years, during fifteen of which he was chief clerk to the master mechanic at Beardstown, Ill., to which place the Angier family moved while the late Mr. Angier was but a boy.

Family circumstances made it necessary for him to go to work when he was but fourteen years old and when he had only been through the Sixth grade in the public school. He began as a trucker in the freight house and while following this vocation took up a correspondence course in chemistry with the International Correspondence Schools, completing it and qualifying as a chemist in the Burlington laboratory at Aurora, Ill.

In 1899 the Burlington decided to build its own timber preservation plant and Mr. Angier was requested to handle the work, the plant being erected at Edgemont, South Dakota. Timber preservation, not alone on the railroads but generally, was quite a new science in those days and Mr. Angier had to do a good deal of research and pioneering work in the erection of this plant. Here he was superintendent for two years.

The success of the operations encouraged the Burlington Company to go into timber preservation on a larger scale and the Edgemont plant was cut into sections, put on flat cars and moved to Sheridan, Wyoming, where it was considerably enlarged and operated under Mr. Angier from 1902 to 1907.

He was then instructed by the Burlington Company to build a new plant at Galesburg,

Ill., and was made superintendent of timber preservation of that railroad, in charge of both plants. President Willard was second vice-president of the Burlington, in charge of operations, at that time, and it was under his supervision that Mr. Angier put into the track of the Burlington the first test ties ever placed in a railroad track. These ties have been carefully watched since that time and a recent examination of them has provided the most up-to-date and conclusive figures extant, on the value of tie preservation, some of which were presented to the readers of our MAGAZINE by Mr. Angier in a recent issue.

The late F. J. Angier, Superintendent Timber Preservation

He next became affiliated with the Kettle River Company, a commercial timber preservation firm with headquarters in Chicago. In the meantime Mr. Willard had become president of the Baltimore and Ohio Railroad and asked Mr. Angier to affiliate with it and to superintend the erection of our Green Spring Preservation Plant, as superintendent of Timber Preservation. His service with our Company started on August 1, 1911 and continued until the time of his death.

Mr. Angier was number one of the twenty charter members of the American Wood Preservers' Association, formed in 1905. He became secretary in 1910 when there were but 40 members and when he gave up this office to become first Vice-President in 1921, the membership had grown to over 400. For years he was the "wheel horse" of the organization, the annual report being the encyclopedia of the art of timber preservation, and gotten out under his painstaking, expert and devoted supervision.

Little wonder, therefore, that the association rewarded him with the office of president in January, 1922.

Mr. Angier is survived by his widow, a daughter, Ruth, a son, Robert N., his mother, two sisters and four brothers. He was a member of Beauseant Commandery No. 8, Knights Templar, which was in charge of the funeral on March 27, from his late home in Baltimore. Representatives from other Masonic bodies with which he was affiliated were also present, as were a large number of the officers of the Railroad, including C. W. Galloway, vice-president Operation and Maintenance, J. S. Murray, assistant to president, and Earl Stimson, chief engineer Maintenance. Twenty-five of the employes of the Treating Plant, headed by E. E. Alexander, supervisor of plants, made the pilgrimage from Green Spring to pay their last respects Mr. Alexander was associated with Mr. Angier for eighteen years and many of his companions have been with the plant since it was built. Resolutions of sympathy offered by the Safety Committee at the plant were sent to the family, and the beautiful flowers at the funeral attested the wide and deep esteem in which he was held.

To his business friends it was always apparent that he was intensely enthusiastic over and devoted to his specialty of wood preservation. He was fortunate in having entered such a pursuit, commanding as it does, the best thought of some of the leading conservationists and economists in the country. His training as chemist, his practical knowledge of railroading, his early and continuous investigations into wood preservation and his wide experience on the railroad end of preservation, made him an authority on the subject and of great value to the Baltimore and Ohio. His work with the American Wood Preservers Association has been mentioned. He contributed freely to its publications and to others, and had a practical and at the same time scientific grasp on his specialty possessed by few men in the country. He was always ready to talk on it and always in an interesting and convincing way. Some of the results of his work have been made manifest in the findings on the test ties which he placed in 1909 in the tracks of the Burlington. As far as the intervening years permitted, these findings were conclusive as to the value of preservation, and there is good reason to believe that Mr. Angier's enthusiastic belief that the passing of more years would but increase the proven value of preservation, as shown in the test tracks, was well founded. It is unfortunate that he could not live to see the complete results of his work, especially on these test tracks. Yet few men who are pioneers in a specialty such as his are given in their lives the ample proof that he had that his enthusiasm was so well substantiated and his pioneering work resultful in so convincing a degree.

Meet Mr. Baltimore and Ohio in His New Role of Soil Doctor!

Acidity versus Soil Health

By O. K. Quivey, General Agricultural Agent

MANY of us find it necessary from time to time to take a spoonful of mother's baking soda in a glass of water to neutralize acid in the stomach. We call this condition "heartburn." Soda dispels it because it is the work of an alkali neutralizing an acid.

Acid soils act much in the same way, producing little else but misery. Acid soils (and nearly all soils are partly acidic) cannot nourish crops into wholesome matured plants, so we neutralize the acid by applying ground limestone, which, like soda, is also an alkali. The practice of applying limestone to acid soils is not a new one. Old records kept by George Washington speak of the use of "limestone used to sweeten the ground."

It would seem that a practice which dates so far back would be well established today, but the fact remains that thousands of farmers are plowing and sowing seed to acidic soils, securing only meager crop returns and with little effort on their part to "sweeten" these soils with limestone and increase their crop yields.

With a keen appreciation of the value of limestone, the Baltimore and Ohio Railroad, through its Agricultural Department, will continue the limestone demonstration work begun last year. This is being done largely in Illinois, Indiana and Ohio, where it is most needed. In Ohio a Twelve-County program is being carried out this year. Each County Agricultural Agent in charge of these counties has arranged a "limestone demonstration week," at which time he will use a carload of limestone which the Baltimore and Ohio will transport to him free of all transportation charges, the limestone being donated by the manufacturers of that commodity. The schedule of demonstrations is given at the close of this article.

Careful check is being kept in each of these counties relative to the time of application, the rate of application per acre, kind of soil, crop, etc., in order that we may have a more intelligent appreciation of the final results.

It is said by the agricultural authorities in Illinois that poultry, limestone and butter fat form the trinity that has made farming in southern Illinois profitable. These three farming pursuits are named in the order of their importance. Poultry is first, because it affords to the farmer a quick return, in fact, an almost daily cash income, thus permitting him to purchase and make a liberal application of limestone to his sour, low-producing fields. These in turn produce vastly increased crop yields of corn, clover and alfalfa, with

which he can feed a goodly number of dairy cows. And these again in turn produce a fairly quick return and a consistent cash income from the sale of butter fat.

Pass Riders—Please Note

Some pass riders continue to embarrass their associates and the Railroad by failing to live up to the Baltimore and Ohio standard of courtesy. When women are standing in coaches and seats are not available for them, it is not only simple courtesy but a rule of the Railroad that men who are seated and who are riding on passes should surrender their seats to them.

Vice President Galloway Addresses Toledo Division Veterans

Second Annual Banquet, Reunion and Ball of Toledo Division Veterans is One of the Most Successful of the Season

NOTE: On March 16, when the Toledo Division Veterans and their wives gathered at Dayton for their second annual reunion, there might have been seen among those gathered to enjoy the fun a group of three, whose faces are not familiar to all of the Veterans. They are, nevertheless, well known through the pages of our MAGAZINE, and particularly to those who read the columns of the Among Ourselves Department. These three are the MAGAZINE correspondents for the Toledo Division, Edward M. Mannix, roundhouse clerk, Dayton, and two of his assistants, Miss Gertie Mae McBride, Division Accountant's Office, Dayton, and Ray Garrigus, Car Department, Lima. The following account of the evening's entertainment was sent in to the MAGAZINE by these three, who have expressed the sentiment of all present when they say that they never had such a good time. We'll present, first of all, a poem which Mr. Mannix dedicated to the Ladies' Auxiliary:

Her life is like an open book, as each page we pursue,
Striving every moment for the good that she can do.
And as we read the pages of a life so pure and sweet
We pluck the rarest roses and lay them at her feet.
She was sweetheart, wife and mother to her hero in her youth,
She has followed out the teachings of her sacred Book of Truth.
And, as years are fast advancing, making inroads in her life,
We crown her with a memory, and the honored name of Wife.

THE day was one made to order for a Veterans' reunion, so warm and bright that it made the heart beat just a little faster and added new life to the oldest. Hardly a passerby would have thought that any one of those assembled at the station at Dayton had seen twenty years of service with the Baltimore and Ohio; and yet, there were those who had seen more than double this and who are still going strong.

It was early in the afternoon when the reception committee came to the station to meet the brothers and sisters from the other divisions who had come to visit them, and to shake a welcome hand with the officers of the Baltimore and Ohio who had come to speak to them. Such a jolly crowd it was, and what fun they had getting their pictures "took;" for not only was a picture taken for our own MAGAZINE, but the attention of the daily papers was called to this happy assembly, and each one smiled his sweetest and struck a graceful pose while the picture man pushed the bulb.

Vice President Galloway, General Superintendent Mitchell and Superintendent

Mann had already arrived. Grand President of Veterans G. W. Sturmer, Chief of Welfare W. W. Wood and "Grandpa" Holmes were, among the arrivals from Baltimore. Mr. and Mrs. Frank Howard and some friends came from Newark. (Mrs. Howard is grand president of the Ladies' Auxiliary.) Mr. and Mrs. J. M. Garvey, grand vice presidents of the Veterans and of the Ladies Auxiliary, respectively, from Wheeling, were among those who had arrived earlier in the day. Trainmaster "Tom" Daley was on hand to help show the visitors a good time.

After all "How-dy do's" had been said, the Veterans, their wives and guests commandeered a score of automobiles and drove out to McCook Field, the famous airplane field of the Wright Brothers. Here they were shown all through the factories where the great winged birds are made. The flying tests also attracted the attention of our folks. Several of the good sisters insisted on flying, but their husbands declared that they were angels already.

Leaving the field, the folks proceeded to go to their homes or to hotels, where

the ladies frizzed their hair and the men twisted their mustaches in preparation for the grand event.

Six o'clock, or a few minutes thereafter, found them all gathered together at Odd Fellows' Hall. At 6.30, the three hundred and more made their way joyfully to the basement, where the banquet was served. Rev. George W. Johnson made the invocation, and all were seated. The officers of the Ladies' Auxiliary and their guest, "Aunt Mary," were presented with beautiful bouquets, which, we learn from good authority, they wore for a week, then had them pressed in order that they might keep them as souvenirs of the occasion.

A famous minister once said that there is an imp under every church pew. There was certainly one under the banquet table, for here he rises to make a few remarks.

"Three cheers for Toastmaster Mann!"

"Boy, page Mr. Wallburg. His wife is eating her third plate of cream."

"With whose spoon did the preacher-man eat? One plate with two spoons is all right, but two plates to one spoon—Sh-h-h!"

"Why didn't the ladies smoke cigarettes? They had permission. 'I don't smoke,' quoth one, 'but I'll take a cigar; I know a nice man who does.'"

"Creamed chicken, rolls, peas, celery, grape fruit, 'taters, slaw, mints, coffee, ice cream, music—what does that sound like to you? More!"

"What did Mr. Wood do with all the eats? He put 'em—on Mrs. Howard's—no, I mean, on Mrs. Wallburg's plate. Why did he make such a grave mistake?"

"Who knows Jack and Mrs. Spratt?"

"How many nieces and nephews has that old lady from Baltimore?"

"Mrs. Hopper brought the news from Garrett. And she must have had a lot to tell the folks when she got back."

"Red carnations make me dizzy when I see the officers wearing them. Come, follow me to the entertainment hall. Farewell."

Following the dinner, the guests repaired to the third floor where another feast was awaiting them in the way of a good hearty laugh, but not before they had had a treat by way of an address of welcome by City Manager F. O. Eichelberger.

Soon the curtain went up, and why shouldn't it, for back of that curtain was a party of good old colored folks who started to work on those fiddles, and, say, folks, it was better than any old camp meeting you ever saw. However, on consulting the program, we found that it was not folks from the sunny south after all, but our old friend, Rusche and his wife, together with the Misses Young.

Next on the program was Warren Schmieding with "Oh, Brother, What a Feeling," which made us almost seasick, so well did he render it. Next came Clarence Schmieding and Miss Young, with a selection, "Leave Me with a Smile." The popular songs, given by the Baltimore

and Ohio Quartette, were appreciated by all, so much so, that they were called back several times. The Krebs Trio showed a marked talent in musical ability for children of their ages.

"Rummy" and "Dub" certainly made a hit when it came time for their appearance on the program. Everybody just had to laugh. "Dub" (better known as Lee Wentz) held his audience spell-bound when he started clog dancing. He will undoubtedly have a few pupils to train for the next Veterans' meet in the persons of "Ike" Clayton and Augspurger, who stood up in order not to miss any turn he might make. It's no use, boys, you couldn't do that, you're too fat for such strenuous exercise.

After this our minds were directed to the more vital things in railroad life by Mr. Galloway, vice-president of the Baltimore and Ohio, who pleaded cold, bare facts before the Veterans for their earnest and honest consideration. Mr. Galloway pointed out that the Railroad wants to do all for its employes that is within its power; he called upon the Veterans to meet the issues of railroad life with unbiased minds, that they may help to keep the Baltimore and Ohio up to the highest point of prosperity possible.

Following Mr. Galloway's address, there was a talk by Grand President of Veterans Sturmer, who stirred up that old spark of enthusiasm and love for railroad work, when he spoke of those who have been in the service for a period of twenty years or more, and their influence in railroad life.

General Manager R. N. Begien then spoke to the Veterans and added his appreciation of their faithful performance of duty at all times.

General Superintendent F. B. Mitchell Southwest District, told of the possibilities of business getting, the courtesies due the traveling public and shippers, and the necessity of getting business.

Miss Margaret Talbott Stevens, better known as "Aunt Mary," associate editor of the Baltimore and Ohio MAGAZINE, then described the Women's Department of the MAGAZINE and the possibilities open to the women of the Railroad,—of business getting and how to get it.

Following this Mrs. Howard, grand president, Ladies' Auxiliary, was called on for a speech in behalf of her work.

Several of the speakers were unable to

At the Second Annual Banquet of the Toledo Division Veterans at Dayton

Vice President Galloway Said:

That we should be constructive, not destructive, critics of that which pertains to the Railroad.

That we need a mutual adherence to the principles of business.

That the Baltimore and Ohio will represent the interest of the employe in any case of unjust criticism.

That we want to be "A Good Neighbor."

That to promote good service, we must be associated for mutual helpfulness.

That when a man is a Veteran, it means that he is going to be a benefit to himself, to the Baltimore and Ohio, and to his fellow employes.

That the Ladies' Auxiliary is a necessity to a Veterans' organization.

That misunderstandings occur through misinterpretations.

That there is no secret about railroad work.

That certain present day railroad propaganda is destructive instead of helpful.

That we are all human, and therefore we are liable to make mistakes.

That sometimes a man in the Rocky Mountains squeals until he gets a dentist from the East to pull out his tooth.

That a railroad man is invited to come in and have a heart to heart talk with his officers.

That the Baltimore and Ohio's policy is to have every employe feel that the management is his friend, and its aim is to keep harmony reigning in the Baltimore and Ohio Family.

That he was glad to see us.

be present and sent their regrets, but we know that their hearts were at the meeting.

Among our prominent Veterans was Zachary Jackson, 85 years old, but as spry as a cricket, with long gray beard and hair. He displayed a letter, dated 1866, written to him while employed on the line out of Baltimore as a locomotive engineer. His heart is still with the Baltimore and Ohio even though he has retired from railroad life now and is living at Cincinnati. His eye is good and clear and he could still run an engine.

Brother C. F. Hopkins, a well known and highly esteemed Veteran from Cincinnati, was escorted to the "party" by Brother Holmes, of Baltimore.

John Mass, 78 years old, Custer, the oldest employe on the Toledo Division, attended the banquet. He said that he enjoyed it as he had never enjoyed a function of its kind before.

Mr. Mass served as section foreman for fifty years, from May, 1862, to December, 1912, when he was retired on pension.

"I hurt my back in 1912 and had to quit work. If it wasn't for that I would still be the best section foreman on the line," Mr. Mass declared.

"I can remember working in Dayton when everything north of the Miami and Mad rivers was considered 'wild country.' It was at that time that the greatest development was to be found in railroads, and I grew with the old Baltimore and Ohio.

Among those present from the Traffic Department were Messrs. Lewis, Gallagher and Arnold; from the Motive Power Department, Messrs. Galloway and Hitch. We were also glad to welcome Mr. Duffy, former trainmaster, Toledo Division, now located in Baltimore, and Mr. Eccleston, of Baltimore.

The success of the meeting was due to the untiring efforts of Mr. Bushaw, telegrapher, Dayton, and Mr. Wallburg, of Lima, Ohio.

After the speaking, the evening was turned over to dancing, the Royal Five Jazz Band furnishing the music.

Some of those who made up the reception committee at Dayton

Pensioners' Roll of Honor

*Oh, blest retirement! friend of life's decline—
Retreat from care that ever must be thine;
How blest is he who crowns, in shades like these,
A youth of labor with an age of ease.*

GOLDSMITH—"The Deserted Village"

John G. Philbrick

John G. Philbrick, pensioned machinist helper, was born on June 1, 1850. He entered the service of the Baltimore and Ohio as brakeman on February 1, 1886. In May of that year, he was promoted to freight conductor. In April, 1893 he was promoted to passenger conductor. In this position he had charge of the first Baltimore and Ohio passenger train that entered the World's Fair Grounds, Jackson Park, Chicago, in 1893.

In 1900 he left the service, re-entering later as yard foreman, Stores Department, Chicago. His positions after that time were as follows: yard foreman, material distributor, gang foreman, machinist operator, machinist helper.

Mr. Philbrick was in continuous service of the Railroad from then until the time of his retirement. He has always been a booster for the Baltimore and Ohio, working for its interests; for, as he says, the Company's interest is his.

Joseph Rufus Duvall

Joseph Rufus Duval, pensioned trackman, Baltimore Division, was born on July 5, 1854. He entered the service of the Baltimore and Ohio as trackman in March, 1889. On August 14, 1911 he took a position as lamp tender. In 1912 he again took the position of trackman, remaining in this capacity until the time

of his retirement. Mr. Duvall has a wife and two children living.

John F. P. Meyers

John F. P. Meyers, pensioned machinist, was born on November 2, 1851. He entered the service of the Baltimore and Ohio as machinist apprentice at the age of 18. He continued in the service until March 3, this year, after fifty-two years of service. Mr. Myers' photograph, which is shown herewith, was taken about 22 years ago when he was dressed to attend a parade of Baltimore and Ohio employees.

John Schmaus

John Schmaus, pensioned gang foreman, was born on July 17, 1854. In 1881 he entered the service of the Baltimore and Ohio as laborer, Locust Point Stores. In 1908 he was made assistant foreman, Wicomico St. Lumber Yards. Five years later he was made leading man, and in 1917, promoted to gang foreman. This position he held until the time of his retirement.

Mauna H. Higginbottom

Mauna H. Higginbottom entered the service at Mt. Clare Shop, Baltimore, in 1878 as painter. In May, 1894, he was made foreman of painters, Maintenance of Way department. He continued in this capacity until January 14, 1921.

Death Claims Harry A. Allison, President of Cumberland Veterans

By John J. Sell,

Car Distributor, Cumberland

ON Tuesday, March 7, Henry Allison, president of the Cumberland Veterans' Association, died, and with his passing we lose one of our best known Veterans.

Mr. Allison was born July 21, 1860, and first entered the service of the Company as car inspector on the Philadelphia Division, May 1, 1880. He was promoted to assistant car foreman on the same division in March, 1886. Three years later, March 1, 1889, he was transferred to the Cumberland Division as general car foreman, Cumberland, Md., which position he held until June, 1904. After that date he filled various positions in the Mechanical and Car Departments, having been appointed chief joint inspector in January, 1921.

For a number of years Mr. Allison was joint interchange man at Cumberland and was always active in Safety and Welfare work. In addition to his active work in this connection, he wrote considerable verse under the nom de plume of "Old Interchange," by which name he was well and familiarly known by not only fellow employees but a host of friends among the general public.

As president of our Cumberland Veterans chapter he always took an active part in advancing welfare and social activities, having enthusiastically furthered the Somerset picnics, which proved such successes, as well as all local social gatherings of the Veterans.

In addition to his social activities among the Veterans, President Allison always had a sympathetic ear for any employee or his

Queen of the Springtime

When Hepatica comes smiling, clothed in gowns of blue and white,
When sweet Violet's fair carpet makes the earth smile in delight,
When Sir Bloodroot doffs his headgear as dear Madam Fern appears,
When Miss Showy Orchis greets us with a pride beyond her years;
When King Robin in the treetops fills the air with lilting song,
And our Quaker Lady's smiling as the fragrance drifts along;
When Pa Hillside buys a waistcoat, made of grasses bright and green,—
Then Old World grows fair and lovely, and we know that April's queen.

Father Forgets

An Editorial from the September, 1920 number of the Peoples Home Journal.

Reprinted by special permission.

LISTEN, son, I am saying this to you, as you lie asleep, one little paw crumpled under your cheek and the blond curls stickily wet on your damp forehead. I have stolen into your room, alone. Just a few moments ago, as I sat reading my paper in the library, a hot, stifling wave of remorse swept over me. I could not resist it. Guiltily I came to your bedside.

These were the things I was thinking, son: I had been cross to you. I scolded you as you were dressing for school because you gave your face merely a dab with a towel. I took you to task for not cleaning your shoes. I called out angrily when I found you had thrown some of your things on the floor.

At breakfast, I found fault, too. You spilled things. You gulped down your food. You put your elbows on the table. You spread butter too thick on your bread. And as you started off to play and I made for my train, you turned and waved a little hand and called, "Good-by, Papa!" and I frowned, and said in reply, "Hold your shoulders back!"

Then it began all over again in the late afternoon. As I came up by the hill road, I spied you, down on your knees, playing marbles. There were holes in your stockings. I humiliated you before your boy friends, by making you march on ahead of me, back to the house. Stockings were expensive—and if you had to buy them you would be more careful! Imagine that, son, from a father! It was such stupid, silly logic.

But do you remember, later, when I was reading in the library, how you came in, softly, timidly, with a sort of hurt, hunted look in your eyes? When I glanced up, over my paper, impatient at the interruption, you hesitated at the door.

"What is it you want?" I snapped.

You said nothing, but you ran across,

gathering all your child courage, in one tempestuous plunge, and threw your arms around my neck and kissed me, again and again, and your small arms tightened with an affection that God had set blooming in your heart and which even neglect could not wither. And then you were gone, patting up the stairs.

Well, son, it was shortly afterwards that my paper slipped from my hand and a terrible, sickening fear came over me. Suddenly I saw myself as I really was, in all my horrid selfishness, and I felt sick at heart.

What had habit been doing to me? The habit of complaining, of finding fault, of reprimanding—all of these were my rewards to you for being a boy. It was not that I did not love you; it was that I expected so terribly much of youth. I was measuring you by the yardstick of my own years.

And there was so much that was good, and fine, and true in your character. You did not *deserve* my treatment of you, son. The little heart of you was as big as the dawn itself, over wide hills. All this was shown by your spontaneous impulse to rush in and kiss me good-night. Nothing else matters, tonight, son. I have come to your bedside in the darkness, and I have knelt here, choking with emotion, and so ashamed!

It is a feeble atonement. I know you would not understand these things if I told them to you during your waking hours. Yet I must say what I am saying. I must burn sacrificial fires, alone, here in your own bedroom, and make free confession.

And I have prayed God to strengthen me in my new resolve. Tomorrow I will be a *real* daddy! I will chum with you and suffer when you suffer and laugh when you laugh. I will bite my tongue when impatient words come. I will keep saying, as if it were a ritual: "He is nothing but a boy—a little boy!"

I am afraid I have visualized you as a man. Yet as I see you now, son, crumpled and weary in your cot, I see that you are still a baby. Yesterday you were in your mother's arms, your head on her shoulders. I have asked too much, too much!

Dear boy! Dear little son! A penitent kneels at your infant shrine, here in the moonlight. I kiss the little fingers, and the damp forehead, and the yellow curls, and, if it were not for waking you, I would snatch you up and crush you to my breast.

Tears came and heartache and remorse, and, I think, a greater, deeper love, when you ran through the library door and *wanted* to kiss me!

A Good Recipe

Butter Scotch Pie

Contributed by Mrs. W. D. Roebuck,
Lima, Ohio

Yolks of three eggs
2 tablespoons flour
2 cups brown sugar
¼ cup melted butter.

Mix well together and stir into 2½ cups boiling water. Flavor with vanilla. This makes two pies.

Good night!
Sleep tight,
Wake up bright in the morning light!
Then do what's right
With all your might.

Anne "Bobby" Pennington

How to Grow Dahlias

By Trainman W. H. Stone

Gaithersburg, Md.

Note: In the Magazine for October of last year there were several pictures showing some of the Baltimore folks who visited the dahlia farm of Brakeman and Mrs. W. H. Stone, at Gaithersburg, Md. In the article which accompanied the picture, we promised to give our readers the benefit of Mr. Stone's experience in raising dahlias. Mr. Stone kindly sent us the following article, and we are glad to pass it on. Mr. Stone makes quite a business of raising dahlias, and his kindness in passing his knowledge on to our Baltimore and Ohio folks is heartily appreciated.—Associate Editor

TO begin with, there are many varieties of dahlias, and the notes that I am giving herewith are gleaned from questions that our railroad folks have asked me.

The dahlia was discovered by Baron Humboldt in 1789, in the country of Mexico. It was sent by him to Prof. Cavenilles of the Botanical Gardens, Madrid, who had named it "Dahlia," in honor of that celebrated Swedish botanist, Prof. Andrew Dahl.

In this same year it was introduced into England by the Marchioness of Bute, who had secured a plant from Prof. Cavenilles. Although this plant was grown under glass and received the greatest of care, the stock was finally lost. Lady Holland reintroduced it into England in 1804. In Spain, France, and Germany the dahlia was now beginning to receive much attention.

In 1814 came the introduction of the first of the double variety. We wonder if Humboldt or Cavenilles might have dreamed of a development of the dahlia as it appears today.

The dahlia can be found in nearly every color except blue, and in all of the intermediate shades and tints. It is the ease of culture and its varied habits, and adaptability to climatic conditions that make the dahlia so valuable and popular.

Both the single and double varieties grow from twelve inches to fifteen feet high. Between these two extremes range the dwarf, the semi-dwarf, and the standard, or tall varieties.

As a cut flower, whether for bouquets, decorations, or for exhibition purposes, the dahlia is unsurpassed for diversity of form and brilliance. In size the dahlia varies from the smallest pompon of a half-inch in diameter to the largest of the show and cactus varieties, which may grow from seven to ten or more inches in diameter, on stems three feet in length.

Anybody, by a little care in cultivation, can grow dahlias. The rules that I follow are as follows:

1. Select a suitable location; that is, where the plants will be able to get plenty of sunlight and air. Any soil that grows potatoes will grow dahlias.

2. If the soil is heavy, lighten with coal ashes and well rotted manure (do not use fresh manure) spread broadcast.

3. Spade or plow the ground to a depth of eight or ten inches.

4. My time for planting dahlies is from May 15 to June 30. Do not plant too early if you want good Fall bloom.

5. Select bulbs with no more than two eyes; one is still better.

6. Allow a four foot square for each plant. The hill should be six inches deep. Cover the stub three or four inches. When the time comes for cultivation this will be soon enough to level the hills.

7. Cultivate once a week.

8. When the plant has acquired four joints, pinch off the third, leaving just two joints. This will cause the plant to branch out instead of growing tall.

9. When the plants begin to bud, give each plant a pint or more of good bone meal.

10. Hill up the plant well; cultivate lightly afterwards. It is well to have a good stake between each hill. Tie a rope around both sides of the bush.

11. Do not allow all of the buds to bloom; by leaving only the first bud on each branch, large blossoms will result.

Care of Bulbs

1. After the frost has turned the bush black, select a dry time to lift the clumps out of the ground. Leave a stem six inches in length.

2. Pack the bulbs with the stems downward in a good box well lined with heavy paper. Place them in a cool place in the cellar. Do not have them near a furnace.

3. Keep them out of the way of rats and mice.

4. Wait until the clumps sprout and you can tell how the clumps should be divided.

5. Grow only the best dahlias, such as the English Curved Cactus, Colossal Cactus, Hybrid, Decorative, and Peony Style. These have been recognized by the American Dahlia Society.

Dear Women Readers:

What the Ladies' Auxiliaries are doing for the Veterans' Associations all over the system is but an indication of how our women can be of real help in the progress of the Railroad. When the Veterans' Associations grew in membership and they decided to make real social affairs of their monthly meetings, to whom did they go for help? To that natural source—their own wives. And the wives responded, and responded nobly. And now, whenever you hear of a large, progressive chapter of Baltimore and Ohio Veterans, you may know for a certainty that it has a correspondingly large and well organized Ladies' Auxiliary behind it.

And right here it might be said as a compliment to our men that they are not slow in recognizing this fact; they realize what help the women are in planning drives, holding picnics, banquets, entertainments and all social affairs. I have yet to hear a speech made by one of the officers of any chapter in which he did not make mention of the good work done by the sisters of the Auxiliary.

And for cooperation?

At the meeting of the Grand Lodge in Baltimore in January, a Grand Body of the Ladies' Auxiliary was also formed. We asked for reports of the doings of the various chapters. Did they respond? Well, if you will take a good look at the MAGAZINES of the past two months, you will see what a fine lot of news our women have sent us. In some cases it was necessary for us to curtail the news items a bit in order to get them all in, but they're all there, and it's work of which we are justly proud.

For some time the Veterans have been engaged in a business-getting campaign. In this the Ladies' Auxiliaries have been invited to join. Thus far we have not heard much from the ladies, but we're expecting great things. In this letter I just want to remind you again that Miss Mabel Gessner is our woman passenger representative, and that she will be glad to help any of you along this line. She is located in the Passenger Traffic Department at the Baltimore and Ohio Building, Baltimore, where you may write or visit her. If you know of any prospective business, get in touch with Miss Gessner at once; if she cannot be with you, she will be glad to advise you how you may handle it.

Yours for success,

Margaret Talbot Stevens

Clever Touches to Give to the Simplest of Frocks and Suits

By Maude Hall

THERE is shown among the exceedingly pretty figured crepes a dress in the new shade called blossom, figured with little circles of Gobelin blue. The blouse is in kimono style, with short sleeves. Trimming the blouse is an applied front, with oval neck and belt cut in one. The sides are laid in plaits which form cascade draperies. The draperies are lined with blue satin, and this idea is repeated in the cascades which add grace to the skirt at either side. These draperies, however, may be omitted, leaving a plain kimono blouse and straight gathered skirt, which conform to the smartest lines laid down by Dame Fashion. Besides polka-dots, small discs and ring-effects of various sizes and arrangement, the new silks exploit designs that are chiefly of Japanese and Chinese inspiration, arranged in close all-over patterns. Cream and ecru grounds, printed in color or in black and scarlet or scarlet and green, are much liked.

The range of woolen fabrics is so narrow that the adoption of the tweed weaves makes a welcome addition to the list. One-piece frocks as well as tailleurs are fashioned of the new tweeds, which come in a pleasing variety of colors and designs. As a matter of fact, nothing exceeds in smart demand the tailored suit of tweed, because it is stylish-looking and economical. A model sponsored by Paris combines a long jacket with straight, simple lines and a two-piece gathered skirt. The fronts of the jacket are underfaced and rolled with the collar, forming long pointed revers. If preferred, however, the neck may be finished with a simple shawl collar.

White has been introduced at the fashionable resorts, both here and abroad, with such unquestioned success that no one doubts that the late Spring and Summer will be seasons of white. New fabrics show white as background for checks, stripes, plaids, field flowers, etc., while white threatens to overshadow the most attractive shades as a solid. Youthful and lovely is a frock in white kasha cloth, trimmed with cut velvet ribbon in two tones. The ribbon forms a narrow belt, which is finished at one side with a large rosette, from which hang uneven streamers. Anything that points toward the hemline this season avoids the ways of evenness and regularity. The skirt is stitched with a series of narrow folds to imitate tucks, and these folds are edged with a fine braid with picoted edge. The braid outlines the round neck and finishes the short sleeves. Ribbons are unusually beautiful and novel in effect this year. Deserving of special mention are those in variegated effect, shading from light at the center to six or seven tones darker at the edge, where they finish with a narrow fluted ribbon edge in the darker shade. Similar ribbons are shown with undulated metal borders.

Although the sleeve is generally admitted to be the pivot upon which revolves the Spring and Summer fashion figure, the low waist-line comes next in order of importance. There are so many modifications of the mode that it can be made becoming to almost anyone. Fashion offers delectable arrangements of linked girdles and tie sashes that droop below normal waist-line without actually defin-

ing a low waist-line or the exaggerated hip, and which give no emphasis to the normal waist-line. The crushed girdle and draped sash, the embroidered banding and braided belt all serve a purpose in defining the low waist. In coats a mere band of self-material frequently indicates the lowered waist-line and in suits a low-placed belt.

Organdy and handkerchief linen are used to trim frocks of serge, knit-silk, kasha cloth, etc., forming, as it were, a connecting link between the two seasons. These materials are also seen in the advance blouse models for summer, being well adapted to the drawn-work and hand-stitching that distinguishes hand-made designs.

GIRLS' ONE-PIECE DRESS No. 9741. Five sizes, 6 to 14 years. Size 8 requires 2 yards 54-inch material. Without lining, slashed and closed at center-back. Open neck finished with a round collar perforated for V-shaped neck finished with a collar which is rounded at back and pointed in front. Price, 30 cents.

A Tip

Generous Old Lady (using telephone for first time—to operator)—As you've been so nice and attentive, my dear, I'm putting an extra nickel in the box for yourself.

Lesson In Home Dressmaking

Girl's Coat with Dart-Fitted Circular Cape, Which May Be Omitted if Preferred

9294 9694

Fascinating Frocks In Canton Crepe

Canton crepe fashions both of these models, which are delightfully youthful. To the left is a dark-brown dress trimmed with self-color Georgette, which is used to line the sleeves and side draperies of the skirt. The closing is at the left side, and the front foundation gore is attached to an underbody. The outer front is laid in plaits at the waist, hanging in jabot drapery at the sides. Medium size requires $5\frac{1}{8}$ yards 36-inch crepe, with 2 yards of Georgette.

To the right is a straight-line design in black crepe, for many smart frocks are developed in crepe for the coming season. There is a high note in the girdle of bright-blue beads and metal rings, as well as in the blue-satin bands that finish the sleeves and round collar. Medium size requires $3\frac{3}{4}$ yards 40-inch black and $\frac{1}{4}$ yard 36-inch blue material.

First Model: *Pictorial Review* DRESS No. 9294. Sizes, 34 to 46 inches bust. Price, 35 cents.

Second Model: DRESS No. 9694. Sizes, 34 to 44 inches bust. Price, 35 cents.

COSTUME No. 9942. Sizes, 34 to 44 inches bust.

COSTUME No. 9950. Sizes, 16 to 20 years and 34 to 44 inches bust.

COSTUME No. 9949. Sizes, 16 to 20 years and 34 to 42 inches bust.

COSTUME No. 9991. Sizes, 34 to 44 inches bust.

COSTUME No. 9966. Sizes, 34 to 44 inches bust.

Price 35 cents each.

THERE are charming new coat models for girls under twelve, and one which features the cape now in such great demand is shown here, simplified so that the home dressmaker will have no trouble in duplicating it. Six-year size requires $2\frac{1}{8}$ yards of 54-inch serge, velours, or any other preferred material, with 3 yards of 36-inch lining.

The coat is made so that it closes at the neck with a round collar. It is trimmed with a one-piece circular cape, dart-fitted on the shoulders. If preferred, the cape may be omitted. Turn-back cuffs finish the one-piece sleeves, and there is a narrow sash of self-material, for which no particular pattern is required. Without the cape, one-half less material will be sufficient.

Follow the cutting guide closely when cutting. Place the cape, the collar and the back of the coat so that the triple "TTT" perforations will rest along the lengthwise fold of material. The front, the underfacing, sleeves and pockets are laid with large "O" perforations on a lengthwise thread.

To make the coat, first close the under-arm and shoulder seams as notched. Turn the hem at lower edge on small "o" perforations, the large "O" perforations indicating the center-front. Adjust underfacing underneath the front of the coat, with corresponding notches and edges even.

Next, close dart seam of the cape as notched, and terminate seam at the small "o" perforation. Turn hem at lower edge of cape on small "o" perforations. Arrange cape on coat with notches at neck and center-backs even. Then, face the collar and sew to neck edge as notched, with center-backs even. Arrange strap on front of coat (underneath collar) with center-fronts and upper edges even. Tack right side edge to position and finish the left for closing.

Close seams of sleeve and cuff as notched. Sew cuff to sleeve as notched, with seams even. Sew sleeve in armhole as notched, with small "o" perforation at shoulder seam. Bring seam of sleeve to underarm

seam. Ease in any fulness between the notches, or the fulness may be shrunk out. Hold the sleeve toward you when basting it in the armhole.

Adjust one pocket section to position on front of coat, matching the small "o" perforations. Stitch straight across, $\frac{1}{8}$ inch above and below the perforations, then slash between the perforations. Draw the pocket through the slash to the inside of coat. Baste and press. Sew another pocket section underneath with edges even.

Trim with buttons of the same material or of bone.

CHILD'S COAT No. 9751. Sizes, 2 to 10 years. Price, 35 cents. (*Lesson in Home Dressmaking.*)

Mostly!

"Well, Billie," said Uncle George, "how do you stand in school these days?"

"In the corner mostly," returned Billie.

9751

Three Cheers for the Prize Winners in the "Our Town" Contest!

States of Virginia, Indiana, Pennsylvania, Illinois, West Virginia, Ohio and Maryland—All Claim Prize Winners

ALL of the states named above may be justly proud of the little Baltimore and Ohio folks who live therein, for all of the little Baltimore and Ohio folks who entered the "Our Town Contest" are proud of their states and the towns in which they live.

Three months ago our Children's Page announced that prizes would be given for the best compositions and stories about the home towns in which our little folks live. Forty-four entries were sent in, thirty-nine from girls and five from boys. The girls' ages ranged from six to fourteen, so in order to give the younger ones an equal chance with the older ones, the girls were divided into two groups, separate prizes being awarded to each group. The judges were as follows: Mrs. Roger Dickens, teacher, Boy's Latin School, Baltimore; W. E. Lewes, general passenger agent and C. H. Dickson, art editor of the MAGAZINE.

Each entry was given a number, a record of which was kept at the MAGAZINE office; typewritten copies of each essay were then made, one for each of the judges. On these were written the numbers only, so that there was no way for the judges to know the names of the contestants. Each first choice was given 100 points; each second choice 75 points, and each third choice 50 points. A diagram explaining the decision in detail will appear in May issue.

The prizes offered were children's books, as follows: First prizes, books worth two dollars; second prizes, books worth a dollar and a half; third prizes, books worth one dollar.

In examining the various entries, there were a number of strange happenings; for example, Floyd Roy Abernathy's number was 13, generally supposed to be a hoodoo number, but it proved to be good luck for him who won first prize among the boys. There were two little folks named Walker who were successful contestants: Mazie Walker, of Midland City, who won second prize in Group B, and Erving Walker, Brunswick, Md., who won third prize in Group C.

It will be interesting to our little folks to know that there were twins from Bruns-

wick who entered the contest, Katherine and Margaret Harrison, whose father is an engineer.

Two of the prize winners lived on streets named for Thomas Jefferson: Viola Saltz, who lives on Jefferson Avenue, Chillicothe, Ohio, and Dorothy V. Cannon, who lives on Jefferson Street, Lexington, Va. Marjorie White, another little lady who sent a very nice paper, but who was not quite as successful, also lives on a Jefferson Avenue in Washington, Pa.

Perhaps the biggest little booster for her home town is Bernice Conklin, of Mounts-ville, W. Va. You will be glad to read her paper when it is published. Hazel Wensell was the only representative of Keyser, W. Va., and there were lots of interesting things that she told about her town. Bernice Kirkpatrick likes her town of Dover, Ohio, because of its nice, shady streets. Florence Margaret Gross, of Baltimore, tells about the games that she likes to play; Marguerite McDonald, Richmond, Staten Island, lives in a town which has hills and valleys and beautiful flowers; Gladys Shaw named seven different kinds of people who live in her town of Fairmont, W. Va.; Juanita Hastings deserves a lot of credit, for she is only six years old and the youngest one in the contest; Juanita Barnhart was the second "Juanita" to enter; she lives in Brunswick, Md. Agnes Donnelly lives at Glen Burnie, a pretty little town between Baltimore and Annapolis. She likes the annual carnivals at her town.

Minnie Loury wrote the funniest essay of all, telling us of some of the funny rhymes that she writes at school. Mildred Toms, Weston, W. Va., sent a very interesting paper, giving much of the history of her town and telling about the growth of the Baltimore and Ohio. Gertrude Wilson, Greenfield, Ohio, was the only one who sent a typewritten essay, although most of the papers were quite legible; Kathryn Hadden's paper was perhaps the neatest of the others. Beulah Hoar, Brunswick, sent in a newsy little letter; Louise Barker, Glendale, Ohio, wrote a lovely description of her town. Mildred Bauman's letter was just full of the history

of her town, Somerset; she told also of the home-building club of Railroad employees. Marjorie White's town, Washington, Pa., has a burgess, instead of a mayor as most of our towns do. Lenore Taylor wrote an interesting little tale about how the town of Aiken, Md., got its name. Kathryn Colling's description of Newark, Ohio, was much better than I have seen from many grown people. Sarah Pennington was the first person to send in her essay; she, too, has a pleasant little story of how the people gather up the coal that falls from the trains.

Ethel Gardiner took each suggestion given in the MAGAZINE and discussed it separately, thus making a well-connected essay; her town is Baltimore, Md. Mildred E. Dixon is another little girl from Weston; she told the famous story of the "Chicken House." Dorothy Witt, of South Connells-ville, and Esther V. Richter, Roslyn, Md., are two little contestants who are eight years old. Viola Saltz is but seven. All three of these wrote fine papers. Dorothea Taxis told of the great fire in Baltimore. Most unusual was the story written by Grace Shawen, Baltimore, Md., who told of how an old, homely piece of property was built up into a lovely place. Gale Schachte tells us many, many interesting things about her town of Mt. Pleasant, Pa.

This contest is only an example of what our little Baltimore and Ohio girls and boys can do. They have showed us before, in their responses to requests that they contribute to our Children's Page. We expect to hear from all of them as time goes on, and to add many new names to our fast growing list of children contributors. We only wish that each of the contestants

FIRST PRIZE WINNERS

1. Dorothy V., daughter of Engineer W. T. Cannon, Lexington, Va. 2. Gertrude, daughter of Machinist T. H. Cassell, Morgantown, W. Va. 3. Floyd Roy, son of Agent F. R. Abernathy, Lebanon, Ill. 4. Mary Edwin, daughter of Superintendent Transportation J. D. Clarke, Baltimore, Md.

might have received a prize. However, we hope to have other contests in the future, so that all of these and many others may have another chance. The compositions—all of them—were exceptionally good, and

we expect to use each one, in turn, in the MAGAZINE. We thank every one of the forty-four contestants.

Hurrah for our Baltimore and Ohio girls and boys!

The Home of Two Great Generals

By Dorothy V. Cannon,

Twelve Year Old Daughter of Engineer, Lexington Va.

First Prize, Class A (tie)

LEXINGTON is a pretty little town in the valley of Virginia, not far from the north branch of the James River. It is at the end of the Valley Branch of the Baltimore and Ohio Railroad and fourteen miles from Natural Bridge. The population of the town is about 4,500.

There are few towns that have so much history as the little town of Lexington. It was once the home of the two great Southern generals, Robert E. Lee and Thomas J. Jackson.

General Robert E. Lee was born in 1807. He was president of Washington and Lee College. He made himself famous in the Civil War. When he died in 1870, he gave his home to the people of Lexington for the president of Washington and Lee College to live in.

Thomas J. Jackson, better known as "Stonewall" Jackson, was born in 1824. We all know him through history. When he died in 1863, he gave his home to the people of Lexington to be used as a hospital. It has been a great benefit to the people of our town. There are two great monuments here that were erected in memory of these two generals. Lee's is in the chapel, and Jackson's is in the cemetery.

Washington and Lee University was founded in 1803. It is a school for young men. Not only Americans but young men of other nations go to school here.

Virginia Military Institute is another popular school for young men. They drill every Wednesday and Saturday. It is very interesting. They take long hikes and go by singing and whistling. They seem very healthy and happy.

Indianapolis, the Home of Literature

By Mary E. Clark,

Thirteen Year Old Daughter of Superintendent of Transportation, Baltimore, Md.

First Prize, Class A (tie)

"NO mean place," is what former President Benjamin Harrison said about my Home Town, Indianapolis, Indiana.

I do not live in Indianapolis now, but I was born there, and spent the first five years of my life there. I never forget Indianapolis, though, for every summer, during a part of my summer vacation, I make a visit to the home folks.

Indianapolis is what is called a "Mid-western city." It is very flat, and also very dry, meaning, of course, that it is near no large body of water.

House Mountain is near Lexington. It is a beautiful view from here. This is a story of it:

The Giant of House Mountain

There was once a boy and girl, whose names were Lars and Mary, and who lived in Lexington. They were tired of being told to do things so they decided that they would go where they might eat licorice all of the time and do nothing. At Licorice Town they were very happy, but they soon grew tired of it. So one day they went up to visit the Giant of House Mountain.

They crept into the house and got into one of the giant's gloves. The giant came in and called out in a coarse voice, "Who's in my gloves?"

Timidly Lars and Mary told him that they were sorry, but that they had thought that his gloves were houses. Then the giant laughed and said that he was glad that they had come. They could help him get ready for his party.

Then the giant took a big spoon and began to stir the clouds.

"Giant," asked Lars, "what are you doing that for?"

"I am making ice cream pudding," said the giant.

Then Lars and Mary and the giant invited all of the people of Lexington to the party. They had a lovely time, and after it was all over they went home.

And to this day, when you hear a rumbling of the clouds around House Mountain, you may look up and see the clouds piling up. Then you know that the giant is making ice cream pudding and that he is getting ready for a party.

Quite a number of well-known authors have lived in or near Indianapolis. One whom I am quite sure you will remember is James Whitcomb Riley, whose "Little Orphan Annie" and "The Old Swimmin' Hole" have their places in the hearts of all young Americans. Other well known authors are:

Booth Tarkington, whose Penrod stories are enjoyed by girls as well as boys, and Meredith Nicholson, whose books are more interesting for grown-up folks than for children. There is also George Ade, whose "Fables" are full of homely truth. Here

SECOND PRIZE WINNERS

1. Helen May, daughter of Fireman E. E. Leslie, Pittsburgh, Pa. 2. Mazie M., daughter of Bridge Inspector Nate Walker, Midland, Ohio. 3. James Ralph, Jr., son of Machinist J. R. King, Mt. Clare Shops, Baltimore, Md. 4. Lena Jane, daughter of Operator Fred Reis, Deer Park, Md.

we would not forget to add the name of the famous Kin Hubbard, whose "Abe Martins" fill our daily papers with a quaint humor. And these are not all, for my town can boast of many others, quite enough, in fact, to give it the name of "literary center."

There are many interesting landmarks in my town. If you should ever go there, be sure to see the beautiful "Sunken Gardens" of Garfield Park, which takes its name from President Garfield.

Perhaps the first thing to catch your eye on entering the city is the Soldiers' and Sailors' Monument, which was erected as a memorial to the soldiers and sailors of Indiana who fought in the Civil War. It is said to be the most beautiful monument of its kind ever erected.

Indianapolis is the largest inter-urban center in the country. Baltimore has no such lines except that of the Washington, Baltimore and Annapolis, which is, in a way, similar to the Interurban. This line has also a two-and-a-half-mile speedway, where automobile races of international interest are held annually.

My Home Town covers an area of the same number of square miles as does Baltimore, but it is not nearly so densely populated. There they know nothing of "row houses," because all of their homes have yards surrounding, except, of course, the apartment houses, of which there are a great many.

While our Baltimore and Ohio Railroad does not run into Indianapolis, the town is a great railway center, and if any of you ever happen to visit there, drop me a card and let me know how you like My Home Town.

THIRD PRIZE WINNERS

1. William H., son of Machinist W. A. Kiefer, Mt. Clare Shops, Baltimore, Md. 2. Viola Anna, daughter of Laborer Oscar Saltz, Chillicothe, Ohio. 3. Emma Cole, daughter of Chief Engineer of Maintenance Earl Stimson, Baltimore, Md.

MORE OF OUR LITTLE BALTIMORE AND OHIO PEOPLE WHO ENTERED THE CONTEST

1 and 2. Margaret and Katharine, daughters of Engineer Harrison, Brunswick, Md. 3. Mildred Erma, daughter of Conductor Martin Bauman, Somerset, Pa. 4. Marguerite Marie, daughter of Signal Maintainer Joseph W. McDonald, Richmond, Staten Island, N. Y. 5. Mary Bernice, daughter of Boilermaker Linns E. Conklin, Moundsville, W. Va. 6. Agnes, daughter of Fireman D. P. Donnelly, Glen Burnie, Md. 7. Esther V., daughter of Accountant Righter, Roslyn, Md. 8. Bernice Stella, daughter of Machinist G. C. Kirkpatrick, Dover, Ohio. 9. Grace Louise, daughter of Telegrapher W. M. Shawen, Baltimore, Md. 10. Sarah Frances, daughter of Crossing Watchman P. M. Pennington, Cumberland, Md. 11. Louise, daughter of Storekeeper T. H. Barker, Ivorydale, Ohio. 12. Kathryn, daughter of Boilermaker William Colling, Newark, Ohio. 13. Dorothy, daughter of Brakeman Samuel Witt, South Connellsville, Pa. 14. Marjorie Lura White, niece of cashier, Freight Office, Washington, Pa. 15. Our youngest contestant—Juanita, little daughter of Conductor R. E. Hastings, South Connellsville, Pa. 16. Florence Margaret Gross, sister of clerk, Car Service Department, Baltimore, Md. 17. Gertrude, daughter of Joint Agent W. Wilson, Greenfield, Ohio. 18. Gladys Helen, daughter of C. Shaw, miner, Fairmont, W. Va. 19. Hazel C., daughter of Conductor E. L. Wensell, Keyser, W. Va. 20. Minnie Loury, daughter of Sullivan Lauretano, Kent, Ohio. 21. Beulah Virginia, daughter of Conductor James W. Hoar, Brunswick, Md. 22. Juanita Mildred, daughter of Engineer P. W. Toms, Weston, W. Va. 23. Ga'e, daughter of Brakeman A. Schachte, Mt. Pleasant, Pa.

Do You Like the Name of Morgantown?

By Gertrude Cassell.

Nine Year Old Daughter of Machinist, Morgantown, W. Va.

First Prize, Class B

DON'T you like the name of Morgantown? I do, for it is the name of my home town. It was named after a fine old settler named Zachariah Morgan, more than 130 years ago. From that time our town has grown so that now we have a population of 15,000 people.

We are proud to boast that the Father of His Country, George Washington, spent a night here during his march through West Virginia, on what is now known as the Hille Farm.

From the top of each of the five hills may be seen our town, which is situated on the blue-green waters of the Monongahela River.

There are so many advantages and industries in our town that these should attract people to locate here. I like to live here because it is a nice place to get a good education. We have nine schools, one high school, and the only university in the state, with the most competent teachers that can be found anywhere.

The surroundings of the state buildings take the place of a beautiful park, which, I am sorry to say, we lack.

The most attractive thing we have is the girls' new dormitory which overlooks our town. It is really a beautiful picture.

It would take too much space to tell of all the industries, but I shall name the most important:

Eleven glass factories, including the Pressed Prism Plate, the only one of its kind in the world. Products from here are sent to the four corners of the earth. The General Woodworking Company, the Quality Cement Company, Morgantown Brick Company, Sabraton plants of the American Sheet and Tin Plate Company are all located here. The last named has an annual payroll of \$2,000,000.

Our town has the richest coal region of the state, having three Pittsburgh runs, also Lewickly and Redstone Coal.

In machinery and mining manufactures are the following:

The Chrisman Foundry and Machine Company, the Jackson and McGraw Machine Company, the Rosemset Machine Company. Last, but not least, come the Baltimore and Ohio Machine Shops, formerly known as the Morgantown and Kingwood shops, where my papa works every day. We have four railroads coming in here.

There is no excuse for one's not going to church in my town, for we have sixteen churches, of all denominations.

To add to the beauty of our town we need one more building—a Baltimore and Ohio Passenger Station, where every day hundreds of people leave to travel over the Baltimore and Ohio System.

HONORABLE MENTION

1. Cathrine, daughter of Conductor W. E. Hadden, Dover, Ohio. 2. Pearl Marion, daughter of Pile Driver Engineer Daniel Reimsnyder, Dorsey, Md. 3. Ethel P., daughter of Electrician J. W. Gardiner, Baltimore, Md. 4. Mildred Eunice, daughter of Master Mechanic W. J. Dixon, Weston, W. Va. 5. Lenore, daughter of Operator W. L. Taylor, Aiken, Md. 6. Howard Warren, son of Warehouseman William Deering, Camden Station, Baltimore, Md.

The First Town to Elect Women on Its School Board

By Floyd Roy Abernathy

Ten Year Old Son of Agent, Lebanon, Illinois

First Prize, Class C

I LIVE in the beautiful little town of Lebanon, Illinois. If you will look out of the car window you may see it located on the hill to the north. Lebanon has about 2000 inhabitants. The railroad was first owned by the O. & M., about seventy-five years ago.

Here is located one of the oldest colleges

in the West—McKendree College. Many great and learned men were graduated from here; among them were Governor Deneen, Ex-Senator L. Y. Sherman, Dr. Benjamin Hypes and many others. The people of the town are very proud of their college. They have just collected almost a million dollars for funds.

We have seven churches in our town, an eight grade public school, and we are now building an eighty thousand dollar community high school.

Lebanon was among the first to elect women on its school board. My mother and a leader in my Sunday school were elected last Spring.

We have fine farm lands around here. There are also pit mines from 300 feet to 1200 feet deep. We also have a large flour mill. Near us there is Scott Field, where they have an airplane and balloon school.

Dear Girls and Boys:

More of the prize-winning stories will be published in the May Magazine. Look out for them.

I'd like to have more poems about vacation, games, flowers, birds, summer, etc., for the June issue. Send in your contributions by May 15.

Your lovingly,

Aunt Mary

Aunt Mary,
Baltimore and Ohio Magazine,
Mt. Royal Station, Baltimore, Maryland.

The Autobiography of a Lead Pencil

By Ernestine Wolfe,
Charleston, W. Va.

I AM only a stubby little lead pencil, but once upon a time I was as long as the best and the newest of you. I was not battered as I am now, but fresh and new, with a nice little rubber cap on my head. But my owner was often hungry, so he chewed and chewed upon the rubber until it disappeared.

I had a name, too. It was "Dixon M," printed in fine gilt letters on my side; but the name can scarcely be deciphered now. Perhaps you'd like to hear my story.

Well, one fine morning I was having a comfortable though rather dull time, lying on a shelf in Moore's Book Store, when in came a boy to buy a pencil. By luck I was given to him.

He slipped me under the strap which held his books and started off. I soon found that my companions were an algebra, a history, and an English book. In a few minutes we entered a room, which I soon discovered to be the school room.

My owner and I have learned lots and have had lots of fun. Twice a day we have climbed up long flights of stairs and around halls until I became dizzy. Once or twice the teacher caught another pencil and me writing notes, but she always blamed the boy, so it did not worry me much.

Those happy days are over. I am now thrust into the bottom of a deep, dark pocket with a knife, a top, a piece of string, and some marbles. My master has a brand new pencil now; he said his reason for getting it was because he is going to have examinations.

Safety Roll of Honor

Baltimore Terminal

During the forepart of March, Joseph Turner, conductor, Camden Yard, while off duty, saw some property which he recognized as belonging to the Company, being taken off by unauthorized persons. He reported the matter and the property was recovered.

Every penny that is lost as material like this sometimes is, means cutting down of the Company's resources, which often results in a curtailment of working forces. Men who have the same interest as Mr. Turner therefore do double duty when they act as above described—they help their fellows and their employer.

Baltimore Division

On January 5, when No. 508 was delayed at Newark, Del., the work of closing off steam and plugging pipe was done entirely by Fireman J. F. Hook with the assistance of Engineer J. L. Edenfield, who were dead-heading on Train No. 508 at the time.

While going to work on the night of January 6, Operator F. W. McEwing found large stone on inside of rail on westbound track in middle of cut. He had it removed and bridge watchman at that point notified.

On January 24, extra east, engine 4002, with train of 63 loaded cars, in charge of Engineer J. D. Drenner, Conductor B. B. Watts, Fireman G. B. Morsberger and Front Brakeman A. G. Hicks, derailed tank of engine and ten following cars, blocking Nos. 1 and 2 tracks. Brakeman A. G. Hicks was slightly injured. As soon as Brakeman Hicks got on ground, engineer called to him to look out for No. 47. Hicks, knowing he was without lamps, called to Morsberger to throw him fusee. Morsberger extricated himself from coal in tank, reached for fusee and threw it to Hicks. Hicks succeeded in lighting fusee and gave stop signal to No. 47, which was recognized promptly by engineer of that train and train brought to a stop 30 feet from first car obstructing No. 1 track.

About 10.05 a. m. on February 12, Fireman W. E. Jamison found some boys with a hand car on the main track at 63rd Street Bridge, Philadelphia. He secured the assistance of two city police officers and removed the hand car from the track just in time to clear for No. 505. Had this hand car not been noticed by Fireman Jamison, it would have delayed No. 505; and by this action, he averted a possible accident.

When No. 88 passed tower at Silver Side, about 1.20 p. m. on February 21, Operator H. W. Alrich noticed a steel rail, or girder, protruding from a car of contractor's material. This load was on a car near the middle of the train and had shifted badly. The train dispatcher was notified and train stopped at Chester. Car was set off at Eddystone and moved to East Side for adjustment of load. Operator Alrich has been commended for his close observance of passing equipment and prevention of an accident.

On the morning of March 3, as Operator C. W. Proctor was going to work on his

motor car and riding over switch point leading into station siding at Bradshaw, the wheel of the motor made a peculiar swerve and gauge seemed tight. Proctor stopped, went back and examined the switch and found point open about one-fourth inch. Further examination developed that the switch stand was broken. Word was sent to train dispatcher who arranged for section foreman to look after the switch.

F. M. Moon

On the afternoon of February 28, Foreman W. Callery, of Section 4, Belt Line, was inspecting switches at east end of Howard Street Tunnel. He found eighteen inches of flange at the switch leading from No. 2 to No. 4 Track. He reported the matter immediately to "DO" Office and the wheel with broken flange was found in train at Aikin, where the car was cut out.

Cumberland Division

On March 22, Frank Seeders, track walker, Section No. 24-A, Dans Run, noticed train No. 8 stop at automatic signal west of Dans Run Station about 6 o'clock a. m. Being familiar with these signals, Mr. Seeders went at once to locate trouble. He found a broken rail on No. 4 track, made temporary repairs and notified foreman. Mr. Seeders was not on duty at this time.

On March 6, Mr. Walter L. Taylor, employed as a miner, while walking from Rowlesburg to Tunnelton, when near Buckhorn on Cheat River Grade, discovered a large rock on track. He flagged No. 54, then due, and informed the crew of the obstruction.

Mr. Taylor's prompt action in handling the matter is appreciated.

While on way home from work on March 6, at a point one mile and a half west of Green Spring, Signalmen H. P. Logsdon and J. T. Duvall, and Operator C. P. Houck discovered fire burning along right of way around three telegraph poles. They succeeded in extinguishing the fire before damage was done.

Their prompt action in the matter saved damage and interruption to the line.

Connellsville Division

The accompanying photograph is of Track Walker F. M. Moon, who is employed on Section 24, Connellsville Division. On the morning of March 4, Mr. Moon while patrolling track just west of Bidwell, discovered a broken rail and immediately notified his foreman, who arranged for necessary repairs. Weather conditions on this date were bad.

Mr. Moon has on several occasions proved his loyalty to the Company by paying particular attention to the condition of our right of way, and has discovered and reported quite a few broken rails, his prompt action probably preventing derailments. Mr. Moon has been in the service for fifteen years.

On February 20, Operator N. M. Harclerode, Hyndman, Pa., while on his way home from work, discovered a piece of iron wedged in switch point, also some rock lying across track in cut just east of Fairhope. This was removed by Operator Harclerode and the matter reported to the train dispatcher.

At 4.20 p. m. on March 9, Operator W. E. Cupp, while on his way to work at Oriental, discovered about one foot broken out of rail on No. 2 track, about 600 yards east of Oriental. He immediately called section foreman, who renewed rail.

Pittsburgh Division

On February 21, engines 2315 and 2357 took siding at Duvall for No. 76. When pulling into the siding, Brakeman Roy Sloan, who was riding the head end, dropped off the train on the left side, and while the train passed him was on the alert for defects. His vigilance was rewarded by the

Operator W. E. Cupp

finding of a broken arch bar on C. & O. 7897, which he immediately reported to his conductor, C. M. Brown.

Both Conductor Brown and Brakeman Sloan looked the car over very carefully and decided it was safe to haul the car, if handled carefully, to some point where it could be set off and proper repairs made. Conductor Brown instructed engineman in charge of his train to handle it carefully from Duvall to Forgies siding, about one mile west of Washington. This was done and the car set off.

Charleston Division

The following employees and residents of our division have been thanked and commended for reporting unsafe conditions:

J. A. Groves, Orlando, recently found a broken rail which he reported by flagging No. 61.

Conductor H. E. Bailes, Flagman C. E. Thompson, Engineers A. Kibbe and W. P. Paxton, Firemen J. A. Buckner and R. E. Murphy, for finding a slide, which they cleared without delay.

Conductor B. E. Jeffries, for close observation and careful attention to duty.

Mr. A. G. Cooper, of Emmart, for finding and reporting broken angle bars in main track near Walkersville.

Mr. Guy McNeamer, of Copen, for finding a pile of rock on the main line near Copen, which he reported promptly to our agent; Mr. D. W. Singleton, of Gilmer, for reporting a broken switch near there.

Engineer G. F. Purkey for volunteer flagging done on his own time, at a slide, averting serious delays to trains; Baggage-man Hall, for clearing a slide.

Conductor H. B. McLaughlin for signal assistance rendered in clearing a number of slides and thereby averting serious delays to trains.

Flagman G. C. Sands for finding and reporting a broken rail.

Mr. Frank Hosey, of Centralia, for finding a broken rail, and reporting the condition to our agent.

Foremen D. F. McCord, S. Eden, W. W. Squires, W. W. McCord, S. M. Cochran, Burley King, A. W. Henline, E. Heater, for picking up good material on their sections, and forwarding it to the storekeeper, thereby assisting in our economy campaign; Engineers J. Daugherty and W. P. Paxton for picking up good material on line and bringing into shops.

Machinists D. R. Barrett and C. F. Beatty, of Gassaway shops, for close inspection of locomotives resulting in finding defective conditions and averting possible accidents.

Conductors Harmon, Fansler, Coger, Brake and H. E. Bragg for close observation and bringing hot boxes into terminals, avoiding delay and expense.

Agent O. M. Gross, Villa Nova, and J. A. Fisher, Weston, for securing long haul for the Baltimore and Ohio on prospective shipments.

Conductor R. Shelton for close observation and for his efforts to conserve the Company's revenue.

Engineer R. N. Jeffries, one of our safety committeemen, Fireman E. M. Arbogast and Brakeman S. N. Fury for close observation in handling car with hot box; Conductor C. A. Barrett and Brakeman D. Payne for the same kind of service; Conductor P. J. Condry for close inspection of

his train, resulting in finding broken "U" bolt under coach.

Conductors H. B. McLaughlin, R. R. Milles; Engineers G. F. Purkey, J. P. Poling; Firemen R. E. Murphy, B. H. Paxton; Flagmen H. G. Northcraft, M. G. Ballard; Brakemen C. C. Cogerm, J. R. Fox, and A. M. Carpenter; for assistance in clearing slides and obstructions to traffic.

Engineers M. T. Hall and J. M. Williams; Conductor R. Roush, Firemen D. G. Stewart and G. L. Nicholas, and Brakeman F. Reese for assistance rendered in clearing slides and rock falls.

The following engineers have been commended for making over 100 per cent. fuel performance in February:

W. T. Spencer, H. Robinson, Hefner, Powell, Hoover, L. R. Shomo, Whitecotton, R. E. Smith and Hoffman.

Keep Your House Clean and In Good Order.

Cincinnati Terminals

On February 17, Charles E. Fisher, switchman, averted what might have been a serious accident. As No. 85, engine 1461, was leaving Hopple Street, Mr. Fisher discovered a broken spring on tank of the engine. He notified the engineer, who stopped the engine at Stock Yards Round House, and had the necessary repairs made. Switchman Fisher deserves much credit for his close observance.

Newark Division

On March 6, Section Foreman George W. Forbes noticed brake rigging dragging on car in No. 85 just west of Pleasant Valley. He stopped train and had brake rigging removed with no damage to track or equipment.

On February 11, Signal Maintainer O. F. Flippo, Mt. Vernon, Ohio, found a piece of flange ten inches long lying along the right of way. Train 93 had just pulled in the siding and Mr. Flippo surmised that the wheel from which the flange had broken was in 93's train. He immediately reported the discovery to the operator at Mt. Vernon, who was able to get train 93 before train pulled out of siding. Train crew examined wheels in train, found the car and set it off at Mt. Vernon. The prompt action of Mr. Flippo probably averted an accident and he has been commended by Superintendent Kruse for his alertness and prompt action in this matter.

New Castle Division

Superintendent D. F. Stevens has written each of the following employees a letter of appreciation and placed a commendatory entry on the record of each.

Freight Conductor M. Lewis, while in charge of extra west, engine 4224, discovered broken tread on wheel of G. T. car 72942, and had the car set off train without damage, thus averting possible accident.

On March 7, as extra east, engine 4064, was pulling out of the yard at Ohio Junction, Freight Brakeman T. F. Johnson noticed something lying on the eastbound main track. He immediately notified the operator, who, upon investigation, found a brake beam lying directly across the rail.

While inspecting his train at Akron Junction, February 18, Freight Conductor J. C. Stoner discovered broken flange on Baltimore and Ohio Car 150999. He had car set out without any damage.

Operator N. H. Shriver noticed something dragging in train No. 14 while passing F. S. Tower on February 11. He notified

operator at Newton Falls. Train was stopped and examination made. Brake rigging was found dragging on car, which created dangerous condition in this high class train. The interest displayed by Mr. Shriver in the safe operation of trains, removed the possibility of a serious accident.

On March 11, Brakeman C. E. Hertle, while off duty, was walking along track No. 3 in Warwick Yard, and discovered a broken rail, which he promptly reported to the yardmaster. Trackmen were notified and the defect remedied.

Mr. W. G. Marty, an employe of the McKone Rubber Co., Millersburg, Ohio, while walking along our tracks on March 16, discovered a badly broken rail. He immediately notified the operator who reported the matter to trackmen who removed the broken rail.

Mr. Marty's action is highly appreciated by the officers of the Baltimore and Ohio. Superintendent Stevens has written him a letter expressing his personal appreciation for his close observance and interest in the safe operation of trains.

Cleveland Division

On March 11, Section Foreman A. Bonacci discovered brake beam dragging on C. N. car 138644, in train of extra west, engine 2830. He immediately flagged this train and assisted in removing the beam. His careful observance no doubt averted an accident.

On March 16, while extra east, engine 4271, passed about a half mile west of Crystal Springs, Section Foreman F. Rose noticed a pair of wheels on Baltimore and Ohio car 140417 derailed and running on ties. He immediately signaled to one of the members of the crew and had train stopped. The car was causing considerable damage to the track and if it had not been for Mr. Rose's close observance, there probably would have been a great deal more damage done.

The following employes of the Cleveland Division, have been commended for watchfulness in the performance of their duties:

B. F. Akers, agent, Tippecanoe City, Ohio, for observing eight inches broken out of rail between West Switch Station siding and Bridge 16, Tippecanoe City. He immediately reported observance to dispatcher, called section foreman, then went back and flagged three extras.

F. McCormick, assistant agent, Brooklyn, Ohio, for finding 18 inches broken off from top rail of train No. 41. He immediately notified the dispatcher and arranged for No. 42 and other trains to use the Brooklyn Siding.

J. A. Smith, third trick operator, Keyser, W. Va., for discovering 15 inch piece of flange on No. 2 track just west of Main Street crossing. He immediately got in touch with the operator at Terra Alta who arranged to have cars set off at Piedmont.

On March 21, Operator C. W. Summers, Seville, Ohio, discovered a lug broken off of switch point at end of double track at Seville, Ohio, and made immediate report of same to section foreman who had necessary repairs made. He has been commended by the superintendent.

Chicago Terminal

Section Foreman E. F. Cuddigan noticed a brake beam dragging when C. M. & St. P. extra 688 was passing on February 10 at 11 a. m. He flagged train and averted a possible accident.

Chicago Terminal

CHICAGO, ILL., February 10, 1922.

A copy of the following letter, written by Superintendent DeVeney, was sent to both C. J. Thompson, switchman, and A. N. Parsley, switchmen, Lincoln Street:

"My attention has recently been called to your alertness in stopping a run-away engine off the ready track at Lincoln Street.

"There is no way by which the value of your service can be measured in that particular instance. We have all reason to believe, however, that the destruction of Company's property and damage prevented by you is great if considered only in the least. Furthermore, your demonstration of loyalty and alertness above all, is commendable in the highest degree and I, therefore, desire to extend to you my appreciation by this letter of commendation."

CHICAGO, ILL., March 2, 1922.

MR. JOE AQUINO, Section Foreman, Chicago Ridge, Ill.

Dear Sir—I am much pleased to know that on January 30, you notified the crew on Indiana Harbor Belt, extra east, engine 255, of a brake beam dragging on one of the cars in the train.

General Superintendent J. W. Smith, of the Indiana Harbor Belt, has expressed his appreciation of your diligence and prompt action in the case.

We are always pleased to know that our foremen are doing what is necessary to promote the interests of the Company.

Yours truly,
(Signed) G. P. PALMER,

Engineer Maintenance and Construction

On February 10, at 11 a. m., Section Foreman E. F. Cuddigan noticed a brake beam dragging when C. M. & St. P. Extra 688 was passing; he flagged the train and averted a possible accident.

Ohio Division

On February 27, after extra 2247 west passed Scioto Furnace, Ohio, T. J. Lewis, section foreman, noticed marks on rail, indicating broken flange. He reported this to operator at Bloom Junction, who notified conductor of this train at Gepharts, Ohio, where they were in siding to meet No. 54. Conductor examined train and found about twelve inches broken out of flange. Car was set off and undoubtedly accident averted by Mr. Lewis' watchfulness. He has been commended.

Toledo Division

While extra 4301 north, on the morning of February 15, was going into Piqua Crossing, slowing down for the block at that point, Flagman J. A. Stoll, looking his train over from the rear platform, noticed a tank of oil ahead of the caboose somewhat out of line and immediately called Conductor Charles Galvin's attention to it. Galvin got over on the car at once, found a broken arch bar, applied air and stopped his train. He notified his engineer to pull down very slowly, in order to get car into clear if possible. The finding of this broken arch bar south of the switches and interlocking plant over the Penna. Lines crossing at Piqua Crossing, averted a bad derailment and loss from heavy damages to equipment and track as well as the possible blocking of traffic over both lines.

Webb C. Ball Was Best Known Time Inspector in the United States

MR. Webb C. Ball died on March 7 at his home in Cleveland, Ohio at the age of seventy-five. He had charge of time inspection on The Baltimore and Ohio and many other lines, and was widely known throughout the United States

The late Webb C. Ball

x Indicates cars set off

among railroad officials and employees generally.

In 1911 he established the Webb C. Ball Company in Cleveland, and in August, 1918, he and others incorporated the Official Bureau of Railroad Time Service.

Mr. Ball was born on a farm in Knox County, Ohio, and started as an apprentice at \$1.00 per week. After ten years as a jeweler elsewhere, he established his business in Cleveland, where he remained until his death.

In 1879 he married Miss Florence I. Young, of Kenton, Ohio. Besides his widow, he leaves three daughters and a son.

He was a charter member of the Cleveland Chamber of Commerce.

Mr. Ball was possessed of a pleasing personality, which made him many friends, all of whom will regret his passing.

Fairmont Veterans Hold Oyster Supper

By Mrs. Harry Fleming

A FINE oyster supper, followed by an informal program of various stunts, including music and oratory, was a big feature of the February meeting of the Veterans' Association of Fairmont.

The supper was served at 6.30 o'clock. There were about one hundred seated at the tables. Large bowls of sweet peas were used as decorations.

Following the supper came the business meeting of the organization, after which the evening's entertainment began. Grand Vice President and Mrs. Garvey were the honored guests. Other out of town visitors included Mr. and Mrs. George E. Stewart, of Grafton, and Trainmaster and Mrs. Ernest Bartlett. The business meeting was presided over by J. F. Shafferman, president of the local association.

Short speeches were made by Mr. Garvey; Mr. L. D. Snider, chief of police of Fairmont; and "Tom" Shields, of Grafton, who represented the penny profit store proposition.

Louise, daughter of Mr. and Mrs. Harry Fletcher, played a violin solo, accompanied by Naomi Heffner, pianist. There were also piano duets by Mrs. Warden Tutt and her daughter, Dorothy.

The supper was in charge of Mrs. George Swisher, vice president of the Ladies' Auxiliary, assisted by Mrs. Harry Fleming, Mrs. J. H. Downey, Mrs. Jessie Nuzum, Mrs. Harry Fletcher, Mrs. Frank Grimes, Mrs. Walter Wrick, and a number of other ladies, to whom much credit is due.

The thanks of the Association and of the Auxiliary are extended to the Kelly Music Stores for the use of a victrola, and to Webber's for the floral contribution.

Every monthly meeting of the Veterans and their wives seems to bring forth some new means of entertainment. We are forging ahead in our work and we are going to accomplish great things in the near future. Watch us grow.

Among Ourselves

Baltimore and Ohio and Baltimore and Ohio Annex Buildings

Law Department

Correspondent, GEORGE W. HAULENBECK

The Death of Mr. Bond

The death of our General Counsel, Mr. Hugh Lennox Bond, Jr., occurring on the eleventh of April, enveloped the department in melancholy and sadness. Mr. Bond's office door was ever ajar to any of the clerks who wished to consult him. He was one of the few officials with whom I have come in contact who was never disturbed by an interruption when giving dictation and could resume without any effort at the very point where the dictation was delayed.

The day I was seventy, I told Mr. Bond I did not wish to be pensioned and he responded, "Haulenbeck, as long as you are able to sit up you will not be disturbed and when you cannot sit up, you will ask for retirement."

John K. Cowen died April 25, 1904; Judge Cross on May 2, 1906, and now our Mr. Bond on April eleventh. Three grand good men.

The Death of Clinton Swearer

Clinton Swearer, Secretary to H. R. Preston, general solicitor, dropped dead on April 12, 1922. Mr. Swearer joined the Law Department forces July 13, 1903. He was a competent stenographer and a faithful and efficient employe.

David A. J. Peck

Years ago, when the custom prevailed of paying Baltimore and Ohio employes from the pay car, even in Baltimore City, David A. J. Peck served in the capacity of paymaster. He was very popular. Gloom and ennui did not enter into his composition. His smile was contagious and his popularity extended everywhere. Besides, he was a most efficient officer of the Company. He died on November 13, 1921, after forty years of faithful service.

When Major Peck was pensioned, Vice President Thompson wrote him a personal letter, expressing appreciation of his long and faithful service. Mr. Thompson added that though he was retired, he would be considered an employe of the railroad company, sharing with the management in the success and prosperity of the railroad that he had helped to bring about. This letter is highly prized by the family.

James A. C. Bond

Judge James A. C. Bond, who, with his partner, Mr. Francis Neal Parke, represents the Baltimore and Ohio Railroad in legal matters, principally in Westminster, Maryland, is always a welcome visitor in the Law Department. Indeed Judge Bond and Mr. Parke are both welcome, but it is to the senior counsel that I refer now.

He has served the Company as counsel in seven counties in Maryland for forty nine years, and the record of his firm is at the top notch. If any one in the office here should happen to strike a temperamental streak, the presence of Judge Bond with his perennial smile, dispels it immediately. The point I wish to dwell on is his length of service as Counsel. Forty-nine years is a period to be proud of.

Fort E. Wilson

Then there is another veteran of whom I would speak, a man who served the Company for a good many years and who was pensioned with a perfect record. He was 73 years of age on March 19. I refer to my friend, Fort E. Wilson.

Clarence W. Egan

Before my space is exhausted, I wish to remark that the General Claim Agent's Office on the sixth floor, presided over by C. W. Egan and his assistants, Charles C. Peery and H. L. Stires, does a lot of valuable work for the Company and it is all accomplished without ostentation. They make no vain display, but proceed to settle cases that would be troublesome, vexatious and costly. The General Claim Agent's Office is a part of the Law Department, and its work is appreciated.

Helping Mother

"Because a young lady is easily swept off her feet is no reason why she shouldn't help Mother around the house."

At Seventy

"Many a man stays young at seventy, laughing at the old folks of twenty."

The Ladies

We have a lot of real bright girls in our service, here in this big building and in our annex. During the Income Tax campaign in March I met ever so many of them. I noted their manner of signing and their conduct generally; but there was one—now listen—one that possessed several good qualifications. She was modest and refined, and I was much pleased.

All of the young ladies executed their papers with a full degree of intelligence,

but this young lady to whom I refer was among the best. I decline to give her name. She resides in Baltimore County and uses a trolley every day, and I am pained to observe that she does not always possess a seat.

Engineering Department

Correspondent, OSWALD K. EDEN

Charles Milton Fleagle

(Died of double pneumonia, February 26, 1922.)

Charles Milton Fleagle was born in Baltimore on October 10, 1889. He received his early education at the public schools. On April 1, 1908, he entered the employ of the Company as blue-printer. He held that position for a little over a year, when in October, 1909, he was made file clerk of the drafting room, which position he held until his untimely death on February 26.

"Jits," as he was called by his friends—and he had a host of them—was an ideal man for the position he held. Of a genial, unselfish disposition, and with an ability to keep calm in the performance of his duty when all around him were excited, he was known as an unusually efficient and pleasant employe throughout the building.

In 1920 his wife, who was formerly Miss Gretta McGinnis, died. After her death he lived with her parents. It was at their home he was taken ill and died.

At his funeral there was gathered a large number of his friends, business associates and relatives, who had come to pay the last homage they could. The funeral service was held at his home, interment at Mt. Olivet Cemetery. The pallbearers were all co-workers of his from the Office of Office Engineer. Our heartfelt sympathies are extended to his relatives in their latest bereavement.

Baseball has monopolized the spotlight now. We hope to be represented by a stronger aggregation than last year as we will have had a year's experience. W. C. Towson has been elected manager. (If he can keep a Ford running in good shape, he ought to be able to put some pep into the team!) J. V. Bromwell is handling the kale as before. Let's go, fellows! Batter up.

The late Charles Milton Fleagle

The question of daylight saving was quite a lively one, arousing some very good arguments amongst the crowd, both pro and con. A straw vote was taken and practically everyone was in favor of the idea. Just think of the pleasure one can get out of an extra hour in the summer.

Signs of Spring

J. E. S.—Digging up the garden.
H. C. H.—Driving his "car" to work.
G. C. H.—Reviewing last year's bungalow plans.
C. L. R.—Vending "hen fruit."
J. M. K.—Enameling the perambulator.
O. K. E.—"Wandering" with the Wanderlusters.
W. M. McC.—Smoking a new pipe.
J. V. B.—Dyeing his cow.
G. P. S.—"Saying it with flowers" to the office.
R. H. B.—Taking long rides in his "fliv."
W. W.—Showing violent signs of spring fever.
J. M. F.—Showing a renewed display of energy.
A. M. W.—Among the chickens.
H. R. T.—Re-outfitting his canoe.
W. O. T.—Shining up the "fliv."
H. B. B.—Walking to work.

It's wonderful the feeling we have when spring approaches each year. After a generally dismal winter we come to that time of the year which makes our blood tingle and we give thanks that we are alive and well. You can feel it everywhere. Everyone is planning this, that or the other thing. One will give the house the spring coat of paint. Another will get out his canoe or his tennis togs, or what-not, and brush them up for the coming season. I ask you, ain't it a grand an' glorious feeling when Spring comes?

Goggles have become quite the rage in our department. Even the correspondent wears them. He was ugly enough before, but now, ugh!

Some of you will be glad to hear that Ansell Freedberger, who left the cost engineer on March 1 to go to California, is progressing very well in his new endeavor. He is working as an assistant camera man. Some of the fellows got together and gave him a rousing send-off. Good luck and our best wishes go with you, Ansell.

Office of District Engineer Pittsburgh, Penna.

Correspondent, J. M. WHEALAN, *Field Accountant*

Owing to the pressure of work, our former correspondent, Miss M. M. Ward, was obliged to relinquish her position, and District Engineer Clarke has appointed me in her stead. If you have a joke about someone, or an item of interest, send it in. All contributions are thankfully received.

Besides seeing many things at the Convention of the American Association of Railway Engineers, held at Chicago, those of our department who went were treated to a spectacular fire, which, according to the newspapers, did \$10,000,000 worth of damage. Must have been some "bon-fire."

Married or single, it seems that one has trouble in keeping a decent place to live. We hope that a certain young man will not be disturbed by an impending change in his boarding-house life.

Mr. Barrett, who is in charge of the reconstruction of certain bridges at Elm Grove and Bellaire, reports excellent progress and is hustling in order to complete them as quickly as possible.

The debating room has been the scene of some learned discourses in the past few weeks. The topics cover a wide range, but so far, nobody has actually gotten possession of the dog. It really seems, however, that one must do something in order to forget the lack of heat.

Freight Claim Department

Correspondent, GEORGE DOBBIN

The Baltimore and Ohio Railroad has nothing to sell but SERVICE. The type of service necessary to satisfy the public and earn fair dividends must closely approach perfection. An error by a Baltimore and Ohio employe can easily mean the loss of human life or of the cash value of freight which fails to reach its destination within a reasonable time in as good condition as it was shipped. The officials can gauge the accuracy of all purely mechanical devices but it is up to us to eliminate the errors and losses chargeable to the "human element." This part of ourselves is more thoroughly described as the ability to make mistakes whether through negligence, carelessness or ignorance. Double entry bookkeeping, checking systems and all forms of verification, with their burden of expense, could be done away with if it were not for this factor. We make mistakes even though we try ever so hard to avoid them, but there are times when the "I-don't-care" spirit increases their number to a dangerous point. These are days of competition, not only between "common carriers" but their employes as well. The quality of our personal effort is collectively reflected in the degree of efficiency attained by the Baltimore and Ohio System as a whole, and errors of any sort are always more or less costly. Therefore; let us remember that a business enterprise is concerned largely with one objective, and that is net profit. Our chances for promotion are greater or less in proportion to the amount our work as individuals causes to be placed on the debit or credit side of the ledger. Apart from the selfish view-point, it is our duty to work each day with nothing less than perfection as a goal. Think it over. The Baltimore and Ohio helps you; will you help Our Road in its effort to render PERFECT SERVICE?

One of the popular indoor sports among our young ladies is sitting through three performances at the Century, awaiting Viola Dana in person. Look out girls, or Hollywood will get you!

Our congratulations to Chew, the newly appointed semi-official valet-in-waiting to the ladies.

Ruben has been heard enumerating "Her" good qualities. We now know that she can bake nice pound cake!

Can it be that a new romance is budding? You tell us, Chlan.

We were generally represented at the Hotel Belvedere on March 3, at an informal gathering in the interests of "The College Hero" staged under auspices of Boumi Temple.

Our own Smith of the mezzanine floor is wishing that rents would come down. Boy, you sure have got plenty of company.

Our sincere sympathy to A. P. Shipferling, O. S. & D. Division, on the recent sad loss of his brother.

We are just as up-to-date as tomorrow when it comes to bobbed hair. The girls sure do have all the luck in the advantages to be derived from variety.

These are indeed doleful times; not a wedding, no, not even an engagement to keep step with the old spring-time tradition.

Of course it is none of our business, George G.—but that is *some more* hat you annexed.

Our friend Duval, recently of the Mail Division, is thinking of dropping his regular reducing exercises since joining the O. S. & D. Division.

Abe, it's been a long while since we were favored with news of the Lansdowne Fire Department. Open up!

Just as all honest bootleggers are about to combine and raise their prices, and the "down with tobacco, baseball, movies" boys are going strong, the heretofore innocent frying pan gets a slam! Oh! sweet visions of "ham and —," has it come to this at last?

Our deepest sympathy to H. F. Dixon of the O. S. & D. Division on the loss of his beloved mother on March 6. There should be comfort in the knowledge that no matter how wonderfully we take care of our loved ones, they inevitably go to a Better Place.

We hear that our own "Skinny" Keene received his clothes from the laundry and was surprised to find his night shirt neatly folded but not washed. Further investigation disclosed a polite notice to the effect that "We do not wash tents."

We are glad to have Miss Keiner with us after the ordeal of a severe illness. It is to be remembered that "it's hard to keep the good 'uns down" and we want to see that smile that won't come off.

With the intention of supplying the popular demand, our own Jazz Band, composed of Messrs. Horn, Duval, Koenig, Koerner, Chlan and Gnau, provided an Easter Monday Dance at Schanze's Hall. The boys are all there with the live wire organizing spirit and the appreciation of this department was well expressed by a very large attendance.

Freight Tariff Bureau

Correspondents,

F. W. RUPPERT, C. A. WAGNER

We extend our sympathy to G. B. Hoyt, who, with his wife, was struck by an automobile while going to the Lyric Theatre on March 16.

We are sorry to say that Mrs. Hoyt is in a serious condition although Mr. Hoyt was almost unhurt, save for a little jarring.

They have our sincere wishes for a speedy recovery.

Tariff Division

Can any pen, can any tongue

Of all this crowd, so old, so young,
Tell of the times, rehearse the fun
Of this TARIFF DIVISION?

There's Levi, Lew, Westminster Mike,
Bausey, Ed, and more of that type,
Lem, Gus, Peg-leg, John and Jap,
And Irish Frank, who has a good map.

"Al" Nibbs, George R. and Square Head
"B,"

Make a cracking old team with Bobby
"G."

Cabby, Higgs, Heinz and me
Are on a strike with "G" and "B."

Alas, that strikes shall cause such woe
As here we sat not long ago,
Fair one our old Unconscious Oats,
Sat on Moo-ee and got his goat.

Abe Martin quick to the rescue flew,
The healing balm—a bottle of glue,
Told by Eich t'was all unglossed
In the drama "Loved and Lost."

Desperate Desmond as Silas sleeps,
Across the footlights slowly creeps,
He makes a hit—to our surprise
There is no sleep about his eyes.

The Gumps as well are with us too,
Our Widow Zanders, who says she'll do,
There's Chester, too, and Uncle Bim
Though we regret we have no Min.

Time and time again, you'll hear
That old, old song, "We want good Beer"
Or "It hurts me more than it does you"
But this as quick will disappear.

For excitement Rex is in the lead
Who at times is hard to please;
Huckleberry walks in reflected sheen,
Among the groves that intervene.

We have no need for any clock,
For there is our own faithful, Doc,
Who watches old Ben with timely grace
And Father Time who keeps the pace.

There's G. B. H., our grand old man,
Gen. L. does a cadence with the band,
But 'tis quite hard to find at all
Any as good as we recall.

'Round the room now and agin
Some verses just fresh from the pen,
Whether Bunny or Swede 'tis hard to
decide
They're both so modest when once out-
side.

All that goes on—not a whit escapes
Troubles and talks, works and scrapes,
When Jerry yells, when Huey looks
When Buck hums aloud or drops his
books.

When Charlie sleeps, Press wiggles his ears,
Across the room, they laugh to tears,
They see it all, through the hole they made
Through the green celluloid they call eye
shade.

Hurrah for the chief and his chief clerk,
To be thrilled with pleasure makes light
work,

Three cheers for them; men whose hearts
Give to each and all a good start.

Relief Department The Death of Miss Costello

Anna Mercedes Costello, daughter of William F. Costello of the Relief Department, died on March 26, 1922, having been ill only one week.

Her funeral took place on March 29, from Corpus Christi Church, Baltimore. Interment was at Bonnie Brae Cemetery. Miss Costello was a girl of peculiarly pleasant and lovable temperament and her absence will be mourned by a large circle of friends. She was in every sense a "home" girl and her mother's helper and companion. The two were inseparable until this bereavement deprived the mother of one whom she loved so devotedly. The sympathy of the Relief Department and others by whom she was known, is extended to the sorrowing parents.

Relief Department

Correspondent, H. IRVING MARTIN

"Bob" Graham reports that "Lady Betty," who came to him like a wonderful gift at Christmastide, is getting more interesting every day. A little queen of hearts. On the ice-man's scales she'll soon weigh about forty-two pounds. If she ever gets to be as big and husky as her dad, she sure will be some child. Here's hoping for all good luck to the little lady.

Years ago, some writer chap, a graduate of the University of Matrimony, wrote a notable book: "How to be Happy though Married." Ever since there have been venturesome persons who have been testing out our theories.

Our latest candidates for matriculation, seekers for knowledge at this university, report from their branch college on Harford Avenue, Baltimore, that all is well. The

male has not yet asked, or needed to ask, for some of the cake like mother used to make.

The "Shakes" have signed the petition for "Daylight Saving" and are getting ready to spade up the worms and tickle the ground with a hoe. Yet but a few weeks ago, after removing two thousand, or less, cubic yards of snow, they declared that the life of a locomotive fireman had no charms for them and that never again would they clasp the handle of a shovel with a friendly grip. See what a few days of spring have brought forth!

The time of the swinging of the bats has come; the voice of the rooter is heard in the land.

The football has been tucked under the bed, the Victor records are locked in the cabinet in the sub-cellar, the key is under the door-mat.

Sis Boom! Rah! Hully Gee!
Rah! R. D.! R. D.! R. D-EEE!

What's it all about? Why, the Relief Department team has wakened from its winter sleep and has taken its place in the Welfare Department, Baltimore and Ohio League.

"Joe" and "George" and "Web" and "Bill" have dug out the score-cards of 1913, or thereabouts, and Johnny Brooks has a list of players as long as your arm. There's something to be doing and mighty soon. What's the matter with getting Oriole Park 'til Jack Dunn comes home?

All of our "Babe" Ruths, "Ty" Cobbs, "Tris" Speakers, etc., are massaging their winter-stiffened muscles and ironing out their glass arms.

"Bob" Owens says he can "tee" the first ball for a home-run to start the game.

"Ataboy!" we are with you. May you average .888 or better.

Transportation Department Correspondent, LUKE BURNS

That Spring arrived in the Transportation Department is unquestioned. A crop of poets has sprung up, some of whose fruits have already appeared in the MAGAZINE. Other varieties will no doubt continue to appear. Herewith consigned to your tender mercy, Mr. Editor, is an ode to Spring herself and another written by a Spring Fever Romeo. Possibly after passing through the Editorial Purgatory their worst stains and blemishes can be removed and their souls at least remain to enjoy the blessed light in the MAGAZINE.

Spring

By Lewis Rosenthal

Ex-Clerk, Mine Rating Bureau

The birds twitter merrily in the trees,
The streams flow peacefully by,
The saplings bend 'neath the gentle breeze,
The sun shines down from on high;
The fields are covered with green,
The flowers burst into bloom,
The heavens are calm and serene,
'Tis a perfect spring afternoon!

Spring Fever

By "Romeo" Brooks

The birds are singing happily,
The sun is shining warm,
The teams are playing snappily,
And getting into form.
The flow'rs are peeping shyly,
The brook now sings its song,
The sun in heaven sails highly,
All this, as Spring comes along.
The girls are getting quite giddy,
They flirt with me all the day long,
So don't be surprised if this ditty
Turns lightly into a song.

I walked down the street this morning,
Just after the break of day,
The autos were all a-horning
For me to get out o' th' way.
But I was too slow for the auto
And the man had no time to wait
So soon I'll be playing lotto
With St. Peter up at the Gate.
But while that brooklet is flowing.
Time goes, and poems must stop—
The front lawn now needs a mowing,
And the front parlor floor needs a mop.

Valuation Department

Correspondent, G. B. SAUMENIG,
Accountant

We have back with us our friend, Pryor, who had been confined to his home for past month on account of severe illness. We regard him as our human encyclopedia. Any question, local or foreign, can be answered by G. H., Jr., at a moment's notice.

Detroit has another citizen. B. P. Wheatley, formerly with our cost engineer, has accepted a position with the United States Government, with headquarters in the "City of Straits." "Ben" was a prince of a chap with a fine cheerful disposition and a desire to be a friend to all. He was a heartbreaker, and our girls will certainly miss him. Our loss is the Government's gain.

Assistant File Clerk Terrier has been at the University Hospital for some weeks on account of an operation for appendicitis. We hope for his early recovery.

Our financiers and wealthy stock brokers had a difficult task figuring their income tax. Plenty of excitement on the last day. One of our boys went so far as to make a deduction for war tax on a package of toothpaste purchased early in 1921.

Smythe continues to be a star at duckpins. When it comes to rolling above 100, he must be considered.

A number of the fair sex from our office served as waitresses at the American Legion Dance, which was held at the Fifth Regi-

ment Armory, on February 22. We can boast of quality as well as of quantity.

"BUMPITIS"—a disease worse than the "flu" or "black fever" has made its appearance. Such symptoms as worried and troubled expression, excited trips to the bulletin board, secret conversations back of file cases, and, finally an exultant grin. The disease is contagious and spreads rapidly. It is prevalent in both sexes and all nationalities. It must be said in favor of the Irish that their sturdy constitutions often make them repel the germ. Look out for the "bumpitis."

It is impossible to give a list of changes in our office this month. They come and go so quickly that it is a case of "Off again, On again, Gone Again—Finnegan."

The most astounding piece of news has leaked out. It can hardly be believed, yet it is true. Pilot Engineer Taylor, better known among his associates as "Adam," "Buck" and "Bonehead," has finally admitted his decision to get married. Some time ago, when Chief Draftsman Coles took to himself a wife, we were surprised, but now we are dumfounded. I wonder if it is the result of a wager. Wonders never cease and it clearly shows that two hearts can beat as one—even if she is far away in New England. This is advance information, but it is authentic.

We regret the illness of the mother of Miss Ritter and hope she will soon recover.

A. H. Talbott, cost engineer's force, is now associated with the Timber Preservation Office at Mt. Royal Station. We can say that while we knew him, he refused to worry or to be pessimistic. These qualities go a long way towards success.

Since Perry came to town, unhappy he has been,
Because he left behind in Chi his one and only queen.
He says the girls in Maryland are so very, very cold,
In fact the isolation is making him look old.
Now won't some one have pity and fix him up a date
And find a girl for him before it gets too late?

"Jimmie" Connor's twins knocked him out in the seventh round, and he is now recuperating from too strong a "grippe."

Since Chaney's operation he has a brand new sneller and can detect a home brew still three miles away. What a help to Volstead he would be.

Miller is waiting for the Bonus so that "U. Sam" will bring him an umbrella and a box of blocks.

Why pay rent; it's cheaper to move, Fraser says.

Mooley and Dodd, Valuation Department

Hansen and Bullen each purchased a ring and presented the same to a dear little thing. When asked what it implied, they laughed and replied: "Wedding bells will soon ting-a-ling, ting-a-ling." (Apologies to Walt Mason).

Why are Sanders and Pentz like the Siamese twins? Because they can't be separated.

Keep smiling (like Ralston) and let your conscience be your guide.

And now, like the old lady who had sat and listened to the parson preach a lengthy and dry sermon of about two hours in length, and who stood up in her seat when the preacher said, "And now what more can I say" and shouted, "Say Amen and sit down." And he sat down. We'll do like wise until our next.

Afterthought

Early to start the day,
Late to leave,
According to Mr. Barker's say,
Much we will achieve.

Auditor Coal and Coke Receipts

Correspondent, JOHN LIMPET

Coming down the home stretch, with only one more round to go, the standing of teams in the office bowling league including games of March 21 is:

	Won		Lost		
Pull Men	39	21	650		
Royal Blues	36	24	600		
Head Lights	36	24	600		
Bumpers	25	35	417		
Wrecking Crew	24	36	400		
Tail Lights	20	40	333		

A neat race and any one of the first three can grab the bacon! (Can almost hear the rattle of the knife and fork league.)

Pritchard was in fine form on the night of February 21, getting a total of 343 for the three games, which is the season's record. Royal Blues also hung up a new three game record by spilling 1407 pins.

Atwell shattered the wood for a 127 count on the night of February 28, setting a new season's record for one game. Tail Lights sprung a big surprise by taking three in a row. Pull Men had their winning streak broken after having won eleven straight.

Pritchard again stepped out into the lime-light, on the night of March 14, and mowed 'em down for a 133 count.

Mrs. Joseph Josephs, bride of Printing Department Compositor Josephs

A rather pleasant afternoon was spent by several gentlemen of the office, at a private oyster feast, held at the home of Jerry Johnson, on the afternoon of March 4. It was the original intention to go to a shore on Bear Creek, but the day being a typical "Inauguration Day," with plenty of rain, the party was switched to Jerry's. Oyster stew, fritters, raw, cocktail, etc. Special mention is made of the fact that "Chef" Shakespeare sure did himself proud, he preparing the best fritters it has been our pleasure to devour. "Phil" Williams got stalled on a pan-sized fritter. Jerry was bandmaster and kept things going pretty lively with the old Vic. O. R. Lutz is a bear when it comes to eating 'em raw.

Limerick No. 13

A dashing bootlegger named Gartrell,
Out Irvington way did he dwell;
In his cellar he dug,
And found a quart jug,

For the best "bob tail" is offered one (1)
"Pride of the Sewer" cigar. "Joe" Heine
is acting as judge. (We bet Heine got ne'er
a smell).—Censor.

Auditor Merchandise Receipts

Correspondent, P. H. STARKLAUF

"Good morning! My tid's a lovely day—
But I say, aren't you glad you're alive?"
Thus spoke the Mother Goose Lady to us
recently and everybody smiled to the tune
of her modern philosophy.

"Twas to smile, too, oh how sweet a half
dozen of our young ladies looked on the occa-
sion of the American Legion Ball, February
22 at the Fifth Regiment Armory, where
they assisted the Baltimore and Ohio Post
in various capacities (the Misses Derwart,
Kerns, Teders, Kriewald, Jones and Pes-
sagno).

Recent arrivals in the homes of Ross Tarr
and John Hornick. Congratulations!

Weddings—Miss Eva Phelps, Local Set-
tlement, to Hiram Soper, on December 18,
at Elk Ridge, Md., by the Rev. John T.
Norton. Miss Katherine Blaney to Millard
Jenkins, Revision Department, February
22, at Ellicott City, by the Rev. J. C. Null.

Miss Lillian Worthington was accorded a
linen shower on the evening of March
2, by the folks of the Statistical Bureau.
They say that George is his first name.

Our sympathies go out to fellow clerks
C. H. Benson on the death of his sister; C.
Karfing on the death of his mother; Miss
Helen Walter on the death of her parents;
Miss Gladys Schultz on the death of her
father.

G. F. Creswell, head clerk, Interline Divi-
sion, has rounded a quarter of a century in
the company's service. Good boy, Gawj,
"old top."

They say there's a beaten track between
two homes along the line of road between
St. Denis, where he lives, and Relay,
where she lives. Now all hands smile the
Johnny smile!

Spring time is coming strong on its way
with that fellow named Romance; some
think of the seashore, others of the moun-
tains while N. & J. quietly hie themselves
to the folks down the "Vale of Shenando!"

Then again we find notes left behind by
the love lorn in our records, about not
living long, suffering, etc., joining the army
and going to way far off China. Willie,
have a care that you don't leave your mis-
sives around so promiscuously in the future.

Fruit and cigars were recently sent to our
sunbeam "Bill" Straughn who has been

under the weather for some time. Here's
hoping he's back in harness soon.

By the bye, drop a card or word of cheer
to our fellow clerk, Eddie Cronin, of the
Revision Department. He's at the Sani-
torium at Sabillasville and it's reasonable
to assume he will be pleased to receive a
postal shower.

Eastern Lines

Pier 22, North River, N. Y.

Correspondent, JOHN NEWMAN

Frances Miller, Collector "Mike" Muel-
ler's stenographer, has resigned to accept
a position as housekeeper, etc. to her hus-
band. That is woman's proper place, ac-
cording to an authority that no longer has
authority, the ex-kaizer, who promulgated
the Three-K ordinance for women: "Kirche,
Kueche, Kinder." Let this be your guide,
and our best wishes follow you, Frances.

Resignations are not so much the order
of the day now as they were not so long ago.
"Unemployment" is the spectre that,
wagging a bony finger at us, counsels us,
and keeps each cobbler sticking to his last.

In 1917 the overturn of employees at this
Terminal was 473 resignations in the force
of about 150 clerks; over 300 per cent. In
1921 we had 45 resignations from the
clerical force; in 1922—Frances Miller. A
commentary on how *tempora mutantur*.

Another St. Patrick's Day party was held
in the freight office at Pier 22, N. R.,
between noon and 1 o'clock p. m. By pre-
arrangement some of the lady-clerks with
Irish names brought with them that day—
in addition to the usual little "without-
which-nix" dittyboxes containing artists
materials—huge packages of lunch. The
hors-d'oeuvre, or what do you call it, con-
sisted of one big bowl of—pigs' knuckles.
Green tissue paper covered the desk and the
emerald color was much displayed as a deco-
ration. And the fun was boisterous and the
party-cipants happy (and the onlookers
envious).

FOUND: A one-piece bathing costume
secreted in an unused desk. It was a 48 inch
waist. Owner will present claim to Agent
J. Bayer. A try-on will be required and
perfect fit will be sufficient to establish owner-
ship. (See "Cinderella" for precedent.)
This find recalls to mind the Asbury Park
special officer who had instructions to allow
no "one-piece-suits" on the beach. Observ-
ing a chicken, disporting herself in the sand
arrayed in one of the tabooed garments, he
stalked up to her and sternly commanded
her to "take it off."

Miss Malick reports herself engaged—
again. In announcing the interesting fact,
she stabs you in the retina with the rays
from a two-carat diamond. She says it is a
diamond. We don't know. We never saw
one at such close range before, and can't tell
crystallize i carbon from fused flint anyhow,
but we believe her—again. Let's see, how
many times does this make it now, Hattie?
Please don't become as addict.

T. C. A. (title) C. E. F. (name) is a great
"kiddier." In his lighter moods he loves to
"get a rise" out of some one. The other day
he went to T. T. (title) J. N. (name) and
asked apparently seriously: "How do you
make a Maltese cross?" The victim cor-
respondingly and obligingly proceeded with
compass and rule and great mathematical
exactness to draw the figure according to
Euclides Elementa. When he was ready
with the Q. E. D. the T. C. A.-C. E. F.
acknowledged it to be a Maltese cross, but
added that a simpler way to do it was to
"pull his tail." The joker is a big man and
the victim a much smaller fellow; therefore
they are still both alive.

Superintendent E. J. Hamner of the New
York Division, although not of Irish descent
or adaption, selected the 17th of March as
the day upon which to make his debut on
this earth.

To commemorate the passage of another
mile-stone along his successful pathway
through the intricacies of the Railroad
labyrinth, and to express their appreciation
of his efficient supervision, a party of friends
called unexpectedly on the evening of St.
Patrick's day at his residence, carrying with
them all the requirements for a jolly even-
ing: feed, from soup to nuts; music for
those who danced and, best of all, a spirit
of good will and well wishes for the future,
and many happy returns of the day "with-
out any added years," as E. J. H. expressed
it.

A delightful evening was enjoyed by all,
one of the surprises and delights of the
evening being the striking rendition of old
time songs by the talented and popular wife
of our division operator.

The spirit of good cheer, well wishes and
friendship entertained by the assembled
guests was very appropriately expressed at
the hour of parting in a few "short"
remarks from our veteran trainmaster.

"Tom" Kavanaugh, former correspon-
dent of the MAGAZINE for Pier 22, and a
good friend of the writer, dropped in at the
MAGAZINE Office in Baltimore during the
third week of March. "Tom" looked,
acted and talked prosperity and suggested
in an off-hand way that he might run down

to Baltimore again within the next couple of weeks, to spend a few days with some of his friends who own stables that at this writing are quartered at the Bowie track. If success begets success, as we are supposed to believe, "Tom" may add an inch or two to his girth while in Maryland, and incidentally fatten his bank roll at the expense of some of the natives. Ed.

Staten Island Lines

Correspondent, G. J. Goolic

The employees of the Staten Island Lines extend their heartfelt sympathy to the families of following late employees: Engineer William Darnell, who died at his home on February 6; M. of W. Carpenter Michael Dougherty, who died at his home on February 23.

John A. Goodski, clerk to trainmaster, was promoted to position of stenographer, Superintendent's Office, vice Miss Irene McCarthy, resigned. Edward L. Meloy was promoted to stenographer and clerk, Trainmaster's Office, vice John A. Goodski, promoted.

The accompanying picture is of Joseph Morris, Jr., grandson of Joseph Morris, electrician, Maintenance of Way Department. Joseph was four months old when he posed for this picture.

Stationmaster William Patrick Slattery, St. George, is receiving congratulations from many of his friends on the arrival of a baby boy on March 20. "Bill" promised that he is going to bring up William P. Jr., to be a stationmaster.

NOTE: Here's an item that the correspondent, for some reason or other, overlooked. Never mind, G. J. G., news travels, and Chief Clerk W. J. Vidler helped us out. Thanks, Mr. Vidler—Ed.

We are pleased to announce the marriage of George J. Goolic, assistant chief clerk, Maintenance of Way Department, to Miss Madelyn Cannon of Fort Wadsworth.

This happy event was solemnized at the Church of St. Mary's, at Rosebank, Staten Island, on February 28 at 5.30 p. m. This ceremony was witnessed by many of the

Jolly Joseph Junior is the little son of Electrician Joseph Morris, Staten Island

office staff who were present to give the bride and bride-groom a good send-off. The honeymoon was spent at Niagara Falls.

Mr. Goolic has been associated with the Maintenance of Way Department of the Staten Island Rapid Transit Railway for several years, starting in the capacity of material clerk in Supervisor's Office. "George" (as he is known by his fellow employees) has been a hard worker for the social events connected with the S. I. R. T. and has for some time held the office of recording secretary of the Employees' Mutual Benefit Association, which is now in flourishing condition, largely through his efforts. He was also secretary of the Staten Island Railroad Club for quite some time. When he took over these duties, the club was in a hole, but by his exertions he put it on a sound basis.

We all wish Mr. and Mrs. Goolic happiness and prosperity, and we hope that the Baltimore and Ohio will retain him for years to come.

Baltimore Terminal Division

Master Mechanic's Office, Riverside

Correspondent, MARTHA V. FOX

Many changes have been made in the personnel of the force in the Master Mechanic's Office at Riverside. One of the most important changes is that in the position of chief clerk. E. J. McGuiness, formerly at Keyser, has been our chief clerk since November 16, 1921; we greatly appreciate "Mac's" good nature and efficiency.

After over a year's absence, Howard King is again among us, and those who know him will agree with us that "it is just great" to have Howard back with us, for he is possessed of never-failing good nature and humor.

After much bumping, we have somewhat settled down, and the "bumps" bumped into our midst Miss Florence Shipley, work report clerk, and Miss Eva Bichman, file clerk. We are glad to have two such pleasant young ladies with us, and hope they will not be "bumped" away.

Things We Would Like to See

Paul Purgitt answering telephones promptly.

Mr. Sigafosse late for work in the morning.

Messenger Burns with a clean face.

T. H. Clark idle.

Mr. McGuiness smiling while he works.

John Higdon not worried.

Miss Comra walking (instead of running) down the track in the morning.

First Villager: "Hello, Aaron. Hear you've got married. What kind of a match did you make?"

Second Villager: "Well, neighbor, I didn't do as well as I expected, but, to tell you the truth, I don't think she did either."

—Partners

Help! Help!

There is an old man named Henny,

Who is only one of many,
When confronted by thieves,

He rolls up his sleeves,
And won't let them get a penny.

But one dark night in December,

The date I just can't remember,
But the time it was ten,

He was grabbed by two men,
And he called each a dirty offender.

When they hit him he shouted, "Oh, my!"

"They are killing me," was his sigh,

Then they pulled their black jack

And gave him a crack,
And let him lie there to die.

Now Henny remembers the shock,

He runs like a fifteen day clock,

And if I am right,

I think from the fright,
His whole darn head is a block.

And He Moved Slowly Away—Like This

June Louise Fitzgibbons

The Ladies' Auxiliary of the Baltimore and Ohio Y. M. C. A. decided at their last monthly meeting to give a surprise party to one of their old and faithful members, Mrs. Crawford, widow of the late Engineer Chris. Hile, who was recently married. T. E. Ballew was appointed to see that Mr. Crawford was at home on that night. The committee reporting O. K., arrangements were made for the entire Ladies' Auxiliary and their husbands and gentlemen friends to be present on Thursday, March 2, at the residence of Mrs. Crawford, 1739 Covington Street. Mrs. "Jack" Stewart was sent on ahead to see that Mrs. Crawford was kept in the house. This having been accomplished, the entire committee and their companions, carrying baskets of salads, cakes, ham and other good eatables, invaded the home. T. E. Stacy and Walter Edwards brought up the rear guard carrying an immense freezer of Hendler's Ice Cream. To say that Mrs. Crawford was surprised is putting it mildly. There was some talk of taking off the wall paper to make a little more room for the thirty-eight people present. The collation was served in three relays. A very enjoyable evening was spent, and many expressed the wish that the other widows of the organization would soon succeed in getting the right man, so that a similar party could be given. Many pleasant years to Mr. and Mrs. Crawford.

Mt. Clare Shops

Correspondent, Miss M. S. ALBRECHT

Superintendent of Shops Office

Another addition to Mount Clare's cradle roll! Little June Louise, seven months old, is the daughter of D. E. Fitzgibbons, locomotive inspector, Mount Clare. June Louise surely looks happy, and we *know* it's because she is a Mount Clare baby!

Conversations often heard in this office.

"Hydrostatic test, 9-16-21. Get me?"

"Good-night! Why don't you answer that telephone once in a while!"

"Telephone, Mr. Serp!"

"Where's Stembler?"

"Marion, will you get me some carbon?"

"Miss Heinekamp, do you know where this file is?"

"This man wants to know where he stands on the list."

"Poulton, get me this service record."

"Arthur, will you get me some lunch at 12 o'clock?"

"Hankin, will you rule this for me? I can't make a straight line to save my neck!"

"Mr. Serp, do you think it will keep on raining?" Reply: "It'll be a wet summer t does!!"

"Have you sent in your Income Tax?"

Whenever you hear the song "Everybody Step," you can just bet your last dollar that Marion's shoulders and feet will be moving! This young man has acquired the art of dancing, and he does *some* stepping. We are told that he "steps" to Highlandtown at least two or three times a week! Watch-out, Marion, old top! This gay life will take the curl out of your hair!

If you see someone about one o'clock in the afternoon, figuring with pencil and paper, you can just *know* that he is not figuring income tax, or how much money he has, but that he has the "LIMERICK BUG." We are all infected with the limerick bug, and it's a dangerous one, too. There are two young men in the office who claim to have won \$110.00 between them, (in by-gone years) making out limericks, but we haven't seen any checks flying in as yet. However, we are still hopeful, and think we may have a celebrity in our midst yet.

By the time this MAGAZINE reaches you, we hope everybody at Mt. Clare will be over the Spring Fever and fairly well settled down again! All Mount Clare-ites get this disease as it flies in the windows, (when they are first opened for good in the Spring) along with the Pratt Street dust! Both of these elements are strong, but we soon forget the dust, and Spring Fever vanishes quickly. Here's hoping we all have a quick recovery!

Accounting Department

If you ever happen to be strolling down the hall of the main office building at Mt. Clare, anytime between 12 o'clock and 1 o'clock, during the lunch hour, don't be alarmed if you hear a lot of *noisy* noise. It's just the Accounting Office girls having lunch in the room upstairs! And say! You can just bet your life that Campbell's Soup gets lot of advertisement. If visitors arrive at this daily luncheon, and want to keep time to the band of soup-eaters, they chase around after a glass and a spoon, and if they can't find any, the Chemical Laboratory always comes to the rescue, always producing something that looks like a soup bowl, even if it isn't! So if you get hungry, and need a little bit of cheering, just let

these girls know, and they will give you heaps of laughs, and a bowl of that life-giving manna, "CAMPBELL'S SOUP!"

Ethel, I have been commissioned to find out the name of the gay Lochinvar who escorts you to the office each morning in a J. G. Brill, 80-passenger, 1922 model car. I am told that you seem to be very much interested in whatever the young man has to say. (Maybe you were still thinking about what he told you the other morning when you stubbed your little toe! Am I right, honey?)

Drawing Room

I have scouted around this office for scandal, gossip, or something interesting to write about, but nobody seems to be doing anything scandalous, nobody seems to want to be the mark of our gossip, and nobody is doing anything interesting during Lent, so, as both Els and I declare, this month's notes will have to be

Sans scandal,
Sans gossip,
Sans interest,
and

Sans fun! (with all due apologies to Omar Khayam!)

Engineer of Tests

The spring is bringing out all the cars owned by both the married and single men here. Yesterday a new one made its debut at Mt. Clare—a little Dodge roadster! (Which, by the way, stalled for some unaccountable reason several days ago, on Park Heights Avenue. We haven't learned the reason yet, but we have our suspicions.) But this car is owned by a married man, girls, so there isn't any hope for you! Much to our sorrow, most of the cars are owned by the blissfully wedded ones, so all of us poor girls at Mt. Clare are out of luck, save that we may depend on our car-less friends to escort us up the street, help us across loose bricks, etc. However, as we are still able to *walk*, we aren't grieving a bit!

Agent's Office, Camden Station

Correspondent, W. H. BULL

Here is another cartoon by our artist, A. F. Bauernschub; this time he has depicted

IN THE SPOTLIGHT

A trio of employees who helped make a "howling" success of the Relay Minstrel Show. Girls, don't overlook Friend Canby, of the Inbound Billing Department, Camden Station. He's on the right-hand side in the middle of the picture

porter, our employee, who helped make the recent Relay Minstrel Show a "howling" success. We suggest to our young ladies that they do not overlook Friend Canby of the Camden Station Inbound Billing Department, who is No. 3. This gentleman is popular among the fair sex and we would not be surprised at any time to hear that he has carried off one of the girls.

It is with great sorrow that we record the passing of Mrs. Ella M. Waltz, beloved wife of Cashier C. H. Waltz. Mrs. Waltz was taken ill on Sunday evening, March 5, and a few days later was taken to the Maryland General Hospital, where she died on March 14, following an operation for appendicitis. Mr. Waltz is survived by her husband, a daughter, Mrs. Edward Thorney, and a son, Ridgely. The funeral services were held at her late home, Lansdowne, Md., on Thursday, March 16. Interment took place on March 17 at Walkersville, Md., her former home. The entire office force extended to Mr. Waltz and family their deepest sympathy in their bereavement. Our outward expression of sympathy was shown by a beautiful floral design.

Locust Point

Correspondent, J. R. GOULD

We are happy to report that local conditions at Locust Point Station show an improvement; in fact indications clearly give promise of a general revival of business on our road.

We have had a long and strenuous pull and it seems to be the universal opinion that we are about "Crossing the bar" into clearer water, where once more our trains will be carrying the commerce of the world with

vessels waiting at our piers to load for delivery to Europe. "Tis a consummation devoutly to be wished."

Let us not rest in fancied security, but keep "carrying on" as the goal is not yet reached, ever remembering the immortal words of England's naval hero, which we paraphrase to read "The Baltimore and Ohio expects every employee to do his duty."

When you start in life's great struggle,
Hold your grip:
When times are dark with trouble,
Do not slip.
But grit your teeth, and push along,
Accept the right, decline the wrong,
And help your pal who's not as strong,
To hold his grip.

We were certainly pleased to welcome back to the office our fellow clerk, Louis B. De Goey, after an illness of nearly three weeks. We not only congratulate him on his recovery, but ourselves in being able once more to enjoy his pleasant companionship.

The S. S. Mobile City, of the Isthmian Line, sailed from our piers on February 14, destined for San Francisco, carrying 256 carloads freight, 182 of which were of tinplate, aggregating more than 9,000 tons.

S. S. Steel Ranger of the same line, sailed from our piers on February 27 for the same destination, carrying 264 cars, principally tinplate and structural iron, aggregating 9,500 tons.

Baltimore Division

Correspondent, W. H. TARR

H. S. Hartman, agent, Holmes, Pennsylvania, is in receipt of the following:

BARNESVILLE, PENNA.,
January 2, 1922

Mr. H. S. HARTMAN,
Holmes, Penna.

Dear Sir—In reference to our conversation on train to Philadelphia: You asked me to try the Baltimore and Ohio. So I have done it, just for friendship. I spoke to my sisters and told them that we arrived at Philadelphia and they said, "We will just try it." I told them I had spoken to you on the train. Well, I am going to tell you that the service between Washington and Philadelphia was most wonderful. The conductors are some of the finest speaking gentlemen I have met and very kind. I have been speaking to a number of my friends and told them about the train service on The Baltimore and Ohio Railroad. I told them just to try the train service of the Baltimore and Ohio and they are going to let me know when they arrive home.

Yours truly,

(Signed) WILLIAM J. SAMKAVITZ,
Box 28, Barnesville, Pennsylvania.

Mr. Hartman met this gentleman on a Philadelphia and Reading train enroute to Philadelphia and persuaded him to try the Baltimore and Ohio.

On March 17 the stork presented Conductor and Mrs. H. Heber Murphy with a baby boy, Edward Thurston. Mr. Murphy is employed at Willsmere, Del. Congratulations!

East Side, Philadelphia

Correspondent, CHARLES H. MINNICK

The accompanying picture is of Mrs. Charles H. Minnich, and little daughter Ruth, wife and daughter of East Side correspondent.

ALL ABOARD FOR EAST SIDE, PHILADELPHIA, PA.

1. East Side roundhouse force. 2. Little 74. 3. Our switch engine force at East Side Shops. 4. The long and short of it, East Side Yardmaster "Pop" Barks and Conductor "Chaffie" Hatfield

Mrs. C. H. Minnick, wife of correspondent at East Side, and little daughter Ruth

We have another chief clerk in the Master Mechanic's Office: Mr. Whalen, who succeeds Robert Merryman, who has taken a year's furlough to visit England.

Samuel Land, the oldest man (in years) at East Side, has changed his occupation of caretaker at the Rest House to janitor in the Yardmaster's Office. We will say this for him: we can see through the windows now; formerly it was a hard job.

I had occasion to notice the other day little engine No. 74 which has no tender and seems to be only about 10 feet long and about as high, pushing an enormous No. 4400 tender out of the roundhouse to the turntable and then on to the farm. Old faithful "Jim" Donnelly was at the helm. Well I just thought to myself, it seems impossible for a little engine like that to do such heavy work, and yet it was done quickly and well.

The moral I took from it was this: We are all a part of the great Railroad and because we are of relatively small importance we should not slight our task but do it faithfully. Little No. 74 could not pull a heavy freight or passenger train, but still what she was doing was very essential in that she was assisting in making a part of a large 4400 engine ready for service in pulling a long freight train. Our task may seem small, and yet, done properly and well, may result in much good. If we slight our work, great loss or damage may result therefrom. In order for the whole machinery of Railroad organization to work smoothly it is essential that every part, no matter how small, shall do its work faithfully and properly with due regard to its importance. In a word, success in railroad business is based on co-operation in all things big or small.

Washington, D. C. Freight Station

Correspondent, W. L. WHITING

Did somebody say anything about a slump in business? Or was it only the usual growl of the chronic pessimist? Anyhow it has not been much in evidence at Washington, D. C. During the month of February we made an increase in revenue of about \$138,000.00, over the month of February, 1921, and handled approximately 20,000

tons more freight. And what is still more to the point, at the present writing there is no let up in the activities around us. The busy Springtime is upon us, and all indications point to a successful season.

"Lest We Forget"

We men folk are always ready to write and talk about the achievements that railroad men accomplish, but we are apt to forget that railroad women have had a great share of the burdens of the past few years cast on their shoulders. Among the many activities that occupied the women during the Great War, none perhaps, showed what woman's helpfulness meant more than the American Red Cross Society, and one of the busiest and most faithful auxiliaries in this city was that formed by the women of the Washington Terminal Company, and which consisted of the wives, sweethearts and sisters of men connected with the railroads running into Washington. Be very sure that the good old Baltimore and Ohio was not backward in its representation in the good work.

As a kind of commemoration of the enjoyable times they had during the years of trouble, knitting sweaters, making pajamas, and all kinds of other things necessary for the alleviation of the suffering of the boys "Over There," a number of these good ladies met recently upon the invitation of Mrs. J. D. Healey, wife of the trainmaster of The Washington Terminal Company, at Mrs. Healey's home. There they renewed old acquaintanceships, related interesting reminiscences of their Red Cross days, and had a grand, good time generally.

Of course, this being strictly an "Adam-less Eden" party, all that we mere men had to do was to escort our better halves to the place of meeting, and fetch them home afterwards. However, your correspondent was able to glean from various sources some of the features of the evenings' entertainment. Stories were told, and several of the ladies in humorous costumes, furnished a splendid little musical vaudeville skit which "brought down the house."

Finally a repast was set out by the hostess, which was of such a generous nature and so thoroughly enjoyed by everybody that some of them are still talking about "Mrs. Healey's supper." They enjoyed this supper as much as if they had been a party of men folk.

Among those present were Mrs. D. M. Fisher, wife of our freight agent, and her two sisters, Mrs. Hearn and Mrs. Todd; Mrs. J. T. Mathews, wife of our general foreman; Mrs. W. L. Whiting, wife of your correspondent; Mrs. G. H. Winslow, wife of the secretary of the Terminal R. R. Y. M. C. A.; Mrs. J. H. Tonge, wife of the superintendent of The Washington Terminal Company; Mrs. Heritage, Mrs. Caldwell, Mrs. Owen, Mrs. Hanlon and Mrs. Healey herself, with her mother and daughters.

It was a late hour when the party broke up, and all expressed their pleasure at a most enjoyable reunion and voted that Mrs. Healey was indeed a "Jolly Good Fellow."

This meeting may be the nucleus of a proposed Railroad Women's Club here.

The spring fever of weddings and love making, has again invaded our midst. On February 18, our record binder, Allan W. Kidd, succumbed to the inevitable and took unto himself Miss Priscilla H. Gardner to be his helpmeet during the coming years.

It was a surprise to us all. Allan is one of the latest additions to our force, and is still quite a young man. Of course the usual jokes about "Kid(d)napping," went the rounds, but carrying a name like that, he would not expect that such an opportunity for a joke would be passed up. May a long

life of happiness and prosperity be the lot of the newlywedded "Kidds!"

Your correspondent had planned a one day trip with his wife on a certain Sunday into the state of Pennsylvania, but on the previous Friday evening in going down the cellar steps to fill the everhungry furnace for the night, he slipped, breaking a leg. Fortunately a whole leg is not necessary for writing purposes, or perhaps there would have been no April notes for the MAGAZINE. The doctor came the next morning, and after the usual amount of prodding and pinching, pronounced a "beautiful fracture of the femur." This sounds very poetical and reminds one of the "Beautiful Isle of Somewhere," that they sing about—but it only reminds, for, believe me, it certainly does not feel particularly poetical.

However there is a silver lining to every cloud, and being fortunate enough to possess the best of nurses, a good wife, the damaged "femur" stays at home, and is not subject to the tender mercies of a hospital. Everything is going along splendidly and we hope before very long to be in the game again literally "with both feet." And so the planned trip to the Keystone State went "aglee."

Of the other sick, we are glad to report that Chief Delivery Clerk T. E. Frye has recovered sufficiently from his rheumatism to enable him to resume his place on the platform. Salvatore Galipo, warehouseman, had the misfortune to break a rib recently, but a little thing like that is not apt to keep a son of sunny Italy off the job for long, and we hope to see "Sam" with us again before very long.

The recent readjustment of the force at this station caused one or two changes. W. A. "Doc" Keys, chief clerk to Car Foreman T. O'Leary, took a position as delivery clerk on the platform. C. M. Webb, who was foreman's clerk, is now filling the position of tallyman.

Recently we had a "look in," just a handshake and a "Howdy" from our good old friend, Jacob S. Schell. Mr. Schell was formerly foreman carpenter at this station for a long time. He says he is feeling fine and his looks certainly carry out his statement. Call again, J. S. S., we're always glad to see you.

Brunswick, Maryland

Correspondent, R. L. MUCH,

Conductor

Willard F. Wenck

After a short illness, Willard F. Wenck, timekeeper, Brunswick, died of pneumonia.

Mr. Wenck was born at Hamburg, Va., on May 18, 1856. His early boyhood was spent in the vicinity of Mt. Jackson. At the age of 16, he went to Baltimore, where he entered the service of the Baltimore and Ohio as clerk, Mt. Clare Station. Later he was made chief clerk there. He also worked at Camden Station for a time, spending 20

Arthur Needham, our handsome index clerk, and one of his affinities

years in all at Baltimore. In 1893, when the Transfer Shed was opened at Brunswick, Mr. Wenck was transferred to this station. Later he was made chief clerk and time-keeper. In 1917, because of the pressure of business, he was relieved of the duties of chief clerk.

It has always been Mr. Wenck's great desire to complete fifty years with the Baltimore and Ohio. When his death occurred, he lacked only three months of completing this record. He was a faithful and loyal employee, a man devoted to his family. He was a member of the Baltimore and Ohio Veterans' Association and of the Methodist Church. Surviving him are his wife and four children, as follows: Mrs. P. Estella Wilkerson, Willard F. Wenck, Jr., Mrs. Gertrude Humphreys, and R. Glenrode Wenck; a sister, Mrs. Mary C. Maphis, of Washington; a brother, Samuel H. Wenck, of Mt. Clare, N. J., and twelve grandchildren.

Funeral services were conducted by Rev. J. T. Hart, of the Methodist Church, Brunswick; interment at Park Heights Cemetery.

Mr. Wenck will be greatly missed by his many, many friends, but particularly by the Baltimore and Ohio friends with whom he associated daily. They all knew him and loved him.

Trainmaster John McCabe has been holding a series of examinations at the Y. M. C. A., rounding up the delinquent engine and train crews who were tardy in answering the superintendent's annual examination call. After being shown where to "head in" they will "clear" until the time for the next examination.

injured about the neck. He expects to resume duty soon.

Secretary H. E. Dixon, of the Y. M. C. A., has been holding weekly religious meetings. He deserves great credit for the manner in which he endeavors to keep the Railroaders together and to point out to them the straight and narrow path.

John W. Peyton, veteran employee, Transfer Department, who is in Florida for his health, writes that he is getting along splendidly. He sends his regards to all of his friends. Following is a part of his letter:

I wish to express my sincere appreciation for the privilege afforded me, through the kindness of the Baltimore and Ohio, to visit the beautiful state of Florida.

The climate here is wonderful, people bathing all the year 'round, folks sitting or strolling in the beautiful parks, among the palm trees and the lovely flowers, enjoying the balmy sunshine and gentle breezes—breezes which kiss your cheeks and revive in your tired body a renewed vigor, an abundance of good health.

How true is St. Paul's statement: "Eye hath not seen and ear hath not heard, neither hath it entered into the heart of any man"—the things that God has in store for those who love and serve him. This certainly applies to this land of beauty. As I roam among the fragrant flowers, enjoying their sweet perfume, then among the modest pine trees and the orange groves, noting the splendor of the vegetation, I pause and give to God the praise. This is His own handiwork, this ornamenting of the Southland. I praise him for the privi-

lege of allowing me the blessed opportunity of enjoying His work.

In closing, I wish to assure the officers of the Baltimore and Ohio, in every department, that I humbly and gratefully appreciate their kindness. I have served the Company for 31 years; I have always tried to be "on the square" with the Railroad, and I have come to feel that I am really a part (though a small part) of the Baltimore and Ohio. Its employees are my big brothers.

I was taken ill in December, last year. My physician ordered me to the South for the winter. After examination, the Relief Department endorsed this order, and the good old Baltimore and Ohio furnished me with transportation to Tampa and return. This alone would have cost me about \$95.00.

I would like this letter to appear in our Baltimore and Ohio MAGAZINE so that some "Knocker" may read it, reflect on it, and become a "Booster."

THE BALTIMORE AND OHIO WILL TAKE CARE OF YOU.

Yours very truly,
(Signed) JOHN W. PEYTON

Cumberland Division

Correspondent, JOHN SELL

The movement of loads east of Cumberland for the month of February was a record breaker, and the movement over the entire division for the month was good. We also note that the blue-print still shows the Cumberland Division in first place, and everybody is on the job to keep it there.

The accompanying picture of Miss Laura Lingamfelter, taken atop of Lovers Leap,

AMONG THE HILLS OF CUMBERLAND

1. Coal Billing Office force, Cumberland Scales. Standing (left to right): Coal Billing Agent W. S. Beggs, Mrs. Mae Beck, J. H. Fike, Esther Weltman, W. S. Snyder, Gertrude Harper, G. F. Lippold. Lower row: W. P. Copeland, Blanche Thomas. 2. Second trick hump crew, eastbound yards. 3. Miss Laura Lingamfelter, stenographer, Division Engineer's Office. 4. No. 7153 completing the trip from Somerset to Cumberland with 70 loads of coal.

Miss Kathryn Hogan, bookkeeper, Y. M. C. A., contemplates a journey southward. Good luck and a fine trip, Kathryn.

Conductor R. E. Grabill is taking electric treatment at Frederick for an injury received when his train was wrecked at Opequon.

Conductor E. Keyser had a narrow escape while backing his train at Martinsburg. A brake lever failed to work, and Mr. Keyser was thrown to the ground and

Cumberland, shows our stenographer to the division engineer taking the air.

The new icing plant at Cumberland is rapidly nearing completion, and will be an important adjunct to this terminal.

Main Line and Romney Branch at Green Spring Station

The accompanying pictures of the Coal Billing Office force, and the Evitts Creek Yard Hump Crew, Cumberland Terminal, show the forces at their best during an off-minute of a busy day.

A sad report which we have to record with this number is the recent sudden and unexpected death of our president of the Cumberland Veterans' Association, Harry Allison.

The accompanying picture shows the 7153 at the top of Hogpen Grade, Cumberland Yard, completing the trip from Somerseset with 70 loads of coal.

One of our attractive young lady clerks in the Superintendent's Office surprised her many friends by going to Oakland and quietly getting married. Mr. and Mrs. Gross are now receiving the congratulations of their friends.

From all indications it will be necessary to ask the editors to reserve some additional space in subsequent issues, to take care of the spring and summer crop of weddings which are now budding. We have a seniority list of the prospects lined up, but it changes from day to day as they run around their turn.

There are lots of interesting items we might note, but the "Victrola" needs winding so we will say more next time. "Eh, John?"

Green Spring

Correspondent, E. E. ALEXANDER

"Let's clean up.

It's a lot easier to maintain order and neatness than disorder and confusion. It's safer. It's better. You personally, will feel a lot better if things are neat and clean about you. Therefore, help to make them so.

Next time you feel tempted to throw something on the floor or into some out-of-the-way corner—don't! Put it in its proper place or in a receptacle provided. You'll thereby save somebody else the trouble of picking it up. You'll help to save janitor expenses, and you'll experience a feeling of pride in having your surroundings neat and clean.

"Let's all clean up! Let's respect our surroundings, our fellow workmen and ourselves. Let's be thoughtful and decent enough to cut out the "rough stuff" in the way of promiscuous spitting, wall defacing, and litter strewing.

"Let's clean up!

"And stay that way!"

—From our Bulletin Board

Messrs. R. G. Brown, J. C. Wilson, Charles Cartel and "Mike" Polenski were

among plant employees recently reported on the injured list, all having suffered quite painful injuries.

We read with much interest the first issue of the Union Pacific Magazine published at Omaha in January. It is a fine magazine, a credit to its sponsors, and we hope it will be a regular visitor. We have some old friends on that road.

We have been advised that our hustling young signal maintainer, Thomas Duvall, and Miss Lulu Grace Ward of Patterson Creek, were married in Cumberland, February 15. We extend our heartiest congratulations.

Walter Gurtler, clerk, Green Spring Station, who has been unable to attend to his duties for some time because of a severe attack of pneumonia, is able to be out among his friends again.

Operator C. P. Houck has taken the second trick at Evitts Creek, and our old friend, Vincent Twigg, third at Patterson Creek. It is rumored that "Vince" will move to the Creek. Extra Operator M. L. Barnes is at present working first at Green Spring, vacancy left by Mr. Houck.

The First Public Carrier in America

The Baltimore and Ohio has the proud distinction of being America's first public carrier on the completion of a line 14 miles long from Baltimore to Ellicott's Mill, Md., on May 10, 1830.

—Union Pacific Magazine

F. L. Carder, Richard Parry, A. F. Leonard and George H. Appold are several local men entering plant service recently.

C. H. Long, who was filling position of special apprentice when furloughed from shop, has returned to his duties, having been promoted.

Pipefitter J. J. Foley has the latest in radio at his home, installed by his son, William. We now get reports on concerts from all the leading cities of the United States. J. J. hopes soon to be in communication with London and Paris.

Laborer J. M. Bean has been confined to his home a number of weeks with a serious illness. His fellow workers hope to see "Joe" on the job again soon.

The Railroad Tie

"Blest be the tie that binds our hearts in Christian love," runs the old hymn; "the fellowship of kindred minds is like to that above." But the tie that binds us in national harmony is the railway tie. This should be always remembered. It is the secret of our existence.

—Herbert Quick

Have You Heard the New Song "Shenandoah?"

A song of our own Shenandoah Valley, written by Baltimore and Ohio employees for Baltimore and Ohio folks. Music by Leo Friedman, author of "Meet Me Tonight in Dreamland," "Let Me Call You Sweetheart," and others. Send in your order now for sheet music, rolls and records. Sheet music (with words) 25 cents per copy, postpaid.

Address:

Billy Shelton, 3024 E. 77th St., Cleveland, Ohio.

Mr. and Mrs. F. A. Sebold have gone to house keeping in one of Mr. Rees's houses.

We predict a great future for Garland Myerly—as a "Road Builder." Keep it up, boy! We need more like you.

The Quiet-Hour Children, under the leadership of Mrs. E. Allen, gave an interesting program at the U. B. Church recently. We are glad Mrs. Allen was able to resume her work with the children.

Mrs. A. E. Irving, wife of our genial tie inspector, is at the Alleghany Hospital at this writing, where she underwent a severe operation.

We are pleased to present for our fellow workers the photograph of Operator J. D. Rockwell and his charming family. Mr. Rockwell takes a deep interest in his work, his home and the community.

Rain and Fog

We claim Green Spring has more foggy mornings and as many rainy days as any point on the Baltimore and Ohio System. Figures below are taken from our weather chart for 1921. Can you beat it?

	HEAVY FOG DAYS	CLOUDY DAYS	RAINY DAYS
January.....	0	17	5
February.....	1	16	3
March.....	2	7	6
April.....	2	12	6
May.....	5	8	11
June.....	6	9	7
July.....	11	10	11
August.....	15	8	9
September.....	13	16	18
October.....	17	11	8
November.....	2	16	11
December.....	1	17	5

Total..... 75 147 100
(Note: 1921 is not our record year.)

Operator J. D. Rockwell and family, Green Spring

Swearing on Trains

Few of our trainmen or other employees would swear while entertaining guests in their own homes, yet they sometimes neglect this courtesy on our trains. I was riding in the smoker of one of our trains recently, seated with a gentleman of refinement, who from his garb and conversation I knew to be a minister. When we were approaching a terminal several trainmen were conversing loudly in the aisle about their work, punctuating and emphasizing their conversation with oaths, shocking to the gentleman seated with me and no doubt to other passengers. "Our passengers are our guests" and a friendly tip to trainmen will not be taken amiss.

To accompany our items this month we have a picture of Green Spring taken from the eastbound signal bridge by J. C. Alexander. This picture shows the main line of the Baltimore and Ohio, Cumberland Division, Green Spring station and grounds, the beginning of the branch to Romney and Petersburg and a portion of our town, as well as our tie yard and plant stacks in the distance.

Keyser, W. Va.

Correspondent, H. B. KIGHT, *Ticket Clerk*

Safety Agent Lenderking made an address on "Safety" to the pupils of the Keyser High School, at Chapel on Friday afternoon, March 3.

"Jim" Steadman, night ticket clerk, has been busy cleaning up his "Fierce-Sparrow" automobile, in anticipation of many trips to Terra Alta this summer. Seems to be some attraction in Terra Alta for "Jim."

James Smith has accepted the third trick at the Keyser Station Telegraph office. He has moved to Keyser. Welcome, "Jim."

Larry Alvaro, our cartoonist, has installed a vulcanizing plant in the First National Bank Building.

DEPOSITS \$1,055,260.26

The First National Bank

Keyser, W. Va.

SPECIAL SAVINGS DEPARTMENT

Interest paid every six months
from date of deposit

Seems there ought to be a chapter of the Veterans' Association in Keyser. We have at least a dozen employees (still in the service) who have 50 years or more service to their credit. The correspondent hopes to get this bunch together and to get a picture of them for the MAGAZINE, soon.

West End Conductor "Sargent" O'Brien had the toes on his left foot badly mashed while in the performance of his duties. He was given medical attention at the Hoffman Hospital, where it was necessary to amputate three of his toes. He has so far recovered as to have been able to leave the hospital and is now at his home in Piedmont.

Passenger Engineer E. M. Dawson had an operation performed on his arm at the City Hospital at Grafton, where a needle

On the famous Seventeen Mile Grade, between Piedmont and Altamont, W. Va.

Dr. Hoffman, Medical Examiner at Keyser

with four inches of thread in it was removed. How this needle entered his arm is not known to Mr. Dawson.

Brakeman Chilcoat was called to his home in Pennsylvania during the latter part of February, because of the death of his aged father. We extend to "Charlie" our deepest sympathy.

Brakeman Lee and Millhand James Hoover have our heartfelt sympathy in the loss of their mother, Mrs. Annie Hoover, who died at her home in Keyser on March 1.

Mrs. J. W. Johnston, wife of one of our roundhouse employees, died at her home on West Piedmont Street, Keyser, on March 1, after a short illness of pneumonia. We extend to Mr. Johnston our sincere and heartfelt sympathy.

With the coming of the spring time, comes the thought to the station employees to plant flowers and otherwise beautify the lawn between the Freight and Passenger Stations. This lawn was one of the prettiest along the right of way, last year, and we want it to be better looking this year than ever.

KEEP OFF THE GRASS, fellows and help us to keep our "Divisional kitchen" as clean as our parlor.

Thomas Head, was Keyser's agent about 1867. In this capacity he served for several years, resigning to accept the position of clerk of the County Court of Mineral County, to which office he was elected and served faithfully in for many years. He will be remembered by many of the older residents of Keyser. Assistant Terminal Trainmaster W. H. Virts of Keyser, is his son-in-law.

The accompanying picture is of Dr. C. S. Hoffman, one of our Relief Department surgeons located here. Dr. Hoffman has been connected with the Relief Department for 42 years. He was appointed Company's Surgeon on April 26, 1880. Several years ago he built the Hoffman Hospital here, and it is to this institution that nearly all of our injured and sick employees are taken.

Kreider H. Stover, Keyser's present agent, came to us a couple of years ago from the Western Maryland Railroad, where he had been employed as telegrapher

Kreider H. Stover, agent at Keyser, and Thomas Head, agent in 1867

and yardmaster. His pleasing personality has won many friends both for himself and for the Company he now serves. Mr. Stover was also employed by the Pennsylvania Railroad for several years. He spent several years of his life in the lumber business and during the years 1904-07 he was president of the West Virginia Saw Mill Association. He served Mineral County, West Virginia, in that memorable legislature of 1920-21, which ratified the 18th and 19th Amendments. And now rumor has it that he has thrown his hat in the Congressional ring. If that is a fact, we feel sure that before long Keyser will have another agent.

"Bill" Thrush, West End brakeman, is noted for his beautiful teeth—both of 'em.

The Keyser Collegians, composed of Baltimore and Ohio employes, returned the latter part of February from a tour of several of the western states, where they played some of the best basketball teams of the country. Out of 14 games played, the Collegians won ten, making their team the champion of eight states. On their return home they were met at the train by 1700 fans, headed by McIlwee's Band, and a parade was held. Rev. Engle, of the Presbyterian Church, standing on an automobile, made an address of welcome, after which the team was banqueted at the "Grill."

Enginemen A. S. and R. R. Nethkin have the sympathy of us all in the recent death of their father.

Main Street Crossing is guarded day by day under the watchful eye of Mrs. Lillian Boehmes. Up in the little crossing tower, she guards the safety of every person using this crossing, in a manner that is to be commended.

Agent Howard P. Stuck and wife, of Oakland, have recently returned from a trip to California.

We are indebted to Mr. Tapman, for a visit through his test car a few days ago. This a wonderful car, with its mechanical devices for recording any information desired, while testing out trains.

Safety Inspector "Ed." Sirbaugh is a great booster for the Loan Feature of the Relief Department. He is now purchasing his third house through this department.

Don't forget, fellows, you can get a copy of the MAGAZINE every month at the Ticket Office.

Thanks, Hardman, for your cooperation. Send in some more notes.

I have had occasion to use our trains pretty much over the division, or a part of it, lately, and have paid particular attention to the treatment accorded passengers by our train crews. From personal observation I have found them courteous and attentive to our patrons, and they are endeavoring to give the best service possible.

It is with deepest sympathy that we report the death of another one of our "Baltimore and Ohio Mothers." Mrs. Christine Avers, wife of Engineman Jacob Avers, passed peacefully away at her home on Spring Street, on March 11. We refer to her as a "Baltimore and Ohio Mother," and do so because of the sons she gave to our Company and who are now in its employ. She was the mother of John and William, west end enginemen; Clifton and Carl, shopmen; and George, clerk, Master Mechanic's Office. She was also the mother of Mrs. Claude Clevenger and of Mrs. Alex Miles, both of Painesville, whose husbands are loyal employes of our Company. A real Baltimore and Ohio Family.

Brakeman Tucker, who fell from train

29 at Roberts a few weeks ago and was badly hurt, has so far recovered as to be able to leave the Hoffman Hospital. He is now convalescing at his home near Parkersburg.

Keyser Shop

Painter Foreman Dunk is busy at home preparing his checker boards for the annual checker tournament, which will be held in the near future. At this time it will be expected that Messrs. Ketzner and Noone will represent the Superintendent's Office.

Car Foreman J. B. Gillum is lining up his repair track forces for spring practise at Mill Meadow, where he will "look em over" and select his baseball team for the coming season. "Mike" Ward, as usual, will be head coach, assisted by "Tom" Stanley and "Bob" Pownall.

Our assistant car clerk states that she will be eligible to the next vacancy as power clerk, as she is positive that her experience in tracing the movement of West End engines will be of valuable assistance for this position.

General Foreman Graney has about finished the renovation of the Roundhouse Office. The addition of a new door in the back will greatly facilitate the movement of the roundhouse clerks, if at any time one of the Mallet engines decides to make a call without advance notice.

Lent was observed by the clerks in Master Mechanic's Office by the following resolutions:

The shop clerk—Not to prepare any Forms 940

M. M. stenographer—To eat less yeast

Boiler clerk—Not to be so cruel to Dusty

Time clerk—To cut out the day dreaming

A. R. A. clerk—To cut Beechnut chewing

Assistant A. R. A. Clerk Susie—Not to wear her \$24.00 hat

Assistant A. R. A. Clerk Nell—Not to stop in roundhouse after 5.00 p. m.

Assistant car clerk—Cooking Parker (House) rolls.

On February 18, Electrician Helper P. V. Ritter, age 21, residing with his parents at Piedmont, W. Va., was instantly killed by engine 7206 backing over him. Mr. Ritter stepped in front of the tender of the engine after attending to the electric lights in the sand house. Mr. Ritter showed marked musical talent and was prominent in social entertainments. He was well thought of by his fellow workmen, who showed the extent of their sympathy by a handsome floral token, presented by them at the time of his death. We extend our sympathy to his parents.

"Pete" Sebold, operator, "DE" Tower, is the possessor of two mighty fine "goldfish" which were caught in the lake at Mountain Lake Park and for which "Pete" parted with two perfectly good Rhode Island Red hens. "Pete" says he was swindled in the deal, and that the goldfish were gold looking, only, having been covered with some of the red mud of the lake.

Keyser employes read in a recent issue of the MAGAZINE of the wonders accomplished in home-building by the employes at Somerset, and having had a similar plan in mind for sometime, decided to get busy. One meeting, a sort of a preliminary one, was held in the Freight office a few weeks ago, to be followed up, on March 16, by a big meeting in the office of the trainmaster. This meeting was held as per schedule and about 60 prospective homebuilders were present. Messrs. Shivers and Graham, of the Relief Department, were present and explained to the employes what the Loan

Guaranteed GENUINE LEATHER

7-Window Pass Case, Card Case and Bill Fold

Will show 7 regular size passes, identification cards, and photos, each under a separate transparent celluloid face protecting it from dirt and wear. Also has gusseted pockets for smaller cards and roomy billfold pocket in back. Railroad men tell me it is the bandiest thing they ever saw. Over 20,000 of them now being carried.

23K Gold Engraving FREE!

Your name and address (3 lines) and your emblem or insignia (order, brotherhood, lodge—I have them all) engraved in 23K gold absolutely free. This work alone is worth \$1.50 of anybody's money. Case is beautifully made of fine black seal grain genuine leather. Strongly sewed, neat and convenient. Size, 3½x4½ inches closed.

Send No Money

Don't send me a single penny in advance. Just send your name and address on the coupon below with the emblem or insignia you want. I will send you this wonderful pass case at once, and when the postman delivers it to you, when you actually have the goods, pay him only \$3.00 and postage. I positively guarantee that if you don't think this is the best buy you ever made, you may return it and I will refund your money immediately. I have been in this business for over 10 years. You take no risk. Send coupon now.

Sabraton, W. Va.

Correspondent, L. M. GUMP

Car Inspector C. B. Gosnell has been wearing a very worried expression lately. We understand that it is due to his fear of contracting the measles, which is quite prevalent at this time.

We regret to report the death of the father of our leading machinist, F. C. Pippin. The elder Mr. Pippin, who was for many years a Baltimore and Ohio employe, resided in Grafton, and had been ill for some time.

What Caused:

Agent Hansel to lose his religion?

R. L. Catlett to say "Uh-huh" over the telephone?

Storekeeper Farrell to go to Fairmont?

C. B. Gosnell to look worried?

T. F. Cassell to wear a regulation green flag March 17?

W. C. Johns to sprout whiskers?

March 17 saw storekeeper Farrell on duty with a handsome bunch of spinach adorning the lapel of his coat. We admire the spirit, but cannot say as much for his taste in flowers.

Favorite expressions heard around the shops:

Supervisor Catlett: Well sir, I'll just tell you now—

Conductor Mayfield: Well! (Always accompanied by shake of head).

Stockman Childs: By jolly!

Machinist Lewis: I b-b-betcha!

FEEDING THE CHICKIES

Virginia May and Glendine Gidley, at Sabraton

Engineer Runner: What am I on to-morrow?

Electrician Ware: How's the line this morning?

Here we have the two children of Tender Repairman R. M. Gidley. They are Virginia May, aged five, and Glendine, aged three. Mr. Gidley has been with the Baltimore and Ohio for four years and has his own home in Morgantown.

Martinsburg Shops

Correspondent, W. L. STEPHENS

The local Veterans' Association lost an active member and the Baltimore and Ohio a loyal and efficient employe by the sudden death of Brother Samuel Scanlon, locomotive engineer.

Engineer Scanlon was born near Three Churches, W. Va., where he spent the early years of his life. About 1882 he entered the employ of the Baltimore and Ohio. In 1890 he was given a position as locomotive fireman. He then resided in Keyser. After firing for a short time he was promoted to engineer. This position he held continuously until December, 1921, when he came home ill.

His illness was of short duration, his death of heart trouble bringing to a close a busy and useful life of 67 years. A widow and one son, Grover C. Scanlon, of Jamesville, survive.

Paw Paw, W. Va.

Correspondent, M. L. SHARON,
Retired Engineer

Mrs. Martin Hansrote, whose husband was at one time an employe of the Baltimore and Ohio, was severely burned about the body a few days ago. Her clothes ignited from a stove. We are glad to know that she is recovering.

We are glad to see Mrs. Guy Hare, who came in town on a visiting and shopping trip recently. Mr. Hare is track foreman, Magnolia.

There was a bad derailment just west of Paw Paw recently. Six cars were derailed, because of a broken flange. A good bit of coal was spilled on high line. Watch out

for the broken flanges, boys! They can cause a lot of trouble.

Since our last notes, C. W. Kaylor, our high-speed track foreman, has been complaining of a bad cold and probably grip. We noticed "Bill" coming from the doctor's office, and we are sure that he was feeling sick; all the same, however, he stayed on the job to see that things were going all right.

Some of the boys have caught a few fish already. This is an invitation to our old friend, Engineer "Joe" Linthicum, to come up for a week's good fishing.

Connellsville Division

Office of Train Master

Correspondent, C. E. REYNOLDS

Division Operator Jos. Riling met with an accident during the first part of March,

his home during the past few weeks. We all hope for his speedy recovery, so that he will soon be out in action with his numerous railroad friends.

On Sunday, March 12, Miss Bertha Naomi Peterbrink of Corriganville, Md., and Brakeman James Luther Geiger, Connellsville Division, were married in Cumberland, Md. After the ceremony they left for Dixon, Ill., to spend their honeymoon. On their return they will be at home in Connellsville. We extend our heartiest congratulations.

J. B. and Mrs. Coughenour, Confluence, Pa., left home on March 3 for an extended western trip that will cover several weeks. Their first stop will be at Topeka, Kan. They will then go on to California, visiting Stockton and a number of other places; going from there to Vancouver, B. C. On their return journey they will stop at

ALL AROUND CONNELLSVILLE

1. Forces at Connellsville Shops. 2. Scampering down the ladder. 3. A loving scene—Do you know 'em? 4. Messenger "Joe" Corvin

when he fell on the ice. An X-Ray picture revealed a broken bone of the left ankle, which has caused "J. R." to be confined to

Salt Lake City, Denver, Colorado Springs, and other places of interest. Mr. Coughenour was recently retired as engineer on the Confluence and Oakland Branch passenger train, after having been in the service for a goodly number of years. We wish them a pleasant trip.

On Friday evening, February 24, Miss Catherine Elizabeth Hart, daughter of Mrs. Margaret Hart of Connellsville, Pa., and E. Wayne Powell, of Harrisburg, were married at six o'clock at Harrisburg. After a wedding trip of two weeks to Canadian points, Mr. and Mrs. Powell were at home at Harrisburg, where Mr. Powell is employed in the State Treasury Department. The bride was formerly stenographer in the office of Superintendent Brown, Connellsville Division. Their wide circle of friends extend to them best wishes for a happy married life. On the date that Miss Hart left the service she was presented with some useful gifts by the members of the office force in the General Offices. In addition, the following words of "send-off" were given her:

"When in the course of human events, it becomes necessary for us, a common people, to assemble ourselves together for the sole purpose of wishing Bon Voyage to one of our gang, who through the general trend of things has suddenly decided to embark on the great sea of matrimony, we do so, those of us who have been through the mill, fully realizing that the step she is about to take is a serious one and fraught with many dangers. At the start birds are singing, the sea is calm and heaven seems nearer than it has ever seemed before, but hark ye, gentle listeners, Love is blind they say, and we cannot expect it to see the treacherous rocks and whirlpools which may beset the way.

"Alas and Alack! There are many, no doubt there are a few present on this occasion, who would like to take the step, but they hesitate, 'cause sometimes there is a "Jill" but there 'aint no Jack,—but all things come to those that wait and all you got to do when opportunity comes is open the door and let him in. You have our sympathy. Farewell, Farewell, Cass old girl, you have been a good old wagon and we bid you fond adieu. We'll miss you, and that fountain pen of yours, and that high falutin' jeer you used to give to us, but we cannot forget you, cause where you used to sit there is now a vacuum and there is no cushion on the chair (Vince got it), and as we look across the desk where Cassie used to be we also note that there is gone the look of despair that we were wont to see as first you pondered over the comparative statements and form Seven Nineties. May your journey be long, happy, prosperous and without regrets—This is our wish as we present you these little tokens of our esteem."

(Signed) The Gang.

Here we see a picture of the fair ones on the ladder leading to the water tank at Connellsville Roundhouse. Just as they were "shot" by the camera, a "Big Six" started spitting—and just see them scampering off the ladder.

The Safety Flashes issued by the Safety Department for the month of March indicate that the year 1921 was the banner year in accident prevention work on the Baltimore and Ohio. Good! So, in order to make this Railroad safer for one and all, let's pull together and make a better showing for the year 1922.

Notice: We hope that all employees of

the Connellsville Division are anxious to see something of interest in the MAGAZINE each month to cover happenings on this division; therefore, in order to not disappoint you, the correspondent would appreciate your co-operation in sending him some notes on or before the 10th of each month.

We present the latest photograph of our very, very, efficient messenger, "Joe" Corvin, Superintendent's office, Connellsville. Some of the girls call him "Joseph," but he doesn't like it a little bit, for Joseph argues that his name is "Joe." Don't let them kid you, Joseph!

Daniel Hunt, the veteran passenger conductor on trains 69 and 70, has purchased the confectionery store on North Gallatin Avenue, Uniontown, Pa. Here he will keep all kinds of fresh fruits of all varieties, and fresh confections, tobacco and cigars. He will be pleased to see his many friends.

"Tucker" as he is familiarly called by his old friends, has grown gray in the service and is probably the oldest employee in passenger service on the Connellsville-Pittsburgh Divisions. Drop in and see "Tucker" occasionally in his new place of business. He will be pleased to see you, and will greet you with that old winning smile of his which makes every one feel at home in his presence. When off railroad duty, he has many interesting things to say.

Here are some of our folks who like to get their pictures "took" on the head end of engine 6015 at Connellsville shops. Those in the group are, left to right, front row: John Honisek, H. Y. Pittsburgh Division

Correspondent

E. N. FAIRGRIEVE, *Car Distributor*, Office of General Superintendent

At a joint meeting of the committees representing the Pittsburgh, Connellsville and Cumberland Veteran Employees' Association, held at Connellsville, Monday, March 6, it was decided to hold the third annual picnic and outing at Olympia Park, on Thursday, July 20, next.

Olympia Park is located about three miles from McKeesport, along the line of the Baltimore and Ohio, and is conceded to be the largest natural park in the State of Pennsylvania, containing 76 acres of natural woods and beautiful lawns, and the best amusements that money can buy. There is the carousel, or old fashioned "merry-go-round" which delights the heart of the youth and many of the "old folks;" the "Leap Frog," the "Whip," the ball grounds, the shooting gallery, and other amusements, besides a magnificent dancing pavilion where young and old, alike, delight to trip the light fantastic to the music of a dreamy orchestra.

C. H. Durant, chief clerk to Superintendent Beltz, is the chairman of the Executive Committee of the Pittsburgh Division Veterans' Association. He has stated that the New Castle Division Veterans will be invited to participate in this outing, and that everything will be done to make this third outing the best that has ever been held. Numerous sports are being arranged for, and these, with dancing, baseball and other equally attractive features, will afford an excellent opportunity to spend a delightful day in the woods, not far from home. We hope everybody will take advantage of this opportunity and set aside July 20 as a day

winsomeness of her smile as the train rolls on. Now, these two boys, their names—O yes, we forgot to tell them, Messrs. Davenport and Deitsch, both work on the same floor, and we are told that they make an awful attempt each night to get into this certain coach. Guess it will be a case of the best runner. We hope it will not be a one sided affair, 'cause both these lads are good fellows and we would like to see them both win. O, Boy!

The Bowling League will have finished the season on March 28. The Pacific team, captained by "Joe" Rausch, is leading at present with 53 wins out of 78 games played.

There is a tie for second place between Mogul and Prairie Teams, each with 49 games won and 29 lost. A banquet will follow shortly and will close the second successful season.

Frank Staf, the "prince chap," who recently undertook to raise some fringe on his upper lip and got cold feet, startled his fellow employees in the office recently by appearing immaculately dressed and wearing a derby hat. Some day Frankie may become a Beau Brummel and take a notion to go to Hollywood. Didn't say Hazelwood, I said Hollywood—out where Mary and Roscoe and Mabel startled the natives.

The many friends of Engineer Frank J. Hughes will be sorry to learn of his death on February 26. Engineer Hughes was born on January 24, 1855. He entered the service of the Baltimore and Ohio at the age of 14 years, in the M. P. Department. The following year he was promoted to freight fireman, which position he held until November, 1874, when he was made a freight engineer. He followed this employment until February 1, 1898, when he was made passenger engineer. Death has ended the career of a trusted and faithful employee. He has made his last run and gone home, mourned by all.

The death of Veteran Hughes recalls to mind three other Veteran employees who have answered their last call, Conductor M. J. Ford, Conductor D. W. Darby, and Baggageman F. E. Butts. Conductor Ford was born on June 9, 1865. He entered the service as a freight brakeman July 26, 1896;

was promoted to freight conductor on January 11, 1901, and to passenger conductor on September 26, 1921. This position he held at the time of his death, December 12, 1921.

Conductor Darby was born on January 25, 1873. He entered the service of the Baltimore and Ohio on November 14, 1894 as freight brakeman. He was promoted to freight conductor on February 6, 1899. He died on November 21, 1921.

Baggagemaster F. E. Butts, the oldest P. & W. baggage master, entered the service as a passenger brakeman on May 1, 1874. He was promoted to train baggage master on September 2, 1884. This position he held at the same time of his death, December 19, 1921.

Thus records the passing of some veteran employees who were loyal and faithful, gone to their last reward, mourned by all.

Our old friend Cupid is sneaking around again. We have heard that one young lady in the Division Accountant's Office has already succumbed to his wiles, and, as a proof, sports a beautiful ring. We know a couple out of the same office who did the same thing and they are getting along fine. Mildred, there's no reason why you can't do the same thing. Wish you luck, but don't let him be boss. Remember Jiggs and Maggie.

Now, Miss Andrews—Miss Jayne Andrews, if you please, what's this we hear murmured about you and a certain young man? The train shed is pretty cold in the winter, and you shouldn't stand out there. It's pretty cold in the vestibule these nights, but down in the train shed, O mercy! Take him home and introduce him to "Pa" and "Ma" and if he's O. K., they'll let you sit in the parlor where it's warm.

Northern District

Correspondent, J. F. MILLER,

Assistant Trainmaster

Coming—A Gun Club

The boys at Foxburg from the shops, train service and other departments intend to organize a Gun Club. The matter has not yet taken definite form but there has been a great deal of discussion about it.

The nature and style of the organization has been talked about and in addition to the usual officers such as president, secretary, etc., it was thought that various committees would be necessary. The following are suggestions: Shot Committee; Powder Committee; Ways and Means; Commissary Department; Surgeon; Pallbearers; Chaplain.

To stimulate interest in the movement there was an "informal" shooting match held a few days ago, 15 trees from the Upper Switch Back. By request, no names are mentioned or scores published. All kinds of ordnance ancient and modern were on exhibit and in action at this time. Some good shooting was done and some that was not so good. On the whole there was more damage done back of the shooters than ahead of them. Tales have been told of wonderful fire-arms, some that would "shoot around a corner" but on this occasion there were some that could shoot a "round trip."

There is an old, red rooster that stays down along the river. It had one eye strangely missing. It had always been in place before.

"Andy" Edinger, veteran section foreman at Turkey, has a pet porker that has always been allowed to roam at will. One night it was walking on the track and there was a broken rail. It got one of its feet fast between the sections of the broken rail and could not get loose. It squealed "Andy" out of bed, was liberated and the broken rail repaired. This is, so far as we know, the only case on record in which a broken rail was reported in this manner. "Andy" exempted His Porkship from attendance at all sausage parties and preserves him for the good he has done. Now the point of this is that on this particular date this versatile porker reported at the usual time for his lunch with a neat round hole in one ear. Such are the mystifying events to those citizens who have had no information about the shooting match.

It is hoped this movement will succeed and the Gun Club will become a permanent institution. Casualties will be reported monthly.

Winsome Winifred Applebe, daughter of general foreman at Glenwood

Please mention our magazine when writing advertisers

Glenwood Round House

Correspondent, MARY E. BREEN

Here is a picture of Miss Winifred, three year old daughter of General Foreman J. M. Appelbe. If she keeps on being as winsome as she appears here, it will be good-bye for the rest of the girls when Winnie starts on her vamping expeditions.

Yard Brakeman D. L. Tompkins is the chesty father of a son, who, we suppose, will be "D. L." Junior. Congratulations!

Car Inspector W. H. Steppe is boasting the arrival of a young lady at his home. She's evidently come to stay and W. H. admits that like the rest of the women, what she says—goes.

Omar Horam, Glenwood Round House, and Rose Connelly were married at St. Stephen's Church on Tuesday, February 28. In addition to having the best wishes of all of us, they were sharing honors with Princess Mary and her Viscount. We are sure that Omar and Rose (for we can't quite get used to "Mr. and Mrs. Horam"), carry just as hearty good wishes as did they.

Suspicion has it that Machinist Helper T. E. Johnson finds something exceptionally attractive in Youngstown, Ohio. Of course, "Tommy," we know that your home is there but these many flying trips lead us to the conclusion that there must be something more in the way of attraction and we wouldn't be the least bit surprised to hear of another wedding shortly.

"Speed Recorder King" and "Wireless Fiend" are the two titles which one of our machinist apprentices is acquiring. Which do you prefer, "Bud?" One or the other certainly belongs to you.

Of all the sad things that ever happen I, I believe this little story is the worst. Not so long ago, train No. 16, bound for Cumberland on a Saturday afternoon, carried two young ladies who were the picture of happiness; life was simply at its fullest. But imagine the terrific cloud that came when alighting at Cumberland, that cast anxious eyes about to find no prospective husbands. They came back all right, but don't ask them anything about that trip to Cumberland. Possibly the rest of us will profit by their experience and when embarking on the stormy sea, will see that our futures are safely launched on our arms and won't permit them to get more than 10 feet away until they repeat the fatal "I will." Of course, I may have been misinformed but the persons who told me this story were so seemingly truthful about it that I simply had to believe it.

Here's to the baseball season! May it soon be on—but oh, what sympathy we are going to be calling into play! Personally, I have heard of no less than 29 grandmothers who are going to expire this summer and the only thing that I regret is that I haven't about five myself. They could be pretty sick for one game and then, well, it would be some other calamity for the next time.

View of standard track west of No. 23 Tunnel, west end, Parkersburg Branch, Monongah Division. This is the first class B standard gravel track that Ira E. Baker and crew of Kanawha Station (as seen in the upper picture) have built in his twenty years' experience as section foreman

Monongah Division

Correspondent, CECIL B. BAKER

Office of Division Engineer

The late Frank E. Fuqua

Frank E. Fuqua was born at Fork Union, Virginia, on April 5, 1869. He entered the service of the Baltimore and Ohio as extra operator on the Monongah Division on February 10, 1901. On September 16 of the same year he was promoted to train dispatcher, which position he held until he was transferred, on March 1, 1916, to Baltimore as supervisor of transportation. He held this position until November 1 of the same year when he was returned to the Monongah Division as division operator, which position he held until his death.

The news of Mr. Fuqua's death came as a distinct shock to the entire division family. About February 1, he became ill of influenza and was confined to his bed for a few days. He seemed to recover, however, and went to his old home in Virginia to recuperate. It was the general impres-

The late Frank E. Fuqua

sion that he was getting well fast. On February 26 he wrote to friends in Grafton saying that he was doing nicely and that he would return in a short time. On March 2 the word came that he was dead.

Mr. Fuqua was one of the best known and best liked men on the Monongah Division. He had the courteous manner of the true Virginia gentleman he was, and possessed a disposition that made all who knew him admire him. His position may be filled by another but his place in the hearts of his friends will be forever vacant.

The late T. A. Deegan

On March 1, the Monongah Division was deprived of the services of one of her most faithful employes by the death of T. A. Deegan, platform foreman at Grafton Freight House.

Mr. Deegan was born at Bellaire, Ohio, on August 21, 1856. He entered the railroad service on October 3, 1876, at Wheeling as platform foreman. From September 14, 1886 to June 20, 1890 he was caller at Wheeling, and from the latter date until September 10, 1901 was foreman at Benwood. He was then transferred to Grafton where he remained until his death.

Respect and affection for Mr. Deegan were not circumscribed by railroad circles. He was well and favorably known by all the business men of Grafton and vicinity as well as by those with whom he was associated in his social and religious life.

Charleston Division

Correspondent, M. W. JONES
Secretary to Superintendent
Smile!

People come into your office daily for the purpose of purchasing tickets, dispatching freight, asking for information, etc., but underneath the exterior there is a cord of sympathy in every human breast waiting to be vibrated by a cheery smile, a kind word and COURTEOUS attention. Start the vibrator. "It's the voice with the smile that wins."

Business conditions during February showed some improvement over January, coal business being exceptionally good. Lumber business showed only a slight improvement. Weather conditions were bad during the month, resulting in delays and interruptions from slides, rock falls, etc.

We have all read "Mirrors of Washington" and "Mirrors of Downing Street" in

our daily papers. It may be of interest to us to read a few "Mirrors of the Charleston Division," and so here's the first.

Years ago—who will say how many?—in the little town of Vandalia, Lewis County, West Virginia, there was born Pierce D. Marsh, destined later to become a prominent figure in the daily life of the Charleston Division of the Baltimore and Ohio. In his younger days he became afflicted with "Wanderlust" and went with the First Nebraska Regiment to the Philippine Islands. Becoming tired of this life in the tropics, he secured an honorable discharge and in 1899 was employed as a fireman on our road. In 1901 he became a freight engineer, and in 1906 a passenger engineer, which work he stuck to until 1917 when he was appointed road foreman of engines, which position he holds today. To the early days of Marsh's railroad experience as an engineer, there hangs a tale, which is written in red letters on his service record. In 1907, while engineer on old No. 6, running from Clarksburg to Pickens, while ascending Fisher Summit he saw in the distance nine loads and two cabs off a freight which had broken apart at the Summit, coming towards him at runaway speed. Quick as a flash, Marsh reversed his engine and started down the hill as fast as he could turn a wheel. Using his judgement he allowed the runaways to catch him at the foot, and caught them with the result that but very slight damage was done to his engine and practically none to the cabs, but what was far more important, the lives of the passengers were saved, no one on his train being even bruised. For his cool judgement in a trying situation Mr. Marsh was presented with a watch by the Baltimore and Ohio Railroad, and with a Carnegie medal by the Carnegie Foundation. It will be seen, therefore, that even back in the days before the formation of the Charleston Division, our friend was a believer in the slogan "Think About It." We take pleasure in presenting to our readers a photo of Mr. Marsh in our column of honor this month, a place he deservedly fills. Of a calm and diplomatic nature, Mr. Marsh stands high with his superiors and with the employes with whom he has worked for so many years.

Among our visitors during the past month, we noted C. T. Allman of the Telegraph Department. His caretaker, Mr. Donnelly, however, was not with him; therefore we assigned one of our number to see that he "watched his step" while so far away from home. "Joe" McCaghey was also with us for a day or two—as always—a welcome visitor. G. D. Dreschler, after a long absence, again graced the division with his presence, but among the missing we number our old friend Utterback. Anyone seeing him will please advise him that Weston is still on the map, and head him in this general direction.

"If YOU could read the thoughts of our patrons, as they leave our trains, we wonder how often you would discern kind and friendly impressions of your dealings with them. Show them that you are a regular fellow—and that can mean but one thing, more business for your Company, and more work for you."

Conductor A. Kiddy, Brakeman E. Newlon, Steward J. A. Crouse and Porter Robert G. Anderson, trains 57 and 58, running between Grafton and Charleston, have been highly commended for their courtesy and care of passengers. Through this courteous treatment a party from New York, who had intended to return via a competing line, decided to use our line on the return trip.

Superintendent Holverstott and Assistant Superintendent McClung, of Grafton, recently passed through Weston, on their way from Clarksburg to Buckhannon and Grafton, deciding they would like to take a short ride over a "real" Railroad.

Full information regarding the "Annual" block system will be gladly received by a young lady in the Superintendent's Office. She wants to study it. Similar information will be gladly received regarding good linaments.

A. C. Mason and his wife were given a surprise shower by the Charleston Division employes, shortly after their recent marriage.

We are glad to report that Trainmaster J. D. Nicholas has entirely recovered from his recent illness. Our sincere sympathy is extended to Trainmaster W. C. Deegan, on the death of his father, the latter a veteran of the Baltimore and Ohio service at Grafton.

We are in receipt of a letter from Mrs. Theresa Ramsburg, asking that we express her thanks to all Charleston Division officers and employes for the sympathy extended on the death of her husband, Engineer Ramsburg.

Congratulations are extended to Engineer Shea on his recent marriage. Our best wishes for prompt recovery are expressed to Mrs. W. F. Miles, wife of conductor, who is in the Baltimore Hospital; to Passenger Brakeman "Si" Perkins who has resumed duty after an operation for appendicitis, and to Fireman G. W. Firth, recovering from an operation for appendicitis.

In our columns this month, you will find a photo of Dorothy Ann, the little daughter of Assistant Chief Clerk Pickens. A small railroader in the growing.

Our friend Miss Helen Beyerley, stenographer to the assistant superintendent, has returned from a trip to New York. She was relieved by Mrs. C. H. Sanders. We understand Miss B. had considerable difficulty in finding her way 'round, but she tells us that Baltimore and Ohio people put her on the right track every time, and so she was able to return to us without the necessity of our putting a detective on her track.

A Ladies' Committee has been added to the many activities of the Y. M. C. A. at Gassaway. Mrs. J. H. Bowen is president, and Mrs. J. M. Davis, secretary. They hope to launch a number of activities among the ladies and girls of Gassaway at an early date.

F. H. Remaley, our popular storekeeper, Gassaway, was a recent visitor at Wheeling and Weston. We show you his photo in our notes this month. Mr. Remaley has not been long with us, but long enough to make a warm place for himself in the hearts of his fellow workers. That he is a living exponent of "Good Housekeeping" is a fact, as is shown by a photo of his storehouse which we printed in our MAGAZINE a few months ago.

It is said that Clerk A. Crosslin, Car Department, at Gassaway, recently took a trip to Baltimore and the east. We have our doubts, however, whether the said trip extended far beyond Weston.

General Foreman C. E. Shepard, Gassaway, is off because of ill health, and is recuperating in Florida. We hope to see him back soon. Our old friend "Bill" Longwell, formerly of Buckhannon but now of Clarksburg, is recovering—we are glad to say—from a recent operation. He is doing it in Gassaway—"There's a reason."

The Gassaway Baltimore and Ohio Basketball team, consisting of Frank Henrietta, "Jimmie" Sergeant, "Jake" Williams, Ralph Boggs and Doyle Boggs, has won many games this year. The Baltimore and Ohio band is always on hand to liven up their games with music.

Dr. L. A. Jarrett, Company surgeon, Gassaway, and brother of one of the Division's finest conductors, has given up his position to take a post graduate course at Baltimore.

Get General Car Foreman Frank Garber, our old friend, to tell how he got "left" the other day. He was called to Wheeling for a business meeting. At Clarksburg, however, after he was all set for a day or so in the big

town, a wire was received reading: "Meeting busted, go way back and sit down."

Engineer B. M. Shears, Elk Line, has been commended on two occasions recently for good judgement in handling his engine.

"Soon after a man learns to drive his car, he wonders why the trains don't heed the 'Stop-Look and Listen' signs at the crossing."

A drive is being made on the Charleston Division by officers and safety committeemen to instill into the drivers of autos the lesson of "Safety First." Good results are being obtained.

We show you here a photo of Section Foreman "Sam" Goodwin, of Elkins, one of our

Illinois \$5.75 Per Month

The 21-Jewel Bunn Special
made for
Railroad Men

Send No Money

This 21-jewel Illinois Watch—the Bunn Special sent on trial. Do not send us a penny. The Bunn Special, made to be "the watch for railroad men" is adjusted to 6 positions, extreme heat, extreme cold and isochronism. 21-jewel movement. Montgomery Dial, handsome guaranteed 20-year gold-filled case. **Guaranteed to pass inspection on any railroad.**

After Trial a Few Cents a Day

The watch comes **express prepaid** to your home. Examine it first. Only if pleased send \$5.75 as first payment. Wear the watch. If after 10 days you decide to return it we refund deposit immediately. If you buy, send only \$5.75 a month until \$57.50 is paid.

ORDER TODAY Just send us your name and address. No red tape. Just "Send me the Bunn Special." Do not enclose a penny. Don't delay. Write today.

Our 128-page catalog, No. 4014 shows more than 2,000 bargains in diamonds, watches and jewelry. Write for it NOW.

J.M. LYON & Co. { Dept. 11 Maiden Lane
4014 } New York City

old timers. Entering the service in 1896 as a trackman for the W. Va. and P. R'y. Co., he went with the R. & C. B. in 1898, and to the Coal and Coke in 1898, as foreman, where he has been ever since. Mr. Goodwin is a strong advocate of "Safety First" and during his service has not had a man injured in his gang. He hopes to keep up his record, and we believe he will.

"THINK—The young man who applies himself to Thinking will, bye and bye, be amazed to find how much there is to think about. He should never be content to take things as they are"—Kahn.

A prominent and useful figure in our daily passenger service is Brakeman E. F. Sands, whose photo appears this month. Popular with his passengers, "Courtesy" is his middle name. We also show you a photo of Freight Brakeman H. Duffield and his son Burlin, and then another of Freight Brakeman C. W. McMorrow (Sands is hiding behind him for some reason—natural modesty probably). Then we have another group of the boys at Gassaway, consisting of Brakemen McMorrow, Cogger and Brown, all good Safety First men.

As we told you last month, Passenger Conductor J. R. Cox and his wife were in Morton, Wash., hunting big game. Fisherman "Jimmie" has returned to his old job on the Pickens Line. Here in the photo you see him with one of his "kills." A fine large deer head now graces our office, brought there by the hand of "Jimmie." He says he killed it personally. The proof of the pudding is in the eating they say. Let it go at that. It's a beauty anyway.

FOREIGN CARS EAT MONEY EVERY DAY THEY STAY HERE.
CHASE 'EM!

We are in receipt of advice that H. L. Dow, formerly stenographer to our assistant superintendent, Gassaway, is now secretary to the superintendent of the Dining Car Department, Northern Pacific R'y, St. Paul, Minn. Our congratulations and good wishes!

'WAY DOWN ON THE CHARLESTON DIVISION

Foreman Samuel Goodwin, Elkins, W. Va. 7. Storekeeper Remaley, camera hunting. 8. Brakemen McMorrow and Sands, playing peek-a-boo.

9. Passenger Conductor J. R. Cox and a fine catch

Please mention our magazine when writing advertisers

Did you know that Father Schude is raising chickens? Yea, boy! 16½ eggs per day is the record. Don't know just where the half comes in—but then's his figures. His wife says he's so interested in the "CHICKENS" that when he gets back from the office she has a hard job to make him even come in and eat. Never have that trouble with "Bill" Severns, we'll bet. By the way, "Bill" takes a two mile walk every day trying to get off a little surplus weight. We think the best thing would be for his wife not to feed him so well. She's some cook! For proof—SEE "BILL." He's dancing a whole lot, too, these days, and so perhaps we may see results later.

"It's better to say 'This one thing I do' than to say 'These forty things I dabble in.'"

Our old pal, "Sam" Strachan, assistant to the general freight traffic manager, paid us a flying visit the other day. We were glad to see him, to see him looking so well, and to know that he doesn't forget the old division.

Our fuel performance has been disappointing for the past couple of months. (See fuel bulletin.) The Charleston Division is not in its proper place—First. Get busy and let's put her there.

COURTESY IS AN ASSET

The old fashioned idea that a Railroad must maintain a cold, conservative atmosphere has been dispelled. On this Railroad we hope our patrons will meet men who consider courtesy an asset. Invite your friends to patronize our service, with the assurance that the size of their shipment or the distance they travel will not regulate the courtesy we extend. Treat them as your guests, and remember—every dollar you add to the revenue of the Baltimore and Ohio means just that much more for construction work, and for the employment of more men. Won't you do your little bit with this end in view."

Claims are a big item. Our Claim Prevention Committee is working all the time. What does Claim Prevention mean to YOU, individually? Every claim prevented is just that much money saved for more useful purposes, and the WASTE of just what much avoided.

Wheeling Division

Bellaire, Ohio

Correspondent, J. S. STAMM

Our noble councilman from Shadyside, Harry Koenemund, chief clerk to freight agent, was absent from duty because of sickness. We are glad that he is back on the job again.

A "theft" which has been in the limelight ever since Christmas has just concluded its final chapter. E. J. Kincaid, our "Beau Brummell," purchased a very large and attractive box of candy for Anna for Christmas. E. J. hid the candy in the Freight Office while he wandered forth to purchase a card for the occasion. When he returned the candy was gone.

Earl made a canvas of the office force but aside from much sympathy, and not a few ill-concealed giggles, the search proved futile. As a last resource our "Limb of the Law," "Bobby" Evans, was pressed into service and was promised a good cigar when the candy was located. But, strange as it may seem, the candy was not located until Earl, fully realizing that Anna must have her candy by Christmas, had to purchase another box. Now, just as soon as box No. 2 had been purchased, Box No. 1 was found

by Mr. Evans and had to be passed out to the force. Some treat! The promise cigar has just been received and Mr. Evans says it is one of the finest five cent varieties on the market, and "Bob" adds—"Next time I hide a box of candy from Earl, I will get the cigar before I find the candy."

We have noticed in the "Among Ourselves Department" of our MAGAZINE, some things that we would like to be seen in some of our officers, but in Bellaire we never expect to live to see the day when:

Mr. Pomeroy will be without his "Smokeless Tobacco"

Betty won't want an Eskimo pic
Allen won't have his hair cut every Saturday

Charlie Harris without a "wheel barrow"
Bernard craving to be a snake charmer
Some of the fish "Jack" Pryor catches
"Dad" with a shave
Or I. M. Hite failing on an "Air" exam.

Signal Foreman A. J. Wells, who has been in the hospital for the past month, died early on the morning of March 18. Mr. Wells has been in the service for many years. We will miss his happy smile.

We were very glad to learn that Operator R. C. Zimmermann, "J" Tower, who has been absent because of sickness, will soon resume his duties.

General Yardmaster "Phil" Reilly, who was called to Lynn, Mass., because of the serious illness of his mother, has returned with the welcome news that Mrs. Reilly is now out of danger and is much improved. We are glad to have you back, "Phil."

Operator Keenan has just finished a course in "Domestic Science." It is understood that in the near future invitations will be issued for a good old time dinner to celebrate the completion of Operator Morgan's "Little Bridge."

Congratulations are extended to Mr. and Mrs. C. S. Rice, who have a new baby girl at their home. Mr. and Mrs. Harry Smith are also most heartily congratulated on the arrival of a baby girl. Harry is receiving clerk at the Freight Office.

Our ever alert guardian, R. R. "Rail Road" Evans, can count his friends by the thousands, but that black pipe of his is friendless. There was, at one time, a rumor that he was going to buy a new pipe, but "R. R." says there is no truth in it. He further states that we should appreciate it since he has to go all the way to 49th Street to purchase that particular brand of tobacco. We believe it, but what we marvel at is that he is permitted to smoke that pipe within the city limits. It is, we suppose, a case of "Love me, love my pipe."

Bridgeport, Ohio

"Jack" Murphy, our esteemed billing clerk, created quite a stir with his new spats and cane. "Jack" says they are not new; he has been wearing them for a month—around home. His dad followed him all that time and would not let him get out of the house with them on.

Holloway, Ohio

Correspondent, O. R. TELLE

In the past month, the spirit of the safety meetings was again awakened, and a meeting was held in the Office of the Assistant Master Mechanic. All the crafts were represented, and several important issues pertaining to "Safety" were discussed. With the co-operation of everyone, safety meetings will be a wonderful success.

Mr. and Mrs. C. H. Douglas are the happy parents of a new baby girl. Congratulations!

On February 13, a fire suddenly broke out in the home of Robert Karr, who is employed as stationary engineer at this station. As soon as the call of fire was heard, shop men and other citizens of Holloway immediately responded, and put forth a gallant effort to save Mr. Karr's property. But the fire had too much of a start, and the property burned to the ground, burning also the furnishings. The fellow employees of Mr. Karr join in extending sympathy to him.

Any one wishing to learn the fine points of flying a kite can obtain latest instructions from Night Roundhouse Foreman W. O. Kennedy who gives lessons daily when the weather permits.

Gladysce had two little lambs,

With legs as long as could be,

And every place that Gladysce went,

The lambs you were sure to see.

"I take this means of thanking each and every person for the effort put forth in trying to save my home, and who extended their sympathy in such a substantial manner, thereby helping me to establish a new home.

"I also wish to thank the officials of the Baltimore and Ohio Railroad, who were so thoughtful of my interests as to permit one of their engines equipped with fire fighting apparatus to come near to the scene of the fire and assist in extinguishing the blaze."

(Signed) R. M. KARR

The accompanying picture shows Mrs. Mabel Schatz, our expert record clerk, employed in the Local Car Record Office, taken at her home in Norwood, Ohio.

"She's a rotten sermon," grumbled the big Swede from one of the Twin Cities when he returned from his first attendance at an American church, "all the time the minister talk about St. Paul and never say a word about Minneapolis."—*M. M. C. News.*

Smiling Mrs. Schatz. Mabel is our record clerk, Cincinnati Terminals

Newark Division

Correspondent, B. A. OATMAN

At the regular meeting of the Baltimore and Ohio Veterans' Association, Newark Division, which was held on March 2, the initial move toward securing an increase in the pay of pensioners was inaugurated by the appointing of a committee of sixteen, who will canvas every department on the Newark Division. These will ascertain if the majority of the employees favor an increase in the monthly insurance deduction, the extra amount to be set aside as a fund to be used in increasing the monthly pay of all Baltimore and Ohio employees who are now or will be placed on the pensioners' roll.

The committee appointed is made up of live wires who no doubt will bring this matter to a successful finish. When you are asked to sanction this feature we hope that you will, without any hesitating, offer your assistance in this worthy cause.

We were very much pleased indeed, to have Vice President and Mrs. J. M. Garvey with us at the meeting. The remarks by Mr. Garvey lead us to believe that the Newark Division Vets have made the initial move of this kind on the system. Let other divisions fall in line.

The Stores Department reports the following new arrivals: John Vernon Husband on February 10; William Ellwood Stockdale and Mary Bell McKnight, both on March 4. Mr. Husband is employed as order and receiving clerk; Mr. Stockdale as invoice clerk; and Mr. McKnight as supply clerk. Congratulations, boys!

We notice that Clerk Earl Holman is sporting a dandy new typewriter desk,

marek, Newark, Ohio. C. E. Brennan has been made storekeeper, Zanesville.

We are indeed fortunate in being able to present herewith a picture of Miss Ruth Isabel Grimm, charming granddaughter of General Yardmaster "Cliff" Grimm.

Miss Ruth is twenty months old, is full of life, and promises to be just as good a conversationalist as her ancestors.

W. A. Johns

Born April 8, 1847. Died February 25, 1922. Mr. Johns entered the service of the

Baltimore and Ohio as brakeman at Zanesville, Ohio in June, 1868; he continued in this branch of the service in Zanesville Yards until February, 1888, when he was transferred to Newark, Ohio, where he continued in the yard service until 1905, when he was assigned to the care of one of the yard targets. In 1910 he was made crossing watchman in west end of Newark Yards, an important intersection point with the Pennsylvania Railroad. In 1917, Mr. Johns was placed on the Pensioners' roll after a long and faithful service.

No railroad man in this vicinity was better known than Mr. Johns and his death is regretted by all, but particularly by his older friends and members of the Baltimore and Ohio Veterans' Association, to which he belonged and in which he took an active part. Mr. Johns leaves a widow and four children: J. Albert, of the Division Accountant's Office; Daniel, Loretta and Agnes Johns.

The sympathy of the Baltimore and Ohio employees of the Newark Division is extended to the widow and family.

The Ladies' Auxiliary of the Baltimore and Ohio Veterans' Association held its annual installation of officers at Newark, Ohio, at Engineer's Hall on East Main Street. After the ceremonies a sumptuous chicken dinner was served to the seventy-five ladies who attended.

Division Accountant's Office Newark, Ohio

Correspondent, Miss MARY GAINES

Otto H. Reichert, who has been absent from the office for some time suffering from an attack of rheumatism, is improving and is able to be about again.

L. J. "Doc" Savey, has been assigned to the position of C. & N. accountant, vice J. S. Price, who is ill.

"Bob" George has returned from Mt. Vernon, Ohio where he attended the annual convention of the Elks.

Miss Anna Weigand has been absent from her duties as file clerk to superintendent for a few days because of illness.

We are glad to announce that Robert Laird, son of chief clerk to division superintendent, is recovering nicely from a severe case of pneumonia.

Every railway clerk in Newark has been given a supply of both flower and vegetable

STORES DEPARTMENT, CASTING PLATFORM, IVORYDALE, OHIO

Right: Little "Bobby" Wilson and "Billy" Pershing, twin sons of Switchman and Mrs. Charles E. Connor, Cincinnati, Ohio

fully equipped with four legs and insulators. We do not understand just how Earl gets all the finery unless it is due to his ability to make up good requisitions.

In taking a census of the forces employed in the Stores Department, we discovered that seven clerks are employed, all are married and seven boys and three girls grace the homes of the seven clerks. Congratulations, boys, but we would like to hear from Earl.

We hear that Chief Clerk Kinney is using his extra hours after work in shining up his fishing tackle. Of course, he does not care to have this made public, but we expected to hear this anyway as Walter is a devoted follower of Isaac Walton.

Zanesville Stores Department has been taken over by Division Storekeeper Kaz-

Please mention our magazine when writing advertisers

seeds, donated by Congressman Willis. Now dig up your spade, hoe and rake and get busy. Let's make 'em grow!

We are glad to announce that J. S. Price, C. & N. accountant, is gaining some strength. He has been moved from the hospital and is now under the care of relatives. Mr. Price had a stroke while at his desk some time ago and did not regain consciousness for over a week.

Sandusky, Ohio

Correspondent, Miss I. C. MARTIN

Sandusky furnished a good ice crop this season; all lines at this station put up a good supply at the various icing stations. The Nickel Plate Road procured part of their ice for the Bellevue plant here. About 3000 carloads were handled out of Sandusky besides the huge amount which was stored.

Business at Sandusky has been good for the first two months of 1922, both months showing a nice increase over the same period of 1921. Prospects for spring look good. Our stone and sand shippers are figuring on a good year in road building.

Things we would like to, but never see; in Sandusky office.

The late W. A. Johns

"Mick" without his hat; "Joe" without an argument; "Charlie" smoking; "Jake" without his Beechnut tobacco; "Fred" with nothing to do.

"Jake" spent two weeks last fall in New York. While there he visited the Bowery

where he saw people so tough that they played tiddledy wink with the sewer covers.

"Mick" says to beware of the following months: they are unlucky in which to get married: January, February, March, April, May, June, July, August, September, October, November, December. He has kept away from them.

Allen Kroft, towerman, Sandusky, is passing out the cigars. Friend Stork left a seven pound boy, born on Washington's Birthday. He surely ought to be a great man. We extend our congratulations.

Such a dainty little Miss is Ruth the two year old daughter of Yard Clerk H. R. Ronehouse. We certainly will have to give this picture the sobriquet "Cupid."

Note our pretty pictures of the ice at Sandusky, on this page.

Marietta, Ohio

Correspondent, S. B. HENDERSON, Agent

Veteran Engineer G. W. McClure is still confined to his home because of illness.

Freight House Foreman Mickle is again on duty after a bad spell of grip.

We have three new faces in the Freight

ALONG THE NEWARK DIVISION

Pictures 1, 2 and 3 show how the ice piled up at Sandusky last winter. All nearby railroad lines were supplied from this crop. 4. Little Isabel Grimm, granddaughter of the general yardmaster, Newark. 5. Freight Agent W. O. Stockwell, Mansfield, O. 6. Part of a train of 20 or more cars from the C. & G. Cooper Co., on the way to Casper, Wyo.

Agent's Office; Chief Clerk G. R. Steen, Utility Clerk C. V. Brangham and Way Bill Clerk J. M. Reed. We welcome them into our midst.

February 22 was a gala day in Marietta. With a monster Good Roads meeting on hand, the city was honored by the presence of Governor Davis, State Highway Director Herrick, Secretary of State Harvey Smith, and other notables from over the state.

In the evening the Marietta Chamber of Commerce gave a banquet (an annual affair), and the Baltimore and Ohio was represented by General Passenger Agent George W. Squiggins, Division Superintendent H. G. Kruse, Division Freight Agent E. N. Kendall, and Traveling Freight Agent E. C. Doudna. This day saw the return of the Marietta and Vincent Railroad to the Baltimore and Ohio stations. The party came to Marietta with four coaches loaded, the Reilly boys in charge. They were piloted by Road Foreman of Engines R. A. Vernon. Conductor Schilling was in charge of the welfare of the party.

Mansfield, Ohio

Correspondent, C. R. STONE

There seems to be a good outlook for increased business at this station judging from the following:

The new Open Hearth Plant of the Mansfield Sheet Tin Plate Company, North Plant, located on the Baltimore and Ohio, and on which work has progressed during the winter months, is now nearing completion. It is expected that the plant will be in operation in a short time. This will mean additional business and revenue for the Newark Division. We are looking forward to a nice inbound and outbound business.

The new plant of the Columbia Tire and Rubber Company located on the Baltimore and Ohio tracks, is now in operation. The plant is on full time basis and it is predicted that the volume of business of this company during the present year will amount to approximately \$3,000,000 and that they will market one hundred per cent. production. This means that there will be a nice in and outbound business from this source.

Recognizing Mansfield as the best city on Newark Division, from the standpoint

of production of business, we always endeavor to cooperate with the manufacturers in regard to their orders for car equipment and to do our best to fill all orders.

Mansfield's position as a manufacturing city is clearly shown in summary for the cities of Ohio in statement of the census bureau of manufacturers. But three Ohio cities, Akron, Marion and Columbus, showed a larger percentage since preceeding census. Mansfield's increase in value of products was 210 per cent. This is one of the many reasons why the Newark Division of the Baltimore and Ohio is maintaining its position, to the delight of employer and employees.

The Think and Act Drive and its purpose have taken possession of the men at this station, and the Railroad and the public are both enjoying the benefit. As a result of this continuous drive, Loss and Damage is being reduced to a minimum. This drive is causing the men to think and act and to use their best judgement in the handling of fragile, as well as other articles; the result is being noted and comments are being made in the same way as was noted during our Perfect Package Drive.

The correspondent at this station is endeavoring to put Mansfield to the front in the columns of our MAGAZINE, and will welcome any information from any of the departments at Mansfield. With this greeting to the magazine readers, I wish you all good luck:

What boon shall I ask for?

A few friends to assist me,
The green earth around me,
A bright sky above me.

Give me the true friends,
Who will assist me,
In the Winter's dark hours,
As in Summer's bright day.

Allow me to introduce to the Baltimore and Ohio Family, W. O. Stockwell, our hustling freight agent, who is always looking after the interests of the Railroad. When in Mansfield, if you are looking for some one to show you around, just drop in on Agent Stockwell, who, I am sure, will be glad to render you any assistance possible.

Mt. Vernon, Ohio

Correspondent, J. R. PRICE, Agent

Third Trick Operator E. J. Lett has been off duty for several weeks because of illness. We are glad to hear that he is improving and hope to see him back in the harness soon. Mr. Lett has been in the service thirty-eight years.

The C. & G. Cooper Co., Mt. Vernon, Ohio, has made a shipment of twenty some cars of machinery and stationery engines to Casper, Wyoming. These shipments moved via Chicago and C. & N. W. and made excellent time both over our line and the North Western. The shippers were well pleased with the handling of this machinery. The accompanying picture shows nine cars loaded and ready to move to Chicago.

Barnesville, Ohio

Correspondent, F. B. AULT

After an illness of short duration, Allen Stubbs, section foreman, Barnesville, Ohio, passed to his reward on January 12. Mr. Stubbs entered the service of the Baltimore and Ohio as laborer in June, 1889, and was soon made section foreman on the C. O. Sub-Division. He continued in the service in this capacity until a short time before his death. He was a man well liked by all his fellow employes and friends. He is survived by a wife and five children. We extend our sympathy to the widow and family. The accompanying photo shows Mr. Stubbs and his six year old son, William.

Every Fireman Needs This Course

THERE is only one sure way to move over to the right side of the cab and get that position as Engineer, and that is to prepare yourself to pass the Progressive Examination with a high mark when your turn comes.

Don't trust to luck or to your ability to "pick up" the knowledge you need. For you may find too late that you didn't pick up enough to enable you even to "get by," let alone pass with a high average. And failure to pass means a black mark against your record and the loss of valuable seniority rights.

The International Correspondence Schools will teach you all you need to know about the modern locomotive; boilers and their appurtenances; construction and operation; all about grate area, and the evaporation of steam; valve motion and the running gear of a locomotive; injectors and other auxiliary attachments; and the air-brake equipment on locomotives and cars.

Yes, and you can get this knowledge in the quiet of your home, by devoting an hour a day in the spare time that you now waste.

Just mark and mail the coupon printed below, and without obligation or a penny of cost, get the full story of what the I. C. S. can do for you.

INTERNATIONAL CORRESPONDENCE SCHOOLS BOX 8508-B SCRANTON, PA.

Explain, without obligating me, how I can qualify for the position, or in the subject, before which I mark X.

Columbus, Ohio

Assistant Correspondent,
MISS EDITH ROACH

Blood poisoning caused the death of Thurman Shively on March 2, poison being traced to a defective tooth. He will be remembered by many friends as having been in the service for a period of ten years, leaving the service one year ago because of poor health. He leaves a wife and daughter to mourn him. The sympathy of the clerical forces is extended to the widow and daughter.

The Get Together Club celebrated the birthdays of the Misses Edith Roach, Hazel

Casher and Marie Brink during the month of March, by entertaining them with a dinner and theater party. They still tell their ages.

Miss Kathryn Funke entertained the sewing club on February 28. We have a few new members.

D. H. Reese, rate clerk, has been promoted to rate clerk in the Division Freight Agent's Office, Newark. We are sorry to lose him, but we wish him success in his new position.

New Castle Division

Correspondent, J. A. JACKSON

The Baltimore and Ohio Basketball team rang down the curtain on the season of 1921-22 with an elaborate banquet, served in the private dining room of the Knights of Columbus Club, on Tuesday evening March 14. Superintendent D. F. Stevens was the principal speaker of the evening, and his remarks were interspersed with bits of humor, and personal anecdotes that proved highly entertaining. He left one thought with us. The team, representing the Baltimore and Ohio, he stated, should carry out the motto of President Willard, which is, "BE A GOOD NEIGHBOR." That said Mr. Stevens, is all we could hope and ask for. If you are a good neighbor in sports, a good neighbor in business, your life must necessarily be clean, your play above reproach, and success assured, whether on the athletic field or in the business office or shop.

Sheriff W. G. Andrews, one of the best known and most prominent athletes in New Castle, spoke on the athletic activities in the city, and Harry Day, physical director of the Y. M. C. A., gave a resume of the

activities of the City League and its prospects for next year. He also paid a tribute to the Baltimore and Ohio players for their clean sportmanship, and the excellent showing they made in the City League. Captain Suber responded to the toast, "Our Team," and thanked the players for the hearty co-operation during the season, predicting a better showing in the league next year. Captain Suber then presented Superintendent Stevens with a beautiful framed picture of the team, which was highly appreciated by the recipient. Music for the occasion was furnished by the "Dixie Jolly Seven," and a vocal solo rendered by Thomas J. Cunningham, was a pleasing feature of the evening. The evening's pleasure was brought to a close when all joined in singing "The End of a Perfect Day."

Thomas Kersey, machinist helper, New Castle Junction Shops, is fast making his mark in the music world of this city. He has recently assumed leadership of the Dixie Jolly Seven Orchestra, one of our leading musical organizations. We know "Tom" will make good in his new duties, and we're all pulling for the best orchestra in town.

Just A Reminder

Saturday July 15 is the day and date for the annual picnic of the New Castle Division employes. The place is beautiful Brady Lake. The same capable committee that handled the picnic last year is in charge. This is an assurance that everyone attending will have a good time. Let's all boost for a bigger and better picnic.

One of the prettiest weddings of the early spring was solemnized in the marriage of Miss Beatrice Gaston, stenographer, Division Accountant's office, to James C. Glenn, chief clerk to the division storekeeper. The

ceremony was performed in the parsonage of the Second U. P. Church, with the Rev. A. J. Randalls officiating. It was witnessed by a few intimate friends and relatives of the bride and groom. A wedding dinner was served in the home of the bride, after which the happy couple departed on a honeymoon trip to the Pacific Coast. The bride is one of the most popular girls employed in the Division Office, and has a host of friends among the younger set in New Castle, being a graduate of the local high school in the class of '18. The groom also has a large circle of friends. He has been chief clerk to the division storekeeper for the past three years, and is an athlete of no mean ability, having played on the New Castle Division Baseball Team, as well as on the Basketball Team this year. He is a graduate of the Lonaconing, Md., High School in the class of 1916. After May 1 the happy couple will occupy their newly furnished home in New Castle. The best wishes of their many friends go with them.

Brakeman W. A. Seward and Conductor A. E. Ferguson, both residents of Painsville, Ohio, were visited by the stork recently. A baby boy was left at each of their homes. (El Verso's are now in order.)

Two and a half months of rough and ready basketball, hard training and no little fun were ended at the Y. M. C. A. on Monday evening, March 6, when the Baltimore and Ohio Five and the Shamrocks met in the game that was to decide the championship of the City League. The Shamrocks won out in the last few minutes of play, but not until the final whistle announcing the end of the game, did the hard fighting Baltimore and Ohio Five give up the battle. The game was one of the best seen on the local floor this season, and out of the din and roar of the large crowd of rooters who witnessed the

NEW CASTLE DIVISION BASKET BALL TEAM

Left to right, standing: Burnett, guard; Kocher, forward; Jackson, manager; Weiss, guard; Van Fossen, guard. Sitting: Eilbeck, guard; Suber (captain) forward; Buckingham, forward

conflict, could be seen the fighting figures of Captain Suber and his team-mates straining every ounce of muscle and energy in the struggle that meant the highest honors in the league, and the beautiful silver cup, which was donated by the "Y." The final score was 24 to 18 but the game was really closer than the tight score indicates. The Baltimore and Ohio Five took the lead early in the game, only to be overtaken by their opponents. From that time on, it was first one, and then the other, forging to the front, until the final few minutes of play, when the Shamrocks went into the lead not again to be overtaken. The teams were evenly matched, as each had won ten games and lost two in the league, and were never in any danger of being overtaken by the other four teams. The line up follows:

Baltimore and Ohio	Shamrocks
Suber,—F.	Hoskins,—F.
Buckingham—F.	Wadsworth—F.
Weiss—C.	Smith—C.
Kilbeck—G.	Thompson—G.
Burnett—G.	Coen—G.

Field Goals: Coen, 3; Hoskins, 2; Smith, 1; Suber, 2; Buckingham, 2; Weiss, 2.

Foul Goals: Coen, 12 out of 19; Suber, 6 out of 15.

Substitutions: Van Fossan for Kilbeck.

Referee, Herbst. Scorer, Sturdy. Time-keeper, Day.

Cleveland Division

Correspondent, A. E. BECKER

We are about to lose the services of our handsome yard clerk "Jack" Reilly, who no doubt, will accept the offer made by the Metropolitan Opera Company.

Chief Yard Clerk Gander recently attended a wedding and returned to work the following day with a black eye. Some wedding, eh?

Freight House Foreman T. O'Hara was much disappointed at the "Smoker" given the Cleveland Welfare Association because he was requested neither to sing nor to fight.

Miss Cartwright, Local Freight Office, was married to Mr. Arthur Rolof on February 18. The wedding was a quiet home affair. We all join in good wishes.

Wonder when the Christmas diamonds that appeared in the Cashier's Office will be supplanted by a carved narrow band?

We wonder if Mrs. Garvey liked the surprise gift which mysteriously appeared on her desk.

It's a sure sign of spring when you see the boys at Cleveland warming up for the summer hobby, "Indoor Baseball." We hope that Medical Examiner Church keeps enough liniment on hand to rub up the boys' arms.

We understand that "Ted" Southern, clerk, Car Distributor's office, has visions of a partner for the balance of his life. Of course, there is some uncertainty about this as "Ted" has made several changes in the date he expects to pull this stunt off.

We have heard a lot of "Sandhouse talk" recently about Chief Dispatcher "Pat" O'Leary, buying up Texas. There may be some truth in this for we know that he has practically bought enough oil stock now to own three-fourths of the state.

Things that never happen in the Cleveland Freight Office:

Gerry growing thinner
Pearl growing the other way
Miss Smith losing her dignity
Letitia without war-paint
John Disler without soap

The Baltimore and Ohio Novelty Orchestra, Canton, Ohio. Left to right: Earl Salisbury, cornetist; L. R. Warburton, cornetist, (manager); Ray Cordier, saxophone; Benjamin Schoma, drums; William Whitmer, banjo; Paul Myers, violin

George Trope running an adding machine "Sam" Holcomb breaking the speed law with his Maxwell.

The Baltimore and Ohio Welfare Association of Cleveland held its first annual smoker in the Swiss Club on March 10.

The affair was well attended and all expressed themselves as being well satisfied with the entertainment afforded and suggested that smokers be entered on the Association's social calendar as a regular affair.

On the program were seven boxing bouts, by amateur fighters from various stables in Cleveland, the music being furnished by the Musical Magpies, who proved beyond a doubt that for an affair of this kind, they cannot be surpassed. Local talent also entertained with songs and two of the members staged an expression of Gallagher and Shean.

The Athletic Committee of the Association, with E. L. Kimes as chairman, deserves much praise and commendation for the efficiency with which this affair was staged and the success attained.

Massillon, Ohio

Correspondent, W. E. BRUGH

Brakeman W. H. Heyer has been off duty sick for several weeks, but has been improving some lately. Good luck to you, "Whitie."

Conductor J. W. Griffin has been off sick for the last few months. We hope that he will soon improve in health.

We wish to express our sincere sympathy to Conductor A. E. Green and children. Mrs. Green passed away on March 16.

We are glad to announce the marriage of Passenger Brakeman Paul M. Carpenter on March 23. Spent a honeymoon down East, stopping off at Baltimore and Washington. Good Luck to you, Paul!

The following brakemen were employed recently at Massillon: H. H. Heiserer, Frank Ponn, Ralph Ponn and J. C. Mercer. We wish these boys much success.

Brakeman G. H. Brugh starts his garden- ing early in the spring. He has a small patch started under his nose. Some growth, too.

Agent L. T. Kegler and Ticket Clerk and Operator G. H. McCoy have been com- mended by Baltimore on the good condi- tion of the station and their excellent records. Good work, George and Leo!

Dover, Ohio

We desire to thank the Baltimore and Ohio Railroad employees for the floral offer-

ing and tender sympathy tendered us during our sad bereavement in the sudden death of our father.

(Signed) A. E. Ross, Sisters and Brothers.

Brakeman W. R. Case has entered the service at Dover, Ohio.

Brakeman J. A. Stapleton has been trans- ferred from the Toledo Division to the Cleveland Division, working out of Dover, Ohio. He is a brother to Conductor W. F. Stapleton.

Conductor Stang, on March 19, while checking his train at Piedmont, mis-judged the location of a creek bridge, and fell into the creek, injuring his back somewhat. Safety-First, "Dutch!"

Canton, Ohio

The accompanying picture is of the Baltimore and Ohio Novelty Orchestra, at Canton, Ohio. This orchestra was organized at the station at Canton in August, 1921, and its career, thus far, has been quite successful. It has filled engagements in the leading hotels and dance halls in Canton and in nearby towns. We are glad to publish this picture, for we are proud of our little band.

Chicago Terminal

Correspondent, T. H. WILLIAMS

Considerable interest is being displayed by employees all over the Terminal in the newly organized Baseball Club. This club consists of both male and female employees and to date the girls have shown a keen delight in the activities of the organization. The following members were elected to represent the Club for the year of 1922. M. D. Carothers, president; W. E. Buck- master, vice-president; C. E. Stuart, secre- tary; H. O. Wertenberg, treasurer; Wm. Kinnear, team manager; T. H. Williams, business manager.

The Chicago Railroad Baseball League has been reorganized, R. M. Irish being elected president, and William P. Hogan, secretary. Both of these are Chicago Ter- minal employees. The League consists of teams representing the Chicago Passenger Club, Erie, Pacific Fruit Express, C. B. & Q., American Railway Express, Pullman Co., Pennsylvania and Baltimore and Ohio Chicago Terminal. It has been sometime since the ball players have been entered in an organized league and the team we had last year showed such good form that it seemed a shame to be playing promis- cuously. For this reason the Club was formed with the intent of putting a repre- sentative team in the newly organized League, and we have no doubt that the outcome will be a record to be proud of, as there is considerable material of big league caliber in our midst.

While baseball will be the big feature of the Club it will, by no means, eclipse the social side. A Bunco Party and dance was given in the Stevens Building on February 17, which was attended by a large number of employees and their families.

If you have not received a membership card, be sure and do so as early as possible and join a live bunch for a good time during the coming year.

Yardmaster C. F. McKelvey, Whiting, has gone to Cuba to get some "asthmatic medicine." We think that a few bottles obtained there will cure "Mack," who has a chronic case.

It is with pleasure that we announce the promotion of C. H. McCreary, chief clerk to Storekeeper Dawson. Mr. McCreary has been appointed division storekeeper at South Chicago. While we are sorry to lose

Master Robert Kenneth Mattingley

"Mac" from our midst we feel sure that he deserved this promotion as he was one of our most faithful and progressive young men, and we are sure that he will make good and receive further promotions.

The accompanying picture is that of Master Robert Kenneth, son of General Car Foreman "Ed" Mattingley. "Ed" says that although he is only four months old, he is night foreman in the home.

There was a great commotion around the Grand Central Station a few mornings ago when it was learned that General Traffic Manager S. A. Allen was to arrive with his new bride from New York. A few hours further notice and there would have been a larger crowd than Marshall Foch had. The boys tried to get a band as it was.

The latest question around the Grand Central Station, is, "Why has 'Doc' Hughes been wearing the red necktie lately?"

From the way Assistant Road Foreman of Engines Nels Carlson attacks the bottle of Twentieth Century H₂O every time he comes to the Superintendent's Office, it looks like the Federal officers must have put East Chicago somewhere in the Sahara Desert.

Veteran Examiner C. L. Hegley is much interested in reading about the "Boulevard Vamps." He is thinking of buying a one-seated Ford to keep out of trouble. Although "Charlie" is about 70 years old, he still sits among the live wires.

Miss Cordt, Superintendent's Office, is not only an accomplished stenographer, but she is possessed of magical nursing qualities; in fact we have been convinced that she was better than a trained nurse. Probably she has been in one of John Dill Robertson's nursing classes.

How does Johnny Hajek, file clerk and stenographer, Superintendent's Office, with his Rudolph Valentino teeth and his Charlie Chaplin feet, keep out of the movies?

We wish to extend our deepest sympathy to Homer Sextor, air brake inspector in the Lincoln Street Coach Yard, in the loss of his sister and brother, Grace, age nine, and Walter, age eleven, who were burned to death in their home at 2213 West 13th St. The accident took place on the night of February 14, and was caused by the explosion of an oil stove. Both children died shortly afterward. Homer Sextor was badly burned and is still off duty on account of his heroic efforts to rescue the children from the flames. This he did, but they were so badly burned that no hopes were held for their recovery and death claimed them within a short time.

(Signed) Lincol'n St. Employees

I wish to thank all employees of the Baltimore and Ohio Railroad and all others working in the Lincoln Street Yards and Depot Men, for their utmost kindness during the most trying and saddest time of my life.
(Signed) Homer Sextor.

Switchman A. J. Nichols, son of Former Superintendent J. L. Nichols, Cicero Ave. Yard, is the proud father of a daughter, Beverly Ellen, born on February 26; weight seven pounds, four ounces.

Accountant D. C. Gilbert, Stores Department, has been appointed chief clerk to storekeeper, vice C. H. McCreary, promoted.

While sections were changing rails on the Main Line at Harvey a short time ago, every ten minutes, Section Foreman Bargholtz would get scared and call up the I. C. towerman to find out if there was a train coming. The rails were changed about two blocks south of the freight office and Bargholtz kept us guessing all day long with his running back and forth with a speed of at least 50 miles an hour. We were going to tell him several times to cut down on the speed, being afraid a traffic cop might run him in, but by the time we could get to the office door, he was a block away from the office again.

Here is a secret: Ssh! Mr. Wilhoit told "Charlie" Bender the other day, confidentially, that his home town, South Holland, would join the League of Nations. Mr. Bender did not whisper a word.

The Glee Club has been abandoned for the summer, as Superintendent DeVeny considered that the room in which it was being held was entirely too warm. If any of the members desire further information in regard to when the club will resume, they should call on the chorister, "Mike" Carothers.

South Chicago

Correspondent, ESTHER SPREENBERG

The accompanying photograph is of little "Buddy" Lester, son of Brakeman and Mrs. John Lester, 2852 East 91st St., South Chicago, Ill., who was the winner of first prize in the Prize Baby Contest held recently at Ascher's Theatre.

Prize Winners Two—"Buddy" Lester and "Billie" Corfield

"Buddy" was presented with a Diamond Set Locket, valued at \$100.00 and held first place with a total of 237,533 votes.

Mr. Fein of the Fein Studios presented "Buddy" with an oil painting of himself, a reproduction of the accompanying picture.

Little "Bill" Corfield, son of Mr. and Mrs. William Corfield, and grandson of Conductor and Mrs. Olin Mann, was also a winner in this contest—taking seventh prize. "Bill" led the other contestants a "merry chase" and finished with approximately 136,000 votes.

South Chicago, and especially the Baltimore and Ohio, can be justly proud of these two prizes. There were 119 contestants in the race—and we are proud of both of ours.

There may be a depression in business at some points, but not at South Chicago. There seems to be more than plenty to keep us busy at all times. As little "Izzy" said, when asked how many seasons there were in a year—"Two—Slack and Busy." We have only one here—"Busy."

William Rosenthal is again in the lime-light. A car of asphaltum was received here consigned to a certain company on a competing railroad. However, Mr. Rosenthal called consignees and prevailed upon them to take delivery of car at 14th St. and Robey Team Track on the Baltimore and Ohio Chicago Terminal, thereby saving the Company, in actual figures, \$90.20. Mr. Rosenthal is chief reconsigning clerk, South Chicago, and deserves considerable credit for action taken in the handling of this car.

Ohio Divison

Correspondent, A. E. ERICH

G. P. Mallow, sectional stockman, Stores Department, is the proud father of a nine pound girl, which arrived at his home February 13.

J. W. Miller, car helper, joined the ranks of the benedicts recently. Best wishes to him for a happy married life!

E. G. Slater has been appointed signal supervisor, in place of E. J. Allee, deceased. We welcome Mr. Slater and wish him success.

Miss Lillian Flynn, stenographer, Master Mechanic's Office, who has been off duty for some time with a broken ankle, is back on the job.

Our sympathy is extended to operators W. E. and W. H. Littlejohn, in the recent death of their father.

Philip Hixson, clerk, Division Accountant's Office, stole a march on his friends of the office by slipping over to Covington, Ky., to be married, on February 17. A beautiful set of silverware was presented to the happy newly-weds by the accountant's office force. After the presentation, the customary speech was asked for, but all "Phil" could say was "I can't talk." Congratulations and good luck!

The stork paid a visit recently to the home of O. R. Smalwood, electrician, leaving a boy; he also left a boy at the home of Machinist Lester Hayes, and another with Stock Room Attendant Glen Mallow. Congratulations and best wishes for the future health and happiness of these young gentlemen!

Try to Beat This Record

E. O. Brown, firing for Engineer W. Cadden, train 12, engine 5105, Chillicothe to Parkersburg, on March 1, voluntarily kept record of scoops of coal used on the trip. Information furnished by him indicates that he used 360 scoops of coal. Allowing fourteen pounds for each scoop, this would average 7.42 pounds of coal used per passenger car mile. *Save fuel, it can be done!*

R. H. West, clerk, Dispatcher's Office, is the proud father of a nine pound boy, born on March 4. The young man has been given the name of Richard Harrison. Congratulations!

We regret to report that Fireman S. W. Crowe is in the hospital at Portsmouth, Ohio, suffering from blood poisoning, caused by a bruise on his right hand, which he received when hooking fire on engine. We hope for his speedy recovery.

Machinist Earl Drury, has taken unto himself a permanent helper. Best wishes!

Fireman W. R. Bean, has also joined the ranks of the benedicts. Congratulations!

The Safety Agent "Sez:"

Just think how much it would mean if every railroad man would prevent only one accident a year. After an accident has happened, we often see how easily it could have been averted. Let's think how an accident MIGHT happen to us, or the men working with us and then DO the little thing which will avert it. It doesn't require any big effort, or take much time. *"Get the Safety Habit,"* the rest will be easy.

Our meeting of the Division Safety Committee was well attended on March 6, at Chillicothe. Many items of interest were brought up, and almost all the old items were reported as corrected. At the conclusion of the meeting, a representative of the Passenger Department, Thomas J. West, division passenger agent, gave an interesting outline of the proposed "All-Expense Tours to Washington, D. C.," which his department will organize for the coming summer. Members of the Safety Committee present were much interested in the proposition and will co-operate with the Passenger Department in an effort to make these tours a grand success.

We extend to Brakeman J. S. Thompson our sympathy in the loss of his wife, who died March 10.

Brakeman H. L. Young, while releasing

Water Station Foreman T. A. Carr, "all dolled up" in his new Odd Fellow's uniform

brake on a car at Loveland, slipped and fell, breaking his right wrist and dislocating two bones in his arm. His fellow-workers hope for his speedy recovery.

Toledo Division

Correspondent, EDWARD M. MANNIX

East Dayton, Ohio

"Say it with Efficiency always, for well we know that Merit wins."

Slowly but surely, Old Man Business is rounding into form. From reports of our Main Line and Wellston Divisions, it begins to look like old times.

Mr. Clarence Greer, one of our prominent citizens of Dayton, Ohio, was recently solicited by the writer to try the Baltimore and Ohio on his business visits to Louisville, Ky. Later, when asked how he liked Our Road, he replied: "The best you bet, I've ridden on yet."

We don't very often get to see Master Mechanic A. E. McMillan; his jumping between Ivorydale, Hamilton, Lima and Toledo proves that he has a man-sized job. I guess we'll have to get "Mac" an air-ship.

Our old friend Charles Lough dropped in from Benwood, West Virginia, a few days ago to see the old faces at the roundhouse. He surely looked the picture of health and the boys were glad to see him. Come again Charlie, old scout.

The word "Efficiency" surely means something in the Division Accountant's Office, for under G. B. Spencer's personal supervision and that of Chief Clerk Joseph Fortman, the office will compare favorably with any on our system.

We are certainly proud of our Baltimore and Ohio Veterans and their representation. Dayton wants you to know that the latch string's always on the outside to you and yours. Come often.

Assistant Night Round House Foreman Edward D. Phillians has been transferred to Washington, Ind. We regret to lose you "Ed," although we feel that Washington has gained. Our good wishes go with you for your success in your promotion.

I used to get a few notes occasionally from our old friend, "Bill" Crist, chief dispatcher, but now I cannot blame him for not writing; a look into his office recently

convinced me that he was about as busy as a man as we have on our division. Much obliged just the same, "Bill."

The accomplishments of the Safety First and Fuel Saving Committees ought surely to set an example in railroading, for nowhere on our system is there any more interest taken than that displayed by members of these committees.

With the opening of the spring trade, and the clouds of depression gradually disappearing, we will find the good old Baltimore and Ohio away out in front, ready for emergency, and a safe prediction that she will get her share of the business that is bound to come. Remember:

"We are shining up the harness
And we're rubbing down the mare,
For we're going to get the business,
If there's any business there."

Lima

Correspondent, RAY GARRIGUS

Mister Editor—Well, Ed, I suppose you are just dying with neither curiosity nor impatience to know all about that Toledo Division crossing accident campaign, so I am going to get right at the matter and have it done with. You see, Ed, we've got a trainmaster at Lima, who, besides running trains, can also throw a mean line of safety stuff. Well, this trainmaster puts a picture machine in a department store window and from the way the crowds collected you'd have thought there was some one trying to sell 'Green River' for two bits a quart. How the soever, be that as it was, the crowds sure took in those safety pictures like a fish takes a hook. And speaking of fish, Ed, our local followers of the late Mr. Ike Walton are already getting out their lines, for spring's golden smile floods the city and brings up visions of lazy streams singing on beneath the cool shelter of overhanging boughs. "Andy" Waller spent an evening digging in the back yard and Harry Disman was in Lakeview a few days getting the cottage in shape for the season.

Well, Ed, the old place has changed considerably since you was here the last time, as the constable said to Jason when he hauled him in for drinking too much hard cider. There's a new recipe going around that doesn't call for raisins and they've put two hundred and fifty men back to work. Just like old times, eh, Ed? This shop sure puts out a wicked 2423M now. And there's several new faces around too. When you come around again don't let me forget to give you a knockdown to Mr. Jones. Mr. Jones is the original live wire even if he did come from—, well what's the difference where he came from but we all know by this time that Jesse tacks a mean C. & O. card.

Well, Ed, business has increased by leaps and jumps and I haven't had time to follow my chosen profession of news gathering much farther than the south end of the planing mill. How the so ever, I did a little bit of investigating around the storehouse and I discovered what causes that mile away look in Isabel Goebel's eyes. It was a difficult case at first but my natural ability as a detective soon brought out the facts of the case. It seems that friend Jack was called out of the city and has forgotten to write. Also I discovered that our mutual friend, Mr. Britt, is now on a visit to Baltimore, a slab you might have heard mentioned a couple of times in the newspapers in connection with oyster advertisements.

But be all that as it was, Ed, I've found the luckiest man in Lima. He's so lucky that if he stepped off the top of the Central Building, he'd fall up! His name? Why you remember Ed. Brennan, don't you?

Yes, it's the same Ed, that had the bad luck with those last 24 bottles. Well this guy Tom's he's a card player but if he is then I'm the Grand Duke of Alabama. Last night he stacked the cards at the Veteran's meeting. Well, Ed, the prize was a pair of hand painted pillow cases. Brennan had then safely tucked away when Dr. Hutchinson got right up before the meeting and gave a 20 minute talk on the blessedness of giving. It seems that Brennan got a weak heart and let the pillow cases be auctioned off for the benefit of the Association. Now, Ed, as you no doubt know, Dr. H. sure does waggle a wicked tongue, and Mrs. H. was convinced that Brennan parted with those pillow cases rather unwillingly. So the next day Mrs. Hutchinson painted a new pair and gave them to Brennan. Well, Ed., that episode was the talk of the shop, and the straw that cracked the camel's back as far as Brennan and the card players were concerned. Hereafter some one else is going to furnish the deck and also see that the cards are shuffled before the game starts. But speaking of Dr. H. reminds me of insurance. I see in the papers that the Yanks have insured Babe Ruth for a paltry two millions dollars. I suppose they are afraid that the Babe will die laughing every time he gets his pay check, eh, Ed?

Well, Ed, that's about all of the scandal I've been able to uncover in the last week, being too busy even to pay my regular visit to the Orpheum. But that reminds me. Tell all the boys that I've still got that \$11.14.

So that's that until next week.

Yours till Niagara Falls,

Garamurel.

It is with deep regret that we chronicle the death of William Finn, car inspector, who died after an illness of two years. Mr. Finn was in the service of the Company for eight years. We extend our sincere sym-

pathy to the family and relatives in their bereavement.

We understand that Miss Edna Black of the freight office force is the owner of a new car with white wire wheels 'n everything. Congratulations, Edna!

Better Times

Keep smiling. Better times are at hand. Fundamental industries are reviving. Prices of farm products are rising, along with stocks and bonds. Money is plentiful and interest rates are falling, furnishing capital for new enterprises. Wholesale buying is speeding up along many lines, to fill empty shelves. Consumption is growing. Foreign exchange has risen remarkably, promising a better foreign market. And best of all, railroad traffic is gaining. We all know what that means. Keep smiling.

Division Accountant's Office, Dayton, Ohio

Correspondent, GERTIE MAE MCBRIDE

New kind of "ore" discovered in the Division Accounting Office at Dayton, "Elm-ore." We understand Mr. Chamberlain is using this "ore" to good advantage on account of its sterling quality.

"Quoted"

Where can a man buy a cap for his knee?

Or a key to the lock of his hair?

Can his eyes be called an academy—

Because there are pupils there?

In the crown of his head

What gems are found?

Who travels the bridge of his nose?

Can he use, when shingling the roof of his house,

The nails on the ends of his toes?

Can the crook of his elbow be sent to a jail?

If so, what did he do?

How does he sharpen his shoulder blades?

I'll be hanged if I know, do you?

Veterans' Banquet; the graceful swing of Mr. Spencer's dancing (we heard a good dancer say so), and the pleasant smile of Superintendent R. B. Mann.

The accompanying picture is that of our Baltimore and Ohio girls getting acquainted with operations at the shops at Lima. Reading from left to right: Mrs. William M. Maus (wife of our inspector of accounts), the Misses Jesse Munch, Gail Hoskinson, Francis Townsend, Gertrude Hutzel, Mary Myers, Luella Clayton, Gertie Mae McBride and Mary Blandford.

Joe; Aphro, where did you get your hair cut?

Theis: At the barber shop.

Joe: What did the barber have against you?

Now that spring is really here let's open the windows wide and let in the good fresh air; wear a smile from ear to ear; work like sixty, and thus ward off that spring fever germ.

We are glad to welcome into our midst Jacob Bowsher—a willing worker and one who enjoys his work.

Recently, we heard that Charles Martz said he wasn't going to make a date with any of the fair sex during the year 1922 as he wanted to save some money. We notice, however, that he still gets his hair cut and shaves same as always and really appears quite nifty. Saving anything, Charles?

The Maintenance of Way Department can no longer be accused of being the Juvenile Department, as our assistant accountant, "Dan" Kinninger, celebrated his twenty-first birthday on March 7; and Miss Myers, the pretty stenographer, has grown much older since purchasing a new "red bonnet," all by herself.

Baltimore and Ohio Ramblers Win Close Game

The Ramblers defeated the Carlises in a hard-fought game recently at the St. Andrew's parish house by a score of 23 to 20. The Carlises were on the long end at the close of the first half by the score of 14 to 6, but from the beginning of the second half our boys started to increase the score rapidly. By the time the game was over they were in the lead. The winning was due to the excellent playing of our entire team. The line-up and summary:

Baltimore and Ohio, 23. N. C. R., 20.

Hartman.....	F.....	Lehman
Morrissey.....	F.....	Sachs
Becker.....	C.....	Sherlock
Theis.....	G.....	Stanley
Kinzig.....	G.....	Bradford

Substitutions: Stoecklin for Theis; Harker for Morrissey; Hartman for Myers; Black for Bradford; McMullen for Lehman. Field goals: Becker 7; Harker 2; Hartman 1; Lehman 2; Sachs 1; Sherlock 5; Stanley 1. Foul goals: Hartman 3 out of 4; Sachs 2 out of 3.

It is noted by many that the Ramblers are beginning to Ramble.

White's soliloquy: "Let me see how many erasers did I have on March 1?"

The accompanying is that of "Bobbie," son of Howard White of our office.

On March 12, a through line service was established on the Toledo Division, from Detroit, Michigan, to Louisville, Kentucky. The service is complete with diners, parlor cars, sleepers and drawing room.

Owed to the "Beano"

(Continued from last month)

And Mary Blandford, trim and neat, no better girl you'd care to meet—with only

Baltimore and Ohio girls of Dayton, inspecting operations at the shops at Lima
Left—This little youngster's daddy is Howard White, Division Accountant's Office, Dayton

Can he sit in the shade of the palm of his hand?

Or beat on the drum of his ear?

Does the calf of his leg eat the corn on his toes?

If so, why not grow corn on the ear?

Now that we know for a surety that spring is near—absolutely—Mr. Fortman is cleaning house. Talk about making a good start for the New Year, he has every housekeeper in Dayton beat. He certainly is making things look spick and span in the Division Accounting Office.

Did you see the new car the boss has purchased? You didn't? Well, you ought to see it. Some car! If you don't believe it just have him pick you up in it. Maus says it's a dandy and he ought to know. He's an inspector.

Two things were conspicuous at the

one fault, so they say, that Mary's sure to have her way. She knows M-W from A to Z, 'cept running a handcar on inventory.

And quiet, unassuming Dan—though slender and small, he's quite some man—he'd work all day and half the night that he might know his accounts were right.

Another is noted for eating pie—no other clerk can with him vie; though small of stature, and cleanly of face, when Conn's eating pie—he has no grace.

Now Payne's a handsome fellow—bald-headed though he be—on tonnage he's a gnat—that's why he's there you see.

Of other talents we surely can boast, and chief among these—our singers foremost. There's Sara who sings in a modest way and Luella who warbles almost all day.

There's Roehm who speaks of his children as "kids" and when kidded for it he lifts the lid and enlightens you thus with pride and joy—"the reason is well they are just boys."

And honest, conscientious, good-natured Jess—her many good qualities need no stress; she's quiet, constant, true and kind and none more loyal can you find.

At one of our desks is another tall gent who to switchmen's time has his energies bent. None other than Pud with his Irish smile, working constantly all the while.

Then, too, there's Fox—that sly old jay—with beautiful ladies he's never at bay, but when his mind turns to accounting says he, "I'll never let anyone buffalo me."

In M. P. are "Rosies" and "Eddie's" and "Josies"—mistakes with them aren't in it. Keen boys they are too and help the C. O. to the limit.

There's a rat-a-tat-tat in the office all day—and who is it now who is working this way—with speed in her fingers and brains in her head—'tis no one but Gertrude Hutzel, 'tis said.

Direct your attention to the M. of Way, over whose time sheets Kinzig holds sway—with Slim and Martz both steady and kind—no more earnest workers will the BEANO find.

Walt Myers is plugging in dirt real estate, and of his purchase is proud to relate, how folks can save he chants all of the while, into the Saving's Fund friends to beguile.

There's a shy little blonde with eyes of sky blue, who to her task vows she'll ever be true. 'Tis Mary Myers I hear somebody say—Oh yes it is Mary—in the Maintenance of Way.

Prizer sits tight at his desk all the day, counting up tonnage in an humble way, while Medford on income tax ne'er will relax until he can send you that little white sheet that reminds you there's tax on your income to meet.

And last there's "Gene"—he's here and he's there—in fact I might say he's most everywhere—no matter where there may be work to do, "Gene" will stick 'til he sees it all through.

(To be continued.)

Kentucky and Indiana Terminal

Correspondent, J. L. SIGMON
Industrial Agent

Crossing Flagman and Mrs. Ross Reddish, 623 North Thirtieth Street, Louisville, Ky., were married on March 12, 1872. They celebrated their golden wedding anniversary on March 12, 1922.

There were 75 persons at the wedding. Of that 75, eleven are now living. Three of these were present at the celebration. Mr. and Mrs. Reddish have both been school teachers in their days, both teaching 30 odd years. Mr. Reddish attended three years at the Southern Baptist Theological Seminary, with a view of serving the Lord as a minister of the gospel. Circumstances seemed to be against him and he drifted into the school room again, where he taught many years. Since then he has followed several employments.

Mr. Reddish was born in Nelson County, Kentucky, near Fairfield. Mrs. Reddish was born in Bullitt County, Ky., near Mt. Washington. They are both hale and hearty at present, and are looking forward to their centennial anniversary.

Mr. Reddish has been employed by the Kentucky and Indiana Terminal Railroad Company since August 16, 1916, as crossing flagman and toll collector.

Crossing Flagman and Mrs. Ross Reddish

In the Realm of the Riddle

(Continued from page 17)

conclusion that your interest is at best negative, in which case it would be hardly worth while to continue this feature. So right here and now we will organize the "Baltimore and Ohio Puzzler's Club" which everybody is invited to join with the assurance that there are no initiation fees or dues, and but few rules that all can readily understand and obey. Who's going to be the first to join?

And now I am going to give you some new puzzles and hope I may get a long list of solvers.

1. CURTAILMENT (7)

The days of happiness have ceased to be;
The tie that bound us once has now been broken;
TWO we had loved each other faithfully
The stern decree of parting had been spoken.

And so I gave him up, this friend of mine,—
Each ONE of it an arrow in my heart meant;
But yet my poodle had to heed the sign:
"No dogs or kids allowed in this apartment."

L. M. N. Terry

2. BEHEADMENT (5)

PRIMAL time I meet you
I admire you more.
FINAL shy, I greet you
PRIMAL time I meet you
As 'long the street you
Saunter to the store.
Primal time I meet you
I admire you more.

L. M. N. Terry

3. CHARADE (7)

Pat McFee was the foreman fine
Who bossed the gang on section nine.
Each morn he was wont to start the day
With an harangue that always went this way:
"Ef ye z'll hop on this TWO and lind a ONE
We'll be gittin this TOTAL on the run,
And see if we can't make siction nine
The finest track on the whole dum line."

Miss Fitts

4. CHARADE (9)

How dear to our hearts, is an old fashioned homestead,
When some blest occasion presents it to view:
The home-place, the orchard, the fields all about it
And all the loved places that are met with anew.
While down in the dairy, so sweet, so refreshing,
The milk pails are standing in bright shining rows,
And pure golden PRIMAL, so good and so wholesome,
Is placed where the spring in its limpidness flows.
Out in the garden the FINAL is buzzing,
And the drone of the bee is heard mid the flowers,
While COMPLETE is fluttering in sheerest enjoyment
From bright sunny meadows to cool leafy bowers.
So, bring back once more with all of its treasures
This vision of quaintness, this homestead so dear,
For with all of our present enjoyable pleasures,
There are none to compare, though we search far and near.

The Major

5. BEHEADMENT (5)

Over the mountain, across the plain,
Flashes and thunders the railroad train.
By the cities and haunts of men,
Out through the fields of FIRST again.
SECOND or sunshine, day or night,
Matter not in its tireless flight.
Bearer of happiness, woe or weal,
Girding the world in a band of steel.

Comrade

6. CURTAILMENT (5)

One day in a facetious mood
I asked my wife Marie:
"How does the furnace in our house
Remind you FIRST of me?"

I thought she'd give the riddle up,
And I would calmly state:
"Tis ardent, strong, reliable,
And strictly up-to-date."

But judge my feelings when she said,
And thought her answer bright:
"It smokes, is dirty, hard to run,
And goes out SECOND night."

Comrade

The numeral in parenthesis following the title to the puzzles represents the number of letters composing the whole word making the answer. For instance: The answer to No. 1 contains seven letters, No. 2, five letters, No. 3, seven letters, etc. This arrangement is quite a help to the solvers and is the common practice even among seasoned puzzlers. You will notice these puzzles are all signed with pen-names. L. M. N. Terry is Mr. Charles N. Crowder, a successful young business man of Baltimore. The Major is Mr. E. L. Bangs, an old Baltimore and Ohio employe who has, for many years, been deriving lots of pleasure and benefit from puzzling. Comrade is Mr. W. H. Powell, also a very successful business man of Baltimore. These three puzzlers are known wherever puzzles are made or solved. They have produced some brilliant work and it is quite an honor to have them as contributors to this page. They have purposely made these puzzles easy to solve but in some future issues of the MAGAZINE they are likely to submit problems that will cause you a deal of thinking. Miss Fitts is the pen-name of yours truly in puzzledom. Being a railroad man he had to write a railroad puzzle, as the answer, when you get it, will testify.

Now go to it, ye solvers, and let's see who will send in the first list of six complete answers. Address:

G. H. Pryor, Auditor Disbursements
Baltimore and Ohio Building
Baltimore, Md.

Death of Harry Allison

(Continued from page 23)

family, when sickness or trouble came, and spent considerable of his time in visiting such.

As a member of the Cumberland Division Safety Committee, Mr. Allison was a most active worker and his loss in this work has been beautifully memorialized by this Committee in a resolution passed at the Safety Meeting held March 14, 1922.

The late Harry Allison

The following resolutions were also passed by the Cumberland Chapter:

WHEREAS, in view of the loss we have sustained in the death of our beloved president and associate, Harry A. Allison, and the still heavier loss to those who were nearest and dearest to him; therefore be it

RESOLVED, that it is but a just tribute to the memory of the departed to say that in regretting his removal from our midst, we mourn for one who was, in every way, worthy of our respect and regard.

RESOLVED, that in our natural sorrow for the loss of a faithful and beloved president, we find consolation in the belief that it is well with him for whom we mourn.

RESOLVED, that we sincerely condole

with the family of the deceased on the dispensation with which it has pleased Divine Providence to afflict them, and commend them for consolation to Him who orders all things for the best, and whose chastisements are meant in mercy.

RESOLVED, that this heartfelt testimonial of our sympathy and sorrow be forwarded to the family of our departed friend, and a copy to the Baltimore and Ohio MAGAZINE, and a copy be spread on the minutes of our meeting.

H. L. NESBITT, Chairman,

M. J. FLEMING,

H. W. BLOSS,

Committee Baltimore and Ohio Veterans Association of Cumberland, Maryland.

Season's Final Record—Duck Pin League

The Baltimore and Ohio General Office Duck Pin League completed its schedule on the night of March 30. The season was a successful one and great interest was developed in the game. The following is the standing of the teams at the close of the season:

Section A

NAME	GAMES ROLLED	WON	LOST	PER CENT.	TOTAL PINS	TEAM AVERAGE
Auditor Merchandise Receipts...	8	60	1	.741	38169	471.2
Comptroller.....	81	55	26	.679	38630	476.0
Coal Traffic.....	81	51	30	.630	38315	473.0
Adjustment Division.....	81	46	35	.568	37684	465.2
Motive Power.....	8	45	36	.556	37745	466.0
Car Service.....	75	41	40	.506	34769	463.6
Purchasing.....	78	31	43	.469	36101	462.8
Engineer Account Bureau.....	75	26	55	.321	33680	447.1
Freight Tariff.....	81	24	57	.295	35641	440.0
Auditor Disbursements.....	72	19	62	.234	31796	441.6

Section B

General Freight Claim.....	81	63	18	.777	38791	478.9
Auditor Disbursements.....	81	56	25	.691	38085	470.2
Transportation.....	81	51	30	.630	37679	465.2
Auditor Passenger Receipts.....	81	47	34	.580	37981	468.9
Chief Engineer.....	78	44	37	.543	36080	462.6
Maintenance of Way.....	81	35	46	.432	36554	451.3
Engineer of Buildings.....	78	34	47	.420	36928	447.8
Fuel Agent.....	78	27	54	.333	34770	445.8
Valuation.....	81	26	55	.321	36368	449.0
Employment and Record.....	75	22	59	.271	33299	443.7

Individual and team honors for the season are as follows:

High Individual Score for one game:

Struth—Section A—Auditor Merchandise Receipts..... 146

Sauerwein—Section A—Coal Traffic..... 146

Collins—Section B—Transportation..... 146

High Individual Average for three games:

Fowler—Section B—Transportation..... 119.3

Gallery—Section A—Comptroller..... 116.3

High Individual Average for the Season:

Struth—Section A—Auditor Merchandise Receipts..... 101.8

Boring—Section B—Auditor Disbursements..... 99.0

High Team Score for one game:

General Freight Claim—Section B..... 551

Coal Traffic—Section A..... 541

High Team Average for three games:

General Freight Claim—Section B..... 511.7

Auditor Merchandise Receipts—Section A..... 510.0

A series of seven games was played between the General Freight Claim team and Auditor Merchandise Receipts team for the Championship of the League on the evenings of April 6 and 8, at Whiteford Hall, Irvington, and it was necessary to roll the seven games before the General Freight Claim team could be declared the champions. The general result of the contests follow:

	1st GAME	2nd GAME	3rd GAME	4th GAME	5th GAME	6th GAME	7th GAME	TOTAL PINS	AVERAGE
G. F. C.....	488	493	563	509	486	484	500	3523	503.28
A. M. R.....	489	476	501	502	506	532	485	3491	498.71

Why They Let George Do It

The house of the W. S. Tyler Company, of Cleveland, tells a story of three brothers, who left the farm to work in the city.

All three got jobs with the same company, starting at the same pay. Six years later one was receiving \$100 a month; the second \$200, and the third \$300. Their father, hearing of these salaries, decided to visit his sons' employer and find out why they were paid on what seemed to be such an unfair basis.

"I will let them explain for themselves," said the boss, as he pressed a button on his desk.

The summons was answered by Jim, who was receiving \$100 a month. "I understand the Oceanic has just docked," said the employer. "Please go down and get an inventory of her cargo." In three minutes Jim was back in the office. "She carries a cargo of three thousand sealskins," Jim reported. "I got the information from the first mate over the telephone." "Thank you, Jim," said the boss; "that will be all."

He pressed the button again, and Frank, the \$200 man, reported. "Frank, I wish you would go down to the dock and get an inventory on the Oceanic's cargo." An hour later Frank was back with a list showing not only that the Oceanic carried 2,000 sealskins, but that she also had 500 beaver and 1,100 mink pelts.

The employer pressed the button a third time and George, the \$300 man, walked into the office. He received the same instructions his brothers had received. George did not return for three hours, and the office had closed for the day, but his father and the boss were waiting for him. "The Oceanic carries two thousand sealskins," he began. "They are offered at five dollars each, so I took a two-day option on them, and I have wired a prospect in St. Louis, offering them to him at seven dollars. I expect to have his order tomorrow. I also found five hundred beaver, which I sold over the telephone at a profit of seven hundred dollars. The mink pelts are of poor quality, so I didn't try to do anything with them." "That's fine, George," said the boss.

Then, when George had gone, the employer turned to the father and smiled. "You probably notice," he said, "that Jim doesn't do as he's told, Frank does as he's told, while George does without being told."

Hamilton Watch

"The Railroad Timekeeper of America"

"My Hamilton enlisted in the 90's"

"I bought this Hamilton in the nineties and am still running trains by it", said Conductor Patrick J. Landy, the efficient Conductor who takes the fast mail No. 9 on the Chicago and North Western out of Chicago.

A feeling of affection is displayed by veteran Railroad men for their Hamiltons, a feeling that has been inspired by the unfailing service which the Hamilton Watch has given them under all the strenuous conditions of railroading. The accuracy and durability of the Hamilton Watch is the result of the skill and brains employed in making it the dependable servant of the Railroad man. "Quality First, to meet Railroad requirements" is the motto of the Hamilton factory.

The Engineers and Conductors who have been long in the service have tested and proven the accuracy and dependability of the Hamilton. To the younger generation of Railroad men we say

Own a Watch with a Service Record

The Hamilton Watch has been keeping trains on time for thirty years.

That is the kind of watch you need.

When you buy, inspect the Hamilton models that Railroad men favor, particularly No. 992 (16-size, 21 jewels). Hamilton Watches range in price from \$40 to \$200. Movements alone \$22 (in Canada \$25) and up. Send for "The Timekeeper", an interesting booklet about the manufacture and care of fine watches. The different Hamiltons are illustrated and prices given.

HAMILTON WATCH COMPANY

Lancaster, Penna., U. S. A.
